This unit is designed to provide students with an insight into, and an appreciation of, many of the accounting problems and issues faced in an international business environment. The unit examines issues including: accounting systems in the global environment; international patterns of accounting development including cultural influences on accounting; comparative international accounting systems and practices; the pressures for international accounting harmonisation and disclosure; international disclosure trends and financial analysis; global accounting issues into the twenty-first century.

AYN426 International Capital Markets Law and Regulation

Pre-requisites	AYN410 or AYN456 or (GSN412 and GSN472)
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

AYN433 Research Topics in Accounting

Pre-requisites	AYN417 and AYN418
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces Honours, Higher Degree Research and other Postgraduate students to a broad range of accounting literature. It is designed to explore various theories and research methodologies that are applied in accounting research through assigned weekly readings and assigned research tasks. The assigned readings include contemporary research in financial accounting, management accounting, auditing and corporate governance.

AYN438 Taxation Law and Practice

Pre-requisites	AYN410 or AYN456
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levying of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also examined. The unit concludes with a brief overview of the taxation of partnerships, trusts and companies and the goods and services tax. Emphasis is placed on developing students' skills in problem solving through research and analysis of taxation issues.

AYN442 Superannuation and Wealth Management

Pre-requisites	AYN416 and EFN406 and AYN438. AYN438 maybe studied in the same teaching period.
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The complex regulatory environment in which retirement income policies operate, gives rise to a need for accountants and other business professionals to have coprehensive knowledge and understading of wealth management issues. This unit introduces students to personal wealth management, in particular, the Australian strategies. The knowledge and skills developed in this unit are essential for accounting professionals working in any areas of practice associated with the administration or auditing of superannuation funds, advising employers about superannuation, or providing individuals with financial planning services.

AYN443 Electronic Commerce Cycles

Pre-requisites	AYN416
Anti-requisites	AYB221, AYN402
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit examines the concepts, processes and issues relevant to

computerised accounting systems including: accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Excel, database software such as Access, and interactive multimedia software such as Accounting Information Systems Cycles.

AYN453 Financial Forensics and Business Intelligence

Pre-requisites	AYN443
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

As result of having to make increasing numbers of urgent, strategic, high-risk decisions, management need more than just information to assist them. This unit focuses on providing skills in forensic and business intelligence through the use of SAS technologies to examine large data resources to assist managerial decision making. Applications for financial forensics and business intelligence are emphasised.

AYN454 Forensic Accounting and Investigation

Pre-requisites	AYN417 and AYN418
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides students with a knowledge of critical factors that contribute to fraud and corporate failure, and forensic examination. Students develop an understanding of the risks of fraud and corporate failure occurring and an appreciation for the subsequent forensic review and litigation processes that may follow.

AYN456 Business and Corporations Law

Anti-requisites	AYN410 and AYN412
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT, EXT)

This unit will introduce students to the Australian legal environment and develop students' knowledge and understanding of the basic principles of business law and the Austrlaian corporations legislation. Students will be encouraged to develop their research and analytical skills relevant to contemporary business and corporate practice.

AYN460 Accountancy Work Placement

Other requisites	An application, interview and subsequent approval by the Unit Coordinator is required to enrol in this unit. In addition to completion of the following units: AYN417 & AYN418.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit fosters learning through work related experience. Students will be given the opportunity to experience the work that is performed by accountants which will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities. Admission to this unit is by application and subsequent approval by the unit coordinator. For additional **important information about this unit** please refer to the current unit outline.

AYN461 Accountancy Work Integrated Learning

Other requisites	An application (via a website), a short resume, an interview and subsequent approval by the Unit Coordinator is required to enrol. In additiona, completion of the following units: AYN417 & AYN418
Credit Points	24
Campus	Gardens Point

This unit fosters learning through work related experience. Students will be given the opportunity to experience the work that is performed by accountants which will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities. Admission to this unit is by application and subsequent approval by the unit coordinator.

AYN505 Financial Analysis and Business Valuation

Pre-requisites	AYN417 and AYN418 and EFN406
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is about the analysis of financial information arising primarily from the financial reports of entities. Fundamental analysis techniques are examined in detail with particular emphasis on the application of these techniques in equity (share) valuation decisions. The unit comprises three related parts. Part one outlines the four basic steps in the fundamental analysis framework; business analysis, accounting analysis, financial analysis and prospective analysis. The next part combines these skills in addressing the question of valuation, while the final section of the unit applies the skills in several different contexts, such as credit analysis, security analysis, mergers and acquisitions and financial policy decisions.

AYN506 Strategic Management Accounting

Pre-requisites	AYN414 and AYN417
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Strategic Management Accounting develops a theory of organisations that provides an understanding of the information requirements of management to facilitate strategic planning, decision-making and control. This unit prepares students for a world of unstructured problem-solving and develops skills in managerial decision-making by the use of current research articles to ascertain how managers can design organisations to motivate individuals to make choices that increase firm value. Topics include: the management of control systems; performance evaluation and compensation incentives; transfer pricing. New management accounting practices, activity-based costing, the balanced scorecard, and economic value added, are evaluated using the latest research.

AYN507 Governance Issues in Accounting

Pre-requisites	AYN417 and AYN418
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit adopts an accounting perspective to examine issues relating to sound corporate governance, accountability and transparency. Topics covered include the following: the role of the board of directors and board committees; internal control and risk management; audit committees, internal and external audit; duties of directors and management; codes of conduct and ethics; compensation issues; conflict of interest and insider trading.

AYN520 Integrated Issues in Professional Practice

Pre-requisites	AYN417 and AYN418
Anti-requisites	AYB339
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The Accountancy profession has repeatedly stressed the need for accounting university graduates to be 'work ready' and able to deal with and solve unstructured, multi-disciplined problems. This unit is a deliberate attempt to address this concern for students who enter the accounting profession through the Master of Business (Professional Accounting) - Advanced course and enables students in the Master of Business (Accounting) courses to further develop their team work, research and problem-solving skills. The unit simulates issues faced by a professional advisor/consultant by presenting students with simulated real world problems. The 'real world' focus of the unit ties strategically into QUT's charter and provides our students with a potential advantage in seeking employment.

BEB110 Organising and Managing Project Team

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit focus is on the dynamics of managing and organising project teams involved in delivering built environment, engineering or infrastructure projects. Recent literature has identified the need for managers and leaders to acquire knowledge in the areas of self management and the management of others to contribute to project effectiveness. You will be introduced to key managerial and human resource theories to assist in the development of analytical and interpretive skills to enable you to proactively and effectively lead project teams.

BEB111 Managing Project Quality

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is one of four within the BEE minor in Project Collaboration and is designed to provide you with appropriate knowledge and skills needed for your involvement in delivering projects in professional organisations in the public and private sectors, by ensuring that the

achieved project quality outcomes accord with client requirements and satisfy customer expectations.

BEB112 Principle of Project Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Project Management is the overall planning, control and coordination of a project, from inception to completion, aimed at meeting a client's requirements in order that the project will be completed on time within authorized cost and to the required quality standards. The aim of this unit is to provide the key concepts and foundation knowledge in project management, and to describe, clarify, and formalise project management process.

BEB113 Managing Project Cost

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Cost is a major metric of a successful project management. This unit introduces the process of managing project cost which includes planning, estimating, budgeting, and controlling costs so that the project can be completed within the approved budget.

BEB114 Project Financing

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Project is growing in complexity and size. Many projects never get off the ground due to insufficient financing. It is therefore necessary for project managers to know the sources and cost of project funds in order to package a financially viable project for approval. This unit introduces capital budgeting, project finance, and risk analysis. It covers the capital allocation framework, project cash flows, cost of capital, financial risk analysis, and how various types of projects are financed.

BEB210 Introduction to Collaboration

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the foundational aspects of collaboration within the design and documentation of artefacts, using Building Information Modelling (BIM) approach. Focusing on multidisciplinary collaboration during the complete life cycle of a built environment facility. This unit is an approach to the theory and practice of BIM software, exploring the translation from Computer Aided Design (CAD) to BIM. This unit is also the foundation for BEB212 Advanced Collaboration.

BEB211 Parametric Design Systems

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This subject introduces students to the use of parametric geometry systems that are used in early stages of design. These are the systems used by major design firms such as Zaha Hadid and Frank Gehry (architecture), SOM (architecture/engineering) and Arup (engineering).

BEB212 Advanced Collaboration

Pre-requisites	BEB210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In a real environment designers need to collaborate with others using a range of design tools provided by different software vendors. In this unit you will develop an understanding of interoperability and methods of maximising the benefits of information exchange across a range of design tools.

BEB213 Sustainable Design Systems

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A range of sustainability tools will be covered that support environmental impact analysis, economic analysis and social impact assessment, within a holistic approach to design. The capabilities of the tools will be discussed and then used to build up appropriate workflows that support integrated assessment for sustainability. These will be applied to a comprehensive design problem to reinforce the students understanding.

BEB701 Work Integrated Learning 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit aims to provide you with the opportunity to learn in a workplace environment. It will involve attendance, participation, observation, critical reflection, and report writing on workplace activities. The emphasis of your critical reflection and report writing will be on identifying and describing aspects of professional relevance incorporating: collaboration and teamwork; work place, health and safety; professional conduct; ethical responsibility, and other aspects of your work place experience. This unit may form part of your (compulsory) course core (as required by professional accrediting bodies e.g. Engineers Australia, Australian Institute of Building, Royal Institution of Chartered Surveyors), or it may be one of several work integrated learning (WIL) units (selected as part of a Minor).

BEB702 Work Integrated Learning 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to provide you with the opportunity to continue to learn in a work place environment. It will involve attendance, participation, observation, and reflection on activities negotiated with the work place supervisor. The emphasis of your critical reflection for this unit is to explicate the culture of the organisation you work for via the profile it presents to its employees, clients and the public and critique the role of an individual in a work place and how this relates to other employees in meeting the organisations aims and objectives.

BEB703 Work Integrated Learning 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit will provide you with the opportunity to consolidate and extend your learning through a work placement and associated projects. It will involve some on-campus attendance at lectures and online tutorials as well as

participation in, observation of, and reflection on activities undertaken during the work placement. The emphasis in the unit is on the critical reflection of academic learning and its application in practice. This is supported through an emphasis on the development of high order observation skills and critical reflection skills. The outcomes of your learning will be recorded in your e-portfolio. Most students undertaking this unit will do so as part of a WIL Minor.

BEB704 Work Integrated Learning 4

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

As with the previous WIL units, this unit involves participation in a work placement, associated projects and on-campus lectures and seminars to further extend and consolidate students' learning and preparation for professional practice. The emphasis in this unit is on developing a broader appreciation of the issues impacting on industry, the nature of academic and practice knowledge and how they can be productively integrated to respond to the needs of and the challenges facing professional practice. The unit also gives explicit attention to the continuing development of graduate capabilities including oral communications skills. This unit is normally undertaken as the last unit in the first WIL Minor.

BEB705 Work Integrated Learning 5

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is normally undertaken as the first unit of a second WIL Minor. While the first WIL Minor emphasises the context of practice and its relationship to academia, the second WIL Minor focuses on the participation of students in work in a more proactive and leading way thereby providing the opportunity for sophisticated, collaborative and reciprocal learning and outcomes for all concerned. In this context, this unit introduces students to the notion of practice-led research and research-led practice and provides them with the opportunity to use practice-based projects as vehicles for further developing discipline knowledge as well as advanced critical enquiry skills. In undertaking the unit, students will collaborate with a project supervisor and prepare an interim and final report and seminar on the project.

BEB706 Work Integrated Learning 6

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is normally undertaken as the first unit of a second WIL Minor. While the first WIL Minor emphasises the context of practice and its relationship to academia, the second WIL Minor focuses on the participation of students in work in a more proactive and leading way thereby providing the opportunity for sophisticated, collaborative and reciprocal learning and outcomes for all concerned. In this context, this unit introduces students to the notion of practice-led research and research-led practice and provides them with the opportunity to use practice-based projects as vehicles for further developing discipline knowledge as well as advanced critical enquiry skills. In undertaking the unit, students will collaborate with a project supervisor and prepare an interim and final report and seminar on the project.

BEB707 Work Integrated Learning 7

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is normally undertaken as the first unit of a second WIL Minor. While the first WIL Minor emphasises the context of practice and its relationship to academia, the second WIL Minor focuses on the participation of students in work in a more proactive and leading way thereby providing the opportunity for sophisticated, collaborative and reciprocal learning and outcomes for all concerned. In this context, this unit introduces students to the notion of practice-led research and research-led practice and provides them with the opportunity to use practice-based projects as vehicles for further developing discipline knowledge as well as advanced critical enquiry skills. In undertaking the unit, students will collaborate with a project supervisor and prepare an interim and final report and seminar on the project.

BEB708 Work Integrated Learning 8

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is normally undertaken as the first unit of a second WIL Minor. While the first WIL Minor emphasises the context of practice and its relationship to academia, the second WIL Minor focuses on the participation of students in work in a more proactive and leading way thereby providing the opportunity for sophisticated, collaborative and reciprocal learning and outcomes for all concerned. In this context, this unit introduces students to the notion of practice-led research and research-led practice and provides them with the opportunity to use practice-based projects as vehicles for further developing discipline knowledge as well as advanced critical enquiry skills. In undertaking the unit, students will collaborate with a project supervisor and prepare an interim and final report and seminar on the project.

BEB709 Work Integrated Learning 1

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

BEB801 Project 1

Equivalents	CEB411, CEB420, CNB434, EEB781-1, EEB889-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is usually taken in the final year of study. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. For some students, this unit will be taken one of two 'project' units related to the same student project; in such cases this unit may be a pre-requisite or co-requisite to the second unit (or a follow-on from the first unit). The final 'deliverable' for this unit may vary for each discipline and details will be provided in lectures/tutorials and on the Blackboard website.

BEB802 Project 2

Equivalents	CEB415, EEB782-2, EEB889-2
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is usually taken in the final year of study, and is only taken by students completing a two unit project. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. This unit will be taken as the second of two 'project' units related to the same student project.

BEB806 Project 1

Equivalents	CEB411, CEB420, CNB434, EEB781-1, EEB889-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is usually taken in the final year of study. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. For some students, this unit will be taken one of two 'project' units related to the same student project; in such cases this unit may be a pre-requisite or co-requisite to the second unit (or a follow-on from the first unit). The final 'deliverable' for this unit may vary for each discipline and details will be provided in lectures/tutorials and on the Blackboard website.

BEB807 Project 2

Equivalents	CEB415, EEB782-2, EEB889-2
Credit Points	12
Campus	Gardens Point

This unit is usually taken in the final year of study, and is only taken by students completing a two unit project. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. This unit will be taken as the second of two 'project' units related to the same student project.

BEB902 Greening the Built Environment

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

THIS UNIT IS OFFERED IN EVEN-NUMBERED YEARS ONLY. This unit presents the challenges and opportunities for built environment professionals to contribute to a sustainable society. It introduces a paradigm shift in environmental design from reducing negative environmental impacts to generating net positive impacts. It shows how, with a new approach to design, development can be a sustainability solution. Positive Development would increase overall social and natural capital beyond that which existed on site before settlement. Building design principles and eco-technologies are surveyed that address sustainability issues at the level of buildings, building components and materials. In addition, green practitioners will explain how they have dealt with impediments to sustainable development in an evening lecture series.

BEB904 Eco-Innovation for Sustainability

Credit Points	12
Campus	Gardens Point

THIS UNIT IS OFFERED IN EVEN-NUMBERED YEARS ONLY. This is one of the units in a Minor in Sustainability designed to equip you to address fundamental social, ecological and economic challenges facing society using a systems design approach. This unit focuses on 'eco-innovation', which includes institutional, technological and spatial design solutions that increase the ecological base, human health, well-being and equity as well as reducing total resource consumption and waste. New strategies are explored which can help find leverage points where small actions or investments generate system-wide improvements.

BEN610 Project Management Principles

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit serves as an introduction to project management as a fundamental skill for all postgraduate coursework students in built environment and engineering. It offers an overview of the framework, processes and key knowledge areas of project management.

BEN710 Sustainable Practice in Built Environment and Engineering

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Sustainability has become a global agenda that impacts upon our work and everyday life. The unit will introduce principles, challenges and skills for dealing with a diversity of trans-disciplinary issues in sustainable development. By introducing critical sustainability theory and challenging best practices, this unit will prepare you for the impending changes that are necessary in all built environment and engineering disciplines.

BEN810 Research Methods For Built Environment and Engineering

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

BEN910 Integrated Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Problems that confront professionals are ill-defined and complex. The ability to define a problem, and collect and analyse relevant information using appropriate research methods is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace.

BEN920 Integrated Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Problems that confront professionals are ill-defined and complex. The ability to define a problem, and collect and analyse relevant information using appropriate research methods is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace.

BEZ910 Integrated Project

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

Problems that confront professionals are ill-defined and complex. The ability to define a problem, and collect and analyse

relevant information using appropriate research methods is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace.

BSB009 Service Learning and Community Engagement for Business

Other requisites	Enrolment in this unit requires completion of 96 credit points of approved study including four or more of the Business Core Units
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit fosters learning through an experience of professional practice in a suitable community enterprise where students actively work on a part-time basis. Students are required to submit a plan, a reflective journal and undertake a presentation reflecting upon their learning against course learning goals.

BSB110 Accounting

Anti-requisites	BSD110, CNB293, UDB342
Equivalents	BSX110, CTB110
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with a basic level of knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, analysis and interpretation of financial statements and planning, control and business decision making.

BSB111 Business Law and Ethics

Anti-requisites	AYB120, LWS009, LWB145
Equivalents	BSX111, CTB111
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit integrates the concepts and principles of business law with the theories and applications of business ethics. The unit makes extensive use of cases in law and ethics to develop knowledge and skills that enable students to analyse, apply and evaluate the legal principles and ethical decision-making processes relevant to modern business practice.

BSB113 Economics

Anti-requisites	BSD113
Equivalents	BSX113, CTB113, UDB104
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit introduces students to the key economic concepts and their practical applications. It comprises twelve topics each focusing on a current economic issue. Microeconomic topics include demand and supply, elasticity, production and cost theory and market structure. Macroeconomic topics include measuring GDP, inflation and unemployment, money and banking, and fiscal and monetary policy.

BSB115 Management

Anti-requisites	BSD115
Equivalents	BSX115, CTB115
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM-1 (INT)

The unit provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that are needed in all areas of management and in all areas of organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis will be on knowledge, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.

BSB119 Global Business

Anti-requisites	BSB116, BSB112, BSD119
Equivalents	BSX119, CTB119
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit examines the drivers of globalisation and the diversity of country markets at an introductory level. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments. An authentic country feasibility study is undertaken to help identify where a firm can find opportunities both in terms of actual and potential markets and the location for value-adding activities. The unit aims for students to have developed a comprehension of the nature and role of globalisation and the drivers of international business, a. knowledge of the competitive forces and challenges confronting all business as a consequence of globalisation processes and an awareness of the additional knowledge and skills required of management to operate business internationally across a diversity of environments.

BSB123 Data Analysis

Anti-requisites	BSB117, BSB122, CTB122, EFB101, MAB101, MAB141,MAB233
Equivalents	BSX123
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The ability to collect, analyse, manipulate, understand and report data is an important skill in any work environment. This is particularly true in business where learning to deal with randomness, variation and uncertainty is a vital skill for anyone intending to apply their knowledge. This unit is designed to ensure that students gain the basic tools necessary to allow them to develop this skill. Students will also gain an introduction to many of the quantitative techniques which will be used throughout their further studies in their chosen discipline.

BSB124 Working in Business

Anti-requisites	BSB114, CTB114, HHB113, BSD124
Equivalents	BSX124
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM-2 (INT)

This unit will help you to kickstart your study and your career in business regardless of your specific discipline. Not only does "Working in Business" give you an understanding of where business has come from and where it is headed, but you will also gain insights into yourself

and how you can develop as both a student and professional in the business world. It covers an overview of business, the important issues for working as a professional in an organisation, and also gives you the opportunity to reflect on your own skills, preferences and career options so you can plan a future that suits you.

BSB126 Marketing

Anti-requisites	BSB116,BSD126
Equivalents	BSX126, CTB126
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This introductory subject examines the role and importance of marketing to the contemporary organisation. Emphasis is placed on understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, management information systems and consumer behaviour. The unit explores the various elements of the marketing mix, with special reference to product, price, distribution, and promotion, including advertising and public relations. By way of introduction only, key issues relating to services marketing, e-marketing and strategic marketing are also canvassed.

BSB200 Project

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SUM (INT)

Students will be given the opportunity to develop and write a formal analytical study of a specific theory area or develop an industry case study. Students will select the topic in conjunction with a supervisor and prepare a formal plan for obtaining answers to the research question on the business problem. A full report will be subitted at the conclusion of the semester, which will cover all of the objectives set out in the original proposal.

BSB302 Project 2

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SUM (INT)

Students will develop either a detailed case study or a special project related to their discipline area (either: Advertising, Marketing, Public Relations, Economics, Finance, Management, Human Resource Management or International Business). Students will work individually with a supervisor to develop and execute a comprehensive and systematic study of an issue relevant to their study program.

BSB311 Innovation Commercialisation Strategies

Pre-requisites	MGB223 or LSP127
Anti-requisites	MGB355
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Students study strategies and approaches used in industry and government organisations for the research, development and commercialisation of biotechnology innovations. The unit offers the opportunity to read widely as well as in depth about the commercialisation of molecular biology and biotechnology research. Theoretical concepts are integrated with prepared case studies prior to guest speaker seminars.

BSD110 Accounting

Anti-requisites	BSB110
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with some basic knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, and the analysis and interpretation of financial statements for planning, control and business decision making purposes.

BSD113 Economics

Anti-requisites	BSB113 or UDB104
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces students to the key economic concepts and their practical applications. It comprises 12 topics each focusing on a current economic issue. Microeconomic topics include demand and supply, elasticity, production and cost theory and market structure. Macroeconomic topics include measuring GDP, inflation and unemployment, money and banking, and fiscal and monetary policy.

BSD115 Management

Anti-requisites	BSB115
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

The unit provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that will be needed at all areas of management and in all areas of organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis will be on knowledge, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.

BSD119 Global Business

Anti-requisites	BSD119
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit integrates two rapidly expanding areas of business studies: international business and e-business. Doing business across international borders is facilitated by e-business technologies. This unit explores the nature and models of international business and e-business and how e-business technologies facilitate international business and add value to the business. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments.

BSD124 Working in Business

Anti-requisites	BSB124
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit will help you to kickstart your study and your career in business regardless of your specific discipline. Not only does Working in Business give you an understanding of where business has

come from and where it is headed, but you will also gain insights into yourself and how you can develop as both a student and professional in the business world. It covers an overview of business, the important issues for working as a professional in an organisation, and also gives you the opportunity to reflect on your own skills, preferences and career options so you can plan a future that suits you.

BSD126 Marketing

Anti-requisites	BSB126
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This introductory unit examines the role and importance of marketing to the contemporary organisation. Emphasis is given to understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, marketing information systems and consumer behaviour. The unit explores the various elements of the marketing mix, with special reference to product, price, distribution, promotion. Promotion includes advertising and public relations. By way of introduction only, key issues relating to services marketing, strategic marketing and marketing planning are also canvassed.

BSN005 Introduction to Academic Research

Other requisites	Subject to Course Coordinator Approval: 240 credit points of UG study with a GPA of 5.5>; pre-approval of Course Coordinator; subject to supervisor availability and completion of an agreed learning contract.
Credit Points	12
Campus	Gardens Point

This unit presents a pathway for coursework students into higher degree research. It will provide students with the opportunity to produce a high quality journal article (as primary author) under the supervision of an experienced researcher. The student will report on research outcomes through their participation in an existing research project. Upon completion of this unit, students should be able to draft a literature review drawing largely on provided sources of literature; analyse provided data within a suitable theoretical framework; identify and justify the choice of an appropriate journal to target for publication; complete the journal article as primary author such that it meets all technical requirements for submission to the identified journal.

BSN404 Project 1

Anti-requisites	MKN101, MKN102, MKN103
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK, INT), 2012 SEM-2 (INT, BLK); 2012 SUM (INT, BLK)

This unit is designed to permit the student to undertake a research project, subject to the approval of the Course Coordinator.

BSN405 Project 2

Anti-requisites	MKN101, MKN102, MKN104
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit is designed to permit the student to undertake a research project, subject to the approval of the course coordinator.

BSN406 Project 3

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit is designed to permit the student to undertake a 24 credit point research project, subject to approval of the course coordinator.

BSN409 Research Project

Credit Points	24
Campus	Gardens Point

This is to produce a major piece of applied research. The research project provides the opportunity to apply and reinforce the education and knowledge gained from the course by research report, case study or application of technology. The final project must demonstrate an ability to identify and research a complex business problem in accountancy or banking and finance or a related discipline.

BSN412 Qualitative Research and Analytical Techniques

Anti-requisites	CON500
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides a detailed overview of qualitative research to support decision-making in business disciplines. The primary purpose of this unit is to develop a detailed understanding of the theoretical contexts in which field studies and qualitative research methods have developed and the techniques that define the approach. Students develop the ability to analyse, conduct, and evaluate qualitative research in discipline areas related to business. The unit provides a basic preparation for the development of a project, thesis or dissertation proposal based on the use of qualitative research.

BSN414 Quantitative Research Methods

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Quantitative Research Methods is a postgraduate unit designed to introduce students to a range of quantitative research methods and their application to different research questions and types of quantitative data. Throughout the unit, students will be exposed to a wide range of quantitative research issues including survey and index development, factor analysis, multiple regression, experimental data collection and analysis, ANOVA and MANOVA, structural models, secondary data collection and analysis, and longitudinal data analysis. Each lecture will be conducted in computer laboratories to allow students the opportunity to develop their quantitative research skills using SPSS and AMOS with data provided by lecturers.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake a study of an issue as the culmination of their honours program. The dissertation must have a well-developed conceptual foundation and include a primary research component.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake a study of an issue as the culmination of their honours program. The dissertation must have a well-developed conceptual foundation and include a primary research component.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake a study of an issue as the culmination of their honours program. The dissertation must have a well-developed conceptual foundation and include a primary research component.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake a study of an issue as the culmination of their honours program. The dissertation must have a well-developed conceptual foundation and include a primary research component.

BSN502 Research Methodology

Anti-requisites	BSB400
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The purpose of this study is to provide students with a range of ideas and methods that enable them to analyse, evaluate and conduct research in discipline areas related to business. It provides an essential and basic preparation for the development of a thesis or dissertation proposal. Areas of study include research paradigms, analysis and criticism, research design, data collection and data manipulation, interpretation and presentation.

BSN503 Research Seminar

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit students prepare detailed literature reviews relevant to the thesis or dissertation proposal. Students are required to prepare and present a detailed seminar paper describing and explaining the results of their review and its relevance to the thesis or dissertation proposal. The unit is in two parts: the first provides a series of lectures from staff advising as to the requirements of a thorough, well-directed literature search and review; the second consists of a series of seminars from students presenting their findings.

BSX110 Accounting (Outbound Exchange)

Equivalents	BSB110
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

This exchange unit is only available for selection for students on an approved exchange program.

BSX111 Business Law and Ethics (Outbound Exchange)

Equivalents	BSB111
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

CLB001 Records Management

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

An effective information management system is integral to the success of a business's operations. As almost all activity within and between business organisations involves the transfer of information, it is essential that each business establish its own systems and procedures to enable the efficient management and organisation of information. To this end, employees must have knowledge and understanding of how information and records are collected, classified, accessed and processed within the organisation, as well as an awareness and appreciation of the additional systems established for the purpose of maintaining the integrity and security of the business's information.

CLB002 Computer Applications in BCT

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Advanced computing skills are an essential part of the overall skills, knowledge and understanding required by all employees in any organisation. To participate effectively in today's business environments, you are required to have the skills to operate a variety of software applications and appreciate the value in being able to integrate these packages. As well employees must recognise the need to continually update these skills as technology changes.

CLB003 Administrative Procedures

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit considers administrative practices and procedures relevant to any business environment, including communication skills, practical skills to perform a range of business activities, ability to prepare and produce documentation in a range of business contexts using policies and procedures to achieve tasks in required timeframes.

CLB004 Foundation: Language Design and Theory

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit examines literacy from contemporary perspectives. Literacy education has tended to make an artificial divide between the printed word and visual information. Increasingly, contemporary literate practices combine multiple text forms employing a range of media and technologies to communicate. Texts are spoken, written, visual imagery and other symbolic forms, and are presented in multimedia combinations and digital interactive contexts. This unit examines the complex simultaneity of texts, delivery modes and media that have specific and more general, social and cultural meaning.

CLB005 Foundation: Wellness and Active Citizenship

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit explores the links between a holistic notion of health and wellness and the practice of active citizenship. It investigates the connections between human wellness, behaviour and particular social, cultural, civic, economic and environmental relationships that characterise communities at particular times and places. Students are encouraged to critically analyse such connections and utilise their knowledge and understanding to develop a sense of purpose about wellness and active citizenship in an increasingly globalised world.

CLB006 Teaching Reading and Writing

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

English education is central to primary schooling in Australia and in an increasing number of international contexts. In this unit you will continue to learn about the structures and functions of the English language and begin to learn how to teach print reading and writing.

CLB007 Learning Literacy by Design

Pre-requisites	CLB006
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

unit is to provide you with socio-critical and inclusive principles and practices relating to language and literacy education that are each crucial to your meeting QCT Standard 2. Therefore, you will design learning experiences within a multiliteracies, community of learners framework, catering for student diversity and a range of contexts. You will also examine how strategic practice is linked to particular theories of language and literacy, producing artifacts relevant to your professional portfolio.

CLB008 Teaching Primary SOSE

Pre-requisites	CLB005 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 6TP4 (INT); 2012 SEM-2 (INT)

This unit focuses on recent developments within the social education curriculum area with particular reference to Studies of Society and Environment (SOSE), a national key learning area and explores teaching and learning approaches in SOSE. Understanding the processes of curriculum development and being able to interpret curriculum documents and their implications for classroom practice are essential professional skills. Students will investigate SOSE as a curriculum area and to consider ways of translating syllabus requirements into worthwhile teaching and learning activities. Students will critically reflect upon both the theory and the practical suggestions throughout the unit and to consider how effective teaching can be achieved.

CLB010 Accounting and Business Management Curriculum Studies 2

Pre-requisites	CLB051
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior Accounting and Business Organisation and Management Syllabi to understand mandatory aspects of each syllabus. This unit will prepare students for their professional role as a teacher of secondary business education subjects, in particular, Accounting and Business Organisation and Management.

CLB013 Business and Communication Technologies Curriculum Studies 2

Pre-requisites	CLB051
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior BCT Syllabus to understand mandatory aspects of the syllabus and will prepare students for their professional role as a teacher of secondary business education subjects, in particular, BCT.

CLB018 English Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This introduction to English teaching in secondary schools, provides an indispensable foundation on which English Curriculum Studies II and III are built. Students will develop an understanding of the theories of language and texts that underpin secondary English curriculum and pedagogy and which

condition students learning within English classrooms. Students will have opportunities to apply their learning to their field observations and to plan to put theory of language, texts and learners into practice for English teaching.

CLB019 English Curriculum Studies 2

Pre-requisites	CLB018
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an opportunity to develop a theorized understanding of the Queensland English Syllabus for Years 1-10 and to implement this understanding by developing lessons and curriculum units that are appropriate for the needs and interests of diverse learners in a range of sociocultural contexts.

CLB020 English Curriculum Studies 3

Pre-requisites	CLB019
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides opportunities to develop a theorized understanding of the Queensland English Syllabus for Years 11 and 12, Senior English Communication (SAS) and the Senior English Extension (Literature) Syllabus, and to implement this understanding by analysing and developing senior English programs, teaching and assessment strategies that are appropriate for the needs and interests of diverse learners in particular sociocultural contexts.

CLB021 English as a Second Language Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Effective ESL practitioners require a knowledge and understanding of the many factors that impact on the effective learning of a second (or an additional) language and on learning curriculum content through an additional language. They also need to know how these factors influence planning for learning and how they can be managed to maximise learning outcomes. In this first curriculum unit, students will engage with some of the theory that influences approaches to teaching English as an additional language across the curriculum. Students will engage with the documents that impact on planning for ESL teaching and learning eg ESL Framework of Stages and NLLIA ESL Bandscales.

CLB022 ESL Curriculum Studies 2

Pre-requisites	CLB021
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT)

This unit introduces the theoretical and practical knowledge and skills required by an effective practitioner in the complex social environment of the classroom.

CLB023 ESL Curriculum Studies 3

Pre-requisites	CLB022
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the theoretical and practical knowledge and skills required by an effective practitioner in the complex social environment of the classroom.

CLB024 Film and Media Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to develop competencies needed for planning and teaching in junior secondary Media (Years 8-10). Students will be introduced to the current curricular directions and frameworks for junior media (1-10) and its applications across the curriculum. The unit will build on the understandings and skills students developed in the unit Teaching and Learning Studies I and II and relate also to Field Studies I. This should assist in preparing students for the further Field Studies components of the course.

CLB025 Film and Media Curriculum Studies 2

Pre-requisites	CLB024
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit allows students to apply theoretical knowledge of the curriculum and their Film and Media discipline units to senior secondary contexts. The unit offers the opportunity to develop research and presentation skills by formally researching and discussing the teaching implications of a number of current topics in film and media education.

CLB026 Film and Media Curriculum Studies 3

Pre-requisites	CLB025
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit allows students to apply technological concepts and skills in senior and junior media studies and across other curriculum areas. The unit helps students understand and design pre-production texts investigating the role of technologies in the senior curriculum.

CLB028 Geography Curriculum Studies 2

Pre-requisites	CLB054
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides opportunities to develop an understanding of teaching and learning in Geography and Studies of Society and Environment.

CLB031 History Curriculum Studies 2

Pre-requisites	CLB054
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides opportunities to develop an understanding of teaching and learning in History and Studies of Society and Environment (SOSE).

CLB034 Legal Studies Curriculum Studies 2

Pre-requisites	CLB051 or CLB054
Credit Points	12

Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The second of three complementary units in Legal Studies Curriculum. Units are designed to help prepare students for a professional role as a teacher of secondary school Senior Legal Studies, and also to prepare them to teach in lower secondary subjects which are law-related, particularly the Civics syllabus of SOSE.

CLB036 LOTE Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit allows students to develop an understanding of the language learning process and their awareness of the place of languages in the school curriculum. Students will be encouraged to become reflective learners/teachers who can analyse the contexts in which they work, are familiar with policy and curriculum issues and are able to make soundly-based professional judgments designed to maximize learning for all students.

CLB037 LOTE Curriculum Studies 2

Pre-requisites	CLB036
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Practising teachers need to be aware that syllabuses,policy documents and the classroom practices and teaching strategies to which they give rise reflect underlying views of language and learning.

CLB038 LOTE Curriculum Studies 3

Pre-requisites	CLB037
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the two previous units and explores in greater depth a range of practical and theoretical issues in the area of LOTE curriculum development and implementation.

CLB040 Social Science Curriculum Studies 2

Pre-requisites	CLB054
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit involves translating the syllabuses into modules or units of work, as well as placing an emphasis on assessment principles in Social Science. Students will also be involved in the development of advanced teaching strategies.

CLB042 Primary LOTE Curriculum Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Develops an understanding of the second language learning process and awareness of the place of languages in the primary school curriculum. Students will analyze the contexts in which you work, deal confidently with policy and curriculum issues and make soundly-based professional judgments designed to maximize learning for all students.

CLB049 The Global Teacher

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit enhances the skills of educators to design curriculum and pedagogy in ways that address global citizenship and educational and human rights.

CLB050 Movies and Popular Culture

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to equip students with an understanding of key concepts in socio-cultural theory and to increase their knowledge of the corpus of fictional film and television narrative. It also aims to provide students with the tools to critically analyse the way in which fictional film and television as cultural products, both perpetuate and help to shape ways of thinking and acting in the social and physical world and in institutions such as schools

CLB051 Business Education Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the first of three complementary units in the teaching of Business Education. The three units have been designed to help prepare you for a professional role as a teacher of lower and senior secondary school Business Education subjects (Accounting Business Management, Business Communication Technologies, Economics, Legal Studies, and ICT. In this first unit, the focus will be on curriculum development and teaching approaches in Lower Secondary Business and ICT Education.

CLB053 Business Education Curriculum Studies 3

Pre-requisites	CLB010 or CLB013 or CLB034
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit, the final of three complementary units in the teaching of Business and ICT Education, will develop further your professional knowledge and skills as a learner-focused educator and skilled curriculum developer. The unit explores relevant issues, pedagogy and professional requirements essential for teachers of Business and ICT Education in the twenty-first century classroom.

CLB054 Social Education Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the first of three complementary units in Social Education curriculum aimed at preparing you to teach Social Science subjects in the lower secondary school. This unit focuses on recent developments within the curriculum area of social education, with particular reference to the field of Studies of Society and Environment (SOSE) ¿ a national Key Learning Area. It explores the theoretical context for these curriculum areas, and places emphasis on the links between theory and practice.

CLB056 Social Education Curriculum Studies 3

Pre-requisites	CLB031 or CLB028 or CLB034 or CLB040
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the third of three complementary units in Social Education curriculum. The aim of this unit is to provide you with opportunities to develop an understanding of the ways in which new policies and initiatives have impacted on teaching and learning in social sciences and specific discipline studies in the senior school.

CLB101 Australian Society and Culture

Equivalents	HHB106, HHB108
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is designed to provide overseas and Australian students with an understanding of Australian culture and values. It offers insights and understandings about issues that divide Australians as well as events and circumstances that unite the nation.

CLB102 Australian Historical Studies

Equivalents	HHB109, HHB252
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

There are now competing ideologies and contexts shaping, dominating and influencing the way we think historically about Australia.This unit presents a past in Australia that is constructed, invented, contested and open to interpretation.

CLB103 Interpreting the Past

Equivalents	HHB121
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

For the purposes of this unit, 'history' will be taken to mean a set of practices developed by professional historians to produce knowledge about the past. The study of these practices promotes understandings of how historians set about their work, the rules that govern their methods, the reliability of historical knowledge and the value of history socially and culturally.

CLB104 Colonialism and Independence in Asia-Pacific

Equivalents	HHB122
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides a general introduction to the history, geography and cultures of the Asia-Pacific region. It traces the rise and decline of colonial empires, the growth of nationalism in East Asia, Southeast Asia and the Pacific and the dynamic policies of the Asia-Pacific and their search for identity, independence, growth and stability.

CLB105 Australia and the South Pacific

Equivalents	HHB242, HHB243
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is based on a critical study of the evolving relationship between Australia and the Pacific Islands. The key issue in this unit is: does Australia have a Pacific history?

CLB106 Modern China

Equivalents	HHB246
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The unit provides students with the knowledge of how China, formerly a Dynastic Empire, was disempowered by Western Imperialism, only to obtain independence through the governmental embrace of Communism. The role of powerful individuals in determining China's destiny, and an understanding of how the country's fortunes changed over time are additional features of the content.

CLB107 The Classical World

Equivalents	HHB257
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to endeavour to explain/understand particular societies and their transition in the Classical World, by focusing attention on selected periods, aspects and individuals pertaining to ancient Greece and Rome.

CLB108 Nations and Nationalism in Modern Europe

Equivalents	HHB260
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit will develop an understanding of matters pertinent to the evolution of nationalism in Europe in the modern era. This will include the influence of social movements and cultural and economic issues.

CLB109 World Regions

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit offers an introductory geographical overview of global regions. This is an excellent basis from which to develop an understanding of complex interrelationships between regions and nations. The integrated knowledge gained is of current and practical value to professionals in many fields requiring a knowledge of international affairs including teachers, planners, journalists, business managers and travellers and people in general.

CLB110 Environment and Society

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

People and nature interact to create distinctive and dynamic places and landscapes. Applied geography, with its integrating perspective and skills-base, helps us to understand this. The discipline hence addresses some of our most pressing social and environmental problems. Geography objectively views human activities, natural systems and their inter-relationships in terms of consequent spatial patterns and impacts on landscapes, regions and places.

CLB111 Environmental Hazards

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit takes a geographical perspective to investigate the characteristics and distribution of environmental hazards,

patterns of risk and vulnerability, and how people perceive, manage and adjust to hazardous environments.

CLB112 South East Asia in Focus

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Australia's interaction with Southeast Asia, including our most populous nearest neighbour, Indonesia, continues to increase in significance. This unit examines aspects of Southeast Asian geography, environment, society and culture, in a contemporary framework.

CLB113 Australian Geographical Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Australia faces challenging problems and changes in relation to its changing population, socio-economic development and environmental sustainability. Many of these problems, relating to land-use and settlement patterns, migration trends, resource and hazard distribution, regional socio-economic structure, remoteness and accessibility etc, have a geographical basis. The aim is to describe and analyse, Australia's natural and social landscapes, their interaction, and the changes occurring in them from a geographical perspective

CLB114 Geography in the Field

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit builds upon the geography program to develop advanced understanding of social science research approaches and information capture/analysis. This provides a foundation in research and project design, relevant to a wide range of professions. You will develop skills in the preparation of project grant applications and in presenting a research plan orally.

CLB320 Studies In Language

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit addresses the following topics: the language basis in current approaches to the teaching of English; nature and function of language; the dynamics involved in interactive situations; the appropriateness of language forms used in various social contexts; the educational implications of linguistic diversity within the community; the recognition of the developmental features of adolescent language.

CLB321 Writing Workshop

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The student, as writer, uses all the language modes in social contexts (either genuine or simulated) to lead to writing in a range of situations. Engagement in these writing situations is designed to bring about personal understanding of the following: the nature of the writing process; the influence of audience and purpose on the final written product; the range of genres (or forms) falling within the writing activity.

CLB322 Literature In Secondary Teaching

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit covers the following topics: literature teaching in historical perspective; recent developments in theory; poetry in the senior school; teaching drama in the senior school; teaching the novel in the senior school; shorter works (novellas, short stories) and their use in the English curriculum.

CLB323 Teaching Adolescent Literature

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit addresses the following topics: scope and nature of young adult literature; strategies for evaluation and selection; recent research into adolescents' reading needs, interests and responses; using young adult books in the curriculum.

CLB347 Teaching English as an Additional Language

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This elective unit for students in all teaching specialisations will develop understanding of specific language and learning needs of students for whom English is a second language. It deals with differences in first and second language development, professional implications of significant policy initiatives related to second language learners, and issues in analysis, assessment and cross-cultural communication. Participants will also investigate language demands of their own area of specialisation and develop appropriate teaching techniques and resources.

CLB403 Gender And Sexuality Issues For Teachers

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-2 (EXT)

This unit addresses the following topics: gender and sexualities in cultural and school contexts; historical overview of gender relations; theoretical frameworks for gender and current debates in Australia about gender and equity; femininity and masculinity as social constructs; sexuality and the body; violence and gender; debates about boys' behaviour and performance in Australian schools.

CLB441 Children's Literature

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit provides students with the opportunity to extend their knowledge of children's literature written by both Australian and overseas writers. It examines traditional and emerging genres, develops critical approaches to texts, and considers ways of using children's literature in the classroom.

CLB442 Teaching of Writing

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit will develop your knowledge about effective writing pedagogy. You will learn about the features of written texts and have an opportunity to plan intervention strategies for improving

students' writing in the classroom.

CLB446 Grammar in the Classroom: Theories and Pedagogies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Over the past twenty years, linguistic studies have increasingly informed the development of language curriculum, the assessment of language, and the processes of language and literacy learning in schools. Over the same time the need for teachers to have systematic knowledge of language and how it works has been recognised. In much of Australia this systematic approach to describing language comes principally from the systemic functional school of linguistics. This unit provides an organised, contextualised introduction to that linguistic model through workshop sessions involving the writing and reading of a range of genre. In this unit, students will learn to critically evaluate texts, their purposes and the language resources employed by writers.

CLB452 Media Literacy And The School

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The unit aims to equip future teachers with an understanding of media literacy that they can apply to their own professional growth and incorporate into an educational environment. Aspects of media techniques and practices, relationships between culture and meaning; nature of an audience, and concepts of agents and industry will be explored.

CLN601 Cyberlearning

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit addresses the challenges, opportunities and implications for learning and teaching in dynamic, information-rich online environments. It enables students to: critically and creatively engage with contemporary concepts, technologies and practices for diverse educational, professional and information contexts, including school libraries; participate in an online learning community; collaborate in the design, development and evaluation of online learning resources.

CLN603 Designing Spaces for Learning

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit provides a foundation for understanding the complex relations among space place and learning pedagogies appropriate to the design of innovative, adaptable supportive spaces for learning in future-oriented educational contexts.

CLN608 Second Language Acquisition

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

Research into second language acquisition is providing new insights into the complex processes involved in natural and instructed language development. This unit extends participants knowledge of research into, and theories of, second language acquisition, and explores pedagogical implications and the relevance of research and theories to the enhancement of second language acquisition and learning.

CLN612 Principles Of Second Language Methodology

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This unit considers the range of approaches to second language learning and the theories of language and learning which underpin them: theories of language and learning and their implications for TESOL; the social context of learning and its impact on methodological decision-making; current approaches and methods in TESOL; the roles of teachers and learners in the TESOL classroom.

CLN613 Second Language Curriculum Design Options

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit introduces the factors that influence teachers in the development of language programs. It includes analysis of the following areas: learner profiles and needs; aims and objectives; processes and criteria for selecting methodology; content selection and sequencing; choice and evaluation of materials and resources.

CLN615 Directed Reading In Second Language Education

Other requisites	You must discuss the unit with the course coordinator. The course coordinator will grant you approval to enrol.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides an opportunity for teachers and others involved in TESOL to review current research articles to gain an overview of developments in TESOL/Applied Linguistics and to explore one or two personal interest areas in greater depth.

CLN616 Language Assessment In TESOL

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit introduces the theories and practices in program evaluation, language testing and proficiency assessment. It examines and evaluates standardised tests and instruments that are used to assess the English language proficiency of speakers for whom English is a second language.

CLN617 Personalised Language Development

Credit Points	12
Campus	Kelvin Grove

Language learning is a lifelong task. This unit allows teachers to take a program of language development aimed at improving their level of proficiency and enhancing their cultural awareness. Students wishing to take this unit should discuss options with the coordinator.

CLN618 Technology And Second Language Learning

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT)

The twentieth century saw a rapid change in the technology available to language teachers. This unit explores the creative teaching potential of this technology in areas such as computer enhanced language learning (CELL), interactive multimedia (including CD-ROM and video disc) and the use of linear video, word processing and audio materials. The unit will also explore access to and pedagogical uses of electronic communication such as email, list servers and bulletin boards.

CLN620 Language And Culture

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit explores the relationship between language and culture drawing on insights from linguistics, sociolinguistics and cultural theory. It analyses the co-constitutive nature of language and culture, and examines how this relationship can be explored in the TESOL context.

CLN621 Principles of English as a Foreign Language (EFL) Methodology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

International students preparing to become English language teachers in EFL contexts require knowledge of current approaches to and issues in English language methodology. The key principles and concepts involved in language teachers' decision-making relate to: theories of language, theories of language learning and teaching and social and cultural factors which influence both teachers and learners in language classrooms. This unit responds to the demand for more specifically EFL-oriented teacher preparation which caters to recent graduates from overseas contexts who have not yet begun their professional careers as EFL teachers.

CLN622 Professional Practice in the EFL Context

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

International students wishing to become EFL (English as a Foreign Language) teachers in their home contexts but have no prior teaching experience require a foundational orientation to both general classroom practice and EFL teaching strategies. This unit is designed to provide this primary orientation and introduction to the core principles and practices associated with teaching English in EFL contexts.

CLN640 Sociolinguistics

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is an introduction to sociolinguistics, the study of language as social process and practice. Topics covered include the following: language functions and varieties; regional and social dialects, styles and registers; pidgin and Creole languages; language as social practice; discourse; speech communities; language and power; sociolinguistics and language teaching.

CLN641 From Theory To Practice - Practical Applications In The TESOL Classroom

Credit Points	12
Campus	Kelvin Grove

This unit focuses on Communicative Language Teaching (CLT). It extends students' knowledge of the general trends in methodology learned in CLN612, by providing a theoretical basis for CLT and various opportunities to apply the theoretical framework to classroom practice.

CLN642 Grammar For Teachers

Credit Points	12
Campus	Kelvin Grove

This unit assists language teachers develop a better understanding of grammar and its place in the teaching and learning of a second language. Participants will develop their own language awareness and explore a range of strategies and techniques for the effective integration of grammar instruction into language programs.

CLN646 Learning Hubs

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

The unit provides a research based, theoretical and practical context for exploring organisational, pedagogical, technological and professional dimensions of school libraries and other information services for prospective teacher-librarians information professionals and other educators.

CLN647 Youth, Popular Culture, and Texts

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-2 (EXT)

In the diverse terrain of popular culture, youth find the resources and means for identity formation, social relations and pleasure, and develop develop a range of knowledge, skills, values and attitudes. Educators need to understand the ways popular cultural texts (literary, mass media, computer-based and digital) form the cultural capital of youth and give meaning to their lived experiences.

CLN650 Information-Learning Nexus

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-2 (EXT)

This unit supports the critical, ethical and creative engagement of teacher-librarians, educators and information professionals with a diverse array of information, concepts, technologies, social networks, resources and practices pertinent to contemporary information-learning environments. The unit develops conceptual and strategic approaches to enable independent and connected learning via libraries and other information-rich learning sites.

CLN652 Literacies For English Language Learners

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

The aim of this unit is to provide you with opportunities to build theoretical knowledge of English language literate

practices and development of multilinguals; formulate positions on controversies of English literacy education relevant in your field; and apply these understandings to professional problems of curriculum, pedagogy or assessment of interest to you.

CLN654 Functional Grammar for Reading and Writing

Credit Points	12
Campus	Internet, Kelvin Grove and External

This unit provides opportunities to investigate grammatical knowledge appropriate to a range of singular and multimodal text types and to (de)construct text according to that knowledge. Participants will explore their own multimodal text interests through advanced studies in grammar.

CLN655 Contexts and Issues in Vocational Education

Credit Points	12
Campus	Internet and External

This unit examines theoretical frameworks for understanding vocational education in international, national and local contexts. The educational and political nature of VE is explored, along with its impact on administrators, registered training organisations and other businesses. VE policies and procedures are now integral to most post-compulsory educational settings throughout the developed world.

CLN659 Children's Literature: Criticism and Practice

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

School libraries and classrooms are spaces where multi-literacies and multi-modal textualities are constant and ever-increasing presences in the daily and educational lives of students and staff. This unit provides teachers and teacher-librarians with a range of tools, strategies, and approaches for the critical analysis of children's literature, which in turn will enable them to communicate critically with students and stakeholders in classrooms and libraries

CLN660 Literacy Development and Performance

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit provides: i) a comprehensive overview of different theoretical approaches to literacy and social conditions that are shaping literacy education; and ii) an opportunity to develop an analysis of and recommendations for improving literacy instruction in a selected context. The work undertaken in this unit can be linked with other ED79 Master of Education units providing advanced studies in grammar, reading and writing difficulties, and literacy for second language learners.

CLP400 Middle Years: Multiliteracies

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

This unit provides students with the opportunity to develop concepts of themselves as life-long learners and to demonstrate capacities as effective communicators across media through engagement with critical and socio-cultural principles of language and literacy education. The unit models curriculum development principles, inclusivity and reflective practices that involve problem-based learning.

CLP401 Middle Years: Transdisciplinary Arts and SOSE

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT)

This unit aims to enhance students¿ understanding of the nature of SOSE and the ARTS as curriculum areas and to highlight the advantages of bringing these areas of learning together. It also aims to provide the opportunity to engage with the relevant syllabus and curriculum documents by translating goals and outcomes into innovative middle-years teaching units.

CLP402 Business Education Curriculum Studies 1

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT)

This is the first of three complementary units in the teaching of Business Education. The three units have been designed to help prepare you for a professional role as a teacher of lower and senior secondary school Business Education subjects (Accounting Business Management, Business Communication Technologies, Economics, Legal Studies, and ICT. In this first unit, the focus will be on curriculum development and teaching approaches in Lower Secondary Business and ICT Education.

CLP403 Business Education Curriculum Studies 2 (Business Communication and Technology)

Pre-requisites	CLP402 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (INT, EXT)

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior BCT Syllabus to understand mandatory aspects of the syllabus and will prepare students for their professional role as a teacher of secondary business education subjects, in particular, BCT

CLP404 Business Education Curriculum Studies 2 (Accounting and Business Management)

Pre-requisites	CLP402 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT, INT)

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior Accounting and Business Organisation and Management Syllabi to understand mandatory aspects of each syllabus. This unit will prepare students for their professional role as a teacher of secondary business education subjects, in particular, Accounting and Business Organisation and Management.

CLP406 Legal Studies Education Curriculum Studies

Pre-requisites	CLP402 or CLP414 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT, INT)

This unit is the second in a suite of three complementary units which can be undertaken in either the Business Education or Social Education streams. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Legal Studies Syllabus to understand mandatory aspects of the syllabus. This unit will prepare students for their professional role as a teacher of secondary Legal Studies.

CLP407 Business Education Curriculum Studies 3

Pre-requisites	CLP403, CLP404, CLP406, or MDP455 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT)

This unit, the final of three complementary units in the teaching of Business and ICT Education, will develop further your professional knowledge and skills as a learner-focused educator and skilled curriculum developer. The unit explores relevant issues, pedagogy and professional requirements essential for teachers of Business and ICT Education in the twenty-first century classroom.

CLP408 English Education Curriculum Studies 1

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

An introduction to English teaching in secondary schools, providing an indispensable foundation for subsequent English Curriculum Studies. You will develop an understanding of language learners, and of the theories of language and texts which underpin secondary English curriculum and pedagogy and which condition students¿ learning within English classrooms. You will have opportunities during your field studies to conduct inquiry-oriented language-focused observations of a range of students, evaluate their language learning needs and devise appropriate learning experiences for them.

CLP409 English Education Curriculum Studies 2

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit aims to provide you with opportunities to develop a critical understanding of the theories and principles which inform the Queensland English Syllabus for Years 1-10 and to implement this understanding by developing junior secondary curriculum units and lessons which are appropriate for the needs and interests of diverse learners in a range of sociocultural contexts.

CLP410 English Education Curriculum Studies 3

Pre-requisites	CLP409 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

In this unit, you will develop and implement your understanding of the range of disciplinary approaches (such as Literary and Cultural Studies, Film and Media Studies, and sociolinguistics) which contribute to secondary English curriculum and pedagogy. The policy context is the Queensland English Syllabus for Years 11 and 12, Senior English Communication (SAS), the Senior English Extension (Literature) Syllabus, and school to work transition programs. You will learn to evaluate and develop English work programs for students in the post-compulsory years.

CLP411 Languages Education Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Languages Education Curriculum Studies 1 aims to develop your understanding of the language learning process and your awareness of the place of languages in the school curriculum. This unit will focus on developing your understanding of language learning, the place of languages and literacies in the school curriculum and the role of the language teacher in developing linguistic and cultural awareness.

CLP412 Languages Education Curriculum Studies 2

Pre-requisites	CLP411
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit involves further discussion of the theoretical fundamentals of language curriculum development and methodology and exploration of the major issues that face language teachers in their daily pedagogical decision making. It will develop your capacity to plan learning experiences which support students¿ involvement in multi-literate practices and develop strategic language learning skills which they can use beyond the classroom.

CLP413 Languages Education Curriculum Studies 3

Pre-requisites	CLP411 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on the development of effective language programs and assessment practices for secondary students, including Senior assessment and outcomes-based assessment in a variety of contexts. This unit aims to support you in expanding your teaching repertoire so that you can provide all learners with an effective learning environment based on a critical awareness of good professional practice.

CLP414 Social Education Curriculum Studies 1

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT)

This is the first of three complementary units in Social Education curriculum aimed at preparing you to teach Social Science subjects in the lower secondary school. This unit focuses on recent developments within the curriculum area of social education, with particular reference to the field of Studies of Society and Environment (SOSE) ¿ a national Key Learning Area. It explores the theoretical context for these curriculum areas, and places emphasis on the links between theory and practice.

CLP415 Social Education Curriculum Studies 2 (Geography)

Pre-requisites	CLP414 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (INT, EXT)

This is the second of three complementary units to be taken in the Social Education stream. This unit has been designed specifically to prepare you for a professional role as a teacher of geography in the years of secondary school. It will build on the planning and teaching strategies developed in your first curriculum studies unit. In this second curriculum unit you will explore in depth theories that influence approaches to teaching in geography and ways of catering for diversity in the classroom.

CLP416 Social Education Curriculum Studies 2 (History)

Pre-requisites	CLP414 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT, INT)

This is the second of three complementary units in Social Education curriculum designed to prepare you for a professional role as a teacher of Senior Social Science subjects in the secondary school. This unit builds on the focus of your first curriculum studies unit and extends your knowledge and understanding of the nature of history and historical inquiry developed in the History Curriculum Elective.

CLP417 Social Education Curriculum Studies 2 (Senior Social Science)

Pre-requisites	CLP414 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

This is the second in a suite of three complementary units which are undertaken in the Social Education Stream. This unit has been designed to prepare you for a professional role as a teacher of secondary school Senior Social Science subjects. The aim of this unit is to provide you with opportunities to develop an understanding of teaching and learning and assessment in the social sciences within the senior secondary school.

CLP418 Social Education Curriculum Studies 3

Pre-requisites	CLP406, CLP415, CLP416, or CLP417 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT, EXT)

This is the third of three complementary units in Social Education curriculum. The aim of this unit is to provide you with opportunities to develop an understanding of the ways in which new policies and initiatives have impacted on teaching and learning in social sciences and specific discipline studies in the senior school.

CLP419 Social Education Curriculum - Senior History

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

The aim of this elective unit is to provide you with opportunities to develop an understanding of teaching and learning in history. You will investigate how learning through historical inquiry develops specific historical understandings and skills that are the foundations for historical literacy. This unit provides opportunities for you to critique how recent developments in historical education are impacting upon curriculum development and teaching approaches in Senior Ancient and/or Senior Modern History.

CLP421 Primary Lote Curriculum Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed for students who have completed or are completing relevant language studies in Chinese, French, German, Japanese, Italian or Indonesian and are intending to work as LOTE teachers in the primary sector. The aim of this unit is to develop your understanding of the second language learning process and your awareness of the place of languages in the primary school curriculum. You will also be encouraged to become reflective learners/teachers able to analyse the contexts in which you work, deal confidently with policy and curriculum issues and make soundly-based professional judgments designed to maximize learning for all students.

CLP422 Film and Media Education Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide you with principles and practices about (i) the nature of Film and Media Curriculum in specific discipline areas and across the curriculum (ii) how lower secondary students learn about Film and Media, and the curriculum documents that are used to support this (iii) how to provide quality planned experiences and supportive environments for learning.

CLP423 Film and Media Education Curriculum Studies 2

Pre-requisites	CLP422
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

New Media literacies are essential for successful participation in contemporary societies. In this unit you will be introduced to principles and practices related to (i) the nature of Film and Media Curriculum in specific discipline areas (ii) how senior secondary students learn about Film, Television and New Media, and the curriculum documents that are used to support this (iii) providing quality planned experiences and supportive environments for learning.

CLP424 Film and Media Education Curriculum Studies 3

Pre-requisites	CLP423 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide you with principles and practices related to (i) video and media production from pre to post production (ii) secondary school media production and the challenges students face (iii) strategies for successful group collaborative learning and project work.

Units

CLP425 Primary English: P-7

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aims of this unit are to provide you with opportunities to build knowledge and skills for teaching diverse groups of students to comprehend and construct text. You will use contemporary perspectives to design engaging experiences and environments that promote effective literacy practices for students in the primary years of schooling. As your personal and professional literacy skills are crucial for teaching, a further aim of the unit is for you to develop your own literacy capabilities

CLP426 Primary SOSE: P-7

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit builds on your understanding of early years and primary school learners and curriculum, and introduces you to the pedagogy that underpins social and environmental sustainability education.

CTB300 Internship

Other requisites	Subject to Unit Coordinator approval and 96 credit points of prior studies
Credit Points	12
Campus	Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

CTB302 Special Topics

Other requisites	Subject to Unit Coordinator approval and 96 credit points of prior studies.
Credit Points	12
Campus	Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit, students follow a specialised program agreed to by the academic staff member and the student. It may involve in-depth examination of an issue of importance, supervised work based experience, or the completion of a significant work related project such as a business plan or programming assignment.

DAB110 Architectural Design 1

Pre-requisites	DEB103 or DLB130 or DNB101 or DTB101. DEB103 can be studied in the same teaching period as DAB110
Equivalents	ADB001
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit offers a broad introduction to the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Analysis of the constructed environment leads to a number of design projects that engage with issues of context, tectonics, planning, form, and spatial quality. Orthogonal drawing exercises, freehand sketching, presentation graphics and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB210 Architectural Design 2

Pre-requisites	DAB110 and DAB203. DAB203 can be studied in the same teaching period as DAB210.
Equivalents	ADB002
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers a focused introduction to the field of design through engagement with the explicit process of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Architectural design as a manageable process in explored through a number of exercises and design projects. Discrete steps in the process of architectural design are made explicit through staged activities that build to a complete design project. Orthogonal drawing exercises, freehand sketching, presentation graphics, and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB220 Placemaking in Architecture

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit aims to promote students' awareness of concepts of environmental psychology such as territory, community, privacy, personal space and spatial perception from a variety of cultural perspectives. It also includes an introduction to the ways in which architecture is practiced and the concept of professionalism as it pertains to architectural practice. Further the unit explores social and cultural relationships between people and the institutions of society through the study of introductory sociology, cultural analysis and political economy. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB310 Architectural Design 3

Pre-requisites	DAB210
Equivalents	ADB003
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This intermediate level unit in architectural design uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Design problems of increased complexity are tackled through a process of abstraction, experimentation, representation, imagination, and testing. Advanced orthogonal drawing, freehand sketching, presentation graphics, documentation techniques, and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, workshops and studio based activities.

DAB325 Architecture in the 20th Century

Equivalents	ADB011
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Designers in any discipline should possess the ability to appreciate the history of art, design and architecture. In addition, they should be able to analyse developments in design history from multiple perspectives. This unit is a survey course of the history and theory of architecture from the beginning of the 20th century to the present. Teaching and learning takes place through three forms of structured activity: lectures, tutorials, and online.

Units

DAB330 Integrated Technologies 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is the first discipline-based unit in the Technology and Science design stream, through the introduction and application of the architectural principles for Environmental Design (including sustainability, lighting, and acoustics), Construction, and Structures. It introduces students to the basic technologies and sciences associated with architectural practice and in particular technical skills required for simple design projects. Thermal characteristics of building materials, bioclimatic chart analysis, climate and climatic elements as environmental factors influencing architectural design, basic climatic regions and climate responsive building design, solar heating and cooling of buildings, thermal performance analysis, environmentally sustainable building materials, colour, natural and artificial lighting, ventilation, and condensation will be forming the Environmental Design topics.

DAB410 Architectural Design 4

Pre-requisites	DAB310
Equivalents	ADB004
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers an intermediate level investigation into the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Complex design problems deal with issues of social context, ethics, values, as well as the physical constraints of site, materials, climate, and technology. Design projects require the management of conflicting constraints to achieve optimal design proposals. Precedence, typologies, research and analysis, and representation techniques all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB420 Architecture, Culture and Space

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Architecture is arguably a measure of a community's cultural mores; it reflects the attitudes, values and beliefs of its place, time and makers. This unit aims to promote awareness of how architecture is both a product and an emblem of socio-cultural conditions. In particular it explores the interdependency between how architecture is conceived and made, and the way people structure their worldview and organise their institutions in a range of cultural contexts and settings.

DAB435 Architectural Technology 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit will explore various forms of domestic construction with particular reference to general properties of building materials, common construction practices used in dwellings, single storey and class 10 buildings. Comparison of building systems and their effect on domestic building design will be explored in detail. Students will be introduced to the construction aspects of the BCA including its housing provisions and associated codes for all types of buildings to assist to achieve the requirements for building approvals.

DAB510 Architectural Design 5

Pre-requisites	DAB410
Equivalents	ADB005
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit offers a focused intermediate level investigation into the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. A particular emphasis is placed on the introduction of knowledge and skills to design a technologically enhanced architectural space with the aid of digitally mediated tools and methods while design theory, sustainability, sociology, history and critique, as they all apply to architectural design, all form part of the unit content. Design projects require synthesis of a range of abstract issues to achieve focused architectural proposals. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB525 Architecture and the City

Equivalents	ADB013
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to give a comprehensive overview of issues and techniques relevant to architectural design at an urban scale. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB530 Integrated Technologies 2

Pre-requisites	DAB330
Equivalents	ADB024
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of the structure segment of the unit is to familiarize students with the qualitative influences of structural systems on the design development of buildings. In particular the possibilities and limits of building structure are explored in relation to architectural intention through the use of exemplar. The aim of the construction segment is to familiarize students with various construction systems used in medium-rise commercial buildings. Here the emphasis is on the criteria to be used for the selection of appropriate systems and their associated materials.

DAB610 Architectural Design 6

Pre-requisites	DAB510
Equivalents	ADB006
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will develop greater complexity in architectural design skills in an urban context with a focus on ethical and sustainable design solutions and practice. This requires the synthesis of issues, ideas, knowledge and techniques of architectural design as a holistic practice.

DAB635 Architectural Technology 2

Pre-requisites	DAB435

Equivalents	ADB025
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

It is a fundamental task of architectural design to achieve the comfort requirements of the users. This unit aims to promote students' understanding and awareness of the control of indoor conditions through the effective design and integration of building services. Students will participate in a simulated office practice, producing Building Code of Australia compliant construction documentation for low-rise buildings.

DAB710 Architectural Design 7

Pre-requisites	DAB610
Equivalents	ADB007
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit offers an advanced level investigation into the field of design as applied to architecture, with particular focus on Urban Design issues that come to bear in the design of a building. On completion of this unit you should be able to; demonstrate, through your project work, your understanding of cities and an awareness of the forces shaping their development. Demonstrate that you have developed critical, analytical and speculative research skills applicable to urban situations. Adopt a reasoned position in relation to an architectural problem and to argue, speculate and design from that position. Demonstrate judgement that enables the identification of design opportunities at an urban scale that inform architectural design decisions.

DAB810 Architectural Design 8

Equivalents	ADB008
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers an advanced level investigation into the field of design as applied to architecture, with particular building type or architectural topic. The unit draws on the breadth of knowledge students have attained through the process of their architectural education. On completion of this unit you will be able to: Demonstrate your understanding of the design process. Demonstrate your development of a range of critical, analytical and speculative research skills applicable to architectural design projects. Establish a defensible position in relation to an architectural problem and to speculate, design and argue from that position. Demonstrate your development of judgement that enables the identification of opportunities that inform architectural design decisions.

DAN100 Master Studio A

Equivalents	ADB009, ADB067, ADN067
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit offers a focused high level investigation into the field of design as applied to architecture through the investigation of a complex design problem. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Design theory, sustainability, sociology, history and critique, as they all apply to architectural design, all form part of the unit content. Design projects require synthesis of a range of abstract issues to achieve focused architectural proposals. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAN110 Architectural Theory and Research 1

Equivalents	ADB051
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is intended to prepare you for future professional responsibilities involving research. It is in particular aimed at development skills that are appropriate and relevant to investigate topics in architecture and related fields.

DAN125 Contemporary Architectural Culture

Equivalents	ADN014, ADB014
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides the opportunity for the students to become aware of and to debate the innovative and advanced projects and critical thinking in the international field of architecture of the contemporary time. It provides the framework in which the student can locate individual research and design activities. It prepares the student to make informed and creative decisions in professional life. Teaching and learning takes place through three forms of structured activity: lectures, tutorials, and online.

DAN135 Advanced Topics in Architectural Technlogy 1

Equivalents	ADB026
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit aims to promote student understanding of advanced techniques for the design of environmentally friendly, sustainable, and healthy high-rise buildings. It will foster an understanding of the design and advanced techniques for natural day lighting of deep interiors and to promote detailed understanding of advanced construction techniques for high-rise and special structures. In all these areas the unit aims to promote understanding of the way in which these advanced technologies influence the design and procurement of buildings together with an integrated overview of high-rise building services, promoting awareness of the coordination role of specialist building consultants, and the legal requirements of building services.

DAN200 Master Studio B

Pre-requisites	DAN100
Equivalents	ADN053, ADB053
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers a focused high level investigation into the field of design as applied to architecture through the investigation of a complex design problem as a final project to demonstrate high level design proficiency. It uses developmental exercises to enhance and extend student perceptions of the built environment in a problem-based learning environment. Design projects require synthesis of a range of abstract issues to achieve focused architectural proposals, explored and developed to a professional standard.

DAN220 Architectural Theory and Research 2

Pre-requisites	DAN110
Equivalents	ADN052
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit allows you to research a specialist architectural topic of your choosing; based on the research proposal of the pre-requisite unit (DAN110). The unit requires professional standards of practice for the research and analysis of data, and tutorial guidance will be tailored to your own project. Research and analysis work will be presented in the real world scenario at the end-semester conference.

DAN230 Advanced Studio in Integrated Technologies

Pre-requisites	DAN135
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers a high level investigation into the field of design as applied to architecture, with particular emphasis on the integration of technological solutions in architecture, as a form of 'output' from the design process. It engages with the application of innovative building construction and environmental control systems and their development through detailed design and contract documentation processes.

DAN245 Professional Practice

Equivalents	ADN033, ADB033
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit investigates the business and practice of architecture. It provides a detailed understanding of the organisation, structure and management of an architectural office, defining and examining the range of activities and professional services undertaken within the office from contractual engagement to the completion of an architectural project. The unit reviews the laws and statutory regulations that control the practice of architecture.

DEB100 Design and Sustainability

Anti-requisites	ENB100
Equivalents	BEB100 and UDB100
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit, with its special focus on the role and impact of designers to shift society toward a more environmentally sustainable way of living, introduces you to essential academic and professional skills and practices for learning to become a designer.

DEB101 Introducing Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Please note: this unit is only available to First Year DE40 students. This unit offers a uniquely broad introduction to the field of design as applied across the design disciplines. It uses exercises to enhance student perceptions of the natural and human made environments in a problem based learning context. The unit is block taught over several weeks during the semester and will include students from a range of design disciplines participating in a four day field trip (students unable to attend participate in an alternative program). Students work individually and in cross-disciplinary teams in a stimulating and immersive environment. This unit covers content of problem solving, team work, visualisation and communication, and environmental awareness.

DEB103 Visualisation 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Designers work in three dimensions and thus employ a variety of tools to think about and communicate three-dimensional ideas. This unit introduces you to the skills and techniques you'll need to support this design visualisation with a focus on analogue media, drawing skills and simple model making. Some of them are common to all the disciplines in the course while others are specific to one or more disciplines of architecture, industrial design, interior design and landscape architecture.

DEB202 Introducing Design History

Equivalents	ADB931, DEB102
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit encompasses a broad survey of the history of design from the civilizations of antiquity to the opening of the 20th century – including architecture, industrial design, interior design and landscape architecture. It is a first year foundation unit and serves as preparation for more detailed and specialized studies in history and theory in subsequent years. Key designs, ideas and artefacts and the aesthetic, environmental, technological, socio-cultural and political factors that related to their production will be analysed.

DEB203 Visualisation 2

Pre-requisites	DEB103
Equivalents	DEB201
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

DEB103 Visualisation 1 introduced you to the skills and techniques needed to support design visualisation with a focus on analogue media and drawing skills. This unit continues that process and integrates digital and analogue approaches. Content will be divided between common and discipline specific techniques and traditions.

DEB601 Collaborative Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The experience of cross-disciplinary design collaboration is considered a significant aspect of the preparation of design students for future professional practice. This unit provides such an experience through a collaborative design studio. Collaboration will be addresses and fostered by students working on a design studio project that facilitates cross-disciplinary collaboration and introduces them to various forms of collaboration. Through the projects student will be exposed to the discourse of design disciplines other than their own while at the same time being able to build on discipline specific skills, knowledge and attitudes.

DEB701 Design and Research

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is a core unit common to architectural studies, landscape

architecture, industrial design and interior design. The unit is project based and introduces students to research methods and methodologies that have relevance in design practice. It also provides a foundation for higher degree research. The content covered in this unit includes: • philosophical context of research in, of and through design • qualitative research incorporating methodologies and methods of relevance to design • research rigour and ethics • developing a research plan • literature searching and review • data gathering and analysis • research dissemination and reporting

DEB801 Professional Practice

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces and consolidates key issues in discourses about the design professions: the differences between discipline and professional knowledge, the organisation and roles of the regulatory and professional bodies that govern the professions, the cultural context for contemporary design practice, and the values and attitudes which govern professional practice. Teaching and learning takes place through a variety of structured activities: lectures, tutorials, seminars, workshops and online.

DEN510 Urban Design Studio A

Equivalents	PSP452
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit lays a theoretical foundation for postgraduate coursework and practice in urban design and other professions involved in producing the built environment. It provides a critical view of the theory and practice for urban design as a basis for the development of specialist knowledge in this field, both within this unit and other units within this urban design program.

DEN511 Theory Research Project A

Equivalents	PSN211
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Students will research urban design theory, drawing on literature and case studies from around the world to develop their knowledge in this area and contribute to the School of Design's research data base. This unit links to learnings developed in DEN510.

DEN520 Urban Design Studio B

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit comprises an urban design studio focussed on exploring issues relating to our greater region, i.e. South East Asia and the Pacific Rim. The studio, allows for the synthesis of knowledge and skills from other units in the course. It offers a problem-based learning experience that engages with advanced urban design issues. The unit focuses on the design management of the transformation and incremental development of existing urban/suburban/town/fringe areas. This area of urban design activity has to mediate between existing development patterns, ownership patterns, development trends, diverse community aspirations, and professional and institutional practices.

DEN521 Theory Research Project B

Equivalents	DBP501
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Through this unit you will develop your research knowledge and capabilities in the context of Urban design.. Knowledge from this unit will be developed in parallel with DEN520 and demonstrated through application within the design studio.

DLB130 Landscape Design 1

Pre-requisites	DEB103 or DAB110 or DNB101 or DTB101. DEB103 can be studied in the same teaching period as DLB130
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is the first landscape design studio. It will begin your skill building in design processes and theory on which subsequent studios will build. It will focus on applying the representational techniques covered in the allied unit DEB103 Visualisation 1.

DLB210 Landscape Design 2

Pre-requisites	DLB130 and DLB203
Equivalents	PSB421
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This design studio introduces landscape design within the context of the urban environment. Basic design concepts such as space, effects and qualities are explored. It also introduces the use of plants as a design material. There is a concentration on communication and graphic skills in the development of a personal design process. These preliminary explorations provide a foundation for later design studios.

DLB230 Landscape Horticulture

Equivalents	PSB442
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the fundamentals of plant science, ecology and horticulture, especially within a local southeast Queensland context. This theoretical knowledge will be applied to a simple planting design project.

DLB310 Landscape Design 3

Pre-requisites	DLB210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces you to the theory behind spatial design and place-making. It also introduces design research and inquiry methods. In particular, it encourages you to examine the ways that people use, perceive and value places and environments. The unit teaches you to explore design research methodologies, and apply design skills to place-making.

DLB330 Landscape Ecology

Equivalents	PSP263
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

An understanding of physical geography, geomorphology and the theoretical concepts of landscape ecology as a spatial analysis and design tool underpin

this unit. It concentrates on understanding spatial and functional heterogeneity in all landscapes from the 'natural' to the 'developed' by recognising that they share a similar structural and functional model. The unit comprises three content strands: (a) Landscape Structures; (b) Landscape Systems and Processes; and (c) Landscape Development. These theoretical concepts studied in each of these strands are applied in the analysis and redesign of a dynamic real world landscape.

DLB410 Landscape Design 4

Pre-requisites	DLB310
Equivalents	PSB441
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In this unit, students will investigate an urban landscape in order to explore, understand and apply the principles and processes of site planning. These include: the development of a project brief, the understanding and articulation of site user needs, the undertaking of a site appraisal, the development and analysis of design concept options, and the final development of a site plan.

DLB430 Landscape Construction 1

Equivalents	PSB434
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This studio is complementary to DLB410 Landscape Design 4. The core of landscape architecture is the design of controlled change to landscapes. Design implementation requires the re-construction of the existing landscape into new forms. Landscape Construction 1 continues the landscape design process at a finer scale of detail and precision to resolve site regrading, management of surface water and preparing sites for planting new landscapes. It is inextricably linked to the processes of maintenance and management and is therefore one of the core skills landscape architects apply in order to meet sustainability objectives. This unit will develop technical graphic skills associated with manual and digital design communication.

DLB510 Landscape Design 5

Pre-requisites	DLB410
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This design unit builds on Landscape Design 4 and extends the theoretical and applied understanding of site analysis, planning and design processes. It develops skills in the artful, orderly, efficient, aesthetic, and ecologically sensitive arrangement of constructed objects and spaces on a site and their integration with the site's features, systems, spirit of place and satisfying the needs and values of its intended users. Emphasis will be on the development of site specific design outcomes. Application of appropriate graphic communication in all forms will be integrated into the program. The unit will be block taught in the first part of the semester.

DLB525 History and Criticism of Landscape Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit examines landscape design throughout the ages, providing an historical context for exploring contemporary design approaches. The origins of the landscape architectural profession are also investigated. .Incorporated into this landscape design focus will be an examination of past and contemporary design criticism and the role that landscape architects play in this regard.

DLB530 Landscape Construction 2

Pre-requisites	DLB430
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This studio will build on the work of DLB510 Landscape Design 5. The unit introduces the properties and use of materials encountered in landscape construction and the processes of resolving and communicating design decisions as construction documentation. It includes principles of applied science and mechanics relating to the stability of site elements; graphic (manual and digital) skills required to explore construction problems and communicate required outcomes. It will require students to undertake effective research and evaluation of technical data and techniques available to the construction industry in seeking valid solutions to construction problems. The unit will be block taught in the second half of the semester.

DLB630 Landscape Construction 3

Pre-requisites	DLB530
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will build on the work of previous design resolution units to take the student into the realm of construction of larger scale landscape elements. Topics include: the principles and practice of water sensitive urban design; design and construction of golf courses, swimming pools; and artificial lakes and earth dams; scope of contract documents; defining extent of works; set-out of works – horizontal and vertical; site clearing, demolition and environmental protection and noise control. The unit will also advance the principles and practice of contract documentation including writing contract and construction specifications.

DLB645 Landscape Practice and Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit develops understanding of government and non-government institutions that affect land and building development together with a more detailed understanding of specific legal and quasi-legal frameworks having influence on professional practice. Topics include: property with special reference to land ownership; land development applications under the Integrated Planning Act, tort, duty of care and the basis for professional liability; introduction to intellectual property; construction statutes, regulations, codes including the Building Code of Australia, standards and protocols, consultancy and construction contracts, and practice guides and law relating to practice.

DLB710 Landscape Design 6

Pre-requisites	DLB510
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT)

This design unit explores contemporary theories and practices of landscape design and their application through problem-based learning in a real world community project. Concepts and theories including landscape urbanism, landscape strategy, and new theories and practices associated with water landscapes will be investigated and applied through the lens of resilience theory. Skills in strategic planning and detailed design at a large and complex scale will be developed and applied in a selected real world landscape from the urban, peri-urban and rural landscape spectrum.

DLB730 Landscape Design 7

Pre-requisites	DLB510
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This design unit explores contemporary theories and practices of landscape architecture through the conceptual development of a speculative project for real world application. Students will undertake a national and international literature and exemplary project review, together with site research, to establish a project brief and conceptual design for a medium to large-scale strategic landscape design project. Theoretical positions and presentation methods developed in DLB730 will be informed by investigations into the conditions of climate change and water formed landscapes.

DLB810 Landscape Planning and Policy

Pre-requisites	DLB330 and DLB645
Equivalents	PSP273
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Many landscape architects work in broad scale landscapes nationally and internationally. Catchments are recognised as a critical scale for regional environmental planning and this unit addresses a selected catchment as a case study to investigate the complex systems that comprise the social, economic and biophysical fabric of the landscape. Regional issues are challenged by interpreting, visualising and communicating their multi-dimensional character and complexity of overlapping jurisdictions and conflicting management responsibilities. The unit integrates higher level applications, including GIS and the like, to critical, creative and analytical thinking, problem identification and solving in environmental planning.

DLB830 Landscape Design 8

Pre-requisites	DLB730
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is the final design studio in the landscape architecture course and develops urban design skills and knowledge on a project in the con-urbation of South-East Queensland, through a staged process leading to an advanced landscape design outcome. The final design presentation will be to a jury invited from academic staff and practice and a public exhibition of the collected work.

DNB101 Industrial Design 1

Pre-requisites	DNB103 can be studied in the same teaching period as DNB101
Equivalents	ADB201
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Industrial design revolves around the creation of products that satisfy human needs within the constraints of industrial and commercial production. This involves the manipulation of form with an understanding of structure, function, and beauty. Through projects students will be exposed to: basic design elements and principles; introduction to product visualisation techniques including concept sketching and marker rendering; design process and concept development; basic model making techniques; design presentation.

DNB201 Industrial Design 2

Pre-requisites	DNB101 and DNB203. DNB203 can be studied in the same teaching period as DNB201.
Equivalents	ADB202
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit continues with the development of visual and creative thinking within the context of industrial design with special emphasis on the development of product form. Through projects students will be exposed to: aesthetic aspects of products; design process and concept development; product visualisation techniques including concept sketching and marker rendering; model making and basic photographic documentation skills; design presentation.

DNB202 Product Usability

Pre-requisites	DNB101
Equivalents	ADB212
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The professional designer designs principally for others and not primarily by personal preference. Therefore an understanding of the breadth of physical and cognitive needs and capabilities of people is vital to the development of useable products. This unit provides the basis for a user-centred design philosophy built upon an understanding of people and their capabilities and knowledge and experience to integrate advanced human factors and usability concepts into the industrial design process. The content covered in this unit includes: anthropometrics; principles of physical and cognitive ergonomic requirements of special needs groups; human error; usability principles; usability evaluation methods and user testing techniques.

DNB301 Industrial Design 3

Pre-requisites	DNB101
Equivalents	ADB203
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit offers creative opportunities to design and develop new and innovative products in the field of industrial design. It uses design research and methodologies to inspire innovative and sustainable practices both in the built and natural environments. Thorough user and context research, design development, brief development and existing market research lead to design projects that engage with issues of context, biomimicry, technology and design principle transfers from nature. Learning and teaching activities are spread across lectures, tutorials, workshops and studio based practices.

DNB302 Computer Aided Industrial Design

Equivalents	ADB245
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Once an Industrial Designer has completed the conceptual design stage of a project the details required for manufacture need to be resolved and prototypes made. It is at this stage that Computer Aided Design (CAD) is used. 3D CAD allows the details of the design to be resolved. Rapid prototypes can be made directly from the CAD data for design testing and verification. Modifications to the CAD data can be made quickly. Once the design is satisfactory, the 3D CAD models can then be used to generate photo-realistic images and engineering drawings so that the new product can be manufactured.

DNB303 Manufacturing Technology

Equivalents	ADB233
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Manufacturing technology is integral to industrial design and is a basic knowledge requirement to build upon throughout the course. Design for manufacturing allows both the analysis and application of manufacturing principles to product design and development. The knowledge gained in this unit allows the designer to develop a sound awareness of the relationship between design and manufacturing. The content covered in this unit includes: electronics; plastics; production techniques in relation to different materials; forming; finishing operations; production costs; technical documentation and communication.

DNB401 Industrial Design 4

Pre-requisites	DNB201
Equivalents	ADB204
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Industrial design advances design knowledge gained in DNB201 Industrial design 2.The unit introduces how various design processes interact, in complex problems such as sustainable transportation systems. Through collaborative projects students will be exposed to: design research; design innovation; communication skills; integration of design processes, manufacturing technologies and application transfer of design principle mechanisms to solve real world problems.

DNB402 Socio-cultural Studies

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

An understanding of people and their cognitive and emotive relationship with the world is essential for designing responsive products and environments. This unit encourages a diversity of knowledge to gain a broader perspective of culture, understand how issues of culture influence product design and the designer's interaction with society and diverse cultures. The content covered includes: theoretical perspectives of culture, psychological implications of everyday human-artefact interactivity, environmental and cultural perception, changing socio-cultural landscapes, ageing population, sustainability and globalisation, potential for design to advance social changes and quality of life, and psychological implications and attitudes imbedded in product semantics and symbolics.

DNB501 Industrial Design 5

Pre-requisites	DNB301
Equivalents	ADB205
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Experience design (or design for experience) is a design approach that aims to create appropriate experiences before, during and after product interaction. This unit introduces methods for enhancing the user experience. Through projects students will be exposed to: • design process and creative thinking • user-product interaction • user research and context study • design narratives • design ethics and culture

DNB502 Industrial Design History, Theory and Criticism

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with the opportunity to become aware of theoretical and historical discourse in industrial design and to debate innovative and advanced ideas and critical thinking in the field internationally. It provides a framework in which students can locate their individual design activities. The content covered in this unit includes: • contemporary history of industrial design • relationship between social and technological change and industrial design • contemporary design theory and discourse • criticism methodology • writing about design • learning to critique design

DNB601 Industrial Design 6

Pre-requisites	DNB401
Equivalents	ADB206
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Design for experience focuses design intent not on products as an end in themselves but in the experiences of the people who use them. Going beyond this involves focusing on the emotional aspects of experience. Through projects students will be exposed to: • design process and creative thinking • interaction design • socio-cultural trend analysis • design narratives • creativity and product innovation • interdisciplinary teamwork • design ethics and culture

DNB602 New Product Development

Equivalents	ADB235
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit will focus on the introduction of new products into the market. It will provide the students with an overview of the relationship between product design and commercialisation. It will provide an overview of strategy development where the aim is to meet consumer expectations, whilst achieving corporate objectives. The major topics covered in this unit include: • new product development process • idea generation • strategic planning • introduction to marketing • product screening and evaluation • commercialisation and post launch review

DNB701 Industrial Design 7

Pre-	DNB501

requisites	
Equivalents	ADB207, ADP207
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces an advanced product and system design as relevant to industrial design. It provides students knowledge about the various contexts that impact on products – from usability to business to manufacturing. Thought the projects the students will be exposed to • advanced design process and creative thinking • knowledge integration within various contexts • understanding industrial designer's role within collaborative projects.

DNB702 Human-centred Design Innovation

Pre-requisites	DNB601
Equivalents	ADP267
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Human-centred innovation incorporates studies of the dynamic relationships between people, products/artifacts and systems, and their contextual environment. The unit will introduce the ways research about people can contribute to product innovation, an essential aspect of industrial design. It will introduce how to integrate the applied research skills and knowledge that support the development of an innovative product or system. It also provides you with the foundation for higher research degrees. The major topics covered in this unit include: • human-centred innovation framework • application of qualitative research methods to industrial design • situating product/systems within the social framework • communication of research outcome.

DNB801 Research and Innovation 1

Pre-requisites	DNB701 and DNB702
Equivalents	ADP268
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Applied research is key component of industrial design: this unit will show you how to apply research outcomes to the design of products and systems and how to lead large projects. It also serves as the foundation for higher research degrees. Your research will be centred on a project you select and you will be responsible for its leadership, in close collaboration with industrial design academic advisers who will guide your progress. The unit is built upon the units Human-centred Design Innovation and Design Research and is corequisite to Research and Innovation 2.

DNB802 Research and Innovation 2

Pre-requisites	DNB701 and DNB702
Equivalents	ADP269
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP5 (INT)

The aim of this unit is to assist students to integrate the knowledge gained in previous semesters and to learn how to generate relevant, new knowledge to be applied during the developmental phases of a design project. Through the individual project the students will be exposed to how to: • apply in depth research outcome to product design • apply usability testing in the relevant stages of design process • develop design in collaboration with other relevant professions • manage large projects • communicate at a professional level visually, orally and in writing This unit is corequisite to Research and Innovation 1 and serves as the foundation for higher research degrees.

DTB101 Interior Design 1

Pre-requisites	DTB103 can be studied in the same teaching period as DTB101
Equivalents	ADB101
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides foundational material for the study of interior design. Students will be introduced to design theory, methodology and aesthetics. Design will be explored as an interpretive process. Topics covered in the context of projects for the unit include: The studio as a way of learning; Introductory design exercises exploring two and three dimensional elements as they relate to the interior design context; Freehand sketching, principles of perspective; Mechanical drawing, principles of scaled drawing; Presentation and visual communication skills; Environmental issues and sustainability.

DTB201 Interior Design 2

Pre-requisites	DTB101 and DTB203. DTB203 can be studied in the same teaching period as DTB201.
Equivalents	ADB102
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the student to design in three dimensional spaces of relevance to the practice of interior design and with a particular emphasis on the socio-cultural relations between people and the environment. The unit aims to foster an understanding of design not only as a language of exploration and communication but also as an activity addressing person-environment interaction in a certain way. Topics covered in the context of projects for the unit include: Introduction to characteristics of design problems; Methods to generate and test design proposals; Creativity and innovation relative to contextuality; Presentation methods, techniques and materials used to generate and communicate design ideas; Relevant design history.

DTB202 Design Technology

Equivalents	ADB122
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In this unit students will acquire an understanding of the interconnection between technological changes, inventiveness, social context and interior design. Topics covered in this unit include: Interior design in relation to structural systems, materials, technologies and relevant legislation with specific emphasis on domestic building construction; Skills associated with observation, research, and communication; Ergonomic principles, site measure, tracking examples of construction, identification of types of structures; Measurement and recording of building environments and documentation incorporating 2D CAD.

DTB301 Interior Design 3

Pre-requisites	DTB201
Equivalents	ADB103
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to facilitate students

to develop an applied understanding of transition, interiority and building character in relation to interior design. This will be achieved through the integration of technological, psychosocial and experiential knowledge and theory with applied design approaches. Student learning will be facilitated in an holistic approach to the design issues. Topics covered in the context of projects for the unit include: Design methodology, skills, strategies, alternative processes; Documentation ranging from the conceptual to design development; Finishes, fittings and furnishings; Relevant design history; Relevant technological, psycho-social and experiential theory; Environmental issues and sustainability.

DTB302 Colour Studies

Equivalents	ADB152
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes studies of the interdependence of light and colour, the physical properties of colour, the psychological and cultural dimensions of colour, and colour and its relationship with expression and aesthetics as it applies to the interior design context. Topics covered in this unit include: Colour properties, harmony and contrast; Mixing and application of colour; Qualitative effects of colour and light on interior form and space; Symbolic, physiological and psychological aspects of colour within historical and contemporary contexts.

DTB303 Technical Design

Pre-requisites	DTB202
Equivalents	ADB123
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

In this unit students will acquire an understanding of the wide variety of commercial building interior systems related to the interior design industry. Topics covered in this unit include: Materials and tectonics, drafting conventions, technical site analysis and recording methods, introduction to ergonomics, codes and standards, introduction to commercial joinery and documentation techniques, and graphics and presentation approaches for communication. In addition 2D CAD skills will be introduced within this unit.

DTB401 Interior Design 4

Pre-requisites	DTB301
Equivalents	ADB104
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to facilitate students to develop a deep understanding of dual function relationships in interior design in relation to person-environment interactions. This will be achieved through the integration of technological, psycho-social and experiential knowledge and theory specific to those contexts. Learning will be facilitated in order that a holistic approach is implemented. Students will be encouraged to define tasks, research possibilities, integrate theory and explore resolutions in a self-directed manner. Topics covered in the context of projects for the unit include: Design methodology skills; strategies; alternative processes; Documentation ranging from the conceptual to design development; Schedules and specification; Finishes, fittings and furnishings; Relevant design history; Relevant technological, psycho-social and experiential theory; Environmental issues and sustainability.

DTB402 Interior Systems

Pre-requisites	DTB303
Equivalents	ADB153
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to promote the understanding and awareness of the use and application of materials relevant to the interior design industry. Topics covered in this unit include: Textile manufacture and application; Interior decorative finishes, properties and techniques; Building codes and standards and specification relevant to material quality, performance and maintenance; Documentation and specification of finishes and fittings; The relationship between design technology and material selection; The role of contextual frameworks on designers' decisions in regard to materials.

DTB403 Human Environment

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit addresses political and social theories related to interior design and development within the built environment. Students are introduced to contemporary theories of post-industrialism, post-colonialism and multiculturalism. Topics covered in this unit include: Requirements of special needs groups; Psychosocial issues and privacy, perception, personal space, territoriality and way finding; The roles and responsibilities of design professionals, historically and in contemporary society; Cultural diversity.

DTB501 Interior Design 5

Pre-requisites	DTB401
Equivalents	ADB105
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is structured to assist students understand varied approaches to design by choosing from a range of research-led themes that address more complex physical technical and cultural contexts. This approach ensures that an open, active and critical debate is sustained by the discipline on what constitutes interior design as an exploratory subject and creative endeavour, capable of revealing new intellectual and formal concepts. The content allows for new forms of knowledge and expertise to emerge through student projects.

DTB502 Environments in Transition

Equivalents	ADP156
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

In this unit, the 19th century era will be used as a frame-of-reference for deconstructing both space and design artefact to understand the social and cross-cultural influences upon design production. Various theoretical perspectives and case studies will be used to explore this historical reference and further explore parallels with contemporary design practice. In addition, it will introduce how the cross-cultural migration of ideas and design approaches can be creatively translated and transformed to inform innovative design outcomes particular to the contemporary context.

DTB503 Furniture Studies

Equivalents	ADB154
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on furniture as an integral element of an interior environment and of personal and cultural identity. These aspects will be contextualised in an appropriate furniture design project. Topics covered in this unit include: • A focus on interaction factors such as visual cues and psychological responses • An historical analysis of the role of furniture in interior design • Historic, contemporary and future trends • Furniture design and documentation

DTB601 Interior Design 6

Pre-requisites	DTB501
Equivalents	ADB106
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to facilitate students to develop a deep understanding of specialised interior design in relation to person-environment interactions. This unit specifically addresses issues relevant to the interior designer in practice. Students are provided with an opportunity to apply their developing skills and knowledge in an informed and critical manner. Topics covered in the context of projects for the unit include: • Consideration away from main stream interior design application eg interior design for transportation systems • Development of the characteristics to tackle ambiguous, ill-defined, 'real-life' simulated interior design problems • Relevant design history • Environmental issues and sustainability • Relevant technological, psycho-social and experiential theory

DTB602 Design in Society

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit adopts a social science viewpoint in addressing social and cultural aspects of significance to interior designers. Some of theses aspects include action and interaction, socialisation, ethnicity and race, control, and socio-cultural and indigenous issues of relevance to interior designers. Other topics covered in this unit include: • Australia and the contemporary world • Bureaucracy and organisations • Mass media • Technology • Globalisation and regionalism

DTB701 Interior Design 7

Pre-requisites	DTB601
Equivalents	ADP107
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with the opportunity to pursue a topic of professional relevance. The project at this stage in the course will be highly complex requiring attention to a diverse/conflicting range of macro and micro issues at an advanced, in-depth and sophisticated level. Topics covered in this unit will be project directed.

DTB801 Interior Design 8

Pre-requisites	DTB701
Equivalents	ADP108
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Everyday practice provides a context for research and opportunities to contribute in an explicit way to further practice and research. Learning in this unit is facilitated by a semester-long project that involves the application of a research-through-practice methodology. The core content of this unit will be the substantive and procedural aspects of a project developed by the student in response to their interests, continuing education and professional requirements.

EAB001 Early Childhood Foundations 1: Historical and Comparative Perspectives of EC Education

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit examines the historical development of early childhood services in Australia, and explores a range of comparative perspectives on the care and education of young children in different socio-cultural contexts in Australia and in other cultures. To come to understand early childhood education, it is important to consider the evolution of key ideas that have influenced the development of the field over the past 150 years in western societies (Britain, Europe, the United States and Australia). The unit encourages students to reflect critically on the changing beliefs and practices in relation to young children and families in Australia over the twentieth century and to begin to formulate a personal philosophy of early childhood care and education.

EAB002 Early Childhood Foundations 2: Families and Childhoods in EC Education and Care

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

Early childhood education and care interface with the lives of children and families in diverse contexts. This unit deals with the social constructions of families and childhoods, the social practices they adopt and the services in which they participate. An understanding of these conditions is necessary for early childhood educators to teach and lead effectively.

EAB003 Development and Learning in Early Childhood

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit examines the major theories, features and processes of early development. The pace and direction of development are shaped by biological predispositions and personal attributes, as well as by the interactions and experiences afforded to the child. Knowledge of contexts, their impact on individual development, and an awareness of the interrelationships between each area of development is necessary in order to develop an understanding of how children think and learn. Early childhood teachers also require a range of skills for observing and analysing behaviour in order to plan and organise appropriate educational opportunities in early childhood settings.

EAB004 Development and Learning in Early Childhood 2

Pre-requisites	EAB003
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

To facilitate learning during early childhood, teachers must have a sound knowledge of the major theories, features and processes of development. The units in the developmental strand are underpinned by sociocultural theory, which takes into account both the psychological and the social mechanisms of development and learning. Development and Learning in Early Childhood will foreground the social mechanisms of learning by discussing children's learning and development in a social context, integrating the social, emotional and cognitive elements of learning. Knowledge of contexts and their impact on individual development is necessary in order to develop an understanding of how children think and learn.

EAB005 Inclusion in Early Childhood Settings

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT)

This unit aims to promote an understanding and valuing of inclusive educational programs and practices for working with young children with special needs in diverse early childhood settings. Students are expected to develop knowledge of behavioural and developmental characteristics presented by young children with specific needs, as well as understand principles and practices related to assessment, planning and implementation of educational programs for these children.

EAB006 Leadership and Management in Early Childhood Services

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT)

Early childhood settings, including primary schools, operate by using site-based management practices that rely heavily on participation by teachers, staff from all levels of the organisation, and parents. Early childhood teachers need excellent leadership and management strategies to participate effectively in group decision-making for the development of high quality programs and services. They also need an understanding of how management structures impact on programs and service provision. This understanding, together with a high level of personal power, helps individual teachers influence and lead decisions about what happens in early childhood settings.

EAB008 Early Childhood Language, Literacies and Communication I

Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT, EXT)

This is an introductory unit in which students examine literacies from contemporary perspectives. The focus is on young children learning literacies in family and community contexts in the years prior to formal schooling. Students are encouraged to appreciate each child's journey as they encounter a range of multimodal practices that constitute literacies.

EAB009 Early Childhood Language, Literacies and Communication 2

Pre-requisites	EAB008
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT)

In this unit a literacy as social practice approach is examined critically. Students explore matters related to instructional experiences, literacy resources and materials, diversity, and partnerships with children's families. Although print will be the focus in reading and writing instruction, image/graphic text will be a significant consideration, so that literacy practices reflect new and changing ways of operating with texts. Teachers use pedagogies and assessment that provide opportunities for success for all students, particularly those individuals and groups who may perform at lower levels of proficiency.

EAB010 Early Childhood Language, Literacies and Communication 3

Pre-requisites	EAB009
Equivalents	EAB535
Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT, INT)

This unit focuses on enabling students to build competencies in planning classroom discourses and learning programs that will enable young children to establish confident use of a repertoire of language, literacy and communications understandings and practices as a basis for ongoing learning and cultural participation.

EAB011 Early Childhood Curriculum: Arts 1

Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT, EXT)

We are surrounded by visual images, in many cases much more powerful than any other form of communication. It is important that we are aware of how these images are working on us, and for that, we need to be visually literate. Childhood cultures are made up of interwoven narratives and commodities. The arts enable young children to give form to thought, to develop multiliteracies for exploring and expressing ideas and feelings through representation. This unit examines the characteristic features of the early childhood arts curriculum, its philosophical and theoretical underpinnings, beliefs about the nature of the learner, the child/teacher relationship, and the educational process.

EAB012 Early Childhood Curriculum: Arts 2

Pre-requisites	EAB011
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Relevant theories, principles and philosophies are presented and analysed as a basis for developing appropriate teaching strategies for a quality arts program in the early years. Desired outcomes will be achieved through descriptive, interpretive, analytic and expressive processes and shared knowledge between students and staff.

EAB013 Early Childhood Society Environment and Health Education

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT)

This unit promotes a broad view of science. However, that includes the social

sciences, health and environmental perspectives. Appropriate curriculum approaches that support a broader, more integrated view of science is a key goal. Through this unit, students should achieve the following: develop a deepening of their own understandings of concepts pertinent to science, studies of society and environment, and health; learn to critique and broaden their views of science; understand a range of appropriate inquiry-based approaches relevant to these areas; learn to apply these approaches to facilitate young children's learning in the sciences.

EAB015 Early Childhood Science and Technology Education

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (INT)

It is essential that children are provided with opportunities to develop their abilities and interests by using a variety of learning modes and that children have opportunities to develop concepts that are foundational to understanding in mathematics, and which form the basis of learning in all curriculum areas. Students require understanding of how children apply active inquiry processes to tasks designed to further concept development in mathematics. This unit will engage them in learning about foundational concepts in mathematics and exploring ways in which teachers can develop appropriate learning opportunities to encourage and foster their development.

EAB016 Research in Early Childhood Education

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to foster critical understanding of research with young children. The unit will provide opportunities for students to become lifelong learners and effective communicators.

EAB017 The Early Childhood Professional

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 6TP4 (EXT, INT); 2012 SEM-1 (EXT)

This unit involves students in drawing together and analysing information from a variety of disciplines and historical perspectives with a view to developing an understanding and knowledge that will provide them with a basis for creating and evaluating an integrated curriculum in early childhood settings.

EAB021 Early Childhood Health, Safety, Nutrition and Wellness Education

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

There is concern in the community about the general health of young children. Therefore it is important for students to understand current health policies and practices for various early childhood education settings. This includes the daily food needs of young children and how to provide appropriate everyday food education and social food experiences. The unit provides students with the knowledge to lead, plan, implement, and evaluate health practices in services and to balance the nutritional needs of individual children. Personal health and health practices including preventative strategies are addressed.

EAB022 Early Childhood Science Education

Credit Points	12
Campus	Kelvin Grove

This unit examines the importance of developing children's creativity, curiosity, problems solving skills and sense of wonder and appreciation of the environment, in the exploration of science. The unit focuses on the different approaches to teaching science and the development of positive attitudes for life long learning while taking into account children's cultural and diverse backgrounds.

EAB023 Mathematical Explorations in Early Childhood

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Mathematics is considered to be an essential learning area in the early childhood curriculum, as preparation for life, work and critical participation in society. Mathematics can also provide personal enjoyment.

EAB026 Early Childhood Community Arts Project

Pre-requisites	EAB012
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit has a focus on pedagogies, planning and assessment within the curriculum organisers of the New Basics, the Preschool Curriculum Guidelines and the key learning areas. It aims to increase knowledge and understanding of how curriculum organisers and outcomes can be used to plan intellectually challenging curricula for young children.

EAB027 Early Childhood Mathematics Education 1: Birth to Six Years

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit aims to develop concepts that are foundational to understandings in early childhood mathematics, and to generally enhance students'understandings, attitudes, values and skills in relation to early childhood mathematics, supported by concrete materials and computer environments. This unit will also investigate teaching methods and key sequences for developing concepts and skills for number, space, measurement, chance and data, and patterns and algebra.

EAB028 Early Childhood Mathematics Education 2: Four to 8 Years

Pre-requisites	EAB027
Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 6TP4 (INT); 2012 SEM-2 (EXT, INT)

Children's successful participation in mathematical contexts is mediated by the effectiveness of a teacher's pedagogical practice, understandings of how learners learn, and knowledge and understanding of mathematics. This unit aims to develop an understanding of the pedagogical practices which inform the teaching and learning of mathematics in early childhood contexts, in particular, a sound understanding of the knowledge, skills and processes required to support

learners in the early years of schooling.

EAB130 Negotiating Curriculum with Young Children

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT)

This unit provides a sound understanding of the key concepts which underpin early childhood education, in relation to childcare, preschool, prep and lower primary settings. Students begin to learn along with a community of learners, and make links between research, theory and practice, each informing the other.

EAB361 Storytelling In Early Childhood

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

A major consideration for the teacher of early childhood is to provide children with rich experiences of 'storying'. This unit introduces students to the following: the value of storytelling with young children; the selection of appropriate children's literature suitable for storytelling; various storytelling strategies in terms of their impact on a young audience; the use of appropriate props for storytelling; ways of integrating storytelling across the curriculum.

EAB363 Creating Curriculum With Young Children

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The concept of curriculum in early childhood education evokes much discussion and debate. In this unit, more encompassing concepts of curriculum for young children will be considered in the light of theories and research that suggest that children construct their own knowledge. Ways in which teachers and children can work together in creating a curriculum that is meaningful to children while meeting the expectations of parents and society in relation to child care, kindergarten/preschool and lower primary settings are considered. Practical strategies for setting up supportive learning environments and methods for evaluating teaching and learning are included.

EAB364 Academic And Professional Communication

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

The unit includes the following: the development of an understanding of the general processes of communication in an academic and professional contexts; application of information literacy skills to a range of print and electronic sources; conventions for communicating using a range of academic text-types using print and electronic media; key concepts relating to the study topic: Families in Context.

EAB416 Early Childhood Art Education

Credit Points	12
Campus	Kelvin Grove

This unit includes the following: historical and contemporary trends in art education; philosophy and practice in early childhood visual arts education; in-depth exploration of young children's artistic development and learning; assessment and evaluation of visual arts in early childhood; methods of reporting and record-keeping; studio art experiences; curating children's art exhibitions; public information about children's artistry; advocacy for improving options for young children in the visual arts.

EAB422 Information and Communication Technologies and the Young Child

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: selection, use and critical evaluation of computers and associated software, and related technologies in early childhood programs, linking technology and problem-solving; applications and use of computers and associated software for language, number and problem-solving; creating teaching materials.

EAN601 Investigating Curriculum and Pedagogy in Early Childhood

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The aims for this unit are to assist students in developing a critically-informed and research-based understanding of the current issues that are under scrutiny in the field of Early Childhood Education. Recognition and appreciation of gender, culture and customs are essential to the consideration of the issues, and students will make active contributions to promoting codes of practice relevant to the specific professional area of education/learning.

EAN603 Child Development in Context

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

The aim of the unit is to foster critical understanding of current developmental theory, the conduct of developmental research and the application of research findings to practice in early childhood education and other fields in which professionals work with children and families.

EAN614 Arts and Sciences in Early Childhood

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

The unit challenges students, as leaders in early childhood teaching and learning, to interrogate a broad range of ideas, principles and guidelines to assist them in making decisions about curriculum in the arts and sciences. It challenges students to engage with trans-disciplinary and cross-disciplinary knowledge and innovation.

EAN615 Mathematics in Early Childhood

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-2 (EXT)

This unit aims to develop a sound understanding of the theories which inform early childhood mathematics and the teaching and learning of mathematics. Students develop a broad knowledge of mathematical content specifically for early childhood contexts.

EAN616 Language, Literacies and Communication in Early Childhood

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT)

The focus of this unit is to help students to understand recent research-based practices for literacy learning and teaching in the years before compulsory schooling and the early schools years. Emphasis is placed on a broad definition of literacy that highlights the importance of all children becoming active participants in society and of knowing and engaging in a range of literacy practices, rather than just learning a set of reading and writing "skills".

EAP400 Early Years: Literacies

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT)

In this unit you will examine literacy from critical contemporary perspectives - as a repertoire of contextualised social practices. You will gain insight into different pathways children take to literacy as their learning and development is shaped in family, community and school contexts. A key focus is on helping you to understand early reading and writing processes in the print medium, as well as multimedia. You will learn to use the framework of four literacy practices: code-breaker, text- participant, text-user and text-analyst to explore operational, cultural and critical dimensions of literacy. You will build a repertoire of strategies that will allow you to meet the needs of diverse learners and create instructional events that connect with the experi

EAP401 Early Years: Mathematical Understandings

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT)

This unit aims to develop concepts that are foundational to understandings in early childhood Mathematics, and to generally enhance your understandings, attitudes, values, and skills in relation to early childhood Mathematics. You will investigate teaching approaches, and key sequences for developing concepts and skills for various aspects of Mathematics education.

EAP402 Early Years: Arts and Humanities

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit aims to develop students¿ capacities as scholars, educators and researchers, through adopting a problem-finding, problem-solving and inquiry-based approach to learning. Through engaging in their own inquiry-based investigation of a social/ environmental issue, students learn how the arts can be used as a learning and teaching tool. Students will investigate Indigenous studies and SOSE through descriptive, interpretive, analytic and expressive processes, to share and create knowledge with students and staff.

EAP403 Early Years: Science and Technology Education

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT, EXT)

This unit aims to extend your prior understanding of science and technology education, and to enhance their understandings, dispositions and skills in relation to early childhood science and technology education. It also aims to augment students¿ understandings of teaching strategies, planning and evaluation for diverse groups of young children in a variety of school and centre settings.

EAP404 Primary Arts/LOTE: P-7

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Through music, movement/dance, media, imaginative play, story and drama, children are provided with ways to understand, appreciate and respond to their worlds, as they develop visual, aural, bodily-kinaesthetic and aesthetic literacies. This unit examines the basic elements and concepts relevant to the art forms of dance, drama, media and music; provides opportunities for practical exploration of these art forms; builds a repertoire of relevant arts pedagogies and extends on EAB011, with further analysis of the importance of the arts in the education of young children.

EAP405 Early Years: Development, Diversity and Inclusion

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

An understanding of inclusive educational principles and practices is important if early years teachers are to address the participation rights of all children. This requires you to engage with the literature evidence-base on inclusive approaches in early education, and to deepen your understanding of the diverse characteristics and backgrounds of young children. Inclusive education of young children incorporates the development of effective educational partnerships with families and other professionals to support children's learning, development and well-being.

EDB001 Teaching and Learning Studies 1: Teaching in New Times

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Teaching today is being practised in a changing world. New forms of culture and society have emerged in recent decades alongside new and more globalised diagrams of economy, power and government. Schooling and education in all domains are being affected by these shifts and transformations. Educational sites, for instance, are becoming more differentiated and enterprising; learners themselves increasingly more diverse, active and autonomous. Teaching in New Times challenges students, in the early stages of their course, to develop an insightful and research-based conceptual framework, drawn from social theory and cultural studies, so that they may respond to these transformations in an informed, ethical and professional manner.

EDB002 Teaching and Learning Studies 2: Development and Learning

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit has the dual purposes of promoting your own personal and professional development as life long, creative, autonomous learners, capable of reflection and high level thinking, and of

enabling you, as educators, to promote similar development in your learners. Pursuit of these aims will involve an exploration of human development, from personal and interpersonal perspectives, with sensitivity to socio-cultural contexts, and with a particular focus on the theory, research and practice which informs educators about how learners construct knowledge and become creative, self-motivated thinkers and problem solvers.

EDB003 Teaching and Learning Studies 3: Practising Education

Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT, EXT)

Education is a social and cultural activity. This unit provides a sociological and cultural studies framework that provides an insightful explanation of how education in its various sites is constructed and organised. The unit includes a socio-cultural analysis of an educational site which will be undertaken in conjunction with the Field Studies unit.

EDB004 Teaching and Learning Studies 4: Inclusive Education

Credit Points	12
Campus	Kelvin Grove, External and Caboolture
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit aims to develop students' understanding and appreciation of the contributions that diversity, belonging and trust make towards a quality learning environment for all learners. Students will learn to engage in teaching a broad range of students in diverse and inclusive ways utilising pedagogies and curriculum practices that enhance learning for all students and generate inclusive cultures within the school and classroom settings. Desired outcomes are achieved through descriptive, interpretative, analytic and expressive processes to share learning with fellow students and staff.

EDB005 Teaching and Learning Studies 5: Professional Work of Teachers

Pre-requisites	EDB033, EDB023, or EDB013
Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 6TP4 (INT, EXT)

Students will share the responsibility for shaping their beginning career learnings through a process of professional induction with a number of key significant stakeholders. The process will be proactive, collaborative and self determined and students will need to become professionally responsible for developing a professional development program that best accommodates their needs at the close of the teacher education program.

EDB006 Learning Networks

Anti-requisites	CLB341, MDB385
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit explores the concept of learning networks: interacting social and technical systems that lead to collective sense-making and knowledge construction. Topics include the nature and use of Information and Communication Technologies (ICTs), learning theories and technologies and socio-technical practices in learning networks.

EDB007 Culture Studies: Indigenous Education

Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 6TP4 (EXT); 2012 SEM-2 (INT)

Numerous government reports and recent discussions about reconciliation have called for an increased commitment to Indigenous education in Australia. Teachers are increasingly being asked to improve their skill, knowledge and understanding to teach Indigenous students, and to teach curricula which incorporates Indigenous viewpoints on social, cultural and historical matters. This unit begins with an analysis of the students' own cultural place in the Australian context and afterwards moves towards an understanding of Aboriginal and Torres Strait Islander perspectives on history and contemporary issues, and an understanding of why Aboriginal and Torres Strait Islander students have been so disadvantaged by the Australian education system.

EDB010 Field Studies: Development and Learning in the Teaching of English

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit has the dual purpose of promoting your own personal and professional development as life long, creative, autonomous learners, capable of reflection and high level thinking, and enabling you, as educators, to promote similar development in your learners. This unit will contribute to the overall aims of the BEd by giving attention to two sets of teacher practitioner attributes. In the first set, emphasis is on your personal and professional development in the course and the second set, the emphasis is on the attributes required of educators to facilitate learning in their students.

EDB011 Early Childhood Field Studies 1: Development and Learning in the Field

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT)

Designated Unit. This unit focuses on students' professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs in a wide range of settings for children aged from birth to eight years. In this unit of the professional practices strand, students will have opportunities to undertake activities designed to help them refine an increasing number of strategies for teaching and working collaboratively with children and their parents, and with other professional colleagues. Not available to Visiting students.

EDB012 Early Childhood Field Studies 2: Practising Education in the Field

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (INT, EXT)

Designated Unit This unit focuses on students' professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the second set of teaching experiences, in a graduated sequence over the course of the BEd. In this second unit of the professional practices strand, students

will focus upon program planning and implementation in settings for children in lower primary. Students will focus upon teaching in lower primary school classrooms, with an emphasis upon the development of knowledge of relevant policies and resources in curriculum provision. An emphasis will be maintained on understanding Early Childhood approaches to curriculum.

EDB013 Early Childhood Field Studies 3: Diversity and Inclusivity

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Designated Unit The aim in this unit is to develop professional support relationships that early childhood practitioners must provide for all children and their families, and an awareness of the need for the teacher to work as a member of the community and as a partner with parents and other colleagues.

EDB014 Early Childhood Field Studies 4: Professional Work of Teachers - Induction into the Field

Pre-requisites	EDB011, EDB012 and EDB013
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

Designated Unit This final early childhood practice unit is designed to provide a means of transition from the role of the tertiary student to that of a professional early childhood practitioner who is able to work across diverse settings. Students are encouraged to engage in reflection about their professional development and their future career paths and options.

EDB015 Internship (Early Childhood)

Pre-requisites	EDB014 (Can be enrolled in same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

Designated Unit This unit aims to induct students into the professional work of teachers. The aim is for students to apply the knowledge, skills and understandings of teaching and learning that they have acquired throughout the course in an extended time in the workplace.

EDB021 Primary Field Studies 1: Development and Learning in the Field

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Designated Unit. This unit focuses on students' professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs. This requires an understanding of learner needs, curriculum knowledge, procedures for creating supportive classroom environments, and sensitivity to socio-cultural contexts. Not available to Visiting studnets.

EDB022 Primary Field Studies 2: Practising Education in the Field

Pre-requisites	EDB021and (CLB006 or CRB005) and (MDB002 or CRB933)
Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

Designated Unit Through critical examination of the socio-cultural dimensions of these sites, this unit aims to utilise aspects of social enquiry to analyse the practice of teaching as a social and cultural activity. At the same time, the unit aims to develop students' pedagogical and curriculum skills as a teacher.

EDB023 Primary Field Studies 3: Inclusive Educational Practices

Pre-requisites	EDB022
Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT)

Designated Unit. As a final year teacher education student you will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. This field experience is designed for students to engage in teaching, learning and assessment practices in their field, interacting with individual students, small groups of students and whole class situations. Students will be required to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of the students in classes.

EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field

Pre-requisites	EDB023 and EDB004
Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT, EXT); 2012 5TP2 (EXT, INT)

Designated Unit. Learners remain central to the work of teams and must be recognised as culturally and socially diverse as well as intellectually diverse. Within these constructs the graduating teachers are required to provide a range of educational opportunities that facilitate high quality and meaningful learning engagement for all students across differing educational contexts and sectors. This unit is designed to fully immerse the pre-service teacher into the field with a view to scaffolding their repositioning as autonomous, critically reflective, inclusive professional teachers on completion.

EDB025 Internship (Primary)

Pre-requisites	EDB024 (Can be enrolled in same teaching period)
Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT, EXT); 2012 5TP3 (INT)

Designated Unit. This unit aims to induct you into the professional work of teachers. The aim of this unit is for you to apply the knowledge, skills and understandings of teaching and learning that you have acquired throughout the course in an extended time in the workplace.

EDB031 Secondary Field Studies 1

Pre-requisites	HMB231 or XNB291 or HMB292 or CLB018 or CRB909 or CLB036 or LCB903 or CLB021 or LCB339 or CLB051 or CRB920

	or CLB054 or CRB924 or MDB015 or MDB021 or CRB923 or MDB031 or CRB930 or PUB343 or XNB191. Pre-req can be enrolled in the same TP as EDB031
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Designated Unit. This unit focuses on the students' professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs. This requires an understanding of learner needs, curriculum knowledge, procedures for creating supportive classroom environments, and sensitivity to socio-cultural contexts. Please note in Semester 2 this unit is ONLY available to students who have previously failed the unit and have received approval from the faculty to be enrolled in the alternate offering. This unit is not available to Visiting or Cross-Institutional students.

EDB032 Secondary Field Studies 2

Pre-requisites	EDB031 and a Curriculum Studies 2 unit. The CS2 unit can be enrolled in the same teaching period as EDB032
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Designated Unit Through critical examination of the socio-cultural dimensions of these sites, this unit aims to utilise aspects of social enquiry to analyse the practice of teaching as a social and cultural activity. At the same time, the unit aims to develop students' pedagogical and curriculum skills as a teachers.

EDB033 Secondary Field Studies 3

Pre-requisites	EDB032 and Curriculum Studies 3 unit. The CS3 unit can be enrolled in the same teaching period as EDB033
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT)

Designated Unit. Students will be required to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of the students in your classes. Students will be required to argue that their orientations to curriculum, teaching and assessment reflect practices that offer all students access to quality learning experiences.

EDB034 Secondary Field Studies 4

Pre-requisites	EDB033
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT); 2012 5TP2 (INT)

Designated Unit. This unit is designed to fully immerse the pre-service teacher into the field with a view to scaffolding their repositioning as an autonomous, critically reflective, inclusive professional teacher on completion.

EDB035 Internship (Secondary)

Pre-requisites	EDB034 (Can be enrolled in same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT); 2012 5TP3 (INT)

Designated Unit. This unit aims to induct students into the professional work of teachers. The aim of this unit is to apply the knowledge, skills and understandings of teaching and learning that students have acquired throughout the course in an extended time in the workplace.

EDB036 Introduction To Education

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is early in the course to introduce foundational theories and practices in the design of curriculum, pedagogy and assessment that you will then build on throughout the remainder of your course.

EDB037 Introduction To Educational Sites

Pre-requisites	EDB036
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Effective teachers have a deep knowledge and understanding of educational sites and of how they operate. The role of this unit is to introduce you to the diversity of schooling contexts and to assist in preparing you to work flexibly and cooperatively within and across educational settings. Through the processes of critical observation and reflection, this unit requires you to make links between current educational thought and practice.

EDB038 Indigenous Australian Culture Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit encourages an appreciation of the two distinct indigenous cultures of Australia and how external forces to Aboriginal and Torres Strait Islander cultures caused social, economic and political changes. It looks at traditional family life and organisation.

EDB039 Indigenous Politics and Political Culture

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit examines issues and influences underlying the world of indigenous politics: political representation; land rights; health; education; community development; criminal justice; culture and heritage. This unit has an Australian focus with New Zealand and North American comparisons.

EDB040 Indigenous Knowledge: Research Ethics and Protocols

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides students with a critical examination of the major ethical and moral issues arising from the designing and conducting of research 'on/in' Australian Indigenous people/communities or issues. The unit examines the calls by Indigenous researchers for the decolonising of research methods - a process which critically examines the historical and philosophical bases of Western research and the frustrations of Indigenous researchers with various Western

paradigms, academic traditions and methodologies.

EDB041 Indigenous Australia: Country, Kin and Culture

Anti-requisites	SWB109
Credit Points	12
Campus	

This unit aims to expand understanding of issues of importance to Indigenous people and to relate those issues to the practices in human service agencies. The Oodgeroo staff and leaders from the Indigenous community will work with staff from Social Work and Human Services in presenting this unit.

EDB200 Insights into Early Childhood Development

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

The unit aims to develop knowledge and understanding of early childhood development with a focus on children's thinking and communicating in a social context.

EDB350 English for Teachers

Credit Points	12
Campus	Kelvin Grove

This unit aims to continue the development of participants' own language proficiency and intercultural competence and to further develop their understandings of the importance of effective and appropriate use of language in successful TESOL classrooms.

EDB351 TESOL Methodology 1

Pre-requisites	EDB350 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove

This unit is designed to help TESOL teachers to develop a range of understandings so that they can plan and implement effective TESOL programs for young lelarners and interpret and manage the classroom as a complex social environment for teaching and learning.

EDB352 Classroom-Based Reseach: TESOL Methodology 2

Pre-requisites	EDB350 and EDB351
Co-requisites	EDB353
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Language teachers are required to make informed pedagogical decisions which are response to the learning needs of their students and to the curriculum frameworks of the context in which they work. This unit extends the understandings and strategies developed TESOL Methodology 1 and encourages participants to expand their pedagogical repertoire as they refind their own developing teaching philosophy.

EDB353 TESOL Materials and Curriculum Development

Pre-requisites	EDB350 and EDB351
Co-requisites	EDB352
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Effective language teachers working with young children need to be able to critically analyse, evaluate, develop and generate course materials and activities that engage young learners and support their language development in a principled and coherent fashion across the teaching period.

EDB354 Resources, Design and Evaluation for English as a Foreign Language

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit improves and expands the English language of participants. Helps them to select, develop and critically analyse resources in which EFL teachers of young children can work with resources in teaching/learning contexts.

EDB356 Assessment in English Language Teaching

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit further supports the development of your English language ability and develops both a practical and a critical understanding of the theories and issues informing second language assessment. In conjunction with what you know and continue to learn about language and literacy development in young children, you will develop skills in creating and evaluating language tests and tasks that reflect the local policy context and your understanding of effective language assessment strategies.

EDB410 Introduction To Research Methods

Other requisites	Entry to the Research Pathway is by invitation from the Research Pathway Coordinator. Students are required to have a GPA of 5.5 or above.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides a foundation for understanding research design and methods in education. It focuses on reading, understanding and evaluating educational research both within and across different paradigms and on enabling students to develop their own plan for a small-scale research project. It includes the development of skills in understanding, appreciating, and using the processes and techniques of research. Students are made aware of the variety of research cultures and theoretical perspectives, to become informed consumers of the research findings of others.

EDB411 Dissertation (Stage 3)

Other requisites	Entry to the Research Pathway is by invitation from the Research Pathway Coordinator. Students are required to have a GPA of 5.5 or above.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides you with opportunities to develop research skills that are increasingly important for teachers in an era when schools, professional associations and other educational settings are becoming important sites of knowledge production.

EDB411 Dissertation (Stage 2)

Pre-requisites	EDB410 (can be enrolled in the same teaching period)
Other requisites	Entry to the Research Pathway is by invitation from the Research Pathway Coordinator. Students are required to have a GPA of 5.5 or above.
Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides you with opportunities to develop research skills that are increasingly important for teachers in an era when schools, professional associations and other educational settings are becoming important sites of knowledge production.

EDB411 Dissertation (Stage 1)

Pre-requisites	EDB410 (can be enrolled in the same teaching period)
Other requisites	Entry to the Research Pathway is by invitation from the Research Pathway Coordinator. Students are required to have a GPA of 5.5 or above.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides you with opportunities to develop research skills that are increasingly important for teachers in an era when schools, professional associations and other educational settings are becoming important sites of knowledge production.

EDB433 Primary Professional Practice 4: Beginning Teaching

Pre-requisites	EDB432
Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

Designated Unit In this unit, students synthesise the range of skills, attitudes and knowledge sources that they have experienced to ensure an effective transition into professional practice as beginning teachers, taking responsibility for the shaping of educational practice from their own perspective and those of the learners. Emphasis is on planning and implementation of the total program. It includes thirty days of practice teaching in a primary school.

EDB440 Independent Study

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT), 2012 SEM-2 (EXT, INT); 2012 SUM (EXT, INT)

This unit involves self-initiated and self-directed academic study in an area of educational management interest that allows study either to a depth not possible in electives, or in an area not covered by the course.

EDN602 Advanced Seminars

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, BLK, INT), 2012 SEM-2 (EXT, BLK, INT); 2012 SUM (BLK, INT, EXT)

This unit provides for the special needs and interests of students. Small groups of students interact at an advanced level with specialists or visiting scholars in seminars, conferences and research projects.

EDN603 Facilitated Study Unit

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance.

EDN604 Facilitated Study Unit

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation.

EDN604 Facilitated Study Unit

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

See EDN604-1.

EDN610 Professional Dialogues in Education

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This unit aims to develop understanding of what it means to be an innovator and a leader in a contemporary professional context. The unit is underpinned by the notion that innovation means being more critical, being open, being able to engage with greater uncertainty and complexity, and being able to learn from the past in order to manage the future.

EDN611 Professional Applications of Research

Credit Points	12
Campus	Internet and Kelvin Grove

The unit focuses on the needs of professionals to seek research knowledge that addresses specific problems or issues in their practice and to develop a positive attitude towards research in general. It assists students to search databases and other sources to locate published research reports in their field and evaluate them critically.

EDN612 Conducting Innovative Educational Research

Pre-requisites	EDN611
Credit Points	12
Campus	Internet and Kelvin Grove

The unit aims to enhance capacities for undertaking research in educational and other learning contexts that is innovative in both its focus and its approach. The unit engages students in a comprehensive examination of relevant research theory and practical application.

EDN619 Educational Research: Design, Methodology and Analysis

Pre-requisites	EDN611
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT)

In this unit, the dynamic interplay between educational theory and research will be emphasised with the intent of developing your skills and knowledge required by consumers and practitioners of educational research.

EDN626 Learning And Teaching In Higher Education

Credit Points	12
Campus	Internet

This unit aims to develop the student's capacity to take a theoretically grounded approach to teaching and learning in higher education, specifically through increasing their knowledge of formal and informal theories of learning and teaching.

EDN627 Contexts And Issues In Higher Education

Credit Points	12
Campus	Internet and External

This unit aims to provide students with opportunities to develop an understanding of a range of contemporary historical, policy and social issues that impact on higher education at institutional, school, department, course and individual levels.

EDN629 Online Design: Implications for Learning

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit aims to provide students with the opportunity to gain the knowledge, skills and confidence to use a variety of delivery methods appropriate to their post-secondary student cohort, and to be able to evaluate and critique each mode of delivery within a pedagogical framework, which is student-centred and context-specific.

EDN630 Curriculum Design, Assessment and Evaluation in Higher Education

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-2 (EXT)

The unit aims to introduce students to key concepts and practices underpinning contemporary curriculum design, development, assessment and evaluation in rapidly changing global and local contexts.

EDN631 Supervised Practicum 1

Co-requisites	PYN601, LCN625 or SPN640 and (LCN626 or SPN641)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim is to provide students with a basic level of professional knowledge and akills in the practice of educational and development psychology and an awareness of ethical guidelines. Students will also develop a high standard of professional conduct through supervised practice.

EDN632 Supervised Practicum 2

Pre-requisites	EDN631, PYN601, SPN640, SPN641
Co-requisites	SPN642
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This units aims to provide students with supervised experience in applying diagnostic, assessment and intervention skills in educational settings. This unit will also develop students' written and oral communication skills and provide them with practice in using this skills to communicate results of assessments and recommendations for interventions to school staff, parents and other stakeholders.

EDN633 Supervised Practicum 3

Pre-requisites	EDN632
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit provides students with supervised experience in applying their diagnostic, assessment and intervention skills within non-educational settings. It will further develop their written and oral communication skills, and provide them with practice in using these skills to communicate results of assessments and intervention strategies within teams from non-educational settings.

EDN634 Supervised Practicum 4

Pre-requisites	EDN633
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to provide students with support in ensuring that they have attained the level of knowledge and skill required to meet the competencies of the Psychologists Board of Queensland.

EDN635 Field Studies in Early Childhood

Pre-requisites	EAN601
Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

In this unit, students are required to draw on professional knowledge and experience in making child observations and in planning, implementing and evaluating learning experiences for children.

EDN641 Field Studies in Early Childhood: Birth To 5 Years

Pre-requisites	EAN601
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

The field experience component of this course provides opportunities for the demonstration of competence in working with young children in a planned environment. The aim of this unit is enable you to draw upon your professional knowledge and experience in making child observations and in planning, implementing and evaluating learning experiences for children.

EDP415 Engaging Diverse Learners

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

Increasingly rich and complex opportunities are offered to today¿s learners to engage in personal, contextual and technological approaches to knowledge construction. To participate effectively in modern learning environments, and to be able, in the future, to support the learning of diverse learners, students completing this unit will develop an understanding of the processes of learning, and the influence of both individual differences and socio-cultural contexts in personal, social and professional development.

EDP416 The Professional Practice of Educators

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This Education Studies unit builds your professional and ethical capacity as an Early, Middle or Senior Phase Educator by developing a social science framework for understanding and analysing the professional practice of educators in local and global contexts. The unit will develop

your knowledge of the social, cultural, and political ¿strategies¿ shaping professional practice and education today. It will also develop your understanding of the ¿identities¿ produced by these strategies and of the ways in which they might be ethically and equitably managed in all phases of learning.

EDP421 Early Years Field Studies 1: Engaging Diverse Learners

Co-requisites	EAP400
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

Designated Unit. Inclusive philosophies and pedagogies are fundamental for schools and educators who seek to provide rich educational experiences for all learners in the early years of schooling. Teachers must be able to identify and reduce barriers to learning and maximize educational outcomes in response to the needs and interests of all students. This unit provides students with the opportunity to investigate and develop their ability to identify a range of social, cultural and political issues which may create barriers to learning. It also engages students with various pedagogical responses that may provide inclusive educational experiences for students in the early years.(22 days Field Studies). Not available to Visiting students.

EDP422 Early Years Field Studies 2: The Professional Practice of Educators

Pre-requisites	EDP421
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

Designated Unit. This unit prepares you for your work as a beginning teacher, on completion of this course. It provides you with the opportunity to identify and discuss professional issues for beginning teachers in the early years. It aims to develop strong links between research, theory and practice by emphasising inquiry- and evidence-based approaches to teaching and learning in early childhood settings and professional development for teachers. (33 days Field Studies). Not available to Visiting students.

EDP431 Middle Years Field Studies 1: Engaging Diverse Learners

Pre-requisites	MDP452 or CRP421. CRP421 can be enrolled in the same teaching period.
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

Designated Unit. This unit integrates and applies the current perspectives, issues and theoretical frameworks of inclusion and diversity. It enhances the student's ability to identify and address social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners. Students will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. To do this effectively students will need to identify barriers to student learning and develop strategies to maximize educational outcomes for all students. (22 days Field Studies) Not available to Visiting students.

EDP432 Middle Years Field Studies 2: The Professional Practice of Educators

Pre-requisites	EDP431 and (CRP400 or CLP400). CRP400 can be enrolled in the same teaching period.
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

Designated Unit. This unit identifies, discusses and applies the professional issues and responsibilities the beginning teacher needs to be aware of. The students' ability to identify the crucial professional issues for them personally will be enhanced. Students will not only engage with the challenges of addressing social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners but also identify a professional development program that best accommodates their needs as a beginning teacher. (33 days Field Studies). Not available to Visiting students.

EDP441 Senior Years Field Studies 1: Engaging Diverse Learners

Pre-requisites	Curriculum Studies 1 unit. This unit can be studied in the same teaching period as EDP441
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

Designated Unit. This field studies unit integrates and applies the current perspectives, issues and theoretical frameworks of inclusion and diversity. It enhances the student¿s ability to identify and address social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners. Students will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. To do this effectively students will need to identify barriers to student learning and develop strategies to maximize educational outcomes for all students. (22 days Field Studies).

EDP442 Senior Years Field Studies 2: The Professional Practice of Educators

Pre-requisites	EDP441 and Curriculum Studies 3 unit. The CS3 unit can be enrolled in the same teaching period as EDP442
Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

Designated Unit. This Field Studies Unit is designed to alert you to the professional issues of ethical and equitable practice, to legal responsibilities that face any educator, and to the need to stay informed of new developments shaping professional practice. In the field study placement you will move towards becoming a beginning teacher, managing learning environments that are educationally productive, alert to student diversity and the legislative context, as well as mindful of the need for ongoing career enrichment and planning. (33 days Field Studies).

EDP452 Reflective Practitioners 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Designated unit. This is the first field studies unit in the primary stream of the graduate pre-service teacher education program. It provides you with your first supervised professional experience in teaching. Through a combination of university-based professional learning and school-based supervised field

experience, the unit provides the opportunity for you to develop the professional capacity to plan, implement and evaluate effective and inclusive teaching/learning programs. The unit closely articulates with your first Education Studies unit, SPP402 Primary Educational Perspectives, and with your first Curriculum Studies units. (25 days Field Studies).

EDP453 Reflective Practitioners 2

Pre-requisites	EDP452
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit will build on your emerging understanding of classroom management and investigates a range of classroom management approaches appropriate for middle years contexts and scaffold the development your own individualised approach to classroom management. This unit also continues your professional development in designing, implementing and assessing appropriate middle years learning experiences. As such, this field studies unit continues the process of your induction into the education profession. (33 days total field studies)

EDR703 Interdisciplinary in Education Studies (Advanced Seminars)

Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit is a reading and seminar program that aims to broaden and deepen the student's initial perspective to include elements derived from theoretical perspectives drawn from a number of disciplines. The unit seeks to provide a context of learning for educators who seek the personal and professional benefits that the broadening and deepening of their professional knowledge affords.

EDZ009 Professional Development: Ethics in Education

Credit Points	12
Campus	Institut Perguruan Ilmu Khas
Teaching Periods	2012 SEM-1 (INT)

Teachers' professional knowledge is dynamic and constantly changing; and it is essential for beginning teachers to develop as lifelong learners and reflective practitioners, prepared to work in constantly changing social, economic and professional conditions. This unit covers topics related to the complex professional and personal dimensions of teachers' work.

EDZ010 Curriculum Studies

Credit Points	12
Campus	Institut Perguruan Ilmu Khas
Teaching Periods	2012 SEM-1 (INT)

This unit examines the meaning of curriculum in relation to the school context, state and national contexts, the broader socio-political context. Of central importance throughout is the idea of curriculum as an interactive process. The idea of curriculum as a process is emphasised, and the dynamic interplay between curriculum context, theory and practice is illustrated through the topics listed below.

EDZ011 Linking Theory and Practice in the Language Classroom

Credit Points	12
Campus	Institut Perguruan Ilmu Khas
Teaching Periods	2012 SEM-1 (INT)

This unit examines the pedagogical frameworks underpinning classroom methodology. This final year unit will focus on linking theory and practice and on preparing students for forthcoming classroom teaching. It will include the practical preparation and implementation of lessons, drawing on and bringing into focus, relevant aspects of the programme.

EDZ013 Teaching Practice

Credit Points	48
Campus	Institut Perguruan Ilmu Khas
Teaching Periods	2012 SEM-2 (INT)

During the second semester of Year 4, you will carry out an extended period of practice teaching for a twelve week period in a Malaysian School. The Practice will focus on the teaching of English; however, you may be requested/given the opportunity to teach a second subject. During this extended field experience you will have the opportunity to develop the reflective dimension of your practice through the experience of implementing a small-scale research project.

EDZ024 Research Project

Credit Points	12
Campus	Institut Perguruan Ilmu Khas
Teaching Periods	2012 SEM-1 (INT)

EEP201 Fundamentals of Power System Earthing

Credit Points	4
Campus	Gardens Point

This unit includes the following: electrode resistance, potential gradient areas of common types of electrodes; multiple electrodes; stratified grounds electric shock; calculation of step and touch potentials; introduction to substation earthing; ground potential rise; connection of services; grid and mesh potentials; measurement of soil resistivity and electrode resistance; earthing of transmission lines; tower foot resistance; current division between ground and aerial earth wires; division of earth currents at substations; earth current distribution on faulted lines; distribution systems; MEN; SWER; safety during faults; flow of lightning currents to ground.

EFB201 Financial Markets

Pre-requisites	BSB113 or CTB113
Equivalents	EFX201
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the institutional structure of global financial markets, and thereby complements the understanding of theoretical finance gained in either BSB122 or EFB210. Topics covered include the functions of financial markets, the banking and payments system, financial system deregulation, non-bank financial institutions, stock exchange operations, debt markets, foreign exchange markets and markets for financial derivatives.

EFB210 Finance 1

Pre-requisites	BSB123 or BSB122 or MAB126 or (BSB110 and BSB113)
Equivalents	EFX210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit covers the following topics: an introduction to the financial institutional

framework; an introduction to debt and equity instruments; financial mathematics applied to the pricing of debt and equity securities; a firm's investment decision including Net Present Value (NPV) and Internal Rate of Return (IRR); introduction to risk and uncertainty using the Capital Asset Pricing Model (CAPM) and Weighted Average Cost of Capital (WACC) concept and risk management.

EFB222 Quantitative Methods For Economics and Finance

Pre-requisites	BSB122 or CTB122, or BSB123 or MAB101 or MAB233
Anti-requisites	EFB101
Equivalents	EFX222
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit will provide students with the necessary background for advanced study in economics, econometrics and finance. It should also enable them to use basic mathematical and statistical techniques for economic and financial analysis and enable the confident and independent use of these skills. Students will be helped to understand the use of these techniques with reference to real world applications drawn from the fields of economics and finance.

EFB223 Economics 2

Pre-requisites	BSB113 or CTB113 or UDB104
Equivalents	EFB102, EFX223
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Consumer behaviour, the role of the government in market intervention, allocative efficiency and market structure are some of the fundamental issues in microeconomics addressed in this unit. Business cycles and the related issue of macroeconomic stabilisation policy are analysed and explained within the Australian context. The significance of the international economy is described through a discussion of foreign exchange markets, the Australian dollar and the terms of trade.

EFB224 Trading Floor

Pre-requisites	BSB113 or BSB123
Anti-requisites	EFN424
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of the unit is to help students move away from the dualistic black and white way of thinking, towards being able to see issues from a range of viewpoints and perspectives, thereby enhancing their critical and technical ability. Additionally, the unit aims to help improve the student research ability through the delivery of a large scale academic style portfolio that reflects their transition from theory to strategy and trading and reflection. The unit is NOT designed to be taken as a traditional book learned class. Reading and knowledge is gained from many sources including case studies, books, jounals and newspapers.

EFB240 Finance for International Business

Pre-requisites	(BSB119 or CTB119 or BSB116) and (BSB113 or CTB113)
Anti-requisites	EFB312, MIB202
Equivalents	EFX240, IBB202
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit students analyse the way international operations and performance of business can be put at risk by changing financial and regulatory conditions across borders and determine how best to manage the exposure to this risk. This unit examines the following: the evolution of the international financial system; the foreign exchange market; the types of foreign exchange rate exposures; managing exchange; translation and consolidation risks; assessing foreign direct investment targets; comparing the performance of foreign affiliates; operations exposure to regulatory risk of tax; investment and competition policy changes; country risk assessment and managing country risk exposure.

EFB307 Finance 2

Pre-requisites	EFB210
Equivalents	EFX307
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit includes the following topics: the financing decision - capital structure, debt versus equity, lease versus debt, term structure versus default structure of interest rates; the dividend decision - dividends versus capital gains, franked versus unfranked income; firm valuation; free cash flow model; evaluation of takeovers; Risk and Return - diversification, the CAPM model, its practical application and its relationship to efficient market hypothesis; introduction to forwards, futures, options, warrants, convertibles and risk management using financial derivatives.

EFB308 Finance 3

Pre-requisites	EFB307
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following topics: a study of contemporary finance research; CAPM; beta estimation; valuation theory; market efficiency; value at risk; use of finance research tools; anomalies and extension of finance theories. Students are required to complete a research project combining theory and practice.This unit covers many topical areas in contemporary finance research. These include, but are not limited to: asset pricing; beta estimation; market efficiency; value at risk; mutual fund performance; volatility modelling; and the term structure of interest rates. Students are required to complete a research project combining theory and practice.

EFB309 Financial Derivatives

Pre-requisites	EFB307
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit extends students' knowledge of financial derivatives as obtained in Finance 2. Topics include: advanced option pricing models; advanced option trading strategies; exotic options; forward and futures pricing models; hedging commodities and equities by using futures; forward rate agreement and interest rate swaps; financial risk management issues.

EFB310 Financial Institutions - Control

Pre-requisites	EFB210
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-2 (INT)

This unit introduces students to the fundamental principles of controlling the risk profile and capital position of a deposit-taking financial institution to maintain solvency. The basic framework of the unit is based on the regulatory capital adequacy regimes, supplemented by consideration of the more sophisticated internal models of risk developed by financial institutions themselves. Relevant case studies demonstrate the imperative for, and application of, the risk management framework.

EFB311 Financial Institutions - Lending

Pre-requisites	EFB210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit examines the fundamental motivations for lending by financial institutions, and the ways in which these are reflected in loan market practice. Specific topics cover the theoretical basis of lending as financial intermediation, the purpose and utilization of loans by borrowers, the major costs of lending for financial intermediaries (including a strong focus on credit costs), lenders¿ compensation, lending relationships, the structural features of loan agreements, loan security and enforcement, and special topics on syndicated lending and project finance.

EFB312 International Finance

Pre-requisites	EFB210
Anti-requisites	EFB212, IBB202, EFB240
Equivalents	EFX312
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit examines the theory and practice of international finance, including the mechanics and uses of the spot, forward, swap, futures and options markets in foreign exchange; the relationship between domestic and international capital markets; interest rate and exchange rate determination; risk management of foreign exchange; international trade finance; evaluation of offshore investment.

EFB326 Applied Portfolio Management

Pre-requisites	EFB210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the student to the treasury environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate. Students must make decisions concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading will be conducted over a simulated four quarter year.

EFB330 Intermediate Macroeconomics

Pre-requisites	EFB223 or EFB102
Equivalents	EFB202, EFX330
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit develops an analytical framework which can be used to understand and evaluate the macroeconomic performance of the Australian economy. It also provides extensive discussion of the monetary and fiscal policy approaches that are taken to maintain a sustainable economy with low inflation and low unemployment. Key issues addressed include unemployment, inflation, economic growth, saving and the balance of payments.

EFB331 Intermediate Microeconomics

Pre-requisites	EFB223 or EFB102
Equivalents	EFB211, EFX331
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to develop students' understanding of microeconomics and its applications at the intermediate level. More specifically, the theoretical and empirical content of this unit provides the basis for understanding the decisions and actions of consumers, firms and governments in modern economies. Furthermore, the unit provides an appreciation of the range of issues to which economics may usefully be applied to improve managerial decision-making and the formulation of public policy to improve the welfare of the community.

EFB332 Applied Behavioural Economics

Pre-requisites	EFB337 or EFB222
Equivalents	EFX332
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to expose students to current and practical applications of behavioural economics that can be used to improve the understanding of important topics in the area of sports, arts and entertainment. It uses an economic approach to explore topics such as superstardom, fakes, fads and herding behaviour, favouritism, awards and creativity, pressure, pay and performance, positional concerns or outcome uncertainty. The theories and methodological tools learned in this unit can also be applied to other economic areas and industries.

EFB333 Introductory Econometrics

Pre-requisites	EFB222 or EFB101
Anti-requisites	EFB200
Equivalents	EFX333
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Economics and finance graduates require some knowledge of econometrics to assist them in the application and testing of behavioural models and to provide quantitative forecasts for informed decision making. This unit aims to provide an introduction to a range of econometric techniques appropriate for students studying economics and finance. The unit will provide an understanding of some core underlying theoretical issues essential for competent econometric modelling and then introduce students to a set of techniques tailored specifically to the needs of economics and finance students.

EFB334 Environmental Economics and Policy

Pre-requisites	EFB223 or EFB102
Equivalents	EFX334
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit introduces students to some of the current environmental and natural resource issues confronting society and how planners and decision-makers could better understand and address these problems using economics. This unit demonstrates that economics has a major role to play in helping us to understand and solve some of the environmental problems facing societies. It will be demonstrated that economics can often be used to help protect the environment rather than harm it. The unit would benefit those who wish to work either in the public or the private sector.

EFB335 Investments

Pre-requisites	EFB307 and EFB222
Anti-requisites	EFB318
Equivalents	EFX335
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit advances the students' understanding of how investment decisions are made, what securities to invest in, how they fit in a portfolio, what is the impact of transaction costs, the risks associated with investing and performance evaluation of the investment process. This unit aims to provide students with an intermediate to advanced level of investment decision making skills which are essential for finance students in their personal and professional lives.

EFB336 International Economics

Pre-requisites	EFB223 or EFB240 or EFB201
Anti-requisites	EFB314
Equivalents	EFX336
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

International economics advances student understanding of global markets and positions through theories and analyses of trade, intervention, currencies, current transactions, capital positions and obligations in an interdependent world. Through considerations of international positions and competitiveness the unit develops a framework for understanding of the prospects and challenges facing firms, organisations, institutions and governments active in the international economy and of the wider issues of global progress and stagnation.

EFB337 Game Theory and Applications

Pre-requisites	EFB223
Equivalents	EFX337
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit presents the basic concepts of game theory and its application to economic phenomena, focussing on how individuals and firms deal with uncertainty and situations involving strategic interactions. The theoretical concepts are illustrated with applications from both the private and public sectors. Contents include the economics of uncertainty and information, asymmetric information, auctions, bargaining, markets and competition.

EFB338 Contemporary Application of Economic Theory

Pre-requisites	(EFB330 or EFB202) and (EFB331 or EFB211) and (Completion of 168 credit points)
Equivalents	EFB329, EFX338
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

EFB338 is a unit designed to summarize your studies in economics. The unit comprises usually of three or more topics of current research in economics. The topics cover micro and macro economics, trends in current theoretical, empirical and economic policy research. The unit is designed to develop your ability to summarise, evaluate and criticise research findings as well as to introduce you to how research in economics evolves to allow you to keep up with the progress made in economics after your degree.

EFB339 Financial Planning and Investments

Pre-requisites	EFB210
Anti-requisites	AYB250
Equivalents	EFB230
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

EFB340 Finance Capstone

Pre-requisites	EFB307 and EFB335. EFB335 can be enrolled in the same teaching period as EFB340.
Equivalents	EFX340
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is designed to encompass the theory and knowledge gained in the entire Finance Major. The topics included in this unit are project evaluation, investment analysis, corporate valuation and advanced financial decision making. This unit aims to provide students with the forum to practice their finance skills in an applied setting which acts as a bridge between university studies and real-world employment in the financial services industry.

EFB341 Economics and Finance Special Topic - C

Other requisites	Subject to Unit Coordinator Approval. Students are required to complete a minimum of 192 credit points of study and must seek approval from a potential supervisor and unit coordinator prior to enrolment.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

The purpose of the unit is to provide undergraduate students with an opportunity to pursue an elective research topic.

EFB342 Workplace Experience in Economics and Finance

Other requisites	Subject to Unit Coordinator approval of an appropriate placement within industry; and GPA: 4.5 or above; and EFB307 or (EFB202 or EFB330 and EFB331 or EFB211)
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT)

This unit aims to expose students to an organisational setting in the fields of economics and finance whre theoretical knowledge is applied to solving real world problems. In the process of application, students' understanding of their learned knowledge will be enhanced. The unit will also help students appreciate the provisional nature of knowledge and the importance of dealing with incomplete information, ambibuity/complexity of information, and their social and ethical issues in these fields.

EFN405 Managerial Economics

Anti-requisites	GSN203, GSN411, GSN414, GSN491, GSN492 and GSZ491
Equivalents	EFX405
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit addresses the following topics: managerial decision making in an economic environment; an introduction to economics, demand analysis, cost analysis, market strategy and the macroeconomic environment; issues including problems of resource allocation at the firm, in industry and in the economy.

EFN406 Managerial Finance

Anti-requisites	GSN413, GSN423, GSZ413
Equivalents	EFX406
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT), 2012 SEM-2 (INT, EXT); 2012 SUM (INT)

This unit is an introduction to the world of finance and financial management. Topics include: the finance function, the role of the financial manager; the Australian financial environment; sources of funds; present and future value; time value of money; financial mathematics; introduction to valuation; cost of funds; the firm investment decision; investment evaluation techniques; capital budgeting; portfolio theory; risk and return; capital asset pricing model; dividend policy; financial structure policy; futures; options.

EFN408 Special Topic - Economics, Banking and Finance A

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides the opportunity to study in detail, at a postgraduate level, specific current issues relating to economics, banking or finance. The nature of the unit varies from year to year depending upon contemporary issues and the interests of staff.

EFN410 Economic and Financial Modelling

Pre-requisites	EFN412
Anti-requisites	AYN419, EFN503
Equivalents	EFX410
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the modelling techniques which are frequently used in a business and financial environment. Modelling is used as an aid to decision-making, as a means of forecasting important variables and as a planning and analysis tool. Various modelling exercises are used to illustrate the use of these modelling techniques in an economic and financial context.

EFN412 Advanced Managerial Finance

Pre-requisites	EFN406
Equivalents	EFX412
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit expands on material introduced and developed in EFN406 Managerial Finance. Its objective is to examine the key decisions made by corporate financial managers (that is the investment, financing and dividend decisions). Topics include: the financing decision ¿ capital structure, debt versus equity, lease versus debt, term structure versus default structure of interest rates; the dividend decision ¿ dividends versus capital gains, franked versus unfranked income; firm valuation, free cash flow model; evaluation of takeovers; Risk and Return ¿ diversification, the CAPM model, its practical application and its relationship to efficient market hypothesis; forwards, futures, options, warrants, convertibles and risk management using financial derivatives.

EFN414 International Finance

Pre-requisites	EFN406
Anti-requisites	EFN417
Equivalents	EFX414
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the theory and practice of international finance, the relationship between domestic and international financial markets, international parity conditions and arbitrage, foreign exchange risk management, country and political risk management, international trade finance, international portfolio investment, multinational cost of capital and capital structure, international capital budgeting and foreign direct investment.

EFN415 Security Analysis and Portfolio Management

Pre-requisites	EFN406
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit deals with security analysis and portfolio management. The unit is both practical and theoretical. Topics covered include: portfolio theory and the capital asset pricing model; bond and equity portfolio management; fundamental valuation techniques; portfolio hedging; active vs. passive investment strategies; and the evaluation of portfolio performance. The ultimate purpose of this unit is to provide the necessary tools for students to manage investment risk and return, select mispriced securities, design and administer investment portfolios, accomplish goals in portfolio management, and measure the performance of investment management.

EFN416 Treasury and Portfolio Management

Pre-requisites	EFN406
Equivalents	EFX416
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the student to the treasury environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on

unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate and decisions must be made concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading will be conducted over a simulated four quarter year.

EFN419 Data Analysis

Anti-requisites	EFB101
Credit Points	12
Campus	Gardens Point

The unit introduces the common statistical methods and tools for inference and decision making in business. It covers important methods of data analysis with an emphasis on interpreting and understanding reported business and economic data. Topics include the concept of sampling error and sampling distributions, estimation and hypothesis testing, regression analysis, time series and an introduction to non-parametric statistical methods.

EFN420 Introduction To Financial Management

Equivalents	EFX420
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is a preliminary study of financial information and financial markets and it includes a number of techniques required for analysing financial information.

EFN421 Financial Planning and Strategies

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK); 2012 SEM-2 (INT)

This unit aims to give students a solid grounding in the world of Financial Planning and Superannuation. This will involve gaining knowledge of financial markets and instruments as well as the appropriate regulatory framework.

EFN422 Economics and Data Analysis

Anti-requisites	EFB101,EFN405,EFN419,GSN403,GSN411,GSN414,GSN491
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

The aim of the unit is firstly to provide a basic understanding of how market conditions are determined and, in particular, it investigates market forces that drive production and prices in both individual markets and the national economy. Secondly, the aim is to help students to develop a statistical way of thinking to assist with decision-making in the absence of complete information in real word situations.

EFN424 Equity Trading Floor

Pre-requisites	EFN405 and EFN406
Anti-requisites	EFB224
Equivalents	EFX424
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of the unit is to help students move away from the dualistic black and white way of thinking, towards being able to see issues from a range of viewpoints and perspectives, thereby enhancing their critical and technical ability. Additionally, the unit aims to help improve the student research ability through the delivery of a large scale academic style portfolio that reflects their transition from theory to strategy and trading and reflection. The unit is NOT designed to be taken as a traditional book learned class. Reading and knowledge is gained from many sources including case studies, books, jounals and newspapers.

EFN500 Contemporary Macroeconomic Theory

Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the latest theoretical developments in the field of macroeconomics using both qualitative and quantitative approaches. It places these theories in their historical, philosophical and societal contexts. This unit looks at New Classical, New Keynesian and other theoretical approaches to a range of issues. These include: theories of expectation formation, supply side economics, labour markets, monetary theory, real business cycle theory and growth theory.

EFN501 Corporate and Commercial Lending

Pre-requisites	EFN412
Equivalents	EFX501
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit covers the theory and practice of lending by commercial banks to firms. Topics include the nature of financial intermediation, basic loan structure, costs of lending, lender's compensation, and loan terms and conditions.

EFN502 Developments in Microeconomic Theories

Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit involves the discussion and analysis of contemporary developments in microeconomic theory, such as game theory and its applications, consumer behaviour, problems of collective action, evolutionary economics, the economics of voting, externalities, public goods, and the market mechanism. It explores refinements in microeconomic theory which have been contemporaneously used in the development of government policies in areas such as the environment, energy, public enterprises and industrial development.

EFN504 Finance Honours

Equivalents	EFN511
Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Credit Points	12
Campus	Gardens Point

This unit provides an advanced coverage of the theory of financial management, building on work done in the undergraduate course with reference to empirical evidence where available; topics include: capital markets, investment decisions, market equilibrium, the capital asset pricing model, arbitrage pricing theory, capital structure, dividend policy, efficient capital markets. The unit provides a theoretical basis allowing for evaluating policy problems in the area of

financial management, a prerequisite for further specialisation in this area.

EFN505 Financial Risk Management

Pre-requisites	EFN415
Equivalents	EFX505
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit covers the main areas of modern risk management. The focus is on measuring and managing risks in financial institutions. Particular attention is paid to developing understanding of the analytical techniques employed in the construction of hedging strategies and the interrelations between the main areas of risk management. The unit emphasises empirical applications and assessment of risk management techniques. Topics covered include the current state of prudential regulation of financial institutions, measurement and management of market risks, hedging strategies with derivatives and managing interest rate and exchange rate risks.

EFN507 Advanced Capital Budgeting

Pre-requisites	EFN406 and EFN412
Equivalents	EFX507
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Topics in this unit include: capital investment analysis, the NPV rule, adjusted present value, replacement decisions, retirement decisions, unequal lives, optimal life, cost of capital, estimating beta, capital rationing, valuation of new issues, mergers and takeovers, analysis of financial and leverage leases, the impact of recent taxation changes on the financing, dividend and investment decisions of the firm, capital budgeting in an international context, access or infrastructure pricing, and real options. The course includes a series of case studies, problems and exercises, which require the student to apply the theory they have learned, to practical situations not covered in normal undergraduate courses. A basic understanding of spreadsheets is assumed.

EFN508 Econometric Methods

Anti-requisites	BSN506
Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides a comprehensive grounding in the econometric methods necessary for conducting research using such methods. Recent contributions to the econometric literature are studied.

EFN509 Policy Economics and Evaluation

Pre-requisites	EFN500, EFN502 and EFN508
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This Economics Honours unit lays emphasis on economic policy and evaluation. The primary purpose of this unit is to focus on the application of microeconomic and macroeconomic principles to informing contemporary commercial, economic and social policy in Australia, and the global economy. This unit has a strong focus and will illustrate in a practical manner how economic tools can be used to assess policy issues and to evaluate potential solutions. The unit will complement theory with appropriate tools of analysis (inclusive of both analytical methods and model-based arguments).

EFN510 Econometric Methods 2

Pre-requisites	EFN508 or BSN506
Credit Points	12
Campus	Gardens Point

This unit builds on *EFN508 Econometric Methods* and provides a second unit in applied econometrics. While *EFN508* is essentially single equation based, this unit focuses on non-linear estimation and systems of equations.

EFN511 Finance Theory

Equivalents	EFN504
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides an advanced coverage of the theory of finance, building on work done in the undergraduate course. Topics include: basic utility theory and risk aversion, investment decision, market equilibrium, the capital asset pricing model, arbitrage pricing theory, and multiperiod investment decisions. The unit provides a theoretical basis for further specialisation in this area.

EFN512 Asset Pricing

Pre-requisites	EFN508 and EFN511
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides an advanced coverage of the empirical asset pricing literature, building on work done in Finance Theory and Econometric Methods. The unit will provide a broad coverage of key empirical work in a broad range of asset pricing and risk management, with topics including: understanding the distribution of financial returns, testing asset pricing models, stochastic discount factors, momentum, and aspects of financial risk management.

EFN513 Corporate Finance

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is an advanced unit in Corporate Finance. The primary purpose of this unit is to expose and familiarise students to the major literature and recent developments in the theory of corporate finance. This unit has a strong focus on research and covers a number of major subject areas in corporate finance, including capital raising, capital structure, payout policy, mergers and acquisitions, and corporate governance.

EFX201 Financial Markets (Outbound Exchange)

Equivalents	EFB201
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

EFX210 Finance 1 (Outbound Exchange)

Equivalents	EFB210
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

Units

EFX222 Quantitative Methods for Economics and Finance (Outbound Exchange)

Equivalents	EFB222
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

EFX223 Economics 2 (Outbound Exchange)

Equivalents	EFB223
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

EFX240 Finance for International Business (Outbound Exchange)

Equivalents	EFB240
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

EFX307 Finance 2 (Outbound Exchange)

Equivalents	EFB307
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

EFX312 International Finance (Outbound Exchange)

Equivalents	EFB312
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

Credit Points	12
Campus	
Teaching Periods	2012 XCH-2 (EXT)

ENB100 Engineering and Sustainability

Equivalents	DEB100,UDB100
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces you to the essential professional skills and practices of engineers in the context of sustainable development.

ENB110 Engineering Statics and Materials

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces you to forces and moments between rigid bodies and to the properties of steel. This knowledge will help you to understand how major infrastructure systems (e.g. bridges, skyscrapers, roads, factories), mechanical systems (e.g. engines, turbines, pumps, vehicles), and electrical systems (e.g. power stations, transmission lines, motors) are designed and built. This unit is one of four first year units covering fundamental engineering principles that you will need in your profession.

ENB120 Electrical Energy and Measurements

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

This unit introduces you to basic electrical circuit concepts. It requires you to perform circuit analysis, circuit synthesis, and the measurement and testing of relevant quantities within circuits.

ENB121 Aerodynamics

Equivalents	MMB251
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: introductory concepts of fluid mechanics and thermodynamics; conservation of mass, energy and momentum, state properties of fluids, the standard atmosphere; dimensional analysis; experimental aerodynamics and aerodynamic coefficients; Reynolds number and Mach number effects; estimation aerodynamic forces and moments; fundamentals of aircraft performance; estimating range and endurance; take off and landing calculations; flight envelopes.

ENB130 Mechanical and Thermal Energy

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Engineers work with numerous kinds of systems where consideration must be given to the motion within, and associated energy of, the system. This unit introduces the student to the concepts of mechanical and thermal energy in the context of real engineering systems. The inter-relationships of between forces, motion and energy is described as related to the flow of energy within these engineering systems. After an introduction to engineering units, concepts and data, Newton's first and second laws are used in the description of system motion and the concepts of force and energy, conservation of momentum and conservation of energy are introduced and described. Thermodynamic processes, certain thermo-physical parameters and the first and second law of thermodynamics are introduced and used to describe simple engineering systems. This is then expanded to include the generation and transport of energy through these systems in terms of convection, conduction and radiation heat transfer.

ENB150 Introducing Engineering Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces you to engineering design. A multi-disciplinary approach is taken with an emphasis in engineering systems, technical design and project management.

ENB200 Introducing Engineering Systems

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will enable you as a graduating Built Environment and Engineering professional to take active and positive steps to transform professional practice in ways that promote the sustainability of our planet, our economy and our society. As future professionals in the fields of Design, Urban Development and Engineering Systems, you will need to understand and apply the concepts of sustainability in your professional practice if we are to achieve sustainable development in the 21st Century.

ENB205 Electrical and Computer Engineering

Pre-requisites	ENB120 or ENB103
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces single and three phase power, electrical machines, principles of transformers, electronic circuits and sensors, filters, operational amplifier applications. It also covers computing fundamentals, programming in MATLAB and Excel using applications in electrical and computer engineering.

ENB211 Dynamics

Pre-requisites	(MAB126 or MAB180 or MAB131) and (ENB130 or PCB136 or PCB150)
Equivalents	MMB112

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Fundamental equations of particle kinetics; energy, power, impulse and momentum; kinematics of rigid bodies in plane motion, relative motion and motion relative to rotating axes; kinetics of rigid bodies, Basic machine components, (Gears, clutches, brakes etc.), Single degree of freedom system.

ENB212 Strength of Materials

Pre-requisites	ENB110 or ENB101 and ENB104
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the analysis of stress and strain in simple engineering components and systems such as uniaxial and bending stresses, deflection of beams, torsion, thin walled structures, combined loading, yield criteria, and introduces the finite element method (FEA).

ENB215 Fundamentals of Mechanical Design

Equivalents	MMB281
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Basic procedures of design, design for sustainability, universal design, Concept development, creative problem solving, Basic component design, computational scheme in design, manufacture & materials.

ENB221 Fluid Mechanics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the basic concepts of fluid mechanics and applies them to some simple engineering problems.

ENB222 Thermodynamics 1

Pre-requisites	ENB130
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Thermodynamic behaviour of substances; theory and application of the 1st and 2nd laws of thermodynamics; thermodynamic cycles, including gas cycles, vapour power cycles and refrigeration cycles; gas-vapour mixtures and the principles of air-conditioning; fuels and combustion.

ENB229 Mechatronics Project 1

Pre-requisites	ENB120, ENB130 and ENB150
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

ENB229 is a project unit with a hands-on introduction to mechatronics. You will be introduced to the basic concepts in mechatronics, focusing on the mechanics, electronics, and embedded software principles. The unit focuses on the research, design, and implementation of a mechatronic product to conform to a customer's needs.

ENB231 Materials and Manufacturing 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Materials and their engineering applications, Manufacturing systems and technology, material properties and manufacturing, material selection, failure, graphical communication.

ENB240 Introduction To Electronics

Pre-requisites	ENB103 or ENB120
Equivalents	EEB312
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Module Electronics A provides a basic understanding of the characteristics and operation of discrete semiconductor components. Electronic circuit design is introduced with emphasis on the small signal low and high frequency response of those circuits. Module Digital Electronics gives students a good grounding in the basic principles of digital design, with particular regard to the fundamentals of digital number systems, Boolean algebra, combinational and sequential logic design.

ENB241 Software Systems Design

Pre-requisites	ENB246 or INB104
Equivalents	EEB612
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit introduces students to Software Engineering by considering a whole Software Lifecycle. Each step of the lifecycle is treated in detail, such as concept phase, requirement definition, software design, human-computer interaction, implementation, audits, and maintenance. Software design principles and techniques are presented as well as real-time system design. CASE development tools are briefly introduced as well as object oriented programming for which a structured Object Oriented Analysis and Design are considered.

ENB242 Introduction To Telecommunications

Pre-requisites	(ENB120 or ENB103) and (MAB126 or MAB110 or MAB111)
Equivalents	EEB340
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Telecommunications systems and the principles underlying their operations are introduced starting from mathematical preliminaries such as the Fourier series and the Fourier transform. Analogue modulation techniques (AM and FM), systems and circuits for generation and demodulation, analogue to digital conversion, pulse modulation and base-band digital data communication techniques are studied using time and frequency domain analyses.

ENB243 Linear Circuits and Systems

Pre-requisites	ENB120 and MAB126
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Network analysis; Laplace transform of signals and transfer functions of systems, time and frequency responses of linear circuits, feedback configurations and transfer functions, analyse and designing analogue systems using transistors and operational amplifiers, designing and

synthesising analogue filters, signal conditioning.

ENB244 Microprocessors and Digital Systems

Pre-requisites	ENB240
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

ENB244 is an introduction to microcontrollers and will cover topics from binary numbers, logic gates, and architectures, to assembly language and basic C programming. After this course you'll have a basic understanding of how computers work and you'll be able to develop programs for a microcontroller based computer system.

ENB245 Introduction To Design and Professional Practice

Equivalents	EEB584
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Introduction to general principles of electronic circuit and electrical equipment design and realisation; design and implementation of basic electronic circuits; experience in undertaking engineering projects, in report writing, and working in teams. The unit gives students the opportunity to apply their theoretical knowledge to real-life engineering problems.

ENB246 Engineering Problem Solving

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the use of computers as tools for solving engineering problems. MATLAB is introduced as a numerical computing environment with the capacity to support complex mathematics and to be programmed to solve specific engineering problems. Stand alone application development using C++ is introduced as a means of exposing students to the high and low level computer programming concepts that are necessary to the implementation of engineering solutions in hardware specific programming environments.

ENB250 Electrical Circuits

Pre-requisites	ENB120
Anti-requisites	ENB103
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces you to electrical circuit analysis. It shows how to determine the transient and steady state solution in single and three phase circuits as well as the interaction of fluxes and currents in transformers and electrical machines.

ENB270 Engineering Mechanics of Materials

Pre-requisites	ENB101 or ENB110
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces calculating the stress produced in various members of a structural system due to the forces applied to them, and how to determine the design specifications (size and shape) of the members to withstand the forces to prevent the structural system failing.

ENB272 Geotechnical Engineering 1

Equivalents	CEB209, CEB232
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Soil mechanics is a part of geotechnical engineering, soil types, their description, classification and engineering properties. The unit includes the following: granular and cohesive soil classification systems; volume and mass components; density and air voids; determination of soil geostatic vertical pressures; pore water pressures and effective stress; permeability theory and fluid seepage in soil, with erosion and piping analysis; soil shear strength assessment and application to retaining wall lateral pressures; retaining wall design; slope stability analysis and stabilisation. Computer simulation and analysis programs are used where appropriate.

ENB273 Civil Materials

Pre-requisites	ENB270 or ENB102. ENB270 can be studied concurrently.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit provides students with a sound and practical approach to material properties and selection so that they may adapt to scientific and technological changes in the variety of products entering the market. They understand where the engineer fits in a quality assurance program and become aware of the numerous components of quality assurance and the costs generated by quality control and assurance. Students become aware of the effect of the working environment on different engineering materials. Among other things, they study the behaviour of concrete from the time it is manufactured to the end of its life, and develop knowledge of the parameters involved in manufacturing good concrete, and the consequences of delivering poor concrete.

ENB274 Design of Environmentally Sustainable Systems

Pre-requisites	BEB200 or ENB200 or ENB100 or UDB100 or SCB110
Equivalents	CEB214, UDB214
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit extends and applies the knowledge developed in BEB200 Introducing Sustainability to important issues such as site investigation, development of site planning criteria, site planning, environmental management and quality, pollution prevention and control, and resources and waste management. BEB200 and ENB274 form the foundations of the civil and environmental degree. This unit builds upon generic competencies acquired in BEB100 Introducing Professional Learning and ENB271 Design of Structural Timber and Earthworks. It also provides transport planning fundamentals, which will be built upon in ENB372 Design and Planning of Highways and ENB379 Transport Engineering and Planning Applications.

ENB275 Project Engineering 1

Equivalents	CEB216
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit commences with the development of the construction

techniques common to site investigation, earthworks, pile driving, deep foundations, reinforced and prestressed concrete and steel erection. This operational understanding is extended into a study of the practices used to estimate cost and to administer contracts, including planning and the legal implications of operating in a commercial environment. The unit concludes with the issues surrounding the uncertainty of weather and of operating in remote environs.

ENB276 Structural Engineering 1

Pre-requisites	ENB102 or ENB270
Equivalents	CEB215
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: development of the method of moment distribution and its application in analysis of continuous beams and frames; theory of influence lines and its application to determine the effects of moving loads on beams and trusses; 'pattern loading' on frames and continuous beams; behaviour of reinforced concrete members; applications in the design of beams and columns.

ENB277 Construction Engineering Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A study of the Workplace Health and Safety Act 1989/1990, the regulations applying and Codes of Practice. The application of this legislation to a Site Safety Management Plan. Basic understanding of negligence, duty of care, nuisance, fraud and conversion. Contract Law including elements of contract, content of a valid contract, collateral, contract misrepresentation, implied terms; formal requirements and part performance; contract documents and their interpretations; substantial performance and quantum meruit.

ENB280 Hydraulic Engineering

Credit Points	12
Campus	Gardens Point

This unit primarily provide a basic understanding of hydraulic (fluid) principles and an understanding of the use of these principles in engineering applications. The main topics to be covered are: Units and properties of fluids, Forces in static fluids, Buoyancy, Kinematics and continuity, The energy equation and the momentum equation; Similitude and dimensional analysis, Lift and drag, Frictional flow in pipes, Application of pipe resistance formulae, Fitting.

ENB301 Instrumentation and Control

Pre-requisites	MAB126 or MAB182 or MAB132
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit introduces the student to classical control systems, analysis and synthesis, and implementation in an industrial control context. It introduces the principles of electrical measurements and instrumentation, sensors, PLC, DSC and industrial networks, and foundation of feedback control theory for engineers.

ENB311 Stress Analysis

Pre-requisites	ENB102 or ENB212
Equivalents	MMB212
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Further analysis of stress and strain; torsion of prismatic sections and thin-walled sections; axisymmetric problems; energy methods; thin plates. Introduction to FEA including the use of a FEA software.

ENB312 Dynamics of Machinery

Pre-requisites	ENB211
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Kinematic and dynamic analysis of planar linkages and mechanisms; multi-degree of freedom systems with steady and transient vibrations, Introduction to noise.

ENB313 Automatic Control

Pre-requisites	ENB211
Equivalents	ENB301
Credit Points	12
Campus	Gardens Point

This unit introduces you to the theory and practice of control systems engineering. The unit introduces system modelling principles for mechanical, electrical and electromechanical systems, using the Laplace transform to build transfer-function models of system components. The unit emphasizes the practical application of control theory to the analysis and design of feedback systems to ensure stability, reduce steady state errors and improve transient response.

ENB314 Industrial Noise and Vibration

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit is about the study of noise and vibration measurement and control which is experienced in industry. It includes a basic understanding of the theories and capable of modelling and predicting noise and vibration in an industrial environment. This unit will provide you with sufficient experience in instrumentation and measurement of noise and vibration and to apply them in industry.

ENB315 Motor Racing Vehicle Design

Pre-requisites	ENB316
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

After studying Fundamentals of Mechanical Design and Design of Machine Elements, in this unit you will study design of different systems of motor racing vehicles. This will accomplish systematic study of Mechanical Design and will enable you to carry out design of race vehicles and prepare them for a competition. Attention will be paid to styling and ergonomics as well as construction methods used in building race vehicles. The topics covered include: Introduction. Concept development of a race vehicle. Tyre selection. Suspension geometry, components and alignment. Brakes. Race car handling. Engine and engine tuning. Drive train (gearing and differentials). Frame and body. External and internal aerodynamics of a race vehicle. Driver compartment (fitting and comfort). Testing and preparation for a competition. Safety in motor racing (accident avoidance and driver protection).

ENB316 Design of Machine Elements

Pre-requisites	ENB215
Equivalents	MMB381
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Analysis of operating conditions and their impact on design solutions, design of fasteners, shafts and other mechanical components, design of springs, Design for manufacturability, fundamentals of lubrication, computer aided design (solid modelling), frames and housings.

ENB317 Design and Maintenance of Machinery

Pre-requisites	ENB316
Equivalents	MMB382
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Design of equipment for special applications such as pressure vessel, food processing, Design of machine system, Optimisation of design, machinery failure, prediction, analysis and prevention. Design for reliability application of FMEA, Condition monitoring, ethics, Fundamentals of friction , wear related to design, Failure analysis & OH&S.

ENB318 Biomechanical Engineering Systems

Pre-requisites	ENB211
Equivalents	MMB391
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Topics covered in this unit include an appreciation of the mechanics of the tissues of the joints (micro mechanics or tissue mechanics) and the function of the body during normal activities (macro-mechanics or biomechanics). This unit is designed to develop an understanding of the complex properties of the individual tissues and practical competencies in the evaluation of human function and performance from a biomechanical perspective. Biomedical engineers require the ability to analyse the mechanics of the human body for applications such as prosthetic design (both artificial limbs and replacement joints), design of assistive devices for people with disabilities, sporting performance, ergonomic tasks, and other health related areas.

ENB319 Biomechanical Engineering Design

Pre-requisites	ENB215
Equivalents	MMB392
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is structured to further develop the engineering design skills of students, with particular emphasis on the role of computer-aided design (CAD), materials selection, manufacturing processes, assembly and maintenance in the design and management of bio-engineering devices. A knowledge of manufacturing processes, fundamentals of engineering design, engineering drawing and engineering materials is assumed. Contents include design for manufacture, materials selection, computer-aided design and solid modelling, rapid prototyping techniques, user interface, and case studies of selected medical devices.

ENB321 Fluids Dynamics

Pre-requisites	ENB201 or ENB221
Equivalents	MMB352
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Hydraulic and pneumatic systems; design, analysis and performance of pumps, turbines and fluid couplings; unsteady pipe flow; flow around solid bodies, including potential flow and boundary layers; compressible flow and shock waves.

ENB322 Biofluids

Pre-requisites	ENB201 or ENB221
Equivalents	MMB362
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The mechanics of fluids in biological and biomedical systems differs from industrial applications as most of the fluids encountered exhibit viscosity that changes in a non-linear manner with shear rate. It is therefore necessary, when designing a second course in the mechanics of fluids for medical engineers, to examine the particular properties of the fluids that might be encountered and to introduce techniques to analyse their behaviour. It is also important to consider how the properties of the fluids relate to their biological function and the relevance of their properties to the design of associated equipment.

ENB329 Mechatronics Project 2

Pre-requisites	ENB229 and ENB243 and ENB244
Credit Points	12
Campus	Gardens Point

ENB329 is a project unit with a hands-on application to advanced mechatronics principles. You will focus on the mechanics, electronics, and embedded software principles behind mechatronics. The substance of the unit revolves about the research, design, and implementation of an advanced mechatronic product to conform to a customer's needs.

ENB331 Materials and Manufacturing 2

Pre-requisites	ENB231
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit extends the formative body of knowledge gained in ENB231 and introduces the shear deformation mechanisms of engineering material and how these properties can be used to understand the mechanics of metal cutting. Descriptive and analytical information about different material removal processes and material failure mechanisms are provided to you through lectures, tutorials, practical laboratory and case studies. The unit also provides you with an excellent opportunity to apply the knowledge in the design and manufacture of a component.

ENB333 Operations Management

Equivalents	MMB476
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit develops students' ability in applying quantitative techniques in solving different types of industrial operations problems. Topics include: product mix, assignment and transportation models; location and layout

decisions, job design analysis; project planning; quality control and the use of simulation in operations management.

ENB334 Design For Manufacturing

Equivalents	MMB374
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Topics covered in this unit include: basic concepts in the analysis of a mechanical engineering design, relating the design requirements to a range of manufacturing processes; an understanding of the complete manufacturing specifications for mechanical designs based on functional requirements, manufacturing processes, interchangeability and standardisation; introduction to the basic principles in the design of jigs and fixtures in manufacturing.

ENB335 Modelling and Simulation For Medical Engineers

Pre-requisites	ENB318
Equivalents	MMB496
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Traditional experimentation techniques can often not be applied to investigate the mechanics of biological systems. Medical engineers are often then required to use modelling and simulation techniques to understand the behaviour of biomechanical components and/or systems. This unit introduces you to some of the fundamental principles of modelling and simulation techniques and their applications in Biomedical Engineering.

ENB336 Industrial Engineering

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Aim of this unit is to develop skills and understanding the concepts and techniques of lean manufacturing (methods engineering). These includes identifying wastes using Value Stream Mapping (VSM), 5S, SMED, JIT, plant layout, cell design with proper material handling and balance and job design with due consideration to ergonomics.

ENB338 Biomaterials

Equivalents	MMB292
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Topics covered in this unit include: an understanding of the relationships between the properties, failure mechanisms, processing and microstructures of various materials used for medical applications and their interaction with human tissues; an understanding of the fundamentals of the use of materials in a medical environment and an understanding of the fundamentals of materials properties and processing; consideration of metallic, ceramic, polymeric implant materials; composites as biomaterials; structure-property relationships of biomaterials; tissue response to implants; soft tissue replacements; hard tissue replacements.

ENB339 Introduction to Robotics

Equivalents	MMB451
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces you to the components, systems and mathematical foundations of robotics. The unit introduces the technologies and methods used in the design and programming of modern intelligent robots, and encourages critical thinking about the use of robotic technologies in various applications. The unit emphasizes the practical application of robotic theory to the design and synthesis of robotic systems that respond accurately and repeatably.

ENB340 Power Systems and Machines

Pre-requisites	ENB103 or ENB250
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is a core unit that develops the basic topics essential for an electrical engineer working in areas that include the resources sector, the process industries, electrical power utilisation, electric power generators as well the electricity supply industry. Topics covered in machines include magnetic circuits, single phase and three phase transformers; electric machines including electromechanical energy conversion, reluctance motors, induction motors, synchronous machines, D.C. machines, stepper motors, P.C. motors; motor control; heating, cooling and rating. Power system topics include power generation and energy sources, electricity market operation, fault calculations, basic protection and power system operation, in particular real and reactive power control.

ENB342 Signals, Systems and Transforms

Pre-requisites	ENB242
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit covers the area of Signals in Linear Systems for which a detailed study of Fourier theory applied to both analogue and discrete-time signals and to the analysis of linear systems will be given. Systems will be represented in time as well as in frequency and various characteristics and relationships in the two domains will be discussed. The students will be introduced to the fundamentals of analogue and discrete-time signal processing; analogue and discrete Fourier transform; linear and discrete convolution. Finally, the students will learn the fundamentals of digital filter design and implementation, with examples and applications arising from various disciplines.

ENB343 Fields, Transmission and Propagation

Pre-requisites	ENB103 or ENB250
Equivalents	EEB641
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Fundamental concepts of static and time varying electromagnetic fields; Maxwell's equations and the characteristics of their solution, such as wave equations, losses in various media and energy flow; numerical methods; transmission line theory, terminated line, Smith Circle Chart usage and lattice diagram; propagation modes in waveguides and optical fibre; free-space propagation, reflection, refraction, diffraction; basic antenna theories and antenna parameters, Frii's transmission equation, half-wave dipole, two-element array.

ENB344 Industrial Electronics

Pre-requisites	ENB240
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit gives a basic understanding of linear and switching applications in industrial electronics. Practical knowledge associated with interfacing and design is developed. Students will also study the theory and design of advanced digital embedded systems as well as the practicalities associated with implementation. It also covers power rectification, controlled rectification, inverters, AC and DC drives, uninterruptible power supplies and power switching components.

ENB345 Advanced Design and Professional Practice

Pre-requisites	ENB245
Equivalents	EEB684
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Detailed design and realisation of typical electronic subsystems used in all areas of electrical and electronic systems engineering. The unit enhances the student's ability in solving complex engineering problems. The design builds on the theoretical knowledge gained in other units. The student is required to write a detailed technical report and also give an oral presentation on her/his design.

ENB346 Digital Communications

Pre-requisites	ENB342
Equivalents	EEB560
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Revolutionary developments in the field of Digital Communication Technology have enabled improvement in the characteristics of communication systems in order to meet the performance requirements for transmission of information for private, business and industrial applications. This unit which covers Elements of a Digital Communication System aims at providing the students with an in-depth understanding of the theory and applications of digital communication systems and technology.

ENB347 Modern Flight Control Systems

Pre-requisites	ENB348
Equivalents	EEB535
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The modules of this unit are Control Systems B and Flight Control Systems. The unit provides students with an understanding of control system design and analysis for discrete time control systems as well as using the state space approach. Furthermore, it introduces students to different aspects of flight control including factors affecting the performance and simulation. Specific topics such as artificial stability and MILSTDs are also covered.

ENB348 Aircraft Systems and Flight Control

Pre-requisites	MAB127 or MAB182 or MAB132
Equivalents	EEB431
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The modern aircraft is an extremely complex machine comprised of many systems. These systems include propulsion, engine management, flight management, flight control, navigation, and life support and flight data recorders. The safe and reliable operation of all these systems is required to conduct a single flight. The modern avionics engineer requires an understanding of all these systems and how they operate on modern civil and military aircraft. This unit places emphasis on the flight control systems of modern aircraft which is one of the primary sub-systems. As part of this, methods for modelling the dynamic behaviour of aircraft, missiles and spacecraft are introduced, along with the criteria for stability.

ENB350 Real-time Computer-based Systems

Pre-requisites	ENB244
Equivalents	EEB566
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit covers the area of embedded systems and real-time kernels. C programming is reviewed in the context of real-time applications where it is often mixed with assembly language. Data representations, input-output programming, concurrency, scheduling, memory management and system initialisation are discussed. Programming laboratory exercises introduce development tools and reinforce fundamental concepts such as polling, interrupt driven input-output, serial port communication, pre-emptive and non pre-emptive scheduling, resource sharing, priority inversion and deadlock. Students develop a simple real-time process control application using programmable logic and micro-controllers.

ENB352 Communication Environments For Embedded Systems

Pre-requisites	ENB350
Equivalents	EEB666
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit addresses the following: computer networks; network programming; open network foundations; embedded systems; client/server; bus architectures; network controllers; distributed systems in automation and process control; embedded Java; distributed objects; distributed databases; distributed operating systems.

ENB354 Introduction To Systems Design

Equivalents	EEB585
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Introduction systems engineering methodologies and techniques as applied to Aerospace Engineering projects. The students receive formal lectures and apply the knowledge gained to a specific case study or mini project.

ENB355 Advanced Systems Design

Pre-requisites	ENB354
Equivalents	EEB685

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is based on the experiences already gained in first semester. The purpose of this unit is to lead to a deeper understanding of the system engineering process and the relations between the project phases, requirements, review processes, documentation and/or related deliverables. Practical examples will be given based on currently ongoing projects. A further objective of this course is to outline the importance of understanding contractual relations of Test Reports (TR), Design Documents (DD), Verification and Validation (V&V), Acceptance Tests (AT) and delivery.

ENB356 Military Combat Electronics

Pre-requisites	ENB343
Equivalents	EEB831
Credit Points	12
Campus	Gardens Point

This unit deals with knowledge of sophisticated weapon systems and protection against threat for aircrafts in the military context. The unit addresses the following topics: sound generation propagation and analysis in the military environment; principles and application of lasers to sighting and guidance systems; principles of detection of submarines using magnetometers; infra red propagation and its use in detection and weapons guidance; ECM/ECCM; sonar processing; laser processing and guidance; radar guidance/sighting; gun sights; weapons control systems; IFF/transponders; command and control; magnetic anomaly detection; tactical navigation systems; infra red. Some ethical, social and moral aspects concerning military systems will be discussed.

ENB371 Geotechnical Engineering 2

Pre-requisites	ENB272
Equivalents	CEB322
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes: further study on the behaviour of soil and rocks; determination of subsurface pressures from surface loadings; soil settlement including time related clay consolidation settlement and immediate settlements on sand and clay as related to shallow foundations; assessment of bearing capacity and allowable bearing pressures under shallow foundations; pile foundation systems and analysis for capacity and settlement; rock mass behaviour, classification and joint shear strength applied to slope stability assessment and stabilisation measures.

ENB372 Design and Planning of Highways

Equivalents	CEB317
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Civil engineers as professionals are responsible for the delivery of major transport infrastructure items through the stages of inception, planning, design, development, maintenance and management. The purpose of such projects is to improve the quality of life of the community by offering safe and efficient access to activity locations and mobility between locations. In delivering such infrastructure it is imperative that social, economic, and environmental impacts and benefits are considered and addressed. This unit offers students an opportunity to explore the role of the civil engineer in the preparation of a feasibility design study for a road as a major transport infrastructure item.

ENB373 Design and Construction of Steel Structures

Pre-requisites	ENB375
Equivalents	CEB329
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the study of steelwork: design and construction; structural systems; load paths; rules of thumb; building layout; function and form; cladding; element and wind loading evaluation; idealisation, analysis, design action effects; space gas, columns and rafters; trusses and bracing; connections; knee ridges; base plate design; procurement and fabrication; scheduling and erection.

ENB375 Structural Engineering 2

Pre-requisites	ENB102 or ENB270 or ENB276
Equivalents	CEB318
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit considers the following: limit states design of steel structures; buckling and ultimate strength behaviour of steel structures; tension members, compression members; local and global buckling (flexural and flexural torsional buckling modes) concepts as applied to compression members and beams; effective lengths of compression members and beams; design of beams; effect of lateral restraints on buckling; web stresses including web crippling and buckling; beam-columns; bolted and welded connections; unsymmetric bending of beams including principal second moments of area; shear stresses in beams of thin-walled open cross-sections and their shear centres. Most cold-formed steel sections are unsymmetric and hence the latter topics are useful in steel design.

ENB376 Transport Engineering

Equivalents	CEB323
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The transport system is an essential part of our physical infrastructure. It is imperative that civil engineers are able to undertake typical road and traffic engineering investigations, analyses and designs. These require an understanding of the intent of individual road system elements, how they operate, and how they are delivered and managed: this understanding is developed in this unit. Further, it is important that civil engineers are able to undertake multi-modal transport surveys to gain an understanding of the operation of a particular transport system.

ENB377 Water and Waste Water Treatment Engineering

Pre-requisites	ENB201 or ENB280
Equivalents	CEB321
Credit Points	12
Campus	Gardens Point

The provision of a safe, wholesome and adequate supply of water and the proper

treatment, disposal, and reuse of wastewater are essential for protecting human health and well-being. Water and wastewater treatment are required for the control of water-born diseases and the provision of proper sanitation for urban, rural, and recreational areas. Water and wastewater treatment engineering is a major field of civil and environmental engineering and is manifested by sound principles and practice in terms of solving sanitation problems.

ENB378 Water Engineering

Pre-requisites	ENB201 or ENB280
Equivalents	CEB319
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The main topics to be covered in this unit follow: the hydrologic cycle and its application to the estimation of runoff from small catchments; probability and risk and the selection of design floods; hydrologic data; estimation of peak runoff using the Rational Formula estimation of runoff hydrographs using rainfall-runoff routing models; the hydraulic characteristics of open channels; uniform flow, gradually varied flow and rapidly varied flow; the hydraulic characteristics of culverts and retention basins; the operation of urban drainage systems.

ENB379 Transport Engineering and Planning Applications

Equivalents	CEB419
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The environmental engineer must be familiar with the role of each transport mode in the overall transport task, along with current issues associated with each mode. This must be overarched by an understanding of the system for planning and management of transport projects and systems, particularly in context with economic, environmental and social attributes. This unit provides students who wish to pursue a career in environmental engineering with an understanding of these areas. The unit also includes case studies covering the environmental impacts for some of the urban and rural transport and infrastructure projects especially in the area of community consultation.

ENB380 Environmental Law and Assessment

Pre-requisites	ENB383
Equivalents	CEB416
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The adverse consequences of human activity have resulted in the adoption of various international treaties, enactment of stringent legislative requirements, and a growing demand for improved management practices. Engineers need to be aware of the way in which the law works, to be able to communicate with lawyers, and to recognise the legal and political implications of their projects. An understanding of the local, state, and federal governments' power to regulate development and the legal and planning requirements and assessment procedures is essential for professional engineering practice.

ENB381 Civil Engineering Construction

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Detailed studies of the methods and equipment employed in the execution of civil engineering construction. Includes earthworks, heavy foundations, steel fabrication and erection, bridge construction, marine construction, water retaining structures, road and airfield construction and mechanical erection.

ENB382 Estimating in Engineering Construction

Pre-requisites	ENB381
Equivalents	CEB513
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The majority of the unit applies construction, planning and commercial understanding previously developed to fundamental estimating skills suited to firm bidding. The conversion of an estimate to a tender, includes the review process, the determination of risk and profit and the drafting of a tender letter conclude the critical content. A comparison with sub-contract pricing and the use of Bills of Quantity is studied and is linked to conceptual estimating, preliminary estimates for budgets and proposals.

ENB383 Environmental Resource Management

Equivalents	CEB418
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit addresses management of solids and hazardous wastes generated from domestic, commercial, and industrial sources. It includes the following: waste minimisation; promotion of efficient use of resources; promotion the use of waste through recycling and energy production; viewing waste as a resource; reducing the mass, volume and toxicity of the waste; disposing of waste in a socially and environmentally acceptable manner; waste avoidance; recycling; energy production; treatment; disposal. Waste management is an important aspect of civil and environmental engineering education.

ENB384 Design of Masonry Structures

Pre-requisites	ENB102 or ENB270
Equivalents	CEB516
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Historic development & Modern Masonry; Constituent Materials – testing standards; Design for durability; Limit state design principles – capacity & serviceability; General design aspects of walling, Fire design provisions; Out-of-plane behaviour of unreinforced masonry walling; Design of facades, ties & accessories; Unreinforced masonry – in-plane behaviour, shear walls & construction detailing; Reinforced masonry – design for flexure, in-plane and out-of-plane shear; Design for compression & slender walls; Novel designs – prestressed masonry, dry-stack masonry, thin bed masonry, geometrical sections, cavity walls and diaphragm walls; Case study - industrial building / medium rise apartment building.

ENB421 Thermodynamics 2

Pre-requisites	ENB222 and ENB321
Equivalents	MMB351
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT)

Applications of heat transfer theory in steam power plant, refrigeration and gas turbines; steady state and transient conduction; convection with internal or external flow; free convection in stationary fluids; boiling and condensation; thermal resistance networks; heat exchangers; radiation heat transfer.

ENB422 Energy Management

Equivalents	MMB451
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Topics covered in this unit include: Global energy and climate issues, the systematic process by which energy use is monitored and analysed; individual treatment of electricity, fuels and their properties, compressed air, buildings, cycle requirements, energy recovery equipment; financial analysis of proposals. Environmental aspects will be considered for each topic.

ENB423 Heating, Ventilation and Air-Conditioning

Pre-requisites	ENB201 or ENB221 or ENB222
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Heating, Ventilation and Air Conditioning (HVAC) is closely related to human habitation, comfort and productivity. It also consumes considerable amount of energy. With increasing global warming, it is becoming one of the most important engineering systems in modern buildings. This unit will introduce you basic principles of HVAC and refrigeration systems. It will discuss the design factors and practices related to the design and operation of HVAC systems. It will also provide you with other relevant knowledge commonly used in the building services industry. This course should therefore provide you a good basis to undertake further study, research and professional work in this field.

ENB432 Engineering Asset Management and Maintenance

Equivalents	MMB470
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: engineering asset management policy statement; overhaul and replacement of engineering assets; organisation for maintenance; maintenance planning and control; failure mode and effect analysis; reliability, maintainability and availability analysis; risk assessment; spare parts inventory management.

ENB433 Plant and Process Design

Pre-requisites	(ENB221 or ENB201) and ENB222 and ENB231
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit is of great assistance to graduates who will work in one of the many industry where Mechanical Engineers are concerned with Plant and Process Design. These industries use heat exchangers, piping systems and cooling towers intensively. This would include power stations, mineral processing, sugar/processing and refinery/chemical industries. The unit is taught by university and industry specialists who have considerable experience in their chosen field.

ENB434 Tribology

Pre-requisites	ENB201 or ENB221
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Tribology is the study of friction, wear and lubrication. In this unit, the knowledge you acquire is applied to solve problems prevalent in engineering. Topics covered range from the theory of friction, lubricant properties and chemistry, to the control of friction and wear by proper selection of both materials and lubricants.

ENB435 Computer Integrated Manufacturing

Equivalents	MMB471
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Topics covered in this unit include: introduction of the concepts of strategic planning for computer integrated manufacturing; concepts of advanced manufacturing technologies and the various components of computer integrated manufacturing system; the importance of concurrent engineering in the context of CIM; introduction to the principles of modelling and simulation techniques as a design and evaluation tool for manufacturing systems.

ENB436 Mechatronics System Design

Equivalents	MMB478
Credit Points	12
Campus	Gardens Point

This unit provides students with an understanding of design and interpretation of hydraulic and pneumatic circuits (including graphical symbols, fluid logic and components of fluid systems) and a basic understanding of PLC programming for control of manufacturing systems with the emphasis on hands on practice of developing a control system for a given process. Topics include the following: mechatronics systems design; power supply; introduction to fluid power and graphical symbols; hydraulic and pneumatic systems; simple circuits; fluid logic; logic symbols and circuits; hydraulic components, fluids, system design, circuits; pressure compensated flow control.

ENB437 Health Legislation in the Medical Environment

Equivalents	MMB492
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to the types of legislative control in the health and medical industries. It highlights the minimum requirements in relation to the role of medical engineers and their contribution to successful and ethical relationships with medical, health legislative and regulatory affairs professionals. Content includes: national and international legislative controlling bodies and codes (EC, TGA, FDA); structure and sources of legal system (State and Federal); Good Manufacturing Practice (GMP); ISO9000 Quality Systems; Total Quality Management; ethics committees and clearance; industry case studies.

ENB440 RF Techniques and Modern Applications

Pre-requisites	ENB343
Anti-requisites	ENB445
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit addresses the following: lumped and distributed microwave and RF circuits, including [y], [t] and [s] parameters; impedance matching techniques; passive and active microwave devices; RF circuit design techniques; microwave and RF measurement techniques; linear antennas and microwave antennas; analysis and synthesis of antenna arrays; specialised antennas and antenna measurements; EMC definition, standards and regulations; test plan; measurements; interference coupling; susceptibility; EMC design techniques, component selection, circuit layouts, grounding, shielding, filters, suppressors, isolation and safety; EMC management; propagation of electromagnetic fields in electrical materials; application of numerical methods.

ENB441 Applied Image Processing

Pre-requisites	ENB342
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce the fundamentals and applications of image processing to the students. The unit covers topics such as image acquisition, image representation, image enhancement, image segmentation, and image filtering. These topics will be introduced using a project based approach with applications to engineering practical problems.

ENB443 Space Technology

Pre-requisites	MAB127 or MAB182 or MAB132
Equivalents	EEB732
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit offers a general introduction to space technology. It includes the following: coordination of systems and time references used within space flight dynamics; discussion of rocket ascent trajectories and satellite orbit dynamics; detailed description and discussion of satellite as a system and subsystems; description and discussion of rocket as a system; introduction to satellite launch systems and satellite applications.

ENB444 Spacecraft Guidance and Navigation

Pre-requisites	ENB443
Equivalents	EEB833
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: general introduction to spacecraft guidance and navigation systems and concepts; coordination of systems and time references applied within spacecraft guidance and navigation; discussion of spacecraft orbit and attitude dynamics; detailed description and discussion of GNSS system aspects; GPS observables and data processing; description and discussion of spacecraft guidance and navigation sensors and systems; methods for spacecraft orbit and attitude determination; discussion of spacecraft actuators.

ENB445 RF Communication Technologies

Pre-requisites	ENB343
Equivalents	EEB766
Credit Points	12
Campus	Gardens Point

The unit covers various communication and signal processing technologies that are used in point to point and point to multi-point; wired and wireless communications including microwave terrestrial and satellite communication; last miles solutions including ADSL, VDSL and wireless local loops; ad hoc radio transmission such as the Bluetooth and Home RF, Wireless LANs including wireless infrared transmission and IEEE8012.11 standard.

ENB446 Wireless Communications

Pre-requisites	ENB346
Equivalents	EEB960
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit addresses the following: cellular mobile radio system concepts; mobile radio propagation; spread spectrum techniques and CDMA; speech coding modulation and channel coding techniques for GSM and CDMA; fading mitigation through diversity; inter-symbol interference mitigation; the GSM and CDMA standards; the WAP and the GPRS; introductions to UMTS/IMT2000; introduction to personal communications; introduction to blue tooth technology; other wireless systems including wireless LAN, wireless local loop, microwave local multipoint distribution systems (LMDS) and LEO satellite communication.

ENB447 Navigation Systems For Aircraft

Pre-requisites	MAB127 or MAB182 or MAB132
Equivalents	EEB835
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Modern aviation continues to flourish, with millions of passenger flying each year throughout the world and in all kinds of weather condition. Safe and reliable navigation is one of the primary functions that enable these flights. In past years pilots navigated visually relying on fair weather conditions. Today pilots use navigation aids to allow navigation in all types of weather conditions day or night. This unit presents the principles and practices of modern navigation sensors and systems.

ENB448 Signal Processing and Filtering

Pre-requisites	ENB342
Equivalents	EEB941
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit gives a comprehensive introduction to the representation and processing of signals distorted or corrupted by noise, and the systems needed to process them. Techniques to enhance, detect , classify and estimate useful information from the signals in the presence of noise and other distortions will be presented. The methods presented will be tested on real signals drawn from different engineering applications, such speech signals, image signals, biomedical signals and signals in communications systems.

ENB451 Aerospace Radio and Radar Systems

Pre-requisites	ENB343

Equivalents	EEB760
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes a thorough treatment of the elements of radio and radar systems, ground, air and space based. This is a highly technical unit and an emphasis will be put on the solution of technical problems and the knowledge required to solve these problems. Electromagnetic Compatibility and Electromagnetic Interference principles are covered in detail. Analysis of antennas, modulation techniques, amplifiers and filtering techniques for radio, as well as, types of radar and applications, Mechanisms for Ranging, Doppler Radar and Receiver Processing are some of topics addressed.

ENB452 Advanced Power Systems Analysis

Pre-requisites	ENB340
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to introduce you to the basic topics of power system analysis relevant to engineers involved in both operations and planning. Specific tasks will be evaluation of faults on lines, load flow and stability analyses using commercial packages.

ENB453 Power Equipment and Utilisation

Pre-requisites	ENB340
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit emphasises the use of relevant standards to the specification and design of electrical equipment for the use of electrical energy supply for buildings and for earthing. Design approaches emphasise current engineering practise.

ENB454 Power System Management

Pre-requisites	ENB340
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this subject is to develop skills in the operational management and the overall system management of Power systems. There are many decisions to be made in the context of imperfect information. This subject provides tools to provide a degree of structure to the decision process, whether at purchase time or in daily operation. These tools cover the areas of risk analysis, reliability and asset management and extend to the operational areas of utilization of equipment and quality of supply. The outcome is to achieve a balance between maintenance and capital purchases between investment and reliability.

ENB455 Power Electronics

Pre-requisites	ENB344
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit introduces the student to advanced industrial electronics and power converters with different applications. Students learn how to model power converters, design a controller and simulate power electronic systems using Matlab/Simulink software for different applications. They also learn practical issues such as EMI, efficiency and losses to design a controller and power circuits.

ENB456 Energy

Equivalents	EEB911
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Renewable energy sources including solar and wind energies are becoming more important than ever due to increasing energy demand, dwindling oil and gas supplies, increasing pollution levels in the atmosphere and the associated global warming effects. Renewables may also help improve competitiveness and have a positive impact on regional development and employment. An overview of the different energy sources will be covered followed by an understanding of the characteristics of solar energy, radiation calculation, measurements and applications in remote, hybrid and grid interactive configurations. Students will be equipped with fundamentals of alternative energy sources including solar thermal, photovoltaics and wind conversion technologies.

ENB457 Controls, Systems and Applications

Pre-requisites	ENB301
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Control systems are playing an increasingly important role in process control, energy management and utility management. This unit is concerned with the application of advanced control systems with an emphasis on physical architectures and implementations. Topics covered include control system actuators, sensors and controllers, control system architectures, human machine interfacing, adaptive control strategies and intelligent control.

ENB458 Modern Control Systems

Pre-requisites	ENB301
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the student to the following concepts: Discrete time control systems and their design, state space modelling and control system design using state space techniques, linear optimal control, non-linear systems, and adaptive control with applications of neuro-computing and fuzzy logic.

ENB471 Design of Concrete Structures and Foundations

Pre-requisites	ENB276 and ENB371
Equivalents	CEB424
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Concrete design and construction; roles of building professionals; current structures; structural systems; load paths; rules of thumb; building layout, function and form, design effects; seismic and element loads; formwork and placement constraints; reinforced and prestressed concrete slabs, beams and columns; architectural issues, connections and detailing; site investigation, spread and pile footings and foundations; retaining walls.

ENB472 Project Engineering 2

Pre-requisites	ENB275
Equivalents	CEB412
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit builds on the understanding of the physical aspect of construction gained in Project Engineering 1 to develop the skills needed to manage a project. Further studies in estimating, contracts administration and cost control provide support for a major computer simulation exercise based on the construction management of a complex industrial project. This experiential component provides a framework for the exploration of issues in the legal, managerial and technical areas which form the basis for the professional presentations that conclude the unit.

ENB473 Design and Construction of Multi-storey Buildings

Pre-requisites	ENB275 and ENB375
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the structural, material, construction and design units of previous semesters, in particular Design of Steel and Concrete Structures, and applies that knowledge and skills to a multi-storey building on a real site to perform a real function. The unit covers a range of topics as applicable to multi-storey buildings, namely, structural systems, analysis techniques, design and construction methods, composite floor systems, steel framed buildings, construction, fire safety and durability. Using a realistic building project it enables QUT students to prepare themselves to pursue a career in structures and/or construction. There will be a special emphasis on the interdependency between construction and design. The aim of this unit is to help you to learn and develop professional engineering skills with special emphasis on analysis, design and construction of multi-storey buildings.

ENB474 Finite Element Methods

Pre-requisites	ENB475
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The Finite Element Method (FEM) is 20th century's answer for treating complex problems, which had hitherto remained impossible to solve, in several areas of engineering such as structural, geotechnical, electrical, heat conduction, etc. The applications of this powerful computer based method has rapidly extended to cover several areas of engineering. In the structures area, the displacements and stresses in complex concrete connections, dams, deep beams with openings, shell structures, etc., can only be obtained by finite element analysis. Basic theory of FEM and its features such as engineering actions, modelling techniques, choice of elements, boundary conditions and input data will be covered in this unit. It aims in equipping engineers with skills to apply FEM effectively in structural, geotechnical and water engineering problems.

ENB475 Structural Engineering 3

Pre-requisites	ENB276
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is an advanced structural engineering unit which builds up on previous knowledge in this area and covers applications. Load paths in structures and cable structures with applications in bridge engineering will be covered. The stiffness method, which is the basis of all structural analysis software packages will be covered in detail. The formation of plastic hinges (failure points) and failure mechanisms in structures will be treated with simple applications. Structural dynamics and vibrations in structures will be introduced and illustrated with applications. Application of structural dynamics will be extended to seismic engineering. The basics of seismic engineering and the use of the Australian code for analysing structures subjected to seismic loads will be covered.

ENB476 Civil Engineering Design Project

Pre-requisites	(ENB371 and ((ENB372, ENB376, and ENB378) or EN40MJR-CVCOENG)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Through preparation of various civil engineering design elements of a major project, this final design strand unit builds upon the earlier units to polish students' professional capabilities as expected of a graduate civil engineer. Students will be expected to apply to their project the knowledge and experience gained in the civil engineering sub-disciplinary core units including: Geotechnical Engineering 2, Water Engineering, and Transport Engineering. The aims of this unit are to provide you with an understanding of the role of the civil engineer within a major project, including the various technical activities undertaken, overall project management, and an understanding of community expectations.

ENB477 Facade Engineering

Pre-requisites	ENB375 or ENB311
Credit Points	12
Campus	Gardens Point

ENB478 Advanced Water Engineering

Pre-requisites	ENB378
Credit Points	12
Campus	Gardens Point

This unit primarily intended to provide detailed conceptual knowledge on river and coastal processes. The main topics to be covered under River Engineering are: catchment and flood plane management, river flow modelling, sediment transport and application of water sensitive urban design to urban systems. The main topics to be covered under Coastal Engineering are: wave theory, coastal inlets and canal systems, planning and design of coastal structures and coastal management and planning.

ENB481 Civil Engineering Project Management

Pre-requisites	ENB275
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Engineers are invariably required to manage projects. This unit reinforces the student's understanding of current management principles in the context of construction projects. Other topics include administration, cost control, claims, legal and insurance issues together with

outsourcing, problem solving, communication and dispute resolution. The focus of the unit is to ensure students develop an appreciation of the commercial and non-technical issues associated with successful projects. The aim of this unit is to help the student understand the nature of the decisions required of an Engineer managing a project and practising making these decisions within the fast-moving commercial and economic environment for such projects.

ENB485 Advanced Geotechnical Engineering Practice

Pre-requisites	ENB371
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to firstly, develop the generic technical skills required to identify and solve geotechnical engineering problems of the type commonly encountered by specialist geotechnical consultants, and secondly, to have a good understanding of some specialist techniques for site investigation, performance prediction and construction. The unit will be presented as study modules, each one emphasising a different area of geotechnical engineering. The study areas and the case studies used for practice may change from year to year depending on the availability of experienced practitioners and on current geotechnical projects and interests.

ENN510 Engineering Knowledge Management

Equivalents	MEN273
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP4 (BLK)

Knowledge management is an innovative process that needs to be closely aligned to organisation goals. The development of knowledge management systems requires a sound understanding of the related issues such as knowledge identification, knowledge development, knowledge preservation, knowledge representation and knowledge distribution. All engineering managers must have the fundamental skills and knowledge to understand, design and develop and manage knowledge management systems in an organisation. This unit provides the basic knowledge and skills to understand the complex issues of knowledge management that are essential to the career advancement of engineering managers.

ENN515 Total Quality Management

Equivalents	MEN177
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Total Quality Management (TQM) has evolved beyond its roots in statistics and the quality control function. Today, many observes consider it to be a framework for "excellent" management. The dominant themes are: a data-based approach to problem solving: a strong emphasis on organizational and behavioral considerations: a customer-oriented market- sensitive approach to designing and delivering both products and services: and finally, a desire for continual improvement. TQM practice is a pathway to the achievement of world class competitiveness.

ENN520 Advanced Signal Processing and Systems

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The concepts of signals, images and systems arise in a wide variety of fields, and the ideas and techniques associated with these concepts play an important role in such diverse areas of science and technology as communications, aeronautics and astronautics, circuit design, acoustics, seismology, biomedical engineering, process control, and speech and image processing. The field of signal and image processing has grown rapidly in the last few decades and it continues to grow in importance as technologies such as very large scale integration, programmable logic devices and high performance computing make it possible to implement digital signal and image processing systems for many practical applications.

ENN530 Asset and Facility Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Professionals are often involved in the management of infrastructure including transportation, water, energy, buildings and telecommunications. In today's business environment, the efficient maintenance and management of these assets and associated risks is critical. The professionals need to know how to manage the whole of life cycle of assets; organise maintenance based on condition and reliability assessments; and create as well as implement effective asset management and maintenance plans so as to meet the business objectives of the organisation.

ENN540 Engineering Optimisation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

In a society that recognises the impact of resource depletion and industrial activity on the environment, it is critical that professional engineers are equipped with the skills necessary to develop effective engineering conceptual solutions, optimise them, and then deliver them. This highly practical unit will introduce you to a range of advanced tools used in engineering concept development and optimisation, using mathematical and numerical methods.

ENN542 Statistical and Optimisation Methods for Engineers

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers an introduction to statistical methods and optimisation methods useful for engineers in practice. It includes the following: the process of stochastic research, linear regression analysis, simultaneous equation model, count data model, time series, classical optimisation methods, Nonlinear, geometric and dynamic programming.

ENN550 Energy Systems Fundamentals

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit immerses students in an integrated systems approach to the provision of energy services that are responsive to the global imperative for a transition to a low-carbon society in the

21st century. An Earth System Science (ESS) approach is utilised to develop an understanding the Earth's systems and the interactions between these systems, energy systems and social, technological and economic systems. The unit incorporates identification, analysis and evaluation of existing, transitional and future energy systems, with a core focus on the optimisation of the integrated system and sub-systems through effective knowledge-driven decision making.

ENN552 Solar Thermal Systems - Heat and Power

Pre-requisites	ENN550. ENN550 can be enrolled in the same teaching period as ENN552.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The sun's heat can be harnessed for a wide range of applications to meet various energy service needs. An understanding of solar geometry and the characteristics of various technologies will enable energy professionals to make informed decisions enabling the optimisation of this renewable energy source that is globally available.

ENN560 System Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is intended to provide you with an understanding of the technical skills necessary to implement the Systems Engineering "SIMILAR" steps, adopted by industry for systems design solutions: i.e. State the problem, Investigate alternatives, Model the system, Integrate, Launch the system, Assess performance, and Re-evaluate; in compliance with Australian and International standards where applicable. As part of a systems design team, you will have the opportunity to evaluate and develop your knowledge and skills to interact with other professionals, and to communicate in an appropriate and industry recognised manner.

ENN570 Enterprise Resource Planning

Equivalents	MEN272
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Enterprise Resource Planning (ERP) plays an increasingly significant role in large corporations. Today, many business analysts consider ERP to be essential for effective corporate functionality and increased productivity for private and government industries.

ENN579 Advanced Traffic and Transit Operations

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides you with vital advanced traffic and transit operations knowledge. It emphases your capability to relate technical, cognitive and communication skills learned in undergraduate studies and/or workplace to real traffic and transit operation problems, analyse and interpret the merits and limitations of possible solutions with regard to technical and social considerations. This unit will assist your professional engineering career when dealing with new problems with mastery of engineering knowledge, creativity, initiative, accountability and planning. On completion of this unit you will be able to apply advanced traffic analysis methodologies to critically analyse complex traffic systems; apply advanced transit analysis methodologies to critically analyse complex transit systems; use analysis outcomes to generate economically, socially and environmentally responsible solutions responsive to client's, agency's and/or community's needs.

ENN580 Automated Control Systems

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Feedback control systems form the basis of a large number of systems engineering applications in a diverse range of disciplines, including aerospace, robotics, power systems, and manufacturing. An advanced knowledge of real world control system issues, such as dealing with non-linearities and non-stationary phenomena, is essential for the advanced systems engineering practitioner.

ENN589 Intelligent Transport Systems

Credit Points	12
Campus	Gardens Point

ENN590 Project 2

Pre-requisites	ENN590-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This two-semester unit is a project unit aims to give students experience in solving advanced engineering problems in a relevant discipline and the opportunity to apply the knowledge gained throughout the course. Through the project students will gain experience in project identification, research planning, finding solutions and communications.

ENN590 Project 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This two-semester unit is a project unit aims to give students experience in solving advanced engineering problems in a relevant discipline and the opportunity to apply the knowledge gained throughout the course. Through the project students will gain experience in project identification, research planning, finding solutions and communications.

EPG001 Introduction To Power Plant

Credit Points	12
Campus	Gardens Point

THIS UNIT IS AVAILABLE TO BX20 AND BX21 STUDENTS ONLY. This unit provides an overview of the operation, performance and maintenance of large coal-fired boiler-turbine-generator plants. It is intended as an introduction to the whole of the power station plant and systems. Such coal-fired power plants consist of a water and steam cycle, a fuel (coal and air) cycle and control systems to optimise performance. A typical power station burns millions of dollars worth of fuel every week. Maximising plant efficiency in the face of plant problems, operational requirements and changes in fuel supply can save thousands of dollars each week and reduce the environmental impact of power generation. Electricity is a commodity being traded in a market, but unlike most other commodities it cannot be stored in any significant quantity. Understanding the context of the network and the electricity market is a crucial aspect of operating power plants.

EPG005 Project Delivery

Credit Points	12
Campus	Gardens Point

THIS UNIT IS AVAILABLE TO BX20 AND BX21 STUDENTS ONLY. This unit provides an overview of the techniques and tools required for the professional development of a project including the generation and submission of viable proposals. The successful development and implementation of such projects and the ability to appropriately manage projects and contracts related to plant equipment, maintenance and life schedules including refurbishment can save vast resources and directly affect the environmental impact within a power generation facility.

EPG006 Applied Thermodynamics

Credit Points	12
Campus	Gardens Point

THIS UNIT IS AVAILABLE TO BX20 AND BX21 STUDENTS ONLY. Many power station plant processes involve movement of heat from one component to another. This might be for the generation process itself, or simply maintaining equipment within operating temperature limits. Measuring and managing heat transfer processes are crucial for the effective and efficient operation of generating plant. The heat produced by the boiler in a power station is delivered to the turbine. Any heat not extracted from the steam by the turbine is then discharged to the atmosphere through the cooling towers. This unit considers ways of effectively moving the heat generated in the various processes in the power station plant, and extracting that heat to produce electricity.

EPG011 Industrial Electrical Power Distribution

Credit Points	12
Campus	Gardens Point

THIS UNIT IS AVAILABLE TO BX20 AND BX21 STUDENTS ONLY. This unit provides an overview of the aspects of industrial power distribution and earthing systems relevant to a power generation plant. Around 8% of a power station's output is used on plant auxiliaries - power stations are their own biggest customer. The effective design, operation and maintenance of equipment used for distribution of this auxiliary power across a plant site is crucial for its reliable operation. Earthing systems underpin the safety of personnel and plant in any industrial complex. This unit provides the theoretical and practical background knowledge required to understand the design, testing and maintenance of earthing systems in a power plant.

EPG015 Industrial Electrical Power Systems

Credit Points	12
Campus	Gardens Point

THIS UNIT IS AVAILABLE TO BX20 AND BX21 STUDENTS ONLY. Electrical protection systems are fundamental to the safe and reliable operation of the generating facility. This unit provides the theory and knowledge to enable review and testing of protection schemes that protect plant items. Emergency Power systems underpin the safety and reliability of industrial facilities. This unit provides the theoretical and practical background knowledge required to understand the design operation and maintenance of Emergency Power systems. Applicable standards, codes and legislation, fundamentals of lighting system design.

GSN233 Special Topic in Philanthropy and Nonprofit Studies

Credit Points	12
Campus	Gardens Point

This unit is developed around the visiting adjunct professors or visiting scholars to the Centre of Philanthropy and Nonprofit Studies. It provides students with access to contemporary issues and experts in the field and involves in-depth examination of an issue of importance.

GSN234 Contemporary Issues in Entrepreneurship

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit introduces the students to the field of entrepreneurship research and the problems, theories and methods that are prevalent in (empirical) research on entrepreneurship. Students learn to "know the field" including its historical development; its "infrastructure" of journals, conferences and research centres, and its contemporary research questions and approaches. The students will develop an ability to assess the strengths and weaknesses of the field and gain insights into where and how they can contribute to its research frontier.

GSN401 Managing in the Global Business Environment

Anti-requisites	GSN204, MGN409
Equivalents	GSZ401
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT); 2012 6TP2 (INT)

Competence in managing is the key to success for any organisation and for any person within that organisation. The knowledge and ability to manage within the global business environment are crucial requirements for today's and tomorrow's managers. This unit introduces the planning, leading, organising and controlling functions of management to elucidate current trends in management practice in the global environment.

GSN403 Understanding Data

Pre-requisites	GSN404, GSN405, GSN407 and GSN491
Anti-requisites	EFN409
Equivalents	GSZ403
Credit Points	6
Campus	Gardens Point

This unit is designed to provide students with a clear understanding of different types of data and techniques to present and analyse real world problems relevant to business and managers. Students are introduced to various techniques of organising, presenting and analysing economic and business data. Topics include probability theory, descriptive and inferential statistics.

GSN404 Financial Statements Analysis

Anti-requisites	GSN202
Equivalents	GSZ404
Credit Points	6
Campus	Gardens Point

This unit introduces students to basic accounting concepts and financial statements, and then explores methods of analysing them to give an informed understanding of the financial well being of the entity. Throughout, it takes the perspective of the user of financial statements, and in this role, explores the information in financial statements and how the three basic accounting statements are linked, and interdependent. The course guides students through the process of analysing financial statements, how to interpret

findings and how to understand what the analysis and other contextual data tell them about the business.

GSN405 Strategic Management

Anti-requisites	GSZ602
Equivalents	GSZ405
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT); 2012 6TP6 (INT)

Strategy is the process of determining goals and moving towards the achievement of those goals in a business, government, or not-for-profit setting. This unit introduces the concept of strategy and explores the basic tenets of the strategy process, competitive advantage, and strategic management in a changing global environment. It lays in the foundations for students in terms of understanding contemporary thinking in the strategy field. The learning process is enhanced by practical real-time examples of strategy in action utilising the case study method of learning.

GSN406 Human Resource Management Issues

Equivalents	GSZ406
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT); 2012 6TP6 (INT)

This unit examines the challenges faced by managers in achieving effective human resource management in the contemporary business environment. An issues-based approach is adopted to focus attention on the need for the individual managers to complement their technical expertise with knowledge and skills in people management. Specific attention is given to the human resource management implications arising from the global business environment and the changing nature of organisations.

GSN407 Business Communication

Anti-requisites	GSZ603
Equivalents	GSZ407
Credit Points	6
Campus	Gardens Point

Business Communication is an introductory unit that promotes effective written and spoken communication skills in a range of situations encountered by managers. Students will better understand the principles of effective written and spoken communication by exploring communication theory and undertaking several practical exercises and tasks.

GSN408 Fundamentals of Marketing Management

Equivalents	GSZ408
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT); 2012 6TP5 (INT)

This unit provides students with the opportunity to critically examine and evaluate the role of marketing and its contribution to the strategic processes of the modern firm operating in an increasingly competitive national and international environment. Key marketing decision areas are examined, including the marketing concept, the marketing mix, marketing information systems and marketing research, market segmentation, targeting and positioning, and the process of marketing planning, implementation and control. Students have the opportunity to consider the evolution of marketing philosophy, determinants of consumer and organisational behaviour and the influences of environmental forces on marketing decision-making within the firm.

GSN409 Organisational Behaviour 1

Anti-requisites	MGN412
Equivalents	GSZ409
Credit Points	6
Campus	Gardens Point

Organisational Behaviour 1 is an introductory unit which analyses human behaviour at work with a focus on issues of personality, motivation, group interaction, occupational stress, and health and organisational change. The unit examines issues related to aspects of the working environment and to the relationship between managerial strategies, organisational structures and their effects on performance, health and autonomy.

GSN410 Entrepreneurship

Equivalents	GSZ410
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT); 2012 6TP2 (INT)

This unit introduces the student to the field of entrepreneurship and the management of innovation. Entrepreneurial behaviour can take place within existing organisations (as intrapreneurship) or by starting a new business venture that is created to exploit a new technology or to introduce a new product, service, or business process. Topics include entrepreneurial attitudes, abilities and behaviours and culture; opportunity recognition and the development of new venture ideas; viability screening for initial and sustainable competitive advantage; risk recognition and mitigation; intellectual property protection; and developing the business model for a new enterprise.

GSN412 Business Law 1

Anti-requisites	AYN410, EFN413
Equivalents	GSZ412
Credit Points	6
Campus	Gardens Point

This unit provides managers with an overview of basic legal principles, which form the foundation of the laws of commercial transactions from the perspective of, and with particular relevance, to managers. Students will learn key elements of the rules governing business dealings by the interaction of the laws of contract, agency and franchising, property law, securities and bailment, company law and consumer law. The unit also introduces students to the Australian legal and statutory structure and provides an overview of the legal nature of business entities.

GSN413 Financial Management 1

Pre-requisites	GSN403
Anti-requisites	EFN406
Equivalents	GSZ413
Credit Points	6
Campus	Gardens Point

This unit introduces the student to the international financial environment in which business operates. The three major lessons in finance (time value, diversification and arbitrage) are introduced. Topics include time value of money, valuation, sources of funds, behaviour of firms and financial markets, introduction to investment evaluation, diversification, risk and return, and cost of capital.

GSN415 Understanding Leadership

Equivalents	GSZ415
Credit Points	6
Campus	Gardens Point

Leadership is the process of persuasion or example by which an individual influences others to pursue identified goals. The skills of leadership can be identified and learned. This unit explores the attributes, roles and tasks of leaders in contemporary business situations and the issues that impact on leadership, such as leader-follower interaction, ethics, leadership characteristics and leadership development. This unit culminates in the development of leadership profiles of contemporary leaders with an exploration of their characteristics and how their leadership roles are exercised.

GSN416 Business Plans 1

Pre-requisites	GSN405 and GSN410
Equivalents	GSZ416
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT); 2012 6TP5 (INT)

This unit offers students the opportunity to write a formal business plan for a new business venture or offshoot of an existing venture. As business planning is an intensive viability screening exercise in which the business planners must consider all strategic alternatives, students are required to choose a preferred 'business model' and analyse whether or not the proposed new venture appears to be viable. The business plan is a document that communicates this viability to an investor or other potential stakeholders in the new business and the structure and content of the business plan is crafted according to its intended role in a multi-stage communication process with the target reader.

GSN417 Effective Advocacy for Managers

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP1 (INT)

This unit builds on work completed in GSN407. It is designed to enhance students' presentation skills. It covers the practical application of key theories of speech communication to create managers who are effective persuaders, opinion leaders, and facilitators of change in a business environment. The issues covered include: structuring and designing for an audience; developing a persuasive theme; using imagery and language effectively; developing presentations.

GSN418 Marketing Strategy Development

Pre-requisites	GSN408
Anti-requisites	GSN206
Credit Points	6
Campus	Gardens Point

This unit builds upon the foundation provided by GSN408 and examines the managerial process involved in identifying and developing effective marketing strategies. It examines the role of marketing within the strategic processes of the modern firm and considers the process involved in strategic marketing in the global business context. It takes a case based approach to illustrating the effectiveness of key approaches to marketing strategy development and highlights the importance of new and emerging fields of marketing practice.

GSN420 New Venture Strategy

Pre-requisites	GSN405
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP1 (INT)

This unit considers and the requirements for resource-based sustainable competitive advantage in the context of new business ventures and the need to be strategically competitive. Topics include new venture strategic constraints; entry strategies; opportunity selection, connection between new venture strategy and marketing, disruptive strategy, strategy creation using applied Morphological Box, Value Innovation and TERMS methodologies. Students complete a Strategic Plan for a new venture as part of this unit.

GSN423 Financial Management 2

Pre-requisites	GSN413
Anti-requisites	EFN406
Credit Points	6
Campus	Gardens Point

This unit builds on the material covered in GSN413 Financial Management 1. It extends the analysis of firms' decisions in the areas of investment, dividends and financing. Topics include capital budgeting and taxation, dividends and imputation, capital structures, risk management using options and futures, and an introduction to international finance.

GSN425 Leadership Development

Pre-requisites	GSN415
Credit Points	6
Campus	Gardens Point

This unit builds upon GSN415 to develop leadership ability, utilising a conceptual framework for self-understanding and the development of the requisite knowledge, skills and attitudes required to lead successfully in contemporary society. It is designed to allow individuals a better understanding of their own capacities as leaders. Individuals will learn the principles of effective leadership and how their own style affects leadership, decision making, vision building, organisational culture and the use of power. The focus is on the development of self-awareness and the improvement of the individual's capacity to understand, communicate with, and influence others.

GSN428 International Study Tour

Equivalents	GSZ428
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK); 2012 5TP3 (BLK)

This unit involves a group excursion to one or more international countries for students interested in learning more about doing business with that (those) countries. Students study the business environment and the underlying socio-political, geographical and historical aspects of that (those) countries in considerable detail. The international study tour will normally be scheduled during the semester break period, and involve 10-14 days overseas, accompanied by an Academic Advisor. The group attends organised briefings, meeting, presentations and site visits in the host countries. Assessment includes attendance and participation at all events and submission of a detailed Daily Journal.

GSN429 New Venture Marketing

Pre-requisites	GSN408
Credit Points	6

Campus	Gardens Point
Teaching Periods	2012 6TP6 (INT)

New Venture Marketing is concerned with the special marketing needs of entrepreneurial businesses. In new ventures, market ignorance is often greater than in existing firms. Needs of potential customers must be analysed, product design and prototypes must be developed in line with marketing research results, new marketing channels must be created and access to existing channels must be secured. Potential customers must be identified, informed, and persuaded to try the new product. Pricing is also a problem area.

GSN430 New Venture Funding

Pre-requisites	GSN410 or GSZ410
Credit Points	6
Campus	Gardens Point

This unit is concerned with raising funds to establish, launch and grow a new business venture. Sources of funding considered include one's own resources, family and friends, 'social capital' transactions, business angels, venture capitalists, banks, and the public equity market. Methods of 'bootstrapping' and cash conservation, including agreements with suppliers, customers, and employees, are also considered. Pro-forma financial statements for the new venture, the financial valuation of the new venture, and the allocation of equity for intellectual property, seat equity, expenses incurred and funding provided are also examined.

GSN431 New Venture Growth and Transitions

Pre-requisites	GSN410 or GSZ410
Credit Points	6
Campus	Gardens Point

New ventures often start successfully but then flounder as rapid growth leads to problems in production, distribution, product quality, employee morale, cash flow or financing. Management's ability to make the transition from the new, small firm to a rapidly growing company is critical to its success. If the firm is to survive the entrepreneur must navigate the transition from 'hands on' involvement in every aspect of the business to a more detached management role.

GSN434 Venture Capital

Pre-requisites	GSN413
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP5 (INT)

This unit considers, in the Australian and global financial market contexts, the operation of the venture capital industry and its rationing of relatively scarce risk capital among relatively abundant demands for new venture funding. Students gain an understanding of how the venture capital industry works and the criteria by which funds are committed to the support of new ventures. Students increase their ability to distinguish the less risky and more profitable investment opportunities from the more risky and less remunerative opportunities that may also be presented to venture capitalists.

GSN440 Risk Management 1

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP6 (INT)

This unit examines the role of risk management in contemporary management theory and practice. Key decision areas of risk (eg financial, human resource, physical - asset management etc) are considered in the context of the general management of the organisation.

GSN442 Project Management 1

Credit Points	6
Campus	Gardens Point

Managers are increasingly placed in a position of project manager, to manage projects as diverse as the construction of new facilities, expansion to global markets, implementation of change, information technology systems installation, or planning the major conference. This unit provides the fundamental skills in both the operational and strategic aspects of project management. Academic requirements are met through a minimum of fortnightly contact with the lecturer by each student, through reading of the text and associated publications, and through the preparation and submission of a written project proposal.

GSN443 Project Management 2

Pre-requisites	GSN442
Credit Points	6
Campus	Gardens Point

Managers are increasingly placed in the position of project manager, to manage projects as diverse as the construction of new facilities, expansion to global markets, implementation of change, information technology systems installation, or planning a major conference. This unit builds on the fundamental skills in both the operational and strategic aspects of project management, which are covered in GSN442. In distance mode, academic requirements are met through fortnightly contact with the lecturer by each student, through reference to the text and associate publications, and through the preparation and presentation of a written project proposal.

GSN444 Special Topic 1

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT), 2012 6TP4 (INT); 2012 6TP2 (INT)

This unit is offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business, but which is offered when specific subject matter is considered especially timely and/or in a semester when a visiting or adjunct professor is available with expertise that is not normally resident in the Faculty of Business.

GSN445 Special Topic 2

Equivalents	GSZ445
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT), 2012 6TP4 (INT), 2012 6TP1 (INT), 2012 6TP2 (INT); 2012 6TP6 (INT)

This unit is offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business, but which is offered when specific subject matter is considered especially timely and/or in a semester when a visiting or adjunct professor is available with expertise that is not normally resident in the QUT Business School.

GSN455 Special Topic 3

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT); 2012 6TP2 (INT)

Like GSN444 this unit is offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business. This unit is offered to students who have already taken GSN444 and GSN445 and who wish to take an additional 'Special Topic' unit in the same award program.

GSN456 Personal Development and Ethics for Managers

Anti-requisites	GSN208, GSZ604
Credit Points	6
Campus	Gardens Point

This unit provides students with an opportunity to increase their understanding of themselves and how their interactions with others impact on their effectiveness as managers in a global environment. This unit also provides a framework of basic principles for ethical decision making. The roles of the individual and ethics in business decision making are explored through the use of international case studies. Students get the opportunity to evaluate, critically, the role of individual behaviour and ethical decision making, from not only a personal career perspective but as determinants of management and business effectiveness in an international context.

GSN472 Legal Principles of Corporate Governance

Pre-requisites	GSN412
Anti-requisites	GSN229, GSN481
Credit Points	6
Campus	Gardens Point

Principles of Corporate Governance provides an introduction to the increasingly important area of corporate governance, as practiced by the Boards of Directors of companies. This subject provides an overview of the main concepts and history of corporate governance as a global trend, the core legal principles that underpin corporate governance including: relationships between key stakeholders; corporate governance in different contexts including small proprietary companies and large listed and unlisted entities and current issues; and includes arguments propounded for self regulation versus government intervention.

GSN473 Corporate Governance and Accountability

Pre-requisites	GSN403 and GSN409 and GSN412
Equivalents	GSZ473
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT); 2012 6TP2 (INT)

Boards of directors and managers of organisations are now legally as well as morally accountable for policies, processes, and outcomes to an increasingly vocal set of stakeholders. Many of these accountabilities are not new, although until recently they may not have been monitored rigorously or at all. Recent high-profile corporate collapses and the widespread impact of the costs of these failures have resulted in greater regulation supplanting the former self-regulation practices. GSN473 examines the roles of the board and management in implementing and monitoring a sound corporate culture, proactively identifying and dealing with risk, and safeguarding the company's assets and its place in our society and economy.

GSN474 Strategy Planning & Development

Pre-requisites	GSN405
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT)

The understanding of strategic planning, development and implementation and the implications for the modern organisation underpin this unit. Based on the case study method of teaching, the unit discusses the strategy development process in the modern business context, and takes into account the various stakeholders and influences that determine the eventual success or failure of strategy initiatives.

GSN479 Spreadsheet Modelling for Managers

Pre-requisites	GSN403
Credit Points	6
Campus	Gardens Point

This unit provides students with the analytical modelling skills to enhance abilities in making business decisions under uncertainty. Students are introduced to a range of techniques that involve structuring, analysing and solving managerial business decisions problems using Excel spreadsheets and add-ins. Topics include optimisation modelling, simulations models, decision analysis and forecasting.

GSN481 Philanthropic and Nonprofit Frameworks of Governance

Anti-requisites	GSN472, GSN229
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP2 (INT)

The unit explores contemporary understandings of philanthropic and nonprofit governance in the context of social, economic and political systems. It locates these understandings in various theoretical and descriptive frameworks providing students with both the knowledge and analytical skills that are necessary to reflect critically on philanthropy and nonprofit governance systems and their environments.

GSN483 Ethics for Philanthropic and Nonprofit Organisations

Anti-requisites	AMN480, GSN230
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT)

This course introduces students to ethical theories and constructs with a focus on producing effective personal and professional resolutions to those ethical dilemmas specifically associated with Philanthropic and NonProfit (PANFP) organisations. The unit recognises the distinctive mission and character of PANFP organisations, while seeking to provide an understanding of integrity and response-ability.

GSN484 Management for Philanthropic and Nonprofit Organisations

Anti-requisites	AMN480, GSN230
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP2 (INT)

In the context of the multiple management challenges facing non-profit and philanthropic entities, this unit provides students with an introduction to contemporary thinking and practice in the effective and efficient management of organisations. While the focus is on non-profit management, wider management and organisational theory will be drawn on in order that proactive responses to situations, problems and dilemmas facing non-profit organisations can be developed by students.

GSN485 Legal Issues for Philanthropic and Nonprofit Organisations

Anti-requisites	GSN231
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT)

The unit introduces students to critical issues of philanthropic and nonprofit law and taxation. The unit examines the regulatory, taxation and governance framework of nonprofit organisations and philanthropic transactions in Australian Federal and State jurisdictions.

GSN486 Accounting and Finance Issues for Philanthropic & Nonprofit Organisations

Anti-requisites	GSN231
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP5 (INT)

This unit introduces students to an overview of financial reporting. The unit begins with an overview of the purpose of accounting and the types of financial statements that comprise a financial report. The unit also focuses on the Australian financial reporting framework and whether an Australian accounting standard for nonprofit organisations is required. International comparisons are made.

GSN487 Introduction to Social Enterprise

Anti-requisites	AMN482
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT)

The nonprofit sector continues to mature and expand with the establishment of more sophisticated social enterprise programs. With significant reductions in the traditional sources of revenue, increasingly sophisticated competition and dramatic changes in expectations from clients and stakeholder groups, the need for effective strategy and implementation has grown. The unit offers a background to social enterprise and associated issues.

GSN488 Fundraising Development Principles

Anti-requisites	GSN232, MIN409, AMN481
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT)

This unit considers the broad factors that influence fundraising/development success. It applies theories of marketing, public relations and management to fundraising and development and builds an understanding of the philanthropic environment. It re-examines the principles of fundraising/development, institutional readiness, case statement preparation, leadership, constituencies and research to build understanding of the context in which good development practice occurs.

GSN489 Fundraising Development Techniques

Pre-requisites	GSN488
Anti-requisites	GSN232, MIN409, AMN481
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP5 (INT)

This unit builds on GSN488 to delve into particular techniques of resource mobilisation in nonprofit organisations. It considers a range of income generation vehicles and techniques including capital and major gifts, special events, bequests, direct mail, telemarketing, e-fundraising, gift clubs and the art of building donor relationships. It also examines professional evaluation of fundraising programs.

GSN490 Managing Technological Innovation

Pre-requisites	GSN405 and GSN410
Equivalents	GSZ490
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP1 (INT); 2012 6TP5 (INT)

The role of technological innovation is crucial for the effective performance of modern enterprises. This unit explores the concepts of innovation and provides a managerial understanding of the major types of contemporary information technologies. These are used to explore the way technological innovation integrates and supports a broad range of business functions and processes and can be used strategically to provide advantage to an enterprise.

GSN491 Economics in Business 1

Anti-requisites	EFN405, GSN411, GSN414
Equivalents	GSZ491
Credit Points	6
Campus	Gardens Point

This unit is designed to show how economics provides a framework of analysis, and a powerful set of tools that can be used by managers to understand the market conditions affecting business performance. It examines the forces that influence production and pricing decisions in individual markets and how market forces interact to determine the level of macroeconomic activity. The course provides a self-contained treatment of the major themes in micro and macro economics. It also provides a solid foundation for further study of the subject.

GSN492 Economics in Business 2

Credit Points	6
Campus	Gardens Point

This unit builds on the analysis developed in GSN491. It provides a basic understanding of some of the key micro and macroeconomic factors that influence business performance. On the micro side, the unit examines the nature of the firm as an organisation, business objectives and constraints, strategic pricing decisions, the influence of market structure on pricing, and the rationale for government policy intervention in markets. The macro analysis examines the forces that determine output growth and the relationship between growth, inflation and unemployment. It also examines how monetary and fiscal policy influence the business environment and how exchange rates are determined.

GSN493 Customer Relationship Management

Credit Points	6
Campus	Gardens Point

This unit introduces the student to the field of customer relationship management in the business environment whether local, national or international. The unit provides the opportunity for developing an understanding of customer relationship management (CRM) as a core business strategy with the associated technology dependencies and customer marketing concepts. Students

will examine various business components of CRM, the CRM value chain technology tools, implementation processes and from case studies understand their applicability to different businesses and industries.

GSN496 Public Relations and Crisis Management

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP2 (INT)

This unit has been designed to introduce managers to the role of public relations in managing stakeholder relationships and to specifically address this role during times of crisis. Crisis management is growing in importance as organisations face increased scrutiny at a local and global level. The ability to identify issues, negotiate with stakeholders where possible and handle effectively, communication during times of crisis is critical to the ongoing success of organisations. Managers require an understanding of the types of issues and crises that can occur and various action strategies to address the particular needs of their organisation.

GSN501 The Strategic Management of Complex Projects

Equivalents	GSZ501
Credit Points	6
Campus	

Complex projects are usually initiated to implement long range strategies in contexts of high complexity and uncertainty, where client outcomes are often emergent. This unit provides the fundamental skills that enable complex project managers to understand the project's strategic context and develop project strategies capable of delivering successful client outcomes. Strategic management competencies are developed through the application of strategic and systems concepts and frameworks to real-life case studies of complex projects

GSN502 Systems Thinking

Equivalents	GSZ502
Credit Points	6
Campus	Gardens Point

Managers of complex projects deal with complex problems whose resolution requires holistic approaches, sophisticated thinking and pluralist methodologies. This unit provides foundational knowledge related to systems methodologies and their underpinning epistemologies that enable project managers to solve complex project problems in context. Students will acquire systems skills in a reflexive process involving the application of systems methodologies in isolation and in combination.

GSN503 Self Realisation and Personal Development

Equivalents	GSZ503, GSZ554
Credit Points	6
Campus	
Teaching Periods	2012 6TP5 (INT)

Self awareness provides a foundation for both personal and leadership development. This unit provides an opportunity for students to increase their understanding of themselves and how their interactions with others impact on their effectiveness as managers. Personal development is explored in the context of cultural understanding and ethics. This unit contributes to the core competencies of: Change and Journey; Innovation, Creativity and Working Smarter; Leadership; Culture and Being Human; and Probity and Governance; as it deals with the role, behaviour and development of the individual.

GSN505 Communicating Effectively

Equivalents	GSZ505
Credit Points	6
Campus	Gardens Point

Effective communication is a key driver of success, particularly in complex environments. This unit explores the communicative qualities of the individual, including persuasiveness, assertiveness, responsiveness and versatility, and the communicative qualities of the complex organisational environment in which project managers operate, both nationally and internationally. The focus is on the development of participants who are identifiable by the communicative sophistication of their behaviour across all their responsibilities. The unit provides the foundation knowledge that supports each of the other competencies in the program.

GSN507 Developing and Leading High Performance Teams

Equivalents	GSZ507
Credit Points	6
Campus	Gardens Point

Successful projects are dependent on people working together, and on the development and operation of high performance teams. This is particularly the case in large complex projects. This unit explores the role of teams and the contribution made by diverse individuals to team performance. It also explores the building of positive team environments, the emergence of virtual teams and the development of team leadership skills. This unit contributes to the core competencies of: Strategy and Project Management, Change and Journey, Organisational Architecture and Leadership; as teams are integral to the way organisations and complex projects operate.

GSN508 People in Organisations

Equivalents	GSZ508
Credit Points	6
Campus	Gardens Point

This course will develop an understanding of why employees feel and act the way they do in organisations, and provide methods for enhancing and promoting positive employee attitudes and behaviours and for improving organisational effectiveness. Concepts and theories relevant to the behaviour of individuals and groups such as individual differences, perception, motivation, conflict resolution and managing in complex environments will be used to identify, analyse and discuss organisational problems relevant to complex projects and develop behavioural responses to these situations. An additional focus is the broader organisation, its dynamic relationship with its environment and implications for organisational culture, power, change and development.

GSN509 Workplace Project 1

Equivalents	GSZ509
Credit Points	6
Campus	Gardens Point

As a work-integrated unit, Workplace Project 1 will be conducted using a problem-based learning approach. Each participant will identify a problem resulting from the management of a complex project in their workplace or a nominated other workplace. Working with a workplace mentor, an academic advisor, and a support team of project managers from the program, the participant will conduct research to understand the

problem, identify the key dynamics and issues, and develop implementation plans to improve the situation. Participants will apply key learnings from units GSN 5101-508 to develop their plan.

GSN510 Complex Projects and the Law

Equivalents	GSZ510
Credit Points	6
Campus	Gardens Point

Project managers in managing complexity are often required to manage their projects both within and across a multitude of legal frameworks and systems (national and international). As a result, project managers need the skills and expertise to examine, interpret and where necessary enter contracts on behalf of their organisation with confidence and minimum risk of legal and financial exposure. This course has therefore been designed to examine different legal frameworks associated with complex project management (ie. governance, contractual & financial management) in the commonwealth public sector and international settings.

GSN512 Strategically Managing Risk

Equivalents	GSZ512
Credit Points	6
Campus	

Understanding and expertise in the analysis of organizational and systems vulnerability, in addition to continuity and recovery planning and risk management strategies, confer particular advantages to participants working in complex settings. This Unit examines issues relevant to applying risk-based analytical tools to complex organizational activities both nationally and internationally. Unit goals focus on developing conceptual and practical skills in vulnerability and uncertainty analysis as well as targeted mitigation strategies and seek to integrate this knowledge with competencies relevant to working in complex organizational and project settings.

GSN526 Problem Solving in Complex Environments

Equivalents	GSZ526, GSZ556
Credit Points	6
Campus	

The mission of the DMO executive education program is to provide world class graduate business education and a stimulating learning experience to current and future business leaders and managers. The aim of this unit is to assist managers to develop knowledge and skills through investigating and experiencing problem framing and problem solving in situations of incomplete information. Exploration involves experience of the principles, processes and practices of creative problem solving and the use of entrepreneurial thinking to identify and capture opportunities for business renewal. This unit will help students to increase their understanding of the way in which insights from creativity and the field of entrepreneurship may be applied to complex project environments to generate opportunities and value.

GSN527 Acquisition Strategies

Equivalents	GSZ527
Credit Points	6
Campus	

GSN528 Strategic Contract Management

Credit Points	6
Campus	

GSN533 Financial Analysis and Decision Making

Equivalents	GSZ533
Credit Points	6
Campus	

GSN551 Negotiation Skills and Strategies

Equivalents	GSZ551
Credit Points	6
Campus	

The mission of the MBA and associated programs is to provide world class graduate business education and a stimulating learning experience to current and future business leaders and managers. The aim of this unit is to provide students with a rich learning experience that will enable them to develop and practice their business negotiation skills.

GSN552 The Sustainable Business

Equivalents	GSZ552
Credit Points	6
Campus	

The mission of the MBA and associated programs is to provide world class graduate business education and a stimulating learning experience to current and future business leaders and managers. The aim of this particular unit is to help managers develop a thorough understanding of the issues surrounding sustainable development and the implications of these issues for the long-term viability of business.

GSN554 Social Innovation and Entrepreneurship

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP2 (INT)

Social innovation and entrepreneurship are emergent concepts in the field of philanthropy and nonprofit management, and in partnerships between nonprofits and other sectors. The aim of this unit is to develop a student's knowledge and skills to critically reflect on emerging trends in philanthropic and nonprofit practice, with a particular focus on social innovation and entrepreneurship.

GSN555 Developing Social Ventures

Pre-requisites	GSN554
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP3 (INT)

Social ventures including social enterprises, social businesses and enterprising community initiatives are becoming increasingly popular mechanisms to: create social value in response to intractable social and environmental problems; generate new income streams for traditional nonprofits; and harness resources from across sectors to produce public benefits. This subject will hone students' practical skills in assessing and designing social ventures with regard for their purpose, context and business structures.

GSN556 Contemporary Issues in Philanthropy

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT)

Trusts and foundations have the potential to be a force for the public good. This unit will examine the critical issues confronting those who wish to harness the resources, power and influence of such bodies to achieve their purposes and benefit the

community.

GSN557 Creative Philanthropy

Pre-requisites	GSN556. GSN556 can be studied in the same teaching period as GSN557.
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT)

This unit analyses and evaluates new philanthropic trends and introduces students to critical reflection of such notions. Students will gain the skills to undertake a broad review of philanthropic developments.

GSZ401 Managing in the Global Business Environment

Anti-requisites	GSN204 and MGN409
Equivalents	GSN401
Credit Points	6
Campus	
Teaching Periods	2012 6TP2 (BLK)

Competence in managing is the key to success for any organisation and for any person within that organisation. The knowledge and ability to manage within the global business environment are crucial requirements for today's and tomorrow's managers. This unit introduces the planning, leading, organising and controlling functions of management to elucidate current trends in management practice in the global environment.

GSZ403 Understanding Data

Pre-requisites	GSZ404 and GSZ405 and GSZ407 and GSZ491
Anti-requisites	EFN409
Equivalents	GSN403
Credit Points	6
Campus	

This unit is designed to provide students with a clear understanding of different types of data and techniques to present and analyse real world problems relevant to business and managers. Students are introduced to various techniques of organising, presenting and analysing economic and business data. Topics include probability theory, descriptive and inferential statistics.

GSZ404 Financial Statements Analysis

Anti-requisites	GSN202
Equivalents	GSN404
Credit Points	6
Campus	

This unit introduces students to basic accounting concepts and financial statements, and then explores methods of analysing them to give an informed understanding of the financial well being of the entity. Throughout, it takes the perspective of the user of financial statements, and in this role, explores the information in financial statements and how the three basic accounting statements are linked, and interdependent. The course guides students through the process of analysing financial statements, how to interpret findings and how to understand what the analysis and other contextual data tell them about the business.

GSZ405 Strategic Management

Equivalents	GSN405
Credit Points	6
Campus	
Teaching Periods	2012 6TP2 (BLK)

Strategy is the process of determining goals and moving towards the achievement of those goals in a business, government, or not-for-profit setting. This unit introduces the concept of strategy and explores the basic tenets of the strategy process, competitive advantage, and strategic management in a changing global environment. It lays in the foundations for students in terms of understanding contemporary thinking in the strategy field. The learning process is enhanced by practical real-time examples of strategy in action utilising the case study method of learning.

GSZ406 Human Resource Management Issues

Equivalents	GSN406
Credit Points	6
Campus	
Teaching Periods	2012 6TP1 (BLK)

GSZ407 Business Communication

Anti-requisites	CON404
Equivalents	GSN407
Credit Points	6
Campus	
Teaching Periods	2012 6TP2 (BLK)

Business Communication is an introductory unit that promotes effective written and spoken communication skills in a range of situations encountered by managers. Students will better understand the principles of effective written and spoken communication by exploring communication theory and undertaking several practical exercises and tasks.

GSZ408 Fundamentals of Marketing Management

Equivalents	GSN408
Credit Points	6
Campus	
Teaching Periods	2012 6TP5 (BLK)

This unit provides students with the opportunity to critically examine and evaluate the role of marketing and its contribution to the strategic processes of the modern firm operating in an increasingly competitive national and international environment. Key marketing decision areas are examined, including the marketing concept, the marketing mix, marketing information systems and marketing research, market segmentation, targeting and positioning, and the process of marketing planning, implementation and control. Students have the opportunity to consider the evolution of marketing philosophy, determinants of consumer and organisational behaviour and the influences of environmental forces on marketing decision-making within the firm.

GSZ409 Organisational Behaviour 1

Anti-requisites	MGN412
Equivalents	GSN409
Credit Points	6
Campus	

Organisational Behaviour 1 is an introductory unit which analyses human behaviour at work with a focus on issues of personality, motivation, group interaction, occupational stress, and health and organisational change. The unit examines issues related to aspects of the working environment and to the relationship between managerial strategies, organisational structures and their effects on performance, health and autonomy.

Units

GSZ410 Entrepreneurship

Equivalents	GSN410
Credit Points	6
Campus	
Teaching Periods	2012 6TP1 (BLK)

GSZ412 Business Law 1

Anti-requisites	AYN410 and EFN413
Equivalents	GSN412
Credit Points	6
Campus	

This unit provides managers with an overview of basic legal principles, which form the foundation of the laws of commercial transactions from the perspective of, and with particular relevance, to managers. Students will learn key elements of the rules governing business dealings by the interaction of the laws of contract, agency and franchising, property law, securities and bailment, company law and consumer law. The unit also introduces students to the Australian legal and statutory structure and provides an overview of the legal nature of business entities.

GSZ413 Financial Management 1

Pre-requisites	GSZ403
Anti-requisites	EFN406
Equivalents	GSN413
Credit Points	6
Campus	

GSZ415 Understanding Leadership

Equivalents	GSN415
Credit Points	6
Campus	

Leadership is the process of persuasion or example by which an individual influences others to pursue identified goals. The skills of leadership can be identified and learned. This unit explores the attributes, roles and tasks of leaders in contemporary business situations and the issues that impact on leadership, such as leader-follower interaction, ethics, leadership characteristics and leadership development. This unit culminates in the development of leadership profiles of contemporary leaders with an exploration of their characteristics and how their leadership roles are exercised.

GSZ416 Business Plans 1

Pre-requisites	GSZ405, GSZ410 and 84cp of EMBA units
Equivalents	GSN416
Credit Points	6
Campus	
Teaching Periods	2012 6TP5 (BLK)

GSZ428 International Study Tour

Equivalents	GSN428
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 5TP5 (BLK)

GSZ445 Special Topic 2

Equivalents	GSN445
Credit Points	6
Campus	
Teaching Periods	2012 6TP2 (BLK)

GSZ473 Corporate Governance and Accountability

Pre-requisites	GSZ404 and GSZ409 and GSZ412
Equivalents	GSN473
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP5 (BLK)

GSZ490 Managing Technological Innovation

Pre-requisites	GSZ405 and 42cp of EMBA units
Equivalents	GSN490
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 5TP5 (BLK)

GSZ491 Economics in Business 1

Anti-requisites	EFN405, GSN411 and GSN414
Equivalents	GSN491
Credit Points	6
Campus	Gardens Point

GSZ501 The Strategic Management of Complex Projects

Equivalents	GSN501
Credit Points	6
Campus	
Teaching Periods	2012 5TP2 (INT)

Complex projects are usually initiated to implement long range strategies in contexts of high complexity and uncertainty, where client outcomes are often emergent. This unit provides the fundamental skills that enable complex project managers to understand the project's strategic context and develop project strategies capable of delivering successful client outcomes. Strategic management competencies are developed through the application of strategic and systems concepts and frameworks to real-life case studies of complex projects.

GSZ502 Systems Thinking

Equivalents	GSN502
Credit Points	6
Campus	
Teaching Periods	2012 5TP2 (INT)

Managers of complex projects deal with complex problems whose resolution requires holistic approaches, sophisticated thinking and pluralist methodologies. This unit provides foundational knowledge related to systems methodologies and their underpinning epistemologies that enable project managers to solve complex project problems in context. Students will acquire systems skills in a reflexive process involving the application of systems methodologies in isolation and in combination.

GSZ503 Self Realisation and Personal Development

Equivalents	GSN503, GSZ554
Credit Points	6
Campus	
Teaching Periods	2012 5TP2 (INT); 2012 5TP7 (BLK)

Self awareness provides a foundation for both personal and leadership development. This unit provides an opportunity for students to increase their understanding of themselves and how their interactions with others impact on their effectiveness as managers. Personal development is explored in the context of cultural understanding and ethics. This unit contributes to the core competencies

of: Change and Journey; Innovation, Creativity and Working Smarter; Leadership; Culture and Being Human; and Probity and Governance; as it deals with the role, behaviour and development of the individual.

GSZ505 Communicating Effectively

Equivalents	GSN505
Credit Points	6
Campus	
Teaching Periods	2012 5TP3 (INT); 2012 5TP4 (BLK)

GSZ507 Developing and Leading High Performance Teams

Equivalents	GSN507
Credit Points	6
Campus	
Teaching Periods	2012 5TP3 (INT); 2012 5TP7 (INT)

GSZ508 Organisational Behaviour and Culture

Equivalents	GSN508
Credit Points	6
Campus

Teaching Periods	2012 5TP6 (INT); 2012 5TP4 (BLK)

GSZ551 Negotiation Skills and Strategies

Equivalents	GSN551
Credit Points	6
Campus	
Teaching Periods	2012 5TP9 (BLK)

Negotiation is an important part of everyday management, and effective negotiation skills are indispensable for successful managers operating in a globalised and complex business environment. This Negotiation Skills and Strategies unit introduces students to a conceptual framework for analysing the business negotiation process. The exploration of negotiation practices in different contexts better prepares students for negotiation in the increasingly globalised business environment.

GSZ552 The Sustainable Business

Equivalents	GSN552
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 5TP5 (BLK)

GSZ553 Business Leadership Practicum

Pre-requisites	GSZ415
Equivalents	GSN553
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP2 (BLK)

Leaders in business, government and community organisations face daily challenges and difficult decisions. How leaders make decisions in complex environments is an insight that is rarely able to be observed by students developing their own leadership and decision making skills. Students completing this highly experiential unit will be paired with a senior executive level leader from a business, government or community organisation to observe the leader in action and engage in discussions about leadership, decision making and dealing with the ethical dilemmas faced by this leader over a period of nine months. This unit is positioned to build upon the EMBA executive coaching program and the work completed in Leadership and Complexity unit.

GSZ554 Self Realisation and Personal Development

Anti-requisites	GSZ601
Equivalents	GSN503
Credit Points	6
Campus	
Teaching Periods	2012 5TP5 (BLK)

Self awareness provides a foundation for both personal and leadership development. This unit provides an opportunity for students to increase their understanding of themselves and how their interactions with others impact on their effectiveness as managers. Personal development is explored in the context of cultural understanding and ethics. This unit contributes to the core competencies of: Change and Journey; Innovation, Creativity and Working Smarter; Leadership; Culture and Being Human; and Probity and Governance; as it deals with the role, behaviour and development of the individual.

GSZ555 Issues Management

Equivalents	GSN523
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 6TP5 (BLK)

GSZ556 Creative and Entrepreneurial Thinking

Equivalents	GSN526
Credit Points	6
Campus	

This unit provides opportunities for improving individual and group creative problem solving skills; to minimise barriers to creativity and generate possibilities for addressing commercial or operational problems; and for designing new operational environments through the use of creative and entrepreneurial thinking. This unit lays the groundwork for designing environments to identify and capture opportunities for operational performance improvement and business renewal.

GSZ601 Leading Self and Others

Anti-requisites	GSZ554
Credit Points	12
Campus	

Teaching Periods	2012 6TP4 (BLK)

Aspiring leaders develop their leadership skills through self-awareness, individual planning, courage and commitment. Through the application of personal insight and environmental feedback they understand their strengths, weaknesses and opportunities for improvement, building capacity both within themselves and those they lead. Effective leadership is fundamental to excellence in all aspects of business administration and is the key to mobilising group dynamics and fulfilling human potential.

GSZ602 Actioning Strategic Change and Innovation

Anti-requisites	GSN405
Credit Points	12
Campus	
Teaching Periods	2012 6TP5 (BLK)

Managing the development and implementation of strategy in government organisations requires the ability to effectively develop innovative solutions for problems in complex environments and plan for the change process through their implementation. This unit examines strategic management concepts and frameworks that will help the manager to understand the strategic context and develop business strategies aligned to government policy frameworks.

GSZ603 Communicating for Results

Anti-requisites	GSN407, GSZ407
Credit Points	12
Campus	
Teaching Periods	2012 6TP6 (BLK)

Without good communication skills, strategic and discipline based knowledge may be of little use to managers. It is through good interpersonal relations, motivation, persuaion and effective negotiation that organisations are able to realise their vision of success. It is essential for leaders to understand their audiences and the commuunication approaches that will get results.

HHB403 Literature Review

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is part of a supervised program in the Honours student's chosen area of specialisation. An assessed critical paper on literature relevant to the Honours dissertation topic is prepared.

HHB404 Honours Thesis 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the upervised design and initial development of an Honours dissertation leading to completion of a thesis outline, including synopses and projected chapters, and a statement of objectives, methods and sources

HHB405 Honours Thesis 2

Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes supervised research and writing of the Honours dissertation, normally between 12,000 and 15,000 words.

HHB406 Honours Thesis 3

Credit Points	12
Campus	Kelvin Grove

This unit includes supervised research and writing of the Honours dissertation, normally between 12,000 and 15,000 words.

HHB407 Honours Seminar

Credit Points	12
Campus	Kelvin Grove

HHN002 Graduate Seminar

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

HHR501 Social Science Methods for the Knowledge Society

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an in-depth treatment of a number of key methodologies in the social sciences, humanities and human services. The unit builds on core methodological knowledge and aims to supply the student with the tools to embark on professional practice projects. The unit builds on material presented in HHN410 The Logic of Social Inquiry, enabling students to explore chosen methodologies in greater detail.

HHR510 Conference Presentation 1: Networking and Presentation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit develops students' skills in summarising, reporting and communicating doctoral-level research. The unit accompanies the development and completion of the first professional practice project, and is designed in order that students can learn how to disseminate the results of that project. The unit also focuses on a variety of other issues in the communication and dissemination of professional practice, including mentoring and networking, and leadership roles in the professions.

HHR520 Conference Presentation 2: Professional Networks

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit develops the skills learned in HHR510; however, while that unit focussed on academic forums for the presentation of research and the development of research networks, this unit concentrates on the translation of doctoral-level research for work-based settings. This unit develops students' skills in summarising, reporting and communicating doctoral level research.

HHR530 Conference Presentation 3: Academic Networks

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on the presentation of high level, complex work, to an expert audience. The unit develops the emphases in HHR510 and HHR520 on networking and on the translation of findings to professional colleagues; however, in this, the emphasis is on the translation of research findings to an academic audience.

HLB001 Health Needs of Aboriginal and Torres Strait Islander Australians

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

HLB300 Independent Study

Pre-requisites	Completion of 192cp
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides the opportunity to substantively explore a topic or subject of personal academic interest within your discipline area. It enables you to extend your knowledge and understanding of a topic area that is not otherwise available as a formal unit of study within the course, and your skills in knowledge development and knowledge management.

HLB400 Transition to Professional Practice

Credit Points	12
Campus	Kelvin Grove

HLN405 Qualitative Research

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit addresses a range of qualitative methodologies and methods which represent alternative approaches to the application of the quantitative paradigm in health science research. The predominance of the natural sciences in nursing/health research has come into question in recent times and thus the unit introduces students to the origins of such challenges, to the knowledge bases of the alternative approaches to investigating the microsocial world of health/illness and to the relevant research methods. The unit comprises a series of lectures, seminar presentations and relevant readings.

HLN700 Thesis

Credit Points	48
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT), 2012 SEM-2 (INT, EXT); 2012 SUM (INT, EXT)

The thesis provides an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the program. Coursework conducted in the area of specialisation may be applied in a practical manner reflecting a student's specific interest in health science. The work represents an independent and original piece of research completed under the guidance of a supervisor. The thesis may be a report on research that makes a contribution to knowledge, or a study in which students critically analyse and appraise existing knowledge and produce observations and conclusions of value to the field concerned.

HLN701 Independent Study

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT), 2012 SEM-2 (INT, EXT); 2012 SUM (INT)

Independent Study allows students to study a topic which is not otherwise available as a formal unit. Students have the opportunity to pursue their studies relatively independently and to develop and practice skills in problem identification, evaluation and/or critical thinking. The study may be for example a critical literature review, an examination of guidelines or an evaluation. The process and outcomes are negotiated in a contract with a supervisor.

HLN703 Project A

Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT), 2012 SEM-2 (EXT, INT); 2012 SUM (INT)

An important aspect of postgraduate development is the opportunity to engage in research or project work in a specialist field of study in industry or as a component of consultancy work. Working in industry or a health-related agency, locally or internationally, can provide students with valuable work experience and develop skills and expertise that advances their profession or the particular industry involved. The research option enables students to work independently under the guidance of a supervisor. The research may be a report that makes a contribution to knowledge or a study in which the student critically analyses existing knowledge and produces observations and conclusions of value to the field concerned.

HLN704 Project B

Pre-requisites	HLN703
Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT), 2012 SEM-2 (EXT, INT); 2012 SUM (INT)

An important aspect of postgraduate development is the opportunity to engage in research or project work in a specialist field of study in industry or as a component of consultancy work. Working in industry or a health-related agency, locally or internationally, can provide students with valuable work experience and develop skills and expertise that advances their profession or the particular industry involved. The research option enables students to work independently under the guidance of a supervisor. The research may be a report that makes a contribution to knowledge or a study in which the student critically analyses existing knowledge and produces observations and conclusions of value to the field concerned.

HLN706 Advanced Quantitative Research Methods

Pre-requisites	PUN105
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The content of this unit builds on the basic statistics background assumed of students. A unifying theme is the concept of sources of variation in collected data, how proper design of study and measurement instruments minimises some sources of variation (error), how analytical techniques account for other sources, and finally the issue of introduced error that cannot be accounted for, but must be addressed in discussion of results. Analytical strategies for modelling health data are compared, and practical experience focuses on the analysis and interpretation of various data sets.

HLN708 Project

Credit Points	48
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This 48 credit point project extends the range of applied investigative options for the Master of Health Science students to undertake. The project is designed to be a workplace-based unit that enables

students to undertake a concentrated applied project in a specific area of interest in the workplace and to combine work and study requirements. It enables students to concentrate on a specific area of interest and to apply intellectual rigour to that area to complete a project of work at an advanced level.

HLN710 Fundamentals of Epidemiology and Research Design

Anti-requisites	HLN705, PUN743
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT)

This unit introduces you to the fundamentals of epidemiology and quantitative research design. It addresses the collection and interpretation of epidemiological data, introduces measures of disease occurrence and association, and contemporary issues of major importance in health. It provides you with essential skills for logical, scientific assessment of the health and medical literature. There will be a strong emphasis on applying concepts through critical reading of the literature and the development of a comprehensive research proposal as the main practical exercise of the unit.

HLN711 Advanced Qualitative Methods

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit offers you the opportunity to study, explore and understand a range of qualitative methods. The focus is on the development of rigorous qualitative research design and on planning and undertaking data collection, data analysis, interpretation and reporting of qualitative research. The aim is to advance student knowledge and skills in relation to the methods of qualitative research and to foster essential skills in collecting, coding, analysing and reporting qualitative research.

HLN720 Clinical Education in Health

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This unit is to introduces you to principles and practices designed to facilitate learning in the clinical context. Completion of the unit will enable you to differentiate between clinical supervision and clinical education, and relate to this to your own field of practice; demonstrate knowledge and understanding of models/theories of clinical education and their application within your own field of practice; demonstrate knowledge and understanding of concepts and principles related to learning, teaching and assessment in the clinical context; apply concepts and principles related to clinical learning, teaching and assessment to your field of practice; reflect critically on your learning in this unit and its implications for your future practice.

HLN750 Thesis

Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT), 2012 SEM-2 (INT, EXT); 2012 SUM (INT)

Students undertake original research with the guidance of a supervisor. The thesis provides an opportunity for coursework conducted in the area of specialisation to be applied in a practical manner reflecting the student's specific interest in health science. HLN750-1 and HLN750-2 are the part-time version of HLN700.

HLN750 Thesis

Pre-requisites	HLN750-1
Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT), 2012 SEM-2 (INT, EXT); 2012 SUM (INT)

Students undertake original research with the guidance of a supervisor. The thesis provides an opportunity for coursework conducted in the area of specialisation to be applied in a practical manner reflecting the student's specific interest in health science. HLN750-1 and HLN750-2 are the part-time version of HLN700.

HLP101 Advanced Discipline Readings

Co-requisites	HLP105
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is a compulsory component of the Faculty of Health Honours programs. It provides the opportunity for students to identify and review the literature relevant to their selected research topic. A one day seminar in advanced information retrieval skills is included in the unit.

HLP102 Research Seminars

Pre-requisites	HLP101
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is a compulsory component of the Faculty of Health Honours programs. Content includes the preparation and completion of a seminar presentation in a professional and scientific manner and attendance at scheduled seminars.

HLP103 Dissertation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

HLP103 Dissertation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

HLP103 Dissertation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of

a supervisor.

HLP103 Dissertation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

HLP104 Readings in Biomedical Science

Pre-requisites	HLP101 and HLP105. HLP101 and HLP105 can be enrolled in the same teaching period as HLP104.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

HLP105 Research Strategies 1

Co-requisites	HLP101
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

HLP106 Research Strategies 2

Pre-requisites	HLP104 and HLP105. HLP104 and HLP105 can be studied in the same teaching period as HLP106
Co-requisites	HLP107-3, HLP107-4
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

HLP107 Project 1

Co-requisites	HLP105
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

HLP107 Project 3

Pre-requisites	HLP107-1
Co-requisites	HLP106
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

HLP107 Project 2

Pre-requisites	HLP107-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

HLP107 Project 4

Pre-requisites	HLP107-1
Co-requisites	HLP106
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

HMB171 Fitness Health and Wellness

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The dimensions and interrelationships of health, physical activity and wellness are studied. Basic principles of conditioning and exercise prescription necessary to demonstrate the impact of physical activity on lifestyle diseases, health behaviours and wellness are examined. Principles and theory of behaviour change are employed.

HMB172 Nutrition and Physical Activity

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is an introduction to principles of nutrition in relation to the physical activity setting, and the role of nutrition and physical activity in weight management. This unit also covers the essential elements of child growth and development (auxology) in relation to nutrition and health. The unit is designed to underpin studies in exercise physiology and sports nutrition.

HMB231 Physical Education Curriculum Studies 1

Pre-requisites	HMB171 and HMB315
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with a range of understandings and competencies for interpreting and managing the physical education environment for teaching and learning. It assists students to develop competencies needed for lesson planning and teaching at all school levels.

HMB271 Foundations of Motor Control, Learning and Development

Pre-requisites	LSB131 or LSB231 or LSB255
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the behavioural and neural bases of movement control through an examination of the central nervous and neuromuscular systems, hierarchical control, human information processing and dynamical systems. It covers elements of sensory mechanisms related to movement. Foundations of motor learning and adaptation are introduced, linking underlying mechanisms of learning with principles that may be applied in teaching, coaching and rehabilitation.

HMB272 Biomechanics

Pre-requisites	LSB131
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes the application of mechanics as they apply to Human Movement including: kinematics and dynamics of human body models; quantitative analysis; impact; work and power; fluid dynamics; material properties.

HMB273 Exercise Physiology 1

Pre-requisites	LSB231 or LSB142 or LQB388
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit describes the immediate physiological responses to exercise, and the adaptations that occur with long-term exercise training. Exercise places a demand on the human body to provide sufficient energy to perform. The

metabolic, hormonal, cardiovascular and pulmonary systems must adapt to meet the challenge of homeostasis. The active skeletal muscle must increase extraction and utilisation of oxygen and other fuels, the cardiovascular system must respond to improved gas and fuel transport, and lung function must change to facilitate increased respiratory gas exchange. NOTE for Summer Semester students: Teaching will not commence until January 2010, but some unit information will be available from 16 November 2009. Students wishing to enrol up to the beginning of January will need to email enquirieshms@qut.edu.au

HMB274 Functional Anatomy

Pre-requisites	LSB131 or LSB255
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: surface anatomy of the trunk and upper and lower limb; morphological and mechanical properties of bone, muscle-tendon units with implications for physical activity; joint structure and function; analyses of movement tasks including walking and running; cinematography and electromyography in functional anatomy of movement tasks.

HMB275 Exercise and Sport Psychology

Pre-requisites	PYB100 or PYB012 or EDB002
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: introduction to the psychological factors which influence performance, participation and adherence to both sport and exercise programs; personality and the athlete; attention and arousal; relaxation theory and practice; aggression and psycho-social development; leadership and team cohesion.

HMB276 Research in Human Movement

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes principles of research: purposes, philosophy, applications. It addresses quantitative research including basic statistics, descriptives, ANOVA, correlation, regression and non-parametrics, and basic research design hypothesis testing. Qualitative research includes methodology, data collection, and theory building. Research presentation includes: writing a research report and developing conclusions. This unit also considers application of research, examples in human movement, related literature, computer data analysis, and information retrieval.

HMB277 Exercise and Sport Nutrition

Pre-requisites	HMB172 or PUB201
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit considers the relationship between nutrition and exercise and physical activity. Areas covered include dietary and energy requirements in exercise and sport and substrate utilisation at the cellular level during exercise. The influence that nutrition has on performance via changes in body composition, fuel utilisation, blood biochemistry and ergogenic aids will also be covered. Nutritional supplements and water and electrolyte balance in exercise and sport are also part of this unit.

HMB278 Foundations of Movement for Educators

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an opportunity for critical inquiry and analysis of human movement from a multidisciplinary perspective. The integration of the human movement principles of sub-disciplines (functional anatomy, biomechanics, motor control, sociology of sport and physical activity and development) are evaluated and applied to coaching of sport and teaching and learning in physical education.

HMB282 Resistance Training

Pre-requisites	LSB131
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to equip students with the basic knowledge, skills and competencies required for exercise prescription in resistance training for muscular fitness. Students build on prior knowledge of biomechanics, anatomy, physiology and motor control to develop understanding of the mechanical and physiological determinants of muscular fitness. The unit incorporates a blend of theoretical background, practical knowledge and skills in the main areas of muscular hypertrophy, strength, power and endurance. This understanding is then used to critically analyse resistance training programs.

HMB292 Health Education Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the initial unit in a series of three Health Education Curriculum units. Students are introduced to current health education curriculum documents with a specific focus on the Queensland Education System. The unit also provides students with a range of competencies for interpreting and managing the health education classroom as a complex social environment for teaching and learning.

HMB300 Teaching Primary HPE

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit provides students with knowledge of how to integrate Health and physical education within the other key learning areas. Students learn the connection between physical activity and health and its role in meeting the developmental needs of children. Additionally, they participate in a range of learning experiences appropriate to the developmental needs of children and acquire the skills necessary to safely deliver student learning in an open environment. Topics include principles of the health and physical education years 1-10 syllabus; motor skill development and ability related expectations for teaching HPE; planning for quality instruction and linking physical activity with health; planning and teaching HPE; classroom management and safety issues.

HMB305 Personal Health

Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 SEM-1 (INT)

Lifestyle is largely determined by an individual functioning in a socio-environmental context that places some limitations on choice and resultant health. This unit is designed to assist individuals to develop a positive self-concept, a sound knowledge of lifestyle issues and their implications, and decision-making skills necessary to make wise choices. The focus of this unit is the development of such qualities for personal maintenance and improvement. Movements in this direction are achieved by analysing the processes involved in developing individuals capable of taking control of their lifestyles and resultant health. Much of this analysis will be self-focused.

HMB313 Socio-Cultural Foundations of Physical Activity

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit lays a foundation in the disciplines of the socio-cultural areas which underpin the study of human movement. It serves as an introduction to the historical, sociological, philosophical, anthropological and cultural foundations of sports, games and leisure activities.

HMB314 Alternative Physical Education

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit involves the application of movement principles to the analysis and development of techniques in all major swimming strokes, water rescue methods, and track and field events. Students explore teaching strategies, motivational, conditioning and training activities, the development of learning experiences for various ability levels and event rules application.

HMB315 Games Based Learning in Physical Activity and Sport

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit various game forms are analysed in order to identify fundamental game skills and problem areas in skill development. Emphasis is placed on the application of relevant movement knowledge and skills to suit game situations and on learning appropriate strategies for teaching and coaching selected games.

HMB331 Physical Education Curriculum Studies 2

Pre-requisites	HMB231
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit extends the principles of professional practice established in the first curriculum studies unit and further encourages students to develop a critically reflective approach to teaching. Students learn how to extend professional practice with a range of understandings and competencies for interpreting and managing the health and physical education classroom as a complex environment for teaching and learning and develop competencies needed for planning and teaching a range of health and physical education units of work. Current health and physical education curriculum documents are explored.

HMB333 Child and Adolescent Health

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit focuses on the wide range of factors that impact on the health of individuals in the two crucial stages of life: childhood and adolescence. An analysis is made of knowledge, beliefs and skills required for promoting health-enhancing behaviours during these ages and experience is provided on some of the skills needed to assess and maintain the health status of children and adolescents.

HMB337 Organisation and Management In Physical Education And Sport

Pre-requisites	HMB231
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

School physical education departments and sporting associations are medium-sized organisations requiring direction for servicing a large client base. In this unit students examine the role of administrators and the administration of monies, facilities and human resources in a school physical education and sports setting.

HMB338 Wellness Processes and Strategies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines the adoption of health behaviours that contribute to the attainment of optimal health, wellness and quality of life. It reviews how various dimensions of health and fitness together form the basis of an individual's well-being, and traces the achievement of a high level of wellness through awareness, education and growth.

HMB339 Health and Wellness in Organisations

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

HMB347 Performance Analysis

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

HMB348 Applied Sport and Exercise Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

HMB351 Wellness Coaching

Pre-requisites	HMB171 and HMB338
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

HMB362 Biomechanics 2

Pre-requisites	HMB272 and HMB274
Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: measurement techniques within biomechanics; analysis of force systems; photographic, goniometric andaelectrographic analysis of movement; an introduction to viscoelasticity and biological materials; material properties; mass and inertial characteristics of the human body; applied aspects of biomechanics undertaken from a research project perspective

HMB371 Motor Control And Learning 2

Pre-requisites	HMB271
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is an advanced unit which provides an in-depth view of theories and concepts in motor learning and control; how we control actions in both everyday and skilled behaviours, and how this capability is acquired. This course provides a multidisciplinary perspective, drawing on research from psychology, neuroscience, biomechanics, robotics, neural networks and medicine. The unit is organised around the theme of sensorimotor integration as related to posture and balance, locomotion and arm movements such as reaching, grasping and pointing.

HMB373 Cardiorespiratory and Metabolic Disorders

Pre-requisites	HMB271, HMB272, HMB273, HMB274
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit builds on foundation units to examine selected disorders of human movement that have a cardiorespiratory or metabolic basis. The unit identifies major features of each disease together with assessment methods, and forms the basis for subsequent units in clinical exercise prescription.

HMB376 Motor Development in Children

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the theoretical perspective of normal and abnormal motor development, incorporating maturational, descriptive and behavioural aspects and the underlying sensory, perceptual, neurological and cognitive changes which influence motor development in children. A theoretical understanding of developmental differences and development delay in children with intellectual, sensory or physical disability. Experience is obtained in developmental and adapted physical activity programs.

HMB377 Children in Sport

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: physical development of the young athlete; physical maturation; benefits of participation in sport and physical activity; psycho-social issues; positive and negative effects of participation including competitive stress; injuries to the growing skeleton; overtraining, overuse injuries; strength training in childhood and adolescence; promotion of safety in sport; accreditation of teachers and coaches; policy guidelines for junior sport; Aussie sport program.

HMB378 Neurological, Psychological and Musculoskeletal Disorders

Pre-requisites	HMB271, HMB272, HMB273, HMB274
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on foundation units to examine selected disorders of human movement that have a neurological, psychological or musculoskeletal basis. The unit identifies major features of each disease together with assessment methods, and forms the basis for subsequent units in clinical exercise prescription.

HMB381 Exercise Physiology 2

Pre-requisites	HMB273
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines the integrated regulation of the organ system examined in Exercise Physiology 1. Within this integrated perspective current research areas will be highlighted, including but not limited to (1) exercise performance and environmental stress, (2) special aids to exercise training and performance, and (3) limitations to exercise in healthy normal individuals, elite athletes and selected patient populations.

HMB382 Principles of Exercise Prescription

Pre-requisites	HMB273 and HMB282
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In this unit, students examine the physiological principles and methods used in training and conditioning programs at all levels of physical activity. The integration of fitness assessment and exercise prescription is a major component of the unit, introducing the student to these requirements in the context of aerobic conditioning, resistance training, weight loss and flexibility. There is a strong emphasis on putting theory into practice, including the development and utilisation of appropriate practical skills in both fitness assessment and exercise prescription.

HMB385 Principles of Exercise Programming

Pre-requisites	HMB382
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides students with the knowledge and capacity to design and implement safe, effective evidence-based exercise programs for individuals and groups in order to achieve specified goals. It is taught through lectures and practical laboratory classes. Assessment will be through group problem-solving exercises, an individual written report, and a final written examination.

HMB396 Health Education Curriculum Studies 2

Pre-requisites	HMB292
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

This is the second in a suite of three Health Education Curriculum units. It is

designed to extend students with a range of understandings and competencies for interpreting and managing the health education classroom as a complex social environment for teaching and learning. It helps students to develop those competencies needed for planning and teaching health education units of work. It has an important role in preparing students for the professional practice component of the course, leading to the development of confidence and competence in class management skills, and facilitating the use of post-lesson and post-practicum reflection and evaluation.

HMB431 Physical Education Curriculum Studies 3

Pre-requisites	HMB331
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit develops students' competencies in the effective planning and implementation of school work programs and units of work consistent with the Senior Physical Education Syllabus. It will also develop students' skills and confidence in effective teaching practices specifically related to teaching physical education and will assist them to become independent and reflective learners.

HMB470 Practicum 1

Pre-requisites	HMB382 and HMB385. HMB385 can be taken in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In the first of the Human Movement dedicated practicum units, students undertake in-depth experience at two different workplaces (40 hours each) while maintaining ongoing involvement in the School's clinics (20 hours). The student is provided with an extended opportunity to apply classroom learned knowledge and skills under the supervision of Human Movement Practitioners. Workplace involvement is preceded by a vocational skill seminar and workshop program while an interactive analysis program is instigated post practicum. [Designated unit]

HMB475 Practicum 2

Pre-requisites	HMB470
Credit Points	36
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit includes a comprehensive vocational experience undertaken as a supervised full-time internship. Students are supervised in the performance of operational tasks including clinical, management and administration and further develop independent professional skills and knowledge. The internship is followed by a comprehensive reflective analysis of the experience. [Designated unit]

HMB481 Clinical Exercise for Cardiorespiratory and Metabolic Disorders

Pre-requisites	HMB373 and HMB382. HMB373 can be studied in the same teaching period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit covers the whole range of activities associated with the assessment and programming of exercise and activity for individuals with cardiorespiratory and metabolic disorders. The unit focuses on the screening, assessment, prescription and evaluation of exercise and activity in the treatment and management of these disorders, including disease-specific considerations.

HMB482 Clinical Exercise for Neurological, Psychological and Musculoskeletal Disorders

Pre-requisites	HMB378
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit covers the whole range of activities associated with the assessment and programming of exercise and activity for individuals with neurological, psychological and musculoskeletal disorders. The unit focuses on the screening, assessment, prescription and evaluation of exercise and activity in the treatment and management of these disorders, including disease-specific considerations.

HMB483 Research Internship

Pre-requisites	HMB271, HMB272, HMB273, HMB274, HMB276
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

HMB496 Health Education Curriculum Studies 3

Pre-requisites	HMB396
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit extends the principles of professional practice established in HMB292 and HMB396 and further encourages the development of a critically reflective approach to the teaching in that area. It emphasises planning and teaching in the senior secondary school and extends a student's ability to make independent judgments about curriculum decisions within syllabus guidelines and broader systems policies, while considering national and international trends in education and society. The unit also encourages exploration of current issues and emerging and future trends in subject areas.

IFN001 Advanced Information Retrieval Skills

Credit Points	4
Campus	Gardens Point and Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK, EXT, INT); 2012 SEM-2 (EXT, INT, BLK)

Provides postgraduate research students with the skills to implement a thorough literature search in their research area and to contribute to life-long learning skills by improving students information literacy. The seven modules which form this unit include: the literature review, developing a search strategy; using the QUT and other libraries, database services, the Internet and its uses; developing a current awareness strategy; personal file management; evaluating information.

IFP100 Knowledge Transfer and Research Commercialisation

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

This unit provides you with practical information and builds skills and capacities in the identification of commercialisation opportunities and the implementation of commercialisation processes appropriate to your research.

Units

IFP101 Leadership and Workplace Communication

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit provides you with an understanding of: Introductory theories relating to the dynamics of teams and teamwork, and the communication process. The practical information and skills to increase the motivation of yourself and others.

IFP102 Project Management and Research

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This subject allows students to assess, plan and manage a chosen research project as a basis for learning about project management lifecycles and generic project management processes including initiating, planning, executing, controlling and evaluating the project. The subject introduces techniques for managing the project's stakeholders as well as those regarding its scope, time, cost, quality, communication, procurement and risk.

IFP104 Entrepreneurial Foundations

Credit Points	12
Campus	Internet
Teaching Periods	2012 SUM (EXT)

The aim of this course is to help you develop and systematically apply an entrepreneurial way of thinking that will allow you to create and/or identify opportunities that may be commercialised successfully. It is the process of building something from nothing - risk is involved. The course is not about small business or lifestyle business management; it focuses on entrepreneurial and innovative growth-orientated businesses.

IFP105 Principles and Practice of Research Management

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit aims to improve understanding of the range of frameworks, and issues involved in the field of research management including research ethics, research training, research dissemination and multi-partner research collaboration. In exploring these frameworks and issues, the unit will acknowledge the human factors in research organisations and will examine the data management systems and other technologies which underpin the operation of a typical research services unit.

IFP106 Managing Research Careers

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit aims to provide you with an understanding of the patterns of research career development, and of the principles and mechanisms of career self-management. It aims to assist you to develop the analytical approaches to professional development needs of researchers, and the personal skills of effective presentation to employers at various levels in the research and research management fields.

IFP107 Global Sustainability

Credit Points	12
Campus	Internet

IFP108 Strategic Issues in Research Management

Pre-requisites	IFP105
Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit looks at: Initiating and Building multi-partner research collaboration: effective network development; new venture formation; international perspectives Managing Research Governance: governance frameworks; research codes, compliance and complaints; company directorships, boards, legislation Managing Research Investment: financing research through diverse revenue streams; the role of incentive schemes; the annual budget cycle Research organisation development – mission and strategy: strategic planning; achieving buy-in through effective communication; quality assurance and risk management

IFP109 Contexts For Research & Development Management

Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (EXT)

IFP110 R&D Management Project 1

Credit Points	24
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT), 2012 SEM-2 (EXT); 2012 SUM (EXT)

The R & D Management Project can include any topic within the overall boundaries of the program as it is structured around a learning agreement between a student and a project supervisor. This learning agreement is drafted by the student and negotiated with a supervisor chosen for their ability to supervise in the general topic area.

IFP111 R&D Management Project 2

Credit Points	24
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT); 2012 SUM (EXT)

The R & D Management Project can include any topic within the overall boundaries of the program as it is structured around a learning agreement between a student and a project supervisor. This learning agreement is drafted by the student and negotiated with a supervisor chosen for their ability to supervise in the general topic area.

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

INB101 Impact of IT

Anti-requisites	INN101
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

You will gain an appreciation of the massive and positive impact that IT has had on a wide range of fields including business, science, engineering, education and health. You will learn about the benefits of increased productivity due to IT. You will consider ethical issues and possible negative impacts of IT. You will raise your awareness of the social implications of IT systems for society at the global, local and personal levels. You will develop an informed position on issues, and justify your reasoning with considered supportive arguments.

INB102 Emerging Technology

Equivalents	ITB005
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit is to provide you with a conceptual framework to understand the technologies that enable IT. This will be a fun exploration of a wide spectrum of ideas where we will examine some currently popular technologies, their history and their future. Information Technology has become so entwined with everyday life that identifying its scope is difficult, which also makes it difficult to identify opportunities where IT might further infiltrate into our daily lives for work and play. To achieve these aims, the unit introduces you to some of the theories and engineering practicalities that have produced recent technological advances in IT. Concepts leading to existing technologies are introduced during lectures, which are followed by laboratory sessions where you will be encouraged to discuss social change, future information tools and explore the concepts required for constructing these technologies.

INB103 Industry Insights

Equivalents	ITB002
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to develop your awareness of the career possibilities in the ICT industry and to equip you with some of the essential skills required of an ICT professional. The unit helps you to derive a roadmap for your career; to enable you to identify the qualities, skills and interests you need to possess, to plan your career path. The unit will also introduce you the inter-disciplinary nature of ICT careers.

INB104 Building IT Systems

Equivalents	ITB001
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Today's modern integrated technology is built on IT systems which run in a range of contexts (e.g. mobile computing, robotics, and web-based systems) using a range of technological solutions such as programming and scripting, databases, web development and network programming. This unit is an integrated introduction to information technology designed to engage, inspire and inform and will demonstrate the important role that technical system design and development plays in achieving robust operation of a large variety of technological solutions. This unit will give you substantial hands-on, practical learning experiences and will motivate you through engagement in the creative, explorative and meaningful development of technological artefacts that operate in real world contexts.

INB120 Corporate Systems

Anti-requisites	ITB360
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit has the aim to introduce you broadly to your field of study and to assist you in identifying an appropriate study career path that suits your skills and interest. To that end, this unit aims to give you a broad overview of the nature and role of socio-technical information systems in corporate business settings, and the role that corporate systems managers perform within the major business domains in which they operate.

INB122 Organisational Databases

Anti-requisites	INN122
Equivalents	ITB362
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to teach students how databases and database-driven websites are used in organisational environments, their role in information

technology, the importance of the information architecture behind the external representation of a database, issues of security, privacy, accessibility, and the social and ethical implications around databases.

INB123 Project Management Practice

Anti-requisites	INN500
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In your information technology career it is very likely that you will work on and lead project teams to achieve business outcomes. You will achieve more effective outcomes by employing a project management method. The aim of this course is to familiarise you with the PRINCE2® method so that you could successfully work within and lead project teams. At the conclusion of this unit you will may be eligible to sit the externally provided PRINCE2® Foundation and Practitioner accreditation examinations.

INB124 Information Systems Development

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

IT professionals work with a wide variety of information systems and are increasingly required to interact with other professionals and understand business domains. In many cases it is necessary to develop custom systems to satisfy business requirements. Problem solving and communication skills and an understanding of programming concepts and logic are required to effectively work with information systems developers. In this dynamic industry, self-managed learning is necessary to remain abreast of technology innovations.

INB180 Computer Games Studies

Anti-requisites	INN180
Equivalents	ITB750
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to give you a clear understanding of the socio-cultural issues that affect the computer game industry. Through critical review of games and games industry literature, playing games and actively participating in classroom discussion you will develop your capacity to join in the discourse about the design, impact and future direction of computer games in our society.

INB181 Introduction to Games Production

Anti-requisites	INN181
Equivalents	ITB751, ITN751
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This subject will provide you with knowledge and skills in games production. By gaining an overview of the production process, you will learn how the technology and the people involved integrate into a coherent and efficient manufacturing process. By the end of this subject you will have the knowledge to conceive, create, integrate and optimise tools and personnel into a complete games production system.

INB182 Introducing Design

Equivalents	DEB101
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Please note: this unit is only available to BGIE (Bachelor of Games and Interactive Entertainment) students. The act of designing is a common link between many disciplines such as game design, software design, animation and character design, architecture, industrial design, etc. This unit offers a broad and generic introduction to the act of designing in a discipline context free environment. This unit is designed to expose you to a range of experiences not possible within the confines of the usual university routine. It also calls upon you to exert physical and mental efforts that may be different in degree and nature to your usual coursework. Through these opportunities this unit seeks to introduce to you the ways of thinking like a designer.

INB201 Scalable Systems Development

Pre-requisites	(INB102 or ITB005) and (INB104 or ITB001)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Information technology is a key enabling tool in a rapidly evolving global economy. IT systems underpin innovation across a range of application areas including business, economics, science, engineering, education and the arts. In order to educate graduates in this climate, Scalable Systems Development adopts an integrated approach to provide broad hands-on experiences designed to orient students to the range of possibilities within the IT discipline. This team-based unit is an extension of project work introduced in Building IT Systems. Within a concrete, project-based context students will encounter the practical challenges of designing and implementing a substantial IT system. The unit aims to increase students' awareness of the potential of IT in enabling innovation through providing active, constructive and challenging problem-based learning experiences.

INB204 Special Topic 1

Credit Points	12
Campus	Gardens Point

This unit aims to introduce a range of techniques and advanced algorithms that will enable you to implement efficient solutions to complex computing problems.

INB205 Special Topic 2

Credit Points	12
Campus	Gardens Point

The aim of this unit is to introduce students to enterprise architectures, its principles and particular analysis and design techniques of its different parts, as applied in commercial organisations.

INB210 Databases

Anti-requisites	INN210
Equivalents	ITB004
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Databases and database systems are essential items that support many aspects of everyday life in modern society. All graduates from a course in Information Technology will be expected by employers to understand the concepts and terminology of databases. The aim of this unit is to introduce you to the structure and role of databases in modern organisations.

INB220 Business Analysis

Anti-requisites	INN220
Equivalents	ITB008
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is aims to give you an introduction to the role, knowledge, and skills required of a business analyst. This unit focuses on both the trades—tools and methods used by a business analyst, as well as the soft skills—creativity and communication, both of which are critical to successful business and requirements analysis. Through lectures, cases studies and role playing activities, you will develop basic knowledge and skills required for introductory business analysis (BA).

INB221 Technology Management

Pre-requisites	INB103 or ITB002 or INB120 or ITB360
Anti-requisites	ITN241, ITN251 and ITN366
Equivalents	ITB366, ITB241
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit presents operational, tactical and strategic insights that support the activities central to the leadership and management of technology. These insights include project management, organisational leadership, outsourcing, planning, governance and millennium technologies. Such insights are used to inform decision-making - the core skill of any manager. Technology managers must understand the factors influencing any decision point. This unit equips students for the challenges of management and to contribute to the decision-making faced by managers and the staff who advise on these issues.

INB222 Enterprise Architecture

Pre-requisites	INB101
Credit Points	12
Campus	Gardens Point

Enterprise Architecture is the means by which companies align business practice and IT. It typically includes information such as the organisational structures and functions of a company, business services, processes, and data objects, and the IT landscape by way of software applications, platforms and infrastructure. These are captured through different modelling techniques and put in the different layers of the enterprise architecture. Through an enterprise architecture, a company can govern its IT existing solutions, and acquire or develop new IT solutions.

INB250 Foundations of Computer Science

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Contemporary computer-based systems are built from a wide range of technologies working at different levels of abstraction, from microprocessor hardware, to operating system and application software, to entire communications networks. At each abstraction level different techniques are needed to understand emergent properties of the system. This unit introduces some of the foundational principles commonly used to reason about the behaviour of computer-dependent systems at different levels of abstraction. Most of the techniques are derived from the field of Discrete Mathematics and are the foundation of the discipline called Computer Science.

INB251 Networks

Anti-requisites	INN251
Equivalents	ITB006
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Computer systems and communications networks are essential to the activities of modern organisations. When you graduate from a course in Information Technology, employers expect you to have a sound understanding of the terminology and concepts of computer systems, communications networks, and network services. This unit provides you with an introductory study of communications network technologies and network applications. The unit serves as an entry point to further specialised studies in the field of computer network systems.

INB255 Security

Anti-requisites	ITB161, ITB523, ITB623, ITN161 and INN255
Equivalents	ITB730
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to give you an understanding of the major issues in information security. You will be able to identify critical information security concepts and determine the information security implications of interactions between entities. You will have knowledge of a range of techniques for protecting information, and understand the limitations of these techniques. You will be aware of international information security management standards.

INB270 Programming

Pre-requisites	INB104 or ENB246
Anti-requisites	INN270
Equivalents	ITB003
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to give you a positive introduction to the skills required in solving computational problems and implementing solutions in a programming or scripting language. Although some theoretical aspects of computer programming are introduced briefly, the overall emphasis of the unit is programming practice. The unit emphasises generic programming concepts and related problem-solving strategies. The skills you learn in this unit will be applicable to a wide variety of commonly-used, industrially-significant programming and scripting languages.

INB271 The Web

Pre-requisites	INB104
Anti-requisites	INB373 and INN373 and ITB227 and ITN007 and ITN227 and INN271
Equivalents	ITB007
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aims of the unit are to give you a thorough understanding of what the web is, how it works and what it has to offer. Additionally, the unit aims to give you a general understanding and basic skills in developing dynamic web applications, including an appreciation of the variety of implementation technologies available. Through an understanding of how web technologies have evolved to date, you will appreciate the necessity for lifelong

learning and become an insightful predictor of future developments in this area. You will learn to critically analyse technological alternatives in order to adapt to and innovate with technologies that presently do not exist. You will appreciate the business or organizational context within which web applications exist and be skilled in communicating within that environment. You will appreciate the social and ethical issues relating to web based systems including accessibility, globalization, privacy, and piracy.

INB272 Interaction Design

Pre-requisites	INB103 or INB181
Equivalents	ITB254
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide you with an understanding of the theory, practices and challenges associated with the development of creative interactive design and human computer interaction.

INB280 Fundamentals of Game Design

Pre-requisites	INB180
Equivalents	ITB016, ITN016
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Modern games production is a complex process involving various businesses and organisations, working with budgets in the tens of millions. One of the roles within a game production team is that of the game designer. It is crucial that a game designer understands how to create a game world, the rules that govern game play and other high level design tasks. This subject provides an introduction to game design, by starting with high level conceptual design tasks before moving to more concrete tasks.

INB281 Advanced Game Design

Pre-requisites	INB280
Equivalents	ITB017
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with theoretical and practical knowledge of advanced games design concepts; that is, specific activities undertaken by game designers and their purpose. By the end of this unit you will have the knowledge to identify problems and suggest solutions for innovative game designs, as well as understand how to carry out the process of designing a game yourself. You will possess practical and theoretical knowledge of game design issues such as: how to design a game level, how to design a task and reward a player for completing it, how to ensure that the player knows how to progress through the game and how to design characters whose behaviour and dialogue provide clues and prompts to the player.

INB282 Games Level Design

Pre-requisites	INB281
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with theoretical and practical knowledge of game level design concepts; that is, specific activities undertaken by level designers. By the end of this unit you will have the knowledge to identify level design problems and suggest solutions for innovative level designs across genres, as well as understand how to carry out the process of designing a level yourself. You will possess practical and theoretical knowledge of level design issues such as conceptual design, level structure and flow, level component design, gameplay, risks and rewards and environment modelling.

INB300 Professional Practice in IT

Pre-requisites	INB201
Anti-requisites	ITS020, INS010, INS011, INS012, INS020
Credit Points	12
Campus	Gardens Point

In this unit you will have the opportunity to experience real world work experiences and to reflect on how your studies have prepared you for the work environment. This will give you the opportunity to plan on how to best take advantage of your remaining studies to prepare for your planned career. To help you to understand your future career you will be working in a team and/or group environments, seeing firsthand the challenges and constraints that arise during professional practice in a real world industry environment. You will develop a richer appreciation of the graduate capabilities required of all information technology professionals, particularly skills such as communication, negotiation and problem-solving strategies.

INB301 The Business of IT

Anti-requisites	ITB009
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

As an IT professional you are more and more evaluated in terms of the business value that you produce. This unit will prepare you for professional practice by making you "business savvy," i.e. giving you the business knowledge and skills that will help you with your future career and job. In particular the unit will address three themes: (1) career planning and job applications, (2) entrepreneurship & innovation, and (3) business and IT strategy. You will be introduced to career development tools that enable you to self-manage your career and life. You will learn how to critically think about the requirements of a job and reflect upon your own experiences and learn how to communicate them. You will also learn about the entrepreneurial process of identifying a business opportunity and how to take advantage of that opportunity. In addition, you will gain an understanding of core strategic concepts and models, discuss typical strategy tools and then apply them to the 'Business of IT'.

INB302 IT Capstone Project

Pre-requisites	INB301
Equivalents	ITB010
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students are to work together in a team of 4-5 on a project that addresses one of the following three types of problems: real business problems, real market needs, real research problems. This unit extends students' development of the professional, technical and teamwork skills required by IT professionals in practice. Students will extend their knowledge and skills in the areas of IT project management through completing professional project documentation and managing the team project. Students will also gain a greater understanding and skill level in analysis and design, and their significance in delivering successful

business or research outcome. The unit also focuses on furthering students' professional skills in report writing, oral communication, and visual communication.

INB304 Special Topic 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit aims to give students an understanding of why future hardware will be increasingly parallel and the challenge this poses for the software development community. The unit aims to give students a basic understanding of this parallel hardware and practical skills in parallelizing programs using today's best tools and techniques, backed up by basic parallel programming principles.

INB305 Special Topic 4

Pre-requisites	INB371
Credit Points	12
Campus	Gardens Point

This unit is to introduce the principles and concepts of object technology, to develop practical competence in the implementation of these concepts in the C++ object-oriented programming language, and to teach the core object oriented design and programming skills to build flexible and extensible systems.

INB306 Project 1

Pre-requisites	INB101, INB102, INB103, INB104 and INB201
Equivalents	ITB230
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB307 Project 2

Equivalents	ITB791
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB308 Project 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB309 Major Project

Pre-requisites	INB309-1 (can be enrolled in the same teaching period)
Anti-requisites	ITB844
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project over two semesters. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB309 Major Project

Pre-requisites	INB101 and INB102 and INB103 and INB104 and INB201
Equivalents	ITB844
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project over two semesters. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB311 Enterprise Systems

Anti-requisites	INN311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit presents and discusses the Enterprise Systems Lifecycle model, orienting students to the requirements of addressing total cost of ownership, change management requirements and process modelling requirements in order to achieve business benefits. Concepts of Enterprise Systems success and associated enablers and barriers are also introduced. This unit introduces the technical architecture of complex 3-tiered client server environments. It seeks to show how an integrated complex database environment meets common business needs, and yet fails to meet the total Information Systems requirements.

INB312 Enterprise Systems Applications

Anti-requisites	ITB233, INN312
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce business configuration aspects of a large Enterprise Systems (also refered to as ERP systems) application. The unit commences with an introduction to concepts of large system implemenattions, requirements gathering and analyses. The unit then teaches how to configure a large Enterprise Systems application (using SAP) for common business processes in an organization. The course also aims to provide hands-on experience of configuring a range of SAP modules. The unit enables you to experience both the business analyst view and the user's view of the system across a number of business processes.

INB313 Electronic Commerce Site Development

Equivalents	ITB260
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will enable you to specify, design, implement and maintain effective e-commerce applications. You will obtain a broad understanding of the potential of e-commerce and how it can be employed to benefit an organisation. You will get direct experience of creating an e-commerce storefront following a business to business (B to B) or business to consumer (B to C) model. You will also have an understanding of the computer systems that underpin e-commerce including payment systems and secure transactions.

INB320 Business Process Modelling

Equivalents	ITB298
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to introduce you to modern methodologies of business process modelling. A main objective is to increase your awareness of the conceptual foundation of modelling and for the capabilities of BPMN and available tools. You will learn how to use grammars and tools to build, maintain and communicate practically relevant process models.

INB321 Business Process Improvement

Anti-requisites	INN321
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce you to modern methodologies of Business Process Management. A main objective is to increase your awareness of the close link between business requirements and IT capabilities, and the related fundamental role of business processes. This unit also seeks to develop logical thinking, an appreciation for conceptual models, and the capability to understand and deal with complex systems.

INB322 Information Systems Consulting

Anti-requisites	ITB264, ITN264
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of the unit is to develop your skills in the consulting engagement process. This unit will give you an appreciation of the management of consulting practices and an understanding of the consulting sector generally. This unit presents the tactical and strategic issues involved in management consulting, and in particular: client engagement. In the unit there is an emphasis on Information Systems (IS) related work. IS constitutes a substantial portion of consulting activity and cuts across all areas of business expertise. The unit examines the dynamics of IS consulting within the context of large consulting firms and familarises students with the consulting engagement lifecycle.

INB324 Business Process Analytics

Pre-requisites	INB320
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will introduce you to a number of state-of-the-art business process intelligence techniques that can be used at different stages of a business process life cycle. The unit will also discuss the design requirements for executable process models and strategies for business process improvement.

INB325 Corporate Systems Management Project

Anti-requisites	ITB370
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The ability to apply knowledge and skills to real-life situations is essential for information systems professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful management. This unit seeks to give you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial Information Systems development project.

INB335 Information Resources

Anti-requisites	INN335
Equivalents	ITB322
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will help you to understand the structure of the information environment, to reflect upon the information resources you discover, and to develop the ability to find appropriate information for future problem solving. You will develop your skills in identifying, accessing, evaluating and retrieving information resources to meet specific information needs. The unit will also help you develop skills in teamwork and oral and written communication.

INB340 Database Design

Pre-requisites	INB210 or ITB004
Anti-requisites	ITB229
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to help you develop your knowledge, understand a formal specification tool (ERM/ORM) for modelling information systems unambiguously and to apply this formal technique to conceptualise information systems found in many real world application domains.

INB341 Software Development With Oracle

Pre-requisites	INB210 or ITB004 or INB122
Equivalents	ITB223
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to develop a sound understanding of database creation, installation, administration, management, security, back up/recovery and application development. The unit aims to develop practical skills in each of these elements, using appropriate Oracle software. It is expected that students undertaking this unit will have prior knowledge of relational database terminology and concepts, be thoroughly able to develop SQL for querying, updating and creating tables, and have a sound knowledge of database design.

INB342 Enterprise Data Mining and Data Analysis

Pre-requisites	INB122 or INB210 or INB340
Anti-requisites	INN342
Equivalents	ITB239
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will provide a comprehensive theoretical coverage of various topics in data and web mining. In addition there will be a significant practical component using hands on tools to solve real-world problems. Specifically, we will consider techniques from machine learning, data mining, text mining, and information retrieval to extract useful knowledge from data which are used for business intelligence, document databases, site management, personalization, and user profiling. This unit will first cover a detailed overview of the mining process and techniques, and then concentrate on applications of these techniques to web, e-commerce, document databases and data from advanced applications.

INB343 Data Warehousing and Mining

Pre-requisites	INB210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit teaches the foundations of data warehousing and mining for producing systems that provide valuable services and decision support to busuness companies. Through this study, you will be able to demonstrate knowledge of the principles and techniques of data warehouse architecture and schema, OLAP and data cubes, ETL and data quality, patterns and sequences mining, association analysis, and decision tables. You will also be able to use and develop smart data services for business intelligence.

INB344 Search Engine Technology

Pre-requisites	INB371
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Search engines are becoming ubiquitous not only for finding web pages but also as a key part of companies' infrastructure. Database systems only allow access to structured data which are only the tip of the iceberg of the vast amount of information that also sits in unstructured files such as word documents, reports, email messages, etc. Industry is now realising the high value of this free text information and deploying the means to use it. Processing this information requires natural language processing for extracting meaningful relations and semantics as well as efficient indexing processes that together compose search engine technology. Today, search technology is a hot area of research and development with applications in data warehousing, e-commerce, digital libraries, bioinformatics, and web information systems in general.

INB345 Mobile Devices

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides the opportunity for exploring new and emerging mobile devices and wireless technology including iPhone, Netbook, 3G, WiMax, and RFID. Students will critically review and understand how they can be used for current contexts such as government, business, education and social community, as well as emerging ‘wilderness’ environments with no power and wired communication. Students will appreciate the impacts of these devices and be inspired for the current and future opportunities in ICT usage trends.

INB346 Enterprise 2.0

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Web technologies and applications are reshaping contemporary organisations. By 2009 it has been predicted that more than 80% of organisations will have blogs and more than 50% of organisations will have wikis as part of their business solutions and strategies. Furthermore, with the advent of Cloud Computing, many companies are outsourcing key business functions to external web applications. The successful contemporary organisation requires expertise in not just business and management practice but in the critical design, use and consequences of new and emerging technologies. This unit will explore the ways in which IT has impacted on how organisations design and deliver activities and services internally and externally. The aim of this unit is to provide you with an understanding of how web 2.0 is changing the way contemporary organisations function.

INB347 Web 2.0 Applications

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Web 2.0 applications enable the user to be control. The unit will provide the opportunity for students to explore web 2.0 applications including blogs, wikis, social networking, social tagging, podcasts, gaming, storytelling and virtual worlds such as second life. Students will critically consider the many and varied web applications and how they can be used in different contexts such as government, small and medium size businesses, non-profit organisations, educational institutions and community groups.

INB348 Mobile Application Development

Pre-requisites	INB370 or INB371
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Proliferation of mobile devices with everyday users have resulted in high demand for creative developers to build innovative applications, and given the variety of platforms there is a major skills shortage. Students with software and user interface design and programming skills will benefit from this project-based unit to start their portfolio in developing useful applications on emerging mobile devices.

INB350 Internet Protocols and Services

Pre-requisites	INB251 or ITB006 or ITB510
Anti-requisites	ITB624, ITB629, ITN525, ITN667, ITN720
Equivalents	ITB720
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

An understanding of the theoretical and practical concepts of network protocols and services is highly useful and relevant to network engineers and others working in the Information Processing industries. This unit introduces you to Internet protocols and the design, implementation and operation of network based applications. Theory and practical skills taught in this unit will be useful if you intend undertaking further networking units.

INB351 Unix Network Administration

Pre-requisites	INB350
Equivalents	ITB721, ITB625, ITB535, ITB525
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide students with a working knowledge of the technical aspects and theory of network administration and management. The unit uses the Unix environment as the learning platform for attaining technical skills and for the development of problem solving skills necessary to be a successful networking professional.

INB352 Network Planning

Pre-requisites	INB350
Anti-requisites	ITB551, ITB628, ITB722, INN352, ITN551, ITN722, ENN523
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit draws together subject matter from a number of different networking-related areas. The aim of the unit is to assemble the previously acquired knowledge and techniques and apply it in a cohesive fashion to the task of network planning.

INB353 Wireless and Mobile Networks

Pre-requisites	INB251 or ITB006
Anti-requisites	ITN723
Equivalents	ITB723
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with the skills to be able to design and understand the issues involved with different types of wireless communications systems. It develops your knowledge of Wide Area Networks (WANs), Local Area Networks (LANs) and Personal Area Networks (PANs) as well as skills in programming for mobile handsets. You will also develop knowledge of the different types of wireless communications technologies available and when each is most applicable in a particular situation.

INB355 Cryptology and Protocols

Anti-requisites	ITB646, ITB548, ITB566
Equivalents	ITB732
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Cryptographic techniques are widely used to implement computer and network security. As an IT security professional you may be required either to evaluate or implement information systems using cryptographic algorithms and protocols. This elective unit covers the main cryptographic technical concepts including encryption, digital signatures and cryptographic protocols.

INB360 Modelling and Simulation Science

Pre-requisites	INB270
Anti-requisites	MAB480
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to give students an understanding of computational techniques used for simulations (and visualisation) in a selection of application areas where the scientific problems are characterized by widely varying spatial and temporal scales. Through this study you will be able to demonstrate knowledge of the development and implementation of simulation algorithms and the analysis of resulting data using multi-dimensional visualisation techniques.

INB365 Systems Programming

Pre-requisites	INB270 or ITB003 or INB371
Anti-requisites	ITB745, ITB706, INN365
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Systems programming is an essential part of any computer-science education. This unit uses operating system concepts to teach the foundations of systems programming and advanced concepts for producing softwares that provide services to computer hardware. Through this study, you will be able to demonstrate knowledge of the principles and techniques of process management, memory and file management, protection & security, and distributed systems.

INB370 Software Development

Pre-requisites	INB270 or ITB003
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Understanding software development is an integral part of the IT industry for software engineers. Software development relies on object technologies, programming techniques and numerous code libraries provided by language developers and third party vendors. Integrated Development

Environments, unit testing frameworks, automated and continuous build tools and versioning systems are all becoming part of the tool set modern software developers must be familiar with. This unit is designed to introduce these technologies and techniques to show how software can be rapidly developed.

INB371 Data Structures and Algorithms

Pre-requisites	INB270 or ITB003
Anti-requisites	ITB711, ITB702, INN371
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The purpose of this unit is to ensure that you have a sound knowledge of modern programming techniques and their use in providing medium-scale software solutions. This unit will teach you to decompose a problem and produce a modular solution to a programming task. The principles to analyse algorithms for efficiency will also be introduced. In addition, you will acquire the necessary skills for you to use the tools available in common development environments, such as Microsoft Visual Studio.

INB372 Agile Software Development

Pre-requisites	INB370
Anti-requisites	INN372, ITB612, ITB712
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces you to the software development process. You will look at each of the major activities involved in developing a software system. You will also learn how to manage and control the software development process for a large project when a number of team members are involved in the development. This unit develops the professional practice of working on large software systems.

INB373 Web Application Development

Pre-requisites	INB270 or ITB003 or INB271 or ITB007
Anti-requisites	INN373
Equivalents	ITB716, ITN716
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with an understanding of the issues, structure and technologies used for developing web-based systems. The unit will provide you with the theoretical and practical skills needed to develop enterprise critical applications designed with an n-tier architecture using state of the art technologies. A comparative technology approach is taken, including an analysis of how web technologies have evolved to date, in order to identify common themes and to better enable you to comprehend and critically evaluate future web technology offerings.

INB374 Enterprise Software Architecture

Pre-requisites	INB270 or ITB003
Equivalents	ITB717
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to introduce you to the field of enterprise architecture. It attempts to give you a grounding in the basic knowledge and skills required by an enterprise architect. This includes a solid understanding of the IT challenges currently facing medium to large size organizations, the theory and technologies currently used to address them and an appreciation of the business imperative for which they are utilized.

INB379 Game Project Design

Pre-requisites	Completion of 144 credit points of study
Anti-requisites	ITB009
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

INB379 BGIE Game Project Design (P1) extends your work on the role, design, and plan of a computer game concept. The unit covers the conceptualisation and game design stages up to the game design pitch. If the project is given a green light by the assessment panel, it may be developed later in the P2 unit.

INB380 Games Project

Pre-requisites	INB379 or INB305
Anti-requisites	ITB020
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit seeks to give you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial related project. The unit also aims to allow you to develop the critical professional skills of working within a cross-disciplinary team and, through implementation of your project, develop the understanding of the role of careful planning, scope control and task management in ensuring that the project is successful.

INB381 Modelling and Animation Techniques

Pre-requisites	INB371 and MAB281
Equivalents	ITB746
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The development of computer graphics tools is a significant application within the IT, Games and related industries, relying heavily on software engineering methodologies. These tools, such as CAD systems, 3D modelling systems and games engines, are used in such industries as advertising, engineering, manufacturing, simulation for education and training, computer games, film special effects, etc. Modelling techniques are intrinsic to a 3D graphics system, especially one used for real time animation. With increased CPU and GPU power, the ability to animate in real time is allowing more sophisticated interaction and the merger of games/simulation and film. The unit will provide you with the knowledge and skills to use an industry standard graphics API to implement graphics applications and to develop a basic real time animation system using an industry standard language.

INB382 Real Time Rendering Techniques

Pre-requisites	INB371 and MAB281
Anti-requisites	ITB648 and ITB649
Equivalents	ITB747
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with knowledge and skills in basic to advanced techniques in real-time rendering using shading languages. You will be able to implement a high-quality real-time rendering system in an industry standard API.

INB383 AI for Games

Pre-requisites	INB371 or MAB281
Anti-requisites	INB304 completed in semester 1 2009
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide students with an intermediate to advanced level course in computer game AI, involving computational approaches to solving a wide range of problems in the interactive entertainment and game industries.

INB385 Multimedia Systems

Pre-requisites	INB103 or ITB002
Anti-requisites	ITB257
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will explore the concepts underpinning multimedia systems and the role played by these technologies in the overall knowledge of a computer professional. You will learn to: design and develop different kinds of interactive multimedia applications; understand the bank of knowledge in cultural developments surrounding the emergence of multimedia technologies; analyse design and processes that contribute to the production of a creative work, using contemporary hardware and software technologies; develop the creative potential of temporal media forms and their placement and use within new media works; understand principles and conventions associated with the interpretation and production of meaning through interactive visual representation.

INB386 Advanced Multimedia Systems

Pre-requisites	INB385 (Special considerations may apply)
Equivalents	ITB259, ITN259
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This advanced level unit will give you high level design and development skills in some of the current and emerging areas of the new media. Web delivered applications, stand-alone systems and installations will be included. It will endeavour to give you an in-depth understanding of interactive Multimedia Systems. You will be given the theoretical basis and practical skills to motivate you in the design and creation of a state-of-the-art system in this discipline. In the process it will encourage a professional team approach appropriate to the industry environment.

INB860 Computational Intelligence for Control and Embedded Systems

Equivalents	ITB847
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is a specialisation unit in the area of Infomechatronics that introduces five methods from the field of computational intelligence and relates them to applications on real time control and embedded systems. The methods are: Knowledge Base Systems, Fuzzy Control, Neural Networks, Reinforcement Learning and Evolutionary Computation. The unit is also intended to teach the specific design and programming skills that will enable you to solve problems using computational intelligence methods in real-time embedded systems. It is assumed that you already have knowledge of programming.

IND102 Emerging Technology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP2 (INT)

The aim of this unit is to provide you with a conceptual framework so that you clearly identify Information Technologies and their purpose. This task will be fun as it covers a wide spectrum of ideas and allows us to examine some currently popular technologies. Information Technology has become so entwined with everyday life that identifying its scope is difficult, which also makes it difficult to identify opportunities where IT might further infiltrate into our daily lives for work and play. To achieve these aims, the unit introduces you to some of the theories and engineering practicalities that have already resulted in technological advances in the area of information technology. Concepts leading to existing technologies are introduced during lectures, which are followed by laboratory sessions where students will be encouraged to discuss social change, future information tools and explore the concepts required for constructing these technologies.

IND103 Industry Insights

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT); 2012 13TP1 (INT)

This unit aims to develop your awareness of the career possibilities in the ICT industry and to equip you with some of the essential skills required of an ICT professional. The unit helps you to derive a roadmap for your career; to enable you to identify the qualities, skills and interests you need to possess, to plan your career path. The unit will also introduce you the inter-disciplinary nature of ICT careers.

IND104 Building IT Systems

Credit Points	12
Campus	
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This team-based unit is an integrated introduction to information technology designed to engage, inspire and inform and will demonstrate the important role that technical system design and development plays in achieving robust operation of a large variety of technological solutions. This unit will give you substantial hands-on, practical learning experiences and will motivate you through engagement in the creative, explorative and meaningful development of technological artefacts that operate in real world contexts.

IND210 Databases

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP2 (INT)

The aim of this unit is to help you develop your knowledge, understand a formal specification tool (ORM) for modelling information systems unambiguously and to apply this formal technique to conceptualise information systems found in many real world application domains.

IND251 Networks

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT); 2012 13TP1 (INT)

Computer systems and communications networks are essential to the activities of modern organisations. When you graduate from a course in Information Technology, employers expect you to have a sound understanding of the terminology and concepts of computer systems, communications networks, and network services. This unit provides you with an introductory study of communications network technologies and network applications. The unit serves as an entry point to further specialised studies in the field of computer network systems.

IND270 Programming

Pre-requisites	IND104
Credit Points	12
Campus	
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit aims to give you a positive introduction to the skills required in solving computational problems and implementing solutions in a programming or scripting language. Although some theoretical aspects of computer programming are introduced briefly, the overall emphasis of the unit is programming practice. The unit emphasises generic programming concepts and related problem-solving strategies. The skills you learn in this unit will be applicable to a wide variety of commonly-used, industrially-significant programming and scripting languages.

INN101 Impact of IT

Anti-requisites	INB101, ITB361, ITN361
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

You will gain an appreciation of the massive and positive impact that IT has had on a wide range of fields including business, science, engineering, education and health. You will learn about the benefits of increased productivity due to IT. You will consider ethical issues and possible negative impacts of IT. You will raise your awareness of the social implications of IT systems for society at the global, local and personal levels. You will develop an informed position on issues, and justify your reasoning with considered supportive arguments.

INN120 Corporate Systems

Anti-requisites	ITN360 and INB120
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit has the aim to introduce you broadly to your field of study and to assist you in identifying an appropriate study career path that suits your skills and interest. To that end, this unit aims to give you a broad overview of the nature and role of socio-technical information systems in corporate business settings, and the role that corporate systems managers perform within the major business domains in which they operate.

INN122 Organisational Databases

Anti-requisites	INB122, ITB362, ITN365
Equivalents	ITN122
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to teach students how databases and database-driven websites are used in organisational environments, their role in information technology, the importance of the information architecture behind the external representation of a database, issues of security, privacy, accessibility, and the social and ethical implications around databases.

INN124 Information Systems Development

Anti-requisites	INB124
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

IT professionals work with a wide variety of information systems and are increasingly required to interact with other professionals and understand business domains. In many cases it is necessary to develop custom systems to satisfy business requirements. Problem solving and communication skills and an understanding of programming concepts and logic are required to effectively work with information systems developers. In this dynamic industry, self-managed learning is necessary to remain abreast of technology innovations.

INN180 Computer Games Studies

Anti-requisites	INB180, ITB750
Equivalents	ITN750
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to give you a clear understanding of the socio-cultural issues that affect the computer game industry. Through critical review of games and games industry literature, playing games and actively participating in classroom discussion you will develop your capacity to join in the discourse about the design, impact and future direction of computer games in our society.

INN181 Introduction to Games Production

Anti-requisites	INB181, ITB751, ITN751
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This subject will provide you with knowledge and skills in games production. By gaining an overview of the production process, you will learn how the technology and the people involved integrate into a coherent and efficient manufacturing process. By the end of this subject you will have the knowledge to conceive, create, integrate and optimise tools and personnel into a complete games production system.

INN204 Special Topic 1

Credit Points	12
Campus	Gardens Point

INN205 Special Topic 2

Credit Points	12
Campus	Gardens Point

INN210 Databases

Anti-requisites	INB210
Equivalents	ITN200
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Databases and database systems are essential items that support many aspects of everyday life in modern society. All graduates from a course in Information Technology will be expected by employers to understand the concepts and terminology of databases. The aim of this unit is to introduce you to the structure and role of databases in modern organisations.

INN220 Business Analysis

Anti-requisites	INB220
Equivalents	ITB222, ITB365, ITN222, ITN365
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is aims to give you an introduction to the role, knowledge, and skills required of a business analyst. This unit focuses on both the trades—tools and methods used by a business analyst, as well as the soft skills—creativity and communication, both of which are critical to successful business and requirements analysis. Through lectures, cases studies and role playing activities, you will develop basic knowledge and skills required for introductory business analysis (BA).

INN221 Technology Management

Anti-requisites	ITN241, ITN251, ITN366,INB221
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit presents operational, tactical and strategic insights that support the activities central to the leadership and management of technology. These insights include project management, organisational leadership, outsourcing, planning, governance and millennium technologies. Such insights are used to inform decision-making - the core skill of any manager. Technology managers must understand the factors influencing any decision point. This unit equips students for the challenges of management and to contribute to the decision-making faced by managers and the staff who advise on these issues.

INN222 Enterprise Architecture

Pre-requisites	INN120
Credit Points	12
Campus	Gardens Point

Enterprise Architecture is the means by which companies align business practice and IT. It typically includes information such as the organisational structures and functions of a company, business services, processes, and data objects, and the IT landscape by way of software applications, platforms and infrastructure. These are captured through different modelling techniques and put in the different layers of the enterprise architecture. Through an enterprise architecture, a company can govern its IT existing solutions, and acquire or develop new IT solutions.

INN250 Foundations of Computer Science

Anti-requisites	INB250
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Contemporary computer-based systems are built from a wide range of technologies working at different levels of abstraction, from microprocessor hardware, to operating system and application software, to entire communications networks. At each abstraction level different techniques are needed to understand emergent properties of the system. This unit introduces some of the foundational principles commonly used to reason about the behaviour of computer-dependent systems at different levels of abstraction. Most of the techniques are derived from the field of Discrete Mathematics and are the foundation of the discipline called Computer Science.

INN251 Networks

Anti-requisites	INB251
Equivalents	ITN701
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Computer systems and communications networks are essential to the activities of modern organisations. When you graduate from a course in Information Technology, employers expect you to have a sound understanding of the terminology and concepts of computer systems, communications networks, and network services. This unit provides you with an introductory study of communications network technologies and network applications. The unit serves as an entry point to further specialised studies in the field of computer network systems.

INN255 Security

Anti-requisites	INB255, ITB161, ITB523, ITB623, ITB730
Equivalents	ITN161, ITN511, ITN523, ITN663, ITN730
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to give you an understanding of the major issues in information security. You will be able to identify critical information security concepts and determine the information security implications of interactions between entities. You will have knowledge of a range of techniques for protecting information, and understand the limitations of these techniques. You will be aware of international information security management standards.

INN270 Programming

Anti-requisites	INB270
Equivalents	ITN700
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to give you a positive introduction to the skills required in solving computational problems and implementing solutions in a programming or scripting language. Although some theoretical aspects of computer programming are introduced briefly, the overall emphasis of the unit is programming practice. The unit emphasises generic programming concepts and related problem-solving strategies. The skills you learn in this unit will be applicable to a wide variety of commonly-used, industrially-significant programming and scripting languages.

INN271 The Web

Anti-requisites	INN373, INB373,INB271,ITB007,ITB227
Equivalents	ITN007,ITN227
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aims of the unit are to give you a thorough understanding of what the web is, how it works and what it has to offer.

Additionally, the unit aims to give you a general understanding and basic skills in developing dynamic web applications, including an appreciation of the variety of implementation technologies available. Through an understanding of how web technologies have evolved to date, you will appreciate the necessity for lifelong learning and become an insightful predictor of future developments in this area. You will learn to critically analyse technological alternatives in order to adapt to and innovate with technologies that presently do not exist. You will appreciate the business or organizational context within which web applications exist and be skilled in communicating within that environment. You will appreciate the social and ethical issues relating to web based systems including accessibility, globalization, privacy, and piracy.

INN272 Interaction Design

Anti-requisites	INB272
Equivalents	ITN254
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide you with an understanding of the theory, practices and challenges associated with the development of creative interactive design and human computer interaction.

INN280 Fundamentals of Game Design

Anti-requisites	ITB016and INB280
Equivalents	ITN016
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Modern games production is a complex process involving various businesses and organisations, working with budgets in the tens of millions. One of the roles within a game production team is that of the game designer. It is crucial that a game designer understands how to create a game world, the rules that govern game play and other high level design tasks. This subject provides an introduction to game design, by starting with high level conceptual design tasks before moving to more concrete tasks.

INN281 Advanced Game Design

Pre-requisites	INN280
Anti-requisites	ITB017 and INB281
Equivalents	ITN017
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with theoretical and practical knowledge of advanced games design concepts; that is, specific activities undertaken by game designers and their purpose. By the end of this unit you will have the knowledge to identify problems and suggest solutions for innovative game designs, as well as understand how to carry out the process of designing a game yourself. You will possess practical and theoretical knowledge of game design issues such as: how to design a game level, how to design a task and reward a player for completing it, how to ensure that the player knows how to progress through the game and how to design characters whose behaviour and dialogue provide clues and prompts to the player.

INN282 Games Level Design

Pre-requisites	INN281
Anti-requisites	INB282
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with theoretical and practical knowledge of game level design concepts; that is, specific activities undertaken by level designers. By the end of this unit you will have the knowledge to identify level design problems and suggest solutions for innovative level designs across genres, as well as understand how to carry out the process of designing a level yourself. You will possess practical and theoretical knowledge of level design issues such as conceptual design, level structure and flow, level component design, gameplay, risks and rewards and environment modelling.

INN304 Special Topic 3

Pre-requisites	INN210 or INN004 or INN122
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SUM (INT)

INN305 Special Topic 4

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SUM (INT)

INN311 Enterprise Systems

Anti-requisites	INB311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit presents and discusses the Enterprise Systems Lifecycle model, orienting students to the requirements of addressing total cost of ownership, change management requirements and process modelling requirements in order to achieve business benefits. Concepts of Enterprise Systems success and associated enablers and barriers are also introduced. This unit introduces the technical architecture of complex 3-tiered client server environments. It seeks to show how an integrated complex database environment meets common business needs, and yet fails to meet the total Information Systems requirements.

INN312 Enterprise Systems Applications

Anti-requisites	INB312, ITB233
Equivalents	ITN233
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce business configuration aspects of a large Enterprise Systems (also refered to as ERP systems) application. The unit commences with an introduction to concepts of large system implemenattions, requirements gathering and analyses. The unit then teaches how to configure a large Enterprise Systems application (using SAP) for common business processes in an organization. The course also aims to provide hands-on experience of configuring a range of SAP modules. The unit enables you to experience both the business analyst view and the user's view of the system across a number of business processes.

INN313 Electronic Commerce Site Development

Anti-requisites	INB313 and ITB260

Equivalents	ITN260
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will enable you to specify, design, implement and maintain effective e-commerce applications. You will obtain a broad understanding of the potential of e-commerce and how it can be employed to benefit an organisation. You will get direct experience of creating an e-commerce storefront following a business to business (B to B) or business to consumer (B to C) model. You will also have an understanding of the computer systems that underpin e-commerce including payment systems and secure transactions.

INN320 Business Process Modelling

Anti-requisites	ITB298 and ITB320
Equivalents	ITN301
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will teach you the foundations of business process modelling. You will learn how to use standard process modelling notations such as BPMN to capture organizational business processes in a consistent and unambiguous way, and to reason about these models.

INN321 Business Process Improvement

Anti-requisites	INB321
Equivalents	ITN298
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce you to modern methodologies of Business Process Management. A main objective is to increase your awareness of the close link between business requirements and IT capabilities, and the related fundamental role of business processes. This unit also seeks to develop logical thinking, an appreciation for conceptual models, and the capability to understand and deal with complex systems.

INN322 Information Systems Consulting

Anti-requisites	INN335, ITN332,INB322
Equivalents	ITN273
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of the unit is to develop your skills in the consulting engagement process. This unit will give you an appreciation of the management of consulting practices and an understanding of the consulting sector generally. This unit presents the tactical and strategic issues involved in management consulting, and in particular: client engagement. In the unit there is an emphasis on Information Systems (IS) related work. IS constitutes a substantial portion of consulting activity and cuts across all areas of business expertise. The unit examines the dynamics of IS consulting within the context of large consulting firms and familarises students with the consulting engagement lifecycle.

INN323 Business Process Automation

Pre-requisites	INN324
Anti-requisites	INB324
Credit Points	12
Campus	Gardens Point

The aim of this unit is to introduce you to modern-day topics underlying Business Process Management (BPM) such as service oriented architectures, business intelligence, business process automation, and workflow patterns. The unit will demonstrate how business processes modelled on the basis of well-known and established workflow patterns can seamlessly lead to sophisticated business process-aware information systems. It will be shown how these information systems can exploit concepts from service-oriented architectures and from state-of-the-art BPM and business intelligence environments.

INN324 Business Process Analytics

Pre-requisites	INN320
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will introduce you to a number of state-of-the-art business process intelligence techniques that can be used at different stages of a business process life cycle. The unit will also discuss the design requirements for executable process models and strategies for business process improvement.

INN326 Advanced Process Modelling

Pre-requisites	(INN320 or INB320) and (INN321 and INB321)
Credit Points	12
Campus	Gardens Point

This unit provides advanced knowledge around the use of process modelling in organizational practice. Deepening and broadening the knowledge around process modelling (INB320) and BPM projects (INB321), this unit will provide a comprehensive discussion around governance, conventions, purposes, application areas and advanced challenges of using process modelling in an Enterprise.

INN327 Business Process Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will provide an overview about all factors that impact the enterprise-wide deployment of Business Process Management (BPM). The unit will follow the six factors of a BPM maturity model and cover the impact of emerging technologies in the design and management of business processes.

INN330 Information Management

Anti-requisites	INB330
Equivalents	ITN266
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT, EXT)

The aim of this unit is to provide you with an awareness of the activities in which IM professionals are engaged within various organisational contexts. You will use case studies and introduce yourself to the strategic and analytic elements that comprise information management activities. These activities include the alignment of enterprise information and business planning, enterprise information policy, evaluation of information resources & systems and applications of the

information inventory.

INN331 Management Issues for Information Professionals

Anti-requisites	INB331
Equivalents	ITN274
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT)

The overall aim is to enable you to identify and resolve selected key management issues within a particular type of organisation of your choice. Using an integrated approach the subject draws from the field of organisational behaviour, business management literature, IT-management, and other readings appropriate to your interest. A further emphasis will be on case studies of actual practices in the type of organisation or enterprise environment setting that you have chosen to investigate.

INN332 Information Retrieval

Anti-requisites	INN335, ITN322
Equivalents	ITN273
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT)

The ability to quickly learn and expertly use new information resources and concepts is a vital skill for the modern day library and information professional. This unit will help you to understand the structure of the informatoin environment, to reflect upon the information resources you discover, and to develop the ability to find appropriate information for future problem solving. You will develop your skills in identifying, accessing, evaluating and retrieving information resources to meet specific needs. The unit will also help you develop skills in teamwork and oral and written communication.

INN333 Information Programs

Anti-requisites	ITN330
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

The unit encompasses the planning, implementation and evaluation of an information product or service for a particular community of use. The community may be anything from a specialised professional or business group, to community members with special needs etc. Emphasis is on identification of user needs, creating an information product or program and marketing or promoting its use. The unit also explores the impact of web 2.0 technologies (e.g. blogs, wikis, facebook, YouTube, flickr) and concepts such as creative commons and open access on program and product design and delivery are explored.

INN335 Information Resources

Anti-requisites	INB335, INN332, ITN273
Equivalents	ITN332
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will help you to understand the structure of the information environment, to reflect upon the information resources you discover, and to develop the ability to find appropriate information for future problem solving. You will develop your skills in identifying, accessing, evaluating and retrieving information resources to meet specific information needs. The unit will also help you develop skills in teamwork and oral and written communication.

INN340 Database Design

Anti-requisites	INB340
Equivalents	ITN229
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to help you develop your knowledge, understand a formal specification tool (ERM/ORM) for modelling information systems unambiguously and to apply this formal technique to conceptualise information systems found in many real world application domains.

INN341 Software Development With Oracle

Pre-requisites	INN210 or ITN200 or INN122 or ITB004
Anti-requisites	INB341, ITB223
Equivalents	ITN223
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to develop a sound understanding of database creation, installation, administration, management, security, back up/recovery and application development. The unit aims to develop practical skills in each of these elements, using appropriate Oracle software.

INN342 Enterprise Data Mining

Pre-requisites	INN210 or INN340 or INN122
Anti-requisites	ITB239, INB342
Equivalents	ITN239
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will provide a comprehensive theoretical coverage of various topics in data and web mining. In addition there will be a significant practical component using hands on tools to solve real-world problems. Specifically, we will consider techniques from machine learning, data mining, text mining, and information retrieval to extract useful knowledge from data which are used for business intelligence, document databases, site management, personalization, and user profiling. This unit will first cover a detailed overview of the mining process and techniques, and then concentrate on applications of these techniques to web, e-commerce, document databases and data from advanced applications.

INN343 Data Warehousing and Mining

Pre-requisites	INN210
Anti-requisites	INB343
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit teaches the foundations of data warehousing and mining for producing systems that provide valuable services and decision support to busuness companies. Through this study, you will be able to demonstrate knowledge of the principles and techniques of data warehouse architecture and schema, OLAP and data cubes, ETL and data quality, patterns and sequences mining, association analysis, and decision tables. You will also be able to use and develop smart data services for business intelligence.

INN344 Search Engine Technology

Anti-requisites	INB344
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Search engines are becoming ubiquitous not only for finding web pages but also as a key part of companies' infrastructure. Database systems only allow access to structured data which are only the tip of the iceberg of the vast amount of information that also sits in unstructured files such as word documents, reports, email messages, etc. Industry is now realising the high value of this free text information and deploying the means to use it. Processing this information requires natural language processing for extracting meaningful relations and semantics as well as efficient indexing processes that together compose search engine technology. Today, search technology is a hot area of research and development with applications in data warehousing, e-commerce, digital libraries, bioinformatics, and web information systems in general.

INN345 Mobile Devices

Anti-requisites	INB345
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides the opportunity for exploring new and emerging mobile devices and wireless technology including iPhone, Netbook, 3G, WiMax, and RFID. Students will critically review and understand how they can be used for current contexts such as government, business, education and social community, as well as emerging ‘wilderness’ environments with no power and wired communication. Students will appreciate the impacts of these devices and be inspired for the current and future opportunities in ICT usage trends.

INN346 Enterprise 2.0

Anti-requisites	INB346
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will help you to acquire the skills and knowledge required to critically explore and utilise applications within diverse contexts and organisations.

INN347 Web 2.0 Applications

Anti-requisites	INB347
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Web 2.0 applications enable the user to be control. The unit will provide the opportunity for students to explore web 2.0 applications including blogs, wikis, social networking, social tagging, podcasts, gaming, storytelling and virtual worlds such as second life. Students will critically consider the many and varied web applications and how they can be used in different contexts such as government, small and medium size businesses, non-profit organisations, educational institutions and community groups.

INN348 Mobile Application Development

Pre-requisites	INN370 or INN371
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Proliferation of mobile devices with everyday users have resulted in high demand for creative developers to build innovative applications, and given the variety of platforms there is a major skills shortage. Students with software and user interface design and programming skills will benefit from this project-based unit to start their portfolio in developing useful applications on emerging mobile devices.

INN350 Internet Protocols and Services

Anti-requisites	INB350,ITB624,ITB629,ITB720,ITN524,ITN529,ITN667
Equivalents	ITN720
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

An understanding of the theoretical and practical concepts of network protocols and services is highly useful and relevant to network engineers and others working in the Information Processing industries. This unit introduces you to Internet protocols and the design, implementation and operation of network based applications. Theory and practical skills taught in this unit will be useful if you intend undertaking further networking units.

INN351 Unix Network Administration

Pre-requisites	INN350
Anti-requisites	INB351
Equivalents	ITN525, ITN535, ITN721
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide students with a working knowledge of the technical aspects and theory of network administration and management. The unit uses the Unix environment as the learning platform for attaining technical skills and for the development of problem solving skills necessary to be a successful networking professional.

INN352 Network Planning

Anti-requisites	INB352, ITN722, ITN551, ITB628, ITB551, ITB722, ENN523
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit draws together subject matter from a number of different networking-related areas. The aim of the unit is to assemble the previously acquired knowledge and techniques and apply it in a cohesive fashion to the task of network planning.

INN353 Wireless and Mobile Networks

Anti-requisites	INB353, ENN524
Equivalents	ITB723, ITN723
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with the skills to be able to design and understand the issues involved with different types of wireless communications systems. It develops your knowledge of Wide Area Networks (WANs), Local Area Networks (LANs) and Personal Area Networks (PANs) as well as skills in programming for mobile handsets. You will also develop knowledge of the different types of wireless communications technologies available and when each is most applicable in a particular situation.

INN355 Cryptology and Protocols

Anti-requisites	INB355
Equivalents	ITB548, ITB566, ITB646, ITB732, ITN566, ITN512, ITN581, ITN732,
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Cryptographic techniques are widely used to implement computer and network security. As an IT security professional you may be required either to evaluate or implement information systems using cryptographic algorithms and protocols. This elective unit covers the main cryptographic technical concepts including encryption, digital signatures and cryptographic protocols.

INN360 Modelling and Simulation Science

Pre-requisites	INN270
Anti-requisites	MAN480
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to give students an understanding of computational techniques used for simulations (and visualisation) in a selection of application areas where the scientific problems are characterized by widely varying spatial and temporal scales. Through this study you will be able to demonstrate knowledge of the development and implementation of simulation algorithms and the analysis of resulting data using multi-dimensional visualisation techniques.

INN365 Systems Programming

Pre-requisites	INN270 or ITB003 or INB270
Anti-requisites	ITB706, ITB745, ITB365
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Systems programming is an essential part of any computer-science education. This unit uses operating system concepts to teach the foundations of systems programming and advanced concepts for producing softwares that provide services to computer hardware. Through this study, you will be able to demonstrate knowledge of the principles and techniques of process management, memory and file management, protection & security, and distributed systems.

INN370 Software Development

Anti-requisites	INB370
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Understanding software development is an integral part of the IT industry for software engineers. Software development relies on object technologies, programming techniques and numerous code libraries provided by language developers and third party vendors. Integrated Development Environments, unit testing frameworks, automated and continuous build tools and versioning systems are all becoming part of the tool set modern software developers must be familiar with. This unit is designed to introduce these technologies and techniques to show how software can be rapidly developed.

INN371 Data Structures and Algorithms

Pre-requisites	INN270 or INB270
Anti-requisites	INB371,INB372,TB702, ITB711, ITN711
Equivalents	ITN702
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The purpose of this unit is to ensure that you have a sound knowledge of modern programming techniques and their use in providing medium-scale software solutions. This unit will teach you to decompose a problem and produce a modular solution to a programming task. The principles to analyse algorithms for efficiency will also be introduced. In addition, you will acquire the necessary skills for you to use the tools available in common development environments, such as Microsoft Visual Studio.

INN372 Agile Software Development

Pre-requisites	INN370
Anti-requisites	INB372, ITB712, ITN662, ITN712, ITB612
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit examines the theory, techniques, and technologies associated with the specification, design, construction and testing of software systems. It integrates specialist knowledge from previous units to prepare you to become a professional software engineer. By the end of this unit, you will have a firm understanding of the principles of software development processes, and the detailed practices of a modern agile methodology. This will extend and refine your knowledge of the traditional software development lifecycle and testing, and putting your new knowledge into practice. You will work together in small teams of four to six people to build a project using an agile methodology and using test-driven development strategies. You will thus be well-prepared to become a member of a professional development team.

INN373 Web Application Development

Pre-requisites	INN270 or ITN700 or INB270 or ITB003 or INN271 or INB271
Anti-requisites	INB373
Equivalents	ITB716, ITN716,
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with an understanding of the issues, structure and technologies used for developing web-based systems. The unit will provide you with the theoretical and practical skills needed to develop enterprise critical applications designed with an n-tier architecture using state of the art technologies. A comparative technology approach is taken, including an analysis of how web technologies have evolved to date, in order to identify common themes and to better enable you to comprehend and critically evaluate future web technology offerings.

INN374 Enterprise Software Architecture

Pre-requisites	INN270, INB270, ITN700, or ITB003
Anti-requisites	INB374 and ITB717
Equivalents	ITN717
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-2 (INT)

This unit introduces you to the field of enterprise and component-based architecture. It provides a grounding in the knowledge and skills required by a software architect to address the future needs of business IT systems. These include a solid understanding of the IT challenges currently facing medium to large organizations, the theory and technologies used to address them, and an appreciation of the business needs that motivate their use. To enable you to address these challenges you will be exposed to system design methods, and the current technologies, that allow the resulting systems to be adaptive to changing business needs.

INN381 Modelling and Animation Techniques

Pre-requisites	(INB371 or INN371) and (MAB281 or MAN281)
Anti-requisites	INB381, ITB441, ITB460, ITB648, ITB649, ITB746
Equivalents	ITN440, ITN460, ITN746
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The development of computer graphics tools is a significant application within the IT, Games and related industries, relying heavily on software engineering methodologies. These tools, such as CAD systems, 3D modelling systems and games engines, are used in such industries as advertising, engineering, manufacturing, simulation for education and training, computer games, film special effects, etc. Modelling techniques are intrinsic to a 3D graphics system, especially one used for real time animation. With increased CPU and GPU power, the ability to animate in real time is allowing more sophisticated interaction and the merger of games/simulation and film. The unit will provide you with the knowledge and skills to use an industry standard graphics API to implement graphics applications and to develop a basic real time animation system using an industry standard language.

INN382 Real Time Rendering Techniques

Pre-requisites	MAB281
Anti-requisites	INB382
Equivalents	ITN747
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with knowledge and skills in basic to advanced techniques in real-time rendering using shading languages. You will be able to implement a high-quality real-time rendering system in an industry standard API.

INN383 AI for Games

Anti-requisites	INB383
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide students with an intermediate to advanced level course in computer game AI, involving algorithmic and utility-based approaches to solving a wide range of problems in the interactive entertainment and game industries. You will gain both practical and theoretical knowledge about a range of AI techniques applied in computer games. You will be able to identify and explain different types of AI agents, describe their algorithms using a pseudo code convention, identify and explain different structures and algorithms used to represent and solve a range of problems in computer game AI.

INN385 Multimedia Systems

Anti-requisites	INB385
Equivalents	ITN257, ITB257
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will explore the concepts underpinning multimedia systems and the role played by these technologies in the overall knowledge of a computer professional. You will learn to: design and develop different kinds of interactive multimedia applications; understand the bank of knowledge in cultural developments surrounding the emergence of multimedia technologies; analyse design and processes that contribute to the production of a creative work, using contemporary hardware and software technologies; develop the creative potential of temporal media forms and their placement and use within new media works; understand principles and conventions associated with the interpretation and production of meaning through interactive visual representation.

INN386 Advanced Multimedia Systems

Pre-requisites	INN385
Anti-requisites	INB386 and ITB259
Equivalents	ITN259
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This advanced level unit will give you high level design and development skills in some of the current and emerging areas of the new media. Web delivered applications, stand-alone systems and installations will be included. It will endeavour to give you an in-depth understanding of interactive Multimedia Systems. You will be given the theoretical basis and practical skills to motivate you in the design and creation of a state-of-the-art system in this discipline. In the process it will encourage a professional team approach appropriate to the industry environment.

INN401 Honours Dissertation 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research is about contributing to scientific knowledge. You will be expected to make such a contribution in your honours dissertation, although the size of that contribution will probably be relatively small as this is likely to be your first research project. The principle aim, however, is to provide you with basic research skills that you will be able to apply again in the future in other contexts, be they in a higher research degree, or applied to real-world problems in an industry setting. You will learn the types of processes, creativity and analytical thinking that leads to such scientific advances and how to communicate such findings in a rigorous scientific manner.

INN402 Honours Dissertation 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research is about contributing to scientific knowledge. You will be expected to make such a contribution in your honours dissertation, although the size of that contribution will probably be relatively small as this is likely to be your first research project. The principle aim, however, is to provide you with basic

research skills that you will be able to apply again in the future in other contexts, be they in a higher research degree, or applied to real-world problems in an industry setting. You will learn the types of processes, creativity and analytical thinking that leads to such scientific advances and how to communicate such findings in a rigorous scientific manner.

INN403 Honours Dissertation 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research is about contributing to scientific knowledge. You will be expected to make such a contribution in your honours dissertation, although the size of that contribution will probably be relatively small as this is likely to be your first research project. The principle aim, however, is to provide you with basic research skills that you will be able to apply again in the future in other contexts, be they in a higher research degree, or applied to real-world problems in an industry setting. You will learn the types of processes, creativity and analytical thinking that leads to such scientific advances and how to communicate such findings in a rigorous scientific manner.

INN404 Honours Dissertation 4

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research is about contributing to scientific knowledge. You will be expected to make such a contribution in your honours dissertation, although the size of that contribution will probably be relatively small as this is likely to be your first research project. The principle aim, however, is to provide you with basic research skills that you will be able to apply again in the future in other contexts, be they in a higher research degree, or applied to real-world problems in an industry setting. You will learn the types of processes, creativity and analytical thinking that leads to such scientific advances and how to communicate such findings in a rigorous scientific manner.

INN500 PRINCE2 (R) Project Management

Pre-requisites	Completion of 36 credit points of Postgraduate or International College Diploma units (INN% or QCD% or GSN%)
Anti-requisites	INB123, ITB365, ITB272
Equivalents	ITN272
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The majority of information technology (IT) initiatives, such as systems developments and implementations, are introduced into organizations through projects, and the success of these projects depends on their effective management. This unit covers the integration of the multi-disciplinary skills that students would have acquired at stage in the course required to manage IT projects successfully. Specifically, it covers the administrative, technical, communication and socio-political demands placed on modern IT project managers. The unit covers practical, relevant and topical IT project management issues delivered through workshops and lectures.

INN530 Online Information Services

Equivalents	ITN278
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT)

The primary aim of this unit is to provide a capstone experience that will allow you to draw on the knowledge and skills you have gained throughout your course. The unit focuses on the development of your skills and knowledge in web service delivery. You will have the opportunity to learn from industry experts and to reflect on how your studies have prepared you for this type of work. Through practical exercises, lectures, workshops and guest speakers, you will develop an introductory knowledge of web content management as it applies to organisations today. You will also be introduced to current trends and issues in web service delivery. You will develop an appreciation of the tasks, practices, principles and policies required for dynamic forms of web architecture, and you will begin to explore the development of skills required to work with and manage content management systems.

INN531 Collections Management

Equivalents	ITN276
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit seeks to develop your understanding of the key issues involved in developing and managing a contemporary and innovative collection. In particular you will be given the opportunity to become familiar with the methods and tools used in the selection and acquisition of information resources and the creation of information collections to meet the specific needs of a community or client group. You will also develop a working knowledge of the skills and techniques essential for critically evaluating the resources and collections created. The unit further seeks to develop your oral and written communication skills, critical thinking and teamwork skills.

INN532 Information Literacy Education

Equivalents	ITN279
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit aims to develop your understanding of information literacy and information literacy education and how these concepts can be applied according to the needs of client group(s) of your choice. As a professional you may engage in policy development, advocacy, research, developing and implementing instruction programs or managing staff who undertake these activities. New professionals and other educators can become heavily involved in teaching information literacy and skills to learners in a range of environment including academic, workplace or community programs. This unit provides the opportunity for theoretical and practical work in contexts of your choice to suit your individual interests.

INN533 Information Organisation

Equivalents	ITN275
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

The aim of this unit is to develop an understanding of the principles and practices of information organisation as applied to description and classification of knowledge contained in a range of information resources utilised in different contexts.

INN540 User Experience

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

Understanding users and their experiences is a vital dimension of IT professionals' competence and ethical awareness. People experience information and technology in a wide range of contexts, increasingly digital enviroments on a daily basis. Understanding people's experience provides an important foundation for design and evaluation of a wide range of technologies and user contexts. This subject provides an opportunity for you to explore your own experience as user and also the experience of others. You will explore the experience of others, through engaging with them directly or via technology, and by engaging with a wide range of resources that inform us about users' experiences. The aim of this unit is to introduce students to understanding and investigating users' experiences in contexts that interest them, with particular emphasis on digital environments.

INN550 Computer Forensics

Equivalents	ITN774
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to give you instruction in the principles of Computer Forensics, and the principles that need to be observed by the computer forensic investigator in order to successfully identify, secure, analyse and present digital evidence. In this advanced level elective unit we focus on the principles which direct the collection, analysis and presentation of the electronic or digital evidence available to a forensic investigator, and the techniques that are used in order to ensure that those principles are met for evidentiary requirements.

INN570 Internationalisation of Software

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Software is now a global market, and developers need to be able to produce applications that can be used in many different cultures and nations. There is a significant body of enabling technology that allows efficient and cost effective development of applications that can be used in diverse contexts. Understanding the principles and the technologies involved in internationalisation and localisation is essential for companies seeking to go global or that are already global.

INN600 Advanced Readings 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aim of this unit is to broaden your understanding of potential research topics and methods and support you in developing essential skills that enable clarity and focus in investigating IT research; rigour in evaluating claims and accuracy in your understanding of domain problems, related theories and methodologies appropriate to your specialist area.

INN601 Advanced Readings 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aim of this unit is to broaden your understanding of potential research topics and methods and support you in developing essential skills that enable clarity and focus in investigating IT research; rigour in evaluating claims and accuracy in your understanding of domain problems, related theories and methodologies appropriate to your specialist area.

INN602 Advanced Readings 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aim of this unit is to broaden your understanding of potential research topics and methods and support you in developing essential skills that enable clarity and focus in investigating IT research; rigour in evaluating claims and accuracy in your understanding of domain problems, related theories and methodologies appropriate to your specialist area.

INN605 Advanced Research 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit is to broaden your understanding of potential research topics and methods and support you in developing essential skills that enable clarity and focus in investigating IT research; rigour in evaluating claims and accuracy in your understanding of domain problems, related theories and methodologies appropriate to your specialist area.

INN606 Advanced Research 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit is to broaden your understanding of potential research topics and methods and support you in developing essential skills that enable clarity and focus in investigating IT research; rigour in evaluating claims and accuracy in your understanding of domain problems, related theories and methodologies appropriate to your specialist area.

INN607 Advanced Research 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit is to broaden your understanding of potential research topics and methods and support you in developing essential skills that enable clarity and focus in investigating IT research; rigour in evaluating claims and accuracy in your understanding of domain problems, related theories and methodologies appropriate to your specialist area.

INN610 Case Studies in Business Process Management

Pre-requisites	INN320 or INN321 with a grade of 6 and a GPA of at least 6
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit seeks to develop business process analysts capable of working as consultants. It seeks to develop the generic skills expected in graduates and in particular to develop better interpersonal skills, better written and oral communication skills, skills in conflict resolution, negotiation, project planning and project management. You will learn to identify, analyse and consider interdependencies. You will increase your awareness for the challenges of

teamwork. The projects also allow you to apply the theoretical knowledge gained in the pre-requisite unit to real practical problems. Overall, you will get insights into the skills, tools and services of consultants.

INN632 Professional Practice

Equivalents	ITN280-1
Credit Points	2
Campus	Gardens Point

This unit has been developed as an overarching unit in the IT70 Master of Information Management program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession. The unit is structured as a sequence of six modules, completed as you progress through the course.

INN632 Professional Practice

Pre-requisites	INN632-1
Equivalents	ITN280-6
Credit Points	2
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit has been developed as an overarching unit in the IT70 Master of Information Management program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession. The unit is structured as a sequence of six modules, completed as you progress through the course.

INN632 Professional Practice

Pre-requisites	INN632-1

Equivalents	ITN280-2
Credit Points	2
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit has been developed as an overarching unit in the IT70 Master of Information Management program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession. The unit is structured as a sequence of six modules, completed as you progress through the course.

INN632 Professional Practice

Pre-requisites	INN632-1
Equivalents	ITN280-3
Credit Points	2
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit has been developed as an overarching unit in the IT70 Master of Information Management program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession. The unit is structured as a sequence of six modules, completed as you progress through the course.

INN632 Professional Practice

Pre-requisites	INN632-1
Equivalents	ITN280-4
Credit Points	2
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit has been developed as an overarching unit in the IT70 Master of Information Management program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession. The unit is structured as a sequence of six modules, completed as you progress through the course.

INN632 Professional Practice

Pre-requisites	INN632-1
Equivalents	ITN280-5
Credit Points	2
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit has been developed as an overarching unit in the IT70 Master of Information Management program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession. The unit is structured as a sequence of six modules, completed as you progress through the course.

INN633 Executive Information Practice

Anti-requisites	INN631
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

This unit has been developed as an overarching unit in the Executive Information Practice program, to establish meaningful links between the various units of study and to introduce you to key aspects of management and leadership as well as personal and professional development as you plan your future career journey. This unit is designed to enable you, as an individual, to reach a

richer understanding of you capacities as a professional and as a future manager and leader.

INN634 Professional Practice

Equivalents	INN632-1,INN632-2,INN632-3,INN632-4,INN632-5,INN632-6,ITN280
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit has been developed as an overarching unit in the IT43 Master of Information Technology (Library and Information Science) program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession.

INN650 Advanced Network Management

Pre-requisites	INB351 or INN351
Equivalents	ITN771
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide you with an understanding of the advanced technical issues pertaining to the management of organisational networks of various sizes. You will use the Unix environment as the learning platform for attaining additional technical skills and for the enhancement of existing problem solving skills necessary to be a successful network administrator or manager.

INN651 Security Technologies

Anti-requisites	ITB731, ITN731
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to provide you with the knowledge to investigate and determine the security requirements for computer systems and networks and to understand the underlying issues and problems. In addition, this unit aims to enable you to investigate, evaluate and select the most appropriate security technologies for specific situations.

INN652 Advanced Cryptology

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Cryptology forms a core discipline in the study of information security. This unit concentrates on the latest developments in cryptology. This is a specialised unit that prepares postgraduate students for research in cryptology. The aim of the unit is to explore and understand recent developments in the theory and practice of cryptology. The unit provides fundamental knowledge for students seeking to undertake postgraduate research or work in the area of information security, especially involving cryptology.

INN690 Minor Project 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN691 Minor Project 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN692 Minor Project 3

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN693 Project

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN694 Project 1

Other requisites	Students must complete INN694-2 to receive a grade for this unit
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit enables you to carry out an independent or group project addressing a research question or practical problem in theoretical or practical information technology. It provides an opportunity to individualise your studies by concentrating on a specific problem. The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN694 Project

Pre-requisites	INN694-1. INN694-1 may be studied in the same teaching period as INN694-2.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit enables you to carry out an independent or group project addressing a research question or practical problem in theoretical or practical information technology. It provides an opportunity to individualise your studies by concentrating on a specific problem. The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well

written project report.

INN695 Major Project

Credit Points	48
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN696 Major Project 1

Other requisites	Students must complete INN696-2 to receive a grade for this unit
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN696 Major Project 2

Pre-requisites	INN696-1. INN696-1 may be studied in the same teaching period as INN696-2.
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN700 Introduction To Research

Pre-requisites	Admission into IT28 or IT29
Equivalents	ITN100
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT, EXT)

This unit is aimed at students undertaking a major research project (see corequisites above). In order to pursue such a project, you must have some insight into the range of possible approaches to research available. Before commencing the research proper, it is necessary to review related literature in depth and prepare a detailed proposal outlining the research question, design and project plan. Quality control and good project management must be exercised throughout the research project. Main items of assessment pertain to each student's unique, research project being pursued in parallel. This unit aims to give you insight into the range of possible approaches to research, to develop the skills needed to prepare your literature review and research proposal and to assist you in planning and managing time and resources.

INN701 Advanced Research Topics

Pre-requisites	INN700 which can be studied in the same teaching period as INN701
Equivalents	ITN269
Other requisites	Except with special permission, this unit is restricted to and mandatory for students enrolled in Honours, Professional Doctorate and PhD courses, and is optional for Research Masters students.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

All research students need an appreciation of a wide variety of potential approaches to conducting research and an understanding of the key issues that bear on such approaches. INN701 is an advanced unit aimed at research students who are soon to complete a detailed, rigorous and defensible design of their intended research project (e.g. Stage 2). Research students, coursework masters students and honours students intending undertaking a major research project should pursue INN701 either subsequent to, or in parallel with INN700.

INS010 Full Year Co-operative Education

Anti-requisites	INB300
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The Cooperative Education Program offered by the Faculty of Information Technology (also referred to within QUT as the Work-integrated Learning Program) will give you on-the-job experience through a one-year paid placement with one of our industry partners. Participation in the Cooperative Education Program offers you a real-world IT setting in which you can integrate and apply the skills you have already developed to this point in your course. It will also give you the opportunity for personal growth by allowing you to identify the complete range of both technical and non-technical skills that you may need to enhance or develop in order to have a successful career in the IT industry.

INS011 Co-operative Education 1

Anti-requisites	INB300
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The Cooperative Education Program offered by the Faculty of Information Technology (also referred to within QUT as the Work-integrated Learning Program) will give you on-the-job experience through a one-year paid placement with one of our industry partners. Participation in the Cooperative Education Program offers you a real-world IT setting in which you can integrate and apply the skills you have already developed to this point in your course. It will also give you the opportunity for personal growth by allowing you to identify the complete range of both technical and non-technical skills that you may need to enhance or develop in order to have a successful career in the IT industry.

INS012 Co-operative Education 2

Anti-requisites	INB300
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The Cooperative Education Program offered by the Faculty of Information Technology (also referred to within QUT as the Work-integrated Learning Program) will give you on-the-job experience through a one-year paid placement with one of our industry partners. Participation in the Cooperative Education Program offers you a real-world IT setting in which you can integrate and apply the skills you have already

developed to this point in your course. It will also give you the opportunity for personal growth by allowing you to identify the complete range of both technical and non-technical skills that you may need to enhance or develop in order to have a successful career in the IT industry.

INS020 Professional Experience (Undergraduate)

Anti-requisites	INB300
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Advanced Standing may be applied for Professional/Industry Experience. For instructions on how to apply, please refer to: www.scitech.qut.edu.au/documents/study/courses/vre/INS020.pdf

INS040 Professional Experience (Postgraduate)

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Advanced Standing may be applied for Professional/Industry Experience. For application instructions, please refer to: www.scitech.qut.edu.au/documents/study/courses/vre/INS040.pdf

INS350 CCNA 1&2 Network Fundamentals and Routing

Equivalents	ITS701, ITS601, ITB011, ITN011
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides in-demand Internet technology skills for designing, building and maintaining networks. Combining instructor-led, online education with hands-on laboratory exercises, the curriculum enables students to apply what they learn in class while working on actual networks. From building basic networking skills to advanced VLAN troubleshooting, the Networking Academy curriculum prepares students for industry certification that lead to lifelong opportunities. Particular emphasis is given to using decision-making and problem-solving techniques in the application of science, mathematics, communication and social studies concepts to solve networking problems.

INS351 CCNA 3&4 Lan Switching

Pre-requisites	INS350
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is the second step to a Cisco career certification path. The aim of this unit is to prepare students for the topics covered in Interconnecting Cisco Networking Devices Part 2 (ICND2) v1.0 (640-816) and Cisco Certified Network Associate Exam (CCNA 640-802). The ICND exam is one of the two qualifying exams available to candidates pursuing a two-exam option for the Cisco Certified Network Associate (CCNA) certification and CCNA 640-802, single-exam option for the Cisco Certified Network Associate CCNA certification.

INS352 CCNP Route

Pre-requisites	INS351
Anti-requisites	INS456, INS452
Equivalents	ITS703
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is the second step to a Cisco career certification path. It provides more knowledge and practical skills on Wide Area Network through various routing protocols and layer 2 related technologies. This unit provides you with advanced level of study on WAN technologies.

INS354 CCNP Switch

Pre-requisites	INS350 and INS351
Equivalents	ITS705
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is the second step to a Cisco career certification path. It provides more knowledge and practical skills on securing enterprise networks with various security technologies. The aim of this unit is to provide professional knowledge and skills focusing on securing LANs and WANs environment.

INS356 CISCO Security

Pre-requisites	INS350
Anti-requisites	INS456
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides internet technology skills for converged voice and data networks as well as the challenges faced by its various technologies. This unit presents generic solutions and implementation considerations to address those challenges. Students will learn about PSTN, Voice over IP network architecture, Voice over IP system components, features, and Quality of Service (QoS) technologies. In particular this unit focuses on developing understanding on the latest VoIP technologies and skills to build VoIP integrated campus networks.

INS357 CISCO VOIP

Pre-requisites	INS350
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides internet technology skills for converged voice and data networks as well as the challenges faced by its various technologies. This unit presents generic solutions and implementation considerations to address those challenges. Students will learn about PSTN, Voice over IP network architecture, Voice over IP system components, features, and Quality of Service (QoS) technologies. In particular this unit focuses on developing understanding on the latest VoIP technologies and skills to build VoIP network for campus networking environment. The aim of this unit is to prepare students for the topics covered in CISCO CCNA Voice Exam (640-460 IIUC Implementing Cisco IOS Unified Communications OR 642-436 CVOICE 6.0 Cisco Voice Over IP). This unit aims to build important knowledge and skills necessary to build the VoIP integrated campus network.

INS450 CCNA 1 and 2 Network Fundamentals and Routing

Anti-requisites	INS350
Equivalents	ITS701, ITS601, ITB011, ITN011
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides in-demand Internet technology skills for designing, building and maintaining networks. Combining instructor-led, online education with hands-on laboratory exercises, the curriculum enables students to apply what they learn in class while working on actual networks. From building basic networking skills to advanced VLAN troubleshooting, the Networking Academy curriculum prepares students for industry certification that lead to lifelong opportunities. Particular emphasis is given to using decision-making and problem-solving techniques in the application of science, mathematics, communication and social studies concepts to solve networking problems.

INS451 CCNA 3 and 4 Lan Switching

Pre-requisites	INS450 which can be studied in the same teaching period as INS451
Anti-requisites	INS351
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is the second step to a Cisco career certification path. The aim of this unit is to prepare students for the topics covered in Interconnecting Cisco Networking Devices Part 2 (ICND2) v1.0 (640-816) and Cisco Certified Network Associate Exam (CCNA 640-802). The ICND exam is one of the two qualifying exams available to candidates pursuing a two-exam option for the Cisco Certified Network Associate (CCNA) certification and CCNA 640-802, single-exam option for the Cisco Certified Network Associate CCNA certification.

INS452 CCNP Route

Anti-requisites	INS352
Equivalents	ITS703
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is the second step to a Cisco career certification path. It provides more knowledge and practical skills on Wide Area Network through various routing protocols and layer 2 related technologies. This unit provides you with advanced level of study on WAN technologies.

INS454 CCNP Switch

Anti-requisites	INS354
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is the second step to a Cisco career certification path. It provides more knowledge and practical skills on securing enterprise networks with various security technologies. The aim of this unit is to provide professional knowledge and skills focusing on securing LANs and WANs environment.

INS456 CISCO Security

Pre-requisites	INS450
Anti-requisites	INS356
Equivalents	ITS703
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides internet technology skills for converged voice and data networks as well as the challenges faced by its various technologies. This unit presents generic solutions and implementation considerations to address those challenges. Students will learn about PSTN, Voice over IP network architecture, Voice over IP system components, features, and Quality of Service (QoS) technologies. In particular this unit focuses on developing understanding on the latest VoIP technologies and skills to build VoIP integrated campus networks.

INS457 CISCO VOIP

Pre-requisites	INS450
Anti-requisites	INS357
Equivalents	INS350
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides internet technology skills for converged voice and data networks as well as the challenges faced by its various technologies. This unit presents generic solutions and implementation considerations to address those challenges. Students will learn about PSTN, Voice over IP network architecture, Voice over IP system components, features, and Quality of Service (QoS) technologies. In particular this unit focuses on developing understanding on the latest VoIP technologies and skills to build VoIP network for campus networking environment. The aim of this unit is to prepare students for the topics covered in CISCO CCNA Voice Exam (640-460 IIUC Implementing Cisco IOS Unified Communications OR 642-436 CVOICE 6.0 Cisco Voice Over IP). This unit aims to build important knowledge and skills necessary to build the VoIP integrated campus network.

IZN001 Principles and Practices of University Learning and Teaching

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

IZN002 Curriculum Design and Assessment in Contemporary Learning Environments

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

IZN003 Research and Career Planning and Development

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

IZN004 Scholarly Learning and Teaching Project

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

JSB170 Introduction to Criminology and Policing

Equivalents	JSB131, JSB011, JSB101
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit will provide you with an introduction to both of the majors before you make your choice. It will provide you with a foundation for understanding criminology and policing. It begins with an

exploration of the existing explanations of crime from both an individual and social perspective and will provide you with a background of policing in Queensland, Australia and internationally. The remainder of the unit then covers topics of interest to those within the area of criminal justice, policing and criminology, for example, crimes in the home, crime in public, cyber crime, and street crime

JSB171 Justice and Society

Equivalents	JSB131, JSB011, JSB101
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The Justice degree is about producing competent justice professionals. In order to achieve this purpose, this degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. The purpose of this unit is to introduce students to the structural parameters of social justice.

JSB172 Professional Criminological Research Skills

Equivalents	JSB132, JSB012, JSB104
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

There are a range of skills which are essential for students studying the Bachelor of Justice degree. This unit introduces basic skills in research and written communication in order to lay a successful foundation for academic and professional achievement

JSB173 Understanding the Criminal Justice System

Equivalents	JSB135, JSB015, JSB202
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The Justice Studies degree is about producing competent justice professionals. In order to achieve this purpose, this degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. This unit provides a clear overview and critical examination of the Australian criminal justice system.

JSB174 Forensic Psychology and the Law

Equivalents	JSB136
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Forensic Psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. Psychologists are now involved significantly in policing, judicial procedures and correctional processes. The term 'forensic' literally means 'of or used in law courts' (Australian Oxford Paperback Dictionary). The term 'psychology and the law', however, is now used more generally to describe the different ways in which psychology and law intersect - namely the psychology of the law, psychology in the law, and psychology by the law. By its very nature the study of psychology and law draws from a wide multi-disciplinary base for the application of specialised knowledge. As a student of this discipline area, you will need a broad introductory appreciation of (and a critical perspective on) what the study of psychology and the law involves and what it has to offer across the three criminal justice domains of the police, the courts, and corrections.

JSB175 Social Ethics and the Justice System

Equivalents	JSB134
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

It is essential for those employed within the justice system be able to competently and confidently work at the borders between ethics and the law. Ethical ability will enable practitioners to critically assess the moral status of current laws, to interpret acceptable standards of behaviour in situations not covered by the laws, and to develop shared understandings of moral responsibility in justice organizations and the wider community.

JSB176 Criminal Law in Context

Equivalents	JSB242, JSB024, JSB204
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT)

Justice students work, or hope to work, as justice professionals in areas related to the Criminal Justice System or Human Rights. They need an understanding of fundamental principles of criminal law and of social justice issues related to criminal law. Laypeople may assume that the law is shaped by rational decisions aimed at reducing crime and punishing wrongdoing, when in fact a closer examination of the policy underpinnings, the substance of the law and the way in which it is applied demonstrates that such an analysis is overly simplistic. A deeper understanding of the forces that shape the law and the way the law's application can distort its policy objectives is essential to those who wish to contribute to more effective laws.

JSB177 Crimes of Violence

Equivalents	JSB138
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (EXT, INT)

Justice students work, or hope to work, as justice professionals in areas related to the criminal justice system or human rights. They need an understanding of fundamental principles of criminal law and of social justice issues related to criminal law. Students undertaking the Criminology and Policing major need to understand issues of criminal procedure and due process, as well as specific contexts of criminal law. Crimes of violence provides students with an understanding of the forces that shape this area of the law and the rationales for its implementation.

JSB255 Eco Crime

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

JSB257 Policing Diversity

Credit Points	12
Campus	

Are policing strategies developed for ‘mainstream’ Australia effective for Aboriginals, or refugees from East Africa? Are Australian police forces equipped to provide effective services to the range of diverse communities they police? What programmes and initiatives are police using in Australia and overseas, and are they working? These questions form the basis for a course in Policing Diversity. This unit takes up the challenge to critical analyse these questions and thereby offer students an advanced education about

the issues related to policing increasingly diverse populations in modern, complex societies like Australia. The unit will focus on key issues such as policing new migrant and refugee communities, Lesbian, Gay, Bisexual and Transgender (LGBT) communities, police and Aboriginal peoples, critical analysis of contemporary Australian policies and programmes aimed at enhancing police effectiveness in responding to cultural and social difference.

JSB258 Official Corruption

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

JSB259 Criminal Database Analysis

Credit Points	12
Campus	Gardens Point

As a consequence of the increasing reliance on computer technology within the investigative and intelligence communities within Australia it is recognised that students should gain a working knowledge of the design and development of criminal databases as well as the ability to analyse the data so contained.

JSB260 Global Justice and Human Security

Credit Points	12
Campus	Gardens Point and External

The aim of this unit is to provide students with an understanding of justice from a global perspective. Students will gain a detailed knowledge of the global context of human rights, and an understanding of the social, political and economic causes of human rights abuses. This unit will also provide an introduction to the theory of human security, and present case studies of crimes against human rights. Students should leave the unit with a good working knowledge of the key challenges justice professionals face in the maintenance of international justice and the prevention of human rights abuses.

JSB271 Policy Governance and Justice

Equivalents	JSB251, JSB081
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit will enable you to become familiar with policy-making practices and wider issues of governance. The unit aims to introduce the theory and practice of public policy with an emphasis on policy issues relevant to criminal and social justice. It analyses processes in policy development such as policy formation, writing, implementation and evaluation. You will gain tools for participating in policy development processes in both the public and community sectors.

JSB272 Theories of Crime

Pre-requisites	96cp of previous study
Anti-requisites	JSN113
Equivalents	JSB231, JSB018
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The main aim of this unit is to introduce the student to the study of theoretical criminology. This unit will address the social context of crime but is not exclusively sociological. The study of criminology is essentially multi-disciplinary and this is reflected in the diversity of theoretical approaches. Theory is typically offered as distinct from methods of research, however, together they provide the foundation for policy and practice. The unit provides an analytical framework in order to critically assess the epistemological claims and justifications found in criminological theory. Criminological theories are viewed embedded governmental practices aimed at ensuring the regulation and control of particular 'problem populations'.

JSB273 Crime Research Methods

Pre-requisites	96cp of previous study
Equivalents	JSB933, JSB043
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This subject builds upon research skills acquired in first year study and is thus intended to provide knowledge and skills in research design and methodology for use in the fields of criminal justice, justice administration and criminology. The aims of this unit are three-fold. First, to revisit issues central to the research process. Second, to introduce students to a variety of research design models, data collection techniques and data analyses. Third, to give students the practical skills in writing a research proposal, carrying out a research project and reporting the research results. This subject, offered as a compulsory primary major unit in both the Criminology and Policing primary majors and sets the foundation for research in the justice honours program.

JSB274 Policing in Context

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit studies the diverse roles, duties, powers and problems of policing in Australia with the primary focus on sworn police officers and also the approaches of policing in Australia across three key sections. The first section called 'Principles of Policing', comprises of four modules that cover the principle knowledge needed for understanding the policing history, context and structure in Australia. The second section is 'Specialisation' which focusses in closer detail the actual skills, tasks and operations that police are expected to engage in as part of their core skill requirements. In the final section, 'Issues', the module reflects on contemporary issues that are enhancing the task of police work and may potentially change its areas of specialisation.

JSB371 Indigenous Justice

Equivalents	JSB352
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

In the context of increasing public and institutional concern for the recognition of the political, social, cultural and legal rights of Indigenous peoples, it is essential that those who work in the justice system have an understanding of contemporary Indigenous justice issues. All justice professionals require a sound grasp of the unique aspects of Indigenous culture and society which impact upon the interaction of Indigenous people with the justice system. The operation of both the criminal and civil justice systems in Australia has, at times, been characterised by inequity, intolerance and ignorance in the development and implementation of policies directed towards Indigenous people. This unit explores the major areas of interaction between Indigenous Australians and the justice and legal systems and seeks to raise awareness of those factors which inhibit the formulation of sound policy and

practice.

JSB372 Youth Justice

Equivalents	JSB232, JSB041
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit is concerned with the way in which a 'youth crime problem' is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the administration and management of youth crime through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdictions. Contemporary articulations of youth crime control are examined in relation to Queensland's system of youth justice, particularly as this relates to young indigenous people, young women and those from various social classes and ethnic groups. Theoretically, the unit takes as its starting point a genealogical analysis that focuses on questions of knowledge, power, regulation and discipline. These are discussed in relation to the contemporary government of young people in Australia and other 'western' countries.

JSB373 Punishment and Penal Policy

Anti-requisites	JSB233, JSB331
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT)

What is punishment? Why do we punish crime and deviance the way we do? Why do we have so many people in prison and why don’t prisons seem to work to reduce crime and make society safer? These are all important philosophical and theoretical questions that are of concern to academics, researchers, policy workers, and the general public. This unit takes up the challenge to critically analyse these questions and thereby offering students an advanced education about the philosophy of punishment, and the theoretical bases of modern penal policy. The unit will focus on the history of punishment and prisons, the rise of correctional privatisation, the rehabilitation ideal and ‘treatment’ of offending, and responses to ‘difference’, including women and indigenous-focused policies and interventions.

JSB376 Information Management and Analysis

Anti-requisites	JSN106
Credit Points	12
Campus	Gardens Point

The policing role within society is continually changing, and since the advent of information technology the use of various hardware and software have become a basic requirement of the policing organisations. It is through the inputting and analysis of respective data that a police or law enforcement organisation can monitor the development of crime trends or criminal linkages or associations with the aid of computer technology. The aim of this unit of study is to expose you to the computer software being utilised within the professions. The unit also seeks to provide the student with the ability to process and analyse data utilising the selected software packages and subsequently proposing solutions to problems evidenced from the data analysis.

JSB414 Thesis 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 1, 3 and 4 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. This unit provides the preparation for the honours dissertation.

JSB414 Thesis 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 2, 3 and 4 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. This unit provides the preparation for the honours dissertation.

JSB414 Thesis 3

Credit Points	12
Campus	Gardens Point

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 1, 2 and 4 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. This unit provides the preparation for the honours dissertation.

JSB414 Thesis 4

Credit Points	12
Campus	Gardens Point

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 1, 2, and 3 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. This unit provides the preparation for the honours dissertation.

JSB415 Advanced Research Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Employment as a researcher in government departments and justice agencies and the successful undertaking of higher degree study requires an ability to independently design and execute complex research projects. The Honours year is often the first time that students have been required to research independently. An integral part of good research is the establishment of parameters within which their research should proceed. Knowledge of the literature in and around the chosen topic is vital to establishing the basis of a good research project. This unit will provide students with an opportunity to become thoroughly familiar with the bibliography of specialised literature relevant to their nominated field of research and to conduct a comprehensive research pr

JSB971 Gender Crime and the Criminal Justice System

Credit Points	12
Campus	Gardens Point and External

Teaching Periods	2012 SEM-2 (EXT, INT)

This unit examines the experiences and treatment of men and women as criminals, victims and workers within the criminal justice system by asking whether and how: a) offending patterns vary according to gender, b) experiences of victimisation differ for men and women, c) the treatment and experiences of male and female offenders, victims and workers within the criminal justice system differ. Theories about crime, victimisation and criminal justice practice in relation to gender are also explored as are intersections between gender and Indigenous status. Recent developments in criminal justice policy and practice that could potentially effect future change with regard to gender inequities are critically examined.

JSB975 Independent Study

Equivalents	JSB931, JSB092
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The independent study represents an individual piece of research completed under the guidance of an academic supervisor. It may be a research study which makes a contribution to the body of knowledge in your discipline area or professional background, or a study in which you critically analyse and evaluate existing knowledge and produces observations and conclusions of relevance to the particular field of study.

JSB976 Independent Study

Equivalents	JSB931, JSB092
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

The independent study represents an individual piece of research completed under the guidance of an academic supervisor. It may be a research study which makes a contribution to the body of knowledge in your discipline area or professional background, or a study in which you critically analyse and evaluate existing knowledge and produces observations and conclusions of relevance to the particular field of study.

JSB977 Organised and Transnational Crime

Anti-requisites	JSB982
Equivalents	JSB342, JSB053
Credit Points	12
Campus	Gardens Point and External

The aim of this unit is to provide knowledge and understanding of organised crime activities through an examination of problems created by organised crime for policing. Specifically it looks at three issues: a) applying Social Science perspectives to interpret Organised Crime; b) using those perspectives to develop strategies for investigating Organised Crime; and c) using them to aid police agencies to report objectively to the community on all the realities of Organised Crime.

JSB979 Forensic Scientific Evidence

Equivalents	JSB937, JSB444
Credit Points	12
Campus	Gardens Point and External

The word 'forensic' once meant anything relating to a law court. However today the term 'forensic science' refers to a whole new subject: it means using science to solve legal issues. As science, and the many sub-disciplines of science, are appearing in court with ever-increasing rapidity, there is a clear need for scientists to understand the foundations to the law, the ways in which law reasons, the adversarial process, and the basics to the key area of evidence law. The aim of this unit is first to provide you with an understanding of evidence law, with a particular emphasis upon the foundations to reception of scientific evidence, and the ways in which expert scientific witnesses are received in our courts. The unit aims to clarify the links between science and law, as well as to articulate the differences between these two increasingly inter-twined disciplines.

JSB980 Professional Placement

Equivalents	JSB934
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In order to operate effectively in the workplace you will need to be able to connect and apply the knowledge and theory you have gained from the other units in the course to the practice of the profession in which you gain employment. Successful running of this unit will depend on the number of professional practices that are willing to participate.

JSB986 Death Investigation

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (INT, EXT)

JSN101 Justice and Human Rights

Equivalents	JSN001, JSP001, JSB411, LWN040
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

Arguments concerning perceived problems of justice and injustice usually reveal conflicting ideas about what justice actually means both theoretically, and in practice. Justice and human rights go hand in hand both theoretically and in the practice of law enforcement and other criminal justice professions. You will require a sophisticated level of understanding of theories of justice and human rights in a social and criminal context if you are to effectively apply in practice the content knowledge you have acquired in the course of your post graduate study.

JSN102 Applied Data Analysis Techniques For Criminology and Criminal Justice

Equivalents	JSN018, JSN163, JSP163, JSP063
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

The content of this Unit is based on an assumption that students have a solid knowledge of research methodologies. This includes: an understanding of qualitative and quantitative research paradigms; principles of sampling; and various methods of collecting data. This Unit will build on that knowledge and provide students with an understanding of the techniques that can be used to analyse both quantitative and qualitative data. These skills are important for those working in criminal justice and related fields in order for them to not only process research data but also to make sense of research results published in reports, journals and other publications.

JSN104 Transnational and Organised Crime

Anti-requisites	JSB982

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

JSN106 Analytical Methods of Intelligence

Anti-requisites	JSB376
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (BLK)

Over the last decade or so selected technological advances have enhanced the ability of policing and intelligence agencies to collate and analyse large amounts of data and then display the links and associations in a visual manner. By doing this the respective gaps and areas requiring additional input of information become evident, thus enhancing the gathering of information and promoting the success of the investigation. As the use of the available computer software is the contemporary professional standard it is incumbent on individuals employed within this environment to utilise the data analysis software.

JSN108 National Security and Intelligence

Equivalents	JSN164, JSP164, JSP065
Credit Points	12
Campus	Internet and External

The rationale of this unit is for you to be able to gain insight on how security is conceptualised from a theoretical and applied perspective. This knowledge of the variety of ways, in which security is defined and sought, will enable a critical analysis of what security means for Australia. In addition, this unit will explore the contemporary issues that intelligence gathering operations are currently engaged with at the regional and international level. Security ostensibly is a multilayered task, which requires the domestic, regional and international conceptualisation of threats and strategic responses. This unit will profile how security prioritization occurs within nation states and how security is conceptualised today in relation to both traditional and non-traditional security threats.

JSN109 Intelligence Practice 1

Equivalents	JSN161, JSP161, JSP061
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

Intelligence professionals provide support to government and the private sector. Intelligence analysts are increasingly taking a leading role in investigations by providing more information to provide an informed decision for team leaders of criminal investigation teams. Within the Intelligence community they offer an advantage to managers, through the provision of accurate and timely advice. This unit presents the essentials of the intelligence system, the intelligence process and creative problem solving skills within the intelligence environment. Intelligence analysts are provided with methodologies and tools for their profession. Intelligence work requires proficiency in thinking strategies and skills, effective interpersonal skills, teamwork and application of intelligence process methodologies in a variety of contexts.

JSN110 Intelligence Practice 2

Equivalents	JSN162, JSP162, JSP067
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-2 (EXT)

There are two perspectives to be borne in mind: the management of intelligence within organisations; and, intelligence management. The unit examines organisational structures against proven principles. It acknowledges the importance of people, and examines the specific needs of personnel systems in an intelligence environment. Finally, it looks at the processes to plan and conduct efficient operations. The unit considers the management of intelligence organisations, personnel and operations. It recognises the need for managers to be attuned to the context and environment in which they are operating. The unit examines organisational structures against proven principles. The subject concentrates on applying established principles and procedures to the unique needs of intelligence organisations.

JSN111 Terrorism and Political Violence

Anti-requisites	JSB985
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

In this unit you will be taught the defining characteristics of terrorism and why it is described as both a political and criminal act. During the unit you will be exposed to different types of terror tactics and will investigate particular terror groups that are currently operating on a national, regional and international scale. This unit will explore the characteristics of terrorist organizations and examine how recent developments in technology and finance allow them to flourish. The unit will provide students with the opportunity to critically engage with counter-terror tactics, assess whether the tactics engage with the terror threat as a political or criminal one, and evaluate their effectiveness.

JSN113 Theories of Crime

Anti-requisites	JSB272, JSB231, JSB018
Credit Points	12
Campus	Internet and External

The main aim of this unit is to introduce you to the study of theoretical criminology. This unit will address the social context of crime but is not exclusively sociological. The study of criminology is essentially multi-disciplinary and this is reflected in the diversity of theoretical approaches. Theory is typically offered as distinct from methods of research, however, together they provide the foundation for policy and practice. The unit provides an analytical framework in order to critically assess the epistemological claims and justifications found in criminological theory. Criminological theories are viewed embedded governmental practices aimed at ensuring the regulation and control of particular 'problem populations'.

JSN116 Independent Study

Equivalents	JSN006
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

In the course of their study, Justice students may discover an area that is of particular interest to them, or which has specific relevance to their intended professional orientation. This unit gives you the opportunity to extend aspects of your coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

JSN117 Independent Study

Equivalents	JSN007
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-2 (EXT)

In the course of their study, Justice

students may discover an area that is of particular interest to them, or which has specific relevance to their intended professional orientation. This unit gives you the opportunity to extend aspects of your coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

JSN122 Research Thesis

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT)

JSN123 Research Thesis

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT)

JSN124 Criminal Database Analysis

Credit Points	12
Campus	External

As a consequence of the increasing reliance on computer technology within the investigative and intelligence communities within Australia it is recognised that students should gain a working knowledge of the design and development of criminal databases as well as the ability to analyse the data so contained.

JSN125 Official Corruption and Ethics

Credit Points	12
Campus	External

Until recently, technological advancements and increased economic rationalism had forced public and private organisations into a managerial mode of governance that focussed on outcomes at the expense of process. The managerial mode created major gaps in public accountability and responsibility, leading to increased risk of corruption, fraud and scandal. To address these problems, current government policy has begun to focus more and more on governance and accountability and their associated processes. This unit provides the theoretical and conceptual basis for examining and analysing the ethical issues involved in contemporary public and private organisations, and offers a critical analysis of current attempts at addressing these issues.

JSN129 Policing Diversity

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (EXT)

Are policing strategies developed for 'mainstream' Australia effective for Aboriginals, or refugees from East Africa? Are Australian police forces equipped to provide effective services to the range of diverse communities they police? What programmes and initiatives are police using in Australia and overseas, and are they working? These questions form the basis for a course in Policing Diversity. This unit takes up the challenge to critical analyse these questions and thereby offer students an advanced education about the issues related to policing increasingly diverse populations in modern, complex societies like Australia. The unit will focus on key issues such as policing new migrant and refugee communities, Lesbian, Gay, Bisexual and Transgender (LGBT) communities, police and Aboriginal peoples, critical analysis of contemporary Australian policies and programmes aimed at enhancing police effectiveness in responding to cultural and social difference.

JSZ901 Transnational Organised Crime and Terrorism

Credit Points	12
Campus	Singapore
Teaching Periods	2012 SEM-2 (INT)

The aims of this unit are to provide knowledge and understanding for police officers about the motivators of terrorism (religious extremism, nationalism, ideology) conventional and non-conventional forms of terrorism (nuclear, chemical, biological, radiological) as well as state-sponsored terrorism and narco-terrorism and the nexus between transnational organised crime and various forms of terrorism.

JSZ902 Criminal and Terrorism Profiling

Credit Points	12
Campus	Singapore
Teaching Periods	2012 SEM-2 (INT)

The aims of this unit are to provide knowledge and understanding for police officers about the different approaches to criminal and terrorism profiling available to police and law enforcement agencies in order to improve their effectiveness of operational policing duties.

JSZ903 Investigative Thinking and Knowledge Management

Credit Points	12
Campus	Singapore
Teaching Periods	2012 SUM (INT)

The aim of this unit is to provide knowledge and understanding for street police about the qualitatively different 'investigative thinking styles' (ITS) that detectives use when conducting ongoing investigations, and the management of such investigative knowledge, in order to improve their effectiveness when responding to incidents.

JSZ904 Justice Research Methodologies

Credit Points	12
Campus	Singapore
Teaching Periods	2012 SUM (INT)

The aims of this unit are to provide knowledge and understanding for police officers about the different research methodologies available to them for getting the necessary information from and about their local community in order to be better informed about how best to carry out the mission of policing.

JSZ905 Asian Economic Crime Trends

Credit Points	12
Campus	Singapore
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide a knowledge and understanding for police officers about the exponential growth of economic crime within the Asia-Pacific region. By being aware of the economic nature of the structure and operations of transnational, organised, corporate and white-collar crime and their relationship to terrorism activities police officers will be better equipped to combat these types of criminal and terrorist behaviours.

JSZ906 Police Research Project

Credit Points	12
Campus	Singapore
Teaching Periods	2012 SEM-1 (INT)

This unit provides further development, enhanced from JSZ904, on how to design and conduct a police-specific research project on the policing theme of 'local

solutions for local conditions'. The aims of this unit are to provide knowledge, understanding and practice for general duties police in knowing how to design and conduct empirically acceptable research projects to increase the knowledge base and professionalism of a Police Service.

KAP401 Advertising Creative: Introduction

Equivalents	KIP424
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to the creative side of advertising, involving the analysis of advertising creative content, the development of creative strategies, creative concepts, and the crafting of persuasive ideas. The unit is the foundation for further work in creative advertising, and provides you with a thorough grounding in creative advertising history, industry practices, strategies and concept development. * KIP424 will be recoded to KAP401 from July 2012. Please enrol in KIP424 if you wish to study this unit in the first half of 2012. Please enrol in KAP401 if you wish to study this unit in the second half of 2012.

KAP402 Advertising Creative: Copywriting and Art Direction

Pre-requisites	KAP401. KAP401 can be enrolled in the same teaching period.
Equivalents	KIP426
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Copywriting and art direction are fundamental to creative advertising practice. Both tasks exist at the front end of advertising: copywriters and art directors help to bring advertising campaigns to life through creative concept development, writing, and liaising with both clients and artists. This unit builds on the introductory creative advertising units. It examines contemporary advertising theory and practice and develops practical skills in writing and art directing. Case studies examine a wide range of advertising campaigns, including campaigns to sell products, corporate reputations, and not-for-profit organisations. * KIP426 will be recoded to KAP402 from July 2012. Please enrol in KIP426 if you wish to study this unit in the first half of 2012. Please enrol in KAP402 if you wish to study this unit in the second half of 2012.

KAP403 Advertising Creative: Trends in New Media

Equivalents	KIP429
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops core skills in the creative production of advertising for key electronic and print media: TV, radio, cinema, paper, print, magazine, and outdoors; with a strong emphasis on interactive and new media trends. It examines how creative advertisers use these media principles for creating effective ads; the media influence in the creative process; how to present concepts for each medium; and the roles, steps and components of creative advertising production. Through this process, you will expand your understanding of and skills in developing ads for the key electronic, print and new mediums. * KIP429 will be recoded to KAP403 from July 2012. Please enrol in KIP429 if you wish to study this unit in the first half of 2012. Please enrol in KAP403 if you wish to study this unit in the second half of 2012.

KCB101 Introduction to Media and Communication: Texts

Credit Points	12
Campus	Kelvin Grove

This unit introduces you to foundational ideas in the study of communication. It covers key questions of textual analysis, practice, and context. Drawing extensively on examples of popular communication practice from contemporary society, the unit aims to impart an understanding of communication ecologies, processes, systems, and modes within the wider frame of radical changes occuring to the way texts are produced, read and circulated within our culture.

KCB102 Media Myth Busting

Equivalents	KCB140
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit explores a variety of key myths, controversies and debates surrounding the relationship between media and society. It investigates the historical foundations, cultural context and factual accuracy of a series of 'common sense' arguments regarding how different kinds of media have or have not affected the way our society functions.

KCB103 Strategic Speech Communication

Equivalents	KCB213, KCD103
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit emphasises both the theory and practice of speech and interpersonal communication. It introduces theories of language, rhetoric and persuasion, which are interrelated to promote understanding and development of your communication skills. Classroom practice in simulated work situations will enhance the leadership skills you need to become articulate presenters in a range of contexts including personal presentations and interviews.

KCB104 Media and Communication: Industries

Equivalents	KCB150
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

A contemporary understanding of the cultural and economic significance of media and communication industries is a vital foundation for scholarship and professional practice in the media and communications industries. This unit surveys the political economies of print and electronic media industries, as well as advertising and public relations. It considers the impact of regulation on these industries and explores convergence and globalisation as frameworks for understanding change. You will be supported to develop your own strategy for maintaining current awareness of media and communication industries in the process of evaluating current public and policy debates.

KCB105 Inquiry in Media and Communication

Equivalents	KCB334
Credit Points	12
Campus	Kelvin Grove

The research process (define problem, collect relevant information, analyse information, formulate conclusions/outcomes) underlies many decisions that confront media and communication professionals. This subject introduces foundational research

skills and contextualises them with a number of media and communication problems. The unit will involve qualitative and quantitative research methods including content analysis, focus groups, ethnography, interviews and survey research which are studied in the context of media and communication problems and issues. You will carry out research using some of these methods, analyse the results and present your conclusions and recommendations.

KCB106 Media in a Globalised World

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Media organisations in Australia operate in a global context. Australian media content represents an important export for the country's economy, while Australian audiences consume large quantities of content produced overseas, or adapted from formats originated in other media markets. There is great value, therefore, in students of journalism, media and communication learning how the global media market functions, and the implications of cultural globalisation for professional practice. This foundation unit will introduce you to the global nature of media production, and to your role as a future practitioner in a globalised media system.

KCB110 Introduction to Mass Communication

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces you to the main theories of mass communication and to key contemporary issues in mass communication industries. Investigating topics such as ethical and legal issues in mass communication, the relationship between journalism and public relations, advertising and new media and the future of television, you will analyse and critique mass communication media and professional practice in a range of formats.

KCB203 Consumption Matters: Consumer Cultures and Identity

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

A knowledge of and ability to research consumer cultures is essential to those working in the Creative Industries: it is crucial to understand the ways in which consumption actively shapes not only media and production industries, but also the value and meanings of products themselves. This unit requires you to synthesise and apply concepts and methodologies that you have learned in earlier units. This unit focuses on developing in you a broader understanding of media, communication, and production through the lens of consumer cultures. The knowledge that you gain in this unit will inform your future professional, academic, and creative practices.

KCB205 Professional Communication

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Professional Communication aims to enhance your career prospects by developing a better understanding of communication dynamics between individuals and groups in organisational settings. The unit will sharpen your practical and critical skills in situation analysis, project proposal development, formal document production, sponsor and client presentations, and workplace communication practices. Although the main focus of the unit is on the creative and cultural industries, the content and skills covered are applicable to a range of professions and career options.

KCB206 Internet, Self and Beyond

Equivalents	KCB201, KCB295
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The number of individuals in contemporary societies who use new media technologies to shape, (re)form and sustain their identities is on the rise. From social networking sites like FaceBook and blogs to YouTube, this unit takes you through the critical enquiry of your use of new media in five aspects of everyday life: entertainment, socialisation, information, education and business, health and well-being, and beliefs and politics. This unit also introduces them to theories, issues and deliberations surrounding new media.

KCB207 Exploring New Media Worlds

Anti-requisites	KCP408
Equivalents	KCB202, KCB336
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit expands and builds on the connections made between new media and everyday life for the individual in KCB206 to include the relationships between individuals and communities that are afforded, extended, amplified and intensified as well as attenuated by new media technologies and practices. It accomplishes this through an exploration of contemporary worlds—the world of connections; the world of play; the world of commerce and the world of politics—with new media lenses. Alongside the concepts underlying these explorations, you will also examine, confront and challenge the notion of the boundaries surrounding new media such as the limits of embodiment, nation-states and their infrastructures of laws and economics. The knowledge you gain and processes you learn in this unit will add to your professional, academic and creative development.

KCB301 Media Audiences

Equivalents	KCB349
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with a conceptual understanding of media audiences within industry and academic contexts. In addition, the unit introduces you to a range of practical skills that may be applied when undertaking audience research. A knowledge of and ability to research audiences is essential to a detailed and comprehensive understanding of the media. The ability to undertake quantitative and qualitative research into various audience groupings, the use of associated analytical tools and the ability to critically analyse academic and industry based audience research are important skills for undertaking both postgraduate research in Media & Communication and those seeking employment in media industries.

KCB302 Political Communication

Equivalents	KCB311

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an overview of the theory and professional practices of political and parliamentary communication especially through the media and communications industries. The unit examines contemporary and historical political campaigns in Australia and internationally from the perspectives of media influence, strategic image and issue management, rhetorical models, and persuasion theory. The unit also considers how professional campaign consultants plan and develop political campaigns.

KCB303 Brisbane Media Map 1

Other requisites	Unit coordinator approval is required. Students are expected to have completed 192cp of undergraduate study.
Credit Points	12
Campus	Kelvin Grove

Networks of industry and professional association are extremely important in media and communication industries. In this unit you will extend and apply your critical knowledge of media and communication to the task of deepening your understanding of these networks. Through developing and updating the Brisbane Media Map—an online resource that profiles media and communication industries in Brisbane—you will also refine your project planning and management skills, information analysis skills, and team leadership and membership skills. You will also explore ethical, communication, and intellectual property concerns that arise in the processes of undertaking a real-world media and communication industries project.

KCB304 Designing Communication Resources

Pre-requisites	Completion of 72 credit points of study
Equivalents	KCB335
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Controlled media resources (such as brochures, booklets, information kits, promotional materials, and web sites) are common tools used during communication campaigns. This unit develops your abilities to devise effective resources for clients. You will develop critical and practical skills in evaluating resources, managing projects, researching the audience, writing and designing resources, testing your work, and seeing the product through to final production. The unit involves desktop publishing training, and offers you the opportunity to develop a print or electronic resource for a client.

KCD103 Strategic Speech Communication

Equivalents	KCB213, KCB103
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP2 (INT)

This unit is based in rhetorical and communication theories, as a base for developing professionals who are articulate presenters, probing but empathic interviewers and interviewees, and good team players. Theory and practice are interrelated to develop understanding and self-reflexivity within students in terms of their own communication skills, and to guide them to become effective leaders in the communication industries and professions. Practice in simulated work situations will allow growth and learning in the laboratory of the classroom.

KCP407 Applied Professional Communication

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit hones your skills in professional communication and integrates the important skills of writing and presenting under a strategic planning framework. It includes a focus on leadership, teamwork, audience analysis, evaluation, and ethics.

KCP408 Exploring New Media Worlds

Anti-requisites	KCB207
Equivalents	KCP402, KCP336
Credit Points	12
Campus	Kelvin Grove

This unit focuses on the relationships between individuals and communities that are afforded, extended, amplified and intensified as well as attenuated by new media technologies and practices. You will explore the contemporary worlds of connections, play, commerce and politics through the lenses of new media. In the process, you will examine, confront and challenge the notion of the boundaries surrounding new media such as the limits of embodiment, nation-state sovereignty and their infrastructures of laws and economics.

KCP415 Co-Creative Media: Digital Storytelling

Equivalents	KKP405, KCP403, KCP353
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SUM (INT)

In this unit you will learn about the breadth of achievements of research in the Creative Industries (for example, in making visible the creative economy. This knowledge is essential for arts and creative industries managers. You will also have the option to experience deep learning in the theory and practice of one particular creative human capital development technique and qualitative research platform, known as Digital Storytelling. * KKP405 will be recoded to KCP415 from July 2012. Please enrol in KKP405 if you wish to study this unit in the first half of 2012. Please enrol in KCP415 if you wish to study this unit in the second half of 2012.

KCP416 Global Media and Communication

Equivalents	KKP406
Credit Points	12
Campus	Kelvin Grove

This unit provides an advanced-level overview of key developments in 21st century global media and communications. It considers the theoretical underpinnings of global media from perspectives including political economy, cultural studies and professional practice. It will examine major international developments in journalism, advertising, film and television and new media, through a grounded case study approach into global media organisations, production processes and cultural factors, with particular emphasis on developments in Australia, the Pacific and Asia. * KKP406 will be recoded to KCP416 from 2013. Please enrol in KKP406 if you wish to study this unit in 2012. KCP416 will be available from 2013.

KCP417 Creative Industries in Asia

Equivalents	KKP407, KTP407, KCP354
Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 SEM-2 (INT)

Forces associated with the rise of creative industries, such as globalisation, the knowledge-based economy, and media and communications networks are significantly shifting both public policy and creative practice in the Asia-Pacific region, and raising new challenges, tensions and contradictions in politics, economics and culture. This unit will provide you with an understanding of how developments in the creative industries will affect the economics, politics and cultural development of nations and people in the Asian region.

KCP418 Fundamental Media Skills for the Workplace

Equivalents	KKP410
Credit Points	12
Campus	Kelvin Grove

This unit introduces an array of media products that are often used in the workplace and allows students hands on experience of making media products. To discover principles of communication underlying practice, classes will discuss the use of a variety of media platforms, channels and tools. * KKP410 will be recoded to KCP418 from July 2012. Please enrol in KKP410 if you wish to study this unit in the first half of 2012. Please enrol in KCP418 if you wish to study this unit in the second half of 2012.

KCZ101 Communication in the New Economy

Equivalents	KCB101
Credit Points	12
Campus	The Chinese University of Hong Kong
Teaching Periods	2012 6TP5 (INT)

This unit introduces students to foundational ideas in the study of communication. It covers key questions of textual analysis, practice, and context. Drawing extensively on examples of popular communication practice from contemporary society, the unit aims to impart an understanding of communication ecologies, processes, systems, and modes within the wider frame of radical changes occuring to the way texts are produced, read and circulated within our culture.

KCZ102 Media and Society: From Printing Press to Internet

Equivalents	KCB102, KCB140
Credit Points	12
Campus	The Chinese University of Hong Kong
Teaching Periods	2012 5TP8 (INT)

This unit explores a variety of key myths, controversies and debates surrounding the relationship between media and society. It investigates the historical foundations, cultural context and factual accuracy of a series of 'common sense' arguments regarding how different kinds of media have or have not affected the way our society functions.

KCZ103 Strategic Speech Communication

Equivalents	KCB103, KCB213
Credit Points	12
Campus	The Chinese University of Hong Kong
Teaching Periods	2012 5TP9 (INT)

This unit emphasises both the theory and practice of speech and interpersonal communication. It introduces theories of language, rhetoric and persuasion, which are interrelated to promote understanding and development of students' communication skills. Classroom practice in simulated work situations will enhance the leadership skills students need to become articulate presenters in a range of contexts including personal presentations and interviews.

KCZ104 Introduction to Media and Communication Industries

Equivalents	KCB104, KCB150
Credit Points	12
Campus	The Chinese University of Hong Kong
Teaching Periods	2012 SUM (INT)

A contemporary understanding of the cultural and economic significance of media and communication industries is a vital foundation for scholarship and professional practice in the media and communications industries. This unit surveys the political economies of print and electronic media industries, as well as advertising and public relations. It considers the impact of regulation on these industries and explores convergence and globalisation as frameworks for understanding change. Students will be supported to develop their own strategy for maintaining current awareness of media and communication industries in the process of evaluating current public and policy debates.

KDB101 Performance 1

Pre-requisites	KDB103 (can be enrolled in the same teaching period)
Equivalents	KDX111
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.

KDB102 Performance 2

Pre-requisites	(KDB101 or KDX111) and KDB104 (can be enrolled in the same teaching period)
Equivalents	KDX112
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This studio-based unit consists of a creative process through rehearsal directors and teaching staff leading to a studio and public performance.

KDB103 Dance Technique Studies 1

Equivalents	KDB180
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit involves practical dance classes as on-going action research.

KDB104 Dance Technique Studies 2

Pre-requisites	KDB103 or KDB180
Equivalents	KDB181
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit involves practical dance classes as on-going action research.

KDB105 Architecture of the Body

Equivalents	KDX104
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on experiential awareness of the body, including an

introduction to a working knowledge of anatomy, kinesiology and the movement potential of the body, both in theory and practice

KDB106 Dance Analysis

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes a study of the analysis of dance through a concentration on the dance as text and a study of various international historical and contemporary works.

KDB107 Choreographic Studies 1

Equivalents	KDX143
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces crafting skills and choreographic devices used in process of making dance work. It includes the presentation of group work.

KDB108 World Dance

Equivalents	KDB172
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes exposure to a range of culturally specific dance styles through practical workshops and a theory component providing contextual background to the styles taught.

KDB109 Funk, Tap and all that Jazz

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

American and Western European popular and music theatre dances from the late 1900s to the present form the content base of this unit, drawing on three of the following styles: funk, tap, jazz and/or hip-hop. Dance technique and style pertinent to each dance form is taught in the practical classes, while in the theory component of the unit this content is interrogated through historical and cultural perspectives.

KDB110 Deconstructing Dance in History

Equivalents	KDB125
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes a study of various international historical and contemporary contexts of dance as art. It focuses on romanticism, classicism, modernism and postmodernism.

KDB111 Performance in Context 1

Equivalents	KDB101, KDX111
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This studio-based unit involves the making and performing of a dance work for public performance in either a theatrical, digital or site-specific domain.

KDB120 Dance Practice 1

Equivalents	KDB103, KDB180
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

All professionals in the field of dance need a comprehensive grounding in the practice of dance. This unit provides the opportunity to hone skills and deepen understanding in contemporary dance and a second dance genre. As an introductory unit in a suite of Dance Practice units, you will develop approaches to learning and reflective practice to enable you to become an effective self-directed practitioner.

KDB121 Dance Practice 2

Pre-requisites	KDB120 or KDB103
Equivalents	KDB104, KDB181
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

All professionals in the field of dance need a comprehensive grounding in the practice of dance. This unit provides further opportunities to hone skills and deepen understanding in contemporary dance and a second dance genre. As a second unit in a suite of Dance Practice units, you will continue to develop skills in learning and reflective practice to enable you to become an effective self-directed practitioner.

KDB201 Dance Curriculum Studies 1

Pre-requisites	Completion of 48 credit points of Dance discipline units (KD% units)
Anti-requisites	KDP201
Equivalents	KDB421
Credit Points	12
Campus	Kelvin Grove

As the first of a series of three curriculum units, this unit provides introductory practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilize your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences. You will begin to understand and learn to manage the complex socio-cultural environments of the dance classroom and develop theoretical understandings, practical knowledge and skills necessary to be an effective Dance teacher. Each subsequent curriculum unit will then provide you with opportunities to increase your breadth and depth of understanding in these areas.

KDB202 Dance Curriculum Studies 2

Pre-requisites	KDB201
Anti-requisites	KDP202
Equivalents	KDB429
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is the second of a series of three curriculum units, this unit builds on practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilise your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences with particular emphasis on Years 10-12.

KDB203 Dance Curriculum Studies 3

Pre-requisites	KDB202 (can be enrolled in the same teaching period)
Anti-requisites	KDP203

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Developing from the work undertaken in Dance Curriculum Studies 1 and 2, this unit provides you with the opportunity to continue investigating and exploring dance curriculum planning and work program design. This unit also relates current theoretical issues in assessment to the unique challenges that dance assessment provides. You will explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment at all levels.

KDB204 Australian Dance

Equivalents	KDB114
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes a study of the ritual, artistic and social functions of dance in contemporary Australian society.

KDB205 Teaching Dance

Anti-requisites	KDP205
Equivalents	KDB117
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes a practical introduction to philosophies and practices in dance education. The areas of choreography, performance and appreciation are explored as students develop basic teaching and reflective practice skills. This unit is appropriate for students planning to teach dance in the primary, secondary, community or studio context.

KDB206 Contextualising Dance in the 21st Century

Pre-requisites	KDB106 and KDB110
Credit Points	12
Campus	Kelvin Grove

Dance has demonstrably been a leader in many of the areas that inform the globalised environment of 21st century arts practices, noticeably in the areas of interactive technologies, interdisciplinarity, international collaborations which interrogate differing cultural perspectives, and the increasing fascination of mass audiences with dance reality television shows and social network sites such as YouTube. Parallel to these practices are the growth in participation of recreational dance-related physical activities, and in an industry context the DIY artists of the independent performance scene. Common to these practices is a conscious hybridisation of traditional hierarchies between ‘elite’ and ‘popular’ culture. At the same time 21st century dance practices are engaged with pressing issues of our age in relation to health, environmental concerns, and urban mediated environments. This in turn has informed changes in contemporary aesthetic sensibilities.

KDB207 Choreographic Studies 2

Pre-requisites	KDB107 or KDX143
Equivalents	KDX144-2
Credit Points	6
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes practice and performance of choreographic work employing choreographic skills in creation of movement material, form and style. Clarity of intention is major focus. This is a year long unit. Students must enrol in KDB207-2.

KDB207 Choreographic Studies 2

Pre-requisites	KDB207-1 or KDX144-1
Equivalents	KDX144-2
Credit Points	6
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes practice and performance of choreographic work employing choreographic skills in creation of movement material, form and style. Clarity of intention is major focus. This is a year long unit. Students must enrol in KDB207-2.

KDB208 Integrated Professional Skills

Equivalents	KDB221
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is an integrated program building specific practical and psychological skills and strategies for career development and enhancement.

KDB211 Performance 3

Pre-requisites	(KDB102 or KDX112) and KDB213 (can be enrolled in the same teaching period)
Equivalents	KDX141
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.

KDB212 Performance 4

Pre-requisites	(KDB211 or KDX141) and KDB214 (can be enrolled in the same teaching period)
Equivalents	KDX142
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.

KDB213 Dance Technique Studies 3

Pre-requisites	KDB104 or KDB181
Equivalents	KDB182
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit involves practical dance classes as on-going action research.

KDB214 Dance Technique Studies 4

Pre-requisites	KDB213 or KDB182
Equivalents	KDB183
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit involves practical dance classes as on-going action research.

KDB215 Performance in Context 2

Pre-requisites	KDB111 or KDB101

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This studio-based unit involves the making and performing of a dance work for public performance in either a theatrical, digital or site-specific domain.

KDB225 Music Theatre Skills

Equivalents	KSB225, KSB011
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with an introduction to practical skills development in acting, dance and singing for music theatre.

KDB230 Dance Practice 3

Pre-requisites	KDB121 or KDB104 or KDB181
Equivalents	KDB213, KDB182
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

All professionals in the field of dance need a comprehensive grounding in the practice of dance. This unit provides further opportunities to hone skills and deepen understanding in contemporary dance. As a third unit in a suite of Dance Practice units, you will continue to develop skills in learning and reflective practice to enable you to become an effective self-directed practitioner. You will also investigate approaches in assisting others to learn.

KDB231 Latin Dance Party

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Latin American Dance styles make an important contribution to a Dance practitioner's skills portfolio. Further, as an enjoyable and healthy form of social interaction, knowing how to dance these styles is a broadly applicable life skill.

KDB303 Dance and Technology 1

Pre-requisites	KDB207-2 or KDX144-2
Equivalents	KDB158
Credit Points	12
Campus	Kelvin Grove

This unit includes modes of choreographic communication: discussion of aesthetic questions that have emerged out of the last major choreographic movements and collaborative practices encouraged with specific focus on digital technologies.

KDB304 Dance and Technology 2

Pre-requisites	KDB303 or KDB158
Equivalents	KDB159
Credit Points	12
Campus	Kelvin Grove

This unit includes a major choreographic project for public performance. It explores aesthetic and artistic values in collaborative processes of making new work with technology.

KDB305 Performance in Context 3

Pre-requisites	KDB215
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This studio-based unit involves the making and performing of a dance work for public performance in either a theatrical, digital or site-specific domain.

KDB306 Dance Project 1

Pre-requisites	KDB214 or KDB183
Equivalents	KDB301, KDB193
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed for you to investigate your practice as a dance performer and/or creator via an interdisciplinary and collaborative project. The projects may be self-devised or alternatively you may contribute to other creative projects involving new work. In addition to the project proposals and their realisation, the unit comprises a reflective practice written assignment.

KDB307 Dance Project 2

Pre-requisites	KDB306
Equivalents	KDB302, KDB199
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This capstone unit is designed to develop and showcase at a professional level your performative skills and artistry. It will allow you to connect with choreographers of national standing in order to experience the creation of professional dance work, culminating in public performances through the Dance Graduation Season.

KDB310 Professional Dance Training 1

Pre-requisites	KDB212 or KDX142
Equivalents	KDB301, KDB193
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed for you to develop the technical and interpretive dance skills acquired in the first two years of your course to a pre-professional level. Through embodied knowledge, emphasis is placed on specialist and alternative training methods in order to equip you with advanced technical skills; preparing you for the rapidly increasing demands placed on dance practitioners by the professional dance industry.

KDB311 Professional Dance Training 2

Pre-requisites	KDB310
Equivalents	KDB301, KDB193
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit follows on from the technical and interpretive dance skills acquired in KDB310 Professional Dance Training 1. It is designed to facilitate your continued development in advanced technical skills training pitched at a professional level. Through embodied knowledge, emphasis is placed on specialist and alternative training methods at a professional level; preparing you for the rapidly increasing demands placed on dance practioners by the professional dance industry. The culmination of this unit recreates a real life Audition experience through unseen practical examinations.

KDP201 Dance Curriculum Studies 1

Anti-requisites	KDB201, KDB421
Credit Points	12

Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

As the first of a series of three curriculum units, this unit provides introductory practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilize your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences. You will begin to understand and learn to manage the complex socio-cultural environments of the dance classroom and develop theoretical understandings, practical knowledge and skills necessary to be an effective Dance teacher. Each subsequent curriculum unit will then provide you with opportunities to increase your breadth and depth of understanding in these areas.

KDP202 Dance Curriculum Studies 2

Pre-requisites	KDP201
Anti-requisites	KDB202, KDB429
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is the second of a series of three curriculum units, this unit builds on practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilise your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences with particular emphasis on Years 10-12.

KDP203 Dance Curriculum Studies 3

Pre-requisites	KDP202 (can be enrolled in the same teaching period)
Anti-requisites	KDB203
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Developing from the work undertaken in Dance Curriculum Studies 1 and 2, this unit provides you with the opportunity to continue investigating and exploring dance curriculum planning and work program design. This unit also relates current theoretical issues in assessment to the unique challenges that dance assessment provides. You will explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment at all levels.

KDP205 Dance in Education

Anti-requisites	KDB117, KDB205
Credit Points	12
Campus	Kelvin Grove

This unit includes a practical introduction to philosophies and practices in dance education. The areas of choreography, performance and appreciation are explored as students develop basic teaching and reflective practice skills. This unit is appropriate for students planning to teach dance in the primary, secondary, community or studio context.

KFB101 Design Studio 1

Equivalents	KFB401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The sequence of six Design Studio units is fundamental to the course and focuses on the integration of design principles with the practical skills and understandings of pattern technology, garment design and construction. Alongside the acquisition of design skills, it is essential for successful fashion designers of the future to understand the context of their practice, within an industry that is international in scope.

KFB102 Design Studio 2

Pre-requisites	KFB101 or KFB401
Equivalents	KFB402
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to build on skills acquired in KFB101.

KFB103 Introduction to the Industry of Fashion

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction to some of the complexities of the fashion system and is intended to provide a base for students wishing to pursue the subject of fashion as a major, sub-major or minor.

KFB104 Sustainability: The Materiality of Fashion

Equivalents	KFB407-2, KFB104-2
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Detailed knowledge of the materials, skills and processes available to the garment and textile industries is essential in the first year of study for the fashion designer.

KFB106 Unspeakable Beauty: A History of Fashion and Style

Credit Points	12
Campus	Kelvin Grove

Fashion has been a defining feature of Western culture for over 500 years. Contemporary fashion regularly revisits earlier approaches to dressing the body. This unit studies key figures in the history of fashionable dress who defined the standards of beauty for their time. It provides students with a basis for understanding fashion as a significant form of visual culture as well as providing a vital sense of history.

KFB107 Drawing for Fashion

Equivalents	KVB107, KVB107-2, KVB757-2
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit concentrates on developing core skills and knowledge of drawing to provide an important foundation for existing and evolving modes for constructing and presenting fashion proposals.

KFB108 Unspeakable Beauty 1: A History of Dress and Fashion

Equivalents	KFB106
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Unspeakable Beauty One introduces you to the history of western fashion from the 14th century up until the mid-19th Century. You will be provided with a guide to understanding changes in fashion and style in especially in regards to issues of gender and class. This knowledge will assist you in understanding the pivotal role that fashion has played throughout history in defining social and cultural

identity. This unit is the first of the suite of Fashion Studies Units offered by the fashion discipline and will provide you with an introduction to the key concepts essential to the study of the history and theory of fashion.

KFB109 Unspeakable Beauty 2: Fashion and Modernity

Equivalents	KFB206, KFB105, KFB408
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

Unspeakable Beauty 2 introduces you to the history of western fashion from the mid nineteenth century up until the mid twentieth century. You will be provided with a guide to understanding changes in fashion and style especially in regard to theories of modern consumption and production. This unit is the second in the suite of Fashion Studies Units offered by the Fashion Discipline and will provide you with an introduction to key concepts essential in the study of the history of modern fashion.

KFB200 Design Studio 3

Pre-requisites	KFB102
Equivalents	KFB201, KFB403
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The sequence of six Design Studio units is fundamental to the course and focuses on the integration of design principles with the practical skills and understandings of pattern engineering and garment design and construction.

KFB202 Design Studio 4

Pre-requisites	KFB200 or KFB201 or KFB403
Equivalents	KFB404
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to build upon the expected outcomes of KFB201. It aims to develop in students a combination of initiative, creativity and self-reliance, alongside the key skills of collaboration and working in teams.

KFB205 Fashion and Style Journalism

Pre-requisites	KFB103 or KJB224 (KJB224 can be enrolled in the same teaching period)
Equivalents	KJB339
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit maps the scope and practice of fashion and style journalism in Australia and internationally. It will allow you to develop the skills necessary to conceptualise and produce fashion and style editorial content in a variety of styles and contexts.

KFB206 Fashion and Modernity

Equivalents	KFB105, KFB408
Credit Points	12
Campus	Kelvin Grove

In this unit students will examine the development of modern fashion. They will study the influence of various factors that affect changes in fashion, including major designers.

KFB207 Contemporary Fashion

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Fashion is a vital dimension to contemporary culture; it is art and industry, idea, image and product. In its truest sense all Fashion is Contemporary fashion. This unit draws on ideas developed in Introduction to Fashion to provide a context for the shifting terrain of contemporary fashion. The unit addresses content such as key developments in fashion since 1970, significant International and Australian contemporary designers and current trends in the consumption, production and presentation of fashion.

KFB208 Fashion Portfolio

Equivalents	KFB202, KFB201
Credit Points	12
Campus	Kelvin Grove

In the fashion design and associated industries digital illustration/graphic and presentation skills are increasingly necessary to present creative and professional work. Through the use of technology, fashion and textile designers, illustrators and photographers can present and enhance their applied creativity by augmenting traditional hand skills with a range of digital processes. This unit introduces the learner to this knowledge and to the processes and practices that will enable the student to develop a concept driven fashion portfolio.

KFB209 Ragtrade: Wholesaling Fashion

Pre-requisites	KFB103
Equivalents	KFB201
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on the logistics and skills required in the industry, for the distribution and selling end of the fashion cycle. It will develop your understanding of the importance of international and national wholesale selling or order taking, through to fashion companies going direct to the final consumer. The unit seeks to bring together the professional, creative and real world opportunities available in fashion industry selling strategies, with the business planning and sustainability strategies required for profitability. You will acquire skills and knowledge that will support and enhance your understanding of current and future trends in fashion business planning, entrepreneurial acumen and sales logistics, through practical application of the practices and strategies researched.

KFB210 Fashion and Costume in Film

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit studies the relationship between fashion and its dissemination through visual culture. Magazines, film, photography, television and new media have been fundamental to the dissemination of fashion information, the construction of stardom and femininity, and to the development of the fashion industry. This unit examines two creative media, film and the internet. It examines how historically the cross-pollination between the Hollywood Studios, the cosmetic and the clothing industries first, and, more recently, contemporary blogs and internet images have contributed to the formation of discourses of consumer fashion and feminine aesthetic. By examining internet blogs and images, the unit also studies how fashion media have expanded exponentially, with the advent

of the stylist, the pr and the dissemination of fashion images as new global phenomena.

KFB211 Developing and Buying Fashion Product

Pre-requisites	KFB103
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

While many would see the role of the designer as an integral part of any fashion brand, many of the largest fashion businesses in the industry are built on a process of product development instead of traditional ideas of design. Rather than working from a blank canvas, the product developer creatively evolves unique and commercial garments from existing ideas and samples to create ranges that are both profitable and easy to outsource for manufacture. Product development requires diverse skills and knowledge in trend analysis, range building, textile selection and sourcing, garment finishing, specification sheets, global operations, marketing, and business to ensure successful project outcomes. By developing a foundation of knowledge in product development this unit aims to prepare students for work in commercial fashion or to assist them with the skills for creating their own product developed fashion brand.

KFB301 Design Studio 5

Pre-requisites	KFB202 or KFB404
Equivalents	KFB405
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This sequence of six Design Studio units is fundamental to the course and focuses on the integration of design principles with the practical skills and understandings of pattern engineering and garment design and construction. Design Studio in the final year allows students the opportunity to further immerse themselves in the development of their own product or range. Design Studio 5 acts as a stage one of the final project and forms the research and development phase of the project. During this unit, students formulate their final project for prototyping and completion in Design Studio 6.

KFB302 Design Studio 6

Pre-requisites	KFB301 or KFB405
Equivalents	KFB406
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is the capstone Design Studio unit and aims to provide students with the opportunity to synthesise prior learning, within university and the workplace, through the production of a final year project. Within this unit students develop confidence and the ability to work with minimal supervision in preparation for graduation.

KFB303 Fashioning Futures

Equivalents	KFB412
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to provide you with an opportunity to identify relevant issues relating to your planned career and to position yourselves effectively for entry to industry, community-based projects or postgraduate study.

KFB304 Fashion, Law and the Real World

Equivalents	KFB056
Credit Points	12
Campus	Kelvin Grove

This unit prepares you for the transition into the real world, by equipping you with an understanding of law as a regulator of business. In order to flourish as an entrepreneurial creative practitioner, it is essential that you understand the legal implications of your decisions and actions and those of others with whom you work or trade. This unit forms part of the final year of study so that you can apply the knowledge acquired within your workplace learning experiences and incorporate the learning from this unit into their planning and preparation for graduation.

KFB305 Critical Fashion Studies

Pre-requisites	Completion of 48cp of Fashion discipline units (KFB% units)
Credit Points	12
Campus	Kelvin Grove

Critical Fashion Studies is the final undergraduate unit in the suite of Fashion Studies units. It consolidates and extends material covered in fashion units such as Unspeakable Beauty (1 & 2) and Contemporary Fashion. In order to develop a critical understanding of fashion it is important that you are introduced to theoretical models and critical debates in the area of fashion scholarship. Embracing an interdisciplinary approach characteristic of current fashion scholarship this unit provides a basis for you to research specific areas of interest in the field of fashion studies. It provides a critical academic context for students interested in pursuing an Honours or Post-Graduate pathway in the Fashion Discipline.

KIB100 Design and Creative Thinking

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Design processes and creative thinking are at the core of interactive and visual design disciplines. This unit offers a broad foundational and generic introduction to the processes and methods designers employ when designing in a contemporary cross-discipline environment. It also introduces design history and theory. The unit is offered at beginning of the interactive and visual design course in order to provide you with a foundation in design and creative thinking.

KIB101 Visual Communication

Equivalents	KIB801
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Communication Design deals with visual communication and the creation of meaning through images. This unit will introduce you to the principles, production and presentation of visual design and communication.

KIB102 Visual Interactions

Pre-requisites	KIB101 or KIB801 or KPB101 or KPB150 or KPB155
Equivalents	KIB802
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit further develops interface design skills for communications technologies including design priorities,Interaction, visual systems, refinement of concepts,

project analysis and problem solving through presentation models.

KIB103 Introduction to Web Design and Development

Anti-requisites	INB271, KIP403
Equivalents	KIB807, KKB007, KKB818
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction to theories and skills underpinning the application of multimedia technology with the Creative Industries, providing a foundation of conceptual and practical skills related to contemporary modes of electronic hypermedia production, communication and publishing.

KIB104 Digital Media

Equivalents	KIB808
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit explores multimedia development and design concepts and practices and investigates the user and user interaction principles.

KIB105 Animation and Motion Graphics

Equivalents	KIB804
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to animation and motion graphics concepts and practices, with an emphasis on principles of design in motion

KIB108 Animation History and Practices

Equivalents	KIB825
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit is an introductory examination of the development of animation. It addresses social, cultural, economic and technological themes that have shaped notable practitioners and established animation as a significant medium for the expression of popular culture, artistic experiment and philosophical, social and political comment.

KIB109 Design for Interactive Media

Pre-requisites	KIB101 or KIB103 or KIB801 or KIB807 or KKB007 or KKB818 or KIP401 or KIB201 or KIB202
Equivalents	KIB214, KIB210
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Designing for contemporary media requires a sophisticated understanding of how we effectively interact with new technologies, software applications, displays and environments. This unit focuses on the field of interaction design and user experience design. It develops an understanding of the theories, methods, and processes employed by Interaction Designers through a series of lectures and tutorials. These principles are then applied to authentic design briefs within design studios.

KIB110 Animation Methodologies

Equivalents	KIB220
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Animators have employed a wide range of media to create animated imagery for a variety of contexts. The broad scope of available 2D and 3D media allows images to be developed in diverse ways to display virtual reality, digital three-dimensional objects, traditional two-dimensional formats, stop-motion processes, and integrated effects within live-action motion pictures. Animation Methodologies recognises that any given production technique provides just one of many possible ways to realise an animation project whether for game development, film or television, Web or emergent media. This unit explores the varied nature of animation methods from traditional practices to approaches using digital techniques.

KIB111 Introduction to 3D Computer Graphics

Equivalents	KIB203
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The field of 3D computer graphics has grown from being a highly specialist field, supported by large film studios, into a vast and growing industry. Throughout film and television, scientific visualization, industrial and architectural design, physical modelling, animation and gaming; 3D visualisation has become a significant contributor to the construction of virtual worlds and the simulation of physical environments. This unit provides an introduction to the world of 3D graphics, paying particular attention to pre-production techniques, project management, 3D modelling techniques, and designing virtual environments. It establishes a foundation for advanced study in subsequent units on Real-time Computer Graphics and Virtual Environments. Theoretical understandings gained through lectures will be supplemented with technical skills in workshops, and applied to the production of 3D environments in design studios.

KIB120 Graphic Design

Pre-requisites	KIB101 or KIB801 or KIP401
Anti-requisites	KVP401
Equivalents	KVB204
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

An ability to create and promote atractive and effective messages is the aim of graphic design. In this unit, you will build upon the knowledge and skills you have gained in visual communication to consolidate an advanced understanding of how graphic design works in our contemporary society. This unit is focused on the design process and projects (publications, corporate identity, digital media and advertising), therefore, there is an emphasis on skills and concepts that contribute to interpreting and responding to design briefs, and to developing creativity and design innovation.

KIB201 Concept Development for Game Design and Interactive Media

Equivalents	KIB816
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit addresses theoretical issues associated with non-linear story structures and interactive narratives through the analysis of game structures, the creation of original game ideas and the application of techniques of information design to the

structuring of non-narrative content. Addressing the creative and analytical roles of writers, conceptual designers and information designers in the context of interactive digital media and the Creative Industries.

KIB202 Enabling Immersion

Pre-requisites	KIB201
Equivalents	KIB814
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

As creative practitioners within a highly networked technological society, it is important to develop a critical understanding of how the application of technology influences modes of communication, production processes and creative practices, particularly within the Creative Industries. This unit provides an introductory overview of the philosophies underlying applications of technology, and critically examines current applications in order to explore creative visions of future technology.

KIB203 Introduction to 3D Computer Graphics

Credit Points	12
Campus	Kelvin Grove

The field of 3D computer graphics has grown from being a highly specialist field, supported by large film studios, into a vast and growing industry. Throughout film and television, scientific visualization, industrial and architectural design, physical modelling, animation and gaming; 3D visualisation has become a significant contributor to the construction of virtual worlds and the simulation of physical environments. This unit provides an introduction to the world of 3D graphics, paying particular attention to pre-production techniques, project management, 3D modelling techniques, and designing virtual environments. It establishes a foundation for advanced study in subsequent units on Real-time Computer Graphics and Virtual Environments. Theoretical understandings gained through lectures will be supplemented with technical skills in workshops, and applied to the production of 3D environments in design studios.

KIB204 Web Interface Design

Pre-requisites	(KIB103 or KIB807 or KKB007 or KKB818) and (KIB102 or KIB120 or KIB802 or KVB204)
Equivalents	KIB230, KIB211
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Effective interface design is an essential aspect of contemporary communication. In the production of digital media forms, such as web sites or mobile applications, you will need to have an in-depth understanding of how visual design and communication principles apply to the creation of visual interfaces. You will also need to understand the effective and integral relationship between interface and interaction design. This unit provides the knowledge and skills in interface design that will be required to design effective interactive media, which you will apply in future studies in Interactive and Visual Design.

KIB205 Programming for Visual Designers and Artists

Equivalents	KIB210
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

As part of a contemporary art and design production, practitioners often need to understand aspects of computer programming. This unit provides artists and designers with an introduction to computer programming. It demonstrates how artists and designers use programming within their practices and introduces the principles of programming that will allow you to use computing as a tool for art and design innovation. The unit is presented in a manner that is suited to the learning styles of visual designers and artists, and requires no previous computer programming experience. These skills will developed and applied to the development of art and design outcomes in a studio setting.

KIB207 Theories of Visual Communication

Pre-requisites	(KIB120 or KVB204) and completion of 96cp of study
Credit Points	12
Campus	Kelvin Grove

Contemporary visual designers need to have a thorough and sophisticated understanding of the principles, theories, and history of visual communication as well as how it shapes and changes the way that we understand meaning, persuasion, society and culture. This unit builds on knowledge gained in KIB101 Visual Communication and KIB120 Graphic Design to provide an in-depth knowledge of the field of visual communication.

KIB214 Design for Interactive Media

Pre-requisites	KIB102 or KIB202 or KIB802 or KIP402
Equivalents	KIB210
Credit Points	12
Campus	Kelvin Grove

Designing for contemporary media requires a sophisticated understanding of how we effectively interact with new technologies, software applications, displays and environments. This unit focuses on the field of interaction design and user experience design. It develops an understanding of the theories, methods, and processes employed by Interaction Designers through a series of lectures and tutorials. These principles are then applied to authentic design briefs within design studios.

KIB215 Real-Time 3D Computer Graphics

Pre-requisites	(KIB111 or KIB203 or KIB107) or (KIB105 and KIB108 and KVB106)
Equivalents	KIB325, KIB310, KIB821
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The rapid improvements of rendering 3D graphics in real-time has seen this field expand beyond its early application to virtual environments and games. The use of real-time 3D technologies to enable virtual cinematography is quickly becoming commonplace. Real-time 3D engines allow directors and cinematographers to interactively direct a virtual camera with the same freedom as a live shoot. This unit provides students with a firm grounding in the practices, concepts and skills associated with asset creation for use in a real-time 3D engine. The content presented lays the critical groundwork for more advanced practices in KIB316 Virtual Environments.

KIB216 Advanced Web Design

Pre-requisites	KIB204 or KIB230
Equivalents	KIB211, KIB817
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Web Design has extended significantly

from the concept of information delivery into social networking and other expanded modes of engagement. Web applications now appear in a range of delivery platforms from the desktop to personal and mobile technologies, such as media players and mobile phones. This unit will extend upon the knowledge and skills acquired in Introduction to Web Design, Interaction Design and Interface Design. It will introduce you to dynamic Web publishing employing contemporary open source content management systems. Theoretical understandings gained in lectures will be complemented by technical skills and applied to the development of authentic projects within design studios.

KIB220 Animation Production

Pre-requisites	KIB105 and KVB106
Credit Points	12
Campus	Kelvin Grove

Animation employs a studio-based production process that introduces you to workflows, practice-based investigations, critical thinking and problem-based learning. Animation: Studio Production will support you to build animation studio production skills by introducing design briefs, networking, teamwork and collaboration This unit will focus particular attention on image-based solutions for the production of animated work. It will allow you to advance your skills and techniques in matte painting, image-based modeling, terrain and environment modeling, particle systems for environments, and 3D object creation and shading, as you develop an area of specialisation through personal investigation and self-directed inquiry.

KIB221 Animation: CG Toolkit

Pre-requisites	KIB105 or KIB804
Equivalents	KIB213
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

CG Toolkit offers an in-depth look at the tools of animated production from within a studio setting. Continuing from Animation Studio 1: Preproduction, this unit looks at the tools and the processes involved in creating high level successful 3d computer animations for game development, film or television production, web or emergent media.

KIB225 Character Development, Conceptual Design and Animation Layout

Pre-requisites	KIB111 or KIB203 or KIB107 or (KIB105 and KIB108 and KVB106)
Equivalents	KIB106, KIB807
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit emphasizes production in practice. By considering type and generic attributes within a technological context, you will be guided through the key concepts involved in the development of working drawings and final artworks.

KIB226 Virtual Environments

Pre-requisites	KIB215 or KIB325
Equivalents	KIB316, KIB310, KIB821
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The field of 3D virtual environments, simulation, and visualization are used to produce sophisticated approaches to interaction design, social networking and game-play. This unit is designed to cater for both creative and technical practitioners. Extending the knowledge and skills developed in 3D Computer Graphics and Real-time environments, this unit develops an advanced understanding of virtual environments and 3D spaces. You will apply and extend principals of real-time modeling, texture acquisition for real-time environments, and interaction design in the 3D context. Students enrolled in this unit will work in project teams to produce a significant 3D interactive environment within the context of a design studio.

KIB230 Interface and Information Design

Pre-requisites	KIB101 or KIB801
Equivalents	KIB211
Credit Points	12
Campus	Kelvin Grove

With the advent of new technologies for communication, graphical user interfaces have become fundamental to the design of effective communication, and a key factor in the uptake, ease of use and experience of technology systems. This unit builds upon knowledge and skills acquired in units on visual communication and Web design to establish the knowledge and skills required to design and produce effective visual interfaces for technology applications such as Web, small screens in mobile media, and interactive displays. It will cover theories and principles of visual communication, information architecture and user experience design, which will be applied in the production of interfaces for interactive media and digital projects. The unit will be taught through a combination of lectures, tutorials and practical classes, in which skills and knowledge will be applied.

KIB231 Typography and Illustration

Pre-requisites	KIB120 or KVB204
Equivalents	KIB335
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Typography and illustration are essential components of graphic design for both print and electronic media. This unit will focus on techniques of type design, appropriate use of type forms, the design and incorporation of lettering, and the expressive and communication uses of typography. It will also cover the history, uses, and processes of illustration and its application within visual design and communication. Lectures will introduce design history, techniques and approaches, which will be applied in design studios.

KIB302 Contemporary Issues in Animation

Pre-requisites	Completion of 168cp of study
Credit Points	12
Campus	Kelvin Grove

Since the arrival of digital technologies, animation has become increasingly pervasive and is now embedded in many disciplines. Contemporary Issues in Animation recognises the diversity of animation practice and explores theoretical and critical debates about its role and place within the context of media globalisation. It examines animation practice across a range of contemporary media; investigates the relationship between evolving digital technologies and existing media; and considers the effect of new animated image forms on the experience of visual culture.

Units

KIB309 Embodied Interactions

Pre-requisites	KIB216 or KIB205 or INB385
Equivalents	KIB311
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Interaction with technology has advanced beyond the desktop paradigm of mouse and keyboard to embodied interfaces that incorporate video tracking, audio input, and gestural interaction techniques. Applications range from wearable technology to tangible media installations. This unit introduces an experimental field of interactive media design through the practical application of the processes and techniques of tangible media applications. Lectures, which provide the theoretical grounding of the study area, methodologies and examples of the application of tangible media are complemented by practical classes which extend the technical skills acquired in Programming for Designers and Artists and support the development of tangible media outcomes within design studios.

KIB314 Tangible Media

Pre-requisites	KIB309
Equivalents	KIB311
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit extends the understandings of tangible media interfaces and applications gained in the embodied media unit. In this unit students will develop a tangible media project from concept through to design, production, evaluation, and exhibition. Theoretical understandings on tangible media object design, interaction and installation gained through lectures will be supplemented with production skills in workshops, and applied to the development of tangible media works in design studios. Finished works will be displayed in a final exhibition where members of the public will interact with them.

KIB315 Contemporary Issues in Digital Media

Pre-requisites	Completion of 168cp of study
Equivalents	KIB813
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The ubiquitous uptake of new technologies in communication, social interaction, and artistic expression has changed the way that we conceptualize art and design. Designing within a contemporary context requires a sophisticated understanding of new design practices, methods, and theoretical models. This theory unit is designed to create an awareness of contemporary design practices, theories, and historical and philosophical contexts; and to develop the critical, creative and analytical thinking that is required for design innovation. The unit will be taught through a combination of lectures, seminars and presentations.

KIB316 Virtual Environments

Pre-requisites	KIB325
Equivalents	KIB310, KIB821
Credit Points	12
Campus	Kelvin Grove

The field of 3D virtual environments, simulation, and visualization are used to produce sophisticated approaches to interaction design, social networking and game-play. This unit is designed to cater for both creative and technical practitioners. Extending the knowledge and skills developed in 3D Computer Graphics and Real-time environments, this unit develops an advanced understanding of virtual environments and 3D spaces. You will apply and extend principals of real-time modeling, texture acquisition for real-time environments, and interaction design in the 3D context. Students enrolled in this unit will work in project teams to produce a significant 3D interactive environment within the context of a design studio.

KIB320 Advanced Concepts in Computer Animation 1

Pre-requisites	KIB221 or KIB213
Equivalents	KIB312
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit allows you to consolidate your understanding of animation studio processes from previous units, and supports you to develop advanced skills and concepts in computer animation, character development, and cinematic narrative and storytelling. You will have the opportunity to pitch, critique and produce assets for an animated work for a show-reel and to engage in self-directed, independent study in a studio context. You will also develop skills in production management and direction for the production of a major work in Animation.

KIB321 Advanced Concepts in Computer Animation 2

Pre-requisites	KIB320
Equivalents	KIB313
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Animation Studio 4 consolidates the work completed in the previous animation studios. Concentrating on output, portfolio preparation, post production and transitioning between university and industry or into higher degrees, the studio offers the opportunity to produce and direct a final portfolio piece or to begin academic research in the field of computer animation.

KIB322 Professional Practice for Designers

Pre-requisites	Completion of 168 credit points of study
Equivalents	KIB806
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Design Project is an advanced studio unit for interactive and visual designers. The second of two capstone units, it supports students to develop a final project which brings together the creative approaches, specialist design knowledge, and organizational skills that have been acquired through the Interactive and Visual Design course. In this unit, you will develop a design project based on proposals and prototypes produced in Design Project 1. The unit will be taught through presentations and seminars, critical reviews and design studio processes. The outcomes of this unit will contribute to a design portfolio and a graduate exhibition.

KIB325 Real-Time 3D Computer Graphics

Pre-requisites	KIB225
Equivalents	KIB310, KIB821
Credit Points	12
Campus	Kelvin Grove

This unit provides the opportunity for extending the principles of 3D computer

graphics into the emerging field of virtual environments that respond to interaction in real time. In this unit you will cover the principals of real-time modeling; texture acquisition for real-time environments and interaction design in the 3D context. This unit provides an opportunity where students studying 3D computer graphics can apply animation and interactive design principles to real-time spaces. These principles can be applied to the fields of game design and interactive 3D environments.

KIB330 Advanced Concepts in Computer Animation 2

Pre-requisites	KIB320
Anti-requisites	KIB321
Equivalents	KIB313
Credit Points	24
Campus	Kelvin Grove

To prepare for life outside of the academic institution, it is important to be able to showcase your work, with knowledge of the requirements of your field. As a capstone unit, Advanced Concepts in Computer Animation 2 gives you the opportunity to present yourself and your work in a portfolio and show-reel. The studio continues to develop production skills, concentrating on final output and postproduction for exhibition.

KIB335 Typography and Illustration

Pre-requisites	KVB204
Credit Points	12
Campus	Kelvin Grove

Typography and illustration are essential components of graphic design for both print and electronic media. This unit will focus on techniques of type design, appropriate use of type forms, the design and incorporation of lettering, and the expressive and communication uses of typography. It will also cover the history, uses, and processes of illustration and its application within visual design and communication. Lectures will introduce design history, techniques and approaches, which will be applied in design studios.

KIB338 Print Media

Pre-requisites	KIB120 or KVB204
Anti-requisites	KCP361, KCP405
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit builds on the visual communication and graphic design units to develop specialist skills in design layout and the creative production of print media. It will introduce the theory and principles involved in combining text, image and design elements into a coherent design layout and will extend this theory into practice through the development of advanced design publishing techniques. Theoretical understandings gained through lectures will be augmented with technical skills in workshops, and applied to the production of team-based, professional quality print projects in design studios.

KIB340 Visual Information Design

Pre-requisites	KIB120 or KVB204
Equivalents	KIB211
Credit Points	12
Campus	Kelvin Grove

We encounter information design every day, It has become an essential aspect of contemporary communication. The field of information design has grown rapidly in the past decade and is now routinely employed across many fields where the visual display of complex data, events, and phenomena provide concise explanations, new insights and even discoveries. Information Design is used in many fields, including product information, way-finding, mapping, biology, transport, news and journalism, interaction and interface design, and systems diagrams. The demand for visual communcators with expertise in information design continues to grow. In the interpretation and production of information design you will extend your understanding of visual design and communication principles to include principles for effective information design. This unit provides advanced knowledge and skills in visual information design, which will be applied in design outcomes for a range of contexts.

KIP401 Visual Communication

Anti-requisites	KIB101, KIB801
Credit Points	12
Campus	Kelvin Grove

Communication Design deals with visual communication and the creation of meaning through images. This unit will introduce you to the principles, production and presentation of visual design and communication.

KIP402 Visual Interactions

Anti-requisites	KIB102, KIB802
Credit Points	12
Campus	Kelvin Grove

This unit further develops interface design skills for communications technologies including design priorities, visual systems, refinement of concepts, project analysis and problem solving through presentation models.

KIP403 Introduction to Web Design and Development

Anti-requisites	KIB103, KIB807
Credit Points	12
Campus	Kelvin Grove

This unit provides an introduction to theories and skills underpinning the application of multimedia technology with the Creative Industries, providing a foundation of conceptual and practical skills related to contemporary modes of electronic hypermedia production, communication and publishing.

KIP404 Digital Media

Anti-requisites	KIB104, KIB808
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit explores multimedia development and design concepts and practices and investigates the user and user interaction principles.

KIP405 Animation and Motion Graphics

Anti-requisites	KIB105, KIB804
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to animation and motion graphics concepts and practices, with an emphasis on principles of design in motion.

KIP408 Animation Practices

Anti-requisites	KIB108, KIB825
Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 SEM-2 (INT)

The unit is an introductory examination of the development of animation. It addresses social, cultural, economic and technological themes that have shaped notable practitioners and established animation as a significant medium for the expression of popular culture, artistic experiment and philosophical, social and political comment.

KIP412 Advanced Practice in Animation, Interactive and Visual Design

Pre-requisites	KK86MJR-INVISDN - Interactive and Visual Design Major or KK86MJR-ANIMATN - Animation Major
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on up to dated knowledge and techniques through experimental and innovative production activities with practical and realistic approaches. Through the exploration of current interactive, animation and visual design issues, you will develop design discourse and visual design principles to enhance your interactive, animation, visual design and communication capacities.

KIP424 Advertising Creative: Introduction

Equivalents	KCP404, KCP360
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction to the creative side of advertising, involving the analysis of advertising creative content, the development of creative strategies, creative concepts, and the crafting of persuasive ideas. The unit is the foundation for further work in creative advertising, and provides you with a thorough grounding in creative advertising history, industry practices, strategies and concept development. * KIP424 will be recoded to KAP401 from July 2012. Please enrol in KIP424 if you wish to study this unit in the first half of 2012. Please enrol in KAP401 if you wish to study this unit in the second half of 2012.

KIP426 Advertising Creative: Copywriting and Art Direction

Pre-requisites	KIP424, KCP404, or KCP360 (can be enrolled in the same teaching period)
Equivalents	KCP406, KCP362
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Copywriting and art direction are fundamental to creative advertising practice. Both tasks exist at the front end of advertising: copywriters and art directors help to bring advertising campaigns to life through creative concept development, writing, and liaising with both clients and artists. This unit builds on the introductory creative advertising units. It examines contemporary advertising theory and practice and develops practical skills in writing and art directing. Case studies examine a wide range of advertising campaigns, including campaigns to sell products, corporate reputations, and not-for-profit organisations. * KIP426 will be recoded to KAP402 from July 2012. Please enrol in KIP426 if you wish to study this unit in the first half of 2012. Please enrol in KAP402 if you wish to study this unit in the second half of 2012.

KIP429 Advertising Creative: Trends in New Media

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit develops core skills in the creative production of advertising for key electronic and print media: TV, radio, cinema, paper, print, magazine, and outdoors; with a strong emphasis on interactive and new media trends. It examines how creative advertisers use these media principles for creating effective ads; the media influence in the creative process; how to present concepts for each medium; and the roles, steps and components of creative advertising production. Through this process, you will expand your understanding of and skills in developing ads for the key electronic, print and new mediums. * KIP429 will be recoded to KAP403 from July 2012. Please enrol in KIP429 if you wish to study this unit in the first half of 2012. Please enrol in KAP403 if you wish to study this unit in the second half of 2012.

KJB101 Digital Journalism

Credit Points	12
Campus	Kelvin Grove

This unit acquaints you with the uses journalists make of computers in their work: for word-processing, personal information management, time management, and gathering information for stories and journalism assignments by searching online and CD-ROM databases, by analysing public records with spreadsheets and by using email to interview sources found on Internet bulletin boards and in newsgroups, usergroups, and listservers.

KJB102 Introduction to Journalism, Media and Communication

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces you to core concepts and key knowledge essential for subsequent study in Journalism, and Media & Communication. It combines teaching about media organisations with communication theory and practitioner perspectives drawn from a range of relevant industry sectors. The unit creates a foundation on which you will build in subsequent semesters.

KJB120 Newswriting

Anti-requisites	KJP401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit you learn to think like journalists, to evaluate events for their potential news value, to record interviews and perform other reporting tasks and to write news stories. It includes the evolution and theories of reporting.

KJB121 Journalistic Inquiry

Pre-requisites	KJB120
Anti-requisites	KJP402
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit develops the basic skills learnt in Newswriting: generating story ideas; researching; conducting interviews; finding news values and news angles and applying them in a practical context. You also learn about how practical newswriting skills fit into an online environment. You are introduced to the rigours of deadlines and have opportunities to write stories related to different news rounds throughout the

semester.

KJB211 Layout and Design

Pre-requisites	KJB120 or KJP400
Equivalents	KJB322
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

In this unit, students will learn how to use visual mediums (e.g. words, pictures, headlines, fact boxes etc) to best communicate to a variety of journalism audiences. Using the latest computer design package, students will be taught to apply design theory to publish journalistic copy, incorporating photographs, images, graphics, tables, headlines and captions. They will learn the importance of print size, spacing, columns, captions and other visual communication devices in capturing the attention of an increasingly visual literate society.

KJB222 Online Journalism 1

Pre-requisites	KJB121 or KJP402
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

As increasing volumes of news and other factual material are processed through online media, practitioners and also intending citizen journalists stand to get a secure understanding from studying the social and economic underpinnings of the format, and also from acquiring skills for using it. This unit explores the background to practice in online journalism, such as the place of the medium in contemporary mass communication; it promotes the principles of best practice in journalism, and enables students to publish reports on line, giving them instruction in a wide range of production skills.

KJB224 Feature Writing

Pre-requisites	KJB120 or KWB107 or KWB381
Anti-requisites	KJP403
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students conduct interviews and other research that they use to write Internet, newspaper and/or magazine articles that profile personalities or stories or that treat processes, events and places to exploit their human-interest value.

KJB235 Radio and Television Journalism 1

Pre-requisites	KJB121
Anti-requisites	KJP404, KJB232
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit aims to provide means to learn about broadcast media from a production-based perspective, and to begin advanced, practical preparation for working professionally in news media. The practical and theoretical aspects of radio and television media are studied and applied through the production of broadcast news programs. Students will gather, script and produce a number of news items for radio and television bulletins for broadcasting through community sector outlets. This process is facilitated through the learning and usage of broadcast style and through the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

KJB239 Journalism Ethics and Issues

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

QUT Journalism supports the development of socially responsible, ethical journalists. KJB239 is a core journalism unit. It begins with an overview of western and eastern moral philosophical traditions and moves on to examine current journalistic practice in the context of Australian and international news media operations, regulatory bodies and the stance of professional journalism organisations. Students generate ethical dilemmas and work through them individually, making difficult decisions about issues such as invasion of privacy, protection of sources and conflict of interest. The impact of developing information and communication technologies is also addressed.

KJB280 International Journalism

Pre-requisites	KJB120 or KJP401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit identifies, compares and analyses the diversity of journalistic practice in different countries and regions. You will look at historical conditions that have led to variations in journalism across the world, how different politico-economic systems affect journalistic activity, and how and why different news media take distinct approaches to covering world issues. You will develop the cross-cultural awareness and background knowledge required to identify story ideas, relate to sources and produce news reports in different countries and cultural environments.

KJB304 Sub-Editing

Pre-requisites	KJB120 or KJP400
Equivalents	KJB322
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on KJB211 (Layout and Design) and is aimed at teaching students how to assess text for publication in the journalism industry which is a highly sought skill for employment both within Australia and overseas. Students will assess the text for news' values, quality, photographs, supporting stories, applying style guides (both generic and in-house), grammar, spelling, accuracy, verification, its legality (including defamation, contempt and sub-judice), ethics, sources and balance. Students, individually and in small teams, will be given a range of copy-text from very poor to reasonable on a variety of topics which will be made publishable (i.e. production-ready) by them working with their tutor using the above processes.

KJB323 Online Journalism 2

Pre-requisites	KJB222
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

All media outlets now have a visible and increasing online news presence. This unit builds on the foundations established in Online Journalism 1 to equip students with the skills and theory needed to compete in this multimedia news world. Students will receive practical hands-on training allowing them to incorporate text, audio, video and still images into timely online news and feature reports. They will

be required to consider the application other online communication tools (Blogs, wikis, Myspace, YouTube etc) in a modern journalistic environment. The praxis-based unit will see students work in rostered teams to create journalistic copy to be published online. They will also work independently to develop individual news or feature story highlighting the innovative possibilities of the online journalism medium.

KJB336 Radio and Television Journalism 2

Equivalents	KJB338
Other requisites	Successful completion (grade of 4 or higher) in KJB235 Radio and Television Journalism 1 PLUS an overall course GPA of 5 or higher
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the philosophy and formulation of radio and television news and current affairs, anchor techniques, and radio and television news production using computers.

KJB337 Public Affairs Reporting

Pre-requisites	KJB120
Credit Points	12
Campus	Kelvin Grove

This is an advanced reporting unit stressing the watchdog role of the news media using investigative techniques, including computer-assisted reporting, Internet and other online searching. You write news feature stories for possible publication, and engage in case study/role play exercises for understanding public events/processes and their relationships to news media. The unit is taught in three hour blocks over the first nine weeks of semester.

KJP400 Theories of Journalism

Equivalents	KJP105
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: a summary of the body of literature pertaining to the theories of journalism; identification of individual research interests; attention to the empirical traditions; summary of issues at an advanced level from journalists' perspectives through close reading of core texts.

KJP401 Newswriting

Equivalents	KJP120
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit you learn to think like journalists, to evaluate events for their potential news value, to record interviews and perform other reporting tasks and to write news stories; the evolution and theories of reporting.

KJP402 Journalistic Inquiry

Anti-requisites	KVP402
Equivalents	KJP121
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit develops the basic skills learnt in Newswriting: generating story ideas; researching; conducting interviews; finding news values and news angles and applying them in a practical context. You also learn about how practical newswriting skills fit into an online environment. You are introduced to the rigours of deadlines and will have opportunities to write stories related to different news rounds throughout the semester.

KJP403 Feature Writing

Equivalents	KJP224
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit you will conduct interviews and other research that you use to write Internet, newspaper and magazine articles that profile personalities or that treat processes, events and places to exploit their human-interest value.

KJP404 Radio and Television Journalism 1

Pre-requisites	KJP401 or KJP120 or KJP402 or KJP121
Anti-requisites	KJB235
Equivalents	KJP232
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit the practical and theoretical aspects of radio and television media are studied and applied through production of broadcast news programs. You learn styles and use, and the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

KKB020 Applied Photography

Anti-requisites	KKP420, KVB104, KVP402, KJP420
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK); 2012 SUM-2 (BLK)

Digital media increase the communication opportunities and challenges confronting both professionals and amateurs. This unit provides both an understanding of this changing communication environment and digital photography principles and digital photography skills to enhance communication practice with visual design elements. Classes will explore technical approaches to digital photography, including press photography, photojournalism, and documentary photography. Students enrolling in this unit should have a basic working knowledge of a contemporary digital camera.

KKB101 Creative Industries: People and Practices

Equivalents	KKB009, KKB618, KKD101
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

The development of the creative industries has been identified as a central element of the contemporary knowledge-based economy, which is informational, global and networked. This unit introduces concepts of the creative industries and the work of creative industries practitioners who explore and exploit the expression of creativity for commercial and artistic gain. In exploring the work of creative industries practitioners you will develop written communication skills for new media and academic contexts and reflect on your own emerging role as a creative industries practitioner. This unit is the first of two Creative Industries Foundations units which focus on building an understanding of creative industries practices and a diverse range of literacies essential to working in this new knowledge economy.

KKB102 Creative Industries: Making Connections

Equivalents	KKB007, KKB818, KKD102
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

The ability to work collaboratively and to communicate effectively is essential for all Creative Industries professionals. In this unit you will have the opportunity to acquire and apply research, collaborative practices and project management skills through the collaborative development of a Creative Industries project proposal. This unit is a complement to KKB101 Creative Industries: People and Practices and examines the practical requirements of contributing to cultures and establishing connections with communities.

KKB175 Creative Industries Legal Issues

Anti-requisites	LWS009
Equivalents	KKB275
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces Creative Industries students to the law which applies to their professional practice and theoretical study. The unit provides a foundational approach to general aspects of law as well as particular topics for students in these fields. The unit is based on a core set of lectures and tutorials which are offered in two strands: Strand 1 for Journalism and Media Communication; Strand 2 for other Creative practices.

KKB201 Teaching Primary Music, Visual Arts and Media

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

Through both practical and theoretical contexts, you are introduced to curriculum planning and teaching in primary Visual Arts, Music and Media using The Arts Years 1 to 10 Syllabus (Queensland Studies Authority, 2002).

KKB202 Teaching Primary Dance and Drama

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

Through both practical and theoretical contexts, you are introduced to curriculum planning and teaching in primary Dance and Drama using The Arts years 1 to 10 Syllabus (Queensland Studies Authority, 2002).

KKB216 Audio/Visual Interaction

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

You will build interactive software systems for sampling, synthesising and manipulating media in real-time using graphical programming environments (also known as “patcher languages”). This will enable you to design and implement custom audio/video software for live performances and/or installations.

KKB221 Approaching Interdisciplinarity

Pre-requisites	KKB102 or KKB007 or KKB818
Credit Points	12
Campus	Kelvin Grove

In order to be competitive in the global community, innovative practice becomes a commodity that is highly attractive. It is widely recognised that a sound knowledge in at least one discipline is a prerequisite for effective collaborative practice. This is the first of two units which are planned to expose and reveal the knowledges embedded in the qualities and concentrations of an individual discipline and commence functionally integrating this knowledge alongside other disciplines. This first unit offers you the opportunity to practice multi-disciplinary processes in teams and explores the psychology behind preferences for role choices within these teams.

KKB222 Interdisciplinarity in Practice

Pre-requisites	KKB221
Credit Points	12
Campus	Kelvin Grove

Being able to function effectively in collaborative teams often necessitates the cross-fertilisation of ideas and practices in the creative process. Coupled with the thinking that the constraints of working in a single discipline may prevent its progression in the field, the practice of cross and inter-disciplinarity offers fresh entry points to the investigation, creation and production of product. This is the second of two units which are planned to expose and reveal the knowledges embedded in the qualities and concentrations of an individual discipline and commence functionally integrating this knowledge alongside other disciplines. The unit introduces you to cross and inter-disciplinary collaborative processes in the development of a site specific product for a festival to be held in the CI precinct.

KKB341 Work Integrated Learning 1

Pre-requisites	Completion of 168 credit points of study
Anti-requisites	BEB701, BEB702, KKB343, KKB344
Credit Points	12
Campus	Kelvin Grove

It is important that Creative Industries students gain real work industry-based experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This advanced-level (capstone) unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context.

KKB342 Creative Industries Internship 2

Pre-requisites	KKB341 or KKB343 or BEB701. KKB341 can be enrolled in the same teaching period as KKB342
Anti-requisites	BEB702
Credit Points	12
Campus	Kelvin Grove

It is important that Creative Industries professionals gain real work industry-based experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This advanced-level capstone unit is offered during the final year of an undergraduate degree, that builds upon and strengthens knolwedge and skills acquired in KKB341 Internship 1.

KKB345 Creative Industries Project 1

Pre-requisites	Completion of 72 credit points of Creative Industries units (K% or D% units)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The Faculty of Creative Industries intends that its graduates practice as professionals in their respective discipline or disciplines. Increasingly, a major part of such practice is the instigation, management, monitoring, and reporting on Creative Industries projects. This unit offers experience at participating in an advertised project that may be offered by one or more disciplines in the Faculty. Normally projects are advertised in the preceding semester through the Ci Tranisitions Hub (log on to BB > Community top tab > Creative Industries > CI_Transitions). For some students this unit will be taken as the first of two 'project' units related to the same project, in such cases this unit may be a prerequisite or corequisite to the second unit, KKB346 Creative Industries Project 2.

KKB346 Creative Industries Project 2

Pre-requisites	KKB345 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The Faculty of Creative Industries intends that its graduates practice as professionals in their respective discipline or disciplines. Increasingly, a major part of such practice is the instigation, management, monitoring, and reporting on Creative Industries projects. This unit offers experience at participating in an advertised project that may be offered by one or more disciplines in the Faculty. Normally projects are advertised in the preceding semester through the Ci Tranisitions Hub (log on to BB > Community top tab > Creative Industries > CI_Transitions). For some students this unit will be taken as the second of two 'project' units related to the same project, in such cases the first unit (KKB345) may be a prerequisite or corequisite to the second unit (KKB346).

KKB347 Becoming A Researcher: Understandings, Skills and Practices

Pre-requisites	Completion of 192cp of study
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is the first of two units for third year Creative Industries students designed as a preparation for the Creative Industries Faculty Honours program and/or as an introduction to professional and commercial research contexts.

KKB350 Creative Industries International Study Tour

Pre-requisites	Completion of 72 credit points of Creative Industries units (K% or D% units)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is designed for students who have completed at least one year full time study of a QUT Creative Industries Faculty course and are ready to expand their horizons by gaining experience of international creative industries practice in creative cities. Creative cities contain tourist districts, art museums, galleries, fashion houses, creative precincts, production houses and the like, managed by internationally recognised cultural producers, designers and professionals. The unit addresses the issues that pertain to the culture that is produced and exhibited in the city or cities selected for the tour and provides the opportunity for students to interact with internationally recognised creative artists and cultural professionals. IMPORTANT NOTE: The cost of the 2-3 week tour is estimated at between four and five thousand dollars.

KKD101 Creative Industries: People and Practices

Equivalents	KKB009, KKB618, KKB101
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP2 (INT)

This unit introduces concepts of the creative industries and the work of creative industries practitioners who explore and exploit the expression of creativity for commercial and artistic gain. In exploring the work of creative industries practitioners you will develop written communication skills for new media and academic contexts and reflect on your own emerging role as a creative industries practitioner.

KKD102 Creative Industries: Making Connections

Equivalents	KKB007, KKD818, KKB102
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT); 2012 13TP1 (INT)

The capacities to work collaboratively and to communicate effectively using various media forms are essential for any Creative Industries professional. In this unit you will have the opportunity to acquire and apply research, communication and project management skills through the collaboratively development of a Creative Industries project proposal for the Creative Industries Precinct community.

KKN320 Postgraduate Workplace Learning

Equivalents	KKN330, KKN340-1, KKN340-2
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during postgraduate courses so that students are able to apply appropriate, transferable skills to a workplace or professional context.

KKN330 Postgraduate Workplace Learning

Equivalents	KKN320, KKN340-1, KKN340-2
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during postgraduate

courses so that students are able to apply appropriate, transferable skills to a workplace or professional context.

KKN340 Postgraduate Workplace Learning

Pre-requisites	KKN340-1
Equivalents	KKN320, KKN330
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during postgraduate courses so that students are able to apply appropriate, transferable skills to a workplace or professional context.

KKN340 Postgraduate Workplace Learning

Equivalents	KKN320, KKN330
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during postgraduate courses so that students are able to apply appropriate, transferable skills to a workplace or professional context.

KKP001 Entrepreneurship in the Creative Economy

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Entrepreneurial skills are valuable assets to both the creative practitioner and creative industries management. This unit outlines the effectiveness of an entrepreneurial education in the creative economy. This unit aims to provide the creative industries practitioner/management with an understanding of the theory and practice of entrepreneurship by integrating the concepts, definitions, skills and techniques required for an entrepreneurial approach to creative industries.

KKP002 20:20 Vision: Imagining the Creative Future

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

One condition of late modernity is rapid change and an increasing rate of change. This unit will address the drivers of change, the impact change has now and is likely to have in the mid term and how the creative industries formulation responds to these larger societal forces. Understanding of the dynamics of these forces is crucial for creative industries practitioners and professional in order to shape a future characterised by the creation of innovative action, forms and thought.

KKP003 Project Design in the Creative Industries

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The cohesive and reflexive nature of creative producers permits their successful skill transfer to a variety of employment. Understanding the importance of collaboration and professional networking in the Creative Industries is therefore essential. The unit aims to critique the relevance of collaboration and professional networking to the creative practitioner/manager and combines these with relevant project management skills.

KKP004 Innovation in the Creative Industries: Major Project

Pre-requisites	KKP004-2 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This major project is the final and culminating activity of the Master of Creative Industries. It serves to focus each candidate's learning through a specifically designed and substantial project that seeks to realise innovations in the candidate's practice or workplace. Each project will be designed to 'fit' the scale, scope and focus of 48 credit points. This unit aims to provide the creative industries worker with an opportunity to plan, implement and evaluate a major project professional project in the Creative Industries. Such a project may be located in the candidate's workplace, constructed as an internship with a innovative firm or company or a piece of scholarly enquiry which addresses the challenges of innovation within one of the creative industries.

KKP004 Innovation in the Creative Industries: Major Project

Pre-requisites	KKP004-1 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This major project is the final and culminating activity of the Master of Creative Industries. It serves to focus each candidate's learning through a specifically designed and substantial project that seeks to realise innovations in the candidate's practice or workplace. Each project will be designed to 'fit' the scale, scope and focus of 48 credit points. KKP400 Honours Project

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 is a multi-component unit and all five components must be completed to obtain final credit points.

KKP400 Honours Project

Pre-requisites	KKP400-1 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 Honours Project

Pre-requisites	KKP400-2 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 is a multi-component unit and all five components must be completed to obtain final credit points.

KKP400 Honours Project

Pre-requisites	KKP400-3 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 is a multi-component unit and all five components must be completed to obtain final credit points.

KKP400 Honours Project

Pre-requisites	KKP400-4 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 is a multi-component unit and all five components must be completed to obtain final credit points.

KKP401 Honours Graduate Seminar

Equivalents	KKN002
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This is a seminar program of formal presentations and in-class workshops designed to review your progress to date and to assist in refining key areas of your project prior to submission for examination. You are expected to notify your Project Supervisor of your content in this Unit and invite your Super visor to the oral presentation of your research findings.

KKP402 Business and Corporate Development in the Creative Industries

Equivalents	GSN225
Credit Points	12
Campus	Kelvin Grove

This unit introduces issues involved in selecting and refining a concept/idea/new product in the creative industries. Topics include: business opportunity recognition; screening for potential viability and sustainable competitive advantages; identifying and analysing strategic options; creating a marketing strategy and outlining the production and operations, human resources, and financial plans for a selected creative industries venture. You build the components of a business model for your selected creative concept and write a formal business plan for that concept/product. You examine and critique the business models of a variety of existing businesses in the creative industries during the semester.

KKP403 Transmedia Storytelling: From Interviewing to Multi-Platform

Pre-requisites	Completion of 48cp of study
Credit Points	12
Campus	Kelvin Grove

Advanced level research and creative practice in the Creative Industries frequently draws upon the expertise of leading national and international researchers who visit the Creative Industries Faculty, as well as innovative creative projects. Through a Special Topic unit, Masters, PhD and Professional Doctorate students at the postgraduate level can systematically engage with these initiatives through a structured program of attendance at key events, reading and investigation, and working in creative teams to develop project deliverables.

KKP404 Policy Development in Creative and Cultural Industries

Equivalents	KCP018, KCP401
Credit Points	12
Campus	Kelvin Grove

In this unit, you will undertake an overview of the creative industries as a major element of the global knowledge economy. You will critically analyse key creative industries concepts such as: the knowledge-based economy; networks and clusters; economic aspects of culture and creativity; creative cities; organisation of creative work; creativity and management; social entrepreneurship.

KKP405 Co-Creative Media: Digital Storytelling

Equivalents	KCP403, KCP353
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 5TP3 (BLK)

In this unit you will learn about the breadth of achievements of research in the Creative Industries (for example, in making visible the creative economy. This knowledge is essential for arts and creative industries managers. You will also have the option to experience deep learning in the theory and practice of one particular creative human capital development technique and qualitative research platform, known as Digital Storytelling. * KKP405 will be recoded to KCP415 from July 2012. Please enrol in KKP405 if you wish to study this unit in the first half of 2012. Please enrol in KCP415 if you wish to study this unit in the second half of 2012.

KKP406 Global Media and Communication

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an advanced-level overview of key developments in 21st century global media and communications. It considers the theoretical underpinnings of global media from perspectives including political economy, cultural studies and professional practice. It will examine major international developments in journalism, advertising, film and television and new media, through a grounded case study approach into global media organisations, production processes and cultural factors, with particular emphasis on developments in Australia, the Pacific and Asia. * KKP406 will be recoded to KCP416 from 2013. Please enrol in KKP406 if you wish to study this unit in 2012. KCP416 will be available from 2013.

KKP407 Creative Industries in Asia

Equivalents	KTP407, KCP354
Credit Points	12
Campus	Kelvin Grove

Forces associated with the rise of creative industries, such as globalisation, the knowledge-based economy, and media and communications networks are significantly shifting both public policy and creative practice in the Asia-Pacific region, and raising new challenges, tensions and contradictions in politics, economics and culture. This unit will provide you with an understanding of how developments in the creative industries will affect the economics, politics and cultural development of nations and people in the Asian region.

KKP408 Marketing Arts and Culture

Equivalents	KTP408, GSN228
Credit Points	12
Campus	Kelvin Grove

This unit examines and applies theories of arts marketing for arts cultural organisations. The focus is on audience development, but product and service development models in the mission driven arts environment provide the context for you to develop marketing strategies, marketing plans and campaigns for arts and cultural management.

KKP409 Approaches to Honours Enquiry

Co-requisites	KKP400-1
Equivalents	KKB347
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

There are many forms of enquiry suited to the diverse range of disciplines which make up the Creative Industries. These forms of enquiry typically fall within qualitative research traditions, creative practice as research and applied commercial research. This unit plays a key role in your research degree by introducing you to the most appropriate form of enquiry for your study and providing you with the strategies, methods and protocols for designing, implementing and evaluating that study. You will be undertaking this unit with your Honours cohort and attending certain lectures in the postgraduate mode for this material, KKP601 Approaches to Enquiry in the Creative Industries, as nominated by the Honours Coordinator.

KKP410 Fundamental Media Skills for the Workplace

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces an array of media products that are often used in the workplace and allows students hands on experience of making media products. To discover principles of communication underlying practice, classes will discuss the use of a variety of media platforms, channels and tools. * KKP410 will be recoded to KCP418 from July 2012. Please enrol in KKP410 if you wish to study this unit in the first half of 2012. Please enrol in KCP418 if you wish to study this unit in the second half of 2012.

KKP412 Theory and Policy in the Creative Industries

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to introduce the basic theoretical and historical framework and conceptual tools by which students can develop their own specific area of investigation. It situates the creative industries theoretically in the context of art history and cultural studies, political economy and economic and cultural geography.

KKP413 Advanced Theory and Policy Studies in the Creative Industries

Pre-requisites	KKP412 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit extends the historical and conceptual work of KKP412 into policy case study work. It aims at making the student link the more general conceptual frameworks to the study of a particular policy initiative, or agency or creative industry sub-field.

KKP420 Applied Photography

Anti-requisites	KVB104, KVP402, KKB020
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK); 2012 SUM-2 (BLK)

Digital media increase the communication opportunities and challenges confronting creative professionals. This unit provides both an understanding of this changing communication environment and the application of digital photography principles and digital photography skills to enhance communication practice with visual design elements. In this unit students develop and apply digital photographic skills to explore this rapidly changing communication environment. Students enrolling in this unit should have a fundamental working knowledge of an SLR digital camera. Classes will explore technical approaches to digital photography, including press photography, photojournalism, documentary photography, landscape and portrait photography. * KKP420 will be recoded to KJP420 from 2013. Please enrol in KKP420 if you wish to study this unit in 2012. KJP420 will be available from 2013.

KKP601 Approaches to Enquiry in the Creative Industries

Equivalents	DEB701, KKP609, KKP624
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

There are many forms of enquiry suited to the diverse range of disciplines which make up the Creative Industries. These forms of enquiry typically fall within qualitative research traditions, creative practice as research and applied commercial research. This unit plays a key role in your research degree by introducing you to the most appropriate form of enquiry for your study and providing you with the strategies, methods and protocols for designing, implementing and evaluating that study.

KKP603 Project Development in the Creative Industries

Pre-requisites	KKP623
Equivalents	KKN065
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

After examining a range of procurement options available across the creative industries the unit focuses on strategic alliances, cross cultural projects, performance measures and the management of IP. These topics are addressed within a framework for project development that is shaped by ethical theory.

KKP606 Creative Industries Final Seminar

Pre-requisites	KKP622
Equivalents	KKN072
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Two units (also KKP604) are dedicated to the reporting of research outcomes to a collegial group of peers, industry partners and fellow research students and peers. In writing and presenting reports to a publishable standard, candidates report on aspects of their professional projects by drawing on the theoretical frameworks developed in the coursework together with their lived experience of project planning and implementation.

KKP607 Advanced Professional Practice 1

Equivalents	KKN011
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is the first of two units for professional artists enrolled in the Master of Fine Arts. Its purpose is to extend and improve creative practice through intensive (live and/or digital) studio-based exploration, either independently or collaboratively. The unit consists of the creation and production of a creative work, accompanied by a written reflective analysis and contextualisation of the work.

KKP608 Advanced Professional Practice 2

Equivalents	KKN013
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit addresses specific issues in each student¿s professional practice. As a practice-led enquiry, you will work closely with your supervisor to investigate specific issues related to your aesthetic, creative and performative concerns.

KKP613 MFA Project

Pre-requisites	KKP613-3 (can be enrolled in the same teaching period)
Equivalents	KKN010-4
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This extended unit is the final study for the Master of Fine Arts, culminating in a creative or performance work encompassing skills, concepts and

processes explored throughout the degree. Its purpose is to refine your practice to a sophisticated and professional level through intensive exploration with a public outcome, either in an individual or collaborative project. The artistic work is accompanied by a written exegesis reflecting on and contextualising your practice, with both components examined by an industry professional and an internal examiner. As the final component to your award you would be expected to work 35-40 hours per week (full-time).

KKP613 MFA Project

Equivalents	KKN010-1
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This extended unit is the final study for the Master of Fine Arts, culminating in a creative or performance work encompassing skills, concepts and processes explored throughout the degree. Its purpose is to refine your practice to a sophisticated and professional level through intensive exploration with a public outcome, either in an individual or collaborative project. The artistic work is accompanied by a written exegesis reflecting on and contextualising your practice, with both components examined by an industry professional and an internal examiner. As the final component to your award you would be expected to work 35-40 hours per week (full-time).

KKP613 MFA Project

Pre-requisites	KKP613-1 (can be enrolled in the same teaching period)
Equivalents	KKN010-2
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This extended unit is the final study for the Master of Fine Arts, culminating in a creative or performance work encompassing skills, concepts and processes explored throughout the degree. Its purpose is to refine your practice to a sophisticated and professional level through intensive exploration with a public outcome, either in an individual or collaborative project. The artistic work is accompanied by a written exegesis reflecting on and contextualising your practice, with both components examined by an industry professional and an internal examiner. As the final component to your award you would be expected to work 35-40 hours per week (full-time).

KKP613 MFA Project

Pre-requisites	KKP613-2 (can be enrolled in the same teaching period)
Equivalents	KKN010-3
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This extended unit is the final study for the Master of Fine Arts, culminating in a creative or performance work encompassing skills, concepts and processes explored throughout the degree. Its purpose is to refine your practice to a sophisticated and professional level through intensive exploration with a public outcome, either in an individual or collaborative project. The artistic work is accompanied by a written exegesis reflecting on and contextualising your practice, with both components examined by an industry professional and an internal examiner. As the final component to your award you would be expected to work 35-40 hours per week (full-time).

KKP615 Graduate Seminar

Pre-requisites	KKP601 or KKP624 or KKP609 or KKN020
Equivalents	KKN200
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

Graduate seminar is a unit that fosters a culture of discussion and debate among creative industries research students. You participate in a seminar series and present the findings of your own research. You will meet with distinguished guests, staff and fellow students in a spirit of sharing, analysis and interdisciplinary curiosity.

KKP616 Postgraduate Independent Study

Equivalents	KKN006
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit enables students to undertake independent work of an artistic or scholarly nature which is of appropriate scope. The student devises an outline and proposal of project study and/or creative practice in consultation with a staff supervisor. Artistic outcomes would be expected to be to the standard of public showing. Written work requires a minimum of 6000 - 10000 words, or equivalent if other media/reportage is used.

KKP620 Introduction To Reflective Practice

Equivalents	KKP602, KKN061
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit investigates the intuition and tacit knowledges that inform and inspire your creative practice by building the conceptual framework for being a reflective practitioner. Texts, terminologies and processes will be discussed and analysed within the context and forms of your practice.

KKP621 Reflective Practice in Action

Equivalents	KKP602, KKN061
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit strengthens the capacities of candidates to work as reflective practitioners within the collaborative, action oriented and theoretically embedded settings that constitute the creative industries. As candidates do this they are theorising on action, raising serious questions about their own practice, identifying the sources and patterns evident in their ideas and actions and transforming the contexts of practice so that professional autonomy may be enhanced. KD42 Master of Creative Industries external students will be required to attend a 2 to 3 day residency in Brisbane.

KKP622 Advanced Reflective Practice

Pre-requisites	KKP603 and KKP623
Equivalents	KKP605, KKN062
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides for a thorough analysis of the reflective practitioner process as it applied to students and their colleagues during DCI Professional Project I. Patterns of engagement and response in the workplace are analysed during a

process of re-theorising and conceptual review. Conceptual reference points for analysing practice are extended by investigating theoretical frameworks from other fields that may assist in building a more complete understanding of an individuals creative work practices.

KMB003 Sex Drugs Rock 'N' Roll

Equivalents	KMB640
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit, you gain an insight into the interaction between music and society by analysing the artistic, economic, and political landscape of the diverse, innovative music of the 21st century including rock and pop music, world music, dance music, indigenous music and new age music.

KMB004 World Music

Equivalents	KMB631
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

You will gain an awareness and better understanding of world music, its particular significance within Australia and its impact upon contemporary music through a series of lectures, demonstrations and tutorials.

KMB107 Sound, Image, Text

Equivalents	KMB638
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit focuses on the rich and varied relationship between sound and image in a number of media and artforms, including film, music video, theatre, installation, mixed media performance and many more.

KMB119 Music and Sound Production 1

Equivalents	KMB108, KMB621
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the fundamentals principles of music and sound production through a mix of theory and practice. Students gain an understanding of sound recording, sound production and live sound reinforcement and develop listening skills essential for music and sound production.

KMB122 Music and Sound Concepts 1

Equivalents	KMB130, KMB632
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the first of two units exploring and engaging with key concepts in music and sound. The unit encompasses both criticism and analysis as well as creative practice and experimentation and draws on a wide spectrum of contemporary and historical music and sound examples.

KMB125 Creative Studio 1

Equivalents	KMB110, KMB657, KMB120, KMB651
Credit Points	12
Campus	Kelvin Grove

To achieve success as a musician, you will need to form and negotiate your creative identity within a complex field of musical practice. This unit builds your critical and practical skills in the creation and presentation of music. As the first of two foundation units in creative music practice, it develops your skills in exploring and presenting musical ideas with peers in a supportive, staff directed environment.

KMB129 Music and Sound Production 2

Equivalents	KMB105, KMB619
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit builds on Music and Sound Production 1. It introduces students to sound synthesis and signal processing and extends the students understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB132 Music and Sound Concepts 2

Pre-requisites	KMB122
Equivalents	KMB131, KMB633
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is the second of two units exploring and engaging with key concepts in music and sound. The unit extends the critical and analytical skills developed in Music and Sounds Concepts 1 as well as developing a broader understanding of strategies for creative practice and experimentation by critically listening to a wide spectrum of contemporary and historical music and sound examples.

KMB135 Creative Studio 2

Pre-requisites	KMB125 or KMB110 or KMB657 or KMB120 or KMB651
Equivalents	KMB111, KMB658, KMB121, KMB652
Credit Points	12
Campus	Kelvin Grove

This unit builds on, and extends the skills in music creation and presentation covered in Creative Studio 1. It introduces you to a broader range of contemporary approaches to music creation and performance and assists you to clearly identify the skill and resource requirements associated with different music practices. As the second of two foundation units in creative music practice, it develops and consolidates your skills in exploring and presenting musical ideas with peers in a controlled, staff directed environment.

KMB140 Creative Studio 1

Anti-requisites	KMB125, KMB110, KMB657, KMB120, KMB651
Credit Points	24
Campus	
Teaching Periods	2012 SEM-1 (INT)

*SUBJECT TO FINAL APPROVAL
Successful musicians need to form and negotiate their creative identity within a complex field of practice. They need to develop critical skills to understand their music in context and how it can be connected to an audience. This unit builds students' critical and practical skills in the creation and presentation of music. As the first of two foundation units in creative music practice, it provides an opportunity for students to explore and present musical ideas with peers, at an introductory level, in a staff directed environment.

KMB141 Creative Studio 2

Pre-requisites	KMB140 or KMB125 or KMB110 or KMB657 or KMB120 or KMB651
Anti-requisites	KMB135, KMB111, KMB658, KMB121, KMB652
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL This unit builds on, and extends, the concepts relating to music creation and presentation covered in Creative Studio 1. It introduces to students to a broader range of contemporary approaches to music creation and presentation and assists students in developing a critical approach to the identification of skill and resource requirements associated with different music practices. As the second of two foundation units in creative music practice, it develops and consolidates students' skills in exploring and presenting musical ideas with peers in a controlled, staff directed environment.

KMB200 Music Scenes and Subcultures

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit will explore many of the major musical subcultural movements of the last sixty years through an interdisciplinary approach. To understand how music operates as a form of social, cultural and political communication this unit explores the various contexts in which music circulates and is made meaningful.

KMB201 Music (Secondary) Curriculum Studies 1

Pre-requisites	Completion of 48 credit points of Music discipline units (KMB% units)
Anti-requisites	KMP201
Credit Points	12
Campus	Kelvin Grove

A foundation study in secondary music and sound curriculum focusing upon the fundamentals of teaching, lesson planning and developing a philosophy appropriate to music and sound education practice.

KMB215 The Music Industry

Equivalents	KMB301, KMB056
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit gives a working knowledge of the structural, legal and business aspects of the Australian music industry by engaging with real world music industry professionals and formulating a number of strategies to reflect this.

KMB219 Music and Sound Production 3

Pre-requisites	KMB129 or KMB105 or KMB619
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds upon the first year foundation units in Music and Sound Production. It introduces students to the recording studio control room, focussing on microphone captured audio and the integration of electronic and acoustic resources and extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB225 Creative Studio 3

Pre-requisites	KMB141 or KMB135 or KPB105 or KMB111 or KMB658 or KMB121 or KMB652 or KPB185 or KPB260
Equivalents	KMB214-2
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on, and extends, the concepts relating to music creation and presentation covered in Creative Studio 1 and 2. It assists students in establishing their identity as an artist and locating their work within a broader field of practice. It will also introduce students to the role of the creative collaborator. The unit will introduce students to strategies for audience engagement, promotion and event curation. In consultation with studio staff, students will formulate a program of work for the semester that allows them to identify and investigate their personal artistic direction. Students will also be introduced to the design and execution of successful music events and presentations.

KMB229 Music and Sound Production 4

Pre-requisites	KMB219
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit builds upon Music and Sound Production 1, 2 and 3. It introduces students to the concept of the studio as an instrument. By developing advanced studio recording techniques and focussing on creative relationships, it extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB235 Creative Studio 4

Pre-requisites	KMB225 or KMB214-2
Equivalents	KMB214-2
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit builds on, and extends, the concepts relating to music creation and presentation covered in Creative Studio 1, 2 and 3. It assists students in consolidating their identity as an artist and collaborator, and in positioning their work within a broader field of practice. The unit will build students' skills in audience engagement, promotion and event curation in off campus contexts. In consultation with studio staff, students will propose a program of work for the semester and be mentored in bringing their projects to successful public outcomes both on and off campus.

KMB250 Creative Performer 1

Pre-requisites	(KMB141 or KMB135) and KMB119 and KMB129
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to develop the skills and understanding necessary for generating original creative work through extension and experimentation. It adds to the foundational knowledge and ideas delivered in Music and Sound Concepts 1 & 2 and draws on technical content introduced in Music and Sound Production 1 & 2.

KMB251 Creative Performer 2

Pre-requisites	KMB250
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit adds to the contextual knowledge and conceptual frameworks delivered in Creative Performer 1 and further develops the skills required to generate original creative work at a greater depth of experimentation and musical knowledge.

KMB252 Multi-Platform Sound Design

Pre-requisites	KMB129
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 5TP5 (BLK)

This unit builds on previous sound design knowledge and uses a range of tools to design and develop sound content for multi platform television, mobile phones, web, games, virtual worlds and social networks. Students gain an understanding of a variety of working methods and delivery formats and develop practical skills essential to successful collaboration and creation.

KMB301 The Music Industry

Equivalents	KMB056
Credit Points	12
Campus	Kelvin Grove

This unit gives a working knowledge of the structural, legal and business aspects of the Australian music industry by engaging with real world music industry professionals and formulating a number of strategies to reflect this.

KMB319 Music and Sound Production 5

Pre-requisites	KMB229
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds upon Music and Sound Production 1, 2, 3 and 4. It focuses on the skills needed for the delivery and professional presentation of developed work in a variety of creative production areas. It deepens understanding of creative relationships and extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB325 Creative Studio 5

Pre-requisites	KMB235
Equivalents	KMB314-2
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds students' skills working in self-directed environments as project initiators, and as active collaborators on projects devised by peers. Students will explore, in greater detail, strategies for audience engagement, music curatorship, and event promotion and will critically examine the approaches of successful music and sound professionals. In consultation with studio staff, students will devise a program of work for public presentation alongside a marketing and promotion plan. Students will examine the relationships between live performance/presentation and recording, both creatively and as tools for audience engagement.

KMB329 Music and Sound Production 6

Pre-requisites	KMB319
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This capstone unit extends and completes students' skills developed in Music and Sound Production 1, 2, 3, 4 and 5. It focuses on the skills needed for the delivery and professional presentation of developed work in a variety of creative production areas. It deepens understanding of creative relationships and extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will develop further practical skills in music and sound composition and deepen their knowledge of performance direction and session management techniques commonly used in industry standard creative production.

KMB335 Creative Studio 6

Pre-requisites	KMB325 or KMB214-2
Equivalents	KMB314-2
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This capstone unit extends and completes students' skills working in self-directed environments as project initiators, and as active collaborators on projects devised by peers. Students will apply strategies for audience engagement, music curatorship, and event promotion. With mentoring from studio staff, students will present a public program of interdisciplinary work designed to engage audiences at a professional level. Critical evaluation of the work by peers, staff and industry professionals will be an integral element of the unit.

KMB350 Creative Performer 3

Pre-requisites	KMB251
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the third unit of four Creative Performer units and concerns itself with the analysis of originality in professional practice and how these concepts and techniques could apply to your musical identity.

KMB351 Creative Performer 4

Pre-requisites	KMB350
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This capstone unit, the last of four Creative Performer units, examines the student's own musical practice in relation to finding a distinctive performance profile.

KMP101 Music (Primary / Instrumental) Curriculum Studies 1

Anti-requisites	KMB101
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

A foundation study in Primary or instrumental music specialization focusing

upon the fundamentals of teaching, lesson planning and developing a philosophy appropriate to music education practice.

KMP201 Music (Secondary) Curriculum Studies 1

Anti-requisites	KMB201
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

A foundation study in secondary music and sound curriculum focusing upon the fundamentals of teaching, lesson planning and developing a philosophy appropriate to music and sound education practice.

KMP202 Music (Secondary) Curriculum Studies 2

Pre-requisites	KMP201
Anti-requisites	KMB202
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Further study in classroom music and sound curriculum focusing upon more advanced teaching methods, unit planning and the development of an approach to philosophy in action appropriate to music and sound education practice in the senior secondary context.

KMP203 Music (Secondary) Curriculum Studies 3

Pre-requisites	KMP202 (can be enrolled in the same teaching period)
Anti-requisites	KMB203
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

n advanced study in classroom music and sound curriculum, focusing upon innovative teaching methods and planning, whole school community cultural management and the development of an approach to inclusive philosophy which enables a holistic and integrated approach to music and sound education that responds synergistically to individual secondary school communities and facilitates meaningful and engaging music and sound environments.

KMP405 Materials of Music

Pre-requisites	KK86MJR-MUSCSND - Music and Sound Major
Equivalents	KMN630
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides the basis for understanding rhythmic, melodic and timbral organisation and their relationship to texture. The study of textural design has been enriched by recent developments in music technology, enabling music to be heard as pure timbre in the sound media. As well as studying texture, timbre, rhythm and melodic organisation, this unit includes the study of formal devices, processes and analytical techniques that musicians and composers use to generate textures

KPB101 Introduction to Film, TV and New Media Production

Equivalents	KPB150, KPB155
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces the principles and technologies of video production for both cinema and television. This includes the roles and responsibilities of production teams, production management, design and practice. Lecture delivery by experts in the major production areas of producing, directing, and cinematography, editing and sound informs this practice. You work in groups to produce videos which form a major part of their assessment.

KPB104 Film and Television Production Resource Management

Equivalents	KPB314
Credit Points	12
Campus	Kelvin Grove

This unit considers the role of the producer and executive producer in film and television production with a particular focus on running a production. It considers the following: preparing and running a budget, achieving balance in above-the-line, below-the-line and marketing costs, casting and crewing a production, and legal and copyright issues.

KPB105 Narrative Production

Pre-requisites	KPB101 or KPB155 or KPB150
Equivalents	KPB185, KPB260
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit builds on and advances basic understandings, skills and principles delivered in KPB101. An introduction to the skills of sound and lighting complements the earlier core skills of camera, editing, directing and production management. Assessment consists of the production of a short narrative video.

KPB109 Film and TV History

Equivalents	KPB102, KPB359
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Television and film are among the most influential forms of representation developed over the past century. An appreciation of the history and influence of narrative styles and industrial movements emphasizes the important changes in technology and aesthetics that have contributed to making these media potent cultural forces. The history of narrative and movements needs to be considered alongside the production and viewing of television and film as entertainment, information and art.

KPB110 The Movie, TV and New Media Business

Equivalents	KPB106, KPB209
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The movie, TV and new media businesses are key parts of the entertainment industry, which is one of the biggest in the world. For anyone interested in working in these media an understanding of how they function as businesses is vital. This unit provides an introduction to producing, writing and theoretical aspects of the movie, TV and new media businesses.

KPB112 TV and Film Genres

Equivalents	KPB103, KPB107, KPB372-2
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Genre matters — for creators of genre films and television productions, for distributors, and for audiences. Film and television genres continue to evolve in response to entertainment and artistic imperatives in the contemporary new media environment. It is therefore important to consider similarities, differences, and connections between related genres on film and television, as well as those genres unique to television.

KPB113 TV and Film Text Analysis

Equivalents	KPB108, KPB130
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In an era when film and television texts are being transformed by digital media formats, media practioners (including creative artists, critics, and educators) value a media literacy based on critical and informed approaches to textual analysis. Taking into account the new media environment, selected techniques for undertaking textual analysis are applied to popular film and television such as blockbuster movies and cult television programs.

KPB114 Researching and Planning Creative Film, TV and New Media Projects

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

*SUBJECT TO FINAL APPROVAL The ability to research, write and conduct critical analyses are essential undergraduate skills and creative projects require the attributes of a contemporary researcher. By first familiarising students in the general skill set of academic research this unit will then apply this knowledge to specific tasks required as part of the project planning that goes into film, television and new media practices and productions across the three years of the FTVNM course.

KPB115 Editing and Technical Production

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL Contemporary editing, audio and vision operational skills require technical understandings and competencies. This demonstration based unit will provide students with an introduction to the technical dimensions supporting audio visual productions and will utilise Editing laboratories, TV Studio and Studio Control room, cameras and sound recording equipment.

KPB116 Introduction to Scriptwriting

Anti-requisites	KWP401
Equivalents	KWB102, KWB111
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Writing scripts for a range of media formats is a learned craft and requires discipline, perseverance and an understanding of industry practice. Possessing this key knowledge will give you abilities to develop concepts through to script stage across various film, television, and new media genres.

KPB201 Experimental Production

Pre-requisites	KPB105 or KPB185 or KWB102 or KWB111
Equivalents	KPB190
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Through exploration of the historical and theoretical underpinnings of experimental motion picture art, you have the opportunity to develop your creative potential through experimentation. Building on prior knowledge acquired in the production units KPB101 and KPB105, you are encouraged to become willfully nonconformist in approach, drawing on a wide range of traditions from within the genre of Experimental or Avant-Garde film-making.

KPB205 Documentary Theory and Practice

Equivalents	KPB358
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The documentary filmmaking tradition has involved many crucial aesthetic, technical and ethical concerns throughout history. This unit introduces this significant tradition of documentary production. For KP25/KK34 (Film & Television) students, the unit is a preparation for the documentary practical production unit, through learning to assimilate the principles outlined in the unit into their own documentary screenplays. For non-KP25/KK34 (Film & Television) students, the unit provides an opportunity to address the theoretical underpinnings of the documentary form, and the processes of documentary production.

KPB206 International Cinema

Equivalents	KPB344
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines a range of national cinemas from a global perspective. Key theoretical approaches to national/international cinemas are covered, along with significant historical, textual, representational and ideological issues. The critical challenges posed by productions from these different cultures to Hollywood mainstream productions are also explored.

KPB207 Film and Television Scriptwriting

Equivalents	KWB229, KWB105
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit focuses on the production of a sustained script for film or television.

KPB210 Production Management for Film, TV and New Media

Equivalents	KPB104, KPB314
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

*SUBJECT TO FINAL APPROVAL This unit considers the role of the producer and executive producer in film and television production with a particular focus on running a production. It considers the following: preparing and running a budget, achieving balance in above-the-line, below-the-line and marketing costs, casting and crewing a production, and legal and copyright issues.

KPB211 Writing Dialogue

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Dialogue is a vital part of any script. It must fit the characters; it must advance the story; it should be interesting, colourful or funny; and it should avoid exposition. In this unit you will learn the skills for writing good dialogue for television, film and new media projects.

KPB212 Australian Film and TV

Equivalents	KPB203, KPB343, KPB106
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: study of Australian film and television productions within their cultural and institutional contexts; issues facing the film and television industry today; the construction and circulation of cultural discourses such as national identity, nationalism, gender, ethnicity and class; experimental film and television; indigenous productions; new technological and global challenges.

KPB213 Multi-Camera TV Studio Production

Pre-requisites	KPB201 or KPB190
Equivalents	KPB204, KPB265
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Students seeking employment in the media production industries require knowledge, skill and experience in a wide variety of production styles, including multi-camera TV studio production. This unit builds on skills and knowledge developed in previous units and provides an understanding of the workings of multi-camera TV studio production and practical production skills as crew members.

KPB214 Single Camera TV Production

Equivalents	KPB204, KPB265
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Students seeking employment in the Film and Television industry require knowledge and experience in a wide variety of production styles, including single-camera TV production. This unit builds on skills and knowledge already developed in previous units and provides an understanding of the workings of single-camera TV production and practical production skills as crew members.

KPB302 Project Development for Film, TV and New Media

Pre-requisites	KPB210 or KPB104 or KPB207
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

A key part of the television and film industries is the large amount of time devoted to the development of projects. Substantial resources are devoted to identifying ideas, developing them, script editing and re-writing and market testing. In this unit you will go through this process as you develop a project for production.

KPB303 Critical Thinking About Television and Film

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Students who have an interest in the social function of television, film and new media should be encouraged to think critically about social, cultural and aesthetic issues regarding the media. In this unit you will look at these issues, and learn the skills you need in order to research them and think about them critically.

KPB308 Film and Television Drama Practice

Equivalents	KPB268
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces you to methodologies in the key specialisations of film and television drama. The unit familiarises you with a wide range of stylistic approaches to directing, producing, cinematography, editing and sound. You are expected to assimilate the principles outlined in the unit into KPB306 Film Drama Production and into your own creative work.

KPB313 Producing for Film, TV and New Media

Pre-requisites	Completion of 96cp of study
Equivalents	KPB202
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Producers are key figures in the production of television, film and new media. This unit will take you through the key skills you need to work as a producer, including how to source funding for projects, putting together a creative team, and organising distribution and marketing.

KPB320 Advanced Production (Craft) 1

Pre-requisites	Completion of 108 credit points of KPB coded units (KPB%)
Equivalents	KPB301, KPB360
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Designed for students in their final year of study, this unit includes practice in short film, television and new media production primarily in the communication of non-fictional events. Students work in groups and independently under supervision. It provides training in direction, camera and lighting, location sound, vision and sound editing, and new media applications at an advanced level. Specialisation crew positions may be based upon proposed career paths, demonstrated ability, evidence of practice and learning, and approval from department supervisors.

KPB321 Advanced Production (Craft) 2

Pre-requisites	KPB320 (can be enrolled in same teaching period)
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Designed for students in their final year of study, this unit includes practice in short film, television and new media production in the communication of fictional or non-fictional events. Students work in groups and independently under supervision. It provides training in direction, camera and lighting, location sound, vision and sound editing, and new media applications at an advanced level. Specialisation crew positions may be based upon proposed career paths, demonstrated ability, evidence of practice and learning, and

approval from department supervisors.

KPB322 Advanced Production (Producing) 1

Pre-requisites	Completion of 108 credit points of KPB coded units (KPB%)
Anti-requisites	KPB304
Equivalents	KPB270, KPB306, KPB310
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Designed for students in their final year of study, this unit includes practice in short film, television and new media producing in the communication of fictional or non-fictional events. Students work in groups and independently under supervision. The unit provides training in producing at an advanced level.

KPB323 Advanced Production (Producing) 2

Pre-requisites	KPB322 (can be enrolled in same teaching period)
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Designed for students in their final year of study, this capstone unit includes practice in short film, television and new media producing in the communication of fictional or non-fictional events. Students work in groups and independently under supervision. The unit provides training in producing at an advanced level, and builds on and refines the practical skills and theoretical knowledge previously acquired in KPB322 Advanced Production (Producing) 1.

KPP403 Introduction to Scriptwriting

Anti-requisites	KPB116, KWB102
Credit Points	12
Campus	Kelvin Grove

*SUBJECT TO FINAL APPROVAL

KRB101 Technical Production 1

Co-requisites	KRB105 and KRB111
Anti-requisites	KRB113, KSB113, KSB289
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

*SUBJECT TO FINAL APPROVAL

Technical Production One is an introduction to lighting and sound in a theatrical environment, with basic references to variations in lighting and sound set-ups and operations in more-complex productions, events and venues.

KRB104 Event Technology Practice

Pre-requisites	KRB101 or KRB113 or KSB113 or KSB289 or KRB111 or KSB111 or KSB292
Anti-requisites	KRB114, KSB114, KSB018
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

In the context of the creative industries, stage management and technical production training is applied across various genres, disciplines, venues and production styles, each requiring the application of specialist skills in unique contexts. A disciplined application of event and stage management, lighting and sound practice in changing facilities and circumstances will affirm knowledge to support production process in developing creative surroundings.

KRB105 Theatrecraft

Co-requisites	KRB101 and KRB111
Equivalents	KSB105, KSB274
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit involves development of practical skills in workshop construction and pre-production areas of stage scenery, props and costumes.

KRB111 Stage Management 1

Co-requisites	KRB101 and KRB105
Equivalents	KSB111, KSB292
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the coordination of a live theatre production including theatre layout and terminology, role of the stage manager, duties and responsibilities from pre-rehearsal to close of season, communication procedures and rehearsal room procedures.

KRB113 Technical Production 1

Co-requisites	KRB105 and KRB111
Equivalents	KSB113, KSB289
Credit Points	12
Campus	Kelvin Grove

This unit develops basic skills in theatrical lighting and sound operation and their integration into the overall production process.

KRB114 Event Technology Practice

Pre-requisites	KRB113 or KSB113 or KSB289 or KRB111 or KSB111 or KSB292
Anti-requisites	KRB104
Equivalents	KSB114, KSB018
Credit Points	12
Campus	Kelvin Grove

This unit provides technical production students with the opportunity to apply lecture content to authentic learning sites through participation in creative industries events and productions.

KRB120 Scenography and the Art of Technical Theatre

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces students to theoretical concepts and principles associated with scenography, historical trends in technical theatre and the background associated with the broad vocabulary of technical theatre terminology.

KRB121 Visual Theatre

Pre-requisites	KRB120 (can be enrolled in the same teaching period)
Equivalents	KSB215, KSB276
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces students to the concepts and principles associated with traditional visual theatre design. It is a studio-based unit comprised predominantly of ongoing practical work that students complete under the close guidance and instruction of QUT academic staff and external industry professionals.

KRB211 Stage Management 2

Co-requisites	KRB217
Equivalents	KSB211
Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 SEM-1 (INT)

This unit introduces the management issues in areas of stage mechanics, flying, props and wardrobe and preparation of students to undertake performance crew roles in these departments. It provides an introduction into stage management for Dance, Opera and Musicals.

KRB212 Stage Management 3

Pre-requisites	KRB211 or KSB211 or KSB293
Co-requisites	KRB218
Equivalents	KSB212, KSB294
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit broadens the skills base for stage managers into production and event management.

KRB217 Technical Production 2

Pre-requisites	KRB114 or KSB114 or KSB018 or KRB104
Co-requisites	KRB211
Equivalents	KSB217, KSB290, KSB213
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit continues the creative and technical use of lighting and sound in performances. It provides an introduction to lighting and sound design and advances in lighting and sound operations in the overall production process. With an emphasis on an environment of increasingly-complex sound and lighting practice, this unit exposes students to a diverse range of venues, equipment and contexts. They will be introduced to the skills and professional protocols demanded by the production process across multiple genres. There is a provision for multi-skilling and management of technical expertise, and students will undertake at least two production roles on a creative industries production or event. Intensive, studio-based classes and seminars and professionally-conducted, rigorous rehearsal periods characterise the teaching and learning in this unit, in productions and events for the paying public.

KRB218 Technical Production 3

Pre-requisites	KRB217 or KSB217 or KSB213 or KSB290
Co-requisites	KRB212
Equivalents	KSB218, KSB214, KSB291
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit engages a complex balance of intense, studio-based classroom work and practical, production experience – with a concentration on the principles and realisation of professional lighting design. It supports students moving forward into creative and management roles in lighting, sound and production specialties. Student roles will include drama, contemporary dance, ballet, opera, musicals and concerts. Lighting and sound design and operation are integrated into the overall learning and production processes. Students will continue to develop creative and management methods and a high level of production independence - with an emphasis on understanding and applying advanced techniques in these areas. The process of putting theoretical knowledge into practice is followed by individual, meaningful and analytical reflection and feedback.

KRB220 The Scenographic Divide

Pre-requisites	KRB120
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit challenges students to undertake a detailed interrogation of the tensions between the practice of traditional stage design and the theoretical concepts and principles associated with scenography.

KRB221 Intermedial Applications for the Theatre

Pre-requisites	KRB121 and KRB220
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces students to the concepts and principles associated with intermedial applications in the theatre. It is a studio-based unit comprised predominantly of ongoing practical work that students complete under the close guidance and instruction of QUT academic staff and external industry professionals.

KRB301 Technical Production Practice A

Pre-requisites	(KRB218 or KSB218 or KSB214 or KSB291) and (KRB212 or KSB212 or KSB294)
Equivalents	KSB301, KSB255
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to expose you to the rigors of public performance and production processes by providing you with production-based opportunities. This unit provides students with roles on production and events in senior creative and/or management capacities with the associated professional and management ethic and artistic expectations. In the third year of the course, this unit is placed when you are most able to transfer the theoretical and practical skills you have gained this far in practical production contexts.

KRB302 Technical Production Practice B

Pre-requisites	KRB301
Equivalents	KSB301, KSB255
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit further consolidated the skills acquired in Technical Production Practice A (KRB301), in a professional setting under conditions that you, as a potential graduate, can expect to find in the industry. This unit provides students with roles on productions and events in senior creative and/or management capacities and prepares students for entry into the industry through high-profiled productions; enhancing professional and management ethic and artistic expectations. This unit provides a production-based opportunity different to that undertaken in Technical Production Practice A (eg genre, venue, role).

KRB303 Advanced Technical Production Practice A

Pre-requisites	KRB301 (can be enrolled in the same teaching period)
Equivalents	KSB302, KSB256
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to expose you to the rigors

of industry-standard production processes by providing opportunities in senior creative and/or management capacities with the associated professional and management ethic and artistic expectations. Student can choose to undertake a role on a Creative Industries Production/Event OR Industry Secondment OR Placement with an established production partner/project. This unit aims to encourage students to be pro-active in seeking opportunities for professional exposure and development.

KRB304 Advanced Technical Production Practice B

Pre-requisites	KRB302 (can be enrolled in the same teaching period)
Equivalents	KSB302, KSB256
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to expose you to the rigors of industry-standard production processes by providing opportunities in senior creative and/or management capacities with the associated professional and management ethic and artistic expectations. Student can choose to undertake a role on a Creative Industries Production/Event OR Industry Secondment OR Placement with an established production partner/project. This unit aims to encourage students to be pro-active in seeking opportunities for professional exposure and development. Students who have, previously, undertaken roles on QUT productions (only) can only undertake the Industry Secondment or Placement pathway of this unit.

KSB101 Acting 1

Co-requisites	KSB103
Anti-requisites	KSB107
Equivalents	KSB202
Credit Points	12
Campus	Kelvin Grove

This unit focuses on the actor's instrument, using a series of exercises that deal specifically with whatever impedes the actor's personal truths, and unblocks instrumental blocks to emotional expression. Work incorporates stage and camera requirements.

KSB102 Acting 2

Pre-requisites	KSB101 or KSB202
Credit Points	12
Campus	Kelvin Grove

This unit continues instrument work and the introduction of craft techniques, dealing with contemporary naturalistic texts for stage, film and television.

KSB103 Voice and Movement 1

Co-requisites	KSB107
Equivalents	KSB204
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is an introduction to an organic approach to body and voice and their integration as the basis for all forms of dramatic expression. All voice and body work complements and supports the emotional freeing demanded in acting classes.

KSB104 Voice and Movement 2

Pre-requisites	KSB103 or KSB204
Equivalents	KSB205
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit continues the vocal and physical development work and introduces specific craft techniques. You will be working on contemporary naturalistic texts for stage, film and television.

KSB106 Acting Fundamentals

Anti-requisites	KTB103, KTB106, KKFAMJR-ACTING, KKFAMJR-DRAMA
Credit Points	12
Campus	Kelvin Grove

Acting Fundamentals is a studio-based exploration of foundational acting principles for the development of character and story applicable to stage and film, involving warm-ups, physical and vocal awareness and expression, improvisation, scene study and performance process.

KSB107 Acting 1

Co-requisites	KSB103
Anti-requisites	KSB101, KSB202
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Actors must learn to trust themselves in their craft and learn that their sensory and emotional apparatus are their artistic medium. This work forms the foundation of the actor's craft and begins the development of the performer's sensory and emotional resources. Emphasis is placed on work that challenges the capability of the actor's instrument intellectually, emotionally, physically and vocally.

KSB108 Acting 2

Pre-requisites	KSB107 or KSB101 or KSB202
Anti-requisites	KSB102
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL This unit extends the introductory acting exercises undertaken in Acting 1 and addresses issues of combining an organic acting process with the requirements and responsibilities of dramatic text at a naturalistic level.

KSB223 Voice and Movement 3

Pre-requisites	KSB104 or KSB205
Co-requisites	KSB229
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit explores the area of heightened language. The focus is on the technical devices of Shakespearean text. Work developed is performed both on the stage and for camera.

KSB224 Voice and Movement 4

Pre-requisites	KSB223 or KSB233
Equivalents	KSB234
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops a vocal and physical technique that supports and serves the professional performer. Advanced voice and body studio work develops physical expressiveness, clarity and strength.

KSB229 Acting 3

Pre-requisites	KSB108 or KSB203
Co-requisites	KSB223
Equivalents	KSB221, KSB247
Credit Points	24
Campus	Kelvin Grove

Teaching Periods	2012 SEM-1 (INT)

This unit advances the acting process and associated skills through rehearsal and performances of complex text-based plays. With an emphasis on classical texts such as Chekov and Shakespeare, the aim of this activity is to bring dramatic text to life for an audience, creating believable characters, situations and relationships. In addition, students will be introduced to the skills and professional protocols demanded by the audition process. Intensive studio-based work, professionally-conducted rigorous rehearsal periods culminating in performances for the paying public will characterise the teaching and learning in this unit.

KSB230 Acting 4

Pre-requisites	KSB229 or KSB221 or KSB247
Equivalents	KSB222, KSB248
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is an advanced acting unit that introduces the concept of the independent artist through writing and performing a stand-up comedy routine and responding to the demands of a professional director in a major Shakespeare performance. Students will work in a variety of performance venues to enable them to adapt their craft and skills to the differing acoustic and audience types encountered in professional practice. Additionally, they will develop advanced audition and rehearsal management techniques. This unit continues the consolidation of the organic acting process with a developed technique for both stage and screen and is delivered via intensive studio-based work, professionally-conducted rigorous rehearsal periods culminating in performances for the paying public.

KSB301 Theatre Project 1

Pre-requisites	KSB230 or KSB222 or KSB248
Equivalents	KSB255
Credit Points	48
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In this unit you participate in a season of semi-profiled performance projects, working as an ensemble performing roles for film and stage.

KSB302 Theatre Project 2

Pre-requisites	KSB301 or KSB255
Equivalents	KSB256
Credit Points	48
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

A season of high-profiled performance projects, providing you with the opportunity to demonstrate their skills to potential employers in the industry, through film and stage work.

KTB101 Understanding Theatre

Equivalents	KTB251
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In this unit you will investigate the major artistic movements of the 20th century; fields of performance practice dominant in the 20th century; key 20th century performance makers and innovators and theatricality and performance.

KTB102 Process Drama

Equivalents	KTB214
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines the structural forms and dramatic conventions used in a specific genre of drama - process drama. It moves from examining effective drama workshop design to consider the artistic application of these workshop techniques.

KTB103 Performing Skills 1: Character and Scene

Anti-requisites	KSB106
Equivalents	KTB257
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with essential understanding of how to combine practical performance skills (involving body/voice/role) with analytical, research and group skills, into an overall methodology for creating performance, within a professional ethos.

KTB104 Performance Innovation

Equivalents	KTB271
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to give you an appreciation and understanding of performance innovation in both historical and contemporary contexts.

KTB105 Production 1

Pre-requisites	KTB103 or KTB257
Equivalents	KTB273
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces a clearly defined rehearsal ethic through extended performance project. It includes text analysis, formal group discussion, role creation and intensive rehearsal, and live performance of a scripted drama before an audience.

KTB106 Performing Skills 2: Style and Form

Anti-requisites	KSB106
Equivalents	KTB258
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to be of benefit to anyone seeking to extend their understanding through workshop, rehearsal, performance, and the application of dramaturgical skills, of theatrical styles and forms other than realism. These could include Greek drama, commedia dell¿arte, Shakespearean theatre, Restoration comedy, comedy of manners, epic theatre and theatre of the absurd.

KTB107 The Creating Body

Equivalents	KTB206, KTB277
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

An understanding of innovative contemporary performance would be incomplete without an appreciation of the role that investigations into physical expressivity have played in the development of a range of new

performance forms, including Physical Theatre, and of a range of training techniques that focus on releasing the performer's physical creativity.

KTB108 Applied Theatre

Pre-requisites	KTB102 or KTB214
Equivalents	KTB209, KTB280, KTB272
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL It is important for students of performance to push beyond the walls of the designated theatre space and examine performance in a range of forms and contexts for its transformative powers and as it is applied to social action. To consider performance as it is applied within diverse communities for a range of purposes is key to a full understanding of contemporary performance in the twenty-first century.

KTB201 Drama Curriculum Studies 1

Pre-requisites	Completion of 48 credit points of Drama discipline units (KT% units)
Anti-requisites	KTP201
Equivalents	KTB414
Credit Points	12
Campus	Kelvin Grove

This unit provides an introduction to key syllabus documents and to key skills and strategies of drama teaching.

KTB202 Drama Curriculum Studies 2

Pre-requisites	KTB201
Anti-requisites	KTP202
Equivalents	KTB415
Credit Points	12
Campus	Kelvin Grove

In this unit, you develop planning and teaching skills for aesthetic learning and assessment and develop as a critically reflective practitioner and teacher artist.

KTB203 Drama Curriculum Studies 3

Pre-requisites	KTB202 (can be enrolled in the same teaching period)
Anti-requisites	KTP203
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is the final drama curriculum unit for you as a graduating drama teacher. In this third curriculum unit you will expand on the knowledge and understandings gained from Drama Curriculum Studies 1 and 2. It provides you with the opportunity to articulate a wide range of teaching skills that are essential for interpreting and managing in a variety of arts contexts in school and industry.

KTB204 Understanding Performance

Equivalents	KTB275
Credit Points	12
Campus	Kelvin Grove

In this unit you will investigate the nature of the performance event; performance in everyday life; theatricality and performance; trans-disciplinary performance theory and practice; the body in performance; site and performance; live and mediated performance; spectator and audience.

KTB205 Production 2

Equivalents	KTB308
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on the collaborative devising of a performance with professional guidance.

KTB206 The Creating Body

Equivalents	KTB277
Credit Points	12
Campus	Kelvin Grove

This unit is designed to extend understanding of innovative, physically-based performance. Through practical and theoretical work, the unit explores the possibilities and problematics of body-centred methodology and performance.

KTB207 Staging Australia

Equivalents	KTB253
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces key concepts and practices pertaining to Australian theatre and drama of the twentieth and twenth-first centuries. Theatre practices are explored in relation to broader social and political concerns.

KTB209 Applied Performance

Pre-requisites	KTB102 or KTB214
Equivalents	KTB280, KTB272
Credit Points	12
Campus	Kelvin Grove

This unit is a combination of a practical and theoretical investigation into the process of improvisation and the way drama can be used as a tool for critical enquiry and social change. It provides a basis for further work in writing for performance and advanced improvisational skills.

KTB210 Creative Industries Management

Pre-requisites	Completion of 72 credit points of study
Equivalents	KTB061
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces management techniques within the Australian creative industries environment including company structures, cultural policy, strategic management and leadership in the arts, legal, ethical, economical and social requirements of arts, boards, and entrepreneurial activity.

KTB211 Creative Industries Events and Festivals

Pre-requisites	Completion of 72 credit points of study or admission to KK86, KK88, KJ42 or IX96
Anti-requisites	KTP406
Equivalents	KTB062
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Combination of practical and theoretical investigation into how strategy and mission work in arts agencies in arts, events, promotion and public relations in Australia.

KTB212 Theatre and Community

Pre-requisites	KTB108
Credit Points	12
Campus	Kelvin Grove

Australia has a strong record of

excellence in the expanding field of theatre and drama in communities. Knowledge of the ethos, values and processes of working with communities in a responsive and consultative fashion is thus an essential component of any comprehensive preparation for a career in Drama and provides major career opportunities particularly for emerging artists. This is a 2nd year unit that articulates with and builds upon previous knowledge gained in KTB102 (Process Drama) and KTB108 (Applied Theatre).

KTB213 Directing Theatre

Pre-requisites	Completion of 72cp of study (% units)
Equivalents	KTB306
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL Directing text-based performance events, whether within a subscription season of 'traditional' theatre, or as a stand-alone event within the independent theatre sector, or within a festival context, requires highly developed creative skills and sound managerial and organisational abilities. This third year undergraduate unit examining the artistic processes and project-management responsibilities that a drama director must fulfill, is essential for students wishing to further their practice as directors, or as performance-makers within educational settings or within the creative industries. It builds on skills and perspectives acquired in units such as Performing Skills 1&2, Performance Innovation, Production 1&2, Understanding Theatre and Staging Australia.

KTB301 Performing Self

Equivalents	KTB056
Credit Points	12
Campus	Kelvin Grove

This unit provides you with the requisite skills for success within the creative industries in a knowledge economy by consolidating three years of undergraduate study as a performing arts graduate. In particular the unit focuses on what it means to be an initiator and leader within the sector.

KTB302 Postdramatic Theatre

Equivalents	KTB204, KTB275
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The elements of drama and the conventions of various periods have provided the pivot around which genres and forms of theatre can be studied. However, in recent decades a fresh species of drama has emerged called postdramatic theatre that challenges many of the traditional terms we use to define and make theatre. This unit examines postdramatic theatre that was heralded by the emergence of postmodernism. The unit will investigate the challenges postdramatic theatre makes to traditional notions of unitary art form, character, audience, site, time and narrative. The unit will investigate the postmodern aesthetics inherent in interdisciplinary, transdisciplinary and inter-media practices.

KTB303 Production 3

Pre-requisites	Completion of 192 credit points of study
Equivalents	KTB310
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Performance 3 will provide you, as a third year student, with the opportunity to consolidate theoretical understandings and practical skills in performance making with particular application to adaptation, interpretation and the creation of innovative performance forms.

KTB305 The Entrepreneurial Artist

Pre-requisites	Completion of 168 credit points of study
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is taken in the final three years of the Bachelor of Creative Industries Drama course. The program is designed to cover a range of artistic and economic areas, including: aesthetics, creativity, regulatory, administrative, legal and ethical issues related to the practice and business of the creative industries.

KTB306 Directing for Performance Events and Festivals

Pre-requisites	Completion of 72 credit points of study
Credit Points	12
Campus	Kelvin Grove

This unit equips you with the basic analytical, organisational, interpretive and choreographic skills necessary to taking a creative performance project from conception through to realisation.

KTB313 Production 4

Pre-requisites	KTB303
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

When a work that has undergone creative development moves into production, a whole new set of challenges, imperatives and creative ethos come into play. Understanding and managing this complex transition is a vital skill for the emerging collaborative ensemble. This 3rd year capstone unit prepares you for entry into the performance/education industry and/or postgraduate study by building upon skills and knowledge from KTB105 Production 1, KTB205 Production 2 and KTB303 Production 3.

KTP201 Drama Curriculum Studies 1

Anti-requisites	KTB201, KTB414
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction to key syllabus documents and to key skills and strategies of drama teaching.

KTP202 Drama Curriculum Studies 2

Pre-requisites	KTP201
Anti-requisites	KTB202, KTB415
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

In this unit, you develop planning and teaching skills for aesthetic learning and assessment and develop as a critically reflective practitioner and teacher artist.

KTP203 Drama Curriculum Studies 3

Pre-requisites	KTP202 (can be enrolled in the same teaching period)
Anti-requisites	KTB203
Credit Points	12

Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is the final drama curriculum unit for you as a graduating drama teacher. In this third curriculum unit you will expand on the knowledge and understandings gained from Drama Curriculum Studies 1 and 2. It provides you with the opportunity to articulate a wide range of teaching skills that are essential for interpreting and managing in a variety of arts contexts in school and industry.

KTP401 Contemporary Performance

Anti-requisites	KTB204
Equivalents	KTN002
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

School curriculum documents present Drama as a stable field of study. The elements of Drama and the conventions of various periods have provided the pivot around which genres and forms of Theatre can be studied. However, in recent decades a fresh species of Drama has emerged called Performance to challenge many of the traditional terms we use to define Theatre.

KTP406 Creative Industries: Events and Festivals

Anti-requisites	KTB211
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Combination of a practical and theoretical investigation into how strategy and mission work in arts agencies in arts, events, promotion and public relations in Australia.

KTP408 Marketing Arts and Culture

Equivalents	GSN228, KKP408
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit examines and applies theories of arts marketing for arts cultural organisations. The focus is on audience development, but product and service development models in the mission driven arts environment provide the context for you to develop marketing strategies, marketing plans and campaigns for arts and cultural management.

KTP409 Arts and Cultural Management

Equivalents	GSN227
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students of arts and cultural management with an investigation and analysis of the management function of the not-for-profit arts organisation. It examines the strategic management approaches and operational procedures of arts organisations, including their relationships with the legal system, the media, business, the public, and the industrial provisions and human resources of the organisation.

KTP411 Advanced Practice in Creative Production and Arts Management

Pre-requisites	KK86MJR-CPARTMG - Creative Production and Arts Management Major
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The growth of arts festivals and cultural centres across Australia and internationally is driving a demand for new and appealing arts programs. To meet this demand, cultural producers require a comprehensive suite is skills including creative entrepreneurship, programming, commissioning, management and leadership.

KTP412 Advanced Practice in Creative Partnerships

Pre-requisites	KK86MJR-CPARTNR - Creative Partnerships Major
Credit Points	12
Campus	Kelvin Grove

The aim of this unit is to give you an appreciation and understanding of innovative national and international practices and policies in the field of community cultural development, community arts and creative partnerships.

KTP413 Managing Money in the Arts

Equivalents	KKP402, GSN225
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Arts managers, event managers and creative producers play a critical role in taking great ideas to market. In this unit, you will examine the entrepreneurial strategies arts leaders use to implement their ideas in the current policy and economic climate. You will consider the role of corporate development, fundraising, grants, sponsorship and philanthropy.

KTP414 Arts and Cultural Policy

Equivalents	KCP018, KCP401, KKP404
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In this unit, you will consider arts and creative industries policy initiatives in Australia, at Federal, state and local government levels, and internationally, with particular reference to the Asia-Pacific region. You will examine the way in which policy impacts on the work of creative producers, arts managers, and members of arts boards, and the role the arts manager plays in issues of governance, planning, advocacy, and accountability.

KVB102 Modernism

Equivalents	KVB701
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an overview of the key concepts and movements that comprise twentieth-century modernism in the period 1900-1945. Beginning with cubism, the unit provides an understanding of terms, such as avant-garde, modernism and modernity. It explains how modernism focuses upon the issue of representation and how this approach led to inter-disciplinary work, which engaged with film, photography, design, architecture and installation as well as the traditional visual arts.

KVB103 Australian Art

Equivalents	KVB702
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit focuses on Australian art over the course of the twentieth century, including the contemporary period. It

gives you an understanding of the national, cultural and social frameworks within which this art has been produced and introduces a number of artists, artistic movements and issues within Australian art. It also considers the nature of indigenous art and its contribution to the complexity of Australian cultural identity. All of these issues are presented in order to help you understand the important role of Australian art as an expression of our cultural values throughout the twentieth century.

KVB104 Photomedia and Artistic Practice

Anti-requisites	KKB020, KKP420, KVP402, KJP420
Equivalents	KVB509, KVD104
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to provide you with an understanding of the aesthetic aspects of various photomedia concepts and processes and the artistic use of genres. It also aims to give you proficiency in alternative and experimental uses of photographic processes, establishing an understanding of investigative and creative research. By including a range of photographic processes as part of the photographic artist's repertoire, this unit aims to give you a broad range of choices and approaches to creating images. The unit encourages you to engage with photography as a medium for visual and artistic expression in order to extend your own photographic practice.

KVB105 Drawing for Design

Equivalents	KVB755
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is a studio based unit that introduces you to media, processes, strategies and traditions of drawing and associated imagery for use in animated media. The development of critical/reflective frameworks of traditional and contemporary practice underpins studio development.

KVB106 Drawing for Animation

Equivalents	KVB756
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops individual knowledge, concepts and skills to enable you to articulate and present capabilities of motion through drawing for contemporary animation practices.

KVB108 Contemporary Asian Visual Culture

Equivalents	KVB444
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit considers the influences of historical visual arts, backgrounds, philosophical beliefs and trade on the symbolism, forms, techniques and uses of various artifacts in contemporary Asian visual art practice.

KVB109 Visual Arts Foundation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

*SUBJECT TO FINAL APPROVAL
Careers in the visual arts are diverse and dynamic and the sector encompasses a range of roles and employment possibilities for you to pursue. Certain skills and abilities are common to all of these potential destinations. Successful artists, art teachers and arts professionals benefit from rigorous research, writing and visual analysis skills as well as a broad knowledge of the industry as a whole and it is important that you are introduced to these skills at the beginning of your course to contextualise your learning throughout your degree. Through visual arts specific activities you are able to discover the connection between core academic skills and your future career in the visual arts.

KVB110 2D Media and Processes

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This introductory unit is a studio course enabling you to explore, construct, analyse and interpret visual data through the 2D graphic modes of drawing, painting and printmaking.

KVB111 3D Media and Processes

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This first year unit introduces you to current contemporary art practices and concepts to assist you in making, analyzing and critiquing three dimensional artworks. As a second semester unit, this unit will develop foundational skills in 3D media and processes to complement and augment understandings and knowledge of 2D media and processes.

KVB120 Studio Art Practice 1

Equivalents	KVB740
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: development of an enquiry-based, self-sustaining art practice; fostering of appropriate research skills; encouragement of open flexible independent approach to formulating resolutions to conceptual and visual concerns; development of safe workshop practices, safe studio work habits and appropriate professional skills. It includes introductions to technological artforms.

KVB121 Studio Art Practice 2

Pre-requisites	KVB120 or KVB740
Equivalents	KVB741
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Contemporary cultural conditions and artistic practices are very diverse and complex. Consequently, this unit introduces aspects of artistic practice that will actively support self-motivation, self-reliance, as well as a sense of inquiry and openness to new ideas and experiences. It therefore comes in the first year of your course and provides foundational learning for future studio practice. As an active contributor in the cultural and creative industries, it is important that you learn to formulate personal conceptual and visual interests, as well as develop an understanding of your individual body of art work that is based on the application of knowledge of contemporary visual arts practices. It is an important concern of this unit that you understand that the media employed in visual art are not neutral but actively contribute to the form and content of work produced.

KVB200 Exhibition and Display in the Visual Arts

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit addresses the development of the Museum in Western cultures and how that tradition manifests in current arts practices, such as in contemporary exhibitions, the display of collections, installation and site-specificity, audience interaction, curatorial activities such as didactic panels and virtual galleries. This unit will assist you in displaying objects and images from your own arts practice and/or the artwork of others in effective and appropriate ways.

KVB204 Graphic Design

Pre-requisites	KIB101 or KIB801 or KIP401
Anti-requisites	KVP401
Credit Points	12
Campus	Kelvin Grove

Graphic design is a long established field of study involving the presentation of aesthetic elements, image and text for the purpose of effective communication. New modes of reproduction, display and transmission are reshaping the way that text, images and messages are communicated. This unit will develop an understanding of enduring graphic design principles, emphasize the importance of targeted communication, and introduce new and innovative ways of approaching graphic design for contemporary media. You will apply these principles by articulating and graphically presenting design options for production in a range of mediums. Lectures will introduce graphic design principles, theory and practices and this knowledge will be applied in a range of contexts within design studios.

KVB211 Post 1945 Art

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the historical, philosophical, economic, political, social, cultural, artistic and formal issues related to the production of art since 1945 and into the post-modern era. Major topics that are examined include the neo-avant-garde and art¿s engagement with consumerism. This unit is intended as a foundation skill-base for all students in Creative Industries applicable to all disciplines and cultural industries including art criticism, arts practice, architecture, landscape architecture, fashion and music.

KVB212 Australian Art, Architecture and Design

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to examine the impact of modernism upon the fields of visual art, architecture and design in Australia during the period between 1917 and 1967. It will also examine debates about modernism and provide a detailed historical background to the development of these three fields in Australia in response to the idea of modernism. It will build upon the background provided in units such as KVB102 Modernism and KVB103 Australian Art by providing more in-depth analysis of modernism in the Australian context. It will also develop the practical application of such principals in design exercises.

KVB213 Graphic Investigation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The interface between the graphic design, print and art environments is dynamic and pervasive. An awareness of contemporary practices through conceptual and cross-media investigations will allow you to interpret, create and engage in these environments.

KVB220 Studio Art Practice 3

Pre-requisites	KVB120 or KVB740 or KVB121 or KVB741
Equivalents	KVB742
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In consultation with studio staff, you formulate a program of work for the semester which allows you to investigate your own personal artistic direction, formulate and develop self-generated enquiry and acquire working methods, resources, skills and knowledge necessary to realise concepts.

KVB221 Studio Art Practice 4

Pre-requisites	KVB220 or KVB742
Equivalents	KVB743
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The conditions of current cultural practice, their production, reception and contribution to society are extremely diverse, increasingly complex and multi-layered. In this unit sustained critical involvement and an increasing commitment to artistic conceptual pursuits is underpinned by contemporary theoretical reference which includes investigation into a broad range of artists' practices. You are required to articulate a personal position in these issues.

KVB301 Visual Arts Curriculum Studies 1

Pre-requisites	Completion of 48 credit points of Visual Arts discipline units (KV% units)
Anti-requisites	KVP301
Equivalents	KVB412
Credit Points	12
Campus	Kelvin Grove

The aim of this unit is to enable you to begin to design and sequence Visual Arts activities that address learning experiences for successful planning, teaching and classroom management. The skills and knowledge of this unit will assist you in creating appropriate learning outcomes and assessments as well as address syllabus requirements. The content and processes of this unit are based on your previous required studies and experiences in Visual Arts theory and practice.

KVB302 Visual Arts Curriculum Studies 2

Pre-requisites	KVB301
Anti-requisites	KVP302
Equivalents	KVB413
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to have you establish capabilities in the design, sequencing and delivery of visual arts studies that address the learner as well as the requirements of syllabus documents. This unit will address issues of both unit and whole program structures as well as classroom management and teaching in the visual arts.

Units

KVB303 Visual Arts Curriculum Studies 3

Pre-requisites	KVB302 (can be enrolled in the same teaching period)
Anti-requisites	KVP303
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to prepare you for the complexity of secondary visual arts teaching. With a particular emphasis on professional preparedness, this unit aims to support your development as a competent, confident, skilled curriculum developer and reflective practitioner.

KVB304 Contemporary Art Issues

Equivalents	KVB712
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is intended as a foundation skill-base for students in Creative Industries applicable to all disciplines and cultural industries including art criticism, arts practice, architecture and fashion. The unit introduces the economic, political, social, cultural, artistic and formal issues related to the production of art since 1990 in the contemporary era. By means of lectures, discussions and analysis of artworks and readings, the students' awareness of the conceptual, historical and philosophical contexts concerning artists and the artworks is heightened.

KVB306 Video Art and Culture

Equivalents	KVB703
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Existing Visual Arts units examine a broad range of subjects addressing artistic media such as painting, sculpture and installation. The 'Video Art and Culture' unit supplements these by instituting a specialised study of artistic and cultural practice that focuses on new mass media technology. The unit therefore enhances, extends and updates knowledge of recent art strategies in contemporary society.

KVB307 Theories of Spatial Culture

Equivalents	KVB704
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides the necessary critical evaluation of issues and practices that relate to considerations of space in modern and contemporary art, new media and culture in general. It provides a historical overview of key art practices that have focused their critical attention to the issue of space and the built environment. In order to function as an informed practitioner in the environment of public space you must acquire such knowledge because it will form the critical-analytical background to current debates and theories in the field of spatial culture and public art.

KVB320 Studio Project 1

Pre-requisites	KVB221 or KVB743
Equivalents	KVB744
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In consultation with studio staff students at this level are expected to undertake individual projects that lead to the development of a professional organised and articulated body of work. Substantial research is expected in support of these projects.

KVB321 Studio Project 2

Pre-requisites	KVB320 or KVB744
Equivalents	KVB745
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

In consultation with studio staff, at this level you are expected to undertake individual projects that lead to the development of a professionally organised and articulated body of work. Substantial research is expected in support of these projects.

KVD104 Photomedia and Artistic Practice

Equivalents	KVB104
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT); 2012 13TP1 (INT)

This unit aims to provide you with an understanding of the aesthetic aspects of various photomedia concepts and processes and the artistic use of genres. It also aims to give you proficiency in alternative and experimental uses of photographic processes, establishing an understanding of investigative and creative research. By including a range of photographic processes as part of the photographic artist's repertoire, this unit aims to give you a broad range of choices and approaches to creating images. The unit encourages you to engage with photography as a medium for visual and artistic expression in order to extend your own photographic practice.

KVP301 Visual Arts Curriculum Studies 1

Anti-requisites	KVB301, KVB412
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to enable you to begin to design and sequence Visual Arts activities that address learning experiences for successful planning, teaching and classroom management. The skills and knowledge of this unit will assist you in creating appropriate learning outcomes and assessments as well as address syllabus requirements. The content and processes of this unit are based on your previous required studies and experiences in Visual Arts theory and practice.

KVP302 Visual Arts Curriculum Studies 2

Pre-requisites	KVP301
Anti-requisites	KVB302, KVB413
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to have you establish capabilities in the design, sequencing and delivery of visual arts studies that address the learner as well as the requirements of syllabus documents. This unit will address issues of both unit and whole program structures as well as classroom management and teaching in the visual arts.

KVP303 Visual Arts Curriculum Studies 3

Pre-requisites	KVP302 (can be enrolled in the same teaching period)
Anti-requisites	KVB303

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to prepare you for the complexity of secondary visual arts teaching. With a particular emphasis on professional preparedness, this unit aims to support your development as a competent, confident, skilled curriculum developer and reflective practitioner.

KVP400 Contemporary Aesthetic Debates

Anti-requisites	KVB004
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses upon aesthetic debates that inform contemporary art practice The unit concentrates on developing historical, critical and analytical skills in evaluating modern and contemporary critical issues in the visual arts as well as contemporary culture in general. For this reason, it examines the status of art today, asking what type of knowledge does art give us, whether it remains important today and how art is it best comprehended.

KVP402 Photomedia and Creative Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides you with an understanding of conceptual, technical and aesthetic perspectives as encountered in a number of contemporary photographic genres. The unit teaches you strategies for developing and applying advanced processes and concepts in Photomedia to the creation of your own personal work. It also encourages critical understanding of contexts that will contribute to your ability to work in a variety of creative and industry settings.

KWB101 Introduction to Creative Writing

Equivalents	KWB250
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This course develops creative, critical and analytical skills in reading and writing a variety of creative textual forms. You acquire an understanding and some practice in crafting various forms of poetry and short fiction.

KWB102 Media Writing

Anti-requisites	KWP401
Equivalents	KWB111
Credit Points	12
Campus	Kelvin Grove and Caboolture

This unit introduces you to the formats, terminology and protocols used in the preparation of proposal documents and short scripts. It will explore fundamental concepts including narrative structures, metaphors, point of view, plotting, character and voice. You will examine a range of professional scripts and development documents and be asked to apply their knowledge of typical script problems and solutions to their own work.

KWB103 Persuasive Writing

Anti-requisites	KWP402
Equivalents	KWB315
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Persuasive writing is an integral (if often unconscious) element of both professional and creative writing. Therefore, practitioners in these fields should be able to understand the principles of persuasion, use the vocabulary of persuasion, and evaluate the efficacy of different persuasive strategies. This unit introduces you to the theory and practice of writing persuasively across a number of genres to enhance your writing skills.

KWB104 Creative Writing: the Short Story

Anti-requisites	KWP403
Equivalents	KWB350
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit covers the writing of the short story in detail.

KWB106 Corporate Writing and Editing

Anti-requisites	KWP405
Equivalents	KWB314
Credit Points	12
Campus	Kelvin Grove

This unit deals with both the fundamentals of language (grammar, punctuation, style) and the dominant corporate writing genres (manuals, report, speeches, brochures).

KWB107 Creative Non-Fiction

Equivalents	KWB381
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit covers the acquisition of practical and analytical skills in creative non-fiction writing in particular review writing on books, film, music, visual arts, fashion and food, as well as travel, scientific, essay, humorous and sports writing. The unit provides examples, techniques and practical exercises in non-fiction creative writing and editing, and the opportunity to develop individual work in the supportive context of in-class and small workshop groups. Potential publishing areas will be explored.

KWB108 Introduction To Literary Studies

Equivalents	KWB001, KWB716
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

"The 'textualisation' of the world has been an important development in twentieth century theory in the West," (Fuery:57). What are texts? What do they mean? This unit addresses these issues by providing you with an introduction to conceptual frameworks derived from some of the major critical discourses that have impacted on our world.

KWB109 Writing Australia

Equivalents	KWB002, KWB710
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides you with opportunities to read, explore, discuss and evaluate a number of Australian texts written and published over the last twenty-five years. Upon completing this unit, you are able to understand and critically interrogate texts pertinent to contemporary Australian society and culture.

Units

KWB110 Writing Fundamentals

Equivalents	KKB009, KKB618
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Academic writing is an essential skill that all students need to succeed in their university degree programme, as academic writing underpins assessment tasks in all university degrees. This unit is placed in the first semester of your first year to ensure that you have the necessary writing skills to complete assessment at a high standard.

KWB112 Youth and Children's Writing

Equivalents	KWB206, KWB712
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes children's and adolescent novels within the cultural context of nineteenth and twentieth century Australia, England and America. It focuses on textual analysis of major generic types and considers issues such as race, gender, class and regionalism in fiction for young Australians.

KWB205 Creative Writing Project 1

Equivalents	KWB395
Credit Points	12
Campus	Kelvin Grove

This unit provides the opportunity for you to write a sustained piece of creative work, within the genre of your choice, including short fiction, poetry, creative non-fiction and hypertext, under supervision. Such work will be written to a standard commensurate with being suitable to submit for publication to print or electronic journals. Your final submission is written after familiarisation with industry demands, niches and marketing possibilities.

KWB206 Youth and Children's Writing

Equivalents	KWB712
Credit Points	12
Campus	Kelvin Grove

This unit includes children's and adolescent novels within the cultural context of nineteenth and twentieth century Australia, England and America. It focuses on textual analysis of major generic types and considers issues such as race, gender, class and regionalism in fiction for young Australians.

KWB207 Great Books: Creative Writing Classics

Anti-requisites	KWP407
Equivalents	KWB301
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an overview of the enduring classic literary works. It will give you a better knowledge and understanding of the craft of storytelling and stimulate you to develop your own critical and creative writing as well as an understanding of yourself and others. The course commences with several of Chaucer's medieval tales and concludes with Vonnegut's modern anti-war classic Slaughterhouse Five. It includes Swift's biting satire and Emily Bronte's passionate Wuthering Heights. The unit aims to make such works accessible to students from all disciplines in the university, and provides valuable historical context and analysis of the writing craft in each case.

KWB208 Modern Times (Literature and Culture in the 20th Century)

Equivalents	KWB003, KWB321
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The twentieth century is a time of significant developments and major transformations in writing and culture. This unit focuses on a number of twentieth century writers from Europe, England, Africa, Asia, Australia the Americas, from modern to postmodern times, and explores the connections between texts, language, culture and society.

KWB209 Shakespeare, Then and Now

Equivalents	KWB004, KWB729
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to introduce students to Shakespearean studies and the ongoing cultural importance of Shakespearean material.

KWB210 Imagining the Americas: Contemporary American Literature and Culture

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Imagining Americas is a literature-based unit which will explore a selection of contemporary written texts from the North and South American continents. The unit will focus on issues of place, nationality, regional and ethnic identity and will encourage an examination of these and the variety of writing styles from intercultural and international perspectives.

KWB211 Stylistics

Equivalents	KWB370, KWB201
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit allows students to significantly advance their writing practice and associated critical and editorial skills through close analysis of language-level literary style, as opposed to story-level or narrative concerns. In creative writing advanced stylistics, students will work on unpacking, theorising and then replicating literary techniques used by a wide range of exemplary authors. This unit gives students a unique opportunity to consider and manipulate very specific aspects of their authorial voices, drawing on the field of literary stylistics, the Oulipo movement, reader response theorists, and other author-based literary theories and schools. Intensive studio-based work, self-directed creative practice, guided critical analysis and asynchronous on-line activities characterise the teaching and learning in this unit.

KWB212 Writing Poetry

Pre-requisites	Completion of 96cp of Creative and Professional Writing discipline units (KWB% units)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL The unit covers one of the major genres in creative writing, and is designed for those who are interested in language and the use of words in precise, innovative,

concentrated and musical ways. It would also be useful to lyricists. The unit provides important creative and critical skills in writing verse and cultivating an understanding and appreciation of poetry and occurs at the mid-point of the creative writing major, building on KWB211 Stylistics and preparing students for the advanced work of third year.

KWB213 Corporate Writing and Editing

Anti-requisites	KWP405
Equivalents	KWB106, KWB314
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit deals with both the fundamentals of language (grammar, punctuation, style) and the dominant corporate writing genres (manuals, report, speeches, brochures).

KWB232 Creative Writing Advanced Practice 1

Equivalents	KWB331, KWB305, KWB396
Other requisites	Students undertaking the Advanced Writing Practice Minor must have a GPA of 5 or above at the end of semester 3. Students undertaking the Creative Writing and Literary Studies Research Minor must have a GPA of 5.5 or above at the end of semester 3
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

*SUBJECT TO FINAL APPROVAL This unit is the first in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In creative writing advanced practice 1 students will work on a sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (e.g.: elements of a novel length work) and non-fiction with a specific emphasis on conceptualising, planning and beginning sustained pieces. With the ability to articulate into the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWB302 Novel and Genre

Anti-requisites	KWP103, KWP400
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is a key advanced Creative Writing unit in the Advanced Writing Practice package. This unit enables you to develop a sustained and coherent piece of work, and develop the analytical, practical and professional skills needed to work within this unique form. The focus is on the longer narrative form and across various genres. The unit is also designed to enable you to begin to develop a critical understanding of your own and others approaches to the writing life. This unit includes face-to-face and electronic learning environments designed to facilitate the development of professional reading, editing and writing skills.

KWB303 Writing and Publishing Industry

Equivalents	KWB399
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to the function and structure of the writing and publishing industry.

KWB304 Editing and Developing the Manuscript

Anti-requisites	KWP104, KWP404
Equivalents	KWB301
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit develops your understanding of the editing process - in particular, the developmental intervention required to bring a creative manuscript to a publishable standard. These skills are crucial to those of you intending to work in the publishing industry, and of great benefit to professional creative writers. You will receive the opportunity to learn to edit the work of others with insight, understanding and technical skill.

KWB306 Creative Writing Project 1

Equivalents	KWB205, KWB395
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides the opportunity for you to write a sustained piece of creative work, within the genre of your choice, including short fiction, poetry, creative non-fiction and hypertext, under supervision. Such work will be written to a standard commensurate with being suitable to submit for publication to print or electronic journals. Your final submission is written after familiarisation with industry demands, niches and marketing possibilities.

KWB308 Wonderlands: Literature and Culture in the 19th Century

Equivalents	KWB005, KWB724
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit considers important contemporary cultural and social questions by way of readings in science fiction, fantasy fiction and fiction, class ideologies and revolutionary politics from a selection of novels and poetry of the nineteenth century. The novels and poems examine political and social change in Europe between 1790 and 1900, with a view to making critical links between current ideologies and literary forms and their formulation in a nineteenth century text. As such, works ranging from Frankenstein to Alice in Wonderland are deployed to consider the textual representations of important cultural, social, and sexual issues.

KWB309 Popular Fictions, Popular Culture

Equivalents	KWB006, KWB725
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit is designed to provide you with skills in understanding popular culture/s. It addresses the production of popular culture via a range of texts and mediums, and provides you with a framework by you they can critique the operations of popular cultures.

KWB313 Novel and Memoir

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit allows students to significantly advance their writing practice and associated critical and editorial skills through close analysis of the novel and memoir, with an emphasis on story-level and narrative concerns. In Novel and Memoir, students will engage in detailed analysis from a writer's point of view of how a novel is made – the problem-solving process, which includes overall and chapter structure, character development, and other key narrative elements. This unit also gives students a unique opportunity to consider the synergies and differences between writing novels and longer forms of life writing, with extended analysis of the conventions of memoir writing. Lectures, intensive workshop activities, self-directed creative practice, guided critical analysis, and on-line collaboration characterise the teaching and learning in this unit.

KWB331 Creative Writing Advanced Practice 1

Equivalents	KWB305, KWB396
Other requisites	Students undertaking the Advanced Writing Practice Minor must have a GPA of 5 or above at the end of semester 3. Students undertaking the Creative Writing and Literary Studies Research Minor must have a GPA of 5.5 or above at the end of semester 3
Credit Points	12
Campus	Kelvin Grove

This unit is the first in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In creative writing advanced practice 1 students will work on a sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (e.g.: elements of a novel length work) and non-fiction with a specific emphasis on conceptualising, planning and beginning sustained pieces. With the ability to articulate into the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWB332 Creative Writing Advanced Practice 2

Pre-requisites	KWB331 or KWB232
Equivalents	KWB305, KWB396
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is the second in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In creative writing advanced practice 2 students will work on an already-conceived, sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (eg: elements of a novel length work) and non-fiction with a specific emphasis on developing, structuring and modulating sustained pieces. With the ability to articulate into and out of the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWB333 Creative Writing Advanced Practice 3

Pre-requisites	KWB332
Equivalents	KWB305, KWB396
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is the third in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In this unit, students will work on an already-commenced, sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (eg: elements of a novel length work) and non-fiction with a specific emphasis on structural editing, redrafting, concluding and marketing sustained pieces – including contemporary writing and publishing industry issues. With the ability to articulate out of the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWP401 Media Writing

Anti-requisites	KPB116, KWB102
Equivalents	KWP111
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces you to the formats, terminology and protocols used in the preparation of proposal documents and short scripts. It will explore fundamental concepts including narrative structures, metaphors, point of view, plotting, character and voice. You will examine a range of professional scripts and development documents and be asked to apply their knowledge of typical script problems and solutions to their own work.

KWP402 Persuasive Writing

Equivalents	KWP315
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit teaches the use of persuasive writing in the workplace. The unit analyses a variety of writing genres to reveal how they persuade their audiences. The analysis is founded on critical discourse and semiotic theory. You will apply these learned techniques and theories to produce a portfolio of persuasive writing. It covers a range of genres such as public health campaigns, proposals, speechwriting and political persuasion.

KWP403 Creative Writing: the Short Story

Equivalents	KWP350
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit covers the writing of the short story in detail.

KWP404 Editing and Developing the Manuscript

Anti-requisites	KWB304

Equivalents	KWP104
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines processes of editing and manuscript development from the viewpoint of both editor and writer. You participate in the managed development of a manuscript or a range of manuscripts. Classes are taken in intimate seminar mode.

KWP405 Corporate Writing and Editing

Anti-requisites	KWB213, KWB106, KWB314
Equivalents	KWP314
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit deals with both the fundamentals of language (grammar, punctuation, style) and the dominant corporate writing genres (manuals, report, speeches, brochures).

KWP407 Great Books: the Literary Classics

Anti-requisites	KWB207, KWB301
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an overview of the enduring classic literary works. It will give you a better knowledge and understanding of the craft of storytelling and stimulate you to develop your own critical and creative writing as well as an understanding of yourself and others. The course commences with several of Chaucer's medieval tales and concludes with Vonnegut's modern anti-war classic Slaughterhouse Five. It includes Swift's biting satire and Emily Bronte's passionate Wuthering Heights. The unit aims to make such works accessible to students from all disciplines in the university, and provides valuable historical context and analysis of the writing craft in each case.

KWP410 Narrative: Advanced Practice

Pre-requisites	KK86MJR-CRWRTG - Creative Writing Major
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The novel represents one of the most pervasive, complex and culturally important literary forms. This unit is designed to help you examine the theory and practice of novel writing across various genres; the relationship between imagination and inspiration and the process of planning and research leading to the development of a novel proposal, including an initial chapter and synopsis.

KWP412 Contemporary Practice in Professional Communication

Pre-requisites	KK86MJR-PROFCOM - Professional Communication Major
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Professional communication specialists require high-level practical and theoretical skills. A key aspect of any professional writing document is its level of reader usability. Therefore, this unit provides high-level skills in professional writing with an aim to ensure that professional writing documents are tailored specifically to meet the needs of the user. The skills required to meet user needs include tone, advanced style and clarity, advanced English grammar, and advanced editing skills.

KWP415 Theory and Practice in Creative Writing and Literary Studies

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

KWP420 Transmedia Storytelling: From Interviewing to Multi-Platform

Pre-requisites	Completion of 48cp of study
Equivalents	KKP403
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Advanced level research and creative practice in the Creative Industries frequently draws upon the expertise of leading national and international researchers who visit the Creative Industries Faculty, as well as innovative creative projects. Through a Special Topic unit, Masters, PhD and Professional Doctorate students at the postgraduate level can systematically engage with these initiatives through a structured program of attendance at key events, reading and investigation, and working in creative teams to develop project deliverables.

KXB101 Introduction to Entertainment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The entertainment industries are by far the largest sector of the creative industries; in 2007, the global Entertainment industry was worth $2.4 trillion, and it is projected to grow to $3.5 trillion by 2012. Entertainment industries include but are not limited to: TV, popular music, major entertainment events, games, radio, entertainment marketing, sports media, theme parks, and movies. In this unit you will learn about the nature of entertainment, and how the entertainment industries work. This unit familiarises you with: • The history of entertainment. • Key characteristics of entertainment. • The relationship between entertainment and the wider creative industries. • Changes in entertainment over the period of modernity. • The size and nature of entertainment industries.

KXB102 Global Entertainment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Entertainment and entertainment industries are a global phenomenon. In this unit you will learn about important entertainment industries in specific places—such as Bollywood, Hollywood, and South Korean computer games—as well as about the ways in which important entertainment forms such as soap operas, theme parks, sport as entertainment, and pop music (specifically Cantopop) work in different cultures around the world.

KXB102 Global Entertainment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Entertainment and entertainment industries are a global phenomenon. In this unit you will learn about important

entertainment industries in specific places—such as Bollywood, Hollywood, and South Korean computer games—as well as about the ways in which important entertainment forms such as soap operas, theme parks, sport as entertainment, and pop music (specifically Cantopop) work in different cultures around the world.

KXB201 Entertainment Practice: Balancing Creativity and Business

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In this unit you will learn how creativity and business can work together to complement each other in the entertainment industries. This unit will assist you in developing your ability to combine entertainment creativity and business in productive ways. It unit addresses content such as: the current situation of the entertainment industries in Australia and globally, models of creativity, and the relationship between creativity and constraints such as business requirements. As part of your learning, you will write an entertainment proposal which demonstrates your ability to balance creative and business skills.

KXB202 Project Management for Entertainment

Pre-requisites	Completion of 72 credit points of study
Anti-requisites	MGB335, MGX335
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide you with the skills to oversee the production of an entertainment project by providing you with amid-course level understanding of, and ability to employ, project management skills for entertainment.

KXB301 Entertainment Industries Map

Pre-requisites	KXB101 and (36 credit points from AMB200, AMB207, BSB126, KPB101, KPB116, KXB102, KXB201, LWS008 and LWS009)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Industry networks are of key importance in Entertainment. In this unit you will extend and apply your critical knowledge of entertainment industries to the 'real-world' task of creating and updating an online directory of entertainment industries. The online directory will be a public product.

LJB301 Community Justice Projects

Pre-requisites	Completion of 96 credit points of law or justice units
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This unit is one of the suite of Work Integrated Learning (WIL) units offered by the Faculty which provides an opportunity for students in both Law and Justice degrees to address a social justice need within a community organisation through creative problem solving and the transfer of discipline knowledge.

LPP111 Lawyers' Skills

Anti-requisites	LPZ111
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP4 (BLK, EXT, INT), 2012 6TP1 (EXT, BLK, INT); 2012 6TP2 (BLK, INT, EXT)

The Law Admissions Consultative Committee considers that 'an entry level lawyer should be able to demonstrate oral communication skills, advocacy skills, negotiation and dispute resolution skills, and letter writing and legal drafting skills'. These skills are introduced in this unit. The intention is that students then seek to develop those skills during the rest of the course and in the workplace.

LPP112 Work Skills

Anti-requisites	LPZ112
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT, BLK, EXT), 2012 6TP1 (BLK, INT, EXT); 2012 6TP2 (EXT, INT, BLK)

The Law Admissions Consultative Committee considers that an entry level lawyer should be able to demonstrate competence in ethical understanding and knowledge of solicitors' trust accounting and file and risk management at the level required for admission as a legal practitioner in Australia.

LPP113 Civil Litigation

Anti-requisites	LPZ113
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 6TP3 (INT, EXT), 2012 6TP4 (EXT, INT), 2012 6TP1 (EXT, INT), 2012 6TP2 (INT, EXT); 2012 6TP5 (INT, EXT)

LPP114 Commercial

Anti-requisites	LPZ114
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 6TP4 (EXT, INT), 2012 6TP2 (EXT, INT); 2012 6TP5 (EXT, INT)

The Law Admissions Consultative Committee considers that 'an entry level lawyer should be able to conduct commercial transacations such as the sale and purchase of a small business...set up standard business structures...provide basic advice on finance and securities...and appreciate the type of advice needed to assess the revenue implications of standard commercial transactions'. This unit provides students with experience in specific commercial transactions of the types described above.

LPP115 Property

Anti-requisites	LPZ115
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 6TP3 (EXT, INT), 2012 6TP4 (EXT, INT), 2012 6TP1 (EXT, INT), 2012 6TP2 (EXT, INT); 2012 6TP5 (INT, EXT)

The Law Admissions Consultative Committee considers that 'an entry level lawyer should be able to convey, lease and mortgage real property...and provide general advice on land use.' This unit equips students to do that in selected contexts.

LPP116 Electives

Anti-requisites	LPZ116
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 6TP4 (EXT, INT), 2012 6TP2 (EXT, INT); 2012 6TP5 (INT, EXT)

The Law Admissions Consultative Committee considers that entry level lawyers should have experience in two areas of practice, administrative law practice, criminal law or family practice

AND one of either wills and estates, planning and environment, employment and industrial relations, or consumer law practice. This unit provides students with experience in their choice of one area from each list.

LPP117 Interaction

Anti-requisites	LPZ117
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 6TP3 (EXT, INT), 2012 6TP4 (EXT, INT), 2012 6TP1 (EXT, INT), 2012 6TP2 (INT, EXT); 2012 6TP5 (EXT, INT)

This unit is designed for law graduates who are completing the Graduate Diploma in Legal Practice for the purpose of becoming admitted as a legal practitioner and who are not working in law offices while they are doing the course. The unit seeks to further develop students' communciation, advocacy, interviewing and work management skills where they do not have the opportunity to develop those skills in a real life law office.

LPP118 Placement

Anti-requisites	LPZ118
Credit Points	12
Campus	External
Teaching Periods	2012 6TP4 (EXT); 2012 6TP6 (EXT)

The Law Admissions Consultative Committee considers that every entry level lawyer should have experience in a law office before being admitted. This unit provides four weeks experience in a law office to satisfy legal practitioner admission requirements.

LQB181 Introduction to Medical Laboratory Science

Anti-requisites	LSB480
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Medical laboratory scientists have a vital role in the diagnosis of disease and ongoing management of patient care. It is estimated that 70% of all medical treatments are based on a pathology diagnosis. This first year unit introduces you to the clinical practice of diagnostic pathology, the role of medical laboratory scientists in healthcare, medical research and profession of medical laboratory science in a local, national and international context. Foundation knowledge in the core diagnostic pathology disciplines will be introduced in a series of clinical case studies and scenarios in conjunction with basic practical bench-skills required in the laboratory to prepare you for later units of your course.

LQB182 Human Cell & Molecular Biology

Anti-requisites	SCB112, SCB122
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Human Cell and Molecular Biology equips you with a comprehensive understanding of the molecular structure and function of the cell. This unit introduces the basic principles and concepts of cell structure, function, specialisation, maintenance and replication, and introduces you to fundamental molecular mechanisms important to the organisation of the cell. You will be shown how macromolecular interactions are crucial to information flow and heredity. You are taught the relationships between chromosomes, genes and cellular function and ultimately how these may determine an organism's phenotype.

LQB183 Human Systematic Anatomy

Anti-requisites	LSB131, LSB255
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Human anatomy provides an important foundation and essential prerequisite to the understanding and integration of knowledge from many other life sciences disciplines. Furthermore anatomy is a language that enables biologists and medical professionals to communicate with each other in a scientific forum. This unit focusses on the acquisition and application of appropriate anatomical terminology, understanding of basic cell and tissue structure and a detailed understanding of the major anatomical concepts of each organ system within the human body. It therefore provides appropriate introductory knowledge and skills in anatomy for students enrolled in science or health courses in their first year of study.

LQB184 Biomedical Skills 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to develop an appreciation and understanding of the role of biomedical scientists in a range of research and clinical fields; develop a basic understanding of academic honesty and ethics related to biomedical science; introduce you to academic and professional skills that provide an important basis for the study of the discipline and for working in the profession, including scientific reading and writing skills, communication and presentation skills, experimental design, critical thinking and critical evaluation; and provide an introduction to quantitative measurements and basic practical laboratory skills and competencies required by biomedical scientists.

LQB281 Human Health & Disease Concepts

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

LQB381 Biochemistry: Structure and Function

Pre-requisites	PQB105 or (SCB121 and SCB122) or (SCB111 and SCB121) or SCB113 or (CVB101 & CVB102) or CZB190 or LQB180
Anti-requisites	LSB325
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide you with a clear understanding of the structure and function of the biological macromolecules that are essential to the metabolic and physiological processes of living cells in health and disease.

LQB383 Molecular and Cellular Regulation

Pre-requisites	SCB122 or LSB238
Anti-requisites	LSB338
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Molecular and Cellular Regulation is a

second year unit and is a continuation and expansion of topics introduced in SCB112 Cellular Basis of Life and SCB122 Cell & Molecular Biology. Molecular and Cellular Regulation strengthens the focus on the molecular and genetic aspects of cellular processes and the consequences to the organism of failure of these basic processes. Topics taught relate to gene structure and regulation in prokaryotes and eukaryotes and the role of gene expression in the development of complex organisms. Related concepts such as cell signalling, communication, proliferation and survival are further developed in this unit.

LQB386 Microbial Structure and Function

Pre-requisites	PQB105 or (SCB112 and (SCB121 or SCB113))
Anti-requisites	LSB328
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Aspects of microbiology impinge upon many facets of daily life, for example, human health, genetic engineering, the food industry and the built and natural environment. The unit introduces you to and provides you with a solid foundation in the basic microbiology required for progression to advanced studies in Microbiology. This unit provides knowledge about safe handling and study of micro-organisms that is also very important in many other disciplines, because micro-organisms are used as models and tools in a wide range of study areas.

LQB388 Medical Physiology 1

Pre-requisites	LSB258 or LSB111 or LSB131 or LSB142 or LSB255
Anti-requisites	LSB358
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit deals specifically with the physiological systems that are responsible for the maintenance of health in humans. In the course of the semester students will investigate half the systems that constitute the human body (with the remainder dealt with in the second semester unit Physiology 2 [LQB488]). The unit offers a useful frame of reference for students enrolled in courses such as animal biology, biochemistry, microbiology, molecular biology, nutrition and human movements. Together with Physiology 2 [LQB488] this unit is a prerequisite to the third level unit, Applied Physiology [LQB588] and will be of particular interest to students considering medicine as a postgraduate career option.

LQB389 Regional and Sectional Anatomy for Radiation Therapy

Pre-requisites	LQB183
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aims of this unit are to apply accurate anatomical language to identify and describe macroscopic structures of the human body using regional and sectional anatomy approaches, and develop skills in anatomical communication, teamwork and self-management.

LQB390 Regional and Sectional Anatomy for Medical Imaging

Pre-requisites	LQB183
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

The aims of this unit are to apply accurate anatomical language to identify and describe macroscopic structures of the human body using regional and sectional anatomy approaches, and develop skills in anatomical communication, teamwork and self-management.

LQB462 Microbial Diagnostics

Pre-requisites	LQB362
Anti-requisites	LSB435
Credit Points	12
Campus	

Medical microbiology involves research into human infectious diseases from multiple viewpoints, including: spectrum of disease, diagnosis, aetiology, treatment, prevention, control and epidemiology. An integral part of the practice of medical microbiology is laboratory processing of specimens derived from patients with infectious diseases. Ultimately you will need to have both a comprehensive and in-depth knowledge and understanding of theoretical concepts in infectious disease microbiology and be able to apply that knowledge and understanding safely, competently and skilfully in a PC2 diagnostic laboratory context. Such obligatory graduate attributes need to be constructed and refined in a stepwise progression. LQB462 is designed to provide you with a more focussed and in-depth knowledge and understanding of theoretical concepts in medical microbiology and for you to be able to apply that knowledge and understanding in a PC2 diagnostic laboratory context.

LQB481 Biochemical Pathways and Metabolism

Pre-requisites	LQB381 or LSB308
Anti-requisites	LSB275, LSB325, LSB408
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The study of biochemistry and cell biology, along with molecular biology, provides students with the knowledge required for the proper understanding of the structure and function of living organisms at the molecular level. As such, this unit extends the studies begun in the unit LQB381 Biochemistry into the metabolic processes occurring in living cells, and provides students with a basis for further studies in biochemistry as well as support for other units in the third year of the course.

LQB482 Anatomical Imaging

Pre-requisites	LQB183 or LSB131 or LSB255
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

LQB483 Molecular Biology Techniques

Pre-requisites	LSB238 or SCB122
Anti-requisites	LSB468, LSN468, LSN483
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Molecular biology and recombinant DNA technologies have important roles in many areas within the life sciences, including medicine, agriculture, cell biology, environmental science and forensics. Through close alignment of theoretical concepts and practical skills, this lab-based unit expands on molecular themes introduced in earlier cell and

molecular biology units to develop expertise in modern recombinant DNA techniques and an understanding of strategies used to identify and manipulate genes. The close relationship between theory and practice in this unit is designed to develop competence, independence and critical thinking that will provide students with a solid foundation for advanced molecular biology studies presented in several third level units.

LQB484 Introduction to Genomics and Bioinformatics

Pre-requisites	LQB383 or LSB338 or LSN101 and LSN102
Anti-requisites	LSB537, LSB619, LSB469
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The completion of the Human Genome project, along with similar projects on other organisms of a prokaryote and eukaryote nature, marked the beginning of a major revolution in fundamental biology that changed our understanding of the natural world. To understand how information on genome structure-function relationships (ie bioinformatics) is being used in areas such as gene discovery, disease diagnosis and drug development, students need to understand how the information content of DNA and proteins is extracted and analysed. This unit introduces students to the approaches to database mining and genome exploration.

LQB486 Clinical Microbiology 1

Pre-requisites	LQB386 or LSB328
Anti-requisites	LSB435, LSB547
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Micro-organisms are very important as pathogens of humans and animals, and their accurate clinical diagnosis is essential for appropriate treatment and management of infections. This unit builds upon the foundational topics in microbiology that you learned in LQB386 (Microbial Structure and Function) and starts preparing you for a career in a microbiology laboratory in clinical practice, industry or research. The unit will advance your knowledge and skills in classical methods of isolation and identification of bacteria in clinical specimens and introduce aspects of microbial pathogenesis and antibiotic sensitivity. The unit will provide you with an understanding of clinically important viruses, and will commence your training in diagnostic parasitology.

LQB488 Medical Physiology 2

Pre-requisites	LQB388
Anti-requisites	LSB458
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

An appreciation of how the human body works is an essential prerequisite to understanding the basis of health, disease, diagnostic technologies and treatment strategies. This unit deals specifically with the physiological systems that are responsible for the maintenance of health in humans. It therefore provides a useful frame of reference for students enrolled in biomedical science, pharmacy, human movement studies, nutrition and dietetics or any of the life science majors. The aim of this unit is to introduce you to the normal physiology of the human body in order to facilitate an understanding of how injury or disease affect health as well as the mechanism of action of drugs and other therapeutic interventions.

LQB489 Plant Physiology and Cell Biology

Pre-requisites	SCB120 or SCB122 or NRB270 or LSB238
Anti-requisites	LSB397, LSB497
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Plants are a vital resource providing food, medicines, fibre and fuel. The utilisation and manipulation of plants requires an understanding of growth and development on a molecular, cellular and whole plant basis. This is an intermediate-level unit covering the principles of plant cell biology and physiology to provide a platform for more advanced studies in plant biology and biotechnology. It integrates the fundamentals of plant physiology, biochemistry and molecular biology in such a way to enable students to understand how plants grow, develop and interact with their environment, and will also be valuable for lifelong appreciation of the potential of agriculture and its contribution to humanity. The aim of this unit is to provide you with an understanding of plant function from the cell to the whole plant, skills in measuring and monitoring these processes and an appreciation of how they are influenced by the environment.

LQB562 Advanced Microbial Diagnostics

Pre-requisites	LQB462 or LSB465
Credit Points	12
Campus	

Medical microbiology involves research into human infectious diseases from multiple viewpoints, including: diagnosis, aetiology, treatment, prevention, control and epidemiology. It covers a spectrum of disease states and etiologies. An integral part of the practice of diagnostic microbiology is the laboratory processing of specimens derived from patients with infectious diseases. Ultimately you will need to have a comprehensive and in-depth knowledge and understanding of theoretical concepts in infectious disease microbiology and be able to apply that knowledge and understanding safely, competently and skilfully in a PC2 diagnostic laboratory context. Such obligatory graduate attributes need to be constructed and refined in a stepwise progression. LQB562 is designed to satisfy the aforementioned requirements.

LQB581 Functional Biochemistry

Pre-requisites	LQB481
Anti-requisites	LSB508
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will study advanced biochemical concepts with a focus on metabolism, signalling pathways, systems and networks that coordinate and regulate the functional behaviour of cells and tissues.

LQB582 Biomedical Research Technologies

Pre-requisites	LQB481 or LQB381
Anti-requisites	LSB527
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will study the technical principles and practical techniques that are essential for advancing research and development in biochemistry and biotechnology.

LQB583 Genetic Research Technology

Pre-requisites	LQB385 or LQB483
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The tools available for the discovery and manipulation of new genes are increasing exponentially and, in turn, this is having a significant impact in many areas of the life sciences. The true potential for this ultimately relies on the ability to link genes and their function. There are many strategies, both targeted and global, which facilitate an understanding of gene and genome structure function relationships. These strategies rely on integrated technologies based on molecular genetics, molecular biology and genetic engineering. The identification of function leads then to unlimited potential for detection and manipulation of these genes in human, animal and plant systems.

LQB584 Medical Cell Biology

Pre-requisites	LQB383 or LSB338
Anti-requisites	LSB449, LSB503, LSN584
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit builds and extends the understanding of basic theoretical and practical aspects of molecular cell biology developed in previous cell and molecular biology units. Medical Cell Biology develops and extends the context of the cellular environment and its central role within the organism providing all of the biological functions required by the organism to survive, defend and protect itself from disease and trauma. An understanding of cell biology theory and molecular mechanisms of animal development and disease is essential for introduction to higher level units in medical biotechnology.

LQB585 Plant Genetic Manipulation

Pre-requisites	LQB483 or LSB468
Anti-requisites	LSB577
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The potential of plant biotechnology can only be recognised as a result of the significant advances being made in technologies enabling the genetic manipulation of plants. Familiarity with the strategies, techniques and breadth of applications is essential as a basis for anyone planning a career in plant biotechnology. The unit is designed with a significant emphasis on achieving technical expertise in plant genetic manipulation and control of gene expression.

LQB586 Clinical Microbiology 2

Pre-requisites	LQB486
Anti-requisites	LSB547 and LSB647
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Clinical microbiology laboratories throughout the world are recognising the need to maximise their diagnostic capabilities for accurate and early detection and management of medically-important parasitic, fungal and bacterial diseases of humans. This unit emphasises a strong commitment to professional practice by: (i) providing you with a comprehensive, in-depth knowledge and understanding of infectious disease states and their etiology, (ii) developing high level generic and specific laboratory-based skills in diagnostic microbiology and (iii) developing and refining critical thinking skills so that experimental results may be observed and recorded intelligently and reported with a high degree of confidence in their validity and rigor.

LQB587 Applied Microbiology 1: Water, Air and Soil

Pre-requisites	LQB386, LSB328, or LSB492
Anti-requisites	LSB528
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Issues relating to microbial populations within the environment are of great interest and relevance to the community, and also to scientists. Building on the foundation of basic microbiology, in this advanced level unit you will gain a strong understanding of the nature of microbial populations in water, air and soil, and their importance to the human population. This unit is issues-based, encouraging a problem solving approach as you investigate/study microbial pollution, bioremediation, biogeochemical cycles and a healthy environment. You will gain knowledge and skills in analysis and interpretation of water, air and soil populations, which will permit you to investigate real-world problems.

LQB588 Applied Medical Physiology

Pre-requisites	LQB388 or LQB488
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on the development of your skills and knowledge relevant to research in physiology and other biomedical fields. This unit is designed to foster your development of a range of skills including: critical thinking, team work, planning, writing, time-management, problem-solving and organisation skills. This unit will help you to interpret scientific literature and to understand how the use of statistical methods relates to research. The unit will cover a range of advanced topics in physiology using a more integrative and applied approach than previously encountered. It introduces some issues currently under debate and at the forefront of physiology research.

LQB680 Forensic DNA Profiling

Pre-requisites	SCB384
Credit Points	12
Campus	Gardens Point

The individuality of human beings is manifested at the molecular level in terms of our DNA, proteins and antigens. Techniques in molecular genetics are most commonly used to detect this individuality in biological samples, such as blood, semen, hair, teeth, bone or saliva. This is one of the final units in the forensic science major, which will draw together knowledge and understanding gained in previous studies. The aim of this unit is to develop your understanding of the application of DNA technologies to human identification for forensic purposes such as crime, parentage testing and the identification of human remains, as well as the issues related to presenting DNA evidence to court.

LQB681 Biochemical Research Skills

Pre-requisites	LQB381 or LSB308. Students with equivalent study can apply for a requisite waiver
Equivalents	LSB607
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In the real world, the design and completion of successful research and/or business projects demand that individuals gather information, solve problems, work effectively as a part of a team and analyse and communicate results in a critical manner. This unit offers opportunities for you to develop these skills that are valued highly by potential employers and research project leaders. The aim of this unit is to assist you to demonstrate and strengthen a number of generic research skills in a mentored problem-based learning environment that mirrors a real-world research team and the challenges that they face.

LQB682 Protein Biochemistry and Bioengineering

Pre-requisites	LQB381 or (LSN101and LSN102)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to give you the essential concepts and techniques driving research and industrial biotechnology so that you will be equipped for multiple careers in the biological sciences. The skills you develop will allow you to enter a practical laboratory environment or to apply your knowledge in related areas of evaluations of technologies and intellectual property.

LQB684 Medical Biotechnology

Pre-requisites	LQB584
Anti-requisites	LSN684
Equivalents	LSB609
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Medical Biotechnology will provide you with a thorough understanding of diagnostics and therapeutics in the commercial environment of biotechnology. A comprehension of approaches and the applications used as therapeutic interventions in medicine is necessary for this understanding. This unit focuses on current state-of-the-art applications within therapeutic biotechnology as directed to novel drug discovery and drug optimisation and to the development of novel therapeutic strategies, such as gene therapy, transplantation and immunotherapy. It will prepare you for subsequent involvement in medical research and/or employment in medical laboratories.

LQB685 Plant Microbe Interactions

Pre-requisites	LQB483 or LSN483
Anti-requisites	LSB578
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Microorganisms, including viruses, bacteria and fungi, cause many devastating diseases in plants and are responsible for significant losses to crops in Australia and Internationally. Diagnosis and control of these organisms, which vary considerably in their biology and infection strategies, is an ongoing challenge. However, plant genetic engineering approaches are now offering new and novel solutions to these problems. These approaches are of widespread scientific, commercial and humanitarian interest. The application of current technologies and development of new, novel technologies relies on an understanding of the biology of the organism, of the way in which these organisms cause disease in plants and the mechanism by which many plants are resistant.

LQB686 Microbial Technology and Immunology

Pre-requisites	LQB386 and LQB483
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This capstone unit builds upon your foundation knowledge and understanding of microorganisms and bioinformatics, molecular technology, and immunological skills. You will: (i) study infectious disease states as a major focus, (ii) research the importance of microbial pathogens as aetiological agents of disease, (iii) apply your knowledge of bioinformatics and molecular assays to design polymerase chain reaction (PCR) assays that can be used to selectively detect and amplify a specific bacterial pathogen, (iii) extend your knowledge of molecular subtyping methods, genomics, manipulation of bacterial genes, antibiotics, human immunology and vaccines, and (iv) write a research report in the format of a journal article.

LQB687 Applied Microbiology 2: Food and Quality Assurance

Pre-requisites	LQB386 or LSB328
Equivalents	LSB628
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Food microbiology and quality assurance constitute potential areas of employment for graduates. Many aspects of these disciplines are important in public health and operational management, Understanding fundamental concepts and their correct application are critical for food safety and management of both food-, and non-food-based operations. This unit with content in applied food microbiology and quality systems, builds on the introduction to food microbiology provided in earlier units. The aim of this unit it to gain advanced knowledge and expertise in food microbiology and fundamental quality assurance principles suitable for application in food and other (bio)technology-based industries.

LQB781 Work Integrated Learning Internship

Pre-requisites	LQB562, LQB683, LSB625, LSB655 and LSB665
Co-requisites	LQB762
Credit Points	36
Campus	

LSB111 Understanding Disease Concepts

Anti-requisites	LSB321, LSB365, LSB365, LSB475
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the structure and function of the body, reviews the body systems and links those to mechanisms of disease. Systems and topics covered are: integumentary, skeletal, muscular, nervous, endocrine, blood, heart and circulation, lymphatic, immune, respiratory, digestive (including nutrition and metabolism), urinary, reproductive, concepts of growth and development,

genetics. Examples of diseases introduced are: heart disease and hypertension, cancers (lung, breast, skin, colon, prostate, testicular, cervical), diabetes, depression, Parkinson's disease, asthma and chronic obstructive lung diseases.

LSB131 Anatomy

Anti-requisites	LQB183, LSB255
Equivalents	LSB145
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes basic concepts of anatomy: an overview of the structure of cells, body tissues, and body systems; aspects of surface anatomy which are relevant to human movement; musculoskeletal systems.

LSB142 Human Anatomy and Physiology

Anti-requisites	LSB131, LSB182, LSB258
Credit Points	12
Campus	Gardens Point and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide grounding in the principles of human anatomy and physiology. Following an introduction to the structure of the cell and the organisation of tissues, each of the major systems that constitute the human body are examined by the integrated study of their anatomy and physiology.

LSB182 Bioscience 1

Anti-requisites	LSB131, LSB142
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aims of this unit are to provide you with a clear understanding of anatomical terminology used in the health professions; provide you with a strong background enabling you to apply concepts of anatomy, physiology, microbiology and introductory pharmacology to your future studies of diseases and their treatment; provide an introduction to infectious agents that impact on human health and infection control.

LSB231 Physiology

Anti-requisites	LSB250
Equivalents	LSB245
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit covers the general physiological principles such as homeostasis and how all systems in the body contribute to it. Topics include cells, transport processes, cardiovascular system, cardiac electrical activity, cardiac output, regulation of blood pressure, respiratory system, endocrine system, pulmonary ventilation and its function.

LSB235 Advanced Anatomy

Pre-requisites	LSB131
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

An in-depth study of the systematic and regional anatomy of the lower limb is undertaken with particular emphasis on osteology, arthrology, musculature, angiology and neurology.

LSB250 Human Physiology

Pre-requisites	SCB112 or LSB118 or LSB131 or LQB182
Anti-requisites	LSB231
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A strong foundation in human physiology is crucial for students in Optometry, Podiatry and Medical Science. This unit will provide you with the necessary foundation for subsequent units in physiology, pathology or immunology. This unit is also appropriate for other students interested in studying medical physiology at an intermediate level and is also designed to encourage your interest in scientific research and current issues in medical physiology. The aim of this unit is for students to gain a strong a background in human physiology and to develop skills and gain knowledge that are relevant to the needs of future optometrists, podiatrists and medical scientists.

LSB255 Human Anatomy

Pre-requisites	SCB112 or LSB118 or LQB182
Anti-requisites	LSB152
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A detailed understanding of human anatomy is fundamental to the knowledge base of the medically orientated biological scientist. This unit introduces you to both theoretical and practical aspects of gross, systemic and microscopic anatomy of the human body with emphasis on the microscopic anatomy. The unit builds upon knowledge gained in previous units which introduced you to basic principles of cell structure and function. Knowledge gained in this unit provides a basis for more advanced studies in cellular pathology, histochemistry and cytology.

LSB275 Biomolecular Science

Anti-requisites	LQB381, LSB308, LQB481, LSB408
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is designed specifically for optometry and podiatry students and introduces you to the study of biochemistry, along with anatomy and physiology. Being an introductory unit, it provides you with the knowledge required for the proper understanding of the functioning of the human body and its organ systems in health and disease, as a preparation for their clinical studies. The aim of the unit is to develop an understanding of the structure and function of biological molecules and metabolic processes.

LSB282 Bioscience 2

Pre-requisites	LSB182 or (LSB131 and LSB231)
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

The aims of this unit are to provide you with a clear understanding of the pathophysiological processes resulting in altered health and disease states, and to introduce you to the host immune mechanisms which respond to foreign invaders within the body or result in disease states.

LSB321 Systematic Pathology

Pre-requisites	LSB245

Anti-requisites	LSB361, LSB367, LSB475
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The field of radiography and radiation therapy is rapidly changing and a sound knowledge of the disease processes being investigated or treated is required for professional practice. Knowledge of diseases of the major organ systems provides an essential background for understanding the clinical applications of imaging and the therapy aspects of medical radiation science. This will enable you to integrate theoretical and practical knowledge of human pathology and is required for the understanding of subsequent clinical semesters. The aim of the unit is to introduce you to the study of the processes and mechanisms underlying the major diseases of human organ systems.

LSB325 Biochemistry

Pre-requisites	SCB121 or SCB113 or PQB105
Anti-requisites	LQB381, LQB481
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The study of biochemistry and cell biology, along with anatomy and physiology, provides students with the knowledge required for the proper understanding of the structure and function of the human body and its organ systems in health and disease, as a preparation for their clinical studies.

LSB365 Pathology

Pre-requisites	LQB281 and LSB250 and LSB255
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce you to the study of disease processes underlying the major diseases of human organ systems. The first part of the unit will introduce you to aspects of general pathology including cell adaptation, inflammation, immune disorders, infectious diseases and cancer. Systemic pathology will be covered in the second part of the unit during which the general pathologic processes will be applied to the major organ systems of the body. In addition, you will expand and further develop your practical skills along with your understanding of how they relate to laboratory investigation and diagnosis of disease.

LSB367 Pathology

Anti-requisites	LSB321, LSB475
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT)

This unit is an external unit designed to run online to meet the requirements of the students in the course who are located throughout Queensland. Pathology has a central role in most health related courses. A sound understanding of pathology is essential for the informed assessment and management of emergency patients. The unit has two main sections. The first section deals with general pathology principles (eg homeostasis, adaptation and defence, principles of diagnosis, environment and pathology, neoplasia, circulatory disorders). The second section involves application of the general principles of pathology to major diseases and dysfunctions of each of the organ systems of the body.

LSB382 Bioscience 3

Pre-requisites	LSB182 or LSB131
Credit Points	12
Campus	Gardens Point, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

The aims of the unit are to provide you with a clear understanding of the pathophysiological processes resulting in altered health and disease states; develop your understanding of the aetiological agents of infectious disease and the effects of infection on the body; and enable you to apply strategies to control infections.

LSB384 Pharmacology For Health Professionals

Pre-requisites	(LSB111 or LSB282 or LSB382 (NS40) or (LSB475 or CSB520 (OP45))) or (LSB235 and LSB250 (PU43 Podiatry))
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Health professionals such as Nurses, Paramedics, Podiatrists and Optometrists require a detailed understanding of the pharmacological properties of the medicines that are used daily in the treatment of patients under their care. This unit introduces students to the discipline of pharmacology by examining the interaction of drugs with biological systems. An understanding of pharmacology is fundamental to a student's understanding of pharmaceutical products in terms of efficacy and safety and provides a rationale for their therapeutic use.

LSB425 Quantitative Medical Science

Pre-requisites	LSB325 and MAB141 and SCB131
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit integrates physics, chemistry, biochemistry, maths and statistics for applications to chemical analysis, as preparation to clinical biochemistry.

LSB435 Diagnostic Microbiology 1

Pre-requisites	LQB386
Anti-requisites	LQB486, LSB547
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit builds on foundation topics in Microbiology 1 and starts preparing the student for a career in a routine diagnostic microbiology laboratory. The overall theme is the diagnosis of human infectious diseases with bacteriology and parasitology the two key focus areas. This unit emphasises a strong commitment to professional practice by developing high level generic and specific skills. Specific lecture and lab class discussion points include (where relevant): life cycles; pathogen acquisition; infectious disease diagnosis pathways; classification systems; clinical presentations; diagnostic protocols and patient management. Students are encouraged to think critically and to discuss issues in an interactive and supportive learning environment.

LSB438 Immunology 1

Pre-requisites	LQB386 and LSB250
Anti-requisites	LSN438
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-2 (INT)

The immune system protects against a range of infectious and malignant diseases. However, it occasionally also attacks the host producing autoimmune disease or overreacts to environmental stimuli to cause allergic reactions. This unit provides a basic introduction to these topics and to the laboratory tests involved in assessing immune function.

LSB465 Histopathology 1

Pre-requisites	LSB365 and SCB113 and LSB255
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Histopathology and cytology are essential components of pathological diagnosis and major clinical disciplines in Medical Laboratory Science. The aim of the unit is to provide you with a knowledge of histological techniques and interpretation of histopathological tests, as well as the principles of cytopathological diagnosis.

LSB467 Pathophysiology

Anti-requisites	LSB658
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT)

This unit is an external unit designed to run online to meet the requirements of students located throughout Queensland. Building on a sound knowledge of anatomy, physiology and pathology, you will develop an understanding of the pathophysiology mechanisms underpinning diseases which is essential for the informed assessment and management of emergency patients. In order to relate the material as closely as possible to the real-world setting, a problem-based model is employed, using case-studies.

LSB475 Disease Processes 4

Anti-requisites	LSB321, LSB361, LSB367
Credit Points	12
Campus	Gardens Point and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Disease Processes provides a link between your foundation knowledge in anatomy and physiology and the application of such knowledge in a clinical setting. This intermediate level unit places an emphasis on general pathological knowledge necessary for your understanding of future advanced units . It therefore provides you with the knowledge needed for subsequent clinical semesters. The aim of the unit is to introduce you to the study of disease processes underlying the major diseases of human organ systems.

LSB480 Professional Practice

Pre-requisites	LSB425 and LSB435 and LSB465
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

Six weeks of professional practice is undertaken at the end of the second year full time of the medical science course, during the summer vacation. This experience provides you with a supervised introduction to the pathology workplace and prepares you for the clinical units in the third year of the course. During this time you will be given limited supervised experience working at the bench, and you will gain a greater appreciation of the role of the laboratory scientist in a paramedical team. It will reinforce the importance of quality standards, and health and safety issues, as stressed at QUT, and it will place you in direct contact with prospective employers in the pathology industry. The professional practice unit aims to provide you with a supervised introduction to the pathology workplace.

LSB492 Microbiology

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will provide you with foundation knowledge and an understanding of the diversity of microorganisms, the host's immune response to infection and methods of control of microorganisms. You will: (i) study relevant infectious disease states, (ii) research the importance of microbial pathogens as aetiological agents of disease, and (iii) reinforce your knowledge of microorganisms and methods of control of microorganisms by performing experiments within the microbiology laboratory.

LSB525 Chemical Pathology

Pre-requisites	LSB425
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This course of study (along with LSB625 Clinical Biochemistry 2) provides the graduating scientists with sufficient biochemical knowledge and laboratory experience to work effectively in both the smaller general-purpose laboratory performing a limited number of biochemical tests and the larger specialised laboratory performing in-depth studies of all aspects of clinical biochemistry.

LSB535 Microbial Immunology

Pre-requisites	LSB438 or LQB387
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the concepts developed in Immunology 1 to introduce students to the life cycles of a variety of pathogens, particularly viruses, and the mechanisms employed by a host to avoid infection.

LSB555 Principles and Practice of Clinical Haematology

Pre-requisites	LSB425 and (LSB438 or LQB387)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Haematology is the study of blood and investigates pathologies associated with non-malignant and malignant blood cell dyscrasias, and abnormalities of the haemostasis and coagulation system that can lead to an increased risk of bleeding or thrombosis. This third year unit is designed to provide you with the essential knowledge and practical skills to work competently in a routine diagnostic haematology laboratory. In developing these skills it is critical you have an in-depth understanding of the aetiology and pathophysiology of commonly encountered dyscrasias, and the principle and rationale of laboratory investigations used to diagnose them and monitor patient treatment in the clinical setting.

LSB565 Histopathology 2

Pre-requisites	LSB465
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Histopathology is an essential component of pathology and one of the major clinical disciplines in Medical Laboratory Science. Students are introduced to advanced techniques and methods of handling histopathological specimens. Students acquire sufficient scientific and technical expertise to enable them to carry out and to understand a range of techniques used routinely in clinical histopathology and histology research laboratories.

LSB584 Pharmacotherapeutics for Podiatrists

Pre-requisites	LSB384 or PUB437
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

There is an increasing need for the use of medicines by endorsed Podiatrists for the treatment, management and rehabilitation of patients of various foot pathologies. This unit will further enhance your understanding of pharmacology with a focus on the S2, S3 and S4 medicines administered and prescribed for the treatment and diagnosis of the disease states encountered in the scope of professional practice of Podiatrists. You will also be exposed to recognised clinical guidelines that recommend the appropriate selection and use of medicines such as the Therapeutic Guidelines and drug protocols approved by the Podiatry Board of Australia and gain an appreciation of the national policy on the Quality Use of Medicines.

LSB625 Diagnostic Endocrinology

Pre-requisites	LSB525
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit builds on and extends LSB525 Clinical Biochemistry 1 to provide you with sufficient biochemical knowledge and laboratory experience to work effectively in either smaller general-purpose laboratory performing a limited number of biochemical tests or larger specialised laboratory performing in-depth studies of all aspects of clinical biochemistry. LSB625 is completed in the final Semester of the LS37 course and builds on the theoretical aspects of biochemistry introduced in LSB325, the practical skills developed in LSB425 and the theoretical and practical elements of LSB525.

LSB635 Diagnostic Microbiology 2

Pre-requisites	LSB435
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This advanced level unit completes the preparation of the student for a career in a routine diagnostic microbiology laboratory by building upon foundation topics covered in LSB435. The overall theme is human infectious disease diagnosis with bacteriology, mycology and parasitology the three key focus areas. This unit continues a strong commitment to professional practice by developing high level generic and specific skills. Specific discussion points include (where relevant): life cycles, pathogen acquisition, infectious disease diagnosis pathways, classification systems, clinical presentations, diagnostic protocols and patient management. Students are encouraged to think critically and to discuss issues in an interactive and supportive learning environment.

LSB655 Applied Clinical Haematology

Pre-requisites	LSB555
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to provide you with an up to date understanding of the common white blood cell and haemostatic disorders routinely encountered in a haematology laboratory, as well as their diagnosis, treatment, significance and prognosis for the patient being investigated.

LSB658 Clinical Physiology

Pre-requisites	(LQB388 and LQB488) or (LSB282 and LSB382)
Anti-requisites	LQB400
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aims of this unit are to help you develop a full understanding of how the pathophysiology of the major disorders of the human body derives from a knowledge and understanding of anatomy and physiology, and critical thinking and complex reasoning skills that provide you with a strong basis for cogently discussing and understanding case histories, their diagnoses and treatments.

LSB665 Transfusion & Transplantation Science

Pre-requisites	LSB555
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to provide you with an understanding of the theoretical and practical aspects of transfusion medicine, as it applies to the provision of a safe transfusion service. This includes knowledge of blood and its components, the genetic and immunological aspects of antigens and antibodies relevant to transfusion, compatibility testing and the clinical factors affecting transfusion practice decisions and outcomes. The knowlege, practical skills and competence gained will prepare you for employment as a medical scientist in transfusion services including pathology/hospital bloodbanks.

LSB709 Biotechnology Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Knowledge of the practical aspects of developing a project for research and development is a fundamental aspect of real-world biotechnology. This unit involves a small team research project based on the R and D proposal developed in LSB409 Readings in Biotechnology. The unit guides student teams through the research process from the experimentation to the writing of an assessment of the project under the guidance of academic and industry mentors. The research project aims to foster enhancedapplied problem solving skills, literacy and communications skills, and professional responsibility and ethical conduct.

LSB709 Biotechnology Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Knowledge of the practical aspects of developing a project for research and

development is a fundamental aspect of real-world biotechnology. This unit involves a small team research project based on the R and D proposal developed in LSB409 Readings in Biotechnology. The unit guides student teams through the research process from the experimentation to the writing of an assessment of the project under the guidance of academic and industry mentors. The research project aims to foster enhancedapplied problem solving skills, literacy and communications skills, and professional responsibility and ethical conduct.

LSB709 Biotechnology Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Knowledge of the practical aspects of developing a project for research and development is a fundamental aspect of real-world biotechnology. This unit involves a small team research project based on the R and D proposal developed in LSB409 Readings in Biotechnology. The unit guides student teams through the research process from the experimentation to the writing of an assessment of the project under the guidance of academic and industry mentors. The research project aims to foster enhancedapplied problem solving skills, literacy and communications skills, and professional responsibility and ethical conduct.

LSB850 Research Strategies

Co-requisites	LSB851-1, LSB852-1
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The primary aim of this unit is to introduce and develop the intellectual skills necessary to understand and apply the scientific method, to understand the scientific, ethical, social, and commercial implications of research, to assist in evaluating useful and pragmatic options in research, and to communicate research ideas and outcomes effectively.

LSB850 Research Strategies

Co-requisites	LSB851-2, LSB852-2
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The primary aim of this unit is to introduce and develop the intellectual skills necessary to understand and apply the scientific method, to understand the scientific, ethical, social, and commercial implications of research, to assist in evaluating useful and pragmatic options in research, and to communicate research ideas and outcomes effectively.

LSB851 Readings in Life Science 1

Pre-requisites	LSB850-1, LSB851-1 and LSB852-1
Co-requisites	LSB850-2, LSB852-2
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Advances in science require a sound understanding of previously published investigations, and an ability to analyse critically scientific reports and their significance to the area of investigation. Scientific investigations by an individual or a group of researchers from Australian Institutions require funding and research support. Research project proposals are submitted to national competitive funding bodies that include the National Health and Medical Research Council (NHMRC) and the Australian Research Council (ARC). Acquisition of the skills and strategies for critically analysing scientific papers and for writing a competitive research proposal is a prerequisite for a successful scientific career. The aim of this unit is to provide you with the skills and strategies to examine critically the significance of scientific papers and to write a successful grant application.

LSB851 Readings in Life Science 1

Co-requisites	LSB850-1, LSB852-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Advances in science require a sound understanding of previously published investigations, and an ability to analyse critically scientific reports and their significance to the area of investigation. Scientific investigations by an individual or a group of researchers from Australian Institutions require funding and research support. Research project proposals are submitted to national competitive funding bodies that include the National Health and Medical Research Council (NHMRC) and the Australian Research Council (ARC). Acquisition of the skills and strategies for critically analysing scientific papers and for writing a competitive research proposal is a prerequisite for a successful scientific career. The aim of this unit is to provide you with the skills and strategies to examine critically the significance of scientific papers and to write a successful grant application.

LSB852 Project

Co-requisites	LSB850-1, LSB851-1
Credit Points	30
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A career in research will involve your understanding of the methods of independent scientific investigation and analysis, your ability to identify the need for a particular investigation, your skills to frame a testable hypothesis and design appropriate tests to examine it, and communication of your ideas and arguments to others. Thus, this unit builds on the knowledge you have gained in your undergraduate units, with particular emphasis on practical aspects of technique applications, data interpretation, and the presentation of a scientific argument in a coherent and acceptable format. This unit runs over two semesters (full-time) and is the core component of the SC60 BAppSc (Hons) degree, comprising the laboratory research project of the course and its reporting in written and oral formats. The aim of the unit is to provide you with the skills for independent, laboratory based investigation, analysis and reporting.

LSB852 Project

Co-requisites	LSB850-2, LSB851-2
Credit Points	30
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A career in research will involve your understanding of the methods of independent scientific investigation and analysis, your ability to identify the need for a particular investigation, your skills to frame a testable hypothesis and design appropriate tests to examine it, and communication of your ideas and arguments to others. Thus, this unit builds on the knowledge you have gained in your undergraduate units, with particular emphasis on practical aspects of technique applications, data interpretation, and the presentation of a scientific argument in a coherent and acceptable format. This unit runs over two semesters (full-time) and is the core component of the SC60 BAppSc (Hons)

degree, comprising the laboratory research project of the course and its reporting in written and oral formats. The aim of the unit is to provide you with the skills for independent, laboratory based investigation, analysis and reporting.

LSN011 Research Seminars in Life Science 1

Co-requisites	LSN013
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Your transition from undergraduate scholar to reliable and productive researcher requires an ability to present research findings and their critical analysis in an oral form. Oral presentation is a significant skill in academic, industrial and clinical research settings. The primary aim of this unit is to help you communicate your research ideas and outcomes effectively and articulately.

LSN013 Readings in Life Science 3

Co-requisites	LSN011
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Scientific investigations by an individual or a group of individuals from Australian Institutions require in-depth knowledge of the field of research. Literature reviews are undertaken by all researchers prior to commencing, (and throughout), their research projects. This unit will provide postgraduate students with the skills and strategies required for writing a critical literature review that may potentially be submitted for publication in the relevant Journals in the field. The aim of this unit is to provide you with the strategies required for writing a substantial critical literature review.

LSN023 Research Seminars in Life Science 3

Pre-requisites	LSN011 and LSN013
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Your transition from undergraduate scholar to reliable and productive researcher requires an ability to present research findings and their critical analysis in an oral form. Oral presentation is a significant skill in academic, industrial and clinical research settings. The primary aim of this unit is to help you communicate your research ideas and outcomes effectively and articulately.

LSN101 Molecular Biosciences

Co-requisites	LSN102, LSN483
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

For you to be successful in the more advanced units offered in the coursework programs in biotechnology you must have a sound knowledge and understanding in the key areas of molecular biology, cell biology, biochemistry and microbiology and be able to demonstrate your learning in a practical way in the laboratory. This unit, in conjunction with LSN102 Cellular Biosciences and LQB483 Molecular Biology Techniques, will help you to achieve those goals. This unit aims to facilitate your active learning (knowledge, understanding and application) of cell and molecular biology appropriate for a postgraduate degree in biotechnology.

LSN102 Cellular Biosciences

Co-requisites	LSN101, LSN483
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Central to your understanding of the fundamental theory underlying medical and plant biotechnology is an understanding of normal and disease processes, and the events and changes that occur in structure and function at the cellular level. This unit gives you the opportunity to explore these key aspects before proceeding to more advanced concepts in biotechnology. This unit aims to provide high level understanding of cellular processes and responses, as a fundamental basis for further postgraduate studies in cellular and molecular biosciences.

LSN103 Postgraduate Learning and Research Skills

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit assists you in developing of a range of generic and specific skills and attributes to be a successful postgraduate student. On completion of the unit, you will: (i) know how to manage information tools and resources effectively in order to advance your university study and become an independent and competent learner (ii) build and increase your knowledge and competence in using basic software applications and general knowledge of information communication technologies and (iii) develop key skills in project design and management. This unit consists of a series of workshops, seminars and on-line tutorials presented by a team of teaching and learning support staff from across the university.

LSN483 Molecular Biology Techniques

Co-requisites	LSN101, LSN102
Equivalents	LQB483, LSB468
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Fundamental and advanced skills in molecular biology are essential prerequisites for biotechnology. Through close alignment of theoretical concepts and practical skills, this strongly lab-oriented postgraduate unit allows you to develop expertise in modern recombinant DNA techniques and an understanding of strategies used to identify and manipulate genes. Integration between theory and practice in this unit is designed to develop competence, independence and high-order critical thinking skills so as to fully prepare you for the suite of advanced units in the Postgraduate Coursework Biotechnology programs. The overall aim of this unit is to develop concepts and laboratory skills in the characterisation and analysis of nucleic acids and recombinant DNA technologies and to extend these technologies into the understanding and application of the different strategies for gene discovery.

LSN583 Genetic Research Technology

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The tools available for the discovery and manipulation of new genes are increasing exponentially and, in turn, this is having a significant impact in many areas of the life sciences. The true potential for this ultimately relies on the ability to link genes and their function. There are many strategies, both targeted and global, which facilitate an understanding of gene and genome structure function relationships. These strategies rely on integrated technologies based on

molecular genetics, molecular biology and genetic engineering. The identification of function leads then to unlimited potential for detection and manipulation of these genes in human, animal and plant systems.

LSN584 Medical Cell Biology

Pre-requisites	LSN101 and LSN102
Anti-requisites	LSB503, LSB449, LQB584
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit builds and extends the understanding of basic theoretical and practical aspects of molecular cell biology developed in previous cell and molecular biology units. Medical Cell Biology develops and extends the context of the cellular environment and its central role within the organism providing all of the biological functions required by the organism to survive, defend and protect itself from disease and trauma. An understanding of cell biology theory and molecular mechanisms of animal development and disease is essential for introduction to higher level units in medical biotechnology.

LSN585 Plant Genetic Manipulation

Anti-requisites	LSB577
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The potential of plant biotechnology can only be recognised as a result of the significant advances being made in technologies enabling the genetic manipulation of plants. Familiarity with the strategies, techniques and breadth of applications is essential as a basis for anyone planning a career in plant biotechnology. The unit is designed with a significant emphasis on achieving technical expertise in plant genetic manipulation and control of gene expression.

LSN684 Medical Biotechnology 2

Pre-requisites	LSN101 and LSN102
Anti-requisites	LQB684
Equivalents	LSN609
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Students undertaking Medical Biotechnology 2 should have a thorough understanding of diagnostics and therapeutics in the commercial environment of biotechnology. A comprehension of approaches and the applications used as therapeutic interventions in medicine is necessary for this understanding. This unit focuses on current state-of-the-art applications within therapeutic biotechnology as directed to novel drug discovery and drug optimisation and to the development of novel therapeutic strategies, such as gene therapy, transplantation and immunotherapy. It will prepare you for subsequent involvement in medical research and/or employment in medical laboratories. The aim of this unit is to enable you to acquire a thorough understanding of current and emerging strategies for therapeutic interventions in the treatment of disease.

LSN710 Project

Credit Points	48
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

A research project is taken at the end stage of the LS96 course and enables you to develop detailed expertise in one area of research related to biotechnology. It usually enables specialisation in a research field but may also be taken in some clinical speciality area as approriate. This postgraduate unit is specifically designed to develop and refine your generic and high order academic skills and attributes, scientific research hands-on skills, your information retrieval and communication skills. You will be expected to work semi-independently with minimal supervision.

LSN711 Project 1

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This postgraduate unit is usually taken at the end stage of the LS96 Master of Biotechnology (Advanced) degree or as part of the SC71 Graduate Diploma of Applied Science degree and may be done in conjunction with LSN712 Project 2. LSN711 involves the writing of a critical literature review on a specific topic to identify knowledge gaps which are usually explored experimentally in LSN712 to follow. The overall aims of this postgraduate unit is for you to develop and refine skills in the collection and analysis of information and data on a specific topic in your area of research interest and to enable you to compile and write a comprehensive and critical literature review.

LSN712 Project 2

Pre-requisites	LSN711 (can be enrolled in the same teaching period)
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This postgraduate unit is usually taken at the end stage of the LS96 Master of Biotechnology (Advanced) degree or as part of the SC71 Graduate Diploma of Applied Science degree and is undertaken in conjunction with LSN711 Project 1 as a prerequisite or corequisite. LSN712 involves experimental exploration of knowledge gaps identified in a critical review of the literature (LSN711). The overall aims of this postgraduate unit are to: (i) develop and refine your experimental skills in a research laboratory and (ii) enable you to compile and write a research report derived from the data collected and critically analysed.

LSP127 Business Aspects of Biotechnology

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Supporting a successful biotechnology industry in Australia requires an entrepreneurial framework to be developed which assists the efforts of both researchers and innovators. This unit integrates those essential entrepreneurial techniques of launching a biotechnology business. The unit focus is on the research and development of industrial products and commercialising innovations developed in this industry. On completion of this unit the student will be able to identify and analyse entrepreneurial opportunities and evaluate these opportunities within biotechnology together with the ability to identify and comprehend the steps involved in setting up a new biotechnology enterprise.

LWB136 Contracts A

Credit Points	12
Campus	Gardens Point and External

Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This unit includes the following: formation of contracts; equitable estoppel; privity of contract; formalities; express and implied terms; an examination of promises which are legally binding; how contractual promises may be characterised and the significance of that characterisation.

LWB137 Contracts B

Pre-requisites	LWB136
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

Legally binding promises pervade society, from uncomplicated bargains like riding on a bus to complex multi-million dollar transactions. The law of contract provides an understanding of promises which are legally binding, how contractual promises may be characterised and the significance of that characterisation, and how contractual promises may be discharged or invalidated. This is the second of two associated units which examine the law of contract, the focus of this unit being on the discharge of contracts, remedies for breach and the invalidation of contracts. The two units together provide the foundation for several units encountered later in the course.

LWB142 Law, Society and Justice

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit examines the basic tenets of our democratic liberal legal system, particularly the central concept, the rule of law. The unit begins with an historical development of rights and the rule of law. It looks at how law and values intertwine and how society at a particular time shapes notions of legal personality, the recognition of 'family' and human rights in law. It finally addresses the limitations of democratic liberalism and the rule of law by examining the reality of equality before the law in relation to such topics as gender and cultural neutrality, equal access to justice, and lawyers and the adversarial system.

LWB144 Laws and Global Perspectives

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit is designed to give students an understanding of the global context in which Australia operates and the important impact of this context on Australian law and legal practice. The unit introduces and explains the fundamental structures and principles of Comparative Law, Public International Law and Private International Law; and examines their relevance to contemporary legal practice in Australia.

LWB145 Legal Foundations A

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

The unit aims to provide foundational knowledge about law and legal concepts, the Australian legal system and constitution, sources of law (including their purpose and use) and the ethical underpinnings of the law and legal profession. The unit also aims to introduce, within real world contexts, the essential legal skills of case analysis, problem solving, legal writing, legal reasoning, legal research and statutory interpretation to enable students to progress in their study of law.

LWB146 Legal Foundations B

Pre-requisites	LWB141 or LWB145
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

The aim of this unit is for you to further develop, within real world contexts, the skills in legal research, analysis, problem solving and writing that were introduced in LWB145 Legal Foundations A. This aim is directed towards ensuring that by the end of the first year of your law degree you are able to perform tasks required to progress your study of law and that you can reflect on the continued development of your legal research and writing skills to equip you with the skills required in legal practice.

LWB147 Torts A

Pre-requisites	LWB145 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

The aims of this unit are for you to develop an understanding of the law of torts relating to trespass, negligence and workers' compensation and the underlying principles and policies that influence the development of torts law. Further, this unit aims to demonstrate how the law of torts works in a real world context, with particular focus on legal problem solving and the teaching of legal interviewing skills. The unit will practise and develop the foundational legal skills introduced in LWB145 Legal Foundations A.

LWB148 Torts B

Pre-requisites	LWB138 or LWB147 or LWB146 where LWB146 can be enrolled in the same study period
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit aims to build upon the knowledge, understanding and skills developed in Torts A through a more in-depth examination of a wider range of torts and related issues. It also aims to equip you with a more detailed and sophisticated knowledge and understanding of how this area of the law is likely to develop in the 21st Century. Integral to this is the development of your skills, necessary for the practice of law and your further studies of law, in legal problem solving, research and written communication and an understanding of ethical issues related to the practice of law.

LWB149 Indigenous Legal Issues

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Indigenous Australians have a unique position in Australian society as the traditional owners and custodians of the Australian continent and its offshore islands. The colonisation of Australia and the introduction of Anglo-Australian law have had a profound impact on Indigenous Australians and in many ways have contributed to the current level of social and economic disadvantage in Indigenous communities. This unit aims to provide you with an understanding of how government law and policy has had an especially adverse effect on Australian Indigenous peoples. It explores the potential for greater recognition of Indigenous rights, including the right to self determination, in the Australian

context. The unit is of relevance if you are intending to work in legal practice, public sector policy or community organisations.

LWB150 Lawyering and Dispute Resolution

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

Law students, and first year law students in particular, need an introduction to the context of legal professional practice to inform their study of the law. It is critical for the effective learning of law that students start to 'think like a lawyer', and understand the important and positive role that lawyers play in society. This role includes upholding the rule of law and assisting people to resolve disputes. In this unit students are introduced to a range of aspects of legal practice, with a focus on non-adversarial approaches to practice and to legal advocacy. Students are also introduced to key foundational lawyering skills centred on effective legal practice. In this way students are encouraged to develop an emergent sense of a positive professional legal identity.

LWB238 Fundamentals of Criminal Law

Pre-requisites	LWB145 or LWB141. LWB145 can be studied in the same teaching period as LWB238
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

An understanding of the principles of Criminal Law is of fundamental importance as it impinges upon almost every aspect of domestic, commercial, corporate and public activity in Queensland. The aim of this unit is to provide an overview of the aims and sources of Criminal Law in Queensland and to develop an understanding of the onus of proof in criminal matters. Additionally the unit explores the concept of fault elements, the criminal justice system and a selection of major offences while also developing advocacy skills.

LWB239 Criminal Responsibility

Pre-requisites	LWB238
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT); 2012 SUM-2 (INT)

The aim of this unit is to build upon the principles and skills explored in LWB238 by developing an understanding of the way criminal responsibility is imposed through the complicity provisions of the Criminal Code and the common law and how the major defences and excuses operate. The unit also examines the major sentencing principles applied in Queensland.

LWB240 Principles of Equity

Pre-requisites	LWB136
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SUM (BLK)

The principles of Equity were originally developed to ameliorate the harshness of the common law and have since become a fundamental component of our legal system. A knowledge and understanding of the major principles of equity are necessary to an understanding of how the Australian legal system operates; it is therefore located early in the LLB degree. The aim of this unit is to provide a coherent knowledge and understanding of equitable principles within the context of the Australian legal system as well as developing skills relevant to ongoing learning and professional practice.

LWB241 Trusts

Pre-requisites	LWB240
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

Trusts are a fundamental institution of ownership of property in equity; they are used for various purposes including estate planning, commercial and charitable purposes. A knowledge and understanding of the trust in its various forms and the equitable principles of property transfer are fundamental in understanding the impact of the principles of equity in the area of property ownership and rights. The aim of this unit is to provide a coherent knowledge and understanding of the law relating to trusts within the context of the Australian legal system and to develop skills relevant to ongoing learning and professional practice.

LWB242 Constitutional Law

Pre-requisites	LWB146 or LWB143
Anti-requisites	LWB235, LWB231
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

The aim of the unit is to provide knowledge and understanding of the constitutional arrangements effected by the Commonwealth Constitution and the State Constitutions, including the structure and institutions of the Constitutions, the division of power between Commonwealth and States, and relations between the different levels of government.

LWB243 Property Law A

Pre-requisites	LWB137 and (LWB148 or LWB139)
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SUM (BLK)

The aim of the unit is to provide you with an understanding of the legal principles relating to real and personal property and how these rules operate in a modern legal system. The unit also aims to develop the skills, necessary for the practice of law and your further studies of law, in legal problem solving and reasoning and oral and written communication.

LWB244 Property Law B

Pre-requisites	LWB243 and LWB146 and LWB241. LWB241 can be enrolled in the same teaching period as LWB244
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit aims to build upon the knowledge, understanding and skills that you acquired in LWB243 Property Law A by further developing your understanding of property law relating to leases, mortgages, co-ownership, community title, easements, profits a prendre and freehold and statutory covenants. It also aims to equip you with an understanding of how this area of the law is likely to develop in the 21st Century. Integral to this is the development of your skills of problem solving, research, writing and drafting which are necessary for the practice of law and your further studies of law, in legal problem solving, research, written communication and drafting.

LWB260 Sports Law

Pre-requisites	LWB137 and LWB148
Equivalents	LWB460
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

Sport is an area that is becoming increasingly business orientated and litigious. It you plan to work as a manager, administrator or lawyer in the area of sports you will, in the course of your day to day activities, encounter a wide variety of situations that could have potential legal consequences. As a result, a sound knowledge of the key areas of the law relevant in this area, such as torts, contract, sporting tribunals, discrimination and licensing, and how to apply them to real world problems is essential. This unit rplaces LWB460 Sports Law.

LWB302 Family Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT); 2012 SUM-2 (INT)

This unit considers the manner in which the law treats the special social relationships that exist among members of a family and transforms them into legal rights and duties. The following aspects are addressed: the family as a legal phenomenon; methods of dispute resolution in family law; annulment of marriages; dissolution of marriages; consequences of separation and divorce, such as maintenance, child support, adjustment of interests in property and parental responsibilities.

LWB307 Insolvency Law

Pre-requisites	LWB334
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit examines the following: the insolvency of individuals and the Bankruptcy Act 1966 (Cwlth); winding up of companies; reconstructions and arrangements and voluntary administration as procedures other than winding up which may be open to an insolvent company; the law relating to receivership; relevant provisions of the Corporations Law.

LWB309 Succession

Pre-requisites	LWB240, LWB241
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit includes the following: examination of the law with respect to wills and probate; a study of the formalities required to execute a valid will; the intestacy provisions where someone dies without having made a will; the rights of a testator's family when they have not been named as a beneficiary in the deceased's will; a detailed examination of the provisions of the Succession Act 1981 (Qld).

LWB312 Real Estate Transactions

Pre-requisites	LWB137, LWB240 and LWB244
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit includes an analysis of a land transaction through the principles involved in the construction of contracts for the sale of land, with special emphasis on the standard REIQ Contract Terms of Sale in use in Queensland. There is also reference to conveyancing of lots under the Body Corporate and Community Title Management Act 1997 and Land Sales Act 1984.

LWB313 Discrimination & Equal Opportunity Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SUM (BLK)

This unit includes the following: an examination of the law and policy with respect to discrimination and equal opportunity in Australia; relevant international treaties and Australian legislation such as the Queensland Anti-Discrimination Act; the Anti-Discrimination Commission and procedures.

LWB333 Theories of Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

Legal practice requires an understanding and appreciation of its philosophical and theoretical foundations, as these guide the policies and inform changes to law through legislative and judicial action. Understanding the major theoretical and philosophical approaches assists with the resolution of novel and difficult legal problems. This unit imparts both knowledge based content and process based competencies that result in independent learning outcomes. Topics covered include natural law, positivism, Dworkin, social, economic and historical theories of law, legal realism, sociological theories of law, critical legal studies, postmodern legal thought, feminist theories of law, critical race theory, postcolonial legal theory.

LWB334 Corporate Law

Pre-requisites	(LWB143 or LWB146) and (LWB237 or LWB243)
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT); 2012 SUM (BLK)

This unit includes the following: the basic legal principles relating to registered companies; the principle of the veil of incorporation; internal functioning of a registered company including the operation of the constitution and replaceable rules; dealings with third parties; legal rules relating to share capital; dividends and loan capital; introduction to obligations of company officers and shareholder rights. Further specialised units such as Law of Corporate Governance are offered for students who have completed Corporate Law and wish to concentrate some of their studies in the corporations and commercial area.

LWB335 Administrative Law

Pre-requisites	LWB242 or LWB231
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SUM-2 (INT)

To enable you to develop a working knowledge of administrative law at both the state and federal level as well as a broader understanding of the role and function of this area of law in balancing administrative efficiency and legitimate government interests against the requirements of accountability in executive decision-making.

LWB356 Advocacy

Pre-requisites	LWB432
Credit Points	12

Campus	Gardens Point

Advocacy is the art of persuasion in Court and before Tribunals. This unit concentrates on developing the fundamental skills of a good advocate, namely analysis, preparation and performance. Students are required to participate in oral advocacy exercises and mock trials. Regular attendance is necessary for successful completion of this unit.

LWB359 Advanced Taxation Law

Pre-requisites	LWB364
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit examines the taxation of business entities. The taxation processes for partnerships, trusts and companies are analysed together with the implications for the taxation of individuals involved with business entities. These individuals include partners, beneficiaries, trustees and company shareholders. This unit builds on the principles developed in Introduction to Taxation law in relation to taxation of individuals in that the concepts of income, deductions, residence and so on are discussed in the context of business entities. Tax planning issues involving entities are critically analysed and reflected on together with the effect of the general anti-avoidance provisions in the taxation legislation.

LWB361 Drafting

Pre-requisites	LWB241, LWB244 and (LWB237 or LWB243)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This skills unit uses an interactive practical approach in teaching students the rules in drafting private legal documents in plain English. The general rules are considered first and then applied in drafting documents and parts of documents from the areas of conveyancing contracts (residential and commercial land, and businesses), options, leases, mortgages, guarantees and trusts. Stamp duty is also dealt with because of the close relationship stamp duty has with documents of various kinds.

LWB363 Insurance Law

Pre-requisites	LWB137
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Insurance is the payment of a premium by one to another to cover the risk that an unidentified event should occur, upon which a payment in the insured sum shall be made. This course prepares students to advise insureds and insurers alike on issues such as whether a policy covers the event which has occurred and whether there are grounds upon which all or part of a claim may be refused. In addition to principles of general insurance, the course also covers selected aspects of professional indemnity insurance, directors and officers insurance and a detailed study of the statutory framework in Queensland for compulsory third party motor vehicle insurance and workers compensation. Any one interested in litigation should study insurance law.

LWB364 Introduction to Taxation Law

Anti-requisites	AYB219
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit examines the principles relating to the powers of the Australian government to impose income tax. This includes concepts of residence of individual tax payers for taxation purposes and source of income. Students consider the distinction between income and capital as this relates to the imposition of income tax and the concept of deductions as a means of reducing taxable income. Taxation of capital gains particularly as this relates to a taxpayer's main residence, deceased estates and general transfers of assets is discussed in detail. The other major topic is a critical analysis of the need for the general anti-tax avoidance provisions and how they apply.

LWB366 Law of Commercial Entities

Pre-requisites	(LWB143 or LWB146) and (LWB237 or LWB244) and LWB240 and LWB241
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit examines the legal principles pertaining to a number of different structures found in commercial life. It includes a brief consideration of corporations, more detailed examination of partnerships, unit trusts, joint ventures and incorporated associations. Consideration is given to the definition of these structures, relationship with third parties, relationship of members inter se. This unit can be completed before or in conjunction with Corporate Law (LWB334).

LWB406 Fundamentals of Public International Law

Pre-requisites	LWB144
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit considers the legal rules that govern the activities of nations and the regulation of the activities of nations by international organisations, such as the UN. It also includes: the creation of international law and its sources; treaties; customary law; general principles of law; the concept of international legal personality; statehood; self-determination; recognition; the effects of international law; sovereignty; international responsibility. It also includes the law of armed conflict.

LWB407 Private International Law

Pre-requisites	(LWB242 or LWB231) and (LWB237 or LWB244)
Credit Points	12
Campus	Gardens Point and External

This unit includes the body of law governing the resolution of private legal problems with a significant foreign (or inter-state) element. Topics studied include: jurisdiction of domestic courts to determine matters having a foreign element; enforcement of foreign judgments in the domestic jurisdiction; choice of law for the resolution of the dispute, both generally and in relation to family law, contract, tort, property and succession. This unit assumes a basic knowledge of these areas of substantive law and therefore is best taken as a final year unit.

LWB413 Queensland Parliamentary Internship Program

Pre-requisites	192 Credit Value in spk(s): LWB%
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides an opportunity for students to learn about the workings of the Queensland Parliament and to undertake a piece of research of interest and use to a member or senior officer of Parliament. Places are limited and preference will be given to students with a good academic record. This unit may be undertaken in semester 2, and intending students should contact the Unit Coordinator in May of each year. Places are generally available only to students in their final year of study who have achieved a grade point average of at least 5.2 or have demonstrated other evidence of capacity for research and report writing.

LWB418 Competition Moots 1

Pre-requisites	LWB137 and LWB238 and (LWB139 or LSB148) and (LSB231 or LWB242)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

If students have completed the core units in first and second year, enjoy working under pressure and have participated in at least one moot as counsel, they may apply when applications are called for. Places are very limited, but if students are successful, they can take their skills to the national and international arena, and experience mooting at the highest level. International and national moots require significant preparation and attention to detail, with a very high level of commitment, research, writing and discipline knowledge. Because of the timetabling of international moots throughout the year, students may be required to work on the competition moot from November to February. The number of moots offered will vary from year to year.

LWB419 Competition Moots 2

Pre-requisites	LWB418
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit allows a student to build on the skills they have learnt in LWB418 Competition Mooting 1, to give them a higher level of understanding of oral and written argument and persuasive speaking, and an ability to apply these skills in an international competitive context.

LWB420 Internship

Pre-requisites	192 Credit Value in spk(s): LWB%
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit, ideally to be undertaken in the later years of the LLB course, is to provide an opportunity for students to work in a functioning workplace environment with a broad public law focus and to enable students to engage in practical tasks, that require demonstration of legal analysis critical reflection and appropriate communication skills.

LWB421 Learning in Professional Practice

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT); 2012 SUM (EXT)

This unit provides students with the experience of working in a legal professional placement in the private sector. The student will reflect upon and learn from this experience through keeping a reflective journal, sharing their experiences with other students and use of the student ePortfolio. Integral to the student's experience will be the identification and consideration of the theory/practice nexus.

LWB422 Virtual Law Placement

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The aim of the VLP unit is to provide you with a real world learning experience through your application for, and supervised placement in one of a diverse range of legal workplace environments. Through this experience you should achieve a greater knowledge and understanding of the dynamic relationship between academic knowledge and its practical application to the legal issues that arise in a workplace; as well as the opportunity to identify and practise the graduate capabilities relevant to the workplace environment in which your virtual placement is located.

LWB423 Intellectual Property and Technology Law Clinic

Credit Points	12
Campus	Gardens Point

This unit aims to provide you with an open and practical environment in which you can gain real world experience, skills and knowledge working directly on the provision of free legal services to the community, in matters of intellectual property and technology law.

LWB431 Civil Procedure

Pre-requisites	192 Credit Value in spk(s): LWB%
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SUM (EXT)

This core unit focuses on developing basic litigation skills. The following issues are examined: the adversarial system and alternative methods of dispute resolution, obligations to the client, the structures and processes of litigation conducted in the Supreme, District and Magistrates Courts, jurisdiction, originating process, notice of intention to defend, parties, service, ending proceedings early, pleading, disclosure, subpoenas, trial, appeals, costs and enforcement.

LWB432 Evidence

Pre-requisites	LWB238
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SUM (BLK)

The law of Evidence concerns those rules and principles which govern the presentation and proof of facts and information in court proceedings, both civil and criminal. The unit covers both State and Federal jurisdictions. NB: External only in Semester Two.

LWB433 Professional Responsibility

Pre-requisites	Completion of 192 cp of Law units (LWB%)
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT), 2012 SUM (BLK); 2012 SUM-2 (INT)

This unit includes the following: the ethical principles upon which the practice of all professions is based; the principles which underpin the discipline of law and the workings of the legal profession; the history, nature, organisation and

operation of the legal profession; codes of conduct, trust accounts and professional legal ethics.

LWB435 Legal Research in Practice

Pre-requisites	192 Credit Value in spk(s): LWB%
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The aim of this unit is assist you to develop the advanced legal skills necessary to solve and communicate options for the resolution of complex legal problems (issue identification, legal research, critical analysis and effective writing), in a professional context. The unit also aims to advance your ability to acquire new knowledge independently. The focus of the unit is on teaching doctrinal legal research skills.

LWB456 Legal Clinic (Organised Program)

Pre-requisites	192cp of previous study in Law units (LW%)
Credit Points	12
Campus	Gardens Point

In this unit students are provided with the opportunity to see law in action through being involved in the delivery of legal services to members of the community under the umbrella of Legal Aid Queensland, the Prisoners Legal Service Inc or the Aboriginal and Torres Strait Islander Corporation (QEA) for Legal Services. Students work in their placement is supplemented with a weekly seminar program that deals with such topics as legal interviewing, family and criminal law practice, professionalism and legal writing.

LWB459 Commercial and Consumer Law

Pre-requisites	LWB243
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

Commercial Law concerns rights in relation to personal property, in particular goods, in the context of commercial transactions. Consumer Law focuses on the rights afforded by the law to the consumer in commercial and financial transactions. This unit builds on the knowledge of the laws of personal property gained in Property Law A. The concepts of personal property law underpin sale of good transactions. It is important to have a sound understanding of these concepts to be able to apply the relevant statutory provisions. The principles of agency law will be examined at an advanced level given the relevance of agency to commercial transactions.

LWB460 Sports Law

Credit Points	12
Campus	Gardens Point and External

Sport is an area that is becoming increasingly business orientated and litigious. It you plan to work as a manager, administrator or lawyer in the area of sports you will, in the course of your day to day activities, encounter a wide variety of situations that could have potential legal consequences. As a result, a sound knowledge of the key areas of the law relevant in this area, such as torts, contract, sporting tribunals, discrimination and licensing, and how to apply them to real world problems is essential. This unit is an elective in the law degree in the human rights elective interest group.

LWB463 Immigration and Refugee Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

Immigration and refugee law is currently a key area of law and policy in Australian society. If working in this area of the law it is important that you have an understanding of some of the underpinning theories and of how historical, political and socio-economic factors can impact on this area of the law. It is also important to have a working knowledge of the legislation and case law, including key administrative and constitutional law principles, and how to apply them to real world scenarios. This unit is an elective in the law degree and forms part of the human rights elective group.

LWB480 Media Law

Pre-requisites	LWB147 or LWB138
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit examines the regulation and non-regulation of freedom of speech exercised by the media. In this regard various limitations imposed by the common law, statute and self-regulation will be examined, such as defamation, restrictions on reporting courts and politics, contempt, privacy and confidentiality.

LWB482 Internet Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit addresses the idea that it is vital for any participant in the digital age to gain a thorough knowledge of the structure, governance and regulation of the Internet, digital intellectual property, and risk management strategies for stakeholders.

LWB483 Medico-Legal Issues

Pre-requisites	(LWB147 or LWB138) and LWB239
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit considers the regulation of health care as well as the relationship between the individual and the health care provider in terms of consent to treatment; negligence; the impact of the criminal law; abortion; removal from life support systems; mental illness; medical records and evidence; ownership and confidentiality of records; the duty to treat; complaints against hospitals and health care workers.

LWB485 Environmental Law

Pre-requisites	192cp of previous study in Law units (LW%)
Credit Points	12
Campus	Gardens Point and External

This unit provides an introduction to environmental law in Queensland: the sources, nature and development of environmental law in Queensland; the concepts of environmental law (for example property, administrative control, law and policy, planning, management); access to the environment; planning to prevent environment degradation and pollution; protecting the environment; managing the environment; conservation; ecologically sustainable development; enforcement of environmental law; the role of the Commonwealth.

LWB486 Intellectual Property Law

Pre-	(LWB237 or LWB244) and

requisites	LWB240
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SUM-2 (INT)

There have been significant developments in the field of intellectual property law in recent years and the area is undoubtedly one perceived by the practising profession as growing in importance. This unit will provide a foundation to those areas of intellectual property law that legal practitioners may encounter in their everyday practice. In so doing, it will provide an examination of each of the intellectual property regimes. The course will also consider some of the broader more general policy matters as they relate to the field of intellectual property law.

LWB494 Principles of Sentencing

Pre-requisites	LWB239
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit seeks to examine in detail the principles underlying the sentencing of offenders, by examining the theories of punishment and how they are employed in practice under the Penalties and Sentences Act 1992 (Qld). It also considers the principles of sentencing offenders, sentencing dispositions, and sentencing different classes of offenders, eg juveniles, dangerous offenders.

LWB496 Australian and Comparative Human Rights Law

Pre-requisites	LWB239 and (LWB231 or LWB242)
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The law of human rights is being incrementally developed by the courts & may, in the next few years, by further promoted by statue law if other jurisdictions enact Acts like the ACT Human Rights Act 2004. There will be an increasing demand for lawyers who have detailed knowledge of this law. This unit will explore the notion of what human rights are (except for anti-discrimination rights which are covered in other units), and will then explore the current protection given to human rights by the common law, by techniques of statutory interpretation, by express consitutional provisions, by constitutional implications and by reliance on international Conventions. We will then critically consider th different models for rights protection adopted in other natio

LWB497 Advanced Research Project

Pre-requisites	192cp of Law discipline units (LWS% units)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

The aim of the unit is to provide students with the opportunity to develop and apply the skills of research and writing, analysis and reasoning, by undertaking a specific, supervised project of research under the supervision of a senior academic, on a topic agreed between the student and supervisor which is suitable for achieving the objectives of the unit.

LWB498 Dispute Resolution and Non-adversarial Practice

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SUM (BLK)

Dispute resolution processes such as mediation and conciliation are now utilised in many areas of comtemporary Australian society to resolve both legal and non-legal disputes. These processes are used both within the court system and outside it in legal, government, banking, workplace, community, complaints management, health and educational settings. In addition, in recent years, we have witnessed the increasing use by judicial officers of less adversarial approaches to justice within the court system with the aim of providing a more beneficial and effective outcome for clients. It is important that you as a future lawyer or legal professional have a knowledge and understanding of these processes along with a critical perspective of the adversarial system.

LWB499 Creative Commons Clinic

Pre-requisites	LWB237 or LWB244
Credit Points	12
Campus	Gardens Point

Creative Commons is a world wide project that aims to build a distributed information commons by encouraging copyright owners to licence use of their material thruogh open content licensing protocols and thereby promote better identification, negotiation and reutilization of content for the purposes of creativity and innovation. QUT is the lead agent for the Australian Creative CommonsProject. This unit aims to provide you with a cross disciplinary environment in which yu can gain real world experience, skills and knowledge working directly on the further implementation of the Creative Commons Project in Australia and accross the world. This unit is being run in conjunction with the ARC Centre of Excellence for Creative Industries adn Innovation (CCI) and is designed to generate and disseminate knowledge on the Creative Commons project, in line with the CCI's key outcomes.

LWN025 Research Project 1A

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

In this unit, students undertake a supervised research project of about 10,000 words over one semester approved by the Teaching, Learning and Curriculum Committee. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course and how to apply to undertake this unit.

LWN026 Research Project 2A

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

In this unit, students undertake a supervised research project of about 20,000 words over two (2) semesters approved by the Teaching, Learning and Curriculum Committee. This unit code is the first component. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course and how to apply to undertake this unit.

LWN026 Research Project 2A

Credit Points	24
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

In this unit, students undertake a supervised research project of about 20,000 words over one semester approved by a working party of the Law

Faculty Teaching, Learning and Curriculum Committee. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course and how to apply to undertake this unit.

LWN026 Research Project 2A

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

In this unit, students undertake a supervised research project of about 20,000 words over two (2) semesters approved by the Teaching, Learning and Curriculum Committee. This unit code is the final component. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course and how to apply to undertake this unit.

LWN030 Mediation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP1 (BLK); 2012 5TP5 (BLK)

The ADR movement has developed at a rapid pace in Australia and internationally with mediation being incorporated into the practices of most courts and tribunals as well as at the private level. This unit examines the theory and skills of mediation. The aim of this unit is to provide a coherent knowledge and understanding of mediation theory as well as developing mediation skills relevant to ongoing learning and professional practice.

LWN046 Advanced Planning Law

Credit Points	12
Campus	Gardens Point

To practice effectively in the growing area of Environmental and Town Planning Law it is essential that practitioners have a detailed knowledge of the principals of town planning, relevant statutory instruments and the practice and procedure of the Planning and Environment Court. It is advisable for those practising in this area to be aware of the legislative changes that have taken place in the recent past and what is proposed for the future. It is an area where the State Government has and will continue to make considerable changes.

LWN048 Advanced Legal Research

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP2 (BLK); 2012 SEM-2 (BLK)

Legal Research at an advanced level is a fundamental part of postgraduate legal study both for coursework and more particularly thesis and dissertation purposes. Exposure to a structured course on the nature, aims and techniques of legal and other research is essential to a proper foundation in postgraduate research skills at an advanced level. Advanced Legal Research is also highly recommended for those students who have completed their undergraduate degree in a jurisdiction other than Australia.

LWN050 Restrictive Trade Practices Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

All countries that rely on markets and competition to allocate resources and satisfy the needs of consumers have a set of rules designed to deal with problems of market failure caused by one or more firms possessing market power. Such firms are able to undermine the competitive process by engaging in anti-competitive behaviour. This unit considers this Law.

LWN051 Consumer Protection and Product Liability

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit is divided into two main parts. The first part considers the statutory and common law actions that are available to protect consumers from misleading or deceptive conduct and unfair marketing practices. Emphasis is given to the role played by the Trade Practices Act in relation to conveyancing and land transactions, financial services and advertising. Unconscionable conduct is also considered. The second part of the unit is concerned with statutory and common law actions available when loss or damage is suffered as a result of defective products. Remedies and defences are considered throughout the course.

LWN053 Research Project 1B

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

See LWN025.

LWN056 Research Project 1C

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

See LWN025.

LWN057 Research Project 1D

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

See LWN025.

LWN058 Research Project 2B

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

See LWN026-1.

LWN058 Research Project 2B

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

See LWN026-2.

LWN060 Environmental Legal System

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK)

Environmental law and its related unit Natural Resources Law have become significant areas of professional legal practice over the last decade or so. A number of firms of solicitors have set up units in their practices specialising in these areas. At the same time, these branches of the law have emerged as significant areas for research and publication. Most law schools have undergraduate courses in environmental law and several have introduced postgraduate courses in these areas. There is a growing demand for courses in these areas at postgraduate level on the part of those wishing to study the subject for the first time and also on the part of those seeking to expand their existing

knowledge and understanding of these areas. This unit complements the unit in Natural Resources Law. Together these two courses create the framework within which further study is possible either by way of further units or more focused research papers.

LWN065 Construction and Engineering Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Preparation of construction and engineering contracts has now become a distinct area of legal practice with many firms having established sections which specialise in this area. A sound knowledge of the standard forms used in the industries and the special principles of law applicable to this area is essential for those wishing to practise in the area. This unit provides the knowledge sought by current and future practitioners and those considering embarking upon research in this area.

LWN075 International Commercial Transactions

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (BLK)

This unit on international trade law addresses the legal problems that arise in the formation and operation of commercial transactions of an international nature. Its scope is largely confined to the sphere of private law. Topics covered include: the international trade law and environment; harmonisation and unification of law; international contracts (characteristics, comparative law, negotiating and drafting, choice of law); international sale of goods (trade terms, standard conditions, uniform law); carriage of goods by sea; payment in a documentary sale, and other financing mechanisms; marketing arrangements (agency, distributorship, subsidiary, joint venture).

LWN083 Estate Planning

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

In recent years there has been a renewed interest in all aspects of estate planning. During the period when death duties were imposed at both the State and Federal levels, professional interest in this area was high as the public perceived its need for expert professional advice, particularly as it related to the structuring of a person's affairs to minimise the impost of these duties. The emergence of capital gains tax and the realisation of its growing significance, together with a recent emphasis generally on financial planning has again brought this area to prominence. At a time when the legal profession is looking for new areas at work, there is also evidence that lawyers see this area as one which has been largely neglected. This unit seeks to conceptualise a framework in which the issues which arise in estate planning can usefully be considered.

LWN094 Energy Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

Natural resources law and its related subject, environmental law, have become significant areas of professional legal practice over the last decade or so. One of the particular areas of natural resources law for these purposes is energy law. Energy law is the law relating to the ownership, use, development and control of those natural resources which are used to produce energy for the benefit of the community. Areas covered in this unit include: the sources and history of energy law; the principles and concepts underlying energy law; the common law rules of ownership of sources of energy; statutory ownership of sources of energy; how the law regulates access to sources of energy; how the law controls the development of sources of energy.

LWN099 Intellectual Property Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit includes a study of the concept of Intellectual Property and the principles and policies of intellectual property law. Topics covered include copyright, designs, patents, innovation patents, trade marks, passing off, and breach of confidence.

LWN111 Public Law and Government Commercial Activity

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (BLK)

This unit examines the reach of public law remedies in the field of commercial activities in which government agencies are involved. Areas covered include corporatisation, out sourcing and privatisation.

LWN117 Cyber Law and Policy

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit examines legal issues relating to the Internet. The unit will consider the application of existing legal principles to "cyberspace" as well as newly developed Internet Law or Cyberlaw principles. Knowledge of Internet Law is of increasing importance in many areas of legal practice, industry and to society more generally. This is a new area of activity and it is important to educate lawyers and other professionals on the unique issues that have arisen and will emerge in this area, in particular the difficulty in regulating the distributed international network of computers known as the "internet".

LWN119 Employment Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT)

Employment law is a foundation unit that allows students to survey at an advanced level the sources, components and relationships of employment law in Australia. Successful completion of this unit provides students with the necessary background to continue on to undertake further advanced courses in more specialised areas of labour law, including public sector employment law and the law of trade unions.

LWN122 Commercial Leases

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP5 (BLK)

With the exponential rise in the numbers of commercial premises such as office blocks, shopping centres and industrial

factories in the past decade or so, the study of commercial leases for the legal practitioners has assumed a great importance. Statute law in the form of the Trade Practices Act 1974 and the Retail Shop Leases Act 1994 have also impacted siginficantly upon commercial leasing practices. Whilst there is no one form of standard commercial lease, certain generic clauses have emerged and there now exists a substantial body of law in Australia relating to the theory underlying and practice of the law of commercial leases. This unit endeavours to explain the theoretical basis for the use of certain basic covenants at the same time taking full account of the practical operation of commercial leases in Australia.

LWN125 Electronic Commerce Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP3 (BLK)

It is vital for any participant in the digital age to gain a thorough knowledge of how the information economy is regulated for the benefit of individuals, corporations and the State, nationally and internationally. In order to be able to participate as a lawyer or other professional in this new environment it is important to have an understanding of the laws relating to privacy, e-security, consumer regulation, electronic payment and taxation systems, electronic contracts, and Public Key Infrastructure.

LWN127 Advanced Insurance Law 1

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT)

Insurance is of vital importance to business, industry and to all individuals in the community. The insurance industry's vital role is evident from the significant place that insurance law has achieved on the legislative programs of governments in Australia and abroad. Accordingly an understanding of the law and practice of insurance law is essential for a wide variety of social, economic, commercial and personal purposes.

LWN131 Queensland State Lands: Law and Practice

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 5TP3 (BLK)

As the unit examines a unique system of land tenures and dealings which is not studied in any great depth at undergraduate level, the focus of the unit is on: the current legislative scheme and current policies relating to non-freehold land in Queensland; contemporary issues within the context of the prevailing legislative and policy frameworks; and the development of generic skills including research skills and critical evaluation skills that may be applied in other areas of study.

LWN139 Privacy Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit covers an introduction to the concept of privacy: including both the historical development of privacy rights and the operation and implication of state and federal legislation and international obligations; detailed consideration of the Commonwealth private sector regime; consideration of the impact of privacy law on specific fields of practice such as health, employment, not-for-profit and banking/finance/insurance; issues relating to the Internet; compliance and code development; international regimes.

LWN146 International and Comparative Intellectual Property Law

Credit Points	12
Campus	Gardens Point

The unit provides you with an introduction to international intellectual property and policy issues and their connection with the European Union (EU) efforts to create an internal market with a level playing field for the protection of intellectual property. The unit also considers diverging perspectives on topics ranging from the protection of traditional knowledge and folklore to high technology.

LWN150 Death, Decisions and the Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP5 (BLK)

As people near the end of their lives, their medical treatment and other care raises complex medical, legal and ethical decisions. Choices about whether particular treatment should be provided or refused may have to be made, and this is complicated by the fact that many people may not have the competence at this stage in their life to be able to make these decisions. Although a competent adult may refuse treatment, another choice demanded by some is the right to end their own life and to be assisted by others to achieve this. This unit examines the legal aspects of these choices.

LWN159 Electronic Litigation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK)

With the proliferation of electronic files being created and distributed by corporations around the globe today, it is no surprise that the discovery process during a document-heavy litigation is becoming more and more onerous. Tools to effectively manage this electronic information are used by many of the larger law firms and will soon be part of every legal practice, in much the same way as the word processor is a necessity in any new millennium practice. Moreover, courts are now taking the initiative to encourage the use of information technology in civil litigation. Knowledge of the issues that surround electronic documents and the use of information technology to better manage discovery and trial processes is imperative, and such issues are examined in this unit - Electronic Litigation.

LWN162 Australian Common Law System

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is designed for international students from civil law countries and other non- common law jurisdictions or jurisdictions where English is not the first language and Australian graduates in disciplines other than law. This unit will provide these students with a solid foundation in the common law system with particular emphasis on the Australian legal and constitutional framework so that they will be much better equipped to complete other units in LW51 Master of Laws or LW60 Graduate Certificate in Law.

LWN164 Health Care Law and Ethics

Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-2 (BLK)

The relationship between law and ethics in healthcare is important, but at times contested. This unit explores that relationship to lay the foundations of an understanding of law and ethics as they relate to healthcare.

LWN166 Consent To Treatment and Clinical Negligence

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP5 (BLK)

Health law is an important and growing area of legal practice and attracts much attention from academic, social and political commentators across a range of disciplines. A detailed knowledge and understanding of the law relating to consent to treatment is a core legal issue in health law. This area involves the consideration of complex legal, ethical and policy considerations. In recent times, decisions of the High Court of Australia and courts in other jurisdictions have emphasised the importance of the rights of patients to make decisions for themselves in relation to medical treatment where they are competent to do so and absent special circumstances.

LWN171 Use of Force and International Humanitarian Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP1 (BLK)

This important area of law is currently informing and shaping state responses to terrorist and other threats to peace and security. Many of the fundamental concepts in this area of the law are based on the assumption that conflicts occur between states or occur within states and that the principle actors in a conflict are state-based actors. The events of September 11 and consequent terrorist attacks have invited a rethinking of the fundamentals of the laws applicable to the resort to force and the laws which regulate the use of force in situations of armed conflict. At the same time, long standing rules of International Humanitarian Law (IHL) designed to protect civilians from unwarranted attack and to ensure fair trial for individuals accused of serious violations of international humanitarian law have come under enormous pressure. The course will examine the development of these rules and current developments in the enforcement of these important principles of IHL.

LWN172 Special Topic in Commercial Law

Credit Points	12
Campus	Gardens Point

Advanced level research frequently draws on the expertise of leading national and international researchers who visit the Law Faculty, as well as research developing out of activities (grants etc) in the Faculty or related entities (Centres of Excellence etc). By enrolling in Special Topic in Commercial Law, Graduate Certificate in Law (LW60) students and Master of Laws (LW51) students can take advantage of the expertise of these acknowledged experts, enrol in this unit and gain knowledge in areas of interest that may only be available for a limited period of time at QUT, while at the same time counting this unit as part of a major in Commercial Law.

LWN173 Special Topic in Environmental Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP8 (BLK)

Advanced level research frequently draws on the expertise of leading national and international researchers who visit the Law Faculty, as well as research developing out of activities (grants etc) in the Faculty or related entities (Centres of Excellence etc). By enrolling in Special Topic in Environmental Law, Graduate Certificate in Law (LW60) students and Master of Laws (LW51) students can take advantage of the expertise of these acknowledged experts, enrol in this unit and gain knowledge in areas of interest that may only be available for a limited period of time at QUT, while at the same time counting this unit as part of a major in Environmental Law.

LWN174 Special Topic in Health Law

Credit Points	12
Campus	Gardens Point

Advanced level research frequently draws on the expertise of leading national and international researchers who visit the Law Faculty, as well as research developing out of activities (grants etc) in the Faculty or related entities (Centres of Excellence etc). By enrolling in Special Topic in Health Law, Graduate Certificate in Law (LW60) students and Master of Laws (LW51) students can take advantage of the expertise of these acknowledged experts, enrol in this unit and gain knowledge in areas of interest that may only be available for a limited period of time at QUT, while at the same time counting this unit as part of a major in Health Law.

LWN175 Special Topic in Public Law

Credit Points	12
Campus	Gardens Point

Advanced level research frequently draws on the expertise of leading national and international researchers who visit the Law Faculty, as well as research developing out of activities (grants etc) in the Faculty or related entities (Centres of Excellence etc). By enrolling in Special Topic in Public Law, Graduate Certificate in Law (LW60) students and Master of Laws (LW51) students can take advantage of the expertise of these acknowledged experts, enrol in this unit and gain knowledge in areas of interest that may only be available for a limited period of time at QUT, while at the same time counting this unit as part of a major in Public Law.

LWN176 Special Topic in Criminal Law

Credit Points	12
Campus	Gardens Point

Countries worldwide are under increasing pressure to take effective steps, both individually and collectively, to tackle corruption and recover the proceeds of corruption. Australia is no exception. International efforts to address the problem culminated with the coming into force in December 2005 of the UN Convention Against Corruption (UNCAC). This the first global instrument designed to tackle corruption in both the private and public sectors and it builds on a number of regional anti-corruption initiatives, including the Asia Development Bank/OECD Anti-Corruption Initiative for Asia-Pacific. In addition the Organisation for Economic Cooperation and Development (OECD) has been active within the setting of tackling corruption in international business, particularly through the OECD Convention on Combating Bribery of Foreign Public Officials in International Business Transactions (OECD Convention). Australia is a party to both Conventions.

LWN177 Special Topic in Technology Law

Credit Points	12
Campus	Gardens Point

Advanced level research frequently draws on the expertise of leading national and international researchers who visit the Law Faculty, as well as research developing out of activities (grants etc) in the Faculty or related entities (Centres of Excellence etc). By enrolling in Special Topic in Technology Law, Graduate Certificate in Law (LW60) students and Master of Laws (LW51) students can take advantage of the expertise of these acknowledged experts, enrol in this unit and gain knowledge in areas of interest that may only be available for a limited period of time at QUT, while at the same time counting this unit as part of a major in Technology Law.

LWN178 Special Topic in Intellectual Property Law

Credit Points	12
Campus	Gardens Point

Advanced level research frequently draws on the expertise of leading national and international researchers who visit the Law Faculty, as well as research developing out of activities (grants etc) in the Faculty or related entities (Centres of Excellence etc). By enrolling in Special Topic in Intellectual Property Law, Graduate Certificate in Law (LW60) students and Master of Laws (LW51) students can take advantage of the expertise of these acknowledged experts, enrol in this unit and gain knowledge in areas of interest that may only be available for a limited period of time at QUT, while at the same time counting this unit as part of a major in Intellectual Property Law.

LWN180 Open Licensing: New Models For Intellectual Property

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The Internet and associated digital technologies provide us with an enormous potential to access and build information and knowledge networks. Information and knowledge can be communicated in an instant across the globe, cheaply and with good quality, by even the most basic Internet user. However intellectual property law, which takes its definition from international conventions and is similar in most countries, places significant restrictions on people's ability to take full advantage of this revolution. While the technology has the capacity, the legal restrictions on the reuse of copyright and other intellectual property materials materially hamper its negotiability in the digital environment.

LWN181 Intellectual Property Litigation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP6 (BLK)

Intellectual property (IP) is an expanding industry, with companies increasingly seeking to protect their intellectual property in designs, inventions, trade marks and other assets. This expansion has unsurprisingly seen a tussle over the breadth of IP rights between owners, competitors, consumers and others. Critical to the resolution of these tensions and the process of defining the boundaries between competing rights holders is IP litigation. Accordingly, in addition to understanding the law and theory underpinning IP rights, it is necessary to be familiar with IP litigation strategies.

LWN182 Criminal Tribunals

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT)

Lawyers working within the criminal jurisdiction may be called upon to represent clients within a wide range of courts and tribunals. The study of criminal law at the undergraduate level typically focuses on the prosecution and defence of matters within the mainstream courts. Given that a significant number of matters take place within more specialist courts, usually catering for a special category of offender, it is essential for those practicing within the criminal jurisdiction to have a working knowledge of the law relating to the rules and procedures of these specialist courts. It is also important to understand the jurisprudence and juristic principles which inform the creation and operation of these fora.

LWN183 Health Care Law and Ethics For Medical Administrators

Credit Points	12
Campus	Gardens Point

LWN185 Insolvency Law and Professional Practice 2

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (EXT)

LWN186 Constitutional Law and State Power

Credit Points	12
Campus	Gardens Point

In Australian law courses, Constitutional Law units often focus on the extent of Commonwealth legislative powers, refer to the powers of the State Parliaments as 'plenary and ample', and treat the impact of constitutional law on the States as something of an afterthought. However, the Commonwealth Constitution has always imposed significant limits on State power and recent developments in constitutional interpretation have tightened these limits. There is an increasing need for those who advise the State government, or those who may litigate against it, to engage in a systematic and critical study of the effect of constitutional doctrines, mainly emanating from the Commonwealth Constitution, on State governments

LWN188 Advanced Taxation Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

In most legal transactions, there is a requirement to consider and obtain taxation law advice. Such transactions range from buying and selling a business to finalising a property settlement in family law. It is important, therefore, that lawyers have an understanding of these significant taxation issues so that they may provide a more comprehensive service to their clients.

LWN189 Space Law

Credit Points	12
Campus	Gardens Point

Space Law represents an increasingly important area of International Law and impacts on a wide range of Governmental and private commercial activities. Last year was the fortieth anniversary of the first human lunar landing and, as such, represents a milestone in the use and exploration of outer space. In the short

period since then, the rapid development of technology has meant that space has been used (and utilised) for a myriad of diverse purposes. Many activities in space affect everyday life – including telecommunications, direct satellite broadcasts, weather forecasting, agricultural planning, mapping, remote sensing, spying and other military activities, exploration and scientific experimentation. The use of space represents a multi-billion dollar industry.

LWN194 Conceptual Issues in Medical Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The aim of the unit is to develop an understanding of the major conceptual issues underpinning contemporary debates and proposals for law reform in the following main areas of health law: - Withholding and withdrawing medical treatment and euthanasia; - Embryonic stem cell research; and - Genetic engineering. We then aim to develop an understanding of the role such a clarification can play in contributing to, and resolving, some of the more intractable issues in the debates.

LWN195 Elder Law

Credit Points	12
Campus	

LWN196 Environmental Law and Practice

Credit Points	12
Campus	Gardens Point

Environmental law is a relatively new and innovative area of law. It has been created in response to growing concerns in our community regarding the need to protect our environment from excessive harm, whilst enabling industrial activities to continue to operate and contribute to our economy. Environmental law has emerged in recent years as a significant area of professional legal practice. This unit will introduce you to the key concepts of environmental law through analysis of a series of real world environmental law scenarios which will integrate your understanding of the law and legal system. This unit will provide a strong foundation for more in-depth postgraduate study of particular aspects of environmental law.

LWN199 Australian and Comparative Human Rights Law

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

LWN201 Contemporary Issues in Legal Education

Credit Points	12
Campus	Gardens Point

LWN202 Select Issues in Climate Change Law

Credit Points	12
Campus	Gardens Point

Climate change presents as the archetypal environmental problem. The scientific reports of the Intergovernmental Panel on Climate Change state that the stabilisation of emissions in the atmosphere, to avoid the adverse impacts of climate change, requires significant and rapid reductions in 'business as usual' global greenhouse gas emissions. The sheer magnitude of emissions reductions required, within this urgent timeframe, will necessitate an unprecedented level of international and intra-national cooperation and will challenge conventional approaches to the creation and implementation of international and domestic legal regimes. The purpose of this unit is to analyse and evaluate the emerging legal rules and frameworks, both internationally and within Australian, for the regulation of greenhouse gas emissions and the minimisation of the adverse impacts of climate change.

LWN203 Commercial Contracts - Construction and Enforcement

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP6 (BLK)

This unit is a study of advanced contract law principles in the context of commercial agreements with a focus upon the contemporary approach to contractual interpretation which takes account of the purpose and surrounding circumstances in which the transaction occurs in much the same way as modern statutes are interpreted by the courts. The effect of the differences between the earlier approach of favouring a " literal" interpretation of contracts will be compared with the contemporary approach of construing the terms fo the contract with regard to the intention of the parties and the commercial context of the transaction. The contemporary approach will be analysed against the background of certain common clauses found in commercial agreements and how this may affect their enforcement. You will be at a distinct disadvantage if you have not previously studied contract law in a common law jurisdiction.

LWN204 Family Dispute Resolution

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP5 (BLK)

LWN205 Cross Border Insolvency

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP3 (BLK)

The aim of this unit is to enable insolvency specialists to understand the essential features of the world's major insolvency systems, as well as the basic workings of the UNICTRAL Model Law as it has been adopted in Australia and in the United States, and the essential features of the European Insolvency Regulation. Comparative and Cross-Border Insolvency will allow students to survey at an advanced level the sources, components and policies underlying the law of international insolvency. The course will proceed in two stages. In the first stage, the class will examine the types of bankruptcy systems in place in the developed and developing world.

LWN301 Principles of Australian Contract Law

Anti-requisites	LWB136 and LWB137
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Although grounded in principles of English common law, Australian contract law has, like many other areas of Australian law, developed a distinctly Australian slant, particularly in the last 20 years. These emerging principles, as well as the more fundamental contract law concepts, will be explored in this unit. Where appropriate, we will be concentrating on the legal principles

applicable in Queensland.

LWN302 Australian Criminal Law

Credit Points	12
Campus	Gardens Point

An understanding of the principles of criminal law is of fundamental importance to legal practitioners and to those working within the justice system. This unit will provide students with a basic foundation in criminal law and procedure within the context of the Queensland Criminal Justice System. An understanding of criminal law and procedure is essential to practitioners advising on liability for potentially unlawful acts or ommissions and on the possible punishments and sanctions. The aim of this unit is, therefore, to provide an introduction to the principles and doctrines of the statutory criminal law of Queensland and how these are modified and extended thorugh the operation of the common law. In doing so, the unit explores the concepts of mens rea and actus reus and instructs students on their use in the elementising of a selection of major offences ,defences and excuses.

LWN303 Principles of Property, Commercial and Corporate Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed for international students from civil law countries and other non-common law jurisdictions and Australian graduates in disciplines other than law. This unit will provide these students with a solid foundation in corporate, commercial and personal property law and better equip students to complete more specialised units in these fields of law.

LWN401 General Introduction To Intellectual Property Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK)

Intellectual property law is of fundamental significance to the knowledge economy. It provides the legal framework for managing the creation, transfer and commercial transactions in intangible works. It has become a vital component of legal practice, but also has importance in the development of policy and practices internationally. This unit provides an overview of the key areas of intellectual property law, in order to demonstrate the scope of the law, and some of the key issues affecting the operation of the law in today's society.

LWN402 Patents and Biotechnological Inventions

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN402
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP2 (BLK)

In the modern world, commercial entities are increasingly faced with issues concerning the exploitation of and access to innovative products relating to information technology and biotechnology. This specialised area is of growing importance to government, industry and society more generally. This unit apprises IP experts of the workings of the patent system in a fast-changing, dynamic global environment in the light of current economic, political and strategic innovations.

LWN403 Copyright and Related Rights

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN403
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP3 (BLK)

In the last decade, the traditional copyright regime has been debated on two fronts. First by the growth of technological developments that makes unauthorised copying even easier. Second by concerns voiced by developing nations, consumers, library associations, open source advocates, NGOs, internet service providers, digital manufacturers and others who have advocated for more balanced copyright protection. Legislators around the world have responded to these challenges with major reform to copyright law at both the national and international levels. Given the increasingly complex nature of copyright law in the digital age, it is necessary not only to be familiar with the current copyright law but also to understand both the international and policy context driving the reform agenda.

LWN404 Trade Marks, Domain Names and Geographical Indications

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN404
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP3 (BLK)

Knowledge of trade mark law is integral to the understanding of, and practice in, the area of intellectual property law. In order to gain a sound understanding of trademark law, it is important to learn the statutory requirements and the associated procedures relating to registration of trade marks, domain names and geographical indications. This unit will also examine issues relating to infringements and the principles of law applicable here.

LWN405 Industrial Designs and Plant Variety Protection

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN405
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP4 (BLK)

This Unit comprises two discrete branches of intellectual property law, viz., industrial designs law and law relating to protection of new plant varieties. However, the selection relating to industrial designs will be the major focus whereas plant varieties protection law will be covered at an introductory level. Industrial designs are everywhere around us. They cover every industrial sector, ranging from textiles to furniture, packaging to jewellery, household goods to toys. This unit explores issues concerning the protection and exploitation of industrial designs facing lawyers today. New plant varieties are of fundamental significance for production of sufficient and high quality food in the agricultural and horticultural fields. Sustainable agriculture and food security are dependent on provision of adequate legal protection of plant breeder's rights.

LWN406 Traditional Knowledge and other emerging issues; Interface between Antitrust and IP Rights

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN406
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-2 (BLK)

Intellectual property rights are being continuously reshaped to adapt to dramatic changes and are facing unprecedented challenges. In the knowledge and information technology age where knowledge and IP-based assets have become key factors in global competition and economic growth, intellectual property law has become a crucial crossover for several economical, scientific and political decisions and the awareness of the ethical implications connected to Intellectual Property law is constantly growing.

LWN407 Intellectual Property Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 5TP7 (BLK)

It is of fundamental significance that the creation of new intellectual property and necessary registration (where appropriate), leads to production of new products or services for introduction into the marketplace. This usually occurs through the process of commercialisation. This unit investigates the key issues dealing with commercialisation of intellectual property in order to apply strategies that need to be put in place to transform the IP into new and useful products and services.

LWN408 Research Project

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN408
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is the vehicle for you to undertake a structured, individual research project under supervision. The course requires that you are capable of using your initiative to manage a major research project to satisfy completion. The project is to be a substantial piece of work relevant to the course carried out on an individual basis, investigating and analysing the legal aspects of a real world intellectual property problem.

LWP100 ADR Skills

Credit Points	12
Campus	Gardens Point

LWP108 Organisational Behaviour

Credit Points	12
Campus	Gardens Point

LWP137 Contracts B

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

Legally binding promises pervade society, from uncomplicated bargains like riding on a bus to complex multi-million dollar transactions. The law of contract provides an understanding of promises which are legally binding, how contractual promises may be characterised and the significance of that characterisation, and how contractual promises may be discharged or invalidated. This is the second of two associated units which examine the law of contract, the focus of this unit being on the discharge of contracts, remedies for breach and the invalidation of contracts. The two units together provide the foundation for several units encountered later in the course.

LWP142 Law Society and Justice

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT)

The practice of law requires an understanding and appreciation of the historical origins of the concepts of ‘rights’ and ‘justice’ and how such concepts continue to be influenced by changing values within our society. In order to become effective legal practitioners, law graduates need to understand that society is rapidly changing and the law is also evolving, although often at a much slower pace. As a consequence, some groups within our society may be disadvantaged in the legal system. These notions guide the development of the policies underlying the law, and inform changes to law through legislative and judicial action. The unit is placed at the outset of the course to commence your training in legal thought processes such as the ability to think critically about the law and to introduce you to various skills important to legal practice such as oral communication.

LWP144 Laws and Global Perspectives

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Modern Australian lawyers need to have an understanding of the legal rules which apply in jurisdictions outside of their own and how these rules influence Australian law and legal practice. Following on from Law, Society and Justice, which gave you an appreciation of the societal context in which the Australian legal system operates, this unit takes the next step, situating the law and legal practice in Australia within the broader global context and explaining how international and overseas legal systems impact on our own. The unit will introduce and explain the fundamental structures and principles of three areas of law which are essential to an appreciation of the global context in which the Australian legal system operates – public international law, comparative law, and private international law – and examine their relevance to contemporary legal practice in Australia.

LWP148 Torts B

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This unit aims to build upon the knowledge, understanding and skills developed in Torts A through a more in-depth examination of a wider range of torts and related issues. It also aims to equip you with a more detailed and sophisticated knowledge and understanding of how this area of the law is likely to develop in the 21st Century. Integral to this is the development of your skills, necessary for the practice of law and your further studies of law, in legal problem solving, research and written communication and an understanding of ethical issues related to the practice of law.

LWS007 Introduction To Intellectual Property Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Intellectual property protection is undoubtedly of paramount importance in the research, development and commercialisation of emerging technologies. Managers and researchers need to be aware of the different types of

property that can be protected and how the property needs to be protected. There have also been significant developments in the field of intellectual property law in recent years. The concepts taught in Introduction to Intellectual Property Law are of significant relevance to persons intending to practice in the emerging fields of science.

LWS009 Introduction to Law

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

For students involved in a wide range of industries it is important to have a fundamental understanding of the nature of the Australian legal system. The unit introduces students to the sources of law (both cases and legislation) and will assist students in acquiring introductory knowledge about the Australian legal system and laws so that they will be equipped to complete other law units in their relevant course.

LWS075 International Business and Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (BLK)

This unit on international trade law addresses the broad range of legal problems that arise in the formation and operation of commercial transactions of an international nature. An understanding of the law and practice regarding international commercial transactions is a basic prerequisite for the development of Australian export activity, such activity being generally recognised as crucial to Australia's economic well-being. The importance of international trade law as a subject of legal study is attested to by the ever increasing number of courses offered on it at the postgraduate level in Australian Law Schools.

LWS101 Ethics Law and Health Care

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Nursing practice involves making decisions with and for others. This involves making evaluations of what is in the best interest of others, what are nurses' obligations to others and what will best protect or enhance their well-being. Hence, decision-making in nursing practice is bounded by normative considerations and these normative considerations fall into two groups: those constituted by the law and those constituted by ethics. This unit has been designed to provide for nursing students and practitioners an opportunity to develop a reflective understanding of the place of law and ethics in nursing and a professional awareness of current legal statutes and ethical discussions as they apply to nursing practice.

MAB101 Statistical Data Analysis 1

Anti-requisites	BSB123, EFB101, MAB141, MAN101, MAB233
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM-2 (INT)

The aim of this unit is to provide you with an essential grounding in statistical reasoning, and in basic methods for the analysis of data and interpretation of variation in all areas of modern science, social science, technology, industry and associated fields. The unit also provides you with key statistical knowledge to apply in many advanced units and projects which involve data and influences of random variation. Fundamental quantitative methods which inform and support statistical knowledge are also provided

MAB105 Preparatory Mathematics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is intended to cater for the needs of students whose background in mathematics is either weak or does not reach the equivalent of Senior Mathematics B. It is intended to provide the concepts and skills needed for successful study of those units within the university which assume a background equivalent to Senior Mathematics B. This unit is incompatible with a grade of High Achievement in Senior Mathematics B. The aim of this unit is to develop your mathematical skills in and understanding of algebra, functions and graphing, differential and integral calculus of one variable and to interpret and solve simple, real world problems using these skills.

MAB120 Algebra and Calculus

Anti-requisites	MAN120
Equivalents	MAB100, MAB125, MAB180
Credit Points	12
Campus	Gardens Point

This unit introduces you to the fundamental mathematical ideas of functions, calculus, vectors and matrices, through the use of contextualized problems. In solving these problems you will develop both an understanding of the mathematical concepts and competency in appropriate solution methods.

MAB121 Calculus and Differential Equations

Anti-requisites	MAN121
Equivalents	MAB111, MAB126, MAB131, MAB182
Credit Points	12
Campus	Gardens Point

Building upon the foundations established in MAB120 or Senior Maths C, this unit addresses the significant role of mathematical modelling using differential equations for the description and resolution of simple and complex problems relevant to real world situations. The formulation and solution of such problems is supported by appropriate advanced mathematical concepts used for function approximation, differentiation and integration. Undertaking this unit will allow you to develop your problem solving skills, especially in the context of advanced mathematical techniques applied to ordinary differential equations used to model real world problems. You will also gain a deeper understanding of the concepts of the derivative and the integral, and how these may be used in applied contexts.

MAB122 Algebra and Analytic Geometry

Equivalents	MAB112, MAB127, MAB132
Credit Points	12
Campus	Gardens Point

Building upon the foundations established in MAB120 or Senior Maths C, this unit addresses the significant role of mathematical modelling using vectors, matrices and multivariable calculus for the description and resolution of simple and complex problems relevant in the real world. The formulation and solution of such problems is supported by appropriate advanced mathematical concepts used for function approximation, differentiation and integration.

Undertaking this unit will allow you to develop your problem solving skills, especially in the context of mathematical techniques related to vectors, matrices and multivariable functions used to model real world problems.

MAB125 Foundations of Engineering Mathematics

Anti-requisites	MAN120
Equivalents	MAB100, MAB120, MAB180
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit introduces you to the fundamental mathematical ideas of function, calculus, vectors and matrices, through the use of contextualised engineering related problems. In solving these problems you will develop both an understanding of the mathematical concepts and competency in appropriate solution methods.

MAB126 Mathematics for Engineering 1

Anti-requisites	MAN121
Equivalents	MAB111, MAB121, MAB131, MAB182
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Building upon the foundations established in MAB125 or Senior Maths C, this unit addresses the significant role of mathematical modelling using differential equations for the description and resolution of simple and complex problems relevant to the discipline of engineering. The formulation and solution of such problems is supported by appropriate advanced mathematical concepts used for function approximation, differentiation and integration. The unit is located in first year for application in core engineering units throughout the rest of the course. Undertaking this unit will allow you to develop your problem solving skills, especially in the context of mathematical techniques applied to ordinary differential equations used to model engineering relevant problems.

MAB127 Mathematics for Engineering 2

Equivalents	MAB112, MAB122, MAB132
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Building upon the foundations established in MAB125 or Senior Maths C, this unit addresses the significant role of mathematical modelling using vectors, matrices and multivariable calculus for the description and resolution of simple and complex problems relevant to the discipline of engineering. The formulation and solution of such problems is supported by appropriate advanced mathematical concepts used for function approximation, differentiation and integration. You will complete this unit in first year or first semester of second year depending on your initial maths background. Undertaking this unit will allow you to develop your problem solving skills, especially in the context of mathematical techniques related multivariable functions, vectors and matrices used to model engineering relevant problems.

MAB141 Mathematics and Statistics for Medical Science

Anti-requisites	MAN101, MAB101, LQB284
Equivalents	MAB140
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM-2 (INT)

This unit provides you with the essential grounding in mathematical and statistical concepts, methods and analysis of data used in units you will encounter later in your course, and relevant to medical science laboratory data and situations in pharmacy, vision science, biomedical science and medical science.

MAB210 Statistical Modelling 1

Pre-requisites	MAB121 or MAB122. MAB121 or MAB122 can be studied in the same teaching period as MAB210
Anti-requisites	MAN210
Credit Points	12
Campus	Gardens Point

This unit is intended for all mathematics degree students, all double degree students with mathematics, secondary education students with mathematics as a teaching area, and quantitatively-oriented students in other courses, particularly in Science, Information Technology, Engineering and areas of Business. The unit will provide you with fundamental skills and operational knowledge for all further study in statistics, and highly relevant foundations for other areas of mathematics such as mathematical modelling and operations research. The unit will also help you develop fundamental problem-solving skills in statistics and mathematics.

MAB220 Computational Mathematics 1

Anti-requisites	MAN220
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Many real world problems are not solvable analytically, meaning that it is necessary to develop computational methods that can be used to solve these problems. Additionally, to be able to apply these methods to large problems, they must be implemented as algorithms in a computer language such as MATLAB. This unit addresses both the theoretical development of computational methods and their implementation in MATLAB. The aim of this unit is to provide you with the introductory concepts, computational techniques and programming skills that will allow you to solve many real world problems. It is also designed to prepare you for study in the advanced units in computational mathematics.

MAB233 Engineering Mathematics 3

Pre-requisites	MAB131 or MAB182 or MAB121 or MAB126 or MAB127
Anti-requisites	BSB123, MAN101
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit will provide you with the foundation knowledge and skills to carry out a statistical data investigation including defining the problem, planning the investigation, collecting and analysing data, and reporting conclusions in context. It will also provide you with foundation knowledge and concepts of probability, random variables and distributions for further learning in engineering.

MAB281 Mathematics for Computer Graphics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Computer graphics is a rapidly growing

field of the computer science industry. It has applications in computer games, virtual reality, CAD systems and geometric modelling. Fundamental to all of these applications is mathematics. Thus, to be a working professional in this area you will need a working knowledge of the basic mathematics and concepts that are central to this field. This unit is also ideal for non-specialists as it demonstrates some of the various fields of applications of mathematics in everyday life. The aim of this unit is to introduce you to the mathematics of computer graphics and relate this to the solutions of problems that arise in the many applications of computer graphics.

MAB311 Advanced Calculus

Pre-requisites	(MAB111 or MAB121) and (MAB112 or MAB122)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: polar coordinates; parametric equations; conic sections; quadric surfaces; vector-valued functions; Fourier series; functions of several variables; graphs; partial derivatives; total derivatives; extrema; Lagrange multipliers; Taylor series for multivariable functions; double and triple integrals; Green's theorems; line and surface integrals; divergence theorem; Stoke's theorem; applications.

MAB312 Linear Algebra

Pre-requisites	(MAB111 or MAB121) and (MAB112 or MAB122)
Anti-requisites	MAN312
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The main aim of this unit, which is intended for students majoring in mathematics and students in other courses who require the foundations of linear algebra, is to develop the basic theory of linear algebra and to provide you with the necessary skills to apply this theory in science, technology, engineering and mathematics. It seeks to foster an appreciation of the historical development and the value of the principles and methods presented.

MAB313 Mathematics of Finance

Pre-requisites	MAB111 or MAB121 (which can be concurrently enrolled)
Anti-requisites	MAN313
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Finance provides one of the significant areas for the application of mathematics. Understanding the fundamental principles involved will enhance your general preparation for life and provide an essential tool for those of you who intend to pursue further studies or careers in the financial area. The aim of this unit is to provide you with an introduction to the methods used in obtaining relevant solutions to financial and business problems.

MAB314 Statistical Modelling 2

Pre-requisites	MAB122 and MAB210
Credit Points	12
Campus	Gardens Point

This unit includes: models for stochastic processes and statistical methods, which have applications in engineering, information technology, finance, and physical and life sciences. Markov chains; random walks; branching processes; queueing processes; long-term behaviour of processes; use of generating functions; bivariate and conditional distributions; transformations of random variables; beta and gamma distributions; mixture distributions; order statistics, minimum and maximum.

MAB315 Operations Research 2

Pre-requisites	MAB210 and (MAB112 or MAB122)
Anti-requisites	MAN315
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the essential features of operations research methods. It develops a number of basic mathematical techniques to solve generic problems and the theoretical foundations of these techniques. Students should develop the ability to apply various operations research methods, algorithms and techniques in the solution of practical problems. Students will also look at the applications of operations research techniques to real-world problems.

MAB413 Differential Equations

Pre-requisites	MAB311 or MAB312
Anti-requisites	MAN413
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Differential Equations are among the most important aspects of the theoretical developments of any branch of science. It is often the case that the formulation of mathematical models of real world problems leads to an equation in which a function and its derivatives play a major role. Such equations are examples of differential equations. This unit builds on studies of differential equations in first year and provides a framework for studying partial differential equations and other aspects of applied mathematics in later semesters.

MAB414 Applied Statistics 2

Pre-requisites	MAB101 or MAB210
Credit Points	12
Campus	Gardens Point

This unit includes: Simple linear regression (revision), multiple linear regression, making inferences from regressions, choosing a model, checking model assumptions, general linear models - analysis of covariance, ANOVA revisited, designing experiments, issues in designing experiments, analysing experimental results, further experimental designs, assumptions, and how to cope if they aren't met, simulations.

MAB420 Computational Mathematics 2

Pre-requisites	MAB220 and MAB312
Anti-requisites	MAN420
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides you with the opportunity to employ a number of the skills that you have developed in the disciplines of computational mathematics and linear algebra, combining them in a coherent manner for resolving topical and relevant real world problems. You will become familiar with the methodologies for developing numerical algorithms that can be employed for either the direct solution or the iterative solution of large, sparse linear systems.

MAB422 Mathematical Modelling

Pre-requisites	MAB121
Anti-requisites	MAN422
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In this unit you will develop skills in the formulation and interpretation of mathematical models of 'real-world' problems drawn from the literature, the media and the lecturer's own research areas. You will also develop and extend your skills in the use of mathematical software to investigate solutions of some of these models. By emphasising the need to write clear mathematical arguments and to explain in logical and clear English the conclusions drawn from the mathematical models developed in the unit, you will also develop your written communication skills.

MAB461 Discrete Mathematics

Pre-requisites	MAB112 or MAB122
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Discrete mathematics is playing an ever increasingly important role in society. We live in an electronic age where information security is of paramount importance, and it is discrete mathematics in the main that provides this security. In addition, many real world systems are discrete in nature and therefore lend themselves to a discrete analysis. These methods are therefore vital to the professional mathematician and useful to those with an interest in mathematics. This second level unit will provide you with an introduction to discrete and combinatorial mathematics, and give you a mathematical perspective that is different from the traditional coverage in other mathematics units. It will also provide you with valuable methods to apply in other areas of science and computer science.

MAB521 Applied Mathematics 3

Pre-requisites	MAB311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes: partial differential equations such as the wave, heat and Laplace equations; special functions(gamma, delta, Bessel and error functions, Legendre polynomials); vector analysis and applications (vector algebra, vector calculus, fields, grad, div, curl, line and surface integrals, divergence theorem, Stoke's theorem, applications); functions of a complex variable (analytic functions, contour integrals, Laurent series, residues).

MAB522 Computational Mathematics 3

Pre-requisites	MAB311 and MAB420
Anti-requisites	MAN522
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with the opportunity to employ a number of the skills that you have developed in the discipline of computational mathematics, combining them in a coherent manner for solving topical and relevant real world problems. You will become familiar with the methodologies for developing numerical algorithms that can be employed for problems that would otherwise be unsolvable, and with the skills of communicating the results of your numerical studies to a diverse audience.

MAB524 Statistical Inference

Pre-requisites	MAB314
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes: maximum likelihood estimation, confidence intervals and hypothesis tests, introduction to Bayesian inference, prior and posterior distributions, Bayesian inference for binomial data, Poisson count data and normal data, simulation techniques for sampling from distributions. Use of software Matlab and R.

MAB525 Operations Research 3A

Pre-requisites	MAB315
Anti-requisites	MAN525
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Operations research techniques are used in most industries which are concerned with the application of scientific methods in decision making, especially the allocation of resources. There is thus a need to graduate students who can make decisions on the most appropriate technology to solve a particular problem and implement it. This unit will build on the foundations of MAB315/MAN315 by developing and manipulating mathematical and computer models of complex systems composed of people, machines, money and their operating procedures.

MAB533 Statistical Techniques

Pre-requisites	MAB210 and MAB414
Anti-requisites	MAB523
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This third year unit aims to provide you with sufficient knowledge and understanding of advanced statistical methods to enable the application in a range of real-world situations in diverse workplaces and disciplines.

MAB536 Time Series Analysis

Pre-requisites	MAB314 and MAB414
Anti-requisites	MAN536, MAB526
Credit Points	12
Campus	Gardens Point

Data in business, economics, engineering and the natural sciences often occur in the form of time series. Time Series Analysis provides models and methods for the analysis of such series of correlated observations. The ability to forecast optimally, to understand causal relationships between variables, and to analyse dynamic systems is of great practical importance. For example, optimal sales forecasts are needed for business planning, transfer function models are needed for improving the design and control of a process plant, and vector time series models are used to represent the relationships and interactions of macroeconomic variables in an economy. This unit is concerned with the building of time series models and the use of such models for practical applications such as optimal forecasting, simulation, causality analysis, and analysis of dynamic systems.

MAB613 Partial Differential Equations

Pre-requisites	MAB311 and MAB413
Anti-requisites	MAN613
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Partial differential equations are the classical foundation of mathematical models used to unambiguously describe processes exhibiting spatial and temporal variation. There exist numerous modern important examples of such so called continuum models and so it is essential that any practising mathematician be conversant with both the background, formulation and solution of such equations. This unit aims to develop your understanding of the construction, analysis, solution and interpretation of partial differential equation models of real-world processes.

MAB623 Financial Mathematics

Pre-requisites	MAB313 and MAB311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: quantitative techniques in business, economics and finance; theory and structure of interest rates; general accumulation and discounting functions; force of interest; discounting including Modern Portfolio theory and extension; varying interest; general annuities; varying annuities; continuous varying annuities; mathematical analysis of financial transactions in money and capital markets; life annuities and life assurances; the life table; basic life table functions; life annuities and assurances; policy values; paid up policy values; changes to policies; use of life table; superannuation.

MAB624 Applied Statistics 3

Pre-requisites	MAB414
Anti-requisites	MAN624
Credit Points	12
Campus	Gardens Point

Applied statistics provides methods for investigating relationships between variables that arise in data from a variety of areas including science, technology and commerce. The planning of the collection of the data, using ideas of experimental design, and the analysis of the resulting data, using methods based on statistical inference, are fundamental aspects of the statistical process. In addition, communication of results with clear reporting of the conclusions of the analysis is very important. These activities are an important part of decision making processes whatever the context of the application. This unit aims to build on the introductory experimental design and statistical analysis methods presented to you in Applied Statistics 2 in order to introduce modern statistical methods. Additionally, the use of statistical software to carry out analyses and the reporting of conclusions are emphasised.

MAB625 Operations Research 3B

Pre-requisites	MAB315
Equivalents	MAN625
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Operations research techniques are used in most industries that are concerned with the application of scientific methods in decision making, especially the allocation of resources. There is thus a need for graduate students who can make decisions on the most appropriate technology to solve a particular problem and implement it. This unit will build on the foundation of previous Operations Research units to develop knowledge and skills in using advanced techniques, tools and methods.

MAB640 Industry Project

Other requisites	Unit coordinator approval is required to enrol
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In a holistic and systematic approach to problem solving, it is important that you learn to apply analytical methods and quantitative techniques encountered in a classroom environment to real world issues in industry. The aim of this unit is to allow you to utilise your knowledge of problem solving procedures and develop your communication and interactive skills by completing a specified project in industry under controlled supervision, providing a summary of your findings in a seminar and presenting a formally written detailed report.

MAB672 Advanced Mathematical Modelling

Pre-requisites	MAB422
Anti-requisites	MAN672
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to develop concepts, skills and an understanding of Mathematical Modelling by providing examples and outlining the steps required in the development, analysis and interpretation of a model using 'real-world' problems and associated mathematical software to solve these problems.

MAB730 Surveying Mathematics 2

Pre-requisites	MAB100 or MAB120 or MAB125
Anti-requisites	MAB220
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Surveying and mapping involve the collection, processing, analysis and presentation of data about the earth's features. Typically, the processing and analysis of this data is performed using computer technology. Thus, knowledge of analytical mathematics and the mathematical algorithms behind a range of computational processes is essential for the surveying professional. The aim of this unit is to extend your knowledge of analytical mathematics and to introduce you to the mathematical algorithms behind a range of computational processes and the basic programming skills needed to enable you to implement these algorithms.

MAN101 Statistical Data Analysis 1

Anti-requisites	MAB101, MAB141, BSB123, EFB101, MAB233
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM-2 (INT)

The aim of this unit is to provide you with an essential grounding in statistical reasoning, and in basic methods for the analysis of data and interpretation of variation in all areas of modern science, social science, technology, industry and

associated fields. The unit also provides you with key statistical knowledge to apply in many advanced units and projects which involve data and influences of random variation. Fundamental quantitative methods which inform and support statistical knowledge are also provided.

MAN105 Preparatory Mathematics

Anti-requisites	MAB105
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is intended to cater for the needs of students whose background in mathematics is either weak or does not reach the equivalent of Senior Mathematics B. It is intended to provide the concepts and skills needed for successful study of those units within the university which assume a background equivalent to Senior Mathematics B. This unit is incompatible with a grade of High Achievement in Senior Mathematics B. To develop your mathematical skills in and understanding of algebra, functions and graphing, differential and integral calculus of one variable and to interpret and solve simple, real world problems using these skills.

MAN120 Algebra and Calculus

Anti-requisites	MAB100, MAB120, MAB180, MAB125
Credit Points	12
Campus	Gardens Point

This unit introduces you to the fundamental mathematical ideas of functions, calculus, vectors and matrices, through the use of contextualized problems. In solving these problems you will develop both an understanding of the mathematical concepts and competency in appropriate solution methods.

MAN121 Calculus and Differential Equations

Anti-requisites	MAB121, MAB111, MAB126, MAB131, MAB182
Credit Points	12
Campus	Gardens Point

Building upon the foundations established in MAN120 or Senior Maths C, this unit addresses the significant role of mathematical modelling using differential equations for the description and resolution of simple and complex problems relevant to real world situations. The formulation and solution of such problems is supported by appropriate advanced mathematical concepts used for function approximation, differentiation and integration. Undertaking this unit will allow you to develop your problem solving skills, especially in the context of advanced mathematical techniques applied to ordinary differential equations used to model real world problems. You will also gain a deeper understanding of the concepts of the derivative and the integral, and how these may be used in applied contexts.

MAN122 Algebra and Analytic Geometry

Anti-requisites	MAB112, MAB122, MAB127, MAB132
Credit Points	12
Campus	Gardens Point

Building upon the foundations established in MAN120 or Senior Maths C, this unit addresses the significant role of mathematical modelling using vectors, matrices and multivariable calculus for the description and resolution of simple and complex problems relevant in the real world. The formulation and solution of such problems is supported by appropriate advanced mathematical concepts used for function approximation, differentiation and integration. Undertaking this unit will allow you to develop your problem solving skills, especially in the context of mathematical techniques related to vectors, matrices and multivariable functions used to model real world problems.

MAN200 Advanced Topics in Mathematical Sciences 1

Other requisites	Unit coordinator approval is required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit, which is available to students majoring in Mathematics in the SC60 Bachelor of Applied Science Honours course and the postgraduate MA65, MA75 and MA85 courses, aims to provide a framework for you to undertake advanced level coursework in a specialised topic in the mathematical sciences. You will gain expertise in problem formulation, problem solving, critical thinking, and written and oral communication in an advanced mathematical context.

MAN201 Advanced Topics in Mathematical Sciences 2

Other requisites	Unit coordinator approval is required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit, which is available to students majoring in Mathematics in the SC60 Bachelor of Applied Science Honours course and the postgraduate MA65, MA75 and MA85 courses, aims to provide a framework for you to undertake advanced level coursework in a specialised topic in the mathematical sciences. You will gain expertise in problem formulation, problem solving, critical thinking, and written and oral communication in an advanced mathematical context.

MAN210 Statistical Modelling 1

Pre-requisites	MAB121 or MAB122
Anti-requisites	MAB210
Credit Points	12
Campus	Gardens Point

This unit is intended for all mathematics degree students, all double degree students with mathematics, secondary education students with mathematics as a teaching area, and quantitatively-oriented students in other courses, particularly in Science, Information Technology, Engineering and areas of Business. The unit will provide you with fundamental skills and operational knowledge for all further study in statistics, and highly relevant foundations for other areas of mathematics such as mathematical modelling and operations research. The unit will also help you develop fundamental problem-solving skills in statistics and mathematics.

MAN220 Computational Mathematics 1

Anti-requisites	MAB220
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Many real world problems are not solvable analytically, meaning that it is necessary to develop computational methods that can be used to solve these problems. Additionally, to be able to apply these methods to large problems, they must be implemented as algorithms in a computer language such as MATLAB.

This unit addresses both the theoretical development of computational methods and their implementation in MATLAB. The aim of this unit is to provide you with the introductory concepts, computational techniques and programming skills that will allow you to solve many real world problems. It is also designed to prepare you for study in further units in computational mathematics.

MAN281 Mathematics for Computer Graphics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Computer graphics is a rapidly growing field of the computer science industry. It has applications in computer games, virtual reality, CAD systems and geometric modelling. Fundamental to all of these applications is mathematics. Thus, to be a working professional in this area you will need a working knowledge of the basic mathematics and concepts that are central to this field. This unit is also ideal for non-specialists as it demonstrates some of the various fields of applications of mathematics in everyday life. The aim of this unit is to introduce you to the mathematics of computer graphics and relate this to the solutions of problems that arise in the many applications of computer graphics.

MAN311 Advanced Calculus

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: polar coordinates; parametric equations; conic sections; quadric surfaces; vector-valued functions; Fourier series; functions of several variables; graphs; partial derivatives; total derivatives; extrema; Lagrange multipliers; Taylor series for multivariable functions; double and triple integrals; Green's theorems; line and surface integrals; divergence theorem; Stoke's theorem; applications.

MAN312 Linear Algebra

Pre-requisites	(MAN121 or MAB111 or MAB121) and (MAN122 or MAB112 or MAB122)
Anti-requisites	MAB312
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The main aim of this postgraduate unit is to develop the basic theory of linear algebra and to provide you with the necessary skills to apply this theory in science, technology, engineering and mathematics. It seeks to foster an appreciation of the historical development and the value of the principles and methods presented.

MAN313 Mathematics of Finance

Pre-requisites	MAB111 or MAB121 or MAN121 (which can be concurrently enrolled)
Anti-requisites	MAB313
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Finance provides one of the significant areas for the application of mathematics. Understanding the fundamental principles involved will enhance your general preparation for life and provide an essential tool for those of you who intend to pursue further studies or careers in the financial area. The aim of this postgraduate unit is to provide you with an introduction to the methods used in obtaining relevant solutions to financial and business problems.

MAN314 Statistical Modelling 2

Credit Points	12
Campus	Gardens Point

This unit includes: models for stochastic processes and statistical methods, which have applications in engineering, information technology, finance, and physical and life sciences. Markov chains; random walks; branching processes; queueing processes; long-term behaviour of processes; use of generating functions; bivariate and conditional distributions; transformations of random variables; beta and gamma distributions; mixture distributions; order statistics, minimum and maximum.

MAN315 Operations Research 2

Pre-requisites	MAB210 and (MAB112 or MAB122)
Anti-requisites	MAB315
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the essential features of operations research methods. It develops a number of basic mathematical techniques to solve generic problems and the theoretical foundations of these techniques. Students should develop the ability to apply various operations research methods, algorithms and techniques in the solution of practical problems. Students will also look at the applications of operations research techniques to real-world problems.

MAN413 Differential Equations

Pre-requisites	MAB311 or MAB312 or MAN311 or MAN312
Anti-requisites	MAB413
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Differential Equations are among the most important aspects of the theoretical developments of any branch of science. It is often the case that the formulation of mathematical models of real world problems leads to an equation in which a function and its derivatives play a major role. Such equations are examples of differential equations. This unit builds on prior studies of differential equations and provides a framework for studying partial differential equations and other aspects of applied mathematics in later semesters. This unit aims to provide you with a basis for understanding differential equations, their solutions and solution strategies. The mathematical theory of differential equations, skills in the application of this theory, and the relevance of the material in this unit to problem solving and interpretation will all be developed.

MAN414 Applied Statistics 2

Pre-requisites	MAN101
Credit Points	12
Campus	Gardens Point

This unit includes: Simple linear regression (revision), multiple linear regression, making inferences from regressions, choosing a model, checking model assumptions, general linear models - analysis of covariance, ANOVA revisited, designing experiments, issues in designing experiments, analysing experimental results, further experimental designs, assumptions, and how to cope if they aren't met, simulations.

MAN420 Computational Mathematics 2

Pre-requisites	(MAN220 or MAB220) and (MAN312 or MAB312)
Anti-requisites	MAB420
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides you with the opportunity to employ a number of the skills that you have developed in the disciplines of computational mathematics and linear algebra, combining them in a coherent manner for resolving topical and relevant real world problems. You will become familiar with the methodologies for developing numerical algorithms that can be employed for either the direct solution or the iterative solution of large, sparse linear systems.

MAN422 Mathematical Modelling

Pre-requisites	MAN121
Anti-requisites	MAB422
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In this unit you will develop skills in the formulation and interpretation of mathematical models of 'real-world' problems drawn from the literature, the media and the lecturer's own research areas. You will also develop and extend your skills in the use of mathematical software to investigate solutions of some of these models. By emphasising the need to write clear mathematical arguments and to explain in logical and clear English the conclusions drawn from the mathematical models developed in the unit, you will also develop your written communication skills.

MAN461 Discrete Mathematics

Pre-requisites	MAN122 or MAB112 or MAB122
Anti-requisites	MAB461, MAB621
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Discrete mathematics is playing an ever increasingly important role in society. We live in an electronic age where information security is of paramount importance, and it is discrete mathematics in the main that provides this security. In addition, many real world systems are discrete in nature and therefore lend themselves to a discrete analysis. These methods are therefore vital to the professional mathematician and useful to those with an interest in mathematics. This unit will provide you with an introduction to discrete and combinatorial mathematics, and give you a mathematical perspective that is different from the traditional coverage in other mathematics units. It will also provide you with valuable methods to apply in other areas of science and computer science.

MAN521 Applied Mathematics 3

Pre-requisites	MAN311 or MAB311
Anti-requisites	MAB521
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Topics selected from: partial differential equations such as the wave, heat and Laplace equations; special functions(gamma, delta, Bessel and error functions, Legendre polynomials); vector analysis and applications (vector algebra, vector calculus, fields, grad, div, curl, line and surface integrals, divergence theorem, Stoke's theorem, applications); functions of a complex variable (analytic functions, contour integrals, Laurent series, residues).

MAN522 Computational Mathematics 3

Pre-requisites	(MAN311 or MAB311) and (MAN420 or MAB420)
Anti-requisites	MAB522
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with the opportunity to employ a number of the skills that you have developed in the discipline of computational mathematics, combining them in a coherent manner for solving topical and relevant real world problems. You will become familiar with the methodologies for developing numerical algorithms that can be employed for problems that would otherwise be unsolvable, and with the skills of communicating the results of your numerical studies to a diverse audience.

MAN524 Statistical Inference

Pre-requisites	MAN314 or MAB314
Anti-requisites	MAB524
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes: maximum likelihood estimation, confidence intervals and hypothesis tests, introduction to Bayesian inference, prior and posterior distributions, Bayesian inference for binomial data, Poisson count data and normal data, simulation techniques for sampling from distributions. Use of software Matlab and R. Assumed knowledge: exposure to introductory ideas of statistical inference, including parameter estimation, confidence intervals and hypothesis testing, such as provided by a first course in statistics or data analysis.

MAN525 Operations Research 3A

Pre-requisites	MAB315 or MAN315
Anti-requisites	MAB525
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Operations research techniques are used in most industries which are concerned with the application of scientific methods in decision making, especially the allocation of resources. There is thus a need to graduate students who can make decisions on the most appropriate technology to solve a particular problem and implement it. This unit will build on the foundations of MAB315/MAN315 by developing and manipulating mathematical and computer models of complex systems composed of people, machines, money and their operating procedures.

MAN533 Statistical Techniques

Pre-requisites	MAN210 and MAN414
Anti-requisites	MAB533
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This year unit aims to provide you with sufficient knowledge and understanding of advanced statistical methods to enable the application in a range of real-world

situations in diverse workplaces and disciplines.

MAN536 Time Series Analysis

Pre-requisites	MAB314 and MAB414
Anti-requisites	MAB536, MAN526
Credit Points	12
Campus	Gardens Point

Data in business, economics, engineering and the natural sciences often occur in the form of time series. Time Series Analysis provides models and methods for the analysis of such series of correlated observations. The ability to forecast optimally, to understand causal relationships between variables, and to analyse dynamic systems is of great practical importance. For example, optimal sales forecasts are needed for business planning, transfer function models are needed for improving the design and control of a process plant, and vector time series models are used to represent the relationships and interactions of macroeconomic variables in any economy.

MAN613 Partial Differential Equations

Pre-requisites	(MAN311 or MAB311) and (MAN413 or MAB413)
Anti-requisites	MAB613
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Partial differential equations are the classical foundation of mathematical models used to unambiguously describe processes exhibiting spatial and temporal variation. There exist numerous modern important examples of such so called continuum models and so it is essential that any practicing mathematician be conversant with both the background, formulation and solution of such equations. This unit aims to develop your understanding of the construction, analysis, solution and interpretation of partial differentil equation models of real-world processes.

MAN623 Financial Mathematics

Pre-requisites	(MAN313 or MAB313) and (MAN311 or MAB311)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: quantitative techniques in business, economics and finance; theory and structure of interest rates; general accumulation and discounting functions; force of interest; discounting including Modern Portfolio theory and extension; varying interest; general annuities; varying annuities; continuous varying annuities; mathematical analysis of financial transactions in money and capital markets; life annuities and life assurances; the life table; basic life table functions; life annuities and assurances; policy values; paid up policy values; changes to policies; use of life table; superannuation.

MAN624 Applied Statistics 3

Pre-requisites	MAB414 or MAN414
Anti-requisites	MAB624
Credit Points	12
Campus	Gardens Point

Applied statistics provides methods for investigating relationships between variables that arise in data from a variety of areas including science, technology and commerce. The planning of the collection of the data, using ideas of experimental design, and the analysis of the resulting data, using methods based on statistical inference, are fundamental aspects of the statistical process. In addition, communication of results with clear reporting of the conclusions of the analysis is very important. These activities are an important part of decision making processes whatever the context of the application. This unit is concerned with building on the experimental design and statistical analysis methods presented in undergraduate units in order to advance your knowledge of modern statistical methods. Additionally, the use of statistical software to carry out analyses and the reporting of conclusions are emphasised.

MAN625 Operations Research 3B

Pre-requisites	MAN315
Equivalents	MAB625
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Operations research techniques are used in most industries that are concerned with the application of scientific methods in decision making, especially the allocation of resources. There is thus a need for graduate students who can make decisions on the most appropriate technology to solve a particular problem and implement it. This unit will build on the foundation of previous Operations Research units to develop knowledge and skills in using advanced techniques, tools and methods.

MAN672 Advanced Mathematical Modelling

Pre-requisites	MAN422 or MAB422
Anti-requisites	MAB672
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to develop concepts, skills and an understanding of Mathematical Modelling by providing examples and outlining the steps required in the development, analysis and interpretation of a model using 'real-world' problems and associated mathematical software to solve these problems.

MAN700 Project

Other requisites	Unit coordinator approval is required to enrol
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit aims to provide a framework for you to apply the mathematically-founded analytical methods and quantitative techniques learned in other units in the course to real world problems relevant to you. You will gain expertise in problem formulation, problem solving and communication, involving mathematical techniques. Permission to enrol in this unit must be obtained from the Course Coordinator.

MAN717 Minor Project

Other requisites	Unit coordinator approval is required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research in the Mathematical and Statistical Sciences can be intellectually challenging and rewarding and generally requires a knowledge base and a range of generic capabilities to be developed to a level that is not normally achieved in a bachelor degree of three years duration. This unit offers you the opportunity to

acquire this knowledge and these capabilities. By undertaking a minor research project in a field which is of interest to you, undertaking advanced level coursework in a discipline related to your area of Mathematical interest, or both. Permission to enrol in this unit must be obtained from the Course Coordinator.

MAN764 Applied Mathematical Modelling

Pre-requisites	MAB613 and MAB672
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Through the investigation of case studies and the development and practice of techniques and skills related to the formulation of mathematical models and their numerical solution, this unit provides you with the opportunity to employ these skills you have developed in your studies in mathematics, combining them in a coherent manner for solving topical and relevant problems. You will become familiar with methodologies for developing mathematically based theoretical tools for the solution of problems that may well be outside your core discipline area and in communicating the results of your theoretical study to a diverse audience.

MAN765 Bayesian Data Analysis

Pre-requisites	MAB524 or MAN524
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This subject builds on the foundations of Bayesian analysis laid in MAB524 to extend modelling and computational approaches to real world problems. Skills in using statistical computing platforms for Bayesian analysis, model development and comparison, and extending computational approaches will be developed. You are encouraged to apply skills to data modelling tasks motivated by their work or research areas.

MAN766 Applied Time Series Analysis

Pre-requisites	(MAN524 or MAB524) and (MAN536 or MAB536)
Credit Points	12
Campus	Gardens Point

The overall aim of this unit is to strengthen your understanding and skills in Time Series Analysis with particular emphasis on the state-space representations of ARIMA models and nonlinear time series models and to use these models for practical applications such as optimal forecasting, simulation and analysis of dynamic systems.

MAN768 Advanced Techniques in Operations Research

Pre-requisites	(MAN525 or MAB525) and (MAN625 or MAB625)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of operations research is to gain an understanding of complex situations, and thereby suggest ways to predict system behaviour and improve system performance. This requires you to learn how to develop and manipulate mathematical and computer models of complex systems composed of people, machines and their operating constraints/procedures.

MAN769 Mathematics of Finance

Pre-requisites	MAN623 or MAB623 or MAN522 or MAB522
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will present to you the essential elements of mathematical finance including the development of stochastic calculus which is essential for a quantitative treatment of mathematical finance. Computational approaches will be developed for simulating various financial instruments. In addition, the application of models and methods developed in some key problems of mathematical finance will be demonstrated to you.

MAN771 Computational Mathematics 4

Pre-requisites	(MAB522 or MAN522) and (MAB613 or MAN613)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

An essential skill for practicing applied mathematicians and engineers is the derivation and implementation of computational models for solving the equations that govern many of the physical processes encountered in research and industry. Through the investigation of specific case studies developed in Matlab, the derivation of numerical techniques, the implementation of efficient algorithms and the visualisation of the simulation results, students undertaking this unit will develop an understanding of the value of computational mathematics. The aim of this unit is to provide you with the opportunity to employ a number of the skills that you have developed in the discipline of computational mathematics, combining them in a coherent manner for solving topical and relevant real world problems.

MAN774 Perturbation Methods

Pre-requisites	(MAN413 or MAB413) and (MAN521 or MAB521)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes: regular and singular perturbation expansions; asymptotic expansions, strained coordinates; boundary layer analysis and matched asymptotic expansions; selected examples from industrial applications and mathematics applied in medicine and biology.

MAN775 Statistical Modelling of Financial Processes

Pre-requisites	MAB524 and MAN536
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Postgraduate students pursuing a career in finance will find that financial modelling is a major area of application of mathematics and statistics. In fact, its models and methods, which draw on recent developments in diverse areas of mathematical sciences such as stochastic analysis, partial differential equations and probability theory, provide needed tools for quantitative modelling and financial analysis. In fact, its fundamental principles enhance a general education for life. This unit is one of a suite of units in statistics and operations researchDecision Science, which will equip you with essential skills for pursuing a career in business and finance.

MAN778 Applications of Discrete Mathematics

Pre-	MAN461 or MAB621

requisites	
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit has two main areas of study. One is the application of graph theory to a number of practical problems including trees and shortest path algorithms. The other area is advanced number theory and includes the topics of divisibility, congruence, multiplicative functions, primitive roots, quadratic residues and applications to cryptology including the RSA algorithm.

MAN787 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research in the Mathematical and Statistical Sciences has contributed significantly to a vast range of social and economic amenities. Such research can be intellectually challenging and rewarding and generally requires a range of capabilities to be developed to a level that is not normally achieved in a bachelor degree of three years duration. This unit offers you the opportunity to develop and/or refine some of these capabilities by undertaking a research project that is significant in the context of the social and economic outcomes alluded to above. Permission to enrol in this unit must be obtained from the Course Coordinator.

MAN787 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research in the Mathematical and Statistical Sciences has contributed significantly to a vast range of social and economic amenities. Such research can be intellectually challenging and rewarding and generally requires a range of capabilities to be developed to a level that is not normally achieved in a bachelor degree of three years duration. This unit offers you the opportunity to develop and/or refine some of these capabilities by undertaking a research project that is significant in the context of the social and economic outcomes alluded to above. Permission to enrol in this unit must be obtained from the Course Coordinator.

MAN787 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Research in the Mathematical and Statistical Sciences has contributed significantly to a vast range of social and economic amenities. Such research can be intellectually challenging and rewarding and generally requires a range of capabilities to be developed to a level that is not normally achieved in a bachelor degree of three years duration. This unit offers you the opportunity to develop and/or refine some of these capabilities by undertaking a research project that is significant in the context of the social and economic outcomes alluded to above. Permission to enrol in this unit must be obtained from the Course Coordinator.

MDB001 Foundation: Scientific and Quantitative Literacy

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

It is recognised that Mathematics and Science play crucial roles in the functioning of modern society through their contribution to our understanding of our physical, social and personal worlds, and their usefulness in solving problems a wide range of problems. As students engage with the content of the unit, for example, number, time, astronomy, navigation, measurement, geometry, probability, they will recognise that each is a discipline with a language and methods of thinking that have evolved in historical and social contexts. Knowledge of both areas is important for people to be critically reflective thinkers and active participants in society, and for their life long learning.

MDB002 Teaching Primary Mathematics 1

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

Mathematics is an essential key learning area of the primary school curriculum. Mathematics is closely linked to numeracy, but it extends beyond the day-to-day demands of society. Mathematics underpins and assists in the growth of technology, economics and finance, communication, and the new science of biotechnology. All students complete two units of Mathematics Education. Mathematics Education I focuses on the teaching of numbers, operations, and measurement. The content considers the role of technology in these three strands.

MDB003 Teaching Primary Mathematics 2

Pre-requisites	MDB002
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit investigates new ideas in the teaching and learning of the above topic areas. Students study the development of conceptual understanding in the areas of space and shape, chance and data, and pre-algebra with a particular emphasis on understanding the 'big' mathematical ideas and principles behind these topics.

MDB004 Teaching Primary ICT

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

Information and Communication Technologies (ICT) play a significant role in contemporary society and therefore technological literacy is increasingly being seen as an essential part of education. This form of literacy involves the ability to create, use, manage and understand ICT in a range of contexts. In addition, new networked technologies have brought about the potential for expanding learning opportunities. These necessitate the re-examination of effective learning and teaching principles, the role of the learner, the role of the teacher, creating worthwhile partnerships and the use of ICT within the learning situation.

MDB005 Teaching Primary Design and Technology

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit is designed for students to explore content, pedagogical content knowledge and pedagogies important in design and technology education.

MDB006 Teaching Primary Science

Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

Becoming scientific and technologically

literate contributes to learners' capabilities as life-long learners by providing them with the knowledge and dispositions to question systematically their natural environment. In the prerequisite unit about Mathematics and Science Foundations, grounding in some basic concept areas that help to explain children's everyday experiences of the natural world and an understanding of the nature of science was explored. In this unit the opportunity is presented for students to develop exciting and innovative science programs at all levels of the primary school with a focus on developing scientific skills and abilities to retrieve and explore new scientific knowledge.

MDB010 Biology Curriculum Studies 2

Pre-requisites	MDB031
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an opportunity to develop as an learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment.

MDB013 Chemistry Curriculum Studies 2

Pre-requisites	MDB031
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit encourages students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students also develop a critically reflective orientation to their teaching experiences.

MDB015 Computing Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Computing is now an integral part of secondary education and information and communications technologies (ICTs) are used in all subject disciplines. This unit (the first of three computing curriculum studies units) introduces students to how ICT can be used to create meaningful learning experiences for students in teaching with, about and through computers.

MDB016 Computing Curriculum Studies 2

Pre-requisites	MDB015
Credit Points	12
Campus	Kelvin Grove

Computing is now an integral part of secondary education and information and communications technologies are used in all subject disciplines. This unit builds on the understandings and skills development of the prerequisite and introduces students to the discrete syllabi that constitutes the senior secondary computing curriculum in Queensland secondary schools.

MDB017 Computing Curriculum Studies 3

Pre-requisites	MDB016
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the previous two units and prepares students to teach the subjects within the senior secondary computing curriculum in Queensland secondary schools.

MDB019 Earth Science Curriculum Studies 2

Pre-requisites	MDB031
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit encourages students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students develop a critically reflective orientation to their teaching experiences.

MDB021 Mathematics Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Teachers of middle and secondary school mathematics need a range of understandings and skills to be effective practitioners in the complex social and technological environment of the classroom. This unit introduces students to the teaching and learning of mathematics at the secondary school level. It begins development of students' knowledge and understanding of the secondary mathematics curriculum and their curriculum development skills. The unit is an important component of preparation for Field Studies 1.

MDB022 Mathematics Curriculum Studies 2

Pre-requisites	MDB021
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops students' understanding of the school mathematics curriculum and extends their knowledge and understanding of inclusive learner-focused approaches to mathematics curriculum development.

MDB023 Mathematics Curriculum Studies 3

Pre-requisites	MDB022 or MDB453 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit extends students' knowledge and understanding of mathematics curriculum with an emphasis on catering for the range of students engaged in secondary education, inclusive practices and diagnosis of mathematical learning difficulties.

MDB025 Physics Curriculum Studies 2

Pre-requisites	MDB031
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provide an opportunity for students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Student develop a critically reflective orientation to their teaching experiences.

MDB028 Science Curriculum Studies 2

Pre-requisites	MDB031
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit encourages students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students develop a critically reflective orientation to their teaching experiences.

MDB030 Understanding and Educating Gifted Learners

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This elective addresses the education of gifted students by exploring the appropriate curriculum interventions necessary to meet their specific needs. Some 10-15% of students are identified as gifted and these require specialist educational interventions to ensure that the curriculum offers the appropriate challenge to develop their potential and to avoid boredom, frustration or underachievement. In order to establish appropriate curriculum and pedagogical approaches an understanding of the nature of giftedness is also necessary.

MDB031 Science Education Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is to provide you with opportunities to examine praxis in science classrooms in order to help you develop principles for the establishment and management of effective science learning environments.

MDB033 Science Education Curriculum Studies 3

Pre-requisites	MDB010 or MDB013 or MDB019 or MDB025 or MDB028
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is to provide opportunities for you to develop an understanding of the theoretical underpinnings of a selection of strategies and resources used in the teaching of science.

MDB120 Mathematics Curriculum and Pedagogies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides content knowledge and pedagogical strategies to promote the mathematical development (both cognitive and social) of students' future pupils.

MDB349 Excursions in Mathematical Reasoning

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit includes the following: the concept of thinking and intelligence; the nature of mathematical thinking during the first half of this century; modern ideas on the nature of mathematical thinking; the thinking skills movement and programs designed to foster thinking; analysis of children's thinking in solving mathematical problems; analysis of students' 'everyday cognition' together with their thinking in mathematical situations.

MDB388 Numeracy in Games of Skill and Chance

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit considers the development of probabilistic ideas and concepts through the playing and analysis of games of change and skill.

MDB391 Earth And Space

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines scientific concepts in important areas of space, time and motion, the origin and history of earth and its environments, and light and optics. Scientific principles and techniques for observing space and earth phenomena are investigated.

MDB397 Digital Media in Education

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit addresses the following: understanding multimedia and multimedia systems; application of multimedia in education and training; multimedia authoring software; designing and creating multimedia applications for educational environments.

MDB440 Computers And Education

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit provides an overview of microcomputer hardware and software with an emphasis on the usefulness of various components in schools. It considers the use of educationally valuable application software and critically examines a variety of uses of computers in education including the impact of computers on society and education in particular.

MDB453 Mathematics Curriculum 2: Middle Years and Vocational

Pre-requisites	MDB021 or MDB002 or EAB027
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit assists students to develop a deeper understanding of mathematical content applicable to the middle school and the ways that the content may be integrated into other key learning areas.

MDB454 Science, Technology and Society

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit investigates the interactions and effects that exist between modern science, technology and society both from a social and historical viewpoint. Advances such as the advent of the Internet, genetic modification and nanotechnology are discussed within a context of globalisation, global communications and social change. The

unit also includes a study of the nature of science and technology and the nature of scientific knowledge. A major feature of the unit involves groups of students developing and delivering 'a hypothetical' on a contemporary science and technology issue affecting society.

MDB455 Mathematics in Life and Work

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

You will explore mathematics in a range of life-related situations, including mathematics in history. As well as building your knowledge of the uses of mathematics in specific situations, the unit will assist you to deepen your understanding of the mathematics that underlies these situations.

MDN642 Digital Pedagogies

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-2 (EXT)

This unit includes a critical investigation of digital pedagogies and the changes they are making to the role of the teacher, and the interactions between students, teachers and subject content. The unit assists students in designing and moderating worthwhile learning experiences in online environments or physical environments that make use of digital technologies.

MDN643 Digital Perspectives

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit includes a comprehensive examination of relevant theory, research, policy, and/or practice in the mediation of learning and communication through technology. Students are encouraged to critique the rhetoric and reality of ICT integration in learning networks.

MDN644 Digital Expectancies: Innovative Practices With Emerging Technologies

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-2 (EXT)

This unit will formalise understandings of digitally expectant learners and how emergent technologies can be used to meet their needs, preferences, attitudes and habits. It will investigate the nature and affordances of emergent technologies and apply this understanding to a learning context.

MDN645 Digital Leadership

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

Digital leadership is much more than resource acquisition and management. The new opportunities and chances of digital learning have great significance for the future of our information and learning society. To be an effective leader one needs to look within and beyond their organisations to determine the right direction for action.

MDP452 Middle Years: Mathematical Understandings

Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT)

This unit will provide the content knowledge and pedagogical strategies to promote mathematical development (both cognitive and social) in the middle phase of learning. The unit will provide a theoretical framework and the opportunity to participate in collaborative problem tasks. There will be a focus on students developing a broader range of thinking and reasoning processes as they work with the mathematical content. Students will be encouraged to critically evaluate ideas, reflect on their learning and freely express personal viewpoints.

MDP453 Middle Years: Transdisciplinary Science and Technology

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-2 (EXT)

This unit aims to develop the skills and understandings required to integrate science and technology KLAs across the curriculum and create meaningful learning experiences that cater for the diverse needs of middle years students.

MDP456 Mathematics Education Curriculum Studies 1

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT)

This unit provides an introduction to the learning and teaching of mathematics and to begin the development of your understanding of learning environments conducive to the effective learning of mathematics.

MDP457 Mathematics Education Curriculum Studies 2

Pre-requisites	MDP456 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit is to further develop your understanding of the school mathematics curriculum and to extend your knowledge and understanding of inclusive learner-focused approaches to mathematics curriculum development.

MDP458 Mathematics Education Curriculum Studies 3

Pre-requisites	MDP457 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit extends your knowledge and understanding of mathematics curriculum with an emphasis on catering for the range of students engaged in secondary education, inclusive practices and diagnosis of mathematical learning difficulties.

MDP459 Science Education Curriculum Studies 1

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT)

This unit is to provide you with opportunities to examine core educational theory in order to understand the basis for teaching and learning in science and thus establishing and managing effective learning environments.

MDP460 Science Education Curriculum Studies 2

Pre-requisites	MDP459 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (INT, EXT)

This unit is to provide an opportunity for you to develop as a learner-centred teacher in the context of senior schooling, who can plan to meet the needs of individual students in a varied, stimulating and safe environment.

MDP461 Science Education Curriculum Studies 3

Pre-requisites	MDP460, MDP462, MDP463, MDP464 or MDP465 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit is to provide opportunities for you to understand the theoretical underpinnings of an extensive range of strategies and resources used in the teaching of science.

MDP462 Biology Curriculum Studies 2

Pre-requisites	MDP459 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT, INT)

This unit provides an opportunity to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment.

MDP463 Chemistry Curriculum Studies 2

Pre-requisites	MDP459 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit encourages students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students also develop a critically reflective orientation to their teaching experiences.

MDP464 Earth Science Curriculum Studies 2

Pre-requisites	MDP459 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit encourages students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students develop a critically reflective orientation to their teaching experiences.

MDP465 Physics Curriculum Studies 2

Pre-requisites	MDP459 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit encourages students to develop as a learner-centred teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students develop a critically reflective orientation to their teaching experiences.

MDP470 Primary Maths: P-7

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The pedagogical methodology will consider strategies to develop what is important to prepare individuals in a rapidly changing society that is ever more dependent on mathematical understanding in diverse fields, never envisaged just 10 years ago. The core of the content will be based on the Queensland Essential Learnings (Mathematics) and the Australian Curriculum: Mathematics, currently being developed by the Australian Curriculum Assessment and Reporting Authority (ACARA).

MDP471 Primary Science: P-7

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Teaching science and technology in primary schooling contexts needs to focus on developing students' skills of inquiry and investigation with opportunities for students to explore a wide range of phenomena that relate to the natural and designed world. This unit is designed to develop some fundamental curriculum, pedagogical and assessment practices associated with teaching science and technology in the primary years of schooling.

MGB200 Leading Organisations

Pre-requisites	BSB115 or CTB115
Anti-requisites	MGB211, CTB211, MGB222, CTB232
Equivalents	MGX200
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit introduces you to a range of perspectives in understanding human behaviour and its context within organisation structures. The unit also enables you to interpret, analyse, evaluate and explain conditions and consequences of work in organisations with a view to understanding and appreciating complex management issues in day to day experiences in business.

MGB201 Contemporary Employment Relations

Pre-requisites	BSB115 or CTB115
Equivalents	MGX201
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit will develop your skills in understanding the effects of both domestic and international legal environments relating to employment relationships. This is important for developing practical, workable business strategies and HRM interventions

MGB207 Human Resource Issues and Strategy

Pre-requisites	BSB115 or CTB115
Equivalents	CTB207, MGX207
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides a broad overview of the role and functions of human resource management (HRM) and explores the contribution of HRM to business performance and quality of work life. This

unit gives you a foundation for professional practice in HRM and a practical introduction to the ways that organisations go about aligning the contributions of their people with business goals.

MGB210 Managing Operations

Pre-requisites	BSB115 or CTB115
Equivalents	CTB234, MGX210
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit extends general management approaches to the production operations subsystems of service and manufacturing organisations. The unit focuses on the deployment of productive resources in order to maximise the added value of services and products. Issues of quality and efficiency are considered analytically in terms of broader strategies and constraints. It considers the opportunities that new technology brings to operational strategies in both manufacturing and service. Project management principles are considered in relation to resource deployment and continuous improvement.

MGB220 Human Resource Decision Making

Pre-requisites	BSB123 or BSB122
Anti-requisites	AMB201, CTB201
Equivalents	MGX220
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit will develop your knowledge and skills that are necessary for diagnosing problems at work, gathering data and information about these problems, and analysing the data and information to derive solutions and inform decision making.

MGB223 Entrepreneurship and Innovation

Pre-requisites	BSB115 or CTB115
Equivalents	CTB223, MGX223
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the nature and characteristics of entrepreneurship and innovation and explores the inter-relationship between the two within contemporary economies from managerial perspective. Learning will be directed towards developing the theoretical and applied knowledge, skills, and attitudes that will support and enhance innovation and enterprise creation activity, through the development of a business plan. The unit is designed for those individuals interested in creating a new venture or working in industries as employees of venture owners or those that serve this sector. Students will have opportunity to build a comprehensive plan of their business concept.

MGB225 Intercultural Communication and Negotiation Skills

Pre-requisites	BSB115, CTB115, BSB119 or BSB124
Anti-requisites	MGB312
Equivalents	IBB205, MGX225
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The course develops students' abilities to identify and resolve problems in cross-cultural communication or negotiation situations where cultural differences have created misunderstandings or undesirable or unexpected outcomes. It first explores the concept of 'national culture' by considering the work of major theorists of cultural value dimensions - from Hall to Schwartz. Students are encouraged to analyse communication/negotiation process issues in terms of these value dimensions and to practise managing the process of communication/negotiation to improve their outcomes.

MGB305 HRM Strategy and Policy

Pre-requisites	MGB314
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This is the capstone of the HRM extended major. The primary objective is to integrate HR concepts and issues into the wider business and environmental context; a range of historical features, professional and ethical matters are considered; policy development and evaluation is examined; an experiential approach based in cases and/or simulations is adopted.

MGB306 Independent Study

Other requisites	Subject to Unit Coordinator Approval. Students must complete at least 96 credit points of approved study to be considered for enrolment in this unit.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit enables students to demonstrate an ability to direct their own learning, a key competence for professionals who must keep themselves up-to-date in their area of expertise. Either individually or in small groups, students undertake one or several learning activities with the approval of a supervisor. Appropriate activities include literature review, research (mini-thesis), project, practicum (work placement), or an alternative deemed acceptable by the supervisor.

MGB309 Strategic Management

Pre-requisites	MGB200, MGB211, CTB211, MGB222, or CTB232
Anti-requisites	MIB314
Equivalents	MGX309
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In this unit fundamental elements of strategy, which can be used in the decision making process, are placed in a framework that is developed within the particular context of Australia's economic development position. The emphasis is upon process and content issues that affect the strategic performance and positioning of the organisation. This involves creating an understanding of the universal building blocks of competitive advantage at the business, corporate and international levels. By understanding the nature and determinants of competitive and strategic advantages, students should enhance their professional competences to be able to take a more strategic and critical perspective.

MGB310 Sustainability in A Changing Environment

Pre-requisites	MGB200, MGB211, CTB211, MGB222, or CTB232
Anti-requisites	MGB334, CTB334, MGB212
Equivalents	MGX310
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides participants with an opportunity to investigate selected and critical issues in the relationship between business activity and the imperative of creating sustainable futures. The unit draws on interdisciplinary sources to encourage the development of a systemic view that incorporates global, corporate, and personal levels of analysis. The unit prepares participants to make a significant contribution to the sustainable development of organisations and society. The unit will be of value to business and non-business students seeking careers in private, public, and not-for-profit sectors.

MGB314 Organisational Consulting and Change

Pre-requisites	MGB211, CTB211, MGB222, CTB232, or MGB200
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Managing change is a fundamental skill required by prospective managers and professionals. This unit provides opportunities for students to develop a theory in practice orientation to consulting to individuals, groups, and organisations. Hence content theory and process theory is addressed. The focus of this unit is on human process issues and change. The unit examines a range of human process interventions designed to improve organisational effectiveness. Attention is also given to change strategies that are socially and culturally inclusive. Graduates of this unit should be able to be productive members of organisational change teams.

MGB320 Recruitment and Selection

Pre-requisites	MGB339 or MGB221
Equivalents	MGX320
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit examines the most effective techniques for recruiting and selecting the best people for organisations, in the context of current pressures on attracting and keeping skilled, talented people in the workforce. Commonly used recruitment and selection techniques are covered, emphasising the validity and reliability of each technique, to enable the best strategies to be developed.

MGB324 Managing Business Growth

Pre-requisites	MGB223
Equivalents	MGB218, MGX324
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to provide skills in the analysis, solutions and implementation of the general management issues that SME owners have to manage in their growing operations. The unit brings together the different functional aspects of managing an established SME and how they are best managed from the owner's (general manager's) point of view. It also provides opportunity to bring students into contact with real world SME owners and their venture management issues.

MGB331 Learning and Development in Organisations

Pre-requisites	MGB211, CTB211, MGB222, CTB232, or MGB200
Equivalents	MGX331
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to equip you with the skills and knowledge to meet strategic organisational human resource development requirements. The unit explores learning and development concepts and approaches and the role of learning and development as a strategic partner to management. You will learn how to design, implement and evaluate systems for learning in organisations as part of a strategic approach to human resource development.

MGB335 Project Management

Pre-requisites	(MGB210 and MGB309) or (MGB210 and AMB303)
Anti-requisites	KXB202
Equivalents	MGX335
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit develops knowledge in the areas relating to effective management of projects (as distinct processes). This knowledge is gained by focusing on the central issues of project selection, modelling, planning, control and evaluation. Case study projects are used throughout the unit and are mainly from the services industry sector. The unit seeks to develop the technical skills (tools and techniques) as well as the people (behavioural) skills needed for effective management of projects.

MGB338 Workplace Learning

Other requisites	An application, interview and subsequent approval by the unit coordinator is required to enrol, in addition to the completion of a minimum of 192 credit points of study and a GPA of 4.0 or higher
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit entails a structured program of workplace learning in which students are exposed to a variety of organisational issues. For the duration of their experience, students work on a specific HRM project of relevance to their host organisation. Building upon knowledge acquired in the HRX major, students' exposure to HRM in an actual organisational setting enhances understanding of links between theory and practice and develops skills and abilities through a professional learning experience.

MGB339 Performance and Reward

Pre-requisites	MGB201, MGB207, or CTB207
Equivalents	MGB221, MGX339
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with the basic competencies expected of HR practitioners in managing performance and reward/compensation systems, which are among the most important strategies used by organisations to support competitive advantage. Performance and Reward Management is a key functional area of HRM and it is imperative that you understand the strategic framework within which these decisions are made.

MGB340 International Business in the Asia-Pacific

Pre-requisites	MGB225, IBB205, IBB217, or IBB208
Anti-requisites	IBB317
Equivalents	MGX340
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Australia is situated in the fastest growing region in the world - the Pan-Pacific rim. The aim of this unit is to meet the needs of future business professionals working internationally and particularly within the Pan-Pacific region, to understand the nature of this region's business environment.

MGB341 Operational Risk Management

Pre-requisites	MGB309
Anti-requisites	IBB306
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to develop student competencies in analysing risk management issues in national and international contexts and build a strong appreciation of managing the organisational uncertainty in the current global environment. It introduces conceptual and practical applications of risk management techniques used in private and public organisations by combining lectures with practical 'hands-on' workshops. The unit examines: conceptual bases of risk management; international, national and sub-national regulatory frameworks; corporate risk management in international firms; business continuity planning; security risk management; emergency response planning; managing crises in organisations; participatory 'desktop' simulations of crisis decision making.

MGB370 Personal and Professional Development

Pre-requisites	MGB331 and BSB124
Equivalents	MGB315, MGX370
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit develops personal, interpersonal and team skills that distinguish outstanding human resource, management and other professionals. Recent literature has identified the need for professionals to acquire knowledge in the areas of self management and the management of others to contribute to organisational performance. To achieve this, Personal and Professional Development is positioned at the conclusion of the course to build upon concepts learned in introductory and intermediate units with a strong focus on the application of theory to practice.

MGN409 Introduction to Management

Anti-requisites	GSN401 and GSZ401
Credit Points	12
Campus	Gardens Point

This unit examines the following: the functions and roles of managers; concepts and principles and their practical applications; the key management functions; areas of planning, organising, staffing, directing and controlling; production/operations management and the management of quality; entrepreneurship and business planning; and important problems, opportunities and trends facing managers in Australia analysed from the viewpoint of relevant academic disciplines.

MGN410 Employment Relations

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit looks at the following: employment relations; employee and union action; the role of governments and industrial tribunals; alternative methods and pressures to change traditional Australian systems; the Australian system of labour management relations; systems of regulation in the employment area; negotiating skills; and the resources required for mobilising change in this area.

MGN412 People in Organisations

Anti-requisites	GSN409, GSN419 and GSZ409
Credit Points	12
Campus	Gardens Point

This subject aims to provide a broad understanding of organisational behaviour as a base for future study and practice of management. It moves from a micro-perspective on individual behaviour through the interface between the individual and the organisation to overall characteristics of organisations which shape the behaviour of their members. The aim is to provide an understanding of why employees feel and act the way they do in organisations and considers methods for enhancing positive employee attitudes and behaviours and organisational effectiveness. The emphasis is on understanding basic assumptions and models, major theoretical issues, methods of measurement and practical implications.

MGN421 Strategic HRM

Pre-requisites	MGN506 and 84cp of other MGN units
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

HRM is concerned with the relationship between people management strategies and organisational goals and objectives. This capstone unit provides HRM students with the opportunity to apply their learning to this relationship in a systematic way. It requires them to produce high quality HRM advice that provides direction for practicing line managers consistent with organisational goals and objectives. The learning strategies in the unit challenge students to identify contemporary issues of organisation and management and to interpret these using the paradigms of HRM.

MGN423 Contemporary Strategic Analysis

Anti-requisites	BSN407 and MGN504
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit focuses upon developing managers' understanding of the strategy concept and placing the fundamental elements of strategy in a framework for use in the decision making process. Taking the perspective that many managers make decisions that can have strategic implications, the emphasis is upon studying those issues that can affect the strategic positioning of the organisation. This involves creating an understanding of the universal building blocks of competitive advantage at the business, corporate and international levels. By understanding the nature and determinants of competitive and comparative advantages, students will be well positioned to take a more strategic perspective in their organisational activities.

MGN431 Strategic Human Resource Development

Pre-	MGN440

requisites	
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Strategic HRD provides a theoretical and practical framework for planning and implementing HRD within today's organisations. It examines the critical theoretical approaches underpinning learning and skills development and relatesthese in a practical way to the HRD challenges faced by organisations. This unit also provides exposure to contemporary international HRD ideas and practices to develop an understanding of the contribution of HRD to the broader economic context.

MGN433 Managing High-Performance Organisations

Pre-requisites	MGN409
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Managing High-Performance Organisations is designed to provide a bridge between HRM-discipline specific and strategic/general management perspectives. The unit is therefore a centrepiece of the postgraduate HRM program. The unit serves the vitally important role of locating HRM in to its broader organisational and general management context. It also aims to develop advanced level business knowledge and skill and develop conceptual frameworks for integration and high level impact of HRM with business success and performance.

MGN440 Designing Effective and Sustainable Organisations

Anti-requisites	MGN427
Credit Points	12
Campus	Gardens Point

This unit examines the interplay between human resource management policies and processes and their contribution to sustainable competitive advantage and organisational effectiveness. HRM is considered from stakeholder, strategic and functional perspectives and an open systems model is used to introduce key processes and practices. The unit fosters discipline knowledge, analytical and action taking competencies and prepares students for advanced study in the field.

MGN441 Leadership and Executive Coaching

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

One-to-one executive coaching has emerged as a popular and powerful intervention for improving the performance and satisfaction of individual executives. More recently, its use has been expanded into a variety of related organisational interventions. Human resource professionals are often responsible for making decisions about how coaching is used in organisations, particularly in relation to leadership development. This unit will equip students with expertise in understanding how leadership and executive coaching intersect in organisations. It will cover the theoretical foundations and models of evidence-based executive coaching, give opportunities to acquire and practice foundational coaching skills, as well as providing feedback for self-development.

MGN442 Self Leadership

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

In the contemporary business environment professionals are empowered to manage their own growth and development in order to facilitate meaningfulness in organisational life. The unit on Self-leadership is an elective in the HRM major and is delivered predominately in an ‘on-line’ mode to enable an ‘anytime’ and ‘anywhere’ approach to your self-development work. This approach invites you to take the necessary time to reflect and develop greater insight into your own thinking and behaviour.

MGN443 Talent Management

Anti-requisites	MGN429
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Australia's growing skills shortage and the prospect of an ageing workforce threaten the sustainability, productivity and growth of many industry sectors. These pressures have made talent management a strategic priority for many organisations. At its heart, talent management is simply a matter of anticipating the need for human capital and then developing a plan to meet it. However, the adaptive capacity of traditional workforce planning methods appears inadequate for today’s uncertain business environment. This unit examines talent management as an alternative to traditional HR planning practices. It focuses on developing both a theoretical framework to guide talent management initiatives and applied skills (e.g. identification of critical roles, workforce forecasting and analysis) required to develop a talent management plan.

MGN444 Business in Asia

Anti-requisites	MIN403
Equivalents	IBN403, MGX444
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit is to enable an intensive study of business and markets in Asia. The development of the major industries is examined, together with major intra-regional patterns of trade, commerce and finance. Significant economic, political and social factors determining developments are focused on, as well as regulatory restraints governing market access. Students are required to undertake a project that requires the application of knowledge of the region to a business issue.

MGN445 Business in Europe

Anti-requisites	MIN404
Equivalents	IBN404, MGX445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit enables a more intensive study of business and markets in Europe. The development of the major industries will be examined, together with intra-regional patterns of trade, commerce and finance. A particular focus will be the development of a single European market and its international implications. Significant economic, political and social factors determining developments will be focussed upon, as well as regulatory restraints governing market access. The student will be required to undertake a project which requires the application of knowledge of the region to a business issue.

MGN446 Business in Australia

Anti-requisites	MIN435

Equivalents	IBN435, MGX446
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit introduces students to the business environment in Australia. Students examine the geographical, historical, socio-cultural, political, regulatory, demographic, economic, legal, locational and other factors that have influenced, or still impinge upon, doing business in Australia in the current international environment. Learning activities include factory visits and industry analysis.

MGN447 Managing in a Globalised Economy

Anti-requisites	BSN408
Equivalents	IBN408, MGX447
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This core unit examines the forces of globalisation, the diversity of international environments and their impact on business functions at the operational level. It examines the processes and challenges of internationalising the business operation as firms strive to compete successfully in the global marketplaces. Areas of study include the growth of international business and globalisation, international business motives and forms, the nature and challenges of the diversity of environments, and managing and controlling business operations. An international business simulation game is used to facilitate the understanding of business as a system of integrated operations and environments.

MGN448 Negotiating Across Borders

Anti-requisites	GSN462
Equivalents	IBN409, MGX448
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit develops students' skills in negotiating intra- and inter-culturally. It provides students with a tool-box of negotiation skills and then explores the relationship between cultural value dimensions and negotiating behaviours. Students practise their negotiating skills with members of their own culture, in cross-cultural dyads and in multi-cultural teams to build confidence and capability in negotiating and influencing.

MGN505 Consulting and Change Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit considers the origins, nature and effect of social change on individuals, organisations and communities. Theories and models of change are used to explore planned and unplanned changes currently occurring, particularly as these relate to possible futures. Emphasis is on the strategies and skills required to initiate and participate in effective change management.

MGN506 Contemporary Issues in Human Resource Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The main objectives of this unit are to identify, analyse and report on contemporary issues in HRM and to research information relevant to identified topics. The content may vary according to which issues are current or predictably important in the future. Special expertise of staff, visiting scholars or distinguished HRM professionals may be utilised.

MGN509 HRM Project 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

MGN510 HRM Project 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

MGN524 Special Topic in Management 1

Credit Points	12
Campus	Gardens Point

In this unit students undertake specialised study on a topic area relevant to particular needs. It permits an in-depth examination of an issue of importance. The content varies depending on the issue examined and the academic member(s) involved (including short-term visiting academics).

MGN528 Special Topic in Human Resource Management 1

Credit Points	12
Campus	Gardens Point

In this unit students undertake specialised study on a topic area relevant to particular needs. It permits an in depth examination of an issue of importance. The content varies depending on the issue examined, and the academic member(s) involved (including short-term visiting academics).

MGX200 Leading Organisations (Outbound Exchange)

Equivalents	MGB200
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX201 Contemporary Employment Relations (Outbound Exchange)

Equivalents	MGB201
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX207 Human Resource Issues and Strategy (Outbound Exchange)

Equivalents	MGB207
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX210 Managing Operations (Outbound Exchange)

Equivalents	MGB210
Credit Points	12
Campus	

Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX220 Human Resource Decision Making (Outbound Exchange)

Equivalents	MGB220
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX223 Entrepreneurship and Innovation (Outbound Exchange)

Equivalents	MGB223
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX225 Intercultural Communication and Negotiation Skills (Outbound Exchange)

Equivalents	MGB225
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX309 Strategic Management (Outbound Exchange)

Equivalents	MGB309
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX310 Sustainability in a Changing Environment (Outbound Exchange)

Equivalents	MGB310
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX320 Recruitment and Selection (Outbound Exchange)

Equivalents	MGB320
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX324 Managing Business Growth (Outbound Exchange)

Equivalents	MGB324
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX331 Learning and Development in Organisations (Outbound Exchange)

Equivalents	MGB331
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX339 Performance and Reward (Outbound Exchange)

Equivalents	MGB339
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

MGX340 International Business in the Asia-Pacific (Outbound Exchange)

Equivalents	MGB340
Credit Points	12
Campus	
Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

Teaching Periods	2012 XCH-1 (EXT); 2012 XCH-2 (EXT)

NQB201 Planet Earth

Equivalents	NRB230
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Earth Science impacts every aspect of modern life. Hence, the concepts of Earth Science are fundamental not only to the field of Geology, but also to Environmental Science, natural resource management, civil engineering and society at large. Planet Earth provides an introduction to Earth Science, including earth materials, geologic history, geological process at the Earth's surface, and the complex interplay between the lithosphere, atmosphere, hydrosphere and biosphere through geologic time. Thus, Planet Earth is a foundation unit for further studies in Geology and Environmental Science and also serves as a broad introduction to the world we live on.

NQB202 History of Life on Earth

Equivalents	NRB240
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit aims to provide you with an understanding of the processes of evolution and the changing environmental conditions through time that influenced the patterns of the evolution of life on this planet. The unit will provide you with practical experience in fossil plant and animal identification, classification and morphological interpretation. It will also enable you to apply palaeontological information to interpret the evolutionary history of higher taxa and the changing ancient depositional environments through time.

NQB302 Earth Surface Systems

Equivalents	NRB301
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Understanding long and short term climate and environmental change is now recognised as crucial to the interpretation of our biotic, geomorphic and cultural landscapes. To fully understand environment change it is important to recognise the interconnectedness between the atmosphere, hydrosphere, lithosphere, biosphere and humanity's place within these spheres over various temporal and spatial scales. Developing knowledge of past and present climate change and landscaping processes helps to predict future process pathways for natural resource management, civil engineering, risk analysis, and impact assessment in the context of both natural and anthropogenic induced change.

NQB311 Mineralogy

Equivalents	NRB333
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Minerals are the building blocks of rocks which comprise the solid Earth. The study of minerals is essential for understanding the structure and composition of the earth and the detailed processes of the rock cycle. Mineralogy forms the basis for petrology (the study of the genesis of rocks) and geochemistry, and is thus essential for Geoscience. The unit may also be of interest to chemists.

NQB314 Sedimentary Geology

Equivalents	NRB331
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with an introduction to sedimentology; both sediments and sedimentary rocks. The unit focuses on the link between the range of features preserved in sedimentary rocks and what those features tell us about sedimentary processes, depositional environments and the burial history of the rocks. The sedimentological processes and depositional environments observed in the modern world are discussed and used as a foundation for interpreting the evidence preserved in the ancient sedimentary rock record, in turn revealing much about earth processes in geologic history.

NQB321 Ecology

Pre-requisites	SCB110 or SCB112
Equivalents	NRB311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Ecology is the study of the factors that influence the distribution and abundance of organisms. Ecology deals with basic properties of individuals and the emergent properties of collections of individuals that form populations and the dynamics of these populations and their interactions with populations of other species. An understanding of basic ecological principles is central to managing species and ecosystems. This unit provides a broad theoretical background in the major concepts of plant and animal ecology. It serves the dual role of providing a thorough grounding in ecology for students from all faculties; and laying the conceptual foundation for later subjects in the ecology and environmental science.

NQB322 Invertebrate Biology

Equivalents	NRB370
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Anyone pursuing a career as an ecologist, environmental biologist, or teacher needs to be familiar with invertebrates, including their diversity and how they function. Because approximately 90% of all invertebrates are arthropods, this unit focuses on this dominant phylum, which includes all the animals with jointed exoskeletons (the insects, prawns and crabs, spiders, millipedes and more). The aim is to provide you with an overview of arthropod diversity, structure and function, as a basis for exploring the role of arthropods in natural and human-modified systems.

NQB323 Plant Biology

Pre-requisites	SCB112
Equivalents	NRB371
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with an introduction to fundamental evolutionary and ecological concepts in plant sciences. It aims to provide the basis for a conceptual framework and understanding of the diversity of plants with a particular emphasis on the Australian flora and the development of plant identification skills.

NQB403 Soils and the Environment

Pre-requisites	NQB302 or NRB301 or (ENB272 and ENB274)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will provide you with grounding in soil science (pedology) by emphasising pedological principles, their application to environmental soil analysis and management, and knowledge of ecosystem function of soil in a changing environment. This one of the most critical resources to consider within the context of climate change and is an essential component of environmental scientific studies. It also compliments and provides a basis for further biogeoscientific studies in the SC01 degree. Your knowledge of past and present soil processes will help you to predict process pathways and outcomes for the purposes of environmental planning and management, risk analysis, and impact assessment involving soils. It also contributes to your understanding of field survey and interpretation of soil phenomena in ecological, geological and environmental contexts.

NQB411 Petrology of Igneous and Metamorphic Rocks

Pre-requisites	NQB311 or NRB333
Equivalents	NRB436
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Igneous and metamorphic rocks compose the bulk of the Earth. Understanding what these rocks are and how they form is an essential part of the study of geology and is fundamental to a wide range of higher level units. This unit builds upon the knowledge and skills acquired in the prerequisite unit (NQB311 Mineralogy) by focusing on the description, classification and origins of igneous and metamorphic rocks. This unit aims to allow you to develop the theoretical and practical skills necessary to describe, classify and interpret igneous and metamorphic rocks.

NQB412 Structural Geology and Field Methods

Pre-requisites	NQB314 or NRB331
Equivalents	NRB434
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Structural geology, the deformation of earth materials, is one of the main elements in the core curriculum in geology. It is also essential to other subdisciplines of geology, such as foundation engineering and petroleum and mineral exploration. Geologists need to be able to describe and map structures, to understand the mechanical principles of rock deformation, and to be able to manipulate and calculate structural data. This unit fosters the skill of critical three- and four-dimensional analysis that usually sets geoscientists apart from other scientists and technologists.

NQB413 Stratigraphy

Pre-requisites	NQB314 or NRB331
Equivalents	NRB437
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Sedimentary rocks that cover most the Earth's surface are arranged into layers that record the history of the Earth's surface for large periods of geological time. The study of sedimentary rock layers (strata) is called stratigraphy. The types of sedimentary rocks that are preserved in particular strata are direct indications of the conditions that prevailed during their formation. The study of stratigraphy can help unravel the geological history of the area. Hence, stratigraphy is a fundamental part of the education of any geoscientist, and especially of those who wish to be involved in fossil fuel exploration and water resource management.

NQB421 Experimental Design

Pre-requisites	MAB101 or MAB104 or MAB105 , and NQB321 or NRB311
Equivalents	NRB412
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit deals with the theory and practice of experimental design and the quantitative approaches used for the investigation of ecological and environmental questions discussed in the prerequisite unit Ecology and developed in subsequent units in the ecology and environmental science majors. The aims of this unit are to to provide an introduction to the logic of experimentation and experimental design; build a practical extension on the theoretical basis of statistics obtained in other units using experimental situations commonly met in ecology and environmental science; and apply methods used to quantify the ecological attributes of populations and communities in experimental field situations.

NQB422 Genetics and Evolution

Pre-requisites	SCB112
Equivalents	NRB410
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A detailed understanding of the principles of genetics is required to fully comprehend modern developments in ecology and evolutionary theory. These principles will be taken forward to develop a clear understanding of the mechanisms and processes that drive evolution in natural populations. The unit provides the foundation for further studies in population and conservation biology. The aim of the unit is to provide a detailed understanding of the principles of genetics and their application to studies of evolution and ecology.

NQB423 Vertebrate Biology

Pre-requisites	SCB112
Equivalents	NRB470
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides background and details on the diversity and evolution of vertebrates. It is therefore an important unit of study for any graduate wishing to pursue a career that requires an understanding of the earth's biological diversity. The unit compliments other advanced units dealing with animal and plant diversity, and the ecology of these groups. The aim of this unit is for you to gain a deeper understanding of the evolution of vertebrate groups, vertebrate taxonomy, physiology and behaviour.

NQB501 Environmental Modelling

Pre-requisites	NQB412 or NQB421
Equivalents	NRB500
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The capacity for management of complex environmental problems such as climate change, now and in the future, will rely on the capacity of environmental managers to create, interpret and critically analyse models of environmental systems. Mathematical model building promotes the capacity to understand the interdependent relationships that characterise environmental systems and also provides a quantitative foundation for informed environmental management.

NQB502 Field Methods in Natural Resource Sciences

Pre-requisites	(NQB321 or NQB411) and (NQB302 or NQB412)
Equivalents	NRB601
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Field experience is an essential part of the professional training of geologists, environmental scientists, ecologists, and natural resource specialists in general. The theory and practice of methods to interpret, measure, map, and monitor important natural resource features and

characteristics are essential to the study of geological, ecological and environmental systems. Methods of survey, mapping and interpretation are necessary skills for resource assessment, geo-exploration, environmental impact assessment, land evaluation, baseline studies, and ecological investigations. There are varying emphases on these outcomes depending on the type of field survey you undertake in this unit.

NQB503 Spatial Analysis of Environmental Systems

Equivalents	NRB501
Credit Points	12
Campus	Gardens Point

The aim of this unit is to provide you with a sufficient understanding of maps and mapping, GIS procedures, and remote sensing for their application to elementary problems of spatial analysis of environmental systems. This is the basis for more advanced analysis that you are likely to encounter in subsequent university studies and/or your professional career.

NQB512 Economic Geology

Pre-requisites	NQB411, NQB413
Anti-requisites	NRB535
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The unit is divided up into two 6 week modules. The first module concentrates on the formation of coal deposits, the geology of Australian coal basins, formation and exploitation of coal seam gas and coal resource evaluation. The second module concentrates on the formation and preservation of economic mineral deposits.

NQB513 Geophysics

Pre-requisites	(NQB201 or NRB230) and (NQB412 or NRB434)
Equivalents	NRB534
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Geophysics is an integral branch of geology, providing many of the most useful methods of imaging the subsurface of the earth. These methodologies are useful in disciplines as diverse as plate tectonics, oil and mineral exploration, hydrogeology, environmental geology, engineering geology, and seismic hazards. The aim of the unit is to provide you with the core knowledge and skills of geophysical measurements, processing of data, and geological interpretation of geophysical data.

NQB521 Population Genetics and Molecular Ecology

Pre-requisites	NQB422
Anti-requisites	NRB510
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is an extension of NQB422 Genetics and Evolution. Topics include the genetic structure of populations and processes of evolutionary change; natural selection, inbreeding and adaptation, species and speciation theory; ecological genetics; the genetics of behaviour.

NQB523 Population Management

Pre-requisites	NQB321, NQB421
Anti-requisites	NRB511
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit develops the theoretical treatment of populations as a unit of study and integrates the content of previous ecology units into approaches for the management of biological populations. The unit focuses on those interactions that are most relevant to pest control, but the unit is also of fundamental importance to harvesting and conservation biology.

NQB601 Sustainable Environmental Management

Equivalents	NRB600
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides background and details on global sustainable management issues and practices with a focus on Australia. It is therefore an important unit of study for any graduate wishing to pursue a career in environmental science who shares an abiding interest in the state and sustainable management of our planet. The unit compliments other advanced units dealing with environmental science and its practice. The aim of this unit is to gain deeper understanding of a variety of current issues in environmental management; their multi-disciplinary nature, the science behind them, and the ways of achieving sustainable environmental management in scientific and practicable ways.

NQB602 Environmental Chemistry

Pre-requisites	PCB140 or PCB142 or SCB111 or SCB121
Equivalents	NRB440
Credit Points	12
Campus	Gardens Point

Focusing on fundamental environmental principles, this unit provides essential material for students majoring or co-majoring in any of several disciplines: earth science, environmental science, ecology, biodiversity and chemistry. Material covered includes: basic chemical principles underlying global, regional and local environmental processes; behaviour of natural and synthetic chemical species in the environment and biota (basic toxicology); and basic concepts in applied biogeochemistry, bioremediation and bioleaching. The unit also fosters development of practical and theoretical environmental monitoring skills using physicochemical parameters. Such monitoring data is used to promote informed environmental management through facilitation of scientific hypotheses testing about the environment; supply of data for model validation; testing compliance with regulations and guidelines; and providing data for environmental impact and risk assessment.

NQB612 Basin Analysis and Petroleum Geology

Pre-requisites	(NQB413 or NRB437) and (NQB513 or NRB534). NQB513 can be studied in the same teaching period as NQB612
Equivalents	NRB636
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of the unit is to provide you with a fundamental working knowledge of sedimentary strata at regional and basin-wide scales, so as to allow you to solve problems in the exploration and modern environmental management sectors. This unit fosters the skill of critical three- and four-dimensional analysis that usually sets geoscientists apart from other scientists and technologists, and

develops an understanding of exploration and production aspects of the fossil fuel industries. Undertaking this unit, you will acquire: the conceptual and technical tools to enable you to rationally interpret the distribution of rock units in space and time with emphasis on predicting the occurrences of petroleum resources; an understanding of the genesis and setting of hydrocarbon resources; and an understanding of the techniques of exploration, evaluation and utilisation of petroleum.

NQB613 Plate Tectonics

Pre-requisites	(NQB412 or NRB434) and (NQB314 or NRB331) and (NQB411 or NRB436) and (NQB513 or NRB534). NQB513 can be studied in the same teaching period as NQB613
Equivalents	NRB635
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit considers geological observations in the context of a unifying theory. It examines lithospheric plates, plate geometries, Earth morphology, relative and absolute plate movements, stresses of plate interactions, types of plate boundaries, and orogenesis. It also examines the development of the most important geologic theory of the 20th century.

NQB614 Groundwater Systems

Pre-requisites	NQB302 or NRB301 or ENB383
Equivalents	NRB633
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit focuses on the origin, occurrence and movement of groundwater; aquifer properties; chemistry and quality of groundwater; exploration methods for groundwater; drilling methods and well testing equipment; assessment of groundwater problems, both supply and quality; and introduction to modelling of groundwater systems. Groundwater resources of Australia are covered and current issues. Lectures are supported by desktop excercises. Students will obtain practical experience with pump tests and computer modelling. There is interaction with government and private sector hydrogeologists, and a field site visit for hands-on well testing.

NQB615 Geochemistry

Pre-requisites	NQB311
Equivalents	NRB536
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit aims to allow students to have the theoretical knowledge and practical skills necessary to use the wide range of geochemical tools that are standard for modern geoscientists to address environmental and geological problems.

NQB622 Conservation Biology

Pre-requisites	NQB321 or NRB311, and NQB422 or NRB410
Equivalents	NRB611
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Conservation Biology is the application of ecological theory and principles to the problem of the maintenance of viable populations of rare, threatened or endangered species, or ecological systems. The unit integrates ecological and genetic material covered in earlier units to provide an understanding of factors that enable the maintenance or enhancement of populations. The unit examines biodiversity and its determinants, the process of extinction, population viability analysis and the diagnosis and treatment of population declines, habitat fragmentation, metapopulation processes and the design of natural reserves, and conservation genetics.

NQB623 Ecological Systems

Pre-requisites	NQB321 or NRB311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The science of ecology examines the distribution and abundance of organisms at a number of organisational levels from individuals to landscapes. At each of these levels there are separate and distinct attributes that require investigation and explanation. One important level of organisation is the ecosystem. An essential component of ecological studies is to examine these ecological systems and how they are shaped by the interaction between their constituent species and the physical environment. This unit builds on aspects animal and plant diversity and ecology covered in previous units to examine how the interrelationships between key physical, ecological, biological and geological processes shape ecological systems. The aim of this unit is to develop an understanding of the structure and function of terrestrial and aquatic ecosystems, and especially the processes that have shaped Australia's major ecological systems.

NRB720 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Independent research is fundamental to science and the research project represents a major component of the Honours program. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project work to published work in the field of study. Project aims to foster enhanced observational skills, relevant practical skills, lateral thinking and problem solving, literacy and communication skills, professional responsibility and ethical conduct, and conduct of scientific research. (60 credit points achieved at completion of NRB720-1, NRB720-2, NRB720-3, NRB720-4 and NRB720-5.)

NRB720 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Independent research is fundamental to science and the research project represents a major component of the Honours program. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project work to published work in the field of study. Project aims to foster enhanced observational skills, relevant practical skills, lateral thinking and problem solving, literacy and communication skills, professional responsibility and ethical conduct, and conduct of scientific research.(60 credit points achieved at completion of NRB720-1, NRB720-2, NRB720-3, NRB720-4 and NRB720-5.)

NRB720 Project

Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Independent research is fundamental to science and the research project represents a major component of the Honours program. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project work to published work in the field of study. Project aims to foster enhanced observational skills, relevant practical skills, lateral thinking and problem solving, literacy and communication skills, professional responsibility and ethical conduct, and conduct of scientific research.(60 credit points achieved at completion of NRB720-1, NRB720-2, NRB720-3, NRB720-4 and NRB720-5.)

NRB720 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Independent research is fundamental to science and the research project represents a major component of the Honours program. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project work to published work in the field of study. NRB720 Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Independent research is fundamental to science and the research project represents a major component of the Honours program. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project work to published work in the field of study. Project aims to foster enhanced observational skills, relevant practical skills, lateral thinking and problem solving, literacy and communication skills, professional responsibility and ethical conduct, and conduct of scientific research. (60 credit points achieved at completion of NRB720-1, NRB720-2, NRB720-3, NRB720-4 and NRB720-5.)

NRB730 Research Methods and Strategies

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit consists of advanced research discussion and proposal writing. This coursework forms an important component in the development of the research training of the student from the aspects of data acquisition, organisation, planning, and implementation. The aim of the unit is to enable the student to develop and improve research abilities and skills, and to focus their efforts towards their research projects. Such skills are in organisation, but also in locating, identifying and integrating the required background data and other information for the particular study. Specific problems are discussed in detail to help develop critical thinking via a problem solving approach to research issues. Assessment is based on a written research proposal, which includes a comprehensive literature review and on an oral presentation of that proposal. (24 credit points achieved at completion of NRB730-1 and NRB730-2.)

NRB730 Research Methods and Strategies

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit consists of advanced research discussion and proposal writing. This coursework forms an important component in the development of the research training of the student from the aspects of data acquisition, organisation, planning, and implementation. The aim of the unit is to enable the student to develop and improve research abilities and skills, and to focus their efforts towards their research projects. Such skills are in organisation, but also in locating, identifying and integrating the required background data and other information for the particular study. Specific problems are discussed in detail to help develop critical thinking via a problem solving approach to research issues. Assessment is based on a written research proposal, which includes a comprehensive literature review and on an oral presentation of that proposal. (24 credit points achieved at completion of NRB730-1 and NRB730-2.)

NRB735 Advanced Studies in Resource Sciences

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of the unit is to provide an in-depth examination of a global topic, or synthesis of a subject so that the student develops a broad perspective of major issues facing all researchers, regardless of major, in biogeosciences. Important in this unit is the development of an inquiring approach and analytical thought and skills at an advanced level.

NRN100 Readings in Natural Resource Sciences 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This unit includes a review of literature in an area of direct relevance to the research project. The review should be designed in conjunction with the supervisor and demonstrate a broad appreciation of the literature, a critical appraisal of research to date, and the relevance of the research project within the framework of current understanding. Reviews should normally be approximately 5000 words.

NRN101 Readings in Natural Resource Sciences 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This is a companion unit to NRN100 that allows students to (a) prepare a review of a second area relevant to the research project or (b) consider a wider subject area in greater depth. If option (b) is chosen, a single review can qualify as total assessment for both NRN100 and NRN101. In this case, the review should be approximately 10,000 words and be a critical analysis of a substantial research area.

NRN102 Confirmation of Candidature Seminar

Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

This unit includes a public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the proposed research project. The presentation should be designed in conjunction with the supervisor and include background to the project area, specific objectives of the proposed project, methodology to be followed and possible outcomes. The seminar should normally be presented after the project outline has been developed and before any significant amount of research has been undertaken.

NRN103 Final Seminar

Pre-requisites	NRN102
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit includes a public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the progress of the research project. The presentation should be designed in conjunction with the supervisor and include project objectives, progress to date, preliminary data and problems for discussion. The seminar should normally be presented within 12 months (full-time) or 24 months (part-time) of commencement of the postgraduate program.

NRN104 Advanced Topics in Natural Resource Sciences 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students develop an advanced understanding of a topic in the natural resource sciences that is highly relevant to the general area of their proposed research project. The structure and content is variable and can be tailored to the specific requirement of each project and the background of the student. A formal outline of the unit including objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops, laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.

NRN105 Advanced Topics in Natural Resource Sciences 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Material presented in this unit must be distinct from that covered in NRN104. Students develop an advanced understanding of a topic in the natural resource sciences relevant to the area of their proposed research project. A formal outline of the unit outlining objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops and laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.

NSB010 Introduction to Clinical Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

NSB011 Clinical Practice 1

Anti-requisites	NSB010
Equivalents	NSB225
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

NSB012 Clinical Practice 2

Pre-requisites	(NSB011 or NSB225) and (NSB021 or NSB118 or PUB280). (NSB021 or NSB118 or PUB280) can be studied in the same teaching period.
Anti-requisites	NSB010
Equivalents	NSB122
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

NSB013 Clinical Practice 3

Pre-requisites	(NSB012 or NSB122) or NSB010. NSB010 can be enrolled in the same study period as NSB013
Equivalents	NSB212
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

NSB014 Clinical Practice 4

Pre-requisites	(NSB013 or NSB212) and (LSB182 or LSB111)
Equivalents	NSB222
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

NSB015 Clinical Practice 5

Pre-requisites	(NSB014 or NSB222) and (LSB282 or LSB382 or LSB111)
Equivalents	NSB322
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

NSB017 Diversity and Health: Cultural Safety, Indigenous Perspectives

Equivalents	NSB113
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

NSB018 Professional Studies 1: Introduction to the Profession of Nursing

Equivalents	NSB117
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

NSB019 Professional Studies 2: Research, Evidence and Nursing Practice

Pre-requisites	(NSB018 or NSB117) and (NSB118 or NSB021) or PUB251
Equivalents	NSB224
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

NSB020 Professional Studies 3: Transitioning to RN Practice

Pre-requisites	((NSB018 or NSB117) and (NSB019 or NSB224)) or (PYB110 or PYB210 or PUB384 or PUB461 or PUB561)
Equivalents	NSB321
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT, EXT)

NSB021 Nursing Practice in Context 1

Anti-requisites	NSB118
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

NSB022 Nursing Practice in Context 2

Equivalents	NSB324
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

NSB023 Nursing Practice in Context 3

Pre-requisites	NSB021 or NSB118 or NSB022
Equivalents	NSB223
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

NSB024 Nursing Practice in Context 4

Pre-requisites	NSB021 or NSB118 or NSB022
Equivalents	NSB423
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-2 (INT)

NSB025 Nursing Practice in Context 5

Pre-requisites	((NSB021 or NSB118) and (NSB022 or NSB324)) or (CSB342)
Equivalents	NSB500
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

NSB113 Diversity and Health: Introduction to Indigenous and Multicultural Perspectives

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with foundational understandings in culture and its implications for health care. It includes four modules - culture, self and diversity; understanding and valuing Aboriginal and Torres Strait Islander cultures; Aboriginal and Torres Strait Islander health and wellness; and migrant health issues.

NSB117 Nursing and the Health Care System

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The provision of contemporary nursing practice and care in a rapidly changing health care environment is an ongoing challenge. The professional journey requires nurses to think critically, reflect on their practice, reason, defend a position, and engage in continuous learning. This unit commences you on your professional journey by introducing fundamental concepts related to contemporary professional nursing and to the Australian health care system; and by introducing the knowledge and skills underpinning critical thinking, critical reflection, reasoning, argumentation, and lifelong learning. These concepts and skills will be expanded as you progress through the nursing degree.

NSB118 Foundations of Nursing Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Contemporary nursing practice demands practitioners that demonstrate professional clinical decision-making and the ability to utilise information and communication technologies to ensure high quality health care outcomes. Professional communication and high order thinking processes are vital to ensure high quality data collection and management. This unit introduces the fundamental principles, knowledge and skills that need to be considered when applying decision-making processes in nursing practice and using information and communication technologies.

NSB122 Clinical Practice 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is the first in a series of five clinical practice units that provide you with the opportunity to experience the practice of nursing in real world settings and to develop the knowledge, attitudes and skills required for safe practice as a beginning level registered nurse. This unit focuses on providing basic care to patients in a health care setting. In providing this care you will be drawing upon the knowledge gained from your studies in nursing, life science and behavioural science, and the expertise of registered nurses in the clinical setting. The skills that you develop in this unit represent the building blocks of nursing care.

NSB212 Clinical Practice 2

Pre-requisites	NSB122. NSB122 can be studied in the same teaching period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on developing skills related to problem solving, decision making and care delivery for clients who are experiencing a range of health problems, including mental health problems. You will build on the general knowledge and skills that you have gained during your first year units through the application of concepts and principles to particular client problems, and the implementation of more complex nursing interventions. In working alongside registered nurses in various health care facilities you will develop a greater appreciation for the role of registered nurses in the provision of health care. [Designated unit]

NSB222 Clinical Practice 3

Pre-requisites	NSB212 or NSB013
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Following on from Clinical practice 2 this unit continues to develop your skills in identifying health problems, developing

plans of nursing care, delivering care, evaluating client outcomes and understanding of the role of the nurse in the health care team. This unit continues to focus on developing your skills related to problem solving, decision-making and care delivery for clients who are experiencing a range of health problems, including mental health problems. During your clinical practicum you will continue to work alongside registered nurses in a variety of clinical setting. [Designated unit]

NSB223 Mental Health Nursing

Pre-requisites	NSB118 or NSB210
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Nurses in all health care settings will encounter people with mental health problems and disorders. Mental health care is no longer provided solely by a specialised psychiatric service, but in a variety of general health and community settings. Mental disorders represent nearly 30 per cent of the non-fatal disease burden and are the leading cause of disability in Australia. As physical health improves, mental disorders are assuming an even greater impact on people¿s well-being. Mental health nursing skills will enable you to help a wide variety of clients to improve their quality of life and to achieve their highest possible level of functioning.

NSB224 Research Approaches in Nursing

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction and overview of research in nursing. It covers the major philosophical traditions in research, the purpose of research, the relationship between research and nursing practice, the notion of nursing knowledge, the process of research, ethical issues related to research and strategies for critiquing research reports. Particular emphasis will be placed on selected methodologies that are used to research nursing practice, and quantitative and qualitative data collection and data analysis.

NSB225 Health, Human Development and Ageing

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on developing basic knowledge and understanding of the nurse's role in promoting health and wellbeing for people of all ages. Concepts addressed in this unit include, but are not limited to, definitions and models of health and wellbeing; major stages of human growth and development; physical and psychosocial theories of human development, theories of ageing and the concept of health throughout life. As you progress further in the course, the understandings that you develop in this unit will be extended through other theoretical studies and experiences in clinical practice.

NSB321 Professional Nursing Development

Pre-requisites	NSB322
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit is designed to reinforce the link between personal development and clinical practice and highlights the changing workplace and ongoing professional development. As such, the unit focuses on clarifying the relevance of professional concepts such as management, teamwork, scope of practice, changing division of labour, codes of conduct and professional organisations by directly relating these to clinical experience and life long learning. Similarly, the unit considers and interprets clinical practice and the clinical environment by exploring ways in which knowledge is used to inform practice.

NSB322 Clinical Practice 4

Pre-requisites	NSB222, NSB223, NSB324, and NSB423
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 13TP1 (INT)

Nurses play a pivotal role in the provision of contemporary health care in a variety of settings. This clinical unit offers you the opportunity to experience the diversity of nursing practice while providing care for patients with multiple health problems. The clinical practicum associated with this unit utilises a variety of clinical environments providing both hospital and community based care. Students also have the option of undertaking a clinical placement in a rural, remote, interstate, overseas or indigenous community area. In addition, advanced clinical concepts that build on the basic skills you have developed earlier in the program will be addressed. [Designated unit]

NSB324 Health Alterations and Nursing 1

Pre-requisites	NSB118 or NSB021
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit will build on the concepts introduced in Foundations of Nursing Practice and enhance your knowledge and skills in clinical decision making processes. It will introduce nursing care and management of people across the lifespan in a range of environments and use a focus of acute and ambulatory health alterations based around selected body systems. As you progress through the course, the knowledge and skills you develop in this unit will be built upon and extended to meet the requirements of professional practice and consumer needs for quality health care.

NSB333 Clinical Practice 5

Pre-requisites	NSB322
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 13TP1 (INT)

This is the final unit in the series of clinical units that provide you with the opportunity to consolidate the knowledge, skills and attributes required for safe, competent practice as a beginning level nurse. This unit builds on previous clinical units and draws upon concepts, principles and theories that have been developed through your studies in nursing and related sciences. Particular emphasis will be placed on the co-ordination of care for a group of clients, critical thinking and reflection on practice, and confidence, efficiency and effectiveness in the implementation of nursing care. [Designated unit]

NSB412 Clinical Elective

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to enhance final year students' ability to practice competently in a range of clinical situations. Students are

provided with the opportunity to consolidate and extend their knowledge and skills by undertaking a series of self-directed, problem-based learning packages.The areas covered in the unit are advanced life support, respiratory therapies, health promotion, pain management, epidural analyesia and advanced wound care management. A variety of teaching-learning strategies will be used which include case scenarios, small group unilabs, computer-based and other related activities.

NSB423 Health Alterations and Nursing 2

Pre-requisites	NSB118 or NSB210
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit will build on the concepts introduced in Foundations of Nursing Practice and enhance your knowledge and skills in clinical decision making processes. It will introduce nursing care and management of people across the lifespan in a range of environments and use a focus of acute and chronic health alterations based around selected body systems. As you progress through the course, the knowledge and skills you develop in this unit will be built upon and extended to meet the requirements of professional practice and consumer needs for quality health care.

NSB500 Health Alterations and High Dependency Nursing

Pre-requisites	(NSB324 or NSB022) and (NSB423 or NSB023)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is the final of three units expounding on nursing management of acute and chronic health alterations that impact on people across the lifespan in a variety of settings. The focus of this unit is the utilisation of a clinical decision making process to provide comprehensive and holistic nursing management for people experiencing complex and/or life threatening health alterations, particularly in high acuity and palliation settings. Implementation of the clinical decision making process will be at a more advanced level to meet the multifaceted needs of these patients with complex needs in preparation for practice as a beginning level registered nurse.

NSB503 Promoting Health in the Community

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Nurses have an important role in promoting the health and wellbeing of individuals, families and communities. An understanding of contemporary health and wellbeing issues for individuals and groups in our society with specific focus on health and chronic illness in the community. This unit builds on knowledge and understanding of the nurse's role in promoting health and wellbeing for people of all ages, families and communities.

NSB600 Introduction to Nursing Children and Childbearing Families

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (BLK, EXT); 2012 SEM-2 (EXT, BLK)

This unit provides an overview of the theoretical concepts and clinical application principles for practice in the areas in providing nursing and midwifery care for children and childbearing families. The emphasis is upon the childbearing process and the developmental stages of childhood and family dynamics. This is viewed as a normal process of growth and development, which will be affected by social, economic, legal and cultural factors. The focus will be on the promotion and maintenance of health.

NSB602 Pain Management and Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, BLK); 2012 SEM-2 (EXT, BLK)

Making decisions about patient's pain and its management is a key component of nursing practice across a wide variety of patient groups and clinical settings. This unit examines the concept of pain and explores aspects of the nurse's role in relation to pain relief. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of, and reflection upon selected concepts.

NSB603 Introduction to Cardiothoracic Nursing

Pre-requisites	NSB500 or NSB025
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Cardiovascular disorders are commonly encountered by nurses practicing a variety of clinical settings. This unit provides an overview of cardiothoracic nursing and encompasses theoretical concepts specific to this specialty as well as related clinical skills. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of and reflection upon selected concepts.

NSB604 Nursing Practice and the Older Person

Pre-requisites	NSB225
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Nurses have an important role in promoting, maintaining and restoring the health of older people and their families across a diversity of settings. Students will be encouraged to examine the independent role of the nurse and their role as a member of multidisciplinary teams. The unit focuses on the role of the nurse in assessing and identifying problems relevant to older people and making clinical decisions about care practices and outcomes. This unit will extend the understandings that you have developed in other theoretical studies and experiences in clinical practice.

NSB606 Palliative Care Nursing

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The health and support needs of individuals who are dying are diverse and often change over time. To respond effectively to these needs, nurses require knowledge and skills to provide a palliative approach to care. In this unit, you will extend your knowledge of the needs of individuals diagnosed with various life-limiting illnesses. The unit will enable you to develop further your understanding of the core components of a palliative approach to care for these individuals. This unit will extend the understandings that you have developed

in other theoretical studies and experiences in clinical practice.

NSB700 Introduction To Midwifery Practice

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

This unit is an introduction to the scope of midwifery practice and an exploration of the role of midwifery practice and woman-centred care. You will be introduced to cultural considerations relating to child bearing families, and legal and ethical issues relating to midwifery practice. The role of midwifery codes of practice, ethics, and professional midwifery competencies across a range of midwifery practice settings is also examined.

NSB705 Foundations of Midwifery Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides a foundation for the theoretical concepts and principles for practice as a midwife. Emphasis is placed on the childbearing process as a normal and non-pathological process, during which the midwife, in collaboration with the woman, family, and other health professionals, provides midwifery care. Development of core knowledge, attitudes and skills required for beginning practice as a practising midwife is fundamental to providing childbearing women and their families with information, choices and support throughout pregnancy, birthing and the postnatal period.

NSB710 Midwifery Practice 1

Pre-requisites	NSB700, NSB705, NSB122, and NSB212
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides the opportunity to develop the clinical knowledge and skills in the areas of antenatal and postnatal assessment and care, as well as an introduction to the assessment and care for the birthing woman. The focus in this unit is midwifery practice in the area of uncomplicated pregnancy and birth. [Designated unit]

NSB720 Challenges in Midwifery Practice

Pre-requisites	NSB700, NSB705
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to develop an ability to critically evaluate the core knowledge, attitudes and skills required for beginning practice as an endorsed midwife when caring for childbearing women, neonates and their families experiencing complications during pregnancy, birth and/or the puerperium. Midwives have a professional, legal, and ethical responsibility to identify factors that complicate pregnancy, birth and the postnatal period. Midwives need skills and knowledge to recognise and act on changing events, consulting colleagues in a timely manner, working collaboratively to manage complications that arise to put the woman and her newborn at risk of adverse outcomes.

NSB725 Midwifery Practice 2

Pre-requisites	NSB710 and NSB720 and (NSB015 or NSB322)
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

The aim of this clinical unit is to enable you to develop knowledge and skills necessary for the planning and delivery of midwifery care for women and families that require more complex interventions. Off campus settings for this unit may include maternity hospitals, midwifery services, mental health facilities that specialise in postnatal disorders, and community facilities. Midwives have a professional, legal and ethical responsibility to recognise factors that create or intensify complications throughout the childbearing period, and act on their findings. Following on from Midwifery practice 1 this unit continues to develop your skills in providing midwifery care to childbearing women, their newborns and families. In working alongside midwives in various health care facilities you will develop a greater appreciation for the role of the midwife in supporting women experiencing physical and psychological complications of 'high-risk' birthing. [Designated unit]

NSB800 Critical Issues in Neonatal Care

Pre-requisites	NSB720
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with a sound basis for midwifery practice in the area of neonatal care, through an understanding of the critical issues and factors that influence neonatal health and family wellbeing.

NSB805 Australian Indigenous and Global Perspectives in Midwifery Practice

Pre-requisites	NSB700
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit contextualises Australian midwifery practice within a global perspective of midwifery practice and maternity service delivery. Global trends in models of midwifery care and national and international forces that influence these trends is examined.

NSB810 Clinical Project in Midwifery Practice

Pre-requisites	NSB224 and (NSB500 or NSB025)
Co-requisites	NSB820
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit tests theoretical understandings of the links between current theory, quality improvement, and the developing evidence for midwifery practice. It focuses on the design and implementation of a clinical midwifery project that reflects students' clinical practice and development.

NSB820 Integrated Practicum A

Pre-requisites	(NSB322 or NSB015) and NSB710 and NSB720 and NSB725
Co-requisites	NSB810
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This clinical unit offers students the opportunity to further experience the

diversity of practice while providing nursing and/or midwifery care. The clinical practicum associated with this unit utilises a variety of clinical environments providing both hospital and community based care. Students also have the option of undertaking a clinical placement in a rural, remote, interstate, overseas or Indigenous community area. Advanced clinical concepts that build on the basic skills developed earlier in the program will be addressed. [Designated unit]

NSB825 Integrated Practicum B

Pre-requisites	NSB820
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is the final unit in the series of clinical units that provide students with the opportunity to consolidate the knowledge, skills and attributes required for safe, competent practice as both a beginning level registered nurse as well as a beginning level endorsed midwife. This unit builds on previous clinical units and draws upon concepts, principles and theories that have been developed through your studies in nursing, midwifery, and related sciences. Particular emphasis is placed on the coordination of care for a group of clients, critical thinking and reflection on practice, and confidence, efficiency and effectiveness in the implementation of nursing and midwifery care. [Designated unit]

NSN002 Key Issues in Child and Youth Health Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit addresses contemporary issues in child and youth health, to provide the basis for further study in this field. A Primary Health Care framework will be used to consider issues that impact on the health of children and young people. In addition key policy frameworks will provide direction for study in the unit. The unit will consider the impact of social determinants on child, youth and family health and examine current strategies to address such impacts. Students will have the opportunity to examine local programs and strategies aimed at improving health outcomes.

NSN003 Principles of Paediatric, Child and Youth Health Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

Students in this unit are introduced to issues facing nursing when providing care for children and families in the acute and community service environment. The unit presents an overview of the contemporary health problems faced by the Australian child and family and explores nursing interventions that enhance adaptation and health.

NSN004 Acute Paediatric Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit is designed to provide registered nurses with advanced knowledge and skills to enable them to provide safe and competent care to children experiencing acute paediatric illness. This unit will focus on acute health problems in children, employing clinical assessment, problem solving and critical thinking skills. Following completion of this unit the registered nurse will be able to demonstrate knowledge and skills in the nursing management of acute and chronic health problems within paediatric clinical practice.

NSN005 Community Child and Youth Health Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit is designed to provide a sound basis for nursing practice in the area of community child and youth health. Students will examine contemporary issues relating to their professional role in caring for children, youth and families within the community context. The unit adopts a primary health care approach to examine the nurses' role in primary and secondary prevention, in supporting families in the community and in health education and community development.

NSN006 Specialisation in Paediatric, Child and Youth Health Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit will provide students with clinical knowledge and understanding in a selected area of paediatric or child and youth health sub-speciality. The unit is based on a learning contract that will include both theoretical and clinical learning activities and assessment.

NSN332 Clinical Studies in Midwifery B

Pre-requisites	(NSN321 and NSN331) and NSN322 (can be enrolled in the same teaching period)
Credit Points	24
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

This unit continues on from NSB331. It provides the additional opportunities for you to develop the clinical knowledge and skills in the areas of birthing women and the neonate requiring admission to special care nursery. The focus in this unit is consolidation of evidence based midwifery practice in the area of uncomplicated pregnancy and birth, and the development of evidence based midwifery practice in areas of complicated pregnancy and birth. Clinical activities and focused assessment will enable the student to incorporate theoretical, conceptual and practical knowledge, attitudes and skills required to care for the childbearing woman, her infant and family. Current issues and controversies will be explored. [Designated unit]

NSN421 Assessment and Diagnosis in Extended Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit focuses on the scientific basis, processes and procedures for advanced concepts in clinical decision making. It covers the skills and principles of health assessment with specific focus on pattern recognition and diagnostics; ordering and interpreting laboratory tests; ordering and interpreting imaging investigations. The unit also explores the activities and processes for making and accepting referrals with other health professionals.

NSN422 Pharmacology and Therapeutics in Extended Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit relates to the planning and management of therapeutic interventions in health care with a major focus on pharmacology and therapeutics. The content includes the study of pharmacology and pharmacokinetics related to treatment in a wide range of diseases. This will provide the basis for expansion into in-depth knowledge of pharmacology in a specialty field in the unit titled: NSN426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice.

NSN423 Nurse Practitioner Role Development

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit equips students with the skills and knowledge necessary for the development of the nurse practitioner role and scope of practice. Scope of practice refers to, and includes the extent of clinical practice activities available to the nurse practitioner in their speciality field of practice.Content includes requirements and attributes in clinical leadership, influence and advocacy at all levels of health care. Model development will be explored, scope of practice designed and clinical protocols and treatment formulary developed.

NSN424 Evidence Based Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

On successful completion of this unit students will be able to critically appraise systematic reviews of evidence and design projects for the implementation of evidence into practice. Content includes: Evidence-based terminology, principles and processes; incorporating evidence into practice; comparing and contrasting current practice with the most current evidence; modifying policies and procedures to be consistent with the evidence; use of audit results to identify areas of practice that are consistent with the evidence and those needing revision; formulating strategies for promoting the uptake of evidence-based practice.

NSN425 Nurse Practitioner Internship

Pre-requisites	NSN425-1
Co-requisites	NSN428
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This unit continues on from NSN425-1 and provides extended, supervised and supported clinical practice exposure to consolidate and apply coursework learning, enabling students to meet the competency and capability standards for the nurse practitioner. Content is determined by the context of practice and the candidate¿s own learning objectives. Students will explore the extent of extended clinical practice available to them in the specialty in which they are undertaking the internship. Complementary to the unit objectives, and in consultation with their clinical support teams, students will develop personal learning objectives that reflect the knowledge and skills required in this extended scope of practice.

NSN425 Nurse Practitioner Internship

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This unit provides extended, supervised and supported clinical practice exposure to consolidate and apply coursework learning, enabling students to meet the competency and capability standards for the nurse practitioner. Content is determined by the context of practice and the candidate¿s own learning objectives. Students will explore the extent of extended clinical practice available to them in the specialty in which they are undertaking the internship. Complementary to the unit objectives, and in consultation with their clinical support teams, students will develop personal learning objectives that reflect the knowledge and skills required in this extended scope of practice.

NSN426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit follows on from NSN422 Pharmacology and Therapeutics in Extended Nursing Practice and includes development of the scope of pharmacological and therapeutic practice in a student's specialty field of practice, designing and developing protocols and medication formulary. It also includes a focus on skills in development of treatment plans that incorporate a creative, efficacious, patient-centred and sustainable management of symptom/disease states that are based on best evidence.

NSN427 Prevention of Violence Against Women

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The unit explores the prevalence, incidence, and impact of abuse on the individual, family, community and society. A range of approaches to prevention and intervention will be explored, both from local, national and international perspectives, to enable students to contextualise the learning to their discipline area.

NSN504 Clinical Fellowship

Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

The advanced practice nurse (APN) is a registered nurse who operates at the advanced or specialty level within a nursing model of care. Having first received a comprehensive professional preparation, advanced practice nurses are subsequently prepared through intensive education, experience and competency assessment for their chosen speciality. Armed with the appropriate depth of specialist knowledge and skills, APNs work within a defined client population or area of nursing activity. The aim of this unit is to provide you with the educational and clinical preparation that enables you to function at the advanced level in your area of nursing specialty.

Units

NSN506 Clinical Project

Pre-requisites	Completion of 96cp in NSN% units
Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit offers students the opportunity to implement a project of clinical relevance and value to lead to the resolution of practical issues facing nursing. It advances and extends the student's learning from their clinical speciality and the supporting units.

NSN507 Contemporary Practice Issues

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit allow students to explore current issues and develop their understanding through application of relevant theoretical frameworks to nursing practice in selected specialty areas. Students undertaking this unit will examine social, political and economic factors that shape and have shaped nursing practice, analyse factors influencing the organisation of nursing practice, and critically apply a theoretical framework to current issues relevant to nursing practice.

NSN508 Advanced Readings in Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit provides the opportunity for students to access and review a body of literature relevant to an area of individual interest in nursing. This will enable students to extend their knowledge and understanding of a topic which is not specifically addressed elsewhere in the course. In addition, students undertaking this unit will have the opportunity to develop advanced skills information retrieval, critical analysis and writing for publication.

NSN515 Clinical Leadership and Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit aims to extend students' understanding of contemporary issues and trends in the development of leadership in professional practice, strengthen their abilities to provide effective leadership and further develop skills in peer consultation and reflective practice as strategies to support a critical approach to the provision of leadership in the workplace. The unit addresses strategic thinking and planning; organisational and interpersonal communication; decision making; team building; multidisciplinary teams; managing conflict; facilitating change; and creating growth-producing work environments.

NSN516 Sexual and Reproductive Health

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit will bring together current research and evidence-based practice and information as well as, a health-oriented approach to the subject of sexuality and reproduction. The purpose of this unit is to highlight the fundamental issue that even though screening programs have emerged and improved women's health, women continue to have health problems that are unique to them as women. The aim of this unit is for the student to come to the understanding that a woman's sexual health encompasses not only the medical and physical components of sexual activity but a holistic understanding of physical and mental health. These are seen as being influenced by self-esteem, values, culture and socio-economic factors as well as societal influences.

NSN517 Women's Health Issues

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit provides students with opportunities to develop and expand their theoretical knowledge and skills in the area of women's health, and utilises the primary health care framework in considering the major objectives for helping women achieve optimal health as documented in women's health policy. This unit aims to make primary health care professionals aware of the broader social context in which service, delivery and care take place.

NSN523 Clinical Studies

Pre-requisites	NSN701, NSN721, NSN722
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit aims to further develop and consolidate knowledge and skills in a selected clinical specialty. This unit will enable students to develop their skills in clinical judgement, and decision making in a specialty area of practice, as well as expanding their skills in establishing and maintaining effective relationships with clients and other health professionals. Students will be encouraged to demonstrate a reflective, self-evaluative approach to practice, and develop strategies that would enable the practitioner to facilitate change with respect to their specialty area of practice.

NSN626 Studies in Dementia

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

Dementia is characterised by progressive impairment of brain functions involving memory, perception, language, personality and cognition. Estimates of the prevalence of dementia have been reported as doubling every five years of age after the age of 65 and as affecting nearly one in four of those aged 85 and over (AIH&W, 2004). Providing services for people with dementia and support to their carers presents a significant challenge to health service providers both now and into the future. The aim of this unit is to allow you to explore a range of health service delivery and community care issues associated with dementia, particularly Alzheimer¿s disease.

NSN701 Advanced Health Assessment

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit aims to develop an advanced understanding of health assessment in nursing practice. This will be achieved by exploring the theoretical, conceptual and practical knowledge required to effectively assess the individual, family and their environment to provide nursing care within the context of specialist practice.

NSN721 Key Issues in Emergency and Intensive Care Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

Health service delivery is undergoing rapid change, and the nature and scope of nursing practice reflects this. Registered nurses working in Intensive Care and Emergency settings require the ability to care for patients that are increasingly critically ill in an environment that evidences increasingly complex technology. As such, registered nurses require knowledge and skills that enable them to understand a client¿s health needs, determine appropriate interventions, predict and manage complications, and develop specific plans of care for critically ill individuals and their families that are appropriate to their unique needs and personal context.

NSN722 Principles of Intensive Care Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Registered nurses working in Intensive Care require the ability to care for patients who are increasingly critically ill in an environment that evidences increasingly complex technology. Nurses working in this field require an advanced level of knowledge of evidence based principles and practices appropriate to prevent and manage these health problems, as well as skills in the implementation and evaluation of intervention strategies, in the context of a multidisciplinary team.

NSN723 Specialisation in Critical Care Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Critical care environments provide care for individuals with a diverse range of health problems. This unit will provide the opportunity for students to further develop and consolidate prior learning in a critical care clinical setting of their choice. In this unit students will expand on their theoretical, professional & practical knowledge to assess patients, plan and implement nursing care in a particular critical care environment.

NSN724 Advanced Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit is designed to present a foundation of theoretical and practice concepts required for registered nurses to provide effective, consumer focused nursing care within a variety of clinical contexts in a range of practice settings. The unit provides a framework from which students can develop an understanding of the impact of selected health problems on individuals, families, and communities. This will include practice concepts (philosophies, evidence based practice, competencies and continuity of care); physiological, pathophysiological and psychosocial underpinnings of advanced speciality or generalist practice; planning of appropriate strategies/interventions for client care; and development of selected technical skills.

NSN725 Specialisation in Medical/Surgical and Cancer Nursing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This clinically based unit will provide the opportunity for students to further develop and consolidate prior learning in a clinical setting of their choice. This unit will enable students to discuss issues and trends occurring in nursing practice in a selected medical/surgical or cancer care environment, and critically analyse the advanced concepts that underpin specialist nursing practice. Students will demonstrate clinical judgement and reflective skills through the application of theoretical concepts to common health problems experienced by clients in a selected medical/surgical or cancer care environment. They will also initiate plans of care to address common needs/problems experienced by clients in this specialist field.

NSN726 Advanced Clinical Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit aims to develop students' understanding of the theory, process and practice of advanced nursing in a designated practice context, to enable them to effectively prevent and manage common health problems experienced by individuals and families in a range of locations within their field. Content which relates to a broad range of clinical nursing practice will be addressed. This will include: physiological, pathophysiological and psychosocial underpinnings of advanced nursing practice across a broad range of body systems and health problems; planning of appropriate strategies/interventions for client care; and development of related technical skills.

NSN727 Emergency Nursing Practice in Unique Client Population

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT)

This unit enables students to critically analyse the advanced concepts that underpin specialist nursing practice in emergency care to unique client populations; demonstrate clinical judgement through the application of theoretical concepts to health problems experienced by unique client populations requiring emergency care; initiate plans of care to address frequently experienced problems encountered by unique client populations requiring emergency care; demonstrate critical reflection skills in applying theoretical concepts to your own practice.

NSN821 Promoting Healthy Ageing

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Individuals' reactions to growing older are embedded in their cultural traditions and social experiences rather than determined through years of age. Responses to ageing are shaped to some extent by expectations about being old. Too frequently, older people are confronted with negative stereotypes, prejudice and discrimination ¿ all forms of ageism. Now, more than ever, health professionals need to be conversant with the impact of an ageing population on services generally, and what government and community initiatives are in place for positive and healthy ageing.

NSN822 Palliation in Dementia

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

Regardless of discipline, those working with older people, whether in the community or in residential care settings, need a broad and holistic understanding of the many issues associated with service delivery: legal, ethical, geographic, service access and availability, workforce issues and funding, among others. These issues impact on the type and quality of services delivered and therefore, on clients and their families. This Unit enables students to explore a range of complex issues relating to service provision for older people.

NSN825 Thesis (Part 1)

Pre-requisites	NSN508
Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

The thesis provides students with an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The study represents an independent piece of research completed under the guidance of a supervisor. The thesis may be a study on research which makes a contribution to the body of knowledge in the student's discipline area or professional area, or a study in which the student critically analyses and evaluates existing knowledge and produces observations and conclusions of relevance to the field concerned. Part-time students complete NSN825-1 and NSN825-2. Full-time students conplete NSN850. The final thesis is approximately 15,000 to 20,000 words.

NSN825 Thesis (Part 2)

Pre-requisites	NSN825-1
Credit Points	24
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

The thesis provides students with an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The study represents an independent piece of research completed under the guidance of a supervisor. The thesis may be a study on research which makes a contribution to the body of knowledge in the student's discipline area or professional area, or a study in which the student critically analyses and evaluates existing knowledge and produces observations and conclusions of relevance to the field concerned. Part-time students complete NSN825-1 and NSN825-2. Full-time students conplete NSN850. The final thesis is approximately 15,000 to 20,000 words.

NSN850 Thesis

Pre-requisites	NSN508
Credit Points	48
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

The thesis provides students with an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The study represents an independent piece of research completed under the guidance of a supervisor. The thesis may be a study on research which makes a contribution to the body of knowledge in the student's discipline area or professional area, or a study in which the student critically analyses and evaluates existing knowledge and produces observations and conclusions of relevance to the field concerned. Part-time students complete NSN825-1 and NSN825-2. Full-time students complete NSN850. The final thesis is approximately 15,000 to 20,000 words.

OPB351 Visual Science 3

Pre-requisites	OPB352 and OPB353
Co-requisites	OPB452 and OPB453
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes a study of the basic visual sciences that underpins the practice of optometry. It covers the optics of the eye, including its basic design, dimensions and retinal quality as well as the psychophysical principles of vision.

OPB352 Ocular Anatomy and Physiology 3

Pre-requisites	LSB250 and LSB255
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides information on the ocular anatomy and physiology that underlies the functional measurements made in optometry and their interpretation. It includes the structure and function of the anterior eye and orbit.

OPB353 Ophthalmic Optics 3

Pre-requisites	MAB141 and PCB150
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

OPB451 Visual Science 4

Pre-requisites	OPB351and OPB452
Credit Points	12
Campus	Kelvin Grove

This subject continues studies commenced in OPB351, and provides students with an understanding of spatial, temporal, colour and binocular vision, and their influence on visual performance.

OPB452 Ocular Anatomy and Physiology 4

Pre-requisites	OPB352
Co-requisites	OPB351
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is a continuation of OPB352. The unit covers the posterior eye, orbit, neural pathways, eye movements, neurophysiology of vision and an introduction to electrophysiological techniques.

OPB453 Ophthalmic Optics 4

Pre-requisites	PCB240 and OPB353
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

OPB550 Diseases of the Eye 5

Pre-requisites	(CSB520 or LSB475) and OPB452
Co-requisites	OPB654
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with a

knowledge and understanding of relevant general diseases and those that affect the eye. It includes general disease principles and processes, referral procedures, genetics, congenital, dystrophic and degenerative eye disease, and the ocular manifestation of general disease. [Designated unit]

OPB556 Assessment of Vision 5

Pre-requisites	OPB351 and OPB453 and PYB007
Co-requisites	OPB451
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit addresses the theory and practice of a number of clinical procedures which are used in eye examination: visual acuity measurement, external and internal examination of the eyes, subjective refraction, and tonometry. Students are also introduced to communication with patients, and the communication principles and skills in taking a case history. [Designated unit]

OPB557 Binocular Vision

Pre-requisites	OPB451 and OPB556
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit covers the different types of refractive errors and what to expect in different age groups, and the types of binocular vision and accommodation anomalies frequently found in the population. A suite of procedures to investigate binocular and accommodation anomalies is covered.

OPB650 Diseases of the Eye 6

Pre-requisites	OPB451 and OPB550 and OPB556
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This is a continuation of OPB550 and covers the ocular manifestations of general disease, neuro-ophthalmology, glaucoma, inflammations/infections, tumours and trauma. [Designated unit]

OPB653 Clinical Practice 6

Pre-requisites	OPB550, OPB551, OPB552, and OPB553
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SUM-2 (INT)

The subject is a continuation of OPB553, and enables students to apply eye examination techniques in a clinical setting. There is an emphasis on advanced communication skills, patient management and clinical decision-making. [Designated unit]

OPB654 Ocular Pharmacology

Pre-requisites	OPB452 and LSB384
Co-requisites	OPB550
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides students with the appropriate knowledge of pharmaceutical agents used to examine the eye and to treat eye diseases. [Designated unit]

OPB656 Assessment of Vision 6

Pre-requisites	OPB556
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the student to the theory and practice of core clinical techniques of vision assessment. The integration of these core clinical techniques with the basic techniques learned previously gives students a thorough knowledge of all aspects of routine patient management. [Designated unit]

OPB750 Topics in Optometry 7

Pre-requisites	OPB653
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Students are required to choose a research topic, conduct a literature search on this topic, develop experimental hypothesis, plan and undertake a research project. Students give oral presentations of their own research project. Presentations on advanced clinical care and decision making skills include lecture and tutorial presentations and case summaries.

OPB751 Advanced Optometry 7

Pre-requisites	OPB653
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with a thorough knowledge of more specialised areas of patient management including patients with low vision and paediatric patients.

OPB752 Clinical Practice 7

Pre-requisites	OPB650, OPB651, and OPB653
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit enables students to apply knowledge and skills gained in third year to patients presenting for eye examinations, and to make decisions in effective patient management. [Designated unit]

OPB753 Specialist Clinical Practice 7

Pre-requisites	OPB650, OPB651, and OPB653
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit enables students to apply specialist clinical knowledge in the management of patients requiring contact lenses, vision training and low vision care. [Designated unit]

OPB850 Topics in Optometry 8

Pre-requisites	OPB750
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Students are required to analyse the results of their chosen research project and write a full report in manuscript form. Oral presentations of the project are given to their peers. Presentations on advanced clinical care and decision making skills include lecture and tutorial presentations and case summaries.

OPB851 Advanced Optometry 8

Pre-requisites	OPB751

Credit Points	12
Campus	Kelvin Grove

This unit includes optometry's role in health care; professional and ethical behaviour; relevant state and federal Acts; professional associations; types of practice; optometric practice and the law. The unit introduces the basic concepts of eye safety and visual ergonomics

OPB852 Clinical Practice 8

Pre-requisites	OPB751, OPB752, and OPB753
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 SUM-2 (INT)

This unit enables students to consolidate skills developed in OPB752, to increase their knowledge base and achieve surety with decision making involving the management of patients' eye and vision problems. [Designated unit]

OPB853 Specialist Clinical Practice 8

Pre-requisites	OPB751, OPB752, and OPB753
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 SUM-2 (INT)

This unit continues to consolidate skills developed in OPB753 in the specialised clinical areas of contact lenses, low vision management and paediatric optometry. [Designated unit]

OPN161 Optometry in Special Needs Groups

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

OPN162 Contact Lens Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

OPN163 Primary Care Clinic 7

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

OPN164 Research Methods in Optometry and Vision Science

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

OPN261 Therapeutic Management of Eye Disease

Pre-requisites	OPN163
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

OPN262 Specialist Clinic 8

Pre-requisites	OPN161, OPN162, and OPN163
Co-requisites	OPN263
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

OPN263 Primary Care Clinic 8

Pre-requisites	OPN163
Co-requisites	OPN261, OPN262
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

OPN264 Research Project

Pre-requisites	OPN164
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

OPP001 Ocular Therapeutics 1

Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide optometrists with a sound knowledge of bio-medical sciences as they relate to ocular disorders and to enable them to therapeutically manage certain eye diseases. This unit covers: general pathology and immunology with reference to ocular tissues, microbiology with reference to organisms involved in ophthalmic diseases, pharmacology and pharmacodyamics including interaction of drugs with the body, disorders of the anterior eye, glaucoma, iritis and uveitis, management of cataract, post-surgical management, legal requirements for therapeutic drug use, workshops on skills related to the management of disease.

OPP002 Ocular Therapeutics 2

Pre-requisites	OPP001
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit enables optometrists to develop an understanding of the properties of ocular therapeutic drugs and their applications in clinical practice, and to develop experience with the clinical management of certain eye diseases. The following topics are covered: Examination and diagnosis of anterior eye conditions (including acute red eye), glaucoma, iritis and uveitis, and cataract; development of management strategies including establishing appropriate treatment plans and evaluating the need for referral for specialist treatment; management of post-surgical conditions.

PCB007 Patient Care in Professional Practice

Equivalents	PYB074
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with an introduction to the theoretical concepts and clinical principles that underpin the care of patients undergoing procedures in medical radiations departments. Patient care involves a team approach from a variety of health professionals and this unit will expose you to effective strategies for communication and interpersonal skills.

PCB121 Vision, Colour and Photometry

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is the first unit in the lighting suite of courses and aims to prepare students with the necessary grounding for future units in the course. All lectures in units that follow this will assume a good knowledge and understanding of the concepts and principles presented in this unit.

PCB122 Lighting Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit aims to introduce students to the basics of lighting design, taking into account both the requirements for lighting a space, as well as the practical issues. Both indoor and outdoor spaces are included. The software packages used are easily understood, as the aim of the unit is to teach students about lighting design, not how to use a lighting package.

PCB123 Sustainability and Human Factors

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

In this unit you should develop an understanding of the performance issues of lamps and luminaires, both from a energy point of view and the human issues – does it meet the needs of the people working or at leisure in the space.

PCB124 Lamps and Luminaires

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is an important unit in the lighting suite of courses because it describes the basic equipment that people working in any area of the lighting industry have to know and understand – the lights themselves. Understanding how a lamp works and how it performs helps people make informed decisions about the choices they have in choosing lamps for particular applications. All lectures in units that follow this will assume a good knowledge and understanding of the principles, properties and performances of light sources, including the emerging LED products.

PCB150 Physics 1H

Credit Points	12
Campus	Gardens Point

Professionals in the applied sciences require an understanding of the processes of making and recording measurements and an understanding of the physical principles that govern the behaviour of both the physical parameters being measured and the instrument being used to make the measurement. The aim of this unit is to introduce you to the processes of making measurements and estimating, processing and interpreting the uncertainties involved with these measurements. To enable you to understand the physical parameters being measured and also the limits of the measuring instrument; the physics of mechanics, heat, sound and light will be introduced and explained.

PCB172 Physics for Surveyors

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: measurement and uncertainty kinematics (vector and scalar quantities, equations of motion); dynamics (friction, centripetal force, impulse and momentum, periodic motion, work and energy); gravity circular motion, centripetal force, gravity, Kepler's Laws, orbits); fluid statics (pressure, barometry); fluid dynamics (fluid flow in pipes and channels, equation of continuity, Bernoulli's principle,); optical instruments (reflection, refraction, total internal reflection, spherical mirrors, thin lenses, transits, theodolites, corner cubes, cameras); electric and magnetic fields; electrical circuits (electronic components).

PCB178 Principles of Medical Radiations

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides an overview of the physical principles of the various medical imaging modalities and techniques. It includes an overview of techniques used in the diagnosis and treatment of cancer.

PCB240 Optics 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes a study of selected topics in optics particularly related to aspects of optometry. Topics include geometrical optics in mirrors and lenses, including thick lenses, cylindrical, spherical and toric lenses, colour and colour measurement, photometry, lens aberrations and optical instruments.

PCB252 Systematic Imaging Pathology

Anti-requisites	LSB367, LSB475
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

PCB272 Radiation Physics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Radiographers require a basic knowledge of general physics and more detailed theoretical background to the physical basis behind the equipment design, construction and materials and the increasing technological support for developing modalities. The aim of this unit is to provide students with an understanding of radiation physics related to x-ray production and radiographic practice and how radiation interacts with matter.

PCB276 General Radiography 1

Pre-requisites	LQB183 and PCB178 and PCB252 and PCB277. PCB252 and PCB277 can be enrolled in the same teaching period as PCB276
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A full and detailed knowledge of positioning techniques for skeletal radiography is essential to the education of medical imaging technologists. This unit is designed to provide students knowledge of skeletal radiography, and imaging practices.

PCB277 Radiographic Practice

Pre-requisites	PCB007, PCB178, and PCB276. PCB276 can be enrolled in the same teaching period.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is a program of practical sessions relating to radiography of the skeletal system allowing the development of skills in patient positioning and image production.

PCB286 Treatment Planning 1

Pre-	PCB178 and LQB183 and

requisites	PCB272
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is an introduction to the techniques of radiotherapy treatment planning including patient data acquisition and radiation dosimetry.

PCB287 Radiation Therapy 1

Pre-requisites	PCB007 and PCB178 and LQB183
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the basic techniques of radiotherapy treatment and equipment. Practical sessions are completed in clinical departments.

PCB375 Radiographic Equipment

Pre-requisites	PCB178
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

To extend the description, initiated in PCB272 Radiation Physics, of x-ray generators and ancillary equipment and to introduce specialised x-ray equipment, digital imaging, image quality and quality control. The aims of the unit are to develop an understanding of how different types of x-ray imaging equipment, particularly digital imaging devices, work and to develop an understanding of how to assess the quality of the images produced by this equipment, and assess the quality of the equipment. (12 credit points achieved at completion of PCB375-1 and PCB375-2.)

PCB375 Radiographic Equipment

Pre-requisites	PCB375-1
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

To extend the description, initiated in PCB272 Radiation Physics and PCB375-1 Radiographic Equipment, of x-ray generators and ancillary equipment and to introduce specialised x-ray equipment, digital imaging, image quality and quality control. The aims of the unit are to develop an understanding of how different types of x-ray imaging equipment, particularly digital imaging devices, work and to develop an understanding of how to assess the quality of the images produced by this equipment, and assess the quality of the equipment. (12 credit points achieved at completion of PCB375-1 and PCB375-2.)

PCB377 General Radiography 2

Pre-requisites	PCB276 and PCB277 and LSB245
Co-requisites	PCB379
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to extend the student's knowledge of skeletal radiography, minor procedures, and imaging practices. The practical sessions are designed to develop positioning skills through role play and taking radiographs of sectional models to become familiar with radiographic appearances.

PCB379 Clinical Radiography 1

Pre-requisites	LSB245 and PCB277 and PCB276
Co-requisites	PCB377
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This period of clinical experience will enable you to gain experience in general routine radiographic examinations and bedside radiography as well as an introduction to minor procedures. The unit will also provide an opportunity for you to become familiar with the patient cares activities undertaken by radiographers.

PCB389 Clinical Radiotherapy 1

Pre-requisites	PCB286 and PCB287 and LSB245
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Experience in clinical departments is vital to developing clinical competence and this Unit is designed to provide students not only with this experience but also some tools to maximise learning during clinical placements. An introduction to concepts of reflective practice will empower students to take ownership of their professional development and identify learning opportunities as well as development needs. After completion of this Unit students should be able to assist with routine clinical procedures and be prepared to organise their clinical learning in relation to their development needs for future clinical Units.

PCB396 Treatment Planning 2

Pre-requisites	PCB286 and PCB287 and LSB245 and PCB272
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the fundamental theories of PCB286 to concentrate on application of knowledge to practice. In order to further prepare them for clinical planning, a range of basic plans will be completed using the central slice only. This will consolidate understanding of basic planning concepts and pave the way for progression to full 3D planning in PCB495.

PCB397 Radiation Therapy 2

Pre-requisites	PCB397-1
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the principles and applications of megavoltage therapy including techniques for specific sites. Practical exercises are performed in clinical departments.

PCB397 Radiation Therapy 2

Pre-requisites	PCB286 and PCB287 and LSB246
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Oncology and technique are an essential component of radiation therapy skills and application of fundamental principles to routine treatment practice is essential. Students will need to gain practical skills in order to become a competent radiation therapist and this module provides them with the underpinning theory and practice. Students at this level are expected to engage with the literature base in order to support their work and they will have specific support for this via the presentation.

PCB452 Applied Medical Imaging

Pre-requisites	LQB183 and (LQB389 or LQB390)

Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

PCB476 Special Procedures

Pre-requisites	PCB377, PCB379 and PCB479 (PCB479 can be enrolled in the same teaching period)
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes specialised techniques of radiography including the skull, macroradiography, obstetrics, gynaecology, CNS, paediatrics and geriatrics.

PCB477 Complementary Imaging Techniques

Pre-requisites	PCB178
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Medical imaging technologists are required to utilise a number of imaging modalities to assist in the diagnosis of disease. Proper utilisation of equipment requires an understanding of the underlying physical principles. Knowledge of the clinical applications enables an appreciation of the overall medical imaging strategies available in a patient's clinical management. The aim of this unit is to provide an appreciation of the physical principles and the complementary nature of the clinical applications of ultrasound and nuclear medicine.

PCB479 Clinical Radiography 2

Pre-requisites	PCB379 and PCB476 (PCB476 can be enrolled in the same teaching period)
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

In the continued development of positioning skills, it is essential that students have the opportunity to assist and perform radiographic examinations in the clinical situation. This period of clinical experience will enable you to gain further experience in general routine radiographic examinations and bedside radiography as well as an introduction to operating theatre and accident and emergency procedures. The unit will also provide an opportunity for you to become familiar with the patient care activities undertaken by radiographers.

PCB489 Clinical Radiotherapy 2

Pre-requisites	PCB389 and PCB396
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

This unit includes clinical experiences in approved departments in techniques of radiation therapy.

PCB495 Treatment Planning 3

Pre-requisites	LQB389 and PCB396
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes a study of planning hardware and software to include two-dimensional planning and the development of concepts to an advanced level of understanding of computer-assisted optimisation of isodose distributions.

PCB496 Radiotherapy Equipment

Pre-requisites	PCB178
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

It is important for you as a future radiation therapist to understand the principles of operation of radiotherapy equipment and the basic physics of the interaction of radiation with tissue. The aim of this unit is to teach you about the physics underlying the operation of linear accelerators and associated topics such as the interaction of radiation with tissue and the measurement of radiation dose.

PCB567 Advanced Radiographic Technique 1

Pre-requisites	PCB476 and PCB479
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit will provide a theoretical and practical understanding on which to build skills in the interpretation of radiographic images and recognition of common pathological processes. Practical sessions will allow maintenance of skills in general radiography.

PCB580 Clinical Radiography 3

Pre-requisites	PCB479
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

An opportunity to observe and assist in the performance of advanced imaging techniques and procedures is important to the education of medical imaging students. The periods of clinical experience in this full year unit will enable you to gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures (12 credit points achieved at completion of PCB580-1 and PCB580-2.)

PCB580 Clinical Radiography 3

Pre-requisites	PCB580-1
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers clinical experience in advanced radiographic techniques as introduced in PCB567, and general radiography. (12 credit points achieved at completion of PCB580-1 and PCB580-2.)

PCB581 Clinical Radiography 3

Pre-requisites	PCB479
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit offers an opportunity to observe and assist in the performance of advanced imaging techniques and procedures is important to the education of medical imaging students. The periods of clinical experience in this full year unit will enable you to gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures.

PCB581 Clinical Radiography 3

Pre-requisites	PCB581-1
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

This unit offers an opportunity to observe and assist in the performance of advanced imaging techniques and procedures is important to the education of medical imaging students. The periods of clinical experience in this full year unit will enable you to gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures.

PCB587 Radiation Therapy 3

Pre-requisites	PCB397, PCB489, PCB495 and LSB445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Oncology and technique are an essential component of radiation therapy skills and application of fundamental principles to routine treatment practice is essential. Students will need to gain practical skills in order to become a competent radiation therapist and this module provides them with the underpinning theory and practice. Students at this level are expected to engage with the literature base in order to support their work and they will have specific support for this via the presentation.

PCB590 Clinical Radiotherapy 3

Pre-requisites	(PCB590-1 or PCB591-1) and PCB489 and PCB587
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

This unit offers clinical experience in radiotherapy treatment and planning including specialised radiotherapy techniques as discussed in PCB587 and PCB595. (12 credit points achieved at completion of PCB590-1 and PCB590-2.)

PCB590 Clinical Radiotherapy 3

Pre-requisites	PCB489
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Experience in clinical departments is vital to developing clinical competence and this Unit is designed to build on the experience gained in PCB489 to further develop students' clinical and interpersonal skills. Continuing commitment to reflective practice will empower students to move towards autonomous learning. After completion of this Unit students should be able to assist with the full range of clinical procedures and have clear ideas about how to organise their clinical learning in relation to their future personal and professional development. (12 credit points achieved at completion of PCB590-1 and PCB590-2.)

PCB591 Clinical Radiotherapy 3

Pre-requisites	(PCB590-1 or PCB591-1) and PCB587 and PCB595
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

PCB591 Clinical Radiotherapy 3

Pre-requisites	PCB489
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Experience in clinical departments is vital to developing clinical competence and this Unit is designed to build on the experience gained in PCB489 to further develop students' clinical and interpersonal skills. Continuing commitment to reflective practice will empower students to move towards autonomous learning. After completion of this Unit students should be able to assist with the full range of clinical procedures and have clear ideas about how to organise their clinical learning in relation to their future personal and professional development.

PCB593 Digital Image Processing

Pre-requisites	PCB375-2 or PCB496 or PQB250
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with a basic understanding of the computer techniques used in image processing and reconstruction. Specific areas of study include the following: the structure of a digital image; image display techniques; grey scale palettes and look-up tables; Fourier transform theory; convolution theory; image processing hardware; image processing techniques, eg analysis, enhancement and restoration; spatial filtering; Fourier space filtering; methods of image reconstruction; 3D volume and surface rendering; applications of image processing in medicine, astronomy and remote sensing, etc.

PCB595 Treatment Planning 4

Pre-requisites	PCB397-2 and PCB489 and LSB445 and PCB495
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the planning experience gained in PCB495 to concentrate on application of complex techniques and technology to 3D planning practice. Students will be made aware of the techniques and challenges posed by the technology. In order to further prepare them for clinical planning, students will have the opportunity to plan highly complex tumour sites.

PCB600 Advanced Radiation Practice

Other requisites	Prior qualification in medical research science is required to enrol
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

The specialised and technically specific nature of each student's previous program in medical radiations requires a customised approach. This unit is necessary to provide an appropriate focussed theoretical and clinical support program to those students who have a prior qualification in the profession.

PCB605 Biomedical Instrumentation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Instrumentation plays an increasingly important role in the life of a scientist. This unit is designed to give you a working knowledge in instrumentations and the principles of circuit theory and electronics that underlie instrumentation. It is offered at this stage of the program since it relies on work developed in the earlier advanced-level units and provides a basis for experimental work in later units. This unit aims to introduce you to the role of instrumentation in modern scientific work. It will provide you with experience in the use of standard electronic laboratory

instrumentation and with an opportunity to develop skills in constructing and testing circuits. This unit will also show you how to access and interpret information on various electronic components and enhance your group interaction skills.

PCB667 Advanced Radiographic Technique 2

Pre-requisites	PCB567 and PCB581-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A knowledge of the principles of operation and application of advanced techniques and their imaging appearances is a necessary requirement of medical imaging students. This unit will expand and extend the knowledge acquired in previous units to advanced imaging investigations and practical imaging sessions will allow maintenance of general radiography skills.

PCB672 Project

Pre-requisites	PCB476 or PCB397-2
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is a supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic. (12 credit points achieved at completion of PCB672-1 and PCB672-2). Introductory lectures in research methods and statistics are provided.

PCB672 Project

Pre-requisites	PCB672-1
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The purpose of this unit is to enable you to carry out an independent enquiry within a professionally related area. An introduction to the research process is important preparation for future professional studies. This full year unit will assist you to develop skills in research and reporting writing as independent learners. During semester two you will prepare a report and poster on a chosen topic. (12 credit points achieved at completion of PCB672-1 and PCB672-2.)

PCB675 Radiation Safety and Biology

Pre-requisites	PCB272
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Medical radiations procedures are the principal cause of non background radiation exposure. It is therefore important that you understand potential hazards of exposure to ionising radiation and techniques of protection. An understanding of relevant codes of practice is also required. The aim of this unit is to provide you with a basic understanding of aspects of radiation biology and radiation safety relevant to your future employment as a Medical radiation technologist.

PCB681 Computed Tomography Imaging

Pre-requisites	LSB345 and LSB445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Computed Tomography Imaging is a specialised modality within the field of medical radiations. The applications of computed tomography imaging have a wide impact on differential diagnoses and subsequent radiographic examinations. This unit will provide you with an introduction to the operation and clinical applications of computed tomography and the image appearances.

PCB682 Magnetic Resonance Imaging

Pre-requisites	LSB345 and LSB445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Magnetic Resonance Imaging is a specialised modality within the field of medical radiations. The applications of magnetic resonance imaging have a wide impact on differential diagnoses and subsequent radiographic examinations. This unit will provide you with an introduction to the operation and clinical applications of magnetic resonance imaging.

PCB687 Specialised Radiotherapy Technique

Pre-requisites	PCB587 and PCB595
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes a study of specialised radiotherapy techniques including techniques applicable to the child patient and patients with communicable disease, total body photon and electron therapy. It also covers the principles, strengths and stage of development of techniques that are integral or complementary to the modern radiotherapy treatment of cancer.

PCB695 Advanced Treatment Planning Topics

Pre-requisites	PCB595 and PCB587
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is a study of the principles and techniques of medical imaging used in the detection of cancer including MRI, PET and SPECT. This study also covers future directions of three dimensional treatment planning, and IMRT.

PCB700 Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation. (60 credit points achieved at completion of PCB700-1, PCB700-2, PCB700-3, PCB700-4 and PCB700-5.)

PCB700 Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation. (60 credit points achieved at completion of PCB700-1, PCB700-2,

PCB700-3, PCB700-4 and PCB700-5.)

PCB700 Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation. (60 credit points achieved at completion of PCB700-1, PCB700-2, PCB700-3, PCB700-4 and PCB700-5.)

PCB700 Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation. (60 credit points achieved at completion of PCB700-1, PCB700-2, PCB700-3, PCB700-4 and PCB700-5.)

PCB700 Research Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation. (60 credit points achieved at completion of PCB700-1, PCB700-2, PCB700-3, PCB700-4 and PCB700-5.)

PCB706 Quantum Mechanics

Pre-requisites	PQB550
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is offered at the Honours level for students who wish to build on their knowledge in quantum mechanics obtained during their undergraduate studies. The unit will provide an essential platform for further studies and theoretical and experimental research in all areas that require knowledge of modern quantum theory. The unit is one of the essential and concluding units in your education in the physics major/co-major.

PCB708 Advanced Topics in Physics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

No more than three topics are included. The content is determined by current research advances, availability of appropriate staff, visiting academics, etc and may vary from year to year.

PCB742 Elective Unit

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The subjects are chosen to suit individual students but the topics studied would normally be in specific areas of physical chemistry, analytical chemistry, inorganic chemistry or organic chemistry and would be chosen from subjects presently offered in the masters program or other post graduate programs. Relevant material from other accredited courses may be included as part or all of the requirement for this subject as directed by the Course Coordinator and Head of School.

PCB780 Advanced Topics in Chemistry 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is the first semester component of a two-semester unit covering a selection of advanced topics in the areas of physical, organic and inorganic chemistry. The topics offered reflect the expertise of the academic staff as well as the needs of the students. (24 credit points achieved at completion of PCB780-1 and PCB780-2.)

PCB780 Advanced Topics in Chemistry 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This is the second semester component of a two-semester unit covering a selection of advanced topics in the areas of physical, organic and inorganic chemistry. The topics offered reflect the expertise of the academic staff as well as the needs of the students. (24 credit points achieved at completion of PCB780-1 and PCB780-2.)

PCN112 Medical Imaging Science

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers an introduction to programming techniques and algorithms and digital image processing; the principles of display, perception and interpretation of medical images; image quality. The second part, nuclear medicine, describes radioactive decay, radionuclide production, imaging systems and internal dosimetry.

PCN113 Radiation Physics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: radioactivity and the interaction of ionising radiation with matter; applied radiation counting techniques; radiation detectors; radiation dosimetry.

PCN114 Microprocessors and Instrumentation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the capabilities and limitations of a given instrument; design of interfaces between microcomputers and transducers; signal conditioning and signal conversion circuits for data acquisition.

PCN121 Vision Colour and Photometry

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

This is the first unit in the lighting suite of courses and aims to prepare students with the necessary grounding for future units in the course. All lectures in units that follow this will assume a good knowledge and understanding of the concepts and principles presented in this unit.

PCN122 Lighting Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit aims to introduce students to the basics of lighting design, taking into account both the requirements for lighting a space, as well as the practical issues. Both indoor and outdoor spaces are included. The software packages used are easily understood, as the aim of the unit is to teach students about lighting design, not how to use a lighting package.

PCN123 Sustainability and Human Factors

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

In this unit you should develop an understanding of the performance issues of lamps and luminaires, both from a energy point of view and the human issues – does it meet the needs of the people working or at leisure in the space.

PCN124 Lamps and Luminaires

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

This is an important unit in the lighting suite of courses because it describes the basic equipment that people working in any area of the lighting industry have to know and understand – the lights themselves. Understanding how a lamp works and how it performs helps people make informed decisions about the choices they have in choosing lamps for particular applications. All lectures in units that follow this will assume a good knowledge and understanding of the principles, properties and performances of light sources, including the emerging LED products.

PCN155 Cardiac Ultrasound 1

Co-requisites	PCN497-1
Credit Points	12
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

A comprehensive understanding of two-dimensional echocardiography and M-mode (motion mode) echocardiography is essential for professionals working in this field. This includes a detailed understanding of cardiac anatomy and physiology as well as a basic understanding of the embryological development of the human heart. Topics include embryological development of the human heart, detailed anatomy of the adult human heart, physiology of the adult human heart, basic cardiac pharmacology, basic electrocardiograph (ECG) patterns, the routine adult two-dimensional and M-mode echocardiographic examination of the adult heart (including standard two-dimensional and M-mode measurements and calculations).

PCN159 Ultrasonic Examination 1

Co-requisites	PCN162, PCN197-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit addresses the normal and abnormal anatomy and functions related to gynaecology and obstetrics, the ultrasonic techniques used and the appearance of related images. It includes a study of the technique used in the ultrasonic examination of the abdomen including the appearance on the ultrasound image of normal abdominal anatomy and its alteration by pathological processes.

PCN162 Principles of Medical Ultrasound

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit is designed to provide students with a thorough understanding of the physical processes involved in producing an ultrasound image, the features of ultrasound equipment and the role and responsibilities of the sonographer in producing a diagnostic examination. Topics include general scanning principles and considerations, care of equipment, physics of ultrasound, ultrasound equipment features, image production and processing, artefacts, image recording methods, quality control, biological hazards and safety issues, principles of Doppler ultrasound, care of the patient and communication issues.

PCN184 Breast Imaging

Pre-requisites	PCN187 and PCN397-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit includes the following: medical imaging of the breast; principles of mammographic and sonographic imaging; breast anatomy and physiology; pathological conditions affecting the breast and its appearance; advanced mammographic techniques; mammographic and sonographic quality assurance.

PCN187 Specialist Studies

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit allows medical imaging technologists to undertake detailed study in one or more specialty imaging areas, as applicable to their professional requirements. This unit is designed to extend the student's knowledge in clinical specialty areas.

PCN197 Clinical Attachment 1

Co-requisites	PCN159 and PCN162
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is a supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers. (12 credit points achieved at completion of PCN197-1 and PCN197-2.)

PCN197 Clinical Attachment 1

Pre-requisites	PCN197-1
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This is a supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers. (12 credit points achieved at completion of PCN197-1 and PCN197-2.)

PCN211 Physics of Medical Imaging

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Most medical imaging modalities now produce images in digital form. These digital images frequently undergo processing such as enhancement, registration, fusion and 3D reconstruction. Digital image processing and 3D image visualisation techniques are also extensively used in nuclear medicine and radiotherapy planning. Consequently, computing, numerical methods and digital image processing are necessary skills of a practising medical physicist. This unit is designed to make the student familiar with image visualisation methods and imaging in nuclear medicine, and to develop skills in digital image processing.

PCN212 Radiotherapy

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides an overview of the application of physics to radiotherapy including theoretical and practical aspects of the major topics in radiotherapy physics.

PCN214 Health and Occupational Physics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the philosophy, protocols and practices of safety in the medical and industrial physics fields and the minimisation of hazards associated with radiation, and laser techniques.

PCN218 Research Methodology and Professional Studies

Credit Points	12
Campus	Gardens Point

In the rapidly changing technological environment of medical physics and medical ultrasound it is essential that students develop basic research skills, data interpretation skills and written communication skills. Topics include the research process, data collection and analysis techniques, and writing and evaluating research reports. Students also require knowledge of the professional, basic management, legal and ethical issues involved in their particular speciality area. Topics include the role and purpose of professional bodies, professional communication, legal and ethical issues, and basic professional management techniques and issues.

PCN221 Best Practices in Lighting

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit brings together all the contributing factors in a lighting design package as studied in other units in this course, from the equipment to the design within the space or environment, the integration with daylight, to the human factors of comfort and visibility and sustainability and gives the student the opportunity to examine and critically analyse new lighting projects, as well as undertake their own total lighting design.

PCN222 Advanced Lighting Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit includes the latest developments in lamp technologies and sources (including LEDs and lasers), lighting in the mesopic range, a review of factors influencing lighting design; discomfort and disability glare; illuminance and glare scale, methods for the assessment of tasks and environments; in-depth studies of colour, form, pattern and space, issues relating to the perception and comprehension of the environment; the practical effects of daylight, introduction to the integration of daylight and electric lighting. This is a very hands-on unit with a large component of computer design work, group discussions and site visits and evaluations.

PCN223 Lighting Applications

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit builds on the material covered in PCN122 and looks in more depth at some of the applications covered in that unit, namely street lighting and public access lighting, as well as other areas not covered in that unit, including general floodlighting requirements and equipment, light distributions, calculation methods, area floodlighting, building floodlighting, pedestrian lighting, tunnel lighting, vehicle lighting, traffic signals, airport lighting, navigation lighting, display lighting, and advertising.

PCN224 Applied Lighting

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

There is no set material for this unit. Students undertake an approved project over a semester on any topic relevant to their interest in lighting. The project may be predominantly a reading course, reviewing, comparing or analysing material on a specific topic, or it may be a practically oriented project involving manufacture, measurement or analysis of a particular lighting product or installation. The project may be taken at QUT or within the person's place of employment.

PCN259 Cardiac Ultrasound 2

Pre-requisites	PCN155
Co-requisites	PCN497-2
Credit Points	12
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-2 (EXT)

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of PCN155 by introducing the principles and clinical applications of Doppler Echocardiography in the assessment of the adult heart as well as basic haemodynamic principles and calculations. In addition, this unit also covers the applications of cardiac ultrasound in the assessment of ischaemic heart disease and cardiomyopathies in the adult patient.

PCN297 Clinical Attachment 2

Pre-requisites	PCN159, PCN162, PCN197-1, PCN197-2 and PCN356
Co-requisites	PCN355, PCN357
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes a period of additional supervised clinical practice designed to expand and refine skills acquired in

PCN197. (12 credit points achieved at completion of PCN297-1 and PCN297-2.)

PCN297 Clinical Attachment 2

Pre-requisites	PCN159, PCN197-1, PCN197-2 and PCN356
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes a period of additional supervised clinical practice designed to expand and refine skills acquired in PCN197. (12 credit points achieved at completion of PCN297-1 and PCN297-2.)

PCN320 Lighting Project

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT, INT)

The requirements for a Masters include an in-depth study of a particular area of lighting that is in keeping with the student's interest. This takes the form of a project that is usually undertaken in an area of particular interest to the student. Although the project may be directly associated with the student's employment, it should have sufficient originality for the student to be able to demonstrate initiative, an understanding of scientific method, and an ability to problem-solve to obtain a meaningful and realistic solution.

PCN321 Reading Topic 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit aims to develop the student's knowledge and understanding of topics in lighting of particular interest to the student. In particular it can aim to give students greater insight into aspects they will cover in their Masters project. It will also help to develop the student's research, organisation and communication skills.

PCN322 Reading Topic 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This unit aims to develop the student's knowledge and understanding of topics in lighting of particular interest to the student. In particular it can aim to give students greater insight into aspects they will cover in their Masters project. It will also help to develop the student's research, organisation and communication skills.

PCN355 Vascular Ultrasound

Pre-requisites	PCN159 and PCN162 and PCN356
Co-requisites	PCN297-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the principles and equipment requirements of ultrasound applications in the cardiovascular system. It also includes the clinical techniques and diagnostic criteria of such applications, in particular those of the peripheral arterial and venous systems.

PCN356 Ultrasonic Examination 2

Pre-requisites	PCN159 and PCN162
Co-requisites	PCN197-2
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the ultrasound techniques used to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology. It also includes ultrasound techniques in advanced obstetrics and gynaecology and in the abdomen.

PCN357 Advanced Ultrasound Topics

Pre-requisites	PCN159 and PCN162 and PCN356
Co-requisites	PCN297-1
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of the unit is to provide you with a detailed understanding of the techniques involved in conducting an ultrasound examination in advanced obstetric applications. You will also be introduced to the applications of ultrasound techniques in paediatrics. New and evolving applications of ultrasound will be introduced.

PCN359 Cardiac Ultrasound 3

Pre-requisites	PCN259 and PCN497-2
Co-requisites	PCN597-1
Credit Points	12
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of PCN155 and PCN259 by introducing concepts and techniques of the more complex haemodynamic calculations and by discussing the applications of these techniques to cardiac valvular disease, diseases of the aorta and hypertensive heart disease in the adult patient.

PCN397 Clinical Attachment

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This is a supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers. (12 credit points achieved at completion of PCN397-1 and PCN397-2.)

PCN397 Clinical Attachment

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (EXT, INT)

This is a supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers. (12 credit points achieved at completion of PCN397-1 and PCN397-2.)

PCN459 Advanced Cardiac Ultrasound

Pre-requisites	PCN359 and PCN497-2
Co-requisites	PCN597-2
Credit Points	12
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-2 (EXT)

This unit extends and builds on the content of units PCN259 and PCN359 by introducing more advanced applications of echocardiography. In particular, this

unit covers the role of echocardiography in the assessment of complex cardiac diseases such as diastolic dysfunction, pericardial disease, cardiac masses, systemic diseases with cardiac involvement and congenital heart defects. An understanding of other diagnostic imaging methods of the heart is important complementary nature of diagnostic testing. The aim of the unit is to provide students with a detailed understanding of advanced applications of echocardiographic techniques, a sound knowledge of new and evolving echocardiographic techniques and an appreciation of the role of other diagnostic imaging tests in cardiac assessment.

PCN497 Clinical Attachment 4

Co-requisites	PCN155
Credit Points	6
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course. In this unit, basic echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff. (12 credit points achieved at completion of PCN497-1 and PCN497-2.) [Designated unit]

PCN497 Clinical Attachment 4

Pre-requisites	PCN155 and PCN497-1
Co-requisites	PCN259
Credit Points	6
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-2 (EXT)

This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course. This unit builds on skills, knowledge and abilities gained in the unit PCN497-1. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. The aim of the unit is to provide students with the opportunity to develop basic, practical echocardiographic skills in an approved clinical environment, under the direction of a suitably qualified clinical supervisor. (12 credit points achieved at completion of PCN497-1 and PCN497-2.) [Designated unit]

PCN520 Project (Full-time)

Credit Points	48
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

New and exciting technologies are playing an increasingly important role in everyday life. Modern healthcare is a good example of a field where technology has had a huge impact in the way patients are diagnosed and treated. Graduates are increasingly involved in the research and development of new technologies and also in its translation and implementation into clinical use. This unit aims to develop further the students skills for carrying out such work in the form of a research project. The project may be carried out in collaboration with a hospital or industry. This unit aims to introduce and improve the students skills in carrying out research work in the form of a short research project.

PCN540 Project (Part-time)

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

New and exciting technologies are playing an increasingly important role in everyday life. Modern healthcare is a good example of a field where technology has had a huge impact in the way patients are diagnosed and treated. Graduates are increasingly involved in the research and development of new technologies and also in its translation and implementation into clinical use. This unit aims to develop further the student's skills for carrying out such work in the form of a research project. The project may be carried out in collaboration with hospitals or industry. This unit aims to introduce and improve the students skills in carrying out research work in the form of a short research project. (48 credit points achieved at completion of PCN540-1 and PCN540-2.)

PCN540 Project (Part-time)

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

New and exciting technologies are playing an increasingly important role in everyday life. Modern healthcare is a good example of a field where technology has had a huge impact in the way patients are diagnosed and treated. Graduates are increasingly involved in the research and development of new technologies and also in its translation and implementation into clinical use. This unit aims to develop further the student's skills for carrying out such work in the form of a research project. The project may be carried out in collaboration with hospitals or industry. This unit aims to introduce and improve the students skills in carrying out research work in the form of a short research project. (48 credit points achieved at completion of PCN540-1 and PCN540-2.)

PCN597 Clinical Attachment 5

Pre-requisites	PCN359 and PCN497-2 and PCN597-1
Co-requisites	PCN459
Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course. This unit builds on skills, knowledge and abilities gained in the unit PCN497. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. The aim of the unit is to provide students with the opportunity to further develop and expand basic, practical echocardiographic skills and to gain experience in advanced techniques in an approved clinical environment, under the direction of a suitably qualified clinical supervisor. [Designated unit]

PCN597 Clinical Attachment 5

Pre-requisites	PCN259 and PCN497-2
Co-requisites	PCN359
Credit Points	6
Campus	Internet and Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is

complementary to all other units in the course. This unit builds on skills, knowledge and abilities gained in the unit PCN497. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff. (12 credit points achieved at completion of PCN597-1 and PCN597-2.) [Designated unit]

PCN640 Project

Pre-requisites	PCN162, PCN218, PCN459 and PCN597-2
Other requisites	Course Coordinator approval is required to enrol
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

In the rapidly changing technological environment of cardiac ultrasound it is important that students develop basic research skills, data interpretation skills and written communication skills. Students require these skills in order to be able to evaluate and appraise the value of research reports as well as prepare their own written research reports. Students, having previously completed the coursework requirements of PH75 may elect to further develop their research skills by undertaking the project phase leading to the award PH85 Master of Cardiac Ultrasound. The project may take the form of a clinical research project or a feasibility study. The project is typically undertaken externally, under QUT supervision over 2 semesters (part-time). (48 credit points achieved at completion of PCN640-1 and PCN640-2.)

PCN640 Project

Pre-requisites	PCN640-1
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

In the rapidly changing technological environment of cardiac ultrasound it is important that students develop basic research skills, data interpretation skills and written communication skills. Students require these skills in order to be able to evaluate and appraise the value of research reports as well as prepare their own written research reports. Students, having previously completed the coursework requirements of PH75 may elect to further develop their research skills by undertaking the project phase leading to the award PH85 Master of Cardiac Ultrasound. The project may take the form of a clinical research project or a feasibility study. The project is typically undertaken externally, under QUT supervision over 2 semesters (part-time). (48 credit points achieved at completion of PCN640-1 and PCN640-2.)

PCN701 Topics in Advanced Chemistry 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The complexity of the chemical systems studied in a research program and the sophistication of the instrumentation used demand that deeper theoretical understanding than that acquired in an undergraduate program. The aims of this unit are to teach and extend knowledge and comprehension of Advanced Chemical Techniques and assess application of knowledge; and to provide the candidate with the appropriate theoretical and practical background, at an advanced level, necessary for the completion of a research program.

PCN705 Research Methodology

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit is a guided program of literature surveys to provide the background information for the research project. This unit enables students to develop verbal and oral communication skills required for the successful conduct of a chemical research project. During the course students will be required to attend and participate in seminars. Students must present two seminars on their own research. (12 credit points achieved at completion of PCN705-1 and PCN705-2.)

PCN705 Research Methodology

Credit Points	6
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit includes a guided program of literature surveys to provide the background information for the research project. This unit enables students to develop verbal and oral communication skills required for the successful conduct of a chemical research project. During the course students will be required to attend and participate in seminars. Students must present two seminars on their own research. (12 credit points achieved at completion of PCN705-1 and PCN705-2.)

PCN710 Chemical Instrumentation

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

For those projects in which instrumental design forms a major part of the research activity a knowledge of the mode of operation of existing chemical instrumentation provides an important basis for further progress. Students will undertake study in chemical instrumentatoin via both practical and theoretical means.

PCN715 Advanced Topics in Physics 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides a focused theoretical foundation for each students research program or other advanced topics in physics and develops a high level of theoretical understanding of the physical principles involved.

PCN716 Advanced Topics in Physics 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides a focused theoretical foundation for each students research program or other advanced topics in physics and develops a high level of theoretical understanding of the physical principles involved.

PCN718 Advanced Topics in Medical Radiation Sciences 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides a focused deeper understanding of the individual student's research program through study of an advanced topic(s) in the field of medical radiation technology.

PCN719 Advanced Topics in Medical Radiation Sciences 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides a focused deeper understanding of the individual student's research program through study of an advanced topic(s) in the field of medical radiation technology.

PCN720 Chemometrics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: the concepts of chemical data acquisition and interpretation; computational methods and existing software packages for statistical analysis in chemistry; statistical methods in quality and process control; sampling procedures; multivariate analysis and optimisation techniques.

PCN730 Advanced Physical Methods in Chemistry

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Research projects in chemistry are frequently dependent on instrumental and physical procedures both for monitoring preparative procedures and for studying fundamental chemical phenomena. The aim of this unit is to prepare students to undertake practical work in instrumental and physical procedures.

PCN740 Laboratory Techniques for Preparative Chemistry

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Before an advanced practical project, particularly one involving organic synthesis, is undertaken it is necessary to develop specialised laboratory skills in preparative chemistry so that the candidate can have the confidence to handle and purify the small quantities of often precious material which he will encounter during the project. The aim of work in this unit is to cultivate and deepen understanding of systems and processes related to organic synthesis, to develop and enhance laboratory skills and techniques related to handling and purifying precious materials. Development of these skillsets is designed to lead to competence in designing and undertaking advanced practical work.

PCN801 Topics in Advanced Chemistry 2

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The complexity of the chemical systems studied in a research program and the sophistication of the instrumentation used demand that deeper theoretical understanding than that acquired in an undergraduate program. The aims of this unit are to extend and deepen the theoretical and practical background required for undertaking a research program and to provide the candidate with the appropriate theoretical and practical background, at an advanced level, necessary for the completion of a research program.

PQB105 Biological Chemistry

Anti-requisites	SCB113, SCB121
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

The study of chemistry forms an important foundation for all students of the health sciences. The organisation of the human body begins with chemicals (atoms and molecules) making up its simplest or smallest scale level of organisation. Chemistry allows us to understand how cells, tissues and organs are formed, how these substances react with each other and their environment, and how these substances behave. This unit will allow development of the essential concepts of chemistry necessary for bioscience and biomedical students. Topics will be introduced and applied in a contextualised manner relevant to the biological sciences.

PQB250 Mechanics and Electromagnetism

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The experimental means by which we have arrived at our modern understanding of the universe is central to the scientific philosophy. Students of physics and physics related areas need to possess skills in quantitative handling, processing, communication and evaluation of data. Higher level studies in specialised areas of Physics require a familiarity with a range of fundamental topics in Physics and an ability to apply critical thinking and advanced mathematical techniques to the analysis and solution of Physical problems. This first-level unit lays the foundation for these higher level studies by introducing the fundamental topic areas of mechanics and electromagnetism.

PQB251 Waves and Optics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Wave phenomena are used to describe and explain many of the physical processes in the universe. Sound and light are the most commonly experienced of these and have far-reaching human applications, including their use as experimental tools for science. The study of wave phenomena has led to the development of quantum mechanics, a cornerstone of modern scientific thought. This first-level unit lays the foundation for discussion of wave phenomena in higher level studies, but will also be relevant to those not considering progressing to a Physics major but wishing to understand more of the Physical world in which we live.

PQB312 Analytical Chemistry For Scientists and Technologists

Pre-requisites	SCB131
Equivalents	PCB414
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit addresses three vital theoretical and practical elements of analytical chemistry: quality assurance in a chemical laboratory; principles of chemical sampling; common instrumental techniques. It is a generic unit designed to address the needs and skills of students enrolled in the Chemistry major as well as other majors such as Forensic Science and double degrees in with the Chemistry major. The unit builds on the analytical chemistry concepts introduced in SCB131 Experimental Chemistry. The aim of this unit is to provide students with principles of analytical chemistry, including some common instrumental techniques, which

are firmly linked to the theory and practice of the discipline in a modern, working laboratory.

PQB313 Analytical Chemistry For Industry

Pre-requisites	SCB131
Equivalents	PCB314
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to develop fundamental knowledge and skills in the theory and practice of the four areas of classical qualitative and quantitative analysis, namely, gravimetry, titrimetry, spectrophotometry, and electrometric methods, as well as to appreciate the close connection of analytical chemistry to industry and environmental monitoring.

PQB331 Structure and Bonding

Pre-requisites	SCB121 and SCB131
Anti-requisites	PCB334, PCB354
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides detailed coverage of the theories of bonding in organic, inorganic and coordination compounds including orbital hybridisation valence bond theory, coordination theory and crystal field theory. The cause and effect relationships between bonding and structure are developed leading to an understanding of structural variability, chirality, and other modes of isomerism for a broad range of chemical compounds. An introduction to molecular symmetry, which is central to the study of molecular geometry and shape, also provides the background for later studies in spectroscopy. Lectures are complemented by 7 laboratory experiments and 4 hands-on style workshops.

PQB350 Thermodynamics of Solids and Gases

Pre-requisites	(PQB250 or PCB250), and (MAB111 or MAB120 or MAB121)
Co-requisites	MAB311
Equivalents	PCB562
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with an overview of the basic thermodynamic principles that describe how heat and other forms of energy are transported through matter in its solid and gaseous states. Through integrated lecture and practical classes, it provides students with a foundation for more advanced studies later in areas such as condensed matter physics and quantum mechanics. The three areas of study in this unit; thermodynamics, solid state physics and statistical physics; are essential core topics if students are considering postgraduate study in the physical sciences or professional employment as a physicist.

PQB360 Global Energy Balance and Climate Change

Pre-requisites	MAB121 and MAB122
Equivalents	PCB563
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Modern societies are becoming increasingly aware of potential environmental problems associated with conventional energy production technologies. Application of alternative technologies is therefore increasing, with ambitious targets and plans to support research and development for reducing energy related environmental consequences. This unit is designed to offer science and engineering students an opportunity to gain awareness about the expanding field of alternative energy technologies and to understand relationships between use of energy and its impact on local and global environment.

PQB401 Reaction Kinetics, Thermodynamics and Mechanisms

Pre-requisites	PQB331
Anti-requisites	PCB354, PCB405
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Physical Chemistry is a discipline of chemistry in which the influences of physical factors on chemical reactions are described and quantified. The fundamental factors that govern the extents (equilibria) and rates (kinetics) of chemical reactions are usually the realm of Physical Chemistry. This unit illustrates this basic science with applications of these principles to actual reaction types that are expounded as case studies of the principles underlying the Chemistry. In addition, all students of chemistry need an understanding of the concepts of acids and bases in their widest sense. This unit provides the tools that chemists use to understand how and why molecules react. The aim of this unit is to demonstrate how reactions and their equilibria and rates can be described and quantified, and to understand by studying key examples, the fundamental factors that govern the outcomes of chemical reactions.

PQB404 Nanotechnology and Nanoscience

Pre-requisites	SCB111 and (SCB121 or SCB113)
Equivalents	PCB445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Nanotechnology is the science of constructing molecular-scale devices and of their applications. Like biotechnology, it is a growth industry and has the potential to significantly affect our lives and the world in which we live. Nanotechnology is truly interdisciplinary, it draws on the strengths of all the basic sciences. The lecture component of the unit will comprise an introduction to the field of Nanotechnology and Nanoscience, with a bias towards Chemical Technology applications derived from the Physical Sciences. The laboratory component will focus on the techniques currently used to characterise and manipulate nanoscale material and the construction of functional devices from nanoscale, molecule components.

PQB423 Process Principles

Pre-requisites	SCB131
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will provide students with a knowledge of qualitative and quantitative aspects of Process Principles. These include an overview of chemical reactions involving important processes and the skills to undertake mass and energy balances around a system whether that system be an individual industrial

process, a combination of such processes or a natural phenomenon. This knowledge will also enable students to participate in the identification, quantification and solution of problems arising during the day to day operation of industrial processes.

PQB442 Chemical Spectroscopy

Pre-requisites	PQB331
Equivalents	PCB444
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Spectroscopic techniques are now widespread in scientific laboratories. An appreciation of both the principles and practice of spectroscopy is essential for those contemplating a career in chemistry. The use of spectroscopic methods to elucidate molecular structure provides an excellent vehicle for training in the scientific method, particularly the logical application of experimental data to deduce the solution to a complex problem. Whilst the fundamental theoretical concepts will be dealt with in the early part of the unit, later emphasis will be on developing practical skills in problem solving, a skill of value to all fields of scientific and technological endeavour.

PQB450 Energy, Fields and Radiation

Pre-requisites	PQB250 or PCB250, and MAB311
Equivalents	PCB362
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The common theme of the topics covered in this unit is fields, the energy contained in these fields and the transfer of this energy. This theme is addressed in the specific topics of classical mechanics, electromagnetism and radiation physics. The classical mechanics and electromagnetism components build on material presented in introductory units and apply this to complex real world problems. The unit is designed to prepare students for more advanced studies in these areas but the unit will also provide a useful background for students undertaking a comajor in Physics or preparing for a career in secondary education.

PQB451 Electronics and Instrumentation

Pre-requisites	PQB250 or PCB250
Anti-requisites	PCB361, PCB460
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Instrumentation plays an increasingly important role in the life of a scientist. This unit is designed to give the student a working knowledge in instrumentations and the principles of circuit theory and electronics that underlie instrumentation. It is offered at this stage of the program since it relies on work developed in the earlier advanced-level units and provides a basis for experimental work in later units.

PQB460 Astrophysics 1

Pre-requisites	PQB250 or PCB250 or PCB150
Equivalents	PCB469
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This second level unit is one of the key units in the astrophysics co-major and introduces students to most of the main aspects of astrophysics. This unit is essential as it defines the connections between the supporting units of the co-major. Students are required to use the knowledge and skills developed in first level physics, maths and natural resource units.

PQB502 Advanced Physical Chemistry

Pre-requisites	PQB401
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A Chemistry graduate in today's highly technological world requires knowledge of the principles that govern the behaviour of solids, liquids, gases, and mixtures thereof. This leads to an appreciation of how fundamental physical chemical principles determine the bulk properties of materials and how the chemical nature of interfaces govern chemical reactions in many important applications. This unit is placed appropriately in fifth semester, following the second year units that provide the basic principles, language and tools of chemistry.

PQB513 Instrumental Analysis

Pre-requisites	PQB312 or PCB414
Equivalents	PCB514
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide an understanding of modern methods of instrumental analysis; expand practical experience in using major instrumental analysis techniques; develop a critical understanding of some of the limitations of analytical measurements as well as an appreciation of the comparative advantages of instrumental methods and why a certain instrumental method might be preferred over another for particular types of problems; and develop fundamental knowledge and skills in data manipulation and multivariate data analysis.

PQB525 Unit Operations

Equivalents	PCB524, CVB221
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Having gained an understanding of mass and energy balances in PQB423 you will be able to appreciate the principles underlying the design and operation of the many individual processes, or unit operations, that together make up a large part of any full-scale industrial process. It is vital that Chemists involved in Chemical Technology understand how unit operations work so that they can interact effectively with unit operators and process engineers. An additional role of this unit is to build a knowledge base for the subsequent development of generic skills in Chemical Technology through a problem-solving exercise involving an authentic industrial process in PQB623.

PQB531 Organic Mechanisms and Synthesis

Pre-requisites	PQB401, PQB442
Anti-requisites	PCB554
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The synthesis of molecules from smaller parts is the ultimate expression of our knowledge of organic reactions and their

mechanisms. In order to understand the diverse range of reagents and reactions used sequentially in synthesis, fundamental knowledge of key reaction mechanisms and reactivity patterns of organic molecules is essential. These topics are both intellectually challenging and of fundamental importance in the real world. Whether the context is the formation of totally new molecules, or the routine preparation of any of a vast array of useful products such as medicines, cosmetics, agrochemicals, plastics, dyes, foodstuffs etc., organic synthesis is vital to our modern lifestyle. This unit builds on the fundamentals of structure and bonding, reaction mechanisms and structure determination covered in previous units, so this unit is programmed in the fifth semester.

PQB550 Quantum and Condensed Matter Physics

Pre-requisites	PQB350 and (MAB134 or MAB311)
Equivalents	PCB561
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide students with an understanding of quantum theory, from its historical development through to its realisation in terms of modern wave mechanics, and its application to spectroscopy and electronic properties of condensed matter.

PQB551 Physical Analytical Techniques

Pre-requisites	(PQB350 or PCB462) and (MAB112 or MAB122)
Equivalents	PCB562
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Modern methods of physical analysis are an important tool for the physical scientist. This unit provides an introduction to the physical principles and applications in three fields of analysis: X-ray diffraction, analytical electron microscopy and physical spectroscopy. Each of these topics encompasses a variety of measurement techniques. The methodologies presented have wide application in a number of areas of science and technology including nanotechnology and materials research and development. Lectures are supplemented by laboratory practicals to enable students to gain familiarity and experience with the instrumentation.

PQB584 Forensic Physical Evidence

Pre-requisites	PQB312, SCB384
Anti-requisites	PCB584
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides a theoretical and practical framework to introduce you to the physical evidence processing techniques of questioned documents and computer forensics and the forensic examination techniques of optical and electron microscopy. The unit will also discuss the physical and chemical structure of some common types of physical evidence (fibres, fabrics & severance, soils and physical fits) and the analytical methods used for their analysis. It is placed appropriately in the fifth semester of the course to coincide with and complement the Instrumental Analysis unit PQB513 which the core knowledge for the instrumental techniques used within the forensic analysis of various types of physical evidence.

PQB623 Chemistry in Industry and Technology

Pre-requisites	PQB525 or PCB524
Equivalents	CVB211
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes mass transfer and heat transfer operations. The unit also includes field trips to various industrial sites, the preparation of field trip report, and a group problem-solving exercise.

PQB631 Advanced Inorganic Chemistry

Pre-requisites	PQB331
Equivalents	PCB634
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Major topics covered are as follows: organometallic chemistry, including metal-carbon bonding, main group and transition metal organometallics and applications of organometallic compounds in synthetic chemistry; bioinorganic chemistry; physical methods of structure determination, such as single crystal X-ray diffraction; chemical applications of group theory.

PQB642 Chemical Research

Pre-requisites	4 Advanced Level Chemistry units
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit addresses a selection of topics in advanced chemistry from a range of evolving areas of relevance in modern chemistry and chemical technology such as nanotechnology, drug design, free-radical chemistry and trace metal speciation in environmental and biological systems. It includes the important issue of the societal and ethical implications of the profession of chemistry.

PQB650 Advanced Theoretical Physics

Pre-requisites	(PQB350 or PCB462) and (PQB550 or PCB561)
Equivalents	PCB665
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Advanced electromagnetism, magnetism of materials and magnetic resonance, and advanced statistical mechanics are the fundamental topics for any advanced-level Physics degree. They provide fundamental background knowledge and problem solving skills that are essential in any area of modern theoretical, experimental, and applied physics. This unit also provides you with an essential platform for further studies and research in physics and applied physics in Honours and at the post-graduate level. The aim of this unit is to provide you with an advanced understanding of fundamental physical phenomena related to electro-magnetism and wave propagation, quantum and statistical basis of nuclear magnetism and magnetic resonance, statistical mechanics, quantum statistics, and general statistical thermodynamics.

PQB651 Experimental Physics

Pre-requisites	PQB451 or PCB460
Equivalents	PCB661
Credit Points	12
Campus	Gardens Point

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit represents the culmination of the students experiences in undergraduate experimental work. The unit is offered in the final year of study to take advantage of and integrate the skills acquired in previous units. The student is given the opportunity to select three experiments to be undertaken from a series of extended experiments in the areas of physics research undertaken at QUT.

PQB660 Astrophysics 2

Pre-requisites	PQB250 or PCB250 or PCB150
Equivalents	PCB669
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Theoretical astrophysics and cosmology are at the forefront in developing comprehensive physical understanding of our world, including natural links between macro and micro processes in the Universe. This third level unit is one of the key units in the astrophysics co-major, that presents an advanced undergraduate course in modern theory of gravitation, space-time concept, cosmology, and their relationship with other areas of contemporary physics. You will be required to use the knowledge and skills developed in first and second level physics and maths units. This unit is the 'cap-stone' of the astrophysics co-major. The main aim of this course is to introduce you to one of the most challenging and exciting topics in modern physics - theory of gravitation and relativistic cosmology.

PQB661 Lasers and Photonics

Pre-requisites	(PQB251 or PCB260 or EEB340 or ENB242 or ENB343) and (MAB311 or MAB233)
Equivalents	PCB664
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Laser and photonic technologies are rapidly maturing areas responsible for creating new industries and employment opportunities for scientists and engineers in the areas of information technology, manufacturing, sensing and health. In particular, the vast global optical communications industry has dramatically increased information transport rates through the development of new laser sources and photonic devices. At the heart of all advances in photonics is a greater understanding of light-matter interactions and the processes used to fabricate devices. This unit is offered to science and engineering students who seek to understand the physical principles underpinning lasers and photonic devices and their use in a range of optical technologies.

PQB684 Forensic Analysis

Pre-requisites	PQB513 or PCB514
Equivalents	PCB684
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides a theoretical and practical framework for forensic analysis and toxicology. It includes topics such as nature and abuse of drugs; introduction to pharmacology and toxicology; illicit drugs and trace evidence; the application of GC, MS and IR in forensic examination; examination of trace evidence. Substantial laboratory and workshop sessions complement the theory.

PUB104 Australian Health Care Systems

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This is an important unit for students entering or planning to enter the health industry as it is designed to give a broad overview of systems of health care in Australia and their methods of operation. This unit introduces the role of health service managers as members of the health care team, the basic principles of health service management in health care facilities and beyond, and the functions of health service managers.

PUB105 Family Influences on Health and Development

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit explores the diversity of Australian families to provide an understanding of the social structures that impact on families and the ways in which families influence the health, development and well-being of family members across the life course.

PUB112 Workplace Health and Safety

Credit Points	12
Campus	External

Introduces students to the basic concepts and theoretical framework of occupational health and safety such that they can identify health and safety problems in the workplace; be aware of strategies for dealing with such problems; and become familiar with the legislation, government agencies and health personnel associated with the working environment. Topics covered will include the physical, chemical and biological environments, and ergonomics. The students will also develop knowledge and skills associated with the actual measurement of the physical and chemical working environment and evaluation of the data collected.

PUB113 Design and Technology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Technology and design are an integral part of the practice of home economics, facilitating effective responses to challenges in the contexts of food, locales and living environments. Personal understanding of and experience with design, creativity, research and innovation are needed to participate productively and sensitively within local and global communities.

PUB180 Foundations of Paramedic Practice 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is an introduction to ambulance practice and the role of paramedics within the health care spectrum. It prepares students for the first clinical practice unit. Topics include the following: the history, evolution, culture and development of ambulance services on a national and international level; the structure, function, policies and procedures of the Queensland Ambulance Service; the role of the ambulance service in a multidisciplinary and integrated approach to health care; the relationship between field care and in-hospital definitive care; and basic ambulance care including initial assessment, planning and implementing basic procedures, and equipment. The

unit includes a structured observer program.

PUB201 Food and Nutrition

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit includes the following: an introduction to the history of food and nutrition in Australia; the food system; the food supply; proteins, carbohydrates, fats, vitamins and minerals; food grouping systems; dietary guidelines; the recommended dietary intakes; nutrition through the life cycle; food and nutrition problems; nutrition as a public health issue; and international nutrition issues.

PUB208 Understanding Health Information

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This aims to provide students with an understanding and appreciation of the diversity of health information resources available; the benefits of high-quality and standardised health information for positive health outcomes and the management of health services; and the various technology platforms available (including telecommunications and the internet). Students develop data organisation and management skills relevant to systems within the health industry context.

PUB209 Health, Culture and Society

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is concerned with the social and cultural dimensions of health and illness and how they relate to health status and patterns of behaviour. The unit introduces students to thinking about health from sociological and anthropological perspectives, drawing on relevant concepts and theory to examine selected public health issues. Identifying and addressing social and cultural factors that shape people's health experiences of health, illness and health systems are integral parts of public health practice in terms of reducing health inequalities, delivering appropriate services, and ultimately improving population health outcomes.

PUB215 Public Health Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

In this unit students will gain an understanding of: the structure of the Public Health workforce; the professional frameworks and future career pathways available; the 'Practice Profiles' of graduates specialising in specific fields in Public Health; the ways in which Public Health graduates work collaboratively with other professionals in this field; and the workplace experience including professional roles, ethical responsibilities and practical skills of graduates.

PUB251 Contemporary Public Health

Anti-requisites	PUN106
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT, EXT)

This unit provides an introduction to the following: the philosophy and approach of public health; the traditional public health process; the multidisciplinary nature of public health; and health policy and its impact on public health. Recent reformulations of traditional public health approaches including health promotion, intersectoral action for health and healthy public policy are examined. The role of public health in Australia and overseas, its main discipline components and some of the constraints faced by public health is also addressed. This unit considers groups with special needs and contemporary issues.

PUB270 Paramedic Clinical Practice 1

Pre-requisites	LSB282 and PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

This unit is the first in a series of supervised clinical practice units. Topics include the following: assessing, diagnosing, planning, implementing and evaluating patient care in the out of hospital phase; effective scene management including logistics, safe access and egress, and patient extrication techniques; written and oral communication including patient interviews, radio procedures, writing ambulance report forms and patient handover at hospital. The placement is six weeks and provides a transition from observer to operational ambulance crew member under the supervision of a qualified paramedic mentor. [Designated unit]

PUB280 Foundations of Paramedic Practice 2

Pre-requisites	PUB180
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit follows on from PUB180 and further develops core clinical skills and expertise in the use of ambulance equipment. Topics covered include the following: monitoring basic patient care and modifying as required; handing over a patient requiring basic ambulance care; the use of ambulance equipment including ambulance vehicles and patient care equipment; health and safety legislation, policies and procedures; and the attributes of a paramedic e.g. compassion, accountability, respect, ethical practice, responsibility and sensitivity. The unit includes a structured observer program for students.

PUB321 Textile Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

In this unit scientific understandings, social issues, production techniques and the aesthetic aspects of textiles are explored. These are applied to individual textile projects.

PUB326 Epidemiology

Anti-requisites	HLN710
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

Epidemiology is the core scientific method of public health. It is the study of the distribution of health and disease in the population and includes research into causes of disease and the effectiveness of public health programs. Epidemiological methods are used to generate the evidence base for clinicians, health promotion specialists, health educators, occupational and

environmental health officers and health service managers.

PUB332 Sustainable Environments For Health

Anti-requisites	PUB107
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an overview of environmental health and introduces the importance of achieving environments that are able to sustain human health. In particular, the unit covers the practice of environmental health, its scientific foundations, and its integral place in the overarching discipline of public health.

PUB336 Women's Health

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit explores the data and current health issues related to women's health and critically evaluates health related policies, systems and practices in terms of their impact on women's health, internationally and in Australia. The social, economic, cultural and political influences on women's health, and the specific needs of sub-populations of women are examined.

PUB339 Podiatric Medicine 1

Pre-requisites	LSB235 and LSB250 and PUB362. PUB362 can be enrolled in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction to the clinical, theoretical and professional aspects of podiatry practice. Students entering the unit begin the transition to the unique and challenging role of clinician, as well as continuing academic learning. Students are required to apply previous background knowledge, ie advanced anatomy, biochemistry, etc, in the clinical setting. Student are also involved in the care of patients attending the university clinic. The unit is particularly designed to encourage the development of essential graduate skills such as a self-directed approach to learning, the ability to work as part of a team and the ability to engage in peer review. [Designated unit]

PUB343 Home Economics Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit explores the nature of home economics, its contribution to the broader goals of schooling and the unique features that characterise home economics teaching and learning. It links discipline studies, curriculum studies and field experiences.

PUB355 Hospitality Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit explores the use of relevant management principles, safe and hygienic work practices, effective communication skills, the mastery of techniques in food production and presentation associated with vocational education and industry.

PUB361 Textiles 2

Pre-requisites	PUB321
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

An understanding of textile consumer issues is developed by studying theoretical and scientific explorations, production practices and creative processes in relation to critiquing and designing textile articles.

PUB362 Podiatric Clinical Gait Analysis

Pre-requisites	LSB235 and PUB339. PUB339 can be enrolled in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Technologies are used according to established procedures in order to assess human gait and collect patient data. The results are evaluated to ensure that the data meet the accepted standards for clinical decision making purposes. The emphasis is on gait analysis techniques that are particularly applicable in podiatry.

PUB383 Foundations of Paramedic Practice 3

Pre-requisites	PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

PUB384 Research and Evidence in Paramedic Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

PUB390 Paramedic Management of Medical and Surgical Emergencies A

Pre-requisites	PUB280 and (LSB282 or LSB382)
Credit Points	12
Campus	Kelvin Grove

This unit covers some of the most common medical and surgical emergencies seen in ambulance practice. Topics include the epidemiology, prevention, integrated and definitive care, pathophysiology, assessment, clinical management and rehabilitation of patients suffering cardiovascular, respiratory and neurological disease. Theory is presented on campus and experience is gained in a hospital environment under the supervision of clinical educators.

PUB391 Paramedic Management of Medical and Surgical Emergencies B

Pre-requisites	PUB280 and PUB390 and LSB282
Credit Points	12
Campus	Kelvin Grove

This unit covers some of the most common medical and surgical emergencies seen in ambulance practice. Topics include the epidemiology, prevention, integrated and definitive care, pathophysiology, assessment and clinical management of patients suffering genitourinary, metabolic, endocrine and gastrointestinal disease. Theory is supplemented by simulation and scenario based activities under the supervision of clinical educators.

PUB405 Nutrition Science

Pre-requisites	(LQB381 or LSB308) and PUB201 and LQB388 and (LQB488 or LSB250)

Co-requisites	LQB481
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Nutrition science examines a range of nutrient components in our food supply, including the biochemical pathways and physiological effects in the body, possible health implications of deficiency or toxicity and important dietary sources. It integrates nutritional knowledge with the science of biochemistry and clinical physiology and provides the foundation on which further studies in nutrition can be built.

PUB406 Health Promotion Practice

Pre-requisites	PUB251 or PUB530
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit ties together the fundamental health promotion knowledge and constructs covered in earlier units in the public health subject area. It builds upon this basis to introduce students to the range of strategies available to a health promotion practitioner. The unit promotes an appreciation of the strengths and weaknesses of different approaches, as well as related administrative factors. Students undertake a small health promotion project in groups of 3-4. This is an essential field of study for those students who wish to work in a health promotion or related field.

PUB416 Advanced Research Methods

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

An understanding of research methods is essential in the training of all public health professionals. This unit explores quantitative methods in a variety of health research projects, examining conceptualisation of research questions and hypotheses, core elements of experimental and quasi-experimental designs, and various approaches to the collection, management and analysis of quantitative data. The unit has a practical focus for students who are considering conducting research as well as those interested in deeper appreciation of implementation behind published research results.

PUB436 Evidence Based Practice

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT)

This unit equips students with the skills to identify, critically analyse and evaluate evidence, and to implement evidence-based practice within thier chosen profession.

PUB438 Medicine

Pre-requisites	(LSB451 or LSB250) and LSB475 and LSB384
Co-requisites	LSB584
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Following completion of this unit, students should be able to recognise and understand the clinical features, pathogenesis and significance of common conditions affecting the lower limbs. For example infectious diseases, nervous system disorders, endocrine/metabolic and deficiency states, renal disorders, cardiology, respiratory disorders, immunology, hepatobiliary disorders, musculoskeletal disorders, haematology/lymph, inherited/genetic conditions. The diagnosis and management of dermatological disorders is also covered.

PUB439 Podiatric Medicine 2

Pre-requisites	PUB339
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to increase proficiency in the examination and treatment of patients who have common foot problems with particular emphasis on aged care and diabetes. Topics covered include: clinical biomechanics, the elderly and the ageing foot, the management and of the diabetic foot, wound healing and wound care products, footware construction, assessment and prescription, foot orthoses. [Designated unit]

PUB442 Podiatric Medicine and Clinical Practice

Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

PUB451 Paramedic Management of Cardiac, Respiratory and Neuro Emergencies

Pre-requisites	LSB282 and PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

PUB452 Paramedic Management of Medical and Surgical Emergencies

Pre-requisites	LSB282 and PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

PUB453 Paramedic Management of Trauma and Environmental Emergencies

Pre-requisites	LSB282 and PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

PUB461 Qualitative Inquiry in Public Health

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Qualitative methods are essential to generate knowledge of people's lived experiences, the meanings they ascribe to them, and to the social dimension of health. The nature and complexities of many public health problems require a mix of research methods and the contributions of qualitative inquiry are increasingly recognised. The practical skills acquired in this unit can be applied to a wide range of public health works, including community based program evaluation, international health and health social science research.

PUB470 Paramedic Clinical Practice 2

Pre-requisites	PUB270, PUB390, and PUB391
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit continues on from PUB270 and includes a six week placement providing work integrated learning experience in a supervised out of hospital environment. Students learn to apply standard ambulance management at non-complex scenes with straightforward clinical presentations and gain confidence in managing patients. [Designated unit]

PUB474 Food Science

Pre-requisites	PUB201 (This unit is available ONLY in courses where listed as a core unit)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

To fulfil their needs as future professionals working in food and nutrition related areas, students explore the nature of foods and their constituents, studying the underlying scientific principles related to the manufacture, preservation, distribution and the final production of food items for consumption. This unit is available ONLY in courses where it is listed as a core unit.

PUB480 Health Administration Finance

Credit Points	12
Campus	External

This unit addresses the following: financial administration and resource/financial distribution within the Commonwealth and State governments; financial management in the health industry; financial analysis; planning and budgeting; working capital management in the health industry; health care financial performance and evaluation; and methodologies for costing health services.

PUB486 Ethics and the Law in Health Service Delivery

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit enables students to develop an awareness of the ethical and legal issues associated with the public sector and health care in the pre-hospital care setting. This unit covers topics relating to the code of ethics, the code of conduct and the legislation unique to the emergency health services. Students are required to apply content knowledge using the problem based learning strategy. Topics include introduction to ethics, morality and ethical theory, bioethics, public sector ethics, overview of the Australian legal system, consent to and refusal of health care, duty of care, confidentiality, and record keeping.

PUB490 Quality Management in Health

Pre-requisites	Completion of 96cp
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT)

Quality is integral to all aspects of healthcare delivery. Knowledge and understanding of the concepts of quality management, and the ability to perform quality processes are essential for all health care professionals. This unit provides students with the necessary knowledge and skills to develop a quality management program, perform quality improvement activities, and expand outcomes into process improvements and organisational change. The principles underpinning evidence based medicine and clinical pathways (including variance analysis) are presented, methods of health care performance measurement are explored, and a clinical quality framework model is introduced.

PUB506 Foodservice Management

Pre-requisites	PUB474
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: organisation and planning in foodservice; the hospital environment; the menu and menu planning; purchasing and storage of food; kitchen planning and design; food production systems; food distribution systems; human resource management in foodservice; finance and costing; hygiene; maintenance and safety; information systems; and total quality management.

PUB509 Community and Public Health Nutrition

Pre-requisites	PUB201
Credit Points	12
Campus	Kelvin Grove

This unit includes the following: the measurement of the nutritional status of a community; nutrition monitoring and surveillance; food and nutrition policy at international, national and state levels; international nutrition issues; nutritional epidemiology; examination of the evidence of nutrition problems within Australia; at risk groups; tools and their validity for measuring nutritional status and nutrition outcome at the population and group level; and dietary intake methodology.

PUB514 Contract/Project Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit aims to prepare students for participation in contract and project management in the health sector. The unit provides advanced undergraduate students with an opportunity to develop an understanding of health project contract management using both theoretical and practical examination of current state and national contracts and projects.

PUB522 Podiatric Anaesthesiology

Pre-requisites	(PUB437 or LSB584) and PUB438 and (PUB439 or PUB539)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an understanding of the science of anaesthetics as applicable to the practice of podiatry. Students are required to understand the pharmacology of local anaesthetics and their clinical usage, and be competent in injection techniques, including local infiltration and local nerve block in the lower limbs. [Designated unit]

PUB530 Health Education and Behaviour Change

Anti-requisites	PUB329, PUB341
Credit Points	12

Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit gives students the skills to bring about change in health-related behaviours through educational interventions. Topics covered include key health education and behaviour change theories, frameworks, strategies; approaches to bring about change in different contexts; research and design of educational interventions to suit different target populations in different settings, using evidence-based practice; and health literacy as a function of health education.

PUB532 Paramedic Clinical Practice 2

Pre-requisites	LSB282 and PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SUM (INT)

PUB537 Radiographic Image Interpretation

Pre-requisites	PUB438 and PUB439 and PUB539. PUB439 and PUB539 can be taken in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to give the student of podiatric medicine an understanding and ability to recognise normal and abnormal foot radiographs. It also enables the student to utilise radiology as an important diagnostic tool in foot pathology.

PUB538 Rehabilitation Medicine and Physical Therapies

Pre-requisites	PUB439
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Ths unit introduces a wide range of diagnostic and physical treatment modalities used in modern podiatric practice. Students gain understanding in uses, applications, contraindications and limitations of each modality studied in direct connection with ongoing clinical studies and theoretical components of podiatric medicine.

PUB539 Podiatric Medicine 3

Pre-requisites	PUB437 and PUB438 and PUB439 and PUB537 and LSB584. PUB537 and LSB584 can be taken in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit develops professional understanding of the general and specific effects of medical and surgical conditions on the human foot. It also expands the concept of total case management in terms of the interdisciplinary approach, including physical, mechanical and surgical techniques. Completion of this unit should enable students to consolidate the podiatrist's role in the health care team across the spectrum of practice. [Designated unit]

PUB545 Health Policy, Planning and Advocacy

Pre-requisites	Completion of 192cp
Anti-requisites	PUB511
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit consolidates knowledge of health policy development and reform and the processes that translate policy into public health practice. Topics covered include translating a health policy into a plan for professional practice; critical examination of advocacy processes and the impact on policies; planning and evaluating the impact of programs; and policy strategies in collaborative teams.

PUB550 Paramedic Management of Obstetric, Paediatric and Behavioural Emergencies

Pre-requisites	PUB390 and LSB382
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit covers the management of obstetric, paediatric and behavioural emergencies. Theory is presented on campus and experience is gained in a three week hospital placement under the supervision of clinical educators.

PUB555 Paramedic Management of Infectious Diseases, Toxicological and Environmental Emergencies

Pre-requisites	PUB390
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

(Not offered till 2007) This unit covers the management of patients with a range of challenging aetiologies including extremes in environmental conditions, toxicological emergencies including overdose, poisoning and acute infectious disease. Topics include the epidemiology, integrated and definitive care, pathophysiology, assessment and clinical management of patients with toxicological, infectious and environmental illness. Theory is supplemented by simulation and scenario based activities.

PUB561 Statistical Methods in Health

Anti-requisites	PUN105
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The ability to analyse and interpret quantitative data is an important skill for all graduates in public health. This unit builds upon PUB326 Epidemiology and complements analytical methods learned in PUB461 Qualitative Enquiry in Public Health. Through critical review of the literature, and worked examples from a range of topic areas, students become familiar with the process of summarising and describing data, defining and testing hypotheses, univariate methods and tests of bivariate associations, the concept of adjustment and the interpretation and presentation of analytical results.

PUB565 International Health

Pre-requisites	PUB251
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

International health will broaden student's understanding of global health systems and programs, providing an advanced level analysis that explores systems and methods that have been devised to address population health problems in

developing and developed countries. Students examine the historic context of the international health movement from the early 1900s to recent changes in global health systems, explore the diversity of services between and within countries, and consider issues of globalisation, economic reform, health equity and ethics. This unit is particularly relevant to students who are interested in international health development work.

PUB566 Paramedic Management of Lifespan Emergencies

Pre-requisites	PUB383
Credit Points	12
Campus	Kelvin Grove

PUB567 Major Incident Management

Pre-requisites	PUB451, PUB452 and PUB453
Credit Points	12
Campus	Kelvin Grove

PUB568 Mental Health Issues in the Out-of-Hospital Environment

Pre-requisites	PUB270 and (PYB007 or PYB111)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

PUB570 Paramedic Clinical Practice 3

Pre-requisites	PUB470
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SUM (INT)

This unit is a six week placement which develops patient care to a level where students can confidently manage more complex clinical presentations under the supervision of a qualified paramedic mentor. [Designated unit]

PUB606 Dietetic Leadership and Management

Pre-requisites	Completion of 288cp including PUB645 and PUB641 and PUB506
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: history of dietetics and the role of management in dietetics; planning and organisation; leadership; peer review systems; total quality management; clinical costing; program evaluation and measuring effectiveness; information systems applied to dietetic management; managing change; casemix funding; management tools; marketing; planning community based programs; team building; and managing role conflict.

PUB609 Health Resource Allocation

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT)

This unit aims to prepare students for participation in health sector decision making as underpinned by a range of health specific evaluation activities. The unit provides students with a grounding in the methodologies of health evaluation and resource allocation.

PUB611 Risk Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT)

Note: This unit is available externally only for Second Semester 2010. This unit provides students with the knowledge and skills for the assessment and quantification of risk in the workplace. It considers the various models available to investigate and analyse accidents and propose strategies to prevent similar incidents in the future. Various hazard identification techniques such as HAZOP, Fault Tree Analysis and FMEA are discussed. The unit provides students with the ability to position occupational health and safety within an organisation's strategic decision making process.

PUB628 Advanced Food Studies

Pre-requisites	PUB474 and (PUB648 or PUB541) and PUB641 and PUB405. PUB641 can be enrolled in the same teaching period as PUB628.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides students with an opportunity to acquire practical skills in the planning, preparation and delivery of nutrient altered foods suitable for a wide range of therapeutic diets. Students evaluate the outcome of incorporating nutrient modified food products into dietary regimens. Food standards, relevant developments and issues are also considered.

PUB635 Podiatric Surgery

Pre-requisites	PUB522 and PUB438 and (PUB437 or LSB584) and (PUB639 or PUB539)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit addresses the implementation of podiatric surgical techniques based on strong theoretical knowledge. On completion, students should understand the principles and techniques of lower limb surgery. Students are taught minor surgical techniques and review some of the more common major surgical procedures including the foot and ankle.

PUB638 Orthopaedics and Sports Medicine

Pre-requisites	PUB537 and PUB538 and PUB639. PUB639 can be taken in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides students with a detailed knowledge of orthopaedic and musculoskeletal conditions affecting the lower limb. The unit also discusses the assessment and management of the sports patient.

PUB639 Podiatric Medicine 4

Pre-requisites	PUB539
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit extends the student by way of a greater role in independent case investigation and clinical case presentations. Complex case histories and treatment interventions are pursued. The theory and treatment of paediatric disorders is studied and students are introduced to specialist clinics in the podiatry facility and treatment of higher order cases. Students implement a wide range of treatments and should be able to

consolidate skills acquired. Diagnostic skills are also developed with the wider range of patients being treated and the specialised study of disciplines such as dermatology and radiology further integrating academic and clinical studies. [Designated unit]

PUB641 Medical Nutrition Therapy

Pre-requisites	PUB541 or PUB648
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit builds on the extensive knowledge base of the theory and application of dietary treatment to disease and the principles of nutritional assessment development in Medical Nutrition Therapy 1.

PUB643 Home Economics Curriculum 2

Pre-requisites	PUB343
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit is the second in a suite of three curriculum units studied concurrently with Teaching and Learning Studies 3 and Field Studies 2. The unit provides students with opportunities to develop knowledge and skills pertinent to the professional educator, including the ability to critique current paradigms. Learning experiences are organised to build deeper understanding of outcomes based syllabuses. This knowledge is applied to the design and management of learning environments and practices that engage learners. The importance of self regulatory practice is emphasised.

PUB645 Introduction To Dietetic Practice

Pre-requisites	LQB488 and LQB388 and PUB474 and LQB481 and PUB405 and (PUB648 or PUB541) and PUB509 and PUB641
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (INT)

This unit is part of the preparation for professional dietetic practice and develops students' skills in integrating theory with practice. The unit prepares students for three practical placement units in their final year. [Designated unit]

PUB648 Diet, Nutrition and Chronic Disease

Pre-requisites	PUB201, LQB488 and LQB388
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit explores the most common and significant nutrition related chronic diseases of the world and introduces previous and current strategies aiming to prevent or manage these diseases. Psychosocial, cultural, political and economics factors will be discussed. Diseases overed include micronutrient deficiencies, obesity, diabetes, cardiovascular disease, cancer, dental disease and osteoporpsis.

PUB662 Clinical Therapeutics for Podiatrists

Pre-requisites	PUB438 and (LSB384 or PUB437) and LSB584 and PUB539 and PUB639. PUB639 can be studied in the same teaching period as PUB662.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit builds on prior studies in disease processes, medicine, podiatric medicine, pharmacotherapeutics, pharmacokinetics and pharmacology. Principles of safe and effective pharmacological management of podiatric conditions are discussed. Clinical decision-making is developed within the framework of the quality use of medicines.

PUB669 Management of Health Information

Pre-requisites	PUB398, PUB490, PUB558 and PUB875
Credit Points	12
Campus	Kelvin Grove

This unit is the final one in the suite of health information management related units. As a result, it has a strong focus on professional issues and current trends in HIM practice. It examines the roles and functions of the health information manager in the management of health care services in the current health environment. Class activities concentrate on the principles and processes of management as applied to health information services. A problem based learning approach is adopted to give students experience in "real world" activities.

PUB670 Internship (Paramedic Clinical Practice)

Pre-requisites	PUB570
Credit Points	36
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit follows on from previous clinical practice units and develops students from preservice paramedic to the role of beginner practitioner at the advanced care paramedic level under the supervision of a qualified paramedic mentor. Students are expected to function as an operational crew member under minimal direction taking the lead in more complex scenarios. [Designated unit]

PUB673 Paramedic Clinical Practice 3

Pre-requisites	LSB282 and PUB280
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

PUB679 Integrated Paramedic Practice (Capstone)

Pre-requisites	PUB470
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

PUB680 Transition to Professional Paramedic Practice

Pre-requisites	PUB673 and PUB679. PUB673 and PUB679 can be taken in the same teaching period as PUB680.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit prepares students for practice as qualified ambulance paramedics and further develops professional skills. Clinical practice is conducted in a prehospital environment under the supervision of an ambulance crew with a qualified clinical mentor. In addition, reading and learning activities give

opportunities for the development of reflective practice skills and strategies.

PUB720 Nutrition and Dietetic Project

Pre-requisites	PUB416 and PUB645 (can be enrolled in the same teaching period)
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an opportunity to identify a relevant nutrition area for further investigation and to undertake a research project or literature review, under the supervision of a qualified dietitian practitioner.

PUB723 Clinical Practice in Individual Case Management

Pre-requisites	Completion of 288 cp including PUB645, PUB641 and PUB506
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students are required to develop skills in the management of nutritional care of clients in the clinical setting, to a standard that allows entry to the Dietetics profession. This unit incorporates the basic strategies of the dietetic care process, such as assessment, planning, implementation and evaluation of nutritional care, for clients who have a variety of disease states. Students also need to demonstrate basic skills in research in relation to clinical outcome. [Designated unit]

PUB725 Clinical Practice in Community and Public Health Nutrition

Pre-requisites	PUB509
Credit Points	24
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PUB730 Dietetic Business Management

Pre-requisites	Completion of 288 credit points including PUB645 and PUB509
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PUB738 Professional Placement 1

Pre-requisites	PUB639 and PUB538 and PUB537 and PUB635 and PUB739. PUB635 and PUB739 can be taken in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to develop high-level clinical skills and professionalism in a range of clinical settings. Increased understanding of the various clinical and non-clinical roles that podiatrists play in the community will be emphasised through external placements. [Designated unit]

PUB739 Podiatric Medicine 5

Pre-requisites	PUB537 and PUB538 and PUB638 and PUB639
Anti-requisites	PUB740, CSB545
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide you with the diagnostic and treatment skills necessary to manage patients with more complex conditions, introduce contemporary issues in podiatry including national and international issues, and to encourage you to critically evaluate the medical literature to inform your clinical decisions. [Designated unit]

PUB743 Home Economics Curriculum Studies 3

Pre-requisites	PUB643
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the theoretical and practical knowledge and skills required by an effective practitioner in the complex social environment of the home economics classroom. There are opportunities to observe, explore, analyse, implement and reflect on learning and teaching strategies that can be used to enhance the learning for the diversity of students found in any classroom.

PUB821 Clinical Practice in Community and Public Health Nutrition

Pre-requisites	PUB509
Anti-requisites	PUB821-1, PUB821-2, PUB875
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides students with the opportunity, in real world settings, to further develop knowledge, confidence and skills to apply theoretical principles covered in earlier years in the area of community and public health nutrition practice. [Designated unit]

PUB822 Clinical Practice in Food Service Management

Pre-requisites	Completion of 288 cp including PUB645 and PUB506
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides students with real problems in foodservice settings to develop skills including the planning and organising of foodservices, the application of scientific principles within foodservice management systems, and menu assessment. [Designated unit]

PUB838 Professional Placement 2

Pre-requisites	PUB639 and PUB738 and PUB739. PUB639 can be taken in the same study period.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to develop high level clinical skills and professionalism in a range of clinical settings. Increased understanding of the various clinical and non-clinical roles that podiatrists play in the community are emphasised through external placements. Students complete clinical rotations not attempted in PUB738 Advanced Clinical Studies 1.

PUB839 Podiatric Medicine 6

Pre-requisites	PUB738, PUB739 and PUB838. PUB838 may be taken concurrently.
Anti-requisites	PUB840, CSB546
Credit Points	12

Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to ensure students are able to demonstrate adequate knowledge and skills expected for entry into the podiatry profession.

PUB862 Transition to the Clinical Profession

Pre-requisites	PUB739 or PUB740
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Health professionals work within financial, legal, ethical and professional frameworks. Practice in public and private settings requires knowledge of accounting, marketing, human resources, project management and professionalism in the health context. This unit prepares students for the transition to practice by exploring these concepts and their relationship to employment/practice.

PUB875 Professional Practice

Pre-requisites	(Completion of 240 cp including PUB514) or (Completion of 240cp including SWB401 and SWB312)
Anti-requisites	PUB645, PUB821
Credit Points	12
Campus	Kelvin Grove

This unit is undertaken by students in the public health, and nutrition and dietetics strands of the BHlthSc. It provides students with the opportunity of working in one or a number of placements in a professional capacity in an area of interest to the student. It provides an opportunity for students to apply the knowledge and skills acquired through their course to a practical problem or workplace situation. [Designated unit]

PUN001 Contemporary Risk Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit provides an introduction to the risk management process as outlined in AS/NZS 4360 risk management. The unit concentrates on the context of risk management and introduces the student to the concepts that will be explored further in other units. The structure of the organisation, its environment and the potential loss exposures are examined in some detail.

PUN008 Risk Assessment

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit provides the skills necessary to identify and assess risks. Qualitative, semi-quantitative and quantitative methods of risk analysis are investigated in the context of the major perils likely to be considered by an organisation. Various risk analysis techniques including HAZOP, FMEA, hazard indices, fault trees, event trees, reliability analysis, statistical analysis, and probability are discussed.

PUN103 Advanced Epidemiology

Pre-requisites	PUB326 or HLN710
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit's aim is the mastery of key principles and concepts of research design. There has been an increasing demand for evidence based health research, and an increasing trend towards research that considers complex biological, environmental and societal inter-relationships. Recent developments in epidemiology have contributed novel research designs and statistical methods to complement these needs. Throughout this unit, students are exposed to these more sophisticated designs and analytical methods. Such knowledge is mandatory for critical evaluation of the current research literature, for design of efficient research studies, and to inform appropriate interpretation of research results at a 'best practice' level.

PUN105 Health Statistics

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

Beyond a common core of statistical concepts, each discipline area emphasises its own set of descriptive and inferential statistical methods and even terminology. The content of this unit emphasises both core and health specific statistical methods in the health sciences. Students are provided with substantial practical experience in the application and interpretation of the most common statistical methods to health data, and are also made aware of data management principles in preparation for analysis. There is a strong emphasis on applying concepts through critical reading and discussion of the literature and worked examples from a range of topic areas.

PUN106 Population Health

Anti-requisites	PUB251
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit addresses some of the significant issues of population health including the complex relationship between health and social, economic, political and lifestyle factors and social disadvantage and health. It examines contemporary concepts of health and illness also draws on international examples. Potential health issues facing Australia and the world, such as the aging of the population, the impact of genetic technology on health and the health of specific sub-populations are also examined.

PUN210 Fundamentals of Health Management

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit will provides students as future health managers with an understanding of the principles of management in health, including financial management in health; human resource management principles in health including workforce design, recruitment, conflict management, individual and team performance management, and occupational health and safety; information management as it applies to health management; and listening, interpersonal communication, advocacy, and negotiation and mediation skills.

PUN211 Health Care Finance and Economics

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

The unit develops analytical skills and understanding of micro- and macro-economics as they apply to health and of accounting and financial management

decision-making principles and processes. It offers an overview of the financial structure of the Australian Health Care system and the context in which it operates. It also offers an understanding of the basic concepts and tools of economic analysis and introduces concepts that are essential in understanding financial resource management, health and health care.

PUN212 Understanding Health Information

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit provides an introduction to the field of health information and its uses and applications in the health industry. It provides a context for the study of contemporary health information and data management practice. The use of information as a strategic, organisational and management resource is discussed, and a broad appreciation of health information and data management procedures and philosophy is provided. Demands on the users of health information occasioned by advances in information technology are highlighted.

PUN213 Introduction to Quality Management in Health

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

The aim of the unit is to assist students to develop the necessary knowledge and skills to develop a quality management program, perform quality improvement activities, and expand outcomes into process improvements and organisational change. Methods of health care performance measurement are explored, and a clinical quality framework model is introduced. Issues relating to administrative and clinical data quality, safety and privacy in an increasingly electronic health care environment are also considered.

PUN214 Systems of Quality and Safety in Health Care

Pre-requisites	PUN213 which can be undertaken concurrently
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit examines the application of quality and safety systems to ensure patient safety in health care environments. It covers quality certification and accreditation systems, their coverage and application to different health care settings, safety systems and models, performance management and case studies.

PUN219 Leadership of Quality and Safety in Health Care

Pre-requisites	PUN213
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

PUN220 Introduction to Advanced Clinical Practice

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (EXT, INT)

PUN221 Cardiovascular Emergencies

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (INT, EXT)

PUN222 Medical and Surgical Emergencies 1

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (INT, EXT)

PUN223 Clinical and Integrated Practicum 1

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (EXT)

PUN224 Medical and Surgical Emergencies 2

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

PUN225 Trauma and Environmental Emergencies

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

PUN226 Obstetric & Paediatric Emergencies

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

PUN227 Clinical and Integrated Practicum 2

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-1 (EXT)

PUN301 Occupational Health and Safety Law and Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit introduces students to the history of occupational health and safety and the impact on occupational health and safety practice of the law, and industrial relations. The theory and practice of occupational health and safety management is discussed.

PUN363 Environmental Health Law

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT)

The purpose of this unit is to develop students who have a detailed understanding of the legislation and legislative frameworks and principles that form the foundation for environmental health practice. In particular, this unit will detail various legislative tools for the management of public health issues in different settings. The prosecution process and gathering of evidence will be discussed along with a detailed discussion on the environmental health practitioners role under the Public Health Act 2005, Environmental Protection Act 1994 and other related legislation. Major topics covered include: an introduction to law and government, public health law,

planning and environmental law, local laws, investigation processes and procedures.

PUN364 Food Safety

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT)

The aim of this unit is to develop the food safety knowledge of future health professionals (such as environmental health practitioners, public health practitioners, nutritionists and dieticians) to enable them to identify and implement processes to ensure a safe food supply and prevent food borne illness in the community. A variety of food safety topics are covered including food science principles, food safety principles, food-borne illness, outbreak investigation and management, food safety law, auditing, premises design, HACCP, food safety programs, and food handler training/health promotion.

PUN451 Introduction To Health Disaster Management

Credit Points	12
Campus	Kelvin Grove and External

This unit develops your knowledge of the principles of major incidence response and your ability to manage such incidents. It covers the principles of major incident and disaster management; prevention, planning and preparation to the process of risk identification and management; operational frameworks for management of major incidents and disasters; and recovery arrangements.

PUN452 Health Disaster Planning and Preparedness

Credit Points	12
Campus	Kelvin Grove and External

This unit develops an understanding of the importance of health services preparation and planning and the knowledge and skills required to lead health services preparation and planning.

PUN453 Health Disaster Response and Recovery

Credit Points	12
Campus	Kelvin Grove and External

This unit develops students' capability in identifying and evaluating issues that need to be addressed during response to, and recovery from, a major incident, and managing those issues.

PUN454 Health Leadership in Disaster Management

Credit Points	12
Campus	Kelvin Grove and External

This unit develops students' capacity to manage a health service so that it is prepared and capable of managing a major incident. It is intended for those who are likely to be responsible for designing response arrangements, instructing others in those arrangements and for managing the health service strategically throughout a major incident.

PUN465 Environmental Protection

Pre-requisites	PUN620 and PUN363. PUN620 and PUN363 can be enrolled in the same teaching period as PUN465
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit aims to give students a detailed understanding of the causes, controls measures and management strategies for environmental pollution and an understanding of environmental impacts on human health. A variety of topics on environmental management are covered including environmental management principles, environmental policy and legislation, integrated planning, waste management, contaminated land, air pollution, water pollution, and noise pollution.

PUN466 Communicable diseases

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT)

This unit aims to provide a comprehensive overview of communicable diseases and to discuss current surveillance, control and prevention methods/strategies implemented by public health agencies. Topics in this unit include the following: communicable disease principles; physiology and epidemiology; outbreak investigation and management; immunisation; vector control; disease surveillance; and infection control.

PUN467 Public Health Risk Assessment

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

The aim of this unit is to provide future public health professionals with the skills and knowledge necessary to effectively assess and manage risks associated with a variety of public health hazards. Topics covered in this unit include the following: the Australian standard risk management framework; environmental health risk assessment framework (issues identification, hazard identification, dose-response assessment, exposure assessment, risk characterisation); risk management strategies and approaches; fundamentals of environmental toxicology and its application in health risk assessment; health impact assessment; effective risk communication and community consultation approaches for public health risks; and case studies.

PUN500 Safety Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

In this unit, students learn about the nature of materials with regards to material failure, fire and explosions. Students are introduced to the concept of the hierarchy of controls and learn about the various safety systems used to control physical, chemical and biological hazards. Students are also introduced to specific legislative requirements that regulate the use of such substances, the configuration of appropriate safety systems, and the storage, handling and transport of hazardous materials. Students develop skills in accident investigation.

PUN551 Advanced Public Health Nutrition

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT)

This unit aims to broaden your understanding of and to critically analyse the application of community and public health nutrition within Australia and internationally across three frameworks. These frameworks are Program Planning incorporating assessment, implementation and evaluation; the Food Chain covering food production, supply and consumption; and the Life Cycle encompassing maternal and infant

nutrition, child and adolescents, adults and ageing populations.

PUN552 Population Nutrition and Physical Activity Assessment

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit focuses on the methods and special features of assessing and monitoring nutrition and physical activity in individuals, groups and whole populations.

PUN553 Chronic Disease Prevention and Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit aims to broaden your understanding of the determinants and issues relating to many major chronic diseases and to critically examine and review the application of a number of currently recommended frameworks, strategies and approaches for their prevention and their management both internationally and nationally.

PUN554 Food Policy and Sustainability

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit aims to broaden your understanding of and to critically analyse the development and application of food policy at local, regional, state and global levels. Within the current context of environmental, economic and social vulnerability it will provide students with tools to use policy to impact on food safety, food security and nutritional health that are sustainable both within the short and long term.

PUN617 Environmental Health Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The aim of this unit is to integrate the aspects of environmental health theory and practice covered in other Units within the environmental health graduate program by focusing on current management and policy issues, strategies, tools and approaches. Topics covered include: environmental health policy development; environmental health management in local and state government; new technologies; program evaluation including economic evaluation and environmental health indicators; emergency management; event management; Indigenous environmental health policy; environmental health research; dangerous goods safety management; project management and environmental health practice issues.

PUN620 Concepts of Environmental Health

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

The aim of this unit is to produce students who have an in-depth understanding of the large range of contemporary environmental health hazards (including historical, current and predicted hazards) and the strategies to assess and manage these hazards in a sustainable manner. This unit consists of the following 4 modules: (1) Introduction to Environmental Health (provides an introduction to environmental health and environmental health management); (2) Ecosystems, Sustainability and Health; (3) Environmental Health Issues (eg. air pollution, water and sanitation, waste and contaminated land, communicable diseases and food safety, physical agents); and (4) Environmental Health Settings (including Indigenous environmental health, the built environment, and global and emerging environmental health issues).

PUN632 Leadership in Health Management

Anti-requisites	PUN610
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

In this unit students develop and apply a researched, conceptual framework to understand management, leadership and change issues, particularly related to health care, consolidated using researching, logical argument, analysis and writing skills. The unit draws on contemporary research and practice

PUN640 Health Care Delivery and Reform

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit introduces conceptual frameworks fundamental to the orgainisation of health systems with particular emphasis on Australian and international health systems. Issues covered include the operation, funding and evaluation of health systems, health reform and the drivers for change.

PUN688 International Health Policy and Management

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit provides students with an understanding of the impact of globalisation on health policy and management, including policy formation and the role of political influences. Students will have an opportunity to explore and understand specific examples of national and international policy in both developed countries and coutries in transition, particularly the in Asia-Pacific region.

PUP032 Intervention Design and Theories of Change

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit examines theories of change as they impact on health promotion and health education practice and the development and implementation of public health interventions. The unit addresses the strengths and weaknesses of change theory into practice and explores the nature of individual, group and organisational change strategies in public health and health promotion.

PUP034 Advanced Studies and Practice in Health Promotion

Pre-requisites	PUP032
Anti-requisites	PUN613 and PUP023
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This advanced unit identifies the

repertoire of practice skills that health promotion students need to address health problems. It integrates needs identification, systematic planning and evaluation models into practice. Internal students put this knowledge into practice through participation in a group based health promotion project. The process of developing and implementing a health promotion program develops an understanding of issues such as ethics, writing goals and objectives, resources and time management. External students conduct a needs assessment and use the data to write a health promotion program proposal.

PUP037 Health Program Evaluation

Pre-requisites	PUP032 and PUP034. PUP034 can be studied in the same semester as PUP037
Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (INT, EXT)

The aim of the unit is to provide students with skills and knowledge of health program evaluation, its place in public health and health sector contexts, the influences of evidence and contexts, both organisational and political in program evaluation and the application of program evaluation techniques. This unit complements health studies and deepens students' understanding of program evaluation in practice.

PUP038 Contemporary Health Promotion

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (INT, EXT)

The unit provides students with a critical understanding of the foundations of health promotion nationally and internationally, and its influence and evidence in improving population health outcomes through new conceptual and practice perspectives. This unit complements public health and other studies and provides a foundation for health professionals of the fundamental underpinnings of the discipline nationally and internationally.

PUP116 Ergonomics

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit explores the relationship between the worker, the work environment and the work space. Occupational ill health and injury arise from a lack of fit between the capabilities of workers and the design of the working environment, the work processes and the physical and mental demands of the task. Insight into ergonomics can assist practitioners to enhance the workers safety and comfort, improve work efficiency and performance, and optimise work performance. Topics include basic anatomy and physiology of body systems, occupational biomechanics and psychology.

PUP250 Toxicology and Occupational Hygiene

Credit Points	12
Campus	Kelvin Grove and External

Occupational and environmental monitoring is described as the recognition, evaluation and control of hazards in the workplace. Workplaces contain numerous substances that are potentially hazardous to the health of the workforce, other occupants and the public. Occupational and environmental monitoring spans a number of disciplines including toxicology, engineering and statistics. Students need to develop strong investigative and analytical abilities and professional judgment. Students also develop skills in evaluating the extent of workplace hazards. A preventative approach to dealing with occupational health problems is emphasised based on an understanding of the control hierarchy and the use of exposure standards.

PUP415 Occupational Health

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit explores chemical hazards in the working environment, epidemiological principles and practice, and identification of special risk groups in the workforce. Topics include the following: the pathological bases of disease in humans; chronic occupational diseases; occupational skin conditions; respiratory diseases; biological hazards in the work environment (bacteria, parasites, viruses, rickettsia and fungi); chemical and physical stresses and their physiological responses; physiological monitoring principles and practice; special risk groups; and epidemiological principles and practice.

PYB000 Psychology in Professional Contexts

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

PYB000 is a foundation unit for students enrolled in the Bachelor of Behavioural Science (Psychology) degree. This unit provides an introduction to the nature, scope, and application of psychological knowledge in diverse professional contexts, and considers the social, cultural and ethical, and multidisciplinary frameworks that shape psychological practice. This unit aims to develop your skills as an active and reflective learner, by explicitly linking the academic and generic skills you will develop throughout the course, with their application to psychological practice.

PYB007 Interpersonal Processes and Skills

Anti-requisites	PYB074, HHB113, PYB111
Credit Points	12
Campus	Gardens Point and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Psychology is generally a people-based profession with many positions involving not only understanding and testing people but communicating with them. More broadly however in most areas of modern work, and indeed within personal relationships, people need developed interpersonal skills and the ability to conceptualise interactive processes. The microskills for communication are also the foundation for helping relationships and counselling.

PYB054 Psychology and Gender

Pre-requisites	Completion of 48cp of PYB units including one of PYB012, PYB101, PYB102 or PYB100
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit asks 'What is gender?'. It includes theories of gender; male and female; masculine and feminine; roles versus power; counselling issues; old and new paradigms; history of psychology of gender; sexuality; mothers and fathers; psychology constructs the female; psychology in patriarchal discourse; family therapy theory and feminist critiques; psychological constructs and the media; film and media; psychology of

gender and power.

PYB067 Human Sexuality

Pre-requisites	Completion of 96 credit points including PYB100, PYB110, and PYB102
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit explores historical approaches to studying, explaining and regulating human sexuality with an awareness of the social nature of definitions of 'normal' or 'acceptable' sexual behaviours. Students critically examine definitions of 'healthy' or 'morally acceptable' or 'normal' sexuality. Different models of sexuality are considered with an emphasis on contemporary critiques of the traditional paradigms of sexuality in the West.

PYB100 Foundation Psychology

Anti-requisites	PYB012
Equivalents	PYB101
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM-1 (INT)

This unit provides an introduction to the major content areas of psychology, including an introduction to psychological research and report-writing, for students intending to pursue further studies in psychology. Psychology is a broad-ranging and multifaceted discipline which encompasses the scientific study of human behaviour, and the systematic application of knowledge gained from psychological research to a broad range of applied issues. The goal of this introductory unit is to introduce you to the major subfields and perspectives in psychology, and to develop your understanding of the research methods and report-writing conventions used in psychological research.

PYB102 Introduction to Psychology 1B

Pre-requisites	PYB100 or PYB101
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Introduction to Psychology 1B extends the introduction provided in Introduction to Psychology 1A to psychology as the scientific study of human behaviour. This unit introduces students to the basic biological and psychological processes underlying perception, memory, learning, problem solving, consciousness, and language. In addition, research participation experience is provided to the students.

PYB110 Psychological Research Methods

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 SUM-2 (INT)

This unit includes the following: an overview of the purposes and strategies of research; elementary research design; operationalising variables; descriptive statistics; distributions; measures of central tendency and spread; standard scores and percentiles; understanding relationships between variables through correlation and regression; an introduction to hypothesis-testing procedures using t-tests. NOTE for Summer 2010 students: Teaching will not commence until January 2011. Lectures - Monday 10 to Friday 21 January on Mon, Wed, Fri, 9.30 – 4.30. Students should set aside the full 2 weeks + 1 day for the unit. Final exam will be on Friday 28 January.

PYB159 Alcohol and Other Drug Studies

Anti-requisites	PYB158
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to give students an understanding of the extent of substance abuse in our community: who uses what, where and when; the models that have been advanced for understanding substance abuse; the intervention and therapeutic models utilised within the field; the effects of substance abuse, physiologically, socially and psychologically.

PYB202 Social and Organisational Psychology

Pre-requisites	(PYB100 or PYB102 or PYB101) or (Admission into PY08)
Equivalents	PYB205
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

People are social beings. Their thoughts, feelings and actions are influenced by the real, imagined or implied presence of others. To obtain greater insight into people's behaviour, it is essential to investigate scientifically the relationship between the individual and the group. We will study the effects of the individual within the group and the group within the individual and also consider the influence of these processes in the organisational setting.

PYB203 Developmental Psychology

Pre-requisites	(PYB012 or PYB101 or PYB102 or PYB100) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to life span developmental psychology. It unit covers the major theories of life span development and includes biological, social and cognitive aspects of development from birth through to old age. It emphasises the interdependency of all aspects of development and the importance of the physical, family, socio-cultural and historical contexts within which development occurs. The unit aims to develop the student's understanding of general patterns of human development and of the ways in which the development of particular individuals and groups may vary from these general patterns.

PYB204 Perception and Cognition

Pre-requisites	((PYB100 or PYB101 or PYB102) and PYB110) or (Admission into PY08)
Equivalents	PYB303
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Cognitive psychology is a major empirical and theoretical area of psychology which explores the processes and structures involved at each stage of information processing within the brain. The structures and processes involved in perception provide the brain with its basic information about both the external world and many of the current states of the individual. Higher level cognitive processes and structures provide the foundation upon which more complex aspects of behaviour are based. The unit is placed in second semester of second year so that students following the normal course structure have an adequate background in research design and data

analysis.

PYB207 Psychology in the Community

Pre-requisites	PYB202 and PYB203 and PYB204 and PYB210
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of this unit is enable you to develop your work-literacy and work-readiness, by providing opportunities to apply psychological knowledge in workplace contexts, supported by activities that promote critical reflection on your learning and workplace practices. Your participation in this unit requires you to establish, conduct, and complete an approved period of volunteer work or placement. You maybe asked to produce a Blue Card (suitability for working with children and young people clearance) before commencing your work placement and it is therefore your responsibility to have obtained this clearance prior to commencing your placement.

PYB208 Counselling Theory and Practice 1

Pre-requisites	PYB007 or PYB074 or HHB113 or SWB104 or PYB111 or PUB209
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops the student's knowledge of the counselling process and skills and provides practice in changing the ways in which people express, conceptualise and respond to their concerns. It builds upon the communication skills and concepts introduced in PYB007 and introduces a range of counselling approaches. It emphasises skills in solution oriented approaches but also covers a range of models and skills for workers in crisis situations. It provides a basis for further studies in counselling in clinical settings requiring psychotherapeutic intervention, and other modes of delivery such as couple, family or group work.

PYB210 Research Design and Data Analysis

Pre-requisites	PYB110 or Admission into PY08
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit takes an hypothesis testing approach to data analysis. This means that statistical analysis is treated as one step in a larger process which also includes formulating theoretically sound predictions, designing a suitable experiment to test the predictions, selecting the appropriate statistics to test the predictions, calculating and interpreting the required statistics, and reporting the outcomes in the correct way. This unit provides the student with the knowledge and skills required to do these tasks with respect to two types of prediction, differences between means and relationships between sets of scores.

PYB215 Forensic Psychology and the Law

Pre-requisites	PYB012, PYB101, PYB102 or PYB100
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Forensic Psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. Psychologists are now involved significantly in policing, judicial procedures and correctional processes. By its very nature the study of psychology and law draws from a wide multi-disciplinary base for the application of specialised knowledge. As a student of this discipline area, you will need a broad introductory appreciation of (and a critical perspective on) what the study of psychology and the law involves and what it has to offer across the three criminal justice domains of the police, the courts, and corrections.

PYB257 Group Work

Pre-requisites	PYB007 or PYB074 or HHB113 or PYB111
Anti-requisites	HHB214 and SWB214
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an opportunity for experiential group learning, either intensively or in regular program times. It examines types of groups and varieties of group experiences: the importance and uniqueness of group medium; understanding behaviour in the group context; theories and models of group development; leader and member behaviours; planning; implementing and evaluating group methods; establishing groups and planning group approaches; the group as a therapeutic community; evaluating group work; ethical issues.

PYB302 Industrial and Organisational Psychology

Pre-requisites	PYB205 or PYB202
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Participation in the workplace is an integral component in the lives of most people. It is important therefore to understand the behaviour of people, individually and collectively, within the workplace. Industrial and organisational psychologists are concerned with advancing the knowledge of the relationship between people and work, and using this knowledge to promote the effective organisation of human resources.

PYB304 Physiological Psychology

Pre-requisites	(PYB102 or PYB101 or PYB100) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to provide a broad introduction to the area of neuropsychology and discusses both the clinical and cognitive approaches in the field. Three broad areas are covered: neuroanatomy, neuropathology, the cognitive analysis of resulting deficits. Students learn about major neuroanatomical structures and their interconnections, with an emphasis on how this information is applied in the clinical setting. They also study a number of neuropsychological disorders in terms of their diagnosis, assessment and treatment, as well as the psychosocial effects such deficits have on the patients.

PYB305 Applied Social Psychology

Pre-requisites	PYB202 or PYB205
Credit Points	12
Campus	Kelvin Grove

PYB306 Psychopathology

Pre-requisites	(PYB012 or PYB101 or PYB102 or PYB100) or (Admission into

	PY08)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit provides an introduction to problems in psychological functioning and reviews research and theory relating to the major classes of mental disorder identified in DSM-IV, the diagnostic and classification manual most frequently employed in Australia and the United States. An integrated approach to the understanding of psychopathology is emphasised, highlighting the reciprocal influence of biological, psychological and social factors on behaviour.

PYB307 Health Psychology

Pre-requisites	PYB100, PYB101 or PYB102
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit examines the psychological dimension of physical illness, health, and health care. There is a strong focus on health psychology in an Australian context with particular emphasis on cross-cultural and indigenous health-related issues. The unit examines definitions of health and health psychology; the role of health psychology; the determinants of health behaviours (e.g., cognitive, attitudinal, motivational, personality, social, developmental); medical settings and patient behaviour; patient and practitioner communication; stress, illness, and coping; pain and pain management; chronic and terminal illness in childhood and adulthood.

PYB309 Individual Differences and Assessment

Pre-requisites	(PYB100 or PYB101 or PYB102) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Individuals differ on a broad range of characteristics that are influenced by many factors including culture, sex, intelligence, personality, life experiences and values. There are a number of ways, within the discipline of psychology, to conceptualise and explain these differences. In this unit we introduce the major theories that underpin explanations of individual differences and the ways in which those who hold to different perspectives seek to measure the various constructs. Important properties of measurement tools such as reliability and validity will also be covered as well as the utility and applicability of various measures.

PYB350 Advanced Statistical Analysis

Pre-requisites	PYB210
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit provides students considering further study in psychology with a thorough grounding in analysis of variance techniques,an introduction to multiple regression, and the data analysis tools used in a broad range of research designs in the social sciences. The unit extends the introduction to analysis of variance and regression provided in PYB210, considering more complex designs involving two or more independent variables. The unit is both theoretical (including the use of conceptual formulae to analyse simple data sets by hand) and practical (analysing data sets using the SPSS statistical package), giving students a firm understanding of the principles underlying each analysis.

PYB356 Counselling Theory and Practice 2

Pre-requisites	PYB208
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit focuses on the common facilitative factors within a counselling process paying attention to the person of the therapist and the counselling relationship. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes which occur. Consideration of verbal, non-verbal, social, emotional, gender, psychological and social dimensions enables counsellors to develop effective, functional and client-focused relationships and to control biases, needs and possible exploitive practices.

PYB359 Introduction to Family Therapy

Pre-requisites	PYB208
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Family therapy, based on a systemic or relationship understanding of human problems, has been one of the most significant influences in the fields of counselling and psychology in recent times. With the increasing emphasis on the family as a focus for social policy, support services, research, and intervention, it is important for counsellors and psychologists to have some familiarity with the basic concepts and skills of this broad approach. This unit focuses on providing basic skills and concepts from one particular approach which will be called 'Constructive Therapy', combining aspects of solution-focused therapy, possibility therapy, narrative therapy and reflecting team practice.

PYB360 Interventions for Addictive Behaviours

Pre-requisites	PYB159 or PYB158 or PYB260 or NSB223 or NSB023
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Addictive behaviours, in the form of alcohol-dependence, substance abuse and gambling, are recognised as major problems nationally and internationally. This unit focuses predominantly on psychological aspects of addictive behaviours. To establish a framework for learning, classes initially review issues relating to psychological models of addiction and methods of studying addictive behaviours. Issues pertaining to the symptomatology, etiology and assessment of addictive behaviours, as well as the theoretical underpinnings of a range of therapeutic interventions are also discussed. This unit encourages critical thinking and analysis with the aim of enhancing students' understanding of the complex issues relating to management of addictive behaviours.

PYB371 Introduction to Road Safety

Pre-requisites	Completion of 96cp
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the key principles and

practices in road safety. Special emphasis is given to the broad context of road use/transport in society and the economic and social implications of road crashes. It introduces the basics of information retrieval, road crash analysis and interpretation, and the strategic development of road safety countermeasures.

PYB372 Traffic Psychology and Behaviour

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit reviews the wide range of factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. It considers all types of road users, including motor vehicle drivers and passengers, motorcycle riders, cyclists and pedestrians. The student examines a range of theoretical models which have been used to explain the behaviour of road users.

PYB374 Applying Traffic Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit reviews the various strategies and programs designed to modify road user behaviour. Effective and ineffective approaches are compared, in order to identify the key characteristics of successful programs. While this is a stand-alone unit, it extends many of the theoretical and practical issues covered in PYB372 -Understanding Road User Behaviour.

PYB400 Thesis (Part 3)

Pre-requisites	PYB401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit covers four parts (each of 12 credit points) which must be completed satisfactorily, leading to the submission of a research thesis. Students select a research topic and design and conduct a related research program using appropriate quantitative/qualitative methods of analysis. This research is reported in a written thesis in APA fifth edition format. Assessment of the thesis is in accordance with University assessment procedures.

PYB400 Thesis (Part 4)

Pre-requisites	PYB401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit covers four parts (each of 12 credit points) which must be completed satisfactorily, leading to the submission of a research thesis. Students select a research topic and design and conduct a related research program using appropriate quantitative/qualitative methods of analysis. This research is reported in a written thesis in APA fifth edition format. Assessment of the thesis is in accordance with University assessment procedures.

PYB400 Thesis (Part 2)

Pre-requisites	PYB401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit covers four parts (each of 12 credit points) which must be completed satisfactorily, leading to the submission of a research thesis. Students select a research topic and design and conduct a related research program using appropriate quantitative/qualitative methods of analysis. This research is reported in a written thesis in APA fifth edition format. Assessment of the thesis is in accordance with University assessment procedures.

PYB400 Thesis (Part 1)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit covers four parts (each of 12 credit points) which must be completed satisfactorily, leading to the submission of a research thesis. Students select a research topic and design and conduct a related research program using appropriate quantitative/qualitative methods of analysis. This research is reported in a written thesis in APA fifth edition format. Assessment of the thesis is in accordance with University assessment procedures.

PYB401 Advanced Research Methods

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides the student with a firm understanding of a range of multivariate procedures as well as the skills to apply each analysis appropriately. In addition this unit aims to prepare students as critical consumers of psychological research.

PYB402 Counselling Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the field of counselling psychology, one of the specialised professional colleges within the Australian Psychological Society. The thematic focus is on the critical analysis, comparison, and evaluation of selected counselling orientations (for example, solution-focused therapy, narrative therapy, cognitive-behavioural therapy, psychodynamic therapy, etc). Comparison of these approaches involves a consideration of major contemporary issues relating to the integration of theory, research and ethical practice.

PYB403 Cognitive Neuropsychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to provide a broad introduction to the area of neuropsychology and discusses both the clinical and cognitive approaches in the field. Three broad areas are covered: neuroanatomy; neuropathology; the cognitive analysis of resulting deficits. The student extends their knowledge of major neuroanatomical structures and their interconnections, with an emphasis on how this information is applied in the clinical setting. A number of neuropsychological disorders are also examined in terms of their diagnosis, assessment and treatment, as well as the psychosocial effects such deficits have on the patients.

PYB404 Issues in Social Developmental Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit evaluates the contributions of social and developmental psychology to the understanding of human behaviour. The unit examines topics in social development, as they relate to families and individuals across the lifespan.

PYB405 Advanced Organisational Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Students explore the role of organisational psychologists as both internal and external consultants who are skilled psychological researchers. Special attention is given to the interaction between organisation systems, community needs, and human beings in differing cultural, political and economic environments.

PYB407 Research and Professional Development Seminar

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops and extends students' understanding of research and practice issues in psychology. It covers current debates and controversies within psychology. Students are encouraged to formulate critical responses to these topics. Attention is also given to the issue of ethics in psychological research and practice. A case-based approach to the study of ethics is used, with reference to the APS Code of Ethics as well as Codes from similar international organisations. Where possible guest speakers, including researchers and practising psychologists, will be invited to participate in seminars to develop and expand students' understanding of broader issues in psychological research and practice.

PYB450 Research Thesis (Part 3)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This research project, listed as three separate 12 credit point units, is to be completed as a group empirical research project.

PYB450 Research Thesis (Part 2)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This research project, listed as three separate 12 credit point units, is to be completed as a group empirical research project.

PYB450 Research Thesis (Part 1)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This research project, listed as three separate 12 credit point units, is to be completed as a group empirical research project.

PYN000 Counselling Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides the student with an initial overview of the field of counselling, before focusing on the theory and practice of one contemporary perspective called 'Constructive' or 'Time-Effective' Therapy. It is an approach based largely in social constructionist principles and promotes a view of counselling as a unique conversational process which attempts to validate the client's experience, while pursuing possibilities for desired change. It also suggests a time-effective perspective, emphasising the possibility of working briefly and effectively with clients. Selected ideas and practices from several related approaches including solution focused therapy, possibility therapy and narrative therapy will be integrated.

PYN001 Professional Studies 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This is an introduction to the professional study of counselling and the 'common factors' present in most counselling approaches. These factors, which include the working relationship, the focus on client resources, and the instillation of hope, contribute greatly to the counselling outcome. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes that occur in counselling. Verbal, nonverbal, social, emotional, gender, psychological and cultural dimensions are all present in the counselling process. Consideration of these dimensions enables counsellors to develop effective, functional and client-focussed relationships.

PYN002 Counselling Studies 2

Pre-requisites	PYN000
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The historical development of psychoanalysis and analytic therapy is examined as well as the utilisation of concepts derived from these approaches and from Process/Experiential work. Understanding the differences between neurotic and psychotic behaviour, and of the need for appropriate referral, is highlighted.

PYN003 Group Studies

Pre-requisites	PYN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides the development of skills and approaches in organising and facilitating group work, in the context of personal support and therapeutic groups. It addresses the following: establishing group norms; facilitating stages of group development; responding to member behaviour and developing facilitator interventions; planning, implementing and evaluating ethical group work practices; dealing with defensiveness and hidden agendas; applying brief solutions-focused and reflecting team processes to groups; examining the motion of the therapeutic milieu.

PYN004 Counselling Studies 3

Pre-requisites	PYN000
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to provide both an

experiential and skills-based approach to specific approaches. The unit is taught in two complementary strands. One strand is largely experiential which focuses on students' exploration of their own family of origin and family dynamics. The second strand extends the process into specific theoretical perspectives and skill development. The approaches build on some of the major orientations and skill areas covered in previous units: constructive therapies (ie solution-focused therapy and narrative therapy), psychodynamic approaches, and reflecting team work.

PYN006 Professional Studies 2

Pre-requisites	PYN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an experiential introduction to the process of professional supervision. Supervision processes, roles, responsibilities, content, approaches and theories are reviewed. Professional issues commonly addressed in supervision such as power, gender, culture, consent, duty of care etc are reviewed.

PYN007 Professional Studies 3

Pre-requisites	PYN006
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides an experiential introduction to the process of providing supervision to counsellors. Supervision processes, roles, responsibilities, content, approaches and theories are reviewed.

PYN008 Project (Part 3)

Pre-requisites	PYN014 and PYN006
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Opportunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving project requirements.

PYN008 Project (Part 1)

Pre-requisites	PYN014 and PYN006
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Opportunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving project requirements.

PYN008 Project (Part 2)

Pre-requisites	PYN014 and PYN006
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Opportunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving project requirements.

PYN013 Advanced Counselling Studies

Pre-requisites	PYN004
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This elective unit is designed to allow students to build on these skills by pursuing counselling studies in two or more specialised areas. Students select studies in two modules. Areas from which selections can be made might include: experiential therapy, family therapy, narrative therapy, relationship counselling, depression, loss and grief and group work. Students may also complete one or both modules through approved forms of independent study (eg completion of approved workshops, courses or special areas of alternative study).

PYN014 Research for Counselling Practice

Pre-requisites	PYN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to prepare students for the reflecting team counselling practice in the Family Therapy and Counselling Clinic in the third year project units. The unit also prepares students for applied counselling project work in professional practice settings.

PYN021 Research Thesis 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aim of the research thesis is to provide you with the opportunity to develop high-level skills in the evaluation, interpretation and application of research. It will also enable you to undertake in-depth research, in a specialised area of psychology and to make a contribution to the professional literature in clinical psychology. This Unit will focus on introducing you to contemporary research methodologies and program evaluation. In addition, you will be required to develop a research proposal and submit an ethics application involved in undertaking your research, as part of the unit.

PYN022 Research Thesis 2

Pre-requisites	PYN021
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

To ensure high quality practice, psychologists working in the area of clinical psychology are continually required to reflect upon and modify their own practice to incorporate knowledge of the most recent research evidence. This requires clinical psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas. The aim of the research thesis unit is to provide you with the opportunity to develop high-

level skills in the evaluation, interpretation and application of research. It will also enable you to undertake in-depth research in a specialised area of psychology and to make a contribution to the professional literature in clinical psychology.

PYN023 Research Thesis 3

Pre-requisites	PYN022 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

To ensure high quality practice, psychologists working in the area of clinical psychology are continually required to reflect upon and modify their own practice to incorporate knowledge of the most recent research evidence. This requires clinical psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.The aim of the research thesis is to provide you with the opportunity to develop high-level skills in the evaluation, interpretation and application of research. It will also enable you to undertake in-depth research, a specialised area of psychology and to make a contribution to the professional literature in clinical psychology.

PYN024 Research Thesis 4

Pre-requisites	PYN023 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

To ensure high quality practice, psychologists working in the area of clinical psychology are continually required to reflect upon and modify their own practice to incorporate knowledge of the most recent research evidence. This requires clinical psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas. The aim of the research thesis unit is to provide you with the opportunity to develop high-level skills in the evaluation, interpretation and application of research. It will also enable you to undertake in-depth research in a specialised area of psychology and to make a contribution to the professional literature in clinical psychology.

PYN025 Clinical Psychological Interventions 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The broad aim of this unit is to cover fundamental aspects of psychological change with adults and children and to introduce you to the theoretical orientation and practical skills involved in cognitive-behaviour therapy. An associated aim is to integrate theory, research and practice, and to encourage students to articulate the link between these areas.

PYN027 Clinical Psychological Assessment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to build on undergraduate training in psychological assessment. The understanding of theoretical perspective in psychological assessment is reinforced. A range of assessment techniques and tests, supported by research, are taught. The unit will explore some of the contextual issues which may have an impact upon the clinical assessment of Indigenous Australians, and outline some important principles of culturally safe clinical assessment. Further, you will also learn the ethical and legal issues involved in psychological assessment.

PYN028 Clinical Psychopathology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides the student with a foundation and critical awareness of the development and phenomenology of psychological disorders. The unit undertakes a systematic study of the mechanisms and etiology of psychological disorders in individuals across the lifespan.

PYN030 Professional Practice in Clinical Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Clinical psychology practice involves a unique process which requires an understanding of special roles, power relationships, boundaries and ethical principles in order to safeguard client rights. This unit presents an overview of ethical, legal and professional issues encountered in practice, and also emphasises the role of supervision in addressing these.

PYN034 Childhood Psychopathology and Treatment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with a sound understanding of the aetiology, diagnosis and management of emotional and behavioural disorders in children. Emphasis is placed on understanding the child within the context of the family and the wider community, and the critical evaluation of the evidence for different strategies for assessing and managing the mental health needs of children and their families.

PYN035 Supervised Practicum Stage 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with the opportunity to develop psychodiagnostic assessment and clinical skills. Students undertake 250 hours of psychological practice including at least 60 hours of direct client contact in the QUT Psychology Clinic.

PYN036 Supervised Practicum Stage 2

Pre-requisites	PYN035
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides students with the opportunity to build on PYN035 and to develop psychodiagnostic assessment and clinical skills. Students undertake 250 hours of psychological practice including at least 100 hours of direct client contact in the QUT Psychology Clinic.

PYN037 Supervised Practicum Stage 3

Pre-requisites	PYN036
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This core unit of the Master of Clinical Psychology course is intended to provide students with the opportunity to build on previous placements and to develop higher level psychodiagnostic assessment and clinical skills.

PYN038 Supervised Practicum Stage 4

Pre-requisites	PYN037
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This core unit of the Master of Clinical Psychology course builds on PYN037 and provides the opportunity to develop advanced psychodiagnostic assessment and clinical skills.

PYN039 Health Psychology and Rehabilitation

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit develops core skills and understanding in health psychology and rehabilitation within a clinical psychology context. It includes modules in health psychology, behavioural medicine, rehabilitation and psychpharmacology. An integrated and scientific approach with the recognition of the importance of an evidence based perspective is used to explore the application of the principles in clinical situations.

PYN041 Supervised Practicum Stage 5

Pre-requisites	PYN038
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit aims to enhance professional knowledge and skills in the practice of clinical psychology, awareness of ethical guidelines and professional conduct through supervised clinical practice (250 hours including 120 hours of direct client contact) within an area of specialisation

PYN042 Supervised Practicum Stage 6

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit aims to enhance professional knowledge and skills in the practice of clinical psychology, awareness of ethical guidelines and professional conduct through supervised clinical practice (250 hours including 120 hours of direct client contact) within an area of specialisation

PYN044 Clinical Psychological Interventions 2

Pre-requisites	PYN025
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide you with a theoretical grounding and practical skills in brief psychodynamic and interpersonally-based psychotherapies and their application within an integrative framework.

PYN045 Clinical Psychological Interventions 3

Pre-requisites	PYN044
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This core unit covers the theories and skills of systemic, narrative and solution-focussed approaches required for relationship counselling and family therapy. The unit has a practical emphasis on common child-focussed and adult-focussed problems. The unit will examine the implications of each of the approaches from an evidence-based practice perspective.

PYN052 Research Thesis (Part 8)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 4)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 7)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 5)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared

articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 2)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 1)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 3)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 6)

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN054 Advanced Assessment Across the Lifespan

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit covers theory and skills associated with the assessment of specialised populations across the lifespan. The unit emphasises the research and practice of advanced assessment techniques. The focus is on advanced assessment of specialised populations including the elderly (e.g. memory), child development (e.g. attention and memory) and persons affected by brain injury. You will build upon your understanding of neurophysiology and neuroanatomy, and brain disorders affecting higher functions. The unit covers advanced research on human development, executive function, spatial processing, language, memory, attention and emotion, across the lifespan.

PYN601 Counselling and Consultation in Educational and Developmental Psychology

Pre-requisites	EDN631. EDN631 can be studied in the same teaching period as PYN601
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Advanced skills in counselling and consultation are required as a core competency of educational and developmental psychologists who work both directly with children, adolescents and families, and also more indirectly with groups, organisations and communities. Their roles vary from counselling individual children and supporting families, to advising teachers and becoming agents of change within organisations and communities. This unit provides students with the knowledge and skills necessary for developing effective counselling relationships with children, adolescents, adults and families and for working as consultants to various groups and systems within educational and developmental settings.

PYN603 Professional Practice in Educational and Developmental Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The practice of psychology requires an understanding of special roles, power relationships, boundaries and ethical principles in order to safeguard client rights. It requires skills in working with individuals and groups from diverse backgrounds, including those from other cultural groups. An understanding of legal issues and relevant legislation and standards is also essential in professional practice.

PYN606 Applied Developmental Psychology

Credit Points	12
Campus	Kelvin Grove

In order to provide effective approaches to the developmental challenges facing individuals and families at all points along the life course, educational and developmental psychologists need skills for describing, explaining, assessing, intervening and collaborating in the promotion of optimum developmental outcomes. These skills are developed in this unit.

PYN610 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation,

interpretation and application of research. The research thesis provides advanced skill development in these areas.

PYN610 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

PYN610 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

PYN610 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

PYP401 Introduction to Road Safety

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 6TP4 (BLK), 2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT)

This unit introduces the key principles and practices in road safety. Special emphasis is given to the broad context of road use/transport in society and the economic and social implications of road crashes. It introduces the basics of information retrieval, road crash analysis and interpretation, and the strategic development of road safety countermeasures.

PYP402 Traffic Psychology and Behaviour

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT)

This unit reviews the wide range of factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. It considers all types of road users, including motor vehicle drivers and passengers, motorcycle riders, cyclists and pedestrians. A range of theoretical models are examined which have been used to explain the behaviour of road users.

PYP404 Applying Traffic Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT, EXT); 2012 SUM (EXT)

This unit reviews the various strategies and programs designed to modify road user behaviour. Effective and ineffective approaches is compared, in order to identify the key characteristics of successful programs. While this is a stand-alone unit, it extends many of the theoretical and practical issues covered in PYP402 - Traffic Psychology and Behaviour.

PYP405 Road Safety Evaluation Models

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SUM-1 (BLK)

This unit introduces the models and methods used to evaluate behaviour change interventions. In particular, itaddresses the systematic application of social and behavioural research methodologies to improve the planning, implementation and monitoring of behavioural road safety programs and counter measures.

PYP406 Road Safety Theory to Practice

Pre-requisites	PYP401
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (INT, EXT)

This unit is undertaken in the latter half of both the Graduate Certificate and Graduate Diploma courses and draws together the various themes developed during the program. It is designed to provide students with an opportunity to study and respond to an existing or emerging road safety problem. The student is required to draw on the knowledge and skills they have developed to investigate and recommend solutions to the problem. As far as possible, the unit is designed to reflect the way road safety problems are approached and managed by road safety agencies.

PYP407 Independent Study

Credit Points	12
Campus	Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT, INT), 2012 SEM-2 (INT, EXT); 2012 SUM (EXT, INT)

This unit enables students to undertake an independent study based in their places of work. Individual supervision and objective feedback on the experience is an important component of the learning experience.

PYP408 Road Safety Audit - Investigation and Treatment of Crash Locations

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SUM-1 (BLK)

Road Safety Audit is a powerful tool for improving the safety of the road network in a proactive manner. It complements the more traditional reactive approaches such as black spot programs. Although Road Safety Audit has been utilised by Australian road authorities for a number of years, there remains a lack of suitably skilled people to conduct the audits. Consequently, the road authorities

(through AUSTROADS) have developed national criteria for the Accreditation of Road Safety Auditors, which include the completion of an approved training course and the obtaining of relevant experience. This course has been designed in conjunction with the Queensland Department of Main Roads to satisfy all the requirements for an approved road safety audit course.

QCD110 Professional Communication 1

Anti-requisites	QCD111, QCD120
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT), 2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.

QCD111 Communication 1

Equivalents	QCD110, QCD120
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT), 2012 13TP3 (INT); 2012 13TP1 (INT)

This unit focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to help students to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.

QCD120 Professional Communication 1

Equivalents	QCD110, QCD111
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.

QCD210 Professional Communication 2

Pre-requisites	QCD110. QCD110 can be studied in the same teaching period as QCD210.
Equivalents	QCD211, QCD220
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT), 2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient essay writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed in support of business subjects. Communication for Business 2 language learning tasks are parallel with content material from these units.

QCD211 Communication 2

Pre-requisites	QCD111. QCD111 can be studied in the same teaching period as QCD211
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT), 2012 13TP3 (INT); 2012 13TP1 (INT)

This unit further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient academic writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed.

QCD220 Professional Communication 2

Pre-requisites	QCD120
Equivalents	QCD210, QCD211
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in the context of field, tenor and mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are extended to enable efficient essay writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed in support of technology subjects. Communication for Information Technology 2 language learning tasks are parallel with content material from these units.

QCE003 English for Academic Purposes for Direct Entry to QUT

Credit Points	48
Campus	Kelvin Grove
Teaching Periods	2012 12TP1 (INT), 2012 12TP3 (INT); 2012 12TP2 (INT)

The English for Academic Purposes course helps international students to upgrade their English proficiency level and to meet university entry requirements. This course is designed to prepare students for independent study and to familiarise them with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.

QCE004 English for Academic Purposes for QUTIC Courses

Credit Points	48
Campus	Kelvin Grove
Teaching Periods	2012 12TP1 (INT), 2012 12TP3 (INT); 2012 12TP2 (INT)

The English for Academic Purposes course helps international students to upgrade their English proficiency level and to meet university entry requirements. This course is designed to prepare students for independent study and to familiarise them with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.

QCE009 EAP Plus

Credit Points	48
Campus	Kelvin Grove
Teaching Periods	2012 12TP1 (INT), 2012 12TP3 (INT); 2012 12TP2 (INT)

QCF100 Computing

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

The use of computers is prevalent in Australia for every study area. The aim of the unit is for international students to develop computing skills to prepare for successful undergraduate studies in an Australian university.

QCF112 Academic English 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit is designed to help students communicate successfully in a variety of situations. This includes the fundamentals of oral and written communication set within the context of a number of academic situations. This will include effective listening skills, knowledge of how to conduct a seminar, the gathering of information from a variety of sources and its organisation for specific purposes, the various writing genres and the correct use of conventions in the English language.

QCF115 Foundation English

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit is designed to continue the development of reading, writing, speaking and listening skills in English to prepare students for further studies in Foundation Communications. A variety of everyday English literature and real-life situations will be incorporated, with the emphasis being on active participation by students, as individuals and as group members. Such activities will provide students with the skills to explore and use the English language in different contexts. Basic computing skills for word processing and the use of QUT computing services will also be developed.

QCF120 Accounting 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces the essential concepts of debit and credit; processing of financial transactions via journals and ledger through to trial balance for a sole-trading enterprise (including GST); end of accounting period adjustments and final reports (specifically preparation of Income Statement and Balance Sheet) and accounting controls over cash.

QCF121 Economics 1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces students to major economic issues; the basics of economic literacy necessary for future tertiary studies; a working knowledge of the global economy; an understanding of economic problems with particular reference to Australia; the main economic systems; the purpose of a five-sector model and the functions and characteristics of each sector.

QCF122 Organisations And Management

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit is designed to develop understanding of the significant role that organisations play in many facets of our lives, how organisations function and what is involved in working in organisations. The emphasis is on skills that are needed at all levels and in all areas of an organisation. You will develop a range of skills that are required by the individual to function effectively in teams and in an organisation.

QCF153 Physical Sciences

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces students to scientific study and research processes and the basic principles underlying physics and chemistry; heat and temperature; geometric properties of light; reflection and refraction; diffraction and interference; introduction to electricity and magnetism; the atom; chemical periodicity; chemical names and formulas; chemical bonding; chemical quantities; chemical reactions; stoichiometry; thermochemistry; the behaviour of gases; water and aqueous systems; properties of solutions.

QCF156 Mathematics A1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit focuses on basic rules of arithmetic; ratio, percentages and proportion; introduction to statistics; averages and interpretation of graphs; dispersion and graphical display; probability; arrangements and combinations; basic measurement, area and volume; spending money; borrowing money and investment.

QCF157 Mathematics B1

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit focuses on basic algebra; equations (including simultaneous equations); functions (including polynomials, exponential, logarithmic) and their graphs; growth and decay; introduction to trigonometry; factorisation; analytical geometry; averages; interpretation of graphs and probability.

QCF160 Introduction to Creativity

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

In this unit students will be introduced to theories of creativity and will investigate the nature of creative culture and practice. The unit will provide students with opportunities to analyse creative applications, ideas and concepts in a range of industries.

QCF200 Australian Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 6TP6 (INT), 2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

The unit focuses on the background and cultural context of Australian issues that are common to the majority of people and texts students will encounter in their studies in Australia.

QCF212 Academic English 2

Credit Points	12
Campus	Kelvin Grove

Teaching Periods	2012 6TP6 (INT), 2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit contributes to the ongoing development of academic capabilities, effective communication in a variety of contexts and modes and critical, creative and analytical thinking. The unit specifically develops skills in listening, reading, analysing, summarising and paraphrasing, spoken and written material from a range of sources.

QCF220 Accounting 2

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit examines various accounting sub-systems such as: 10-column worksheets; control accounts and subsidiary ledgers; inventory and fixed asset systems; accounting for credit transactions; budgeting; and financial analysis techniques useful for management.

QCF221 Economics 2

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces students to the study of macroeconomics. Topics include the five-sector model, the trade cycle, inflation and unemployment, government policy, and the external sector.

QCF230 Information Processing

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces students to a range of problem-solving techniques and shows how these can be used to solve various problems using an object-oriented programming language; the foundation of relational databases in terms of storing, altering and retrieving information, using SQL for its implementation; a basis for the specification and implementation of information systems using relational algebra.

QCF252 Life Science

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit examines the themes of life, macromolecules, metabolism, cell structure, cell processes, biological diversity, plant and animal physiology. The unit emphasises practical skills both in the laboratory and in the field.

QCF254 Physics

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit introduces students to mechanics, sound, light, electricity; magnetism; electronics and nuclear physics. Relevance to real world activities is stressed by discussing the various applications of concepts learned.

QCF255 Chemistry

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit prepares students for tertiary study in the applied sciences and provides a solid foundation in basic chemistry and experimental techniques; elements, atoms and ions, modern atomic theory; chemical bonding; inorganic compounds; chemical reactions and energy; water and solutions; gases; acids and bases; oxidation-reduction reactions and electrochemistry; reaction rates and chemical equilibrium and introductory organic chemistry.

QCF256 Mathematics A2

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit focuses on basic algebra; introduction to trigonometry; normal distribution; hypothesis testing; contingency tables; regression analysis; binomial distribution; inferential statistics; earning money; interest; annuities and t-Distribution.

QCF257 Mathematics B2

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit focuses on rate of change; the derivative; stationary points; curve sketching; optimisation; integration; probability distribution; the binomial distribution; normal distribution; hypothesis testing; dispersion, graphical display.

QCF260 Professional Studies

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit is designed to expand your understanding of creativity and to provide you with experience in using problem solving tools and models in a range of situations. The unit develops skills in working in groups and reflection that are applicable to any field of study or faculty. Undertaking a project provides a practical opportunity for using creative processes and problem solving techniques.

QCF270 International Perspectives

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP3 (INT), 2012 13TP1 (INT); 2012 13TP2 (INT)

This unit is designed to introduce students to a range of matters including economic, social, cultural, political and environmental, which impact on students as an individual and as a global citizen. It is intended to develop students ability to consider these matters in an analytical and informed way and to develop an action research learning approach to a broad range of international perspectives.

QCN011 English for Tertiary Preparation

Credit Points	8
Campus	Kelvin Grove
Teaching Periods	2012 5TP2 (INT), 2012 5TP7 (INT); 2012 5TP5 (INT)

This ETP course helps international students to improve their academic language skills in order to be successful in their chosen program. The course is designed to prepare students for independent study and to familiarise them with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.

QCS230 Computing

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT), 2012 13TP3 (INT); 2012 13TP1 (INT)

Designed to give international students the computing ability to function in tertiary studies in Australia, this unit covers access to the QUT network, Microsoft Windows, email, Internet, word

processing and presentation, and the use of technology for research.

QEL001 IELTS Advanced

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP8 (INT), 2012 5TP2 (INT); 2012 5TP6 (INT)

IELTS Advanced is designed to prepare candidates who have already achieved IELTS 6.5 (with no sub-score less 6.0) or acceptable equivalent, for the IELTS Test, Academic Module. It is offered to those seeking to acheive a score of IELTS 7.0 or higher. This is a test preparation course and students must take an official IELTS test and achieve the required score. The course will also familiarise students with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations. On completion of the IELTS Advanced program, students will take an IELTS test. For entry into programs that require a score of IELTS 7.0 or above, students must achieve this score in an official IELTS test to meet the requirements.

QEL002 IELTS Advanced

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP3 (INT); 2012 5TP7 (INT)

IELTS Advanced is designed to prepare candidates who have already achieved IELTS 6.5 (with no sub-score less 6.0) or acceptable equivalent, for the IELTS Test, Academic Module. It is offered to those seeking to acheive a score of IELTS 7.0 or higher. This is a test preparation course and students must take an official IELTS test and achieve the required score. The course will also familiarise students with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations. On completion of the IELTS Advanced program, students will take an IELTS test. For entry into programs that require a score of IELTS 7.0 or above, students must achieve this score in an official IELTS test to meet the requirements.

QEL003 IELTS Advanced

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP1 (INT); 2012 5TP4 (INT)

IELTS Advanced is designed to prepare candidates who have already achieved IELTS 6.5 (with no sub-score less 6.0) or acceptable equivalent, for the IELTS Test, Academic Module. It is offered to those seeking to acheive a score of IELTS 7.0 or higher. This is a test preparation course and students must take an official IELTS test and achieve the required score. The course will also familiarise students with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations. On completion of the IELTS Advanced program, students will take an IELTS test. For entry into programs that require a score of IELTS 7.0 or above, students must achieve this score in an official IELTS test to meet the requirements.

QEN001 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN001 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN002 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN003 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN004 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN005 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN006 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as

non-academic language development at all levels from elementary to advanced.

QEN007 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

QEN008 General English

Credit Points	20
Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

Campus	Kelvin Grove
Teaching Periods	2012 5TP9 (INT), 2012 5TP8 (INT), 2012 5TP3 (INT), 2012 5TP2 (INT), 2012 5TP1 (INT), 2012 5TP7 (INT), 2012 5TP6 (INT), 2012 5TP5 (INT); 2012 5TP4 (INT)

General English offers pre-academic English and study skills for students preparing for entry into English for Academic Purposes courses as well as non-academic language development at all levels from elementary to advanced.

SCB110 Science Concepts and Global Systems

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

You will undertake interdisciplinary study of the physical, geological and biological concepts relating to the origins of life; from the creation of matter and planets, to the emergence of life in all its complexity, culminating in evolution of earth ecosystems. Human influences, overlaid upon earth's complex systems, will be examined as to their type, extent, and impact. In counterpoint, you will explore the breadth of philosophical developments underlying our search for knowledge; fundamental thoughts and ideas that span the last 2,500 years of human history. Ultimately, these concepts evolved through the development of a scientific method and we explore its workings in relation to the ongoing enterprise of human understanding.

SCB111 Chemistry 1

Anti-requisites	SCB113
Equivalents	CVB101
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Chemistry is the central science. It affects society as well as the individual. It is the language and principal tool of the physical sciences, the biological sciences, the health sciences and the agricultural and earth sciences. A basic knowledge of chemistry is essential to all students in these areas. Knowledge of chemistry allows a better understanding of the human body and of the environment in which we live. The aim of this unit is to introduce you to the basic concepts of general, inorganic, analytical and physical chemistry.

SCB112 Cellular Basis of Life

Anti-requisites	LQB182, LSB118
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Scientists from all disciplines need an appreciation and a broad overview of the characteristics and functioning of the five groups of living organisms (bacteria, protists, fungi, plants and animals), and their interactions with the inanimate world. SCB112 Cellular Basis of Life is a first semester unit that is essential for many students undertaking courses requiring biological knowledge. Through integrated lecture and laboratory classes, this unit provides you with a foundation for later more advanced studies in your course or major (eg such as medical science, biomedical science, pharmacy, optometry, biochemistry, biotechnology, microbiology, geosciences, ecology, business and education among others). The aim of this unit is to introduce you to the wide diversity of living organisms while emphasising the unity of life processes at the cellular, biochemical and biophysical levels.

SCB113 Chemistry for Health and Medical Science

Anti-requisites	PQB105, SCB111 and SCB121
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to introduce students to the basic concepts of general, analytical, physical and organic chemistry; generate an understanding of the importance of chemical bonding and molecular structure and how these factors effect the properties of organic and bioinorganic molecules; and allow recognition of, and provide an understanding of, the nature of organic functional groups.

SCB120 Plant and Animal Physiology

Pre-requisites	SCB112
Equivalents	NRB270
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Regardless of which area of biology you decide to specialise in, you will need to understand the complex interactions between cells, tissues, organs and organ systems that comprise multi-cellular organisms. Although many living processes can be explained at the levels of biochemistry, biophysics and cell biology, a true understanding of complex, multicellular organisms requires integration of knowledge drawn from all of these areas, combined with the more complex physiological and structural levels you will learn about in this unit. The knowledge gained in this and other first level units provides you with the conceptual framework necessary to understand processes occurring from the cellular to the whole organism level and to higher levels of organisation.

SCB121 Chemistry 2

Pre-requisites	(SCB111 or PCB142) . SCB111 can be studied in the same teaching period
Anti-requisites	PQB105 and SCB113
Equivalents	CVB102
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Chemistry is the central science. This is a unit of fundamental importance as it covers the background and general principles that underpin understanding in many science and health related disciplines. In this unit you will be introduced to fundamental aspects of chemistry including the nature of matter, atoms, molecules and ions. From this basis you will develop an understanding of the electronic structure of atoms, chemical bonding and molecular structure as well as the fundamentals of organic chemistry (often described as the chemistry of life). The aims of this unit are to generate an understanding of the importance of chemical bonding and molecular structure and how these factors effect the properties of organic and bioinorganic molecules; and to allow recognition of, and provide an understanding of, the nature of organic functional groups and their respective reactivity.

SCB122 Cell and Molecular Biology

Pre-requisites	SCB112. SCB112 can be studied in the same teaching period.
Anti-requisites	LSB238
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

SCB122 Cell and Molecular Biology 1 equips students with a comprehensive understanding the molecular basis of the cell. This unit expands on the basic principles and concepts relating to cell structure, function, perpetuation and specialisation introduced in SCB112 and introduces students to fundamental molecular mechanisms central to the organisation of the cell. Students will be shown how macromolecular interactions are crucial to information flow and heredity. Students are taught the relationships between chromosomes, genes and cellular function and ultimately how these may determine an organism's phenotype. This unit underpins cell biology and molecular biology units that are offered in second year Life Science units. SCB122 is also ideal for interfaculty students (eg Education, Business, Arts) who will undertake no further life science studies.

SCB123 Physical Science Applications

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Physics principles underpin all of the sciences and 'new technologies'. This unit adopts an investigative team-based approach to provide students with an appreciation of fundamental concepts in physical science, together with experience in the application of these concepts to a range of 'real world' problems. The unit should be taken in the first year of study as the fundamental principles introduced here will be built upon in later units in the context of each science student's major discipline area. Employers in cutting-edge industries expect science graduates to have effective strategies for problem solving, skills for collaborative work and scientific communication and research skills. This unit aims to develop these skills by applying the fundamental concepts of physical science to problems in a team environment.

SCB131 Experimental Chemistry

Pre-requisites	SCB113 or PQB105 or (SCB111 and SCB121). SCB121 can be concurrently enrolled with SCB131
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Chemistry is the central science. A detailed study of chemistry and related disciplines requires the development of practical laboratory skills for synthesis and chemical analysis. This unit is designed specifically to develop these aspects of chemistry. This unit is a laboratory-based unit which is designed for students who intend to continue with experimental science units. The lectures complement the weekly practical sessions and teach the theory required to interpret experimental results. The aim of this unit is to develop a broad knowledge of, and the practical skills required for, scientific experiments in chemistry. The skills acquired in this unit are transferable to other practical sciences including medical science, biochemistry, molecular biology and pharmacy.

SCB208 Introduction to Pharmacy Practice

Pre-requisites	PYB007
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This introductory unit will provide an overview of the activities of a community pharmacy, including the processing of prescriptions, complementary medicine products and other front of shop merchandise. Topics cover foundation practical knowledge and skills (needed for professional placements in later units) together with retailing skills such as merchandising, stock control and computerised point of sales systems.

SCB222 Exploration of the Universe

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to optical observational astronomy; instrumentation; celestial sphere and astronomical coordinates; observations of constellations, stars, planets, clusters and other interesting celestial objects. The theory includes: optics of telescopes; properties of light; determination of physical properties of stars; nebulae; stellar spectra and classification; historical models of the solar system; Kepler's law, gravitation; physical geology of the planets and formation of the solar system; phenomena of astronomical origin; brief introduction to stars and galaxies. This course includes practical exercises and field trips.

SCB301 Science for Dean's Scholars

Other requisites	Enrolment is by invitation to Science and Maths Dean's Scholars and approval of the unit coordinator.
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SUM-2 (INT)

Participation in the Dean's Scholars Accelerated Honours Program requires that you have a foundation for advanced studies in areas such as biochemistry, biotechnology, chemistry, ecology, environmental science, forensic science, geoscience, mathematics, microbiology, and physics. This is achieved through this intensive preparatory unit that comprises

integrated lectures, tutorials, and laboratory classes. The concepts that are covered in this unit will be developed further in advanced studies. The unit's modular composition not only enables the foundation to be tailored to the major study area you have selected for your course but also imparts a multidisciplinary character to the unit that aims to ensure you have a broad appreciation of related disciplines.

SCB303 Tutorial Program for Dean's Scholars

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This individually-tailored tutorial program represents a vital element in ensuring the smooth transition of high-achieving students from an intensive summer program to advanced level units. The involvement of an academic mentor allows an individualised program of study to be designed and developed to meet your specific needs, both in terms of major area of study and individual learning styles.

SCB308 Pharmacy Practice 1

Pre-requisites	SCB208
Co-requisites	SCB338
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A principle role of pharmacists is to dispense and provide advice on the use of large range over the counter (OTC) medications. This unit will provide knowledge on the therapeutic use and regulatory requirements of OTC medications and reinforce the communication skills that are necessary to effectively counsel patients on their proper use and the possible incidence and presentation of adverse effects. An introduction to nutrition and diet will also be provided by the Health Faculty. Experiential placements will also commence during this unit. Additionally, this unit will facilitate the mastery in the proper use of a wide range of basic pharmaceutical calculations which are imperative for the correct determination and validation of prescribed doses of drugs.

SCB338 Pharmaceutical Chemistry and Pharmacology 1

Pre-requisites	SCB122 and SCB131
Co-requisites	SCB308
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Pharmacists require a detailed understanding of the physiochemical properties of drugs and an appreciation of the process of Drug Discovery to facilitate an understanding of how the current range of medicines have been developed. This unit will also provide an understanding of the analytical chemistry techniques that are used to quantitate the active compounds in both pharmaceutical formulations and biological samples, and spectroscopic techniques used in structural elucidation of biologically active compounds. Additionally, this unit will introduce the discipline of pharmacology which examines the interaction of chemical substances with biological system which is fundamental to the understanding of the molecular actions of pharmaceutical products.

SCB384 Forensic Sciences - From Crime Scene to Court

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide you with an introduction to the theory that underpins crime scene investigations, and to give you some appreciation of the practices involved in the processing of a crime and some of the collected evidence, within the framework of the justice system.

SCB401 Research Methods for Dean's Scholars

Pre-requisites	SCB303
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

In order to be able to commence independent research youneed to be able to identify in conjunction with an academic mentor a topic suitable for a scientific investigation; review and report on the literature relevant to the investigation; identify questions or problems to be investigated and appropriate procedures for their investigation; develop and write a report on your investigations. This unit aims for you to develop these skills through the guidance of an academic mentor.

SCB408 Pharmacy Practice 2

Pre-requisites	SCB308
Co-requisites	SCB438
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit extends the students knowledge of pharmacy practice in the areas of dispensing and counselling of both OTC and scheduled drugs used in the treatment of cardiovascular, respiratory, renal and GI Tract complaints. Students will be introduced to concepts such as non-compliance of patients, problem identification and effective strategies to overcome these obstacles to health management through patient communication. Practical experience will be gained by the students via experimental placements in a community pharmacy environment. Additionally, this unit will extend the students mastery of the proper use of a wide range of advanced pharmaceutical calculations.

SCB428 Pharmacokinetics

Pre-requisites	SCB338
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to extend the knowledge of physiochemical properties of drugs and how they relate to pharmacokinetic factors which determine the behaviour of drugs following administration. This unit will develop an understanding of how the chemical properties of drugs relate to absorption, distribution metabolism and excretion. This knowledge is essential in understanding the dosing regimen for drugs and their pharmacokinetic parameters in individual patients. Additionally, generic formulations and product substitution will be explored on the basis of the TGA bioequivalence requirements for the products and provide the students to counsel patients on the suitability of generic brands of pharmaceutical formulations.

SCB438 Medicinal Chemistry and Pharmacology 2

Pre-requisites	SCB338
Co-requisites	SCB408
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A detailed knowledge of medicinal chemistry and pharmacology is essential for the understanding of actions of drugs with endogenous molecular targets. This unit continues to develop the basic principles developed in SCB338 and introduces the concept of structure activity relationships (SARs) which demonstrates the linkage between the chemical structure of drugs and their biological activity and selectivity. The medicinal chemistry of a number of major drug classes are examined in detail, including adrenergic, cholinergic, serotonergic and antihypertensive drugs. This unit also provides an extension of this knowledge in pharmacology and focuses on the drug classes that act on the cardiovascular, respiratory, eye, renal, gastrointestinal systems.

SCB500 Industry Project

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

In this unit students will apply scientific methods and quantitative techniques to real work issues. Students will develop an appropriate plan for analysing and resolving an industry issue under the guidance of both a QUT supervisor and an associate supervisor from an industry partner. At the end of the unit students will present both an oral seminar and a written report.

SCB501 Research Project for Dean's Scholars

Pre-requisites	SCB501-1. SC501-1 can be enrolled in the same teaching period as SCB501-2
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Independent research is a fundamental aspect of science and mathematics. This unit involves a small research project that may be based on a previously developed research proposal. The unit guides students through the research process from the experimentation and/or literature searching and review to the writing of a paper under the guidance of a research mentor. The research project aims to foster enhanced observational, practical, and problem solving skills, literacy and communications skills, and professional responsibility and ethical conduct.

SCB501 Research Project for Dean's Scholars

Other requisites	Approval of the unit coordinator and having identified a research supervisor for your project
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Independent research is a fundamental aspect of science and mathematics. This unit involves a small research project that may be based on a previously developed research proposal. The unit guides students through the research process from the experimentation and/or literature searching and review to the writing of a paper under the guidance of a research mentor. The research project aims to foster enhanced observational, practical, and problem solving skills, literacy and communications skills, and professional responsibility and ethical conduct.

SCB508 Pharmacy Practice 3

Pre-requisites	SCB408
Co-requisites	SCB538
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will focus on the professional interaction of pharmacists with patients suffering from endocrine diseases, in particular diabetes, a variety of central nervous system (CNS) disorders including epilepsy, insomnia, anxiety and depression, Alzheimer's and Parkinson's disease, addiction and patients experiencing strong and debilitating pain from other disease states. Additionally, you will learn how to interact with patients withdrawing from drugs of addiction and the quality use of the both pharmacological and non-pharmacological therapies available for their treatment. This unit will also provide you with further knowledge and skills in the preparation of extemporaneous pharmaceutical preparations in common demand in today's health care environment.

SCB511 Professional Experience A

Other requisites	Approval is subject to Co-ordinator approval. Students must have completed 144 credit points of this course prior to seeking approval.
Credit Points	12
Campus	Gardens Point

SCB528 Pharmaceutics 1

Pre-requisites	SCB428
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to provide knowledge relating to the physical and chemical properties of the components of pharmaceutical formulations. The formulation of drugs has a large influence on the route of administration, the onset and duration of action and the pharmacokinetic parameters that govern the drugs activity in the human body. This course will introduce you to the basic concepts and theories of pharmaceutical formulation and compounding with a focus on liquid and semi-solid dosage forms.

SCB538 Pharmacology 3

Pre-requisites	SCB438
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A detailed knowledge of the pharmacology of drugs is essential for pharmacists to understand the therapeutic applications of pharmaceutical compounds and their concomitant adverse effects. This unit provides an extension of this knowledge and covers the drug classes that act on the central nervous system, endocrine system, anticancer drugs, drugs of abuse and pharmacotherapies for withdrawal syndromes.

SCB608 Pharmacy Practice 4

Pre-requisites	SCB508
Co-requisites	SCB648
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The dispensing of schedule drugs to the community requires expertise in drug

knowledge, packaging, labelling and health regulations, communication techniques, compounding processes and the ability to understand and validate the diagnosis of clinical conditions. This unit will provide students with expertise to dispense pharmaceutical drugs that are used in the treatment of infectious diseases and the treatment of tumours and malignancies.

SCB628 Pharmaceutics 2

Pre-requisites	SCB528
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to extend the knowledge base of pharmacy students in the discipline of pharmaceutics which is essential to their understanding of pharmaceutical product formulation. This unit will focus on solid dosage form design including tablets and capsules and the theory and practical aspects of controlled release formulations which are increasingly utilised in modern pharmaceutical formulations. Additionally, this unit will extend the student¿s expertise in the science of compounding of advanced pharmaceutical formulations.

SCB638 Pharmacogenomics and Drug Metabolism

Pre-requisites	SCB538
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The effects of drugs in patients are determined in part by drug metabolizing enzymes. In addition, the ability of an enzyme to metabolize a drug is determined by genetic variability. A detailed understanding of these factors is necessary for pharmacists to understand drug selection, the biological fate of a drug following administration, the appropriate route of administration, the occurrence of adverse effects and the final effect of a drug. This unit will describe the biochemistry of drug metabolism and genetic factors (pharmacogenomics) that affect drug metabolism and variability of drug effects. The field of pharmacogenomics, is becoming increasingly important for understanding the contribution of the patient's genetic composition to drug effects.

SCB648 Pharmacotherapeutics 1

Pre-requisites	SCB538 and LQB386
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The dispensing and counselling of pharmacotherapies for infectious diseases requires an advanced knowledge, understanding and skills relevant to infectious disease diagnosis, the mechanism of action of pharmacotherapies, public health microbiology. This unit will demonstrate the correct therapeutic use of drugs in the treatment of infectious diseases following a review of their pathophysiologic basis. Additionally, quality use of medicines issues for these pharmacotherapies will be reviewed and reinforced by the use of clinical scenarios.

SCB708 Pharmacy Practice 5

Pre-requisites	SCB608 and SCB648
Co-requisites	SCB758, SCB768
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The pharmacy practice units in the 4th year of the B Pharmacy course will provide both advanced and updated information on the dispensing and counselling of drugs using case based clinical scenarios. Additionally, students will be provided with information that will allow them to critically evaluate clinical trial design using studies of newly released drugs as a reference and the role of regulatory authorities during the process of drug approval. Through a series of case based problems and scenarios that will involve a diverse range of diseases and disorders, the students will gain experience in the skills required to dispense medication and effectively communicate drug knowledge to patients.

SCB748 Pharmacotherapeutics 2

Pre-requisites	SCB648
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A number of factors must be considered before a decision concerning the appropriate drug is prescribed and dispensed to patients. This unit will provide a pathophysiological approach to the identification of cardiovascular, respiratory, renal, and endocrine disorders. Students will be instructed on the factors that determine the correct choice of therapeutic drug and the dosing regimen including drug toxicity, pharmacokinetics and pharmacodynamic consideration for the individual patient, drug-drug interactions and pharmacoeconomics considerations.

SCB758 Pharmacy Management 1

Pre-requisites	SCB608 and SCB648
Co-requisites	SCB708 and SCB768
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

In addition to their role as allied health care providers, pharmacists are often required to assist in the management of their workplace which consists of supervision and administration of a diverse staff roster, stock inventory and marketing strategies. Moreover, many pharmacists enter into complex partnerships agreements during the purchase of a pharmacy. This unit will provide the basic management tools in the areas of accounting, preparation of budgets and business plans, payroll and GST legislation, marketing, partnerships law, decision making and the use of financial software to effectively understand the information provided by support staff to make effective business decisions.

SCB768 Professional Placements 1

Pre-requisites	SCB608, SCB648
Co-requisites	SCB758, SCB708
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The role of a contemporary pharmacist in providing healthcare products and advice consists of diverse range of skills and abilities in the preparation of pharmaceutical preparations, the dispensing of medications, counselling of patients and their families in their correct use and performing medication reviews. To assist students in developing expertise in these areas, this unit will provide real world experience through a long-term continuous placement in a community or hospital environment under the

supervision of qualified preceptor. These placements will consist of a five (5) week block that will commence in the second half of the semester and assessment will consist of the documented completion of a assignments and experiential log book.

SCB808 Pharmacy Practice 6

Pre-requisites	SCB708 and SCB768
Co-requisites	SCB848, SCB858 and SCB868
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The pharmacy practice units in the fourth year of the Bachelor of Pharmacy course will provide both advanced and updated information on the dispensing and counselling of drugs using case based clinical scenarios. Through a series of case based problems and scenarios that will involve a diverse range of diseases and disorders and aspects of pharmaceutical care, the students will gain experience in the skills required to dispense medication and effectively communicate drug knowledge to patients, and an understanding of the provision of primary health care in the Australian Health system.

SCB848 Pharmacotherapeutics 3

Pre-requisites	SCB648 and SCB748
Co-requisites	SCB808
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A number of factors must be considered before a decision concerning the appropriate drug is prescribed and dispensed to patients. This unit will provide a pathophysiological approach to the identification of neurological, mental health and oncological disorders and diseases that affect the eye, ear and skin. Students will be instructed on the factors that determine the correct choice of therapeutic drug and the dosing regimen including drug toxicity, pharmacokinetics and pharmacodynamic consideration for the individual patient, drug-drug interactions and pharmacoeconomics considerations.

SCB858 Pharmacy Management 2

Pre-requisites	SCB758
Co-requisites	SCB808 and SCB868
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit extends the knowledge of pharmacy students in areas of accounting and finance, management, HR and health care policy in relation to the management of a pharmacy business.

SCB868 Professional Placements 2

Pre-requisites	SCB708 and SCB768
Co-requisites	SBC808 and SCB858
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to extend the students experiential skills in working in either a community or hospital pharmacy environment. The design and timetabling of the unit is similar to SCB768 Professional Placements 1, but the emphasis will focus on the dispensing and counselling and QUMs of further drug classes and the management skills will be aligned with SCB858 Pharmacy Management 2. These placements will consist of a five (5) week block consisting of four working days that will commence in the second half of the semester and assessment will consist of the assignments and submission of a experiential log book.

SPB003 Teaching Children with Disabilities

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to a wide range of low incidence exceptionalities (for example sensory impairments, developmental delay and health impairments such as epilepsy, asthma and hepatitis, and so on). It also addresses methods of managing associated disabling conditions, the implementation and evaluation of programming, and the support and referral services.

SPB004 Teaching Students with Learning Difficulties

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit integrates a basic understanding and application of learning theory as it applies to exceptional populations. It focuses on approaches to teaching particular exceptional groups and provides an opportunity for development of specialist skills and resources in one of the following areas: (a) students with learning difficulties; (b) gifted students; (c) students with low incidence disabilities, for example hearing impaired, visually impaired or physically handicapped; (d) behaviourally or emotionally disturbed students.

SPB006 Educational Counselling

Anti-requisites	SPN651
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (BLK); 2012 13TP1 (BLK)

This unit includes the following: the nature of counselling/helping in educational contexts; the educator as counsellor; characteristics of effective helpers; practical development of communications skills; building an empathic relationship; structuring the counselling process; application of some counselling theories to the educational contexts; practical sessions using educationally based role plays to demonstrate effective use of the skills learned. The unit includes a compulsory study school for external students. It is incompatible with studies in Counselling or equivalent at Diploma of Teaching level.

SPB008 Middle Years Students and Schools

Credit Points	12
Campus	Caboolture
Teaching Periods	2012 SEM-2 (INT)

This unit provides an understanding of the developmental needs and interests of young adolescents and reform initiatives being implemented by schools to address these issues. The unit analyses the work of agencies and major reports in the middle years of schooling and examines aspects of research focussing on reform in curriculum, pedagogy and the way schools are organised. The unit is one of four units forming a pathway into the middle years of schooling for primary and secondary teaching.

SPB012 Classroom and Behaviour Management

Credit Points	12
Campus	Internet, Kelvin Grove and Caboolture
Teaching Periods	2012 6TP4 (EXT), 2012 SEM-1 (EXT, INT); 2012 SEM-2 (EXT)

This unit integrates concepts of behaviour development, management and discipline within a defensible pattern of classroom management and appropriate curricula processes.

SPB018 Teaching Strategies

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit includes: evaluation of the students' teaching strategies; the literature on teaching strategies; critical evaluation of strategies/models of teaching available.

SPB020 Classroom Assessment Practices

Credit Points	12
Campus	Internet
Teaching Periods	2012 6TP4 (EXT), 2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

This unit includes: examination of the nature and purpose of assessment; traditional and contemporary developments in the assessment of students in a range of settings; test construction and validation; record keeping and reporting, with emphasis on practical applications by practising teachers.

SPB022 Middle Years Curriculum, Pedagogy and Assessment

Credit Points	12
Campus	Caboolture
Teaching Periods	2012 SEM-1 (INT)

This unit enables students to gain an appreciation of the middle school movement and how this has the potential to impact on the needs and interests of young adolescents. The focus is on a more integrated approach to curriculum, teaching strategies appropriate to middle schools and authentic assessment.

SPB036 Assessment: Using Educational Data

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 6TP4 (INT)

Monitoring individual development and designing appropriate intervention programs/units to meet individual needs is the work of all teachers. Thus, the unit provides opportunities for the educator to devise ways to monitor student development and to engage with current international, national and state developments that require systemic evaluation of all key learning areas.

SPB038 Understanding Reading Difficulties

Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The aims of this unit are to provide pre-service teachers (Prep to Year 12) with opportunities to deepen their knowledge of the reading process and to develop their skills in identifying and supporting struggling readers in an inclusive setting. An emphasis will be placed on classroom-based assessment practices and explicit evidence-based instructional practices that can be incorporated into rich literacy activities.

SPN610 Advanced Educational Counselling

Pre-requisites	SPN651
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK)

This unit provides students with an overview of major theories of counselling and to assist them in the development of a framework using one of these approaches that they may use as a basis for their counselling.

SPN611 Educational Guidance Counselling: Professional Practice

Pre-requisites	SPN651 and SPN612 (SPN612 can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK)

This unit looks at: professional practices of educational counsellors working in the P-12 context; intervention, prevention, affective, and developmental programs; adolescent issues and career counselling; consultation models, theories and practices; self-management skills, time management, program evaluation, accountability and decision-making discussed.

SPN612 Psychoeducational Assessment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 13TP1 (BLK)

In this unit students gain a broad understanding of the various types of assessment techniques and strategies used in the educational context to develop understandings and capacities that advance learners from basic competence in professional practice to confident and ethical leadership in learning innovation in school guidance and counselling.

SPN618 Career Development and Professional Practice

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

This unit encourages learners to engage in lifelong learning and within the context of career development practice, lead innovations in the delivery of career development programs to a wide range of audience throughout the community.

SPN620 Career Counselling

Pre-requisites	SPN651
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT)

This unit encourages learners to critically evaluate the perspectives to formulate a personal position with respect to their career counselling practice. Students have the opportunity to gain experience in the application of traditional and emerging career counselling processes, and to contribute to innovation in supporting the role of career counselling in a new career guidance context of career self-management.

SPN625 Leadership Concepts, Theories and Issues

Credit Points	12
Campus	Internet, Kelvin Grove and External

Teaching Periods	2012 SEM-1 (INT, EXT)

The overall aim of this unit is to enhance the leadership understanding and capabilities for both current leaders and those aspiring to such positions in organisations today and in the future. This aim is set in a broader understanding of notions of shared and multiple leadership concepts.

SPN626 Leading and Managing People

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit enhances the understandings and capabilities of leaders and aspiring leaders to manage their organisation's human resources in rapidly changing and challenging contexts.

SPN640 Developmental and Educational Assessment

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit provides students with an opportunity for foundation study of principles and methods for assessing individual development and personal characteristics. Underlying this unit is the assumption that the purpose of assessment is to collect information that will be used to design interventions.

SPN641 Interventions in Educational and Developmental Psychology

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to equip students with a range of applied strategies for evidence-based prevention and intervention within educational and developmental contexts. Practical skills need to be founded on a deep conceptual understanding of the links between assessment and intervention.

SPN642 Learning Difficulties: Assessment and Intervention

Pre-requisites	SPN640
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The aim of the unit is to provide students with a sound knowledge of learning processes, and methods for assessing individuals with learning difficulties. It also introduces students to a variety of appropriate interventions for individuals with learning difficulties and associated impairments.

SPN643 Developmental Processes and Disability

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit aims to equip students with a sound framework on which to base their professional practice. Working effectively with individuals with a range of disabilities, their families, schools and communities requires knowledge about the ways in which development may be compromised by disability, and the ways in which contextual influences contribute to developmental outcomes.

SPN644 Inclusive Education: Theory, Policy and Practice

Credit Points	12
Campus	Internet
Teaching Periods	2012 SEM-1 (EXT)

Schools are a reflection of diversity within global and local education communities. An inclusive approach to education involves a critique of social values, priorities and the structures and institutions which they support. It involves the politics of recognition and is concerned with the serious issue of who is included and who is excluded within education and society generally.

SPN645 Leadership, Policy and Change in Action

Anti-requisites	SPN627, SPN628
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT, EXT)

The unit presents the theories and processes of educational change; organizational cultures and values and their influence on change; policy processes (development, implementation and evaluation); policy trends and change in educational contexts. The content around these topics will add to your understanding of the dynamics between leadership, culture and change, and the challenges for leaders. You will develop skills to make sense of and constructively respond to policies within organisational contexts.

SPN646 Strategic Management

Anti-requisites	SPN637
Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-2 (EXT, INT)

Since 2000, there have been increasing demands from statuary bodies and other stakeholders for all organizations, whether schools, educational institutions, voluntary organizations, businesses or government departments, to be effective, efficient and transparently responsible. This unit will take a complex systems view using general systems theory, chaos theory and synergistics to analyse the processes educational organisations and other organisational settings use to maintain their strategic intent and to harness both continuous and discontinuous innovation.

SPN647 Understanding Reading and Writing Difficulties

Anti-requisites	SPN614
Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (EXT)

While the understanding and application of learning theory is essential to the teaching of all students, there will always be some for whom specialised approaches are required in order to maximise their potential. Accordingly, it is vitally important for teachers to develop their knowledge and skills so that they can meet the needs of diverse literacy learners in a flexible, problem-solving manner using evidence-based approaches to instruction.

SPN648 School Guidance and Counselling Practicum

Pre-requisites	SPN651 and SPN611 (SPN611 can be enrolled in the same teaching period)
Credit Points	12
Campus	Internet and External
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

As well as developing a sound knowledge base, studying school guidance and counselling needs you to develop the

skills to apply this knowledge in the practical setting of a school. In the Practicum, you will be given the opportunity to observe, participate in and critically evaluate a range of practice activities.

SPN649 Introduction to Autistic Spectrum Disorder

Credit Points	12
Campus	Internet and Kelvin Grove

Teachers' concerns about classroom management are intensified by the inclusion of students with additional needs. Behaviours associated with low engagement, learning difficulties, attention and activity disorders, autism spectrum disorders, and moderate to severe disabilities present major challenges for classroom teachers. Accordingly, sound knowledge of effective classroom management practices and the ability to work collaboratively with support personnel to plan and provide appropriate behaviour management programs are essential.

SPN650 Introduction To Autistic Spectrum Disorder

Credit Points	12
Campus	Internet, Kelvin Grove and External
Teaching Periods	2012 SEM-1 (EXT)

The aims of this unit are to assist you as classroom and specialist teachers, school counsellors and guidance officers to deepen your knowledge in the area of Autistic Spectrum Disorders and to develop your skills in identifying and supporting this group of students in an inclusive educational setting.

SPN651 Introductory Educational Counselling

Anti-requisites	SPB006
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (BLK); 2012 13TP1 (BLK)

Perhaps the most potent message that can be extracted from many branches of applied psychology is that people of all ages yearn to be personally effective. Be they classroom teachers with discipline problems, failing students, or those who are dissatisfied in their work situation - unhappy people are seeking to satisfy unfulfilled hopes and aspirations. More importantly, perhaps, they seek happiness and a sense of being able to direct their own destinies. This unit focuses on issues and topics implicit in the above.

SPN653 Teaching, Learning and Assessing in Vocational Education and Training

Credit Points	12
Campus	Kelvin Grove and External

Within this unit you will become critically-informed about the academic needs of the vocational learner. This unit will also provide you with a comprehensive understanding of theoretical underpinnings and the processes involved in developing vocational education courses together with teaching, learning and assessment approaches that are appropriate to vocational education contexts.

SPN654 Career Development: Policy and Process Context

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT); 2012 SEM-2 (EXT)

This unit introduces students to the broad areas of career development policy, career counselling, and career development programs. It is based on Component 3 of the Australian Career Development Studies (reproduced and modified with the approval of the Federal Department of Education Employment and Workplace Relations).

SPP400 Classroom and Behaviour Management

Credit Points	12
Campus	Internet and Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT, INT)

This unit investigates a range of classroom management strategies, including preventative, supportive and corrective approaches, that are aimed at developing collaborative and inclusive learning environments in a range of educational settings

SPP401 Classroom Assessment Practices

Credit Points	12
Campus	External
Teaching Periods	2012 SEM-2 (EXT)

This unit aims to equip you with both theoretical knowledge and practical skills in assessing and reporting which can be applied in the classroom situation.

SPP402 Primary Educational Perspectives

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The unit requires that you engage-in a critical and problematizing manner-with current theoretical and research literature from the disciplinary perspectives of the Psychology and Sociology of Education so that you are able to build your professional and ethical capacities and dispositions as a Primary school teacher. Of crucial importance in this regard is the vital process of 'teacher as researcher' to which you will be introduced in this unit and which will underpin your learning. The unit is located in the early stages of your course progression to provide you with the necessary professional contexts for your learning in curriculum and field studies.

SPP403 Enhancing Your Teaching Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

In this unit, you will gain knowledge and understanding of theoretical and practical pedagogic frameworks that can be appplied to your classroom practices. As such, this unit will assist you to develop the knowledge and skills necessary to become effective classroom practitioners.

STB551 Engaging with the Innovation Industry

Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

Working in the innovation industry requires a suite of skills beyond an in depth technical and/or business knowledge of a disciplinary area. Successful facilitators of innovation exchange require well developed professional portfolios and high level capabilities in the generic or soft skills including communication (written, oral and aural), thinking approaches (analytical, critical and lateral), adaptability, flexibility, leadership, learning approaches and team-based skills. This unit helps prepare you to become a professional in the innovation industry whether as an entrepreneur seeking funding for

development of intellectual property or as facilitator of innovation exchange between inventor, venture capital sources and the global marketplace.

STB709 Innovation and Commercialisation Project

Pre-requisites	STB551
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The Innovation and Commercialisation Project is a capstone unit that provides a concrete opportunity for students to consolidate and contextualise the knowledge and skills they have acquired in the course and apply them to a substantial project. The unit serves to provide work experience and link University study with the professional practice of innovation commercialisation context. New venture areas of industry, focussed as they often are on emergent technologies and the commercialisation of innovation, require graduates capable of high levels of critical thinking and evaluation coupled with a sound technical and business knowledge and skills base of relevance to the particular innovation context. The capacity to conduct rigorous analysis into the research, development and commercialisation of products and processes is a fundamental aspect of converting real-world science and technology into products for the global marketplace.

STB709 Innovation and Commercialisation Project

Pre-requisites	STB551
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The Innovation and Commercialisation Project is a capstone unit that provides a concrete opportunity for students to consolidate and contextualise the knowledge and skills they have acquired in the course and apply them to a substantial project. The unit serves to provide work experience and link University study with the professional practice of innovation commercialisation context. New venture areas of industry, focussed as they often are on emergent technologies and the commercialisation of innovation, require graduates capable of high levels of critical thinking and evaluation coupled with a sound technical and business knowledge and skills base of relevance to the particular innovation context. The capacity to conduct rigorous analysis into the research, development and commercialisation of products and processes is a fundamental aspect of converting real-world science and technology into products for the global marketplace.

STB709 Innovation and Commercialisation Project

Pre-requisites	STB551
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The Innovation and Commercialisation Project is a capstone unit that provides a concrete opportunity for students to consolidate and contextualise the knowledge and skills they have acquired in the course and apply them to a substantial project. The unit serves to provide work experience and link University study with the professional practice of innovation commercialisation context. New venture areas of industry, focussed as they often are on emergent technologies and the commercialisation of innovation, require graduates capable of high levels of critical thinking and evaluation coupled with a sound technical and business knowledge and skills base of relevance to the particular innovation context. The capacity to conduct rigorous analysis into the research, development and commercialisation of products and processes is a fundamental aspect of converting real-world science and technology into products for the global marketplace.

SWB100 Orientation to Social Work and Human Services

Anti-requisites	HHB100
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides an introduction to human services and social work and locates this within the broader context of the welfare state. It examines both the history, and global and national forces, which shape the current direction of welfare policy and the human service industry. The purpose of human service work and the various roles a human service worker may undertake or utilise are explored. The unit challenges students to reflect on their own understandings of human services and human service work, and provides a foundation for detailed study in later years of the course. [SWB100 is incompatible with HHB100]

SWB102 Human Development and Behaviour

Anti-requisites	HHB102
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to a range of individual, familial and social conditions that impact on the lives and lifestyles of Australians. Attention is directed toward the impact of factors such as age, ability, gender, culture and class, and the identification and exploration of key processes in human growth and development. Students become informed about theories from a range of disciplines and develop a critical and reflective approach to understanding human development. By examining how societies define and respond to human need and adversity students develop a framework for examining the dynamic interaction of individual, interpersonal and social forces. [SWB102 is incompatible with HHB102]

SWB105 Introduction to Human Rights and Ethics

Anti-requisites	HHB114
Credit Points	12
Campus	Gardens Point and Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit explores a range of contemporary national, regional and international human rights challenges and issues. It examines the relationship between human rights, the human rights system and critically important global problems including climate change, poverty, terrorism and oppressive forms of intolerance. It offers opportunities to investigate thematic concerns relating to women, youth, indigenous peoples and minority groups as well as specific topics such as human trafficking, harmful cultural practices, workers rights and child soldiers. The unit draws on a number of academic disciplines and makes extensive use of the Internet and information, communication and collaborative technologies. There are a number of interesting options open for assessment. [SWB105 is incompatible

with HHB114]

SWB106 Applied Skills and Scholarship

Anti-requisites	HHB116
Credit Points	12
Campus	Kelvin Grove and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to introduce students to key aspects of important generic attributes which QUT graduates are expected to acquire across the period of their studies. The unit covers a range of topics relating to information literacy, academic literacy, and technological literacy. These topics are addressed in a practical way so that students will easily be able to apply the skills learned across other units in their course. Students have the opportunity to develop their skills through a series of activities such as self-paced online interactive exercises, quizzes, links and information. A variety of assessment items are spread across the semester. [SWB106 is incompatible with HHB116]

SWB108 Australian Society, Systems and Policies

Anti-requisites	SWB103, SWB218
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

SWB109 Working with Aboriginal and Torres Strait Islander Peoples and Communities

Anti-requisites	EDB041
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

SWB110 Understanding Families and Relationships

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

SWB200 Working in Human Service Organisations

Pre-requisites	SWB100 or HHB100
Anti-requisites	HHB200
Credit Points	12
Campus	Kelvin Grove

This unit includes the following: service quality and the organisational dimension; industrialisation and development of human service work organisations; power based and empowering organisational paradigms; organisational cultures and gender; personal skills for human service workers including career, time and stress management; interpersonal skills for working collaboratively and resolving disagreement. [SWB200 is incompatible with HHB200]

SWB201 Human Services Practice Placement 1

Pre-requisites	(SWB100 or HHB100) and PYB007
Anti-requisites	SWB208 or HHB208, SWB209
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

SWB202 Health, Wellbeing and Social Work

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

SWB204 Introduction to Child and Family Services

Anti-requisites	HHB204
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

The unit focuses on developing competent social work and human services professionals by providing students with opportunities to develop knowledge, skills and dispositions specifically relevant to work with children and families. Students from, education, psychology, and health related areas also find this unit useful as it provides a foundation in theories and practices for working with children and families that is transferable to a wide range of professional settings.

SWB207 Introduction to Youth Services

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction to human services practice with young people. It gives students an overview from both theoretical and operational perspectives. The various theoretical and popular understandings about 'youth' or 'adolescence' which condition human services provision to young people will be critically explored. Diversity and marginalisation among young people in relation to socio-economic status, gender, race and ethnicity, disability, sexual identity, and geographic location will be examined. The unit briefly overviews contemporary policies, services, and practice frameworks oriented to young people. [SWB207 is incompatible with HHB207]

SWB211 Casework and Case Management

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Casework and case management are the predominant human services practice methods and involve a range of processes and skills to ensure that service outcomes are effective and efficient. This unit compares and contrasts casework and case management strategies and approaches across a variety of practice contexts and scenarios. Students explore and analyse primary skills, tasks and roles including assessment, referral, brokering, review, advocacy, record keeping and workload management. Key learning strategies include problem based learning and the review, design and modification of a case management system for a particular practice context. Assessment is a scenario based exam and project paper. [SWB211 is incompatible with HHB211]

SWB212 Community and Place Based Practice

Anti-requisites	HHB212
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Community work as a distinct intervention skill is defined. The unit provides background to community work in Australia. Models of community work are introduced and analysed. Basic skills and techniques are developed: entering a

community; building community involvement; developing community action; managing common problems. [SWB212 is incompatible with HHB212]

SWB214 Group and Team Practice Skills

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

A significant methodology used in human service work involves facilitating, supporting or consulting with various groups of people. This unit focuses on the development of skills to utilise this type of intervention appropriately. The unit aims to provide a basic understanding of the various uses to which group processes may be applied. Group work is located as an intervention process within the human service arena as distinguished from other processes at individual, community and societal level. [SWB214 is incompatible with HHB214]

SWB219 Legal and Ethical Dimensions of Social Work and Human Services

Pre-requisites	SWB100 and SWB105
Anti-requisites	HHB277
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This unit aims to produce graduates who have a comprehensive knowledge of the ethical and legal dimensions of human service practice and an understanding of the relevance of such dimensions for professional practice and the empowerment of the disadvantaged. [SWB219 is incompatible with HHB277]

SWB220 Practice Theories

Anti-requisites	HHB278
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is intended to enable you to develop an understanding of the major theoretical approaches (practice perspectives, practice theories and practice models) underpinning human service practice and critically examine the way theoretical concepts and disciplinary knowledge inform intervention process. [SWB220 is incompatible with HHB278]

SWB221 Professional Practice Processes and Assessment

Anti-requisites	HHB279
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit is intended to enable students to develop knowledge and application skills in practice processes and methods central to social work and human service practice contexts. It aims to orient students to core human service and social work practice processes and methods and enable them to appropriately use these across diverse settings. [SWB221 is incompatible with HHB279]

SWB222 Advanced Communication for Social Work and Human Services

Pre-requisites	HHB113 or SWB104 or PYB007
Anti-requisites	HHB215, HHB282
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

[This is a designated unit] Developed interpersonal communication skills are the cornerstone for both personal and professional relationships. Human service and social work in a broad sense, aim to help people in their struggle for self determination and social justice. At a fundamental level, the struggle for independence, justice and empowerment is facilitated by interpersonal processes involving the effective use of communication and conflict resolution skills. This unit builds the fundamental communication skills essential for professional social work within a diversity of practice settings. It pays particular attention to the needs of Indigenous peoples and clients from ethnically and cultural diverse backgrounds. It develops necessary skills in interpersonal dynamics, interviewing, empathic engagement, relationship building, working with resistant clients , alternate dispute resolution and reflective practice. [SWB222 is incompatible with HHB282], [Designated unit]

SWB301 Advanced Professional Practice

Pre-requisites	(SWB200 or HHB200), (SWB208 or HHB208), (SWB209 or HHB209), (SWB219 or HHB277), (SWB220 or HHB278) and (SWB221 or HHB279)
Anti-requisites	SWB314, SWB315, HHB301
Credit Points	36
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The Advanced Professional Practice unit is a vital part of the Human Services course and a time for final year students to link the theoretical component of the course to the human services agency context. The final practice unit will provide students with the opportunity to reflect upon their learning goals and choose appropriate placements where they will develop their role as a professional human services practitioner by undertaking 400 hours of practical work experience. The time in the field will be complimented by university workshops, liaison visits from University staff and peer group experiences. The outcome of this placement will provide students with a sound platform from which to move from the university setting to the professional practice arena. [SWB301 is incompatible with HHB301]

SWB304 Child Protection and Family Practice

Pre-requisites	SWB204 or HHB204
Anti-requisites	HHB304
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

The unit extends and deepens knowledge gained in Child and Family Introduction. You will particularly focus on developing a framework for assessment with families and gain further knowledge for practice with families who are refugees, where there is domestic violence and in the hospital context. Emphasis is placed on developing strategies to promote the participation of children and young people. You will also enhance skills of identifying worthwhile service change and submission writing. [SWB304 is incompatible with HHB304]

SWB306 People, Community and Disability

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit builds on concepts and issues introduced in the Disability Services:

Introduction unit and is designed to promote understanding of the knowledge required to undertake policy and service development activities within the disability sector. It explores the range of service models relevant to people with a disability across their lifespan. Additionally, it examines the quasi-legal and policy aspects of working in disability service organisations, along with some of the ethical dilemmas inherent in human service provision with particular relevance to people with a disability. [SWB306 is incompatible with HHB306]

SWB307 Youth Services Practice

Pre-requisites	SWB207 or HHB207
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

Many of the positions available in the human services industry and oriented to young people require specific knowledge, skills and understandings. This unit involves an in-depth exploration of contemporary and emerging areas of direct and indirect practice with young people. Included are early intervention and prevention, youth policy analysis and development, juvenile justice practice, youth and family work, youth health practice, public space practice, accommodation and housing practice, and the interface between human services practice and schools. The unit also examines the legal and ethical dimensions of direct practice as an integral part of the unit. [SWB307 is incompatible with HHB307]

SWB310 Linking Social Work Theory and Practice

Pre-requisites	(HHB277 or SWB219) and (HHB279 or SWB221) and (HHB282 or SWB222 or PYB208)
Anti-requisites	HHB339
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

An essential component of developing into a competent social worker is the capacity to reflect on and build a framework for practice. In this unit students are required to attend a series of seminars and workshops that have been designed to provide them with the opportunity to gain specific knowledge and process skills for the development of an initial framework for professional practice. One aspect of competency for later professional development is the capacity to reflect and build upon this framework throughout the students' life as a social worker. This unit provides skills and understandings necessary for this to occur. [SWB310 is incompatible with HHB339]

SWB311 Mental Health and Social Work

Pre-requisites	SWB221 or HHB279
Anti-requisites	HHB340
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

Appreciation of the mental health dimensions of people's lives is essential for social work practice. This unit develops an appreciation of the social construction of mental health issues together with a basic knowledge of the bio-psych-social aspects of various mental health conditions. These provide a foundation for a critical consideration of the nature of social work practice around mental health considerations and of the interface between social work and other practice roles and disciples. [SWB311 is incompatible with HHB340]

SWB312 International Social Work

Anti-requisites	HHB341
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

This unit examines the application of social work to various international, national and regional contexts outside Australia. It critically explores a range of approaches that are utilised in international development, aid and human rights practice and how social work values, knowledge and skills apply to these. This unit forms part of the International Practice Pathway within the Bachelor of Social Work. [SWB312 is incompatible with HHB341]

SWB314 Human Services Practice Placement 2

Pre-requisites	[SWB201 or SWB209] and [SWB204 or SWB207] and [SWB208 or SWB200] and SWB219 and SWB220 and SWB221
Co-requisites	SWB315
Anti-requisites	HHB301, SWB301
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

SWB315 Transition to Human Services Practice

Co-requisites	SWB314
Anti-requisites	SWB301
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

SWB316 Social Work Field Education 1A

Pre-requisites	(SWB219 or HHB277) and (SWB221 or HHB279) and (SWB222 or PYB208 or HHB282)
Co-requisites	SWB317
Anti-requisites	SWB309, HHB338
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

SWB317 Social Work Field Education 1B

Pre-requisites	(SWB219 or HHB277) and (SWB221 or HHB279) and (SWB222 or PYB208 or HHB282) and SWB316. SWB316 can be enrolled in the same study period.
Anti-requisites	SWB309, HHB338
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

SWB318 Disaster Health: Principles, Planning and Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT)

This interdisciplinary unit introduces students to the principles and practices used in the management of major incidents and disasters, and the processes affecting individuals, groups and communities in the response and recovery phases. It has a particular emphasis on health and welfare responses. The roles, responsibilities and

tasks which authorities and others undertake in order to safeguard the community and minimise disruption, dislocation and trauma are examined. Effective response by these systems to major incidents and disasters is examined along with the responsibilities and roles of individuals who must understand organisational planning and preparation, disaster management, and service coordination.

SWB319 Socio Legal Practice

Pre-requisites	SWB219 and SWB222
Credit Points	12
Campus	Kelvin Grove

SWB400 Macro Context of Social Work Practice

Pre-requisites	SWB108 or SWB218
Anti-requisites	SWB302
Credit Points	12
Campus	Kelvin Grove

SWB401 Research Methods for Professional Practice

Pre-requisites	SWB100 or HHB100
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (INT)

This unit provides an introduction to research methods relevant to the practice of social workers and human service professionals. A basic grounding in social research is provided followed by specific research methods in participatory action research and evaluation. The unit provides knowledge and skills in research methods at a very practical level, whilst also demonstrating the relevance and challenges of research within a social work and human services context.

SWB402 Social Work Field Education 2A

Pre-requisites	SWB220 and SWB221 and (SWB310 or HHB278) and SWB316 and SWB317. SWB310 can be enrolled in the same teaching period as SWB402
Co-requisites	SWB403
Anti-requisites	HHB408, SWB408
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

SWB403 Social Work Field Education 2B

Pre-requisites	SWB220 and (SWB310 or HHB278) and SWB316 and SWB317 and SWB402. SWB402 can be enrolled in the same teaching period as SWB403
Anti-requisites	SWB408 (or HHB408)
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

SWB404 Complexity in Social Work and Human Services Practice

Pre-requisites	(SWB201 or SWB316 or SWB317) and SWB219
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit aims to orient students to various sources of complexity in contemporary human services practice and equip students with a range of strategies for dealing with this complexity. It aims to enable students to critically evaluate the role of culture in developing responses to complex and high needs and to explore the implications of complexity in their own developing frameworks for practice. [SWB404 is incompatible with HHB302]

SWB405 Advanced Social Work Project

Anti-requisites	HHB411
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit enables students to undertake an in-depth study on an approved topic relevant to social work practice. To enable this, students will extend their knowledge and skills in undertaking various aspects of the research process as this relates to their investigation.

SWB406 Transition to Social Work Practice

Pre-requisites	((SWB316 and SWB317) or SWB309) and SWB402 and SWB403. SWB402 and SWB403 can be studied in the same teaching period as SWB406
Anti-requisites	SWB409
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (INT)

SWB408 Social Work Practice and Fieldwork 2

Pre-requisites	(SWB221 or HHB278), (SWB309 or HHB338), (SWB310 or HHB339)
Co-requisites	SWB409
Anti-requisites	SWB402, SWB403
Credit Points	36
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

[Designated unit] The Practice and Fieldwork 2 unit is a vital part of the Social Work course and a time for students to cement their framework for professional practice firmly in the reality of social care contexts. This practice unit will provide students with the opportunity to reflect upon their learning goals, re-evaluate the outcomes of their earlier practice experience and choose a final placement where they will further develop their role as a professional social work practitioner by undertaking 490 hours of practical work experience. The time in the field will be complimented by university workshops, liaison visits from University staff and peer group experiences. The outcome of this placement will provide students with a sound platform from which to move from the university setting to the professional practice arena. [SWB408 is incompatible with HHB408], [Designated unit]

SWN001 Planning, Literacy and Research For Professional Practice

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit commences with a staff-mentored process which requires each student to conduct a reflective professional / personal audit identifying strengths, weaknesses, opportunities and challenges as they begin study. It includes a review of communication skills, learning styles, personal values, career experiences, knowledge of other disciplines and anticipated areas for future professional practice. The audit culminates in a Personal Learning Plan which provides a base line position for

planned, self-directed learning within the Course. The unit introduces research methodologies relevant for postgraduate study, social and evidence based research for professional practice.

SWN002 Trends, Challenges and Opportunities in Social Work

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit describes and analyses the characteristics of the contemporary social work sector. It provides an overview of current social work issues and places particular emphasis on the dynamic interplay of existing social, economic and political events and their implications for social work practice and institutional contexts. Employing the AASW Practice Standards, it reviews the nature and scope of the social work sector and workforce and describes contemporary generic methods of intervention and practice.

SWN003 Political Economy and Policy Making

Pre-requisites	SWN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK)

This unit recognizes the importance of political and economic factors for professional practitioners in the human service and social welfare sector. It describes and analyses the fundamentals of the Australian political system including the Parliamentary structures and law making processes at different levels of government. It explores the 'real politik' of political parties and vested interest groups in the political process giving particular attention to the development of policy. It provides an overview of public sector policy making process including the budgetary procedure. The unit encourages students to be active actors in relevant political / economic processes.

SWN004 Professional Communication Skills

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit builds the fundamental communication skills essential for professional social work within a diversity of practice settings. It pays particular attention to the needs of Indigenous peoples and clients from ethnically and cultural diverse backgrounds. It develops necessary skills in interpersonal dynamics, interviewing, empathic engagement, relationship building, insight, negotiation, advocacy and reflective practice. It acknowledges the need for professionals to be proficient in written and audio communications and ensures competence in the use of a range of contemporary information, communication and presentation technologies.

SWN005 Health, Wellbeing and the Human Condition

Pre-requisites	SWN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit considers the contested and changing understandings of human well being across the life cycle. Key aspects of wellness and health are examined for their impact on individuals, groups, and community well being. It explores selected psychosocial theories and looks at their utility for social work practice particularly in relation to mental health, child and family welfare, and disability services. The unit views health and well being from a holistic perspective, and critiques the dominant biomedical model and challenges perceptions that quality of life is determined merely by acquisition and consumption.

SWN006 The Ethical, Legal and Organizational Context of Practice

Pre-requisites	SWN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK); 2012 SEM-2 (BLK)

This unit locates social work practice within its ethical, legal and organizational context. It emphasizes the imperative for students to know, understand and actualize core social work values particularly those incorporated in the profession's national and international codes of conduct, professional standards and ethical practice requirements. The statutory and organisational dimensions of social work practice are described and explored with case scenarios providing opportunities to develop strategies for self management within diverse organisational contexts.

SWN007 Casework Practice

Pre-requisites	SWN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK)

This unit builds on the fundamental communication skills essential for professional social work case work and case management practice. It assists students to achieve professional levels in understanding and applying contemporary social work theories and principles which underpin case work and case management. The application of core principles that are essential in Social Work practice, such as client self determination and empowerment, are developed through experiential learning of skills including interviewing techniques, counselling, short term intervention, problem solving and facilitation of change.

SWN008 Group, Team and Community Work for Professional Practice

Pre-requisites	SWN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK)

This unit critically reviews the theory of group work, team work, and community work and explores the strategic use of each as an intervention method in professional practice. It requires students to develop and demonstrate high level skills for the effective use of each of these as intervention methods for addressing disadvantage and marginalisation. It focuses particularly on group, team and community engagement, and tests skills for capacity building, advocacy, negotiation, conflict resolution, project management, planning and leadership.

SWN009 Social Work Assessment and Intervention

Pre-requisites	SWN001
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK)

This unit extends students' skills developed in professional communication,

case, group, and community work, to apply assessment and intervention skills at the micro, messo, and macro levels of practice. The unit explores a range of assessment methods, intervention skills and a professional practice framework to interpret the particularities of the client's life circumstances. The practice skills of assessment, planning, intervention, make decisions and judgments, solve problems, and promoting change at the relevant level of practice to enhance client well being are personalised in real life contexts.

SWN010 The Socio-Cultural Context of Professional Practice

Pre-requisites	SWN001
Credit Points	12
Campus	
Teaching Periods	2012 SEM-1 (BLK)

This unit locates professional practice within the socio – cultural context of Australia. It includes an historical and descriptive mapping of the Australian population giving particular attention to age, health, socio / economic, Indigenous, cultural and ethnic characteristics. The unit focuses on the history of Indigenous Australians and the profound cultural, social and economic consequences of colonisation and institutional racism. It emphasises the acquisition of cultural competence in particular in relation to Indigenous Australians. It employs a range of sociological analytical tools - power, authority, class, status, race and gender – to allow students to explore the structure of Australian society to promote principles central to social care professional practice including, well-being, the protection of human rights, the promotion of social justice and the empowerment of people.

SWN011 Professional Practice 1

Pre-requisites	SWN001 and SWN002 and SWN004 and SWN007 and SWN008. SWN007 and SWN008 may be studied in the same teaching period as SWN011
Credit Points	12
Campus	
Teaching Periods	2012 SEM-2 (BLK)

This Professional Practice unit requires students to complete 245 hours of professionally supervised, staff monitored, field practice in a period of not less than 40 days. In accordance with AASW requirements, students are required to engage in planned activities which may include: direct practice with individuals, groups and communities; service management; organisational development and system change; policy development, implementation and change; research and knowledge generation; education and professional development. This unit is one of three Professional Practice units. [Designated unit]

SWN012 Professional Practice 2

Pre-requisites	SWN001, SWN002, SWN004, SWN007, SWN008 and SWN011. SWN007, SWN008 and SWN011 may be taken concurrently
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (BLK)

This Professional Practice unit requires students to complete 245 hours of professionally supervised, staff monitored, field practice in a period of not less than 40 days. In accordance with AASW requirements, students are required to engage in planned activities which may include: direct practice with individuals, groups and communities; service management; organisational development and system change; policy development, implementation and change; research and knowledge generation; education and professional development. This unit is one of three Professional Practice units. [Designated unit]

SWN013 Professional Practice 3

Pre-requisites	SWN001 and SWN002 and SWN004 and SWN005 and SWN006 and SWN007 and SWN008 and SWN009 and SWN010 and SWN011 and SWN012 and SWN016
Credit Points	24
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (BLK), 2012 SEM-2 (BLK); 2012 SUM (BLK)

This Professional Practice unit requires students to complete 490 hours of professionally supervised, staff monitored, field practice in a period of not less than 40 days. In accordance with AASW requirements, students are required to engage in planned activities which may include: direct practice with individuals, groups and communities; service management; organisational development and system change; policy development, implementation and change; research and knowledge generation; education and professional development. This unit is the final of the three Professional Practice units. Details of activities, requirements, standards, learning outcomes, supervision and other arrangements are set out in SWN011 Professional Practice 1: Guidelines, Standards and Outcomes which incorporates provisions of the AASW Education and Accreditation Standards, AASW Practice Standards for Social Workers: Achieving Outcomes and the AASW Code of Ethics. Designated unit.

SWN014 Developing Social Work Practice Frameworks

Pre-requisites	SWN011, SWN012 and SWN013. SWN013 may be taken concurrently.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-2 (INT); 2012 SUM (BLK)

This unit focuses on student's appreciation of practice and the building of a professional practice framework that integrates knowledge, skills, values, client needs and organizational settings. It requires students to articulate their framework, and to reflect on and recognize the differences between that professional framework and their personal values, assumptions, beliefs and attitudes.

SWN015 Transition to Social Work Practice

Pre-requisites	SWN013 can be studied in the same semester.
Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (EXT), 2012 SEM-2 (INT); 2012 SUM (BLK)

This unit commences with a staff mentored process which engages each student in a reflective professional / personal audit of their skills, knowledge and values against AASW standards. It provides a number of flexible, individualised learning opportunities for students to identify and work on competencies that are required for preferred social work positions and career aspirations. Students review their Personal Learning Plans and transform these into a Continuing Professional Education Plan. They finalise and present their EPortfolio in a social work job interview scenario.

SWN016 Human Development and Behaviour

Credit Points	12
Campus	Kelvin Grove
Teaching Periods	2012 SEM-1 (INT)

SWN017 Social Work Practice - Frameworks and Transitions

Pre-requisites	SWN011 and SWN012 and SWN013. SWN013 can be enrolled in the same teaching period as SWN017
Credit Points	12
Campus	Kelvin Grove

UDB100 Urban Development and Sustainability

Equivalents	DEB100,ENB100
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces you to the essential professional skills and practises common to the fields and disciplines of urban development. Through this unit you will have an opportunity to develop and demonstrate professional knowledge in your specialized area while also developing foundation academic and university skills that you will use to enhance and support your further studies. Concepts relating to professional practice, ethics, information management and sustainability will be addressed through-out the unit. Information from this unit will be consolidated in UDB200.

UDB101 Stewardship of Land

Equivalents	CNB105
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This interdisciplinary unit will introduce students to the characteristics of land and land tenure with a focus on land use and property rights. The particular issues of native title, land contamination, heritage and alternative utility will be covered. Thereafter the property development process will be described in general terms and emphasis placed on the impact of environmental and social factors on the financial evaluation. The final component will cover the management of land, both urban and regional. Case studies will demonstrate the part that each discipline plays in the stewardship of land and its development.

UDB102 Applied Law

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Introduces the fundamental principles and practices of Australian governance as they affect the built environment professions. The relevance of government policies, laws and regulations and aspects of Tort, Contract and Land and Environmental laws applicable to the Development and Construction processes are examined in context.

UDB104 Urban Development Economics

Equivalents	BSB113,BSD113
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will introduce microeconomic and macroeconomics concepts applied to urban and regional development. The unit will initially focus on demand, supply and determination of prices, and other important microeconomic concepts, at the level of an individual development. Here, the value of microeconomics in explaining aspects of development is demonstrated using local and national examples. In doing so, this unit will also help to deepen the appreciation of the key steps in development and the role of the main actors. Since anyone development project does not occur in a vacuum, the unit will then broaden to consider the impact of changes in the national and local economy on land use and development, including business cycle, monetary and fiscal policy.

UDB110 Residential Construction and Engineering

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

You learn to read plans and build a house by studying construction theory and legislation, visiting building sites, and sketching construction details. Focus on the four traditional methods of construction, brick veneer, cavity brick, block and timber, evolution of building, Building Code of Australia and Australian Standards; methods of construction; foundation and footings; linings; claddings; windows; doors; joinery; staircases; roof coverings; balanced cut and fill; services; retaining walls; acoustic and fire safety requirements; specifications for residential construction; protection to the public during construction; temporary support and demolition of structures; energy efficiency design; building defects and failures.

UDB111 Engineering Construction Materials

Equivalents	CNB102
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The choice of material and the reliance on the material being “fit for purpose” is essential to the success of the building project. This unit provides you with an introduction to building materials. We will cover the structural and non structural materials used in the construction process and focus on the basic properties, construction applications, behaviour, strength, durability, suitability, and limitations.

UDB112 Professional Studies 1

Pre-requisites	UDB110
Equivalents	CNB109
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Assignment-based project orientated group work where you design and document a new dwelling preparing a full design of a single level brick-veneer type dwelling to a standard appropriate for building approval including architectural and structural design; construction materials; building services; statutory obligations and the building approval process; measuring and cost planning; contract administration; construction planning and site layout.

UDB113 Measurement 1

Pre-requisites	UDB110
Equivalents	CNB110
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the scope of the role of the quantity surveyor working independently and for contractors. It examines the tendering process and the bill of quantities; the Australian standard method of measurement (rules, taking-off

methodology, mensuration and formulae); measurement of various work sections (finishes, roofing, partitions, woodwork, metalwork, painting, doors, windows, glazing, hardware, suspended ceilings and masonry).

UDB140 Property Valuation 1

Equivalents	CNB194
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides an introduction to property valuation fundamentals including value principles and concepts, market data and the methods of valuation, with particular focus on the valuation of residential property.

UDB141 Building Studies

Pre-requisites	UDB110
Anti-requisites	UD40MJR-CONSMGT-Construction Management Major, UD40MJR-QUANSRV - Quantity Surveying Major
Equivalents	CNB290
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

You learn to read plans and build a house by studying construction theory and legislation, visiting building sites, and sketching construction details. Focus on the four traditional methods of construction, brick veneer, cavity brick, block and timber, evolution of building, Building Code of Australia and Australian Standards; methods of construction; foundation and footings; linings; claddings; windows; doors; joinery; staircases; roof coverings; balanced cut and fill; services; retaining walls; acoustic and fire safety requirements; specifications for residential construction; protection to the public during construction; temporary support and demolition of structures; energy efficiency design; building defects and failures.

UDB161 Introduction to Planning and Design

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to basic principles of planning and urban design. Students learn about urban design principles such as legibility, permeability, robustness and imageability of places. Students also investigate the planning issues facing cities and consider the complex problem-solving skills required to respond to these.

UDB162 History of Built Environment

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit uses examples from the global development of human settlement to demonstrate the importance of interactions between the environment, society, and technology in shaping the built environment. Students will gain an appreciation of the important role played by history in forming the context for contemporary society, policy making, and design.

UDB163 Land Use Planning

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The purpose of this unit is to examine the planning and management of public and private land. Unit topics include: different performance and prescriptive zoning methods; an overview of levels of planning agencies responsible for land use planning in Queensland; and the land development process and regulations that govern land use planning.

UDB164 Population and Urban Studies

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the students to the demographic, economic, social and physical aspects of our cities to help understand the nature of cities we live in. The topics covered include: demographic and economic changes in cities, theoretical models of cities, issues such as social diversity, gentrification, masterplanned communities, and public spaces in cities.

UDB181 Geospatial Positioning and GPS

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will introduce students to skills and knowledge of spatial referencing, site measurement; use of maps and air photos. It will include introduction to map projections; concepts and theory of Global Positioning Systems; introduction to global and local coordinate systems; mission planning and data collection. The unit will highlight the importance of geospatial positioning applications in society.

UDB182 Surveying

Equivalents	PSB640
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides a foundation in field instrumentation and survey computations; a framework for acquisition of a high level of knowledge and practical competence in plane survey computations; use of optical and electronic theodolites; EDM and total electronic station systems, and a focus on collection/presentation of pre-design contour and detail spatial information.

UDB200 Project Planning in Urban Development

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will enable you as a graduating Built Environment and Engineering professional to take active and positive steps to transform professional practice in ways that promote the sustainability of our planet, our economy and our society. As future professionals in the fields of Design, Urban Development and Engineering Systems, you will need to understand and apply the concepts of sustainability in your professional practice if we are to achieve sustainable development in the 21st Century.

UDB202 Business Skills

Equivalents	CNB228
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit focuses on career preparation with a business orientation. Current popular business tools are assembled and critiqued. A sequential approach is used starting with characteristics of the Resume, business protocol and ethics,

the business plan, assessing business risk and Professional Liability.

UDB210 Commercial Construction and Engineering

Pre-requisites	UDB110
Equivalents	CNB107
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The aim of this unit is to provide you with extensive theoretical knowledge to manage and supervise the construction of (1) low rise residential apartment buildings (2) commercial buildings i.e. shops, offices; and (3) industrial buildings. Focus on legislative requirements; on-site inspections; site management techniques; temporary works & construction plant requirements, labour; In-ground construction; External treatments (cladding); formwork; bracing and stability; services co-ordination; Landscaping; . Environmental, building defects,. disabled access; universal design; load-bearing masonry; services co-ordination; internal fit-out; tilt panel construction; portal/steel frames.

UDB211 Introductory Structural Engineering

Pre-requisites	UDB111 (can be enrolled in the same teaching period)
Equivalents	CNB108
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Structural engineering analysis examining structural principles, structural action, load paths and equilibrium. Structural characteristics are examined through first principles including tension, compression, bending and shear forces. Quantitative, qualitative techniques and approximate methods are used as well as the use of computer software in structural analysis.

UDB212 Measurement 2

Pre-requisites	UDB113
Equivalents	CNB204
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Measurement is a core skill among building professionals. This skill is particularly important in relation to the production of quantified documents for the purposes of tendering and estimating. This unit covers the following: measurement of various work sections (concrete, formwork, reinforcement, groundworks, underpinning, tanking, structural steelwork, exterior elements, and bored piers); and the development and application of builders' quantities.

UDB213 Construction Estimating

Pre-requisites	UDB110,UDB113
Equivalents	CNB305
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Estimating techniques to quantify cost; Fundamental elements of cost and methods of evaluating labour, materials and equipment to realistic levels of accuracy; Unit rate approach to assessing the base estimate for major trades; Assessment of offers from sub-contractors and implications for tendering with respect to risk, quality and ethical responsibilities; Functional estimating and the significance of method, time and assembly of information to estimating; Review of an estimate, determination of profit; letters of offer; Subsequent negotiations prior to award of a contract; application of estimating to variations and profit monitoring; Linking best value procurement assessment to outcome performance indicators (including tender evaluation criteria).

UDB214 Professional Studies 2

Pre-requisites	UDB112 or BEB200 or ENB200
Equivalents	ENB274
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Assignment-based project orientated group work where you design and document a commercial development from a project management perspective considering constructability drawing on your skills in estimating; planning; scheduling; site organisation; environmental planning & sustainable urban development. Focus on special construction techniques; reuse of buildings and building materials; durability of materials, minimisation and disposal of construction waste; construction practice; planning and use of appropriate forms of construction for various building sizes and types; community negotiations; statutory responsibilities including access for people with a disability .

UDB215 Building Services Engineering

Equivalents	CNB203
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Fire Services: Fire detection, suppression and extinguishment; statutory requirements for maintenance of essential active fire services; Hydraulics Services: Building hydraulic services including water supply, fire protection and sanitary waste disposal systems. Mechanical Services: Air movement; Types of ventilation; Air-conditioning systems and heating; Installation procedures and the issue of confined spaces; Basis of design and effect of architectural style; Electrical Services: Transformers, sub-stations, switchboards, protection devices, lighting systems, stand-by generators, security systems; systems monitoring and energy management; vertical transportation systems. Energy Efficient Services: Examination of energy efficient design on services.

UDB216 The Environment and the Quantity Surveyor

Equivalents	CNB209
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will involve professional quantity surveying including image and status, fees, codes of ethics, professional competence and continuing professional development. In terms of employment, professional engagement in the workplace will be covered including terms of engagement, professional indemnity insurance, quality assurance and financial asset management. The work of quantity surveying takes place within a social and environmental context and this relates to the interactions between business and environmental interests including the natural environment, environment economics and ecologically sustainable development.

UDB240 Planning Theory and Processes

Anti-requisites	UD40MJR-URBPLAN - Urban and Regional Planning Major
Equivalents	CNB295
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is an introduction to the fundamental principles of urban planning control and regulation in Queensland. Property economists need to be aware of the history, development and current impact of planning regulation on property development and investment. This unit covers current development planning approval, assessments, conditions and appeals processes. Integration of economics, equity and social responsibility which include conservation and heritage protection and its impact on development and land are also discussed.

UDB241 Property Law 1

Equivalents	CNB191
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

A practicing property professional requires an understanding of real property law in order to optimise the utility of property assets and therefore the value of property assets. This unit covers aspects of real property law which impact on professional property practice in Queensland.

UDB242 Property Valuation 2

Pre-requisites	UDB140
Equivalents	CNB292
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

An understanding of valuation methodologies relating to commercial property assessment is central to the work of any property professional. This unit develops an understanding of the various methodologies and the application of these valuation methodologies to practical scenarios. This unit also further develops an understanding of the various market sectors and how the market impacts on the value of a property asset.

UDB243 Property Economics

Pre-requisites	UDB104
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The unit will relate macro and micro economics to the broad property markets. It will consider the practical impact of supply and demand factors on the different market sectors. The nature and complexities of property cycles are covered with specific reference to commercial and industrial property in Australia.

UDB244 Property Law 2

Equivalents	CNB193
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

A practicing property professional needs a good understanding of several areas of law as it applies to property transactions and property practice to be able to manage and avoid risk, identify legal issues as they arise and identify when specialised legal counsel is necessary. This unit focuses on extending and applying the theoretical knowledge obtained in UDB102 and UDB241 to explore how the common law and relevant legislation is applied to property practice and property transactions. The unit covers areas of torts law, contract, agency, consumer protection and dispute resolution as applicable to a practicing property professional in Queensland.

UDB245 Urban Land Studies

Pre-requisites	UDB243
Equivalents	CNB291
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of the unit is to take the students' fundamental knowledge of economic theory developed in earlier units and to apply that knowledge to the specific area of urban development. In particular we seek to develop in students an awareness of those economic imperatives which drive and shape urban form.

UDB246 Property Feasibility Studies

Pre-requisites	UDB242
Equivalents	CNB392
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Property economists play an important role in advising on the investment worth of property. As such the unit introduces students to assessment of property as an investment asset taking into account financing and taxation arrangements in addition to risk and return measures.

UDB247 Property Valuation 3

Pre-requisites	UDB241 and UDB242
Equivalents	CNB391
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

It is part of the role of a Property Valuer to perform valuations for statutory purposes and to represent those valuations in the capacity of an expert witness. It is imperative that you have the necessary knowledge to undertake statutory valuations and have an understanding of the role of a Valuer as an expert witness. This unit will enhance the knowledge and skills you have developed in prior valuation units and apply this in the statutory and special use property valuation context.

UDB265 Site Planning

Pre-requisites	UDB161
Equivalents	PSB431
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The objective of this unit to assist students in learning and applying site planning theories and processes for a given site/areas within a city. The topics covered include: user stakeholder analysis, character analysis, site survey and site analysis, development of proposals.

UDB266 Planning Processes and Consultations

Pre-requisites	(UDB163 and UDB164) or ENB274 or DE40MJR-LNDARCH - Landscape Architecture Major
Equivalents	PSB433
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Students learn how land uses are generated and can be planned. They study the logic, role and methods of successive stages of planning processes including aims, information analysis and synthesis, evaluation, strategy development, monitoring and review.

They learn how to consult widely in the community and with other professionals to develop and apply flexible and widely relevant planning processes.

UDB267 Development Assessment and Infrastructure

Pre-requisites	UDB163 or DE40MJR-LANDARC - Landscape Architecture Major
Equivalents	PSB445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide students with a grounding in the issues and skills related to the assessment of development applications and planning related to infrastructure. The unit will be conducted in two sections. The first will introduce students to the relevant legislation, procedures, and techniques associated with development assessment. The second will give students an understanding of issues related to the provision and maintenance of technical and social infrastructure, with particular reference to the importance of sustainability and the emergence of new technology and systems.

UDB281 Geographic Information Systems

Equivalents	PSB631
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit investigates the basic concepts of geographic information systems. Topics to be covered include components of GIS, spatial databases, data acquisition, reference frameworks, use of photographs and images, spatial analysis and graphic output design issues. The unit will highlight the importance of geographic information systems the unit will highlight the importance of geospatial positioning applications in society.

UDB282 Remote Sensing

Equivalents	PSB655
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: history and principals of remote sensing; types of imagery, image interpretation, satellite systems; supervised and unsupervised image classification; interpretation, analysis and presentation of data; applications in the earth sciences.

UDB283 Surveying Computations

Pre-requisites	(MAB100 or MAB120) and UDB182
Equivalents	DBB646
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the use of advanced scientific calculators and their application for geometric computations, solution of road and area problems, missing data closes, and simple curve problems. It offers solutions for more difficult problems including the three point problem, interrupted bases and various types of curve problems. It introduces spherical trigonometry, the solution of spherical triangles and the use of spherical trigonometry to determine position and direction on the Earth's surface from observation to astronomical objects. Practical exercises determine position and direction.

UDB284 Engineering Surveying

Pre-requisites	MAB101, UDB182, and UDB283
Equivalents	PSB641
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes: horizontal and vertical alignment for route surveys; areas, volumes and earthworks; surveying measurements and their assessment; propagation of variances; pre-analysis of survey tasks; least squares adjustment methods for various functional and stochastic models.

UDB285 Cadastral Surveying

Pre-requisites	UDB182
Equivalents	PSB620
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes land title systems, reinstatement: an explanation of the options of land title systems, with particular reference to Customary Land Tenure, Private Deeds registration, Public Deeds Registration, and Registration of Title. It includes an analysis of reinstatement of property boundaries as applicable to Queensland; the undertaking of a field survey to reinstate the boundaries of a section in the Brisbane Metropolitan area; preparation of cadastral and detail survey plans for survey actions; the legal aspects of re-instatement of boundaries; case law associated with re-instatement; statutory requirements that relate to the zoning and development of land.

UDB301 Research Methods

Pre-requisites	Completion of 216cp in UDB units
Equivalents	CNB395
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Research Methods will introduce students to the range of methods and techniques that may be utilised in examining questions related to professional practice. A comprehensive overview of research methods will be provided in order that students are able to contribute to research as a part of their professional practice, and to enable them to critically analyse research findings and publications.

UDB302 Development Process

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit brings together concepts gained on strategic evaluation, risk, time management, organisational behaviour, planning, construction and development feasibility analysis. It places this knowledge in a total project context and provides you with an understanding of the processes involved in property development from conception to completion and beyond.

UDB310 Highrise Construction and Engineering

Pre-requisites	UDB210
Equivalents	CNB201
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Students learn how to construct a high rise structure from the basement to the roof. Focus on protection to the public during construction, temporary support; demolition; temporary services; deep excavation and foundations; retention and shoring systems; structural components;

multilevel formwork; interaction of building components, systems and services; common building faults and failures and rectification; alternative forms of external cladding; waterproofing problems.

UDB311 Structural Engineering Design

Pre-requisites	UDB111 and UDB211
Equivalents	CNB202
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Study and analysis of engineering components and systems, to develop a sound understanding of how a building achieves structural stability and equilibrium through its load paths. Content includes: Basic structural member design for tension, compression, bending and shear loads through detailed examination through the use of relevant Australian Standards as the basis for examination. Emphasis is on approximate or “first order of magnitude” techniques suitable for estimating or checking purposes. Structural systems analysis; including trusses and retaining walls with a mix of qualitative and quantitative techniques. Construction stability is examined in detail including cranes, shoring, scaffolding, and slings.

UDB312 Contract Administration

Equivalents	CNB302
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The administration of construction contracts represents one of the core applications for both construction managers and quantity surveyors. In order to appreciate some of the commercial implications of contract administration you will study administrative implications for both parties to the contract.

UDB313 Programming and Scheduling

Equivalents	CNB335
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit covers the following: Project time and resource planning techniques such as bar charts, critical path networks (precedence, time scales, and activity on arrows); Line of balance; Resource allocation and levelling; Schedule updates and progress control; Delays and claims analysis. Applications of computer-based project planning software will form an important part of the study in this unit.

UDB314 Statutory Construction Law

Pre-requisites	UDB110, UDB210, UDB310, and UDB215
Equivalents	CNB309
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Commercial Law. Sale of goods; Hire purchase; Trade practices; Negotiable instruments; Insurance law; Partnership law and company law; Bankruptcy and liquidation; Arbitration (the agreement, appointment of an arbitrator; Conduct of an arbitrator; Powers and duties; Enforcement of an award, costs; Alternative dispute resolution. Building Law; Study of the Building Code of Australia and Building Regulations, which control the design, construction of building works; emphasis on all building law; a study of the Acts Interpretation Act, Town Planning Acts; etc.

UDB315 Measurement 3

Pre-requisites	UDB212
Equivalents	CNB310
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Measurement is a core skill among building professionals. This skill is particularly important in relation to the production of quantified documents for the purposes of tendering and estimating. This unit covers measurement of building services (hydraulics, drainage, electrical and mechanical works).

UDB316 Cost Planning and Control

Equivalents	CNB307
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Interrelationship between construction industry and economy; Fundamental principles of cost management (design and construction cost planning and cost control); Nature and purpose of cost planning and cost control systems; Contract costing (historical accounting) and anticipatory (forecast final cost / value); Design economics, cost and value concepts, cost information systems, cost modelling, cost analyses, cost indices, cost data, cost implications of design variables; Life cycle costing and modelling including design knowledge in virtual environments; Value management, including energy efficiency in buildings, and value alignment process for project delivery; Asset management and building maintenance; Risk management in cost planning and cost control.

UDB340 Agency Practice and Marketing

Equivalents	CNB294
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Property sales and leasing are the starting point of any property development, property investment and is also the basis of all valuation analysis. This unit provides students with an understanding of the role of real estate agents in respect to property sales and lease negotiation and demonstrates the relevance and interaction of units such as property valuation, property law and planning in property sales and leasing.

UDB341 Property Finance

Equivalents	CNB297
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Property is a major asset class of available investment options. Due to its distinct characteristics, debt and equity financing plays a major role in investment decisions. As such, the unit develops students’ understanding of property investment and financing techniques and the place of property assets within the capital markets.

UDB342 Real Estate Accounting and Taxation

Anti-requisites	BSB110
Equivalents	CNB293
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides the opportunity for

students to develop basic financial accounting, cost and management accounting and financial management skills, all within the context of the property industry. In addition, students will learn principles involved in accounting for Real Estate Trust Accounts, and various taxation aspects related to property transactions.

UDB344 Property and Asset Management

Pre-requisites	UDB242
Equivalents	CNB393
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

With an increasing number of companies and institutions now leasing property rather than direct ownership, the management of these assets is becoming a crucial aspect of business practice. This unit will cover the physical and financial aspects of commercial, retail and industrial property management and the role of property as a strategic real estate asset. The area of Corporate Real estate and Asset management will also be covered in the unit.

UDB368 Urban Design

Pre-requisites	UDB265
Equivalents	PSB451
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This studio unit develops skills in urban design analysis and intervention through the transformation of urban design theory into policies and design proposals. Students are introduced to the production of urban design instruments (such as strategies and frameworks) and effective communication of desired urban design outcomes. Where possible, students participate in live projects, with inputs from industry, government and communities.

UDB369 Negotiation and Conflict Resolution

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces planning students to the theory and practice of negotiation and conflict resolution. The aim is that students will develop their ability to change their perspective on conflict by seeing it as an inevitable and sometimes valuable part of planning. Students will learn to develop empathy for those they are in conflict with while also communicating their own needs assertively. Content includes key principles of conflict resolution, and practical mediation/negotiation techniques.

UDB370 Environmental Planning and Management

Pre-requisites	(UDB265 and UDB368) or (ENB274 or DLB600 or DAB525)
Equivalents	PSB462
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces environmental planning and management issues, policies, and methods relevant to your future practice as a planner, engineer, designer, or other built environment professional. As part of a multi-disciplinary team, you will participate in investigation of a contemporary case study, engaging in creative problem-solving and synthetic thinking incorporating skills and knowledge from prior units framed within new perspectives. By the end of the unit, you will have a firm grasp on a range of current environmental planning and management issues, and a framework for assimilating and addressing environmental policy in your future practice.

UDB381 Geospatial Mapping

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide the student with a sound knowledge and understanding of image mapping principles (including photogrammetry) and processes as well as practical skills and understanding required to collect spatial information and to produce fundamental mapping products. In addition this unit will provide the skills and knowledge of the principles and characteristics of cartographic communication, surface modelling techniques and digital mapping.

UDB382 Photogrammetric Mapping

Pre-requisites	UDB383
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit builds upon the Geospatial Mapping unit to provide the student with developed knowledge and understanding of photogrammetric mapping theory and processes including spatial geometry, mathematics and aerotriangulation. The unit will also provide the student with an integrated knowledge and understanding of map production principles and practice applied to photogrammetric outputs.

UDB383 Control Surveying and Analysis

Pre-requisites	MAB730
Equivalents	PSB642
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: reconnaissance for geodetic surveys (formulate mathematical models for the solution of linear and non-linear positioning in one, two and three dimensions); geodetic observations techniques and reduction of observations; the three classical methods of geodetic surveying (triangulation, trilateration and traversing); precise levelling including instrument testing; properties of the meridian ellipse; radii of curvature, meridian arc; spheroid as a geodetic reference surface, latitude, longitude, geoid separation and ellipsoidal height; mutual conversion of geodetic and Cartesian coordinates.

UDB384 Geodesy

Pre-requisites	UDB383
Equivalents	PSB643
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit contains the following theory: concept and classification of geodesy, the basic concepts of Earth's gravity field, level surfaces and plumb lines, heights, geoid, mean sea level, spherical harmonics etc, fundamentals of satellite geodesy, reference coordinate systems. It considers GPS positioning models and algorithms, software, GPS field observing, various GPS applications in geomatics; mapping terms and definitions; the mapping problem; principles for deriving

projections; the use of skew graticules; the UTM system.

UDB385 Cadastral and Land Management

Pre-requisites	BEB200 or UDB200
Equivalents	CEB259
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces the student to the basic civil engineering design processes and procedures associated with the development of subdivided urban/rural land for residential, industrial or commercial purposes. The unit covers the following: subdivisional road design types, hierarchy, longitudinal and cross sections, earthworks; stormwater design, basic urban hydrology, catchment properties, rational formula, pipe/gully parameters, pipe and open channel flows; water reticulation system features; sewer reticulation system features and basic design procedures. Modern trends in the above (including sustainability considerations) together with the general construction procedures and basic costings are introduced.

UDB387 Spatial and Land Information Management

Pre-requisites	UDB281
Equivalents	PSB612
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides you with an understanding of the spatial data infrastructure that will increasingly underpin decision making in diverse areas of development including resource management; urban and rural planning; cadastral administration and facilities management. The unit will provide an introduction to the concepts of a spatial data system planning overview, system implementation, and standards, legal issues, and knowledge-based techniques.

UDB388 Spatial Analysis Practice

Pre-requisites	UDB281
Equivalents	PSB654
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit expands a student's knowledge in the field of spatial information science within the framework of a practical exercise focussing on advanced spatial analysis techniques. This approach facilitates exposure to and the incorporation of emerging processes of acquisition, validation, storage, extraction, analysis and presentation of spatial information. A geographic information system environment is utilised to provide a practical introduction to industry practices and client expectations. This unit will provide students with enhanced knowledge of the extent, theory and practice of spatial information science and an enhanced ability to define and solve problems associated with manipulation of spatial information systems to meet client expectations.

UDB410 Construction Management

Pre-requisites	UDB310 or Admission into BN85 or Admission into UDBXSMJ-CONSMGT
Equivalents	CNB336
Credit Points	12
Campus	Gardens Point

UDB410 is a capstone construction management unit bringing together all the skills you have learnt so far in your UD40 construction management course. Construction Managers require a strategic focus on site management, business and corporate responsibilities to manage time, cost, quality and safety on a construction project. UDB410 Construction Management is the last of a series of construction units UDB110, UDB210, UDB310 and consolidates skills students have learned throughout their degree to advance to a work-ready construction manager.

UDB420 Project Administration

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit provides an introduction into project administration in the building construction industry. It will prepare you for the administrative and contractual interactions that occur between the Contractors and Sub-contractors during a project.

UDB441 Advanced Valuation and Market Analysis

Pre-requisites	UDB140 and UDB242 and UDB247
Credit Points	12
Campus	Gardens Point

This unit provides you with the opportunity to research and apply advanced valuation and market analysis techniques to a range of property scenarios. The unit is an advanced unit in the property applications minor and allows you to build on the foundations of valuation and property economics theory and practice that were introduced to you in prior units. This unit is designed to develop a more advanced range of skills and knowledge prior to transitioning to a role as a property professional.

UDB442 Rural Property Valuation and Investment

Pre-requisites	UDB242
Credit Points	12
Campus	Gardens Point

Rural property in Australia and internationally is a major contributor to export income and GDP. An understanding of the value of rural property is an important requirement for valuers, property investors and funds managers who have rural property in their investment .portfolios. An important aspect of rural property and rural property valuation is the link between management and productive value, these issues, together with the rural land valuation process, will be covered in the unit.

UDB471 Urban Planning Practice

Pre-requisites	UDB266
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Students develop skills of interpretation and problem solving to plan the development of a locality or suburb with a population of up to fifteen thousand. Consulting with local governments, communities and stakeholders, and working in supervised multi-disciplinary teams, they produce a real-world local area plans, integrating a wide range of housing, access, work, play, community, cultural and environmental concerns.

UDB472 Community Planning

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Students gain information on the many issues involved in community planning, including affordable housing, environmental quality and design, employment, human services, community access and culture. Combining this with knowledge and skills acquired earlier in the course, they learn to produce solutions and formulate policies which link government policy to local outcomes. This involves community involvement, consultation and conflict resolution.

UDB473 Planning Theory and Ethics

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The application of theory to practice defines the essence of planning. The unit explores the historical and contemporary theories of planning; links the relationship of theory to practice; defines the role of ethics in planning practice; and aids the student in developing his or her own theoretical and ethical foundation for planning practice.

UDB474 Regional Planning Practice

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Students develop and apply the knowledge of policy formulation and skills of analysis and synthesis imparted in Regional and Metropolitan Policy, to real world problem-solving at a scale which is larger than a single local government. This culminating practice unit concentrates on the broader regional and metropolitan scales to develop skills in strategic-level planning.

UDB475 Regional and Metropolitan Policy

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Students learn to focus and apply material from a wide range of disciplines and locations to understand and develop current regional and metropolitan policy. Issues of global, national and state regionalism, demography, economics, human services, central place theory, regional resource evaluation and public administration are related to work in the Regional Planning Practice unit.

UDB483 Global Positioning Principles and Practice

Pre-requisites	UDB383 and UDB384
Equivalents	PSB644
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit includes the following: GPS operation and navigation messages; GPS observable and error budget; differencing techniques; GPS positioning models and algorithms; software; GPS field observing; static, kinematic, RTK and various GPS applications in geomatics. It also includes a practical on the GPS network.

UDB484 Topographic, Hydrographic and Mining Surveying

Pre-requisites	UDB383
Equivalents	PSB645
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: field surveys for DTMs as-constructed surveys; associated specifications and standards; mining surveying for surface and below surface mining activities; Hydrographic surveying for exploration and port management.

UDB485 Property Development Practice

Pre-requisites	UDB302 and UDB385
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit develops your knowledge and capability to engage in a professional manner with land and property development practice. Land development issues dealt with in preceding units are bought together in this final semester unit to prepare you to fulfil your professional role in the practice of land and property development. This unit will further develop the practical skills necessary for the preparation of lot reconfiguration plans suitable for sealing and registration with appropriate organizations.

UDB486 Cadastral Practice

Pre-requisites	UDB285
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit includes the following: property rights as a method of resource control; creating and maintaining knowledge of property rights, including issues concerned with parcel identifiers, land tenure, land boundaries, land subdivision, land registration, changing rights through statutory changes, attitudes and responses of the public; evidence of property rights; evolution from customary land tenures to land registration systems; factors leading to breakdown of systems; effects of technological change on land use; evolving property rights and obligations; information technology and land use controls; procedures of the various departments including but not confined to, the Department of Lands, Resources Industries.

UDN500 Ballast, Sleepers and Fasteners

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT)

As a rail civil engineer you will have responsibility for the permanent way and so needs to have a sound knowledge and clear understanding of the behaviour of the components of rail tracks. The ballast and sleepers on which the rails rest are critical in supporting the safe passage of trains at speed over the track. A large proportion of maintenance expenditure by track owners arises because of fouled or poorly drained ballast or from sleeper replacement. Delays in train schedules, track closures and even derailments can arise due to problems in the track below the rail. This unit is one of the first ones you will study in this course because it focuses on the foundations of an efficient and safe track asset network.

UDN501 Rail and Related Track Structures

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT)

This unit continues the recognition of the need for you as a rail civil engineer to have a sound knowledge and clear understanding of the behaviour of the components of rail tracks. The rail is the immediate interface between train vehicle and the entire supporting system and therefore the most direct effect on enabling or inhibiting train operations. Aside from ballast and sleeper rectification described in UDN500, the costs of rail wear and grinding, eventual replacement of worn rail and rectification of track geometry make up the bulk of maintenance expenditure by the track owner. In conjunction with UDN500, this unit is located early in the course so that you will have been introduced to the nature of all the key elements of the track superstructure and of their important contributions to the operation of rail systems.

UDN502 Track Stability, Design and Formation

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT)

Simply knowing about the components from which railway track is assembled will not enable you to understand and influence the complex interactions between each of those components. Design of railway tracks requires you to build on that component knowledge from UDN500 and UDN501 by considering how they influence each other and what limitations they have in carrying forces applied by operational or by environmental factors. The unit also provides some further foundation knowledge to enable you to understand the forces of interaction between the whole track and passing trains that will be explored later in UDN503.

UDN503 Track Geometry and Train Interaction

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT)

The sole purpose of track is to support the safe and speedy passage of trains carrying passengers, minerals, freight, primary produce and so on. Although tracks can deteriorate due to environmental factors, the primary source of deterioration is the passage of trains. Operators want trains to carry larger and larger payloads at ever higher speeds, which induce increasingly large static and dynamic forces in the track. Those forces deteriorate the track which leads to a rougher ride for the trains, causing even higher dynamic forces down into the track and up into the vehicle. This unit is intended to provide you with an understanding of the interaction between track and trains, which builds on and develops your knowledge of the track structure from UDN500, UDN501 and UDN502, explains aspects of vehicle design, and provides you a basis for appreciating how incidents such as derailments occur when you come to study UDN505.

UDN504 Track Construction, Civil Structures

Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT)

There will be much more responsibility for you as a railway civil engineer than understanding and maintaining the track in the permanent way. Construction of new track and reconstruction of existing track must be able to be managed by you with insight and competence, requiring an appreciation of contracts and their administration, together with an ability to assess construction and geotechnical risks and specify appropriate construction processes. Furthermore, the rail corridor or right-of-way also has within it various structures that need management of their construction and of their maintenance. This unit addresses these issues and is located later in the course to enable you to gain a good grounding in track and train related matters in earlier units.

UDN505 Assets, Environment and Safety

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

UDN510 Urban Planning Practice

Equivalents	UDB471, DBP409
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

As an Urban & Regional Planner, you need skills to understand, analyze, interpret and optimize urban activities and land uses. You require capacities to prepare integrated plans and strategies to solve problems and promote beneficial development. This will involve consultation with local governments, communities and stakeholders. This unit provides you with practical experience to develop and apply these skills of integrated urban planning.

UDN512 Community Planning

Equivalents	UDB472, DBP411
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Planners work with a wide range of communities and therefore need to understand and address an equally wide range of issues and concerns. Community planning offers an inclusive approach based on participatory processes that can match this comprehensive array of responsibilities.

UDN514 Regional Planning Practice

Equivalents	UDB474, DBP413
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

As the culminating practice unit in the course, Regional Planning Practice focuses on regional and metropolitan scales to develop your capacities for larger scale, strategic-level planning. In doing so, the unit provides opportunities to further develop and apply wide-ranging skills of analysis, problem-solving and synthesis introduced and explored earlier in Planning Processes and Regional and Metropolitan Policy to real world situations.

UDN516 Master Concepts and Ethics Seminar

Equivalents	UDB473
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit provides the integrating core to the Masters Program in Urban & Regional Planning. Discussions link professional practice to its wider contemporary contexts. .In order to derive full benefit from your advanced studies as a Masters student, you will exchange views on ideas and practice with each other and with experienced practitioners and academics. The application of concepts to practice defines the essence of planning and provides important insights that enable the planner to respond to critiques from

other disciplines or project partners. Concepts provide planners with opportunities for reflection and self-evaluation and justification for shaping their own roles in the profession. By helping you to understand the forces shaping the profession, they add depth to the practitioner and better enable the planner to contribute fully to the advancement of the profession.

UDN551 History of the Built Environment

Equivalents	UDB162
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit uses examples from the global development of human settlement to demonstrate the importance of interactions between the environment, society, and technology in shaping the built environment. Students will gain an appreciation of the important role played by history in forming the context for contemporary society, policy making, and design.

UDN552 Population and Urban Studies

Equivalents	UDB164
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces the students to the demographic, economic, social and physical aspects of our cities to help understand the nature of cities we live in. The topics covered include: demographic and economic changes in cities, theoretical models of cities, issues such as social diversity, gentrification, masterplanned communities, and public spaces in cities.

UDN553 Site Planning

Equivalents	UDB265, PSP268
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

The objective of this unit to assist students in learning and applying site planning theories and processes for a given site/areas within a city. The topics covered include: user stakeholder analysis, character analysis, site survey and site analysis, development of proposals.

UDN554 Planning Processes and Consultations

Equivalents	UDB266, DBP402
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Students learn how land uses are generated and can be planned. They study the logic, role and methods of successive stages of planning processes including aims, information analysis and synthesis, evaluation, strategy development, monitoring and review. They learn how to consult widely in the community and with other professionals to develop and apply flexible and widely relevant planning processes.

UDN555 Development Assessment and Infrastructure

Equivalents	UDB267
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The aim of this unit is to provide students with a grounding in the issues and skills related to the assessment of development applications and planning related to infrastructure. The unit will be conducted in two sections. The first will introduce students to the relevant legislation, procedures, and techniques associated with development assessment. The second will give students an understanding of issues related to the provision and maintenance of technical and social infrastructure, with particular reference to the importance of sustainability and the emergence of new technology and systems.

UDN556 Development Process

Equivalents	UDB302
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit will address the development process within the framework of a multi-disciplinary activity focusing on a practical exercise for the preparation and lodgement of a development application. This framework will expose students to the manner within which sustainable land development should occur. The unit relies on and brings together, within the practical exercise, the knowledge and skills-set exposed to students in earlier units dealing with stewardship of land, sustainability and economics. The focus on the practical exercise will demonstrate in context the multi-disciplinary range of social, economic and ecological issues that practicing land development professionals need to understand and apply to demonstrate the comparative benefits and likely success of a development proposal.

UDN557 Urban Design

Equivalents	UDB368
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This studio unit develops skills in urban design analysis and intervention through the transformation of urban design theory into policies and design proposals. Students are introduced to the production of urban design instruments (such as strategies and frameworks) and effective communication of desired urban design outcomes. Where possible, students participate in live projects, with inputs from industry, government and communities.

UDN558 Regional and Metropolitan Policy

Equivalents	UDB475, DBP414
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Students learn to focus and apply material from a wide range of disciplines and locations to understand and develop current regional and metropolitan policy. Issues of global, national and state regionalism, demography, economics, human services, central place theory, regional resource evaluation and public administration are related to work in the Regional Planning Practice unit.

UDN572 Infrastructure Planning and Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

It is essential for professionals practicing in the field of infrastructure to understand what is infrastructure, the basic principles of infrastructure planning, condition assessment, monitoring of the condition of the asset, maintenance strategies, funds requirement, life cycle costing, annual budgeting for maintenance and rehabilitation, and prioritising

maintenance strategies for optimum return on investment.

UDN574 Water Resource and Waste Management

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit will provide you with an in-depth understanding of the important issues in water and waste management within the urban environment and particularly the infrastructure management discipline. The management of water and waste are among the essential factors which influence the economic, social and environmental viability of urban areas. In most parts of the world including Australia, water is a limiting resource. The prudent management of the diverse water sources available, the provision of water 'fit for purpose' to meet human and ecosystem needs and the adoption of strategies for optimising of conveyance infrastructure is critical for the long-term sustainability of human settlements. The development and management of systems for the collection, transport and re-use and disposal of various waste streams forms an important activity to ensure the sustainability of urban areas.

UDN576 Transportation Infrastructure

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit has been developed to provide you with an in-depth understanding of the critical issues in the area of transportation infrastructure. The effective management of transportation infrastructure is essential for economic and social considerations. As expansion and development of transportation infrastructure continues to support a nation's economy, prudent management of transportation infrastructure to provide a desired level of serviceability are critical for the long-term sustainability of economic development.

UDN590 Project Scope and Risk Management

Equivalents	UDZ590, CNP521
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit focuses upon the project management functions of controlling project scope and risk. Using the fundamentals of project management as a point of departure, the administration of scope and risk is integrated within the context of the project life cycle. Both the client and project delivery stakeholders' perspectives are explored. Scope Management is the foundation of a project. Developed on a clarified scope baseline, Risk Management safeguards the whole process, as well as the outcome of a project. Through this unit, you will develop skills in outlining activities to be performed within a project, including procedures for information capture, storage, reporting and communication, and risk identification, response and treatment system.

UDN592 Resource, Schedule and Performance Management

Equivalents	UDZ592
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Resources and time are key performance targets during project management exercises. By undertaking this unit, you will develop skills necessary to manage project cost, schedule, and resources, and the ability to appreciate and apply methodologies for monitoring and evaluating project performance.

UDN594 Procurement and Delivery Strategies

Equivalents	UDZ594
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

It is imperative that project managers have a comprehensive understanding of all of the critical elements within the procurement process. They also need to possess the necessary skills, knowledge and understanding to avoid disputes and minimize the risks of unsuccessful contract outcomes. This unit will cover these essential elements of project management.

UDN596 Human Resource and Organisational Culture

Equivalents	UDZ596
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

In the management of projects, it is essential that human resources are effectively coordinated, managed and motivated to achieve the collective and individual outcomes critical for the success of the project. This unit introduces you to the skills necessary to manage these human resources as part of your overall project management approach.

Table A: Student contribution bands for Commonwealth supported students

The cost of your 2012 units is based on the field of education classification of each unit of study. Units are grouped on the basis of their field of education into four bands. We set a student contribution rate for each of the four bands.

If you have been offered a Commonwealth supported place in a course of study you may be covered by different contribution amounts depending on when you commenced. You will be charged in accordance with the year you commenced your course:

Students who commence in 2010, 2011 or 2012

To see the actual contribution costs for your units and their EFTSL value view the alphabetical list of units or refer to your course structure in course information.

2012 Student Contribution bands for Commonwealth supported students

The bands are indicative only. The actual contribution may vary depending on the units in your course. These bands show the student contribution required for one equivalent full-time student load or 96 credit points of study, if all units were taken from that band. The actual amount of your student contribution will depend on the EFTSL value of your individual units within your course.

Band	Field of Education Classifications	Student contribution charge
Band 1	Education, nursing, visual and performing arts, behavioural science, social studies, foreign languages and humanities	$5,648
Band 2	Computing, built environment, other health, allied health, engineering, surveying, agriculture	$8,050

Band	Field of Education Classifications	Student contribution charge
Band 3	Accounting, administration, economics, commerce, law, dentistry, medicine and veterinary science	$9,425
Band 4 National priority	Mathematics, statistics, science	$4,520

Fee changes in 2010

Education and Nursing units are charged as Band 1 from 1 January 2010.

Am I a 2010, 2011 or 2012 student?

You are a 2010/2011/2012 student if you commenced your course of study in a Commonwealth Supported Place on or after 1 January 2010.

Students who commenced in 2009

Students who commence in 2009

2012 Student Contribution bands for Commonwealth supported students

The bands are indicative only. The actual contribution may vary depending on the units in your course. These bands show the student contribution required for one equivalent full-time student load or 96 credit points of study, if all units were taken from that band. The actual amount of your student contribution will depend on the EFTSL value of your individual units within your course.

Calculate the cost of your units using the calculation table

Band	Field of Education Classifications	Student contribution charge
Band 1	Visual and performing arts, behavioural science, social studies, foreign languages and humanities	$5,648
Band 2	Computing, built environment, other health, allied health, engineering, surveying, agriculture	$8,050
Band 3	Accounting, administration, economics, commerce, law, dentistry, medicine and veterinary science	$9,425
Band 4 National priority	Mathematics, statistics, science, education and nursing	$4,520

Fee changes

Education and Nursing units are charged as Band 1 from 1 January 2010.

Am I a pre-2010 student?

Students who commenced their course of study prior to 2010 are considered 'Pre-2010 students' and continue to be charged for Education and Nursing units as Band 4: National Priority (as above).

You are a pre-2010 student if you:

- started your course of study prior to 31 December 2009
- have not completed your course at 31 December 2009
- are not a pre-2008 CSP student
- are not a pre-2009 CSP student
- you are undertaking a unit in education or nursing.

Eligible students will be charged the lower (pre-2010) maximum student contribution amount when undertaking units from these funding clusters.You will still be considered a pre-2010 student if, from 2010 you meet the requirements and you:

- transfer between higher education providers
- are in a pre-2010 Commonwealth supported place, discontinue your course, then recommence the same course or a new course
- undertake a course after completing an enabling course for which you were eligible as a pre-2010 student
- complete a course for which you were eligible as a pre-2010 student and then undertake an honours course.

To be considered as a pre-2010 student please complete an Application to be considered as a pre-2008, pre-2009 or pre-2010 Commonwealth Supported Student (PDF file, 181.88 KB).

Students who commenced in 2008

2012 Student Contribution bands for Commonwealth supported students

The bands are indicative only. The actual contribution may vary depending on the units in your course. These bands show the student contribution required for one equivalent full-time student load or 96 credit points of study, if all units were taken from that band. The actual amount of your student contribution will depend on the EFTSL value of your individual units within your course.

Calculate the cost of your units using the calculation table

Band	Field of Education Classifications	Student contribution charge
Band 1	Visual and performing arts, behavioural science, social studies, foreign languages and humanities	$5,648
Band 2	Mathematics, statistics, science, computing, built environment, other health, allied health, engineering, surveying, agriculture	$8,050
Band 3	Accounting, administration, economics, commerce, law, dentistry, medicine and veterinary science	$9,425

Band	Field of Education Classifications	Student contribution charge
Band 4 National priority	Education and nursing	$4,520

Fee changes

Mathematics, Statistics and Science units are charged as Band 4: National Priority from 1 January 2009.

Am I a pre-2009 student?

Students who commenced their course of study in 2008 are considered 'Pre-2009 students' and continue to be charged for Mathematics, Statistics and Science units as Band 2 (as above).

You are a pre-2009 student if you:

- started your course of study prior to 31 December 2008
- are not a pre-2008 CSP student
- are not transferring in 2009 to a natural and physical science course of study
- are studying a unit in mathematics, statistics or science funding cluster. Eligible students will be charged at the higher (pre-2009) maximum student contribution amount when undertaking units in this funding cluster.

You will still be considered a pre-2009 student if, from 2009, you meet the requirements, and you:

- transfer from one course of study to another, except if you are transferring from a non-Natural and Physical Science course to a Natural and Physical Science course
- transfer between higher education providers
- are pre-2009 eligible in a Commonwealth Supported place and discontinue course and recommence same course or a new course
- undertake a course after completing an enabling course for which you were eligible as pre-2009 CSP student
- complete a course for which you were eligible as a pre-2009 CSP student and undertake the honours course.

*If you commence a course of study that is not a Natural and Physical Science course before 2009 and transfer to a Natural and Physical Science course you will be charged for units undertaken in mathematics, statistics and science as Band 4: National Priority.

Note: A pre-2008 student may also be eligible as a pre-2009 student if they commence a Natural and Physical Sciences course in 2009.

To be considered as a pre-2009 student please complete an Application to be considered as a pre-2008, pre-2009 or pre-2010 Commonwealth Supported Student (PDF file, 181.88 KB).

Students who commenced prior to 2008

2012 Student Contribution bands for Commonwealth supported students

The bands are indicative only. The actual contribution may vary depending on the units in your course. These bands show the student contribution required for one equivalent full-time student load or 96 credit points of study, if all units were taken from that band. The actual amount of your student contribution will depend on the EFTSL value of your individual units within your course.

Calculate the cost of your units using the calculation table.

Band	Field of Education Classifications	Student contribution charge
Band 1	Visual and performing arts, behavioural science, social studies, foreign languages and humanities	$5,648
Band 2	Accounting, administration, economics, commerce, mathematics, statistics, science, computing, built environment, other health, allied health, engineering, surveying, agriculture	$8,050
Band 3	Law, dentistry, medicine and veterinary science	$9,425

Band	Field of Education Classifications	Student contribution charge
Band 4 National priority	Education and nursing	$4,520

Fee changes

Accounting, administration, economics and commerce units are charged as Band 3 from 1 January 2008.

Am I a pre-2008 student?

Students who commenced their course of study prior to 2008 are considered 'Pre-2008 students' and continue to be charged for accounting, administration, economics and commerce units as Band 2 (as above). The arrangements for pre-2008 students apply until the end of 2012.

You are a Pre-2008 student if you:

- started or continued your course of study in a Commonwealth supported place between 1 January 2005 and 31 December 2007; and
- have not completed your course at 31 December 2007; and
- are studying a unit in the accounting, administration, economics or commerce funding cluster. Eligible students will be charged the lower (pre-2008) maximum student contribution amount when undertaking units in this funding cluster.

You will still be considered a pre-2008 student if, from 2008, you meet the requirements, and you:

- transfer from one course of study to another (including where one course of study is postgraduate and the other is undergraduate)
- transfer between Higher Education providers
- discontinue or complete your studies from 2008, and subsequently enrol in a Commonwealth supported place in 2009 (or any year up to 2012)
- undertake a course after completing an enabling course for which you were eligible as a pre-2008 CSP student
- complete a course for which you were eligible as a pre-2008 CSP student and then undertake an honours course.

To be considered as a pre-2008 student please complete an Application to be considered as a pre-2008, pre-2009 or pre-2010 Commonwealth Supported Student (PDF file, 181.88 KB).

If you think you're eligible for transitional arrangements for your course of study, please complete an Application to be considered as a pre-2008, pre-2009 or pre-2010 Commonwealth Supported Student.

Table B: Domestic Tuition Fee

View the cost of individual units to determine the 2012 course fee. Domestic tuition fees are determined at the unit level taking into account the principal subject matter of the unit and the level of study. The aggregation of the cost of units undertaken in 2012 will determine the 2012 fee for the course. The table below outlines the framework for domestic tuition fees.

Note: Special rates apply to certain units offered to study abroad students, in offshore courses, QUT International College courses, or courses customised for corporate delivery. If you can't find your unit in this list, email Student Fees for more information.

Field of Education Classifications	Rate per credit point 2011	Rate per credit point 2012
Law, accounting, administration, economics, commerce	$114 - $366	$116 - $373
Humanities	$153	$156
Mathematics, statistics, behavioural science, social studies, education, computing, built environment, other health	$153 - $245	$156 - $250
Education	$153	$156 - $179
Clinical psychology, allied health, foreign languages, visual and performing arts	$153 - $245	$156 - $250
Nursing	$153 - $186	$156 - $190
Engineering, science, surveying	$153 - $262	$156 - $257

Field of Education Classifications	Rate per credit point 2011	Rate per credit point 2012
Dentistry, medicine, veterinary, science, agriculture	$311	$317
Research thesis (normally PhD) exceeded maximum time	$19369 - $24061 per EFTSL	$19756 - $24542 per EFTSL

Table C: International Student Tuition Fee

International student tuition fees are determined at the unit level taking into account the principal subject matter of the unit and level of study. The aggregation of the cost of units undertaken in 2012 will determine the 2012 fee for the course.

Some courses have special rates approved (eg those undertaken at the QUT International College). Any other course is charged at the individual unit level.

Note: Special rates apply to certain units offered to study abroad students, in offshore courses, QUT International College courses, or courses customised for corporate delivery. If you can't find your unit in this list, email Student Fees for more information.

Course information includes an indicative cost per semester. This is calculated as an average over the whole course using the most common units in which students enrol. The application for admission fee for award courses is $55.00 (incl. GST).

International students should also read the International Student Fee and Refund Policy.

Courses with special rates

Course Code	Course Title	Teaching period	2011 Fee	2012 Fee
BS40	University Diploma of Business	Semester	$8436	$8436
IF06	University Diploma in Professional Communication	Semester	$8436	$8436
IT10	University Diploma in Information Technology	Semester	$8436	$8436
QC01	Foundation - 1 semester	Semester	$7873	$7873
QC02	Standard Foundation - 2 semesters	Semester	$7873	$7873
QC04	Extended Foundation - 2.5 semesters	Block	$17,321	$17,321

Course Code	Course Title	Teaching period	2011 Fee	2012 Fee
QC05	University Certificate in Tertiary Preparation (Formerly Bridging)	Semester	$7873	$7873
QC10	English for Academic Purposes - 12 weeks	Semester	$4320	$4320
QC15	IELTS Preparation	Block	$5400	$5400
QC20/QE05	General English - 5 week block (Incorporating components QE10, QE15, QE20, QE25, QE30, QE35, QE40 and QE45 for multiple 5 week blocks.)	Block	$1800	$1800
QC22	English for Tertiary Preparation - 2 weeks	Block	$720	$720
QC24	English for Academic Purposes plus	Block	$8640	$8640
QC25	Cambridge First Certificate Preparation Course - 12 weeks	Semester	$4320	$4320
UO80	University Study Abroad Certificate	1 Semester	$9450	$9450
UO90	University Study Abroad Diploma	2 Semesters	$18,900	$18,900

Cost of individual units

View the cost of individual units to determine the 2012 course fee. The table below outlines the framework for international tuition fees.

Field of Education Classifications	Rate per credit point 2011	Rate per credit point 2012
Law, accounting, administration, economics, commerce	$230-$442	$222-$378
Humanities	$213-$224	$217-$228

Field of Education Classifications	Rate per credit point 2011	Rate per credit point 2012
Mathematics, statistics, behavioural science, social studies, education, computing, built environment, other health	$230-$235	$235-$257
Clinical psychology, allied health, foreign languages, visual and performing arts	$218-$252	$222-$257
Education	$230-$235	$235-$240
Nursing	$213-$252	$224 - $257
Engineering, science, surveying	$240-$262	$245 - $262
Dentistry, medicine, veterinary, science, agriculture	$311	$317
Research thesis (normally PhD)	$21,919 - $26,611 per EFTSL	$22,357 - $27,143 per EFTSL

Table D: Domestic Undergraduate Non-award Tuition Fee

To view 2012 Domestic Undergraduate Non-Award Tuition Fee charges please refer to Table B: Domestic Tuition Fee.

Table E: Summer Program Tuition Fee and Commonwealth supported courses with Summer as Normal Progression

In accordance with Department of Education, Employment and Workplace Relations (DEEWR) policy from 1 January 2005, a student who is advised that they are to be Commonwealth supported for a unit during QUT's Summer Program will pay the student contribution amount in accordance with those applicable for the year the census date falls.

More information about Summer semester enrolment

This table does not include International Student Tuition Fees.

Summer Program Tuition fees	Units with a census date in 2011/2012
Students enrolled in existing fee-paying courses (postgraduate)	Refer to Table B
Students enrolled in existing fee-paying courses (undergraduate)	Refer to Table B
QUT Commonwealth supported students enrolled in a Commonwealth supported unit over summer	Refer to Table A
QUT Commonwealth supported students enrolled in a Tuition Fee paying unit over summer	Refer to Table B
Visiting and cross institutional students	Refer to Table F

Table F: Visiting Student Tuition Fee

To view 2012 Domestic Visiting Student Tuition charges please refer to Table B: Domestic Tuition Fees.

In accordance with Department of Education, Employment and Workplace Relations (DEEWR) policy from 1 January 2005, a student who is advised that they are to be Commonwealth supported for a unit during QUT's Summer Program will pay the student contribution amount for the year in which the unit census date falls. The rates for 2011/2012 Summer Program are:

- Sum 1: student contribution rate for 2011
- Sum: student contribution rate for 2011
- Sum 2: student contribution rate for 2012

Table L: Student Services and Amenities Fee

Fee rates

From 2012 we will be charging the fee to:

- domestic undergraduate coursework students
- domestic postgraduate coursework students

International, higher degree research, corporate award, and non-award students are exempt from the fee in 2012 and 2013. External units will also be excluded in 2012 and 2013.

The fee will be charged from 1 July 2012 per enrolled credit point. Invoice due dates will align with your tuition fee due dates.

For 2012 the charge is $2.73 per credit point. This table shows example charges per unit:

Credit point value	Charge
6 credit points	$16.38
12 credit points	$32.75
24 credit points	$65.50
48 credit points	$131

The maximum charge for the half-year period 1 July 2012 to 31 December 2012 is $131. The fee will be indexed annually.

Payment of the fee

Eligible students will be able to defer the fee through a loan scheme called SA-HELP.
