OUTLINE OF SUBJECTS

These subjects are listed in subject code order. As a cross-reference to codes, subjects are listed in alphabetical order by name in the list of subjects at the end of this section.
ACB110 ACCOUNTING I
This subject covers introduction to accounting, recording business transactions, adjusting, preparing financial statements, merchandising operations, accounting systems, specialised journals, cash, internal control, non-current assets, receivables, payables, inventories, sources and applications of funds, analysis and interpretation of financial statements.
Credit Points: 12 Contact Hours: 4 per week

ACB111 ACCOUNTING II
The aim of the subject is to give students a sound procedural and conceptual knowledge of basic accounting topics as a grounding for future studies. It covers partnerships, cash flow statements, introduction to company accounting, introduction to tax effect accounting, preparation of financial statements, alteration of share capital, issue and redemption of debentures, funds statements, investments, introduction to consolidations, analysis and interpretation of financial statements.
Prerequisite: ACB110 Credit Points: 12

ACB140 BUSINESS LAW
This unit is designed to introduce students to the impact of law on business. To do this, the unit deals with the components of the Australian legal system and with the judicial process - the way legal decisions are made. The bulk of the unit involves a study of contract law which is the most important area of law in commerce.
Credit Points: 12 Contact Hours: 4 per week

ACB180 ACCOUNTING FOR MANAGERS
This subject covers introduction to recording business transactions, preparation of financial statements, accounting for inventory control accounts and subsidiary ledgers, structure of organisations and company accounts, analysis and interpretation of financial statements, the managerial accounting costing process, cost accounting systems, standard costing and variance analysis, managerial accounting and decision making.
Credit Points: 12 Contact Hours: 3 per week

ACB181 ACCOUNTING INFORMATION SYSTEMS I
This subject introduces the functions, activities and structure of organisations and the basic concepts of information and decision-making; examines the nature and role of the two general accounting systems which are found in an organisation - the Financial Accounting Information System (F.A.I.S.) and the Managerial Accounting Information System (M.A.I.S.); and analyses the procedures and techniques involved in the F.A.I.S. and the management planning and control system.
Credit Points: 9 Contact Hours: 3 per week

ACB210 COMPANY ACCOUNTING
This subject is designed to examine certain issues in financial accounting, particularly related to companies. Both practical and theoretical aspects will be considered: company formation, accounting for company income tax (tax-effect accounting); liquidation; acquisition of assets (including companies); consolidated financial statements; equity accounting; and disclosure in company financial statements.
Prerequisite: ACB111 Credit Points: 12 Contact Hours: 4 per week

ACB220 COST ACCOUNTING
This subject is designed to provide an understanding of cost accounting terminology and concepts and to expose the student to costing systems and cost estimation techniques. The subject should provide a solid grounding for application in managerial accounting.
Prerequisite: ACB110 Credit Points: 12 Contact Hours: 4 per week

ACB230 FINANCIAL MANAGEMENT I
This subject introduces the topic of financial management. Particular emphasis is placed on establishing a theoretical framework that forms the basis for all the finance subjects offered in the degree. It encompasses certainty model; valuation; financial mathematics; capital budgeting; CAPM (Capital Asset Pricing Model); WACC (Weighted Average Cost of Capital); and introduction to the concept of risk: portfolio theory.
Prerequisite: ACB111 Credit Points: 12 Contact Hours: 4 per week

ACB231 AUSTRALIAN CAPITAL MARKETS
This subject is designed to provide the student with a thorough understanding of Australian Capital Markets; its institutions and its behaviour. On completion of this subject, students should be familiar with all parts of the Australian Capital Market place. In addition, financial market mathematical skills will have been developed.
Prerequisite: MNB232 Credit Points: 12 Contact Hours: 3 per week

ACB240 LAW OF BUSINESS ASSOCIATIONS
This subject examines the law relating to the establishment, operation, and dissolution of business associations. The forms of business associations studied include partnerships, joint ventures, trusts, companies and voluntary associations. On completion of this subject students should be able to identify and apply the basic principles of law in so far as they relate to the formation, control and winding down of the various business entities.
Prerequisite: ACB140 Credit Points: 12 Contact Hours: 4 per week

ACB280 HEALTH ADMINISTRATION FINANCE
The subject covers fund/accrual accounting, financial administration in Commonwealth and State Government, financial management in the health industry, financial analysis, planning and budgeting, working capital management in the health industry, health care performance and evaluation.
Prerequisite: ACB110 Credit Points: 12 Contact Hours: 3 per week

ACB281 BUILDING FINANCIAL MANAGEMENT I
This subject intends to develop an awareness of the accounting process and accounting systems in the Building Industry and to equip the student to make financial decisions using accounting data. It includes the nature of accounts, liabilities, and proprietorship; the accounting equation and balance sheet, ledger accounts and the double entry system, the accounting period concept, and profit determination. Different forms of ownership and the basic nature of taxation are considered. A coverage of budgeting follows.
Credit Points: 4 Contact Hours: 2 per week

ACB310 ACCOUNTING THEORY & PRACTICE
This subject is designed to introduce students to the nature and development of accounting theory, and to
develop students' understanding of Accounting Standards and their implications for practice. It includes the evolution of accounting theory; profits (determination and disclosure, revenue and expense recognition); assets (definition, recognition, measurement and classification); extractive industries; liabilities (definition, recognition, measurement and classification); leases; foreign currency translation; and joint ventures.

Prerequisite: ACB210
Credit Points: 12 Contact Hours: 4 per week

**ACB311 AUDITING**
Content: the audit environment; legal liability of auditors; professional ethics; study and evaluation of audit planning and programming, evidence, internal control theory and review techniques; audit program applications; revenue, receivables, cash, inventory; audit in EDP environment and evaluation of EDP controls; computer-assisted audit techniques, computer fraud, completion and review; the audit report.
Prerequisite: ACB210
Credit Points: 12 Contact Hours: 3 per week

**ACB312 AUDITING & PROFESSIONAL PRACTICE**
The audit approach; planning an audit; audit working papers; verification of the balance sheet and profit and loss statement trade debtors, inventory, non-current assets, cash, investments, taxation, capital and retained profits; audit sampling theory techniques and applications; and other issues of current professional interest.
Prerequisite: ACB311
Credit Points: 12 Contact Hours: 4 per week

**ACB320 GOVERNMENT ACCOUNTING**
Scope and approach: institutional framework, objectives, concepts and principles of government accounting, accountability, management control, budgeting; revenue and expenditure accounting; illustration of government accounting systems at all levels of government, comparative government budgeting and accounting systems; accounting information systems, internal audit and efficiency audit.
Prerequisite: ACB110
Credit Points: 12 Contact Hours: 4 per week

**ACB321 MANAGERIAL ACCOUNTING**
Development of budgets, responsibility accounting, special decision making, transfer pricing, VP Planner, case study exercises, variance analysis, investigation of variances, inventory planning and control, project planning and control and strategic management, agency theory.
Prerequisites: ACB220, ACB230
Credit Points: 12 Contact Hours: 4 per week

**ACB330 GOVERNMENT FINANCE**
The subject covers an introduction to government finance, sources of public income, public expenditures, investment and debt. Taxation objectives principles and Australian practices. Instrumentalities of economic accountability, intergovernmental financial relations, government finance and economic policy, new financial legislation and institutions.
Prerequisites: Government Accounting AND Managerial Economics
Credit Points: 12 Contact Hours: 3 per week

**ACB331 FINANCIAL MANAGEMENT II**
This subject is designed to build further upon the work in Financial Management I, particularly looking at the financial management of the firm. Topics covered include firm decisions regarding dividends, capital structure, working capital and leasing. Further topics include market efficiency, portfolio management, the nature and applications of options, takeovers and international finance.
Prerequisite: ACB230
Credit Points: 12 Contact Hours: 4 per week

**ACB332 PORTFOLIO & SECURITY ANALYSIS**
This subject is designed to make students aware of how Australia's financial markets operate. Both theory and empirical evidence are examined. The subject gives the students hands-on experience using Stock Exchange data, to calculate betas and form investment portfolios.
Prerequisite: ACB230
Credit Points: 12 Contact Hours: 3 per week

**ACB333 INSURANCE RISK MANAGEMENT**
This subject is designed to introduce students to the management of insurable risks. Content includes risk classification, measurement and analyses of risk, types of insurance policies available and the evaluations of an insurance program.
Prerequisites: ACB110, ACB230
Credit Points: 12 Contact Hours: 3 per week

**ACB336 INTERNATIONAL FINANCE**
This subject is designed to foster an understanding of both how a multinational firm operates and how international financial markets function. It covers international trade theory, international financial markets, overseas finance, exchange rate, risk management, international investment, legislation.
Prerequisite: ACB230
Credit Points: 12 Contact Hours: 3 per week

**ACB340 TAXATION LAW AND PRACTICE**
This subject deals with the elements that determine the income upon which a taxpayer is required to pay income tax pursuant to the provisions of the Australian Income Tax Assessment Act. The steps involved in the calculation of tax are also covered. Brief consideration is given to employers' liability to fringe benefits tax pursuant to the Fringe Benefits Tax Assessment Act.
Prerequisite: ACB240
Credit Points: 12 Contact Hours: 3 per week

**ACB341 COMMERCIAL & SECURITIES LAW**
In Business Law, students have a detailed exposure to basic contract law. In this unit such law is extended to specific types of contract which are commonly encountered in the business world, such as sale of goods, hire purchase, agency. In addition, other areas of law relevant to commerce are studied, such as bailment and negligent mis-statements.
Prerequisite: ACB140
Credit Points: 12 Contact Hours: 4 per week

**ACB342 COMPANY LAW & PRACTICE**
This subject is designed to flesh out and apply the conceptual principles of company law studied in ACB240 Law of Business Associations. Particular emphasis is laid upon the practical implementation of the accounting, auditing, meeting and managerial requirements of the Companies Code; the outworking of the law relating to insolvent and financially troubled companies; and the peculiar difficulties of
the takeover provisions and the protection of minority interests.

Prerequisite: ACB240
Credit Points: 12  Contact Hours: 4 per week

ACB343 TAXATION OF BUSINESS ENTITIES

This subject examines in depth the income tax treatment of the various business entities and classes of taxpayer, and introduces the principles governing the taxation of international transactions, the administration of taxation legislation, and the imposition of non-income business taxes.

Prerequisite: ACB340 Taxation Law & Practice
Credit Points: 12  Contact Hours: 4 per week

ACB344 TAXATION & PROFESSIONAL PRACTICE

This subject is designed to introduce students to the main decision areas in the management of finance and motivation, management of funding decision, client relationships. Content includes sales tax, stamp duty, payroll tax, workers compensation and land tax, tax planning, and client relationships.

Prerequisite: ACB340 Co-requisite: ACB343
Credit Points: 12  Contact Hours: 4 per week

ACB345 FINANCIAL INSTITUTIONS - LAW

This subject is designed to provide students with a basic knowledge of law relevant to the finance industry. It encompasses legal structures of banks and non-banks, banks customer relationship, Cheque Act, negligent advice, Credit Act.

Prerequisite: ACB140
Credit Points: 12  Contact Hours: 3 per week

ACB350 FINANCIAL INSTITUTIONS - LENDING

This subject is designed to introduce studies to the principles and practice of lending. On completion of this subject, students should be able to understand how loans are analysed in a banking environment, as well as having an appreciation for the legal relationship between financial institutions and their customers.

Prerequisite: ACB110
Credit Points: 12  Contact Hours: 3 per week

ACB351 FINANCIAL INSTITUTIONS - MANAGEMENT

This subject is designed to introduce students to the main decision areas in the management of finance institutions. Content covers strategic planning, managing interest rate risk, liquidity, capital structure costing services, performance measurement, responsibility accounting and motivation, management of funding decision, management of the loan portfolio and liquidity, differential cost analysis and transfer pricing.

Prerequisites: ACB230, ACB220
Credit Points: 12  Contact Hours: 4 per week

ACB352 COMPARATIVE FINANCIAL SYSTEMS

This subject introduces analysis for the operations of important overseas capital markets. On completion of this subject, students should be able to understand how the capital markets of our major trading partners operate.

Prerequisites: ACB231, ACB230
Credit Points: 12  Contact Hours: 3 per week

ACB360 COMPUTER SECURITY & AUDIT

This subject is designed to give an understanding of EDP controls appropriate in a computerised accounting system, the process of auditing such systems, and the use of computer-assisted auditing techniques. The subject covers the impact of EDP on controls and auditing, general EDP controls, EDP application controls, generalised audit software, static and dynamic computer-assisted auditing techniques, special EDP environments and computer fraud.

Prerequisite: ACB311 Co-requisite: ACB311
Credit Points: 12  Contact Hours: 3 per week

ACB380 LAW & COMMUNICATION

The subject covers the institutions of the law, ordering the law - public and private. The fashioning of law - cases, precedent, legislation, delegated legislation interpretation, facts and the law, legal reasoning, the law library, limits on freedom of expression - torts and crimes - defamation, obscenity, laws and regulations affecting advertising - broadcasting, television and press, contempt of court.

Credit Points: 12  Contact Hours: 3 per week

ACB381 PUBLIC ADMINISTRATIVE LAW

The aim of this subject is to ensure the student gains an understanding of the range of controls exercisable by common or statute law over governmental decision making processes, where the validity of such processes is not dependent on special constitutional considerations and where it does not involve a question of mere liability under the existing categories of tort of contract law.

Prerequisites: MNB181, MNB183
Credit Points: 12  Contact Hours: 3 per week

ACB382 INTRODUCTORY ACCOUNTING

The subject covers the accounting equation and the double entry principle, recording business transactions, end of period adjustments, financial statements and closing entries, accounting for merchandising operations, specialised journals and subsidiary ledgers, cash controls, accounting for partnerships, accounting for companies, interpretation of financial statements, setting up an accounting system for a legal practice.

Credit Points: 12  Contact Hours: 3 per week

ACB383 ACCOUNTANCY FOR ADMINISTRATORS

On completion of this subject, students should be able to read and extract information from published financial reports and maintain records for a small organisation. The subject covers double entry accounting, general journal, ledgers, trial balance, overview of financial statements, worksheet preparation, accounting for merchandising operations, specialised journals and subsidiary ledgers and cash controls.

Credit Points: 12  Contact Hours: 3 per week

ACB384 INTRODUCTORY LEGAL STUDIES

The subject covers introduction to law, its nature, sources, development and institutions. The law of contract and its impact on business. Various areas of specialist contracts, e.g. sale of goods, agency and employment. Corporations. Restrictive trade practices and consumer affairs.

Credit Points: 12  Contact Hours: 3 per week
ACB480 PERSONAL & CORPORATE FINANCE

The Australian financial environment from both a personal and corporate point of view. The aim is to equip students with information and analytical techniques which will assist them in investment and financing decision making in their business and personal lives. The subject covers goals and functions of finance, methods of project evaluation, evaluation and selection of investment projects, management of working capital, leverage, cash forecasting and cash management, financial statement analysis.

Credit Points: 4  Contact Hours: 3 per week

ACB481 FINANCIAL MANAGEMENT FOR ENGINEERS

The subject aims to introduce engineering students to the theory and practice of financial management in Australia. It covers the nature of business finance and firm objectives, business structures and the organisation of the Australian capital markets, sources of long term and short term finance, the investment of firm funds in working capital and fixed assets, portfolio management theory.

Credit Points: 6  Contact Hours: 3 per week

ACB482 ACCOUNTING PRINCIPLES C

The subject aims to provide students with a comprehension of accountancy terminology and procedures to use as tools in their professional planning and budgeting activities. It covers the development of the rules and skills to prepare financial statements, the G.A.A.P. concepts for use in measurement of asset and liability values, depreciation and the relevant rates for use in decision making.

Credit Points: 2

ACB659 FINANCIAL MODELLING

Content encompasses supply and demand for financial information cross sectional and time series analysis, bankruptcy prediction, empirical issues and evidence, debt ratings and financial information, financial analysis models, distress analysis and loan decisions. An IFPS project is also included in the course.

Prerequisite: ACB230  
Credit Points: 12  Contact Hours: 3 per week

ACN110 PROFESSIONAL YEAR MODULE - ACCOUNTS

Content see ACN126 Financial Reporting, and ACN112 Advanced Company Accounting

The subject aims to provide students with an understanding of the nature and development of accounting theory. Students will be exposed to a broad coverage of the accounting literature and will be expected to develop an understanding of the nature of research in accounting. Topics covered include the nature, methodology and development of accounting theory, incentive problems and contracting solutions associated with the issue of debt and equity, contracting explanations for external financial reporting, accounting policy choice and the value of the firm, and accounting and the political process.

Credit Points: 12

ACN112 ADVANCED COMPANY ACCOUNTING

This subject is primarily concerned with the accounting for intercompany investments. It involves an analysis of relevant Australian and overseas accounting standards - in particular, standards involving goodwill, business combinations, investments, consolidation, equity accounting and accounting for joint ventures. Furthermore, the consolidation method will be discussed in detail with particular reference to topics such as changes in ownership of shares, mutual shareholdings, foreign subsidiaries, different classes of shares and funds statements.

Credit Points: 12

ACN114 ACCOUNTING RESEARCH

The subject overviews the research methodology used in the field of accounting, and considers at a pragmatic level the use of certain research techniques in order to assist students in their research dissertation and preparation of research papers. The subject aims to develop a capacity to analyze and evaluate the literature in accounting research publications, and skills in research methodologies for undertaking individual research in accounting. This subject is a prerequisite for ACN950 Dissertation and should, therefore, normally be attempted immediately prior to enrolment in ACN950 Dissertation.

Credit Points: 12

ACN118 INTERNATIONAL ACCOUNTING

Examination of accounting and auditing functions in the context of multinational corporations. Discussion of environmental influences on accounting practices, accounting for changing prices, taxation, foreign currency translation, multinational transfer pricing and performance evaluation. Role and impact of international accounting standards and auditing guidelines from IFAC and relationship to Australian accounting and auditing standards. Financial reporting and the analysis of foreign financial statements are also included.

Credit Points: 12

ACN119 COMPANY SECRETARIAL PRACTICE

The purpose of this course is to examine particular aspects of company law which are of practical relevance to persons who act as company secretaries or as advisers to such persons. The role, obligations and liabilities of the company secretary are covered in detail, as are the different methods of raising public funds and the listing requirements on the main and second board. Company charges with emphasis on statutory provisions and floating charges, and various aspects of insolvency, with an analysis of the role of provisional liquidators as well as schemes of arrangement are also covered.

Credit Points: 12

ACN120 PROFESSIONAL YEAR MODULE - AUDIT & EDP

See ACN125 Auditing Standards & Practice, and ACN121 Computer Auditing

This subject introduces students to the fundamental principles of the practice of computer auditing. Topics covered include the auditor and the computer, the study and evaluation of internal control in a computerised application, an understanding of the general and application controls applicable to an accounting application, the audit trail in computer data processing and applicable computer audit tools and techniques. In discussing these topics consideration will be given to both mini and micro computer systems.

Credit Points: 12

ACN122 AUDIT SAMPLING

This subject examines statistical sampling methods proposed for and employed in the performance of audits. Discussion centres on relevant statistical con-
Topics covered include the audit sampling process, auditor decisions and risk of error, attribute, variable and probability proportional-to-size sampling.

Credit Points: 12

<table>
<thead>
<tr>
<th>ACN123 INTERNAL AUDITING</th>
</tr>
</thead>
<tbody>
<tr>
<td>The subject aims at providing specialist training in the area of internal and operational auditing. Topics covered will include the techniques generally used by the internal auditor, the need for efficiency or value-for-money auditing and the role the internal auditor must play in large organisations (public and private).</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN124 AUDITING HONOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>The subject is designed to familiarise students with current research in auditing and develop an awareness of research opportunities in auditing. It covers the nature of auditing research, the role of auditing, independence, reporting, liability, fraud detection, audit process, risk, materiality, internal control, analytical review, computer auditing, and auditing standards.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN125 AUDITING STANDARDS &amp; PRACTICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>An examination of relevant auditing standards and their implications for practice, development of an analytical approach and the ability to exercise professional judgement to audit problems.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN126 FINANCIAL REPORTING</th>
</tr>
</thead>
<tbody>
<tr>
<td>This subject aims to study in detail the requirements for the preparation and presentation of financial statements in accordance with various professional and statutory reporting requirements. In addition, analysis and interpretation of financial statements and the conceptual framework will be covered.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN127 EXTERNAL REPORTING ISSUES</th>
</tr>
</thead>
<tbody>
<tr>
<td>This subject involves the consideration of a number of contemporary issues in external reporting. Various practical accounting and reporting issues covered include accounting for extractive, long-term construction contracts, segment reports, foreign currency translation, leasing, tax-effect accounting, cash flow statements and accounting for off-balance sheet financing. Appropriate statements of accounting standards (both Australian and overseas), relevant discussion papers published by the Australian Accounting Research Foundation, recent accounting journal articles and case studies are used in analyzing these topics.</td>
</tr>
<tr>
<td>Credit Points: 12</td>

</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN151 FINANCE HONOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>An advanced coverage of the theory of financial management, building on work done in the undergraduate course with reference to empirical evidence where available. Topics covered include capital markets, consumption and investment, investment decisions, market equilibrium, the capital asset pricing model, arbitrage pricing theory, capital structure (theory and evidence), dividend policy (theory and evidence), efficient capital markets (theory and evidence). The subject provides a theoretical basis allowing for evaluating policy problems in the area of financial management, a necessary prerequisite for further specialisation in this area.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN152 ADVANCED CAPITAL BUDGETING</th>
</tr>
</thead>
<tbody>
<tr>
<td>The aim of the subject is to develop an in-depth understanding of the theory and practice underlying the firm's investment and financing decisions. This will be achieved by a series of case studies which require the student to apply theory to practical situations not covered in normal undergraduate courses. The subject covers the firm investment decision and its application in practice. Topics include capital investment analysis, adjusted present value, retirement decisions, unequal lives, cost of capital, estimating beta, capital rationing, valuation of new issues, mergers and takeovers.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN153 INTERNATIONAL FINANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The finance function in the context of multi-national corporations and overseas financial markets. The subject will focus on the firm's financing, investing and dividend decisions in the international market place. Topics covered include foreign currency translations in a reporting and decision making context, multi-national transfer pricing, performance evaluation, an introduction to international financial markets, exchange risk exposure, multi-national diversification, remittance to parent companies (dividends, loan repayments), finance of export trade, host country legislation and its impact on multi-national companies.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN155 FINANCIAL MODELLING</th>
</tr>
</thead>
<tbody>
<tr>
<td>The subject will cover the techniques of financial modelling (forecasting, risk analysis, optimisation); model specification, model structure and programming the model; the use of the computer in cash management, financing and investment planning; sensitivity analysis and simulation. Particular emphasis will be placed on solving practical problems using computers, electronic spreadsheets, and modelling applications.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN156 FINANCIAL RISK MANAGEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>This subject is designed as a complete unit in itself. Emphasis will be placed on how security prices are determined and on market behaviour. Equal emphasis will be placed on institutional detail and the valuation methods used in practice. Finally students will be introduced to applied research into share price behaviour. Topics covered include the efficient market hypothesis; portfolio theory; the capital asset pricing model; the valuation of fixed interest securities; the valuation of common shares; the valuation of options, warrants and convertible securities.</td>
</tr>
<tr>
<td>Credit Points: 12</td>

</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN170 PROFESSIONAL YEAR MODULE - TAXATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>See ACN171 Advanced Taxation and ACN172 International Law</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ACN171 ADVANCED TAXATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>The objectives of this subject are to provide a conceptual analysis of the Australian income tax system in order to give perspective and meaning to the considerable body of technical law, the analysis proceeds under the broad headings of income and capital gains, deductions, tax accounting, entities, avoidance and administration; and to provide an in-depth treatment of some complex practical problems raised by the Income Tax Assessment Act and related legislation.</td>
</tr>
<tr>
<td>Credit Points: 12</td>
</tr>
</tbody>
</table>
This subject seeks to convey principles of Australian income tax law and practice as they apply to situations and transactions with an international element. The broad areas covered are: the root principles of jurisdiction, residence and source; substantive provisions - resident earning overseas income and non-resident earning Australian income; and tax planning arrangements and applicable anti-avoidance legislation.

Credit Points: 12

ACN175 COMMERCIAL LAW HONOURS

The objectives of the subject are: to give students the opportunity to obtain a detailed understanding of the rules governing local and foreign takeovers and mergers; to examine prominent takeovers that have recently occurred; to consider the managerial and taxation aspects of takeovers; and to participate in seminar presentations on relevant takeover issues.

Credit Points: 12

ACN176 INDIRECT TAXATION

This subject considers taxes relevant to the conduct of a business other than taxes directly imposed on a taxpayer's income and capital gains. The taxes considered come under the general heading of indirect taxes as the burden of such taxes does not fall fully on the person who pays the tax, but is rather shifted to another person, e.g., the ultimate consumer of goods and services. Some of the taxes and duties considered may not always strictly fit within this definition but nevertheless come within the ambit of a study of this nature.

Credit Points: 12

ACN177 TAXATION POLICY HONOURS

This subject examines the Australian taxation system as it has evolved under the policy making powers of the Australian Government. In the first place the system is analyzed in terms of its degree of concordance with traditionally recognized tax policy objectives. In the second place specific forms of taxation are appraised, and in the third place tax reform proposals are critically assessed.

Credit Points: 12

ACN178 TAXATION & PROFESSIONAL PRACTICE

This subject applies technical expertise in income tax and other revenue laws to specific tax planning situations including employment, retirement, investment, business and professional practice. In addition, analysis is made of the various incentives offered by the Government under the Income Tax Assessment Act and by way of grants and other forms of assistance. Consideration is also given to the professional responsibilities of the tax practitioner, and judicial, statutory and professional responses to tax avoidance and evasion.

Credit Points: 12

ACN231 MANAGERIAL ACCOUNTING HONOURS

An advanced coverage of the theory of management accounting, building on the work done at undergraduate level. The subject will introduce students to the current research in management accounting, with a view to developing and encouraging their own research expertise and endeavours. Topics include: cost estimation, behaviour and statistical techniques, advanced variance analysis and investigation, agency theory, contingency theory and cost allocation, advanced transfer pricing, structure of the firm and its impact on managerial accounting, contemporary developments.

Credit Points: 12

ACN232 MANAGERIAL ACCOUNTING ISSUES A

An advanced managerial accounting subject that examines the theoretical issues associated with the design, operation and evaluation of management accounting systems. In particular, this subject will concentrate on issues surrounding the firm's planning and control decisions as well as introducing and analyzing some of the newer concepts and techniques currently available to contemporary management. The subject will consist of formal seminars, problem solving and case studies.

Credit Points: 12

ACN233 MANAGERIAL ACCOUNTING ISSUES B

An advanced managerial accounting subject that examines the practical managerial accounting issues currently facing contemporary management. The subject will concentrate on analysing the implications of the issues raised, and attempting to apply these issues to a practical framework to assist in managerial decision making and control. The subject will consist of formal seminars and presentations by the students, problem analysis and solving, and case studies. Topics include: advanced budgeting techniques, program budgeting, and variance investigation.

Credit Points: 12
the role of the financial manager, the Australian financial environment, sources of funds, present and future value, time value of money, financial mathematics, cost of funds, the firm investment decision, investment evaluation techniques, cash budgeting, working capital management, capital budgeting, dividend policy, and financial structure policy.

Prerequisite: Accounting Principles
Credit Points: 12  Contact Hours: 3 per week

# ACN950 Dissertation
Prerequisite: ACN114

# ACP111 ACCOUNTING PRINCIPLES I
This subject aims to develop the students' ability to interpret and use corporate financial statements. The subject is concerned with both the preparation and the use of financial accounting data and emphasises the reconstruction of economic events from published accounting reports. The subject, although predominantly about accounting, is directed toward a management rather than an accounting viewpoint.

# ACP213 QUALITY COST ANALYSIS
The subject aims to be able to relate programs in quality assurance to an overall cost control strategy in order to achieve the goals of the business as expressed in its periodic budget, and be able to administer the cost of quality assurance as a part of a control and recovery program which is indicated by variances from budget and as part of a programme for increasing cost effectiveness. Students are introduced to the terminology used in accountancy and the accounting reporting cycle. Emphasis is given to understanding the nature of cost objectives, operational costing, CVP analysis and the variance analysis framework.
Credit Points: 6  Contact Hours: 3 per week

# ARB189 WRITING FOR DESIGNERS I
Offered: Autumn
The writing process: style, accuracy and simplicity in writing; the editing process. To develop students' ability to research, plan, write and present tertiary-standard written communications.
Credit Points: 4  Contact Hours: 2 per week

# ARB190 WRITING FOR DESIGNERS II
Offered: Spring
Writing for the design professional: review of organisation and mechanics; types, formats, styles and review of professional documents; problems of technical style, bibliographic conventions and use of graphs.
Credit Points: 4  Contact Hours: 2 per week

# ARB191 THE HUMAN ENVIRONMENT I
Offered: Autumn
The dimensions and movement of the human body, and its perceptual systems, as an essential preliminary to the design of all artefacts for human use. The course will consist of lectures and studio exercises. Lecture topics include: static and dynamic anthropometry; human sensory systems; introduction to ergonomics; applications of anthro-pometrics and ergonomics to design.
Credit Points: 4  Contact Hours: 2 per week

# ARB192 THE HUMAN ENVIRONMENT II
Offered: Spring
Human needs and the influence of selected interpersonal and physical variables on human behaviour. It encompasses the characteristics and dynamics of group behaviour. Communication process, types, and networks. Concepts of power, leadership and conflict. Observation of behaviour: research methods, interpretation and presentation of research. Environmental stressors and their mediation by individual differences.
Credit Points: 2  Contact Hours: 1 per week

# ARB193 DESIGN I
# ARB194 DESIGN II
Offered: Autumn, Spring
Lectures and studio work focusing on design definition; perception; elements and principles of design; effects of colour, texture, contour, pattern; human dimensions; anthropometrics; elements of aesthetics. A series of exercises develop basic skills to apply basic design principles, and to solve simple design problems. Descriptive geometry; architectural graphics and rendering; freehand drawing and sketching.
Credit Points: 10 (both)  Contact Hours: 5 per week (both)

# ARB195 TECHNOLOGY I
# ARB196 TECHNOLOGY II
Offered: Autumn, Spring
Together, these subjects promote an understanding and develop a basic knowledge of materials, structures and construction in domestic scale buildings. Materials; The manufacture, supply, storage and application in buildings of timber and wood products, paints and clay products, concrete, ferrous and non-ferrous metals, plastics. Construction; Conventional construction of simple, single-storey buildings; foot­ings and floors, wall and roof framing, load bearing masonry, roofing, cladding. Experimentation/Workshop: A series of experiments in heat, light and sound. Use of tools and machinery in wood and metal. Structural testing of materials.
Credit Points: 4 (both)  Contact Hours: 2 per week (both)

# ARB197 HISTORY OF THE BUILT ENVIRONMENT I
# ARB198 HISTORY OF THE BUILT ENVIRONMENT II
Offered: Autumn, Spring
The course reviews the development of man's artificial environment and its relationship to ideas, technology and the fine art from the earliest times to the present.
Credit Points: 2 (both)  Contact Hours: 1 per week (both)

# ARB288 DESIGN SCIENCE II
Offered: Spring
Continuation of the aims and principles as described in Design Science I.
Credit Points: 2  Contact Hours: 1 per week

# ARB289 DESIGN SCIENCE I
Offered: Autumn
A study of the principles of science and their implications on the design of buildings and spaces. The application of these principles in the conceptual stages of design allowed by laboratory tests and computer evaluations of design proposals. The subject is divided into a series of modules, each related to potential studio design exercises.
Credit Points: 2  Contact Hours: 1 per week
ARB290 INTRODUCTION TO COMPUTING II
Offered: Spring
Computers as tools for drafting. Line graphics, plotting, computer-aided drafting, symbol libraries, dimensioning, computer drafting and office organisation. Comparison of available software packages.
Credit Points: 2 Contact Hours: 1 per week

ARB291 THE HUMAN ENVIRONMENT III
Offered: Autumn
The social and cultural development of Australian urban environments, with particular reference to the local built environment. The study of human functioning in urban environments. Theory; privacy, personal space, territoriality, environmental meaning and cognition, cognitive maps and wayfinding, intercultural and intracultural differences. Application via examination and analysis of an urban environment with respect to its sociocultural function.
Credit Points: 4 Contact Hours: 2 per week

ARB292 THE HUMAN ENVIRONMENT IV
Credit Points: 4 Contact Hours: 2 per week

ARB293 DESIGN III
Offered: Autumn, Spring
The concepts of design process to develop a systematic methodology in architecture design. Scope of design; Reitman's State Transformation model; problem solving methods; precedent diagrams; testing; general design heuristic; the art of design. Planning objectives and techniques, privacy and convenience, intelligibility, forms and order, history of planning techniques, the vertical dimension, safety, external constraints.
Credit Points: 10 Contact Hours: 5 per week

ARB294 DESIGN IV
Offered: Autumn, Spring
A series of architectural projects of single storey to low rise buildings of domestic or semi-domestic nature. Use of media for presentation of architectural projects; use of colour, shade, shadow in architectural drawings; 3D presentation and modelling.
Credit Points: 8 Contact Hours: 4 per week

ARB295 BUILDING CONSTRUCTION I
ARB296 BUILDING CONSTRUCTION II
Offered: Autumn, Spring
Credit Points: 4 (both) Contact Hours: 2 per week (both)

ARB297 PRINCIPLES OF STRUCTURES I
Offered: Autumn
The basic principles of structures as applicable to elements of architecture, industrial design, interior design and landscape architecture. The study is qualitative and a minimum of mathematics is used. Emphasis is given to visual and conceptual appreciation of structures.
Credit Points: 2 Contact Hours: 1 per week

ARB298 PRINCIPLES OF STRUCTURES II
Offered: Spring
The principles and their application to building structures in timber and masonry. Priority is given to structural concepts, and structural design is limited to approximation of overall dimensions.
Credit Points: 4 Contact Hours: 2 per week

ARB299 INTRODUCTION TO COMPUTING I
Offered: Autumn
The computer as a tool. Introduction to micro-computer hardware and software, architectural application overview, specialised graphics hardware, files, computer access, and operating systems.
Credit Points: 2 Contact Hours: 1 per week

ARB386 LAW OF THE BUILT ENVIRONMENT
Offered: Spring
Laws, regulations and their interpretation. A review of the Australian and Queensland Acts, local authority by-laws and regulations of statutory authorities as they affect the built environment. Legal aspects of land and land transfer. Introduction to professional liability, design registration, patents and copyrights.
Credit Points: 4 Contact Hours: 2 per week

ARB387 ENVIRONMENTAL IMPACT STUDIES
Offered: Autumn
Ecological impacts of built environment developments such as roads, railways, power lines, buildings. Impact of processes of developments upon natural resources, vegetation, soils, hydrology, air purity etc. Secondary effects of development such as fire, feral animals, weeds, added nutrients, trampling, etc. Rehabilitation of disturbed ecosystems. Maintaining urban habitats and wildlife. Field work will form part of this subject.
Credit Points: 2 Contact Hours: 1 per week

ARB388 DESIGN SCIENCE IV
Offered: Spring
Continuation of the aims and principles as described in Design Science III. Principles governing control of noise and aural conditions in buildings. Basic acoustic design and noise control in buildings. Artificial lighting of interiors, lamp characteristics, colour rendering, modelling, lighting quality, simplified lighting design methods, and external lighting.
Credit Points: 2 Contact Hours: 1 per week

ARB389 DESIGN SCIENCE III
Offered: Autumn
Credit Points: 2 Contact Hours: 1 per week
ARB391 BUILDING SERVICES I
Offered: Autumn
This subject is designed to develop an understanding of domestic building services and their integration in the design and construction of small buildings. It covers supply, connection and reticulation of electricity, gas, water and telephone services and relevant outlets and appliances. Sewage, sullage and stormwater drainage as applicable to domestic buildings. Domestic waste disposal.
Credit Points: 4  Contact Hours: 2 per week

ARB392 BUILDING SERVICES II
Offered: Spring
Mechanical electrical and hydraulic services and their integration in the design and construction of major buildings.
Credit Points: 4  Contact Hours: 2 per week

ARB393 BUILDING DESIGN V
ARB394 BUILDING DESIGN VI
Offered: Autumn, Spring
Credit Points: 10 (ARB393); 8 (ARB394)
Contact Hours: 5 (ARB393); 4 (ARB394) per week

ARB395 CONSTRUCTION III
ARB396 CONSTRUCTION IV
Offered: Autumn, Spring
Contemporary construction, concentrating on non-domestic buildings and furthering the understanding of the links between structural theory, building science, construction and design.
Credit Points: 2 (both)  Contact Hours: 1 per week
(both)

ARB397 PRINCIPLES OF STRUCTURES III
Offered: Autumn
The principles and their application to building structures in steel. Structural properties of mild steel and high tensile steel. Structural framing and connections. Structural systems in steel: beams and columns, portal frames, space frames, trusses, tense structures, approximate sizing.
Credit Points: 4  Contact Hours: 2 per week

ARB398 PRINCIPLES OF STRUCTURES IV
Offered: Spring
Credit Points: 4  Contact Hours: 2 per week

ARB491 HISTORY OF ARCHITECTURE & ART III
Offered: Full year
Credit Points: 2  Contact Hours: 1 per week

ARB493 DESIGN VII
Offered: Full year
Masters of the 20th Century in Europe and the U.S.A. and their architectural styles, design philosophy and influence. Architects in Australia and their influence in Australasian architecture. Major design projects including brief, design, construction, services and landscape. Also a series of architectural projects of medium to high rise construction with emphasis in workability and compliance with codes, by-laws and regulations.
Credit Points: 10  Contact Hours: 5 per week

ARB495 PROFESSIONAL STUDIES I
Offered: Full year
The concepts and writing of building specifications. How to interpret and to apply the Standards Association of Australia Codes and other standards. Acquisition of the skills and knowledge to use computers as management tools. Estimating and Accounting: financial aspects of professional practice. Building Legislation: the law as a constraint in architectural practice. Computer Applications: the skills and knowledge to use computers as management tools.
Credit Points: 8  Contact Hours: 4 per week

ARB497 ADVANCED TECHNOLOGY
Offered: Full year
The aim of these subjects is to develop an initial understanding of mechanical, electrical, electronic and special services and the integration in the design and construction of major buildings and to understand the approximate sizing of service requirements. Subsequently to understand construction methods and specification of complex and high-rise buildings. Emphasis is on case studies.
Credit Points: 4  Contact Hours: 2 per week

ARB591 HISTORY OF ARCHITECTURE & ART IV
Offered: Full year
A global perspective of development of art and architecture of regional interest with particular emphasis on non-European traditions. Architectural development in Regions such as the Far East, South East Asia, the Pacific, and South America are offered and students are to select one region for study in each semester. The topics include planning of settlements, indigenous architecture, materials and techniques in building construction, social, cultural, economic, religious, and western influence. Modernisation, current architecture issues.
Credit Points: 2  Contact Hours: 2 per week

ARB593 DESIGN VIII
Offered: Full year
Architectural criticism. Main themes selected for design and their realisation, convenience, clarity, intelligibility, expression, technology, context form. Post-occupancy evaluation. Testing methodology, analysis and evaluation of building performance, user-oriented design. A series of architectural projects of medium to high rise buildings involving general
building briefs and programmes, environmental impact issues, and post-occupancy analysis.

Credit Points: 10  Contact Hours: 5 per week

ARB595 PROFESSIONAL STUDIES II
Offered: Full year

Credit Points: 10  Contact Hours: 5 per week

ARB597 ELECTIVE I
Offered: Full year
Students who wish to carry out further studies in architecture may choose from the prescribed fields of study, one for each semester. Students are directed by tutors to carry out surveys, experiments, or such work as required and are to present their findings in seminars and in written reports. Students may also substitute the requirements of this subject by an approved subject on campus, or offered at an approved institution.

Credit Points: 4  Contact Hours: 2 per week

ARB693 DESIGN IX
Offered: Autumn
Contemporary architectural theories and ideas and their influence in architectural design and practice. The process of brief, functional and space programming of architectural design projects. An introduction to urban values, design principles and landscape/townscape, to acquire skills in civic and formal planning, and techniques to evaluate urban quality. A comprehensive project of groups of complex buildings is used as a design vehicle to develop planning skills, including brief formation and development programming, quality evaluation, planning, and presentation.

Credit Points: 18  Contact Hours: 9 per week

ARB695 PROFESSIONAL STUDIES III
Offered: Full year
Alternative methods of building procurement with particular emphasis on management of all phases of the building project. This subject is designed to assist students to reach a high level of professional competence and to prepare them for the Practice Examination set by the Board of Architects, Queensland under 'The Architects Act, 1962', and subsequent amendments.

Credit Points: 4  Contact Hours: 2 per week

ARB697 ELECTIVE II
Offered: Full year
Students carry out studies on approved topics of their nomination to sufficient depth. The work shall demonstrate the student's ability to define and to logically analyse proposition, and to conduct research to prove its validity. The submission is normally presented in the prescribed written form with illustrations and/or drawings.

Credit Points: 11  Contact Hours: 4 per week

ARP501 INTRODUCTION TO FACILITIES MANAGEMENT
Offered: Autumn
The concept of facilities programming and management. The notion of human behaviour over time and the monitoring of building performance as the major focus in the day to day management of facilities in a realistic working environment.

Credit Points: 8  Contact Hours: 2 per week

ARP502 ENVIRONMENTAL COMMUNICATIONS
Offered: Autumn
A series of lectures, site visits and projects relating to the design and application of alphabets and factors influencing perception of them in signage systems, display and exhibition, the design of exhibition and display systems, transportation, materials and specifications associated with their construction.

Credit Points: 13  Contact Hours: 5 per week

ARP503 WORKPLACE DESIGN
Offered: Autumn
A series of lectures, seminars and projects concerned with physiological, psychological, and sociological aspects of the workplace, involving furniture systems, equipment and services.

Credit Points: 12  Contact Hours: 5 per week

ARP504 PROFESSIONAL PRACTICE & MANAGEMENT FOR INTERIOR DESIGNERS I
Offered: Autumn
This subject explores the role and responsibilities of the industrial designer in professional practice; job administration, liability, design protection, designer and client relationships; communication management and organisation of project.

Credit Points: 11  Contact Hours: 4 per week

ARP505 PROFESSIONAL PRACTICE & MANAGEMENT FOR INTERIOR DESIGNERS II
Offered: Autumn
A series of seminars/tutorials, case studies and assignments concerned with such topics as: task scheduling; planning systems and control models; program evaluation and review techniques; critical path monitoring; organisational development; personnel recruitment and staffing structures; organisational models; union and labour relations.

Credit Points: 14  Contact Hours: 7 per week

ARP600 BUILDING EVALUATION & BRIEF DEVELOPMENT
Offered: Autumn, Spring
Formulation of the client's brief, definition of the design problem and exploration of design methodologies. Evaluation of building types, suitability of spaces to functions.

Credit Points: 16  Contact Hours: 8 per week

ARP601 FILM, TV & DESIGN FOR THEATRE
Offered: Spring
Introduction to the basic language, technology and procedures of film and video production, roles of production and design teams, script analysis, preproduction planning, story boarding, set design and construction, modelmaking, make up design, lighting and camera work. This will be given through a series of lectures, visits and projects.

Credit Points: 16  Contact Hours: 8 per week

ARP602 CONSERVATION OF HISTORIC INTERIORS
Offered: Spring
A series of lectures, visits and a design project, covering the role and ethic of conservation in interior design.

Credit Points: 16  Contact Hours: 8 per week
ARP603 HISTORIC TECHNOLOGIES
Offered: Spring
An introduction to the interior and building technologies required by a practicing interior designer working on conservation, restoration and recycling projects. Knowledge gained in this subject will be applied in "Design of Historic Interiors".
Credit Points: 8 Contact Hours: 4 per week

ARP613 ADVANCED ERGONOMICS I
Offered: Autumn
Man-machine system and their relations with living and working environment; the importance of ergonomics (human factors) criteria and their application to industrial design. The course consists of series of seminars relevant to case studies concerned. Typical case studies are concentrated on the ergonomic evaluation of consumer products.
Credit Points: 2 Contact Hours: 1 per week

ARP613 ADVANCED ERGONOMICS II
Offered: Spring
Systematic ergonomic evaluation methods and their application to design problems. Lectures and seminars relevant to case studies concentrated on the ergonomic evaluation of the working and living environment, e.g., key-punch operator work station, bus driver work station and ergonomic evaluation of an assembly line.
Prerequisite: ARP613 Credit Points: 4 per week Contact Hours: 2 per week

ARP622 CASE STUDIES
Offered: Autumn
This subject consists of a series of seminars dealing with case study evaluation by practicing designers: study of different evaluation methods and techniques; the application of evaluation methods through individual case studies. All design factors of manufactured products are evaluated in depth.
Credit Points: 4 Contact Hours: 2 per week

ARP652 DESIGN MANAGEMENT & DECISION THEORY
Offered: Spring
This subject covers: meaning of the design process, control and the design process, complexity of design problems, types of contracts, design and business, project team, design responsibility and design management, design documentation, concept of design evaluation and management action, application of design theory to design management.
Credit Points: 2 Contact Hours: 1 per week

ARP653 PROFESSIONAL PRACTICE
Offered: Spring
This subject explores the role and responsibilities of the industrial designer in professional practice. Lectures cover: job administration, liability, design protection, designer and client relationships.
Credit Points: 2 Contact Hours: 1 per week

ARP671 HISTORY, THEORY & CRITICISM OF INDUSTRIAL DESIGN
Offered: Autumn
This subject reviews the development of industrial design and its relationship to ideas, technology and arts, and the development of industrial design from eighteenth century to the present day. It also covers the study of Australian inventions and their impact on product design in Australia.
Credit Points: 2 Contact Hours: 1 per week

ARP672 INDUSTRIAL DESIGN I
ARP673 INDUSTRIAL DESIGN II
Offered: Autumn, Spring
This course consists of studio work in which students design a wide range of products or systems. The emphasis will be on projects generated from local industry and community. The complexity and depth of the design project will increase systematically according to the semester level.
Prerequisite: ARP672 for ARP673 Credit Points: 16 (both) Contact Hours: 6 per week (both)

ARP674 INDUSTRIAL DESIGN RESEARCH I
Offered: Spring
This course consists of the topic selected by a student and approved and supervised by the industrial design staff. Examples of topics are: microsurgical equipment design, bushfire safety equipment, mobile dental clinic in isolated regions, and interactive display in psychological testing.
Prerequisite: ARP673 Credit Points: 20 Contact Hours: 8 per week

ARP675 INDUSTRIAL DESIGN RESEARCH II
Offered: Spring
This course depends on the topic selected by a student in the previous semester. Students are responsible for the program as a part of their project work, which will be approved and supervised by Industrial Design staff.
Prerequisites: ARP672, ARP674 Credit Points: 20 Contact Hours: 8 per week

ARP676 ADVANCED CAD FOR INDUSTRIAL DESIGNERS I
Offered: Autumn
CAD in the design process. 2D and 3D application of appropriate CAD programs. Development of a design project through the interactive use of CAD and related engineering programs as an aid to design analyses and finalisation.
Credit Points: 4 Contact Hours: 2 per week

ARP677 ADVANCED CAD FOR INDUSTRIAL DESIGNERS II
Offered: Spring
CAD/CAM in the design, analysis, and manufacturing process. 3D solid modelling, finite analyses, and CAM will be employed. A project will be taken from first concept through final documentation. The presentation, technical description, engineering analyses, and finalisation to Computer Numerically Controlled (CNC) testing and prototype production of a small product.
Credit Points: 4 Contact Hours: 2 per week

ASB101 STUDY SUPPORT SKILLS
Offered: Autumn
A series of workshops run by the Library and the Counselling Centre to assist students to utilise optimally time and resources. Topics include library resources and their use, note taking, effective reading and assignment writing skills, revision and examination techniques, time management.
Credit Points: 2 Contact Hours: 1 per week

ASB200 INTRODUCTORY METEOROLOGY
Offered: Spring
Historical introduction, the earth’s atmosphere, heat transfer processes, the gas laws, the physics of water vapour, wind theory, atmospheric stability and in-
stability, precipitation, atmospheric electricity, meteorological observation, synoptic meteorology, atmospheric optics.

Credit Points: 8  Contact Hours: 3 per week

ASP701 INFORMATION RETRIEVAL SKILLS
Offered: Autumn
This subject, taught by the Division of Academic Support (in collaboration with Faculty staff in Modules 2 and 4) includes a relevant literature review. Module 1 - Retrieving Information; Module 2 - Evaluation of Information; Module 3 - Organising Information; Module 4 - Thesis Preparation. This subject is assessed on a pass/fail basis.
Credit Points: 4  Contact Hours: 2 per week

ASP702 COMPLEMENTARY STUDIES
Offered: Autumn, Spring
The unit is tailored to suit individual students - studies include a selection from: participation in research seminars; oral communication skills; written communication skills; formal coursework in occupational health and safety, scientific and industrial ethics, philosophy and methodology of science, and science policy and research funding options; development of research management strategies; preparation of a scientific paper/report; and coursework material from other accredited courses as directed by the project supervisor and Head of Department. Assessed on a pass/fail basis.
Credit Points: 16  Contact Hours: 8 per week

ASP703 STUDIES IN GLOBAL SYSTEMS A
ASP704 STUDIES IN GLOBAL SYSTEMS B
These subjects examine topics of global concern to mankind from the perspectives of each of the participating disciplines (Biology, Geology and Chemistry) including: the enhanced greenhouse effect, ozone depletion, acid rain, pollution, soil erosion, toxic wastes and their disposal, sea level changes, and the laws and treaties which relate to them. Note: Students undertake either ASP703 or ASP704, not both.
Credit Points: ASP703 - 9; ASP704 - 6  Contact Hours: ASP703 - 3 per week; ASP704 - 2 per week

ASP705 ADVANCED MICROSCOPY TECHNIQUES
Offered: Autumn
This subject describes, and allows students to practice, preparative techniques relating to transmission (TEM), scanning transmission (STEM) and scanning (SEM) electron microscopy. Techniques include specialist fixation and staining (negative and positive), thin sectioning, critical point drying/freeze drying, replica production, sputter coating and metal shadowing. Each technique is applied to a range of specimens and students familiarised with the use and manipulation of each type of microscope. The analytical capabilities of each instrument are also taught and used.
Credit Points: 9  Contact Hours: 4 per week

BEA004 TAXONOMY
Offered: Autumn
Investigation and identification of local flora and fauna; use and construction of keys. The concepts of systematic, classification, taxonomy and nomenclatural procedure are introduced in short lectures and tutorials associated with the practical exercises.
Credit Points: 8  Contact Hours: 3 per week

BEA011 ANIMAL PHYSIOLOGY
Offered: Spring
This unit introduces the general physiological processes which sustain life, and develops an understanding of animal-environment interactions.
Credit Points: 8  Contact Hours: 3 per week

BEA016 AQUACULTURE TECHNIQUES
Offered: Autumn
Topics covered include: water quality monitoring; culture methods for microscopic food organisms; disease and parasite identification and treatment; and a variety of techniques associated with spawning, rearing, handling and stock assessment.
Credit Points: 8  Contact Hours: 3 per week

BEA021 PLANT PHYSIOLOGY
Offered: Autumn
An introduction to the important aspects of whole-plant physiology, including nutrition, water relations, photosynthesis, translocation and stress physiology.
Prerequisite: BEA108
Credit Points: 8  Contact Hours: 3 per week

BEA026 PLANT CELL TISSUE CULTURE
Offered: Autumn
Topics covered include techniques, equipment and media used in plant tissue culture, the role of plant growth regulators, and micropropagation. The significance of organogenesis, somatic embryogenesis and genetic variability in plant tissue culture are discussed. The lecture program is supported by appropriate laboratory exercises.
Credit Points: 8  Contact Hours: 3 per week

BEA060 HYDROBIOLOGICAL TECHNIQUES
Offered: Autumn
An introduction to the characteristics of aquatic ecosystems. Students gain practical experience using methods, equipment and instrumentation to: estimate population abundance, distribution, biomass and productivity; determine community structure and diversity; determine physical characteristics and morphology and assess water quality. Compulsory field studies form a significant part of this subject.
Credit Points: 8  Contact Hours: 3 per week

BEA090 EXTERNAL PROJECTS I
BEA099 EXTERNAL PROJECTS II
Offered: Autumn, Spring (both subjects)
These two elective subjects enable students to submit studies carried out as part of their normal employment for credit in the course. Design and assessment of the experimental work program is carried out by the employer in conjunction with a supervisor appointed by the Head of Department/delegate.
Credit Points: 8 (both)  Contact Hours: 3 per week (both)

BEA108 INTRODUCTORY BIOLOGY
Offered: Autumn
An introduction to the classification of organisms. Examination of the morphology, anatomy, reproduction, life-history and physiology of selected species.
Credit Points: 8  Contact Hours: 3 per week

BEA198 MICROSCOPY TECHNIQUES
Offered: Autumn, Spring
This unit includes the use and roles of various types of optical microscopes; microscope accessories for counting, measuring, drawing and photography; procedures for preparing specimens for examination and histological/histochernical study.
Credit Points: 8  Contact Hours: 3 per week
BEA200 BIOLOGY B
Offered: Spring
This unit extends the basic concepts presented in Introductory Biology and also includes aspects of mendelian genetics, gene expression and cell differentiation, as well as reproduction and development in selected animals and plants.
Prerequisite: BEA108
Credit Points: 8 Contact Hours: 3 per week

BEA202 CELL STRUCTURE & FUNCTION
Offered: Autumn, Spring
A general course in cell biology including the living cell and its processes, structure and function. Photosynthesis, respiration, intermediary metabolism will be emphasised. Elementary molecular genetics will be outlined.
Credit Points: 8 Contact Hours: 3 per week

BEA297 BIOLOGICAL DATA HANDLING
Offered: Autumn, Spring
Application of statistical procedures to surveys, sampling and design of experiments. Recognition of problems arising from variability in results and particular data type. Methods of data collection, checking, analysis and presentation are discussed. An introduction to the use of computer software packages is included.
Prerequisite: MAA251
Credit Points: 8 Contact Hours: 3 per week

BEA339 INTRODUCTION TO BIOCULTURE
Offered: Autumn
This subject introduces students to techniques of algal culture and plant tissue culture. Topics include nutrition, continuous production techniques, and the use of growth regulators to control growth. The role of environmental factors in controlling growth also is discussed. This subject will provide the theoretical basis for students undertaking electives in aquaculture techniques and/or plant tissue culture.
Credit Points: 8 Contact Hours: 3 per week

BEA349 COMPUTER APPLICATIONS IN BIOLOGY
Offered: Autumn
An introduction to microcomputers and applications-software such as wordprocessing, data bases, spreadsheets, and computer graphics for report presentation. This subject is not oriented towards any specific computer language.
Credit Points: 8 Contact Hours: 3 per week

BEA398 ANIMAL & PLANT TECHNIQUES
Offered: Spring
Care and maintenance of animal and plant resources, both micro- and macroscopic. Animal handling, maintenance of glasshouse resources, culture collections and sterile techniques, preparation of specimens for permanent collections and the maintenance of such collections.
Credit Points: 12 Contact Hours: 4 per week

BEA403 ENVIRONMENTAL BIOLOGY
Offered: Autumn
Ecosystems and energy flow. Productivity, decomposition and nutrient cycling. Niche, species packing, diversity, colonisation and community structure. Short compulsory field trips form an integral part of the unit. Note: This subject is not compatible with BEA305, BEA405; credit may not be retained for more than one of these subjects.
Credit Points: 8 Contact Hours: 3 per week

BEA405 POPULATION BIOLOGY
Offered: Spring
A general course in population biology including: structure and dynamics of populations, evolution and differentiation in populations; the relationships between the genetics, energetics and dynamics of populations leading to particular life-history strategies are emphasised. Field excursions are a compulsory part of the subject.
Note: This subject is not compatible with BEA305, BEA405; credit may not be retained for more than one of these subjects.
Co-requisite: BEA498
Credit Points: 8 Contact Hours: 3 per week

BEA498 FIELD TECHNIQUES
Offered: Spring
Activities include surveying, soil and climatic measurements, assessment and sampling of animal and plant populations, evaluation of spatial changes in plant and animal communities in relation to environmental gradients. Skills are gained not only in sampling and analytical techniques, but also in the establishment and running of a field camp. An extended field excursion is a compulsory part of the subject.
Co-requisite: BEA405
Credit Points: 8 Contact Hours: 3 per week

BEA499 APPLICATIONS IN ELECTRON MICROSCOPY
Offered: Autumn
This subject deals with the roles played by various forms of electron microscopy in the biological sciences and presents an introduction to the basic techniques and their limitations.
Prerequisite: BEA108 + BEA198
Credit Points: 8 Contact Hours: 3 per week

BEB103 BIOLOGY IA
Offered: Autumn
A course of lectures and tutorials dealing with fundamental biological principles and phenomena. Content includes nutrient procurement, transport systems and mechanisms, energy transformations, population and community biology, reproduction and basic genetics.
Co-requisite: BEB149, unless Senior Biology has been undertaken.
Credit Points: 8 Contact Hours: 3 per week

BEB104 BIOLOGY IB
Offered: Autumn
A program of practical work presenting aspects of applied biology, plant and animal physiology and basic genetics including bacterial transformation.
Co-requisite: BEB149 unless Senior Biology has been undertaken.
Credit Points: 6 Contact Hours: 3 per week

BEB149 INTRODUCTORY BIOLOGY
Offered: Autumn
A companion subject to BEB103 and BEB104, designed for students who have not studied Senior Biology. It presents an overview of organisms with emphasis on the relationship between structure and basic biological function, including nutrition, excretion, reproduction and inheritance.
Credit Points: 6 Contact Hours: 3 per week

BEB201 CELL BIOLOGY
Offered: Spring
A program of lectures and tutorials chiefly concerned with the molecular biology of eucaryotic cells, their
This unit introduces general systems theory as a unifying concept in biology and its application to the study of simple biological systems. Emphasis will be placed on modelling techniques and a sub-unit in BASIC programming will provide students with an introduction to computer simulation of simple systems.

Prerequisite: BEB149 or Senior Biology
Credit Points: 8
Contact Hours: 3 per week

**BEB207 BIOLOGICAL SYSTEMS**
Offered: Spring
This unit introduces general systems theory as a unifying concept in biology and its application to the study of simple biological systems. Emphasis will be placed on modelling techniques and a sub-unit in BASIC programming will provide students with an introduction to computer simulation of simple systems.

Prerequisite: BEB149 or Senior Biology
Credit Points: 8
Contact Hours: 3 per week

**BEB303 BIOLOGY II**
Offered: Spring
Comprises a study of plant form, function and classification with examples drawn from major plant and animal taxa.

Prerequisite: BEB103
Credit Points: 16
Contact Hours: 6 per week

**BEB321 PLANT PHYSIOLOGY**
Offered: Autumn
This unit develops an understanding of the functional systems of plants and provides an introduction to environmental physiology and plant tissue culture.

Prerequisite: BEB103 + BEB201
Credit Points: 8
Contact Hours: 4 per week

**BEB357 POPULATION & SYSTEMS ECOLOGY**
Offered: Autumn
Topics to be covered include theoretical models dealing with natural regulation of population size, their limitations and applicability. Population processes and density-dependent feedback; life-history strategies. Energy flow models and dynamics, incorporating productivity and decomposition. Field excursions integrate environmental features with population processes.

Prerequisite: BEB207 Co-requisite: BEB358
Credit Points: 8
Contact Hours: 4 per week

**BEB358 EXPERIMENTAL DESIGN**
Offered: Autumn
This subject is offered in two sections. The first section of ten lecture-tutorials involves multiple and curvilinear regression, chi-squared goodness of fit, multiway analysis of variance, multiple range tests. The second section builds a practical extension on the theoretical basis of statistics, using experimental situations commonly met with in biology.

Co-requisite: BEB357
Credit Points: 8
Contact Hours: 3 per week

**BEB366 BIOLOGY & SOILS**
Offered: Autumn
The subject is an important basis for studies in both aquaculture and terrestrial ecology. Attention is given to the characteristics of soils, soil classification, and the factors (parent material, climate, topography and biota) which determine soil development. The structure and productivity of plant and animal communities, and the distribution of species are shown to be dependent on biogeochemical pathways, regulated by the soil, and on other conditions influenced by the substrate (including water quality). Consideration is given to the distribution of major soil types in relation to effective management of terrestrial and aquatic biota.

Prerequisite: BEB103
Credit Points: 8
Contact Hours: 3 per week

**BEB388 AQUACULTURE I**
Offered: Autumn
A largely practical subject which introduces students to a range of methods and techniques associated with the commercial production of aquatic animal species in hatcheries and on aquafarms. Topics covered include: water quality measurement and management; intensive production of food organisms; induction of maturation and spawning; nursing and rearing larvae and fry; feeding; diagnosis and treatment of health problems; handling and husbandry.

Prerequisite: BEB103
Credit Points: 8
Contact Hours: 3 per week

**BEB390 FIELD STUDIES I**
Offered: Spring
A series of weekend or extended field trips with an aggregate of 40 hours intensive field work in applied biology.

Prerequisite: BEB357
Credit Points: 8
Contact Hours: 3 per week

**BEB411 ANIMAL PHYSIOLOGY**
Offered: Spring
The subject provides and develops an understanding of the functional systems of animals and provides an introduction to environmental physiology.

Prerequisite: BEB103
Credit Points: 8
Contact Hours: 4 per week

**BEB423 PLANT TISSUE CULTURE I**
Offered: Spring
This subject introduces students to the techniques and physiological basis of plant tissue culture. Topics covered include: culture media, organogenesis, somatic embryogenesis and micropropagation. It introduces a range of techniques used in research and commercial laboratories.

Prerequisite: BEB321
Credit Points: 8
Contact Hours: 3 per week

**BEB429 VEGETATION STUDIES**
Offered: Spring
This unit introduces many of the techniques used in vegetation mapping. More specific topics covered include: vegetation classification, floristics, sampling techniques, field surveying techniques and aerial photo-interpretation. There are several compulsory field excursions.

Prerequisite: BEB103
Credit Points: 8
Contact Hours: 3 per week

**BEB435 GENETICS**
Offered: Spring
This unit is an introductory subject in basic genetics. Topics covered include: reproduction and the genetic code, the molecular basis of genetics and Mendelian genetics; genotype-phenotype interactions and quantitative genetics; the genetics of prokaryote and simple eukaryote organisms; evolution and natural selection.

Prerequisite: BEB103 + BEB201
Credit Points: 8
Contact Hours: 3 per week

**BEB444 POPULATION ANALYSIS**
Offered: Spring
General principles of population analysis relating to conservation, control and harvesting. A rigorous individual study of two management problems parallels
field trips to agencies responsible for population analysis for management in Queensland.
Prerequisite: BEB357 + BEB358
Credit Points: 8 Contact Hours: 3 per week

**BEB447 ENVIRONMENTAL MONITORING**
Offered: Autumn.
A course in the skills of environmental assessment, surveying and mapping plant ecosystems. Approaches to, and methods of, assessment. The lecture course is supported by field work in several environments using a range of instrumentation to delineate environmental profiles.
Credit Points: 8 Contact Hours: 3 per week

**BEB490 FIELD STUDIES II**
Offered: Autumn
A series of weekend or extended field trips with an aggregate of 40 hours intensive field work in applied biology.
Credit Points: 8 Contact Hours: 3 per week

**BEB500 SELECTED TOPICS I**
Offered: Autumn
Students complete a study on a specific topic. Such study involves selected reference material and may also include a lecture program or project work.
Prerequisite: BEB357
Credit Points: 8 Contact Hours: 3 per week

**BEB523 PLANT TISSUE CULTURE II**
Offered: Autumn
The subject explores several aspects of plant tissue culture in some detail. Topics covered include cytogenetics and protoplast biology as well as aspects of the biochemistry of plants growing in tissue culture.
Prerequisite: BEB423
Credit Points: 12 Contact Hours: 5 per week

**BEB535 POPULATION GENETICS**
Offered: Autumn
This unit is an extension of Introductory Genetics and examines in detail the genetics of populations. Topics covered include: the genetic structure of populations and processes of evolutionary change; natural selection, inbreeding and co-adaptation; species and specialisation theory; ecological genetics and the genetics of behaviour. Students may be required to undertake semester-long project topics on relevant practical or theoretical problems.
Prerequisite: BEB453
Credit Points: 8 Contact Hours: 3 per week

**BEB560 PROJECTS I**
Offered: Autumn
This unit develops a student’s capacity for managing his/her own work and for persistence within a circumscribed subject area. Projects emphasise specific investigatory skills in reviewing, collating, interpreting and presenting data; contribution to a seminar is usually required. Projects, supervised by various staff members, are graded individually. The Head of Department co-ordinates assessment, and may request external assessment. Projects are to be selected by the 12th week of the fourth semester of the course. There are a number of compulsory field trips. This unit normally leads into BEB660 Projects II.
Prerequisite: BEB305 + BEB357
Credit Points: 16 Contact Hours: 6 per week

**BEB563 BIOLOGICAL RESOURCES**
Offered: Spring
A conceptual basis for aspects of ecosystem management related to naturally-occurring materials and ecosystems subject to interactive use within the economy. Limitations on specific exploitation of natural resources are identified and linked with relevant aspects of land tenure, administration and law. Strategies leading to sustained yield and conservation are contrasted with those resulting in resource degradation.
Prerequisite: BEB103
Credit Points: 8 Contact Hours: 4 per week

**BEB588 AQUACULTURE II**
Offered: Autumn
A course in the skills of aquaculture. Subject content includes the design and operation of production facilities; water quality requirements and management; the biology of commercially important species; reproduction and its control; nutrition, feeding and growth; diseases and their control; methods of production improvement; polyculture; case studies.
Prerequisite: BEB388
Credit Points: 8 Contact Hours: 3 per week

**BEB600 SELECTED TOPICS II**
Offered: Spring
As a final semester subject, provides students with an opportunity to complete a detailed study on a specific topic. The study will normally be based on project work and may include a lecture program.
Credit Points: 8 Contact Hours: 3 per week

**BEB621 PLANT PHYSIOLOGY**
Offered: Spring
Lectures are designed to follow the sequence of biochemical events during life history of a plant. Topics covered include: starch and oil mobilisation during seed germination, biosynthesis of cell membranes, cell pigments (carotenoids, chlorophylls), and plant cell walls; photosynthetic assimilation of nitrogen and sulphur (overview of biosynthesis of all amino acids); biosynthesis of so-called secondary plant products, e.g., terpenoids, flavonoids, and the lignin component of wood; biosynthesis of starch and oils in new seeds. Laboratory classes emphasise techniques of value to plant biochemical research.
Prerequisite: BEB423 or MSB450
Credit Points: 8 Contact Hours: 4 per week

**BEB653 POPULATION MANAGEMENT**
Offered: Spring
The principles of population management are illustrated from examples of economically important plant and animal populations (including pest populations). These are discussed and interpreted in terms of the ecosystem that supports them; various alternative management methods for sustained yield, production or conservation are emphasised; examples of habitat manipulation as a strategy preferable to the direct manipulation of numbers and the criteria for successful biological control programs are examined. The unit also introduces the economic, sociological and legal implications of management programs.
Prerequisite: BEB357
Credit Points: 8 Contact Hours: 4 per week

**BEB655 CASE STUDIES**
Offered: Spring
An extension of Population Management, this unit allows for the detailed study of populations of economic importance. Management strategies for both terrestrial and aquatic populations are presented. Topics cover the range of possible population
manipulations including population simulation, sustained yield and reduction. Major field trips allow students to undertake studies on important systems. 

Co-requisite: BEB653
Credit Points: 12 Contact Hours: 5 per week

- **BEB660 PROJECTS II**
  Offered: Spring
  This elective unit may be undertaken by students who have taken BEB650 Projects I and who have the Head of Department's permission to continue project work. The student either: continues a project undertaken in BEB650, or involves one or more additional projects aimed at developing to a greater depth aspects of the subject matter of experimental subjects previously completed, such projects being established for either individuals or groups. Assessment is conducted as for BEB650. Individual projects for BEB660 are to be determined by the 12th week of the fifth semester of the course. There are a number of excursions.
  Prerequisite: BEB650
  Credit Points: 16 Contact Hours: 6 per week

- **BEP700 PROJECT**
  Offered: Full Year
  All students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project will be assessed on the basis of an extensive written report and an oral presentation.
  Credit Points: 40

- **BEP701 ADVANCED PLANT PHYSIOLOGY & BIOCHEMISTRY**
  Offered: Autumn
  Aspects of plant physiology and biochemistry of current research interest will be covered, expanding upon material in the third year Plant Biochemistry subject. Students will select from a reading list, present seminars and undertake advanced practical work.
  Credit Points: 9 Contact Hours: 4 per week

- **BEP702 DATA HANDLING, INTERPRETATION & BIOMETRICS**
  Offered: Autumn
  The subject covers the efficient organisation and manipulation of data using techniques available through personal computer software. Data manipulation programs are developed to facilitate the application of commercial software to the analysis and interpretation of experimental data.
  Credit Points: 9 Contact Hours: 4 per week

- **BEP704 ADVANCED STUDIES IN POPULATION MANAGEMENT**
  Offered: Spring
  Topics include: pest control and economics; chemical pesticides and their uses; biological control agents: autocidal control and genetic control; use of pheromones, attractants and repellents; resistant varieties, cultural and ecological control; physical methods of control; integrative pest management; quarantine, Conservation management; National Parks and protected areas management; legislation.
  Credit Points: 9 Contact Hours: 4 per week

- **BGB005 MEASUREMENT OF CONSTRUCTION I**
  Offered: Autumn
  Introduction to Quantity Surveying including the work of the Quantity Surveyor and his relationship with other members of the building industry. A study of mensuration and formulae involved in the calculation of length, area and volume. Detailed study and instruction in the process and methods of taking off and billing quantities in the trades roofer, and roof plumber, plasterer, pavior, tile and terrazzo worker, joiner, ironmonger, glazier and painter.
  Prerequisites: BGB151, BGB154
  Credit Points: 6 Contact Hours: 3 per week

- **BGB006 MEASUREMENT OF CONSTRUCTION II**
  Offered: Spring
  Detailed study and instruction in the process and methods of taking off and billing quantities in the trades excavator, concretor, bricklayer and blocklayer and carpenter.
  Prerequisite: BGB005
  Credit Points: 6 Contact Hours: 3 per week

- **BGB007 MEASUREMENT OF CONSTRUCTION III**
  Offered: Autumn
  Detailed study and instruction in the process and methods of taking off and billing quantities in more complex building solutions in the trades excavator, concretor, bricklayer and blocklayer, underpinning, pier and beam RC frame and suspended slabs.
  Prerequisites: BGB254, BGB006
  Credit Points: 4 Contact Hours: 2 per week

- **BGB010 MEASUREMENT OF CONSTRUCTION IV**
  Offered: Spring
  Detailed study and instruction in the process and methods of taking off and billing quantities in more complex building solutions in the trades asphalt and built up roofing, demolisher, mason, structural steel and precast concrete.
  Prerequisite: BGB009
  Credit Points: 4 Contact Hours: 2 per week

- **BGB013 BUILDING SERVICES I HVAC**
  Offered: Autumn
  Co-requisite: BGB253
  Credit Points: 4 Contact Hours: 2 per week

- **BGB014 BUILDING SERVICES II ELECTRICAL**
  Offered: Spring
  Credit Points: 4 Contact Hours: 2 per week

- **BGB008 MEASUREMENT OF CONSTRUCTION II**
  Offered: Spring
  Detailed study and instruction in the process and methods of taking off and billing quantities in the trades excavator, concretor, bricklayer and blocklayer and carpenter.
  Prerequisite: BGB005
  Credit Points: 6 Contact Hours: 3 per week

- **BGB007 MEASUREMENT OF CONSTRUCTION III**
  Offered: Autumn
  Detailed study and instruction in the process and methods of taking off and billing quantities in more complex building solutions in the trades excavator, concretor, bricklayer and blocklayer, underpinning, pier and beam RC frame and suspended slabs.
  Prerequisites: BGB254, BGB006
  Credit Points: 4 Contact Hours: 2 per week

- **BGB010 MEASUREMENT OF CONSTRUCTION IV**
  Offered: Spring
  Detailed study and instruction in the process and methods of taking off and billing quantities in more complex building solutions in the trades asphalt and built up roofing, demolisher, mason, structural steel and precast concrete.
  Prerequisite: BGB009
  Credit Points: 4 Contact Hours: 2 per week

- **BGB013 BUILDING SERVICES I HVAC**
  Offered: Autumn
  Co-requisite: BGB253
  Credit Points: 4 Contact Hours: 2 per week

- **BGB014 BUILDING SERVICES II ELECTRICAL**
  Offered: Spring
  Credit Points: 4 Contact Hours: 2 per week
**BGB103 MATERIAL SCIENCE I**
Offered: Autumn
Properties, manufacture, use and analysis of timber, steel, concrete, and clay products, including investigation into their strength, density, hardness, porosity, plasticity, elasticity and deterioration. Investigation and protection of materials against corrosion and fire.
Co-requisite: BGB254
Credit Points: 4  Contact Hours: 2 per week

**BGB104 MATERIAL SCIENCE II**
Offered: Spring
The aim of this subject is to develop an understanding of the physical and chemical properties of materials and how they affect the construction and structural qualities. It covers laboratory and field testing of bricks, mortar, brickwork, concrete, timber, steel. Investigation and protection of materials against corrosion and fire.
Credit Points: 4  Contact Hours: 2

**BGB131 MEASUREMENT OF CONSTRUCTION I A (FULL TIME)**
Offered: Spring
Subject description as for BGB005.
Credit Points: 6  Contact Hours: 3 per week

**BGB143 STRUCTURES I**
**BGB144 STRUCTURES II**
Offered: Autumn, Spring
Equilibrium of forces. Shear forces and diagram, bending moments and diagram, loading on structures and loading code, truss analysis and force diagram, stress and strain, tension and compression members, bending theory, design of timber beams, columns and connections, design of steel beams and columns, introduction to indeterminate structures.
Prerequisite for BGB144: BGB143
Credit Points: 4  Contact Hours: 2 per week (both)

**BGB151 CONSTRUCTION I**
Offered: Autumn
Materials and methods - the uses of materials and construction in single and two storey domestic structures - site information and investigation, foundations, columns, upper floors, external and internal walls, finishes, etc. Environmental, structural and aesthetic requirements of these structures taking account of the constraints such as costs, dimensional requirements, statutory regulations, life and adaptability and manufacturing and erection requirements. Draughting - preparation of typical construction details and drawings.
Prerequisite: BGB151
Credit Points: 12  Contact Hours: 5.5 per week

**BGB154 CONSTRUCTION II**
Offered: Spring
This subject is designed to develop an understanding of the properties of materials, and how they behave in the manufacturing and construction process and how these considerations relate to form and structure. It includes a studio and practical back-up to the lecture program. Students will be required to prepare working details of building components, co-ordination of building elements for specific building use.
Prerequisite: BGB151
Credit Points: 14  Contact Hours: 7 per week

**BGB161 BUILDING STUDIES I**
Offered: Autumn
The uses of materials and construction in single and two storey domestic structures-site information, substructure, columns, upper floors, external and internal walls, finishes, etc. Environmental, structural, aesthetic, cost, statutory, dimensional, manufacturing and erection requirements. Factors in creating comfort situations in various climatic zones and their effect on building construction. Draughting - preparation of typical details and working drawings. Physical and chemical properties of materials such as timber, steel, concrete and clay products and how they affect their construction and structural qualities.
Credit Points: 14  Contact Hours: 5.5 per week

**BGB162 BUILDING STUDIES II**
Offered: Spring
The uses of materials and construction in single and two storey domestic structures under the elements - staircase, roof, internal and external walls, windows, doors, finishes.
Environmental, structural and aesthetic requirements, taking account of constraints such as costs, dimensional requirements, statutory regulations, life and adaptability and manufacturing and erection requirements. Draughting - preparation of typical construction details and drawings.
Prerequisite: BGB161
Credit Points: 9  Contact Hours: 3.5 per week

**BGB164 BUILDING SERVICES I A**
Offered: Spring
A study of macro services to the community including water supply, sewerage, power, gas, telephone and other public services. Requirements of headworks and reticulations. A study of sanitation, septic tanks, absorption and transpiration beds, stormwater and sewerage disposal and garbage and refuse disposal. Hydraulic engineering services associated with buildings. Water supply (including fire fighting and hot water), sewerage and sanitary plumbing with a study of relevant Acts and laws, including sizing and testing of main and gravity fed services.
Credit Points: 6  Contact Hours: 2.5 per week

**BGB166 URBAN ECONOMICS**
Offered: Spring
An explanation of economic and financial aspects of the property and construction industries. This will cover the environment in which these industries operate, their structure, operation and control and the financial aspects of development projects.
Credit Points: 4  Contact Hours: 2 per week

**BGB243 LAW I - BUILDING ACTS & REGULATIONS**
Offered: Spring
Co-requisite: BGB254
Credit Points: 5  Contact Hours: 2 per week
**BGB245 MEASUREMENT OF CONSTRUCTION IB**

Offered: Autumn

Detailed study and instruction in the process and methods of taking off and billing quantities in the trades of excavator, concretor, bricklayer, blocklayer and carpenter for simple buildings.

Prerequisites: BGB154, BGB131

Co-requisite: BGB253

Credit Points: 6 Contact Hours: 3 per week

**BGB246 MEASUREMENT OF CONSTRUCTION IIB**

Offered: Spring

Detailed study and instruction in the process and methods of taking off and billing quantities in more complex building solutions in the trades excavator, concretor, bricklayer and blocklayer in simple basement, underpinning, pier and beam, R.C. frame and suspended slabs. Detailed study and instruction in the process and methods of taking off and billing quantities in the trades asphalt and built up roofing, demolition, mason, structural steel and precast concrete.

Prerequisites: BGB253, BGB245

Co-requisite: BGB254

Credit Points: 8 Contact Hours: 4 per week

**BGB247 MATERIAL SCIENCE III**

Offered: Autumn

Elements of material sciences: introduction to atomic structure and bonding and its effects on a material's engineering property. Elementary metallurgy of iron and steel. Non-ferrous metals and alloys. Joining of metals, fatigue, creep, brittle and ductile fractures, corrosion and protection. Properties, manufacture, use and analysis of fibrous cement, wood products, ceramics, polymers, paints, sealants and mastic products. Investigation into the material's strength, density, hardness, porosity, plasticity, elasticity, deterioration, optical, electrical, thermal and acoustic properties.

Prerequisites: BGB103, BGB104

Credit Points: 4 Contact Hours: 2 per week

**BGB253 CONSTRUCTION III**

Offered: Autumn

Extending the scope of Construction I and II to include a range of structures from industrial single to multi-storey residential buildings. Study management, planning, and co-ordination necessary for successful construction including site layout, site establishment and material handling processes. Construction draughting and detailed drawings. Site visits and/or workshop.

Prerequisites: BGB154, BGB103, BGB104

Credit Points: 10 Contact Hours: 5 per week

**BGB254 CONSTRUCTION IV**

Offered: Spring

An extension of Construction I, II and III, dealing with multi-storey commercial buildings.

Prerequisite: BGB253

Credit Points: 12 Contact Hours: 6 per week

**BGB257 STRUCTURES III**

Offered: Autumn, Spring

Analysis of indeterminate structures, frame analysis, moment distribution, design of steel connections and structures, concrete columns and walls, composite beams, theory of prestressed concrete, brickwork and concrete masonry design, design of retaining walls, substructures and foundations. Use of computers in structural design.

Prerequisites: BGB103, BGB104, BGB143, BGB144

Credit Points: 4 (both) Contact Hours: 2 per week (both)

**BGB261 BUILDING STUDIES III**

Offered: Autumn

Study of the materials and construction of a range of structures from industrial single to multi-storey residential buildings - substructure, columns and upper floors, staircases, roof, external and internal walls, windows and doors, finishes, fire protection and fittings. Environmental, structural, aesthetic, cost, statutory, dimensional, manufacturing and erection requirements. Draughting - preparation of typical details and working drawings. Material science - physical and chemical properties of materials such as non-ferrous metals and alloys, fibrous cement, ceramics, polymers, paints and sealants and how they affect their construction and structural qualities.

Prerequisite: BGB162

Credit Points: 12 Contact Hours: 5 per week

**BGB262 BUILDING STUDIES IV**

Offered: Spring

An extension of Building Studies III, dealing with multi-storey commercial buildings. It also looks at design appraisal - effect of design on users comfort, safety, energy usage, orientation, materials, layout, services, ageing and aesthetic composition.

Prerequisite: BGB261

Credit Points: 12 Contact Hours: 5 per week

**BGB263 VALUATIONS I**

**BGB268 VALUATIONS II**

Offered: Autumn, Spring

Prerequisite for BGB268: BGB263; 7 (BGB268)

Credit Points: 5 (BGB263); 7 (BGB268) Contact Hours: 2 (BGB263); 3 (BGB268) per week

**BGB264 BUILDING SERVICES IIIA**

Prerequisite: BGB262

Credit Points: 3 Contact Hours: 1.5 per week
BGB341 BUILDING & CIVIL ENGINEERING CONSTRUCTION
Offered: Autumn
Civil Engineering techniques commonly used in excavation of large project sites, involving bulk excavation, earth and rock retaining systems, and rock excavation and explosive handling. Discussion on dewatering and techniques of pile driving, bored pier and special foundation construction. Problems faced in the demolition of structures, particularly those associated with prestressed concrete construction. Roadworks - techniques, stabilised construction and surface sealing and associated bridge construction. Particular attention is given to the need for falsework and temporary works and their effect on cost.
Credit Points: 4 Contact Hours: 2 per week

BGB342 LAW II - PRINCIPLES & PROPERTY
Offered: Autumn
Credit Points: 3 Contact Hours: 1.5 per week

BGB343 ECONOMICS OF THE CONSTRUCTION INDUSTRY
Offered: Spring
Branches of economics. Applied economics. Features of the macro economy. Demand, supply, prices and stocks. Market structures, competition, collusion, integration and concentration. Real property markets, tenure, markets and sub markets. Structure of the construction and housing industries, composition and characteristics. Demand for dwellings, the deposit gap, public housing, rental markets. Pricing mechanism, application to land, contract and speculative projects, etc. Cost analysis, cost components in housing, problems of rising costs and effects of time delays, etc. Finance industries, types and use of finance, use of gearing, risk considerations, cash flow, causes of failure of developer and builder firms.
Credit Points: 4 Contact Hours: 2 per week

BGB345 HYGIENE & SANITATION
Offered: Spring
Subject description as for BGB164.
Credit Points: 4 Contact Hours: 2 per week

BGB361 BUILDING SERVICES IIA
Offered: Autumn
Co-requisite: BGB261
Credit Points: 10 Contact Hours: 4 per week

BGB342 PROPERTY MARKETING
Offered: Spring
Characteristics of the Australian property market, the nature of the marketing problems. The marketing plan: the mix, implementation of plan and sales forecast; pricing decisions, approach to selling; consideration of sales particulars and auction catalogues. Promotional decisions: determination of budget size, media decision and sales promotion; technological advances and market changes. Real estate brokerage and the application of marketing principles to residential, commercial, industrial and special and overseas properties. Marketing in international markets. Negotiation skills development.
Credit Points: 7 Contact Hours: 3 per week

BGB363 VALUATIONS III
BGB364 VALUATIONS IV
Offered: Autumn, Spring
Prerequisite for BGB363: BGB268
Credit Points: 5 & 7 respectively Contact Hours: 2 & 3 per week respectively

BGB367 REAL ESTATE ACCOUNTING I
Offered: Autumn
Credit Points: 4 Contact Hours: 2 per week
BGB368 REAL ESTATE ACCOUNTING II
 Offered: Spring
 Budgeting and cost accounting, the production function, decision and control aspects of production, cost accounting, cost flows, cost types, cost classification, costing systems, standard costing and variance analysis, flexible budgets and budgetary control, performance and evaluation. Company finance - objectives of the finance function, use of financial indicators, debt equity sources of funds, financial versus capital structure, financial risk and gearing, cost of capital. Cash flow management - decision making using cash flow management techniques viz. purchase vs lease etc. Working capital management and short term investment criteria. Capital budgeting for an on-going business. Project sorting and budgeting.

Prerequisite: BGB367
Credit Points: 7 Contact Hours: 3 per week

BGB401 BUILDING ECONOMICS & COST PLANNING
 Offered: Spring
 The aim of this subject is to provide students with a greater understanding of the law relating to building and engineering agreements, and of practices relating in the building industry. It includes contract law - elements, formation and discharge of a contract. Contents of a valid contract - misrepresentation, collateral contract implied terms. Contract documents and their interpretation. Remedies for breach of contract. The building contract process: consideration of the major provisions in Australian Standard Forms of Building Contract.

Credit Points: 4 Contact Hours: 2 per week

BGB403 BUILDING MANAGEMENT I
 Offered: Autumn

Co-requisite: BGB253
Credit Points: 4 Contact Hours: 2 per week

BGB404 BUILDING MANAGEMENT II
 Offered: Spring
 A study of advanced management principles and their application to site administration and management.

Credit Points: 4 Contact Hours: 2 per week

BGB405 PROJECT EQUIPMENT & SAFETY
 Offered: Spring

Co-requisite: BGB254
Credit Points: 4 Contact Hours: 2 per week

BGB406 BUILDING FINANCIAL MANAGEMENT II
 Offered: Spring

Prerequisites: ACB281, BGB403
Credit Points: 4 Contact Hours: 2 per week

BGB440 LAW III - BUILDING CONTRACTS
 Offered: Autumn, Spring
 The nature of value. Effect of supply and demand of land and buildings. Investment value and occupational value. Types of landed property, the incidents of their tenure, the outgoings, and comparison with other forms of investment. Rates of interest required from different types of property. Calculating rental value and net income and capitalization of net income. Use of valuation tables. Liability for dilapidations. Meaning and liability for legal and equitable waste. Implied, express contract covenants and statutory obligations to repair between landlord and tenant. Landlords' remedies for breach of covenant to repair. Liability for injuries to third parties.

Credit Points: 3 Contact Hours: 3 per week

BGB442 VALUATIONS & DILAPIDATIONS
 Offered: Autumn, Spring

Co-requisite: BGB253
Credit Points: 5 Contact Hours: 2.5 per week
**BGB44 MECHANICAL & ELECTRICAL ESTIMATING**

*Offered: Autumn*

Outline of the various mechanical and electrical systems and the parameters influencing their design and application. Types of estimates and tenders. Breakdown of preliminaries. Trade awards and wage rates. Take off procedures under major sections of works including costing and estimating make-up calculations. System costs in relation to total building, floor area, operating and maintenance cost, builders allowance for each system.  
*Prerequisites: BGB013, BGB014*

Credit Points: 4  
Contact Hours: 2 per week

**BGB44 ESTIMATING I**

*Offered: Spring*

Building trades award and wages rates. Hourly rate build up for equipment and trade services. Calculation of preliminaries for a small suburban project.  
*Prerequisites: BGB006, BGB254*

Credit Points: 5  
Contact Hours: 2.5 per week

**BGB451 COMPUTER SOFTWARE APPLICATIONS I**

*Offered: Autumn*

The series of lectures in this subject is to be used to study in depth the preparation of Bills of Quantities using various commercially available computer software packages. The student will be given “hands-on” experience in the following: setup of base accounts, trades, headings, etc; measurement input; editing, correction and data manipulation; report generation and formatting; development of labour constants, standard rates and standard items; pricing, tendering, spreadsheet application. It also deals with contract administration software packages, encompassing set up of base accounts, variation control, rise and fall and final accounts; and progress payments and cash flow forecasts.  
*Prerequisites: BGB014, BGB443*

Credit Points: 4  
Contact Hours: 2 per week

**BGB452 COMPUTER SOFTWARE APPLICATIONS II**

*Offered: Spring*

This subject covers the preparation of cost plans/estimates using various computer software packages, and includes set up of base accounts including parameter specifications; elemental and detailed estimate measurement; editing, correction and data manipulation; report generation and formatting; development of labour constants, standard rates and standard items; pricing, tendering, spreadsheet application. It also deals with contract administration software packages, encompassing set up of base accounts, variation control, rise and fall and final accounts; and progress payments and cash flow forecasts.  
*Prerequisites: BGB254*

Credit Points: 4  
Contact Hours: 2 per week

**BGB461 MEASUREMENT OF CONSTRUCTION V**

*Offered: Autumn*

Detailed study and instruction in the process and methods of taking off and billing quantities in complex basement and foundation work in the trades of plumbing and drainage. Study and instruction will also be applied to complex structural systems in suspended slabs and walls.  
*Prerequisite: BGB010*

Credit Points: 3  
Contact Hours: 1.5 per week

**BGB462 MEASUREMENT OF CONSTRUCTION VI**

*Offered: Spring*

Detailed study and instruction in the process and methods of taking off and billing quantities in the trades of mechanical and electrical engineer, external works and preliminaries. Detailed study and instruction in the process of Bill of Quantity presentation and the prospects for computer usage in Bill of Quantity preparation.  
*Prerequisites: BGB013, BGB014, BGB443*

Credit Points: 4  
Contact Hours: 2 per week
BGB526 POST CONTRACT SERVICES I
BGB653 POST CONTRACT SERVICES II
Offered: Spring, Autumn
An in-depth study in the method of adjustment of provisional items in the contract; a study of rise and fall entitlements under various formulae, methods of preparing valuation certificates for progress payments, and modern control techniques used on jobs during the construction period including review of relevant contractual clauses applicable to all items within semester study. An in-depth study of various aspects of Quantity Surveying practice including adjustment to the contract sum for variations, feasibility studies and different types of contractual arrangement and selection of contractors.
Credit Points: 5 (both) Contact Hours: 2.5 per week (both)

BGB529 PM2 - QUANTITATIVE TECHNIQUES
Offered: Autumn
Prerequisites: BGB403, BGB404
Credit Points: 5 Contact Hours: 2.5 per week

BGB540 ESTIMATING II
Offered: Autumn
Build up of a typical rate for the following trade items: demolition, dewatering, piling, underpinning, shoring/formwork to columns, beams, walls and slab systems/reinforcement tying and fixing; concrete placing rates; precast erection; scaffolding, gantries, hoists and cranes etc. Calculations of preliminaries for country and city project.
Prerequisites: BGB009, BGB010, BGB246, BGB446
Credit Points: 5 Contact Hours: 2.5 per week

BGB543 LAW 4 - TORTS & ARBITRATION
Offered: Spring
Prerequisite: BGB440
Credit Points: 3 Contact Hours: 1.5 per week

BGB547 PM3 - CONSTRUCTION PLANNING TECHNIQUES I
Offered: Autumn
This subject is designed to develop skills in the application of construction planning and control techniques. It includes bar charts. Critical path networks - arrow and precedence diagrams. Updating, control and reporting techniques. Line of balance. Resource levelling. Least-cost optimisation. Multiple activity chart.
Credit Points: 5 Contact Hours: 2.5 per week

BGB548 PM4 - CONSTRUCTION PLANNING TECHNIQUES II
Offered: Spring
The advanced application of quantitative techniques to construction planning and control. Planning and control for various types of projects. Expediting contracts. Misuse and abuse of planning, Floodline scheduling. Legal problems associated with CPM. Simulation techniques.
Prerequisites: BGB547 PM3
Credit Points: 8 Contact Hours: 4 per week

BGB550 PM5 - PROJECT COST CONTROL
Offered: Spring
This subject is designed to develop skills in the financial planning and cost control of the construction project. It deals with a variety of topics including the development time relationship, cost consequences of design decision. Preconstruction budget, budget management, materials control. Performance analysis. Trend evaluation. Forecasting techniques. Progress reports. Cost reports. Financial status reports. Computer applications in expenditure. Control and forecasting. Equipment policy. Equipment economics. Maintenance management. Contract administration including maintaining records, processing payments, negotiating extensions and prolongation claims, rise and fall, prescribed payments, sundry administration.
Credit Points: 6 Contact Hours: 3 per week

BGB552 OFFICE MANAGEMENT
Offered: Spring
A study of scale of fees and professional charges, code of ethics, letters of engagement, law involving the quantity surveyor and his client, professional indemnity, professional image and status. Office management and procedures.
Credit Points: 2 Contact Hours: 1 per week

BGB561 PROPERTY MAINTENANCE I
BGB562 PROPERTY MAINTENANCE II
Offered: Autumn, Spring
Prerequisite for BGB561: BGB164, BGB361, BGB269
Credit Points: 4 & 5 respectively Contact Hours: 2 & 3 respectively per week

BGB563 VALUATION - ADVANCED I
Offered: Autumn
Capital taxation as it affects property transactions. Valuations for development land tax, capital transfer tax and taxation of capital gains. Consideration of fiscal policy and tax planning as they affect the public and private property sectors. Valuations resulting from compulsory purchase with particular reference to land taken, part taken and where no land is taken.
Residential and business disturbance claims. Compensation resulting from adverse planning decisions. The compensation and betterment problem. Law and valuation. The Land Court, professional liability.

**Prerequisites:** BGB363, BGB364  
**Credit Points:** 5  
**Contact Hours:** 2 per week

**BGB564 VALUATION - ADVANCED II**  
**Offered:** Spring  
Valuation in the development sphere, with emphasis on the valuer's role in the development process; the structuring of development schemes in the private and public sectors with specific consideration of partnership schemes. Development potential and the effect of equity sharing schemes, capital budgeting, finance. A study of investment appraisal techniques and their application in the property sector. Portfolio management in the public and private sector, including selection, lease management, property maintenance and performance measurement. The conflict between investment theory and the problems/objectives of operational estate management.

The valuation of corporate assets for organisational and balance sheet purposes. Consideration of the valuer’s role and responsibilities. The treatment of depreciation of fixed assets for accounting purposes.

**Credit Points:** 5  
**Contact Hours:** 2 per week

**BGB565 TIME MANAGEMENT**  
**Offered:** Autumn  

**Prerequisite:** BGB161  
**Credit Points:** 8  
**Contact Hours:** 3 per week

**BGB567 REAL ESTATE PRACTICE I**  
**BGB568 REAL ESTATE PRACTICE II**  
**Offered:** Autumn, Spring  
These subjects explore in detail real estate practice, conveyancing, real estate law, marketing and office administration.

**Credit Points:** 4 & 5 respectively  
**Contact Hours:** 2 & 2.5 per week respectively

**BGB569 PROJECT COST MANAGEMENT I**  
**Offered:** Autumn  
Principles of project cost planning and control from project inception through design, pre-tender, tender, post contract and final account phases. Principles of measurement and preparation of Bills of Quantities, the pricing of construction work including preliminaries and overheads. An introduction to building economics and cost planning. Comparison of cost planning and approximate estimating. Cost implication of design variables - perimeter/floor area ratio, size of building/circulation space, storey height, column spacing, floor space and loadings. Variations, adjustment of prime cost and provisional sums and final accounts. Progress payments.

**Prerequisite:** BGB162  
**Credit Points:** 5  
**Contact Hours:** 2 per week

**BGB601 FORMWORK DESIGN & CONSTRUCTION**  
**Offered:** Autumn  
Objectives in formwork building, quality, safety, control. Formwork planning - re-use, materials and hardware, cost, hire or buy, erecting and stripping, scheduling. Types of materials, facing, finishes, hardware and fasteners. Loads and pressures on slab, beams, column and wall forms. Form design and design tables. Formwork drawing and detailing. Building and erecting formwork, architectural forms, precast concrete. Special techniques and pre-stressing. Proprietary formwork systems. Formwork will be designed in conjunction with the above but will only involve simple support beam or axially loaded props; more complex support systems will not be dealt with.

**Prerequisite:** BGB144  
**Co-requisite:** BGB253  
**Credit Points:** 4  
**Contact Hours:** 2 per week

**BGB606 PM8 - LAND DEVELOPMENT STUDIES**  
**Offered:** Spring  
The structure, operation and control of the land development industry including the political-economic framework, land use plans and approval mechanisms, potentially subdividable land, financial aspects of development projects, and trends and prospects in the house development industry.

**Credit Points:** 4  
**Contact Hours:** 2 per week

**BGB623 PM6 - BUILDING DEVELOPMENT TECHNIQUES I**  
**BGB624 PM7 - BUILDING DEVELOPMENT TECHNIQUES II**  
**Offered:** Autumn, Spring  

Authorities, development restrictions, services, profitability, commercial assessment, land values, options. Purchase - terms, legal documentation, consolidation, surveys. Commissioning design team-building use, facilities, quality, staging. Instruct consultants, analyse alternatives, value engineering, marketability, income and outgoings, commercial assessment from sketch through to working drawings. Cost and time control from sketch design to completion. Tender procedures and negotiations, contract documentation. Leasing, brochures, publicity, letting agents, targets. Authorisation of construction payments, monthly reports, coordination meetings. Financing projects and cash flow.

Financing projects and cash flow.

**Credit Points:** 4 (both)  
**Contact Hours:** 2 per week (both)

**BGB626 LAND DEVELOPMENT STUDIES**  
**Offered:** Spring  
Subject description as for BGB606.

**Prerequisites:** BGB663, LBP441, LBP444  
**Credit Points:** 4  
**Contact Hours:** 2 per week

**BGB642 APPLIED COMPUTER TECHNIQUES**  
**Offered:** Autumn  
An evaluation of the range of commercial and non-commercial computer programs designed for the construction industry.

**Prerequisites:** BGB548 PM4  
**Credit Points:** 6  
**Contact Hours:** 3 per week

**BGB643 LAW 5 - COMMERCIAL LAW**  
**Offered:** Spring  

**Credit Points:** 3  
**Contact Hours:** 1.5 per week
BGB647  COST PLANNING & COST CONTROL I
BGB648  COST PLANNING & COST CONTROL II
Offered: Autumn, Spring
The significance of construction economics for the client, the professions, the industry and society. Historical development, need for main aims of cost control. Comparing cost planning and approximate estimating. Cost implication of design variables - shape, size, perimeter, storey height, etc. Cost implications of construction methods, of site and market conditions, of prefabrication and industrialisation. Types of approximate estimates. Cost analyses, indices and data. Cost in use, maintenance and running costs, the life of buildings and components, effect of taxation and insurance.
Prerequisites: BGB006, BGB461, BGB462, BGB342, BGB540
Credit Points: 4 & 6 respectively
Contact Hours: 2 & 3 respectively

BGB656  BUILDING RESEARCH
Offered: Full year
Prerequisite: BGB341
Credit Points: 9
Contact Hours: 9 per week

BGB661  ELECTIVE RESEARCH PROJECT I
BGB662  ELECTIVE RESEARCH PROJECT II
Offered: Autumn, Spring
The subject is designed to develop an ability to disseminate and evaluate information and specialised knowledge and to acquire an understanding of research methodology. It encompasses the definition, history, financing, future prospects and management of research. Students may either select a research subject, test its workability, develop working procedures, prepare an outline for the study, draft the preliminary section and after a series of critiques, present a bibliographic report, or carry out a case study or project based upon an unusual or complex process within a relevant professional area, prepare a report and give an oral presentation.
Credit Points: 8 (both)
Contact Hours: 4 per week (both)

BGB663  PROJECT DEVELOPMENT PROCESS I
BGB664  PROJECT DEVELOPMENT PROCESS II
Offered: Autumn, Spring
An overview of the project development process from inception to occupancy as a prelude to detailed study of discrete parts of the process. Subject description as for BGB633/4.
Credit Points: 5 each semester
Contact Hours: 2 each semester

BGB665  PROPERTY MANAGEMENT I
BGB666  PROPERTY MANAGEMENT II
Offered: Autumn, Spring
Credit Points: 4 & 6 respectively
Contact Hours: 2 & 3 per week respectively

BGB667  APPLIED COMPUTER TECHNIQUES
Offered: Spring
The subject is designed to give students hands-on experience and to demonstrate contemporary commercial software. On completion of the subject, students should be able to evaluate a range of commercial and non-commercial computer programs designed for the property development and construction industry. It covers accounting and cost control packages; feasibility studies, etc.; maintenance packages; and CPM, network analysis techniques.
Credit Points: 6
Contact Hours: 3 per week

BGB668  LAW 6 - VALUATION OF LAND
Offered: Autumn
The aim of this subject is to provide students with a better understanding of the basis upon which valuations of land are made for the levy of rates and taxes and the assessment of compensation for compulsory acquisition. It encompasses review of land, fixtures, plant, improvements, tenure, interests of land. Valuation - market, capital, unimproved, annual and site values. General principles - assessment of value. Valuation methods - urban and rural lands. Goodwill and business disturbance. Compensation upon compulsory acquisition. Mines and mineral bearing lands. Licensed premises. Valuation of strata title property. Valuer as an expert witness. Valuation appeals procedures.
Co-requisite: BGB563
Credit Points: 4
Contact Hours: 2 per week

BGP412  PROPERTY MAINTENANCE
Offered: Autumn
Nature and importance of building maintenance; maintenance standards; statutory requirements; cost control and taxation.
Credit Points: 6
Contact Hours: 2 per week

BGP414  TIME MANAGEMENT II
Offered: Spring
This subject is designed to develop an understanding and a high level of competence in the design of planning and control techniques for all stages of project management. It is expected that students will understand basic planning techniques. The subject covers updating, control and reporting techniques. Using CPM networks. Resource, time and cost analysis of CPM and PERT. Production planning and control using line of balance/flowline techniques. A critical examination of CPM and case studies on its misuse and abuse in contracts. Development of basic planning to produce detailed repetitive production planning of project components and elements, including cycle times and balancing. Planning for various
project types and its processes, including systematic analysis of methods, techniques and alternatives. Use of multiple activity charts in planning and monitoring progress, and material handling time analyses in repetitive projects.

Credit Points: 6  Contact Hours: 2 per week

**BGP417 DESIGN MANAGEMENT**
Offered: Autumn
The aim of this subject is to provide the student with an understanding of the nature of design and a knowledge of all factors which influence the process of design. It includes planning, managing and controlling the design process from inception to detail documentation; decision sequences in design; appreciation of the consequence of design decisions on the total project; the interrelationships between architectural design and engineering and services design requirements; briefing techniques; cost control; and building maintenance manuals.

Credit Points: 6  Contact Hours: 2 per week

**BGP422 ADVANCED VALUATIONS**
Offered: Spring

Credit Points: 6  Contact Hours: 2 per week

**BGP426 PROJECT DEVELOPMENT**
Offered: Full year

Credit Points: 6  Contact Hours: 2 per week

**BGP429 COST MANAGEMENT & ECONOMICS**
Offered: Full year

Credit Points: 6  Contact Hours: 2 per week

**BGP430 CURRENT ISSUES**
Offered: Full year
This subject is to be seen very much as an integrative study area. There are two main strands of integration: the integration, under the project management umbrella, of areas already studied; and the integration of recent and topical developments in the area of project management. Areas may include: quality management, buildability, value analysis, case studies, industrial relations, computer applications and selection, technology, information systems IT and AI, international project management, simulation exercises (Arousal, Bicrep), recent developments in law, and global land development. It is expected that many of these topics will be covered by guest speakers from industry or presented in the form of seminars.

Credit Points: 9  Contact Hours: 3 per week

**BGP431 PROJECT MANAGEMENT I**
Offered: Autumn
This subject is designed to introduce the student to basic theory in the areas of communication, management and organisation as it applies to the project situation. It encompasses communication - process, skills, environment, applications; management theory and organisation theory.

Credit Points: 6  Contact Hours: 2 per week

**BGP432 PROJECT MANAGEMENT II**
Offered: Spring

Credit Points: 6  Contact Hours: 2 per week

**BGP433 PROJECT MANAGEMENT LAW**
Offered: Full year

Credit Points: 6 each semester  Contact Hours: 2 per week

**BGP434 TIME MANAGEMENT I**
Offered: Autumn

Credit Points: 6  Contact Hours: 2 per week

**BGP437 FIELD TRIP**
Offered: Spring
An experiential field trip of 5 days duration in an adventure style environment. The emphasis will be on team building, working in a stressful environment, communication skills, personal discovery and extension, and building trust and relationships. The activities will be oriented to achieving greater awareness of and competence in the above areas.

Credit Points: 6  Contact Hours: 5 days

**BGP438 REAL ESTATE INVESTMENT & ECONOMICS**
Offered: Autumn
ergonomics to design.

- BGP439 PROPERTY MANAGEMENT
  Offered: Autumn
  Credit Points: 6  Contact Hours: 2 per week

- BGP440 RESEARCH METHODOLOGY
  Offered: Autumn
  This subject is to enable the student to apply recognised research techniques to the production of high quality research and to enable the student to write a dissertation in the correct format. Referring, Hypotheses. Different methods of investigation. Formation of questionnaires, interviews, etc. Sampling, sample size.
  Credit Points: 3  Contact Hours: 2 x 7 weeks

- BGP441 STATISTICS
  Offered: Autumn
  Collection and presentation of data. Probability and probability distribution. Normal, t, F and chi distributions. Statistical estimation and tests of hypotheses based on these. Introduction to non-parameter tests of hypotheses. Regression and correlation.
  Credit Points: 6  Contact Hours: 2 per week

- BGP442 DISSERTATION
  The dissertation may be of a research or investigative nature on any approved area related to project management. Suitable topics will be discussed and arranged with course members each year. Each student will be assigned a supervisor and will be examined in a dissertation format. Referring. Hypotheses. Different methods of investigation. Formation of questionnaires, interviews, etc. Sampling, sample size.
  Credit Points: 19.5  Contact Hours: 2 per week

- BTP100 INTRODUCTORY DESIGN I
  Offered: Autumn
  The greater part of the course will consist of studio work in freehand and mechanical drawing techniques, applied to a variety of subject matter at different environmental scales. Topics covered include: contour, texture and tone; depth perception, optical illusions and the principles of perspective; techniques of perspective drawing; the organisation of the visual field and the gestalt 'laws of pragmagn'; pattern in two and three dimensions; visual interest and attention; visual dynamics; and principles of scale drawing.
  Credit Points: 18  Contact Hours: 8 per week

- BTP101 THE HUMAN ENVIRONMENT I
  Offered: Autumn
  The aim of this subject is to provide a basic understanding of the dimensions and movement of the human body, and of its perceptual systems, as an essential preliminary to the design of all artefacts for human use. The course consists of lectures and studio exercises. Lecture topics include: static and dynamic anthropometry; human sensory systems; introduction to ergonomics; applications of anthropometrics and ergonomics to design.
  Credit Points: 4  Contact Hours: 2 per week

- BTP102 HISTORY OF THE BUILT ENVIRONMENT I
  Offered: Autumn
  The course reviews the development of man's artificial environment and its relationship to ideas, technology, and the fine arts from the earliest times to the seventeenth century.
  Credit Points: 6  Contact Hours: 3 per week

- BTP103 ENVIRONMENTAL STUDIES I
  Offered: Autumn
  Man's place in nature. Some concepts of ecology - concept of the ecosystem, energy in ecosystems, interactions in the natural environment. Population, resources and pollution - concept of the population, man as part of the ecosystem, diversity as an ecological resource, resilience of natural systems, systems of overloading. Structure and function of essential biological systems. Environmental health.
  Credit Points: 2  Contact Hours: 1 per week

- BTP110 APPLIED MATHEMATICS FOR DESIGNERS I
  Offered: Autumn
  Applications of plane and solid geometry in design revision of basic geometry; symmetry; construction and packing of solids; spherical geometry and its applications. Applications of trigonometry in design; revision of basic trigonometry; calculation of heights, distances, areas and volumes. Data collection and analysis in design; introduction to statistics; use of computers in data analysis; elements of computer programming.
  Credit Points: 6  Contact Hours: 2 per week

- BTP132 LIGHT & COLOUR STUDIES
  Offered: Autumn
  This subject extends the study of colour vision. colour harmony and contrast, mixing and the application of colour; examines a range of contemporary theories relating to the use of colour in design; and introduces the study of the qualitative effects of lighting on form and colour in interiors. Lecture topics include the physiological-psychological basis for colour relations and examine the range of techniques used to apply these theories in the design professions.
  Credit Points: 8  Contact Hours: 2 per week

- BTP135 MAP & AIR PHOTO INTERPRETATION
  Offered: Autumn
  Types, sources, uses and availability of maps and air photos, map reading, understanding of contours, land form and use of sections; methods and techniques of map production; introduction to photogrammetry and use of stereoscopes; introduction to remote sensing. Material will be covered by lectures, workshops, visits to map and air photo source organisations. Evaluation of this assessment will be by assignment and practical workshop(s).
  Credit Points: 2  Contact Hours: 1 per week

- BTP151 INTRODUCTION TO TECHNOLOGY
  Offered: Autumn
  This subject aims to provide basic knowledge on applied technologies, and how they relate to industrial processes and the subject. This subject consists of a series of lectures covering in a broad sense: different technological issues and their application in the content of technological evolution; factors related to technological changes; appropriate technologies.
  Credit Points: 2  Contact Hours: 1 per week
**BTB200 INTRODUCTORY DESIGN II**
Offered: Spring
Studio work: simple three dimensional design tasks at a variety of scales, and illustrating tasks associated with the five professions. Workshop and fieldwork will be related to studio exercises. Studies of the professions: a seminar course in which the work and roles of architect, industrial designer, landscape architect, urban and regional planner and interior designer will be explained and discussed by staff and practitioners and related to current work in the studio and to teaching in History of Built Environment II.
Prerequisite: BTB100
Credit Points: 16  Contact Hours: 8 per week

**BTB201 THE HUMAN ENVIRONMENT II**
Offered: Spring
This subject encourages the understanding of human behaviour by examination of relevant theories and processes, and skill acquisition and practical application to daily life. It encompasses basic research principles, perception, learning processes, motivation and problem-solving. Communication, characteristics and dynamics of group and interpersonal interactions. Stress and anxiety management. The role of the self-concept and locus of control in transactions with the world in general.
Credit Points: 4  Contact Hours: 2 per week

**BTB202 HISTORY OF THE BUILT ENVIRONMENT II**
Offered: Spring
A continuation of History of the Built Environment I. History of the following from circa 1600 AD: ideas, art, and three of the following (one of which must be the student's strand discipline) - Town and Country Planning, Landscape Architecture, Architecture, Interior Design, Industrial Design.
Credit Points: 10  Contact Hours: 5 per week

**BTB203 ENVIRONMENTAL STUDIES II**
Offered: Spring
A continuation of Environmental Studies I, covering the natural environment and its interactions with people. It looks at man's place in nature. Some concepts of ecology - concept of the ecosystem, energy in ecosystems, interactions in the natural environment. Population, resources and pollution - the ecology of populations, man as part of the ecosystem, diversity as an ecological resource, resilience of natural systems, systems of overheating. Structure and function of essential biological systems. Environmental health.
Credit Points: 2  Contact Hours: 1 per week

**BTB204 APPLIED SCIENCE FOR DESIGNERS II**
Offered: Spring
In laying the foundations of a scientific understanding of the physical environment and the technology by which it can be adapted to human use, this subject covers chemistry for environmental design; basic chemical properties of commonly occurring materials, natural and artificial; common chemical processes in buildings and artifacts.
Credit Points: 4  Contact Hours: 2 per week

**BTB205 APPLIED LAND SCIENCE FOR DESIGNERS**
Offered: Spring
This subject is concerned with establishing the foundations of a scientific understanding of the earth's surface. It includes earth science and climatology for environmental design; land forms and their origins; introduction to the physical properties and behaviour of soils and rocks in relation to the design professions.
Credit Points: 2  Contact Hours: 1 per week

**BTB210 APPLIED MATHEMATICS FOR DESIGNERS II**
Offered: Spring
Applications of plane and solid geometry in design: revision of basic geometry; symmetry; construction and packing of solids; spherical geometry and its applications. Applications of trigonometry in design: revision of basic trigonometry; calculation of heights, distances, areas and volumes. Data collection and analysis in design; introduction to statistics; use of computers in data analysis; elements of computer programming.
Credit Points: 6  Contact Hours: 3 per week

**BTB220 ERGONOMICS I**
Offered: Spring
To develop a scientific and research approach to problem solving and implementation of principles during the design education, this subject studies different aspects of human factors with an emphasis on their application to human-equipment interface.
Credit Points: 2  Contact Hours: 1 per week

**BTB235 INTRODUCTION TO INTERIOR TECHNOLOGY**
Offered: Spring
The subject has two purposes: to introduce the student to the elements of construction systems and construction materials and how these elements relate to form and structure; and to develop skills in measuring, surveying and recording information in existing spaces in buildings. Lectures deal with basic structural systems and building carcasses. Construction materials and finish materials are differentiated. Instruction in techniques of measuring and recording existing structures including the use of tapes, levels, photography, photogrammetry and the recording, storage and use of surveyed information.
Credit Points: 8  Contact Hours: 3 per week

**BTB300 DESIGN I**
Offered: Autumn
Lecture topics include: Scope of problem solving theory; Reitman's State Transformation Model; special characteristics of design problems; the task environment, the problem space, the solution space and their representation; problem difficulty, recognition and algorithmic methods; generate-and-test methods; heuristics; creativity and innovation; and general psychological theories of creativity. The theoretical base also encompass theories of and development in art, design and perception. The studio exercises, to which most of the time is devoted, are aimed at a range of problems within specific boundaries to focus on the systematic processes of design rather than on questioning the environmental implications of these processes.
Prerequisite: BTB200
Credit Points: 18  Contact Hours: 7 per week

**BTB301 THE HUMAN ENVIRONMENT III**
Offered: Autumn
The role of social, cultural, and historical variables in human - environment interactions. The social and cultural development of Australian urban environments, with particular reference to the local built environment. The study of human functioning in
The course will consist of lectures and studio work.

Lecture topics will include: introduction to common building materials, their properties and behaviour in use; the building as a system; technical innovation and its influence on design and performance; the influence of occupancy, environmental factors, materials and erection procedures in the choice of a construction method; elements of the small building and their function in the building system; historical and contemporary methods of construct small timber framed and masonry buildings. Studio work will consist of exercises in construction drawing related to the lecture topics. Lectures and studio work will be complemented by site visits and workshop practice.

Credit Points: 14  Contact Hours: 6 per week

**BTB315 MANUFACTURING TECHNOLOGY I**

Offered: Autumn

The course will consist of lectures and studio work. Lecture topics will include: metals, glass, ceramic, wood technologies in relation to product construction.

The relationship between the properties of materials and the industrial processes available for their fabrication. Applications of the study of materials, processes and their fabrication to product design including product development, systems and specifications for manufacture will be the subject of studio exercises.

Prerequisite: BTB220

Credit Points: 6  Contact Hours: 6 per week

**BTB341 INTRODUCTION TO THE PROFESSIONS**

Offered: Autumn

The concept of professionalism and contemporary social expectations of the environmental design professions. Current issues and controversies in environmental design and planning in Australia including resource conservation and degradation, and coastal, city centre and inner city development. Roles and ranges of employment within the two professions, Organisation and activities of the professional institutes. The powers, responsibilities and day to day
activities of landscape architects and urban and regional planners in different forms of private and public employment. The future directions, potentials and job opportunities of the two professions.

Credit Points: 3 Contact Hours: 1 per week

BTB344 ORAL PRESENTATION
Offered: Autumn
Formal oral presentation techniques including meetings, conferences, interviews and speeches (informative and persuasive). Evaluation and assessment is by oral report and presentation.

Credit Points: 3 Contact Hours: 1 per week

BTB400 DESIGN II
Offered: Spring
This subject aims to develop the design process in order to facilitate the capacity for application of available technologies and philosophies, consistent with encouragement of individual freedom in the forging of inherent and innovative approaches in seeking design solutions; to develop a rigorous and systematic methodology in the sciences and arts that constitute the design process; to concentrate attention on problems within specific parameters so that students are exposed to and involved in design rather than the broader area of problem solving; and to instill an appreciation of design as a capability of human beings.

Prerequisite: BTB300
Credit Points: 20 Contact Hours: 6 per week

BTB401 THE HUMAN ENVIRONMENT IV
Offered: Spring
Organisation of society; bureaucracy; other approaches to organisation and their structure; directing society; the roles of government and private enterprise; theories of power in society; Federal governments; the Australian example; three tiers of government; Australian constitution; Parliamentary democracy and procedures in State and Federal governments; Queensland State administration; role of local government, especially in Queensland; quangos and statutory authorities; pressure groups and lobby groups and their influence in the Built Environment arena; examples of interactions between government and built environment professions.

Credit Points: 4 Contact Hours: 2 per week

BTB403 ENVIRONMENTAL STUDIES IV - ENVIRONMENTAL IMPACTS
Offered: Spring
The impacts of particular types and processes of development; environmental impacts related to land uses, land and building development, production and use of consumer products, construction materials and processes; environmental criteria for future land and product development.

Credit Points: 2 Contact Hours: 1 per week

BTB406 VISUAL COMMUNICATION II
Offered: Spring
To concentrate on graphic applications in the specific professional areas represented by the School and to allow exploration of areas of particular individual interest and ability, emphasis is placed on development and application of skills and techniques previously covered and computer graphic techniques relevant to professional applications.

Credit Points: 4 Contact Hours: 2 per week

BTB407 DESIGN SCIENCE II
Offered: Spring
Continuation of the aims and principles as described in Design Science I. Basic design for hot humid climates. Principles governing air flow through and around buildings and spaces. Natural ventilation. Introduction to airflow in cities. Testing of airflow through and around models. Basic design for hot arid climates and for cold climates. Macro and micro climatic conditions and their evaluation for design. Manual and computerised climatic evaluation.

Prerequisite: BTB307
Credit Points: 2 Contact Hours: 1 per week

BTB410 BUILDING CONSTRUCTION II
Offered: Spring
The course will be conducted by the case study method, with lectures and studio work. Case studies will be selected to develop understanding of construction in breadth and depth. Each case study will be introduced by lectures explaining the system characteristics of the problem, the human and environmental factors which constrain the solution, and the technical systems which have been developed to deal with problems of this type. Students will then develop their own solution for a particular case in the studio. Lectures and studio work will be complemented by field studies and workshop practice.

Prerequisite: BTB410
Credit Points: 10 Contact Hours: 5 per week

BTB414 POPULATION & URBAN STUDIES
Offered: Spring
Within this subject students are introduced to urbanisation and its definition. Aspects of urban structure including size/function relationships, concentric zone theory, Hoyt's Settlement patterns and problems of rural settlements are discussed. The dynamics of urban areas; the relationships and requirements of urban activities (especially residential, work, and leisure activities); theories of city form and change; the problems of the CBD; the CBD fringe, and the urban/rural fringe. Case studies of Australian settlements.

Credit Points: 6 Contact Hours: 3 per week

BTB415 MANUFACTURING TECHNOLOGY II
Offered: Spring
The course will consist of lectures and studio work. Lecture topics will include application of principles of engineering mechanisms to products/systems in current technology. Analysis of the performance of mechanical, electrical, hydraulic and pneumatic mechanisms in relation to product evaluation and performance criteria. Application of engineering mechanisms and product performance checklists to design problems will be the subject of studio exercises.

Credit Points: 12 Contact Hours: 6 per week

BTB420 ERGONOMICS III
Offered: Spring
Different aspects of human factors with an emphasis on their application to human-equipping interface. The course will consist of lectures and laboratory exercises. Lecture topics will include: psychomotor skills, human information processing. Human machine interfaces, displays, controls and tools, human machine system properties, feedback, and controls, workspace design, noise, stress, vibration, legal aspect, safety and product liability.

Credit Points: 2 Contact Hours: 1 per week

BTB431 FURNITURE & FITTINGS II
Offered: Spring
The manufacture, assembly and fabrication of furniture, fittings and components. Lectures include the
expected performance of materials and furniture items, and will focus on functional, maintenance, life span, economic properties.

**BTB435 INTERIOR TECHNOLOGY II**
**Offered:** Spring
The subject will comprise lectures, tutorials and studio work complemented by site visits. The subject will deal with industrialised interior finishes, and construction of joinery and fittings and their interaction with the building shell and services. The notions of interior maintenance, life span economics will be introduced.

**Credit Points:** 8  **Contact Hours:** 4 per week

**BTB440 INTRODUCTION TO ECONOMICS**
**Offered:** Spring
An introduction to the basic economic problem of scarcity. Production possibilities are outlined together with various types of economic regimes. A simple macro-economic circular flow model is introduced. The household and trading sectors are outlined together with the role of government. Business cycles, inflation, unemployment, saving and investment are introduced and discussed. The second part of the subject deals with micro-economic concepts. The market system and associated concepts of demand, supply and price equilibrium are developed.

**Credit Points:** 2  **Contact Hours:** 1 per week

**BTB441 SITE PLANNING TECHNIQUES**
**Offered:** Spring
Introduction to the processes of site planning and detailed site design that lead to defendable and accountable solutions; role and objectives of survey and analysis phases; types of information required and the methods of processing the resultant data; data analysis, its scope and documentation; the use of data analysis to generate and evaluate possible problem solutions in conceptual form as a basis for strategic and master planning and the value of these processes as long term mechanism for adaptation of master planning to meet changing needs.

**Credit Points:** 2  **Contact Hours:** 1 per week

**BTB442 QUANTITIES & COSTS**
**Offered:** Spring
Measurement and costing of time, resources, and materials for professional services, production of documents, and implementation of projects. The techniques and tools available for both preliminary and detailed measurement and costing and their control.

**Credit Points:** 2  **Contact Hours:** 1 per week

**BTB444 APPLIED NATURAL SCIENCES**
**Offered:** Spring
This subject looks at continued or altered land use that is safe and healthy as human habitat and able to resist deteriorating agencies by remaining in tune with natural processes. Applied studies in geology and geomorphology, climate and micro-climate, soils and hydrology, and broad soil and plan community associations. The influences of these systems collectively and separately on environmental decision making. Lectures and field work are integrated with design studios and technology studies. Evaluation and assessment are by assignment and application in related study areas.

**Credit Points:** 4  **Contact Hours:** 2 per week

**BTB451 ARCHITECTURAL INTERIOR SYSTEMS I**
**Offered:** Spring
Lighting and acoustic considerations, human sensory and behavioural needs. An outline of systems and guidelines for selection and professional judgement.

**Credit Points:** 4  **Contact Hours:** 2 per week

**BTB500 DESIGN III**
**Offered:** Autumn
As the growth of design abilities is largely dependent upon practice and experience, the program will continue to maintain the major time allocation to studio and workshop exercises. Studies in theory will form an integral part but will be cross-referenced with other subject areas that give emphasis to the methodologies inherent in the roles of the professions represented by the School. The study program will allow for the exploration of optional design topics by students.

**Prerequisite:** BTB400

**Credit Points:** 20  **Contact Hours:** 6 per week

**BTB506 VISUAL COMMUNICATION III**
**Offered:** Autumn
This subject concentrates on processes and techniques employed in the production of three dimensional aids to design and presentation. The course will consist of a series of studio exercises in the production of rough mock-ups as an aid to the design process; scale modelling and choice of materials.

**Credit Points:** 4  **Contact Hours:** 2 per week

**BTB510 BUILDING CONSTRUCTION III**
**Offered:** Autumn
The course will be conducted by the case study method, and predominantly by studio work. Case studies will be selected to develop a thorough understanding of the construction of non-domestic buildings of intermediate size. Each case study will be introduced by lectures explaining the system characteristics of the building type, the human and environmental factors which constrain the solution, and the building systems which have been developed for the building type. Students will then develop their own set of solutions for a particular case. Studio work will be complemented by field work.

**Prerequisite:** BTB410

**Credit Points:** 17  **Contact Hours:** 6 per week

**BTB511 LANDSCAPE CONSTRUCTION**
**Offered:** Autumn
This subject aims to introduce students to materials and methods commonly used in landscape construction; and to develop skills in construction detailing and preparation of construction documents. Topics covered include the common building materials; an understanding of foundation soils; basic services of site stormwater drainage, water and electrical services; applied systems including paving, steps and ramps; and construction for planting and small water features.

**Credit Points:** 6  **Contact Hours:** 3 per week

**BTB517 BUILDING SERVICES I**
**Offered:** Autumn
Supply, connection and reticulation of electricity, gas, water and telephone services and relevant outlets and appliances. Sewerage, sullage and stormwater drainage as applicable to domestic buildings. Domestic waste disposal.

**Credit Points:** 4  **Contact Hours:** 2 per week
BTB527 DESIGN SCIENCE III
Offered: Autumn
Prerequisite: BTB407
Credit Points: 4 Contact Hours: 2 per week

BTB531 FURNITURE & FITTINGS III
Offered: Autumn
The aesthetic and practical possibilities of the decorative arts for interior design. The course will consist of lectures, field studies, and studio and workshop exercises. Lecture topics will include: general principles of ornamental design; decorative metalwork; stained glass; decorative ceramics; plasterwork; carved and inlaid woodwork; lacquer work; printed fabrics and papers; tapestry and embroidery.
Credit Points: 4 Contact Hours: 2 per week

BTB535 INTERIOR TECHNOLOGY III
Offered: Autumn
This subject continues Interior Technology I, with an emphasis on commercial construction systems and the impact of regulations. High rise buildings are examined, the planting of trellises, partitioning, and furniture systems. Special considerations for shopping centres, theatres, medical clinics, taverns and restaurants are highlighted.
Credit Points: 2 Contact Hours: 1 per week

BTB543 ENVIRONMENTAL STUDIES V - IMPACT ANALYSIS
Offered: Autumn
Credit Points: 4 Contact Hours: 2 per week

BTB546 LAND DEVELOPMENT I
Offered: Autumn
This subject is designed to illuminate the political, economic, and physical contexts of land development, and establish an understanding of the land development process; to study environmental services and utilities at the broad scale and their effects on land development; to examine the necessary design criteria for these services; and to explore contemporary techniques, future trends, and alternative systems. It looks at a range of topics including characteristics of land development projects; structure and operation of approval authorities; design considerations; impacts of electricity and gas systems on the natural environment; and transport systems planning.
Credit Points: 6 Contact Hours: 3 per week

BTB547 LAND USE GENERATION
Offered: Autumn
Credit Points: 4 Contact Hours: 2 per week

BTB551 ARCHITECTURAL INTERIOR SYSTEMS II
Offered: Autumn
An overview of the environmental systems used in buildings: air-conditioning and system performance, thermal and atmosphere control; the building as a comprehensive environmental system; and their impact on individual interior spaces.
Credit Points: 4 Contact Hours: 2 per week

BTB552 ECONOMICS OF INDUSTRIAL PRODUCTION
Offered: Autumn
This subject consists of series of lectures and seminars and covers the following aspects: business, costing, production, marketing, strategic planning and capital budgeting.
Credit Points: 4 Contact Hours: 2 per week

BTB556 MARKETING
Offered: Autumn
The aim of this subject is to develop an understanding of marketing concepts and their relation to industrial design; and to provide knowledge on methodologies of forecasting and their relation to industrial design. A series of lectures and seminars covers: marketing concept, market segmentation, marketing test, methodologies of forecasting, planning and organisation, costing of products, etc.
Credit Points: 4 Contact Hours: 2 per week

BTB558 MANUFACTURING TECHNOLOGY III
Offered: Autumn
The course will consist of lectures, studio work and field studies. Lecture topics will include: production techniques in relation to different materials, various methods for different finishing operations, various methods for forming, automatic and semi-automatic assembly and quality control methods. Field studies will consist of site visits to selected manufacturing industries. The application of the appropriate production technique should be developed through the design project.
Credit Points: 12 Contact Hours: 5 per week

BTB561 ECONOMICS OF TOWN PLANNING
Offered: Autumn
This subject is essentially micro-economic although the global and national macro-economic forces affect firms will be outlined. It introduces urban economics and the economic aspects of town planning issues; provides techniques for economic analysis suited to planning needs; and illustrates interactions with employment, industry, population and urban studies at the economic interface.
Credit Points: 5 Contact Hours: 2 per week

BTB562 REPORT PREPARATION
Offered: Autumn
The relationship between land use and traffic generation. The objective of this subject is to introduce students to alternative modes of transport; to methods for predicting future urban transport patterns; and to techniques of transport planning and management. It covers movement and its alternative modes - foot, cycle, car, bus, train, plane, pipeline, inland waterway and marine modes. The origin and destination approach to traffic management; interchange studies; inter-urban traffic and regional transport planning. The relationship between land use and traffic generation. Credit Points: 5 Contact Hours: 2 per week

**BTB563 TRANSPORT PLANNING**
Offered: Autumn
The objective of this subject is to introduce students to alternative modes of transport; to methods for predicting future urban transport patterns; and to techniques of transport planning and management. It covers movement and its alternative modes - foot, cycle, car, bus, train, plane, pipeline, inland waterway and marine modes. The origin and destination approach to traffic management; interchange studies; inter-urban traffic and regional transport planning. The relationship between land use and traffic generation. Credit Points: 2 Contact Hours: 1 per week

**BTB565 LANDSCAPE GRAPHICS**
Offered: Autumn
Combined application of frehand, drafting and colour techniques. The selection of colour, theme and emphasis in graphic packages. Realism, abstraction and symbolism in landscape communication. Monochromatic graphics for simple reproduction. Integration of various graphic techniques and media. Efficient processes for production and reproduction. Lectures and studio work. Evaluation will be based on evidence of skills and understanding through studio exercises and logbook/workbook. Credit Points: 2 Contact Hours: 2 per week

**BTB571 PLANT RECOGNITION & REQUIREMENTS**
Offered: Autumn
Field recognition by visual characteristics of size, form, texture and colour and by use of simple keys. Requirements of plants for growth in differing environments and the selection of species most suited to particular sets of environmental conditions. Basic botanical terms, plant nomenclature, collection and preservation of plant material, plant physiology and concepts of plant association will be introduced. Teaching consists of lectures, field work, workshops and the use of slides and films etc. Evaluation and assessment is by submission of annotated plant sketches and tests of both identification skills and basic terminology.
Credit Points: 4 Contact Hours: 2 per week

**BTB600 DESIGN IV**
Offered: Spring
The major time allocation will again be given to studio and workshop exercises. Studies in theory again form an integral part of design and will be cross-referenced to other subjects such as Dynamics II, Environmental Studies VI, Building Construction II, Industrial Construction II, Building Services III, Ecological Principles II, Land Development II, Interior Construction III, Visual Communication IV and External Services II. All students will pursue the same program providing specific inputs but with a limited range of specialisation through research studies and field exercises associated with the studio projects.
Prerequisite: BTB500
Credit Points: 20 Contact Hours: 6 per week

**BTB609 LAW OF THE BUILT ENVIRONMENT**
Offered: Spring
The law as a constraint in the design and construction process. Laws, regulations and their interpretation. A review of the Australian and Queensland acts, local authority by-laws and regulations of statutory authorities as they affect the built environment. Legal aspects of land and land transfer. Introduction to professional liability, design registration, patents and copyrights.
Credit Points: 16 Contact Hours: 6 per week

**BTB610 BUILDING CONSTRUCTION IV**
Offered: Spring
Continuing from Building Construction III. The course will be conducted by the case study method, and predominantly by studio work. Case studies will be selected to develop a thorough understanding of the construction of non-domestic buildings of intermediate size. Each case study will be introduced by lectures explaining the system characteristics of the building type, the human and environmental factors which constrain the solution, and the building systems which have been developed for the building type. Students will then develop their own set of solutions for a particular case. Studio work will be complemented by field work.
Prerequisite: BTB510
Credit Points: 14 Contact Hours: 6 per week

**BTB617 BUILDING SERVICES II**
Offered: Spring
Mechanical, electrical and hydraulic services and their integration in the design and construction of major buildings. Hydraulics: water supply, plumbing, drainage; fire services: sprinklers, alarms, extinguishers, emergency systems; electricity: supply, substations, switchboards, metering, reticulation; vertical transportation: lifts, escalators, hotels.
Prerequisite: BTB527
Credit Points: 4 Contact Hours: 2 per week

**BTB627 DESIGN SCIENCE IV**
Offered: Spring
Continuation of the aims and principles of Science III. Module G - continuation of module E (thermal performance of buildings). Module H - artificial lighting of interiors, lamp characteristics, colour rendering, modelling, lighting quality, simplified lighting design methods, and external lighting.
Prerequisite: BTB527
Credit Points: 2 Contact Hours: 1 per week

**BTB631 FURNITURE & FITTINGS IV**
Offered: Spring
This subject encompasses the development of a methodical approach to the choice of loose furniture, furniture systems and interior products; introduces both quantitative and qualitative assessment approaches; and extends the understanding of design of furniture and its integration into interiors.
Credit Points: 4 Contact Hours: 2 per week

**BTB635 INTERIOR TECHNOLOGY IV**
Offered: Spring
The subject will consist of lectures, tutorials and studio work. Lectures will concentrate on the technological assessment of interiors, structure, openings, environmental systems, artifacts and ambience of existing spaces with a view to utilising/changing what an existing space has to "offer". Tendering, consultants, leasing and tenancy-building interface will be examined.
Credit Points: 16 Contact Hours: 6 per week

**BTB640 PLANTING DESIGN**
Offered: Spring
Design characteristics and criteria. The use of plants as structural and design elements within landscape
principles to planting design. Scale. Design for change, growth, replacement and maintenance. Planting design in typical schemes such as streets, highways, parks, urban forecourts and interior plant-scapes, gardens and broadscale regeneration and stabilisation. Lectures, tutorials and a field visit will be held. Evaluation and assessment will be undertaken through a selected analytical exercise.

Credit Points: 3 Contact Hours: 1 per week

**BTB643 ENVIRONMENTAL STUDIES VI - ISSUES & ETHICS**

Offered: Spring

Case studies of successful solutions to environmental problems (e.g. Oregon, London, South Australia). Implications of major environmental problems and environmental awareness for urban form and policies. Environmental impacts of technological change. Contrasting attitudes towards conservation of natural, rural and urban environments. Concept of stewardship.

Credit Points: 2 Contact Hours: 6 per week

**BTB644 APPLIED ENVIRONMENTAL SCIENCE**

Offered: Spring

The basic principles of ecosystems are introduced and the concepts of plant community - environmental associations are strengthened. Methods and techniques of vegetation mapping and classification are introduced including use of air photo and remote sensing skills introduced previously. Environmental needs of plants in diverse built environments and nursery production of these plants are explored. Lectures include ones by specialist guests and field work is conducted. Evaluation and assessment will be by written assignment and field notes.

Credit Points: 6 Contact Hours: 1 per week

**BTB645 GRADING**

Offered: Spring

Techniques of land surface manipulation including the construction of platforms for building, carparks, sports ovals and other features and the associated provision of surface drainage. Lectures are accompanied by skill development exercises in a Grading Workbook concluding with the preparation of two set grading plans. Evaluation and assessment is based on the studio exercises and the grading plans.

Credit Points: 6 Contact Hours: 3 per week

**BTB646 LAND DEVELOPMENT II**

Offered: Spring

The problems associated with implementation of land development proposals and the means of achieving land development designs. Land development projects - financial aspects (private and community viewpoints), marketing aspects, the housing industries, problems confronting firms and the industry, trends. Spot developments - approval processes, development networks, financing and marketing aspects. A field trip is usually undertaken as part of this unit.

Credit Points: 4 Contact Hours: 2 per week

**BTB647 LAND USE POLICIES**

Offered: Spring

Review of the Government structure as applied to urban areas and regions. The levels of urban planning. How urban policies are made, and analysis of their effectiveness and implementation. Organisations as policy makers, and policy implementors. Areas of conflict and their resolution. Roles of various agencies involved; the various levels and types of land use planning, their powers, and their limits and practice. Major land uses and activities: work, housing, recreation, transport and welfare.

Credit Points: 4 Contact Hours: 2 per week

**BTB648 PUBLIC SERVICES**

Offered: Spring

The provision, organisation, and administration of community services other than public utility services. The subject covers definitions and concepts, historical perspectives, and measurement of community needs in relation to social infrastructural systems and services; health and welfare, education, law/order and safety, open space and recreation, cultural, administration, and communication. Planning objectives for service provisions and maintenance, siting requirements, design considerations, environmental considerations, recent trends and developments.

Credit Points: 4 Contact Hours: 2 per week

**BTB649 CONSERVATION THEORY**

Offered: Spring

Introduction to the concepts of conservation and preservation. Outline of the development and current status of the conservation movement. The structure of conservation legislation and responsibility in Australia. ICOMOS and the “Burra” charter. The particular requirements of places, landscapes and precincts in mixed or public ownership. Application of conservation concepts and their use in the National Listings process. Local and regional case studies.

Credit Points: 3 Contact Hours: 1 per week

**BTB653 VISUAL COMMUNICATION IV**

Offered: Spring

Visual communication techniques employed in the production of design presentations to clients. The subject consists of a series of studio exercises and mock-up presentations in a “forum” environment to aid the design process.

Credit Points: 4 Contact Hours: 2 per week

**BTB654 URBAN & REGIONAL PLANNING ELECTIVES**

Offered: Spring

Any approved subject selected from the undergraduate programs of the Faculty of the Built Environment, normally one of the Landscape Architecture courses. In special circumstances the elective may be selected from courses offered in other faculties of QUT or other approved university or college.

Credit Points: 4 Contact Hours: 2 per week

**BTB655 CAD FOR INDUSTRIAL DESIGNERS**

Offered: Spring

2D CAD used for the development of design concepts through to technical drawings. Evaluations of projects and their evolution through studies undertaken with three dimensional CAD, both wire frame and shaded.

Credit Points: 6 Contact Hours: 2 per week

**BTB656 HOUSING & COMMUNITY SERVICES**

Offered: Spring

Population change and households formation on techniques of analysis and projection of housing stock. Housing conditions and preference surveys: housing issues and policies. The economics of the building and land development industries. The physical place of educational institutions in communities - schools, colleges, universities. Shared use of facilities. Location...
and space standards. Social and welfare services and their role in the community. Planning and management aspects of welfare.

Credit Points: 4 Contact Hours: 2 per week

BTN1658 MANUFACTURING TECHNOLOGY IV
Offered: Spring
This course is designed to develop an understanding of advanced manufacturing processes and materials; and to provide knowledge of advanced manufacturing production techniques and how they relate to product design solutions. Lecture topics will include: organisation, planning and technologies required for CIM (computer-integrated manufacturing). The impact of CIM to product design solutions; advanced materials and their applications. Field studies will complement the lecture series. The application of CIM should be developed through the design project.

Credit Points: 14 Contact Hours: 5 per week

BTN663 URBAN PLANNING I
Offered: Autumn
Building upon preliminary planning knowledge, urban growth theory and constraints are outlined. Population and employment changes and their effect on employment, industry and residential location are identified together with relevant definition and analytical techniques. Introduction to economic base studies, activity rates and use of multipliers. The urban labour market, unemployment and labour supply are outlined. Theory and methods of industry location are developed: types and needs of industry, retailing, retail hierarchies; office activities, office location; shopping centres; and office, industrial and corporate parks. The role of government and the impact of the post-industrial society are considered.

Credit Points: 9 Contact Hours: 3 per week

BTN101 URBAN DESIGN ANALYSIS STUDIO
Offered: Autumn
The emphasis within this subject is on the development of skills in analysis related to the urban design process and adequate communication of the results. Each student will be required to undertake two studies, one chosen from each of two groups typically: city interpretation or townscape appraisal, and housing morphology or pedestrian environments. Where applicable, work in other units of study will be incorporated into this subject. Field work will be incorporated as necessary.

Credit Points: 9 Contact Hours: 3 per week

BTN102 URBAN DESIGN CONTEXT STUDIO
Offered: Spring
Aim: to develop design skills required for relating new development to existing urban contexts. Each student will be required to undertake two studies, one from each of two groups typically: a community participation project or a sense of place project and a conservation and infill project for the redevelopment/rehabilitation of either an urban precinct or a residential area. Where applicable, work in other units of study will be related to this subject.

Credit Points: 9 Contact Hours: 3 per week

BTN103 URBAN DESIGN CONJECTURE STUDIO
Offered: Autumn
Identification and classification of approaches to urban design. The setting of objectives, the adoption of a method and the testing of implications for a particular urban design problem type. Each student will be required to undertake one study chosen typically from: local area, precinct, part of the city, the city as a whole. Where applicable, work in other units of study will be incorporated into this subject.

Credit Points: 9 Contact Hours: 3 per week

BTN104 URBAN DESIGN GUIDELINES STUDIO
Offered: Spring
Each student will be required to develop design guidelines for an urban complex, typically one of the following: a regional centre, a tourist development or a housing development and then to test a design guideline produced by a fellow student for a project other than the one used for his/her own design. Where applicable, work in other units of study will be related to this subject.

Credit Points: 9 Contact Hours: 3 per week

BTN105 URBAN DESIGN FIELD STUDIES STUDIO
Offered: Autumn
Aim: To provide students with direct experience of a range of recent and current urban design problems in Australia. The work in this subject will consist of a field trip of approximately two weeks duration. Visits will be paid to successful and unsuccessful examples of urban design and to design offices in the eastern states and the Australia Capital Territory.

Credit Points: 9 Contact Hours: 3 per week

BTN201 URBAN DESIGN HISTORY OF URBAN SYSTEMS
Offered: Autumn
This subject will offer a systematic analysis of urban forms and systems in the pre-industrial and post-industrial periods. Specific topics will include urban activities (commerce, manufacture, administration, dwelling, recreation and culture) -urban services (water supply, transportation, defence and public order, fire control, sewerage and waste disposal, fuel and power, public information)- urban form (planning for intelligibility, planning for propriety and symbolism, planning for delight).

Credit Points: 3 Contact Hours: 1 per week

BTN202 THE URBAN ENVIRONMENT & BEHAVIOUR I
BTN203 THE URBAN ENVIRONMENT & BEHAVIOUR II
Offered: Autumn, Spring
The city as a product and an influence on human behaviour. This subject will be studied over two semesters and will offer an organising framework for the investigation of interactions between people and the urban environment. Specific topics will include user groups and their spatial and temporal distribution, the impact of changing lifestyles, life cycles in the city, groups at risk, cultural norms and attitudes to the city, interpersonal and group behaviour in urban settings, individual behavioural responses, cognitive and evaluative responses, and psychophysical responses. Methods of observation and recording will be discussed in relation to each topic.

Credit Points: 3 (each) Contact Hours: 1 per week (each)

BTN204 URBAN DESIGN THEORY & CRITICISM
Offered: Autumn
This subject covers a range of theoretical and critical writing about urbanism and urban design, with particular attention to the twentieth century. This subject...
will be studied over two semesters and will investigate the characteristics of 'good theory' in the field of urban design in relation to the work of a number of theoretical writers and schools. Specific topics will include theoretical writing on urban design before 1800, theory and practice in the nineteenth century, the 'Künstlerischen Grundsätzen' of Camillo Sitte, the Green Movement, Le Corbusier and Modernism, Rowe and the city as independent artefact, Cantor, Pahl and Tuan on the phenomenology of the city, and Maitland's analysis of urban design concepts.

Credit Points: 6 Contact Hours: 1 per week

BTN301 CONSERVATION & RE-USE IN URBAN DESIGN
Offered: Spring
Conservation principles and practice in the urban context, including the modification of existing fabric for re-use. Conservation of urban landscape, townscape, and urban structures will be considered. Specific topics will include conservation criteria (historical, aesthetic, environmental, sociological), conservation principles, and evaluation for level of conservation on social and economic bases, conservation issues (private ownership, equity, acquisition, compensation, incentives), existing Australian and other heritage guides, conservation organisation, conservation methods, examples of urban conservation.

Credit Points: 3 Contact Hours: 1 per week

BTN302 THE URBAN LANDSCAPE
Offered: Spring
The city as a landscape unit, notable examples of city/site relationships; contribution of natural factors and patterns (topography, soils, drainage, vegetation, climate) towards better delineation of urban form and character. Spaces and their organisation, the city as spatial entity, sequential experience; spaces for specific purposes; the choreography of spaces - use, settings, and furnishings (enclosure, floors, overhead structures, services, features, finishes). Natural elements and their nurture within urban areas - vegetation species, groupings, and their requirements (streets, plazas, forecourts, roofs, parks, urban forests, natural areas); water bodies and their conservation as healthy feature; urban wildlife - habitats and contribution to the urban experience; landscape conservation techniques in urban areas.

Credit Points: 3 Contact Hours: 1 per week

BTN303 TRANSPORT & MOVEMENT SYSTEMS IN URBAN DESIGN
Offered: Autumn

Credit Points: 3 Contact Hours: 1 per week

BTN304 URBAN CLIMATE & SERVICES
Offered: Autumn
Urban Climate - the science of urban climate and design for micro-climatic comfort: effects on climatic factors of solar radiation, air movement, temperature, precipitation, glare, daylight control, etc. of such elements as urban planning layouts, building orientation and design, streetscape, open space, materials and finishes, etc. Urban Services - functional services of power, telephone, gas, water stormwater and sewerage reticulation: controlling authorities, planning requirements and controls relevant to urban design. Community services related to health, safety, and welfare (such as medical, fire, emergency services, libraries, police, community participatory groups); controlling authorities, extent of services provided and controls relevant to urban design.

Credit Points: 3 Contact Hours: 1 per week

BTN305 TOURISM & RECREATION IN URBAN DESIGN
Offered: Spring
Tourism and recreation as generators of development: benefits and impacts; analysis of demand, trends, potential. Types of tourism and recreation, urban tourism; basic facilities of tourism and recreation; Specific facilities of resorts. Planning procedures - strategy, controls, performance standards and infrastructure requirements. Multi cultural aspects and host culture implications.

Credit Points: 3 Contact Hours: 1 per week

BTN401 URBAN DESIGN COMPUTER APPLICATIONS
Offered: Spring
Introduction to the computers available at QUT. The use of computers to analyse and solve urban design problems and communicate solutions: feasibility studies; land use studies; generation of envelope and space layouts; environment and service systems analysis; development control testing; data handling and manipulation; computer graphics; and interactive integrated design systems.

Credit Points: 6 Contact Hours: 2 per hour

BTN402 LAW & LEGISLATION IN URBAN DESIGN
Offered: Autumn
The subject will investigate legislative controls and law reform related to urban design and the development process with specific reference to Queensland. Topics will include the potential range of legislative controls, principal relevant legislation in Queensland and its impacts on urban design, the development process, the roles of the developer, development control authority, arbitration process and of the State Government and influences of additional legislation (e.g., Group Title, Heritage Acts, Pedestrian Malls) on the urban design process.

Credit Points: 3 Contact Hours: 1 per week

BTN403 URBAN DESIGN GUIDELINES & DEVELOPMENT CONTROL
Offered: Spring
Change and continuity as factors in urban environments. The contrasting needs for innovation and heritage, coherence and diversity, natural features and vigorous built form. Techniques of control: the use of regulations, ratios, and performance standards. Positive planning and the use of incentives for good design: bonuses, transferable rights, advance publication of permissible development, rapid decisions, early dissemination of information. The preparation of design guides and development briefs. Strategic choice in the management of change: the roles of public and private sectors in the development process.

Case studies of design guidance: Adelaide, Perth, Melbourne, Canberra, Sydney, Victorian country towns, Spring Hill in Brisbane, British design guide housing, design guidance in San Francisco.

Credit Points: 3 Contact Hours: 1 per week
**BTN404 URBAN DESIGN FEASIBILITIES & MANAGEMENT**

**Offered:** Spring

The role of feasibility studies. Methods of assessment of feasibility. Evaluation of economic and social-environmental costs and benefits. Decision making criteria. Introduction to management. The management of urban projects, management structures, project team organisation, planning and programming, project control and maintenance.

**Credit Points:** 3  **Contact Hours:** 1 per week

**BTN501 URBAN DESIGN RESEARCH DISSERTATION ELECTIVE**

**Offered:** Spring

Each student will be required, with tutorial guidance, to prepare a dissertation on an individually selected topic approved by the Course Co-ordinator. The student will be required to show evidence of proficiency in research and application of research in the development of design ideas. This may be achieved through an emphasis on a design project or through a written process. The balance between theory and design application in the dissertation may vary. However, a dissertation which focuses on a specific design project must be supported by a theoretical analysis sufficient to define the problem and to explain how the design proposed satisfies the conditions for a solution. Conversely a dissertation which focuses on the development of a theory must sufficiently illustrate the practical implications of the theory for the relevant classes of design task. The dissertation will be supported by work undertaken as Research Electives. Unless specifically approved otherwise by the Course Co-ordinator, this subject shall be undertaken as a final semester subject.

**Credit Points:** 24  **Contact Hours:** 7 per week

**BTN601 PRESCRIPTIVE SUBJECT FOR URBAN DESIGN**

**Offered:** Autumn

To ensure a more effective balance of knowledge and skills in students from a variety of backgrounds, students will be required to take one or more existing subjects offered within Graduate Diploma, other Faculty courses, or specified courses elsewhere. Typically, a student would work 3 hours per week taking topics from the following: The Political Context, Economics of Town Planning, Urban Structure, Introduction to Computers in Planning, Graphics & Professional Presentation, Natural Environment Studies, History of Architecture, and European Cultural History. Topics will be prescribed for each student by the Course Co-ordinator on the basis of the students' qualifications and experience.

**Credit Points:** 9  **Contact Hours:** 3 per week

**BTN701 URBAN DESIGN RESEARCH ELECTIVES I**

**BTN702 URBAN DESIGN RESEARCH ELECTIVES II**

**Offered:** Spring, Autumn

These subjects are intended to give guidance on research techniques, to provide the opportunity for students to research areas of urban design of personal choice, and to provide a firm basis for the final dissertation. Study required for these subjects may be undertaken within QUT or other academic institution or may be undertaken as individual research under direction of a tutor, all subject to the approval of the Course Co-ordinator. Research Electives I will also contain formal input on research and presentation techniques. The electives undertaken should be selected to support the topic of the Research Dissertation typically from the following within the Faculty of the Built Environment: Planning in Developing Countries, Computer Applications, Social Planning, Urban Land Development, Landscape Design, History of Landscape Design, Principles of Landscape Design, and Building Economics.

**Credit Points BTN701:** 6  **BTN702:** 15

**Contact Hours BTN701:** 2; BTN702: 2.3 per week

**CEB102 CIVIL ENGINEERING I**

**Offered:** Autumn

A series of lectures and field visits aimed at introducing the student to the profession of civil engineering, its scope and variety, and its many branches, whilst providing technical information that will prove useful for each discipline of engineering.

**Credit Points:** 3  **Contact Hours:** 1.5 per week

**CEB184 ENGINEERING MECHANICS I**

**Offered:** Autumn

A series of lectures, tutorials and practical work involving the study of bodies in static equilibrium under the action of forces. Topics covered include: resolution and resultant of forces acting on a particle or rigid body, equilibrium of particle or rigid body, analytical and graphical analysis of plane trusses, shearing force and bending moment in beams, the properties of sections and the introduction to stress and strain.

**Credit Points:** 7  **Contact Hours:** 3 per week

**CEB185 ENGINEERING MECHANICS II**

**Offered:** Spring

A detailed study of the fundamental principles of structural mechanics and the application of computer programming to the same, i.e., stress, strain and elasticity; elastic compatibility; simple beam theory including the flexure formula and the shear stress formula; transformation of plane stress; torsion of circular sections; stresses in thin walled pressure vessels.

**Prerequisite:** CEB184  **Credit Points:** 7  **Contact Hours:** 3 per week

**CEB201 STEEL STRUCTURES**

**Offered:** Full year

Structural behaviour and limit state design of steel structures. First as structural elements such as beams, columns, beam-columns and ties, then their connections (bolted and welded) and simple assemblies. Practical details and economy are discussed. Site visit and laboratory testing may be included.

**Prerequisite:** CEB185 Co-requisites: CEB281, CEB282  **Credit Points:** 4 per week  **Contact Hours:** 1.4 per week

**CEB202 CONCRETE STRUCTURES**

**Offered:** Full year

Basic principles involved in the limit state design of reinforced concrete structures. The determination of size and reinforcement to resist shear and bending in beams, Anchorage and detailing of reinforcement, The evaluation of deflections in concrete structures and the analysis of long and short columns in uniaxial bending.

**Prerequisite:** CEB185 Co-requisites: CEB282, CEB281  **Credit Points:** 4  **Contact Hours:** 1.4 per week

**CEB220 CIVIL SYSTEMS I**

**Offered:** Spring

Lectures, tutorials and practical work dealing with computer applications in Civil Engineering Science.
Hardware and software integration within the data logging environment are discussed.

Prerequisites: CEB191, MAB193, CEB185
Co-requisites: CEB252, CEB260
Credit Points: 6 Contact Hours: 2.8 per week

---

**CEB231 CONCRETE TECHNOLOGY**

Offered: Autumn
Materials: cement, aggregates, water quality, pozzolans, chemical admixtures and special materials.
Credit Points: 7 Contact Hours: 3 per week

---

**CEB240 SOIL MECHANICS I**

Offered: Spring
Prerequisite: CEB185
Credit Points: 5 Contact Hours: 2.8 per week

---

**CEB241 SOIL MECHANICS II**

Offered: Autumn
Prerequisite: CEB240
Credit Points: 7 Contact Hours: 3 per week

---

**CEB253 STRUCTURAL ENGINEERING I**

Offered: Spring
Lectures, tutorials, computer programming and laboratory work involving the calculation of deflections for determinate beams, frames and trusses and the analysis of indeterminate structures by the method of superposition. Introduction to buckling and computer based analytical procedures.
Prerequisites: CEB185, CEB282
Co-requisite: MAB493
Credit Points: 5 Contact Hours: 2.8 per week

---

**CEB260 FLUID MECHANICS**

Offered: Autumn
Introduction to fluid mechanics and its relationship to civil engineering practice. Fluid properties; fluid statics, pressure, forces, buoyancy and stability; continuity, energy and momentum applied to steady one-dimensional flows; viscosity, turbulence, boundary layers and fluid dynamics forces; dimensional analysis. The subject includes lectures, tutorials and practical work.
Prerequisites: CEB185, MAB193
Credit Points: 7 Contact Hours: 3 per week

---

**CEB281 STRENGTH OF MATERIALS**

Offered: Autumn
Extension of elastic theory from engineering mechanics into more complex states of stress and shape. Topics include - composites, stress strain transformations, unsymmetrical sections, shear flow, shear centre, torsion, theories of failure, stress concentrations and fatigue.
Prerequisite: CEB185
Credit Points: 5 Contact Hours: 2 per week

---

**CEB282 STATICS**

Lectures, tutorials and demonstrations involving the structural behaviour of trusses, beams and frames. Qualitative evaluation of deflected shapes, shear force and bending moment diagrams. Load paths and structural idealisation of real structures.
Prerequisite: CEB185
Credit Points: 2 Contact Hours: 1 per week

---

**CEB289 CIVIL ENGINEERING MATERIALS**

Offered: Autumn
Physical, chemical and engineering properties of common civil engineering materials. Ferrous and nonferrous metals and alloys, timber, bitumen, cladding materials, polymers, corrosion of materials and protective measures. Selection of materials. Role of quality control in engineering subjects.
Prerequisites: MEB171, MEB133
Credit Points: 7 Contact Hours: 3 per week

---

**CEB303 CIVIL ENGINEERING DESIGN I**

Offered: Full year
Design project work involving the use of steel and reinforced concrete, geotechnical and highway designs. The influence of construction method to design is emphasised. Students prepare design calculations and sketches with the help of design aids and computer software. The development of problem solving skills is emphasised throughout the projects.
Prerequisites: CEB201, CEB202, CEB240
Co-requisites: CEB253, CEB354, CEB291
Credit Points: 8 Contact Hours: 4 per week

---

**CEB305 CONSTRUCTION PLANNING & ECONOMICS**

Offered: Spring
The use of manual and computer based methods for the planning and programming of projects. The fundamental principles of economic and financial analysis pertaining to both the planning and execution of engineering projects.
Prerequisites: CEB307
Credit Points: 6 Contact Hours: 3 per week

---

**CEB306 CONCRETE STRUCTURES II**

Offered: Autumn
Basic principles involved in the serviceability limit state and ultimate limit state design of prestressed concrete structures. Stress blocks and equivalent loads due to prestress, losses, serviceability limit, states of cracking and deflection, ultimate limit states of bending and shear, design of anchorage zones, evaluation of deflections, and anchorage zone reinforcement, design.
Prerequisite: CEB202
Credit Points: 7 Contact Hours: 3 per week

---

**CEB307 CONSTRUCTION PRACTICE**

Offered: Autumn
Through a series of lectures, tutorials and field trips some basic procedures of Civil Engineering construction are introduced. This subject provides a foundation for further construction studies and also gives a practical perspective to later theoretical subjects.
Prerequisites: CEB231, CEB281
Credit Points: 6 Contact Hours: 3 per week

---

**CEB312 HIGHWAY ENGINEERING**

Offered: Spring
Lectures, practical work and field visits covering highway geometry including vehicle performance and human factors as they relate to road geometry,
geometric design, geometric co-ordination and use of computer aided design. Highway pavements including pavement materials and construction processes, pavement cross sections and drainage, pavement theory and pavement analysis methods.

Prerequisites: SVB306, MAB193, CEB102, CEB291, CEB191, CEB231
Co-requisites: MAB493, CEB240
Credit Points: 6 Contact Hours: 3 per week

CEB313 TRAFFIC ENGINEERING
Offered: Spring
Lectures, practical work and field work covering traffic theory including traffic behaviour, probability models, queuing and bunching; traffic management and analysis including unsignalised and signalised intersections, street lighting, signs and markings, barriers and parking. Traffic capacity analysis including standards, warrants, and capacity and environmental volumes.

Prerequisite: MAB493 Co-requisite: CEB312
Credit Points: 6 Contact Hours: 3 per week

CEB335 STRUCTURAL ENGINEERING II
Offered: Autumn
Structural analysis of determinate structures under moving loads using influence lines for beams and trusses. The analysis of indeterminate structures using moment distribution and matrix structural analysis techniques. Analysis of simple cable structures.

Prerequisites: CEB253, MAB493
Credit Points: 7 Contact Hours: 3 per week

CEB335 STRUCTURAL ENGINEERING III
Offered: Spring
The application of plastic analysis techniques to the analysis of beam, frame and slab structures. The use of approximate methods for structural analysis and checking purposes. Development of buckling theory.

Prerequisite: CEB281
Co-requisites: MAB893, CEB354
Credit Points: 6 Contact Hours: 3 per week

CEB339 PRINCIPLES OF STRUCTURES I
Offered: Autumn
Terminology, forces and reactions; loading on structures, equilibrium and stability; co-planar and non co-planar forces; resolution of forces; mechanism of structural components under load: compression, tension, bending, shear, deflection. Connections.

Credit Points: 2 Contact Hours: 1 per week

CEB360 HYDRAULIC ENGINEERING I
Offered: Spring
Lectures, tutorial and practical work on the applications of fluid mechanics to pipe and open channel flow, flow measurement and hydraulic machinery. Topics include: steady flow in pipes, networks, flow measurement, uniform flow in open channels, pump and turbines.

Prerequisite: CEB260 Co-requisite: MAB493
Credit Points: 6 Contact Hours: 3 per week

* Repeat-requisite - the prerequisite or co-requisite requirement may be satisfied by attempting the unit; a passing grade is not essential. A student is deemed to have attempted the unit if all assessment requirements have been attempted when registered for the unit. If failed, the repeat-requisite must be repeated at the first opportunity.

CEB361 HYDROLOGY
Offered: Spring
Lectures, tutorial and practical work providing an introductory course in hydrology and urban drainage; hydrologic cycle, rainfall and runoff; groundwater evapotranspiration, statistical concepts, urban drainage design; unit hydrograph methods; flood studies; data generation, storage estimation.

Prerequisite: CEB260 Co-requisite: CEB360
Credit Points: 6 Contact Hours: 3 per week

CEB364 ENGINEERING SCIENCE II
Offered: Spring
Fluids and fluid flow in pipes and channels. Flow measurement. Hydraulic models. Pumps and pump characteristics.

Prerequisite: MAB199 Survey Mathematics I [R]*
Credit Points: 6 Contact Hours: 3 per week

CEB370 PUBLIC HEALTH ENGINEERING I
Offered: Spring
An introduction to the principles of public health engineering. Causes and effects of water pollution, principles of unit processes and operations of water quality control. An introduction to air pollution, its causes and control.

Prerequisite: CEB346
Credit Points: 6 Contact Hours: 3 per week

CEB393 ENGINEERING INVESTIGATION & REPORTING I
Offered: Spring
Lectures and practical work on the appropriate techniques of investigation and reporting on civil engineering processes. Each student will be required to carry out an investigation, prepare a formal written report on that investigation.

Prerequisite: CMB108
Credit Points: 3 Contact Hours: 2 per week

CEB401 DESIGN PROJECT
Offered: Autumn
Students work in groups to produce initial studies and outline designs of typical civil engineering projects. Students are required to produce a comprehensive definition of the design problems, to establish goals for the project, to identify and collect necessary information, to generate alternative solutions and to optimise some of these solutions. Students are to develop an awareness of the possible impact of civil engineering projects on ecosystems. Students prepare and present reports on various aspects of selected projects, including feasibility studies, environmental friendly contracts, and contractual and economic assessment. Compulsory site visits are included.

Prerequisites: CEB361, CEB305, CEB313
Co-requisites: CEB470, CEB440
Credit Points: 5 Contact Hours: 3 per week

CEB403 PROFESSIONAL PRACTICE
Offered: Spring
Engineering organisations, project initiation, documentation, form of contract, contract administration, arbitration, safety and insurance, legal responsibilities, ethics.

Prerequisite: CSB191 Co-requisite: CEB305
Credit Points: 7 Contact Hours: 2 per week

CEB404 FIELD TRIP
Offered: Spring
This subject involves site visits to several civil and structural projects (generally under construction in south-east Queensland). The practical inspections are
supervised by lecturing staff and engineers associated with the project, and allow valuable consolidation of the theoretical aspects of other subjects.

**Credit Points:** 3  
**Contact Hours:** 1.5 per week

- **CEB405 CIVIL ENGINEERING DESIGN II**  
**Offered:** Full year  
This subject is the continuation of Civil Engineering Design I with topics covering primarily civil engineering design, i.e., municipal civil/structural projects. Field visits are required. More general problem solving skills are developed so that graduates can successfully complete projects other than those covered during the course.  
**Prerequisites:** CEB440, CEB304, CEB331  
**Co-requisites:** CEB460, CEB410, CEB470  
**Credit Points:** 6  
**Contact Hours:** 3 per week

- **CEB406 STRUCTURAL APPLICATIONS**  
**Offered:** Spring  
Lectures and tutorials involving analysis, design, supervision of construction and performance of structures. The course evolves through case studies. Topics include: structural systems, structure modelling, sketching, civil engineering structures, designing for construction, detailing and lessons from structural failures, timber structures and the role of testing, controlling vibrations in structures.  
**Prerequisites:** CEB355, CEB291, CEB354  
**Credit Points:** 8  
**Contact Hours:** 3 per week

- **CEB421 CIVIL SYSTEMS II**  
**Offered:** Autumn  
Lectures, tutorials on understanding and applying advanced civil engineering software. Methods of error checking and model validation are discussed.  
**Prerequisites:** CEB220, CEB241, CEB260, CEB460, CEB355  
**Credit Points:** 3  
**Contact Hours:** 1 per week

- **CEB430 BUILDING CONSTRUCTION**  
**Offered:** Autumn  
Through lectures, tutorials and a site visit this subject provides engineering students with a broad appreciation of building techniques and principles. The subject coverage includes details of building construction from foundations to fitting out for low and high rise structures. The requirements of building regulations as they affect construction are also discussed.  
**Prerequisites:** CEB305  
**Credit Points:** 3  
**Contact Hours:** 2 per week

- **CEB440 GEOTECHNICAL ENGINEERING I**  
**Offered:** Spring  
**Prerequisites:** CEB185, CEB240  
**Co-requisite:** CEB241  
**Credit Points:** 6  
**Contact Hours:** 3 per week

- **CEB459 PRINCIPLES OF STRUCTURES II**  
**Offered:** Spring  
**Prerequisites:** CEB353  
**Credit Points:** 4  
**Contact Hours:** 2 per week

- **CEB460 HYDRAULIC ENGINEERING II**  
**Offered:** Autumn  
A series of lectures, tutorial and practical work in hydraulics with particular emphasis on unsteady flow, movable boundary hydraulics, hydraulic models and hydraulic design of structures. Topics include: unsteady flow in pipes; unsteady flow in open channel flow; design of hydraulic structures such as transitions, culverts, crests, chutes etc., mobile boundary hydraulics; and the theory and practice relating to fixed and mobile boundary, natural scale and distorted models.  
**Prerequisite:** CEB360  
**Co-requisite:** CEB361  
**Credit Points:** 7  
**Contact Hours:** 3 per week

- **CEB470 PUBLIC HEALTH ENGINEERING II**  
**Offered:** Autumn  
Development of principles taught in CEB370 to enable functional design of treatment units to be undertaken. An introduction to wastewater and water reticulation. On completion of this unit the student should be able to proceed to simple design exercises in water supply and wastewater and treatment processes.  
**Prerequisite:** CEB370  
**Credit Points:** 5  
**Contact Hours:** 3 per week

- **CEB491 PROJECT (CIVIL)**  
**Offered:** Full year  
The student is required to undertake a relatively difficult task in an area of civil engineering practice requiring further research and development. Each project includes: a literature review; problem definition; organisation and execution of a program of investigation; critical analysis of investigation; presentation of a seminar on the work and presentation of a written report.  
**Prerequisite:** Students must normally be in final year of course, however students in the penultimate year of their course may be given special permission to attempt the project.  
**Co-requisites:** CEB393, CEB492  
**Credit Points:** 9  
**Contact Hours:** 3 per week

- **CEB492 ENGINEERING INVESTIGATING & REPORTING II**  
**Offered:** Autumn  
A short series of lectures on verbal presentation techniques of civil engineering investigation topics. Each lecture is followed by a 1 hour lecture on a civil engineering investigation topic.  
**Prerequisite:** CEB393  
**Credit Points:** 3  
**Contact Hours:** 1 per week

- **CEB501 CIVIL ENGINEERING PRACTICE I**  
**Offered:** Autumn  
Lectures, tutorials, practical work and field trips covering current topics in a specified area of civil engineering at an advanced undergraduate level. Subject is offered irregularly. When offered, the subject material is advertised.  
**Prerequisite:** Students must be substantially in the final year of course.  
**Credit Points:** 6  
**Contact Hours:** 3 per week

- **CEB503 ADVANCED CONSTRUCTION METHODS**  
**Offered:** Autumn  
Through a series of lectures, tutorials and site visits this subject examines existing practice and technology in the construction industry and provides insights into current and future developments in construction techniques and plant.  
**Prerequisites:** CEB307, CEB305  
**Credit Points:** 6  
**Contact Hours:** 3 per week
**CEB504 ENGINEERING SCIENCE III**
Offered: Spring
Hydrology; rainfall, stream flow measurement; hydraulic design of drainage. Soil mechanics for surveyors; definition, properties and grading of soils; roadwork, foundation and retaining wall design; soil stability. Concrete technology; properties, manufacture and testing of concrete; elementary reinforced concrete design.

Co-requisite: CEB364
Credit Points: 5  Contact Hours: 3 per week

**CEB505 PROJECT MANAGEMENT & ADMINISTRATION**
Offered: Spring
Using case studies and 'role playing' techniques students are required to develop solutions to a variety of project management problems and to submit reports and make presentations regarding these exercises.

Prerequisite: CEB305
Credit Points: 6  Contact Hours: 3 per week

**CEB506 CIVIL ENGINEERING PRACTICE II**
Offered: Spring
Lectures, tutorials, practical work and field trips covering current topics in a specified area of civil engineering at an advanced undergraduate level. Subject is offered irregularly. When offered, the subject material is advertised.

Prerequisites: Students must be substantially in the final year of course.
Credit Points: 6  Contact Hours: 3 per week

**CEB511 TRANSPORT ENGINEERING II**
Offered: Spring
Lectures and practical work focussing in depth on two aspects of transport engineering - rural road upgrading and small urban area transportation planning/road needs requirement. Work covered includes highway upgrading, deficiency analysis, traffic accident analysis, traffic flow simulation, staged development including overtaking lanes and rural intersection design; application of four step transportation planning models, surveys, zone selection, network development, trip generation, distribution, assignment, model calibration, future year modelling, evaluation and selection of road needs, sensitivity analysis.

Co-requisite: CEB512
Credit Points: 6  Contact Hours: 3 per week

**CEB512 TRANSPORT ENGINEERING I**
Offered: Autumn
A series of lectures, practical work and field work covering land use/transport interaction, travel impedance, transport costs, trip distribution and multi model assignment, transport operations analysis, transport economics, transport capacity, urban road planning principles, urban transit planning, railway, aviation and bulk commodity systems design.

Prerequisites: MAB893, CEB312, CEB313
Credit Points: 6  Contact Hours: 3 per week

**CEB520 FINITE ELEMENT METHODS**
Offered: Spring
Lectures and tutorials dealing with finite element, finite difference and similar numerical techniques. Theoretical and modelling considerations are covered in the context of case studies in structures, soil mechanics and hydraulics.

Prerequisite: CEB230
Credit Points: 6  Contact Hours: 3 per week

**CEB532 CONCRETE & MASONRY STRUCTURES**
Offered: Spring
The analysis and design of continuous prestressed concrete members. Detailing of concrete structures including halving joints, opening corners, beam intersections, deep beams, pile caps, etc. Masonry materials and properties. Design of reinforced and unreinforced concrete and clay masonry beams, walls and piers. This includes compression, vertical bending, lateral bending and shear. Walls include solid, hollow, cavity and diaphragm, and vertical prestressing is introduced.

Prerequisite: CEB355, CEB306
Credit Points: 6  Contact Hours: 3 per week

**CEB541 GEOTECHNICAL ENGINEERING II**
Offered: Autumn

Prerequisite: CEB440
Credit Points: 6  Contact Hours: 3 per week

**CEB542 GEOTECHNICAL ENGINEERING III**
Offered: Spring
Development of marginal lands: trafficability; embankments on soft soil; preloading; vertical drainage; vibrofloation; dynamic compaction and other methods of deep foundation improvement. Rock excavation and rock slope stabilisation. Soil improvement, including mechanical and chemical stabilisation, soil reinforcement and other techniques which may be economically feasible. Anchoring in soil and rock. Principles of earth and rockfall design and construction.

Prerequisite: CEB541
Credit Points: 6  Contact Hours: 3 per week

**CEB551 ADVANCED STRUCTURAL DESIGN**
Offered: Autumn
This subject widens and deepens experience in the structural design area. Emphasis is placed on the design of more complex structures. Normally three projects are studied which involve some or all of: design in new materials, new analytical techniques, new codes of practice, novel structures.

Prerequisites: CEB354, CEB201, CEB306
Credit Points: 6  Contact Hours: 3 per week

**CEB559 PRINCIPLES OF STRUCTURES III**
Offered: Autumn
Structural properties of mild steel and high tensile steel. Structural framing and connections. Structural systems in steel: beams and columns, portal frames, space frames, trusses, tenseg structures.

Prerequisite: CEB453
Credit Points: 4  Contact Hours: 1 per week

**CEB560 HYDRAULIC ENGINEERING III**
Offered: Spring
Lectures, tutorials, practical work and site visits examining selected topics in water engineering. Topics are chosen from hydrology, mobile bed hydraulics, river hydraulics, hydraulic structures, urban drainage, physical and mathematical modelling.

Prerequisites: CEB361, CEB460
Credit Points: 6  Contact Hours: 3 per week

</table>
CEP215 ADVANCED TRAFFIC ENGINEERING
Offered: Spring
Traffic flow theory and traffic management. Development of computer analysis routines for urban intersection design, their background and applications.
Prerequisite: CEP217
Credit Points: 8 Contact Hours: 2 per week

CEP218 TRANSPORTATION ENGINEERING
Offered: Autumn
Techniques for the appraisal of rural and urban area road systems, bus operations, airport design, construction and maintenance.
Credit Points: 12 Contact Hours: 3 per week

CEP276 ADVANCED TREATMENT PROCESSES
Offered: Spring
The design of water and wastewater treatment plants, including conventional and alternative processes. Current practice and development. Operation of treatment plants.
Prerequisite: CEP174
Credit Points: 8 Contact Hours: 2 per week

CEP277 WASTE MANAGEMENT
Offered: Spring
Characteristics and analysis of solid wastes. Collection, storage, transportation, handling, recycling and disposal. Sources and characteristics of industrial liquid wastes. Treatment design methodology. Pilot scale modelling and investigation. Case studies of selected classes of industrial wastes.
Co-requisite: CEP174
Credit Points: 12 Contact Hours: 3 per week

CEP310 URBAN TRANSPORTATION PLANNING
Offered: Spring
Transportation planning applications; road needs, urban transport, new developments, local area planning. Macro land use/transportation and micro urban transportation models; urban transportation zone selection and data needs; trip generation; model splits; survey techniques.
Credit Points: 8 Contact Hours: 2 per week

CEP361 DRAINAGE ENGINEERING
Offered: Autumn
Drainage engineering of interest to municipal engineers, road and railway designers, irrigation and general civil engineers. Subject covers rainfall and runoff models, both rational and computer models; drainage hydraulics of roof, streets, pipes, open channels, retention basins, culverts and bridges; erosion, sedimentation aspects of drainage, costs, planning policies and the law.
Credit Points: 8 Contact Hours: 2 per week

CEP491 MUNICIPAL ENGINEERING PRACTICE
Offered: Autumn
A prescribed program of individual supervised study in a selected area within the field of municipal engineering, involving one or more major assignments together with appropriate tutorials.
Credit Points: 16 Contact Hours: 3 per week

CEP999 PROJECT
Offered: Autumn, Spring
The student is required to investigate in depth an approved topic within the range of civil engineering practice and to carry out design, computing, model or experimental design and construction, experimental work and testing. The results are presented in a major formal report.
Credit Points: 36 Contact Hours: 8 per week

CET135 ENGINEERING MECHANICS
Offered: Autumn
Equilibrium of forces and moments, reactions, free body diagrams, truss analysis, shear force and bending moment diagrams.
Credit Points: 7 Contact Hours: 3 per week

CET195 CIVIL ENGINEERING I
Offered: Autumn
Lectures, tutorial work and field trips covering the scope and nature of civil engineering, the organisation of a civil engineering enterprise emphasising the engineering associate role, and emphasising the important skills of oral and written communication and measurement.
Credit Points: 7 Contact Hours: 3 per week

CET235 LABORATORY PRACTICE A
Offered: Spring
The type and role of laboratories in civil engineering, NATA registration and calibration requirements. Quality control and assurance, basic statistics. Basic measuring equipment and techniques; associated calculations. Presentation of data in reports. Laboratory work in materials and hydraulic engineering to demonstrate measuring techniques.
Co-requisites: CET365, CET435
Credit Points: 3 Contact Hours: 3 per week

CET255 STRUCTURAL MECHANICS
Offered: Spring
Prerequisites: CET135
Credit Points: 7 Contact Hours: 3 per week

CET286 CIVIL OFFICE PRACTICE
Offered: Spring
An introduction to the preparation and layout of civil engineering drawings, and to design office procedures including methods of data manipulation, presentation and checking.
Prerequisite: MET120
Credit Points: 7 Contact Hours: 3 per week

CET287 CIVIL OFFICE PRACTICE A
Offered: Spring
Further experience in civil engineering design drafting/drawing, supplementing that undertaken in CET286 Civil Office Practice.
Prerequisite: MET120 Co-requisite: CET286
Credit Points: 3 Contact Hours: 3 per week

CET306 FIELD PRACTICE IA
Offered: Autumn
Tutorial, practical sessions and field trips supplemented by some lectures covering: setting out, as-built surveys and drawings, photography and field sketching; field measurement and sampling in water, soils and materials; implications of field measurements on design and construction practice.
Prerequisites: SVT306, CET365 Co-requisite: CET775
Credit Points: 3 Contact Hours: 3 per week
CET365 HYDRAULIC ENGINEERING
Offered: Spring
Lectures, tutorials and practical work covering the properties of fluid, simple hydrostatics, fundamental characteristics and equations of fluid flow, pipe and open channel flow and hydraulic measurements. Laboratory and tutorial work covers basic fluid behaviour and provides an introduction to instrumentation.
Prerequisite: CET135
Credit Points: 7  Contact Hours: 3 per week

CET387 CIVIL ENGINEERING DRAFTING A
Offered: Autumn
Further experience in municipal engineering design drawings, additional to that undertaken in CET585 Civil Engineering Drafting.
Prerequisite: CET286 Co-requisite: CET585
Credit Points: 3  Contact Hours: 3 per week

CET405 FIELD PRACTICE II A
Offered: Spring
This subject involves field visits and laboratory workshops on many aspects of civil engineering construction.
Credit Points: 7  Contact Hours: 3 per week

CET435 CONCRETE PRACTICE
Offered: Spring
Credit Points: 7  Contact Hours: 3 per week

CET495 PROJECT A
Offered: Spring
The student is required to undertake a substantial project in his/her chosen field. This involves the investigation of the topic, performance of the tests, design calculations etc, and submission of a comprehensive report on sets of drawings.
Prerequisite: Subject must be in student’s final year.
Credit Points: 3  Contact Hours: 3 per week

CET565 ROAD & DRAINAGE ENGINEERING
Offered: Autumn
Elements of road construction and maintenance, road pavements types, design and construction. The drainage component includes road drainage principles, design and construction of urban and rural culverts, urban stormwater drainage systems.
Prerequisites: CET815, CET645, CET365
Credit Points: 7  Contact Hours: 3 per week

CET585 CIVIL ENGINEERING DRAFTING
Offered: Autumn
Preparation of municipal engineering drawings including roadworks and stormwater drain exercises. Exercises refer to State and local authority standards. Projects will involve varying amounts of design computations and at least one example involves computer usage. Introduction to quantity takeoff, bills of quantities, cost estimates and cross referencing between drawings, bills or quantities and specifications.
Prerequisite: CET286 Co-requisite: CET565
Credit Points: 7  Contact Hours: 3 per week

CET598 PROJECT II
Offered: Autumn
An individually designed program including designs, reports and investigations in the area of sanitary engineering.
Prerequisite: The student must have completed or be exempt from the first four semesters of the part-time course.
Credit Points: 21  Contact Hours: 9 per week

CET606 CONSTRUCTION MANAGEMENT
Offered: Autumn
Construction planning, organisational structure, construction reporting, contract, management and administration, human relations, plant hire.
Credit Points: 7  Contact Hours: 3 per week

CET645 SOIL MECHANICS I
Offered: Autumn, Spring
Identification and classification of soils; testing methods required. Compaction of soil, soil permeability, effective and total stress, shear strength and compressibility. Introduction to retaining walls, bearing capacity, CBR testing and in situ sampling and testing.
Prerequisite: CET135
Credit Points: 7  Contact Hours: 3 per week

CET655 CONCRETE & STEEL DESIGN
Offered: Autumn, Spring
Prerequisites: CET135, CET255, CET435
Credit Points: 7  Contact Hours: 3 per week

CET703 CIVIL ENGINEERING PRACTICE I
Offered: Autumn
Lectures, tutorials, practical work and field trips covering current topics in a specified area of civil engineering practice at a level appropriate to the course and as approved by the Head of School. The content of this subject may be changed from semester to semester depending on demand and available staff.
Prerequisite/Co-requisite: Students must be in the final year of course.
Credit Points: 7  Contact Hours: 3 per week

CET704 CIVIL CONSTRUCTION PRACTICE
Offered: Autumn, Spring
Principles of temporary works design. Form work, false work and scaffolding. Shoring, de-watering, excavation and earth works. Plant introduction to the Construction Safety Act and Regulations.
Credit Points: 7  Contact Hours: 3 per week

CET707 MUNICIPAL ENGINEERING
Offered: Autumn
Structure and function of local authorities. Local roads, streets, traffic management, swimming pools, solid waste management, drainage, bridges, town planning, subdivision, landscaping, building practice, relevant legislation.
Prerequisites: CET15
Co-requisites: CET565, CET775
Credit Points: 7  Contact Hours: 3 per week

CET708 SPECIFICATIONS & ESTIMATES
Offered: Spring
Credit Points: 7  Contact Hours: 3 per week

CET709 SAFETY & INDUSTRIAL RELATIONS
Offered: Spring
Lectures, tutorials, practical work and field trips covering current systems and practices in occupational safety and health programs, the industrial relations
system in Australia, and the man management techniques which may be employed to create a good industrial relations climate on a site or in an industry.

Credit Points: 7  Contact Hours: 3 per week

- **CET738 ADVANCED LABORATORY TESTING I**
  Offered: Autumn
  A variety of testing work is undertaken to give the student experiences with a range of equipment and testing procedures. The program includes tests in a number of selected laboratory areas.
  Credit Points: 7  Contact Hours: 3 per week

- **CET756 BUILDING CONSTRUCTION PRACTICE**
  Offered: Autumn, Spring
  Prerequisite: MET141
  Credit Points: 7  Contact Hours: 3 per week

- **CET775 PUBLIC HEALTH ENGINEERING**
  Offered: Autumn
  The design, construction and operation of water supply and sewerage systems, including materials and equipment. Pumping station layout and operation. Basic principles of water quality control. Treatment plant construction, layout and operation.
  Prerequisite: CET365
  Credit Points: 7  Contact Hours: 3 per week

- **CET776 EQUIPMENT OPERATION & MAINTENANCE**
  Offered: Spring
  Lectures, tutorial exercises, practical work and site visits examining the principles and practice of the operation and maintenance of equipment in water and wastewater treatment plants. Topics include: overview of plant; motors; engines; pumps; compressors and generators; rotary and rectilinear scraping and raking mechanisms; chemical handling, mixing, dosing; safety and maintenance scheduling for specific equipment items.
  Prerequisites: CET365, CHA140
  Credit Points: 7  Contact Hours: 3 per week

- **CET777 PROCESS OPERATION & CONTROL I**
  Offered: Autumn
  A study of the principles of unit processes of water and wastewater treatment, with particular reference to their operation. The methods of operational control of these processes.
  Prerequisites: CET365, CET775, CHA140
  Credit Points: 7  Contact Hours: 3 per week

- **CET787 STRUCTURAL ENGINEERING DRAWING**
  Offered: Autumn, Spring
  Preparation of structural engineering drawings covering basic steel work and reinforced concrete works. Reinforcing schedules together with details of steel connections.
  Prerequisites: MET120, CET286, CET585, CET655
  Credit Points: 7  Contact Hours: 3 per week

- **CET797 PROJECT I**
  Offered: Autumn, Spring
  The student is required to undertake a substantial project in his/her student’s chosen field. This involves the investigation of the topic, preparation of reports, design calculations etc., and submission of a comprehensive report on sets of drawings.
  Prerequisite/Co-requisite: Subject must be in student’s final year.
  Credit Points: 7  Contact Hours: 3 per week

- **CET802 CIVIL ENGINEERING PRACTICE II**
  Offered: Spring
  The synopsis of this subject is the same as CET703.
  Prerequisite/Co-requisite: Students must be in the final year of course.
  Credit Points: 7  Contact Hours: 3 per week

- **CET815 ROAD LOCATION & DESIGN**
  Offered: Spring
  Road location principles, road design and geometry including computer applications, subdivision and subdivision street design, introduction to traffic engineering, intersection design.
  Prerequisite: SVT306 Co-requisite: CET286
  Credit Points: 7  Contact Hours: 3 per week

- **CET837 LABORATORY PRACTICE**
  Offered: Spring
  Laboratory organisation and NATA registration. Measurement of strain, temperature, force, pressure and linear devices; their calibration and accuracy. Data logging, photography, concrete and aggregate testing.
  Credit Points: 7  Contact Hours: 3 per week

- **CET838 ADVANCED LABORATORY TESTING II**
  Offered: Spring
  Testing projects undertaken in a more limited number of specialist areas and presented as a series of reports. Each report is expected to include a discussion of the tests undertaken, based on the student’s experience and background reading.
  Prerequisite: CET735
  Credit Points: 7  Contact Hours: 3 per week

- **CET856 FORMWORK DESIGN**
  Offered: Spring
  Concrete pressures, load on formwork, false work stability, timber characteristics, soffit systems; conventional, proprietary, stripping, reshoring, multistory reshoring, multiple tie beam systems, waffle floors, beam forms, wall forms; conventional proprietary, columns, permanent forms, moving systems, special systems, form failure planning, documentation, architectural concrete.
  Prerequisite: CET435
  Credit Points: 7  Contact Hours: 3 per week

- **CET876 PLANT OPERATION & MAINTENANCE**
  Offered: Spring
  The operation and maintenance requirements of water quality treatment plants, including scheduling, labour control, workshop organisation, safety, training and performance monitoring.
  Prerequisite: CET606 Co-requisite: CET776
  Credit Points: 7  Contact Hours: 3 per week

- **CET877 PROCESS OPERATION & CONTROL II**
  Offered: Spring
  An extension of the studies covered in CET777 - of unit processes of water and wastewater treatment with particular reference to their operation. The methods of operational control of these processes.
  Prerequisite: CET777
  Credit Points: 7  Contact Hours: 3 per week
CET87 COMPUTER AIDED DRAFTING
Offered: Spring
A series of lectures, tutorials, practicals and demonstrations on the VAX780 mainframe and personal computers covering civil and structural drawings presentations. Outputs from various computer design programs are use as examples.
Prerequisite: CET286
Credit Points: 7
Contact Hours: 3 per week

CET888 STRUCTURAL DRAWING & DESIGN
Offered: Spring
Minor structural design and layout. Preparation of advanced structural engineering drawings covering steel, reinforced and prestressed concrete and timber where geometric and physical restraints interact with the structural design process.
Prerequisites: MET20, CET286
Co-requisites: CET787, CET585, CET655
Credit Points: 7
Contact Hours: 3 per week

CET894 COMPUTATIONS A
Offered: Autumn
Co-requisite: SVT306
Credit Points: 3
Contact Hours: 3 per week

CHA111 LABORATORY TECHNIQUES
Offered: Autumn, Spring
A course introducing safe and proficient procedures in the laboratory, and giving practice in the manipulation of common elementary laboratory apparatus, equipment and reagents. On completing the course the student should be able to handle, correctly and safely, all the basic pieces of laboratory equipment and be familiar with their main functions and limitations.
Credit Points: 8
Contact Hours: 3 per week

CHA145 INTRODUCTORY CHEMISTRY
Offered: Autumn
An integrated course of fundamental chemistry covering the nature of chemistry, atomic and molecular structure, bonding and types of bonds; the structure and nature of matter, molecular formulae, atomic and molecular weights; the periodic classification of elements; oxidation, chemical equilibria; liquids and solutions and simple phase equilibria; equilibria in electrolyte solutions; pH and its measurement. Carbon chemistry and functional groups. The chemistry and properties of some common laboratory chemicals. Practical applications are emphasised.
Credit Points: 8
Contact Hours: 3 per week

CHA218 ANALYTICAL CHEMISTRY I
Offered: Autumn, Spring
A lecture and laboratory program covering fundamental theory and techniques of titrimetric and gravimetric analysis.
Prerequisite: CHA111
Credit Points: 8
Contact Hours: 3 per week

CHA219 QUALITATIVE ANALYSIS
Offered: Spring
This course considers the behaviour of a range of common cations and anions towards common laboratory reagents. These reactions form the basis of procedures for the separation and identification of these cations and anions. Qualitative testing for elements in organic molecules together with test procedures for qualitative identification of functional groups in organic molecules also are covered.
Prerequisite: CHA111
Credit Points: 6
Contact Hours: 3 per week

CHA230 CHEMISTRY OF INORGANIC MATERIALS
Offered: Autumn, Spring
The occurrence, extinction/ manufacture, properties and uses of the elements and the important inorganic compounds derived from a selection of members of the chemical groups.
Prerequisite: CHA145
Credit Points: 4
Contact Hours: 2 per week

CHA240 INSTRUMENTAL TECHNIQUES
Offered: Spring
An overview of the principles and practice of modern instrumental analysis, including the nature of electromagnetic radiation and its interaction with matter; use of visible, UV and IR spectroscopy; emission and absorption phenomenon; chromatographic techniques and electroanalytical chemistry.
Prerequisite: CHA111
Co-requisite: CHA218 or CHA111 + PHA154, and PHA258
Credit Points: 8
Contact Hours: 3 per week

CHA250 ORGANIC CHEMISTRY I
Offered: Autumn, Spring
An introduction to functional group chemistry including hydrocarbons, aromatic compounds, organic halides, alcohols, phenols and ethers and also an introduction to the use of infrared spectroscopy to indicate the presence of particular functional groups.
Prerequisite: CHA145
Credit Points: 8
Contact Hours: 3 per week

CHA270 PHYSICAL CHEMISTRY I
Offered: Autumn, Spring
The first part of an integrated syllabus of physical chemistry in the Associate Diploma. A study of the fundamental aspects of chemical energetics, solution chemistry and equilibria and practical applications thereof.
Prerequisite: CHA145
Credit Points: 8
Contact Hours: 3 per week

CHA318 INSTRUMENTAL ANALYTICAL CHEMISTRY
Offered: Autumn
A course of lectures and practical work introducing the principles and practices of mass spectrometry, fluorescence spectroscopy and ICP together with further development of selected topics from the unit CHA240.
Prerequisite: CHA218 & CHA240
Co-requisite: CHA319
Credit Points: 8
Contact Hours: 4 per week

CHA319 ANALYTICAL CHEMISTRY II
Offered: Autumn
A course of lectures and practical work designed to develop further the basic titrimetric and gravimetric analysis principles introduced in the unit CHA218. The practical work will feature the analysis of commercial materials with emphasis on sample dissolution techniques.
Prerequisite: CHA218, CHA219
Credit Points: 6
Contact Hours: 3 per week

CHA320 CHEMICAL PROCESS PRINCIPLES I
Offered: Autumn
This course discusses chemical reactors (both homogeneous and heterogeneous), unit operations...
(transport and preparation of materials and separation of materials) and material and energy balances in chemical processes.

**Prerequisite:** CHA270 **Co-requisite:** CHA370  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA350 ORGANIC CHEMISTRY II

**Offered:** Autumn, Spring  
This subject continues the study of functional groups and includes carbonyl compounds, carboxylic acids and their derivatives. Further uses of infrared spectroscopy are discussed.

**Prerequisite:** CHA250  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA368 INDUSTRIAL CHEMISTRY

**Offered:** Spring  
This subject aims to develop an appreciation of the basic aspects of product and quality control, and an understanding of the underlying fundamental chemistry and an overall concept of the chemical technology involved in, for example, the petroleum and petrochemical industry, the polymer, plastic and adhesive industries, the paint industry, the textile industry, the sugar industry, water treatment plants, the glass and ceramics industry, and the cement industry. Field trips are an integral part of this subject.

**Prerequisites:** CHA250, CHA320  
**Credit Points:** 8  **Contact Hours:** 4 per week

### CHA370 PHYSICAL CHEMISTRY II

**Offered:** Autumn  
The second part of the integrated syllabus of physical chemistry of the Associate Diploma. Covers the areas of chemical kinetics, surface chemistry and elementary electrochemistry.

**Prerequisite:** CHA270  
**Credit Points:** 6  **Contact Hours:** 2 per week

### CHA410 COMPUTERS IN CHEMISTRY

**Offered:** Spring  
This course outlines the use of computers in various aspects of the chemical industry - both in laboratory and plant. The different approaches to laboratory automation are discussed and a detailed study of computer control in a selected industry undertaken. Field trips also are included.

**Prerequisite:** CSA259  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA442 INTRODUCTION TO OCCUPATIONAL SAFETY

**Offered:** Autumn  
Basic first aid relevant to laboratory, plant and field situations; principles and practice of safe handling of common laboratory chemicals; safety aspects of laboratory design.  
**Note:** This subject is incompatible with CHA440; credit may not be retained for both.  
**Credit Points:** 4  **Contact Hours:** 2 per week

### CHA520 CHEMICAL PROCESS PRINCIPLES II

**Offered:** Autumn  
A lecture and laboratory course which deals with measurement systems, the principles of process control and the applications of process control in the chemical industry.

**Prerequisite:** CHA230  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA580 ORGANIC CHEMISTRY III

**Offered:** Spring  
This subject aims to give students an appreciation of the chemistry and uses of organic compounds encountered in industry, such as agricultural chemicals, fats and oils, waxes, detergents, dyes, drugs, elastomers, fibres, adhesives and cellulose derivatives.

**Prerequisite:** CHA350  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA580 FOOD CHEMISTRY I

**Offered:** Autumn  
Topics covered include the basic chemical components of food, fats and oils, proteins, carbohydrates, vitamins and minerals and factors affecting quality such as texture, flavour and colour. Measurements of food quality. A major assignment related to the dairy industry is incorporated.

**Prerequisites:** CHA240 & CHA250 & CHA218  
**Co-requisites:** CHA350  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA610 INDUSTRIAL ANALYSIS

**Offered:** Spring  
A course involving the use of both qualitative (semi-micro) and quantitative techniques in the analysis of commercially important materials, including ores, cement, fertiliser, fats and oils and sugar products.

**Prerequisites:** CHA318, CHA319  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA644 PROCESS MEASUREMENT & MONITORING I

**Offered:** Spring  
A study of the physical and chemical measurements involved in the analysis of raw and potable waters; and the determination of organic and microbiological pollution. Emphasis is placed on sampling and sample preservation laboratory techniques, interpretation of results and the significance of the measured parameters in the operation and control of water and wastewater treatment plants.

**Prerequisites:** CET365, CET775  
**Co-requisite:** CHA140  
**Credit Points:** 7  **Contact Hours:** 3 per week

### CHA670 PHYSICAL CHEMISTRY III

**Offered:** Spring  
This subject forms the third part of the integrated syllabus of physical chemistry of the Associate Diploma and covers the areas of applied electrochemistry, corrosion, distillation and extraction. Practical applications are emphasised.

**Prerequisite:** CHA370  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA680 FOOD CHEMISTRY II

**Offered:** Spring  
A more advanced unit covering the chemistry and principal methods of food processing and preparation. A further major assignment appropriate to the dairy industry is incorporated.

**Prerequisite:** CHA380  
**Credit Points:** 8  **Contact Hours:** 3 per week

### CHA744 PROCESS MEASUREMENT & MONITORING II

**Offered:** Autumn  
The physical and chemical measurements involved in: the determination of inorganic and other selected pollutants; the analysis of sewage and other sludges; and the testing of sewage effluents together with an intro-
duction to specialized analytical techniques including atomic absorption spectrophotometry, chromatography and polarography. Emphasis is placed on sampling and sample preservation laboratory techniques, interpretation of results and the significance of the measured parameters in the operation and control of water and waste water treatment plants.

**Prerequisite:** CHA644
**Credit Points:** 7  **Contact Hours:** 3 per week

**CHB250 INTRODUCTION TO ANALYTICAL CHEMISTRY**

**Offered:** Autumn, Spring

A study of industrial wastes with respect to typical waste characteristics, effects on natural waters, sewers and treatment plants, methods of inhouse treatment and their achievable effluent levels, monitoring techniques, legislation and charging procedures.

**Prerequisites:** CET777, CHA744
**Credit Points:** 7  **Contact Hours:** 3 per week

**CHB210 CHEMISTRY IIA**

**Offered:** Autumn

The structure and bonding of atoms and molecules; elementary thermodynamics including the First Law and thermodynamics; the states of matter and the gas laws; homogeneous, heterogeneous and ionic equilibria; elementary kinetics and experimental methods. Principles of non-redox and redox ionic reactions involving oxygen compounds; Periodic Table and periodicity; chemistry of simple acids, bases and salts; chemistry of hydrogen and hydrides; applications.

**Credit Points:** 8  **Contact Hours:** 4 per week

Note: This subject is not compatible with CHB101, CHB102; credit may not be retained for more than one of these subjects.

**CHB201 CHEMISTRY IIB**

**Offered:** Spring

A course in practical chemistry covering experimental aspects of inorganic, physical and organic chemistry that expands on the techniques covered in CHB102.

**Prerequisite:** CHB102  **Co-requisite:** CHB201
**Credit Points:** 6  **Contact Hours:** 3 per week

Note: This subject is not compatible with CHB230, CHB250, CHB270; credit may not be retained for more than one of these subjects.

**CHB210 ANALYTICAL CHEMISTRY I**

**Offered:** Autumn

Introduction to analytical chemistry. Examples of acid base titrations, reduction-oxidation titrations and precipitation titrations are used to develop the theory and practice of volumetric analysis. Gravimetric analysis is introduced and both precipitometric and evolution methods are discussed. A coverage of methods available for handling experimental results is given, including absolute and relative precision and accuracy, deviations, rejection of results, significant figures, sources of error and means by which they may be minimised.

**Credit Points:** 6  **Contact Hours:** 3 per week
the topics of the chemistry of the non-metals and anions; the chemistry of main group and transition metals; basic co-ordination chemistry.
Prerequisite: CHB180
Credit Points: 6  Contact Hours: 3 per week

- CHB250 ORGANIC CHEMISTRY II
Offered: Autumn, Spring
Alkenes and alkynes - electrophilic and free radical addition. Benzene - aromatic character, electrophilic substitution. Alcohols, phenols and ethers - nucleophilic reactions, oxidation. Aldehydes and ketones - addition reactions, oxidation and reduction, active hydrogen reactions, synthesis from Grignard reagents. Simple spectroscopic properties (infrared and ultraviolet) of the above classes.
Prerequisite: CHB150
Credit Points: 8  Contact Hours: 4 per week
Note: This subject is not compatible with CHB201. CHB202: credit may not be retained for more than one of these subjects.

- CHB270 PHYSICAL CHEMISTRY II
Offered: Spring
The Second Law of thermodynamics; introductory surface chemistry and electrochemistry, the properties of liquids and solutions and the phase chemistry of one component systems; molecular bonding and introductory spectroscopy.
Prerequisite: CHB180
Credit Points: 8  Contact Hours: 4 per week
Note: This subject is not compatible with CHB201. CHB202: credit may not be retained for more than one of these subjects.

- CHB310 ANALYTICAL CHEMISTRY III
Offered: Autumn, Spring
Calculation of titration curves for redox, precipitometric and complexometric titrations, conditional stability constants, masking and demasking phenomena, organic analytical reagents, gravimetric theory, methods and theory of sampling, errors, sample dissolution, electrodeposition, potentiometric methods, ion selective electrodes, coulometry, polarography.
Prerequisite: CHB101 + CHB102 or CHB201 + CHB202 or CHB110 + CHB210 + CHB270
Credit Points: 8  Contact Hours: 4 per week

- CHB327 CHEMICAL TECHNOLOGY III
Offered: Autumn
Introduction to chemical process industries. Economic significance. Flowsheets. Unit operations: basic concepts, a study of range of unit operations selected from: comminution, classification, leaching, solid-fluid separations, drying, fluid transport, agitation, liquid-liquid extraction, heat exchange, evaporation, distillation, gas absorption.
Prerequisites: CHB180 + PHB260 or CHB101 + CHB102 + PHB110 + PHB111
Credit Points: 6  Contact Hours: 3 per week

- CHB340 SPECTROSCOPY
Offered: Autumn, Spring
The theory of rotational, vibrational and electronic spectroscopy. Instrumentation and spectroscopic methods of analysis.
Prerequisites: CHB180 or CHB110 or CHB101 + CHB102 + CHB201
Credit Points: 8  Contact Hours: 3 per week

- CHB344 ENGINEERING CHEMISTRY M
Offered: Spring
This introductory subject in chemistry for mechanical engineers covers topics including fuels and their combustion, the chemistry of lubricants and lubrication, metallic corrosion and water treatment processes.
Prerequisite: CHB002
Credit Points: 4  Contact Hours: 2 per week

- CHB350 ORGANIC CHEMISTRY III
Offered: Autumn, Spring
This unit continues the study of organic functional groups and extends the students' knowledge to include simple molecules of biological significance. A study of the stereochemical aspects of organic chemistry is included along with a more detailed examination of spectroscopic properties, including ultraviolet, infrared and nuclear magnetic resonance spectroscopy.
Prerequisites: CHB150, CHB250
Credit Points: 8  Contact Hours: 4 per week
Note: This subject is not compatible with CHB351; credit may not be retained for more both.

- CHB351 ORGANIC CHEMISTRY IIIIC
Offered: Autumn
This unit continues the study of organic functional groups and extends the students' knowledge of the mechanisms of simple organic and biochemical processes. A study of organic spectroscopy is also involved and includes ultraviolet, infrared and nuclear magnetic resonance spectroscopy.
Prerequisites: CHB101, CHB102, CHB202
Credit Points: 8  Contact Hours: 5 per week
Note: This subject is not compatible with CHB350; credit may not be retained for both.

- CHB370 PHYSICAL CHEMISTRY III
Offered: Autumn
Experimental, theoretical and applied reaction kinetics; thermodynamics; real fluids; gas absorption and heterogeneous catalysis; phase equilibria.
Prerequisites: CHB180, CHB270
Credit Points: 8  Contact Hours: 4 per week
Note: This subject is not compatible with CHB371; credit may not be retained for both.

- CHB371 PHYSICAL CHEMISTRY IIIC
Offered: Autumn
Experimental, theoretical and applied reaction kinetics; thermodynamics; real fluids; gas absorption and heterogeneous catalysis; phase equilibria.
Prerequisites: CHB101, CHB102, CHB201
Credit Points: 8  Contact Hours: 4 per week
Note: This subject is not compatible with CHB371; credit may not be retained for both.

- CHB411 ENVIRONMENTAL ANALYTICAL CHEMISTRY
A course of lectures and practical work for students of biological sciences dealing with the principles and application of sampling, and electrometric/spectroscopic/flame separation methods to the analysis of materials from the biosphere.
Prerequisites: CHB101, CHB102, CHB201, CHB202
Credit Points: 8  Contact Hours: 4 per week
Note: This subject is not compatible with CHB370; credit may not be retained for both.

- CHB427 CHEMICAL TECHNOLOGY IV
Offered: Spring
Numerical, graphical and computer aids to problem solving. Chemical process principles. Industrial stoichiometry, material balances for solids, liquids,
Chemical separation methods. Principles of column chromatography, ion exchange chromatography, molecular sieves, gel permeation chromatography, gas chromatography, particularly in the study of chemical reaction rates, and in reaction rate theory and homogeneous catalysis.

Prerequisites: CHB230 or CHB201 + CHB202
Credit Points: 8
Contact Hours: 3 per week

CHB440 SEPARATION METHODS
Offered: Spring
Basic principles and applications of solvent extraction, chromatography, and mass spectrometry. Determination of organic structure by mass spectrometry.

Prerequisites: CHB210 + CHB250 + CHB270 or CHB201 + CHB202
Credit Points: 8
Contact Hours: 3 per week

CHB450 ORGANIC CHEMISTRY IV
Offered: Spring
A study of the reactions and properties of polyfunctional organic compounds as well as heterocyclic compounds particularly naturally occurring and technically useful compounds. Rearrangement reactions and the chemistry of organometallic compounds also are studied.

Prerequisites: CHB250, CHB350
Credit Points: 8
Contact Hours: 4 per week
Note: This subject is not compatible with CHB451; credit may not be retained for both.

CHB451 ORGANIC CHEMISTRY IVC
Offered: Spring
A study of the reactions and properties of polyfunctional organic compounds as well as heterocyclic compounds, particularly naturally occurring and technically useful compounds. Rearrangement reactions and the chemistry of organometallic compounds also are studied.

Prerequisites: CHB351
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with CHB450; credit may not be retained for both.

CHB470 PHYSICAL CHEMISTRY IV
Offered: Autumn, Spring
Application of thermodynamics to phase transition and equilibria. Polynomialisation processes, homogeneous and heterogeneous catalysis. Introduction to reactors and reactor design.

Prerequisites: CHB270, CHB370
Credit Points: 8
Contact Hours: 4 per week
Note: This subject is not compatible with CHB471; credit may not be retained for both.

CHB471 PHYSICAL CHEMISTRY IVC
Offered: Spring
Thermodynamics of real gases and ideal solutions; surface chemistry; industrial chemical reactors; reaction rate theory and homogeneous catalysis.

Prerequisites: CHB201, CHB371
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with CHB470, CHB476; credit may not be retained for more than one of these subjects.

CHB510 INSTRUMENTAL ANALYSIS
Offered: Autumn

Prerequisites: CHB310, CHB340, CHB440, CHB351
Credit Points: 8
Contact Hours: 4 per week
Note: This subject is not compatible with CHB641; credit may not be retained for both.

CHB527 CHEMICAL TECHNOLOGY V
Offered: Autumn, Spring
Chemical engineering process analysis and its applications to selected industrial processes. An introductory study of basic economic principles and their applications to the chemical process industries. An introduction to process plant design.

Prerequisites: CHB327, CHB427, CHB470
Credit Points: 8
Contact Hours: 4 per week
CHB571 PHYSICAL CHEMISTRY VC
Solid-liquid equilibria, ternary eutectics and industrial phase chemistry; equilibria and dynamic electrochemistry; kinetics of chain reactions.
Prerequisites: CHB371, CHB471
Credit Points: 8 Contact Hours: 4 per week
Note: This subject is not compatible with CHB570; credit may not be retained for both.

CHB590 MATERIALS SCIENCE
Offered: Autumn, Spring
The nature of solids; crystalline materials; metals; non-metallic materials and organic polymers.
Prerequisites: CHB370 or CHB371, CHB470 or CHB471
Credit Points: 8 Contact Hours: 3 per week

CHB680 PROJECT
Offered: Spring
A laboratory-oriented investigation extending over one semester full-time or two semesters part-time under the supervision of a member of staff. The project will require a literature search, further study, continuing discussion with the project supervisor and a laboratory research program. The literature search, study and discussion component of CHB680 and CHB681 is aimed at developing student competence in search techniques and experience in experimental design. The laboratory program aims to develop student competence in the use of experimental techniques as a basis for problem solving. Completion of the project requires the submission of a written technical report.
Prerequisites: for CHJ19 - CHB510 or CHB527 and two of CHB530, CHB550 and CHB570 or, for ASJ226 - two of CHB601, CHB531 and CHB571
Credit Points: 20 Contact Hours: 10 per week

CHB610 ADVANCED ANALYSIS
Offered: Spring
Use of computers for on line data acquisition and instrument control. Microprocessor controlled instrumentation and dedicated data systems. Advanced instrumental techniques, with emphasis on trace techniques and associated sample-handling requirements. Techniques included for discussion will be electroanalytical techniques, nondestructive techniques and thermal methods.
Prerequisite: CHB510
Credit Points: 4 Contact Hours: 2 per week

CHB618 LABORATORY AUTOMATION
Offered: Spring
Current approaches to the use of computer facilities in commercial laboratories will be emphasised in the lecture course. Discussion will centre on planning to achieve an integrated network. Instrument types to include analogue output, BCD and serial digital interfaces (RS232C, IEEE, etc.). Incorporation of microprocessor controlled instruments and those instruments with dedicated data systems. Report generation and data communication systems. Polling (programmed I/O) and interrupt techniques.
Prerequisite: PHB504
Credit Points: 8 Contact Hours: 3 per week

CHB627 CHEMICAL TECHNOLOGY VI
Offered: Autumn, Spring
Measurement and control in large-scale chemical processing. An introduction to process modelling including strategies of process operations, optimisation methods, linear programming and dynamic programming.
Prerequisites: CHB537, CHB427
Credit Points: 4 Contact Hours: 2 per week

CHB628 ENERGY TECHNOLOGY
Offered: Spring
A study of energy conversion systems and energy economics including choice of fuels, distribution costs and net energy analysis.
Prerequisite: CHB527 Co-requisite: CHB627
Credit Points: 6 Contact Hours: 3 per week

CHB631 ADVANCED INORGANIC CHEMISTRY
Offered: Spring
Selected metals: the solution and solid state chemistry of metals such as titanium, zirconium, hafnium, chromium, molybdenum and tungsten with emphasis on structures, bonding and reaction mechanisms. Precious metals: the 'platinum group', silver and gold; high purity chemicals. Redox systems: hydrogen peroxide and related peroxy-compounds; dithionates and the oxo-sulphur system; sodium borohydride and other complex hydrides.
Prerequisite: CHB530
Credit Points: 8 Contact Hours: 3 per week

CHB640 CHEMISTRY VI
Offered: Spring
Celluloid chemistry and rheology; Fourier transform, laser and time resolved spectroscopy; interpretative 13C NMR spectroscopy; free radical and photochemistry and the organic chemistry of sulphur and phosphorus compounds.
Prerequisites: CHB450, CHB470, CHB550, CHB570
Credit Points: 4 Contact Hours: 2 per week
Note: This subject is not compatible with CHB641, CHB671; credit may not be retained for more than one of these subjects.

CHB641 ADVANCED SPECTROSCOPY
Atomic absorption and emission spectroscopy. Electron spin resonance spectroscopy. Lasers and laser spectroscopy. Mass spectrometry, particularly GC-MS. Fourier transform spectroscopy, particularly 13C and multi-nuclei NMR. The role of dedicated computers in these techniques will be emphasised.
Prerequisite: CHB340
Credit Points: 8 Contact Hours: 3 per week
Note: This subject is not compatible with CHB510, CHB640; credit may not be retained for more than one of these subjects.

CHB651 BIOLOGICAL CHEMISTRY
Offered: Spring
Prerequisite: CHB551
Credit Points: 8 Contact Hours: 3 per week

CHB660 INDUSTRIAL VISITS
Offered: Spring
Visits to selected industries, for example, petroleum, industrial chemicals, sugar.
Prerequisite: CHB301
Credit Points: 2
CHB671 SOLIDS & SURFACES
Offered: Spring
Colloid chemistry and rheology. The surface chemistry of metals, polymers and other solid materials. Surface analysis techniques including FTIR, XPS, SAM and ESCA.
Prerequisite: CHB571
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with CHB640; credit may not be retained for both.

CHB640 ADVANCED MATERIALS SCIENCE
Offered: Spring
Advanced materials analysis; fibre reinforced composites; advanced alloys; inorganic polymers; applied polymer science.
Prerequisite: CHB590
Credit Points: 8  Contact Hours: 3 per week

CHB691 ENVIRONMENTAL CHEMISTRY
Offered: Spring
The nature and composition of natural and polluted waters; metal ions, gases, redox equilibria complexation and microbial transformation of chemicals in water; water pollution and trace-level substances in water. Environmental chemistry of soils; acid-base equilibria and ion-exchange; chemicals in soil. The nature and composition of the atmosphere; chemical and photochemical reactions in the atmosphere; the oxides of carbon, sulphur and nitrogen in the atmosphere; organic pollutants and photochemical smog; particulate matter. Water and atmospheric monitoring.
Prerequisites: CHB551, CHB571
Credit Points: 8  Contact Hours: 3 per week

CHH110 ANALYTICAL CHEMISTRY I
Offered: Autumn
General introduction to analytical chemistry, literature, including computer-oriented databases. The analytical process, method selection, sampling, method validation, treatment of results, quality control, quality assurance, report presentation. Safety in the laboratory. Packaging, storage, transport and disposal of chemical materials. Instrumental methods for separation and identification: gas chromatography, including glass capillary. Liquid chromatography including ion exchange chromatography. Data handling systems. Electrophoresis. Mass spectrometry and GC/MS plus data system.
Credit Points: 18  Contact Hours: 6 per week

CHN210 ANALYTICAL CHEMISTRY II
Offered: Spring
This unit provides a theoretical background in spectroscopy and an appreciation of the applications, limitations and practice of modern methods of spectrometric analysis. Topics include molecular spectrophotometry, atomic absorption and atomic emission, X-ray fluorescence and related techniques, nuclear magnetic resonance spectroscopy and electron spin resonance spectroscopy.
Prerequisite: CHN110
Credit Points: 18  Contact Hours: 6 per week

CHN310 ANALYTICAL CHEMISTRY III
Offered: Autumn
A study of modern electrochemical analytical techniques and an advanced level course in electronics. Principles of interfacial electrochemistry, the ion double layer, electro-capillarity, electrode kinetics, evaluation of kinetic parameters, interfacial electrochemistry in chemical analysis. Thermal techniques: thermogravimetry, differential thermal analysis, differential scanning calorimetry, enthalpymetry, pyrolysis.
Prerequisite: CHN210
Credit Points: 15  Contact Hours: 5 per week

CHN345 LABORATORY MANAGEMENT
Offered: Autumn
The unit introduces concepts of modern management appropriate to an analytical laboratory. The functions of management. The role of the laboratory manager. Analysis of management efficiency, decision making, management techniques for decision making. Installation of laboratory equipment, selection and maintenance of laboratory equipment, calibration of equipment and apparatus, replacement policy, purchasing and financial control.
Credit Points: 3  Contact Hours: 1 per week

CHN410 ANALYTICAL CHEMISTRY IV
Offered: Spring
Specialised application of analytical techniques. Trace analysis: laboratory design and practice, sample collection, pretreatment and handling. Consideration and selection of techniques and methods. Accuracy, precision, sensitivity, selectivity, reliability. Forensic chemistry: special requirements of a forensic science laboratory - sample handling, unequivocal identification, computerized procedures, security. Consideration of typical examples of forensic analysis. Outline of the Queensland legal system, the expert witness, pretrial preparation facts vs. opinions.
Prerequisite: CHN310
Credit Points: 15  Contact Hours: 5 per week

CHN445 LABORATORY AUTOMATION
Offered: Spring
This unit is designed to give the student 'hands on' experience with on-line data acquisition and instrument control. It includes instruction in a language appropriate to the computer system to be used. Interfacing techniques. Serial and parallel data transmission. Interrupt facilities. Domain conversion and real time data acquisition and display. Digital techniques for signal smoothing. Peak recognition techniques. Analysis of microprocessor applications in analytical instrumentation.
Prerequisite: CHN350
Credit Points: 9  Contact Hours: 3 per week

CHN510 ANALYTICAL CHEMISTRY V
Offered: Autumn, Spring
This four semester unit includes some lecture, seminar and workshop activities, but the research/development project represents the major activity.
Prerequisite: CHN410, CHN345, MAN255
Credit Points: 24  Contact Hours: 8 per week

CHP150 BIOCHEMICAL ENGINEERING
Offered: Spring
The application of organisms, systems and processes to productive level activities. Specific areas are fermentation, bioprocessing and enzyme technology. Topics include: fermentation processes; microbial physiology and environmental factors in processing operations; fermentation kinetics and modelling; aeration and agitation; sterilisation, bio-reactors and scale-up. It also covers enzymology; large-scale extraction and purification of enzymes; immobilised enzymes; application of enzymes; downstream processing; and bio-process economics.
Credit Points: 10  Contact Hours: 6 per week
CHP700 PROJECT
Offered: Full Year
All students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project will be assessed on the basis of an extensive written report and an oral presentation.
Credit Points: 40

CM133 COMMUNICATION TECHNIQUES
Offered: Autumn, Spring
Credit Points: 4 Contact Hours: 2 per week

CM102 SPEECH COMMUNICATION
The major aim of the course is to develop in the student the ability and confidence to successfully communicate in speaking in contemporary business and professional situations. The specific objectives are to develop an understanding of the concepts and skills required for effective participation in performance situations, such as: radio and television broadcasting, creative presentations to clients, creative presentations to the public, persuasive presentations to an audience, supportive bases for these methods of communication will include language and non-verbal aspects, listening and delivery and staging and use of visual aids.
Credit Points: 12 Contact Hours: 3 per week

CM104 WRITING & COMMUNICATION THEORY
The subject provides a broad overview of the contemporary study of communication by introducing students to a wide range of theories, methods, and approaches. In addition, the subject deals with the ways in which different approaches may be applied to particular communicative situations by investigating the principles underlying interpersonal, small group, organisational, and mass communication situations. Emphasis is placed on mass communication theory and practice, with particular attention to the relevance of communication theory to professional practice. Theoretical approaches dealt with include rhetorical, process, interactive, and cultural studies perspectives.
Credit Points: 12 Contact Hours: 4 per week

CM106 PROFESSIONAL COMMUNICATION
Offered: Autumn
Communicating successfully in writing and orally in contemporary professional situations. An understanding of the concepts and skills required for effective practices in formal reporting and persuasive writing, oral reporting and persuasive speaking, group decision making and meeting procedure, and leadership and participation.
Credit Points: 9 Contact Hours: 3 per week

CM107 BUSINESS COMMUNICATION
To achieve standards of preparation and presentation in formal communication which are acceptable in contemporary organisations. It encompasses an introduction to the techniques and objectives of communication in formal contexts. The processes of oral and written communication and their application within organisational settings to interviewing, presentational speaking, research papers, reports and correspondence.
Credit Points: 12 Contact Hours: 3 per week
CMB134 COMMUNICATION
Offered: Autumn
This subject is designed to train students to communicate effectively with the public and with their peers by developing the skills of reading and writing and spoken communication with special reference to professional and administrative contexts.
Topics covered include the library paper; preparation and presentation of research papers; business correspondence; objectives, format, composition; report writing; presentation; editing; and speech preparation.
Credit Points: 12 Contact Hours: 3 per week

CMB135 COMMUNICATION FOR ENGINEERS
Offered: Autumn
Development of confidence in the dissemination of knowledge, skills and information to both technical and nontechnical associates via written and oral communication resources. Oral presentation techniques. Effective written communication skills.
Prerequisite: CMB108
Credit Points: 2 Contact Hours: 1 per week

CMB136 TECHNICAL WRITING
Offered: Autumn
The prose, mechanical and graphical elements in reports, proposals, instructions and other technical literature are analysed and put into practice. The subject includes the preparation of routine correspondence, and presents modern developments in organisational communications.
Credit Points: 2 Contact Hours: 1 per week

CMB161 LITERATURE & COMMUNICATION
This course develops skills in written communication, and also develops critical and analytical skills in dealing with a variety of communicative and textual forms. Students will acquire an understanding of various forms of written communication, specifically, literary forms such as fiction and poetry, and performative, such as drama. This will entail understanding the theory behind such forms; students will therefore be introduced to literary theory as well as language and communication theory. The subject provides a theoretical background for students wishing to take electives in the Humanities area in later semesters.
Credit Points: 12 Contact Hours: 3 per week

CMB163 INTRODUCTION TO AUDIO-VISUAL COMMUNICATION
Introduction to the theory and practice of audio-visual communication, media consciousness, definition of operational objectives, analysis of audience characteristics; development of concept, selection of appropriate mediated form, basic scriptwriting; equipment, quality, and cost effectiveness; selection and operation of appropriate equipment; familiarity with still camera, audio and video equipment; techniques for slide-tape and video production. Production of a sound synchronised slide-tape programme.
Credit Points: 12 Contact Hours: 3 per week

CMB191 FUNDAMENTALS OF PHOTOGRAPHY
Offered: Autumn, Spring
Historical development of the photographic arts, role of the photographer in society, the principles of visual perception and design, photography as both art and craft; display photography, news photography, photo layout and design; the still camera, developing, printing and enlarging; creative use of camera and darkroom. Fortnightly photographic assignments. Portfolio.
Credit Points: 12 Contact Hours: 3 per week

CMB211 COMMUNICATION RESEARCH
This subject aims to provide students with an understanding of qualitative and quantitative research methods used in the communication professions. The course will examine the basic assumptions and strategies of social research. Topics will include focus group interviews; questionnaire construction and sample surveys; experimental design.
Co-requisite: CMB111, CMB104
Credit Points: 12 Contact Hours: 3 per week

CMB212 AUSTRALIAN STUDIES
This subject provides the student with a greater awareness of the Australian social history. It examines the construction of Australian identity since white settlement.
Prerequisite: CMB111 or 5 subjects B.Bus degree program
Credit Points: 12 Contact Hours: 3 per week

CMB220 SPEECH & DRAMA
Students will be given a course of relaxation, vocal and expression exercises to increase their control of body language and vocal presentation. They will study the communication of an age by looking at the manners, values and attitudes of the culture reflected in its drama. Particular attention will be paid to twentieth century drama and its reflection of the communication of our society. Students' perception, especially auditory awareness and visual perspicacity will be extended by the use of video recording of their work. This subject has an equal balance of theoretical and practical components.
Prerequisite: CMB012 or CMB131
Credit Points: 12 Contact Hours: 3 per week

CMB241 INTRODUCTION TO ADVERTISING
This subject serves as an introduction to later subjects in the Communication course and is a prerequisite for further advertising subjects. It is also a useful elective subject for management and accounting students. Introduction to Advertising presents students with an overview of the advertising industry. It traverses the inter-relationship of the institutions of advertising - the advertisers, the advertising agencies and the media. It details methods of determining advertising budgets, establishing target audiences, interpreting audience ratings and circulation figures and enables students to gain a preliminary understanding of the creative functions of the advertising industry. It also shows the ethical and legal side of advertising and its important role in today's society.
Prerequisite/Co-requisite: MNB253
Credit Points: 12 Contact Hours: 3 per week

CMB291 AUSTRALIAN LITERATURE & FILM
A survey of the development of Australian literature and film with an emphasis on modern works. The relationship between literary and cinematic treatment of particular themes and situations will be examined, with special attention to translation of works from literature to film.
Prerequisite: CMB212
Credit Points: 12 Contact Hours: 3 per week
CMB311 CONTEMPORARY SOCIAL ISSUES
A study of social trends and contemporary issues in Australian society from a sociological perspective. Media treatment and presentation of issues, in the form of news, current affairs and documentaries, is examined and discussed and individual, community and governmental responses analysed. Topics vary according to social events, but include such subjects as family crises, environmental issues, deviance, minority groups, health and welfare concerns, leisure and entertainment.
Prerequisite: CMB111
Credit Points: 12  Contact Hours: 3 per week

CMB321 COMMUNICATION IN SMALL GROUPS
The application of communication theory and the refinement of practical speech communication skills. Business and media interviewing, role-playing, and simulated group problem-solving will be practised and analysed. Topics relating to Public Relations, Advertising and Journalism will form a base for these projects. Students’ perception, especially auditory awareness and visual perspicacity will be extended by the use of video recording of their work.
Prerequisite: Three communication degree subjects including CMB012 or CMB131
Credit Points: 12  Contact Hours: 3 per week

CMB351 COMMUNITY RELATIONS
Specialist public relations subject which examines strategies used to relate an institution or individual to communities through community relations programs; fund raising and special events; and the setting up of community groups. The subject is designed to increase in depth and breadth of understanding as well as practical knowledge of a significant and growing area of public relations. Practical work will be undertaken in planning community relations programs, fund raising campaigns and special events. Presentations of their programs are made by student groups.
Prerequisite/Co-requisite: CMB651
Credit Points: 12  Contact Hours: 3 per week

CMB359 NEWSWRITING
Students, through lectures and workshops, learn how to evaluate and select information to write news stories. Students are thus exposed to journalistic style, grammar, spelling, punctuation and syntax.
Credit Points: 12  Contact Hours: 3 per week

CMB360 REPORTING PRINCIPLES
Students go into the community to cover rounds and news stories. They receive individual attention from tutors in weekly conferences in which each story is critiqued. Students rewrite their stories to bring them up to publishable standard. All stories are made available for possible publication in the School newspaper.
Prerequisite: CMB359
Credit Points: 12  Contact Hours: 3 per week

CMB363 ADVERTISING COPYWRITING - PRINT
This subject is an important base for further study in advertising. Students are introduced to the principles, theory and practice relating to the creation of advertisements. The role of the copywriter in the advertising process is examined as is the relationship between copy and art. Practical work involves the writing, setting and presentation of copy for print advertising for manufacturers, service industries and the retail sector. Case briefs for assignments are presented to students by advertisers or advertising agency executives. Finished presentations are then made to these specialists.
Prerequisite: CMB241
Credit Points: 12  Contact Hours: 3 per week

CMB364 ADVERTISING COPYWRITING - ELECTRONIC
Students continue their studies of the principles and practice of copywriting. Practical work concentrates on the electronic media. This includes the writing and production of commercials for both radio and television and other industry requirements.
Prerequisite: CMB363 and CMB464
Credit Points: 12  Contact Hours: 3 per week

CMB371 SUB-EDITING & LAYOUT
An examination of the principal functions of editors and sub-editors in the print media. An introduction to sub-editing. An examination of the theories of newspaper and magazine design and of current and likely future practices. Practice in basic sub-editing, including on-line subbing of Australian Associated Press stories, introduction to Desktop Publishing, design and layout. The class produces a School newspaper. Students are expected to devote 6 hours per week to assigned sub-editing and layout activities.
Prerequisite: CMB571 and 80 wpm Tecline
Credit Points: 12  Contact Hours: 3 per week

CMB422 PROFESSIONAL SPEECHWRITING
The context for speeches - environmental, relational and linguistic; issues for targeting speeches; rhetorical principles for developing personal language style; methods of interpreting and evaluating speeches; study of exemplars and writing of various types of speeches - occasional addresses, informative speeches, persuasive speeches, modern campaign speeches; using speeches for advance release and promotional purposes; reports on speech writing projects.
Prerequisite: CMB552
Credit Points: 12  Contact Hours: 3 per week

CMB423 AUSTRALIAN MEDIA INSTITUTIONS
The aim of the course is to introduce students to the major media institutions within Australia. This will involve examination of industry development and structure, and industry practices in the press, television, advertising and radio. Outside specialists will be used to augment the expertise of Communications staff.
Prerequisite: CMB011
Credit Points: 12  Contact Hours: 3 per week

CMB441 RETAIL ADVERTISING
Topics of study include the examination and study of the advertising objectives, requirements, strategies and practices of the different segments of the retail industry. These are compared and contrasted with the same aspects of national advertising. Workshop sessions and assignments accent practical work on retail advertising.
Prerequisite: CMB363, CMB364 or MNB491
Credit Points: 12  Contact Hours: 3 per week

CMB442 MOTIVATION AND ETHICS IN ADVERTISING
The subject will provide an introduction to those areas of psychology particularly appropriate to advertising. It will relate these to classical and modern theories of the motivational aspects of advertising. The ethical standards of the Advertising Institute of Australia, the Australian Association of National Advertisers, the
Advertising Federation of Australia and the Direct Marketing Association will be examined and compared with motivational practice and requirements. Emphasis will be placed on the examination of current campaigns against motivational and ethical backgrounds.

**Prerequisite:** CMB241
Credit Points: 12  Contact Hours: 3 per week

**CMB451 INDUSTRIAL PRESS**
An examination of the requirements for communication with employees, shareholders, customers and other specific publics through specialist publications. Analysis of requirements for house magazines, newspapers and newsletters, customer brochures, pamphlets and newsletters, and financial reports to shareholders and staff. Use desk-top publishing and examination of new technology.

**Prerequisite:** CMB352
Credit Points: 12  Contact Hours: 3 per week

**CMB452 INTRODUCTION TO PUBLIC RELATIONS**
An introduction to the concept and practice of public relations. The subject surveys the history, theories, models, and management of public relations activities and processes. Modes of communication are analyzed in relationship to reaching different levels of society. A number of guest practitioners discuss their programs and areas of specialization, such as community, internal, media, and government relations.

Credit Points: 12  Contact Hours: 3 per week

**CMB461 CREATIVE WRITING**
Creative writing is a highly skilled form of communication, involving the communication of ideas and values within a social framework. Students will examine the creative writing process from first draft to final product, with particular emphasis on the short story form. The problems of publishing and marketing as a professional writer will be considered.

**Prerequisite:** CMB161
Credit Points: 12  Contact Hours: 3 per week

**CMB462 MAGAZINE & FEATURE WRITING**
Study of reporting and writing techniques for magazine articles and newspaper human interest stories; analysis of content and style of publications; markets for publication; practical writing and production assignments.

**Prerequisite:** CMB360 and 40 w.p.m. Teeline
Credit Points: 12  Contact Hours: 3 per week

**CMB463 MODERN LITERATURE & FILM IN SOCIETY**
This course will offer an integrated study of contemporary literature and film and show how both media can provide an insight into topical issues of the day. Various critical approaches to literary and filmic texts will be analyzed and the concepts of genre, authorship and structure will be considered.

**Prerequisite:** CMB161
Credit Points: 12  Contact Hours: 3 per week

**CMB464 VIDEO PRODUCTION TECHNIQUES**
Analysis of audio-visual media in terms of markets served and cost effectiveness; the technology of video, Principles of production - conversion of script to finished product; introduction to budgeting and production management, hiring and casting. Principles and practice of directing and editing; pictorial composition, lighting, colour, camera; sound and sound recording; animation and graphics. Production of a colour video program.

**Prerequisite:** CMB163
Credit Points: 12  Contact Hours: 3 per week

**CMB465 LITERATURE, LANGUAGE & SOCIETY**
Novels will be considered as both influenced by, and influencing the society in which they are produced. Students will be shown how literature can provide a detailed and complex analysis of society and ideologies. As with the prerequisite subject Literature and Composition, emphasis will be placed on critical and analytical skills through close textual analysis, applying contemporary literary and linguistic theory.

**Prerequisite:** CMB161
Credit Points: 12  Contact Hours: 3 per week

**CMB521 COMMUNICATION & PUBLIC OPINION**
The processes of public opinion are studied from the perspective of sociological theory. Within this framework, the operation of the media will be examined in some detail. Specific topics to be considered include opinion polling in Australia; the association between demographic characteristics and opinions; the role of the media in the "social construction of reality"; the conceptual and operational relationships between attitudes and opinions; cognitive dissonance and communication strategies for opinion change; the role of institutionalised forms of community agitation in influencing public opinion and public policy; social stability and social change. Students will analyze opinion poll data from a number of sources using statistical software on a main-frame computer.

**Prerequisite:** CMB211
Credit Points: 12  Contact Hours: 3 per week

**CMB541 MEDIA STRATEGY**
Topics of study include the following: costing and scheduling media, qualitative and quantitative factors affecting media selection and use, market targeting, researching the media plan, planning media strategy, co-ordinating media, media options, concepts of media decision making, media exposure, media comparisons, media trends, media and the computer.

**Prerequisite:** CMB241 or MNB253
Credit Points: 12  Contact Hours: 3 per week

**CMB542 ADVERTISING MANAGEMENT**
The purpose of the subject is to provide the students with an understanding of the managerial side of the advertising profession, and to equip them with the tools they need to make executive decisions in advertising. Students will examine the process of setting appropriate advertising objectives, designing a program of advertising research, the social environment and regulation of advertising, managerial participation in the creative and media planning process, account management in an advertising agency, client-company management and the advertising process, competing theoretical concepts of "how advertising works".

**Prerequisite:** CMB241 or CMP125
Credit Points: 12  Contact Hours: 3 per week

**CMB543 ADVANCED ADVERTISING**
This subject will build upon the knowledge and skills gained by students in either Advertising Copywriting or Media Strategy and build them to be fully operative at copywriter or media planner level. While theoreti-
The purpose of this subject is to train students to explore theoretical problems related to radio and television news and to provide them with practical experience in writing/production/reading broadcast news. Students will study the theoretical aspects of broadcast news writing and production. They will man the 4EB news throughout the semester and the following between-semester months. Students will prepare television reports and present them in class for criticism. Students will be required to develop an understanding of the workings of the radio broadcast equipment. They will assist in the production of current affairs programs for 4EB.

Prerequisite: CMB462 and 60 wpm Typing
Credit Points: 12 Contact Hours: 3 per week

CMB562 PROFESSIONAL COMMUNICATION PRACTICE
The aim of this elective subject will be to provide the communication student with an opportunity to observe, and gain insight into, the applications of communication theory to communication practice. The student will be placed with an approved employer. The lecturer in charge of the subject will obtain reports from the student at regular intervals. The student will be required to complete a progressive assessment programme. The student's result will be determined on the basis of reports, continuous assessment and the employer's report.
Prerequisite: EITHER CMB363/CMB364 and CMB542 and CMB541 OR CMB371 or CMB672 OR CMB451 and CMB553
Credit Points: 12 Contact Hours: 3 per week

CMB641 ADVERTISING CAMPAIGNS
Students will be briefed to prepare and document three advertising campaigns. The subjects of these campaigns will be drawn from actual industry marketing situations.
Prerequisite: CMB542
Credit Points: 12 Contact Hours: 3 per week

CMB651 ADVANCED PUBLIC RELATIONS
An advanced approach to public relations submissions by means of the case study method. The subject provides practical experience in problem solving, strategic planning, analysis, and implementation of public relations programs. Guest practitioners present problems they deal with in government and financial relations, from which students derive underlying principles and devise model plans that offer solutions to these societal problems.
Prerequisite/Co-requisite: CMB451
Credit Points: 12 Contact Hours: 3 per week

CMB662 AUDIO-VISUAL SEMINAR
Analysis of the process and effects of mediated communication; budgeting and production management;
effective presentation methods; innovation and special media events; advanced production techniques; working as a part of a crew to produce a significant film or television production. Students are required to discuss script preparation in consultation with the lecturer prior to the commencement of the semester.

**Prerequisite:** CMN8464  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### CMN666 PUBLIC RELATIONS CONSULTING & MANAGEMENT

Covers operation of a consultancy and the management of a public relations department in various types of organisations. Guest speakers in specialised areas provide case studies on budgeting, staff development, client relations, computer utilisation, management liaison, and campaign programmes.

**Prerequisite:** CMB351 or CMB651  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### CMN711 MASS COMMUNICATION B

Examines further the relationship between mass media and society through analysis of the practises, conventions and forms of mass communication, especially film and television. It relates the impact of mass media upon society to cultural formations such as ideology and politics. This subject provides additional theoretical bases for analysis of mass communication messages and reception, through the application of discourse analysis involving semiotic, structural and signification theories.

**Prerequisite:** CMN700  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### CMN720 COMMUNICATION EVALUATION

Introduces students to the conceptual skills of communication evaluation at an advanced level. It provides the knowledge and skills in both quantitative and qualitative methods. It is intended to prepare people who will commission, supervise and use search and research, not as an end in itself but as a means to solving communication problems.

**Prerequisite:** CMN700  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### CMN723 SEMINAR IN COMMUNICATION RESEARCH

Allows advanced students to undertake research in order to develop special expertise in a selected methodology, including specific methods and techniques, appropriate to each student’s own research interests. It is designed for advanced study in the methods of interpretive or empirical research, quantitative or qualitative. Students may undertake one or more research projects under the direction of their supervisor. They progressively present their work in a seminar of advanced students for review. It can be used to advance a thesis or project.

**Prerequisite:** CMN722  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### CMN810 COMMUNICATION & SOCIETY

On completing this subject the student should have an appreciation of the social trends and issues which influence the operation of mass communication. Students will study a diversity of social environments which are the setting for communication technology and policy. Students will be assisted in investigating specific fields of interest. Suggested topics may include: social impact of communication technology (home computer, video, access radio, cable television, Aussat); patterns of personal communication in networks and neighbourhoods; cross-cultural communication, multiculturalism and the media; social change in industrial and developing countries; media presentation and the social construction of reality; audience research in mass media and live, performing arts; and communication in urban and rural setting.

**Prerequisite:** CMN711  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### CMN811 COMMUNICATION & CULTURE

Deals primarily with written forms of discourse in mass culture. Topics include: the concept of mass culture and cultural formations; the growth of written mass culture/popular literature; the relationship between language and reality (reality formed by language, rather than vice versa); the modern debate about mass culture versus "high" culture literary journalism; mass culture and ideology (fictional and non-fictional prose, scripts). Theory will be related to textual analysis. This subject follows on from Mass Communication B.

**Prerequisite:** CMN810  
**Credit Points:** 12  
**Contact Hours:** 3 per week
CMN813 COMMUNICATION STRATEGIES
A study of putting communication theory into practice. Students may take policy and plans formed either in the subject Communication Policy and Planning, or elsewhere, and consider how to produce the appropriate change. The ethics of persuasion and the problems of co-operation are explored. Students must take into account the social implications of producing change, the role of the change agent and ways to monitor the effects in Australian as well as developing societies. Alternative perspectives for strategic thinking will be compared for application in the environments of marketing, advertising, editorial journalism, public relations, public affairs, public information.
Credit Points: 12 Contact Hours: 3 per week

CMN814 MODERN COMMUNICATION TECHNOLOGIES
This subject is designed to give students who are non-engineers a working understanding of modern and emerging communication technologies and their use by individuals and social institutions, with regard for their social consequences. Particularly, it aims to investigate the access to these technologies by citizens and to give students basic technological literacy. It overviews the state of the art and studies current and future applications, basic models and theories, the common technical terms, the economics and the fundamental electronics behind the research and practice of telecommunications, other hardware delivery systems and information technology.
Credit Points: 12 Contact Hours: 3 per week

CMN821 ADVANCED ORGANISATIONAL COMMUNICATION
A seminar with a focus on how people relate to each other in modern organisational settings, from small businesses to multi-national organisations in the public and private sector. It addresses communication up, down and across the organisation, among divisions and work units, among different professional and vocational specialties and within work teams. It has a problem-solving, interdisciplinary approach with reference to, at least, social psychology, sociology, culture theory, systems thinking and network analysis.
Credit Points: 12 Contact Hours: 3 per week

CMN823 CURRENT ISSUES IN COMMUNICATION
Allows students, after an exposure to the diverse field of study in human communication, to review aspects of this field in depth. It investigates current issues in the theory and practice of human communication. Student and lecturing staff use the various perspectives, theories and applications explored in the program.
Credit Points: 12 Contact Hours: 3 per week

CMN824 COMMUNICATION POLICY & PLANNING
Introduces students to the principles and processes of policy development and planning for communication delivery systems, such as a telecommunications system, national satellite broadcasting service or a television network, and for planning and regulating authorities. Students become familiar with the complex range of social environments, stakeholders, issues and options, and compare industrial and developing countries. It critically examines case studies of communication policy and planning.
Credit Points: 12 Contact Hours: 3 per week

CMN825 AUSTRALIAN COMMUNICATION CONTEXTS
This subject is designed to analyse specific aspects of the interaction between mass media and the Australian cultural context. It will approach this relationship through cultural studies methodologies - discourse analysis, semiotics, structuralism and theories of cultural production. Much of the theoretical content will follow on from Mass Communication B and Communication and Culture. Following examination of various theoretical and methodological approaches to the analysis of the contexts in which mass communication occurs, students will prepare a case study of a substantial media campaign involving representations of national identity.
Credit Points: 12 Contact Hours: 3 per week

CMN830 SEMINAR IN COMMUNICATION
A series of seminars comprising postgraduate students, teaching staff, and variously, visiting scholars and practitioners, for the purpose of sharing knowledge of human communication across the range of perspectives, theories, research and applications. It allows students to pursue, review and compare their own personal interests and readings.
Credit Points: 12

CMN831 INDIVIDUAL RESEARCH
Permits students to conduct independent research in an area not covered by a substantive subject in their program. It is an opportunity to study an area of personal interest or use it as a pilot study for a thesis or project.
Credit Points: 12

CMN910 AND CMN911 DISSERTATION
Taken in conjunction with, or subsequent to, a subject in the CMN800-899 series; normally a 10,000 word investigation of a communication concept using secondary research relevant to that subject. Prerequisites: CMN710, CMN711, CMN720 Credit Points: 24 (each)

CMN950 THESIS/PROJECT
Students may complete a thesis or a project. A thesis is a scholarly work which provides an opportunity to combine an appropriate theory or perspective, and appropriate research methodology to examine a significant communication problem or issue. Main text will not normally exceed 20,000 words. A project is an approved program of substantive work leading to a report, communication program, printed or audio-visual product, disc or some other product in which theories of communication are applied to some problem or issue.
Credit Points: 24 per semester

CMP007 COMMUNICATION CONCEPTS
Prepares students in the foundation theories and perspectives of human communication, and in the application to modern professional practice, in order to proceed to advanced theoretical study.
Credit Points: 12 Contact Hours: 3 per week

CMP352 FUNDRAISING PRINCIPLES
This subject is designed to cover the fundamentals of fundraising. It starts with the preparation of the case statement, introduces planning methods, and then moves through the various techniques of fundraising. Introductory segments on public relations, advertising, marketing and management also form part of this subject. Major topics include philosophy of fundrais-
The aim of this course is to introduce students to the
major media institutions within Australia. The
organisation of the subject matter falls into two main
categories. Industry development and structure: this
includes ownership of radio, television, newspapers,
and advertising agencies; networking; government
control and regulation; intra-industry organisations
such as FACTS and the unions, technological
developments, future changes in technology. Industry
practices: these are highly specialized, and some use
will be made of media professionals. Topics covered
could include the presentation of news, the difference
between radio and television advertising, TV
programming schedules, radio's response to FM and
V, the impact of satellites. Also important here are the
roles played by the interaction between an industry
and its audiences, audience research and ratings.
Prerequisite: CMB161
Credit: Points: 12 Contact Hours: 3 per week

CSA421 NATIONAL MEDIA
INSTITUTIONS

The aim of this course is to introduce students to the
major media institutions within Australia. The
organisation of the subject matter falls into two main
categories. Industry development and structure: this
includes ownership of radio, television, newspapers,
and advertising agencies; networking; government
control and regulation; intra-industry organisations
such as FACTS and the unions, technological
developments, future changes in technology. Industry
practices: these are highly specialized, and some use
will be made of media professionals. Topics covered
could include the presentation of news, the difference
between radio and television advertising, TV
programming schedules, radio's response to FM and
V, the impact of satellites. Also important here are the
roles played by the interaction between an industry
and its audiences, audience research and ratings.
Prerequisite: CMB161
Credit: Points: 12 Contact Hours: 3 per week

CSB621 ADVANCED TEXT ANALYSIS

This unit focuses on the products of the media, par­
ticularly film and television. The aim of the course
is to enable students to better understand the nature
of film and television as forms of communication. It uses
the general range of cultural studies approaches: semi­
otics, structuralism, psychoanalytic theory, linguistics, film theory, and narrative theory. It ex­
amines media productions as 'texts', subjecting them
to close analysis in order to read from them possible
meanings for their audiences. The aim is for this
methodology to complement more empirical ap­
proaches undertaken elsewhere in the course. Audiences, in particular, become key concepts for
analysis. Unlike other approaches to the audience, this
subject infers audiences from text analysis as well as
talking about audiences as products of the particular
medium of communication under analysis.
Credit: Points: 12 Contact Hours: 3 per week

CSA165 COMPUTING

Offered: Spring
A course in the BASIC language. Computer utiliza­
tion and organisation. Problem solving. Analysis of
numerical and non-numerical problems. A brief intro­
duction to FORTRAN and the differences between it
and BASIC.
Credit: Points: 7 Contact Hours: 3 per week

CSA269 INTRODUCTION TO
COMPUTING

Offered: Spring
This subject (which assumes no previous knowledge
of computing) is intended to give the student a broad
overview of the many facets of computing - ranging
from the impact of computers on society through to
the details involved in data base organisation and the
inter-relationship between these facts. The emphasis
of the course is on demystifying computers - the
student will gain an understanding of the abilities of
computers and, in particular, their role in health
science.
Credit: Points: 6 Contact Hours: 2 per week

CSA100 INTRODUCTION TO COMPUTER
SCIENCE

Offered: Autumn, Spring
This subject establishes a basis for the major comput­
ting topics to be covered in later subjects. It provides
students with a disciplined and structured approach to
algorithm design, and introduces a range of problem­solving methods and a variety of programming
languages which can be used to process information
in a computer.
Credit: Points: 9 Contact Hours: 3 per week

CSB101 COMPUTER SYSTEMS I

Offered: Spring
This subject aims to provide an understanding of the
physical organisation of a computer system, the con­
trol and flow of information within the system, the
representation of data in a computer system, and the
design of elementary digital electronic circuits.
Topics covered include boolean algebra; state con­
ccepts; data representation; processor organisation;
memory organisation; input/output devices; machine
language and assembly language.
Credit: Points: 9 Contact Hours: 3 per week

CSB110 PROGRAMMING PRINCIPLES

Offered: Spring
Extending material introduced in CSB100, this sub­ject
develops structured program design techniques, and
introduces advanced algorithms and methods of
proving program correctness. Prerequisite: CSB100
Credit: Points: 9 Contact Hours: 3 per week

CSB155 INTRODUCTION TO
COMPUTING

Offered: Autumn, Spring
The computer as a processor of information. An over­
view of computers, computer organisation, systems
software, programs and the range of programming
languages. The design of algorithms using structured
techniques and stepwise refinement. Implementation
and execution of such algorithms using PASCAL.
Credit: Points: 8 Contact Hours: 3 per week

CSB181 INTRODUCTION TO COMPUTER
SCIENCE

This subject is designed to provide students with a
disciplined and structured approach to algorithm
design and problem-solving methods. It introduces a
variety of programming languages which can be used
to process information in a computer. On completion
of the subject, students should be able to solve a
variety of problems in different application areas.
Credit: Points: 12 Contact Hours: 4 per week

CSB191 INTRODUCTION TO
COMPUTING

Offered: Autumn This subject introduces students to technical com­
puter programming, teaching programming

techniques for the writing of correct and efficient
programs for limited, but typical engineering
problems; and using structured programming tech­
niques to write, modify and enhance program
applications on selected computer systems using the
PASCAL programming language.
Co-requisites: MAB193, CEB184
Credit: Points: 4 Contact Hours: 2 per week

CSB200 FOUNDATIONS OF COMPUTING I

Offered: Autumn, Spring
A central theme of this subject is the study of abstrac­
tion: data abstraction as a technique for dealing with
complex data inter-relationships, and procedural abstraction as a way of expressing complex operations on such structures. It focuses on the concept of the abstract data type (ADT) and introduces a number of important examples of ADTs and associated algorithms. The subject also includes topics such as the analysis of algorithmic complexity, and proofs of correctness.

Prerequisite: CSB110
Credit Points: 9  Contact Hours: 3 per week

II CSB201 COMPUTER SYSTEMS II
Offered: Autumn
This subject encompasses organisation of simple computer systems, and the way in which hardware provides the basic facilities for the machine. It introduces techniques involved in the programming of input-output operations, and the interrupt structure which underlies operating system organisation in uniprocessor systems.
Prerequisite: CSB101
Credit Points: 9  Contact Hours: 3 per week

II CSB210 FOUNDATIONS OF COMPUTING II
Offered: Spring, Autumn
In this subject, special emphasis is given to the analysis of algorithms, the various styles of programming language and the abstractions which they support. It covers languages with notable features designed for special computer classes of problems; searching and sorting algorithms; recursion and iteration; algorithms; and space and time requirements.
Prerequisite: CSB200
Credit Points: 9  Contact Hours: 3 per week

II CSB212 LANGUAGES & LANGUAGE PROCESSING
Offered: Spring
An introduction to the theory and practice of language processing; the design and recognition of small languages for command processors and other interactive programs; and advanced data structures and algorithm design.
Prerequisite: CSB200
Credit Points: 9  Contact Hours: 3 per week

II CSB213 SCIENTIFIC APPLICATIONS
Offered: Autumn, Spring
The aim of this subject is to give students a thorough knowledge of FORTRAN and C, and to teach the solving of advanced scientific (e.g., mathematical and engineering) problems. It covers FORTRAN programming to an advanced level including aspects of portability arising from differences in standards and compiler implementation, and mathematical software.
Prerequisite: CSB110
Credit Points: 9  Contact Hours: 3 per week

II CSB259 LABORATORY COMPUTING I
Offered: Autumn, Spring
This subject, which assumes no previous knowledge of computing, gives a broad overview of the many facets of computing. It introduces computer organisation; hardware, software; computer-programming including BASIC; data organisation, information storage and retrieval; computer systems including hospital and clinical systems; and social implications.
Credit Points: 6  Contact Hours: 2 per week

II CSB262 COMPUTING
Offered: Autumn
This subject is intended to provide students with a basic understanding of computer programming and with the ability to program simple applications in the BASIC language. Topics studied include: computer utilisation; computer organisation; programming in BASIC; problem solving; analysis of numerical and non-numerical problems; introduction to FORTRAN.
Credit Points: 6  Contact Hours: 2 per week

II CSB280 PROGRAMMING PRINCIPLES
Offered: Spring
This subject forms a continuation of the material introduced in CSB155. It develops structured program design techniques, and introduces advanced algorithms and methods of proving program correctness.
Prerequisite: CSB155
Credit Points: 12  Contact Hours: 4 per week

II CSB281 COMPUTER SYSTEMS I
Offered: Spring
An understanding of the physical organisation of, the control and flow of information in, and the representation of data in, a computer system. The topics covered are: boolean algebra, state concepts, data representation, processor organisation, memory organisation, input/output devices, machine language, and assembly language.
Credit Points: 12  Contact Hours: 4 per week

II CSB282 COMPUTER SYSTEMS II
Offered: Autumn
The subject aims to extend the student's knowledge of mainframe and industry standard micro-based systems, applying the programming techniques acquired in CSB191 to the FORTRAN programming language.
Prerequisite: CSB191
Credit Points: 12  Contact Hours: 4 per week

II CSB283 SCIENTIFIC APPLICATIONS
Offered: Autumn, Spring
The subject aims to give a thorough knowledge of FORTRAN, and to teach the solving of advanced scientific (e.g., mathematical and engineering) problems. It covers FORTRAN programming to an advanced level including aspects of portability arising from differences in standards and compiler implementation, and mathematical software.
Prerequisite: CSB155
Credit Points: 9  Contact Hours: 4 per week

II CSB290 FOUNDATIONS OF COMPUTING I
Offered: Autumn, Spring
A central theme of this subject is the study of abstraction; data abstraction as a technique for dealing with complex data inter-relationships, and procedural abstraction as a means of expressing complex operations on such structures. It focuses on the concept of the abstract data type (ADT) and introduces a number of important examples of ADTs and associated algorithms. The subject also includes topics such as the analysis of algorithmic complexity, and proofs of correctness.
Prerequisite: CSB280
Credit Points: 12  Contact Hours: 4 per week

II CSB291 INTRODUCTION TO FORTRAN
Offered: Spring
The subject aims to extend the student's knowledge of mainframe and industry standard micro-based systems, applying the programming techniques acquired in CSB191 to the FORTRAN programming language.
Prerequisite: CSB191
Credit Points: 4  Contact Hours: 2 per week
CSB292 FOUNDATIONS OF COMPUTING II
Offered: Spring, Autumn
Special emphasis is given in this subject to the analysis of algorithms, the various programming languages, and the abstractions which they support. It covers languages with notable features designed for special computer classes of problems: searching and sorting algorithms; recursion and iteration; algorithms, and space and time requirements.
Prerequisite: CSB290
Credit Points: 12 Contact Hours: 4 per week

CSB294 COMPUTER PROGRAMMING
Offered: Autumn
Co-requisite: SVB121
Credit Points: 6 Contact Hours: 3 per week

CSB301 OPERATING SYSTEMS
Offered: Autumn, Spring
This subject explores the structure of operating systems and real-time software. It examines the process and resource management functions of such software and its realisation in terms of a hierarchy of abstract machines, each of which depends on the set of facilities provided by the abstract machine immediately below it in the hierarchy. While the subject focuses on the hardware-software interface, there is considerable emphasis also on practical work.
Prerequisites: CSB201 OR CSB282 and CSB290
Credit Points: 9 Contact Hours: 3 per week

CSB302 SOFTWARE ENGINEERING
Offered: Autumn
This unit presents the techniques essential to the production of software systems which are reliable, within budget, fully documented, and well tailored to their uses. Practical work provides the means to apply these techniques in the organisation, management and development of software projects with emphasis on modern programming languages supporting software engineering (e.g., Ada, Modula-2).
Prerequisites: CSB210 and CSB212 OR CSB290
Credit Points: 9 Contact Hours: 3 per week

CSB311 ADVANCED COMPUTER ARCHITECTURES
Offered: Spring
The organisation of contemporary computer systems, and the variety of different structures which may be used for specific tasks. The subject presents a mixture of theory and case studies based on existing machines of practical or theoretical importance.
Prerequisites: CSB201 OR CSB282
Credit Points: 9 Contact Hours: 3 per week

CSB320 SPECIAL STUDIES
Offered: Autumn, Spring
Covers aspects of current scientific interest; and makes allowances for significant developments or emphasis in computing not included in the remainder of the course program. Check School noticeboards for further details.
Prerequisite: Completion of at least half of the normal program of the Bachelor of Applied Science (Computing) OR completion of at least half of the Graduate Diploma in Computing Science OR 60 Points in computing subjects in the Science major program.
Credit Points: 9 Contact Hours: 3 per week

CSB321 GRAPHICS
Offered: Autumn, Spring
To acquaint students with the nature of computer graphics hardware and software; to provide a thorough grounding in the design and implementation of computer graphics software so as to enable students to implement graphic systems in their particular application areas.
Prerequisites: CSB213 OR CSB110 and INB252 OR CSP213 OR CSB283
Credit Points: 9 Contact Hours: 3 per week

CSB323 DATA SECURITY
Offered: Spring
Data Security is an area which combines the subjects of complex computer systems and data communications. This final year elective topic will therefore build upon the data communications and computer systems material and provide students with an insight into an area of rapidly expanding career opportunities.
Prerequisites: INB270 OR INP270 OR INB285
Credit Points: 9 Contact Hours: 3 per week

CSB324 ARTIFICIAL INTELLIGENCE
Offered: Autumn
This subject deals with the increasingly important role of artificial intelligence in the computing industry. In particular, aspects of artificial intelligence which have given rise to commercial products are reviewed as well as the background research efforts which promise to have major impact on the use of computers in the near future.
Prerequisite: CSB210 OR CSP214 OR CSB292
Credit Points: 9 Contact Hours: 3 per week

CSB325 EXPERT SYSTEMS
Offered: Spring
Prerequisites/Co-requisites: CSB210 OR CSP214 OR CSB292
Credit Points: 9 Contact Hours: 3 per week

CSB326 SYSTEMS PROGRAMMING
Offered: Spring, Autumn
The subject introduces students to the UNIX operating system at the user and systems programming levels: a study of shell programming and of the UNIX/C programming environment; a detailed examination of UNIX process and device management, UNIX security and UNIX administration; and some time is spent relating the parallelism and inter-process communication features of UNIX/C to similar features in the languages Modula-2 and Ada.
Prerequisite: CSB301 OR CSP213
Credit Points: 9 Contact Hours: 3 per week

CSB350 MISCELLANEOUS STUDIES
Offered: Spring, Autumn
Selected theoretical and/or practical work to complement and/or supplement other subjects studied.
Credit Points: 3 Contact Hours: 1 per week
CSB482 PROGRAMMING LANGUAGES & STRUCTURES
Offered: Spring
The syntax of programming languages. Data structures, including lists, graphs and trees. Data abstraction and the use of procedures.
Prerequisite: CSB280
Credit Points: 9 Contact Hours: 3 per week

CSB490 SOFTWARE ENGINEERING
Offered: Autumn
Using examples from the C and UNIX, the student are introduced to the structure and syntax of well designed programs as well as programming techniques for use in electronics, communications and electrical engineering.
Prerequisite: CSB190 [R]
Credit Points: 6 Contact Hours: 3 per week

CSB960 PROJECT WORK
Offered: Spring
Students will undertake a substantial project which is relevant to the needs of industry. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project.
Credit Points: 12 Contact Hours: 3 per week

CSN100 THEORY OF COMPUTING I
Offered: Autumn
Formal properties of programs and automata. The view of programs as predicate transformers is developed as a method of constructing provably correct algorithms. Methods of software development based on formal specifications are introduced. The relationship between computational problems posed as questions of language recognition and the operation of automata is developed, and the implications for computational complexity explored.
Prerequisite: CSB210 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

CSN110 COMPILER CONSTRUCTION
Offered: Spring
The organisation and structure of language translators and compilers. Some emphasis is placed on those parts of these software tools which are amenable to formal analysis. The material extends undergraduate studies in algorithm design and in the semantics of formal languages. Special attention is paid to techniques which are applicable in the implementation of special purpose languages such as database query languages and production systems.
Prerequisite: CSB212 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

CSN200 COMPUTER SECURITY
Offered: Autumn
This postgraduate subject introduces the graduate to the major topics in computer and data network-related security with the potential, if required, for specialisation in this growing area. Development of a security plan; risk analysis; access control; cryptography, network encryption; key management; database security.
Prerequisite: An appropriate and recognised degree according to postgraduate requirements of QUT or equivalent qualifications and/or experience as determined by the Faculty.
Credit Points: 12 Contact Hours: 3 per week

CSN210 DISTRIBUTED SYSTEMS
Offered: Autumn
This subject is intended to provide a thorough understanding of the rationale for distributed computer systems, their domain of application and the principles of distributed control underlying their construction. A number of representative systems will be examined throughout the subject.
Prerequisites: CSB301 (or equivalent) AND CSB311 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

CSN220 ARTIFICIAL INTELLIGENCE
Offered: Spring
This subject deals with the increasingly important role of artificial intelligence in the computing industry. In particular, aspects of artificial intelligence which have given rise to commercial products are reviewed as well as the background research efforts which promise to have major impact on the use of computers in the near future.
Prerequisite: An undergraduate level artificial intelligence or expert systems subject.
Credit Points: 12 Contact Hours: 3 per week

CSN300 THEORY OF COMPUTING II
Offered: To be advised
The ideas developed in CSN110 Theory of Computing are extended towards a more complete grounding in language theory. Modern developments such as methods of semantic specification and extensions of context-free grammars are covered.
Prerequisite: CSN100
Credit Points: 12 Contact Hours: 3 per week

CSN310 PARALLEL PROCESSING
Offered: To be advised
Parallel Processing is concerned with the architecture and performance of parallel computer systems. The subject consequently deals at length with the modelling of parallel systems and the design methodologies used in their construction. A range of applicable software systems and methodologies is examined. The formal analysis of concurrent systems is based on the theory of Communicating Sequential Processes.
Prerequisite: CSN210
Credit Points: 12 Contact Hours: 3 per week

CSN320 FORMAL SECURE SYSTEMS
Offered: To be advised
The purpose of this subject is to explore the formal mechanisms required in the design of secure systems. It will commence with a study of formal models of secure systems, e.g. Bell-LaPadula model and then explore the relationship between formal methods of computer science and the design of formally verifiable computer systems.
Prerequisites: CSN100 AND CSN200
Credit Points: 12 Contact Hours: 3 per week

CSN330 NATURAL LANGUAGE PROCESSING
Offered: To be advised
This subject treats an important specialisation within the field of artificial intelligence and its applications.
Prerequisite: An introductory subject in natural language processing.
Credit Points: 12 Contact Hours: 3 per week

CSN340 COMPILER LABORATORY
Offered: Autumn, Spring
This subject allows for in-depth treatment of topics of contemporary translator construction in a practical setting. Particular emphasis will be placed on code generation techniques for advanced computer architectures.
Prerequisite: CSN110
Credit Points: 12 Contact Hours: 3 per week

* See note, page 374.
CSN350 ADVANCED GRAPHICS I
Offered: Autumn
This subject provides an advanced level extension of the material in the undergraduate curriculum. Particular emphasis is placed on the use of facilities provided by existing graphics systems.
Prerequisite: CSB321 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

CSN360 ADVANCED GRAPHICS II
Offered: Spring
This subject provides coverage of specialised areas of computer graphics. Topics will be agreed between staff and students.
Prerequisite: CSN350
Credit Points: 12 Contact Hours: 3 per week

CSN370 SPECIAL TOPIC
Offered: Autumn, Spring
Cover at each offering aspects of scientific interest at that time. See School noticeboards for further information.
Prerequisite: To be advised
Credit Points: 12 Contact Hours: 3 per week

CSP112 SOFTWARE PRINCIPLES
Offered: Autumn
This subject introduces students to the study and use of efficient data structures and to a number of languages illustrating the variety of features found in computer programming languages. Structured program design techniques; advanced algorithms and methods of providing program correctness.
Prerequisite: Completion of a qualifying programming subject prior to entry to the course.
Credit Points: 12 Contact Hours: 3 per week

CSP211 SYSTEMS ARCHITECTURE & OPERATING SYSTEMS
Offered: Spring
To provide students with an understanding of computer organisation, the nature and role of system software and the nature of micro-computers and computer graphics. Computer systems architecture, micro-operations, instruction formats, microprocessor types, machine language, system software including operating systems features, assemblers, compilers, loaders.
Prerequisites: CSP112
Credit Points: 12 Contact Hours: 3 per week

CSP212 LANGUAGES & LANGUAGE PROCESSING
Offered: Spring
An introduction to the theory and practice of language processing; the design and recognition of small languages for command processors and other interactive programs; advanced data structures and algorithm design.
Prerequisite: CSP214
Credit Points: 12 Contact Hours: 3 per week

CSP213 SCIENTIFIC APPLICATIONS
Offered: Autumn
The aim of this subject is to give students a thorough knowledge of FORTRAN and C, and to teach them to solve advanced scientific (e.g., mathematical and engineering) problems.
Prerequisites: CSP112
Credit Points: 12 Contact Hours: 3 per week

CSP214 PROGRAMMING LANGUAGES & STRUCTURES
Offered: Spring
This subject forms a continuation of the material introduced in the prerequisite subjects. Special emphasis is given to the analysis of algorithms, the various styles of programming languages and the abstractions which they support.
Credit Points: 12 Contact Hours: 3 per week

CSP960 PROJECT WORK
Offered: Spring
Students, either individually or in small groups, undertake a substantial project relevant to the needs of industry and designed to give insight into industrial requirements. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project. Before work commences on the project, student(s) and supervisor must agree on the topic of the project and the scope of the work to be attempted.
Prerequisites: Successful completion of all other core subjects of the Graduate Diploma in Computing Science.
Credit Points: 12 Contact Hours: 3 per week

CSP970 PROJECT WORK A
Offered: Autumn
Students, either individually or in small groups, undertake a substantial project relevant to the needs of industry and designed to give insight into industrial requirements. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project. Before work commences on the project, student(s) and supervisor must agree on the topic of the project and the scope of the work to be attempted.
Prerequisites: Completion of at least half of the Graduate Diploma in Computing Science.
Credit Points: 12 Contact Hours: 3 per week

CST390 COMPUTER PROGRAMMING I
Offered: Autumn
A first course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 7 Contact Hours: 3 per week

EEB101 CIRCUITS & MEASUREMENTS
Offered: Autumn
Lectures and practical sessions covering the concepts of voltage, current and electrical impedance, simple electrical circuits (R, L and C) and the measurement of electrical quantities using the oscilloscope, meters and bridges. Introduction to AC theory, errors in measurement, traceability of measurement.
Credit Points: 7 Contact Hours: 5 per week

EEB202 ELECTROMAGNETICS
Offered: Autumn, Spring
Introducing engineering applications of current flow, electrostatic and electromagnetic fields. Ideal and loosely coupled transformers - instrument and high frequency transformers. Electrical power supply and safety. Introduction to all types of rotating electrical machines.
Credit Points: 6 Contact Hours: 3 per week

EEB203 CIRCUIT ANALYSIS
Offered: Spring
Network theorems, mesh and nodal analysis, complex power. Introduction to the concept of steady-state response. Introduction to transient response of RL, RC and RCL circuits with step forcing functions. Mutual inductance, three phase systems.
Prerequisite: EEB101
Credit Points: 5 Contact Hours: 3 per week

EEB204 ANALOG DEVICES
Offered: Autumn, Spring
Credit Points: 5 Contact Hours: 3 per week

EEB205 DIGITAL ELECTRONICS
Offered: Autumn, Spring
Digital electronics, counting systems and arithmetic operations. List of logic gates, characteristics and uses of each. Introduction to computer systems.
Credit Points: 5 Contact Hours: 3 per week

EEB206 OPERATING SYSTEMS
Offered: Autumn, Spring
Operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB207 COMPUTER PROGRAMMING I
Offered: Autumn
A first course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB208 COMPUTER PROGRAMMING II
Offered: Autumn
A second course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB209 COMPUTER PROGRAMMING III
Offered: Autumn
A third course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB210 COMPUTER PROGRAMMING IV
Offered: Autumn
A fourth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB211 COMPUTER PROGRAMMING V
Offered: Autumn
A fifth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB212 COMPUTER PROGRAMMING VI
Offered: Autumn
A sixth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB213 COMPUTER PROGRAMMING VII
Offered: Autumn
A seventh course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB214 COMPUTER PROGRAMMING VIII
Offered: Autumn
An eighth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB215 COMPUTER PROGRAMMING IX
Offered: Autumn
A ninth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB216 COMPUTER PROGRAMMING X
Offered: Autumn
A tenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB217 COMPUTER PROGRAMMING XI
Offered: Autumn
An eleventh course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB218 COMPUTER PROGRAMMING XII
Offered: Autumn
A twelfth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB219 COMPUTER PROGRAMMING XIII
Offered: Autumn
A thirteenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB220 COMPUTER PROGRAMMING XIV
Offered: Autumn
A fourteenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB221 COMPUTER PROGRAMMING XV
Offered: Autumn
A fifteenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB222 COMPUTER PROGRAMMING XVI
Offered: Autumn
A sixteenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB223 COMPUTER PROGRAMMING XVII
Offered: Autumn
A seventeenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB224 COMPUTER PROGRAMMING XVIII
Offered: Autumn
An eighteenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week

EEB225 COMPUTER PROGRAMMING XIX
Offered: Autumn
A nineteenth course on computers, including brief introductions to operating systems and utilities. The major emphasis of the subject is on design of algorithms and their implementation in a structural language.
Credit Points: 5 Contact Hours: 3 per week
EEB209 ELECTRICAL ENGINEERING IIM
Offered: Autumn
A series of lectures and practical sessions to introduce students in mechanical engineering to the basic principles of microprocessors, microprocessor systems, electrical machines, power control and tariffs. The subject material is presented at a basic level with heavy emphasis on practical applications.
Credit Points: 6 Contact Hours: 3 per week

EEB272 DIGITAL PRINCIPLES
Offered: Spring
Binary variables, number systems, Boolean algebra, minimisation of logic functions, logic gates, analysis and synthesis of combinational logic functions.
Credit Points: 3 Contact Hours: 1.5 per week

EEB273 MICROCOMPUTERS IN ENGINEERING
Offered: Spring
Introduction to the physical, virtual and application levels of a microcomputer system, I/O devices and interfacing. Operating systems, Programming and software packages. Transducers and peripheral devices. Hardware and software integration.
Credit Points: 4 Contact Hours: 2 per week

EEB302 ELECTROTECHNOLOGY
Offered: Autumn
Magnetic circuits, magnetic materials, transformers and electro-magnetic devices. Heating and cooling of electrical equipment and plant, protection. Power distribution, three phase, balanced and unbalanced loads, power and measurement.
Prerequisites: EEB202, EEB203
Credit Points: 6 Contact Hours: 3 per week

EEB303 NETWORK THEORY I
Offered: Autumn
A detailed study of the basic theory of network analysis covering Laplace and Fourier analysis, four terminal network theory, frequency behaviour and transient response of networks.
Prerequisites: EEB203, MAB193
Co-requisite: MAB493
Credit Points: 7 Contact Hours: 3 per week

EEB361 SIGNALS & SYSTEMS
Offered: Autumn
A detailed study of Fourier theory applied to signals. An overview of systems and their representation, response of systems to signals.
Prerequisites: EEB203, MAB193
Co-requisite: MAB493
Credit Points: 7 Contact Hours: 3 per week

EEB371 ELECTRONIC DEVICES
Offered: Autumn
Theory of operation and characteristics of semiconductor devices including various types of diodes, the bipolar junction transistor and the field effect transistor. Development and practical applications of small signal models.
Prerequisite: EEB101
Credit Points: 5 Contact Hours: 3 per week

EEB372 SEQUENTIAL LOGIC
Offered: Autumn
Flip-flops, counters, shift registers, asynchronous and synchronous sequential machines. Realisation of sequential machines using PROMs, GALs, etc.
Prerequisite: EEB272 Co-requisite: EEB371
Credit Points: 7 Contact Hours: 3 per week

EEB400 ELECTRICAL POWER SYSTEMS
Offered: Autumn
This subject gives students an overall introduction to electrical power systems calculations and covers the technology of overhead lines and cables. Elementary electrical engineering economics are also introduced at this stage.
Prerequisite: EEB302
Credit Points: 6 Contact Hours: 3 per week

EEB401 NETWORK THEORY II
Offered: Spring
Prerequisite: EEB303 Co-requisite: EEB361
Credit Points: 6 Contact Hours: 3 per week

EEB404 ELECTRICAL MACHINES
Offered: Autumn
In this subject students are introduced to the fundamentals of torque production in rotating machines. The theory of operation and characteristics of most commonly used machines are then derived from common foundations.
Prerequisite: EEB302
Credit Points: 6 Contact Hours: 3 per week

EEB430 ENGINEERING FIELDS
Offered: Spring
Electrostatic and magnetic fields, Maxwell’s equations and electromagnetic waves.
Prerequisites: MAB193, PHB152, PHB232
Credit Points: 6 Contact Hours: 3 per week

EEB471 ELECTRONICS
Offered: Spring
A detailed study of transistor circuits and their applications. Circuits, fundamental to the understanding of integrated circuit amplifiers, are studied in detail.
Prerequisite: EEB371
Credit Points: 7 Contact Hours: 3 per week

EEB472 MICROPROCESSORS
Offered: Spring
Microprocessor architecture, instruction sets, assembly language programming, Memories, input/output devices and interrupt systems.
Prerequisite: EEB372
Credit Points: 6 Contact Hours: 3 per week

EEB473 INTEGRATED CIRCUITS
Offered: Autumn
This subject provides the fundamental theory of operation of integrated circuits and the generalised concepts of feedback in electronic circuits. Various operational amplifier configurations are analysed. Oscillators and timing circuits are also studied.
Prerequisite: EEB471
Credit Points: 6 Contact Hours: 3 per week

EEB520 CONTROL ENGINEERING
Offered: Autumn
Prerequisite: EEB302 Co-requisite: EEB401
Credit Points: 6 Contact Hours: 3 per week
EEB51 ELECTRICAL POWER TRANSMISSION
Offered: Spring
Prerequisite: EEB400
Credit Points: 6 Contact Hours: 3 per week

EEB553 ELECTRICAL POWER EQUIPMENT
Offered: Spring
Ratings of equipment, insulation, distribution switchgear and protection, a.c. generators, power measurement and metering, power conversion.
Prerequisite: EEB400
Credit Points: 6 Contact Hours: 3 per week

EEB561 ANALOGUE COMMUNICATIONS
Offered: Spring
Analogue modulations and demodulations hardware, including discrete and integrated electronic methods, AM-SSB-FM modulation and demodulation methods. Heterodyne receivers - image and spurious responses of double and single conversion receivers. Distributed networks - radio and transmission-line links effects and modulated signals.
Prerequisite: EEB351, EEB303
Credit Points: 6 Contact Hours: 3 per week

EEB562 TRANSMISSION & PROPAGATION
Offered: Autumn
Transmission line theory, terminated line, Smith Circle Chart usage and lattice diagram. Propagation modes in wave guides and optical fibres. Free-space propagation, ionospheric and ground wave propagation. Basic antenna parameters.
Prerequisite: EEB361, EEB430
Credit Points: 6 Contact Hours: 3 per week

EEB573 INDUSTRIAL ELECTRONICS
Offered: Autumn
The study of a wide range of modern electronic devices and circuits with particular emphasis to industrial application.
Prerequisite: EEB471
Credit Points: 6 Contact Hours: 3 per week

EEB587 DESIGN I
Offered: Autumn
General principles of electronic circuit and electrical equipment design and the realisation of typical electronic circuits and equipment.
Prerequisites: EEB401, EEB361, EEB400
Credit Points: 6 Contact Hours: 3 per week

EEB591 SYSTEMS PROGRAMMING LANGUAGES
Offered: Autumn
The syntax and facilities of the C programming language are studied and applied to systems programming.
Prerequisite: EEB472
Credit Points: 6 Contact Hours: 3 per week

EEB600 STARTING A TECHNOLOGY BASED BUSINESS
Offered: Spring
The subject covers introduction to business structures, forming a business team, marketing and market research, financing new high risk business, selling yourself with business plans and presentation skills, product development, manufacturing and distribution, inventions, useful people to talk to.
Credit Points: 4 Contact Hours: 2 per week

EEB601 REALTIME OPERATING SYSTEMS
Offered: Spring
Theory and practical aspects of the use of microprocessors and computers as components in time critical engineering applications. Methods of guaranteeing computer response within a specifiable time. Applications related to embedded systems and some business applications. Design of new systems and study of existing systems.
Prerequisite: EEB591
Credit Points: 6 Contact Hours: 3 per week

EEB602 SIGNAL PROCESSING
Offered: Spring
Sampling and reconstruction, z-transforms description of discrete-time signals. Digital filtering - FIR, IIR. Discrete Fourier transform and relationship with z-plane. Leakage effects and window functions. Discrete Hilbert transform relationships.
Prerequisite: EEB361, EEB401, MAB893
Credit Points: 6 Contact Hours: 3 per week

EEB620 CONTROL SYSTEMS ANALYSIS
Offered: Spring
Prerequisite: EEB520
Credit Points: 6 Contact Hours: 3 per week

EEB621 ADVANCED CONTROL SYSTEMS
Offered: Spring
System performance specification format. Selection of control system elements. Design of linear system compensation using analogue and digital techniques. Techniques for dealing with system non-linearities and non-linear system analysis and design. Examples of typical control systems.
Prerequisite: EEB620
Credit Points: 6 Contact Hours: 3 per week

EEB652 POWER ELECTRONICS
Offered: Autumn
Review of modern switching components, characteristics and device control methods. Principles of operation of controlled rectifiers and chopper techniques for d.c. motor control; quasisquare and PWM inverters for induction and synchronous motor control; static switches for induction motor soft start control and static VAR compensation; induction motor drive and d.c. motor drive control strategies, harmonic analysis and waveform modelling analysis.
Prerequisite: EEB573
Credit Points: 7 Contact Hours: 3 per week

EEB661 INFORMATION THEORY & NOISE
Offered: Autumn, Spring
Information in discrete and continuous channels, coding efficiency, statistical description of noise, effects of transformations on signal parameters, error rates, effect of noise in information transfer.
Prerequisite: MAB493, EEB361
Credit Points: 6 Contact Hours: 3 per week
- EEB662 MICROWAVE & ANTENNA TECHNOLOGY
  Offered: Autumn
  Propagation in rectangular and circular guides, guide components, microwave active devices, high frequency techniques, various types of antennas, antenna arrays, computer aided antenna design, antenna measurements.
  Prerequisite: EEB562
  Credit Points: 7  Contact Hours: 3 per week

- EEB741 POWER SYSTEMS ANALYSIS
  Offered: Spring
  Economic operation of power systems, system stability, power system control, HVDC power transmission. Advanced harmonic analysis. Surge phenomena in machine and transmission lines.
  Prerequisite: EEB531 [R]*
  Credit Points: 8  Contact Hours: 3 per week

- EEB742 POWER SYSTEMS ENGINEERING
  Offered: Autumn
  Substation engineering, protection of plant, substation earthing, system overvoltages, insulation co-ordination, HV switchgear.
  Prerequisite: EEB531
  Credit Points: 7  Contact Hours: 3 per week

- EEB761 STATISTICAL COMMUNICATIONS
  Offered: Autumn, Spring
  PCM quantisation noise in uniform and non-uniform quantisation. Effects of channel noise on S/N, Delta modulation and delta-sigma modulations. Threshold extensions, spread spectrum, matched filtering and correlation.
  Prerequisite: EEB661
  Credit Points: 7  Contact Hours: 3 per week

- EEB788 DESIGN II
  Offered: Autumn
  Design principles and practice of more complex electronic circuits and electrical equipment and systems used in industry.
  Prerequisites: EEB587, EEB561, EEB520, EEB400
  Credit Points: 8  Contact Hours: 3 per week

- EEB789 PROJECT
  Offered: Full year
  An individual engineering project on a specified subject. The work requires design, computing, construction, experimental work and practical testing with the submission of appropriate reports. The subject is selected from any area which involves electronics, computing, control, communication and educational power and may include programming, circuit and system design.
  Co-requisite: This subject must be done in the final year of course.
  Credit Points: 15  Contact Hours: 6 per week

- EEB820 ENGINEERING MANAGEMENT
  Offered: Spring
  Credit Points: 8  Contact Hours: 3 per week

* See note, page 374.

- EEB821 PRODUCTION TECHNOLOGY & QUALITY
  Offered: Autumn
  The methodology of electronic system design, the range of production processes in electronic manufacture, and the quality control procedures required in electronic manufacturing at both prototype and full production stages.
  Prerequisites: EEB587, EEB788
  Credit Points: 6  Contact Hours: 3 per week

- EEB887 DESIGN III
  Offered: Spring
  Detailed design and realisation of typical electronic and power based sub-systems used in all areas of electronic systems and power systems engineering.
  Prerequisites: EEB788, EEB602, EEB620, EEB472, EEB400, EEB971, or EEB531
  Co-requisites: EEB968 or EEB742
  Credit Points: 6  Contact Hours: 3 per week

- EEB888 DESIGN IV
  Offered: Spring
  System design techniques and practice in these techniques on typical electronic systems and power systems, taking into account such factors as realisability, reliability, complexity, economic considerations and optimisation.
  Prerequisite: EEB887
  Credit Points: 10  Contact Hours: 3 per week

- EEB890 ADVANCED INFORMATION TECHNOLOGY TOPICS
  Offered: Spring
  The content of this subject depends on current technology and availability of suitable specialist lecturers. Subjects could include artificial intelligence, computer graphics, database systems, computer aided engineering, supercomputing and parallel processing.
  Prerequisite: EEB591
  Credit Points: 8  Contact Hours: 3 per week

- EEB922 COMPUTER CONTROLLED SYSTEMS
  Offered: Autumn, Spring
  Computer control of typical process control systems. Numerical control of machine tools and an introduction to robotics. Optimal control and self-adaptive control systems. Sequential control systems.
  Prerequisites: EEB621, EEB620
  Credit Points: 7  Contact Hours: 3 per week

- EEB944 POWER STATION ENGINEERING
  Offered: Autumn, Spring
  This subject deals with the electrical and mechanical plant found in power stations and with associated instrumentation and control equipment.
  Credit Points: 7  Contact Hours: 3 per week

- EEB951 HIGH VOLTAGE EQUIPMENT
  Offered: Autumn, Spring
  Co-requisite: EEB742
  Credit Points: 7  Contact Hours: 3 per week
EEB954 ELECTRICAL ENERGY UTILISATION
Offered: Autumn, Spring
Power reticulation in building, energy management, fire protection systems, illumination technology, air-conditioning plant, building supervising and control systems, lifts.
Prerequisite: EEB553
Credit Points: 7  Contact Hours: 3 per week

EEB961 COMMUNICATION TECHNIQUES
Offered: Autumn, Spring
Modern communication techniques including switched networks, broadcast, point-to-point systems; microwave and optical links; radio navigation and radar; associated electronic devices.
Prerequisite: EEB661
Credit Points: 7  Contact Hours: 3 per week

EEB962 MICROWAVE SYSTEMS ENGINEERING
Offered: Autumn, Spring
Microwave thermionic and semiconductor devices, amplifier design using scattering parameters. Passive microwave devices including non-linear networks and ferrites. Array theory and design, microwave antennae.
Prerequisite: EEB662
Credit Points: 7  Contact Hours: 3 per week

EEB967 DIGITAL COMMUNICATIONS
Offered: Autumn
Topics in the theory and applications of digital communications technology. Baseband digital signals are introduced; pulse shaping, signal regeneration, measurement techniques, and the digital coding of analogue signals are treated. Such applications as digital radio systems, digital telephone and computer networks, error control in digital networks and ISDN are analysed.
Credit Points: 6  Contact Hours: 3 per week

EEB968 DIGITAL SIGNAL PROCESSING
Offered: Autumn
Adaptive digital filtering and applications, spectral estimation techniques, speech analysis and synthesis. Realtime implementation of signal processing systems.
Prerequisite: EEB602
Credit Points: 7  Contact Hours: 3 per week

EEB971 APPLIED ELECTRONICS
Offered: Autumn
Analysis of the characteristics and applications of a variety of integrated devices. Particular attention is given to new products. Emphasis is placed on errors and quality of design.
Prerequisite: EEB573
Credit Points: 6  Contact Hours: 3 per week

EEB972 INTEGRATED ELECTRONIC TECHNIQUES
Offered: Autumn, Spring
Study of a wide range of commercially available integrated circuits and their typical applications in industry. Design rules, limitations and methods of VLSI fabrication.
Prerequisite: EEB573 Co-requisite: EEB602
Credit Points: 7  Contact Hours: 3 per week

EEP101 ALGORITHMS FOR CONTROL & SIGNAL PROCESSING
Offered: Spring
The application of numerical analysis methods, equation solving and signal processing; the design of digital computer algorithms for the processing of signals and the control of continuous and discrete processes; and the application of optimisation techniques to system control.
Credit Points: 12  Contact Hours: 3 per week

EEP102 UNIX & C FOR ENGINEERING
Offered: Autumn
The C language. Use of C for program development. Use of C as a substitute for assembly language to produce ROMable code with methods and particular problems. The UNIX operating system and its use as an engineering work station operating system.
Credit Points: 12  Contact Hours: 3 per week

EEP103 COMPUTER HARDWARE & INTERFACING
Offered: Spring
Credit Points: 12  Contact Hours: 3 per week

EEP104 REALTIME OPERATING SYSTEMS
Offered: Autumn
Definition and review of real-time operating systems. Detailed examination of the structure of real-time operating system. The development of programming skills, orientated towards real-time applications. Programming exercises for real-time applications using assembler and high-level languages.
Co-requisite: EEP102
Credit Points: 12  Contact Hours: 3 per week

EEP120 NETWORKS & DISTRIBUTED COMPUTING
Offered: Spring
A thorough treatment of the ISO OSI model of computer interconnections and common techniques for layers 3 to 7. This includes protocols, software and packages and the computers which support these layers. A lighter treatment of layers 1 and 2 is also included.
Prerequisites: EEP103, EEP104
Credit Points: 12  Contact Hours: 3 per week

EEP121 PARALLEL & SUPER COMPUTING
Offered: Spring
An open ended subject covering the latest in vector processing and parallel computing technology. Students will have access to parallel computer development systems, and may be required to undertake a small research project.
Credit Points: 12  Contact Hours: 3 per week

EEP122 GRAPHICS & COMPUTER VISION
Offered: Autumn
This subject provides an introduction to the human visual system and the modelling of digital images. It also provides an introduction to a range of digital image process systems, transforms, image enhancement, image structural operations and pattern recognition.
Credit Points: 12  Contact Hours: 3 per week

EEP123 PROCESS CONTROL & ROBOTICS
Offered: Autumn
A thorough survey of computers as applied to manufacturing, encompassing hardware and software methods and state-of-the-art products. Material includes robots, computer numerically controlled
machine tools, distributed process control, networks and computers.

Prerequisite: EEP101
Credit Points: 12  Contact Hours: 3 per week

■ EEP124 DATA COMMUNICATIONS
Offered: Autumn
The subject covers characteristics of transmission channels, synchronous and asynchronous modern and interface, fiberoptic and satellite links, local and wide area networks, encoding and security.
Credit Points: 12  Contact Hours: 3 per week

■ EEP125 ADVANCED ENGINEERING SOFTWARE TOOLS
Offered: Spring
The subject covers selected numerical techniques and computer software tools available in procedural and non-procedural languages as well as specialised commercial applications packages for the analysis and design of data transmission systems.
Credit Points: 12  Contact Hours: 3 per week

■ EEP300 RESEARCH PROJECT
A computer engineering research project in the student's chosen field encompassing a literature search, design, hardware construction or writing of software, testing and publication of a thesis.
Credit Points: 24 per semester
Contact Hours: 168

■ EET100 ELECTRICAL ENGINEERING COMPUTATIONS
Offered: Autumn
Credit Points: 7  Contact Hours: 3 per week

■ EET111 ELECTRICAL ENGINEERING I
Offered: Autumn
SI units, d.c. circuits including: parallel and series resistor combinations, temperature coefficient of resistance, and circuit theorems, Electrostatics and capacitance. Self inductance. Transients RL and RC circuits.
Credit Points: 7  Contact Hours: 3 per week

■ EET211 ELECTRICAL ENGINEERING II
Offered: Autumn, Spring
Prerequisite: EET111
Credit Points: 7  Contact Hours: 3 per week

■ EET270 ELECTRONICS I
Offered: Spring
An introduction to the fundamentals of electronic devices and transistor circuits. Emphasis is placed on characterising and applying these devices to basic electronic circuits. Applications include: transistor amplifiers including differential and tuned stages, current sources, oscillators and simple fault finding techniques.
Prerequisites: EET111, EET100
Co-requisite: EET211
Credit Points: 7  Contact Hours: 3 per week

■ EET350 ELECTRICAL ENGINEERING III
Offered: Autumn, Spring
Magnetic circuits, single phase transformers, equivalent circuits, power losses, regulation and efficiency. Three phase theory. Balanced and unbalanced loads, measurement of power. Electrical safety earthing, fault levels and protection equipment. Electrical machines, review of principles of operation and characteristics of a range of a.c. and d.c. machines. Costs of electricity tariffs.
Prerequisite: EET211
Credit Points: 7  Contact Hours: 3 per week

■ EET420 CONTROL SYSTEMS I
Offered: Spring
Distinction between open and closed loop, discrete and continuous control. Typical nonlinearities. Transducers for temperature, pressure, fluid flow rate, level, velocity, position, strain. Survey of summation and amplifying techniques for electronics (revision), pneumatic and hydraulic systems. Motors, control valves, actuators and brief survey of commercial controllers. The use of negative feedback; improvement in linearity, speed of response, etc. Survey of hardware employing negative feedback. Philosophy of mathematical modelling. Introduction to differential equations. Laplace transforms and transfer functions. Block diagrams. Responses in the time domain. Introduction to frequency domain analytical techniques.
Prerequisite: EET211
Credit Points: 7  Contact Hours: 3 per week

■ EET460 TELECOMMUNICATIONS
Offered: Autumn
Topics include: the nature of signals; elementary Fourier analysis; the concept of modulation; amplitude and angle modulation; pulse modulation; multiplexing; signal processing and noise; the nature of links; noise and links; mixing and superhet principles; digital and data transmission and fibre optics.
Prerequisites: EET100, EET211
Credit Points: 7  Contact Hours: 3 per week

■ EET490 COMPUTER PACKAGES
Offered: Spring
A brief study and use of packages such as word processors, spreadsheets, database packages and commonly used engineering packages such as Matlab and Spice, hardware interconnection.
Credit Points: 7  Contact Hours: 3 per week

■ EET500 ELECTRICAL TECHNOLOGY
Offered: Autumn
Introduction to electric motors, generators, transformers and three phase systems.
Credit Points: 6  Contact Hours: 3 per week

■ EET522 CONTROL SYSTEMS II
Offered: Autumn
Process control system terminology and symbols. Review of hardware as necessary. Chart recorders. Sizing of control valves. Measurement of mass flow-rate, humidity and chemical composition. Analogue data transmission standards. Three term controllers and other appropriate techniques. Examples of process control configurations, such as cascade, ratio and feedback control. Controller tuning, System performance for reference, noise and load disturbances. Accuracy, steady state error, effect of type number on performance. Stability and more advanced frequency domain analysis. Machine control systems, such as D.C. motors speed controllers,
variable frequency controllers, servosystems, performance of machine control systems.

**Prerequisite:** EET420

**Overview:**
- Areas covered include: advanced signal analysis using Fourier methods; AM generation and detection, the effects of filtering and noise; FM and PM generation and demodulation, effects of noise, FM threshold, SSB methods; phase locked loop principles; radio receiver circuits, double conversion, spurious responses; pulse equivalent modulation, PAM, PWM, PPM, circuits and spectra.
- **Prerequisites:** EET270, EET460

**Course Offered:** Autumn

**Description:**
- This subject introduces the student to integrated circuit amplifiers and their applications. Other areas of study include: power amplifiers; optoelectronic devices; voltage regulators and a survey of semiconductor switching devices.

**Prerequisite:** EET270

**Overview:**
- Spring
- A comparative study of computer architectures and operating systems from microprocessors up to super computers. Virtual machines, interpreters, compilers, links, loaders, disoperating systems and executive. Instruction sets, addressing modes and instruction fetch cycles. A survey of memory management techniques such as memory maps, virtual memory, cache memory, and interleveling. Exception processing methods such as interrupts, autovectors, bus errors and supervisor states. Multi processor systems and computer communications standards, networks and protocols. Parallel computing, pipelines, single instruction multiple data and multiple instruction multiple data machines.

**Prerequisites:** CST390, EET676

sion, TDM, FDM, modulation methods. Data coding for error correction and data communication protocols.
Prerequisite: EET560
Credit Points: 7 Contact Hours: 3 per week

- EET790 COMPUTER PROGRAMMING I
Offered: Autumn
Digital computers, their construction and operation, description of machine languages and the various programming languages in common use such as FORTRAN, COBOL, ALGOL. Program writing in FORTRAN and other languages, use of flow charts, debugging, the development of algorithms and preparation of data, to be selected from a range of areas.
Credit Points: 7 Contact Hours: 3 per week

- EET791 COMPUTER PROGRAMMING II
Offered: Autumn
Development of the concepts introduced in CST390 to include the full range of features in this language. An introduction to the features of FORTRAN.
Prerequisite: CST390
Credit Points: 7 Contact Hours: 3 per week

- EET840 SUBSTATIONS & PROTECTION SYSTEMS
Offered: Spring
Insulation co-ordination principles, substation layout and equipment including circuit breakers, current and voltage transformers and their characteristics. An introduction to sequence components and fault calculations. A description of different types of protection systems and their integration with the power system, especially substations.
Prerequisite: EET642
Credit Points: 7 Contact Hours: 3 per week

- EET860 COMMUNICATIONS TECHNOLOGY
Offered: Spring
Broadcast radio and TV, terrestrial and satellite. Specialised broadcast systems, e.g., police, taxi; point to point radio communications; telemetry; switched systems, circuit and packet switching, exchanges, traffic. Use of different frequency ranges, VLF, MF, HF, VHF, UHF and SHF for radio communications. A number of compulsory industrial visits are arranged.
Prerequisites: EET570, EET676
Credit Points: 7 Contact Hours: 3 per week

- EET870 INDUSTRIAL ELECTRONICS
Offered: Spring
This subject studies a wide range of electronic devices and circuits associated with industrial control systems. A wide range of power switching devices and their applications are studied together with electronic measurement systems and their associated transducers.
Prerequisite: EET570
Credit Points: 7 Contact Hours: 3 per week

- EET880 DESIGN
Offered: Spring
The student is introduced to the main concepts of electrical designs and to relevant specifications and standards. Further work is in the form of design projects in which a written report must be submitted.
Prerequisites: Major subjects in selected modules
Co-requisites: Major modules 1(d) and 2(d)
Credit Points: 7 Contact Hours: 3 per week

- EET891 ADVANCED COMPUTING TECHNIQUES
Offered: Spring
Applications of computers and microprocessor systems to data collection supervisory and active control functions. Realtime operating systems and software development in both low level languages and appropriate high level language such as C or MODULA 2.
Prerequisite: CST390
Credit Points: 7 Contact Hours: 3 per week

- ESA310 GEOLOGY
Offered: Autumn
An introduction to geological materials, emphasising chemical concepts and processes. Aspects studied include the origin and constitution of the earth, introductory mineralogy, igneous, sedimentary and metamorphic petrology, study of physical and structural geology, geomorphology, stratigraphy and economic geology. Field excursions as required.
Credit Points: 8 Contact Hours: 3 per week

- ESA510 MINERALOGY TECHNIQUES
Offered: Spring
Fundamental crystallography including crystal systems, forms and symmetry. Stereographic projection of crystals. Systematic treatment of mineral groups, covering aspects of structure, chemistry, properties and uses. Introduction to ore genesis. Techniques of mineral identification.
Credit Points: 8 Contact Hours: 3 per week

- ESB101 EARTH SCIENCE IA
Offered: Autumn
Basic geological principles, origin and general constitution of earth and solar-system, global geology, economic geology. Practical work includes orthographic and stereographic solution of structural problems and identification of economic minerals. Field excursion (one day) to local areas of interest.
Credit Points: 8 Contact Hours: 3 per week

- ESB102 EARTH SCIENCE IB
Offered: Autumn
Crystallography; mineralogy; formation, texture and classification of igneous, sedimentary and metamorphic rocks. Practical work includes study of crystal models, mineral and rock specimens. Field excursions (one day) to local areas of interest.
Credit Points: 8 Contact Hours: 3 per week

- ESB201 EARTH SCIENCE IIA
Offered: Spring
Physical geology, geomorphology, erosion, weathering. Topographic maps and interpretation of land forms. Study of major soil groups and soil formation. Hydrology. Practical work includes exercises based on interpretation of geologic, topographic and orthographic maps. Field excursions as required.
Prerequisites: ESB101 or ESB102
Credit Points: 8 Contact Hours: 3 per week

- ESB202 EARTH SCIENCE IIB
Offered: Spring
Palaeontology, including classification and nomenclature of major phyla in animal and plant kingdoms. Stratigraphy of Australia, in particular of Queensland. Practical work involves study of fossils and map interpretation. Field excursions as required.
Prerequisites: ESB101 or ESB102
Credit Points: 8 Contact Hours: 3 per week
ESB220 MINERALOGY
Offered: Spring
Credit Points: 8  Contact Hours: 3 per week

ESB317 OPTICAL MINERALOGY
Offered: Autumn
The theory and method of optical identification of minerals in both transmitted and incident light. Chemistry, structure, properties and occurrence of selected mineral groups. Practical work involves the identification of minerals in thin section, polished section, and grain mounts.
Prerequisite: ESB102
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB313, ESB413; credit may not be retained for more than one of these subjects.

ESB320 MINERAL ASSEMBLAGES
Offered: Autumn
Prerequisite: ESB20
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB313, ESB413; credit may not be retained for more than one of these subjects.

ESB357 STRUCTURAL GEOLOGY
Offered: Autumn
Stress-strain relationships, rock deformation by brittle fracture and by ductile flow, metamorphic textures; geometric, kinematic and dynamic analysis of folded rocks. Techniques for structural analysis.
Prerequisite: ESB201
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB353; credit may not be retained for both.

ESB367 ECONOMIC MINERAL DEPOSITS
Offered: Autumn
The distribution of metallic and industrial mineral deposits of economic value, in Australia and the rest of the world. Geological occurrence, genetic models, supply and demand, extraction methods. Laboratory techniques for evaluating mineral deposits.
Prerequisite: ESB101 & ESB102
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB363; credit may not be retained for more than one of these subjects.

ESB397 FIELD TECHNIQUES
Offered: Autumn
Methods used in the accumulation, analysis and interpretation of geological field data. Geological mapping, sampling and presentation of reports. Excursions and day trips to areas of geological interest are assessable by means of a combination of reports, assignments, and examinations.
Prerequisites: ESB101 and/or ESB201
Co-requisites: ESB357 or ESB353
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB397; credit may not be retained for both.

ESB403 GEOCHEMISTRY
Offered: Spring
Distribution of elements in nature. Geochemical associations, mobility and dispersion. Sampling methods and design. Data processing, presentation and interpretation. Preparation of geochemical maps and reports. Practical aspects based on field work in selected localities.
Prerequisite: 12 hrs first level chemistry
Credit Points: 8  Contact Hours: 3 per week

ESB411 EARTH RESOURCES
Offered: Spring
An assessment of known resources and future alternatives. Topics discussed include crustal abundances and geochemical distributions; energy sources; metalliciferous and non-metalliciferous economic resources; geopolitics, realities of mineral distribution; limits of earth resources, conservation versus exploitation; waste disposal control; environmental pollution; future technological developments and their possible effects on mineral demands.
Credit Points: 8  Contact Hours: 3 per week

ESB417 IGNEOUS & METAMORPHIC PETROLOGY II
Offered: Spring
The composition, origin, and petrogenesis of igneous rocks, with particular reference to basaltic and calc-alkaline kindreds. A study of metamorphic processes and facies with emphasis being placed on contact metamorphism. Megascopic and microscopic examination of igneous and metamorphic rocks. Textures and mineralogy are emphasised. Field excursions of short duration are normally required.
Prerequisites: ESB317 or ESB313
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB320, ESB413; credit may not be retained for more than one of these subjects.

ESB437 GEOPHYSICS
Offered: Spring
An introduction to the theory of exploration geophysics. Gravity, magnetic, radiometric, well logging, seismic refraction and reflection, electrical resistivity, induced polarisation and electromagnetic techniques. Practical studies of the main techniques, together with limited field work.
Prerequisites: 3 hrs first level physics and ESB101, ESB102
Credit Points: 8  Contact Hours: 3 per week
Note: This subject is not compatible with ESB433; credit may not be retained for both.

ESB447 PETROLEUM GEOLOGY
Offered: Spring
Origin and physio-chemical characteristics of petroleum (oil and gas). Principles of petroleum generation, migration and accumulation through time and space. Development of structural, stratigraphic and reservoir characteristics. Use of geophysical, geochemical and radiometric techni-
ques in petroleum exploration and reservoir characterisation. Drilling techniques, well log interpretation and modern seismic-stratigraphic correlation in petroleum exploration and development. Methods of primary, secondary and tertiary oil and gas recovery. Review of economics of petroleum production.

Co-requisite: ESB499
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with ESB603; credit may not be retained for both.

ESB453 APPLIED GEOMORPHOLOGY
Offered: Spring
The nature, origin and development of landforms and their relationships to underlying structures. The applied aspects concern problems related to economic alluvial deposits, landslides, coastal erosion, river development and environmental geology. Terrain evaluation by aerial photograph interpretation and satellite imagery is central to the practical work.
Prerequisites: ESB201, ESB202
Credit Points: 8
Contact Hours: 3 per week

ESB477 LAND LAW & MINING APPLICATIONS
Offered: Spring
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with ESB473; credit may not be retained for both.

ESB487 GEOLOGICAL FIELD STUDIES
Offered: Spring
An extended excursion (five or more days) with the possible addition of weekend commitments to areas of geological interest. The main emphasis is on mapping. For the extended excursion, students will be required (individually or in groups) to map the geology of an assigned area. Assessment will be based on the production of a geological map to the prescribed scale, together with supporting explanatory notes.
Prerequisites: ESB397 or ESB393
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with ESB483; credit may not be retained for both.

ESB497 SEDIMENTOLOGY
Offered: Spring
Principles of sedimentation, including processes of generation, accumulation and redistribution of sedimentary deposits. Sedimentary depositional environments and the role of tectonics and diagenetic processes in redistribution and lithification of sedimentary deposits. Sedimentary basins, their geometric and structural components. Study of primary sedimentary structures and textures, and their application to environmental interpretation. Economic geology as related to sedimentary rocks, including both minerals and energy resources.
Prerequisites: ESB317 + ESB201 + ESB202
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with ESB493, ESB593; credit may not be retained for more than one of these subjects.

ESB513 ECONOMIC GEOLOGY V
Offered: Autumn
Detailed studies of the genesis, discovery, exploitation and use of economic materials. The following topics are introduced: the legal meaning of ‘mine’ and ‘minerals’, mining leases on Crown Land and mining on private land. The enforcement of mining interests. Petrology, geology emphasising mineralogy and environmental geology. Practical work involves applications for exploration licences, claim and leases.
Credit Points: 8
Contact Hours: 4 per week
Note: This subject is not compatible with ESB517; credit may not be retained for both.

ESB517 MINERAL EXPLORATION
Offered: Autumn
An introduction to the basic principles and theories of geology, emphasising the way in which mineralogy and petrology, geologic structures, geomorphology and groundwater interact with, and are related to engineering design and construction. The engineering properties of rock are considered, and the effect of geologic hazards on engineering construction are examined. The course incorporates a number of case histories to demonstrate and extend the relevance of various aspects of geology to the civil engineer’s workplace.
Credit Points: 6
Contact Hours: 3 per week

ESB519 GEOLOGY FOR ENGINEERING
Offered: Autumn
Techniques for establishing regional geochemical patterns. The application of geochemistry to the discovery of ore deposits and to the solution of environmental problems. Primary and secondary dispersion patterns. Optimum design of geochemical surveys and statistical rationalisation of geochemical data. The application of multipurpose regional geochemical mapping to land use evaluation and environmental impact studies. The relation of selected trace elements to health and disease in plants and animals. Practical work includes an industry oriented field project requiring several days of field work and also case history assignments based upon environmental and exploration problems.
Prerequisites: ESB321 or ESB421 or ESB403
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with ESB533; credit may not be retained for more than one of these subjects.

ESB520 APPLIED GEOCHEMISTRY
Offered: Autumn
Techniques for establishing regional geochemical patterns. The application of geochemistry to the discovery of ore deposits and to the solution of environmental problems. Primary and secondary dispersion patterns. Optimum design of geochemical surveys and statistical rationalisation of geochemical data. The application of multipurpose regional geochemical mapping to land use evaluation and environmental impact studies. The relation of selected trace elements to health and disease in plants and animals. Practical work includes an industry oriented field project requiring several days of field work and also case history assignments based upon environmental and exploration problems.
Prerequisites: ESB321 or ESB421 or ESB403
Credit Points: 8
Contact Hours: 3 per week
Note: This subject is not compatible with ESB533; credit may not be retained for more than one of these subjects.
ESBS23 HYDROGEOLOGY

Offered: Spring

A continuation of ESB443, with the emphasis on practical aspects. The analysis of pumping tests made under a wide variety of geological conditions is studied, together with flow net analysis and the prediction of safe long term pumping rates.

Prerequisites: ESB443

Credit Points: 6  Contact Hours: 3 per week

Note: This subject is not compatible with ESB527; credit may not be retained for both.

ESBS27 HYDROGEOLOGY

Offered: Spring

An extended (five or more days) excursion or a series of weekend excursions to selected areas of geological interest. Students must submit assignments based on these excursions.

Prerequisites: ESB483

Credit Points: 4  Contact Hours: 2 per week

Note: This subject is not compatible with ESB687; credit may not be retained for more than one of these subjects.

ESB533 EXPLORATION GEOCHEMISTRY

Offered: Autumn

Techniques for establishing regional geochemical patterns. The application of geochemistry to the discovery of ore deposits and to environmental problems. A field project is a major component of the practical work. Students are required to attend appropriate field trips which may involve one or two overnight/weekend commitments.

Prerequisites: ESB403

Credit Points: 8  Contact Hours: 4 per week

Note: This subject is not compatible with ESB443, ESB523; credit may not be retained for both.

ESB543 PETROLOGY V

Offered: Autumn

Extension of the concepts studied in ESB413 with emphasis on the less abundant rock types. Assignments and a seminar form an integral part of this unit. Practical work includes the study of selected rock suites. Field excursions of short duration are required.

Prerequisites: ESB413

Credit Points: 6  Contact Hours: 3 per week

Note: This subject is not compatible with ESB547; credit may not be retained for both.

ESB547 IGNEOUS & METAMORPHIC PETROLOGY III

Offered: Autumn

An extension of the information covered in ESB417 with an emphasis on the economically important, but less abundant, rock types. Igneous petrology concentrates on concepts involving rock suites. Metamorphic petrology concentrates on regional aspects. The study of suites and the interpretation of petrographic features is emphasised. Field excursions of short duration are normally required.

Prerequisites: ESB417 or ESB413

Credit Points: 8  Contact Hours: 3 per week

Note: This subject is not compatible with ESB543; credit may not be retained for both.

ESB563 PROJECT V

Students are required to produce an original detailed geological map of an area, prepare a preliminary geological report, and deliver a seminar. Extensive field work is required. Project V must be followed by Project VI (ESB663).

Prerequisites: ESB413 + ESB493 + ESB353 + ESB393 + SVB303

Co-requisites: ESB533, ESB633

Credit Points: 6  Contact Hours: 3 per week

Note: This subject is not compatible with ESB687; credit may not be retained for both.

ESB573 FIELD EXCURSIONS V

Offered: Autumn

A continuation of ESB443, with emphasis on the less abundant rock types. Igneous petrology concentrates on concepts involving rock suites. Metamorphic petrology concentrates on regional aspects. The study of suites and the interpretation of petrographic features is emphasised. Field excursions of short duration are required.

Prerequisites: ESB417 or ESB413

Credit Points: 6  Contact Hours: 3 per week

Note: This subject is not compatible with ESB547; credit may not be retained for both.

ESB593 SEDIMENTARY PETROLOGY

Offered: Autumn

Principles of classification and the concept of maturity, petrology, diagenesis. Carbonate rocks: composition, classification and environment of deposition of recent and ancient carbonates. Diagenesis of carbonate sediments. Dolomites and other carbonate rocks. Characteristics and origin of other biogenic and chemical sedimentary rocks such as chert, phosphorite and ironstone.

Prerequisites: ESB493 + ESB313

Credit Points: 6  Contact Hours: 3 per week

Note: This subject is not compatible with ESB497; credit may not be retained for both.

ESB603 PETROLEUM & COAL GEOLOGY

Offered: Spring

Regional geophysical methods relevant to petroleum and coal exploration; drilling techniques and geophysical and lithological well logging as applied
to petroleum and coal; qualitative well log interpretation and correlation; subsurface mapping techniques and sedimentary basin interpretation. Coal properties, classification genesis and analysis; hydrocarbon generation from coal and oil shale. Coalfield geology. Oil field development and production; methods of primary, secondary and tertiary recovery. Petroleum and coal production and economics. Coal hand specimen study and microscopy. Short field excursions as required.

**Prerequisites:** ESB443 and ESB493  
**Credit Points:** 10  
**Contact Hours:** 5 per week  
**Note:** This subject is not compatible with ESB477; ESB607; credit may not be retained for more than one of these subjects.

**ESB607 COAL GEOLOGY**  
**Offered:** Spring  
Coal properties, classification genesis and analysis; hydrocarbon generation from coal and oil shale. Coalfield geology. Basin analysis and subsurface mapping techniques, coal production and economics. Coal hand specimen study and microscopy. Field excursions of short duration as required, together with practical assignments.

**Prerequisites:** ESB101 + ESB102 + ESB201 + ESB202  
**Credit Points:** 8  
**Contact Hours:** 3 per week  
**Note:** This subject is not compatible with ESB603; credit may not be retained for both.

**ESB613 MINERAGRAPHY & MINING GEOLOGY**  
**Offered:** Spring  

**Prerequisite:** ESB363  
**Credit Points:** 6  
**Contact Hours:** 3 per week  
**Note:** This subject is not compatible with ESB617; credit may not be retained for both.

**ESB617 MINING GEOLOGY**  
**Offered:** Spring  
Search methods for economic materials, ore prediction, reserve assessment techniques. Interpretation of drilling information. Mining economics, case studies. Field excursions as required.

**Prerequisite:** ESB367  
**Credit Points:** 8  
**Contact Hours:** 3 per week  
**Note:** This subject is not compatible with ESB613; credit may not be retained for both.

**ESB633 EXPLORATION GEOPHYSICS**  
**Offered:** Autumn  
The reduction and manipulation of geophysical data, and their interpretation in geological terms. Also included are field data acquisition and laboratory analogue modelling. Experience in a variety of geophysical methods is gained during a field excursion.

**Prerequisites:** ESB433 or ESB437  
**Credit Points:** 8  
**Contact Hours:** 3 per week  

**ESB643 STRUCTURAL GEOLOGY VI**  
**Offered:** Spring  

**Prerequisite:** ESB357  
**Credit Points:** 6  
**Contact Hours:** 3 per week  
**Note:** This subject is not compatible with ESB647; credit may not be retained for both.

**ESB647 STRUCTURAL GEOLOGY & GEOTECTONICS**  
**Offered:** Spring  

**Prerequisite:** ESB357  
**Credit Points:** 8  
**Contact Hours:** 3 per week  
**Note:** This subject is not compatible with ESB643; credit may not be retained for both.

**ESB653 ENGINEERING GEOLOGY**  
**Offered:** Spring  
The application of geology to engineering, including an introduction to soil and rock mechanics, geological factors influencing engineering design and construction and the use of geological materials in construction. Foundation conditions and site investigation techniques. Case histories of various construction projects, including dams, bridges, buildings, roads, railways, tunnels and slopes. Field excursions to appropriate construction sites.

**Prerequisites:** ESB413 + ESB493 + ESB353 or ESB417 + ESB497 + ESB357  
**Credit Points:** 8  
**Contact Hours:** 3 per week

**ESB663 PROJECT VI**  
**Offered:** Spring  
The detailed analysis and interpretation of samples and information resulting from work done in ESB563. Preparation and presentation of a final detailed report. Some field work is required.

**Prerequisite:** ESB563  
**Credit Points:** 8  
**Contact Hours:** 4 per week  
**Note:** This subject is not compatible with ESB687; credit may not be retained for both.

**ESB673 FIELD EXCURSIONS VI**  
**Offered:** Spring  
An extended (five or more days) excursion or a series of weekend excursions to selected areas of geological interest. Students must submit assignments based on these excursions.

**Prerequisite:** ESB573  
**Credit Points:** 4  
**Note:** This subject is not compatible with ESB677; credit may not be retained for both.

**ESB677 FIELD EXCURSIONS**  
**Offered:** Spring  
An extended (five or more days) excursion, with the possible addition of weekend commitments, to areas of geological interest. The emphasis being on economic geology. Students will be assessed on the basis of field attitude, the production of their individual original written report, and any other requirements of the examiner (e.g. oral or written examination, seminar, etc.).

**Prerequisites:** ESB577 or ESB573  
**Credit Points:** 8  
**Note:** This subject is not compatible with ESB673; credit may not be retained for both.
Students are required to produce an original detailed map of a designated area, collect representative samples, observe and collate relevant information (e.g., structures, mineralisation, lithological variation, geomorphic variations, etc.). Appropriate laboratory and office work forms the initial field work. Assessment based on the production of a final detailed report which will include maps. Each student is assigned to an adviser.

Prerequisite: ESB357 + ESB517 + ESB547 + ESB497 + ESB437

Credit Points: 8  Contact Hours: 3 per week

This subject aims at developing a student's capacity for making his/her own work and for persistence within a circumscribed area. The project will normally involve preparation of a seminar in addition to the preparation of a full report. The topic selected will have regard to available expertise and selected field of special interest to the candidate. In particular, it is expected that project work will be conducted across the wide variety of applications in areas serviced by the course. Most projects will be work-related and will have associate supervision from commercial/industrial sources. It is envisaged that, where appropriate, projects may be jointly supervised by staff of the Schools or Departments involved in the course.

Credit Points: 8  Contact Hours: 2 per week

Prerequisite: Approval from Dean of Faculty

Credit Points: 9  Contact Hours: 3 per week

Written and oral English for tertiary purposes. Extension of structure and grammatical knowledge as well as vocabulary.

Offered: Autumn, Spring

Designed to co-ordinate the practical aspects of the lecture material presented each semester so that students both develop essential practical skills and benefit from cross fertilisation of the individual subjects. The importance of all aspects of personal communication will be emphasised throughout and students will also be strongly encouraged to perceive the social implications of computing activities and systems.

Co-requisite: Core topics in appropriate semester

Credit Points: 12  Contact Hours: 4 per week

Prerequisite: Successful completion of subjects totalling not less than 120 hours of weekly contact time

Credit Points: 12  Contact Hours: 3 per week

This subject aims at developing a student's capacity for managing his/her own work and for persistence within a circumscribed area. The project will normally involve presentation of a seminar in addition to the preparation of a full report. The topic selected will have regard to available expertise and selected field of special interest to the candidate. In particular, it is expected that project work will be conducted across the wide variety of applications in areas serviced by the course. Most projects will be work-related and will have associate supervision from commercial/industrial sources. It is envisaged that, where appropriate, projects may be jointly supervised by staff of the Schools or Departments involved in the course.

Credit Points: 8  Contact Hours: 2 per week
Students both develop essential practical skills and benefit from cross fertilisation of the individual subjects. The importance of all aspects of personal communication will be emphasised throughout and students will also be strongly encouraged to perceive the social implications of computing activities and systems.

Co-requisites: Core topics in an appropriate semester
Credit Points: 6  Contact Hours: 2 per week

INB270 DATA COMMUNICATIONS
Offered: Autumn, Spring
The subject describes the role of data communications and on-line systems in a modern computing environment and examines the design, implementation and management of data communications networks. It covers basic concepts and terminology; the International Standards Organisation reference model for open systems interconnection; communications equipment; data communications network design and management; network architectures; local area networks; Telecommunication networks; transaction processing systems; distributed processing systems.
Prerequisite: CSB281
Credit Points: 9  Contact Hours: 3 per week

INB285 DATA COMMUNICATIONS
This subject describes the role of data communications in a modern computing environment. It examines in some detail, aspects of the design, implementation and management of data communications networks. Topics to be discussed include basic telecommunications concepts, communications protocols, the ISO Reference Model for Open Systems Interconnection, wide area networks, local area networks and communications network security.
Prerequisite: CSB281 OR CSB181 OR CSB155
Credit Points: 12  Contact Hours: 4 per week

INB300 PROJECT WORK
Offered: Autumn, Spring
Students, either individually or in small groups, undertake a substantial 12 month project relevant to the needs of industry and designed to give insight into industrial requirements. Each student/group is supervised by a member of staff. In addition, there is a teaching contribution - of one hour per week throughout the first semester from the School of Communication - designed to develop the student's communication skills.
Prerequisite: Successful completion of at least the equivalent of two-thirds of either the Bachelor of Applied Science (Computing) or Bachelor of Business (Computing) AND CMB104
Credit Points: 12 per semester
Contact Hours: 4 per week

INN200 RESEARCH METHODOLOGY
Offered: Autumn
Topic of research by agreement between the student and a Faculty staff member acting as project supervisor. Students must attend lectures/seminars of approximately 1 hour every two weeks (on average). They will also engage in literature search and generally other design aspects of their research project.
Credit Points: 12  Contact Hours: Not applicable

INN210 HONOURS PROJECT II
Offered: Spring
This is a continuation and completion of the research project initiated for the subject INN200 Research Methodology.
Prerequisite: INN200
Credit Points: 12  Contact Hours: Not applicable

INN300 MINOR PROJECT
INN301 MINOR PROJECT
INN302 MINOR PROJECT
INN303 MINOR PROJECT
Offered: Autumn, Spring
Students may undertake a number of minor projects so that they can pursue specialised areas of interest, or broaden their knowledge in areas of relevance to their employment. Topics are to be decided by agreement between the student and a Faculty staff member acting as supervisor.
Credit Points: 12  Contact Hours: 3 per week

INN310 ADVANCED DATA COMMUNICATIONS
Offered: Spring
This subject deals with advanced material in data communications. Topics covered include data communications network design and management (techniques and case studies); performance modelling of communications networks; comparative evaluations of data communications products and services; data communications software design and implementation; provision of integrated communications services (voice, data, video, etc.); network security; communications industry policy (e.g., deregulation vs. regulation).
Prerequisite: INB270 (or equivalent)
Credit Points: 12  Contact Hours: 3 per week

INN400 MAJOR PROJECT-PART I
Offered: Autumn
This subject comprises the first semester of a two semester subject and enables students to pursue a specialised topic in greater depth than is possible in a single semester. Topics are to be decided by agreement between the student and a Faculty member acting as supervisor.
Prerequisite: Completion of eight subjects of the Master of Applied Science (Computing)
Credit Points: 12  Contact Hours: 3 per week

INN450 MAJOR PROJECT-PART II
Offered: Spring
This subject forms the second half of the major project component of the Master of Applied Science (Computing) course, and is a continuation of the same topic commenced in INN400.
Prerequisite: INN400 Major Project-Part 1
Credit Points: 12  Contact Hours: 3 per week

INP270 DATA COMMUNICATIONS
Offered: Autumn, Spring
This subject describes the role of data communications in a modern computing environment. It examines in some detail, aspects of the design, implementation and management of data communications networks. Topics to be discussed include basic telecommunications concepts, communications protocols, the ISO Reference Model for Open Systems Interconnection, wide area networks, local area networks and communications network security.
Prerequisite: CSP112 OR ISP100
Co-requisite: ISP100 (for students in the Graduate Diploma in Commercial Computing)
Credit Points: 12  Contact Hours: 3 per week

ISB101 APPLICATION SYSTEMS
Offered: Autumn, Spring
This subject examines the way business operates and the nature of business application systems. It also
examine the features of some non-business applications. On completion of the subject, students will be able to describe the generalised applications needed to support of business; be aware of the need for custom designed systems; and be aware of career prospects in the information technology industry in Australia.
Credit Points: 4 Contact Hours: 2 per week

ISB180 COMPUTER APPLICATIONS
Offered: Spring
This subject will provide a basic understanding of commercial microcomputer systems as they apply to building and exposure to microcomputer applications, specifically a spreadsheet and a database package. This will include the design and implementation of spreadsheet models and creation of reusable templates; the use of a database management system (DBMS) including design of data files, creation of data views and reports; an introduction to problem definition, solution design and modular programming in conjunction with the DBMS.
Credit Points: 4 Contact Hours: 2 per week

ISB182 REPRESENTATION OF INFORMATION
Offered: Autumn
This subject will provide students with the ability to develop an abstract model of a real situation, being the first step in the process of creating a computer-based information system. The subject therefore forms the basis for the subsequent development of the concepts associated with the design and implementation of information systems.
Credit Points: 9 Contact Hours: 3 per week

ISB201 INFORMATION SYSTEMS ANALYSIS & DESIGN I
Offered: Autumn, Spring
This subject provides a grounding in the methodology and techniques of systems analysis and design.
Prerequisites: CSB101, ISB102
Credit Points: 9 Contact Hours: 3 per week

ISB202 DATABASE AND PROCEDURAL LANGUAGES
Offered: Autumn, Spring
The fundamentals and syntax of a procedural computer programming language (eg COBOL) and its use in the implementation of information systems (in particular database systems). Apart from developing techniques in commercial programming, the subject provides an appreciation of the advantages and disadvantages of a database approach.
Prerequisite: ISB110
Credit Points: 9 Contact Hours: 3 per week

ISB203 ADVANCED DATABASE
Offered: Autumn
This subject covers relational and network database architectures and the facilities provided by a database management system. The issues in the database area which impinge on online systems design will be discussed and students will be introduced to the relationship between database management systems and 4GL software.
Prerequisite: ISB102
Credit Points: 9 Contact Hours: 3 per week

ISB210 INFORMATION SYSTEMS ANALYSIS & DESIGN II
Offered: Autumn, Spring
This subject teaches a complete method for developing an Information System, from initial analysis of the problem through to a working computer system. Emphasis is given to the practical application of the techniques, using a wide range of real life problems.
Prerequisite: ISB201
Credit Points: 9 Contact Hours: 3 per week

ISB214 THE INFORMATION RESOURCE
Offered: Spring
This subject covers the management of information within an organisation, with some consideration of the problems associated with sharing information between organisations and the identification and targeting of information users as clients.
Prerequisite: MNB103
Credit Points: 9 Contact Hours: 3 per week

ISB215 EXTERNAL SOURCES OF INFORMATION
Offered: Autumn
This subject encompasses the scanning of the environment using various information sources, technologies, avenues and methodologies. It will also provide practical skills including online searching. It will cover the definition of external information sources (personal and recorded); types of information provided by Government sources, industrial sources, academic sources and business sources; the publishing industries; online searching techniques; storage and retrieval media; computer conferencing.
Credit Points: 9 Contact Hours: 3 per week
ISB216 POLITICAL & SOCIAL ASPECTS OF INFORMATION TECHNOLOGY
Offered: Autumn
This subject introduces the major political and legal aspects of information technology. Government policies relevant to the information industry will be examined and comparisons drawn between policies adopted by different countries. The social consequences of technological convergence with particular emphasis on the changing nature of work and the evolution of the information professions will be discussed.
Credit Points: 9 Contact Hours: 3 per week

ISB219 ADVANCED COBOL
Offered: Spring
This subject provides students with the opportunity of gaining greater proficiency in writing complex commercial programs in the COBOL language. A major programming project will be implemented to facilitate the above.
Prerequisite: ISB202
Credit Points: 9 Contact Hours: 3 per week

ISB263 INTRODUCTION TO COMPUTERS & INFORMATION SYSTEMS
Offered: Spring
This subject is designed to enable students to identify the necessary computing concepts involved in the design and use of information systems; to apply computing concepts in the area of nursing practice; and to demonstrate competence in using systems creation and retrieval techniques via a computer-based project.
Credit Points: 6 Contact Hours: 2 per week

ISB281 INFORMATION SYSTEMS ANALYSIS & DESIGN I
Offered: Autumn, Spring
This subject provides a grounding in the methodology and techniques of systems analysis and design; and aims to develop competence in techniques and application of methodologies of information systems development.
Prerequisites: CSB155 + ISB282
Credit Points: 12 Contact Hours: 3 per week

ISB283 DATABASE & PROCEDURAL LANGUAGES
Offered: Autumn, Spring
This subject introduces the fundamentals and syntax of a procedural computer programming language (e.g., COBOL) and examines its use in the implementation of information systems (and in particular database systems). Apart from developing techniques in commercial programming, the subject provides an appreciation of the advantages and disadvantages of a database approach.
Prerequisite: CSB280
Credit Points: 12 Contact Hours: 3 per week

ISB289 INFORMATION SYSTEMS ANALYSIS & DESIGN II
Offered: Autumn, Spring
This subject extends coverage of techniques of analysis and design to further develop competence in methodologies, skills and techniques used by systems analysts. It will teach a complete method for developing an information systems, from initial analysis of the problem through to a working computer system. Emphasis will be given to the practical application of the techniques, using a wide range of real life problems.
Prerequisites: ISB281 OR ISB492
Credit Points: 12 Contact Hours: 4 per week

ISB301 ADVANCED INFORMATION SYSTEMS
Offered: Autumn
This subject introduces students to the concept and practice of Decision Support Systems (DSS). It covers foundations architecture and developing DSS; the DSS environment, applications of DSS and the role of DSS in an organisation; end-users and DSS; human factors in DSS; DSS and Management Information Systems; intelligent DSS.
Prerequisite: ISB281
Credit Points: 9 Contact Hours: 3 per week

ISB302 DATABASE MANAGEMENT
Offered: Autumn
This subject provides students with the opportunity of gaining greater proficiency in writing complex commercial programs in the COBOL language. A major programming project will be implemented to facilitate the above.
Prerequisite: ISB283
Credit Points: 9 Contact Hours: 3 per week

ISB303 OFFICE INFORMATION SYSTEMS
Offered: Autumn, Spring
This subject examines the development and implementation of information systems in the office context. It includes an assessment of the computer hardware, software and telecommunications products available to support the automated office. The subject is intended to extend students' competence in the design and management of data communications networks and to examine techniques and systems contributing to automation of the modern office.
Prerequisites: INB270 OR INF270
Credit Points: 9 Contact Hours: 3 per week

ISB305 PROJECT
Offered: Spring
Students, either individually or in small groups, undertake a substantial six month project relevant to the needs of industry and designed to give insight into industrial requirements. Each student, or group of students, undertakes a different project and is supervised generally by a member of staff who provides guidance throughout the duration of the project.
Prerequisite: Successful completion of at least the equivalent of two-thirds of the normal course program and CMB104 OR ISB492
Credit Points: 12 Contact Hours: 4 per week

ISB313 EXPERT INFORMATION SYSTEMS
Offered: Spring
This subject examines the role of expert systems in the commercial area and their impact on business information systems; provides an understanding of how expert systems could be used in the development of advanced business information systems; and gives some practical experience in developing and implementing information systems containing such techniques; includes discussion on social implications of expert systems.
Prerequisite: ISB301
Credit Points: 9 Contact Hours: 3 per week
ISB314 INFORMATION SYSTEMS
MANAGEMENT
Offered: Spring
This subject is designed to develop a knowledge of the functions and practices of management in a computer installation, and to give competence in the evaluation and acquisition of a computer system. It will cover the data processing management process; criteria and techniques for selecting computer hardware, software and services; the RFP, project and operations management; site selection, and evaluation of contracting computers.
Prerequisite: Completion of two-thirds of the Bachelor of Business (Computing) course
Credit Points: 9 Contact Hours: 3 per week

ISB316 INFORMATION SUPPORT SYSTEMS
Offered: Spring
This subject examines the computer data base environment and the organisational superstructure around it as one coherent unit. Students will be introduced to issues varying from planning and administering the information centre to understanding the politics and mechanics of information centre implementation and its interaction with the organisation.
Prerequisite: ISB203
Credit Points: 9 Contact Hours: 3 per week

ISB317 SPECIAL TOPIC - INFORMATION MANAGEMENT
Offered: Spring
This subject will cover at each offering aspects of information management of specific interest at that time. The subject makes allowance for significant developments or emphasis in information management not included in the remainder of the course program.
Prerequisite: To be advised
Credit Points: 9 Contact Hours: 3 per week

ISB318 STRATEGIC INFORMATION MANAGEMENT
Offered: Spring
This subject integrates all learning occurring throughout the Information Management degree in the context of the working environment. The importance of strategic planning by organisations and the contribution of the information manager to this process is stressed. The subject covers methods of intelligence analysis and environmental scanning in support of strategic planning. The value of information to the strategic positions being adopted by the organisations is also covered.
Prerequisite: ISB214
Credit Points: 9 Contact Hours: 3 per week

ISB319 MICROCOMPUTER APPLICATIONS
Offered: Spring
This subject aims to provide a basic understanding of commercial microcomputer systems as they apply to Science. It includes an introduction to three major microcomputer applications: the design and implementation of spreadsheet models and creation of reusable templates; the use of a database management system (DBMS) including design of data files, creation of data views and reports; an introduction to problem definition, solution design and modular programming in conjunction with the DBMS; and an understanding of the basic capabilities of word processing packages and their applications.
Credit Points: 9 Contact Hours: 3 per week

ISB385 MICROCOMPUTER SOFTWARE APPLICATIONS
Offered: Autumn, Spring
This subject is designed to provide a basic understanding of commercial microcomputer systems as they apply to Applied Science. It will include an introduction to three major microcomputer applications: the design and implementation of spreadsheet models and creation of reusable templates; the use of a database management system (DBMS) including design of data files, creation of data views and reports; an introduction to problem definition, solution design and modular programming in conjunction with the DBMS; and an understanding of the basic capabilities of word processing packages and their applications.
Credit Points: 4 Contact Hours: 2 per week

ISB392 BUSINESS COMPUTING
Offered: Autumn, Spring
This subject is designed to provide an understanding of commercial computing, its terminology, hardware and software components; familiarity with specific electronic data processing applications, an ability to design a simple business system and an ability to describe manipulation of information to produce a desired result; an exposure to microcomputer applications, specifically a spreadsheet package; and an introduction to information analysis techniques and database design concepts.
Credit Points: 12 Contact Hours: 4 per week

ISB393 COMPUTER BASED INFORMATION SYSTEMS
Offered: Spring
The subject is designed to introduce engineering students to commercial computer applications. Some time will be spent on introducing systems concepts, file management and database systems. As practical work, the combination of database/spreadsheet package “VP-Planner” has been selected.
Credit Points: 4 Contact Hours: 3 per week

ISB492 COMPUTERISED ACCOUNTING SYSTEMS
Offered: Autumn, Spring
This subject is designed to introduce students planning a career in accounting to the nature and operation of computerised accounting systems. Students will study the basic concepts underlying such systems, features of common applications (eg general ledger, sales) and the process of analysing and designing such systems. Practical experience in the use of the SYBIZ microcomputer accounting package will be provided.
Prerequisite: ISB392
Credit Points: 12 Contact Hours: 4 per week

ISB493 BUSINESS COMPUTER PROGRAMMING
Offered: Autumn
This subject introduces COBOL as a business programming language and develops competence in modern commercial programming techniques. It examines programming principles, structured design, fundamentals of COBOL, commercial data processing systems, algorithms for business applications, data structures and file processing. It includes practical projects in COBOL on HP3000 or VAX.
Prerequisites: CSB155, ISB392
Credit Points: 9 Contact Hours: 4 per week
Note: This subject is not compatible with CSB306; credit may not be retained for both.
ISB998 SPECIAL TOPIC - BUSINESS COMPUTING
Offered: Spring
These subjects are designed to allow for the significant development of or emphasis in business computing not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available. See School announcements for full details of special topics being offered.
Prerequisite: See School announcements
Credit Points: 9 Contact Hours: 3 per week

ISB999 SPECIAL TOPIC - BUSINESS COMPUTING
Offered: Spring

ISN100 INFORMATION SYSTEMS I
Offered: Spring
This subject deals with advances in information system development approaches and techniques. It examines the theoretical basis underlying current approaches to decision support. A special focus is on the impact on information systems development of increased user involvement.
Prerequisite: ISB201 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

ISN156 MANAGEMENT INFORMATION SYSTEMS
Offered: Spring
This subject examines the principles and technologies involved in the collection, analysis and presentation of information to aid management decision making. It provides insight into current principles and technology appropriate to effective practice in the areas of Managerial Accounting and Finance.
Credit Points: 12 Contact Hours: 3 per week

ISN300 INFORMATION SYSTEMS II
Offered: To be advised
This subject provides an advanced treatment of contemporary issues of information system development. It deals particularly with the issues of development of corporate information systems.
Prerequisite: ISN100
Credit Points: 12 Contact Hours 3 per week

ISP100 THE COMPUTER SYSTEM
Offered: Autumn
This subject is designed to provide an overview of the computer as a tool to be applied to a variety of problems concentrating on applications in commerce; to develop the perception for the process necessary in systems development: software engineering; and to develop skills in program development and a basic competence in algorithm development and implementation using PASCAL. It will cover computer hardware and software; an introduction to software engineering; computational linguistics; algorithm development and implementation in PASCAL.
Credit Points: 12 Contact Hours: 3 per week

ISP101 DATA DESIGN & PROCESSING
Offered: Autumn
This subject is designed to introduce the theory of data modeling and the techniques associated with development of database solutions for a variety of information problems and in conjunction with the above, to familiarise students with modern post-procedural approaches to database retrieval and manipulation.
Co-requisite: ISP100 OR CSP112
Credit Points: 12 Contact Hours: 3 per week

ISP113 PRINCIPLES OF INFORMATION MANAGEMENT
Offered: Autumn
This subject serves as an introduction to the core elements of information management and emphasises information as an essential organisational resource required by management to meet organisational goals and objectives. The subject examines the nature and creation of information, storage media, organisation for storage, retrieval techniques, transfer, effects of internal and external environments, security and obsolescence.
Credit Points: 12 Contact Hours: 3 per week

ISP200 SYSTEMS ANALYSIS & DESIGN
Offered: Autumn, Spring
This subject is designed to give students an understanding of methodologies for undertaking the development of a computer-based business system; to develop competence in the use of a number of techniques of systems analysis and design; to develop understanding of design considerations related to important business application areas; and to extend the understanding of the application of data modelling.
Prerequisite: ISP101
Credit Points: 12 Contact Hours: 3 per week

ISP301 ADVANCED DATABASE
Offered: Spring
On completion of this subject, students should be able to accomplish the following: discuss the functions of a DBMS; describe the relational and network approaches to database construction; describe one DBMS in detail; design a database to support the outputs required of some information system; distinguish between databases and knowledge bases, and describe the features expected of a 4GL and how they facilitate the use of prototyping.
Prerequisite: ISP301
Prerequisite/Co-requisite: ISP400 (for students in the Graduate Diploma Commercial Computing)
Credit Points: 12 Contact Hours: 3 per week

ISP303 PROGRAMMING
Offered: Autumn
This subject is designed to develop: advanced algorithms and implement these algorithms; structured design techniques for commercial applications; practical aspects of program testing, debugging and style; and competence in the 'C' programming language. The subject will cover structured program design (top-down development); advanced data structures and algorithm development; and sound program development, testing and debugging using Pascal and C. It will include practical work on VAX, PCs or HP9000.
Prerequisites: ISP100 and ISP101
Credit Points: 12 Contact Hours: 3 per week

ISP313 EXPERT INFORMATION SYSTEMS
Offered: Spring
This subject examines the role of expert systems in the commercial area and their impact on business information systems. It provides an understanding of how expert systems could be used in the development of advanced business information systems, and gives some practical experience in developing and implementing information systems containing such techniques. It includes discussion on the social implications of expert systems.
Prerequisite: ISP301
Credit Points: 12 Contact Hours: 3 per week
ISP314 INFORMATION SYSTEMS MANAGEMENT
Offered: Spring
This subject is designed to develop a knowledge of the functions and practices of management in a computer installation, and to give competence in the evaluation and acquisition of a computer system. It will cover the data processing management process; criteria and techniques for selecting computer hardware, software and services; the RFP, project and operations management; site selection, and evaluation of computing contracts.
Prerequisite: Completion of one-half of the Graduate Diploma in Commercial Computing
Credit Points: 12 Contact Hours: 3 per week

ISP380 QUALITY INFORMATION SYSTEMS
Offered: Autumn
This subject examines methodologies and techniques for achieving a high level of quality in business information systems, relating these to broader principles of quality control and quality assurance. Areas covered include: types of information systems; information as a resource; past and current approaches to information systems; decision making based on information systems; analysis and design; prototype concepts; information system modelling.
Credit Points: 6 Contact Hours: 3 per week

ISP381 ADVANCED INFORMATION SYSTEMS
Offered: Autumn
This subject is designed to introduce students to the concept and application of Decision Support Systems (DSS) to study the development and architecture of DSS; and to introduce students to the role and relationship of the user and the organisation to DSS. It will cover foundations architecture and developing DSS; the DSS environment, applications and the role in an organisation; end-users and DSS; human factors; DSS and Management Information Systems (MIS); and intelligent DSS.
Prerequisite: ISP281
Credit Points: 12 Contact Hours: 3 per week

ISP383 OFFICE INFORMATION SYSTEMS
Offered: Spring
This subject examines the development and implementation of information systems in the office context. It includes an assessment of the computer hardware, software and telecommunications products available to support the automated office. The subject is intended to extend students' competence in the design and management of data communications networks and to examine techniques and systems contributing to automation of the modern office.
Prerequisite: INP285 OR INP270
Credit Points: 12 Contact Hours: 3 per week

ISP401 COMPUTER PROJECT
Offered: Spring
A major project allocated to or proposed by the student in any of the specialist areas (covered or otherwise) in the course, e.g., a development of project, software implementation, or the solution to a particular problem in computer business applications.
Prerequisite: Completion of six subjects of the Graduate Diploma in Commercial Computing
Credit Points: 12 Contact Hours: 3 per week

ISP410 COLLECTION BUILDING & USE I
Offered: Autumn
On completion of this subject, students will be able to demonstrate an understanding of the characteristics of various print and non-print resources as channels for the communication of ideas; an ability to use the major tools of selection for both print and non-print resources; an understanding of the processes of acquisition of resources; an ability to operate a wide range of media equipment; an understanding of the economic basis of decision-making in the selection, acquisition, storage and exploitation of resources.
Credit Points: 8 Contact Hours: 2 per week

ISP411 INFORMATION STORAGE & RETRIEVAL I
Offered: Autumn
This subject is designed to teach information storage and retrieval theory and its application to libraries and information agencies. Students will demonstrate an understanding of the principles of bibliographical organisation of resource materials and their part in fulfilling the mission of libraries and information agencies.
Credit Points: 8 Contact Hours: 2 per week

ISP412 INFORMATION USERS & SERVICES I
Offered: Autumn
On successful completion of this subject students will be able to: answer user queries using standard reference print sources; conduct a reference interview; formulate a search strategy; and evaluate reference sources and services. Students will examine user needs as the basis for library and information services; the findings of user studies conducted in Australia and abroad.
Credit Points: 8 Contact Hours: 2 per week

ISP413 INFORMATION AGENCY MANAGEMENT & SERVICES I
Offered: Autumn
On successful completion of this subject, students will be able to: define the managerial functions of planning, organising, staffing, directing and controlling; apply the theory of management to a wide variety of information agencies; and analyse specific work situations in order to apply managerial concepts and techniques successfully.
Credit Points: 8 Contact Hours: 2 per week

ISP414 LIBRARY SERVICES TO YOUNG PEOPLE
Offered: Spring
This subject is designed to introduce students to the most important aspects of library service to young people. Students will be able to offer a variety of services and programmes appropriate to different community groups; evaluate works written for children and young people in order to select appropriate resources for the library's clientele.
Credit Points: 12 Contact Hours: 3 per week
ISP418 INFORMATION & REFERRAL SERVICES
Offered: Autumn
This subject will provide an introduction to community information services offered in libraries and by other agencies; a means of identifying the information needs of individuals in their private lives; locating, storing, retrieving and repackaging this information.
Credit Points: 12  Contact Hours: 3 per week

ISP419 GOVERNMENT DOCUMENTS
Offered: Autumn
This subject is designed to examine the production, acquisition and organisation of government documents, as well as issues related to their use. Students will demonstrate a knowledge of the range of government documents available; of the extent of bibliographic control currently being applied to these materials; of appropriate organisational patterns for these resources.
Credit Points: 12  Contact Hours: 3 per week

ISP420 COLLECTION BUILDING & USE II
Offered: Spring
On completion of this subject, students will be able to demonstrate an understanding of the characteristics of various print and non-print resources as channels for the communication of ideas; an ability to use the major tools of selection for both print and non-print resources; an understanding of the processes of acquisition of resources; an ability to operate a wide range of media equipment; an understanding of the economic basis of decision-making in the selection, acquisition, storage and exploitation of resources.
Prerequisite/Co-requisite: ISP410
Credit Points: 8  Contact Hours: 2 per week

ISP421 INFORMATION STORAGE & RETRIEVAL II
Offered: Spring
This subject is designed to teach information storage and retrieval theory and its application to libraries and information agencies.
Prerequisite: ISP411
Credit Points: 8  Contact Hours: 2 per week

ISP422 INFORMATION USERS & SERVICES II
Offered: Spring
This subject is designed to teach students to act as the interface between users and the data or information they may require, in whatever form, using a variety of available resources, systems, and technologies. This subject comprises design, construction and use of databases: comparison of commercially produced dbms: structure of the database industry; types of databases.
Prerequisite: ISP412
Credit Points: 8  Contact Hours: 2 per week

ISP423 INFORMATION AGENCY MANAGEMENT & SERVICES II
Offered: Spring
An introduction to automated library management systems, both mainframe/minicomputer and microcomputer based, including circulation, cataloguing, acquisitions and security systems, as well as integrated library systems and the nature and use of local area networks.
Prerequisite: ISP413
Credit Points: 8  Contact Hours: 2 per week

ISP427 SPECIAL TOPIC - LIBRARY SCIENCE
Offered: Spring
This subject is designed to allow for significant development of or emphasis in library science not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available.
Prerequisite: See School announcements
Credit Points: 8

ISP428 FIELD EXPERIENCE
Offered: Autumn, Spring
This subject comprises a total of six weeks' full-time individualised work experience in a library or other information agency approved by the Head of School. Field experience may normally be divided into no more than two separate periods of three weeks' apiece and must be arranged through the School of Information Systems.
Credit Points: 8

ISP998 SPECIAL TOPIC - COMMERCIAL computing
Offered: Autumn
This subject is designed to allow for significant development of or emphasis in commercial computing not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available.
Prerequisite: See School announcements
Credit Points: 8

ISP999 SPECIAL TOPIC - COMMERCIAL computing
Offered: Spring
This subject is designed to allow for significant development of or emphasis in commercial computing not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available.
Prerequisite: See School announcements
Credit Points: 8

LPB441 URBAN PLANNING II
Offered: Spring
The meaning of urban governance. The statutory relationships amongst Australian federal, state and local authorities and the effective relationships amongst them with respect to physical, social, decision-making and financial resources. The structure of local authority, state and federal government departments. The relationships between politicians and administrators. Rural land use patterns. The characteristics and dynamic of rural land uses - forestry, pastoral and arable agriculture, extractive industries, water collection, recreation and tourism, conservation systems. Impacts of rural resource development. Rural land evaluation. Rural planning and characteristics of rural settlements. The rural urban fringe. Rural issues, problems and conflicts.
Credit Points: 4  Contact Hours: 2 per week

LPB444 URBAN PLANNING III
Offered: Autumn
Transport planning: Movement and its alternative modes - foot, cycle, car, bus, train, plane, pipeline, inland waterway and marine modes. The origins and destination approach to traffic management, interchange studies. Inter-urban traffic and regional transport planning. The relationship between land use and traffic generation. Social Planning: The genesis of social welfare policies in Australia - employment, health, housing, income and education. The aims and
conduct of social surveys. Community development and organisation schemes in Australia and overseas. Public participation and community action; planning aid and advocacy planning.

Credit Points: 5  Contact Hours: 2 per week

LPP201 CULTURAL VALUES
Offered: Spring
Concepts of garden, landscape and environment. Formative influences on late 20th century thinking. Landscape as art or artefact, the fine arts tradition, and iconography. The continuing influence of the picturesque and gardenesque. The scientific, rationalist approach and evolving environmental romanticism. Functionalism, symbolism and meaning. The demystification (quantification) of aesthetic and personal response and the influence of the social sciences. Pursuing a public art form.

Credit Points: 6  Contact Hours: 1 per week

LPP202 RESIDENTIAL LANDSCAPE DESIGN
Offered: Autumn
Landscape design problems dealing with single and multiple dwellings. Introduction of the range of housing and subdivision types. How private and common land are controlled and managed. Consequences for design. Controls, by-laws, standards, and regulations for residential development using examples in various States. Relevant international examples including Radburn planning, experimentation with residential forms in the last 50 years, and the Commonwealth’s “Affordable Housing” program. Expectations of residents and the development of attitudes to suburban and urban gardens in Australia over the last century. Fashion, style and environmental constants. Microclimatic control, viewsheds and privacy, noise amelioration. Formulating and resolving briefs.

Credit Points: 9  Contact Hours: 3 per week

LPP203 URBAN LANDSCAPE DESIGN
Offered: Autumn
Theory: client and user analysis, data gathering and information requirements, programming of work for site planning and detailed design services, programming of implementation: user/function analysis and site capacity considerations and preparation of a project brief. Open space theory and the principles of spatial design. Studio: a medium scale intensive/multiple use project which demands re-design and rehabilitation will be undertaken to apply concurrent theory lectures and seminars. Students will be expected to make time available outside studio hours to visit project site(s) and carry out such site surveys and “client” interviews as are necessary to establish project briefs and carry out the design project. Expectations of an advanced level of professional presentation will attach to the project output.

Credit Points: 9  Contact Hours: 3 per week

LPP204 LANDSCAPE PLANNING
Offered: Spring
Studies will include medium to large scale projects involving a range of biophysical, cultural, and visual issues with a relatively high degree of complexity. The focus will be on assessment and evaluation of related landscape attributes and issues with emphasis on deriving landscape management options in the form of policies, guidelines, and implementation strategies. The studio will incorporate a lecture/seminar programme which will promote an understanding of the theoretical framework of landscape planning.

Credit Points: 10  Contact Hours: 4 per week

LPP205 LANDSCAPE DESIGN
Offered: Spring
Landscape design problems of increased scope, complexity and constraint. There will be at least one one-day esquisse project in addition to the primary theme project extending for the duration of the subject. Emphasis will be on the consistent resolution of design from broad concept through to the most detailed level. Matters of appropriate style and morphology will be dealt with in depth with the selected theme applied consistently through scale and organisation of layout, selection of materials, forms and elements, and integration with surrounding context. Projects will emphasise design of planting, constructed elements.

Credit Points: 11  Contact Hours: 3 per week

LPP206 FORUM/WORKSHOP A
LPP207 FORUM/WORKSHOP B
Offered: Autumn, Spring
Content will depend on the needs of students as perceived by staff during each semester. Forum discussions will be structured around topical issues as debates, panel discussions, or seminars which may involve visiting specialist lecturers and/or participants. Skills extension sessions will be seminars of studio tutorials in areas such as graphic and other communication techniques, new materials or processes, innovative approaches to design, or specialised survey/analysis techniques.

Credit Points: 2  Contact Hours: 1 per week

LPP208 LANDSCAPE PRACTICE
Offered: Spring
Practical experience for a period of at least three weeks in landscape architectural office or offices as approved by the Course Co-ordinator. This experience may be prerequisite to or co-requisite with the second part of the subject. Experience will be logged as directed. Principles of contract law, forms of contract, standard conditions of contract and conditions of engagement, contract administration, professional presentation.

Credit Points: 6  Contact Hours: 2 per week

LPP209 ECOSYSTEMS
Offered: Autumn
The study of small to medium scale ecosystems, including plant-soil relationships, structure and function of natural communities, evolutionary and ecological processes, analysis and interpretation of natural indicators. Study of local ecosystems, their composition (identification of species), dynamics, and responses to pressures.

Credit Points: 3  Contact Hours: 1 per week

LPP210 LANDSCAPE MANAGEMENT A
Offered: Spring

Credit Points: 9  Contact Hours: 4 per week
LPP211 LANDSCAPE MANAGEMENT B
Offered: Autumn
The relationship between management and construction. Management created/dependant landscapes and construction created landscapes. Specifying and programming both construction and management as part of design implementation. Monitoring. The role of horticultural, agricultural and environmental sciences; specialisations and appropriate case studies. Horticulture, urban horticulture, arboriculture, plant-scapcs. Bushland management (including the Bradley method), regeneration, and monitoring. Catchment and watercourse management, embankment and stabilisation. Coastal management and monitoring, particularly in use areas.
Credit Points: 10 Contact Hours: 4 per week

LPP212 ADVANCED GRAPHICS
Offered: Autumn
Applications of larger format design presentation; case studies and examples; advanced colour techniques; relating verbal and visual material; relating design concepts to visual themes.
Credit Points: 4 Contact Hours: 2 per week

LPP213 ADVANCED LANDSCAPE CONSTRUCTION
Offered: Autumn
Introduction to theory and techniques of a range of types of landscape construction including platforms, land stability and stabilisation, clearing and demolition, earth dams, lakes and flood levees, broadscale stormwater drainage and control, sports facilities and swimming pools, irrigation systems. Introduction to the types of documentation used for the implementation of landscape works including working drawings, specifications, bills and schedules of quantities and methods of production. Students will be required to produce a set of working drawings and specification of a competent standard for inclusion in their personal portfolios.
Credit Points: 9 Contact Hours: 3 per week

LPP214 LANDSCAPE ENGINEERING
Offered: Spring
Common philosophies of civil engineering designs; site influences on structural form; residential sub-divisions - structural and engineering design, services, design standards, controls; major road systems - hierarchy, route selection, design parameters, noise constraints, associated structures/facilities; waste disposal - land fill; large dams, canals, marinas, coastal development - engineering constraints, design parameters, standards, erosion control methods; airfields, power reticulation - controlling authorities and legislation.
Credit Points: 4 Contact Hours: 2 per week

LPP215 DEPARTMENTAL FIELD TRIP
Offered: Autumn, Spring
The Field Trip will be a 7-10 day organised trip either interstate or in Queensland away from Brisbane. Environments may be natural, rural, or urban and the work and issues for discussion may relate to any or all of these. Current projects and complexity, areas of work, or contextual issues not able to be experienced locally will form the major thrust of the Field Trip.
Credit Points: 2

LPP401 RURAL LAND USE & PLANNING
Offered: Autumn
Credit Points: 3 Contact Hours: 1 per week

LPP402 SOCIAL PLANNING
Offered: Spring
The genesis of social welfare policies in Australia - employment, health, housing, income and education. The aims and conduct of social surveys. Community development and organisation schemes in Australia and overseas. Public participation and community action; planning aid and advocacy planning.
Credit Points: 4 Contact Hours: 1 per week

LPP403 INTRODUCTION TO PLANNING PROCESSES
Offered: Autumn
Credit Points: 6 Contact Hours: 2 per week

LPP404 INTRODUCTION TO THEORIES OF PLANNING
Offered: Autumn
Ideas and theories in planning; theory as a basis for practice. The political and philosophical determinants of land use planning. Values in planning, models of human nature and planning's relationship to important value traditions: liberalism, utilitarianism, empiricism, idealism, socialism, conservatism. The concepts of the public interest, social justice and public intervention.
Credit Points: 6 Contact Hours: 2 per week

LPP405 PROCEDURAL PLANNING THEORY
Offered: Spring
Theory, explanation and prescription and the development of planning and decision theory; comprehensive planning and incrementalism, flexibility and commitment, the management of uncertainty, levels of decision making - the concept of mixed scanning, strategic and local planning, 'procedural' planning theory and recent critiques.
Credit Points: 4 Contact Hours: 1 per week

LPP406 PROFESSIONAL PROCEDURES & ETHICS
Offered: Spring
The nature and role of a profession and professionalisation. Codes of practice and ethics. The role of the expert witness. Situations of professional conflict. The role of the professional planner in public and private practice. Office practice and procedures setting up an office, filing, costing, control systems, preparation of briefs, estimating.
Credit Points: 4 Contact Hours: 1 per week

LPP407 URBAN POLICY PROCESSES
Offered: Autumn
Models of public decision-making: rational, incremental, bureaucratic, etc. The roles of political,
administrative and private actors in public policymaking. Organisational and inter-organisational theory, including theory of bureaucracy, organisational structure and change, inter-organisational decision-making. Ways of improving urban policy making at the organisational and inter-organisational level: corporate planning, PPBS, management by objectives, strategic choice, etc.

Credit Points: 6 Contact Hours: 2 per week

LPP408 SOCIAL & POLITICAL STRUCTURES
Offered: Autumn
The focus and exercise of power in society; analysis of modern industrial societies, with particular reference to Australia; structure of society, family, political groups, ethnic groups, alternative societies, etc.; relevance to and implications for statutory planning.
Credit Points: 3 Contact Hours: 1 per week

LPP411 PLANNING PRACTICE & LAW (URBAN)
Offered: Autumn
This subject takes the form of a problem solving group project set in an inner metropolitan or small town location, often undertaken in conjunction with local communities and councils. In the course of the project, which is accompanied by a series of lectures, the student group formulates policies and strategies relating to a specific urban area. Topics discussed include the statutory basis for urban planning and development in Queensland, including land use allocation, zoning, development control, statutory and non-statutory plans, consultation and participation, and the sources and use of statistical and other data relevant to urban planning.
Credit Points: 14 Contact Hours: 4 per week

LPP412 PLANNING PRACTICE & LAW (REGIONAL & STRATEGIC)
Offered: Spring
The regional concept and its relevance to planning; aims of regional and strategic planning, e.g. integration of urban and rural development, reduction of regional disparities, resource development; statutory basis of strategic planning; the case of Queensland. Strategy and policy formulation in a group project relating to a specific region.
Credit Points: 14 Contact Hours: 4 per week

LPP413 ADVANCED URBAN STRUCTURE
Offered: Autumn
Critique of models of urban land use; justice, equality and welfare in the urban context; marginalisation and polarisation of groups within society; issues related to the problems and requirements of groups such as women, children, the aged, disabled, ethnic minorities, and access to housing, transport, etc.; relevance to and implications for planners.
Credit Points: 3 Contact Hours: 1 per week

LPP414 RESOURCE MANAGEMENT
Offered: Autumn
Credit Points: 6 Contact Hours: 2 per week

LPP415 RESEARCH METHODS & INDIVIDUAL PROJECT
Offered: Spring
The place of objectives in research method; delimitation of areas of concern; structuring the research program; identification of primary and secondary sources; purposes and limitations of analysis; inference, uncertainty and exclusion of false conclusions; selection and adaptation of techniques. Preparation of an individual research study 10-12,000 words in length (or equivalent).
Credit Points: 10 Contact Hours: 2 per week

LPP416 URBAN POLICY IMPLEMENTATION
Offered: Spring
Overview of the roles of the three levels of government in Australia as they impact on urban policy making and implementation. Statutory Authorities. The roles of the private sector, through pressure groups, development proposals and the like. Implementation and evaluation in the urban planning process. The general problems of change, implementation and evaluation: motivation, conflict, coordination, flexibility, information, resources, etc. Development of skills for improving the implementation of urban policies, including conflict resolution and negotiation skills. As far as possible material will be linked to case studies.
Credit Points: 4 Contact Hours: 1 per week

LPP418 COMPUTER APPLICATIONS IN PLANNING
Offered: Spring
The course will deal with four main areas of computer usage in urban and regional planning. Information storage and retrieval: sources of information and data bases (census, local surveys, networked data bases, etc.). The use of information in decision-making. Manipulation of information by use of statistical packages (specifically SPSS & 1022) and Computer-aided Design & Drafting (CADD): the use of PALETTE and CDS on the QUT's facilities, including 'hands on' experience with drafting, digitising, etc. The specific use of Land Information Systems. Micro-computers: the use of APPLE and IBM PC. Applications of software, including graphics, data bases, mapping, business packages (possibly including spread-sheets and CPM as business aids). Planning techniques: will include the use of programmes developed in the Department and will be linked to material being taught in other current subjects in the course.
Credit Points: 8 Contact Hours: 2 per week

LPP420 DEPARTMENTAL FIELD TRIP & WORKSHOP
Offered: Autumn
One field course of approximately 7-10 days duration to provide a comparative dimension to students' studies and to develop skills in observation, data collection, recording and interpretation.
Credit Points: 4 Contact Hours: 7-10 days

LPP501 THEORY OF SITE PLANNING
Offered: Autumn
Exploration of open space theory at regional and local scales; definition of spatial characteristics by edges, nodes, landmarks, districts, and paths. Sense of place: structure and form; legibility; imageability; etc; human responses and expectations and their effects on site planning decisions.
Credit Points: 2 Contact Hours: 1 per week
LPP502 SITE PLANNING TECHNIQUES
Offered: Spring
Introduction to the processes of site planning and detailed site design that lead to defensible and accountable solutions; role and objectives of survey and analysis phases; types of information required and the methods of processing the resultant data; data analysis, its scope and documentation; the use of data analysis to generate and evaluate possible problem solutions in conceptual form as a basis for strategic and master planning and the value of these processes as a long term mechanism for adaptation of master planning to meet changing needs.
Credit Points: 10 Contact Hours: 3 per week

LPP503 HISTORY OF LANDSCAPE DESIGN
Offered: Spring
The form and content, influencing factors, and implication of the creation and development of historically, regionally, and religiously significant consciously designed landscape throughout the world; the evolutionary processes in development of cultural landscapes.
Credit Points: 2 Contact Hours: 1 per week

LPP504 PLANTING DESIGN
Offered: Spring
Design characteristics and criteria. The use of plants as structural and design elements within landscape. Principles of planting design. Scale. Design for change, growth, replacement, and maintenance. Planting design in typical schemes such as streets, highways, parks, urban forecourts and interior plantscapes, gardens, and broadscale regeneration and stabilisation.
Credit Points: 3 Contact Hours: 1 per week

LPP505 CONSERVATION THEORY
Offered: Spring
Credit Points: 3 Contact Hours: 1 per week

LPP506 - USER & CHARACTER DESIGN STUDIES
Offered: Autumn
The first project will be concerned with user behaviour and requirements using two or three city centre pedestrian spaces. The second project uses the same locations to analyse the spaces in the light of both their own inherent characters and the user needs and responses defined earlier. As an introduction to the concept of abstraction, a final project may be held consisting of individuals or small groups of students making sculptures or models expressing the spirit of the places studied earlier in the semester.
Credit Points: 10 Contact Hours: 3 per week

LPP507 SITE PLANNING
Offered: Spring
Application of site planning principles and theory at all scales and types of projects; site utilisation and selection; application of site survey and analysis techniques; natural and man-made influences in physical design; environmental and social implications of design decisions; siting and integrating activities, structures, and services; land form manipulation. Emphasis will be given to alternative concept formulation and evaluation as a critical decision-making phase of the design process.
Credit Points: 10 Contact Hours: 3 per week

LPP508 INTRODUCTION TO PRACTICE
Offered: Autumn
The concept of professionalism and contemporary social expectations of the environmental design professions. Current issues and controversies in environmental design and planning in Australia. Roles, ranges of employment and activities within the profession. Organisation and activities of the professional Institute. The future directions, potentials, and opportunities. Introduction to the range of professions associated with Landscape Architecture. Introduction to the importance and techniques of CVs and portfolios.
Credit Points: 4 Contact Hours: 2 per week

LPP509 QUANTITIES & COSTS
Offered: Spring
Measurement and costing of time, resources, and materials for professional services, production of documents, and implementation of projects. The techniques and tools available for both preliminary and detailed measurement and costing and their control. Time and percentage measurement and costing related to the professional services. Costs of documents, including relative costs of different methods of production. Units of management and costing of broad development types and for more detailed landscape architectural and urban design projects. The techniques of cost control.
Credit Points: 2 Contact Hours: 1 per week

LPP510 INTRODUCTION TO LAW
Offered: Spring
Laws, regulations and their interpretation. A review of the Australian and Queensland acts, local authority by-laws and regulations of statutory authorities as they affect the built environment. Legal aspects of land and land transfer. Planning and land use regulations. Introduction to professional liability, design registration, and copyrights.
Credit Points: 2 Contact Hours: 1 per week

LPP511 - ENVIRONMENTAL PSYCHOLOGY
Offered: Autumn
The social and cultural development of Australian urban environments, with particular reference to the local built environment. The study of human functioning in urban environments. Theory: privacy, personal space, territoriality, environmental meaning and cognition, cognitive ways and wayfinding, intercultural and intracultural differences. Application via examination and analysis of an urban environment or an artefact with respect to its sociocultural function.
Credit Points: 4 Contact Hours: 2 per week

LPP512 PLANT RECOGNITION & REQUIREMENTS
Offered: Autumn
Field recognition by visual characteristics of size, form, texture and colour and by use of simple keys. Requirements of plants for growth in differing environments and the selection of species most suited to particular sets of environmental conditions. Basic botanical terms, plant nomenclature, collection and preservation of plant material, plant physiology and concepts of plant associations will be introduced.
Credit Points: 4 Contact Hours: 2 per week
The basic principles of ecosystems are introduced and the concepts of plant community - environmental associations are strengthened. Methods and techniques of vegetation mapping and classification are introduced including use of air photo and remote sensing skills introduced previously. Environmental needs of plants in diverse built environments and nurture production of these plants are explored.

Credit Points: 4  Contact Hours: 2 per week

LPP515 LAND USE GENERATION
Offered: Spring
Changing patterns of urban land use, medieval to industrial revolution; segregation of land uses in planned settlements of the twentieth century; planning for urban diversity; the logic of design - from values through activities to land uses; the formation of value systems; analysis and projection of activity systems; electronic communications, urban decentralisation, and emerging settlement patterns in the western world.

Credit Points: 6  Contact Hours: 2 per week

LPP516 VISUAL COMMUNICATION - GRAPHICS
Offered: Autumn
Studio sessions focus on lettering, layout, and visual themes in display communication. Scale, emphasis, readability, and organisation of various types of information (photos, diagrams, text, sketches, plans, etc.)

Credit Points: 4  Contact Hours: 2 per week

LPP517 ORAL COMMUNICATION SKILLS
Offered: Autumn
Formal oral communication techniques including meetings, conferences, interviews and speeches (informative and persuasive).

Credit Points: 2  Contact Hours: 1 per week

LPP518 REPORT PREPARATION
Offered: Autumn

Credit Points: 2  Contact Hours: 1 per week

LPP519 COMPUTER AIDED DATA ANALYSIS
Offered: Autumn
Students are introduced to the usefulness of the computer as a tool in landscape architecture and planning, and to the variety of areas where information systems and statistical analysis can assist decision-making. The subject will be orientated towards actual use of computers to ensure students experience all phases of the process (input, manipulation, output, analysis, and presentation).

Credit Points: 4  Contact Hours: 2 per week

LPP520 LANDSCAPE GRAPHICS
Offered: Spring
Combined application of freehand, drafting and colour techniques. The selection of colour, theme and emphasis in graphic packages. Realism, abstraction and symbolism in landscape communication. Monochromatic graphics for simple reproduction. Integration of various graphic techniques and media. Efficient processes for production and reproduction.

Credit Points: 4  Contact Hours: 2 per week

LPP521 MAP & AIR PHOTO INTERPRETATION
Offered: Autumn
Types, sources, uses, and availability of maps and air photos; map reading, understanding of contours, land forms, and use of sections; methods and techniques of map production; introduction to photogrammetry and use of stereoscopes; introduction to remote sensing.

Credit Points: 2  Contact Hours: 1 per week

LPP522 MEASUREMENT OF SITES
Offered: Autumn
Introduction to basic equipment for site measurement - levels, staffs, chains and tapes, prismatic compass, optical square, clinometer, range poles - and their uses in horizontal and vertical measurement. Introduction to recording of field data and the preparation of measured site drawings from recorded data.

Credit Points: 2  Contact Hours: 1 per week

LPP523 LANDSCAPE CONSTRUCTION
Offered: Autumn
Introduction to structures. Definition of terms; basic actions/reactions of beams, columns, slabs, structural units and types of structures; loadings and types (including wind loading). Development of understanding of the properties of common construction materials and their application in landscape construction; establishment of sound techniques of technical drawing in the preparation of construction documents. Topics covered include the common materials; an understanding of foundation soils; basic services of site stormwater drainage, water and electrical services; applied systems including paving, steps and ramps; and construction for planting and small water features.

Credit Points: 6  Contact Hours: 3 per week

LPP524 LAND GRADING
Offered: Spring
Manual techniques of land surface manipulation including the construction of platforms for building, carparks, sports ovals, and other; features and the associated provision of surface drainage.

Credit Points: 6  Contact Hours: 3 per week

LPP525 LAND USE GENERATION
Offered: Autumn
Changing patterns of urban land use, medieval to industrial revolution; segregation of land uses in planned settlements of the twentieth century; planning for urban diversity; the logic of design - from values through activities to land uses; the formation of value systems; analysis and projection of activity systems; electronic communications, urban
decentralisation, and emerging settlement patterns in the western world.
Credit Points: 4  Contact Hours: 2 per week

■ LPP552 INTRODUCTION TO GRAPHICS
Offered: Autumn
Freehand sketching of objects from observation, rendering textured surfaces, design development, understanding two-dimensional layout and competence in presentation of two-dimensional design in reports and drawings.
Credit Points: 4  Contact Hours: 2 per week

■ LPP553 SITE PLANNING DATA & TECHNIQUES
Offered: Autumn
Natural influences in physical planning - geology, climate, topography, hydrology, soils and vegetation etc. Ecological considerations in design and development processes. Impact of natural hazards and other physical constraints on design, including air, water, and noise pollution. Impacts of development on the natural environment. Landscape evaluation techniques.
Credit Points: 2  Contact Hours: 1 per week

■ LPP554 SITE PLANNING PRACTICE
Offered: Autumn
Layout of lots, buildings, roads and services; the retention of existing desirable features of the site; use of trees and other plant material; modification of land surface e.g. cut and fill; subdivision design; planning application and approval process.
Credit Points: 12  Contact Hours: 3 per week

■ LPP555 THEORY OF SITE PLANNING
Offered: Autumn
Exploration of open space theory at regional and local scales; definition of spatial characteristics by edges, nodes, landmarks, districts, and paths. Sense of place; structure and form; legibility; imageability etc.; human responses and expectations and their effects on site planning decisions.
Credit Points: 2  Contact Hours: 1 per week

■ LPP556 PROFESSIONAL COMMUNICATION
Credit Points: 4  Contact Hours: 2 per week

■ LPP557 TRANSPORT PLANNING
Offered: Spring
Movement and its alternative modes - foot, cycle, car, bus, train, plane, pipeline, inland waterway and marine modes. The origin and destination approach to traffic management and transportation. Inter-urban traffic and regional transport planning. This relationship between land use and traffic generation.
Credit Points: 4  Contact Hours: 2 per week

■ LPP558 POPULATION & URBAN STUDIES
Offered: Spring
Basic urban definitions, spread and characteristics of urbanisation, the structure of cities and the economic and social processes at work within cities, particular aspects such as housing and gentrification, basic concepts of population and demography, recent and historical analyses of the Australian population, familiarisation with the role of ABS and with statistical and data analysis of population, world demographic trends.
Credit Points: 5  Contact Hours: 3 per week

■ LPP559 APPLIED NATURAL SCIENCE
Offered: Spring
Applied studies in geology and geomorphology, climate and micro-climate, soils and hydrology, the broad soil and plant community associations. The influence of these systems collectively and separately on environmental design decisions.
Credit Points: 4  Contact Hours: 2 per week

■ LPP560 HISTORY OF PLANNING
Offered: Spring
The links between society, ideas and urban form. Urban evolution from ancient to modern times in Africa, Asia, Europe, America and Australia. The Industrial Revolution and its effect on urban form and on planning ideas. Australian urban history and the development of environmental management and town planning in Australia.
Credit Points: 2  Contact Hours: 1 per week

■ LPP561 INTRODUCTION TO URBAN DESIGN
Offered: Spring
Design method, visual thinking; principles of perception and spatial organisation; the vocabulary of design and urban imagery; design elements; the evolution of designer theory; techniques for analysing the quality of existing built environments; analysis of examples. Urban design project.
Credit Points: 10  Contact Hours: 2 per week

■ LPP562 ECONOMICS OF TOWN PLANNING
Offered: Autumn
Credit Points: 4  Contact Hours: 2 per week

■ LPP563 INTRODUCTION TO COMPUTERS
An overview of computers: their structure, development and uses in the modern world. Problems and advantages of computer use. Introduction to the 'hands on' experience in using QUT's computer facilities: the DEC-10, CADD/CAM, and micro-computers. Gaining access, file structures, information storage and retrieval, editing, and related utility functions. Introduction to flow-charting and programming logic. Simple programming exercises (in BASIC, FORTRAN and/or PASCAL). CADD in design, Word processing on micro-computers. As far as possible class sessions will include both teaching and 'hands on' tutorial experience.
Credit Points: 4  Contact Hours: 2 per week

■ LPP564 INTRODUCTION TO MAPS & AIR PHOTOS
Offered: Autumn
Types of maps, their uses and limitations. Orientation, scale, cartographic symbols, representation of relief
judiciary, the legal profession-and their working, and sustained as a result of a motor-vehicle collision, and others. The role of the private developer.

The purpose of the course is to introduce students to the doctrines and methodology of the Law, including the justifications for imposing punishment by the State, to aspects of the disposition of offenders in the sentencing part of a criminal trial, and to a consideration of imprisonment and release procedures.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB204 LEGAL RESEARCH & WRITING I
Offered: Full year
An introductory subject to teach students basic legal research methodology, and how to write assignments and solve legal problems. It includes a study of the hierarchy of the courts, the history of law reporting and the doctrine of precedent; how to use a law library effectively; and gives students practice in handling the most important research materials. An introduction to the use of computerised legal research also is included.

Credit Points: 4 per semester
Contact Hours: 1 per week

LPP565 URBAN LAND DEVELOPMENT
Offered: Spring
Structural and engineering design requirements in urban development - local physical services, roads and drainage, sewers, water, gas, electricity and Telecom services. Design and control systems, design standards, the effects of standardised requirements and alternative approaches. The roles of statutory authorities - gas, electricity, water, telephone, public transport, railways, waterways, road construction and rules. Development teams - the roles of associated disciplines - civil, municipal and transport engineers, earth and environmental scientist, and others. The role of the private developer.

Credit Points: 2
Contact Hours: 1 per week

LPP566 HOUSING & COMMUNITY SERVICES
Offered: Spring
Population, dwellings and households. Techniques of analysis and projection of housing stock. Housing conditions and preference surveys; housing issues and policies. The economics of the building and land development industries. The physical place of educational institutions in communities - schools, colleges, universities. Share use of facilities. Location and space standards. Social and welfare services and their role in the community. Planning and management aspects of welfare.

Credit Points: 4
Contact Hours: 1 per week

LWB104 INTRODUCTION TO LAW
Offered: Full year
The purpose of the course is to introduce students to the institutions of the law - the courts, Parliament, the judiciary, the legal profession - and their working, and the doctrines and methodology of the Law, including the doctrine of precedent and the principles of statutory interpretation.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB102 LAW OF CONTRACT
Offered: Full year
The substantive principles of contract law, as taught, include: definition of the Law of Contract, outline of remedies; formation of contract - agreement; contents of a contract express and implied terms; factors vitiating contracts; capacity to contract; privity of contract; discharge of contract; breach of contract; limitation of actions; quasi-contract; and basis of liability.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB103 TORTS
Offered: Full year
At its most general level this branch of the law is concerned with the question of compensation to be given by a person causing a loss to a person suffering a loss. Areas of everyday conflict which may be resolved by principles of tort liability include damage sustained as a result of a motor-vehicle collision, and injury to a person's reputation from publication of defamatory material. The rules are examined to ascertain whether they satisfy the critical test: functional adequacy in terms of contemporary values.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB201 LAND LAW
Offered: Full year
The principles relating to the law of Real Property in Queensland - the rights, interests and obligations which can exist in relation to land, and the methods of creating, enforcing, assigning and extinguishing such rights, interests and obligations. The course encompasses: the concept of real property; the doctrines of tenure and of estates; equitable interests; the Torrens system; easements; mortgages; leasehold interests; covenants affecting land; co-ownership; future interests and perpetuities; building units title and group title; time-sharing; and Crown leasehold.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB202 CRIMINAL LAW & PROCEDURE
Offered: Full year
The criminal law in force in Queensland, encompassing (inter alia) criminal responsibility, parties to offences, and major indictable offences. The wider context of the operation of the criminal law is considered, introducing students to penal principles and the justifications for imposing punishment by the State, to aspects of the disposition of offenders in the sentencing part of a criminal trial, and to a consideration of imprisonment and release procedures.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB203 CONSTITUTIONAL LAW
Offered: Full year
A study of the extent of power of the institutions which make, administer or apply the law - particularly important in a federation such as the Commonwealth of Australia. The federal constitution divides power between the State and Commonwealth governments, and between the legislative, executive and judicial branches of the Commonwealth government and actions which ignore those divisions can be challenged successfully in courts of law.

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB301 EQUITY
Offered: Full year
Equitable doctrines were developed to complement the sometimes inflexible rules of the common law. In Autumn Semester, students are introduced to basic equitable principles, including a study of equitable estates and interests. Unconscionable dealings are also studied in some detail. In Spring Semester, major areas of study include the law of trusts and equitable remedies (including some defences).

Credit Points: 12 per semester
Contact Hours: 3 per week

LWB302 FAMILY LAW
Offered: Autumn PT, Spring FT
An examination of the manner in which the law treats the special social relationships which exist among...
members of a family and transforms them into legal rights and duties. Subjects examined include the family as a legal phenomenon; annulment of marriages; dissolution of marriages; and consequences of separation and divorce.

Credit Points: 12 Contact Hours: 3 per week

■ LWB303 COMMERCIAL LAW

Offered: Full year

The legal rules which govern mercantile dealings in personal property. The course encompasses the legal framework, the various kinds of personal property recognised in the Australian legal system, and rules which especially affect commercial transactions. Matters considered in detail include: nature and sources of commercial law; personal property; negotiable instruments including bills of exchange and cheques; bailment; sale of goods; and consumer protection under the Trade Practices Act 1974.

Credit Points: 12 per semester

Contact Hours: 3 per week

■ LWB305 JURISPRUDENCE

Offered: Autumn FT, Spring PT

Jurisprudence (the 'philosophy of law' or 'legal theory') involves the application of insights gained from philosophy - in particular, from logic and from moral, political and social philosophy - to the study of law. The course includes the following topics: historical background to modern theories, sociological and historical descriptions of law and legal change, and theories of limited or unlimited government power, of recognition of valid law and legal systems, of legal reasoning, and of the proper objects of law and the proper direction of legal change.

Credit Points: 12 Contact Hours: 3 per week

■ LWB306 LOCAL GOVERNMENT LAW

Offered: Autumn FT, Spring PT

The course considers the source of legal authority for the government of cities, towns and shires, with particular reference to the City of Brisbane; the laws relating to town planning and subdivision, including the principles applicable to the rezoning of land; uses of land; the control of developments by local authorities; rights to object to developments; the control exercised over subdivision of land by local authorities; rights of appeal from local authority decisions; and the structure, purpose and procedure of the Local Government Court.

Credit Points: 8 Contact Hours: 2 per week

■ LWB307 INSOLVENCY LAW

Offered: Autumn FT, Spring PT

The course consists of two parts. The first deals with the insolvency of individuals and involves a study of the Bankruptcy Act 1966 (Cth). The second part of the course covers winding up of companies, procedures other than winding up which may be open to an insolvent company, and the law relating to receivership of an insolvent company's assets - this includes a consideration of the relevant provisions of the Companies (Queensland) Code.

Credit Points: 8 Contact Hours: 2 per week

■ LWB308 INDUSTRIAL LAW

Offered: Autumn FT, Spring PT

The Industrial Law course examines the rights and duties of employers and employees under the law of employment, breach of these duties, and the remedies of both parties; a worker's entitlement to workers compensation, and the benefits available; the law governing the operation of trade unions and the rights of members; and settlement of industrial disputes in the Commonwealth and State spheres by conciliation and arbitration.

Credit Points: 8 Contact Hours: 2 per week

■ LWB309 SUCCESION

Offered: Autumn FT, Spring FT

Intestate and testate succession; definitions; joint and mutual wills; formal requirements for execution of valid will; alteration, revocation and revival of wills; administration of assets - duties, powers, rights and liabilities of personal representatives; family maintenance provisions - power of court to vary a will.

Credit Points: 8 Contact Hours: 2 per week

■ LWB311 ADMINISTRATIVE LAW

Offered: Full year

An examination of the basis on which the courts review both administrative action taken by governments and delegated legislation, and of the remedies available and restrictions on judicial review. The alternative means of review (the Ombudsman and the Administrative Appeals Tribunal) and access to government information are examined also. The special position of the Crown and the question of government liability in contract and tort are considered.

Credit Points: 12 per semester

Contact Hours: 3 per week

■ LWB312 LAND CONTRACTS

Offered: Autumn PT, Spring FT

This course examines in detail the principles involved in the construction of Contracts for the sale of land, with special emphasis upon the current standard REIQ Contract in use in Queensland. Special consideration is given to statutory requirements as they affect such contracts, including those relating to building units and group titles conveyancing.

Credit Points: 12 Contact Hours: 3 per week

■ LWB401 COMPANY LAW & PARTNERSHIP

Offered: Full year

Company Law dominates the course and is mostly concerned with registered companies. The law relating to proprietary companies is dealt with fully, that relating to public companies in outline only. Topics dealt with include: nature of registered companies, including procedure to obtain registration, and classification of registered companies; prospectuses; general meetings; enforcement of directors' and controlling members' duties; shares, share capital and dividends; and winding-up.

Credit Points: 12 per semester

Contact Hours: 3 per week

■ LWB402 EVIDENCE

Offered: Autumn FT, Spring PT

The rules and principles that relate to the presentation and proof of facts to a Court of Law. Litigation largely involves the application of substantive law to the facts that are determined according to the rules of evidence - students' knowledge of the substantive law is assumed. In addition to the technical rules that are considered during the course, students are encouraged to view the principles in the context of the adversary system and to recognise the problems of applying rigid rules within that system.

Credit Points: 12 Contact Hours: 3 per week
LWB403 TAXATION LAW  
Offered: Full year  
The course examines two revenue-raising statutes - the Income Tax Assessment Act 1936 (CTh) and the Stamp Act 1894 (Qld). Matters dealt with in income tax include the administrative structure and scheme of the Act, residence of taxpayers, determining assessable income and deductions, taxation of partnerships, trusts and companies, capital gains tax, and tax planning. Stamp duty covers assessment of duty on common instruments such as leases, mortgages, trusts and conveyances.  
Credit Points: 12 per semester  
Contact Hours: 3 per week

LWB404 CIVIL PROCEDURE  
Offered: Full year  
The procedure by which Courts resolve civil disputes. The course emphasises (but is not restricted to) the practice in the Supreme Court of Queensland, covering the rules of that Court and principles of law arising from them. Topics studied include commencement of proceedings, interlocutory applications, costs, appeals and execution of orders and judgements. The course is relevant to anyone dealing with jurisdictions based on the Judicature system.  
Credit Points: 8 per semester  
Contact Hours: 2 per week

LWB405 SOLICITORS' TRUST ACCOUNTS  
Offered: Autumn FT, Spring PT  
A practical study of accounting for trust funds covering: trust accounts requirements - commencing a trust account, the format of prime documentation and records, receipts and payments, the books of account, bank and cashbook reconciliations, investments, trust ledger accounts and trial balance; the auditor's role and audit requirements; and accounting for the Queensland Law Society Deposit.  
Credit Points: 8  
Contact Hours: 2 per week

LWB406 PUBLIC INTERNATIONAL LAW  
Offered: Autumn PT, Spring FT  
Basically, the rules which govern the activities of States between themselves (e.g. rules for treaty-making). The ambit of this area of law extends to rules for the running of international organisations such as the UN, and rules of conduct between such organisations and States. The course includes such topics as: treatment of the Australian Aboriginal; Australia's maritime territory; uranium mining and export; the legality of secession of Queensland from the Commonwealth of Australia; and the Namibia dispute.  
Credit Points: 12  
Contact Hours: 3 per week

LWB407 CONFLICT OF LAWS  
Offered: Autumn PT, Spring FT  
An in-depth analysis of the body of law governing the resolution of private legal problems with a significant foreign element. It includes: jurisdiction of domestic courts to determine matters having a foreign element; enforcement of foreign judgments in the domestic jurisdiction; choice of law for the resolution of the dispute - both generally and in relation to family law, contract, tort, property and succession.  
Credit Points: 12  
Contact Hours: 3 per week

LWB409 PROFESSIONAL CONDUCT  
Offered: Spring FT and PT  
All LLB students, whether they intend to become barristers or solicitors, must study both parts of this subject. Barristers - Lectures cover conduct and etiquette at the Bar, and deal specifically with the character of practice at the Bar; regulation of practice at the Bar in Queensland; and the respective duties of Barristers to the Law, the Court, the public, the client and the opponent. Solicitors - Matters dealt with include professional courtesies, division of the profession in Queensland, the Statutory Committee, malpractice, professional conduct, duties of a solicitor, respective functions of barristers and solicitors, a solicitor acting for more than one party, advertising fees, trust accounts and legal professional negligence.  
Credit Points: 2  
Contact Hours: 2 per week for 5 weeks (10 hours)

LWB410 TRADE PRACTICES LAW  
Offered: Autumn PT, Spring FT  
This elective course deals with the law established by the Trade Practices Act 1974 (CTh), as amended, and related State Laws. The course studies: background to, and need for, the legislation; constitutional basis of the Commonwealth Act; administrative arrangements and enforcement procedures; control of 'restrictive' practices; prohibition of 'unfair' practices; and jurisdictional problems and remedies.  
Credit Points: 12  
Contact Hours: 3 per week

LWB412 RESEARCH & WRITING PROJECT  
Offered: Autumn and Spring, FT and PT  
An arranged and supervised piece of research into some area of legal knowledge, and the writing of a paper of between 10,000 and 15,000 words on the results of the research and conclusions drawn therefrom. The paper will be the property of the Faculty of Law and may be placed in the Law Library. A student wishing to undertake the Research and Writing Project should discuss the matter as early as possible in the semester immediately before that in which he/she proposes to undertake it. The written proposal must reach the Dean at least two clear weeks before the beginning of the teaching semester in which the project will be undertaken, and the proposal will be accepted or refused - and the student notified accordingly - not later than the first day of that teaching semester.  
Credit Points: 12

LWB414 DRAFTING & LEGAL TRANSACTIONS  
Offered: Full Year  
A study of the general principles of drafting and analysis of instruments commonly used in practice including deeds, special conditions in Torrens Title conveyancing contracts, options to purchase and renew, Land Act contracts, and business contracts and leases. The course includes an introductory study of stamp duty and its applications, and an examination of securities and trust instruments. Drafting covers mortgages, unit trusts and discretionary trusts, together with stamp duty implications.  
Credit Points: 8 per semester  
Contact Hours: 2 per week

LWB415 LEGAL RESEARCH & WRITING II  
Offered: Full year  
This advanced subject revises, extends and tests students' legal research skills acquired in the introductory subject. Sources from other jurisdictions such as the UK, Canada, New Zealand and the USA are included. An important section of this subject is the researching/writing of an assignment based on a problem which involves a number of subjects studied...
during the LLB course, including researching recent developments in the law in those areas.

Credit Points: 4 per semester
Contact Hours: 1 per week.

LWB480 MEDIA LAW
Offered: Autumn PT; Spring FT
The laws which shape the news media, their industry structure and their message content. Topics include journalists and their sources of information, defamation, contempt, confidential information, access to information, the Broadcasting Tribunal, and regulation of advertising and of ownership.
Credit Points: 12 Contact Hours: 3 per week

LWB481 MINERAL LAW
Offered: Autumn PT, Spring FT
Predominantly, the law governing and affecting the mining of ‘hard’ minerals. The course begins with a short explanation of basic concepts, and then analyses mining legislation - with particular emphasis on Queensland legislation - and other legislation which has an impact on mining. The structure of mining ventures is also considered. Specific topics considered include: ownership of minerals; State agreements; securities; mining on private land; administration of mining legislation; Warden’s Court; and environment protection legislation.
Credit Points: 12 Contact Hours: 3 per week

LWB482 COMPUTERS & THE LAW
Offered: Autumn PT, Spring FT
Computers and their impact upon the law including: use of computers in the individual legal practice; computerisation of the Titles Office, Companies Register, Parliamentary Drafting, Government Printer, Supreme Court; computer contracts; computer records as evidence; and implications of data storage for privacy, and freedom of information. The course includes instruction in the use of Computerised Legal Information Retrieval System (CLIRS).
Credit Points: 12 Contact Hours: 3 per week

LWN001 ADVANCED COMPANY LAW
Offered: Full Year
The first part of this course considers the Companies (Acquisition of Shares) Code which regulates acquisition of shares affecting a change in a company’s control. The second part of the course considers the law of company liquidations; emphasis is given to a creditor’s application for a winding-up order, and effects of a winding-up and duties/powers/rights of liquidators are also considered.
Prerequisite: LWB401 or equivalent
Credit Points: 10 per semester
Contact Hours: 2 per week

LWN005 TRADE PRACTICES & CONSUMER PROTECTION
Offered: Full year
This course studies various aspects of the current Australian Trade Practices Act 1974, not only from a purely professional viewpoint but also from a wider viewpoint of the policy issues involved. No knowledge of economics is required, although some readings will be drawn from economics. Topics dealt with include: the common law doctrine of restraint of trade; the economics of competition; markets, competition and market power; mergers; price fixing; misleading and deceptive conduct in general, and specifically; enforcement, remedies and authorisations under the Act.
Credit Points: 10 per semester
Contact Hours: 2 per week

LWN007 COMMERCIAL ARBITRATION
Offered: Full Year
Commercial arbitration - Australian and international. Course content includes: nature and conduct of arbitration proceedings, court control of arbitration, awards and their enforcement, and international commercial arbitration.
Credit Points: 10 per semester
Contact Hours: 2 per week

LWN008 COMMERCIAL LEASES
Offered: Full Year
A detailed examination of the standard clauses of a modern commercial lease in the light of recent case law and Queensland statutory provisions affecting those interests. Included are several sessions from specialist practitioners on drafting techniques and registration practice.
Credit Points: 10 per semester
Contact Hours: 2 per week

LWN011 LITIGATION
Offered: Full Year
Successful litigation is a product of both favourable substantive law rights and a thorough knowledge and application of the rules of procedure and evidence. The course examines current issues in the litigation process which present interest or difficulty in legal practice. The emphasis is on procedure and evidence in the Supreme Court of Queensland, although other jurisdictions are considered.
Credit Points: 10 per semester
Contact Hours: 2 per week

LWN013 COMMERCIAL REMEDIES
Offered: Full Year
The main emphasis is on study of judicial remedies in civil actions relating to commercial transactions. The course initially discusses the theory and function of such remedies, and then considers in detail remedies such as damages, equitable remedies, restitutory claims, and some statutory remedies. A knowledge of the substantive law giving rise to the existence of a right to seek a remedy is assumed, and the focus is on the process of selecting remedies to best enforce the particular right.
Credit Points: 10 per semester
Contact Hours: 2 per week

LWS001 MEDICINE & THE LAW
This subject seeks to teach students to appreciate the impact of some important fields of law upon the medical profession and upon hospital staff, patients and visitors. Introduction to law and the legal system. The Federal and State systems; General principles of the law of tort. Principles of negligence. Trespass. Liability of hospitals. Industrial law and industrial relations. Workers’ compensation. Legal aspects of medical practice. Medico-legal investigations. Medical ethics. A consideration of emerging legal issues surrounding surrogate motherhood and test-tube babies. Relevant Commonwealth and Queensland legislation and regulations will be introduced and court decisions will be studied.
Credit Points: 12 Contact Hours: 3 per week

MAA251 STATISTICS & DATA PROCESSING
Offered: Spring
A basic subject in statistics, including statistical terminology and organisation of data, elementary probability, binomial and normal distribution, sampling theory, regression and correlation.
Prerequisite: Approval of Head of School of Mechanical and Manufacturing Engineering
Credit Points: 8 Contact Hours: 2 per week
MAB001 MATHEMATICS FOR SCIENCE & TECHNOLOGY
Offered: Summer Term
Data handling; algebra; analytical geometry; trigonometry and calculus; vectors; complex numbers.
Credit Points: 6
Contact Hours: 21 per week over four weeks
Note: This subject is not compatible with MAB201 + MAB204; credit may not be retained for more than one of these subjects.

MAB151 QUANTITATIVE TECHNIQUES
Offered: Autumn
A basic mathematics unit with emphasis on the interpretation of data and the application of numerical techniques.
Credit Points: 4 Contact Hours: 2 per week

MAB173 QUANTITATIVE METHODS
To enable students to use mathematical reasoning and skills to obtain solutions to financial, economic and general business problems. On completion, students should have an understanding of the types of problems amenable to a mathematical solution; they should be able to develop appropriate mathematical models and appreciate any limitations or assumptions in the models and in addition they should be able to obtain solutions to these models.
Credit Points: 12 Contact Hours: 3 per week

MAB193 ENGINEERING MATHEMATICS I
Offered: Full year
Accuracy, relative and absolute errors; solution of systems of linear equations, determinants; vectors; complex numbers; elementary matrix algebra; differential and integral calculus of one variable, elementary multiple integrals; centre of gravity and moment of inertia.
Credit Points: 6 Contact Hours: 3 per week

MAB199 SURVEY MATHEMATICS I
Offered: Autumn
Calculus: differentiation, partial differentiation, complex numbers, sequences and series, integration, applications. Matrix algebra; basic operations, linear equations, inversion, determinants, Cramer’s rule, Coordinate geometry. Statistics.
Credit Points: 12 Contact Hours: 6 per week

MAB211 MATHEMATICS I A
Offered: Autumn, Spring
Elementary functions; differentiation; integration; matrices.
Credit Points: 8 Contact Hours: 3 per week

MAB216 DISCRETE MATHEMATICS
Offered: Autumn
Automatic systems; modular arithmetic; finite groups; elementary number theory.
Co-requisite: MAB211
Credit Points: 8 Contact Hours: 3 per week
Note: This subject is not compatible with MAB409; credit may not be retained for both.

MAB224 MATHEMATICS I B
Offered: Autumn, Spring
Integration; elementary ordinary differential equations; partial differentiation; analytic geometry.
Prerequisite: MAB211
Credit Points: 8 Contact Hours: 3 per week

MAB225 MATHEMATICS IC
Offered: Spring
Introduction to vector algebra, complex numbers and in finite series.
Prerequisite: MAB211 Co-requisite: MAB224
Credit Points: 8 Contact Hours: 3 per week

MAB226 MATHEMATICS ID
Offered: Spring
Limits and continuity, vector geometry; curve sketching.
Prerequisite: MAB211
Co-requisites: MAB224 + MAB225
Credit Points: 8 Contact Hours: 3 per week

MAB227 STATISTICS
Offered: Autumn, Spring
Data handling; probability; sampling; estimation; tests of hypothesis; regression and correlation; experimental design.
Prerequisite: MAB211
Credit Points: 8 Contact Hours: 3 per week

MAB301 CALCULUS & ANALYSIS A
Offered: Autumn, Spring
Real valued functions; differentiation; introduction to partial differentiation; integration; techniques of integration; elementary special functions.
Credit Points: 10 Contact Hours: 3 per week

MAB302 CALCULUS & ANALYSIS B
Offered: Autumn, Spring
Infinite series; improper integrals; complex numbers; functions of complex variables, analyticity; introduction to differential equations.
Prerequisite: MAB301
Credit Points: 10 Contact Hours: 3 per week

MAB309 MODERN ALGEBRA
Offered: Autumn, Spring
Set theory; relations and functions; binary operations; number theory; group theory; rings and fields.
Credit Points: 10 Contact Hours: 3 per week
Note: This subject is not compatible with MAB205; credit may not be retained for both.

MAB310 LINEAR ALGEBRA
Offered: Autumn, Spring
Matrices; vector spaces; linear transformations; eigenvalues and eigenvectors. Euclidean spaces; quadratic forms.
Credit Points: 10 Contact Hours: 3 per week
Note: This subject is not compatible with MAB406; credit may not be retained for both.

MAB317 MATHEMATICAL STATISTICS I
Offered: Autumn, Spring
Collection and representation of data, parameters and statistics; introduction to the theory of probability and probability distributions; elementary treatment of sampling theory leading to the normal, t, F and chi-squared distributions; statistical estimation and tests of hypotheses based on the normal, t, F and chi-squared distributions.
Co-requisite: MAB301
Credit Points: 10 Contact Hours: 3 per week

MAB318 MATHEMATICAL STATISTICS IIIA
Offered: Autumn, Spring
Introduction to quality control, introduction to non-parametric tests of hypotheses; simple linear regression and introduction to multiple linear regression; correlation; fundamentals of one factor and two factor experimental design and the analysis of variance.
Prerequisites: MAB301, MAB317
Credit Points: 10 Contact Hours: 3 per week
MAB331 INTRODUCTORY VECTOR ANALYSIS
Offered: Autumn, Spring
Introduction to determinants; addition and subtraction of vectors; vector products, physical and geometrical applications; differential geometry of curves; conic sections; kinematics of a particle; relative motion.
Credit Points: 10  Contact Hours: 3 per week

MAB342 MATHEMATICS OF FINANCE
Offered: Autumn, Spring
Interest rates; solution of problems in compound interest; annuities; applications of annuities; capital redemption policies; valuation of securities; effects of taxation; introduction to basic modelling techniques.
Credit Points: 10  Contact Hours: 3 per week
Note: This subject is not compatible with MAB40; credit may not be retained for both.

MAB409 MODERN ALGEBRA
Offered: Autumn, Spring
Set theory, relations and functions, binary operations, number theory, group theory; rings and fields.
Prerequisite: MAB211
Credit Points: 10  Contact Hours: 3 per week
Note: This subject is not compatible with MAB216; credit may not be retained for both.

MAB410 LINEAR ALGEBRA
Offered: Autumn, Spring
Matrices; vector spaces; linear transformations; eigenvalues and eigenvectors; Euclidean spaces; quadratic forms.
Prerequisite: MAB225
Credit Points: 10  Contact Hours: 3 per week

MAB411 MATHEMATICS IIA
Offered: Autumn
Laplace transforms; ordinary differential equations; multivariable calculus.
Prerequisite: MAB225
Credit Points: 10  Contact Hours: 3 per week

MAB412 MATHEMATICS IIB
Offered: Autumn
Fourier series; partial differential equations; vector analysis.
Co-requisite: 412 Credit Points: 10  Contact Hours: 3 per week

MAB417 MATHEMATICAL STATISTICS A
Offered: Autumn, Spring
Collection and representation of data, parameters and statistics; introduction to the theory of probability and probability distributions; elementary treatment of sampling theory leading to the normal, t, F and chi-squared distributions; statistical estimation and tests of hypotheses based on the normal, t, F and chi-squared distributions.
Prerequisite: MAB224
Credit Points: 10  Contact Hours: 3 per week

MAB418 MATHEMATICAL STATISTICS B
Offered: Autumn, Spring
Introduction to quality control; non-parametric tests of hypothesis; simple linear regression and introduction to multiple linear regression, correlation; fundamentals of one factor and two factor experimental design and the analysis of variance.
Prerequisite: MAB417
Credit Points: 10  Contact Hours: 3 per week
* See note page 374.

MAB425 MATHEMATICS 2C
Offered: Spring
Partial differentiation, complex analysis, differential equations; special functions.
Prerequisite: MAB411
Credit Points: 10  Contact Hours: 3 per week

MAB442 FINANCIAL MATHEMATICS
Offered: Autumn, Spring
Interest rates, solution of problems in compound interest, annuities and applications; capital redemption policies; valuation of securities; effects of taxation; introduction to basic modelling techniques.
Prerequisite: MAB411
Credit Points: 10  Contact Hours: 3 per week

MAB493 ENGINEERING MATHEMATICS II
Offered: Full Year
Solution of systems of linear equations by direct and iterative methods, rank of a matrix; representation of a function by Taylor series, Maclaurin series, Fourier series; finite differences, polynomial interpolation, Newton-Gregory interpolation formula; solution of first and second order differential equations, operator-D and Laplace transform methods. Taylor series and Runge-Kutta techniques; basic descriptive statistics, probability theorems, distributions.
Prerequisite: MAB193
Credit Points: 6  Contact Hours: 3 per week

MAB495 SURVEY MATHEMATICS II
Offered: Spring
Prerequisite: MAB199
Credit Points: 12  Contact Hours: 6 per week

MAB499 BASIC STATISTICS FOR SURVEYORS
Offered: Spring
Descriptive statistics, frequency distributions and their graphical representation, probability, sampling, estimation, tests of hypothesis, regression and correlation.
Prerequisite: MAB199 (R)*
Credit Points: 5  Contact Hours: 2 per week

MAB601 MULTIVARIABLE CALCULUS A
Offered: Autumn, Spring
Differentiation, extrema, double integrals, triple integrals, surface integrals, complex integration.
Prerequisites: MAB301 + MAB302 + MAB331
Credit Points: 10  Contact Hours: 3 per week

MAB602 MULTIVARIABLE CALCULUS C
Offered: Spring
Vector algebra; scalar and vector fields; line integrals; surface integrals; differential field operators; the integral properties of fields; curvilinear coordinates; application to potential theory, hydrodynamic theory and electromagnetic theory; calculus of variations, functionals; Euler's differential equation; variational problems with subsidiary conditions.
Prerequisite: MAB331
Credit Points: 10  Contact Hours: 3 per week

MAB608 MATHEMATICAL STATISTICS IIB
Offered: Autumn, Spring
Properties and uses of the beta, gamma and exponential probability distribution; introduction to bivariate and multivariate distribution theory; multiple and curvilinear regression theory; three factor, factorial and fractional factorial experimental designs.
Prerequisite: MAB318 Co-requisite: MAB601
Credit Points: 10  Contact Hours: 3 per week
MAB610 APPLIED LINEAR ALGEBRA
Offered: Spring
Vector spaces and matrices; vector and matrix norms; discrete Markov chains with a finite number of states; vector spaces over finite fields; quadratic forms, least square solution of linear equations; random vectors and matrices.
Prerequisite: MAB310 Co-requisite: MAB612
Credit Points: 10 Contact Hours: 3 per week

MAB612 DIFFERENTIAL EQUATIONS
Offered: Autumn, Spring
Vector spaces with inner product; linear operators in finite dimensional spaces; linear differential equations; series methods; Laplace transform; self adjoint boundary value problems and Fourier series; partial differential equations.
Prerequisite: MAB301 + MAB302 + MAB310
Credit Points: 10 Contact Hours: 3 per week

MAB618 NUMERICAL ANALYSIS I
Offered: Spring
Errors; systems of linear equations (direct methods); solution of non-linear equations; interpolation and approximation; numerical quadrature; numerical solution of first order differential equations.
Prerequisites: MAB301(R)* + MAB310(R) + CSB305 or CSB155
Credit Points: 10 Contact Hours: 3 per week

MAB619 NUMERICAL ANALYSIS II
Offered: Autumn
Systems of linear equations (iterative methods); solution of non linear equations; interpolation and approximation; numerical quadrature; eigenvalue problem; ordinary differential equations.
Prerequisites: MAB618 + MAB301 + MAB310
Credit Points: 10 Contact Hours: 3 per week

MAB635 CLASSICAL THEORETICAL MECHANICS
Offered: Autumn
Mathematical model of Newtonian mechanics; statics; conservation laws of dynamics; impulsive motion in one dimension; motion of a particle in one dimension, examples; motion of a particle in two dimensions, examples.
Prerequisites: MAB302 + MAB331
Credit Points: 10 Contact Hours: 3 per week

MAB637 OPERATIONS RESEARCH IA
Offered: Autumn, Spring
The simplex algorithm; simulation; replacement, maintenance and reliability; networks.
Prerequisites: MAB301 + MAB317 + MAB310 + CSB305 or CSB155
Credit Points: 10 Contact Hours: 3 per week

MAB638 OPERATIONS RESEARCH IB
Offered: Autumn, Spring
The revised simplex method; transportation and transshipment; assignment; parametric analysis; inventory; introduction to queuing.
Prerequisite: MAB637
Credit Points: 10 Contact Hours: 3 per week

MAB641 ACTUARIAL MATHEMATICS
Offered: Autumn
The life table; demographic techniques; pure endowments and annuities; assurances; policy values; laws of mortality; benefits depending on other contingencies; pension funds.
Co-requisite: MAB342
Credit Points: 10 Contact Hours: 3 per week

MAB710 LINEAR ALGEBRA B
Offered: Spring
Vector spaces and matrices; vector and matrix norms; discrete Markov chains with a finite number of states; vector spaces over finite fields; quadratic forms, least square solution of linear equations; random vectors and matrices.
Prerequisite: MAB410
Credit Points: 10 Contact Hours: 3 per week

MAB718 NUMERICAL ANALYSIS A
Offered: Autumn, Spring
Errors; systems of linear equations (direct methods); solution of non-linear equations; interpolation and approximation; numerical quadrature; numerical solution of first ordinary differential equations.
Prerequisites: MAB224 + CSB155
Credit Points: 10 Contact Hours: 3 per week

MAB719 NUMERICAL ANALYSIS B
Offered: Spring
Systems of linear equations (iterative methods); solution of non linear equations; interpolation and approximation; numerical quadrature; eigenvalue problem; ordinary differential equations.
Prerequisites: MAB718 + MAB410
Credit Points: 10 Contact Hours: 3 per week

MAB735 MECHANICS
Offered: Autumn
Mathematical model of Newtonian mechanics; statics; conservation laws of dynamics; impulsive motion in one dimension; motion of a particle in one dimension; motion of a particle in two dimensions.
Prerequisites: MAB411 + MAB226 or MAB412
Credit Points: 10 Contact Hours: 3 per week

MAB737 OPERATIONS RESEARCH
Offered: Autumn, Spring
The simplex algorithm, simulation, replacement, maintenance and reliability; networks.
Prerequisites: MAB417 + MAB410 + CSB155
Co-requisite: MAB442
Credit Points: 10 Contact Hours: 3 per week

MAB741 ACTUARIAL MATHEMATICS
Offered: Autumn
The life table; demographic techniques; pure endowments and annuities; assurances; policy values; laws of mortality; benefits depending on other contingencies; pension funds.
Prerequisite: MAB211 Co-requisite: MAB442
Credit Points: 10 Contact Hours: 3 per week

MAB782 FIELD THEORY
Offered: Spring
Tensor analysis; curvilinear coordinates; application to potential theory, hydrodynamic and electromagnetic theory; calculus of variations, functionals.
Prerequisite: MAB425
Credit Points: 10 Contact Hours: 3 per week

MAB788 MATHEMATICAL STATISTICS
Offered: Autumn, Spring
Properties and uses of the beta, gamma and exponential probability distribution; introduction to bivariate and multivariate distribution theory; multiple and curvilinear regression theory; three factor, factorial and fractional factorial experimental designs.
Prerequisites: MAB418 + MAB411
Credit Points: 10 Contact Hours: 3 per week
MAB795 SURVEY MATHEMATICS III
Offered: Autumn
Prerequisite: MAB495
Credit Points: 12
Contact Hours: 3 per week

MAB893 ENGINEERING MATHEMATICS III
Offered: Autumn
Eigenvalues and eigenvectors, quadratic forms, determination of dominant eigenvalue by iteration; sampling theory, hypothesis testing, linear regression and correlation, analysis of variance; introduction to linear programming.
Prerequisite: MAB493
Credit Points: 6
Contact Hours: 3 per week

MAB894 ENGINEERING MATHEMATICS IV
Offered: Spring
Solution of linear systems of differential equations employing operator-D and Laplace transform methods, variation of parameters methods for non-homogeneous equations; solution of partial differential equations, separation of variables method, introduction to numerical techniques; complex variables, Cauchy-Riemann equations, conformal mapping.
Prerequisite: MAB493
Credit Points: 6
Contact Hours: 3 per week

MAB906 TOPICS IN ANALYSIS
Offered: Spring
Topics selected from the following: measures; Lesbesgue integrals; product of measures; normed spaces; metric spaces; constrained optimisation; Gateaux and Frechet derivatives.
Prerequisite: MAB601 + MAB612
Credit Points: 12
Contact Hours: 3 per week

MAB907 MATHEMATICAL STATISTICS IIIA
Offered: Autumn
Distributions of functions of random variables; estimation theory; introduction to multivariate normal distribution theory.
Prerequisite: MAB608
Credit Points: 12
Contact Hours: 3 per week

MAB908 MATHEMATICAL STATISTICS IIIB
Offered: Spring
Experimental design; three factor designs, balanced incomplete designs, introduction to the analysis of covariance; introduction to stochastic processes; random walk, branching processes, Markov chains; sampling theory; random and stratified sampling; multi-stage sampling; probability proportional to size sampling.
Prerequisite: MAB608
Credit Points: 12
Contact Hours: 3 per week

MAB913 NUMERICAL ANALYSIS III
Offered: Spring
Approximation; numerical solutions of ordinary differential equations; partial differential equations; overview of finite element method.
Prerequisite: MAB619
Credit Points: 12
Contact Hours: 3 per week

MAB920 CODING & ENCRYPTION TECHNIQUES
Number theory, finite fields, linear shift registers, block coding theory, Cyclic codes, BCH and Reed-Solomon codes, block coding techniques, convolutional codes, introduction to cryptography stream ciphers, block ciphers, public key systems, and secure speech communications.
Prerequisite: EE661
Credit Points: 12
Contact Hours: 3 per week

MAB921 METHODS OF MATHEMATICAL PHYSICS A
Offered: Autumn
Equations of mathematical physics; mathematical methods, separation of variables; transform method; conformal transformation; theory of distributions and applications to Green's function method; finite difference method; two dimensional wave equations, examples; two dimensional heat equation, examples; two dimensional Laplace equation.
Prerequisite: MAB601 + MAB612
Credit Points: 12
Contact Hours: 3 per week

MAB924 APPLIED STATISTICAL TECHNIQUES
Offered: Spring
The general linear model: errors in variables; autocorrelation; single equation problems; simultaneous equations problems; estimation methods.
Prerequisite: MAB608
Credit Points: 12
Contact Hours: 3 per week

MAB927 OPERATIONS RESEARCH IIA
Offered: Autumn
Linear programming; integer and non-linear programming; dynamic programming; Heuristic methods.
Prerequisite: MAB638
Credit Points: 12
Contact Hours: 3 per week

MAB928 OPERATIONS RESEARCH IIIB
Offered: Spring
Simulation; queuing; decision analysis; implementation in operations research.
Prerequisite: MAB637
Credit Points: 12
Contact Hours: 3 per week

MAB929 STATISTICAL FORECASTING
Offered: Autumn
Introduction; smoothing methods; decomposition methods; ARMA time series methods; Box-Jenkins method, causal models; quantitative and technological methods of forecasting; comparison and selection of forecasting methods.
Prerequisite: MAB608
Credit Points: 12
Contact Hours: 3 per week

MAB941 METHODS OF MATHEMATICAL ECONOMICS
Offered: Autumn
Mathematical models in economics; macroeconomic models; techniques for dynamic economic models; introduction to stability theory; stability of non-linear systems; optimisation theory; the maximum principles of Pontryagin; optimal economic growth.
Prerequisite: MAB601 + MAB612
Credit Points: 12
Contact Hours: 3 per week

MAB960 PROJECT WORK
Offered: Autumn, Spring
Students, either individually or in small groups, undertake a substantial project which is relevant to the needs of industry and which is designed to give students insight into industrial requirements. Each student, or group of students, undertakes a different project.
**ILL MAPIII STATISTICAL METHODS**

- Credit: 6
- Contact Hours: 3 per week

**ILL MAN255 STATISTICS**

- Credit: 4
- Contact Hours: 2 per week

**ILL MAP211 SAMPLING PROCEDURES**

- Credit: 6
- Contact Hours: 3 per week

**ILL MAP212 STATISTICAL PROCESS CONTROL**

- Credit: 6
- Contact Hours: 3 per week

**ILL MAP211 QUALITY PROBLEM SOLVING TECHNIQUES**

- Credit: 8
- Contact Hours: 2 per week

**ILL MEB010 DYNAMICS I**

- Credit: 6
- Contact Hours: 2 per week

**ILL MEB031 MATERIALS TECHNOLOGY**

- Credit: 8
- Contact Hours: 2 per week

**ILL MEB031 MATERIALS TECHNOLOGY**

- Credit: 8
- Contact Hours: 2 per week

**ILL MEB11 MATERIALS I**

- Credit: 6
- Contact Hours: 3 per week

**ILL MEB121 ENGINEERING GRAPHICS**

- Credit: 6
- Contact Hours: 3 per week

**ILL MEB133 MATERIALS I**

- Credit: 6
- Contact Hours: 3 per week

**ILL MEB131 ENGINEERING GRAPHICS**

- Credit: 6
- Contact Hours: 3 per week

**ILL MEB133 MATERIALS I**

- Credit: 6
- Contact Hours: 3 per week
The subject examines the role of manufacturing in generating wealth and its contribution to the Australian economy. It introduces modern concepts in manufacturing systems design. The interaction between design, materials selection, manufacturing, processes, marketing, and information processing of products will be presented. The remaining topics will include the choice of manufacturing technologies in relation to product quality and quantity.

**Credit Points:** 3  **Contact Hours:** 1.5 per week

**MEB171 INTRODUCTION TO MANUFACTURING**

**Offered:** Autumn

This subject sets out firstly to examine the role of manufacturing systems modelling and simulation by computers. A series of lectures and practical classes to introduce students to the general nature and design properties of steam plant, nozzles, impulse and reaction turbines, compressors, engines testing etc.

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB173 MANUFACTURING PRACTICE**

**Offered:** Autumn

This subject examines the role of manufacturing industry in generating wealth and its contribution to the Australian economy. It introduces modern concepts in manufacturing systems design. The interaction between design, materials selection, manufacturing, processes, marketing, and information processing of products will be presented. The remaining topics will include the choice of manufacturing technologies in relation to product quality and quantity. Students have hands-on experience in manufacturing processes, metrology laboratory and systems modeling and simulation by computers.

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB230 MATERIALS II**

**Offered:** Autumn

A series of lectures and practical classes to introduce students to the general nature and design properties of both cast and wrought metallic alloys. An introduction is given to the metallurgical effects of welding.

**Prerequisite:** MEB133

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB231 MATERIALS III**

**Offered:** Spring

Introduction to fracture mechanics; linear elastic fracture mechanics and its application to static design and fatigue crack growth. The structure and properties of polymers, composites and engineering ceramics.

**Prerequisite:** MEB133

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB250 THERMODYNAMICS I**

**Offered:** Autumn

A series of lectures with tutorial and practical periods to introduce the basics of engineering thermodynamics such as reversibility, first and second laws of thermodynamics, applications to heat engines, compressors, engines testing etc. Particular emphasis being given to single phase systems. Field visit.

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB251 THERMODYNAMICS II**

**Offered:** Spring

A series of lectures, tutorials and practical periods on steam plant, nozzles, impulse and reaction turbines, gas turbines and refrigeration. Field visit.

**Prerequisite:** MEB250

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB313 MECHANICS I**

**Offered:** Autumn

Kinematic and dynamic analysis of linkages and mechanisms and linkages synthesis applied to spatial mechanisms and robotics. The design and synthesis of cams and the kinematic analysis of gears.

**Prerequisites:** CEB184, MEB111, CEB185

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB339 MATERIALS & MANUFACTURING PROJECT**

**Offered:** Autumn and Spring

The project introduces the student to supervised, self-regulated research of a specific topic associated with materials engineering or manufacturing engineering. The project normally requires a survey of literature specific to the given topic, organised experimental procedure and the preparation of a formal report.

**Prerequisite:** MEB231

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB361 FLUIDS I**

**Offered:** Autumn

A first subject in fluid mechanics which considers the fluid properties most relevant to mechanical engineering practice. The subject deals in some detail with forces in a fluid at rest and its action on submerged and floating bodies. Manometry, pressure distribution in a liquid subjected to acceleration, different types of flow, momentum and energy-equations, flow through orifices and vortex flow are also included.

**Prerequisites:** MEB111, PHB132, MAB193

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB370 MANUFACTURING SYSTEMS I**

**Offered:** Autumn

Lectures and practical work to cover practical machining principles, machine tool metrology and principle of joining and fasteners.

**Prerequisite:** MEB171

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB381 DESIGN II**

**Offered:** Autumn

The subject develops a methodology for the design of machines and machine elements to determine appropriate component dimensions and materials which will ensure satisfactory functional performance, strength and fatigue life. It will develop skills in the use of both manual and computer-aided numerical and graphical techniques in a design environment.

**Prerequisites:** MEB121, MEB101, CEB184, CEB185

**Co-requisite:** MEB313

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB408 PROJECT A (MECHANICAL)**

**Offered:** Spring

The student is required to investigate in depth and present a formal report on a problem area taken from the full range of mechanical engineering practice. Project work may arise through involvement in applied research programs or specific topic from industry.

**Prerequisite:** MEB339  **Co-requisite:** MEB489

**Credit Points:** 16  **Contact Hours:** 6 per week

**MEB409 PROJECT B (MECHANICAL)**

**Offered:** Full year

The student is required to investigate in depth and present a formal report on a problem area taken from the full range of mechanical engineering practice. Project may arise through involvement in applied research programs or specific topic from industry.

**Prerequisite:** MEB339  **Co-requisite:** MEB489

**Credit Points:** 8  **Contact Hours:** 3 per week
MEB411 THEORY OF MACHINES
Offered: Spring
Balancing of mechanisms and rotors; gyroscopic effects in mechanisms, rotors and vehicles; gear trains, simple and epicyclic; friction and centrifugal devices such as clutches and governors.
Prerequisites: MEB111, CEB184, CEB185
Credit Points: 7  Contact Hours: 3 per week

MEB450 AIR CONDITIONING
Offered: Autumn
Lectures and laboratory work to cover the theory and its application to the following topics: psychrometry, heating and cooling load calculations, air conditioning systems, vapour compression, refrigeration cycle analysis, multipressure systems, absorption refrigeration. Field visit.
Prerequisites: MEB251, MEB462
Co-requisite: MEB550
Credit Points: 7  Contact Hours: 3 per week

MEB462 FLUIDS II
Offered: Spring
A second subject in fluid mechanics for mechanical engineering students. It concentrates on fluid flow in closed conduits, rotodynamic machines, and hydraulic transmissions. It also includes water hammer in pipes and introduces dimensional analysis and dynamic similarity.
Prerequisite: MAB193
Co-requisites: MEB361, MAB493
Credit Points: 6  Contact Hours: 3 per week

MEB463 TRIBOLOGY
Offered: Spring
A series of lectures and supporting practical work on the fundamentals of tribology. The subject demonstrates the multidisciplinary nature of the subject and shows how it is an integral part of machine design, reliability and maintenance.
Credit Points: 6  Contact Hours: 3 per week

MEB464 FLUIDS III
Offered: Autumn
A more advanced subject in fluids for mechanical engineering students. The subject includes boundary layer theory and a more general approach to viscous flow via the Navier-Stokes and Reynold's equations.
Prerequisites: MEB462, MAB893
Credit Points: 7  Contact Hours: 3 per week

MEB471 MANUFACTURING ENGINEERING I
Offered: Spring
Lectures and laboratory work to cover practical machining principles and machine tool metrology.
Credit Points: 6  Contact Hours: 3 per week

MEB472 MANUFACTURING SYSTEMS II
Offered: Spring
Lectures and experimental work to cover fundamentals and applications of plastic theory in the deformation of metals and plastics. Concepts and applications of non-traditional machining and forming processes. Introduction of numerical control technology and practical applications in NC part programming.
Prerequisite: MEB370
Credit Points: 6  Contact Hours: 3 per week

MEB483 DESIGN III
Offered: Spring
The subject continues from MEB381 and further develops the design of machine elements including mechanisms, welded structures, flexible members, journal bearings using the principles of engineering mechanics to analyse loads and to determine appropriate materials and component dimensions to ensure satisfactory performance of strength and functional requirements. It will extend skills in the use of both manual and computer-aided numerical and graphical techniques in a design environment.
Prerequisites: MEB121, MEB101, MEB133, MEB111, CEB102, CSB191, CEB184
Co-requisites: MEB441, MEB231, MEB313
Credit Points: 7  Contact Hours: 3 per week

MEB489 MECHANICAL DESIGN PROJECT
Offered: Full year
Projects drawn from either QUT or from outside organisations will be assigned to teams of (generally) three students, who will work as groups to apply theoretical mechanical engineering principles, tempered by practical considerations, to the solution of design problems. Each team will design, draw, specify and (in most instances) supervise the manufacture of a piece of mechanical engineering hardware.
Prerequisites: MEB483, MEB610, MEB511, MEB770 Co-requisites: MEB772, MEB911
Credit Points: 7  Contact Hours: 3 per week

MEB500 SPECIAL TOPIC I
Offered: Autumn
A series of lectures and tutorials in subject areas which are of special professional relevance to the student's intended career path, or which may be available on occasions from visiting scholars and which may be relevant and important to the undergraduate program.
Prerequisite: Students will need to have achieved an appropriate level of preparation in the topic area concerned.
Co-requisite: Will depend on the syllabus of the particular special topic offered
Credit Points: 7  Contact Hours: 3 per week

MEB510 NOISE & VIBRATIONS
Offered: Autumn
Introduction to noise and vibration measurements and instruments, free and forced vibration, normal mode vibration, Holzer's method, Myklestad's method. Noise levels, A-weighting, leq, SEL, noise dose and standards. Sound power, absorption, fields and the behaviour of sound relating to rooms, enclosures and partitions.
Prerequisites: PHB132, MAB493
Co-requisite: MAB893
Credit Points: 7  Contact Hours: 3 per week

MEB511 STRESS ANALYSIS
Offered: Autumn
Analysis of strain and stress; including strain-displacement relations and stress and strain transformation. Two-dimensional problems including curved bars, thick-walled cylinders and rotating discs. Tension of prismatic bars and thin-walled sections. Failure criteria and their applications. Experimental strain measurement and analysis.
Credit Points: 7  Contact Hours: 3 per week

MEB531 ADVANCED MATERIALS
Offered: Autumn
The subject reviews modern composite materials to give an understanding of their properties, failure modes and uses. The important structural ceramics and high strength metallic materials are also con-
sidered. A treatment is given of special use materials which will be of future importance and the available materials and surface treatment processes to control frictional and wear performance.

Prerequisites: MEB230, MEB231

Credit Points: 7  Contact Hours: 3 per week

MEB550 HEAT TRANSFER

Offered: Autumn

A subject of lectures, tutorials and practical periods which cover the following topics: conduction (steady-state, 1 and 2 dimensions, unsteady-state), convection (boundary layers, forced, natural) and radiation (black and grey bodies, shape factors, shielding, network simulation).

Credit Points: 6  Contact Hours: 3 per week

MEB601 SPECIAL TOPIC I

Offered: Autumn

Lectures and experimental work to cover fundamentals and applications of plasticity theory in the deformation of metals and plastics, Analysis of forming machine performance and selection of machine tools will also be given.

Credit Points: 6  Contact Hours: 3 per week

MEB610 MECHANICS II

Offered: Spring

Introduction to mechanical frames and methods of analysis, with the emphasis placed on investigation the effects of static and dynamic loading upon frames and frame members.

Prerequisites: MEB411, MAB493, MEB510
Co-requisite: MEB511

Credit Points: 6  Contact Hours: 3 per week

MEB640 AUTOMATION I

Offered: Spring

The subject takes the students’ knowledge of mathematics and shows how this may be applied to: model mechanical systems; predict system response to a given input; modify system parameters to obtain a more desirable response.

Prerequisite: MAB493

Credit Points: 7  Contact Hours: 3 per week

MEB650 THERMODYNAMICS III

Offered: Spring

Prerequisites: MEB550, MEB251

Credit Points: 6  Contact Hours: 3 per week

MEB660 FLUID POWER

Offered: Spring

This subject analyses selected fluid systems to show how the performance characteristics of individual components interact to affect overall efficiency.

Prerequisite: MEB462

Credit Points: 6  Contact Hours: 3 per week

MEB670 INDUSTRIAL ENGINEERING I

Offered: Spring

Lectures and laboratory work to provide training in some of the basic techniques for assisting in making decisions in policy, product, process, plant and project control.

Credit Points: 6  Contact Hours: 3 per week

MEB673 MANUFACTURING ENGINEERING III

Offered: Spring

Lectures and experimental work to cover advanced topics related to manufacturing technology including some non-traditional material removal processes and optical measurement. An introduction to CAD/CAM and robotics will be presented.

Prerequisite: MEB471

Credit Points: 7  Contact Hours: 3 per week

MEB680 ADVANCED MECHANICAL DESIGN

Offered: Spring

This subject will introduce topics appropriate to the application of modern materials and analytical techniques to the design of a wide range of machines. It will include lectures and case studies on statistical analysis of failures and the application of the information to improvement of designs; applications of advanced materials science in design, including applications of fracture mechanics techniques to optimisation of fatigue life, and computer-aided methods for optimising selection of both metallic and non-metallic materials; techniques for analysis and synthesis of mechanisms.

Prerequisites: MEB483, MEB230, MEB231, MEB411

Credit Points: 7  Contact Hours: 3 per week

MEB701 SPECIAL TOPIC III

Offered: Autumn

A series of lectures and tutorials in subject areas which are of special professional relevance to the student’s intended career path, or which may be available on occasions from visiting scholars and which may be relevant and important to the undergraduate program.

Prerequisite/Co-requisite: As for MEB500

Credit Points: 7  Contact Hours: 3 per week

MEB710 AUTOMATION II

Offered: Autumn

The subject requires students to use computer packages developed for use in control system design (e.g., Matrix, ‘X’). The student will be taught the fundamentals of discrete time systems theory and be introduced to instrumentation used in the acquisition and analysis of digital data (e.g., Labtech). Students will continue work on the use of Programmable Logic Controllers.

Prerequisites: MEB640, MEB660

Credit Points: 7  Contact Hours: 3 per week

MEB771 INDUSTRIAL ENGINEERING II

Offered: Autumn

Lectures and laboratory work to provide basic techniques used for the planning and control of operational or manufacturing systems.

Prerequisites: MEB670

Credit Points: 6  Contact Hours: 3 per week

MEB772 ENGINEERING PROJECT APPRAISAL

Offered: Autumn

This subject will introduce students to rational economic analysis of engineering projects, both at the
MEB960 FLUID SYSTEMS DESIGN

Offered: Spring
Lectures and practical applications in the design of press tools, dies for forming operations and joining processes including an overview of CAD in tool and die design.
Prerequisite: MEB571
Credit Points: 7 Contact Hours: 3 per week

MEB974 DESIGN FOR MANUFACTURING II

Offered: Spring
Lectures and practical applications in the design of press tools, dies for forming operations and joining processes including an overview of CAD in tool and die design.
Prerequisite: MEB571
Credit Points: 7 Contact Hours: 3 per week

MEB975 DESIGN OF MANUFACTURING SYSTEMS

Offered: Spring
Design and integration of flexible fixtures, palletisers and conveyors to FMS. The use of robots and automatic guided vehicles in materials handling. Total integrated manufacturing systems. Selection of machine tools for CIM implementation.
Prerequisites: MEB976, MEB977
Credit Points: 7 Contact Hours: 3 per week

MEB976 COMPUTER INTEGRATED MANUFACTURING

Offered: Spring
Lectures and applications to cover basic requirements for implementing CAD/CAM systems. Component design using geometric modelling techniques. Classification systems for part family formation and computer ailed process planning. Concepts and applications of Flexible Manufacturing Systems (FMS).
Credit Points: 7 Contact Hours: 3 per week

MEB977 COMPUTER CONTROL OF MANUFACTURING SYSTEMS

Offered: Autumn
Lectures and experimental work on the use of computers in machine tool control. Computer control of production systems. Control of NC and CNC machines and advanced programming techniques. Control of robots.
Prerequisite: MEB976
Credit Points: 7 Contact Hours: 3 per week

MEB978 MANUFACTURING SYSTEMS ENGINEERING

Offered: Autumn
Lectures and laboratory to describe and demonstrate concepts and fundamentals of manufacturing system analysis and production management.
Credit Points: 7 Contact Hours: 3 per week

MEB980 DESIGN OF POWER TRANSMISSION SYSTEMS

Offered: Autumn
Lectures and design office tutorials covering the design of systems for the generation and transmission of mechanical power, including both solid elements (gears, clutches, belts etc) and fluid elements (pneumatic and hydraulic).
Prerequisites: EEB209, MEB411, MEB313, MEB483
Credit Points: 7 Contact Hours: 3 per week

MEB981 DESIGN OF MATERIALS HANDLING SYSTEMS

Offered: Spring
A series of lectures and design office projects covering the design of bulk material conveying and process plant, storage silos and bins, ground stockpiling systems, and the associated supporting structures.
Prerequisites: MEB483, MEB411, CEB184, CEB185, MEB111, MEB511
Credit Points: 6 Contact Hours: 3 per week
MEP173 QUALITY PLANNING  
Offered: Autumn  
Credit Points: 6  
Contact Hours: 1.5 per week

MEP201 SAFETY TECHNOLOGY & PRACTICE I  
Offered: Spring  
To provide an overview of models of the accident phenomenon. To provide the technological background necessary for the understanding of potential hazards with electrical power, on construction sites and with mechanical equipment. To develop an understanding of the failure modes of materials and the influence of material properties and defects on failure.  
Credit Points: 12  
Contact Hours: 3 per week

MEP273 QUALITY MEASUREMENT & TESTING  
Offered: Spring  
Introduction to measurement, inspecting and testing. Definitions, standards. Measurement by observation or instrumentation as applied to any process or procedure, calibration systems, techniques and applications. Acceptance inspection, inspection planning and applications. Testing principles and procedures, types, uses. Instrumentation of test facilities. Laboratory quality assurance. Data analysis and uncertainties. Laboratory and facility management.  
Credit Points: 6  
Contact Hours: 1.5 per week

MEP301 SAFETY TECHNOLOGY & PRACTICE II  
Offered: Autumn  
This subject develops the basic concepts introduced in Safety Technology and Practice I. Importance is placed upon accident prevention and hazard recognition, analysis and control and risk management. The role, design, effective use and maintenance of personal protection equipment will also be addressed.  
Prerequisite: MEP201  
Credit Points: 12  
Contact Hours: 3 per week

MEP371 RELIABILITY & MAINTAINABILITY  
Offered: Autumn  
Credit Points: 6  
Contact Hours: 1.5 per week

MEP473 QUALITY SYSTEMS & ASSESSMENT  
Offered: Spring  
Credit Points: 8  
Contact Hours: 2 per week

MET101 ENGINEERING DRAWING  
Offered: Autumn  
Presentation of graphical data, orthographic drawings, survey plans and the preparation of circuit diagrams and other drawings relevant to an electrical or electronics engineering associate. The use of computers in drawing.  
Credit Points: 7  
Contact Hours: 3 per week

MET120 ENGINEERING DRAWING I  
Offered: Autumn  
Credit Points: 7  
Contact Hours: 3 per week

MET121 DRAFTING PRACTICE I  
Offered: Autumn  
A series of short, practical exercises to cover the highest possible range of drafting experience commensurate with the first year students stage of development.  
Co-requisites: MET120  
Credit Points: 3  
Contact Hours: 3 per week

MET123 ELECTRICAL ENGINEERING DRAWING I  
Offered: Autumn  
Tuition and practice in the preparation of block diagrams, logic diagrams and circuit diagrams.  
Co-requisite: MET120  
Credit Points: 3  
Contact Hours: 3 per week

MET140 ENGINEERING MATERIALS I  
Offered: Autumn  
A series of lectures and practical work dealing with the general properties of materials, materials selection, service requirements and properties of ferrous and nonferrous metals and alloys, corrosion types and prevention, testing procedures, plastics, ceramics and other materials.  
Credit Points: 8  
Contact Hours: 3 per week

MET141 MATERIALS (CIVIL)  
Offered: Autumn and Spring  
Credit Points: 7  
Contact Hours: 3 per week

MET170 MANUFACTURING TECHNOLOGY  
Offered: Spring  
The subject covers the basic methods of converting raw material into manufactured goods and includes an introduction to metrology and safety in the work place.  
Credit Points: 8  
Contact Hours: 3 per week

MET171 TRADE TRAINING I A  
Offered: Autumn  
This workshop practice subject provides skill training in basicfitting and welding. The subject will emphasise the practical and applied aspects of fitting and welding skills.  
Credit Points: 6  
Contact Hours: 7 per week
MET175 WORKSHOP TRAINING
(MECHANICAL) IIA
Offered: Autumn
An introduction to workshops and field training, the use of sketches, working drawings, materials, safety and legal requirements.
Credit Points: 3  Contact Hours: 3 per week

MET201 APPLIED MECHANICS
Offered: Spring
This subject covers the fundamentals of statics, friction, velocity and acceleration, inertia and change of motion, dynamics of rotation, periodic motion, balancing, work and energy, impulse and momentum, strain and stress, fluids at rest and in motion.
Credit Points: 7  Contact Hours: 3 per week

MET210 APPLIED MECHANICS I
Offered: Autumn
Consideration of force and its effects. Equilibrium, moments of forces. Displacement, velocity and acceleration, inertia. Friction and friction machines.
Credit Points: 8  Contact Hours: 3 per week

MET220 ENGINEERING DRAWING II
Offered: Spring
Advanced sectioning, auxiliary projections including graphical and computer graphics, Intersections and surface developments.
Prerequisite: MET120
Credit Points: 8  Contact Hours: 3 per week

MET221 DRAFTING PRACTICE IIA
Offered: Spring
Introduction to geometric tolerances. Cam and gear geometry, Spatial geometry covering true shapes, angles and planes. Basic mechanical drive component selection.
Co-requisite: MET220
Credit Points: 3  Contact Hours: 3 per week

MET223 ELECTRICAL ENGINEERING DRAWING IIA
Offered: Spring
Tuition and practice in preparation of printed circuit board layout, equipment and plant layouts, power transformer construction drawings and single line diagrams.
Prerequisite: MET120 Co-requisite: MET220
Credit Points: 3  Contact Hours: 3 per week

MET250 THERMODYNAMICS
Offered: Autumn
A series of lectures and tutorials with practical periods to introduce the basic engineering thermodynamics concepts, viz. systems, reversibility, first and second law, and the working fluids. IC engine cycles and simple performance evaluations.
Credit Points: 6  Contact Hours: 3 per week

MET271 TRADE TRAINING IIA
Offered: Spring
This subject provides skill training in basic metal machining techniques. The subject will emphasise the practical and applied aspects of turning, milling, shaping, surface and cylindrical grinding.
Credit Points: 6  Contact Hours: 7 per week

MET310 APPLIED MECHANICS II
Offered: Spring
Work, power and energy; efficiency. Introduction to simple machines. Mechanical advantage and velocity ratio. Hydrostatics and fluid friction. Section properties, shearing force and bending moments, torsion.
Credit Points: 8  Contact Hours: 3 per week

MET320 ENGINEERING DRAWING III
Offered: Autumn
Prerequisites: MET120, MET220
Credit Points: 6  Contact Hours: 3 per week

MET350 PROCESS ENGINEERING
Offered: Spring
A series of lectures, tutorials and practical periods related to the following topics: steam plant, positive displacement compressors, refrigeration plant, positive expanders, reciprocating engines and gas turbines.
Prerequisite: MET250
Credit Points: 7  Contact Hours: 3 per week

MET352 REFRIGERATION & AIR CONDITIONING
Offered: Spring
Ideal and actual refrigeration cycles including variation of operating conditions and cycles. Performance of refrigeration equipment. Psychrometry, cooling load estimation. Air supply systems.
Prerequisite: MET250
Credit Points: 7  Contact Hours: 3 per week

MET420 ENGINEERING DRAWING IV
Offered: Spring
Presentation of drafting techniques as applied in electrical, pipework and air-conditioning hydraulic and pneumatic systems using computer graphics.
Prerequisite: MET120, MET220
Credit Points: 7  Contact Hours: 3 per week

MET421 MECHANICAL PROJECT IA
Offered: Spring
Report and presentation. A complete project selected from a prepared list, each dealing with a specific engineering environment.
Prerequisite: MET221
Credit Points: 3  Contact Hours: 3 per week

MET433 ENGINEERING MATERIALS II
Offered: Spring
A series of lectures and practical periods dealing with the properties and selection of advanced engineering materials.
Co-requisite: MET140
Credit Points: 8  Contact Hours: 3 per week

MET475 WORKSHOP (MECHANICAL) IIIA
Offered: Autumn
An introduction to workshop machines and practices.
Co-requisite: MET175
Credit Points: 3  Contact Hours: 3 per week

MET511 NOISE, STRESS & VIBRATION PRACTICE
Offered: Autumn
Instrumentation used to measure vibrations, noise and stress. Fundamental principles and equations related to such measurement including vibration isolation, noise standards and stress/strain transformations.
Co-requisites: MET210, MET310
Credit Points: 6  Contact Hours: 3 per week

MET560 THERMOFLUIDS
Offered: Autumn
Fluid statics, fluid flow and measurement, dimensionless groups, elementary heat transfer by conduction, convection and radiation.
Credit Points: 8  Contact Hours: 3 per week
MET72 PRODUCTION PLANNING & CONTROL
Offered: Autumn
A series of lectures involving the sequence of production planning and management control.
Prerequisite: MET171
Credit Points: 6  Contact Hours: 3 per week

MET73 CAD/CAM TECHNOLOGY
Offered: Spring
Introduction to the fundamentals of CAD/CAM and geometrical modelling. A series of lectures in automated process planning. Tutorials together with practical applications in CNC programming and economics of machine tools. The use of robots and principles of integrated manufacturing systems.
Credit Points: 7  Contact Hours: 3 per week

MET80 MACHINE ELEMENTS I
Offered: Autumn
The practical application of shear force and bending moment diagrams and selection of components from BHP manual. Use of handbooks, codes and rolled steel section tables in the selection and use of bolted and welded connections. The application of standard rolled steel sections. The selection of shafts.
Prerequisites: MET120, MET120, MET220
Credit Points: 6  Contact Hours: 3 per week

MET600 MATERIALS FOR ELECTRICAL ENGINEERS
Offered: Spring
A series of lectures and practical work dealing with the general properties of materials, materials selection, service requirements and properties of ferrous and nonferrous metals and alloys, corrosion types and prevention, testing procedures, plastics, ceramics and other materials.
Credit Points: 4  Contact Hours: 1.5 per week

MET610 MECHANICAL PLANT
Offered: Spring
A study of manufacturing processes and workshop practices, power station equipment (turbines and boilers), mining machinery, air-conditioning equipment, fans and pumps, hoists, compressors, cranes, welding. Heat transfer principles.
Credit Points: 3  Contact Hours: 1.5 per week

MET650 PLANT ENGINEERING IA
Offered: Spring
A series of investigatory practical sessions related to design parameters, performance characteristics and plant maintenance practices associated with engineering plant systems, the machinery within the system and maintenance procedures.
Credit Points: 3  Contact Hours: 3 per week

MET680 MACHINE ELEMENTS II
Offered: Spring
Prerequisite: MET580
Credit Points: 7  Contact Hours: 3 per week

MET733 INDUSTRIAL METALLURGY
Offered: Autumn
A course of lectures and practical work covering techniques in casting and metallurgical advances in materials and their evaluation.
Prerequisite: MET433
Credit Points: 6  Contact Hours: 3 per week

MET782 JIG & TOOL DESIGN
Offered: Autumn
Prerequisite: MET171
Credit Points: 6  Contact Hours: 3 per week

MET859 ENERGY MANAGEMENT
Offered: Autumn
Tariff framing and objectives, energy and power losses in electrical and mechanical plant, equipment and buildings, identification of losses energy audits lead forecasting and control.
Co-requisites: EET500, MET250
Credit Points: 6  Contact Hours: 3 per week

MET901 SUGAR MILL TECHNOLOGY I
Offered: Autumn
This subject provides the basic knowledge and skills in the technology and equipment associated with sugar mill processes and operation.
Credit Points: 6  Contact Hours: 3 per week

MET902 SUGAR MILL TECHNOLOGY II
Offered: Spring
This subject provides further knowledge and skills in the technology and equipment associated with sugar mill processes and operation.
Prerequisite: MET901
Credit Points: 7  Contact Hours: 3 per week

MET926 COMPUTER AIDED DESIGN & DRAFTING
Offered: Autumn
The use of computer based systems for producing engineering drawings with emphasis on practical work.
Prerequisites: MET120, MET220
Credit Points: 6  Contact Hours: 3 per week

MET933 INDUSTRIAL TRIBOLOGY
Offered: Autumn
Maintenance and maintenance systems, types and mechanisms of wear, bearings and seals, friction, lubricants, oils, greases, solid lubricants, gas as a lubricant, application of lubricants.
Credit Points: 6  Contact Hours: 3 per week

MET940 MECHANICAL MEASUREMENTS
Offered: Autumn
To describe the function and method of application of the instruments used to measure mechanical quantities such as: speed, acceleration, frequency, force, torque, pressure, level, flow and temperature.
Credit Points: 8  Contact Hours: 3 per week

MET960 FLUID POWER
Offered: Spring
This subject analyses selected fluid systems to show how the performance characteristics of individual components interact to affect the overall efficiency.
Credit Points: 7  Contact Hours: 3 per week

MET961 FLUID MECHANICS
Offered: Spring
An introduction to fluid mechanics and systems such as pumps and pumping, turbines, compressors and fans. The operation of fluid coupling and torque converters.
Prerequisite: MET560
Credit Points: 7  Contact Hours: 3 per week
■ MET971 INDUSTRIAL PRACTICE
Offered: Spring
A series of lectures in human resource management. Aspects of communication, leadership and teamwork with practical applications to planning and control. Basic engineering metrology.
Credit Points: 7 Contact Hours: 3 per week

■ MNB002 PSYCHOLOGY FOR ENGINEERS
Offered: Spring
Introductory psychology. Basic elements of transactional analysis and their application to work settings. Selfconcept and its relationship to socially effective behaviour. Attitudes and attitude change. The dynamics of supervision in the work place.
Credit Points: 4 Contact Hours: 2 per week

■ MNB004 MANAGEMENT
Offered: Spring
The subject acts as an introduction to the theory and practice of management and lays a foundation on which to build managerial knowledge and techniques throughout a lifetime career. Functions of managerial planning, organizing, leading and controlling are presented in the framework of a systems approach to decision making.
Credit Points: 4 Contact Hours: 2 per week

■ MNB007 BEHAVIOURAL SCIENCE
An introduction to perception, motivation, individual personality, social attitudes, group interaction and dynamics; social motives and the sources and resolution of conflict. Students will be introduced to the practical application and limitations of behavioural studies through the use of readings and case studies drawn from the building industry. An introduction to the job and responsibilities of management; the functions and role of the manager including planning, organization, control, budgeting and decision making; styles of leadership. Students will discuss and assess the various leadership styles and their application in the building industry, together with an assessment of the decision making roles of the contractor, architect, unions, government and owner on the building site. Students will be introduced to employee selection training, appraising and promotion. Worker efficiency and working conditions.
Credit Points: 6 Contact Hours: 3 per week

■ MNB018 INDUSTRIAL RELATIONS
Structure and development of the industrial relations system in Australia. Federal and State conciliation and arbitration systems, authority and extent of jurisdiction. Industrial relations issues such as wages, conditions, claims and disputes. Role of the trade unions, the employers' and employees' representatives, the commission, awards and agreements. Acts, regulations and workers' compensation. Law of Master and Servant. Strikes and Lockouts. Public liability insurance. Law of Professional Negligence.
Credit Points: 4 Contact Hours: 3 per week

■ MNB025 ECONOMIC ANALYSIS FOR GEOLOGISTS
Topics include a general overview of the economic approach and method, Importance of statistics, theory and practice in Economics. Neo-classical economics: Relevance to Australia and other western nations. The macro, micro distinction, comparative systems, and the role of values. Development models; Kaldor, Myint, Robinson, Graff and mineral economics.
Credit Points: 6 Contact Hours: 3 per week

■ MNB026 ADMINISTRATION FOR GEOLOGISTS
The subject aims to introduce geology students to management practices and principles. It covers the managerial functions of planning, controlling, organizing, directing, and staffing, as well as the management of change and control. Included are the areas of business planning for new ventures, budgets and financial controls, and time management.
Credit Points: 6 Contact Hours: 3 per week

■ MNB040 MANAGEMENT
Offered: Spring
An introductory study of management including the functions of management, leadership, motivation and supervision of staff, and employee relations.
Credit Points: 4 Contact Hours: 1 per week

■ MNB043 INDUSTRIAL MANAGEMENT
Offered: Spring
The management process planning, leading, organizing, controlling. Human resources management aspects of communication, motivation, leadership and teamwork, with practical applications to planning and control, personnel relations, job design.
Credit Points: 6 Contact Hours: 3 per week

■ MNB067 PSYCHOLOGY
This subject seeks to educate students to critically evaluate statements about behaviour; state and give examples of higher order motives, and apply this knowledge to work and interpersonal situations; understand factors which cause us to misperceive others, and explain how to minimize misperceptions; use effective social skills in interpersonal and group settings; understand theories of attitude change; and know implications for changing the behaviour of others; use skills to reduce interpersonal stress.
Credit Points: 6 Contact Hours: 1 per week

■ MNB072 PRACTICE MANAGEMENT
The focus of the course is on Small Business Management. It considers the various roles that small business managers must develop at at least rudimentary proficiency in. The structure, organisation, finance, planning, control, taxation, marketing, and environmental factors will be discussed in order to equip students with basic skills necessary for starting a successful small business.
Credit Points: 4 Contact Hours: 3 per week

■ MNB091 MARKETING
The course is designed to concentrate on breadth rather than depth, to provide an overall view of marketing. The areas pursued will be the definition of marketing, including its fit into the strategic plans of a firm or institution, either profit or non-profit; full explanation of the components of the Marketing Mix with emphasis on a systems approach. The components of the marketing mix are defined as price, promotion, product and distribution; the integration of the above elements with branding, packaging sales and sales promotion to create the Marketing Plan.
Credit Points: 9 Contact Hours: 3 per week

■ MNB111 INTRODUCTORY PSYCHOLOGY FOR HEALTH PROFESSIONALS
Offered: Autumn
A course of lectures and tutorials on psychology as a science and interpersonal behaviour and skills.
Credit Points: 4 Contact Hours: 2 per week
MNB120 ELEMENTARY JAPANESE
Introduction to a basic knowledge of the spoken Japanese language through models of dialogue based on situational conversation essential to business and travel. Additionally, it includes special lectures on cultural background studies which are related to business practices in Japan.
Credit Points: 12  Contact Hours: 3 per week

MNB121 COLLOQUIAL JAPANESE
Emphasises spoken and aural comprehension based on situational conversation related to Australian business-people, including study of hiragana/katakana (Japanese syllables reading and writing) and an introductory lesson of Kanji (Chinese characters).
Credit Points: 12  Contact Hours: 3 per week

MNB130 GENERAL PSYCHOLOGY
This course is designed to give students an ability to demonstrate effective interpersonal skills in relation to patients and other health professionals; indicate bases of individual differences; diagnose patient needs and respond appropriately; state causes of stress, effects on health, and indicate appropriate techniques to reduce stress; indicate techniques that may be used to modify patient attitudes.
Credit Points: 4  Contact Hours: 3 per week

MNB151 MICROECONOMIC ANALYSIS
This subject will examine how managers make decisions in firms in the Australian economy. The role of consumers and firms in various markets will be studied. Production and market strategies for managers in different types of firms will be examined. Lastly, constraints on manager's decisions and other contemporary issues in Australian micro economics will be examined.
Credit Points: 12  Contact Hours: 3 per week

MNB152 COMPUTER DATA ANALYSIS
This subject introduces students to the "stand alone" microcomputer in the first six weeks and to the mainframe computer system in the latter half of the course. The microcomputer will be used to teach spreadsheet, database, graphics and report generation involving population data and will also be used to teach Word Processing. Word processing skills will be taught using Word Perfect. In the second half of the course students will be taught how to conduct surveys, the principles of sampling design, how to analyse survey sample data using a compatible package, as well as the theoretical measures of statistics involving central tendency, dispersion, probability and probability distributions, the central limit theorem and confidence intervals. Optimal sample size will also be discussed.
Credit Points: 12  Contact Hours: 3 per week

MNB153 ANALYSIS & METHODOLOGY IN MANAGEMENT
The first part of the course is designed to establish a conceptual base suitable for the analysis of both abstract and empirical argument. The second part of the course builds upon the concept of a valid argument by introducing the notion of the empirical research process, both historical and scientific. Specifically, the research cycle of problem definition, research design, data collection, analysis and reporting will be introduced. Normal empirical research will be concentrated upon, though in the context of a discussion of a wide range of research processes. Primary and secondary data sources will be considered, with case studies utilising archival material, market research and questionnaire design to provide practical anchoring. A final project which requires the construction of an argument and integration of data will be introduced to help integrate the analytical and empirical material, and demonstrate the student's ability to communicate meaning in an appropriate fashion. This may draw on introductory statistics and computing subjects.
Credit Points: 12  Contact Hours: 3 per week

MNB154 PSYCHOLOGY
Offered: Autumn, Spring
An introduction to selected areas of psychology to give a behavioural base to subsequent studies in the management and organisational science area and to provide limited skills training in some areas for personal development. A learning unit investigates conditioning, imitation and higher order learning. A second unit on individuals and groups examines the development and assessment of individuals within groups. Other units examine perception human development and social skills, including assertiveness and stress management.
Credit Points: 12  Contact Hours: 3 per week

MNB181 AUSTRALIAN NATIONAL GOVERNMENT A
This subject provides an introduction to the Australian political system at the national level. It aims to foster an understanding of the major participants in the system and to evaluate their interaction with Australian society. The Australian Constitution, the Commonwealth Parliament, the Cabinet, Ministry and Public Service, the High Court, the electoral system, political parties and interest groups are examined and related to basic political theory and current political issues. The role of the State Governments is also considered.
Credit Points: 12  Contact Hours: 3 per week

MNB182 AUSTRALIAN NATIONAL GOVERNMENT B
This subject provides an introduction to the Australian political system at the national level. It aims to foster an understanding of the major participants in the system and to evaluate their interaction with Australian society. The Australian Constitution, the Commonwealth Parliament, the Cabinet, Ministry and Public Service, the High Court, the electoral system, political parties and interest groups are examined and related to basic political theory and current political issues. Note: One hour per week is set aside for Communication Department input.
Credit Points: 12  Contact Hours: 3 per week

MNB184 INTRODUCTION TO ADMINISTRATIVE & POLITICAL ANALYSIS
The aim of the subject is to ensure the student develops a basic understanding of the aims and methods of the social sciences. It is also intended to help the student develop an understanding of what constitutes a valid explanation of social phenomena that can be utilised in other subjects. It will help develop habits of thought that can be applied to a wide variety of problems and decisions.
Credit Points: 12  Contact Hours: 3 per week

MNB203 MANAGEMENT II (TO BE OFFERED AUTUMN SEMESTER 1990 FOR THE FINAL TIME)
An extension of MNB103, this subject covers: effective delegation, organisational centralisation and
decentralisation, the informal organisation using committees effectively, practical guidelines to motivation and job design, effective leadership, managing change; building effective management control systems, techniques in controlling human reactions to controlling, wasteful organisational practices and management audits.

**MNB231 GOVERNMENT ECONOMIC POLICY**

This subject is designed to examine some of the problems in the economics of government social policy. Social policy will be analysed in terms of its impact on the allocation of resources and the distribution of income and wealth. The theory of public sector economics will not be studied since the subject Microeconomic Policy covers this area. The latter is a recommended but not a necessary prerequisite for MNB231. However, the theory of taxation, fiscal federalism and the significance of the size and growth of the public sector will be studied. The application of economic analysis in a number of areas of social policy including health and medical care, social security, education, environmental protection and housing will be demonstrated.

**Prerequisite:** MNB103  
**Credit Points:** 12  
**Contact Hours:** 3 per week

**MNB250 DEVELOPMENTAL PSYCHOLOGY**

Offered: Autumn  
This subject provides students with a basis for the study of the promotion of psychological health of individuals at differing developmental stages. The content includes psychological adjustment, developmental theories, developmental aspects of childhood, adolescence, middle age and specific areas such as sexual development, death and dying.

**Prerequisite:** MNB151, or MNB471  
**Credit Points:** 12  
**Contact Hours:** 3 per week

**MNB251 MACROECONOMIC ANALYSIS**

Macroeconomic Analysis is concerned with the economic problems that occur at the national level. The aim of the subject is to ensure that students understand the economic problems at this level and appreciate the effects on the business community and on individuals of the Federal Government’s attempts to manage these problems in Australia. Specific topics covered in the subject include economic systems, management techniques and the dominant themes of political life therein.

**Prerequisite:** MNB101  
**Credit Points:** 9  
**Contact Hours:** 3 per week

**MNB252 BUSINESS STATISTICS**

The primary emphasis is on the concepts and applications of basic statistical methods to business subjects such as accounting, economics, management and marketing. The course is mainly concerned with statistical inference. A set of data based upon the relevant data is used as a theoretical foundation for part of the course, and a means of integrating some of the topics discussed. Users unskilled in statistics may instruct the computer to perform an inappropriate or invalid analysis, or they may be unable to properly interpret the results of the requested analysis. This subject also requires in-depth application of a computer package introduced in Computer Data Analysis.

**Prerequisite:** MNB152 or CSB191  
**Credit Points:** 12  
**Contact Hours:** 3 per week

**MNB253 INTRODUCTORY MARKETING**

This introductory subject focuses on the role of marketing and its importance in contemporary organisations. The subject material covers the key marketing decision areas including the marketing concept; understanding consumer behaviour and preferences; marketing research and marketing information systems; market segmentation and positioning; and an introduction to marketing planning, strategy and control. Emphasis is given to understanding the components of the marketing mix, viz. product planning, management and development; pricing methods and strategies; the elements of promotion, including personal selling, advertising, publicity and sales promotion; and distribution.

**Credit Points:** 12  
**Contact Hours:** 3 per week

**MNB254 PERSONNEL MANAGEMENT & INDUSTRIAL RELATIONS**

This subject is about the way human resources act and are acted upon. It examines human resources from the points of view of the employer, employees, government and other stakeholders. It utilises the pipeline concept to introduce some of the key processes of personnel management. It examines a variety of theoretical perspectives on industrial relations, introduces industrial relations concepts appropriate to middle managers, supervisors, and employee representatives, to enable students to understand the interpersonal and communication skills appropriate to the area. Current issues are highlighted throughout and students are introduced to the basic framework of Australian industrial law.

**Credit Points:** 12  
**Contact Hours:** 3 per week

**MNB256 PSYCHOLOGY**

In studying this subject, students will be taught to critically evaluate statements about behaviour; state and give examples of higher order motives, and apply this knowledge to work and interpersonal situations; understand factors which cause us to misperceive others, and explain how to minimise misperceptions; use effective social skills in interpersonal and group settings; understand theories of attitude, change and know implications for changing the attitudes of others; know theories of behaviour change and understand implications for changing the behaviour of others; use skills to reduce interpersonal distress.

**Credit Points:** 4  
**Contact Hours:** 3 per week

**MNB281 POLITICAL BEHAVIOUR**

The aim of this course is to provide students with an understanding of the causes and significance of political behaviour in Australia. The course is structured around two related perspectives, that of political behaviour at the individual level, and political behaviour as a feature of collective political activity. The course examines the major perspectives used to explain political behaviour in Australia, relating these both singly and together to specific examples of political activity. Finally, the implication of these explanations for patterns of political power is examined.

**Prerequisite/Co-requisite:** MNB183 or MNB181  
**Credit Points:** 12  
**Contact Hours:** 3 per week

**MNB282 STATE GOVERNMENT**

This subject aims to provide an analytical scrutiny of Australian state government with attention concentrated on Queensland. The interaction of parties, groups and institutions is highlighted. The course attempts to identify the outstanding demographic, economic, social and political features of the states and the dominant themes of political life therein.
looks at the political parties, at elections, electoral and voting systems, at pressure groups and the press. It investigates the workings of state parliaments and cabinets. Finally it has something to say about state government administration, about functions and financing and about intergovernmental relations.

Prerequisite: MNB451 or MNB181/183
Credit Points: 12 Contact Hours: 3 per week

MNB319 MEDICAL RECORD ADMINISTRATION
An introduction to the principles of record management and their application in medical record departments. The subject will present an overview of the inter-relationships between the various processes of the medical record department and functionally related areas in health care facilities. Topics include the structure, format and uses of medical records, the function of medical record departments, quantitative analysis of medical records, and health information collection and retrieval systems, both manual and computerised.
Credit Points: 12 Contact Hours: 3 per week

MNB320 MEDICAL TERMINOLOGY
This subject is designed to enable the student to understand, define, spell and pronounce terms related to the diseases and systems of the body, the activities of health professionals and medical technology. A thorough knowledge of medical terminology is necessary for medical record administrators and health administrators to communicate effectively with other health care professionals and contribute to health care planning, evaluation and research studies.
Credit Points: 12 Contact Hours: 3 per week

MNB322 INTRODUCTORY TRAINING TECHNIQUES
Training in Australia. Instructional models and theories of learning. Training needs analysis, task analysis process. Basic training techniques - the information giving model, the skill development model, the discussion model. Training aids/audio-visuals, algorithms. Administering a training course. Evaluating learning - writing and scoring test items. Follow-up training.
Prerequisite: The completion of the equivalent of the first year of the course in which the student is enrolled or MNN100.
Credit Points: 12 Contact Hours: 3 per week

MNB323 SOCIAL PSYCHOLOGY
The focus is upon issues and problems which arise when people interact with each other. Students are expected to master social psychological theories, principles and concepts in order to assist them to describe, explain, predict and influence interpersonal behaviours in both their work and their personal life.
Prerequisite: MNB154 or MNB412 or MNN100
Credit Points: 12 Contact Hours: 3 per week

MNB330 AUSTRALIAN HEALTH INDUSTRY
A broad overview of the systems of health care in Australia and their methods of operation. The public and private health and medical care sectors are discussed. The political environment, health care institutions, community health, public health, and the problems of co-ordination and integration of health services are also studied. Students are introduced to the role of the Health Services Administrator.
Credit Points: 12 Contact Hours: 3 per week

MNB331 HEALTH CARE ECONOMICS I
This subject applies economic analysis to the health care industry. It includes an examination of the demand for health care, the supply of health care, and the market for health care.
Prerequisite: MNB151
Credit Points: 12 Contact Hours: 3 per week

MNB351 ORGANISATIONAL ANALYSIS & MANAGEMENT
This subject is designed to explain how modern organisations operate and their import for the study and practice of management. It focuses on two key areas - analysis and understanding of organisational theory and social processes in organisations. In this context the specific skills held to be valuable to managers will be identified and discussed. The major processes will be examined, with a focus on decision and communication processes.
Prerequisite: MNB153
Credit Points: 12 Contact Hours: 3 per week

MNB361 HUMAN RESOURCES & THE ORGANISATION
This foundation subject examines the interface of human resources with the organisation and its requirements. Concepts and processes for analysing jobs will be examined. Human resources planning, job evaluation, job design and performance appraisal concepts and processes will be built on the foundation data. A substantial level of analytical and professional competence is expected in this subject.
Prerequisite: MNB254 or MNN100
Credit Points: 12 Contact Hours: 3 per week

MNB362 RECRUITMENT & SELECTION
This is a practical subject with strong conceptual and research foundations. It builds on job analysis competencies to deal in depth with recruitment and selection. Major topics include use of advertising, private agencies, the Commonwealth Employment Services and other approaches in recruiting; the use of aptitude and ability tests for selection; screening devices (for example, the weighted application blank); practical selection interviewing; other issues in recruitment and selection. Where appropriate, attention is given to underlying statistical methods (for example, in the estimation of reliability and validity). Legal requirements are emphasised throughout (e.g., anti-discrimination, EEO).
Co-requisite: MNB361
Credit Points: 12 Contact Hours: 3 per week

MNB363 INDUSTRIAL RELATIONS I
This subject aims to provide students with an understanding of the principles and practices of industrial relations in Australia. While considerable help is given by the lecturer in the form of lectures and seminar discussion, this subject should appeal to students who appreciate conducting their own individual research. A comprehensive, annotated bibliography is provided and students must use this as the resource base for their own study of the subject. Particular references to the bibliography are noted under the lecture topics.
Prerequisite: 96 credit points successfully completed from Faculty of Business Degree Program, including MNB254
Credit Points: 12 Contact Hours: 3 per week
MNB364 PERSONNEL ADMINISTRATIVE SYSTEMS/ OCCUPATIONAL HEALTH & SAFETY
Introduction to human resources information systems. An examination of entitlements systems, discipline systems, remuneration packages, workers compensation coverage. Award and legal requirements. Computerised systems. Occupational health and safety requirements under the law. Work conditions and employee behaviour. Managing occupational health and safety.
Prerequisite: MNB254 or MNN100 or the completion of the equivalent of the first year of the course in which the student is enrolled
Credit Points: 12 Contact Hours: 3 per week

MNB371 MICROECONOMIC THEORY
Objectives of the firm and decision making under uncertainty; demand theory analysis and estimation; production and cost analysis; pricing analysis and decision; selected topics e.g., economics of advertising, product quality and capital budgeting.
Prerequisite: MNB151
Credit Points: 12 Contact Hours: 3 per week

MNB372 MACROECONOMIC THEORY
Keynesian, monetarist and neoclassical theories of income determination will be studied and evaluated. This will involve analysis of the role of both demand and supply side factors. Comparative monetary theory and expectations theories will also be addressed.
Prerequisite: MNB251
Credit Points: 12 Contact Hours: 3 per week

MNB382 ADMINISTRATION RESEARCH I
This subject introduces the student who will work in the public sector to methods used to collect, process and analyse information. The emphasis is on practicable procedures rather than mathematical derivation, although an intuitive understanding of basic statistical principles is presented. Among the topics covered are sources of Australian statistical information, how to conduct surveys, the use of statistics to analyse survey results, computer use in survey work, scaling methods, probability theory, time series, confidence intervals, demographic and financial processes. Emphasis will be on S.P.S.S. Computer work on the DEC-10 as well as on certain packages on the HP-3000.
Credit Points: 12 Contact Hours: 3 per week

MNB385 ADMINISTRATIVE THEORY
Public administration is eclectic, drawing upon a wide range of theory and related concepts. The aim of this subject is to ensure students gain a critical understanding of such theory, utilising the analytical frameworks developed in Introduction to Administrative & Political Analysis. The understanding developed will be applied in the examination of administrative systems and their problems in a range of subjects, notably Public Policy Process I & II.
Prerequisite: CMB111, MNB184
Credit Points: 12 Contact Hours: 4 per week

MNB391 MARKETING MANAGEMENT
This subject is concerned with the tactical decisions required at the product or middle management level. Particular emphasis will be placed upon new product and services innovations with an introduction to the development of strategy in terms of defining marketing opportunities, developing and implementing marketing plans. There will be a specific focus on market segmentation, positioning, measuring market opportunity, marketing communications, the promotional mix, distribution, price determination together with retail/wholesale, service marketing and not-for-profit marketing as applied in the strategy developing process.
Prerequisite: MNB253 or MNN204
Credit Points: 12 Contact Hours: 3 per week

MNB392 CONSUMER BEHAVIOUR
This course examines the various theories of consumer behaviour and is designed to provide students with an insight into consumer needs, attitudes and behaviour and their impact on all aspects of marketing strategy.
Prerequisite: MNB253 or MNN204
Credit Points: 12 Contact Hours: 3 per week

MNB405 MANAGEMENT SCIENCE A
The major behavioural objectives are to introduce students to important models of operations research; students are made aware of how these models are used in accounting and/or management decision-making situations; students become familiar with solving decision problems through their own calculations and the use of a computer; students will have an appreciation of the strengths and weaknesses of the models.
Credit Points: 9 Contact Hours: 3 per week

MNB411 EXPORT MANAGEMENT
The role of government, including need to export, and export incentives; methods of exporting, including agents and merchants, consultants and overseas organisations; bases for export sales, including terminology and exporter’s responsibilities; export documentation; finance of export trade, including methods of payment, finance for export transactions and foreign exchange transactions; export finance, insurance corporation; modes of international transport; marine insurance; quoting for export, including pricing policies, export costs, marketing and packaging and quotations. A major case study is included as part of the study program.
Prerequisite: First year of BBus (Mgt) program
Credit Points: 12 Contact Hours: 3 per week

MNB413 APPLIED COGNITIVE PSYCHOLOGY
Offered: Spring
Introduction to cognitive psychology; perception processes in cognition; memory processes in cognition; thinking processes in cognition; includes problem solving and decision making; application of cognitive psychology. Artificial intelligence, ergonomics and job design also included.
Credit Points: 9 Contact Hours: 3 per week

MNB419 MEDICAL RECORD ADMINISTRATION II
This subject is designed to provide the student with an understanding of specialised medical and health record systems and techniques, particularly data capture techniques and models. The students will study clinical classification principles and systems used in the retrieval of health information for research, evaluation, planning and statistical collection in the health services.
Prerequisites: MNB319 and MNB320
Credit Points: 12 Contact Hours: 3 per week

MNB420 ADVANCED TRAINING TECHNIQUES
Planning and programming management and supervisory development. Career planning. Developing a complete training program. Advanced training techniques - case study, role play, laboratory training,
simulations, games, programmed instruction, computer assisted instruction, individualised learning, video and learning. Managing the training and development function—planning, organising staffing, directing, controlling. The competencies of a trainer, Experiential and project activities.

Prerequisite: MNB322
Credit Points: 12  Contact Hours: 3 per week

MNB426 SALES MANAGEMENT
This subject introduces the student to the range of analytical activities performed in the design and management of the selling function of the organisation. These activities include sales forecasting, sales force size, territory management and selling logistics, sales force motivation, sales negotiation and so on. The subject combines theory and practice and uses a case study approach to consolidate the learning process.

Prerequisite: MNB253 or MNN204
Credit Points: 12  Contact Hours: 3 per week

MNB430 APPLIED HEALTH CARE ANALYSIS
This subject is an introduction to epidemiology and biostatistics. Descriptive and analytical epidemiological methodology is used to study the occurrence of acute and chronic disease and in health services planning are studied. The statistical techniques appropriate to public health problems are included at an introductory level.

Prerequisite: MNB382
Credit Points: 12  Contact Hours: 3 per week

MNB431 HEALTH CARE ECONOMICS II
The objective of this course is to follow up and continue the study of economics as applied to health care. Advanced level studies in health economics are critically examined.

Prerequisite: MNB331
Credit Points: 12  Contact Hours: 3 per week

MNB432 BUSINESS STRATEGY
Managers make decisions within a macroeconomic environment. The major objective of this subject is to provide students with sufficient knowledge of the current state of macroeconomic theory and policy to enable them to understand macroeconomic arguments as they are presented in the wider economic environment and in the media. The subject gives particular emphasis to competing views about the nature of the contemporary economy and about the causes of, and practical solutions for, its current problems.

Prerequisite: MNB251
Credit Points: 12  Contact Hours: 3 per week

MNB450 PHYSIOLOGICAL & HEALTH PSYCHOLOGY
Offered: Spring
This subject examines the physiological and cognitive bases to human behaviour. In particular, it gives attention to such areas as the nervous and endocrine systems of the body, the brain and its functioning: learning, information processing, memory and problem solving; consciousness and altered states of consciousness; hormones and drugs and their effects on emotional expression; the development of intelligence; and overall the relation of physiological and cognitive factors to motivation and behaviour.

Prerequisite: MNB461 or MNN100
Credit Points: 12  Contact Hours: 3 per week

MNB451 GOVERNMENT, BUSINESS & LAW
The purpose of this subject is to provide a basic understanding of government, business and the law.

It will stress that politics is an all-pervasive aspect of human societies, though its semantic definition varies from culture to culture. This will be illustrated by demonstrating the important senses in which government is a political activity. It will then examine the specialised governmental and legal institutions and processes, the extent to which they structure the frameworks within which business takes place, and feedback from business into the political system. The subject will then use a series of case studies to illustrate and analyse selected business-government relationships.

Prerequisite: MNB181 or MNB263, Australian National Government A or B, or MNN203 Government Business Relations.

MNB461 FOUNDATION HR COMPETENCIES
This subject analyses and develops the personal and interpersonal competencies (in both cognitive and affective domains) which form the foundations from which a HR practitioner must operate. It aims to develop knowledge of and skills in self-awareness, personal and interpersonal development and interpersonal processes. It emphasises the design of process to achieve outcomes.

Prerequisite: MNB154 or MNN100
Credit Points: 12  Contact Hours: 3 per week

MNB462 ADVANCED ORGANISATION BEHAVIOUR
An in-depth study of organisational behaviour. Major organisational aspects (the individual, groups, technology, formal organisation structure) are considered and integrated into a comprehensive analysis of the factors affecting behaviour in the organisation, with the emphasis on practical application. Particular attention is given to methods of research into motivation, leadership and structure in the organisational context. The emphasis throughout is on rigorous analysis and evaluation.

Prerequisite: MNB154
Credit Points: 12  Contact Hours: 3 per week

MNB463 ORGANISATION DEVELOPMENT
The subject has two major objectives. The first is to develop conceptual and theoretical models and skills in relation to the general process of introducing change into organisations, and the specific techniques/interventions which are most often used in organisation development. The second is to develop practical skills wherever possible in relation to the introduction of change, in particular, skills related to the specific interventions/techniques used in organisational development, and diagnostic and analytical skills useful for organisational development. Special attention is focused on the work group and its processes as a key structural unit in organisational change.

Prerequisite: MNB461 or MNN100
Credit Points: 12  Contact Hours: 3 per week

MNB471 MICROECONOMIC POLICY
Introduction to welfare economics. Public utility pricing and investment. Market efficiency and competition. General utility and public goods. Cost benefit analysis. Case studies of Australian industries (e.g., air transport).

Prerequisite: MNB371 or MNB331 or MNN106
Credit Points: 12  Contact Hours: 3 per week
MNB472 MACROECONOMIC POLICY

Monetary and fiscal policies based on various theoretical underpinnings will be discussed. In particular, the role of discretionary-monetary policy will be addressed; as will government expenditure and taxation, the size of the budget deficit/surplus, and the management of an open economy (e.g., Australia).

Prerequisite: MNB372
Credit Points: 12  Contact Hours: 3 per week

MNB482 LOCAL GOVERNMENT

This subject examines the vital role of local government as the third sphere of government in Australia. Its nature and constitution, functions, finance and the role of professional employees are some of the topics examined in the context of questioning local governments' capacity to effectively and efficiently provide services, and to develop as a participative grass root democratic system. The emphasis is on local government in Queensland, but interstate and overseas examples are included with particular emphasis on the UK since the Redcliffe Maud and Bains Reports and recent reforms.

NB: For students enrolled in the Public Administration degree only, this subject includes a one hour per week communication component (4 hour subject).

Prerequisite: MNB181/183
Credit Points: 12  Contact Hours: 4 per week

MNB483 ADMINISTRATION ANALYSIS

This subject introduces students in public sector administration to the interpretation and use of statistical information. The subject covers the most commonly used techniques of handling data, with an emphasis on the purpose of each technique rather than on its mechanics. As well as being proficient for general administration, students who pass this subject will be trained for junior and middle-level research positions. An important part of this subject is the research project each student will do in a field he/she is interested in (for example, health administration, economics, local government) using the techniques taught. Among the topics covered are: hypothesis testing, regression and correlation, multiple regression, forecasting, time series index numbers, and an application of statistical techniques to survey analysis. Students will use the HP-3000 Computer and the DEC-10 system with particular emphasis on S.P.S.S.

Prerequisite: MNB382
Credit Points: 12  Contact Hours: 3 per week

MNB484 PUBLIC PERSONNEL MANAGEMENT

To provide the student with an understanding of the principles and practices which surround personnel management in the public sector. The focus on public sector personnel management is important since there exists a body of law, rules and regulations at each level of government which affects the performance of each personnel activity-human resource planning, job analysis, recruitment, selection, performance evaluation, promotion and training. This subject addresses three factors basic to the field of personnel management: the importance of the law; the perspective of the individual employee; and the function of public personnel activities in defining public policy.

Prerequisite/Co-requisite: MNB385
Credit Points: 12  Contact Hours: 3 per week

MNB485 PUBLIC ENTERPRISE

Public enterprises occupy a central economic role in the Australian economy, at both federal and state levels. They also occupy a unique position astride the public and private sectors, and are subject to both the forces of the market and of the political system. This subject will examine the origins and development of this role, and the unique position of public enterprises in order to illustrate the demands upon the public enterprise manager.

Prerequisite: MNB451 or MNB181 and 8 subjects in either B. Business - Public Administration, or 8 subjects in BBus - Management.
Credit Points: 12  Contact Hours: 3 per week

MNB491 RETAILING MANAGEMENT I

This subject provides a comprehensive introduction to the techniques, concepts and analytical issues that are involved in retailing management. The dynamics of the retail system are examined from a strategic marketing viewpoint and include a basic appreciation of retail customer behaviour and retail information needs. The analysis of store location and the evaluation of retail trade areas and store siting determinants are given detailed attention along with store layout and design. Elements of merchandising, franchising and promotion are also examined. The learning process is further extended by way of visits to local retail stores and shopping centres, and by project work covering the investigation of new retail business opportunities.

Prerequisite: MNB253 OR MNN204
Credit Points: 12  Contact Hours: 3 per week

MNB492 SERVICES MARKETING

This subject is concerned with the special characteristics of services and possible strategies to deal with those characteristics. Topics to be covered include the nature and classification of services; the differences between services and products and their implications for the marketing/customer mix and for marketing strategy; and the management of product support services. The following will also be introduced: the concept of productivity for services; including the management of demand and supply; and the search for service quality and consistency, including the issue of standardisation vs. customisation.

Prerequisite: MNB253 or MNN204
Credit Points: 12  Contact Hours: 3 per week

MNB503 THE TOURISM INDUSTRY IN AUSTRALIA

In recent years the tourism and hospitality sector has been the major growth sector in the Australian economy. The purpose of this subject is to undertake an economic, political and managerial analysis of this sector, its origins, growth and significance, with a particular focus on management needs relevant to the industry. The subject will draw upon the analytical methods and techniques developed in the degree to enable a multidisciplinary analysis of an applied nature.

Prerequisite: 12 subjects in BBus - Management
Credit Points: 12  Contact Hours: 3 per week

MNB504 INTERNATIONAL POLITICS & BUSINESS

This subject will provide a basic outline of the contemporary, international political system, with a focus on Australia's major trading partners. It will examine the major actors in the system, and regional subsystems, with an emphasis on states, international organisations and multinational corporations. The linkages between domestic and foreign policies relevant to business will be examined, both as regards processes and policy content.

Prerequisite: MNB431 or MNB181 or 183 or MNN203 or MNN811
Credit Points: 12  Contact Hours: 3 per week
MN505 HEALTH MANAGEMENT I
A problem solving approach which relates the science of management to decision making and control in health services and administration. Management science (operations research) techniques are learned and applied in weekly case studies.
Prerequisite: 16 subjects in the B.Bus - Health Administration Degree.
Credit Points: 12 Contact Hours: 3 per week

MN509 PUBLIC POLICY & BUSINESS
The policy process in government is generally more complex and encompasses a wider range of variables than is the case in the private business sector. Public enterprises are not exempt from these processes, which can and do have a crucial impact upon the enterprise’s operations. Thus, this subject aims to provide an understanding of public policy processes relevant to public enterprise managers, and to help develop a capacity for the analysis of policy content.
Prerequisite: MN545, MN686 or MN208
Credit Points: 12 Contact Hours: 3 per week
Note: This subject is not available to postgraduate students who have taken the subjects MNP508, MNB511, and MNB514. Students are expected to take one or several learning activities with the subject.

MN515 INDEPENDENT STUDY UNIT
This subject allows students to undertake a supervised research project in the industrial relations area. The topic must be chosen by the student with the approval of their supervisor. The project should entail the study of a significant topic in industrial relations and result in the production of a thesis. Assessment will judge the student’s ability to research and understand the literature surrounding the chosen field. In normal circumstances the student will also be expected to demonstrate an ability to collect some primary data, i.e., not rely totally on library research in the construction of the project.
Prerequisite: MN53 or MNB510
Credit Points: 12 Contact Hours: 3 per week

MN516 ORGANIZATIONAL SOCIOLOGY
The aim of the subject is to ensure that the student gains an understanding of organisations in the public sector. It builds upon the Introduction to Sociology and Theory and Administration subjects to provide a detailed understanding of organisation theory.
Prerequisite/Co-requisite: Eight subjects in the Bachelor of Business Degree including MN53 or MNB510
Credit Points: 12 Contact Hours: 3 per week

MN517 SPECIAL TOPIC IN INDUSTRIAL RELATIONS
According to student demand, a Special Topic in Industrial Relations will be offered. Enterprise level HRM/R, and Comparative Industrial Relations are subjects that are likely to be offered as special topics at an earlier stage.
Prerequisite: Determined by arrangement with Co-ordinator
Credit Points: 12 Contact Hours: 3 per week

MN518 HEALTH ADMINISTRATION PROJECT
This subject enables students to do follow-up work of a practical nature in an area of interest to them. Before being admitted to this subject, students will have completed all the required coursework in the discipline area of the proposed project. Projects may be undertaken in any of the discipline areas covered by the degree e.g., health economics, law, medical sociology, health finance, medical record administration, health management, statistics, epidemiology and architecture, either individually or in small groups. Projects must have prior approval and will be closely supervised. Being of a practical nature, projects will be undertaken in a health or medical care delivery setting e.g., hospital medical records department; group practice; local authority health department; State health department.
Credit Points: 12 Contact Hours: 3 per week

MN519 MEDICAL RECORD ADMINISTRATION
This subject is designed to enable students to recognise and use effectively the types of classification systems utilised for the retrieval of medical information. It builds on to student’s experience from MN519 by refining and enhancing their practical coding skills. It explores the use of coded data in case mix, particularly diagnosis related groups. The examination of specialised types of health records within hospitals, health record systems outside hospitals and systems for the registration and notification of disease is linked with the specialised classification systems developed to aid the retrieval of information from these various health information systems.
Prerequisite: MN519
Credit Points: 12 Contact Hours: 3 per week

MN523 INDEPENDENT STUDY HRD
This subject will enable students to demonstrate a competence at directing their own learning. This is essential for professionals who must subsequently keep themselves up-to-date in their area of expertise. To this end, students (either individually or in small groups) will, within an approved content area, undertake one or several learning activities with the approval of a supervisor. Appropriate activities could include literature review, research (mini-thesis), project, practicum (work placement) or anything else deemed acceptable by the supervisor.
Prerequisite: MN53 or MNB510
Credit Points: 12 Contact Hours: 3 per week

MN524 RETAILING MANAGEMENT II
The basic objective of this subject is to provide students with both a strong conceptual and practical grounding in those retailing activities that comprise the merchandising function of the different types of retail stores including the distributors of durable consumer goods. This area of management attention and control is a basic and vital one for every retail institution from the large supermarket or department store to the smallest corner store. The course covers those topics associated with the merchandising of retail products: forecasting customer demand, planning, what, why, and how when to buy, pricing, store display and promotions, as well as the managerial control of buying and stocking merchandise.
Prerequisite: MN523
Credit Points: 12 Contact Hours: 3 per week

MN525 MARKETING DECISION MAKING
This subject is an advanced treatment of the theory and application of quantitative models in marketing. The various analytical models cover the evaluation of marketing policy and strategy, consumer and organisational buying behaviour, market segmentation and demand assessment, product, price, promotion,
distribution and selling decisions. These models lead to the study of an integrated decision support system for marketing management. Application to real-life examples is stressed throughout case studies and experiential exercises providing the learning framework.

**Prerequisites:** MNB391 or MNN204, MNN202
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB526 INTERNATIONAL MARKETING

This course endeavours to introduce the student to the nature and practice of international marketing. It assumes a familiarity with general marketing management and builds on the knowledge to develop insight into and understanding of the peculiar nature of international marketing management and the problems of marketing within a number of different national markets. The course is managerial in the sense that it focuses on the problems and decisions facing managers of international marketing in business enterprises.

**Prerequisites:** MNB253 or MNN204
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB527 TRANSPORT ECONOMICS

A study of the economics of the management of private and public transport operations. These operations relate to passenger movement and general freight movement. Each operation will be examined in terms of consumer demands, cost, market structure, pricing and non-price strategy, regulation, handling and storage techniques.

**Prerequisites:** MNB371, MNN106
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB528 PACIFIC RIM ECONOMIC RELATIONS

This subject defines Pacific Rim nations as including Australia, South-East Asia, China, Japan, Canada, and the United States of America, Central and South America and New Zealand. It examines the evolution of economic relations between Australia and the other nations in the Pacific Rim category. Matters of trade, investment and migration are emphasised. An analysis of the impact of political, social and cultural variables on these relations is given a high priority. The subject also charts future changes in these relationships. In this way it seeks to contribute to the development of a strategic management perspective.

**Prerequisites:** MNB372
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB533 INTERNATIONAL HEALTH CARE SYSTEMS

The objective of this course is to make students aware of how different countries have organised their health delivery systems. The comparisons will be historical and economic. An analysis will be made of the growth of "the welfare state" in a number of countries e.g., United Kingdom, USA, Sweden, Canada, with particular reference to the organisation and delivery of health services. International organisations working in health will be studied. Students will be introduced to the distribution of diseases in both the West and the Third World; the distribution of health and material resources; international agencies; aid programs and their roles; functions, effectiveness and co-ordination problems.

**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB534 HEALTH SERVICES EVALUATION

This subject is a study of process evaluation, program evaluation and evaluation research with applications to the health fields. It is designed for health professionals in both the administration and practice areas. Theory, practice, the utilisation of evaluation results and the administration of evaluation studies are emphasised in this course. Specific problems such as criteria auditing, risk management, utilisation, review and accreditation are addressed.

**Prerequisites:** MNB543
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB543 HEALTH SERVICES PLANNING

This subject deals with the administrator's role in the planning and development of health care facilities and health services. It includes an examination of the reasons for planning, the concepts and principles of planning and the types and categories of planning applied to the health industry.

**Prerequisites:** MNB430, MNB330 or MNB533
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB551 OPERATIONS MANAGEMENT

Operations Management is an advanced treatment of the management and control of organisational systems. The subject involves the functional analysis of short and medium-term operations using management science techniques. The medium-term analysis provides an operational link with strategic management decision making required in the following core subject Managerial Strategy. The subject provides a logical flow of learning from understanding and analysing an operation, work task or organisational activity, to managing raw materials, work-in-process and finished goods; through to layout analysis, job scheduling and operational planning.

**Prerequisites:** MNB351 or MNN202
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB552 INDEPENDENT STUDY HRM

This subject enables students to demonstrate an ability to direct their own learning, a key competence for professionals who must subsequently keep themselves up-to-date in their area of expertise. To this end, students (either individually or in small groups) undertake one or several learning activities with the approval of a supervisor. Appropriate activities could include literature review, research (mini-thesis), project, practicum (work placement), and anything else deemed acceptable by the supervisor.

**Prerequisites:** MNB361, MNB461, 2 HRM electives or MNN100
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB571 ADVANCED ECONOMIC THEORY & POLICY

Considers the foundations of economic thought and recent contributions to the literature of micro and macro theory and policy and their relevance for public and private decision making in the Australian context.

**Prerequisites:** MNB372, MNB371 or one of these plus the other as a co-requisite.
**Credit Points:** 12  **Contact Hours:** 3 per week

### MNB572 APPLIED ECONOMETRICS

Application of econometric techniques to economic models in micro and macroeconomics. The models will be used to explain or predict the behaviour of such economic variables as demand, production cost, interest rates, investment activity, and government activity.

**Prerequisites:** MNB252, MNB371, MNB372 or one of these plus the other as a co-requisite.
**Credit Points:** 12  **Contact Hours:** 3 per week
MNB582 FINANCIAL ADMINISTRATION
This subject aims at ensuring the student has an understanding of the nature of the systems of public financial administration in Australia, the major institutions and procedures involved, the incidence of public expenditure and its significance. Particular attention is paid to intergovernmental financial relations.
Prerequisite/Co-requisite: MNB181 or MNB183
Credit Points: 12 Contact Hours: 3 per week

MNB586 COMPARATIVE POLITICS
To widen student's knowledge and perspectives of political systems. A variety of liberal democratic, socialist and other types of states will be examined. The emphasis is upon comparative study, rather than a country by country examination of separate political systems.
Prerequisites: MNB183 or MNB181
Credit Points: 12 Contact Hours: 3 per week

MNB588 PUBLIC POLICY PROCESS
Public enterprises at both State and federal levels pursue business functions as part of the institutions of government. They are subject to the public policy processes of government in a wide variety of ways, from financial targets to personnel and industrial relations policies. They are also important actors in the public policy process. Hence, it is essential for managers in public enterprises to understand the position they occupy in relation to such processes. The aim of this subject is to provide such an understanding, especially in relation to formulation and legitimisation.
Prerequisites: MNB451, MNB351 or MNB181, MNB385
Credit Points: 12 Contact Hours: 3 per week

MNB591 ECONOMICS OF INFORMATION
Information as a commodity; the demand for information; the economics of the production of information; the costs of information; the cost; pricing and charging out of information within organisations; the market supply of information; information technology and the supply curve; the structure of the information industry; information and industry concentration; public good characteristics of information; government intervention and economic impacts in the information industry.
Credit Points: 9 Contact Hours: 3 per week

MNB592 MARKETING RESEARCH
This subject has two main purposes, to look at the theoretical foundations behind both qualitative and quantitative marketing research, and to undertake a "hands on" marketing research project whereby small groups of students will be asked to liaise with the client; determine the most suitable way of gathering information; undertake the research; and finally, present the results. Topics to be covered in both the theoretical and practical areas of the subject include problem formulation; research design and sources of information; design and forms of data collection; sample design; analysis and interpretation of data, and the marketing research report and presentation.
Prerequisites: MNB391, MNB493 or MNN204, MNB391 or CMB211
Credit Points: 12 Contact Hours: 3 per week

MNB605 HEALTH MANAGEMENT II
Managing the hospital as a system; managerial information processing; the process of influence in the management of hospitals; managerial styles and the co-ordination and correlation of managerial expectations; hospital management in comparison with other managerial systems e.g., commerce, government. This subject continues the problem solving approach of Health Management I. It departs from the management of hospitals to include considerations of community health, mental health, and group practice management.
Prerequisites: MNB505
Credit Points: 12 Contact Hours: 3 per week

MNB611 SPECIAL TOPIC IN TOURISM
The aim of this subject is to permit an in-depth examination of an issue of importance to the industry. Hence, the actual content will vary, depending upon the issue under examination. Issues currently under consideration are the impact of special, or hallmark events upon the industry, drawing upon School of Management expertise in this area; the gaming industry, its value and impact; and government policy toward the industry, with a special focus upon State owned, tourist corporations. Each issue will be examined from a multi-disciplinary perspective, focused upon managerial considerations.
Prerequisite: MNB503
Credit Points: 12 Contact Hours: 3 per week

MNB612 TRANSCONTINENTAL MANAGEMENT
As a small, relatively open economy, heavily dependent upon commodity exports, and with national policies firmly oriented toward an increase of exports, the need for an understanding of the complexities of transnational management have become greater. This subject is intended to provide a basic outline of management in the transnational context. It will draw upon earlier core subjects and their explanation of management roles to illustrate the manner in which those roles are influenced by the transnational context. The range of problems faced in such situations will be examined, as well as the institutional and procedural solutions adopted, their advantages and disadvantages. The focus will be upon the transnational environments faced in major and developing markets of concern for Australian businesses.
Prerequisite: MNB504 and 12 subjects in the BBus - Management program, or 8 subjects in the MBA program.
Credit Points: 12 Contact Hours: 3 per week

MNB613 GOVERNMENT POLICY & THE TOURISM INDUSTRY
The aim of this subject is to provide a detailed examination of government policy as it influences the tourism industry. It will include the examination of the policies of all levels of government and those international agreements of most significance to the industry, for example, those regarding air traffic rights. The specific governmental institutions and policy processes relevant to the industry will be examined, with a focus on the need to make effective use of the channels provided for access. The policies will be examined in their historical and contemporary context, concluding with an examination of current developments and their likely impact.
Prerequisite: MNB451 or MNB181 or MNB183 or MNN203 or MNN811
Credit Points: 12 Contact Hours: 3 per week

MNB618 HEALTH COMPUTER SYSTEMS
Principles and applications of electronic data processing in health care settings. Computerised health information systems are analysed from a variety of viewpoints including the objectives of the system, specific methods employed to meet user needs, structu-
The subject explores the role and functions of the medical record administrator in the management of health care services. Topics include the legal and ethical implications of health record management; extended care facilities and their special needs; occupational health and health records for industry; health records for community/primary care units; the potential of modern technology in the effective running of medical record services. The clinical classification component will concentrate on nosologic problem solving, collection strategies for disease and operation indexes and the practical application of classifications in health care settings.

Prerequisite: MNB519
Credit Points: 12 Contact Hours: 3 per week

MNB624 PROMOTIONAL STRATEGY

This course introduces the student to concepts of promotional strategy. An overall appreciation will be discussed together with a detailed coverage of the management of the advertising functions including objectives of the promotional program, organising and managing the human resources, characteristics of advertising media (TV, radio, magazine etc.), strategy for selection of media vehicle, investigating advertising effectiveness and formulation of a "promotional strategy" for a local firm or institution. A proportion of the semester will be taken with a coverage of direct marketing and direct response advertising.

Prerequisite: MNB253 or MNN204
Credit Points: 12 Contact Hours: 3 per week

MNB625 PROFESSIONAL MARKETING PRACTICE

With the approval of the lecturer involved the students will undertake a preferred study program within the marketing framework, e.g., some particular area of the marketing mix. This study program will require students to undertake a project or 'internship' with a suitable company, where they will actively work on a part-time basis. The program will be aligned as closely as possible to the preferred area of study. Students will be required to submit a number of reports reflecting the theoretical concepts learned and the application to their job experience.

Prerequisite: MNB391, MNB493 or MNN204, MNB391
Credit Points: 12 Contact Hours: 3 per week

MNB626 INTERNATIONAL ECONOMICS

The subject will concentrate on Australia's experience in international economics. Australia's reason for trade and direction of trade will be considered. Restriction on trade will be examined and debate will cover the Industries Assistance Commission and protection of Australian domestic producers. Appreciation, depreciation and external and internal balance in Australia will be discussed. Special attention will be paid to floating exchange rates and foreign exchange risk management under floating exchange rates; monetary policy and financial deregulation; Keynesian and monetarist theories of the balance of payments; the national debt; ASEAN.

Prerequisite: MNB372 or MNN106
Credit Points: 12 Contact Hours: 3 per week

MNB627 PROGRAM EVALUATION

The objective of the subject is to provide decision makers with a methodology for efficient project selection based on economic criteria. The use of cost benefit analysis, cost effectiveness analysis and program budgeting studies will be investigated. The development of such techniques will involve consideration of objectives, benefits, costs, prices, discount rates and investment rules. The application and limitations of such principles will be demonstrated by the use of case studies.

Prerequisite: MNB371 or MNB471 or MNN106
Credit Points: 12 Contact Hours: 3 per week

MNB630 INDUSTRIAL RELATIONS II

The aim of this subject is to equip students with a detailed knowledge of changes in the Australian community which will have an impact on industrial relationships over the next ten years. The subject aims to develop this understanding largely by means of individual student research into relevant topics. While considerable assistance is given by the lecturer in the way of seminars, advice on research methods, and printed material, this subject should appeal particularly to students who appreciate conducting their own individual research.

Prerequisite: 96 credit points subjects successfully completed from Faculty of Business degree program including MNB254.
Credit Points: 12 Contact Hours: 3 per week

MNB633 DISTRIBUTION MANAGEMENT

Distribution Management deals with the application of the basic principles underlying the distribution of an organisation's products from their production or receipt to final delivery to a customer. Using a systems approach, the subject deals with such practice topics as warehouse location and management and choice of transportation modes. The subject is intended for students working in the marketing and transport/distribution fields but will also be valuable for those in other areas, e.g., business research, retailing, accounting.

Prerequisite: MNB391 or MNB371 or MNN204 or MNN106
Credit Points: 12 Contact Hours: 3 per week

MNB639 ECONOMICS OF STRATEGIC MANAGEMENT

This subject examines the internal structure, operation and growth of organisations with special reference to commercial institutions. A wide range of analytical tools is used to address major issues which include the determinants of the internal structure of organisations; the relative effectiveness of the institutions of market and hierarchy in reaching decisions; the determinants of vertical integration; the determinants of the growth and functioning of internal labour markets; the reasons for the development of firms as economic institutions; and the role of the entrepreneur in decision-making.

Prerequisite: MNB371 or MNN106
Credit Points: 12 Contact Hours: 3 per week
Note: This subject is not available to students who have taken and passed MNN814.

MNB642 BUSINESS FORECASTING

A wide range of companies and government organisations use forecasting in such areas as sales, planning, marketing research, pricing, production planning and scheduling, financial planning, etc. This course has been designed to meet the need for more and better forecasting in an organisation, so that students with
limited training in mathematics and statistics can use forecasting techniques much more effectively. A system of programs called SIBYL/RUNNER will be used by the students. This system can be used equally well by both the novice and the forecasting expert. The authors of this system have maintained simplicity for the management user. Finally a number of case examples that provide exposure to the practical considerations involved in management forecasting problems will be presented.

Prerequisites: MNB232 or MNN307
Credit Points: 12 Contact Hours: 3 per week

■ MNB651 MANAGERIAL STRATEGY
The basic objective of the semester's work is to help the student develop a personally useful and explicit way of thinking about the business enterprise as a total system in a total environment; to help to identify the crucial elements and relationships in a situation; analyse systematically and rigorously the basic opportunities, constraints and issues and trace out the impact of an action in any one part upon the others and upon the totality. It is the capstone subject in the BBus(Mgt) degree, and aims to integrate student's previous studies.
Prerequisites: MNB551 or MEB670
Credit Points: 12 Contact Hours: 3 per week

■ MNB661 INTERVIEWING & COUNSELLING
The unit aims to develop practical skills in aspects of employment interviewing through an introduction to the theory and principles of interviewing and through supervised experience. Attention will be given to the characteristics of the interview situation; the interviewer, the interviewee and their inter-relationships. Interview areas covered will include the personal interview (information seeking) and the employee-personnel interviews (recruitment, appraisal, disciplinary and exit). Personality theory, guidance and counselling theory and techniques will be introduced. An emphasis will be placed on understanding and practicing the human skills required to facilitate the development of others either in individual interaction or group interaction. Role plays, modelling, case-studies, peer and lecturer assessment and guidance may be used towards developing practical skills.
Prerequisites: MNB154, MNB461 or the completion of the equivalent of the first year of the course in which the student is enrolled or MNN100.
Credit Points: 12 Contact Hours: 3 per week

■ MNB666 COUNSELLING FOR HEALTH PROFESSIONALS
Offered: Spring
A study of the psychology of illness and the counselling process.
Credit Points: 4 Contact Hours: 2 per week

■ MNB683 COMPARATIVE ADMINISTRATION
This subject widens the student's perspectives by examining administrative structures and their functioning in a variety of systems. Students should realise that we in Australia do not have a monopoly on administrative wisdom, and that other systems may be just as effective in their particular environments. Liberal-democratic and totalitarian regimes will be examined with countries chosen to represent unitary systems, federal systems and developing and third world systems. For each country included in the final selection, bureaucratic structure and functions will be examined together with personnel practices, major reforms and committees of inquiry.
Prerequisites/Co-requisites: MNB451 or MNB856
Credit Points: 12 Contact Hours: 3 per week

■ MNB686 GOVERNMENT & BUSINESS
To develop an understanding of the relationships between business and government in Australia in historical and contemporary perspective. The subject will build upon the base provided in MNB451, providing a detailed examination of the historical and contemporary context of government business relationships in Australia at federal and State levels. It will provide the detailed understanding for the subject MNB509.
Prerequisites: MNB451 or MNB818
Credit Points: 12 Contact Hours: 3 per week

■ MNB687 PUBLIC POLICY PROCESS II
Public enterprises at both State and federal levels pursue business functions as part of the institutions of government. They are subject to the public policy processes of government in a wide variety of ways, from financial targets to personnel and industrial relations policies. They are also important actors in the public policy process. Hence, it is essential for managers in public enterprises to understand the position they occupy in relation to such processes. The aim of this subject is to provide such an understanding especially in relation to policy implementation and evaluation. It completes the examination of the public policy process commenced in MNB588.
Prerequisite: MNB588
Credit Points: 12 Contact Hours: 3 per week

■ MNB691 STRATEGIC MARKETING
This course is designed to develop a specific understanding of marketing strategies with an in depth consideration of selected areas of decision-making.
The course will also cover current and future dimensions of marketing. Students will be exposed to a variety of advanced marketing techniques and issues through lectures, seminars and case analyses.
Prerequisite: MNB582 or MNB250, MNB391
Credit Points: 12 Contact Hours: 3 per week

■ MNB998 SPECIAL TOPIC IN PUBLIC ADMINISTRATION
The aim of this subject is to help the student apply in detail the modes of analysis developed in the core subjects to specific policy areas. In this way their immediate relevance can be demonstrated and a thorough understanding of a policy area gained.
Prerequisite/Co-requisite: MNB588, MNB251
Credit Points: 12 Contact Hours: 3 per week

■ MND011 PSYCHOLOGY I
The main objectives of this subject are: Students can explain concepts in the areas of social perception, transactional analysis and motivation, and give examples of these in their own and client behaviour; students can facilitate an interpersonal interaction using skills of transactional analysis and helping; students recognise difficulties in interaction and choose appropriate skills to overcome some difficulties.
Credit Points: 6 Contact Hours: 3 per week

■ MND033 PSYCHOLOGY II
This subject seeks to enable students to outline assumptions of stage and learning theory approaches to understanding development; outline the following theories of development: Piaget, Erikson, social learning theory; state main research findings for each
of the following stages of the life cycle (childhood, adolescence, young adulthood, middle age, ageing); distinguish between normal and abnormal adjustment, and explain issues regarding the definition of "normal" behaviour; recognise when referral for specialised help is required; state types of programs available and basic assumptions of different treatment strategies.

Credit Points: 6  Contact Hours: 3 per week

MND055 PSYCHOLOGY III

The main objective of this subject will be to educate students to identify problem behaviours in clients and indicate, select and use appropriate intervention and interpersonal skills to assist adjustments of people with psychological problems. The topics covered in the subject include neurosis; psychosis; child psychology; mental retardation and other psychological approaches.

Prerequisite: MND033
Credit Points: 6  Contact Hours: 3 per week

MND066 PSYCHOLOGY IV

The purpose of this subject is to teach students to explain major theories of counselling; initiate the counselling process; identify appropriate goals and strategies; use appropriate techniques and strategies to facilitate client change; evaluate the outcome of counselling.

Prerequisite: MND055
Credit Points: 6  Contact Hours: 3 per week

MND129 PSYCHOLOGY FOR HEALTH PROFESSIONALS A

The purpose of this subject is to teach students to be able to demonstrate effective interpersonal skills in relation to patients and other health professionals; diagnose patient needs and respond appropriately; state causes of stress, effects on health, and indicate appropriate techniques to reduce stress; indicate techniques that may be used to modify patient attitudes and behaviour; demonstrate appropriate problem-solving skills in their work situation.

Credit Points: 4  Contact Hours: 3 per week

MND222 MANAGEMENT PERSPECTIVES

This subject will teach students to apply a basic knowledge of the management process to the administration of nursing service; analyse the decision-making process; utilise a management approach in administering nursing service; utilise selected management techniques appropriately; explore methods by which nurse administrators may participate in and initiate change in organisations; examine the relevance of the concepts and principles derived from these models for the administration of nursing service.

Credit Points: 6  Contact Hours: 3 per week

MND415 PSYCHOLOGY

The main purpose of this subject is to educate students to recognise the need for and demonstrate effective interpersonal skills in relation to clients and co-workers; diagnose client and co-worker needs and respond appropriately; state causes of stress, effects on health, and indicate appropriate techniques to reduce stress; outline theoretical frameworks for effective helping, characteristics of effective helpers, and demonstrate appropriate helping skills; develop strategies for dealing with groups and team indicate appropriate strategies for dealing with groups and team problems in their work area; and use appropriate research material to conceptualise issues, and provide a framework for practice.

Credit Points: 6  Contact Hours: 3 per week

MND501 PSYCHOLOGY

In this subject, the students shall be able to demonstrate effective interpersonal skills in relation to patient and other health professionals, diagnose patient needs and respond appropriately; state causes of stress, effects on health, and indicate appropriate techniques to reduce stress; indicate techniques that may be used to modify patient attitudes and behaviour and demonstrate appropriate problem-solving skills in their work situation.

Credit Points: 6  Contact Hours: 3 per week

MNN100 INTRODUCTION TO MANAGEMENT

This subject explores the process of management, both analytically and experientially. Using a series of case-studies and other learning activities a series of issues typical of those faced by managers are addressed. The tools of various disciplines are used to examine the definition and solution to these problems. Upon completion of the subject, students will be aware of the various means of management, variations over time in what is managed and in the techniques of management. They will be aware of international differences in the management process. Students will confront the gaps between how they think they ought to act, and how they do act in interpersonal managerial contexts. They will also be competent in understanding issues such as pricing, market research, promotional expenditure, staffing levels, wage negotiations and capital expenditure decisions.

Credit Points: 12  Contact Hours: 3 per week

MNN106 MANAGERIAL ECONOMICS

This subject examines principles of economics pertinent to managerial decision-making in an economic environment. Topic areas include an introduction to economics, the macroeconomic environment, demand analysis and forecasting, cost analysis, market strategy, and investment analysis. At the completion of the subject students will be capable of applying economic principles to problems of resource allocation at the firm, in industry and the economy. A principal means of achieving this end will be completion of an industry study by each student, and an analysis of the Commonwealth budget strategy.

Credit Points: 12  Contact Hours: 3 per week

MNN201 LABOUR-MANAGEMENT RELATIONS

This subject focuses on the development of managerial policy towards employee relations in the industrial and human resource management sphere. It looks at employee and union action and the role of governments and industrial tribunals. It assesses alternative methods and pressures to change traditional Australian systems. As a result of studying this subject a student will understand the Australian system of labour-management relations, be able to evaluate different systems of regulation in the employment area, understand negotiating processes and develop negotiating skills, and both appreciate and be able to utilise the resources required for mobilising change in this area.

Credit Points: 12  Contact Hours: 3 per week

MNN202 DECISION SUPPORT SYSTEMS

Timely and accurate information is a management resource, and computers can process much of this information to augment and extend a manager's capacity. This subject provides an understanding of the importance, variety and value of both quantitative
analyses of stakeholders, significant emphasis on computer-based information and qualitative decision support systems, including specialist system analysis. Personal computers, managers can themselves build logical decision models, and the subject also develops skills of building models, applying personal computer software (e.g., IFPS/Personal, spreadsheets) to analyse those models, and incorporating the analyses in complex managerial decision making processes. The subject will also address issues that relate to the human and organisational elements that support managerial decision making.

Credit Points: 12 Contact Hours: 3 per week

MNN203 GOVERNMENT BUSINESS RELATIONS
This subject examines the nature of the relationship between government and business, especially in the Australian context. It focuses both upon the historical development of the relationships that exist between the private and public sectors and of the impact that the policy decisions of each have on the operations of the other.

Credit Points: 12 Contact Hours: 3 per week

MNN204 MARKETING METHODS & PRACTICES
This introductory subject focuses on the role of marketing, and how marketing fits into the strategic processes of firms and institutions. The subject material covers the key marketing decision areas marketing concept, marketing research, consumer behaviour, marketing segmentation and positioning, product policy, pricing, promotion and distribution.

Credit Points: 12 Contact Hours: 3 per week

MNN302 PEOPLE IN ORGANISATIONS
The subject examines the internal operation of organisations and the behaviour of those in them. The subject explores a range of theories and models of individual and group behaviour including the structural and action perspectives, role theory, conflict and change. This exposure will encourage students to critically evaluate such theories and models, and their implications for management behaviour. Students will also be encouraged to develop the analytical, attitudinal, behavioural and emotional resources necessary to enable them to cope effectively with the complexities and demands of the human resource system in organisations.

Prerequisite: MNN100

Credit Points: 12 Contact Hours: 3 per week

MNN307 STATISTICAL METHODS
Statistics is the study of the procedures for collecting, analysing and interpreting the quantitative data required for effective decision making. The aim of this subject is to develop an understanding of the basic concepts and techniques of statistical analysis, with particular reference to their application in management. The campus computer may be used. Among the topics covered are graphs and charts, descriptive statistics, probability, sampling methods, analysis of sample results and regression and correlation.

Credit Points: 12 Contact Hours: 3 per week

MNN403 BUSINESS POLICY
Business Policy aims to integrate and focus students' earlier studies by developing a general manager's knowledge, analytical understanding and action-taking competencies. A general manager is involved in the decision processes of matching a whole organisation's capabilities to its environment, which includes responsibilities to many stakeholders. Thus tasks of general managers are more complex and interdependent than those of specialist or functional managers. The paradigm adopted in this subject is that of strategic management - analyses of stakeholders, environments and capabilities, strategy formulation, and strategy implementation. Teaching methodologies (such as case studies and real-world projects) used during the semester will emphasise the process of management as well as analysis, and will emphasise contexts as well as concepts. At the conclusion of this subject, students should understand how and why strategic decisions are made, and be prepared to make them.

Prerequisite: MNN202

Credit Points: 12 Contact Hours: 3 per week

MNN404 APPLIED RESEARCH PROJECT
This subject allows the student to demonstrate an ability to plan and execute a significant piece of applied research, or to conduct an independent study of an applied area, with a minimum of supervision. Students will be individually assigned to a project supervisor and should consult with them on the nature of the project to be undertaken and the methodology to be used. The final project report, of a maximum of 15,000 words, must demonstrate an ability to identify and research a significant managerial problem area. A comprehensive literature review of the area, and an appreciation of other relevant studies in the area must be included.

Prerequisite: 10 subjects in the MBA

Credit Points: 12 Contact Hours: 3 per week

MNN601 CONTEMPORARY HEALTH CARE ISSUES
Topics include a comparison of the Australian system of health care with another health care system. The social, political, geographical and economic factors which have shaped the organisation of health care services at local, state, national and/or international levels; funding and resource management; the level and nature of responsibility for health care and health care maintenance; planning for structural change. Among the topics to be considered are consumerism and health literacy; principles of epidemiology and demography; descriptive and analytic measure of health; social distribution of health and illness including the implications of changing patterns of health and disease, the influence of lifestyle factors on health, inequalities in health practices and health status and national goals and targets for improving health.

Credit Points: 12 Contact Hours: 3 per week

MNN602 HEALTH PLANNING, MANAGEMENT & EVALUATION
This subject applies the theory and principles of planning, management and evaluation to health services. It includes an emphasis on an understanding of health services planning techniques. Information requirements and decision making for the strategic management of health services are examined, together with the principles of financial and personnel management required for the effective development and utilisation of health care. Process and program evaluation in health services and the application of evaluation research and cost-effectiveness will be considered.

Credit Points: 12 Contact Hours: 3 per week

MNN805 CURRENT ISSUES IN AUSTRALIAN MANAGEMENT
This subject runs concurrently with MNN806 to provide a review of the substantive disciplines within
MNN805 \textbf{ADVERTISING AND MARKETING MANAGEMENT}  
This subject focuses on managers and participants in an organisational dynamic that is both influenced by and influences such factors as the current state of technology, labour markets, world markets and government and community pressures. Prerequisites: MNN805/806  
Credit Points: 12  
Contact Hours: 3 per week

MNN806 \textbf{CURRENT ISSUES IN AUSTRALIAN MANAGEMENT B}  
This subject runs concurrently with MNN805 to provide a review of the substantive disciplines within management and to highlight key issues in the current theory and practice of management. MNN806 will focus on current issues within strategic management, with particular emphasis on financial management, strategy and planning and the management of human resources. Credit Points: 12  
Contact Hours: 3 per week

MNN807 \textbf{RESEARCH DESIGN & DATA ANALYSIS}  
This subject aims to update and develop student's knowledge of research theory and research procedures in the social sciences with special reference to practical applications in management areas such as economics, marketing and human resource management. This subject also introduces students to problems of logical inference, observation techniques and to advanced data analysis techniques and the advantages and disadvantages of their use in different contexts. Prerequisites: MNN805/806  
Credit Points: 12  
Contact Hours: 3 per week

MNN808 \textbf{MANAGEMENT, TECHNOLOGY & SOCIAL CHANGE}  
This subject provides a critical and cross-cultural review of the development of management theory and an analysis of management within complex organisations. The course focuses on managers as participants in an organisational dynamic that is both influenced by and influences such factors as the current state of technology, labour markets, world markets and government and community pressures. Prerequisites: MNN805/806  
Credit Points: 12  
Contact Hours: 3 per week

MNN811 \textbf{POLICY ANALYSIS}  
Government-business relationships are complex and dynamic. The formulation and implementation of policy in both government and business organisations is particularly sensitive to these relationships. This subject focuses upon the policy process in both public and private sector organisations and its impact on the relationship between these sectors as an important determinable variable. Models of the policy process will be used as the major explanatory device, and government policies towards business as the context within which their relationships are examined. Prerequisites: MNN805/806  
Credit Points: 12  
Contact Hours: 3 per week

MNN812 \textbf{ORGANISATIONAL PSYCHOLOGY}  
The course looks at the nature of organisations and the way in which individuals and groups and leaders function within organisations. Theories of organisational structure, and the determinants of organisational structure and function, are explored, leading to an examination of climate and culture within organisations. The place of the individual within the organisations and the assumptions underlying the psychological theories which guide our treatment of employees are investigated. The traditional and recent developments in leadership theory are examined. The course ends with a consideration of the future of organisations and the changes which will occur. Prerequisites: MNN805, MNN806  
Credit Points: 12  
Contact Hours: 3 per week

MNN813 \textbf{ADVANCED MARKETING MANAGEMENT}  
An advanced study of marketing, marketing systems and market management decision processes within the contemporary structure of social cultural, political, economic, business and organisational environments. The subject will cover advanced marketing theory from both strategic and tactical perspectives with emphasis on the relationship between marketing and corporate policy as well as both the internal and external social and behavioural and motivational factors that facilitate marketing exchange opportunities. The subject will address those marketing issues associated with both profit and non-profit organisations and the relevance of marketing theory to these institutions, and will include the developing area of international marketing. Prerequisite: MNN805, MNN806  
Credit Points: 12  
Contact Hours: 3 per week

MNN814 \textbf{ORGANISATIONAL ECONOMICS}  
This subject examines the internal structure operation and growth of organisations with special reference to commercial institutions. A wide range of analytical tools is used to address major issues which include the determinants of the internal structure of organisations. The relative effectiveness of the institutions of market and hierarchy in reaching decisions; the determinants of vertical integration; the determinants of the growth and functioning of internal labour markets, and the reasons for the development of firms as economic institutions. Prerequisite: MNN806  
Credit Points: 12  
Contact Hours: 3 per week

MNN815 \textbf{CASE STUDY PROGRAM}  
The purpose of this subject is to both study and develop case studies in management. Australian Case Studies (for example from the Melbourne University Data Base) will be included in the program, which is intended to develop the student’s ability to analyse interdisciplinary problems, explore research problems and learn techniques of team-management and problem solving. Prerequisites: MNN807, MNN806, MNN808  
Credit Points: 12  
Contact Hours: 3 per week

MNN816 \textbf{INITIAL PROJECT IN MANAGEMENT}  
An investigation by individuals or small groups of students into a managerially significant issue or problem. Students will be expected to choose an area of investigation that will be connected with their final project (MNN830 and MNN831). For example, this may take the form of a review of a section of their proposed area of project work or be part of an initial or pilot study. Prerequisite: MNN815  
Credit Points: 12  
Contact Hours: 3 per week

MNN820 \textbf{APPLIED RESEARCH & DESIGN}  
This subject aims to give the student an opportunity to test out some practical applications of research theory and analysis. Students will be required to develop a research proposal of interest to them and
related to each student's proposed research project (MNN830). The student will be required to conduct a preliminary or pilot study on a limited number of cases or areas of interest in his/her proposed research field and to complete a research report justifying and assessing the chosen research methodology and demonstrating the research techniques that will be used in the full study. Annotated comments on the report must also show awareness of different designs and statistical techniques etc. that might have been used demonstrating a good grasp of elements covered in MNN810 and the earlier analyses of case study material in this course.

Prerequisite: MNN807
Credit Points: 12
Contact Hours: 3 per week

MNN830 PROJECT & SEMINAR A

MNN831 PROJECT & SEMINAR B

Students are required to write an original project on an area of interest in the management field. During the first year of a full-time program (second of part-time) the student should finalise his/her chosen area. The Management Graduate Studies Board will then nominate a supervisor for the research. Once the area of interest is chosen, the student will be expected to relate to that specialism in other courses for example in the Case Study Program, in the Project in Management and in Applied Research Design. A seminar program will be designed to enable students to give presentations on the course of their research and learn from the research experience of their colleagues. The project itself must demonstrate the student's ability to combine analytic and theoretical ability with an understanding of practical features.

Prerequisite: MNN816, MNN820
Credit Points: 12 (MNN830); 24 (MNN831)
Contact Hours: 3 per week

MNP054 MANAGEMENT & MARKETING

On completion of this unit, the student will be able to understand the development of human resources in an organisation; identify, describe and apply the functions of management in an hospital/service industry setting; analyse and critically examine organisations, especially the structure of the organisation and its relevance to the achievement of objectives; understand and assess the role of marketing in an organisation; define the marketing system and analyse the influence of the marketing function in public health and nutrition.

Credit Points: 12
Contact Hours: 3 per week

MNP12 QUALITY SYSTEM MANAGEMENT

Introduction to the role of quality in a modern company. Quality as a measure of both organisational performance and of products and services. Quality if a total management philosophy. Comparative management practices in quality; Japan, Europe and North America; application to Australia. Organising for quality; organisational structure; the quality plan; the manual of procedures. Managing for quality; use of statistics; continuous improvement implementing company-wide quality control.

Credit Points: 6
Contact Hours: 3 per week

MNP13 MANAGING COMMUNICATIONS FOR QUALITY

Communication as part of a quality process; management, employees, customers and suppliers in the communication network. Communicating the quality plan; commitment; policy; objectives. Employee participation; consultation and feedback to improve quality; quality circles and Australian organisations.

Management communication on quality; what information should be reported; how to present it; interpersonal and negotiation skills; written communications. Introduction to market research. Communicating with the market and with the business environment. Quality as a customer determination; the Deming cycle and its implications.

Credit Points: 6
Contact Hours: 3 per week

MNP123 HUMAN FACTORS IN QUALITY

Human behaviour concepts and their application to quality management. Interpersonal skills and organisational culture, intrapersonal factors. Concepts in motivation, perception, learning, attitudes, etc. Ergonomics in work place design, aspects of the work environment which can affect performance.

Credit Points: 6
Contact Hours: 3 per week

MNP218 ECONOMIC ANALYSIS

Australia's international trading performance relative to other industrialised nations. The potential economic impact on quality control systems on primary, secondary and tertiary sectors of Australian industry. Economics of the firm and the quality factor, quality as a determinant of demand, demand elasticity, goods attribute theory. Tools for incorporating quality into investment decision: opportunity and marginal costs; obsolescence and economic life; repair and major overhaul; criteria for comparing economic alternatives.

Credit Points: 6
Contact Hours: 3 per week

MNP309 TECHNOLOGICAL INNOVATION

Technological innovation focuses primarily on the nature and management of research and development and technical aspects of innovative products and processes. In this regard, attention is given to such issues as product design and development and the assurance of quality and reliability. Furthermore, the subject aims at acquainting students with the multi-faceted nature of product feasibility. Where applicable students will be provided with techniques and strategies relating to the above areas.

Credit Points: 12
Contact Hours: 3 per week

MNP310 VENTURE MANAGEMENT & DEVELOPMENT

The subject will introduce students to concepts and techniques in general management, the management of self and the management of innovation and change. This will include fundamentals of business planning, organising, controlling and staffing. The subject will also require students to formulate a comprehensive business plan for an actual invention by working closely with inventors/entrepreneurs.

Prerequisites: All other subjects in Product Entrepreneurship Strand (I) except ACP851

Credit Points: 12
Contact Hours: 3 per week

MNP333 GRADUATE PROJECTS

This subject aims to give the graduate student an opportunity to undertake an applied project as part of the Graduate Diploma in Business Administration. The graduate project may be in any of the major areas within the School of Management subject to approval of the Graduate Studies Board. Students wishing to undertake the graduate project should seek the agreement of a staff member to act as supervisor. Students will have completed such subjects in the GDIA course or in previous study which in the opinion of the supervisor and the Graduate Studies Board will stand as appropriate prerequisites for the project.

Credit Points: 12
Contact Hours: 3 per week
MSA111 BIOLOGICAL CHEMISTRY I
Offered: Autumn
A course introducing the basic biochemistry of major groups of biologically important compounds, including carbohydrates, lipids, nucleic acids and protein synthesis and proteins. Biochemical homeostasis in biological systems is considered.
Credit Points: 12 Contact Hours: 3 per week

MSA112 BIOLOGICAL CHEMISTRY II
Offered: Spring
A course which deals with basic metabolism. Topics include: biological catalysis; energetics of biological systems; catabolic and anabolic pathways for the metabolism of carbohydrates, lipids, amino acids and nucleic acids; metabolic control and integration.
Prerequisites: MSA111, MSA123
Credit Points: 8 Contact Hours: 4 per week

MSA113 INTRODUCTORY BIOCHEMISTRY
Offered: Spring
Credit Points: 8 Contact Hours: 4 per week

MSA120 PERSPECTIVES IN MEDICINE
Offered: Autumn
An introduction to the health care area. The course includes presentations by specialists in areas of health care and delivery. Topics addressed include safety, functioning of laboratories in hospitals, country pathology services, clinical measurement and research laboratories as well as related topics such as stress management and the roles of various laboratory personnel.
Credit Points: 4 Contact Hours: 1 per week

MSA121 PATHOLOGY
Offered: Spring
Application of scientific methods to the study of the general principles of disease processes and the major diseases of the organ systems. Correct understanding and use of pathological terms and concepts are emphasised.
Prerequisites: PNA170, PNA171
Co-requisite: PNA171
Credit Points: 8 Contact Hours: 2 per week

MSA123 LABORATORY INSTRUMENTATION I
Offered: Autumn
A course of lectures and practical work on the principles, care and effective usage of basic laboratory equipment including glassware, plastics, balances, spectrophotometers, flamephotometers, auto analysers, pH meters and specific ion meters. Programmable calculators and computers are used during the practical course to illustrate modern methods of data manipulation. In addition the practical course aims to provide experience in the handling of chemicals, and in the preparation of reagents and standards. In this work emphasis is placed on aspects of laboratory safety.
Co-requisite: MSA111
Credit Points: 8 Contact Hours: 4 per week

MSA124 LABORATORY INSTRUMENTATION II
Offered: Spring
A course of lectures and practical work designed to integrate the principles and techniques of macromolecule separation by a variety of chromatographic procedures and various methods of electrophoresis, dialysis, filtration and centrifugation.
Prerequisite: MSA123
Credit Points: 8 Contact Hours: 4 per week

MSA161 MICROBIOLOGY I
Offered: Autumn
An introduction to the biology of bacteria, fungi, algae, protozoa and viruses, with consideration of structure, nutrition, reproduction, genetics, and classification systems. The practical course is aimed at developing the manipulative skills necessary for laboratory identification of microbial forms.
Credit Points: 8 Contact Hours: 3 per week

MSA162 MICROBIOLOGY II
Offered: Spring
The growth of microbial populations and methods of controlling growth; sterilisation and disinfection methods; enzymic activity of microorganisms; the identification of the microorganisms more important in public health; host-parasite relationships and an introduction to immunity.
Prerequisite: MSA161
Credit Points: 8 Contact Hours: 3 per week

MSA435 IMMUNOLOGICAL TECHNIQUES II
Offered: Autumn
The subject aims to provide an introduction to immunology with particular emphasis on the principles and performance of basic immunological techniques including blood grouping. Topics include antigens, antibodies and the immune system.
Prerequisites: PNA170, PNA171
Credit Points: 8 Contact Hours: 4 per week

MSA436 TRANSFUSION TECHNIQUES IV
Offered: Spring
A course applying the basic knowledge of immunology gained in Immunological Techniques III to the study of human blood group systems. Topics include principles of immunohaematology, ABO blood group, Rh blood group system, compatibility testing, antibody identification, investigation of transfusion reactions, antenatal testing, quality control and intravenous fluids and blood products.
Prerequisites: MSA435
Credit Points: 8 Contact Hours: 4 per week

MSA441 CLINICAL MICROBIOLOGICAL TECHNIQUES III
Offered: Autumn
The techniques used in isolation and identification of bacteria important in human and animal infections; the use of computerised data bases to assist in bacterial identification; tests for the sensitivity of bacteria to antibiotics; preparation, sterilisation, quality control and use of bacteriological media.
Prerequisite: MSA162
Credit Points: 8 Contact Hours: 4 per week
MSA442 CLINICAL MICROBIOLOGICAL TECHNIQUES IV
Offered: Spring
The course aims to teach basic microbiological techniques in the following disciplines: virology, mycology and parasitology (enteric parasites). The practical periods are used to reinforce the theoretical aspects of the subject.
Prerequisite: MSA162
Credit Points: 8  Contact Hours: 4 per week

MSA463 HISTOLOGICAL TECHNIQUES III
Offered: Autumn
A basic course presenting methods of preparing tissue samples for examination by the various forms of light microscopy. Topics include fixation, tissue processing, microtomy and an introduction to staining and light microscope techniques.
Prerequisites: PNA170, PNA171, MSA123
Credit Points: 8  Contact Hours: 4 per week

MSA464 HISTOLOGICAL TECHNIQUES IV
Offered: Spring
An advanced course dealing with specialised methods for identifying tissue components. Topics include electron microscopy, histochemistry, immunohistochemistry. Emphasis is placed on the practical application of these methods in histopathology.
Prerequisites: MSA112, MSA463
Credit Points: 8  Contact Hours: 4 per week

MSA465 CYTOLOGICAL TECHNIQUES III
Offered: Autumn
A course of lectures and associated practical sessions in cytological methods and normal gynaecological cytology. The course provides a basis for the study of clinical cytology offered in MSA466.
Prerequisites: MSA112, PNA170, PNA171
Credit Points: 8  Contact Hours: 4 per week

MSA466 CYTOLOGICAL TECHNIQUES IV
Offered: Spring
A course of lectures and associated practical work presenting specialised preparative methods for non-gynaecological cytology and demonstrating the evaluation of specimens commonly encountered in routine diagnostic cytology.
Prerequisite: MSA465
Credit Points: 8  Contact Hours: 4 per week

MSA471 CLINICAL BIOCHEMICAL TECHNIQUES III
Offered: Autumn
A study of the basic chemical procedures used in biochemical laboratories with emphasis on technique and accuracy. Topics include tests of renal, pancreatic, hepatic and gastric functions, and the estimation of serum proteins and lipids.
Prerequisites: MSA112, PNA171
Credit Points: 8  Contact Hours: 4 per week

MSA472 CLINICAL BIOCHEMICAL TECHNIQUES IV
Offered: Spring
A study of more complex techniques used in clinical biochemical laboratories, including enzyme assays, estimations of electrolytes, blood gases, drugs, vitamins and hormones. Auto analytical techniques and quality control are also treated.
Prerequisite: MSA471
Credit Points: 8  Contact Hours: 4 per week

MSA481 HAEMATOLOGICAL TECHNIQUES III
Offered: Autumn
A course of lectures and associated practical work in basic haematological techniques. Topics include the counting of blood cells, the preparation, staining and examination of blood films, the determination of the red cell indices, supravital staining techniques, erythrocyte sedimentation rate and origin and maturation of blood cells.
Prerequisite: PNA170, PNA171
Credit Points: 8  Contact Hours: 4 per week

MSA482 HAEMATOLOGICAL TECHNIQUES IV
Offered: Spring
This subject is an extension of MSA481 Haematological Techniques III. The student is introduced to the common blood disorders. A brief outline of the various aspects of the subject is given. The main emphasis is on the use of the basic haematological techniques and some specialised laboratory procedures used in the investigation of commonly encountered blood disease. The basic theory of haemostasis and the screening tests used in the investigation of bleeding disorders are discussed.
Prerequisite: MSA481
Credit Points: 8  Contact Hours: 4 per week

MSB101 MICROBIOLOGY I
Offered: Autumn, Spring
The subject acts as an introduction to the study of microbiology, biochemistry & biotechnology. The diversity of microbes is presented together with the various forms of microscopy used to study them. Important biological molecules, both inorganic and organic, are discussed with emphasis on the mode of action of enzymes and their role in energy production. A detailed study is made of the morphology of eu- and prokaryotic cells and viruses.
Credit Points: 6  Contact Hours: 3 per week

MSB102 MICROBIOLOGY II
Offered: Autumn
A continuation of basic microbiology introduced in MSB101. Lectures and practical exercises will deal with aspects of microbial nutrition, control of microbial populations, genetics, principles of taxonomy and the identification of bacteria.
Prerequisite: MSB101, MSB474
Credit Points: 6  Contact Hours: 3 per week

MSB103 MICROBIOLOGY III
Offered: Spring
The subject deals with aspects of applied microbiology and the taxonomy of important groups of microorganisms, pathways of metabolism, genetic manipulation, biodeterioration and bioremediation, fermentation, a biological waste treatment, microbial ecology, agricultural microbiology and water and food microbiology.
Prerequisite: MSB102
Credit Points: 8  Contact Hours: 3 per week

MSB120 INTRODUCTION TO PATHOLOGY
Offered: Spring
Application of scientific methods to the study of the general principles of disease processes and the major diseases of the organ systems. Correct understanding and use of pathological terms & concepts are emphasised.
Prerequisite: PNB125
Credit Points: 6  Contact Hours: 2 per week
MSB145 LABORATORY TECHNOLOGY II
Offered: Spring
A course dealing with the theoretical and practical aspects of instrumental analysis in the clinical laboratory. Topics covered include glassware, plastics, balances, spectrophotometers, flamephotometers, autoititators, pH meters and specific ion meters. Programmable calculators and computers are used during the practical course to illustrate modern methods of data manipulation. Emphasis is placed throughout on the effective use of the instruments.
Prerequisite: PHB150
Co-requisites: CHB242, PHB250
Credit Points: 8  Contact Hours: 3 per week

MSB150 MICROBIOLOGY
Offered: Spring
This subject examines the characteristics of medically important organisms, sterilisation and disinfection, host parasite relationships, resistance and immunity, infectious diseases, diagnosis, selected microbial infections, chemotherapy and development of resistance by microorganisms.
Credit Points: 6  Contact Hours: 2 per week

MSB201 MICROBIOLOGY
Offered: Spring
An introductory core unit of lectures and practical exercises in microbiology dealing with cytology, nutrition, genetics, control of microbial populations, and principles of taxonomy.
Credit Points: 6  Contact Hours: 3 per week

MSB301 MICROBIOLOGY I
Offered: Autumn
This subject considers the classification and identification of microorganisms. Emphasis is on their microbiology and reproduction. Organisms dealt with the protozoa, helminths, fungi and bacteria and algae.
Credit Points: 6  Contact Hours: 3 per week

MSB310 BIOCHEMICAL METHODOLOGY III
Offered: Autumn
A companion to MSB415 emphasising biochemical laboratory methods and practice and dealing with pH measurement and buffers, UV and visible spectrophotometry, chromatography, electrophoresis and isotope techniques.
Prerequisites: MSB101, MAB208
Co-requisite: MSB415
Credit Points: 8  Contact Hours: 4 per week

MSB320 SYSTEMATIC PATHOLOGY
Offered: Autumn
Detailed study of the diseases of the organ systems: cardiovascular, respiratory, alimentary, urogenital, nervous musculoskeletal, endocrine, haematological and skin.
Prerequisite: MSB120
Credit Points: 8  Contact Hours: 4 per week

MSB405 LABORATORY COMPUTING III
Offered: Autumn
The first section of this subject extends the knowledge of computing gained in Laboratory Computing I by examining the programming process in more detail. This leads on to the second section which concentrates on the practical application and operation of computers in a laboratory. The use of software packages forms an important part of this course.
Prerequisite: CSB259
Credit Points: 8  Contact Hours: 3 per week

MSB408 VIROLOGY IV
Offered: Spring
This subject is an introductory course in virology and will include the range of viruses and virus diseases, their morphology and composition; virus replication, taxonomy and classification and the major virus groups; purification of viruses, diagnosis and virus assay; transmission and "life" cycles; control and eradication of viruses.
Prerequisite: MSB415 or MSB473 and MSB450
Credit Points: 8  Contact Hours: 4 per week

MSB410 BIOCHEMICAL METHODOLOGY IV
Offered: Spring
A companion subject to MSB416 which continues the studies of MSB310. This unit extends studies of chromatographic and electrophoretic methods, protein binding techniques and the methodology of protein and nucleic analysis.
Prerequisite: MSB310 Co-requisite: MSB416
Credit Points: 8  Contact Hours: 4 per week

MSB412 IMMUNOLOGY IV
Offered: Spring
A study of the mechanisms of the immune process including the nature of antigen, antibodies, antigen-antibody reactions, antibody formation, control of the humoral and cell-mediated immune responses, hypersensitivity and allergy and immunisation of man against infections.
Prerequisite: PNB465, MSB445
Credit Points: 8  Contact Hours: 4 per week

MSB415 BIOCHEMISTRY III
Offered: Autumn, Spring
A course of 28 lectures and 42 hours laboratory work introducing properties, biological molecules and at the molecular level with particular emphasis on cell structure and function, the chemistry of proteins, enzymology, energy production and utilisation, the chemistry and functions of carbohydrates.
Prerequisites: CHB242, PHB250, MSB101
Credit Points: 10  Contact Hours: 5 per week

MSB416 BIOCHEMISTRY IV
Offered: Autumn, Spring
A course of 28 lectures and 42 hours laboratory work considering aspects of carbohydrate metabolism in mammals, the chemistry and metabolism of lipids, the basic catabolism of amino acids, the chemistry and function of the nucleic acids, protein biosynthesis and the molecular bases of genetic mutation.
Prerequisite: MSB415
Credit Points: 10  Contact Hours: 5 per week

MSB420 IMAGING PATHOLOGY
Offered: Autumn
A study of the appearances of pathology on medical images with particular emphasis on the radiographic image.
Prerequisite: MSB320
Credit Points: 4  Contact Hours: 2 per week
**MSB421 ELECTRON MICROSCOPY**  
Offered: Spring  
A course providing a theoretical background to the operation, scanning and transmission electron microscopes and applications in biological, materials and forensic science. Basic principles of specimen preparation will be covered, both materials and biological samples and the analytical capabilities of electron beam instruments will be introduced.  
Credit: 3  
Contact Hours: 2 per week

**MSB426 HAEMATOLOGY IV**  
Offered: Spring  
In the first of the three haematology subjects the student is introduced to the theory of the origin, development and composition of normal blood. Laboratory tests (principles, outline of the techniques and interpretation) used in the screening of blood samples are discussed in detail. Basic haematologic tests included in this unit include: preparation, staining and examination of blood films, determination of the red cell indices, supravital staining, erythrocyte sedimentation rate, screening tests used in the investigation of a bleeding disorder.  
Prerequisite: MSB445, PNB132, PNB465  
Co-requisite: MSB416  
Credit: 3  
Contact Hours: 4 per week

**MSB430 DISEASE PROCESSES IV**  
Offered: Spring  
A course introducing the principles of the study of disease and dealing with the causes and nature of circulation disorders, degenerative processes, metabolic and nutritional disorders, disturbances of development and growth, inflammation, infections and infestations, regeneration and repair, and neoplasia. The course includes the applications of general pathalogy to the study of diseases of the heart and circulatory system, digestive system, respiratory system, urogenital system, endocrine system, nervous system, haematologic system and skin.  
Prerequisite: MSB445, PNB132, PNB465  
Co-requisite: MSB416  
Credit: 4  
Contact Hours: 2 per week

**MSB445 LABORATORY TECHNOLOGY III**  
Offered: Autumn  
The course deals with techniques encountered in the clinical laboratory. Topics include immunoassay, enzymic analysis, electrophoresis, isoelectric focusing, and chromatography (gel filtration, ion exchange, affinity, and high performance liquid chromatography). Emphasis is placed on the maintenance of accuracy, precision and quality control in the clinical laboratory.  
Prerequisite: MSB145  
Credit: 3  
Contact Hours: 3 per week

**MSB450 MICROBIOLOGY III**  
Offered: Autumn, Spring  
An introductory core unit of lectures and practical exercises in microbiology dealing with cytology, nutrition, genetics, control of microbial populations, and principles of taxonomy.  
Prerequisite: MSB101 (except optometry students)  
Co-requisite: MSB415 (except optometry students)  
Credit: 4  
Contact Hours: 3 per week

**MSB454 MICROBIOLOGY IV**  
Offered: Autumn, Spring  
An extension of the core course in Microbiology (MSB450), includes aspects of microbial taxonomy, food and water microbiology, microbial ecology, industrial and agricultural microbiology and the role of microorganisms as infectious agents.  
Prerequisite: MSB450 Co-requisite: MSB416  
Credit: 4  
Contact Hours: 4 per week

**MSB471 BIOCHEMISTRY IV**  
Offered: Autumn  
A course of 28 lectures and 28 hours of laboratory work introducing the structures and functions of proteins, carbohydrates, lipids and nucleic acids, basic enzymology, mechanisms of cellular energy production and the role of ATP, an outline of the metabolism of carbohydrates, lipids and amino acids and the fundamentals of protein biosynthesis and molecular biology.  
Prerequisite: CHB242  
Credit: 6  
Contact Hours: 4 per week

**MSB473 BIOCHEMISTRY III**  
Offered: Autumn  
This subject will cover the biochemistry or proteins including structure-function relationships, enzymology including basic kinetics and control mechanisms relevant to metabolism, the mechanism and role of the Krebs (Citric Acid) Cycle including stoichiometry and energetics and bioenergetics including the mechanisms of electron transport and synthesis at ATP.  
Prerequisite: MSB101, CHB150, CHB250  
Credit: 4  
Contact Hours: 4 per week

**MSB492 HISTOPATHOLOGY IV**  
Offered: Spring  
An introductory course presenting methods of preparing tissue samples for examination by the various methods of light and electron microscopy. Topics include fixation, embedding, microscopy and an introduction to staining and microscopy techniques.  
Co-requisite: PNB132, CHB242  
Credit: 8  
Contact Hours: 4 per week

**MSB510 FOOD MICROBIOLOGY**  
Offered: Autumn  
A course of lectures and associated practical work dealing with aspects of the microbiology of foods and water. Topics include foodborne infections and intoxications; food hygiene; food ecology and its relationship to spoilage and preservation; fermentations; methods of microbiological examination of foods.  
Prerequisite: MSB445  
Credit: 8  
Contact Hours: 3 per week

**MSB511 MICROBIAL PHYSIOLOGY & METABOLISM V**  
Offered: Autumn  
An advanced course of lectures and practical sessions relating to the composition, organisation, structure and activity of the microbial cell (bacteria, yeasts and fungi). Topics include light microscopy and staining methods; cell structure; enrichment, isolation & growth of cultures; cells, populations and the kinetics of growth; biosynthesis of cellular material; regulation of metabolism; microbial genetics; sporogenesis and germination.  
Prerequisite: MSB454  
Credit: 10  
Contact Hours: 4 per week

**MSB512 VIROLOGY V**  
Offered: Autumn  
A course of lectures and laboratory exercises dealing with the nature of viruses; viral replication; viral transmission; viral diseases of humans, animals and plants and their diagnosis; virus purification and assay.  
Prerequisite: MSB454  
Credit: 8  
Contact Hours: 3 per week
MSB520 BIOCHEMISTRY V
Offered: Autumn
An extension of studies begun in MSB415 and MSB446 considering further aspects of carbohydrate metabolism emphasising non-mammalian systems, lipid metabolism including steroid biosynthesis, amino acid metabolism in mammalian and non-mammalian systems and regulation and integration of metabolism.
Prerequisite: MSB446
Credit Points: 12 Contact Hours: 5 per week

MSB521 BIOCHEMICAL SEPARATIONS
Offered: Autumn
An advanced course of lectures and a comprehensive project designed to integrate a number of specialist biochemical procedures including chromatography, electrophoresis and spectrophotometry. Students will be required to design and execute an experimental protocol for the separation of selected macromolecules.
Prerequisite: MSB310 Co-requisite: MSB520
Credit Points: 10 Contact Hours: 4 per week

MSB530 INTRODUCTORY MOLECULAR BIOLOGY
Offered: Autumn
An introductory subject of lectures and practical exercises in molecular biology including types and structures of DNA and RNA, the genetic code and protein synthesis; DNA replication, repair and mutability; transcription and translation; gene structure, function and expression in prokaryotes and eukaryotes; transferable DNA including plasmids, bacteriophage and transposable elements.
Prerequisite: MSB416, MSB454
Credit Points: 10 Contact Hours: 5 per week

MSB610 MICROBIAL TECHNOLOGY
Offered: Spring
An advanced course of lectures and practical sessions dealing with the industrial use of microorganisms. Topics include screening and strain development; large scale fermentation; membrane filtration; product recovery; biochemical engineering; production of: fermentation agents and diagnostic reagents; primary and secondary metabolites of industrial importance; single cell protein; microbial transformations; biodeterioration and bioleaching.
Prerequisite: MSB511
Credit Points: 10 Contact Hours: 5 per week

MSB611 APPLIED MICROBIOLOGY
Offered: Spring
An advanced course of lectures and practical sessions with emphasis upon the applied aspects of microbiology. Topics to include electron microscopy; systematics and nomenclature; plant and soil microbiology; preservation of cultures and cell lines.
Prerequisites: MSB511
Credit Points: 10 Contact Hours: 4 per week

MSB620 BIOCHEMISTRY VI
Offered: Spring
An extension of studies begun in MSB415 and MSB446, considering further aspects of protein chemistry, physical biochemistry, enzymology, bioenergetics, applied biochemistry.
Prerequisite: MSB446
Credit Points: 12 Contact Hours: 5 per week

MSB621 ANALYTICAL BIOCHEMISTRY VI
Offered: Spring
A companion unit to MSB620 which extends the subject matter of MSB410 into biochemical analysis. This subject treats enzyme-based analyses, advanced analysis using isotopes, immunosays and specific methods for the major biomolecules.
Prerequisite: MSB410 Co-requisite: MSB620
Credit Points: 10 Contact Hours: 4 per week

MSB630 GENETIC ENGINEERING
Offered: Spring
This subject of lectures and practical exercises introduces the techniques in genetic engineering including the enzymes, the vectors and hosts, gene isolation and detection of recombinant genes; strategies of gene cloning, genomic and cDNA libraries and gene identification; and applications of genetic engineering.
Prerequisite: MSB530
Credit Points: 10 Contact Hours: 5 per week

MSB631 NUTRITIONAL BIOCHEMISTRY
Offered: Spring
This subject builds on a student's background of basic biochemistry. The effect of nutrient intake on metabolic balance and the use of laboratory data for monitoring metabolic balance are highlighted. Specific topics include: the digestion, absorption and assimilation of the macronutrients; the metabolic basis of primary nutritional diseases; biochemical assessment of nutritional status; the clinical significance of pathology laboratory data; integration of metabolism in a variety of pharmacological and pathological conditions which require dietary intervention; drug-nutrient interactions.
Prerequisite: PNB305 + PNB405
Co-requisite: MSB719
Credit Points: 10 Contact Hours: 4 per week

MSB712 IMMUNOLOGY V
Offered: Autumn
This unit builds on the basic understanding provided in Immunology IV and provides an understanding of the genetic control of antibody diversity, the function of antibody and complement at a molecular level, cell interactions in the immune response and immunological process in resistance to and recovery from infection. Practical classes place emphasis on the competent performance of immunological procedures rather than just a demonstration of immunological principles.
Prerequisite: MSB412, MSB416, MSB454
Credit Points: 8 Contact Hours: 4 per week

MSB713 IMMUNOHAEMATOLOGY VI
Offered: Spring
This course is designed to supply the competence in theoretical and practical blood transfusion which would be required of a scientist working in a hospital blood bank. The understanding of immunology gained in Immunology IV and Immunology V is applied to the area of blood banking. Topics include blood group systems, compatibility testing, identification, antenatal serology, clinical use of blood and blood products and quality control.
Prerequisite: MSB712
Credit Points: 8 Contact Hours: 4 per week

MSB718 CLINICAL BIOCHEMISTRY V
Offered: Autumn
This course introduces the study of chemical aspects of human life in health and illness and discusses the application of chemical laboratory methods to diag-
nosis, control of treatment and prevention of disease. Topics include kidney, pancreas, liver and gastric functions, and the metabolism of lipids, carbohydrates and proteins.

- **Prerequisite:** MSB416, MSB445, PNB465
- **Co-requisite:** MAB252
- **Credit Points:** 8
- **Contact Hours:** 4 per week

- **MSB719 CLINICAL BIOCHEMISTRY VI**

- **Offered:** Spring

This course further develops clinical biochemistry with emphasis on enzymes, electrolytes, blood gases, drugs, vitamins, functions of the thyroid and adrenal gland, auto-analyses, quality control and steroid metabolism.

- **Prerequisite:** MSB718
- **Credit Points:** 8
- **Contact Hours:** 4 per week

- **MSB726 HAEMATOLOGY V**

- **Offered:** Autumn

Haematology V is the first of two units in which the student is introduced to the diseases of the blood. Each blood disease is considered under the following headings: cause, laboratory investigation, prognosis, principles of treatment and laboratory monitoring of treatment. The blood disorders discussed in this unit include: bleeding disorders, iron deficiency anaemia, anaemia of chronic disease, microcytic anaemia and pancytopenia.

- **Prerequisite:** MSB426
- **Credit Points:** 8
- **Contact Hours:** 4 per week

- **MSB727 HAEMATOLOGY VI**

- **Offered:** Spring

This unit continues the study of blood diseases. The format follows the one outlined for Haematology V. Topics in this unit include: haemolytic anaemia, leukaemia and related diseases, paediatric haematology, blood disorders in the elderly and veterinary haematology.

- **Prerequisite:** MSB726
- **Credit Points:** 8
- **Contact Hours:** 4 per week

- **MSB755 MICROBIOLOGY V**

- **Offered:** Autumn

A study of parasitology (85 semester hours) directed towards the laboratory diagnosis of parasitic disease in man. It consists of a systematic study of identification, life history, incidence, modes of infection, epidemiology and control of the parasites of man. Emphasis is placed on parasites evident in Australia and on those most likely to penetrate the quarantine barrier. A study of clinical mycology (20 semester hours) including characterisation of fungi responsible for systemic and superficial infections in man.

- **Prerequisite:** MSB454
- **Credit Points:** 16
- **Contact Hours:** 7 per week

- **MSB756 CLINICAL BACTERIOLOGY VI**

- **Offered:** Spring

A study of clinical bacteriology, dealing with the characteristics, isolation and identification of bacteria implicated in human disease, the collection and examination of clinical specimens, the initial use of computerised data bases in bacterial identification and antibiotic sensitivity tests on laboratory isolates, the interpretation and clear reporting of results.

- **Prerequisite:** MSB454, MSB416
- **Credit Points:** 16
- **Contact Hours:** 7 per week

- **MSB761 FUNDAMENTALS OF MEDICINE I**

This subject provides medical record administration students with the theoretical basis for an understanding of the process of medical care. MRAs must understand the nature of disease processes and the clinician’s response to them in order to: design appropriate and efficient health information services for all types of health care facilities; communicate effectively with other health professionals involved in the care of patients; and assist in research and quality assurance programs in the health services. A review of the important and frequently encountered diseases and includes disorders of the major body systems.

- **Prerequisite:** PNB262
- **Credit Points:** 12
- **Contact Hours:** 3 per week

- **MSB762 FUNDAMENTALS OF MEDICINE II**

This subject continues the study of the process of medical care begun in Fundamentals of Medicine I. In addition it includes the study of the roles and functions of allied health professions, and of technological services in the diagnosis and treatment of disease.

- **Prerequisite:** MSB761
- **Credit Points:** 12
- **Contact Hours:** 3 per week

- **MSB792 HISTOPATHOLOGY V**

- **Offered:** Autumn

A detailed study of techniques used in routine histopathology including methods for immunohistochemistry and transmission electron microscopy. Emphasis is placed on the application and relevance of methods to particular diagnostic areas.

- **Prerequisite:** MSB492, MSB416, PNB465, MSB445, PNB132
- **Credit Points:** 8
- **Contact Hours:** 4 per week

- **MSB793 HISTOPATHOLOGY VI**

- **Offered:** Spring

The course reviews recent advances in diagnostic histopathology and introduces advanced and specialised methods including scanning electron microscopy and X-ray microanalysis. A major component is an overview of techniques for diagnostic cytotology concentrating on specimen preparation and the microscopic detection of cancerous and other abnormal cells in human tissues and body fluids.

- **Prerequisite:** MSB792
- **Credit Points:** 8
- **Contact Hours:** 4 per week

- **MSD360 MICROBIOLOGY I**

- **Offered:** Autumn

An introduction to the microbial world with emphasis on organisms causing disease in humans and on host-parasite relationships. The nature of bacteria, viruses, fungi and protozoa, their appearance and means of replication, sterilisation and disinfection, antibiotics and chemotherapeutic agents. An introduction to bacterial genetics.

- **Credit Points:** 3
- **Contact Hours:** 2 per week

- **MSD410 PATHOLOGY**

- **Offered:** Autumn

An introduction to the process of disease and to the processes taking place in the production of conditions requiring clinical treatment.

- **Prerequisite:** PND132
- **Co-requisite:** PND430
- **Credit Points:** 2
- **Contact Hours:** 1 per week

- **MSD460 MICROBIOLOGY II**

- **Offered:** Spring

Sources of human infection and modes of transmission in bacterial, viral and fungal infections. Concepts of host resistance, immunity to infectious disease and the broader concepts of immunology. Consideration of the more important microorganisms responsible for
An introduction to principles and application of epidemiology. The definition and application of terms and parameters. Agents of disease: physical, chemical, biological, social, and their interactions. Data used in epidemiology studies and their sources and accuracy. Methods and approaches. Examples will be freely chosen from communicable and non-communicable diseases and student will gain practice in model studies.

Credit Points: 6  Contact Hours: 3 per week

**MSD751 INTRODUCTORY EPIDEMIOLOGY**
Offered: Autumn
History and purposes of epidemiology, definitions and application of terms used in epidemiology, etiological agents of disease, measurement, methods and approaches.
Credit Points: 2  Contact Hours: 1 per week

**MSN102 CELLULAR BASIS OF DISEASE**
Offered: Spring
The following material will be presented in either lectures or tutorials. Cell injury and stress mechanisms. Cellular communication. The responses of organelles, cells and tissues to injury and stress including the following: immune, inflammation, thrombosis, ageing and neoplastic responses. Transplantation and regeneration.
Prerequisite: 24 Credit Points in Master of Health Science
Credit Points: 12  Contact Hours: 3 per week

**MSN110 MOLECULAR BASIS OF DISEASE**
Offered: Autumn
This course of study aims to provide an understanding, at the molecular level, of the aetiology, diagnosis and treatment of various diseases, by a study of molecular structures, biochemical reactions, and the integration and control of metabolism. Topics for study will include: gene structure and function, protein-structure and molecular dysfunction, and enzymes-properties and alterations in diseases; metabolic integration and hormone action, hormones and organ disease, disorders of carbohydrate and lipid metabolism and chemotherapy.
Prerequisite: 24 Credit Points in Master of Health Science
Credit Points: 12  Contact Hours: 3 per week

**MSN150 EPIDEMIOLOGY & RESEARCH STRATEGIES**
Offered: Autumn
An introduction to the principles and applications of epidemiology with emphasis given to its scope and value in establishing disease aetiology. Course topics will include epidemiological methods (descriptive, analytical and experimental), epidemiological concepts, causal relationships, measurement of morbidity and mortality statistical overview of the health of the Australian population, and the investigation of an epidemic.
Credit Points: 12  Contact Hours: 3 per week

**MSN306 PATHOPHYSIOLOGY**
Offered: Spring
A study of selected pathophysiological states which represent major alteration in physiological functioning, occurring in each developmental phase.
Prerequisite: MSD360
Credit Points: 6  Contact Hours: 3 per week

**MSN307 ADVANCES IN MEDICAL LABORATORY SCIENCE**
Offered: Spring
A series of lectures to provide current and topical information across the general field of medical laboratory science. In addition, topics which have significant implications on the advancement of the profession will be presented, e.g., computers, laboratory automation, biotechnology, self-diagnosis. The lecture program will be flexible to allow for the incorporation of visiting speakers or for the introduction of a current interest topic. In addition to formal lectures the unit will offer tutorial and student seminar sessions.
Prerequisite: 72 Credit Points in Master of Health Science
Credit Points: 12  Contact Hours: 3 per week

**MSN501 CLINICAL BIOCHEMISTRY I**
Offered: Autumn
This subject is designed to emphasise the use of clinical biochemistry in the diagnosis of diseases. Disorders of fluid and electrolyte balance systems, disorders of the gastrointestinal, pancreatic and hepatobiliary systems, and disorders of the cardiovascular system and hypertension will be studied, concentrating on diagnosis and the interpretation of biochemical results. In addition, aspects of instrumentation and laboratory methods will be reviewed.
Prerequisite: 96 Credit Points in Master of Health Science
Credit Points: 12  Contact Hours: 3 per week

**MSN502 CLINICAL BIOCHEMISTRY II**
Offered: Autumn
This subject studies in depth a number of haematologic diseases: their aetiology, laboratory investigation, pathogenesis, principles of treatment and laboratory monitoring. The study program includes seminars, oral presentations and assignments. Topics will be chosen from the following areas: haemopoietic kinetics, haematologic oncology, haemolytic disease, haemostasis and the haematologic manipulations of systemic disease. Assessment will be by formal examination, assignments and seminar participation.
Prerequisite: 96 Credit Points in Master of Health Science
Credit Points: 12  Contact Hours: 3 per week

**MSN510 HAEMATOLOGY I**
Offered: Autumn
An in-depth review of recent advances and modern methods in diagnostic histopathology. Major topics will include immunohistochemistry, enzyme histochemistry and transmission electron microscopy methods.
Prerequisite: 96 Credit Points in Master of Health Science
Credit Points: 12  Contact Hours: 3 per week

**MSN511 HAEMATOLOGY II**
Offered: Autumn
These courses will explore, in-depth, areas of bacteriology, virology, mycology and parasitology. Topics will be chosen to increase the knowledge and
understanding of microorganisms associated with human infection. Recent trends and developments in diagnostic microbiology will be studied. A critical approach to the assessment of laboratory practices and interpretation of data will be developed. 

Prerequisite: 96 Credit Points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

**MSN530 DISSERTATION**

Offered: Full year

The dissertation includes a supervised project in an approved topic area selected by the student. The project area may be novel, developmental or directed at an investigation of the introduction of a new system into the laboratory. Other areas which are considered appropriate include epidemiological analyses, laboratory safety, laboratory design or the efficacy of laboratory service. Each student will submit a written project report in a style to present the data.

Prerequisite: 96 Credit Points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

**MSN610 CLINICAL BIOCHEMISTRY II**

Offered: Spring

This subject is designed to emphasise the use of clinical biochemistry in the diagnosis of diseases. Endocrinology, disorders of the muscular and skeletal systems, disorders of special groups, nutrition and drugs, neurochemistry and neural disorders, cancer-associated biochemical abnormalities, and the seriously-ill patients will be studied, concentrating on diagnosis and the interpretation of biochemical results.

Prerequisite: MSN510
Credit Points: 12  Contact Hours: 3 per week

**MSN611 HAEMATOLOGY II**

Offered: Spring

This unit has the same aims and objectives as for Haematology I. Topics considered in this unit include: age-related changes to the haemopoietic system, perinatal haematology, paediatric haematology and haematology in the elderly, nutrition anemias, the role of the forensic laboratory, transplantation, automation and quality control. Since outside lecturers participate in these specialist electives some interchange of topics between the two units may be necessary.

Prerequisite: MSN511
Credit Points: 12  Contact Hours: 3 per week

**MSN612 HISTOPATHOLOGY II**

Offered: Spring

Investigate methods in diagnostic histopathology. The design and assessment of diagnostic programs to aid the identification of tumours and diseases of selected organ systems. A study of specialised techniques including aspiration cytology, scanning electron microscopy and analytical electron microscope methods.

Prerequisite: MSN512
Credit Points: 12  Contact Hours: 3 per week

**MSN615 MICROBIOLOGY II**

Offered: Spring

These courses will explore in-depth, areas of bacteriology, virology, mycology and parasitology. Topics will be chosen to increase the knowledge and understanding of microorganisms associated with human infection. Recent trends and developments in diagnostic microbiology will be studied. A critical approach to the assessment of laboratory practices and interpretation of data will be developed.

Prerequisite: MSN515
Credit Points: 12  Contact Hours: 3 per week

**MSP104 ANALYTICAL ELECTRON MICROSCOPY**

Offered: Offered: Autumn

An advanced course in electron microscopy with emphasis on the applications of labelling and analytical techniques. Methods covered in lectures and practical sessions include immunocytochemistry, in situ hybridisation, energy and wavelength dispersive X-ray analysis, electron energy loss spectroscopy and image analysis. Specialised preparation methods necessary for use of these techniques in SEM, TEM and STEM, instruments are discussed, together with their advantages and limitations. Applications are drawn from the biological, materials and forensic science areas.

Credit Points: 10  Contact Hours: 5 per week

**MSP105 MOLECULAR DIAGNOSIS OF DISEASE**

Offered: Spring

This subject consists of a series of lectures and laboratory exercises in advanced molecular techniques of disease diagnosis. Included will be collection and preparation of samples; the use of DNA probes in dot blots, Southern blots and Northern blots, RFLP analysis and DNA fingerprinting; advanced immunological techniques such as Elisa and Western blotting.

Credit Points: 10  Contact Hours: 4 per week

**MSP120 ADVANCED GENETIC ENGINEERING**

Offered: Spring

An advanced course of lectures and practical exercises dealing with advanced techniques of recombinant technology. Topics include strategies used for gene cloning; production of cDNA and expression libraries; cloning in other bacterial, yeast, virus and plant vectors; isolation of mRNA; separation of chromosomes by electrophoresis; use of gene probes for disease diagnosis and differentiation; a sequencing as well as applications of genetic engineering in the areas of disease resistance, vaccines, hormones, food, plants and industrial microbiology.

Credit Points: 10  Contact Hours: 6 per week

**MSP121 RESEARCH STRATEGIES I**

Offered: Autumn

This subject consists of a series of seminars presented by staff of the Faculties of Health Science and Science and other research scientists on research strategies and directions in their area of expertise. A series of tutorials and lectures on such topics as library searches, oral communications, written communications and ethics. Several written assignments in the areas of microbiology, biochemistry and biotechnology. A seminar presented by the student covering the background literature relevant to the student's research project.

Credit Points: 8  Contact Hours: 3 per week

**MSP122 RESEARCH STRATEGIES II**

Offered: Spring

This subject consists of a series of seminars presented by staff of the Faculties of Health Science and Science and other research scientists on research strategies and directions in their area of expertise. A series of lectures and tutorials on such topics as biometry and computer analysis, research strategies, applying for grants, photography for scientists. A seminar presented by the student covering the results obtained in the student's research project.

Credit Points: 8  Contact Hours: 3 per week
MSPI123 READINGS IN BIOENGINEERING I
Offered: Autumn
This subject consists of the preparation of a paper reporting the methods and results of investigations in the Honours project (MSPI125). The paper will also include an "in-depth" computer search, the presentation of a written paper demonstrating a considerable knowledge, understanding and appreciation of the literature as well as a critical appraisal of future research requirements.
Credit Points: 8 Contact Hours: 3 per week

MSPI124 READINGS IN BIOENGINEERING II
Offered: Spring
This subject consists of the preparation of a paper reporting the methods and results of investigations in the Honours project (MSPI125). The paper will also include an introduction, analysis and discussion of the project in a style and length deemed to be appropriate by the Head of Department. In the course of this subject students should relate their project work to published work already undertaken in the relevant field.
Credit Points: 8 Contact Hours: 3 per week

MSPI125 PROJECT
Offered: Full Year
All students undertaking Honours in biotechnology, biochemistry or microbiology will be required to select and undertake, in consultation with a supervisor, a suitable project.
Credit Points: 5 Contact Hours: 9 per week

MSPI126 ADVANCED GENETIC ENGINEERING II
Offered: Autumn
A course in advanced methods used in recombinant DNA technology. Topics will include isolation and cloning of genomic DNA, M13 and plasmid sequencing, DNA amplification and pulse field gel electrophoresis.
Credit Points: 10 Contact Hours: 5 per week

MSPI127 TOPICS IN BIOTECHNOLOGY I
Offered: Autumn
This subject consists of invited lectures, departmental seminars and external public lectures or seminars in the area of biotechnology including both research and business topics.
Credit Points: 4 Contact Hours: 1 per week

MSPI128 TOPICS IN BIOTECHNOLOGY II
Offered: Spring
This subject is the second semester continuation of MSPI127.
Credit Points: 2 Contact Hours: 1 per week

MSPI145 PROJECT
Offered: Full Year
All students undertaking the Graduate Diploma in Biotechnology will be required to select, in consultation with their employer and an academic supervisor, a suitable research project. The aims of the project are that students, under supervision, should: participate in the selection of a suitable topic for investigation; conduct a literature search in the subject area; plan an experimental program which includes scheduling laboratory space, equipment and consumables; undertake work at the bench; record, assess and interpret the results; write a concise thesis in a standard form of presentation.
Credit Points: 16 Contact Hours: 3 per week

MSPI152 FOOD MICROBIOLOGY
Offered: Autumn
An introduction to food borne pathogens, microbial spoilage of foods; preservation; Fermentation; hygiene; microbiological standards.
Credit Points: 6 Contact Hours: 3 per week

NSB110 FOUNDATIONS OF NURSING PRACTICE I
Offered: Autumn
The processes underlying nursing practice; use of nursing framework to examine relationships amongst health, environment, individual and nurse; therapeutic nurse-client relationship.
Credit Points: 12 Contact Hours: 4 per week

NSB111 FOUNDATIONS OF NURSING PRACTICE II
Offered: Autumn
The processes underlying nursing practice; use of nursing framework to examine relationships amongst health, environment, individual and nurse; therapeutic nurse-client relationship.
Credit Points: 12 Contact Hours: 4 per week

NSB112 CLINICAL PRACTICE I
Offered: Spring
Application of theoretical concepts to the provision of nursing care in a clinical setting, based on content in year one of the course.
Credit Points: 9 Contact Hours: 3 per week

NSB113 PROFESSIONAL ASPECTS OF NURSING I
Offered: Spring
Use of professional framework to analyse nursing practice; international, national and State nursing organisations and authorities; legal and ethical aspects of practice.
Credit Points: 9 Contact Hours: 3 per week

NSB201 PRINCIPLES OF PATIENT CARE
Offered: Autumn
This introductory unit emphasises the ethical, legal and clinical accountability of the radiographer for safe patient care. The subject aims to develop in radiography students an awareness of their responsibilities in protecting patients and promoting their well-being.
Credit Points: 4 Contact Hours: 2 per week

NSB210 THEORIES OF NURSING I
Offered: Autumn
Analysis of selected models of nursing; interrelationship between research and theory development; application of models/theories to health care settings.
Credit Points: 9 Contact Hours: 3 per week

NSB211 THEORIES OF NURSING II
Offered: Spring
Relationship of research and development of nursing theory; use of a nursing model for generating research problems; application of statistical principles to data analysis; preparation of research reports.
Credit Points: 9 Contact Hours: 3 per week
- **NSB212 CLINICAL PRACTICE II**
  Offered: Autumn
  Use of a nursing model as a basis for giving nursing care; selection of setting (hospital or community) and clients according to developmental stage; emphasis on clinical, teaching and counselling components of nursing role.
  Prerequisite: NSB112
  Co-requisites: NSB210, NSB240
  Credit Points: 6
  Contact Hours: 40 hrs/1 wk block

- **NSB220 NURSING IN SOCIAL SYSTEMS II**
  Offered: Autumn
  Characteristics of Australian society - family, education systems, religion, economic and political order, race and ethnicity; implications for nursing practice.
  Prerequisite: NSB120
  Credit Points: 9
  Contact Hours: 3 per week

- **NSB230 PROFESSIONAL ASPECTS OF NURSING II**
  Offered: Spring
  Factors promoting professional leadership in nursing - leadership theory, evaluation of practice, societal issues affecting practice; legislation related to health delivery.
  Prerequisite: NSB130
  Credit Points: 12
  Contact Hours: 4 per week

- **NSB240 NURSING PRACTICE I**
  Offered: Autumn
  Extension of knowledge of theory and skills related to the clinical, teaching and counselling components of the nursing role; use of case studies for the assessment of individual needs according to stage of development.
  Co-requisites: NSB212, NSB210
  Credit Points: 18
  Contact Hours: 8 per week

- **NSB241 NURSING PRACTICE II**
  Offered: Spring
  Care co-ordinator, change agent and client advocate components of the nursing role - application of management principles to job assignment; documentation; co-operative interaction with other health professionals; application of principles of change; process of client advocacy.
  Prerequisite: NSB240
  Credit Points: 15
  Contact Hours: 6 per week

- **NSB250 PSYCHOSOCIAL ADAPTATION**
  Offered: Autumn
  Aetiological factors related to adaptive and maladaptive behaviour; assessment techniques to identify maladaptation in health-related situations; nursing participation in therapeutic intervention.
  Credit Points: 6
  Contact Hours: 2 per week

- **NSB252 PATHOPHYSIOLOGY**
  Offered: Autumn
  A study of selected pathophysiological states which represent major alteration in physiological functioning, occurring in each developmental phase.
  Credit Points: 6
  Contact Hours: 2 per week

- **NSD120 PERSPECTIVES FOR NURSING PRACTICE I**
  Offered: Autumn
  Views nursing from a conceptual viewpoint, examines the roles of the nurse in the provision of health care. Distinguishes between the independent and interdependent functions of the nurse.
  Credit Points: 3
  Contact Hours: 2 per week

- **NSD121 CONCEPTS FOR NURSING PRACTICE I**
  Offered: Autumn
  Addresses the relationship between the individual and health. Examines human needs/adaptation theory and related concepts. Introduces the concept of health promotion - maintenance.
  Co-requisite: NSD122
  Credit Points: 6
  Contact Hours: 3 per week

- **NSD122 CLINICAL PRACTICE IA**
  Offered: Autumn
  Focuses on the acquisition of knowledge and experience in interpersonal, problem solving and psychomotor skills. Experience takes place in the college laboratory and community placements.
  Credit Points: 9
  Contact Hours: 8 per week

- **NSD123 CLINICAL PRACTICE IB**
  Offered: Autumn
  Provides experience in the application of concepts and principles addressed during semester. Focuses on the acquisition of a specific level of competence. Settings may include: kindergartens, schools, senior citizens centres and maternity units.
  Co-requisite: NSD122
  Credit Points: 9
  Contact Hours: 120 hrs/3 wk block following semester

- **NSD220 PERSPECTIVES FOR NURSING PRACTICE II**
  Offered: Spring
  Critiques health care in Australia. Analyses nursing in hospitals. Determines specific attributes of the nursing roles of clinicians and teacher.
  Prerequisites: NSD120
  Credit Points: 6
  Contact Hours: 2 per week

- **NSD221 CONCEPTS FOR NURSING PRACTICE II**
  Offered: Spring
  Addresses the concept of illness and the effect on individuals. Examines strategies to promote adaptation to illness/hospitalisation of individuals from each developmental stage. Focuses on health promotion - maintenance, restoration, reorganisation.
  Prerequisite: NSD121
  Co-requisite: NSD122
  Credit Points: 6
  Contact Hours: 3 per week

- **NSD222 CLINICAL PRACTICE II A**
  Offered: Spring
  Focuses on the acquisition of knowledge and experience in interpersonal, problem solving and psychomotor skills. Experience takes place in the college laboratory and hospitals.
  Credit Points: 9
  Contact Hours: 8 per week

- **NSD223 CLINICAL PRACTICE II B**
  Offered: Spring
  Provides experience in the application of concepts and principles addressed during semester. Focuses on the acquisition of a specific level of competence. The setting will be hospitals.
  Co-requisite: NSD222
  Credit Points: 9
  Contact Hours: 120 hrs/3 wk block following semester

- **NSD320 PERSPECTIVES FOR NURSING PRACTICE III**
  Offered: Autumn
  Reviews the concept of the health care team. Addresses the roles of care co-ordinator and researcher.
  Prerequisite: NSD220
  Credit Points: 6
  Contact Hours: 2 per week
NSD321 CONCEPTS FOR NURSING PRACTICE III
Offered: Autumn
Addresses the effects of pathophysiology or psychopathology on human needs - respiratory, cardiovascular, fluid/electrolyte imbalance, surgical intervention. Examines strategies - independent and interdependent to promote health - maintenance, restoration reorganisation.
Prerequisite: NSD221 Co-requisite: NSD322
Credit Points: 6 Contact Hours: 3 per week

NSD322 CLINICAL PRACTICE IIIA
Offered: Autumn
Focuses on the acquisition of knowledge and experience in interpersonal, problem solving and psychomotor skills. Experience takes place in the college laboratory and hospitals.
Credit Points: 9 Contact Hours: 10 per week

NSD323 CLINICAL PRACTICE IIIB
Offered: Autumn
Provides experience in the application of concepts and principles addressed during semester. Focuses on the acquisition of a specific level of competence. The setting will be hospitals.
Co-requisite: NSD322 Credit Points: 9 Contact Hours: 120 hrs/3 wk block following semester

NSD420 PERSPECTIVES FOR NURSING PRACTICE IV
Offered: Spring
Concentrates on ethical aspects of nursing - theory and practice. Addresses the role of the nurse as client advocate.
Prerequisite: NSD220
Credit Points: 6 Contact Hours: 2 per week

NSD421 CONCEPTS FOR NURSING PRACTICE IV
Offered: Spring
Addresses the effects of pathophysiology or psychopathology on human needs - urinary, gastrointestinal, musculo-skeletal. Examines emergency/critical aspects of care. Examines strategies - independent and interdependent to promote health - maintenance, restoration, reorganisation.
Prerequisite: NSD221 Co-requisite: NSD422
Credit Points: 6 Credit Points: 15 per week Contact Hours: 120 hrs/3 wk block following semester

NSD422 CLINICAL PRACTICE IVA
Offered: Spring
Focuses on the acquisition of knowledge and experience in interpersonal, problem solving and psychomotor skills. Experience takes place in the college laboratory and hospitals.
Credit Points: 9 Contact Hours: 10 per week

NSD423 CLINICAL PRACTICE IVB
Offered: Spring
Provides experience in the application of concepts and principles addressed during semester. Focuses on the acquisition of a specific level of competence. The setting will be hospitals.
Co-requisite: NSD422 Credit Points: 9 Contact Hours: 120 hrs/3 wk block following semester

NSD520 PERSPECTIVES FOR NURSING PRACTICE V
Offered: Autumn
Addresses the concepts of the community and family as systems. Focuses on crises intervention as a therapeutic process. Examines the role of the nurse as counsellor.
Prerequisite: NSD220
Credit Points: 6 Contact Hours: 3 per week

NSD521 CONCEPTS FOR NURSING PRACTICE V
Offered: Autumn
Addresses the effects of pathophysiology or psychopathology on human needs - reproductive, neurological, psychiatric. Examines the childbearing experience. Examines strategies - independent and interdependent to promote health - maintenance, restoration, reorganisation.
Prerequisite: NSD221 Co-requisite: NSD522
Credit Points: 6 Contact Hours: 4 per week

NSD522 CLINICAL PRACTICE VA
Offered: Autumn
Focuses on the acquisition of knowledge and experience in interpersonal, problem solving and psychomotor skills. Experience takes place in the college laboratory, community and hospital.
Credit Points: 9 Contact Hours: 15 per week

NSD523 CLINICAL PRACTICE VB
Offered: Autumn
Provides experience in the application of concepts and principles addressed during semester. Focuses on the acquisition of a specific level of competence. The setting will be the community, community agencies and hospitals.
Co-requisite: NSD522 Credit Points: 9 Contact Hours: 120 hrs/3 wk block following semester

NSD620 PERSPECTIVES FOR NURSING PRACTICE VI
Offered: Spring
Addresses nursing from a historical and contemporary perspective. Looks at such issues as the nurse as a professional, leadership and the expanding role of the professional nurse.
Prerequisite: NSD220
Credit Points: 6 Contact Hours: 3 per week

NSD621 CONCEPTS FOR NURSING PRACTICE VI
Offered: Spring
Addresses the effects of pathophysiology and psychopathology on human needs - integumentary, endocrine, oncologic, immunologic problems. Examines strategies - independent and interdependent to promote health - maintenance, restoration, reorganisation.
Prerequisite: NSD221 Co-requisite: NSD622
Credit Points: 6 Contact Hours: 4 per week

NSD622 CLINICAL PRACTICE VIA
Offered: Spring
Focuses on the acquisition of knowledge and experience in interpersonal, problem solving and psychomotor skills. Experience takes place in the college laboratory, community and hospitals.
Credit Points: 9 Contact Hours: 15 per week

NSD623 CLINICAL PRACTICE VIB
Offered: Spring
Provides experience in the application of concepts and principles addressed during semester. Focuses on the acquisition of a specific level of competence. The setting will be the community, community agencies and hospitals.
Co-requisite: NSD622
Credit Points: 9 Contact Hours: 120 per week
NSN102 CONCEPTS FOR ADVANCED CLINICAL NURSING

Offered: Autumn
In recent years there has been significant development in the role of the professional nurse as an advanced-level planner and provider of care. At this level, it is expected that nurses show a high degree of competence with an independent problem solving approach to client care and are able to interact widely on intra-, inter- and extra-professional levels. Therefore, this subject is designed to enhance knowledge and skills involved in the selection, provision and communication of contemporary nursing care.
Credit Points: 12  Contact Hours: 3 per week

NSN103 RESEARCH METHODS IN NURSING

Offered: Autumn
This subject will provide opportunities for students to develop skills in research design and data collection processes related to clinical phenomena. The data analysis component will emphasise statistical techniques applicable to nursing research design.
Credit Points: 12  Contact Hours: 3 per week

NSN104 PROFESSIONAL ISSUES IN NURSING

Offered: Spring
This subject is designed to enable students to expand the concept of the social significance of nursing as well as analyse the profession's accountability and responsibility to health care at local, national and international levels. Major topics of study will include theoretical and ideological perspectives of professional regulation, nursing's approach to professionalisation and the involvement of national and international nursing organisations in health policy formulation. Students will be given the opportunity to consider the influence of other disciplines and the historical environment on the development of ideas in nursing theory.
Credit Points: 12  Contact Hours: 3 per week

NSN105 MEDICAL/SURGICAL NURSING I

Offered: Spring
Advanced specialisation in medical-surgical nursing requires the ability to deal critically and effectively with particular clinical phenomena so that the health of the individual, family or community is promoted. This subject, which focuses on the individual as client, will provide opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised. Prerequisites: NSN101, NSN102
Credit Points: 12  Contact Hours: 3 per week

NSN106 MEDICAL/SURGICAL NURSING II

Offered: Autumn (NSM253); Spring (HSN257-NRS)
Advanced specialisation in medical-surgical nursing requires the ability to deal critically and effectively with particular clinical phenomena so that the health of the individual, family or community is promoted. This subject adds a family focus to that of the individual and family. It will provide opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised.
Credit Points: 12  Contact Hours: 3 per week

NSN107 MEDICAL/SURGICAL NURSING III

Offered: Spring
Advanced specialisation in medical-surgical nursing requires the ability to deal critically and effectively with particular clinical phenomena so that the health of the individual, family or community is promoted. This subject adds a community focus to that of the individual and family. It will provide opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised.
Credit Points: 12  Contact Hours: 3 per week
Ill NSN113 PSYCHIATRIC/MENTAL HEALTH NURSING III
Offered: Spring
Particular attention is given to current trends and approaches to the organisation and delivery of mental health services within Australia with selected international comparisons.
Credit Points: 12  Contact Hours: 3 per week

Ill NSN201 GRIEF & Bereavement
Offered: Spring
Advanced level clinical practice in any field of nursing requires the ability to deal effectively and sensitively with grieving and bereaved individuals and families. The purpose of such practice is two fold: to enable the dying to experience a dignified and peaceful death, and to assist with the grieving/bereaved individual’s families’ adaptation to the loss. This subject will provide opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised when caring for grieving and bereaved individuals and families in hospital and community settings.
Credit Points: 6  Contact Hours: 1.5 per week

Ill NSN202 NURSING & HEALTH EDUCATION PRACTICE
Offered: Spring
This elective unit of study introduces practising nurses to the theoretical perspectives of health education. Particular attention is given to the development, implementation and evaluation of health education programs which focus on specific needs of groups and/or communities.
Credit Points: 6  Contact Hours: 1.5 per week

Ill NSN203 HUMAN SEXUALITY & HEALTH
Offered: Spring
Human sexuality remains a controversial and highly debated topic in Australian society. Although there is a growing awareness amongst nurses of the significance of human sexuality to patient care, many nurses suffer from the same paucity of information, myths and misconceptions about sexuality that afflict the broader community. Students undertaking this elective will have the opportunity to explore a subject of considerable complexity within a nursing context.
Credit Points: 6  Contact Hours: 1.5 per week

Ill NSN204 PAIN: A NURSING FOCUS
Offered: Spring
Pain is a universal experience which may cause individuals, together with their families, great distress. It is also a subjective, personal experience about which much is still being learnt and understood. This subject will provide opportunities for students to extend previous clinical knowledge and skills so that a contemporary and comprehensive approach to pain assessment and management may be initiated by the nurse.
Credit Points: 6  Contact Hours: 1.5 per week

Ill NSN205 INDEPENDENT STUDY
Offered: Spring
The intention of this unit of study is to increase flexibility and provide the opportunity for indepth study in an approved area of study interest to meet the diverse needs and interest of practising Registered Nurses.
Credit Points: 6  Contact Hours: 1.5 per week

Ill NSN301 ADVANCED NURSING EDUCATION I
Offered: Spring
This subject is designed to increase students’ knowledge of the theoretical bases of teaching and learning in order to promote and facilitate learning. Students from various disciplines on campus can be accommodated within this subject. Students of nursing will focus on the professional practice of that discipline.
Credit Points: 12  Contact Hours: 3 per week

Ill NSN302 ADVANCED NURSING EDUCATION II
Offered: Autumn
This subject will provide opportunities for students to view measurement and evaluation as essential components of sound educational decision making. Students from various disciplines on campus are able to be accommodated within this subject. Students of nursing will focus on the professional practice of that discipline.
Prerequisite: NSN301
Credit Points: 12  Contact Hours: 3 per week

Ill NSN303 ADVANCED NURSING EDUCATION III
Offered: Autumn
This subject will enable students to explore aspects of curriculum development which are relevant to their specific areas of interest. Students from various disciplines on campus are able to be accommodated with this subject. Students of nursing will focus on the professional practice of that discipline. Content will focus on perspectives, principal issues and theoretical approaches to curriculum assessment, planning implementation, evaluation and innovation.
Prerequisite: NSN301
Credit Points: 12  Contact Hours: 3 per week

Ill NSN304 ADVANCED NURSING MANAGEMENT I
Offered: Spring
This unit will provide opportunities for students to examine the organisation context of nursing and health care from a number of theoretical perspectives and to enable them to contribute effectively to debate on the nature of nursing and health care organisation.
Credit Points: 12  Contact Hours: 3 per week

Ill NSN305 ADVANCED NURSING MANAGEMENT II
Offered: Autumn
This subject provides an opportunity for students to examine management processes of nursing divisions within health care organisations enabling them to have creative input into the nursing environment.
Prerequisites: NSN301
Credit Points: 12  Contact Hours: 3 per week

Ill NSN307 ADVANCED NURSING CLINICAL I
Offered: Spring
This subject allows the student to develop an advanced clinical nurse practice role. It focuses on the role of the advanced clinical nurse practitioner, and includes role creation/development including role theory, role application, role analysis and strategies for implementing role. Students will develop a conceptual framework for advanced clinical practice which will include but not be limited to: expert clinical practitioner advocate, change agent, professional role model, clinical teacher/mentor and motivator.
Prerequisite: Clinical Specialisation III
Credit Points: 12  Contact Hours: 3 per week
NSN308 ADVANCED NURSING CLINICAL II
Offered: Autumn
This subject allows the students to implement functions of the advanced clinical practice role. The content of this subject focuses on implementing the advanced clinical practice role in a selected area. It will provide experiences to strengthen clinical skill, knowledge and judgment.
Prerequisites: NSN301
Credit Points: 12 Contact Hours: 3 per week

NSN309 ADVANCED NURSING CLINICAL III
Offered: Autumn
This subject is designed to develop knowledge and skill in the consultation function of the advanced clinical practitioner role. It also develops skills in the implementation of an innovative change utilising skills from leadership, innovation, and change theory. This subject examines consultation theory and practice in detail. The areas of study include a focus on relationship between the nurse consultant and the client, problems that can arise, planning intervention and evaluation of the consultative process.
Prerequisites: NSN301
Credit Points: 12 Contact Hours: 3 per week

NSN401 STRATEGIES FOR NURSING RESEARCH
Offered: Autumn
This subject introduces postgraduate students to the use and application of qualitative research techniques in nursing practice. The content will be selected from techniques such as participant observation and unstructured interviewing as well as qualitative approaches in nursing research such as phenomenology, grounded theory, ethnography and historical research.
Credit Points: 12 Contact Hours: 3 per week

NSN403 DISSERTATION
Offered: Autumn
The dissertation should be a substantive and original research study. It should provide evidence that the student has identified a significant problem, reviewed the relevant literature, developed appropriate methodology to collect and analyse data, implemented the study and presented the findings in a form consistent with school requirements.
Prerequisites: NSN401, MSN150
Credit Points: 24 Contact Hours: 6 per week

NSP171 PRINCIPLES OF EDUCATION
Offered: Autumn
Learning theories; the teaching process; readiness for learning; organisation of instruction - group and individual methods; teaching techniques; audio and visual aids; and place of evaluation in educational process. Practice of principles of education will be incorporated in the practice of diet therapy as students practise instructing patients on therapeutic diets.
Credit Points: 4 Contact Hours: 2 per week

OPB312 VISUAL SCIENCE III
Offered: Autumn
The performance of the eye as an optical system is considered in the context of ocular aberrations, refractive errors and image formation and quality. An introduction to visual performance characteristics includes absolute and relative thresholds, dark and light adaptation and relative luminous efficiency curves.
Prerequisite: PHB240 Co-requisite: PHB340
Credit Points: 14 Contact Hours: 5 per week

OPB401 OCULAR & REGIONAL ANATOMY
Offered: Spring
The gross anatomy of the head and neck region with particular reference to the central nervous system. The macroscopic and microscopic anatomy of the orbit, extraocular muscles, eyelids, lacrimal apparatus, cornea, conjunctiva, sclera, uveal tract, lens, retina, optic nerve, aqueous, vitreous and the neural pathways and vascular circulation subserving vision. Ocular embryology.
Prerequisite: PNB363
Co-requisite: PNB435; OPB412
Credit Points: 8 Contact Hours: 3 per week

OPB412 VISUAL SCIENCE IV
Offered: Spring
Visual performance is examined with respect to its spatial and temporal characteristics. Perceptual aspects of vision as well as binocular and colour vision performance characteristics are also included.
Prerequisites: OPB312; PHB340
Co-requisite: OPB401
Credit Points: 14 Contact Hours: 5 per week

OPB504 OPHTHALMIC OPTICS V
Offered: Autumn
A continuation of OPB312 Ophthalmic Optics II, with emphasis on problems with spectacle lenses. The practical application of theory to ophthalmic dispensing in the laboratory.
Prerequisites: OPB312, PHB340
Credit Points: 6 Contact Hours: 4 per week

OPB505 CLINICAL OPTOMETRY V
Offered: Autumn
The clinical application of techniques learnt in OPB509 Optometry V (studied concurrently) in the management of patients presenting for eye examinations.
Prerequisite: OPB412
Co-requisites: OPB509, OPB508, OPB527
Credit Points: 8 Contact Hours: 4 per week

OPB508 OCULAR PHYSIOLOGY
Offered: Autumn
This course covers all aspects of ocular physiology including the vegetative physiology of various ocular structures, visual neurophysiology and an introduction to electrophysiological techniques.
Prerequisites: OPB412, OPB401
Co-requisites: OPB503, OPB505, OPB527
Credit Points: 8 Contact Hours: 4 per week

OPB509 OPTOMETRY V
Offered: Autumn
The aim of this subject is to teach the theory and practice of clinical procedures which are used in routine eye examinations.
Prerequisites: OPB412
Co-requisite: OPB508, OPB505
Credit Points: 18 Contact Hours: 9 per week
OPB527 DISEASES OF THE EYE V
Offered: Autumn
The detection, diagnosis, referral and management of ocular disease. General pathological considerations. The writing of reports, referral letters and referral procedures. The nature, aetiology and management of congenital, developmental, dystrophic and degenerative anomalies of the external and internal ocular structures and ocular adnexae. The ocular manifestation of systemic disease including cardio-vascular, metabolic, endocrine, central nervous system and malnutritional disorders.
Prerequisites: PNB435, OPB401, MSB430
Co-requisites: OPB503, OPB508, OPB509
Credit Points: 8  Contact Hours: 3 per week

OPB605 CLINICAL OPTOMETRY V1
Offered: Spring
The continuation of OPB505 Clinical Optometry V. The clinical application of techniques learnt in OPB509 Optometry V and OPB609 Optometry V1 (studied concurrently) in the management of patients presenting for eye examinations.
Prerequisites: OPB505
Co-requisites: OPB608, OPB609, OPB627
Credit Points: 8  Contact Hours: 4 per week

OPB608 OCULAR PHARMACOLOGY
Offered: Spring
General pharmacological principles are presented as background to a study of pharmacological profiles of ophthalmic preparations; both diagnostic and topical therapeutic agents are considered. Particular emphasis is placed on these ophthalmic drugs used to facilitate an eye examination.
Prerequisites: OPB508, OPB509
Co-requisites: OPB608, OPB609, OPB627
Credit Points: 6  Contact Hours: 3 per week

OPB609 OPTOMETRY VI
Offered: Spring
This subject is a continuation of the theory and practice of routine and advanced clinical procedures which are used when conducting a complete eye examination. The areas covered include ocular pharmacology, the management of binocular vision anomalies, methods of examining the visual fields and the measurement of intra-ocular pressure.
Prerequisites: OPB508, OPB509
Co-requisites: OPB608, OPB609
Credit Points: 16  Contact Hours: 8 per week

OPB617 CONTACT LENS STUDIES VI
Offered: Spring
This subject provides an introduction to the basic concepts of contact lens fitting. Areas covered include contact lens instrumentation, contact lens materials and designs, fitting and consultation techniques. The practical component of the subject focuses upon the fitting of contact lenses.
Prerequisites: OPB509, OPB505, OPB527
Co-requisites: OPB609, OPB605, OPB627
Credit Points: 6  Contact Hours: 2 per week

OPB627 DISEASES OF THE EYE VI
Offered: Spring
A continuation of OPB527 Diseases of the Eye V. The anatomical, physiological and pathological aspects of glaucoma. Its symptomatology, methods of detection and diagnosis, management and prognosis. Inflammatory diseases, trauma and tumours of the external and internal ocular structures and ocular adnexae.
Prerequisites: OPB527
Co-requisites: OPB605, OPB608, OPB609
Credit Points: 8  Contact Hours: 4 per week

OPB705 CLINICAL OPTOMETRY VII
Offered: Autumn
This is the clinical application of the procedures studied in OPB609 Optometry VI and OPB709 Optometry VII, and includes the management of patients in the clinical situation.
Prerequisites: OPB605
Co-requisites: OPB709, OPB717
Credit Points: 24  Contact Hours: 13

OPB709 OPTOMETRY VII
Offered: Autumn
This subject is a continuation of OPB609 Optometry VI and provides knowledge and understanding of the theory and clinical procedures involved in paediatric optometry, low vision, colour vision and aniseikonia.
Prerequisites: OPB609
Credit Points: 10  Contact Hours: 5 per week

OPB717 CONTACT LENS STUDIES VII
Offered: Autumn
A series of lectures and practical sessions in advanced aspects of contact lens practice. The subject includes topics such as the physiological consequences of contact lens wear, management of contact lens patients, and fitting of lenses for keratoconus, extended wear and presbyopia. Practical sessions provide training in advanced diagnostic and fitting techniques.
Prerequisites: OPB617
Co-requisites: OPB705, OPB709
Credit Points: 6  Contact Hours: 2 per week

OPB750 PROJECT
Offered: Full year
Students are required to undertake project work in semester 7 and 8 of the course. Students work in groups of up to 3 on projects of their own choosing or on a topic chosen from a suggested list. Project topics must be original. Students conduct a literature search (including a computer based search in conjunction with a reference librarian). They decide on the experimental hypotheses, plan and execute the experiment, analyse the results and write a report in manuscript form which it is hoped will be suitable for publication in the open literature. Students are encouraged to seek assistance from staff members of the Department of Optometry and other Departments within the University. Oral presentations are given by each group to their peers, third year students and staff, as part of a formal semester 8 colloquium.
Co-requisites: OPB709, MAB258
Credit Points: 5  Contact Hours: 3 per week

OPB803 OCCUPATIONAL/PUBLIC HEALTH OPTOMETRY
Offered: Spring
A course of study to introduce the basic concepts of eye safety and visual ergonomics. Content will include eye safety programs, occupational vision screening, legal aspects of eye safety, eye hazards - traumatic, radiation and chemical, eye protection, visual ergonomics and illumination engineering.
Prerequisites: OPB709
Co-requisites: OPB805
Credit Points: 6  Contact Hours: 2 per week

OPB805 CLINICAL OPTOMETRY VIII
Offered: Spring
A continuation of OPB705 Clinical Optometry VII. This subject places emphasis on the students decision
making skills in the evaluation, care and treatment of patients who may have a wide range of visual disorders.

Prerequisites: OPB705, OPB717
Co-requisite: OPB800
Credit Points: 32  Contact Hours: 17 per week

**PHB154 INTRODUCTORY PHYSICS**

Offered: Autumn
An introduction to the basic concepts involved in the study of linear mechanics, ideal gases, liquids and solids, elasticity, surface tension, temperature and its measurement, heat content, heat transfer, reflection and refraction of light at plane surfaces, use of lenses in simple optical instruments, current electricity, e.m.f. resistance, circuit analysis, heating effect, electrical measurements using moving coil galvanometers, potentiometers and Wheatstone bridge, magnetic field with simple applications. A series of laboratory experiments emphasizes the above concepts.
Credit Points: 8  Contact Hours: 3 per week

**PHB104 INTRODUCTORY PHYSICS**

Offered: Autumn
This subject is intended to give the student a grounding in basic physics topics selected from the following areas: mechanics, heat, electricity, and magnetism and light.
Credit Points: 6  Contact Hours: 3 per week
Note: This subject is not compatible with Senior Physics.

**PHB115 PHYSICS IA**

Offered: Autumn
A course of lectures, tutorials and laboratory work covering dynamics, fluid mechanics, mechanical properties of matter, gravitation and geometrical optics. Co-requisite: PHB104 unless Senior physics has been undertaken.
Credit Points: 8  Contact Hours: 3 per week

**PHB111 PHYSICS IB**

Offered: Autumn
A course of lectures and laboratory work on a.c. and d.c. circuit theory, electronics, vibrations and waves, sound. Co-requisite: PHB104 unless Senior Physics has been undertaken.
Credit Points: 8  Contact Hours: 3 per week

**PHB132 ENGINEERING PHYSICS I A**

Offered: Autumn
A basic subject in the physics of waves and optics; including moving and stationary waves in various media, interference of waves, beats acoustics and shock waves and measurement of sound; geometrical and physical optics including reflection, refraction, dispersion, interference and diffraction, polarisation, optical instruments, design and resolution, and photometry.
Credit Points: 6  Contact Hours: 3 per week

**PHB170 PHYSICS FOR SURVEYORS**

Offered: Autumn
Credit Points: 12  Contact Hours: 6 per week

**PHB178 PRINCIPLES OF MEDICAL RADIATIONS**

Offered: Autumn
An introduction to the principles of medical imaging and to the methods of detection, diagnosis and treatment of cancer.
Credit Points: 10  Contact Hours: 5 per week

**PHB210 PHYSICS IIA**

Offered: Spring
A course of tutorials, lectures and laboratory work on thermal physics and electromagnetic fields. Prerequisite: PHB104 or Senior physics
Credit Points: 8  Contact Hours: 3 per week

**PHB211 PHYSICS IIB**

Offered: Spring
A course of lectures and laboratory work on physical optics, and modern and radiation physics. Prerequisite: PHB104 or Senior physics
Credit Points: 8  Contact Hours: 3 per week

**PHB232 ENGINEERING PHYSICS IIIA**

Offered: Spring
A basic subject in the physics of heat and properties of matter; including the kinetic theory of gases, temperature scales and thermometers, heat and heat measurement, thermodynamics and the molecular properties of matter; gravitational fields; basic radiation physics. Prerequisite: PHB132
Credit Points: 6  Contact Hours: 3 per week

**PHB260 PHYSICS IIG**

Offered: Spring
A course of lectures and tutorials in thermal physics, electrostatics, magnetostatics, electromagnetic fields and waves, quantum physics, nuclear and radiation physics.
Credit Points: 8  Contact Hours: 4 per week

**PHB272 RADIATION PHYSICS I**

Offered: Spring
A course of lectures and practical sessions on electrostatics, electromagnetism, the production of X-rays and their interaction with matter.
Credit Points: 12  Contact Hours: 5 per week

**PHB275 PROCESSING TECHNOLOGY**

Offered: Spring
A study of the processes involved in the production of a visible image in radiography, including: latent image formation, processing, techniques and equipment relevant to radiography.
Credit Points: 4  Contact Hours: 2 per week

**PHB276 GENERAL RADIOGRAPHY I**

Offered: Spring
A program of lectures and practical sessions relating to radiography of the skeletal system. Specific experiences relate to topics introduced in PHB276.
Prerequisite: as for PHB310
Credit Points: 4  Contact Hours: 2 per week

**PHB286 TREATMENT PLANNING I**

Offered: Spring
An introduction to the techniques of radiotherapy treatment planning.
Credit Points: 6  Contact Hours: 3 per week

**PHB287 RADIOTHERAPY TECHNIQUE I**

Offered: Spring
An introduction to the basic techniques of radiotherapy including beam direction and defining devices, modification of beam and dosimetry.
Prerequisite: PHB183  Co-requisite: PNB225
Credit Points: 12  Contact Hours: 6 per week
PHB289 CLINICAL RADIOThERAPY I
Offered: Spring
Practical programs carried out in approved clinical departments. Specific experiences relate to topics introduced in PHB287.
Credit Points: 4  Contact Hours: 2 per week

PHB308 ELECTRONICS I
Offered: Autumn
A program of lectures and laboratory work covering basic measurement techniques and instrumentation, solid state components such as diodes, transistors, FETs and optoelectronics, feedback theory and applications.
Prerequisite: 2 semesters tertiary study (PHB111 preferred)
Credit Points: 8  Contact Hours: 3 per week

PHB310 WAVE THEORY & A.C. CIRCUITS
Offered: Autumn
A course of lectures and tutorials on undamped and damped oscillations, forced oscillations, coupled oscillations, wave transmission and refraction, examples of wave systems, a.c. network analysis, resonance, transformers, bridges.
Prerequisite: At least three of PHB110, PHB111, PHB210, PHB211 and at least two of MAB211, MAB224, MAB225
Co-requisite: MAB411 is recommended
Credit Points: 8  Contact Hours: 3 per week

PHB311 OPTICS & ACOUSTICS
Offered: Autumn
A course of lectures and tutorials on interference and diffraction, Fourier methods, coherence and correlation, lasers and holography, sound waves, loudspeakers and microphones, acoustic properties of materials, architectural acoustics and measurement of noise.
Prerequisite: as for PHB310
Credit Points: 8  Contact Hours: 3 per week

PHB312 PHYSICAL PROPERTIES OF MATERIALS
Offered: Autumn
Prerequisite: PHB110 + PHB210
Credit Points: 8  Contact Hours: 3 per week

PHB316 EXPERIMENTAL PHYSICS III
Offered: Autumn
This course is designed to further the education of students in the field of experimental physics. They are exposed to activities including laboratory experiments in electricity and magnetism, acoustics, optics and materials physics.
Prerequisite: At least three of PHB110, PHB111, PHB210, PHB211
Co-requisite: At least one of PHB310, PHB311
Credit Points: 8  Contact Hours: 3 per week

PHB373 NUCLEAR MEDICINE IMAGING I
Offered: Autumn
A course of lectures on the principles, equipment and applications of nuclear medicine imaging.
Credit Points: 4  Contact Hours: 2 per week

PHB374 RADIOGRAPHIC EQUIPMENT I
Offered: Autumn
Detailed discussion of design considerations of X-ray generators and equipment used for control of beam direction.
Credit Points: 6  Contact Hours: 3 per week

PHB376 GENERAL RADIOGRAPHY II
Offered: Autumn
An extension of topics introduced in PHB276 to include more advanced techniques of skeletal radiography, ward and operating theatre radiography, and examinations utilising contrast media.
Prerequisite: PHB276 + PHB279 + PNB225
Credit Points: 12  Contact Hours: 5 per week

PHB379 CLINICAL RADIOGRAPHY II
Offered: Autumn
Clinical experiences in radiographic examinations introduced in PHB276 and PHB376. Experience is obtained in approved clinical departments.
Prerequisite: PHB276 + PHB279 + PNB225
Credit Points: 10  Contact Hours: 5 per week

PHB382 RADIOThERAPY PHYSICS I
Offered: Autumn
A study of the design, physical aspects and operating characteristics of megavoltage and telecurie units.
Prerequisite: PHB272
Credit Points: 4  Contact Hours: 2 per week

PHB386 TREATMENT PLANNING II
Offered: Autumn
An extension of the study of treatment planning introduced in PHB286 to the planning of complex techniques of photon therapy. The planning of electron therapy.
Credit Points: 4  Contact Hours: 2 per week

PHB387 MEGAVOLTAGE THERAPY I
Offered: Autumn
A series of lectures and practical exercises on the principles and applications of megavoltage therapy including techniques for specific sites.
Prerequisite: PHB287 + PNB225
Credit Points: 14  Contact Hours: 6 per week

PHB389 CLINICAL RADIOThERAPY II
Offered: Autumn
Practical exercises in megavoltage therapy related to topics introduced in PHB287 and PHB387. The programs are carried out in approved clinical departments.
Prerequisites: PHB289, PNB225
Co-requisite: PHB387
Credit Points: 10  Contact Hours: 5 per week

PHB401 THERMAL & VACUUM PHYSICS
Offered: Spring
A study of statistical mechanics, thermodynamics and vacuum physics.
Prerequisite: as for PHB310
Credit Points: 8  Contact Hours: 3 per week

PHB402 RELATIVITY & RADIATION PHYSICS
Offered: Spring
A study of relativity and particle physics.
Prerequisite: as for PHB310
Credit Points: 8  Contact Hours: 3 per week

PHB405 INSTRUMENTATION
Offered: Spring
A course of lectures, laboratory work and field trips on instrumentation systems, transducers, signal...
 processing, telemetry, control systems, display and recording systems.
Prerequisite: PHB308
Credit Points: 8 Contact Hours: 3 per week

■ PHB406 ADVANCED ORTHOSES
Offered: Autumn
This subject is designed to demonstrate a broad knowledge of orthotic and prosthetic devices as applicable to pediatric practice. The student will be required to display a high standard of practical skills in producing a range of orthoses e.g., butt edge seams, latex bandage technique, rubber butter devices, expandable foams, latex dipped devices, and specialised thermoplastic, display a high standard of practical skills in producing a range of orthoses for specialised patients e.g., partial or complete forefoot amputees, diabetics, arthritic conditions, post operative patients.
Prerequisites: PNB306, PNB303
Co-requisites: PNB403
Credit Points: 6 Contact Hours: 3 per week

■ PHB408 ELECTRONICS II
Offered: Spring
A program of lectures and laboratory work covering radio-frequency circuits, noise, analogue integrated circuits and applications, digital circuitry, counters, shift registers, A-D and D-A conversion.
Prerequisite: PHB308
Credit Points: 8 Contact Hours: 3 per week

■ PHB411 ASTRONOMY
Offered: Spring
An introduction to the theory and practice of observational astronomy; astronomical coordinate systems, time systems, celestial mechanics and gravitation, stellar measurements. Other topics may include the planets and the solar system in general, stellar spectra, formation and evolution, the structure of the universe, and cosmology. The subject will include practical exercises, and observing sessions as weather permits.
Prerequisites: any three of PHB110, PHB111, PHB210, PHB211
Credit Points: 8 Contact Hours: 3 per week

■ PHB416 EXPERIMENTAL PHYSICS IV
Offered: Spring
This unit consists of an extension of the laboratory program of PHB316 together with experimental radiation physics and a project performed either individually or in a small group. The project occupies approximately six weeks.
Prerequisite: PHB316
Co-requisite: at least one of PHB401, PHB402
Credit Points: 12 Contact Hours: 6 per week

■ PHB471 RADIATION PHYSICS II
Offered: Spring
A study of the philosophy and protocol of radiation protection. The question of protection is treated in a manner which brings into perspective the details of protection dealt with in other units of the course.
Credit Points: 4 Contact Hours: 2 per week

■ PHB473 MEDICAL ULTRASOUND
Offered: Spring
A course of lectures and practical exercises on the physical principles and application of ultrasound.
Credit Points: 4 Contact Hours: 2 per week

■ PHB474 RADIOGRAPHIC EQUIPMENT II
Offered: Spring
A study of the equipment used in specialised radiography; including mobiles, tomographic units, skull tables and mammography units.
Credit Points: 4 Contact Hours: 2 per week

■ PHB475 MEDICAL RADIATION COMPUTING I
Offered: Spring
An introduction to the capabilities of computer hardware and software, and image processing.
Credit Points: 8 Contact Hours: 3 per week

■ PHB476 SPECIAL PROCEDURES
Offered: Spring
A course of lectures and practical exercises on specialised techniques of radiography, including the skull, obstetrics, gynaecology, CNS and paediatric radiography.
Prerequisites: PHB376 + PHB379
Credit Points: 8 Contact Hours: 3 per week

■ PHB479 CLINICAL RADIOGRAPHY III
Offered: Spring
Clinical experience in approved departments in radiographic examinations discussed in PHB376.
Prerequisites: PHB376 + PHB379
Credit Points: 8 Contact Hours: 3 per week

■ PHB481 DOSIMETRY
Offered: Spring
A study of the measurement and dosimetry of external beam X-ray and gamma ray radiotherapy.
Credit Points: 6 Contact Hours: 3 per week

■ PHB482 RADIOTHERAPY PHYSICS II
Offered: Spring
A study of radioactivity including methods of radiation detection, radioactive equilibrium and production of radioisotopes, the principles of brachytherapy.
Prerequisite: PHB382
Credit Points: 6 Contact Hours: 3 per week

■ PHB484 PRINCIPLES OF TREATMENT I
Offered: Spring
A course of lectures on the principles underlying the choice of treatment of cancer in specific sites including consideration of associated treatment.
Credit Points: 6 Contact Hours: 3 per week

■ PHB487 MEGAVOLTAGE THERAPY II
Offered: Spring
An extension of the topic introduced in PHB387 to include the full range of treatment by megavoltage therapy for cancer in specific sites. Consideration includes techniques, planning, patient positioning, outlines and measurements.
Prerequisites: PHB387 + PHB389
Credit Points: 10 Contact Hours: 4 per week

■ PHB489 CLINICAL RADIOTHERAPY III
Offered: Spring
Clinical experiences in approved departments in techniques of megavoltage therapy.
Prerequisites: PHB389 + PHB387
Co-requisite: PHB487
Credit Points: 8 Contact Hours: 3 per week
**PHB501 APPLIED QUANTUM MECHANICS**
Offered: Autumn
A course of lectures on quantum mechanics and theory of spectra.
Prerequisites: PHB310(R)* + MAB411 and MAB412
Credit Points: 8  Contact Hours: 3 per week

**PHB502 ELECTROMAGNETIC FIELD THEORY**
Offered: Autumn
A course of lectures on electromagnetic field theory. Includes static field theory, wave equation, plane and spherical wave solutions, properties of plane waves, reflection, refraction, wave guides, cavity resonators and radiation theory.
Prerequisites: PHB310(R)* + MAB411 + MAB412
Credit Points: 8  Contact Hours: 3 per week

**PHB508 ELECTRONICS III**
Offered: Autumn
A program of lectures and laboratory work covering microprocessor fundamentals and interfacing to computers, displays and instrumentation. Design of microprocessor controlled data collection and analysis systems.
Prerequisite: PHB408
Credit Points: 8  Contact Hours: 3 per week

**PHB510 PHYSICAL METHODS OF ANALYSIS I**
Offered: Autumn
A course of lectures and associated practical work on a range of physical techniques of analysis, including for example X-ray diffraction and fluorescence, electron microscopy, neutron activation analysis, electron microprobe analysis. Emphasis is on the practical principle, instrumentation and nature of information available from each technique. Industrial visits may be included.
Prerequisite: PHB312
Credit Points: 8  Contact Hours: 3 per week

**PHB516 EXPERIMENTAL PHYSICS V**
Offered: Autumn
Laboratory and field work in applied physics with emphasis on open ended experiments with modern equipment. Field trips may be necessary.
Prerequisite: PHB416
Co-requisite: at least one of PHB501, PHB502
Credit Points: 12  Contact Hours: 6 per week

**PHB572 IMAGE RECORDING & EVALUATION**
Offered: Autumn
A course of lectures and practical exercises on non-film image formation evaluation. Information theory.
Credit Points: 4  Contact Hours: 2 per week

**PHB573 DIGITAL IMAGING MODALITIES**
Offered: Autumn
A study of the principles, methods and applications of CT, digital radiography and MRI in medical imaging.
Credit Points: 6  Contact Hours: 2 per week

**PHB574 QUALITY ASSURANCE IN MEDICAL IMAGING**
Offered: Autumn
A study of the principles and techniques used in the quality assurance of medical imaging apparatus and ancillary equipment.
Credit Points: 6  Contact Hours: 3 per week

*See note, page 374.

**PHB575 MEDICAL RADIATIONS COMPUTING II**
Offered: Autumn
A course of lectures and practical exercises related to the applications of computers in image processing and radiotherapy.
Credit Points: 8  Contact Hours: 3 per week

**PHB576 ADVANCED RADIOGRAPHIC TECHNIQUE I**
Offered: Autumn
A study of the principles and techniques used in advanced radiographic techniques including angiography, the salivary glands, arteriography, sinography, the lacrimal system, arteriography and venography.
Prerequisites: PHB476 + PHB479
Co-requisite: PHB578
Credit Points: 12  Contact Hours: 6 per week

**PHB578 IMAGE INTERPRETATION I**
Offered: Autumn
A course of lectures and practical exercises on image interpretation. Including: technical and diagnostic quality.
Credit Points: 4  Contact Hours: 2 per week

**PHB579 CLINICAL RADIOGRAPHY IV**
Offered: Autumn
Clinical experience in special radiographic procedures as introduced in PHB476.
Prerequisites: PHB476, PHB479
Credit Points: 8  Contact Hours: 4 per week

**PHB583 COMPLEMENTARY & EVOLVING TECHNIQUES**
Offered: Autumn
A course of lectures on the principles, strengths and stage of development of techniques which are complementary to radiotherapy treatment of cancer, including: hyperbaric O₂ therapy, neutron therapy, pi-meson therapy, chemotheray, cryotherapy and hyperthermia.
Credit Points: 6  Contact Hours: 3 per week

**PHB584 PRINCIPLES OF TREATMENT II**
Offered: Autumn
A continuation of the detailed discussion started in PHB484 to include the principles of treatment of cancer in all sites, and benign diseases.
Credit Points: 4  Contact Hours: 2 per week

**PHB585 COMPUTER ASSISTED TREATMENT PLANNING I**
Offered: Autumn
A study of planning hardware and software to include two dimensional planning. Development of concepts to an advanced level of understanding of computer assisted optimisation of isodose distributions.
Credit Points: 8  Contact Hours: 3 per week

**PHB587 ORTHOVOLTAGE & SUPERFICIAL THERAPY**
Offered: Autumn
A course of lectures and practical exercises on the specialised techniques of orthovoltage and superficial radiotherapy.
Prerequisites: PHB489 + PHB487
Credit Points: 10  Contact Hours: 4 per week

**PHB589 CLINICAL RADIOTHERAPY IV**
Offered: Autumn
Clinical experience in the techniques of radiotherapy employing orthovoltage and superficial therapy.
Prerequisites: PHB489 + PHB487
Co-requisite: PHB587
Credit Points: 12  Contact Hours: 6 per week

---

*See note, page 374.*

---

**PHB585 COMPUTER ASSISTED TREATMENT PLANNING I**
Offered: Autumn
A study of planning hardware and software to include two dimensional planning. Development of concepts to an advanced level of understanding of computer assisted optimisation of isodose distributions.
Credit Points: 8  Contact Hours: 3 per week

**PHB587 ORTHOVOLTAGE & SUPERFICIAL THERAPY**
Offered: Autumn
A course of lectures and practical exercises on the specialised techniques of orthovoltage and superficial radiotherapy.
Prerequisites: PHB489 + PHB487
Credit Points: 10  Contact Hours: 4 per week

**PHB589 CLINICAL RADIOTHERAPY IV**
Offered: Autumn
Clinical experience in the techniques of radiotherapy employing orthovoltage and superficial therapy.
Prerequisites: PHB489 + PHB487
Co-requisite: PHB587
Credit Points: 12  Contact Hours: 6 per week

---

*See note, page 374.*
PHB601 SOLID STATE PHYSICS
Offered: Spring
A course of lectures on the physics of materials, including mechanical, thermal and electrical properties.
Prerequisites: PHB401 + PHB501 + PHB312
Credit Points: 8 Contact Hours: 3 per week

PHB602 NUCLEAR PHYSICS & ENERGY
Offered: Spring
A course of lectures on applied nuclear physics, neutron physics, reactor technology and energy.
Prerequisite: PHB402
Credit Points: 8 Contact Hours: 3 per week

PHB608 APPLIED ACOUSTICS
Offered: Spring
A course of lectures and associated practical work. Standards, principles of methods and instrumentation used in vibration, noise and sound measurements with emphasis upon architectural acoustics and traffic, industrial and community noise. Brief treatment of underwater acoustics and recording and reproduction of sound. Legal and technical aspects of professional practice. Field trips.
Prerequisite: PHB311
Credit Points: 8 Contact Hours: 3 per week

PHB609 APPLIED RADIATION PHYSICS
Offered: Spring
A course of lectures and associated laboratory work covering special techniques of radiation counting and applications, health physics, radiation protection, and radiobiological effects.
Prerequisite: PHB402
Credit Points: 8 Contact Hours: 3 per week

PHB613 BIOPHYSICS
Offered: Spring
A course dealing with the biophysics of selected biological systems (e.g., electrical transmission systems, amplifiers, mechanical systems, molecular behaviours in fields) and instrumentation for intercellular and inter-organ measurements (micro-electronics, transducers, etc.).
Prerequisites: At least 24 credit points in first level physics subjects and successful completion of at least 80 credit points of second level subjects.
Credit Points: 8 Contact Hours: 3 per week

PHB616 PROJECT
Offered: Autumn, Spring
A supervised project on some aspect of applied physics which could involve the extension and application of existing techniques or the development of new techniques.
Prerequisite: PHB516
Co-requisite: At least one third level physics unit
Credit Points: 16 Contact Hours: 6 per week

PHB620 TOPICS IN PHYSICS
Offered: Spring
Lectures, laboratory work and industrial visits in several topics relating to current advances in physics. The nature of the subject is dependent on departmental and staff activities at the time.
Prerequisite: At least 32 credit points in second level physics subjects.
Credit Points: 8 Contact Hours: 3 per week

PHB671 RADIATION BIOLOGY
Offered: Spring
A study of the biological effects on ionising and non-ionising radiation.
Credit Points: 4 Contact Hours: 2 per week

PHB672 PROJECT
Offered: Spring
A supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic.
Credit Points: 8 Contact Hours: 3 per week

PHB676 ADVANCED RADIOGRAPHIC TECHNIQUE II
Offered: Spring
An extension of topics in advanced radiographic technique as introduced in PHB576 to include mammography, digital imaging techniques, technique for examination of the lymphatic system, and emerging techniques.
Prerequisites: PHB576 + PHB579
Co-requisite: PHB678
Credit Points: 8 Contact Hours: 3 per week

PHB679 CLINICAL RADIOGRAPHY V
Offered: Spring
Clinical experience in advanced radiographic techniques introduced in PHB576.
Prerequisites: PHB576 + PHB579
Credit Points: 14 Contact Hours: 6 per week

PHB680 NUCLEAR MEDICINE IMAGING II
Offered: Spring
A course of lectures, practical exercises and clinical experiences in nuclear medicine imaging. This subject expands on topics introduced in PHB573 and provides an in-depth study of nuclear medicine imaging techniques.
Prerequisite: PHB373
Credit Points: 10 Contact Hours: 5 per week

PHB681 COMPUTED TOMOGRAPHY IMAGING
Offered: Spring
A course of lectures, practical exercises and clinical experiences in CT imaging. This subject expands on topics introduced in PHB573 and provides an in-depth study of CT imaging techniques.
Prerequisite: PHB573
Credit Points: 10 Contact Hours: 5 per week

PHB683 ONCOLOGICAL IMAGING
Offered: Spring
A study of the principles and techniques of medical imaging used for the detection of cancer. Including CT, MRI, US and NM.
Credit Points: 6 Contact Hours: 4 per week

PHB685 COMPUTER ASSISTED TREATMENT PLANNING II
Offered: Spring
A course of lectures and practical exercises in the use of computers in the planning of non-standard and complex radiotherapy treatment. Including arc and rotation techniques, irregular field techniques, 3-D plans.
Credit Points: 8 Contact Hours: 4 per week

PHB687 SPECIALISED RADIOTherapy Technique
Offered: Spring
A study of specialised radiotherapy techniques. Including techniques applicable to the child patient, and patients with communicable disease, theatre procedures, total body photon and electron therapy.
Credit Points: 10 Contact Hours: 4 per week

PHB689 CLINICAL RADIOTherapy V
Offered: Spring
Clinical experience in specialised radiotherapy techniques.
Prerequisite: PHB589 Co-requisite: PHB687
Credit Points: 8 Contact Hours: 4 per week
PHD471 RADIobiology & PROTECTION
Offered: Spring
This unit treats aspects of radiobiology necessary for an appreciation of the philosophy and protocol of radiation protection. The question of protection is treated in a manner which brings into perspective the many details of protection deals with throughout other units of the diagnostic radiography course.
Credit Points: 4  Contact Hours: 2 per week

PHD572 COMPLEMENTARY IMAGING TECHNIQUES
Offered: Autumn
This unit treats a number of topics which are complementary to diagnostic radiography and others in the fields of image presentation and evaluation, which are of potential importance in diagnostic radiography. Includes CT, MRI, nuclear medicine and computers.
Credit Points: 8  Contact Hours: 4 per week

PHD573 RADIOGRAPHIC TECHNIQUE III
Offered: Autumn
This section amplifies PHD473 in relation to the more extensive preparation and techniques for specialised radiographic procedures.
Prerequisites: PHD473, PHD477
Credit Points: 6  Contact Hours: 3 per week

PHD574 RADIOGRAPHIC EQUIPMENT III
Offered: Autumn
This unit covers the technology of X-ray equipment and its correct use in advanced radiographic techniques. Quality control and fault conditions.
Prerequisite: PHD474
Credit Points: 6  Contact Hours: 3 per week

PHD577 CLINICAL PRACTICE IIIYD
Offered: Autumn
Practical programs carried out in approved clinical training centres under the supervision of qualified radiographers. Detailed programs for each semester are specified by a Clinical Practice Supervisory Committee.
Prerequisites: PHD473, PHD477
Credit Points: 16  Contact Hours: 10 per week

PHD580 COMPLEMENTARY & EVOLVING TECHNIQUES I
Offered: Autumn
Consideration of specific imaging modalities used in treatment planning or cancer diagnosis.
Credit Points: 8  Contact Hours: 4 per week

PHD586 RADIOTHERAPY PRACTICE V
Offered: Autumn
This unit covers details of techniques and procedures used in treatment with emphasis on practical considerations.
Prerequisites: PHD485, PHD486
Credit Points: 6  Contact Hours: 3 per week

PHD587 CLINICAL PRACTICE IVT
Offered: Autumn
Practical programs carried out in approved clinical training centres under the supervision of qualified radiographers and radiation oncologists. Detailed programs for each semester are specified by a Clinical Practice Supervisory Committee.
Prerequisite: PHD487
Credit Points: 30  Contact Hours: 13 per week

PHD610 ADVANCED RADIOGRAPHIC TECHNIQUE
Offered: Spring
Assignments must be submitted on topics specified with the areas of modern trends in X-radiographic technique; computerised tomography scanners; digital radiography; nuclear medicine imaging apparatus and other complementary imaging modalities. No formal lecture classes are required.
Credit Points: 4  Contact Hours: 2 per week

PHD677 CLINICAL PRACTICE IVD
Offered: Spring
Practical programs carried out in approved clinical training centres under the supervision of qualified radiographers and radiologists. Detailed programs for each semester are specified by a Clinical Practice Supervisory Committee.
Prerequisites: PHD573 and PHD577
Credit Points: 44  Contact Hours: 16 per week

PHD680 COMPLEMENTARY & EVOLVING TECHNIQUES II
Offered: Spring
Applications of the computer to radiotherapy planning. Consideration of the principles and merits of evolving techniques.
Credit Points: 6  Contact Hours: 3 per week

PHN101 ANALOGUE ELECTRONICS
Offered: Autumn
Principles of electronics applicable in the medical field; discrete circuits and integrated circuits in common use - design and limitations.
Credit Points: 6  Contact Hours: 16 per week

PHN102 INTRODUCTION TO MEDICAL STATISTICS COMPUTING
Offered: Autumn
Basic concepts of computing systems, programming, software engineering, introduction to medical applications. Medical applications of numerical methods and medical statistics.
Credit Points: 6  Contact Hours: 2 per week

PHN103 RADIATION PHYSICS I
Offered: Autumn
Study of the basic principles of radioactivity and radioactive decay and the interactions of ionising radiation with matter.
Credit Points: 6  Contact Hours: 2 per week

PHN104 RADIATION PHYSICS II
Offered: Autumn
Deals with phenomena related to interaction of ionising radiation with biological tissues. Emphasis on aspects of actual or potential importance in a clinical environment. Isotope production, nuclear radiation detectors.
Credit Points: 8  Contact Hours: 3 per week

PHN150 OPTICS
Offered: Spring
The objective of this subject is to provide understanding and knowledge of fundamental optical theory and its
application to optical instruments used in spectroscopy. Optical materials and devices - spectral ranges; diffraction gratings; spectrophotographs; spectrometers; monochromators; spectrophotometers; special purpose instruments; lasers and their applications; optimum illumination; reduction of scattered light; Fourier spectroscopy and grille spectrometers; manufacturer's specifications.

Credit Points: 6 Contact Hours: 2 per week

PHN151 PHYSICS OF ULTRASOUND
Offered: Spring
A course of lectures and practical work covering the physical principles of diagnostic ultrasound including wave physics, propagation, the Doppler effect and the biological effects of ultrasound.
Credit Points: 6 Contact Hours: 2 per week

PHN152 CROSS-SECTIONAL ANATOMY
Offered: Spring
A study of the cross-sectional anatomy of the head, neck, thorax and abdomen (including the pregnant uterus) with an emphasis on an appreciation of the structures demonstrated on ultrasound images.
Prerequisite: PNN161 (or equivalent)
Co-requisite: PNN165 (or equivalent)
Credit Points: 6 Contact Hours: 2 per week

PHN153 ULTRASOUND EQUIPMENT I
Offered: Spring
A detailed study of medical ultrasound equipment, including aspects related to transducers, controls, display, image performance and artifacts.
Co-requisite: PHN151
Credit Points: 6 Contact Hours: 2 per week

PHN154 PRINCIPLES OF ULTRASOUND IMAGING
Offered: Spring
A course of lectures and practical exercises on the general principles of ultrasound imaging techniques including scanning motions, coupling agents, transducer selection and the problems associated with respiration.
Co-requisite: PHN151
Credit Points: 6 Contact Hours: 2 per week

PHN155 ULTRASONIC EXAMINATION IN OBSTETRICS & GYNAECOLOGY
Offered: Spring
A study of the normal and abnormal anatomy and function related to gynaecology and obstetrics, the ultrasonic techniques used and the appearance of related images.
Credit Points: 6 Contact Hours: 2 per week

PHN156 ULTRASONIC EXAMINATION OF THE ABDOMEN
Offered: Spring
A study of the techniques used in the ultrasonic examination of the abdomen including the appearance on the ultrasound image of normal abdominal anatomy and its alteration by pathological processes.
Co-requisite: PHN154
Credit Points: 6 Contact Hours: 2 per week

PHN157 CLINICAL ULTRASOUND I
Offered: Spring
A supervised practical program carried out in an approved clinical ultrasound department. Students must obtain hands-on experience in specified ultrasound procedures used in examination of the abdomen, pelvis and in obstetrics and gynecology.
Co-requisites: PHN154, PHN153
Credit Points: 12

PHN202 BIOMECHANICS
Offered: Autumn
Study of mechanical principles and properties related to human tissues and physiological functions with emphasis on work ergonomics and occupational health measurement problems.
Credit Points: 8 Contact Hours: 3 per week

PHN204 HEALTH & OCCUPATIONAL PHYSICS
Offered: Autumn
Deals with philosophy, protocol and practices necessary to minimise hazards associated with electrical, mechanical and biological techniques used in hospitals. Study of principles and techniques of dosimetry of ionising radiation with emphasis on aspects pertinent to actual or potential use in medicine.
Credit Points: 8 Contact Hours: 3 per week

PHN206 MEDICAL IMAGING
Offered: Autumn
Study of the principles involved in the production of the radiographic and nuclear medicine image and the appropriate quality control protocols.
Credit Points: 8 Contact Hours: 3 per week

PHN257 CLINICAL ULTRASOUND II
Offered: Summer Term
A period of additional clinical experience designed to refine basic skills acquired in PHN157.
Prerequisite: PHN157
Credit Points: 12

PHN301 MICROPROCESSORS
Offered: Spring
Basic digital integrated circuits and their applications in logic design and microprocessor interfacing. Microprocessor programming and applications. Integrated with Instrumentation and Medical Imaging Science to develop an understanding of microcomputer function and applications.
Credit Points: 8 Contact Hours: 3 per week

PHN302 INSTRUMENTATION
Offered: Spring
This subject concentrates on gaining experience in the use of a wide range of instrumentation. Topics included are generalised instrument, data transfer, data interpretation, servomechanisms, data recorders, systems, practical aspects of instrument use. Laboratory learning experience in the gathering, conditioning, storage and analysis of data, using skills learned in digital electronics, computing and instrumentation. Digital signal processing of physiological signals, digital image processing, medical applications of numerical methods and medical statistics.
Credit Points: 8 Contact Hours: 3 per week

PHN304 MEDICAL IMAGING SCIENCE
Offered: Spring
Visual science, analogue and digital images, image enhancement, restoration and analysis, computed tomography, computer architecture, display instrumentation, recording and storage.
Credit Points: 6 Contact Hours: 2 per week

PHN350 ELECTRONICS
Offered: Autumn
The purpose of the subject is to acquaint students with the basic principles associated with using modern high technology devices. It covers basic characteristics of PN junction diodes and their applications in power supplies. Transistor types. Operational amplifiers, linear integrated circuit applications, com-
PHN402 RADIOTHERAPY
Offered: Spring
Considers the principles and techniques of clinical application of ionising radiation for diagnostic and therapeutic purposes. Emphasis will be placed on radiotherapy physics and diagnostic X-rays.
Credit Points: 6 Contact Hours: 2 per week

PHN405 PHYSIOLOGICAL MEASUREMENT
Offered: Spring
Introduction to the principles and techniques of the direct and indirect measurement of physiological variables.
Credit Points: 6 Contact Hours: 2 per week

PHN520 PROJECT

PHN540 PROJECT
Offered: Autumn, Spring
The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under Queensland University of Technology supervision. Time spent on projects will be one year for full-time and two years for part-time students.
Credit Points: 96 (both) Contact Hours: 18 & 9 respectively

PHP700 PROJECT
Offered: Full Year
All students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation.
Credit Points: 40

PHP702 ADVANCED TOPICS IN PHYSICS I
PHP703 ADVANCED TOPICS IN PHYSICS II
Offered: Autumn, Spring
Two topics in each unit, determined by current research interests, staff availability and modern international developments. Examples: shock processing of powders, acoustics, ultraviolet physics, laser physics, classical mechanics.
Credit Points: 6 (both) Contact Hours: 2 (both)

PHP704 ADVANCED MATERIALS SCIENCE A

PHN257

PHN351 ULTRASOUND EQUIPMENT I
Offered: Autumn
A course of lectures and practical exercises on the principles and techniques of quality assurance protocols used in ultrasonic imaging.
Prerequisite: PHN153
Credit Points: 6 Contact Hours: 2 per week

PHN352 ULTRASONIC EXAMINATION IN CARDIOLOGY
Offered: Autumn
A study of the techniques of ultrasound imaging used in investigating the cardio-vascular system including techniques for demonstration of mitral, aortic and tricuspid valves, cardiac chambers, aorta, large blood vessels and superior vena cava.
Prerequisite: PHN257
Credit Points: 6 Contact Hours: 2 per week

PHN353 ULTRASOUND IN MEDICAL DIAGNOSIS
Offered: Autumn
A study of the role of ultrasound in medical imaging diagnosis.
Credit Points: 6 Contact Hours: 2 per week

PHN354 ULTRASONIC EXAMINATIONS OF THE HEAD, NECK & PERIPHERAL ORGANS
Offered: Autumn
A course of lectures and practical work on the techniques ultrasound uses to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology.
Prerequisite: PHN257
Credit Points: 6 Contact Hours: 2 per week

PHN357 CLINICAL ULTRASOUND III
Offered: Autumn
A supervised practical program carried out in an approved clinical ultrasound department. Students must obtain experience of specified ultrasound examinations used in cardiology and in the examination of the head, neck and peripheral organs.
Prerequisite: PHN257 Credit Points: 12

PHN407 CASE STUDIES
Offered: Autumn, Spring
Completion of three assignments in clinical practice procedures including reports written to journal publication standards.
Credit Points: 6 Contact Hours: 2 per week

PHN535 ULTRASOUND EQUIPMENT II
Offered: Autumn
A course of lectures and practical exercises on the principles and techniques of quality assurance protocols used in ultrasonic imaging.
Prerequisite: PHN153
Credit Points: 6 Contact Hours: 2 per week

PHN532 ULTRASONIC EXAMINATION IN CARDIOLOGY
Offered: Autumn
A study of the techniques of ultrasound imaging used in investigating the cardio-vascular system including techniques for demonstration of mitral, aortic and tricuspid valves, cardiac chambers, aorta, large blood vessels and superior vena cava.
Prerequisite: PHN257
Credit Points: 6 Contact Hours: 2 per week

PHN533 ULTRASOUND IN MEDICAL DIAGNOSIS
Offered: Autumn
A study of the role of ultrasound in medical imaging diagnosis.
Credit Points: 6 Contact Hours: 2 per week

PHN534 ULTRASONIC EXAMINATIONS OF THE HEAD, NECK & PERIPHERAL ORGANS
Offered: Autumn
A course of lectures and practical work on the techniques ultrasound uses to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology.
Prerequisite: PHN257
Credit Points: 6 Contact Hours: 2 per week

PHN535 CLINICAL ULTRASOUND III
Offered: Autumn
A supervised practical program carried out in an approved clinical ultrasound department. Students must obtain experience of specified ultrasound examinations used in cardiology and in the examination of the head, neck and peripheral organs.
Prerequisite: PHN257 Credit Points: 12

PHN537 CLINICAL ULTRASOUND III
Offered: Autumn
A supervised practical program carried out in an approved clinical ultrasound department. Students must obtain experience of specified ultrasound examinations used in cardiology and in the examination of the head, neck and peripheral organs.
Prerequisite: PHN257 Credit Points: 12

PHN670 PROJECT

PHN671 PROJECT
Offered: Autumn, Spring
The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under Queensland University of Technology supervision. Time spent on projects will be one year for full-time and two years for part-time students.
Credit Points: 96 (both) Contact Hours: 18 & 9 respectively

PNA170 ANATOMY & PHYSIOLOGY 1
Offered: Autumn
This subject will introduce students to an integrated study of anatomy and physiology. Emphasis will be placed on gaining appreciation of the relationship between structure and function at the levels of cells and tissues, organ and organ systems. Initially the morphology and physiology of cells and tissues will be examined and then the structure and function of the skeletal, muscular, nervous and integumentary systems will be studied.
Credit Points: 8 Contact Hours: 3 per week
II PNA650 RESPIRATORY PHYSIOLOGY & ANATOMY
Offered: Spring
A subject designed to develop a sound biological basis for application in the subjects Respiratory Instrumentation and Respiratory Measurement Techniques. It includes study of both normal and disordered structure and/or function of the respiratory system, as well as the significance of physiological and/or anatomical parameters commonly measured by instrumentation.
Prerequisites: PNA170, PNA171, MSA121
Co-requisite: PHA661, PHA662
Credit Points: 5 Contact Hours: 2 per week

II PNA50 CARDIAC PHYSIOLOGY & ANATOMY
Offered: Autumn
A subject designed to develop a sound biological basis for application in the subjects Cardiac Instrumentation and Cardiac Measurement Techniques. It includes study of both normal and disordered structure and/or function of the cardiovascular system, as well as the significance of physiological and/or anatomical parameters commonly measured by instrumentation.
Prerequisites: PNA170, PNA171, MSA121
Co-requisite: PHA561, PHA562
Credit Points: 8 Contact Hours: 3 per week

II PNA171 ANATOMY & PHYSIOLOGY II
Offered: Spring
The broad objectives outlined PNA170 will be continued. Emphasis in this subject will be upon the relationships between structure and function at the level of organs and systems. The cardiovascular, lymphatic, respiratory, digestive, urinary, genital, and endocrine systems will be studied.
Prerequisites: PNA170 Co-requisite: MSA124
Credit Points: 8 Contact Hours: 3 per week

II PNA115 HUMAN PHYSIOLOGY I
Offered: Autumn
The aim of this subject is to enable students to effectively apply problem solving principles to health care delivery to clients in any age group. This subject will introduce students to the functions of major systems under normal conditions in healthy humans and forms a firm basis for an understanding of abnormal function to be presented in PNB116.
Credit Points: 12 Contact Hours: 3 per week

II PNA116 HUMAN PHYSIOLOGY II
Offered: Spring
This subject considers the physiological basis of the clinical manifestation, pathogenesis and treatment of selected disorders of the cardiovascular, respiratory, haematological, renal, gastrointestinal, nervous and endocrine systems.
Prerequisites: PNB115
Credit Points: 6 Contact Hours: 2 per week

II PNB125 ANATOMY & PHYSIOLOGY I
Offered: Autumn
A study of human anatomy of the body as a whole including a detailed study of the skeletal system.
Credit Points: 10 Contact Hours: 4 per week

II PNB131 ANATOMY I
Offered: Autumn
An integrated course of lectures and practicals dealing with microscopic structure of the cell, epithelium, connective tissue, bone and cartilage, muscle tissue, nerve tissue, and cardiovascular system. Also deals with the gross anatomical of the skeletal, articular, and cardiovascular systems.
Credit Points: 6 Contact Hours: 3 per week

II PNB132 ANATOMY II
Offered: Spring
An extension of PNB131. A course dealing with the microscopic and macroscopic anatomy of the nervous, digestive, lymphatic, integumentary, respiratory, renal, endocrine and reproductive systems.
Prerequisites: PNB131
Credit Points: 6 Contact Hours: 3 per week

II PNB163 HUMAN ANATOMY I
Offered: Autumn
An integrated course of lectures and practicals dealing with microscopic structure of the cell, epithelium, connective tissue, bone and cartilage, muscle tissue, nerve tissue, and cardiovascular system. Also deals with the gross anatomical of the skeletal, articular, and cardiovascular systems.
Credit Points: 8 Contact Hours: 3 per week

II PNB165 PHYSIOLOGY II
Offered: Spring
A course of lectures and practicals. Basic mechanisms - cells, fluids, electrolytes; energy metabolism; essential nutrients; transport mechanisms; blood; communication and control; excitable tissues. Control systems - nervous and endocrine systems. This subject must be taken by students wishing to study nutrition electives.
Co-requisite: CHB201
Credit Points: 8 Contact Hours: 4 per week
Note: This subject is not compatible with PHB231; credit may not be retained for both.

II PNB202 ENVIRONMENTAL HEALTH II
Offered: Spring
Students will be introduced to a brief history of environmental health in Queensland, the current role of environmental health officers within the public health agencies at all levels of government and the principal public health legislation in the State. This subject also deals with the management of an environmental
health unit and provides a foundation for understanding the various legal procedures associated with the duties of such officers.
Credit Points: 16  Contact Hours: 7 per week

- PNB203 ENVIRONMENTAL HEALTH III
  Offered: Autumn
  In this subject students will develop an understanding of the complexity of environmental systems, the effects of pollutants on such systems and the interdisciplinary approaches needed to address these problems. They will also study introductory food science and current food standards prescribed by legislation.
  Prerequisites: CHB242, BEB103, BEB104
  Credit Points: 14  Contact Hours: 7 per week

- PNB204 ENVIRONMENTAL HEALTH IV
  Offered: Spring
  There are three major strands in this subject, covering the construction and design of food premises and their hygienic operation; the potential risks to water resources and design and operation of processes to treat drinking and recreational waters; and the management of community wastes, focusing on the origins, transport and disposal of liquid, solid and hazardous wastes.
  Prerequisites: PNB203
  Credit Points: 18  Contact Hours: 9 per week

- PNB205 ENVIRONMENTAL HEALTH V
  Offered: Autumn
  This subject will address the causative agents of communicable and noncommunicable diseases and conditions and introduce students to the principles of and methods in epidemiology. The food hygiene foundation provided in PNB204 will be further developed to encompass food poisoning and spoilage. Students will gain a knowledge of relative pest control principles and practices, especially in relation to vectors of disease.
  Prerequisites: PNB204, MSB402, PNB232
  Credit Points: 30  Contact Hours: 16 per week

- PNB206 ENVIRONMENTAL HEALTH VI
  Offered: Spring
  This subject will develop a sound theoretical and practical knowledge of a wide range of environmental health problems which confront the community. The underlying principles of health promotion and their effective practical application will be addressed. Food topics will be completed by considering aspects of food production and packaging and concepts of nutrition and malnutrition. Students will also gain an insight into obligations, responsibilities and ethics of professional practice.
  Prerequisites: PNB205
  Credit Points: 30  Contact Hours: 16 per week

- PNB210 OCCUPATIONAL HEALTH & SAFETY I
  Offered: Autumn
  This subject will introduce students to the basic concepts of occupational health and safety, such that they can identify health and safety problems in the workplace; be aware of strategies for dealing with such problems, and become familiar with the legislation, government agencies and health personnel associated with the working environment. Topics covered will include the physical, chemical and biological working environments, temporal work patterns and the design and use of protective devices.
  Credit Points: 6  Contact Hours: 3 per week

- PNB211 OCCUPATIONAL HEALTH & SAFETY II
  Offered: Spring
  This subject develops further the principles covered in PNB210 and highlights their practical applications to the workplace. Students will also develop knowledge and skills associated with the actual measurement of the physical and chemical working environment, physiological effects on humans in the workplace and evaluation of the data collected.
  Prerequisites: PNB210
  Credit Points: 8  Contact Hours: 4 per week

- PNB220 SYSTEMATIC ANATOMY
  Offered: Spring
  An extension of PNB163. A course dealing with the microscopic and macroscopic anatomy of the nervous, digestive, lymphatic, integumentary, respiratory, renal, endocrine and reproductive systems.
  Prerequisite: PNB163
  Credit Points: 10  Contact Hours: 3 per week

- PNB225 ANATOMY & PHYSIOLOGY I
  Offered: Spring
  A course of lectures and practical exercises involving a basic, yet comprehensive, study of the anatomy and physiology of the various body systems.
  Prerequisite: PNB125
  Credit Points: 10  Contact Hours: 4 per week

- PNB231 ANATOMY & PHYSIOLOGY II
  Offered: Autumn, Spring
  This subject introduces students to an integrated study of anatomy and physiology at the degree level. Emphasis is placed on gaining an appreciation of the relationship between structure and function at the levels of cells, tissues, organs and organ systems. Initially the morphology and physiology of cells and tissues is examined. Metabolism, nutrition and temperature regulation are reviewed and then the skeletal, muscular, nervous and integumentary systems studied.
  Credit Points: 8  Contact Hours: 4 per week
  Note: This subject is not compatible with PNB165; credit may not be retained for both.

- PNB232 ANATOMY & PHYSIOLOGY II
  Offered: Autumn, Spring
  The broad objectives outlined in PNB231 are continued. Emphasis in this subject is focused on structure-function relationships at the level of organs and systems. The cardiovascular, lymphatic, respiratory, digestive, urogenital and endocrine systems are studied. A review of the actions of drugs on cells, tissues, organs and systems is given at the end of the subject.
  Prerequisite: PNB231
  Credit Points: 8  Contact Hours: 4 per week
  Note: This subject is not compatible with PNB465; credit may not be retained for both.

- PNB261 ANATOMY & PHYSIOLOGY I
  Offered: Autumn
  This subject will introduce students to an integrated study of anatomy and physiology at the degree level. Emphasis will be placed on gaining an appreciation of the relationship between structure and function at the levels of cells, tissues, organs and organ systems, initially the morphology and physiology of cells and tissues will be examined. The skeletal, muscular, nervous and integumentary systems will be studied.
  Credit Points: 12  Contact Hours: 4 per week
PNB262 ANATOMY & PHYSIOLOGY II  
Offered: Spring  
This subject follows on PNB261, integrating the study of structure and function of the human body. The systematic physiology of organs and organ systems continues with the study of the cardiovascular, lymphatic, immune, endocrine, respiratory, digestive, urinary and reproductive systems. Metabolism, nutrition and temperature regulation will be reviewed. A brief study on pregnancy and human development will be included.  
Prerequisites: PNB261  
Credit Points: 12  
Contact Hours: 4 per week

PNB301 ADVANCED ANATOMY  
Offered: Autumn  
On completion of this subject, students should be able to describe the structures, function and anatomical relationship of the components of the lower limb and demonstrate anatomical knowledge which will be fundamental to the understanding of the functional and applied aspects of podiatric anatomy.  
This subject contains the major topics of osteology, myology, arthrology, angiology and neurology.  
Prerequisites: PNB220  
Co-requisite: PNB302  
Credit Points: 8  
Contact Hours: 3 per week

PNB302 PODIATRIC MEDICINE I  
Offered: Autumn  
This subject introduces the student to the health, social and economic implications of podiatric care in the general population with particular reference to specialised groups e.g., children, diabetics, the aged and sports patients. It also provides foundation studies essential to the pre-clinical student in the diagnosis and treatment of conditions commonly manifesting in the foot.  
Prerequisites: PNB220  
Co-requisite: PNB420, PNB303  
Credit Points: 10  
Contact Hours: 5 per week

PNB303 CLINICAL PODIATRY I  
Offered: Autumn  
On completion of this subject students should be able to demonstrate competent operating skills: expertise in clinical observation of the patient and the elicitation of an accurate medical record; recognise common clinical entities and implement appropriate treatment and develop a professional attitude towards patients, clinical teaching and care of equipment used during clinical practice.  
Prerequisites: MSB201  
Co-requisite: PNB302  
Credit Points: 8  
Contact Hours: 5 per week

PNB304 PHYSICAL MEDICINE  
Offered: Autumn  
This subject is designed to introduce the student to a wide range of diagnostic and physical treatment modalities used in modern podiatric practice. On completion of this subject, students should be able to understand the uses, applications, contra indications and limitations of each modality studied in direct connection with the ongoing clinical studies and theoretical component of podiatric medicine lectures.  
Prerequisites: PNB435  
Co-requisite: PNB504, PNB410  
Credit Points: 6  
Contact Hours: 2 per week

PNB305 HUMAN NUTRITION I  
Offered: Autumn  
This subject builds on student's foundations in physiology to gain an appreciation of the meaning of nutrition, of methods used in its study, of food as a source of nutrients, of the nutritional impact of technology and other aspects of the subject.  
Co-requisite: MSB415 + PNB165 or PNB231  
Credit Points: 6  
Contact Hours: 3 per week

PNB306 PHARMACOLOGY  
Offered: Autumn  
This course is designed to ensure that students understand basic system drug therapies their patients may be using, the groups of drugs for specific diseases and their application and relevance to Podiatry and Clinical Podiatry situation. Emphasis is placed on drug groups and their use for specific disease, rather than proprietary brands. Students will be able to recognise the drug groups and know the system they are acting on in the body. In addition, differentiation between the different groups within one group of systemic drugs and why they are used for a condition will be emphasised.  
Prerequisites: CHB242  
Co-requisite: MSB471  
Credit Points: 8  
Contact Hours: 3 per week

PNB325 REGIONAL & SECTIONAL ANATOMY  
Offered: Autumn  
An expansion of the topics introduced in PNB125 and PNB225 to a detailed study of regional and sectional anatomy of the human body.  
Prerequisites: PNB225  
Credit Points: 8  
Contact Hours: 4 per week

PNB363 HUMAN ANATOMY III  
Offered: Autumn  
An extension of PNB163 Human Anatomy I. This integrated course of lectures and practicals will cover basic embryology, structure and development of the eye, and gross and microscopic anatomy of the major organ systems of the human body.  
Prerequisites: PNB163  
Credit Points: 10  
Contact Hours: 5 per week

PNB406 ADVANCED ORTHOSES  
Offered: Autumn  
This subject is designed to demonstrate a broad knowledge of orthotic and prosthetic devices as applicable to podiatric practice. The student will be required to display a high standard of practical skills in producing a range of orthoses e.g. butt edge seams, latex bandage technique, rubber butter devices, expandable foams, latex dipped devices, and specialised thermoplastic, display a high standard of practical skills in producing a range of orthoses for specialised patients e.g. partial or complete forefoot amputees, diabetics, arthritic conditions, post operative patients.  
Prerequisites: PNB506, PNB503  
Co-requisite: PNB603  
Credit Points: 6  
Contact Hours: 3 per week

PNB410 MEDICINE  
Offered: Autumn  
Following completion of this subject students should be able to recognise and understand the clinical features, pathogenesis and significance of common conditions affecting the lower limb, e.g., oedema; obesity; motor, sensory and trophic disturbances and their resultant effects in paralysis, ataxia, deformity and ulceration; intermittent claudication, vascular spasm and cramp are taught so as to emphasise their significance. Medical conditions with manifestations in the feet are given particular attention.  
Prerequisites: MSB430, PNB435  
Co-requisite: PNB503  
Credit Points: 8  
Contact Hours: 3 per week
PNB411 ORTHOPAEDICS
Offered: Spring
The emphasis of this subject will be on orthopaedic surgery. It will seek to develop a detailed knowledge of general and specific orthopaedic conditions which have an effect on the lower limb and the surgical treatment of systemic conditions as seen by the podiatrist i.e., diabetes. In addition the subject will provide an understanding of the special problems associated with children and specific lower limb conditions with emphasis on the surgical techniques used in their treatment.
Prerequisites: PNB303, PHB313
Co-requisite: PNB505
Credit Points: 8 Contact Hours: 3 per week

PNB412 CLINICAL PODIATRY II
Offered: Spring
At this stage students will be able to follow cases through to observe the ’short term’ effect of therapy and will be expected to commence case studies to develop comparative and recording skills. Students should now be adopting the standard medical terminology and abbreviations used in clinical situations.
Prerequisites: PNB303, PNB302
Co-requisite: PNB506
Credit Points: 8 Contact Hours: 6 per week

PNB420 ORTHOTIC SCIENCE I
Offered: Autumn
This subject will introduce the student to many of the commonly used types of orthoses and procedures employed in modern podiatric practice. The subject will enable students to discuss the main types of orthoses employed in podiatric practice and to give a reasoned explanation on choice of orthotic types and properties of materials. Students should also be able to explain the main techniques employed in producing orthoses i.e., non-casting and casting techniques and their uses in orthotic practice.
Prerequisites: PNB460 Co-requisite: PNB302
Credit Points: 6 Contact Hours: 3 per week

PNB421 PODIATRIC MEDICINE II
Offered: Spring
The foundation for study in the role of therapeutics in patient management including short term and long term managements of conditions. It will expand the range of understanding of the wide variety of conditions presenting to the podiatrist. On completion, students should be able to develop an understanding of the biomechanical principles affecting the joints of the foot and the structural and functional consequences presenting in podiatric practice.
Prerequisites: PNB302 Co-requisite: PNB412
Credit Points: 12 Contact Hours: 4 per week

PNB422 PODIATRIC ANAESTHESIOLOGY
Offered: Autumn
This subject is designed to provide a sound understanding of the science of anaesthetics as applicable to the practice of podiatry. Students will be required to understand the pharmacology of local anaesthetics in current use and their clinical usage, and be competent in injection techniques, including local infiltration and local nerve block in the lower limb.
Prerequisites: PNB305, PNB421
Co-requisite: PNB410
Credit Points: 6 Contact Hours: 2 per week

PNB425 IMAGING ANATOMY
Offered: Spring
A study of the appearances, on medical images, of normal and abnormal anatomy.
Credit Points: 8 Contact Hours: 4 per week

PNB435 HUMAN PHYSIOLOGY
Offered: Spring
A course of lectures and practicals. The lectures are the same as PNB165 Physiology II and PNB465 Physiology III. The course is presented as a one semester program.
Prerequisite: MSB471 Co-requisite: MSB430
Credit Points: 12 Contact Hours: 7 per week

PNB465 PHYSIOLOGY III
Offered: Autumn
A course of lectures and practicals. Maintenance systems - gastrointestinal; cardiovascular; respiratory; and renal systems. Integrated mechanisms - sexual development; pregnancy; parurition; lactation; control of growth, energy intake, organic metabolism, body temperature, ECF osmolarity and volume; major reactions, blood pressure and flow, respiration; response to tissue damage and foreign matter; adaptation to stress and exercise. This subject must be taken by students wishing to study Nutrition electives.
Prerequisite: PNB165
Credit Points: 8 Contact Hours: 4 per week
Note: This subject is not compatible with PNB232; credit may not be retained for more than one of these subjects. Consult Strand Co-ordinator.

PNB502 DERMATOLOGY
Offered: Spring
This subject is designed to provide an appreciation of the many varieties of skin lesions and their particular relevance when found in the lower limb. The lecture program will consist of classification of skin disease, vascular reaction group, vasculities, ulcers, peripheral vascular disease, tumours, eczema, dermatitis, allergy, immunity, infections, psoriasis, squamous eruptions, nails and hair, skin manifestations of internal disease, pharmacology and general therapeutics. The clinical sessions will utilise this information in allowing students the opportunity to see and diagnose many of these conditions.
Prerequisites: PNB410, PNB421
Co-requisite: PNB503
Credit Points: 6 Contact Hours: 3 per week

PNB503 PODIATRIC MEDICINE III
Offered: Autumn
This subject develops the professional understanding of the general and specific effects of medical and surgical conditions on the human foot. It also expands the concept of total case management in terms of the interdisciplinary approach. Including physical, mechanical and surgical techniques. On completion of this subject students should be able to consolidate the role podiatrist in the health care team across the spectrum of practice.
Prerequisites: PNB421
Co-requisite: PNB504, PNB604
Credit Points: 10 Contact Hours: 3 per week

PNB504 CLINICAL PODIATRY III
Offered: Autumn
On completion of this subject the student should be able to consolidate upon skills acquired in operative mechanical, chemical and physical therapy and to demonstrate expertise in the treatment of the diabetic arthritic foot, and related circulatory and neurological
disorders. Diagnostic skills will also be developed with the wider range of patients being treated and the specialised study of disciplines such as dermatology and radiology further integrating academic and clinical studies.

Prerequisites: PNB412, PNB421
Co-requisite: PNB304
Credit Points: 6 Contact Hours: 9 per week

■ PNB505 PODIATRIC SURGERY
Offered: Spring
The implementation of pediatric surgical techniques based on a strong theoretical component of knowledge. At the conclusion of this course students will be able to understand the principles and techniques of minimal incision surgery.
Prerequisites: PNB422, PNB410
Co-requisite: PNB603
Credit Points: 12 Contact Hours: 4 per week

■ PNB506 ORTHOTIC SCIENCE II
Offered: Spring
A consolidation of Orthotic Science I; on completion students should be able to discuss the main types of functional and semi-rigid devices employed in orthotic therapy. The subject will also provide an understanding of the main techniques employed in dispensing orthotics made from a positive cast i.e., cast evaluation, bisect, pouring, modification, intrinsic and extrinsic posting. Students will also be informed how to write a prescription for the dispensing of an orthotic to comply with patients individual requirements i.e., children, adolescent, adult and special requirements of selected cases e.g., in-toe, out-toe, sprinters, marathoners, arthritic, post operative and obese patient.
Prerequisite: PNB420 Co-requisite: PNB421
Credit Points: 8 Contact Hours: 3 per week

■ PNB602 SPORTS MEDICINE
Offered: Spring
This course provides an awareness of the importance of a multidisciplinary approach to the diagnosis, evaluation and treatment of sports injuries. Students will study the symptomology of lower limb functional pathologies as related to specific sports and devise treatment programs. An understanding of the principles of human fitness and potential in relation to athletic injuries and expectations forms the foundation for further studies.
Prerequisites: PNB503, PNB410
Co-requisite: PNB411
Credit Points: 10 Contact Hours: 3 per week

■ PNB603 CLINICAL PODIATRY IV
Offered: Spring
This subject is designed to prepare the student for the transition to private practice. During this semester students will be introduced to the sports medicine patient in terms of the range of injuries which occur affecting the lower back, hip, knee, ankle and foot. Case presentations will be an integral part of clinical learning and sessions conclude with exchange between students and staff over case management.
Prerequisite: PNB504 Co-requisite: PNB411
Credit Points: 6 Contact Hours: 6 per week

■ PNB610 PROJECT & PROFESSIONAL MANAGEMENT
Offered: Spring
The two component parts of this subject explain firstly how a professional practice may be set up and how a small practice can operate as a business enterprise. Methods of budgeting, finance and control are explained. Secondly it aims to develop an interest in podiatric research using scientific methods of investigation and presentation. Students will be encouraged to publish these projects as original material in related professional journals.
Credit Points: 6 Contact Hours: 4 per week

■ PNB665 CLINICAL PHYSIOLOGY
Offered: Spring
This subject aims to develop in the student an appreciation of the physiological basis of the pathogenesis, clinical features and treatment of the major disorders of the cardiovascular, respiratory, haematological, renal, gastrointestinal and endocrine systems. In addition, students will be introduced to topics of particular interest to those wishing to pursue a career in nutrition and dietetics, such as the chemical carcinogenesis, nutrition in cancer patients, and the metabolic response to stress.
Prerequisite: PNB165 + PNB465
Credit Points: 10 Contact Hours: 4 per week

■ PNB666 ADVANCED NUTRITIONAL PHYSIOLOGY
Offered: Spring
This subject examines the links between normal and abnormal food intake and normal and abnormal physiological functions in the human body. Special attention is focused on the role of nutrition in the physiology of the cardiovascular, renal, gastrointestinal and nervous systems.
Prerequisite: PNB165 + PNB465
Credit Points: 10 Contact Hours: 4 per week

■ PND131 ANATOMY
Offered: Autumn
Addresses the general principles of anatomy. Deals with the macroscopic and microscopic structures of the human body. Introductory surface and regional anatomy are dealt with in relation to systemic anatomy.
Credit Points: 9 Contact Hours: 4 per week

■ PND241 BIOMEDICAL SCIENCE
Offered: Spring
Covers aspects of essential biochemical processes, basic physiological principles, fundamentals of disease processes and basic pharmacological principles.
Prerequisites: CHD148
Credit Points: 6 Contact Hours: 3 per week

■ PND340 CLINICAL PHYSIOLOGY I
Offered: Autumn
Considers the physiological basis of the clinical manifestations, pathogenesis and principles of treatment of the major disorders of the respiratory, cardiovascular, haematological, urinary, digestive and musculo-skeletal systems.
Prerequisites: PND241
Credit Points: 9 Contact Hours: 4 per week

■ PND420 ANATOMY II
Offered: Autumn
The structures, function and anatomical relationship of the components of the lower limb and its application to clinical podiatry.
Prerequisites: PND120 Co-requisites: PND431
Credit Points: 6 Contact Hours: 3 per week

■ PND421 FOOD & NUTRITION
Offered: Spring
Addresses the role of nutrients in the body in health and disease. Examines nutritional issues of current
significance in the Australian diet. Highlights individuals and groups at risk of nutrition related disease and suitable goals for dietary modification of these people. Examines why people develop their food habits and their sources of nutrition information.

**Prerequisites:** PND241  
**Credit Points:** 6  
**Contact Hours:** 3 per week

### PND430 PHYSIOLOGY

**Offered:** Autumn  
A course of lectures and practicals. The lectures are the same as PNB165 and PNB465. The course is presented as a one semester program.

**Prerequisites:** MSD114  
**Co-requisite:** MSD410  
**Credit Points:** 10  
**Contact Hours:** 6 per week

### PND431 PODIATRY III

**Offered:** Autumn  
Clinical teaching in practical podiatry extends throughout the course. Practical training is given in the management of a wide range of cases of increasing difficulty, these being representative of the wide field of practice in which skills must be at a high level in diagnosis, operating skill, therapeutic procedures and podiatric orthotics.

**Prerequisites:** PND132  
**Co-requisites:** PND420, PND441  
**Credit Points:** 20  
**Contact Hours:** 10 per week

### PND432 PODIATRY IV

**Offered:** Spring  
Clinical teaching in practical podiatry extends throughout the course. Practical training is given in the management of a wide range of cases of increasing difficulty, these being representative of the wide field of practice in which skills must be at a high level in diagnosis, operating skill, therapeutic procedures and podiatric orthotics.

**Prerequisites:** PND431  
**Co-requisites:** PND442, PND460  
**Credit Points:** 18  
**Contact Hours:** 10 per week

### PND441 ORTHOTICS III

**Offered:** Autumn  
This subject expands upon PND42 Orthotics II by providing additional clinical instruction, where theoretical methods are related to patient diagnosis and treatment.

**Prerequisites:** PND142, PND132  
**Co-requisites:** PND431  
**Credit Points:** 6  
**Contact Hours:** 3 per week

### PND442 ORTHOTICS IV

**Offered:** Spring  
Expands orthotic practice by careful consideration of problems of abnormal posture and gait which may be appropriate and amenable to orthotic control.

**Prerequisites:** PND441, PND431  
**Co-requisites:** PND432  
**Credit Points:** 6  
**Contact Hours:** 3 per week

### PND452 THERAPEUTICS II

**Offered:** Autumn  
This subject is a continuation of Therapeutics I and endeavours to expand the student's knowledge in the way that chemotherapeutic agents and medications are used in podiatric and medical practice.

**Prerequisites:** PND132, PND451  
**Credit Points:** 2  
**Contact Hours:** 1 per week

### PND460 PODIATRIC ANAESTHESIOLOGY

**Offered:** Spring  
The science of anaesthetics as applicable to the practice of podiatry. The pharmacological study of local anaesthetics will be concurrent with instruction in their clinical usage. Injection techniques will include local infiltration and digital nerve block.

**Prerequisites:** PND452, PND431  
**Co-requisite:** PND710  
**Credit Points:** 4  
**Contact Hours:** 2 per week

### PND461 SPECIAL PROCEDURES CLINIC

**Offered:** Autumn  
A clinic in which procedures under local anaesthesia can be undertaken for those conditions requiring radical treatment. These procedures will include the use of cryotherapy, chemotherapy and electrocautery.

**Prerequisites:** MSD410, PND431  
**Co-requisites:** PND471  
**Credit Points:** 6  
**Contact Hours:** 2 per week

### PND469 MEDICINE

**Offered:** Spring  
The course aims to provide a basic understanding of systemic disease. The etiology, pathology, symptomology and principles of treatment are given for the more common systemic illnesses. Particular emphasis is given to those conditions which give rise to manifestations in the lower limb and their significance and recognition.

**Prerequisites:** PND410, PND431  
**Co-requisites:** PND471  
**Credit Points:** 6  
**Contact Hours:** 3 per week

### PND470 HUMAN GENETICS & DEVELOPMENT

**Offered:** Autumn  
Genetic principles and their applications in the field and in medicine; normal and abnormal human development.

**Prerequisites:** BED150, PND120  
**Credit Points:** 2  
**Contact Hours:** 1 per week

### PND471 SURGERY

**Offered:** Spring  
General surgical principles and practice techniques of general surgery with emphasis on orthopaedic surgery. The program includes lectures and attendance at a hospital orthopaedic clinic where possible.

**Prerequisites:** PND431, PND469  
**Co-requisites:** PND471  
**Credit Points:** 4  
**Contact Hours:** 2 per week

### PND540 CLINICAL PHYSIOLOGY II

**Offered:** Autumn  
Considers the physiological basis of the clinical manifestations, pathogenesis and principles of treatment of the major disorders of the nervous system.

**Prerequisites:** PND241  
**Credit Points:** 6  
**Contact Hours:** 3 per week

### PND640 CLINICAL PHYSIOLOGY III

**Offered:** Spring  
Considers the physiological basis of the clinical manifestations, pathogenesis and principles of treatment of the major disorders of the endocrine, reproductive and integumentary systems.

**Prerequisites:** PND241  
**Credit Points:** 6  
**Contact Hours:** 3 per week

### PND701 DERMATOLOGY

**Offered:** Autumn  
Students are taught to appreciate the varieties of skin lesions as they affect the lower limb. The program includes lectures and attendance at a hospital dermatology unit.

**Prerequisites:** PND469, PND471  
**Co-requisites:** PND731  
**Credit Points:** 4  
**Contact Hours:** 2 per week
PND710 PHARMACOLOGY
Offered: Spring
Drug groups and their action on the body systems; the effect of certain drugs with manifestations pertaining to the podiatrist.
Prerequisites: PND452 Co-requisites: PND460
Credit Points: 4 Contact Hours: 2 per week

PND731 PODIATRY V
Offered: Autumn
Clinical teaching in practical podiatry extends throughout the course. Practical training is given in the management of a wide range of cases of increasing difficulty, these being representative of the wide field of practice in which skills must be at a high level in diagnosis, operating skill, therapeutic procedures and podiatric orthotics.
Prerequisites: PND432 Co-requisites: PND750
Credit Points: 26 Contact Hours: 13 per week

PND732 PODIATRY VI
Offered: Spring
Clinical teaching in practical podiatry extends throughout the course. Practical training is given in the management of a wide range of cases of increasing difficulty, these being representative of the wide field of practice in which skills must be at a high level in diagnosis, operating skill, therapeutic procedures and podiatric orthotics.
Prerequisites: PND731 Co-requisites: PND761
Credit Points: 26 Contact Hours: 13 per week

PND742 ORTHOTICS VI
Offered: Spring
This unit follows on from Orthotics IV and teaches the student to adapt previously learned principles of orthotic fabrication to incorporate prosthetic devices where appropriate.
Prerequisites: PND442 Co-requisites: PND732
Credit Points: 6 Contact Hours: 3 per week

PND752 CLINICAL BIOMECHANICS
Offered: Autumn
In this subject students are taught the biomechanical principles of foot function as used in the clinical situation.
Prerequisites: PND460 Co-requisites: PND731
Credit Points: 6 Contact Hours: 3 per week

PND761 SPORTS MEDICINE
Offered: Spring
This course follows on from the Orthotics units and the subject Kinesiology and Biomechanics, and is designed to consider the special needs of athletes. Studies are undertaken in those conditions which affect foot function and subsequent athletic performance.
Prerequisites: PND750 Co-requisites: PND732
Credit Points: 6 Contact Hours: 3 per week

PND770 PROJECT
Offered: Spring
Students are required to undertake special projects and to submit a thesis related to either a theoretical or clinical topic of their own choice.
Credit Points: 6 Contact Hours: 2 per week

PNN101 ENVIRONMENTAL HEALTH
Offered: Spring
Currently, there is heightened awareness about the nature of industrialised human activity and its impact upon natural resources and human health. Nurses have traditionally been concerned with the provision of an environment which is conducive to the promotion, maintenance and/or restoration of health. Thus, an understanding of contemporary environmental health issues is vital to the provision of effective health care which meets the needs of today’s society. Content will be selected from an introduction of ecosystems or environmental factors and human health.
Credit Points: 6 Contact Hours: 1.5 per week

PNN102 NUTRITION & LIFESTYLE
Offered: Spring
A wide variety of illness has its basis in inappropriate nutrition. In this subject, particular emphasis is placed on current trends in nutrition epidemiology in order to assist practising nurses in their health education efforts with clients.
Credit Points: 6 Contact Hours: 1.5 per week

PNN161 ANATOMY & PHYSIOLOGY I
Offered: Autumn
A study of basic functional anatomy covering cells, tissues, and the organ systems of the human body. The lectures and practical work are integrated and emphasise the relationships between structure and function.
Credit Points: 6 Contact Hours: 2 per week

PNN165 ANATOMY & PHYSIOLOGY II
Offered: Spring
A study of the mechanisms and controls of body functions. Stress is placed on fundamental principles and the practical work serves to illustrate these principles, as well as providing experience in physiological recording and investigative techniques.
Credit Points: 8 Contact Hours: 3 per week

PNP104 APPLIED NUTRITION I
Offered: Autumn
The application of nutrition principles to groups and populations is examined. Tools used in assessment including recommended dietary intakes and food composition tables are discussed. External determinants on nutrition such as food legislation and financial constraints are also discussed. The role of agencies involved in nutrition education are included.
Credit Points: 4 Contact Hours: 2 per week

PNP108 APPLIED NUTRITION II
Offered: Spring
The application of nutrition knowledge and assessment techniques to groups of individuals and population. Nutrition problems in Australia as a whole will be addressed as well as the nutritional needs of specific groups. Nutrition planning and policy and variations between states will be discussed.
Prerequisites: PNP104 PNP143
Credit Points: 6 Contact Hours: 3 per week

PNP111 FOOD STUDIES I
Offered: Autumn
The subject provides an overview of the structures and composition of food and its role in providing for nutritional requirements of the community. The impact of processing on nutrients in food is considered. The subject is closely allied with the subjects Foundations of Nutrition and Food Studies II.
Credit Points: 4 Contact Hours: 2 per week

PNP112 FOOD STUDIES II
Offered: Spring
Provides an opportunity to experiment with food commodities and to practise service planning, and food presentation. Examines the ingredient content of commercial foodstuffs. Examines the role of individual
ingredients of foodstuffs in the determination of food structure and organoleptic properties.

Prerequisites: PNP111
Co-requisites: PNP120, PNP108
Credit Points: 6 Contact Hours: 3 per week

- PNP115 OCCUPATIONAL HEALTH & SAFETY ADMINISTRATION I
  Offered: Autumn
  This fundamental subject will introduce students to basic management principles as they apply to this discipline and also in the development and delivery of health and safety training programs. A sound foundation in the principles and practice of health promotion will also be developed.
  Credit Points: 12 Contact Hours: 3 per week

- PNP116 HUMAN FACTORS
  Offered: Autumn
  This subject will introduce the human factors in occupational health and safety. Basic human anatomy and physiology will be reviewed prior to a discussion of how the physico-chemical environment of the workplace can impinge on normal physiological function. The psychology of humans in the work environment will be discussed with consideration of attitudes towards health and safety. The use of ergonomics, anthropometry and biomechanics in the design of safer workplaces will be reviewed.
  Credit Points: 12 Contact Hours: 3 per week

- PNP120 THERAPEUTIC DIETETICS
  Offered: Spring
  An extensive study of the application of dietary modifications and nutritional support in clinical settings. The emphasis is on dietary intervention for individuals particularly those with medical or surgical conditions where diet forms part of the treatment. There is a large practical component.
  Prerequisites: PNP143, PNP104
  Credit Points: 10 Contact Hours: 7 per week

- PNP123 PRACTICE IN THERAPEUTIC DIETETICS
  Offered: Autumn
  Practical experience and seminar presentations relevant to PNP120. The course will be conducted in institutions off-campus. (40 hours per week for 11 weeks).
  Prerequisites: Completion of all subjects Semester I & Semester 2
  Credit Points: 31 Contact Hours: 40 per week

- PNP123 PRACTICE IN COMMUNITY NUTRITION
  Offered: Autumn
  This subject enables students gain experience of nutrition and health care of individuals and groups in the community through off-campus practice. (40 hours per week for 3 weeks).
  Prerequisites: Completion of all subjects Semester I & II
  Credit Points: 7 Contact Hours: 40 per week

- PNP124 INTRODUCTION TO DIETETICS PRACTICE I
  Offered: Autumn, Spring
  These subjects offer an introduction to clinical dietetics. They involve one week each principally in the hospital setting. The offer an opportunity to practise interviewing and dietary assessment.
  Credit Points: (PNP124)-4, (PNP125)-6
  Contact Hours: 40 per week

- PNP132 PRACTICE IN LARGE SCALE FEEDING
  Offered: Autumn
  Practical experience and seminar presentations relevant to PNP137. The course will be conducted in institutions off-campus (40 hours per week for 4 weeks).
  Prerequisites: Completion of all subjects Semester I & Semester 2
  Credit Points: 10 Contact Hours: 40 per week

- PNP137 CATERING STUDIES
  Offered: Spring
  This subject is an introduction to institutional food service administration. Topics include the organisation of foodservice, production, distribution and service of food menu planning, hygiene, maintenance, financial control, human resource management and computer assistance and quality assurance. Field trips are included.
  Prerequisites: MSP152, PNP143, PNP111
  Credit Points: 7 Contact Hours: 5 per week

- PNP142 MEDICINE
  Offered: Spring
  Aetiology of disease. Brief description of treatment other than dietary of hypertension, cardiovascular, renal, gastro-intestinal and mental diseases, diabetes mellitus. Effect of nutrition on teeth, eyes, skin general, dental care and the effects of special diets on teeth, child health, nutrition in pregnancy, lactation, the aged. Brief introduction to pharmacology and proprietary names of drugs.
  Credit Points: 4 Contact Hours: 1.5 per week

- PNP143 FOUNDATION OF NUTRITION
  Offered: Autumn
  This subject builds on the background of biochemistry and human physiology of the students. It brings together, in an integrated manner, appropriate areas of biological chemistry and physiological function, to provide a scientific base on which the study of human nutrition can be built. Special attention is given to the development, structure and function of the gastro-intestinal tract and related organs, energy and work, interrelationships between food, additives and drugs.
  Credit Points: 12 Contact Hours: 6 per week

- PNP151 PROJECT I

- PNP251 PROJECT II
  Offered: Autumn, Spring
  The aims of these subjects are to introduce and practice research skills which will enable the student to formulate, design and conduct a research project, to analyse and interpret research data and write a scientific report. Additionally there will be an introduction to costing projects, presenting findings to different audiences and media releases. A start will be made on the community nutrition project for third semester.
  Prerequisites: Nil for PNP151; PNP151 for PNP251
  Credit Points: PNP151-4, PNP251-5
  Contact Hours: 1 per week

- PNP215 OCCUPATIONAL HEALTH & SAFETY ADMINISTRATION II
  Offered: Spring
  In this subject, students will develop an understanding of both the legal framework within which the discipline operates and industrial relations concepts and
This subject is designed to introduce students to basic disease processes in humans. They will also develop an understanding of the body's various uptake mechanisms of hazardous workplace agents and basic toxicological principles, including the body's various responses to toxic agents. Examples of acute and chronic occupational diseases will be discussed.

Credit Points: 12 Contact Hours: 3 per week

**PNP416 OCCUPATIONAL HEALTH & SAFETY PROJECT**

Offered: Spring

This major project gives students an opportunity to research a particular aspect of their theoretical or practical studies, and thereby develop their research techniques, data collection and evaluation skills and ability to work independently under supervision. By submission of a written project report, they will draw upon many of the skills developed throughout the course.

Credit Points: 12

**SVB001 SURVEYING & MAPPING**

Offered: Autumn

Instrumentation for land measurement, contour mapping; types of map, availability and interpretation; simple survey techniques; introduction to remote sensing techniques.

Credit Points: 2 Contact Hours: 2 per week

**SVB101 SURVEYING & MEASURING**

Offered: Autumn

The study programme is aimed at problems likely to be encountered by the builder. Basic concepts and applications of surveying and relationship with architecture and building. Instrumentation: level, steel tape, theodolite, compass traversing. Applications of instruments: running a flight of levels, cross sectioning, contours, detail surveying of sites, setting out of processes as applied to large building projects, tachometry. Office applications: plotting of survey data, computations of volumes. Legal aspects: cadastral system and tenure system, Titles Office applications: plotting of survey data, easements, encroachments, interpretation of survey plans.

Credit Points: 2 Contact Hours: 2 per week

**SVB111 DATA PRESENTATION I**

Offered: Autumn

Drafting instruments and techniques. Tinting and colouring. ‘One-off’ reproduction, Perspective.

Co-requisites: SVB121

Credit Points: 6 Contact Hours: 3 per week

**SVB123 LAND SURVEYING I**

Offered: Autumn

Credit Points: 13 Contact Hours: 6 per week

**SVB203 PROJECT SURVEY**

Offered: Spring

Students will be required to carry out two surveys of a building site of approximately one acre in area of undulating ground. The first survey is to be a chain survey with reduced levels taken on a grid to show the nature of the topography. The second survey on an alternative site of the same size is to be done by theodolite traverse.

Prerequisite: SVB101

Credit Points: 4 Contact Hours: 2 per week

**SVB211 DATA PRESENTATION II**

Offered: Spring

Engineering survey drafting; working survey drawings. Basic principles of computer graphics, hardware, software. Programming. Plotter production of maps and plans.

Prerequisites: CSB294, SVB111

Co-requisite: SVB226

Credit Points: 6 Contact Hours: 3 per week

**SVB212 DATA PRESENTATION III**

Offered: Spring

Develops drafting skills and introduces engineering survey drafting and computer graphics.

Prerequisite: SVB111 Co-requisite: SVB226

Credit Points: 2 Contact Hours: 1 per week

**SVB226 LAND SURVEYING II**

Offered: Spring

Prerequisite: SVB121 Co-requisite: SVB211

Credit Points: 13 Contact Hours: 6 per week

**SVB270 LAND ADMINISTRATION I**

Offered: Spring

Introduction to the elements of law. Law relating to land title and registration. Crown land administration in Queensland.

Credit Points: 6 Contact Hours: 3 per week

**SVB282 SEMINAR I**

Offered: Autumn

Preparation of technical papers and reports for both written and oral presentation. Business correspondence. Meeting procedures.

Credit Points: 5 Contact Hours: 2 per week

**SVB306 SURVEYING II**

Offered: Spring

Introductory surveying methods and instrumentation, use of level and theodolite for gathering and setting out data points, distance measurement, circular curves, areas and volumes, introductory photogrammetry and digital terrain models.

Credit Points: 8 Contact Hours: 3 per week

**SVB311 DATA PRESENTATION III**

Offered: Autumn

Prerequisite: SVB111 Co-requisite: SVB393

Credit Points: 5 Contact Hours: 3 per week

**SVB331 OBSERVATIONS & ADJUSTMENTS I**

Offered: Autumn

Review of relevant statistical concepts, theory of observations and of random errors, linear and nonlinear functional model, stochastic model, the law of propagation of variances, the error ellipse. Practical applications.

Prerequisites: MAB495, MAB499

Co-requisite: MAB795

Credit Points: 4 Contact Hours: 2 per week
SVB343 PHOTOGRAMMETRY I
Offered: Spring
Introduction to photogrammetry. Photogrammetric optics. Aerial photography. Geometry and use of single photographs. Geometry and use of the stereogram. Students are required to undertake one half day visit to an aerial survey/mapping organisation in the greater Brisbane area.
Prerequisite: PHB170
Credit Points: 6  Contact Hours: 3 per week

SVB352 LAND STUDIES A
Offered: Autumn
Introductory ecology and conservation of resources. Introduction to physical aspects of land. Assessment of physical land parameters. Land classifications. Students are required to undertake a full day ecological field trip to Stradbroke Island and a full day land evaluation exercise in the greater Brisbane area.
Credit Points: 6  Contact Hours: 6 per week

SVB393 LAND SURVEYING III
Offered: Autumn
Cadastral surveying. Field astronomy. Students are required to carry out offfcampus field work in the greater Brisbane area or a contiguous shire.
Prerequisites: SVB121, SVB270
Co-requisites: SVB311, SVB373
Credit Points: 10  Contact Hours: 5 per week

SVB442 GEODETIC COMPUTATIONS
Offered: Spring
Plane coordinate computation. Geometrical geodesy, geometry of spheroid, computation on the spheroid. Theory of map projections. The transverse mercator and UTM. Computations on the Australian Map Grid.
Prerequisite: SVB121
Co-requisite: SVB430
Credit Points: 9  Contact Hours: 4 per week

SVB443 PHOTOGRAMMETRY II
Offered: Autumn
Principles of construction and operation of analogue stereoplotters. Aerial triangulation. Terrestrial photogrammetry. Analytical photogrammetry. Students are required to undertake one half day visit to an aerial survey/mapping organisation in the greater Brisbane area.
Prerequisites: SVB343, MAB795
Co-requisites: SVB431
Credit Points: 11  Contact Hours: 6 per week

SVB451 LAND STUDIES B
Offered: Spring
An introduction to the theory of price. Location theory. Land economics.
Credit Points: 5  Contact Hours: 3 per week

SVB470 LAND ADMINISTRATION II
Offered: Autumn
Introduction to government and public administration. Australian public land administration. Private sector land administration.
Credit Points: 4  Contact Hours: 2 per week

SVB473 LAND INFORMATION SYSTEMS I
Offered: Autumn
Need for a computerised land information systems review of cadastral systems. Land title systems: the multipurpose cadastre and automation. Survey requirements for land information systems. Design principles, retrieval techniques.
Prerequisites: CSB294, SVB211, SVB393
Co-requisite: SVB573
Credit Points: 5  Contact Hours: 3 per week

SVB535 LAND SURVEYING V
Offered: Autumn
Geodetic surveying. Topographic surveying.
Prerequisites: MAB495, SVB121
Co-requisite: SVB430
Credit Points: 5  Contact Hours: 3 per week

SVB551 LAND VALUATION
Offered: Autumn
Prerequisite: SVB451
Credit Points: 6  Contact Hours: 3 per week

SVB561 LAND DEVELOPMENT PRACTICE I
Offered: Autumn
Land development as an economic activity. Surveys for subdivision design. Site planning. Land use determinants; political, economic, social and physical. Traffic aspects affecting subdivision design. Case studies of recent land development projects.
Prerequisites: SVB351, SVB451
Co-requisites: CEB364, SVB531, SVB574
Credit Points: 10  Contact Hours: 6 per week

SVB563 LAND INFORMATION SYSTEMS II
Offered: Autumn
Data acquisition, storage and management. Spatial identifiers. Cartographic display and generalisation in an automated system. Implementation of a system.
Prerequisite: SVB473  Co-requisite: SVB412
Credit Points: 4  Contact Hours: 2 per week

SVB571 CADASTRE
Offered: Autumn
A series of lectures and tutorials dealing with more complex and modern problems involved in the cadastre.
Prerequisite: SVB393
Credit Points: 4  Contact Hours: 2 per week
Queensland case law and legislation affecting land and the survey of land including the registration of interests in land, and statutory control of land development.

Prerequisite: SVB270
Credit Points: 6  Contact Hours: 3 per week

An introduction to rural and urban sociology. Social aspects of land administration.

Prerequisite: SVB270
Credit Points: 6  Contact Hours: 2 per week

Offered: Spring

A series of lectures covering the preliminaries of development, data assembly, statutory approvals, elements of design, requirements of communication, hydraulic and energy services, factors affecting development costs, financial and technical controls of land development schemes. Projects covering neighbourhood development, residential development, industrial estate development, canal and reclamation estates, commercial development, rural development schemes and design of small towns as are associated with mining ventures.

Prerequisites: SVB561, SVB574
Credit Points: 10  Contact Hours: 6 per week

The history of surveying and surveyors. The surveyor in relation to statutory authorities, civil, commercial and taxation laws. The surveyor as employer, employee, expert witness. Surveyor-client-consultant relationships. Professional ethics.

Prerequisite: SVB470
Credit Points: 5  Contact Hours: 3 per week

Each student will prepare and present at least one technically oriented seminar paper in a field germane to surveying.

Prerequisites: SVB282, successful completion of subjects totalling not less than 85 hours of weekly contact time
Credit Points: 2  Contact Hours: 1 per week

Numerical relative and absolute orientation. Independent model and bundle methods of block adjustment for triangulation, close range photogrammetry including nonconventional techniques. Analytical plotters including generation, manipulation and storage of digital data. The use of micro and mini computers in analytical photogrammetry.

Prerequisite: SVB443  Co-requisite: SVB451
Credit Points: 5  Contact Hours: 3 per week

Remote sensing satellites. Thermography and radar. Data processing for presentation and enhancement. Cartographic correction of remote sensing data for systematic geometric error.

Prerequisite: SVB343
Credit Points: 6  Contact Hours: 3 per week
methods. The project may be topographic or thematic in nature.
**Prerequisites:** SVT311, SVT412
Co-requisite: SVT443
Credit Points: 8 Contact Hours: 4 per week

- **SVT688 PROFESSIONAL PRACTICE A**
  Offered: Spring
  This subject prepares surveyors for professional practice either as employer or employee.
  **Prerequisites:** Successful completion of subjects totalling not less than 100 hours of weekly contact including SVB573
  Credit Points: 4 Contact Hours: 2 per week

- **SVT694 GEODESY II**
  Offered: Spring
  Review of matrices, the Jacobian matrix, orthogonal matrices, transformations, coordinate transformations, rotations in three dimensions, euler angles, datum transformations, the development of datums.
  **Prerequisite:** SVT640
  Credit Points: 8 Contact Hours: 3 per week

- **SVT113 INTRODUCTORY CARTOGRAPHY**
  Offered: Autumn
  Introduction to graphical presentation as a means of communication. Introduction to map projections. Map types, concepts of scale. The Queensland land tenure system. Introduction to map and plan reproduction. Simple plotting.
  Credit Points: 8 Contact Hours: 3 per week

- **SVT115 CARTOGRAPHIC COMPUTATIONS I**
  Offered: Autumn
  Calculation and calculating. Plane geometry. A review of algebraic manipulation with cartographic applications. Matrices and transformations as used in mapping.
  Credit Points: 8 Contact Hours: 3 per week

- **SVT222 SURVEY DRAFTING**
  Offered: Spring
  **Prerequisite:** SVT113
  Credit Points: 8 Contact Hours: 3 per week

- **SVT225 ENGINEERING SURVEYING I**
  Offered: Autumn
  A series of lectures, tutorials and practical classes covering fundamental survey concepts, coordinate systems, differential and simple trigonometric levelling; angular measurements; bearing and azimuth; linear measurement by steel tape and stadia.
  Credit Points: 7 Contact Hours: 3 per week

- **SVT315 CARTOGRAPHIC COMPUTATIONS II**
  Offered: Autumn
  Computer systems for the solution of cartographic problems. The structure of cartographic data and its relevance to computer solution. Applications of mathematical languages.
  **Prerequisite:** SVT115
  Credit Points: 8 Contact Hours: 3 per week

- **SVT316 LAND STUDIES I**
  Offered: Autumn
  Introduction to the physical aspects of land. Assessment of physical land parameters, land classification systems. Land evaluation.
  Credit Points: 8 Contact Hours: 3 per week

- **SVT343 PHOTOGRAMMETRY II**
  Offered: Autumn
  Use of stereoplotters, relative and absolute orientation; radial line methods. Terrestrial photogrammetry. Differential rectification and orthophoto construction. Positioning and identification of ground control. Introduction to remote sensing. Students are required to undertake one evening visit to a mapping organisation in the greater Brisbane area.
  **Prerequisite:** SVT243 Co-requisite: SVT115
  Credit Points: 8 Contact Hours: 3 per week

- **SVT426 LAND STUDIES II**
  Offered: Spring
  Introduction to the cultural aspects of land use.
  **Prerequisite:** SVT316
  Credit Points: 8 Contact Hours: 3 per week

- **SVT443 PHOTOGRAMMETRY III**
  Offered: Spring
  The operation of stereoplotting instruments. Aerial triangulation. Compilation of maps.
  **Prerequisite:** SVT343
  Credit Points: 8 Contact Hours: 3 per week

- **SVT471 LAND LAWS & REGULATIONS**
  Offered: Autumn
  Introduction to the Australian legal system, sources of law. The various acts affecting land and land surveying in Queensland.
  Credit Points: 8 Contact Hours: 3 per week

- **SVT511 CAD SYSTEMS**
  Offered: Autumn
  Principles of digital mapping. The use of an interactive graphics system for mapping operations.
  **Prerequisite:** SVT991
  Credit Points: 8 Contact Hours: 3 per week

- **SVT513 DIGITAL MAPPING**
  Offered: Autumn
  Advanced three-dimensional mapping. Analytical plotting systems including digital and graphical mapping, digital evaluation models and unconventional mapping applications. This subject will be project oriented.
  **Prerequisites:** SVT443, SVT315
  Credit Points: 8 Contact Hours: 3 per week
SVT623 PROJECT MAPPING
Offered: Spring
Introduction to the role of government and the private sector in project mapping. Planning projects for mapping purposes.
Prerequisites: SVT343, SVT443
Credit Points: 4 Contact Hours: 1.5 per week

SVT626 SEMINAR
Offered: Spring
Preparation of technical papers and reports for both written and oral presentation. Business correspondence. Meeting procedures.
Credit Points: 4 Contact Hours: 1.5 per week

SVT642 MAP PROJECTIONS I
Offered: Spring
Introduction to special trigonometry and its application to map projections. Tangential, cylindrical, conical and conventional projections using a sphere as reference surface.
Prerequisite: SVT115
Credit Points: 8 Contact Hours: 3 per week

SVT715 CARTOGRAPHY I
Offered: Autumn
Introduction to design. Monochrome design. Map compilation. The process camera for cartographic use. Introduction to lithography.
Credit Points: 8 Contact Hours: 3 per week

SVT742 MAP PROJECTIONS II
Offered: Autumn
Prerequisite: SVT642
Credit Points: 8 Contact Hours: 3 per week

SVT815 CARTOGRAPHY II
Offered: Spring
Map production, registration systems, scribing and masking techniques, printing methods including letter press, gravure, offset lithography and silk screen, paper and ink manufacture. Colour theory. Munsell’s system, colour synthesis, colour correction and proving.
Prerequisite: SVT715
Credit Points: 8 Contact Hours: 3 per week

SVT826 CARTOGRAPHIC ADMINISTRATION
Offered: Spring
Introduction to government and public administration. Theory of organisations and its application to mapping agencies.
Credit Points: 8 Contact Hours: 3 per week

SVT915 CARTOGRAPHY III
Offered: Autumn
Standard mapping, economics of standard mapping, standard sheet sizes, map specifications, map accuracy. Use of orthophotos as control for mapping. Thematic mapping. Special cartographic techniques, air brush tinting, hill shading, etc.
Prerequisite: SVT815
Credit Points: 8 Contact Hours: 3 per week
List of Subjects
These subjects are listed in alphabetical order as a basis for reference to the Outline of Subjects section which is presented in subject code order.
