Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Your degree at a glance

Year 1

You will build a base of broad business knowledge through the core units, covering all areas of business from finance, accounting and economics through to marketing and data analysis. You will develop generic skills in all areas, and gain an understanding of how businesses operate within the commercial and legal environment. Your focus on management begins in your second semester, when you'll start to develop skills in strategy, leadership and internationalisation.

Year 2

Building upon your broader business knowledge, you'll learn how critical analysis and strategic thinking assists management in challenging old viewpoints. You will learn about the importance of sustainability and change in organisations operating within complex environments. Opportunities will be provided to investigate the functional role of operations management designed to add value in productivity through allocating all the resources needed to produce a product. You will also be introduced to innovative and entrepreneurial thinking to enhance your business planning capabilities. The choice of a second business study area or an extended major in management will begin to steer your future career direction.

Year 3

In the third year you both integrate and further expand your knowledge into strategic management and operations management through the project approach to management. You will investigate how companies seek advantages over their industry competitors. You will consolidate your learning and extend yourself, developing analytical-thinking and decision-making skills. Working as individuals and in groups, you will develop a project management plan, fusing your knowledge of technical and social-cultural aspects of the organisation developed throughout the major. Defining the project, addressing the challenges of time, costs and risk you will decide the ways and means to effectively and efficiently use human and non human resources to reach the project's goals and those of the organisation.

Professional recognition

Graduates may be eligible for membership of a number of professional bodies depending on choice of major and units.

Management major, second major and extension – Students will meet the requirements for membership of the Australian Institute of Management.

Choice of campus

You may choose to complete your business degree at Gardens Point or Caboolture campus, majoring in Management.

Other majors

See also separate entries for other majors in this course: Accountancy, Advertising, Economics, Finance, Human Resource Management, International Business, Marketing, and Public Relations.

Your degree at a glance

Year 1

You will build a base of broad business knowledge through the core units, covering all areas of business from finance, accounting and economics through to international and electronic business. With generic skills in all areas, you will gain an understanding of how businesses operate within the commercial and legal environment. Your marketing major will commence in second semester, investigating why consumers buy products and how they make purchase decisions.

Year 2

Building your knowledge of consumer behaviour, you will gain skills in conducting consumer and audience research and learn how market research informs corporate and strategic decision making. You will investigate the part technology has to play in developing new products for consumers, and learn how e-marketing can help companies compete in a global market. You will also have the opportunity to personalise your degree with the selection of a second study area.

Year 3

You will round out your major by finding out how marketing decisions contribute to the strategic success of any business. Opportunities to apply your knowledge to real-world scenarios include producing a marketing plan in a simulated environment which allows you to apply your marketing decision making skills and assess the results. You may also have the opportunity to complete an industry placement to gain valuable work experience.

Campus options

You may choose to complete your business degree at Gardens Point or Caboolture campus, majoring in Marketing.

Professional recognition

Graduates may be eligible for membership of a number of professional bodies depending on choice of major and units.

Marketing first and second major and extension – Students may meet the requirements for membership of the Australian Marketing Institute, the Marketing Research Society of Australia, the Australian Institute of Management, the American Marketing Association and the Australian Institute of Export.

Other majors

See also separate entries for other majors in this course: Accountancy, Advertising, Economics, Finance, Human Resource Management, International Business, Management, and Public Relations.

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Your degree at a glance

Year 1

You will build a base of broad business knowledge through the core units, covering all areas of business from finance, accounting and economics through to marketing and global business. With generic skills in all areas, you will gain an understanding of how businesses operate within the commercial and social environment. You will begin your studies in public relations in the second semester, with an introduction to founding principles, an overview of the profession, and an insight into the future of public relations practice in contemporary organisations.

Year 2

You will build knowledge and skills in public relations techniques, learning how to write and prepare public relations tactics and tools such as media releases, social media programs, and events for real-world clients. In doing so, you will develop a portfolio of public relations materials to show potential employers. You will also build skills in public relations planning, allowing you to identify the best practices of public relations by analysing successful public relations campaigns from Australia and around the world. You will also have the opportunity to personalise your degree with the selection of a second study area.

Year 3

Acting as an internal adviser, you will explore corporate communication issues for organisations and track contemporary issues through case studies. You will also take the role of a public relations consultant, advising a real-world client on their problem or opportunity. Working in partnership with other students to form a consulting team, you will prepare a campaign plan to present to your client. Your writing skills will be further developed through your campaign portfolio. Work placements are also available to match your interests in consultancies, government, corporate settings and community groups.

Professional recognition

This course is accredited by the industry's peak professional body, the Public Relations Institute of Australia (PRIA), providing graduates access to professional education and career opportunities. QUT maintains strong links with this body, in which a number of our teaching staff hold executive positions.

Practical teaching

The practical nature of this major means that you will graduate with a portfolio of work to demonstrate your skills to potential employers.

Third year project work is imperative to demonstrating the depth and breadth of skills you have accumulated throughout the course. This hands-on experience will give your career a vital kick start by bringing together the design, strategic planning and tactical preparation that underpins a real world public relations campaign.

Other majors

See also separate entries for other majors in this course: Accountancy, Advertising, Economics, Finance, Human Resource Management, International Business, Management, and Marketing.

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Entry requirements

International students must complete Australian Year 12 studies (or equivalent including International Baccaulearate) onshore.

International Subject prerequisites

- English

Mathematics is required for Accountancy, Finance, Economics and Marketing majors.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

To complete the Bachelor of Business (Dean's Honours), a student must successfully complete all parts listed below:

(a) Eight Business School Core units (96 credit points)
(b) One block of eight Major Core units (Study Area A) (96 credit points)
(c) One Minor of 4 units selected from a University-Wide unit set or a Business School extension (48 credit points)
(d) Four prescribed Option units undertaken during the Summer semester(48 credit points)

Students should note that not all minors are timetabled in every year or semester. Hence, due to the accelerated structure of the course, it is important you confirm that the minors you are interested in will be available.

Students will study five units (60 credit points) in each of the major semesters and an additional two units (24 credit points) in the Summer semesters.

Students who graduate from the Bachelor of Business with a GPA of 5.5 or higher will be eligible to enrol in the Bachelor of Business (Honours) (BS63).

Study areas

Study areas for this course are Accounting, Advertising, Economics, Finance, International Business, Human Resource Management, Management, Marketing, and Public Relations.

Special Course Requirements

Minimum GPA: It is expected that students maintain a minimum GPA of 5.5. If a student does not maintain a GPA of 5.5 it will be recommended that they return to the standard program, Bachelor of Business (BS05). (A GPA of 5.5 is required for entry to the Bachelor of Business (Honours) (BS63) program).

Breaks in Study: Due to the accelerated program breaks in study are not permitted. Students wishing to take a break from study will be advised to transfer to the standard program, Bachelor of Business (BS05).

Course progression: Due to the accelerated program students are expected to follow the course structure. Students wishing to deviate from the recommended course structure will be advised to transfer to the standard program, Bachelor of Business (BS05).

Advanced standing (credit)

Due to the accelerated nature of this program, advanced standing or credit for previous study is not permitted (with the exception of START QUT).

Professional recognition

Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. See each course major for details.

Bachelor of Business (Dean's Honours)

Further study
Students in the Dean's Honours (BS06) are expected to maintain a GPA 5.5 in order to be eligible for entry into the Bachelor of Business (Honours) (BS63) program.

For information on the Honours program, see the entry for BS63 Bachelor of Business (Honours) (BS63).

Campus options
This degree is available at Gardens Point campus only, however some units are offered at Caboolture campus. Students may enrol in Business units at Caboolture campus.

Deferment
Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more on deferment.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Entry requirements

International students must complete Australian Year 12 studies (or equivalent including international Baccaulearate) onshore to be eligible for this course.

International Subject prerequisites

- English

Mathematics for Accountancy, Finance, Economics and Marketing majors.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Study areas

Study areas for this course are Accounting, Advertising, Economics, Finance, International Business, Human Resource Management, Management, Marketing, and Public Relations.

Special course requirements

Breaks in study: Due to the accelerated nature of the program breaks in study are not permitted. Students wishing to take a break from study will be advised to transfer to the standard program, Bachelor of Business (BS05).

Course progression: Due to the accelerated nature of the program students are expected to follow the course structure. Students wishing to deviate from the recommended course structure will be advised to transfer to the standard program, Bachelor of Business (BS05).

Professional recognition

Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. See each course major for details.

Advanced standing (credit)

Due to the accelerated nature of this program, advanced standing or credit for previous study is not permitted (with the exception of START QUT).

Further study

Students in the Accelerated program (BS07) may choose to enrol in the Bachelor of Business (Honours) BS63 on completion of the degree with a GPA of 5.5.

For information on the Honours program, see entry for Bachelor of Business (Honours) (BS63).

Campus options

The degree is available at Gardens Point campus only, however some units are offered at the Caboolture campus. Students may enrol in Business units at the Caboolture campus.

Important Information

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet. Other useful information can be found on the Student Services website

Abbreviation

BBus(Study Area A)

Domestic Course structure

Course design

The Bachelor of Business (Accelerated Program) allows you to be flexible in your fields of study to suit your own needs and career aspirations. The three distinct components within the program will give you many combinations of study areas and minors, as well as opportunities to participate in internships, work placements, special topics or projects during summer.

(a) Eight Business School Core units (96 credit points)
(b) One block of eight Major Core units (Study Area A) (96 credit points)

(c) One Minor of 4 units selected from a University-Wide unit set or a Business School extension (48 credit points)
(d) Four prescribed Option units undertaken during the Summer semester as project or research units (48 credit points)

Students should note that not all minors are timetabled in every year or semester. Hence, due to the accelerated structure of the course, it is important you confirm that the minors you are interested in will be available.

Students will study five units (60 credit points) in each of the major semesters and an additional two units (24 credit points) in the Summer semesters.

Special course requirements

Minimum GPA: It is expected that students maintain a minimum GPA of 5.5. If a student does not maintain a GPA of 5.5 it will be recommended that they return to the standard program, Bachelor of Business (BS05). (A GPA of 5.5 is required for entry to the Bachelor of Business (Honours) (BS63) program).

Breaks in study: Due to the accelerated nature of the program breaks in study are not permitted. Students wishing to take a break from study will be advised to transfer to the standard program, Bachelor of Business (BS05).

Course progression: Due to the accelerated nature of the program students are expected to follow the course structure. Students wishing to deviate from the recommended course structure will be advised to transfer to the standard program, Bachelor of Business (BS05).

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Professional Recognition

Depending on the choice of majors, graduates of the Bachelor of Mass Communication may satisfy the academic requirements for membership of the Advertising Institute of Australia (AIA) and the Society of Business Communicators (SBC).

Course Design

Students commencing the Bachelor of Mass Communication must complete 24 units of equal weighting totalling 288 credit points comprised of
a. Business School Core (six Business School core units)
b. Major Core (two majors of six units each) and
c. Unit Options (six units).

Although studies can be tailored to meet a specific career goal or create a wide variety of career choices, there is a set of recommended combinations of majors. Students are not required to take these combinations, however they do represent the more common and logical choices within a mass communication qualification.
The recommended combinations are:
- Advertising and Public Relations
- Public Relations and Journalism
- Public Relations and Media and Communication
- Entertainment and Public Relations
- Entertainment and Media and Communication
- Journalism and Media and Communication.

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet. Other useful information can be found on the Student Services website

Domestic Course structure

Your course

Year 1

You will explore key concepts driving media and communication industries in the global new economy and be introduced to skills in your chosen professional areas of study including public relations, advertising, media and communication, journalism, and entertainment industries. You will apply your knowledge to communication activities and exercises which provide insight into the nature and scope of the industry sectors you will work in.

Year 2

Focusing on your major areas of study, you will undertake activities that enable you to apply your rapidly developing communication skills and knowledge of media industries. You will complete projects using industry-standard equipment and software, gaining experience in a range of tasks you will undertake as part of your professional life. You also begin to broaden your skill and knowledge base by selecting from a range of elective units.

Year 3

This capstone year focuses on the refinement of skills. Working individually and in teams, you will produce a portfolio of work, often for real-world clients, which showcases your project management, communication and creative talents. Work placement opportunities complement these activities and allow you to network with a range of industry leaders.

Discontinuation

Students should note that from Semester 1, 2007 this course has been renamed and recoded to IX38 Bachelor of Arts/Bachelor of Business. Therefore, there will be no further intake into this course, however, students who are currently enrolled, or have already been made an offer into this current course for 2007, are able to remain enrolled in it.

For course structure information on the new course, please refer to the new course.

Other Majors

See also the separate entry for the following majors in this course: Bachelor of Arts/Bachelor of Business (Advertising, Electronic Business, Human Resource Management, International Business, Management, or Public Relations).

Professional Recognition

Business component: Students may be eligible for a membership to a number of professional bodies depending on choice of major and unit selection. Click on the link for more information and enter " Bachelor of Business " in the Course Accreditation search field: http://www.qut.edu.au/study/courseinfo/accreditation/

Course Design

Students are required to complete 432 credit points comprised of 192 credit points from the Bachelor of Arts program and 240 credit points from the Bachelor of Business program.

Business component: Students must complete 96 credit points of Faculty Core Units with a 72 credit point Major, as well as a further 72 credit points from one of the following:

- Double Major (six units); or
- Extended Major (six units): or
- Specalisation (six units)

BA Course Requirements

BA Course Requirements (Years 1-4) Students are required to complete one Multidisciplinary Professional Major comprising 7 units in the chosen Major. The Multidisciplinary Professional Major may be chosen from International and Global Studies, Ethics and Human Rights, Society and Change, Community Studies or Australian Studies.

BA Course Requirements

In addition to a Multidisciplinary Professional Major, students may wish to:

- complete a Discipline Major (Geography, History, Languages, Social Science); or
- develop a Minor (48 credit points) in one of the interdisciplinary professional areas
- develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course or from the University wide Minors set
- take a series of elective units.

Students planning to complete a full Language sequence (6 units) will need to discuss their program with the relevant Course Coordinator in order to ensure that they begin their Language studies in first semester and that their language units can be continued into their third year.

NB: Students are required to complete 16 units in the BA component of the double degree.

Important Information for Business Students

Domestic Entry requirements

Course requirements

Working with Children Check: Blue Card

A Blue Card will be required if the placement component of this course involves working with children or young people. There's no cost if you apply through QUT.

Submit your Blue Card application to the QUT Student Centre as early as possible - ideally, as soon as you've received your offer.

If you don't receive your Blue Card before the start of a unit that requires contact with children, you may be unable to participate and your grades may be affected. You may also still have to pay fees for the unit.

How to apply for a Blue Card

First aid, Tuberculosis screening and Flu Vaccination

It is recommended that you complete a First Aid Certificate, Tuberculosis Screening and/or Flu Vaccination. However these are not mandatory.

Uniform

QUT School of Nursing polo shirt, navy blue trousers/long pants with pockets, and suitable footwear (black, brown or navy leather shoes with a non-slip sole) are required for this course. Students will need to cover this cost.

Uniform

A QUT T-shirt is required for Exercise and Movement Science and Clinical Exercise Physiology courses. Students will need to cover this cost.

Orientation camp

First year students have the option of attending an orientation camp.

Students will need to cover this cost.

Off-campus placements

Students are required to undertake off-campus placements and will need to cover travel and accommodation costs.

Clinical placements with Queensland Health

Students are required to complete the Deed Poll and Orientation Package before participating in clinical placement in Queensland Health facilities. Failing to do so may result in you not able to participate in clinical placement and your grades may be affected. You may still be liable to pay fees for the unit.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

Also assumed knowledge: one of Chemistry, Physics or Biology Recommended study: Health Education or Physical Education We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors requires 4 SA in Maths A, B or C.

International Entry requirements

Course requirements

Working with Children Check: Blue Card

A Blue Card will be required if the placement component of this course involves working with children or young people. There's no cost if you apply through QUT.

Submit your Blue Card application to the QUT Student Centre as early as possible - ideally, as soon as you've received your offer.

If you don't receive your Blue Card before the start of a unit that requires contact with children, you may be unable to participate and your grades may be affected. You may also still have to pay fees for the unit.

How to apply for a Blue Card

First aid, Tuberculosis screening and Flu Vaccination

It is recommended that you complete a First Aid Certificate, Tuberculosis Screening and/or Flu Vaccination. However these are not mandatory.

Uniform

QUT School of Nursing polo shirt, navy blue trousers/long pants with pockets, and suitable footwear (black, brown or navy leather shoes with a non-slip sole) are required for this course. Students will

need to cover this cost.

Uniform
A QUT T-shirt is required for Exercise and Movement Science and Clinical Exercise Physiology courses. Students will need to cover this cost.

Orientation camp
First year students have the option of attending an orientation camp.

Students will need to cover this cost.

Off-campus placements
Students are required to undertake off-campus placements and will need to cover travel and accommodation costs.

Clinical placements with Queensland Health
Students are required to complete the Deed Poll and Orientation Package before participating in clinical placement in Queensland Health facilities. Failing to do so may result in you not able to participate in clinical placement and your grades may be affected. You may still be liable to pay fees for the unit.

International Subject prerequisites
- Maths B
- English

Also one of Chemistry, Physics or Biology You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

Minimum english requirements
Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Overview
The four year Bachelor of Exercise and Movement Science/ Bachelor of Business combines the major elements of the single degrees in business and in exercise and movement science. It provides students with general business theory and skills and with both foundation knowledge in the exercise and movement sciences and their applications to health and wellness, or sport science and performance assessment.

Course Design
Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Exercise and Movement Science program and 192 credit points from the Bachelor of Business program.

Business: Students must complete the 96 credit points Business School Core Units in the Business program together with a 96 credit point Major.

Professional recognition
Business component: Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Pathways
Graduates can apply for admission to the HM44 Bachelor of Clinical Exercise Physiology if they should wish to achieve full Exercise Physiologist status.

Important Information for Business Students
QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet. Other useful information can be found on the Student Services website.

Further information
For information about this course, please call the School of Exercise and Nutrition Sciences on +61 7 3138 4831 or email exercise@qut.edu.au OR the QUT Business School 61 7 3138 2050 or email bus@qut.edu.au

Career Outcomes

Electrical and computer engineers design, install and maintain electrical, electronic, telecommunications and computing systems on behalf of governments and private companies. Graduates of the Bachelor of Business are skilled in many aspects of business including: accountancy, advertising, banking and finance, economics, electronic business, human resource management, international business, management, marketing and public relations.

Overview

Students combine engineering knowledge in electronics, computer systems, telecommunications and electric power with a business course majoring in one of accountancy, advertising, economics, finance, human resource management, international business, management, marketing or public relations.

Professional Recognition

This degree meets the requirements for membership of Engineers Australia.

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Special Course Requirements

A candidate for the degree of Bachelor of Engineering must obtain at least 60 days of industrial employment/practice in an engineering environment as part of the Work Integrated Learning unit, before graduating.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Course Design

Students are required to complete 480 credit points comprised of 288 credit points from the Bachelor of Engineering program and 192 credit points from the Bachelor of Business program. Students supplement the engineering component of this program with the 96 credit point Business School Core units in the Bachelor of Business program together with a 96 credit point Major in one of the following: Accountancy, Advertising, Economics, Finance, Human Resource Management, International Business, Management, Marketing or Public Relations.

Important Information

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet.
Other useful information can be found on Student Services website.

IMPORTANT NOTE

As of 2013, this course will only be available for continuing Bachelor of Applied Science/Bachelor of Business students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year Bachelor of Applied Science units.
New students - please refer to Bachelor of Science/Bachelor of Business. Please contact sef.enquiry@qut.edu.au for any enquiries.

Overview

Through the combination of science and business, you will equip yourself for an exciting career at the cutting edge of scientific innovation within a range of public, private and non-profit industries.

Your business degree will give you a broad base of commercial knowledge as well as the opportunity to major in a specific business area. This understanding of business makes you more attractive to employers, even if you wish to work predominantly in a science-based career.

Professional Recognition

Both degrees allow you to satisfy the requirements of membership of the relevant professional body for your chosen majors. Please refer to the relevant pages in this prospectus for details on your intended science major, and the QUT Business School prospectus for more information on business majors, or visit www.qut.edu.au/courses

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet.

Discontinuation

This course code has been discontinued and replaced by IX58 Bachelor of Business/Bachelor of Information Technology.
Currently enrolled students who wish to remain in, and graduate from the existing program will be permitted to do so up to the end of 2011. From Semester 1, 2012, all students will be enrolled in the new program.

Cooperative Education Program

The Coop Ed Program is a joint venture between employers and the Science and Engineering Faculty giving you the opportunity of 10-12 months paid industry placement to better prepare you for employment after you graduate. The Coop Ed Program integrates formal study and professional experience, so you can apply what you're learning in an area relevant to your chosen path.

Some of the organisations our Coop Ed students have worked with are the Australian Tax Office, Boeing Australia, CITEC, Department of Natural Resources and Water, Dialog, EPA, Queensland Police, RACQ and UNiTAB Limited.

Find out more about the Cooperative Education Program.

Course Design

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Business program and 192 credit points from the Bachelor or Information Technology program.

Business component: Students must complete the 96 credit point QUT Business School Core Units in the Business program together with a 96 credit point Major.

Professional recognition

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Graduates of the Bachelor of Information Technology meet the knowledge requirements for admission to the Australian Computer Society (ACS).

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the “Translation Unit Codes” column you are not permitted to enrol in the listed new code

Important Information for Business Students

QUT Business School rules and procedures are outlined in the QUT Business School Undergraduate Guidelines booklet.
Other useful information can be found on the Student Services website.

Overview

This program consists of 16 creative industries units and 16 business units which are integrated so that you will study units from both areas each semester. You will undertake the Bachelor of Creative Industries core units as well as one creative industries major from animation; art and design history; creative and professional writing; dance; digital media; drama; entertainment industries; fashion; film, television and screen; interactive and visual design; journalism, media and communication; literary studies; or music.

Your business degree provides you with a broad base of business knowledge, and you will choose a major from accounting, advertising, economics, finance, human resource management, international business, management, marketing or public relations.

Course Design

This course is made up of 384 credit points. Each component (i.e. Business and Creative Industries) comprises 192 credit points.

The Business component is made up of 96 credit points of Business School core units and 96 credit points of units from a Business major. The Business majors are accountancy, advertising, economics, finance, human resource management, international business, management, marketing, public relations. Accountancy students will complete 10 major units and 6 Business School core units in order to meet professional recognition requirements.

The Creative Industries component is made up of 96 credit points of core units and a Creative Industries major (96 credit points).

Professional Recognition

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more on deferment.

Domestic Entry requirements 2012 registrations have closed.

Registration for 2012 intake was due on the 23 September 2011 and have now closed. If had not registered and you are considering applying to study in 2013 we recommend you read the following information as a guide only as it details requirements for entry in 2012 and these may change prior to the 2013 intake.

Thank you for your interest in Fashion at the QUT Creative Industries Faculty.

To be considered for a place you must do two things.

1. Submit to the Creative Industries Faculty by the extended closing date of 14 October 2011. a Fashion 2012 Registration Forma copy of the QUTpay confirmation page from your online credit card payment for the $33 service charge (PLEASE NOTE: Q-Step and ATSI applicants are exempt from the service fee).a Portfolio with this Registration Form
2. Apply through QTAC by 30 September.
   (See the QTAC website for more information)

Interviews

Following the submission applicants will be shortlisted. QUT will be conducting interviews in November 2011. Should you be shortlisted you will be notified via email. Only submissions that include all the above stated requirements will be processed.

Offers

The portfolio assessment is managed by QUT Creative Industries; however, all offers for the course will be made through QTAC in the 15 December 2011 offer round.

The Portfolio - further details

Your Portfolio must contain three things.

1. Academic Records - include your most up-to date records.
2. Personal statement - A typewritten personal statement outlining your reasons for applying to this particular course, indicating your personal strengths and your future ambitions (max 300 words).
3. Maximum 20 single-sided A4 pages, which should include a range of examples that demonstrate your potential as a fashion designer. This could include but is not limited to: Good examples of your sketchbook work (to demonstrate your ability to research a topic and develop ideas based on that topic).Fashion design drawings (showing your ability to create fashion designs, based on research and a concept). We are looking for evidence of fabric awareness, colour, and 3D thinking.Selected photographs that show good examples of any garments you have made.

There is no one particular type of folio we are looking for, as long as you keep to the requirements of 20 single-sided A4 pages of your work. We are looking for something individual; a folio that expresses you, your talents and potential within the fashion industry. We would like to know what you think about fashion and what you like about fashion - or even what you don't like about fashion. Think of the folio as a way of introducing yourself to us - and showing us your creativity and thought processes. Show us what inspires you and excites you.

Do not send original documents, colour photocopies only please

Will my portfolio by returned?

You will need to provide with your registration form, a stamped, self-addressed envelope (appropriate to the size of the portfolio submitted) for your portfolio to be returned. Portfolio materials will only be returned to applicants that provide the envelope.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Entry requirements

Which Fashion courses require additional entry application?

- KK34 - Bachelor of Fine Arts (Fashion)
- IX35 - Bachelor of Business / Bachelor of Fine Arts (Fashion)

You must submit three things:

1. Academic Records - include your most up-to date records.

Domestic Entry requirements 2012 registrations have closed.

Registration for 2012 intake was due on the 23 September 2011 and have now closed. If had not registered and you are considering applying to study in 2013 we recommend you read the following information as a guide only as it details requirements for entry in 2012 and these may change prior to the 2013 intake.

Thank you for your interest in Visual Arts at the QUT Creative Industries Faculty. To be considered for a place you must both apply through QTAC and register directly with the Creative Industries Faculty through our Online Registration Form. Please read through the following information carefully to ensure you are prepared to apply at that time.

What is the closing date for additional entry registration with Visual Arts at QUT Creative Industries?

- You must register through the Online Registration Form with the Creative Industries Faculty by the extended closing date of 14 October 2011.
- You must also apply through QTAC, where the due date for on-time applications is 30 September. See the QTAC website for more information.

What are the additional entry requirements?

You must supply the following:

Academic record - A copy of your most recent report (it does not have to be your final end-of-year grades).

Portfolio - Maximum of 20 pages of images that best demonstrate your current art achievements, working processes, commitment and potential. Consider the "Qualities" we look for (listed below) when compiling your portfolio. It may contain photographs, slides, photocopies of sketches and journal pages (showing your planning and preparation for a project), printed digital images and/or short video excerpts (no more than 2 minutes each). For a paper-based portfolio, keep pages to a maximum of A4 size and do not include large folders. If you are including CD/DVD/uploaded images, the preferred format is either as a 'PowerPoint' or .jpg files. We prefer video that can be opened in 'QuickTime' and only samples of work are required. To ensure we will be able to open and view any digital media files, keep the file size to a minimum (i.e. under 5MB) PLEASE NOTE: We do NOT return portfolios, so do NOT include any original copies of your work or documentation.

Responses to a series of questions about your interest in visual art. These are essential. To lodge your responses, return to this site in early July to register online. Your responses to these questions are important - please answer them as specifically, carefully and informatively as possible.

- Are you planning to graduate as a studio artist, art teacher or other art industry professional? Please outline your career goals.
- What are you expecting to learn in a course of study in Visual Arts at QUT?
- Describe briefly which exhibitions and galleries you have visited in the past 12 months, and the art-related books/articles/reviews you have read, etc).
- Briefly list any group exhibitions, solo exhibitions, commissions and awards you have been included in, plus membership of art associations etc.
- What do you think is art's role in the twenty-first century? Outline briefly.

Service charge of $33 (GST inclusive) - This is to cover the costs of administration and insurance in processing applications, and is non-refundable. The service charge can be paid by credit card online with QUTPay. PLEASE NOTE: Q-Step and ATSI applicants are exempt from the service fee.

Passport style photograph

How do I apply?

To apply for this course, you must:

- Complete the Online Registration Form and print the confirmation pages;
- Post or deliver the confirmation pages with a passport-style photograph attached; a copy of your academic record; a copy of the QUTpay confirmation page from your online credit card payment for the $33 service charge; your portfolio (unless uploaded online);
- Apply for this course through QTAC. Please see the QTAC website for more information.

Please Note: Registering with QUT for assessment of your portfolio is separate and in addition to listing the course as a preference with QTAC. To successfully apply for entry into this course, you are

required to do both. The portfolio assessment is managed by QUT Creative Industries; however, all offers for the course will be made through QTAC in the 15 December 2011 offer round.

What qualities are QUT Creative Industries looking for?

- Overall, we seek indications of your ability to think creatively, to be open to new ideas and challenges, and of your potential to succeed in the course.
- We look for evidence of versatility, skill, enterprise, inventiveness and knowledge of contemporary art and culture/s. We are also looking for candidates who bring a wide range of interests and enthusiasms to their study area (e.g. film, literature, music, digital culture, etc.).
- We look at your artistic achievement - the level of investigation and familiarity with particular media, the degree of sophistication and sensitivity in handling media, evidence of industry, hard work, sustained practice and familiarity with visual media.
- We look for the degree of exploration of ideas and evidence of the development of ideas. Some carefully selected key documentation of preliminary plans, working sketches, journals and work in progress help us in this regard.
- We also look for evidence of artwork that is totally self-initiated (i.e. not necessarily part of a set study program) and an indication that you are determined to pursue art interests in a range of circumstances.

When and where are the interviews?

Shortlisted applicants will be contacted, and interviewed, during November. If you are called, you are not required to bring anything with you to this interview, but you should be prepared to respond to questions about your artwork and your future goals. Interviews are designed to further assess your suitability for the style of Visual Arts course that we offer and will also present an opportunity for you to ask any questions you may have about the course. Interviews will occur at the QUT Kelvin Grove campus.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Entry requirements

Thank you for your interest in Visual Arts at QUT Creative Industries Faculty. Please read the information below before submitting your application.

Which Visual Arts courses require additional entry application?

- KK34 - Bachelor of Fine Arts (Visual Arts)
- KK34 - Bachelor of Fine Arts (Visual Arts)/ED38 Graduate Diploma in Education (Senior Years)
- IX35 - Bachelor of Business/Bachelor of Fine Arts (Visual Arts)

What is the closing date for additional entry applications to Visual Arts at QUT Creative Industries?

There are no closing dates for international applicants. We encourage you to apply as soon as you decide on the course you wish to study, to help you with visa requirements.

What are the additional entry requirements?

You must supply the following:

Academic transcript from secondary and/or tertiary institutions

- Portfolio: Maximum of 20 images that best demonstrate current art achievements, working processes, commitment and potential.
- It may contain photographs, slides, photocopies of sketches and journal pages, printed digital images and/or short video excerpts (no more than 2 minutes each).
- Responses to a series of four questions about your interest in visual art. Your responses to these questions are important - please answer them as specifically, carefully and informatively as possible.

1. What attracts you to a course of study in Visual Arts?
2. Describe briefly what contact you have had with works of other artists (exhibitions, galleries you have visited, books/articles/reviews you have read, etc).
3. Summarise the types of visual arts activities in which you have participated (for example group exhibitions, solo exhibitions, commissions, awards, membership of art associations etc).
4. Describe aspects of art that you respond to, both positively and negatively.

What qualities are QUT Creative Industries looking for?

Overall, we seek indications of your ability to think creatively, and of your potential to succeed in the course.

We look for evidence of versatility, skill, enterprise, inventiveness and knowledge of contemporary art and culture/s.

We look at your artistic achievement - the level of investigation and familiarity with particular media, the degree of sophistication and sensitivity in handling media, evidence of industry, sustained practice and familiarity with visual media.

We look for the degree of exploration of ideas and evidence of the development of ideas. Some carefully selected key documentation of preliminary plans, working sketches, journals and work in progress help us in this regard.

We also look for evidence of artwork that is totally self-initiated (i.e. not necessarily part of a set study program) and an indication that you are determined to pursue art interests in a range of circumstances.

How do I apply?

Please send your Additional Entry requirements along with your F Form to QUT. You may post or e-mail your application.

Post to:
QUT Admissions
Victoria Park Road
Kelvin Grove, QLD 4059

Professional Recognition

Both degrees allow you to satisfy the requirements of membership of the relevant professional body for your chosen majors. Please refer to the relevant pages in this prospectus for details on the Bachelor of Mathematics and the QUT Business School prospectus for more information on business majors or visit www.qut.edu.au/courses

Financial Support

You should consider applying for an industry-sponsored mathematics bursary or a business scholarship to help you financially throughout your studies. For further information visit Scholarships.

Course Design

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Mathematics program and 192 credit points from the Bachelor of Business program.

Business component:
2009 and 2010 commencing students
• 7 Business School Core units (96 credit points)*
• 8 Major Core units (96 credit points)
• MGB223 Entrepreneurship and Innovation*

2007-2008 commencing students
• 7 Business School Core units (84 credit points)*
• 9 Major Core units (108 credit points)

*Please note that BSB122 Quantitative Analysis & Finance (Replaced by BSB123 Data Analysis) is not required as the content of MAB313 Mathematics of Finance covers similar topics. An additional unit from the chosen major replaces BSB122/BSB123 for 2007 and 2008 commencing students. MGB223 Entrepreneurship and Innovation replaces BSB122/BSB123 for 2009 and 2010 commencing students.

* Please note that EFB101 Data Analysis for Business which is normally undertaken in the Majors of Accountancy, Banking & Finance and Economics, is not required as the content will be covered in the statistics units from the mathematics component of the program.

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet.
Other useful information can be found on the Student Services website.

Discontinuation

This course has been discontinued, therefore, this course is available to continuing students only.

Professional Recognition

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Course Design

Students are required to complete 192 credit points from the Bachelor of Business program. Students supplement the Arts component of this program with the 96 credit point QUT Business School Core units in the Bachelor of Business program together with a 96 credit point Major in one of the following: Accountancy, Advertising, Banking & Finance, Economics, Electronic Business, Human Resource Management, International Business, Management, Marketing or Public Relations.

BA Course Requirements

Students are required to completed 192 credit points for the Arts Program including at least one of the five multidisciplinary majors (7 units from the Major list). You will choose from International and Global Studies, Society and Change, Ethics and Human Rights, Community Studies and Australian Studies.

As well as the multidisciplinary major, students may also wish to undertake a Discipline Major in one of the following: History, Geography and Environmental Studies, Languages (French, Indonesian, German, Japanese, or Mandarin), and Social Science. (Note that apart from Mandarin, all languages are now offered via cross institutional study from the University of Queensland).

Students may also wish to include:
- an Arts minor/s in any of the multidisciplinary or disciple majors (4 units)
- an approved university minor, or individual electives in another QUT course (up to 4 units)

NB: Students are required to complete 16 units in the BA component of the double degree.

Overview

This course has been replaced by IX17 Bachelor of Exercise and Movement Science/ Bachelor of Business from first semester 2010, therefore, there will be no further intake for this course.

Continuing students will complete their course requirements in IX47 Bachelor of Applied Science (in Human Movement Studies)/Bachelor of Business.

This double degree combines training for careers in a range of exercise and sports science settings with the strength of general business theory and skills.

Professional Recognition

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Course Design

Students are required to complete 408 credit points comprised of 216 credit points from the Bachelor of Applied Science (in Human Movement Studies) program and 192 credit points from the Bachelor of Business program.

Business component:
8 QUT Business School Core units (96 credit points)
8 Major Core units (all Business majors including Accountancy, Advertising, Banking & Finance (continuing students only), Economics, Finance, Human Resource Management, International Business, Management, Marketing and Public Relations) (96 credit points)

Please note that students must complete the special course requirements for (BS56/BS05) Bachelor of Business and (HM42) Bachelor of Applied Science degrees.

Other Course Requirements

There are additional costs associated with this course including the purchase of the practicum shirt (approximately $50), the attainment of a current first aid certificate prior to commencement of year three and a Blue Card to work with children depending upon the practicum site. Attendance at the orientation camp is highly recommended though not compulsory (approximately $115).

Important Information for Business Students

QUT Business School rules and procedures are outlined in the QUT Business School Undergraduate Guidelines booklet.
Other useful information can be found on the Student Services website.
Students who require enrolment advice about the Business component of their course should contact the QUT Business School phone 3138 2050 or email bus@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

Accountancy, Finance, Economics and Marketing majors: Maths A, B or C. We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA)

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Professional recognition

The Bachelor of Behavioural Science (Psychology) component of the degree is accredited by the Australian Psychology Accreditation Council (APAC).

To pursue a career in a professional area of psychology, you must be registered with the Psychology Board of Australia. This currently involves completing a fourth year of study in psychology, e.g. Bachelor of Behavioural Science (Honours Psychology) or Postgraduate Diploma in Psychology, followed by either two years of supervised work experience or the completion of an appropriate higher degree such as Doctor of Psychology (Clinical), Master of Clinical Psychology or Master of Psychology (Educational and Developmental).

Business component: Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Course Design

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Behavioural Science (Psychology) program and 192 credit points from the Bachelor of Business.

The course structure for the Bachelor of Behavioural Science component of the double degree comprises the main APAC-accredited psychology core programme of 12 units as well as 4 psychology electives. The psychology core allows the student to complete a 3-year APAC-accredited psychology sequence across 4 years of study. On completion of the double degree program, a student then has the option to apply for entry to a Bachelor of Behavioural Science (Honours Psychology) or the Postgraduate Diploma in Psychology, in order to gain provisional registration as a psychologist.

The Business major can be selected from all majors offered within the BS05 Bachelor of Business. The Bachelor of Business component consists of eight core units*; and an additional eight discipline specific units from within the chosen major, offered at Gardens Point. Students choosing the Management or Marketing majors may undertake units at the Caboolture campus.

* Please note that the Business School Core Unit BSB123 Data Analysis is not required as the Psychology content covers similar topics. MGB223 Entrepreneurship and Innovation replaces this unit.

Bachelor of Business (Honours) Year Option

Students can apply for Bachelor of Business (Honours) (BS63) once they have completed the double degree program. Please click on BS63 for more details.

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet. Other useful information can be found on

the Student Services website.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Study Areas

IX58 will not have nominated majors and minors and consequently there will not be a Study Area A shown on a graduate's parchment. Instead, IX58 will have specialisations. The specialisation areas that will be available for students will include:

- Business Process Management
- Data Warehousing
- Digital Societies
- Enterprise Systems
- Information Management
- Network Systems
- Software Engineering
- Web Technologies

The following Majors are available from the Business component: Accounting, Advertising, Economics, Finance, Human Resource Management, International Business, Management, Marketing and Public Relations.

Pathways to Futher Studies

In 2001, an accelerated Honours program was introduced to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of their a BIT degree (or double degree) which would be counted both for completion of the degree and towards the Honours program. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete a BIT degree (or double degree) with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Business: For BS63 Bachelor of Business (Honours) please click BS63 for details.

Cooperative Education

The Science and Engineering Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Overview

This course offers you a range of options in combining business knowledge with practical skills and a contextual understanding of media and communication.

This combination of media and communication with a business major in advertising, marketing or public relations provides proven professional outcomes in media sales, media marketing and promotions, and in media planning/buying for advertising agencies.

An international business major will equip you with an understanding of the cultural, financial and regulatory issues involved in doing business across borders. Alternatively you may choose to study another of the business professions to diversify your career options.

Career Outcomes

Graduates use their skills for a variety of professional functions across all industry sectors. Many work in marketing communications, public relations or corporate communications. Others apply their broad media knowledge in the media function of advertising, either as sales executives for media outlets or as media planners and buyers for advertising agencies.

Careers exist in audience and market research, collating and analysing audience data to help media outlets better understand who their audiences are and how they are interacting with their product. Graduates also find employment in media policy development in the public sector and private enterprise. Pathways exist to prepare you for further study including honours.

If you wish to use your business knowledge more in your career, you could gain employment in arts administration—marketing, managing or balancing the books for creative projects and businesses.

The combination of media and communication with advertising, marketing or public relations provides proven professional outcomes in media sales, media marketing and promotions, and in media planning/ buying for advertising agencies. You will also develop the entrepreneurial and business skills necessary to sell your abilities to a range of employers, or start your own creative enterprise. Please refer to the QUT Business School prospectus to find out more about the business majors.

Course Design

You are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Business program and 192 credit points from the Bachelor of Media and Communication program. You will undertake the two components of the double degree concurrently.

You will undertake 192 credit points of specialist units in media and communication. Your business degree component comprises eight business core units, and eight business major units.

You will choose a business major from accounting, advertising, economics, finance, human resource management, international business, management, marketing or public relations. You must

complete 96 credit point Business School Core Units in the Business program together with a 96 credit point Major.

Professional Recognition

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet. Other useful information can be found on the Student Services website.

Pathways to further study

On successful completion of the Bachelor of Media and Communication, you will be eligible to apply for entry into the Bachelor of Media and Communication (Honours), or the Bachelor of Business (Honours) (Study Area A), provided you have achieved the required GPA.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Business program and 336 credit points for the Bachelor of Laws program.

Business students will complete 96 credit points (16 units) consisting of eight Business School Core Units and an eight unit major. As the content of BSB111 Business Law and Ethics overlaps with the Bachelor of Laws, it has been replaced by MGB223 Entrepreneurship and Innovation.

Students must choose a major from:

- Accountancy
- Advertising
- Economics
- Finance
- Human Resource Management
- International Business
- Management
- Marketing
- Public Relations

For professional recognition, the Accountancy structure differs from the normal structure. Accountancy students will complete seven Business School Core Units and complete a nine unit major.

Professional recognition

The QUT Bachelor of Laws course is an approved degree for the purposes of the Legal Practitioners Admission Rules. Accordingly, it enables graduates to satisfy the academic requirements for admission to practise as a solicitor and/or barrister in all Australian states and territories. The QUT LLB degree qualification is also recognised for admission purposes in West and East Malaysia, Fiji and Papua New Guinea.

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Advanced standing

You may wish to apply for advanced standing (also known as credit or exemption) for former completed studies and other assessable learning outcomes. See more at Advanced Standing

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more on deferment.

Law School Electives Information

Students who are enrolled in LW34 (straight law undergraduate entry) are required to undertake two contextual electives in the first year of their degree (one in each semester). Contextual electives may also be undertaken by any student as an ordinary elective within their degree. The contextual electives are:

- LWB142 Law Society and Justice
- LWB144 Law and Global Perspectives
- LWB149 Indigenous Legal Issues
- LWB150 Lawyering and Dispute Resolution.

Students who are enrolled in any of the law double degrees commence their law electives in the second semester of their second year.

Students who are enrolled in LW35 (Graduate Entry) commence their law electives in first semester of their second year.

Law students other than Graduate Entry students can undertake 4 non-law units as electives within their law degree. Students may be particularly interested in elective options within the School of Justice which relate to human rights and criminal justice.

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet. Other useful information can be found on the Student Services website.

Graduate Destination Streams

The Faculty of Law has identified graduate destination streams for students undertaking a law or law double degree. This means that, as students learn more throughout their degree, they can choose their elective units in the areas of law in which they become interested. Students are not restricted to choose electives from a single stream; the streams are only to provide guidance to students in making their elective choices.

• Legal Practice
• General Legal Practice (work as a lawyer across a wide range of different legal areas)
• Specialist Legal Practice (work as a lawyer specialising in a particular area of the law, such as property law, family law or corporate law)
• Advocacy and Dispute Resolution (acting for clients in court or resolving disputes through negotiation and mediation processes)
• Public Sector (work as a lawyer in a government department)
• Private Enterprise (for those students not wanting to practise as a lawyer, but perhaps work within business management, human resources, information technology etc)

As students progress towards the end of their degrees there are more opportunities to participate in subjects where they engage in ‘real world learning’ , for example, working within law firms and government departments in placement electives.

Domestic Course structure

Course structure

You will study a combination of business and law units in the first four years, with law units only in the final years. You will also have the opportunity to choose elective units relevant to your career interests.

Course design

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Business program and 336 credit points for the Bachelor of Laws program.

Business students will complete 96 credit points (16 units) consisting of eight Business School Core Units and an eight unit major. As the content of BSB111 Business Law and Ethics overlaps with the Bachelor of Laws, it has been replaced by MGB223 Entrepreneurship and Innovation.

listening	6.0
overall	6.5

Course design

To complete the Bachelor of Business (Dean's Honours), a student must successfully complete all parts listed below:

(a) Eight Business School Core units (96 credit points)
(b) One block of eight Major Core units (Study Area A) (96 credit points)
(c) One Minor of 4 units selected from a University-Wide unit set or a Business School extension (48 credit points)
(d) Four prescribed Option units undertaken during the Summer semester(48 credit points)

Students should note that not all minors are timetabled in every year or semester. Hence, due to the accelerated structure of the course, it is important you confirm that the minors you are interested in will be available.

Students will study five units (60 credit points) in each of the major semesters and an additional two units (24 credit points) in the Summer semesters.

Students who graduate from the Bachelor of Business with a GPA of 5.5 or higher will be eligible to enrol in the Bachelor of Business (Honours) (BS63).

Study areas

Study areas for this course are Accounting, Advertising, Economics, Finance, International Business, Human Resource Management, Management, Marketing, and Public Relations.

Special Course Requirements

Minimum GPA: It is expected that students maintain a minimum GPA of 5.5. If a student does not maintain a GPA of 5.5 it will be recommended that they return to the standard program, Bachelor of Business (BS05). (A GPA of 5.5 is required for entry to the Bachelor of Business (Honours) (BS63) program).

Breaks in Study: Due to the accelerated program breaks in study are not permitted. Students wishing to take a break from study will be advised to transfer to the standard program, Bachelor of Business (BS05).

Course progression: Due to the accelerated program students are expected to follow the course structure. Students wishing to deviate from the recommended course structure will be advised to transfer to the standard program, Bachelor of Business (BS05).

Advanced standing (credit)

Due to the accelerated nature of this program, advanced standing or credit for previous study is not permitted (with the exception of START QUT).

Professional recognition

Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. See each course major for details.

Bachelor of Business (Dean's Honours)

Further study
Students in the Dean's Honours (BS06) are expected to maintain a GPA 5.5 in order to be eligible for entry into the Bachelor of Business (Honours) (BS63) program.

For information on the Honours program, see the entry for BS63 Bachelor of Business (Honours) (BS63).

Campus options
This degree is available at Gardens Point campus only, however some units are offered at Caboolture campus. Students may enrol in Business units at Caboolture campus.

Deferment
Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more on deferment.

Students must complete four coursework units (48 credit points) and a dissertation (48 credit points) as per the programs of study described under the individual majors.

Unit requisite requirements are deemed to have been satisfied upon admission to this course. Where option (elective) units may be undertaken, students should check requisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Subject Area Coordinator prior to enrolment.

Grades are awarded for each of the individual coursework units. The dissertation, which is currently given the weight of four units, is also graded. The degree is awarded at a certain level ranging from first class to third class Honours.

Important course specific enrolment advice

The Business School will provide students with up to $600 for approved research related expenses associated with the preparation of a thesis under the Business School's Postgraduate Research Student Support Scheme. Schools may also provide additional funding assistance and/or opportunities for paid research assistant or tutoring work.

To obtain further information about the policies and procedures relating to this course, please refer to the Business Postgraduate Guidelines.

Other useful information can be found on the Student Services website.

Domestic Course structure

Course design

The course is designed for total immersion in academic study for a full-time year. Therefore undertaking the honours course part-time is generally discouraged. Not all schools permit mid-year entry. The structure of the course is such that the coursework units in the first semester logically precede the research thesis, which is largely completed in the second semester.

International Course structure

Course design

The course is designed for total immersion in academic study for a full-time year. Therefore undertaking the honours course part-time is generally discouraged. Not all schools permit mid-year entry. The structure of the course is such that the coursework units in the first semester logically precede the research thesis, which is largely completed in the second semester.

CRICOS	009038B
Duration (full-time)	1 year
Duration (part-time domestic)	2 years
Campus	Gardens Point
Domestic fee (indicative)	2012: CSP $4,713 per Semester
International fee (indicative)	2012: $12000 per Semester
Total credit points	96
Credit points full-time sem.	48
Credit points part-time sem.	24
Dom. Start Months	February, July
Course Coordinator	Director of Higher Degree Research Studies
Discipline Coordinator	Dr Jodie Warren Business Student Services phone 3138 2050 or email bus@qut.edu.au

Domestic Entry requirements

Domestic students: A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

Applicants are required to nominate a supervisor and topic before submitting a formal application. Normally applications will be successful only if a supervisor and topic are well matched. The Business School does not guarantee supervision capacity for all topics. Applicants should ensure that there is a genuine fit with the potential supervisor's research interests by looking at the interests of the researchers within the relevant school as stated on the Business School website. The Research Coordinator within each school can also assist with this process.

To assist applicants to find an appropriate supervisor, applicants should:
1. Identify supervisor's research interests by looking at the interests of the researchers as described on the Business School website;
2. Contact the HDR Admissions Officer within the QUT Business School. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The information will be passed onto the nominated school or supervisor.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

Students must complete four coursework units (48 credit points) and a dissertation (48 credit points), as per the programs of study described under the individual majors.

Unit requisite requirements are deemed to have been satisfied upon admission to this course. Where option (elective) units may be undertaken, students should check requisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the School Honours Coordinator.

Alternative pathways

The traditional approach is to complete a fourth year after you graduate from your undergraduate degree.

The School also offers the unique opportunity to fast track your studies and complete both your Bachelor of Business and Honours degree in three years with significant financial support through the Dean's Honours program or the School of Accountancy Honours Scholarship Program. Both programs offer successful applicants the opportunity of enrolling in extra units throughout the first two years and over summer, so you can commence and complete your Honours year in the third rather than the fourth year.

Mid-year entry students

Mid-year entry students should contact the Honours Discipline Coordinator for enrolment advice and course progression details. Mid-year entry to any major cannot be guaranteed and is subject to supervisor and unit availability.

Important course specific enrolment advice

The Business School will provide students with up to $600 for approved research related expenses associated with the preparation of a thesis under the Business School's Postgraduate Research Student Support Scheme. Schools may also provide additional funding assistance and/or opportunities for paid research assistant or tutoring work.

To obtain further information about the policies and procedures relating to this course, please refer to the Business Postgraduate Guidelines.

Domestic Students: A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or other Business School to qualify for admission.

Applicants are required to nominate a supervisor and topic before submitting a formal application. Normally applications will be successful only if a supervisor and topic are well matched. The Business School does not guarantee supervision capacity for all topics. Applicants should ensure that there is a genuine fit with the potential supervisor's research interests by looking at the interests of the researchers within the relevant school as stated on the Business School website. The Research Coordinator within each school can also assist with this process.

To assist applicants to find an appropriate supervisor, applicants should:
1. Identify supervisor's research interests by looking at the interests of the researchers as described on the Business School website;
2. Contact the HDR Admissions Officer within the QUT Business School. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The information will be passed onto the nominated school or supervisor.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

Students must complete four coursework units (48 credit points) and a dissertation (48 credit points), as per the programs of study described under the individual majors.

Unit prerequisite requirements are deemed to have been satisfied upon admission to this course. Where option (elective) units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Subject Area Coordinator prior to enrolment.

Mid-year entry students

Mid-year entry students should contact the Honours Discipline Coordinator for enrolment advice and course progression details. Mid-year entry to any major cannot be guaranteed and is subject to supervisor and unit availability.

Further information

For further information on this course contact the Honours Discipline Coordinator Dr Artemis Chang on 3138 2522 or a2.chang@qut.edu.au

The Honours Discipline Coordinator is responsible for the administration of the course, including admissions, scholarships and determining the result for the year as a whole. If you have any questions about the course or any comments, the Honours coordinator should be your first point of contact.

Important course specific enrolment advice

To obtain further information about the policies and procedures relating to this course, please refer to the Business Postgraduate Guidelines.

Other useful information can be found on the Student Services website.

Domestic Course structure

Course design

The course is designed for total immersion in academic study for a full-time year. Therefore undertaking the honours course part-time is generally discouraged. Not all schools permit mid-year entry. The structure of the course is such that the coursework units in the first semester logically precede the research thesis, which is largely completed in the second semester.

Students must complete two prescribed units (24 credit points), two option units (24 credit points) and a dissertation (48 credit points).

International Course structure

Course design

The course is designed for total immersion in academic study for a full-time year. Therefore undertaking the honours course part-time is generally discouraged. Not all schools permit mid-year entry. The structure of the course is such that the coursework units in the first semester logically precede the research thesis, which is largely completed in the second semester.

Students must complete two prescribed units (24 credit points), two option units (24 credit points) and a dissertation (48 credit points).

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at: http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Articulation

With approval of the relevant Discipline Coordinator in conjunction with approval from the Course Coordinator, students may articulate from the Graduate Certificate in Business to a related Master of Business course, depending on the major undertaken. Students must meet the entry requirements and/or prerequisites for further study. Students completing the Graduate Certificate in Business (Human Resource Management) may articulate to the:

- BS16 Master of Business (Human Resource Management)

Domestic Course structure

Students are required to complete 48 credit points (4 units). The course can be undertaken either full-time (1 semester) or part-time (2 semesters).

To ensure that the program builds on prior academic and work experience, each participant in the HRM major receives an individualised study plan. Participants are therefore required to consult with the HRM coordinator regarding development of their study plan. Any subsequent changes to the approved program will require coordinator approval. Failure to obtain approval may affect a student's course progression and impact on their eligibility to graduate.

International Course structure

Students are required to complete 48 credit points (4 units).

To ensure that the program builds on prior academic and work experience, each participant in the HRM major receives an individualised study plan. Participants are therefore required to consult with the HRM coordinator regarding development of their study plan. Any subsequent changes to the approved program will require coordinator approval. Failure to obtain approval may affect a student's course progression and impact on their eligibility to graduate.

Sample Structure

Code	Title
Human Resource Management - for students with prior study in HRM	
Students with an undergraduate HRM major are required to complete 4 units (48 credit points) from the following in consultation with the Discipline Coordinator:	
MGN421	Strategic HRM
MGN423	Contemporary Strategic Analysis
MGN431	Strategic Human Resource Development
MGN433	Managing High-Performance Organisations
MGN441	Leadership and Executive Coaching
MGN442	Self Leadership
MGN443	Talent Management
MGN505	Consulting and Change Management
MGN506	Contemporary Issues in Human Resource Management
Or other units approved by the Discipline Coordinator.	
Human Resource Management - for students without prior study in HRM	
Students without prior study in HRM are required to complete 4 units (48 credit points) in consultation with the Discipline Coordinator. These units are typically, but not limited to:	
MGN409	Introduction to Management
MGN410	Employment Relations
MGN412	People in Organisations
MGN440	Designing Effective and Sustainable Organisations

Other Majors

See also separate entries for the following majors in this course: Accounting, Applied Finance, Human Resource Management, Integrated Marketing Communication, Interdisciplinary, International Business, Marketing, Public Relations (internal delivery), Philanthropy and Nonprofit Studies, or Research Studies.

Special Entry

Applicants who have an undergraduate degree with a GPA below 4.0, may be considered for special entry following the approval of the Discipline Coordinator. Such applicants may be required to attend a selection interview and present a portfolio of work.

Articulation

With approval of the relevant Discipline Coordinator in conjunction with approval from the Course Coordinator, students may articulate from the Graduate Certificate in Business to a related Master of Business course, depending on the major undertaken. Students must meet the entry requirements and/or prerequisites for further study. Students completing the Graduate Certificate in Business (Public Relations) may articulate to the:

• BS16 Master of Business (Public Relations); or
• BS16 Master of Business (Integrated Marketing Communication).

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at: http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Domestic Course structure

Students are required to complete 48 credit points (4 units). The course is only available part-time (2 semesters).

Sample Structure

Code	Title
Public Relations - Online Unit Set

Domestic Entry requirements

To be considered for admission, applicants must:

- demonstrate proficiency in the English language
- hold a Bachelor degree in any field from a recognised university with a minimum grade point average (GPA) of 4.5 on QUT's 7-point scale
- have a GMAT score of at least 550
- have a minimum three years full-time equivalent relevant managerial or professional work experience post-degree
- provide two referee reports on proforma.

Prior academic achievement

Prior academic study at the Bachelor level can be in any field at any recognised tertiary institution. Original or certified copies of academic transcripts that show date of completion or conferral of degree(s) and a Grade Point Average (GPA) must be provided. Not all undergraduate degrees from overseas institutions are assessed as being equivalent to Australian bachelor degrees. Applicants who have not completed a recognised bachelor degree, including the three-year diploma in China, will be considered for admission into the Graduate Certificate in Business Administration based on their Graduate Management Admission Test (GMAT) score, prior work experience and referee reports.

Graduate Management Admission Test (GMAT)

As applicants may come from a range of fields and their work experience may be diverse, a management aptitude test score is a useful indicator of an applicant's ability to meet the program's academic requirements. All applicants are required to undertake the GMAT. There will be no exemptions based on prior education or experience. GMAT test scores are valid for five years.

If you have already undertaken the GMAT QUT needs to see a certified copy of your Test Takers Score. If you are planning to take the GMAT, please have the results sent directly to QUT (our identification number is 1677).

GMAT details (PDF file, 271.78 KB)

Work experience

Relevant work experience indicates applicants will be able to contribute to class discussion. A minimum of three years full-time equivalent professional or managerial work experience is required after the completion of an undergraduate degree. To enable us to assess your work experience, a current curriculum vitae providing details of your roles, responsibilities and achievements is required.

Referee reports

All applicants must obtain two referee reports on the referee proforma. At least one referee report should be from your current employer. The referees may choose to send the recommendations directly to QUT (fax, email and postal addresses are provided on the proforma).

Referee Proforma (DOCX file, 106.99 KB)

International Entry requirements

To be considered for admission, applicants must:

- demonstrate proficiency in the English language
- hold a Bachelor degree in any field from a recognised university with a minimum grade point average (GPA) of 4.5 on QUT's 7-point scale
- have a GMAT score of at least 550
- have a minimum three years full-time equivalent relevant managerial or professional work experience post-degree
- provide two referee reports on proforma.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

Students must complete two MBA foundation core units, and select either a further 36 credit points from MBA core units or one of the following study areas: Corporate Governance, Entrepreneurship and Innovation, Leadership or Strategy.

Advanced standing

Advanced standing may be granted only if the course units for which the advanced standing is being sought have been completed in the last five years from an accredited business school or university (eg AACSB, EQUIS, AMBA). Advanced standing may also be granted at the discretion of the Graduate Studies Director under the following criteria:

1. The business school or university is highly ranked by an international publication or agency
2. There is a pre-existing exchange/cross-institutional agreement
3. The applicant is considered to be in the top third of his/her class cohort or has a GPA of 5.75 or more on a 7-point scale.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at:

PhD Pathway for International Students

Grad Dip (Research) + PhD pathway for international students: If the offer for entry into BS69 is packaged with the PhD, the following conditions will apply:

1. The package is defined as a sequence of programs from BS69 to IF49;
2.
3. Progression from BS69 to IF49 is guaranteed if the BS69 is completed with a GPA of 5.5/7 or greater;
4.
5. A supervisor for the IF49, normally the same as the supervisor for the BS69, is confirmed when assessing entry into the BS69 program;
6.
7. A suitable research topic and thesis title for both BS69 and IF49, the latter of which can be a progression of the topic undertaken in BS69, is confirmed when assessing entry into the BS69 program;
8.
9. The Business School guarantees Research support, places, supervisors and topic areas for IF49 12 months in advance of when the offer for BS69 is made to full time students and 24 months in advance of when the offer for BS69 is made to part time students.

Course Availability

Mid-year Entry:
Students should contact the Research Discipline Coordinator for enrolment advice and course progression details. The majors in Finance, Economics, and Philanthropy and Nonprofit Studies are not available for mid-year entry due to unit availability. Mid-year entry to any major cannot be guaranteed and is subject to supervisor and unit availability.

Part-time Study:
Students should contact the Research Discipline Coordinator for enrolment advice and course progression details. Part time study in any major cannot be guaranteed and is subject to unit availability. The majors in Finance, Economics, and Philanthropy and Nonprofit Studies are not available for part-time study due to unit availability.

Course design

Students must complete four coursework units (48 credit points) and a dissertation (48 credit points) as per the programs of study described under the individual majors.

Unit prerequisite requirements are deemed to have been satisfied upon admission to this course. Where elective units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Subject Area Coordinator prior to enrolment.

Grades are awarded for each of the individual coursework units. The thesis, which is currently given the weight of four units, is also graded.

Important course specific enrolment advice

This course is a PhD qualifying course, and applicants are assessed as to their potential suitability for undertaking a PhD on the completion of BS69. Prior to enrolment in BS69, a supervisor and dissertation topic must be allocated. Contact with the supervisor prior to applying for entry is essential.

To obtain further information about the policies and procedures relating to this course, please refer to the Business School Postgraduate Guidelines.

Other useful information can be found on the Student Services website.

Domestic Entry requirements

Entry Requirements

A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or possess other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

Applicants are required to nominate a supervisor and topic before submitting a formal application. Normally applications will be successful only if a supervisor and topic are well matched. The faculty does not guarantee supervision capacity for all topics. Applicants should ensure that there is a genuine fit with the potential supervisor's research interests by looking at the interests of the researchers within the relevant school as stated on the Business School website. The Research Coordinator within each school can also assist with this process.

To assist applicants to find an appropriate supervisor, applicants should:

1. Identify supervisor's research interests by looking at the interests of the researchers as described on the QUT Business School website;
2. Complete the Expression of Interest to Apply for a Research Degree form, and email this to the QUT Business School HDR Admissions Officer. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International Entry requirements

Entry Requirements

A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or possess other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International students who may receive home sponsorship on the basis of a conditional PhD offer should contact the QUT Business School to discuss the possibility of a study offer that packages BS69 with the PhD prior to submitting a formal application. Conditions apply to such an offer. All other students should enrol initially in the BS69 to undertake the academic prerequisite training for potential entry to the PhD program.

Minimum english requirements

Students must meet the English proficiency requirements.

Course Coordinator	
Discipline Coordinator	Associate Professor Ian Lings Business Student Services phone 3138 2050 or email bus@qut.edu.au

Domestic Entry requirements

A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or possess other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

Applicants are required to nominate a supervisor and topic before submitting a formal application. Normally applications will be successful only if a supervisor and topic are well matched. The faculty does not guarantee supervision capacity for all topics. Applicants should ensure that there is a genuine fit with the potential supervisor's research interests by looking at the interests of the researchers within the relevant school as stated on the Business School website. The Research Coordinator within each school can also assist with this process.

To assist applicants to find an appropriate supervisor, applicants should:

1. Identify supervisor's research interests by looking at the interests of the researchers as described on the QUT Business School website;
2. Complete the Expression of Interest to Apply for a Research Degree form, and email this to the QUT Business School HDR Admissions Officer. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International Entry requirements

The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International students who may receive home sponsorship on the basis of a conditional PhD offer should contact the QUT Business School to discuss the possibility of a study offer that packages BS69 with the PhD prior to submitting a formal application. Conditions apply to such an offer. All other students should enrol initially in the BS69 to undertake the academic prerequisite training for potential entry to the PhD program.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Graduate Diploma in Business (Research) (Advertising)

Course design
Students must complete four coursework units (48 credit points) and a dissertation (48 credit points), as per the programs of study described under the individual majors.

Unit prerequisite requirements are deemed to have been satisfied upon admission to this course. Where elective units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Discipline Coordinator prior to enrolment.

Course Availability
Mid-year entry:
Mid-year entry students should contact the Research Discipline Coordinator for enrolment advice and course progression details. Mid-year entry to any major cannot be guaranteed and is subject to supervisor and unit availability.

Part-time study:
Part-time students should contact the Research Discipline Coordinator for enrolment advice and course progression details. Part time study in any major cannot be guaranteed and is subject to unit availability.

PhD Pathway for Internation Students
Grad Dip (Research) + PhD pathway for international students: If the offer for entry into BS69 is packaged with the PhD, the following conditions will apply:

1. The package is defined as a sequence of programs from BS69 to IF49;
2.
3. Progression from BS69 to IF49 is guaranteed if the BS69 is completed with a GPA of 5.5/7 or greater;
4.
5. A supervisor for the IF49, normally the same as the supervisor for the BS69, is confirmed when assessing entry into the BS69 program.
6.
7. A suitable research topic and thesis title for both BS69 and IF49, the latter of which can be a progression of the topic undertaken in BS69, is confirmed when assessing entry into the BS69 program;
8.
9. The Business School guarantees Research support, places, supervisors and topic areas for IF49 12 months in advance of when the offer for BS69 is made to full time students and 24 months in advance of when the offer for BS69 is made to part time students.

Important course specific enrolment advice
This course is a PhD qualifying course, and applicants are assessed as to their potential suitability for undertaking a PhD on the completion of BS69. Prior to enrolment in BS69, a supervisor and dissertation topic must be allocated. Contact with the supervisor prior to applying for entry is essential.

To obtain further information about the policies and procedures relating to this course, please refer to the Business Postgraduate Guidelines.

Other useful information can be found on the Student Services website.

Further Information
For further information on this course contact Research Discipline Coordinator Associate Professor Ian Lings on 3138 4329 or ian.lings@qut.edu.au

The Research Discipline Coordinator is responsible for the administration of the course, including admissions, scholarships and determining the result for the year as a whole. If you have any questions about the course or any comments, the Research Discipline Coordinator should be your first point of contact.

Domestic Entry requirements

Entry Requirements

A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or possess other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

Applicants are required to nominate a supervisor and topic before submitting a formal application. Normally applications will be successful only if a supervisor and topic are well matched. The faculty does not guarantee supervision capacity for all topics. Applicants should ensure that there is a genuine fit with the potential supervisor's research interests by looking at the interests of the researchers within the relevant school as stated on the Business School website. The Research Coordinator within each school can also assist with this process.

To assist applicants to find an appropriate supervisor, applicants should:

1. Identify supervisor's research interests by looking at the interests of the researchers as described on the QUT Business School website;
2. Complete the Expression of Interest to Apply for a Research Degree form, and email this to the QUT Business School HDR Admissions Officer. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International Entry requirements

Entry Requirements

A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or possess other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

1. Identify supervisor's research interests by looking at the interests of the researchers as described on the QUT Business School website;
2. Complete the Expression of Interest to Apply for a Research Degree form, and email this to the QUT Business School HDR Admissions Officer. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International students who may receive home sponsorship on the basis of a conditional PhD offer should contact the QUT Business School to discuss the possibility of a study offer that packages BS69 with the PhD prior to submitting a formal application. Conditions apply to such an offer. All other students should enrol initially in the BS69 to undertake the academic prerequisite training for potential entry to the PhD program.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0

reading	6.0
listening	6.0
overall	6.5

Course design
Students must complete four coursework units (48 credit points) and a dissertation (48 credit points), as per the programs of study described under the individual majors.

Unit prerequisite requirements are deemed to have been satisfied upon admission to this course. Where elective units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Discipline Coordinator prior to enrolment.

Course Availability
Mid-year entry:
Mid-year entry students should contact the Research Discipline Coordinator for enrolment advice and course progression details. Mid-year entry to any major cannot be guaranteed and is subject to supervisor and unit availability.

Part-time study:
Part-time students should contact the Research Discipline Coordinator for enrolment advice and course progression details. Part time study in any major cannot be guaranteed and is subject to unit availability.

PhD Pathway for International Students
Grad Dip (Research) + PhD pathway for international students: If the offer for entry into BS69 is packaged with the PhD, the following conditions will apply:

1. The package is defined as a sequence of programs from BS69 to IF49;
2.
3. Progression from BS69 to IF49 is guaranteed if the BS69 is completed with a GPA of 5.5/7;
4.
5. A supervisor for the IF49, normally the same as the supervisor for the BS69, is confirmed when assessing entry into the BS69 program.
6.
7. A suitable research topic and thesis title for both BS69 and IF49, the latter of which can be a progression of the topic undertaken in BS69, is confirmed when assessing entry into the BS69 program;
8.
9. The Business School guarantees Research support, places, supervisors and topic areas for IF49 12 months in advance of when the offer for BS69 is made to full time students and 24 months in advance of when the offer for BS69 is made to part time students.

Important course specific enrolment advice
This course is a PhD qualifying course, and applicants are assessed as to their potential suitability for undertaking a PhD on the completion of BS69. Prior to enrolment in BS69, a supervisor and dissertation topic must be allocated. Contact with the supervisor prior to applying for entry is essential.

To obtain further information about the policies and procedures relating to this course, please refer to the Business School Postgraduate Guidelines.

Other useful information can be found on the Student Services website.

Further information
For further information on this course contact the Research Discipline Coordinator Associate Professor Ian Lings on 3138 4329 or ian.lings@qut.edu.au

The Research Discipline Coordinator is responsible for the administration of the course, including admissions, scholarships and determining the result for the year as a whole. If you have any questions about the course or any comments, the Research Discipline Coordinator should be your first point of contact.

A completed Bachelor or course work Masters degree that includes a major in the area of intended study or a qualification deemed equivalent. Students must have achieved a grade-point average (GPA) of 5.5 or better on a 7-point scale in the relevant degree or possess other qualifications and experience which is considered by the Executive Dean, QUT Business School to qualify for admission.

Applicants are required to nominate a supervisor and topic before submitting a formal application. Normally applications will be successful only if a supervisor and topic are well matched. The faculty does not guarantee supervision capacity for all topics. Applicants should ensure that there is a genuine fit with the potential supervisor's research interests by looking at the interests of the researchers within the relevant school as stated on the Business School website. The Research Coordinator within each school can also assist with this process.

To assist applicants to find an appropriate supervisor, applicants should:

1. Identify supervisor's research interests by looking at the interests of the researchers as described on the QUT Business School website;
2. Complete the Expression of Interest to Apply for a Research Degree form, and email this to the QUT Business School HDR Admissions Officer. This contact should include a transcript of academic records, the topic area which they wish to study, the school in which they wish to undertake their research, and if known, the name of a potential supervisor. The HDR Admissions Officer may ask for further information to assist with your enquiry. The information will be passed onto the nominated school or supervisor.

International students who may receive home sponsorship on the basis of a conditional PhD offer should contact the QUT Business School to discuss the possibility of a study offer that packages BS69 with the PhD prior to submitting a formal application. Conditions apply to such an offer. All other students should enrol initially in the BS69 to undertake the academic prerequisite training for potential entry to the PhD program.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0

reading	6.0
listening	6.0
overall	6.5

Course design
Students must complete four coursework units (48 credit points) and a dissertation (48 credit points), as per the programs of study described under the individual majors.

Unit prerequisite requirements are deemed to have been satisfied upon admission to this course. Where elective units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Research Discipline Coordinator prior to enrolment.

PhD Pathway for International Students
Grad Dip Bus(Research) + PhD pathway for international students: If the offer for entry into BS69 is packaged with the PhD, the following conditions will apply:

1. The package is defined as a sequence of programs from BS69 to IF49;
2.
3. Progression from BS69 to IF49 is guaranteed if the BS69 is completed with a GPA of 5.5/7 or greater;
4.
5. A supervisor for the IF49, normally the same as the supervisor for the BS69, is confirmed when assessing entry into the BS69 program;
6.
7. A suitable research topic and thesis title for both BS69 and IF49, the latter of which can be a progression of the topic undertaken in BS69, is confirmed when assessing entry into the BS69 program;
8.
9. The QUT Business School guarantees Research support, places, supervisors and topic areas for IF49 12 months in advance of when the offer for BS69 is made to full time students and 24 months in advance of when the offer for BS69 is made to part-time students.

Course Availability
Please note that the major in Philanthropy and Nonprofit Studies is not available part-time or for mid-year entry.

Important course specific enrolment advice
This course is a PhD qualifying course, and applicants are assessed as to their potential suitability for undertaking a PhD on the completion of BS69. Prior to enrolment in BS69, a supervisor and dissertation topic must be allocated. Contact with the supervisor prior to applying for entry is essential.

To obtain further information about the policies and procedures relating to this course, please refer to the Business School Postgraduate Guidelines.

Other useful information can be found on the Student Services website.

Further information
For further information on this course contact the Research Discipline Coordinator Professor Myles McGregor-Lowndes on m.mcgregor@qut.edu.au

The Research Discipline Coordinator is responsible for the administration of the course, including admissions, scholarships and determining the result for the year as a whole. If you have any questions about the course or any comments, the Research Discipline Coordinator is your primary contact.

Overview

The Graduate Diploma of Business (Professional Accounting) provides students with a solid core in accounting studies and ensures that graduates meet the academic requirements of the Australian professional accounting bodies. This program will be fully nested within the BS16 and BS17 programs and, consequently, requires that students achieve the learning outcomes designed for the Master of Business suite.

If you are looking to change your career direction or enhance your career options, accountancy is a dynamic profession that will provide you with a sustainable, challenging and diverse range of career paths. Professional accountants are in increasing demand nationally and internationally by organisations throughout the commercial, public and not-for-profit sectors. Accountants can work in commerce and industry, in public or chartered accounting firms, in government organisations or as individual practitioners.

Discipline units focus on financial and management accounting requirements, specialised applications in company accounting, audit and assurance, tax and company regulation. Core concepts and knowledge, problem-solving skills and critical and analytical thinking are developed throughout the entire course.

Professional Recognition

Graduates meet the academic component of requirements for membership of CPA Australia and the Institute of Chartered Accountants in Australia, and enrolment in their respective professional programs. Graduates are also eligible for exemptions in the qualifying program for membership of the Association of Chartered Certified Accountants.

External Study

The external version of this course is only available to domestic students. In Semester 1, 2012 it will only be availbale for part-time study. From Semester 2, 2012 this course will be available for full-time study.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at: http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Further Information

If you have any further questions regarding this course please contact the QUT Business School Student Services Office by phone on (07) 3138 2050, via email on bus@qut.com or in person at Level 1, B Block, Gardens Point campus

Domestic Course structure

Course design

Students complete six core units (72 credit points):

- Business and Corporations Law
- Cost and Management Accounting
- Financial Accounting 1
- Financial Accounting 2
- Financial Accounting 3
- Managerial Finance.

Plus, two units (24 credit points) from:

- Auditing and Assurance

Domestic Entry requirements

For all majors except Accounting, entry requirements are an undergraduate degree with an overall minimum grade point average of 4.0 (on a 7-point scale). Students entering the Accounting major must have an appropriate degree in accountancy.

Other cognate degrees: Communications courses will be considered for Advertising and Public Relations, and Journalism courses will be considered for Public Relations. Applications based on other cognate degrees will be assessed on a case-by-case basis and will be determined by the extent of studies in the relevant area.

International Entry requirements

For all majors except Accounting, entry requirements are an undergraduate degree with an overall minimum grade point average of 4.0 (on a 7-point scale). Students entering the Accounting major must have an appropriate degree in accountancy.

Other cognate degrees: Communications courses will be considered for Advertising and Public Relations, and Journalism courses will be considered for Public Relations. Applications based on other cognate degrees will be assessed on a case-by-case basis and will be determined by the extent of studies in the relevant area.

Pathways programs

Pathways units are designed for academically qualified students who do not meet the language requirements.

The Postgraduate Business Pathway program allows international students who have obtained IELTS 6.0 with no sub-band lower than 5.0 or TOEFL Internet Score of 80 with no sub-band lower than 20 to enter some majors of the Master of Business (BS16) and Master of Business Advanced (BS17) on the condition they undertake two Communication units (QCD111 and QCD211) in the first semester of their postgraduate business course. This option is applicable to following Majors: Strategic Advertising, Applied Finance, Integrated Marketing Communication, International Business, Marketing and Public Relations.

Please note that the Pathways option is not open to students who enter the degree with advanced standing based upon undergraduate studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Overview

Our Master of Business suite of programs is designed to give you deep specialist knowledge in particular fields of business. Some majors also satisfy the requirements for professional recognition.

This practical nature of our courses means part-time students can apply the concepts they are learning in the classroom directly to their workplace. Full-time students re-enter the job market armed with the latest in global management techniques.

Optional study

An optional 48 credit points of additional study is available in the Master of Business - Advanced program (BS17). This allows you to extend your studies to suit your career interests. The additional 48 credit points may include research studies, advanced coursework studies in your chosen discipline, or the choice of studies in another business discipline. We encourage you to consult with your subject area coordinator as early as possible in your studies to determine the best way to meet your needs.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for ‘all degrees’ at: http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Pathways programs

Pathways units are designed for academically qualified students who do not meet the language requirements.

The Postgraduate Business Pathway program allows international students who

have obtained IELTS 6.0 with no sub-band lower than 5.0 or TOEFL Internet Score of 80 with no sub-band lower than 20 to enter some majors of the Master of Business (BS16) and Master of Business Advanced (BS17) on the condition they undertake two Communication units (QCD111 and QCD211) in the first semester of their postgraduate business course. This option is applicable to following Majors:

• Strategic Advertising
• Applied Finance
• Integrated Marketing Communication
• International Business
• Marketing
• Public Relations

Please note: Advanced Standing based upon undergraduate studies is not available to students who enter the degree under the Pathways option

For further information and entry requirements for Pathways, visit www.qutic.qut.edu.au/courses/pathways/index.jsp

Advanced standing for Undergraduate Studies

Students applying for admission to the Master of Business (BS16) or Master of Business Advanced (BS17) may be eligible for exemptions based on prior undergraduate studies.

If you have completed an undergraduate degree in a Business related or other cognate degree directly related to the discipline area in which you are studying within previous 5 years, you may be eligible for exemptions up to a maximum of 48 credit points. Approved exemptions will apply to introductory studies or option components in the discipline area you are studying and are not available for specified advanced units. No exemptions will be granted for non-Business related degrees, even if some business subjects may have been completed as part of the course.

New applicants may apply for the exemptions under Section 7 of the Application for Postgraduate Coursework Admission (PG form). Students who completed their undergraduate business degree at QUT do not need to supply additional documentation. Students who completed their undergraduate degree elsewhere must also submit an Application for Advanced Standing (AS form), together with original or certified copies of their final undergraduate transcripts confirming course completion.

University deadlines apply http://www.studentservices.qut.edu.au/info/dates/key/.

Early exit options

Students may exit from the Master of Business (BS16) at the following stages, once those particular course requirements have been met:

• Graduate Diploma of Business (BS79) (Study Area A)
• Graduate Certificate in Business (BS39) (Study Area A)

Students seeking to exit early from the Master of Business course and graduate with an approved exit course should lodge an application during the teaching period in which they expect to complete their studies. Completion of 96 credit point units, where a minimum of 72 credit points are within the same discipline area, and as approved by the Subject Area Coordinator, is required for completion of the Graduate Diploma course. Due to professional recognition requirements, students exiting from the Master of Business (Professional Accounting) major must complete all of the units in the Graduate Diploma in Business (Professional Accounting) course. Students may apply to early exit with the Graduate Certificate course upon completion of a minimum of 48 credit points, in accordance with the course requirements of the relevant business discipline area.

Early exit from the Master of Business course should only be used for students whose circumstances restrict them from completing the original award course. This process in not designed to allow students to obtain multiple qualifications. Students who are approved to early exit from the Master of Business course will not normally be permitted to continue their enrolment in the original award course for a period of 2 years.

Domestic Course structure

Course design

All majors within the BS16 course are available both full-time and part-time, except for Public Relations (On-line delivery) which is only available part-time.

The Master of Business programs are available in 10 different disciplinary fields. Each discipline area within consists of 144 credit points of study comprising of core and option (elective) units. For those new to the discipline there are 48 credit points of introductory units to develop an appropriate level of foundation knowledge. If you have an appropriate undergraduate degree you may be entitled to receive advanced standing for the introductory units.

The programs consist of two components, the Foundation Studies Component (Part A) and the Discipline component (Part B). The Foundation Studies component provides you with an introduction to your chosen discipline, along with other introductory business studies. Part B units provide discipline-based knowledge in your chosen major. Some majors give you choices to customise your study through option (elective) units or the inclusion of project work.

Further coursework studies are available in majors where professional recognition requirements dictate the content of the Masters program. This option gives students more flexibility to choose units of most interest to them. The choice of a minor in another business discipline allows students to diversify their knowledge through a complementary or alternative business area.

Optional study

An optional 48 credit points of additional study is available in the Master of Business - Advanced program (BS17). This allows you to extend your studies to suit your career interests. The additional 48 credit points may include research studies, advanced coursework studies in your chosen discipline, or the choice of studies in another business discipline. We encourage you to consult with your subject area coordinator as early as possible in your studies to determine the best way to meet your needs.

No exemptions will be granted for non-Business related degrees, even if some business subjects may have been completed as part of the course.

New applicants may apply for the exemptions under Section 7 of the Application for Postgraduate Coursework Admission (PG form). Students who completed their undergraduate business degree at QUT do not need to supply additional documentation. Students who completed their undergraduate degree elsewhere must also submit an Application for Advanced Standing (AS form), together with original or certified copies of their final undergraduate transcripts confirming course completion.

Block exemption

Students seeking to exit early from the Master of Business course and graduate with an approved exit course should lodge an application during the teaching period in which they expect to complete their studies. Completion of 96 credit point units, where a minimum of 72 credit points are within the same discipline area, and as approved by the Subject Area Coordinator, is required for completion of the Graduate Diploma course. Students may apply to early exit with the Graduate Certificate course upon completion of a minimum of 48 credit points, in accordance with the course requirements of the relevant business discipline area.

Early exit from the Master of Business course should only be used for students whose circumstances restrict them from completing the original award course. This process in not designed to allow students to obtain multiple qualifications. Students who are approved to early exit from the Master of Business course will not normally be permitted to continue their enrolment in the original award course for a period of 2 years.

Career outcomes

Accountancy is a great platform for a dynamic and exciting business career. Accountants work in a diversity of areas—in commerce, local, national and international firms, government organisations, law firms, banks, merchant banks, stockbrokers, charitable organisations, hospitals and churches, film, television and media or they run their own business. A career in accounting can lead to more strategic and leadership roles such as general manager, chief financial officer and chief executive officer.

Why choose this course?

Many graduates begin in consultancies as account executives or in government or private sector organisations performing a variety of roles from publicity through to events management and product launches. You then have the opportunity to progress to senior consultant or be part of the senior management team within organisations as part of the strategic planning process. IMC graduates have the opportunity to take a new qualification into the marketplace.

Why choose this course?

Rules, regulations, government policy and the diversity of cultures and consumer needs and preferences all impact on how companies do business across borders.

International business skills are in high demand. These skills incorporate ethics, sensitivity and responsiveness to local cultures in new and diverse markets, while at the same time providing the planning, decision-making and strategic management these highly competitive operations need.

The international business environment is explored across a range of business disciplines, including accounting, finance, logistics, management and marketing. The International Business program will give you the expertise and skills to succeed in organisations both in Australia and around the world, including multinational enterprises, smaller firms operating across borders, government agencies and consulting firms that serve international companies.

Course design

Students are required to complete 12 units (144 credit points). Please refer to the course structures for information on specific unit requirements.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Overview

This course is designed for marketing practitioners to freshen or further their skills, or those seeking a career change to this field you will develop marketing management skills as they apply to a business or corporation with practical focus on the identification of forecast opportunities and threats in domestic and international industries; the development of marketing strategies, tactics and plans for such opportunities and threats; the ability to implement and monitor marketing strategies, tactics and plans and their effect on the organisation; and the consideration of new theories, concepts and techniques in marketing management.

Why choose this course?

Marketing professionals are involved in the promotion and/or sales of a company's goods or services. This includes the marketing of existing product lines, or the development of new markets for new or existing products. Marketing is a vital component of business in all industries, as well as in government and third-sector organisations.

This course can lead to more strategic roles such as business development managers, brand or product managers, marketing consultants or marketing managers.

Course design

Students are required to complete 144 credit points of units. Please refer to the course structures for information on specific unit requirements.

Early Exit

Information on early exit options may be found on the Master of Business title page.

Abbreviation

MBus(ProAcc)

Other majors

See also separate entries for the following majors in this course: Accounting, Applied Finance, Human Resource Management, Integrated Marketing Communication, Marketing, Philanthropy and Nonprofit Studies, Professional Accounting, Public Relations and Strategic Advertising.

Professional recognition

Graduates meet the academic component of requirements for associate membership of CPA Australia, the Institute of Chartered Accountants in Australia, the Institute of Public Accountants, and enrolment in their respective professional programs. Graduates are also eligible for exemptions in the qualifying program for membership of the Association of Chartered Certified Accountants.

Career outcomes

Accountancy is a great platform for a dynamic and exciting business career. Accountants work in a diversity of areas—in commerce, local, national and international firms, government organisations, law firms, banks, merchant banks, stockbrokers, charitable organisations, hospitals and churches, film, television and media or they run their own business. A career in accounting can lead to more strategic and leadership roles such as general manager, chief financial officer and chief executive officer.

Why choose this course?

Postgraduate study in public relations is designed for practitioners to sharpen or further their skills, or those seeking a career change to this field. The major is designed as a systematic and comprehensive survey of the discipline of public relations. It provides an overview of the foundations of public relations theory and practice, problems and opportunities in communicating with the corporate audience, theories underpinning public opinion and mass media effects, mass media strategy and tactics, and a systematic exploration of the planning, management and evaluation of public relations campaigns.

Course design

Students are required to complete 144 credit points of units. Please refer to the course structures for information on specific unit requirements.

Postgraduate study in public relations is designed for practitioners to sharpen or further their skills, or those seeking a career change to this field. The major is designed as a systematic and comprehensive survey of the discipline of public relations. It provides an overview of the foundations of public relations theory and practice, problems and opportunities in communicating with the corporate audience, theories underpinning public opinion and mass media effects, mass media strategy and tactics, and a systematic exploration of the planning, management and evaluation of public relations campaigns. This online program is only available part-time.

Course design

The Public Relations (Online delivery) major is only available in part-time mode.

Students are required to complete 144 credit points of units. Please refer to the course structures for information on specific unit requirements.

Articulation

Students who have articulated from the Graduate Certificate in Business may receive advanced standing for 48 credit points.

Overview

In today's rapidly changing business environment, Human Resource Management (HRM) professionals are confronted with the challenges of developing organisational and workforce capability. HRM expertise is also increasingly required by line managers, who now take a more active role in the development and management of their team members.

The Human Resource Management program is designed to increase the skills of both specialists and line managers and meet the individual learning goals and career aspirations of each student. The program provides flexibility for the busy professional to complete the degree part-time, focusing on real-world work issues of personal relevance. HRM professionals will develop a broader view of the nature of business, and the relationship between how people are managed and the organisation's performance in the global context of business.

Those who are undertaking HRM activities but have a background in other professional fields will gain the enhanced people management skills they require. The major also suits the needs of graduates who wish to move into the HRM profession.

The Master of Business - Advanced allows you to further your knowledge with the selection of four approved postgraduate option (elective) units.

Course design

Students must undertake 192 credit points consisting of 144 credit points of prescribed units and 48 credit points of approved option (elective) units.

To ensure that the program builds on prior academic and work experience, each participant in the HRM major receives an individualised study plan. Participants are therefore required to consult with the HRM coordinator regarding development of their study plan. Any subsequent changes to the approved program will require coordinator approval. Failure to obtain approval may affect a student's course progression and impact on their eligibility to graduate.

Students who have completed an undergraduate degree in a Business related or other cognate degree directly related to the discipline area within the previous five years, may be eligible for exemptions up to a maximum of 48 credit points. For further information on exemptions, please refer to the Master of Business Advanced title page.

Some applicants may require unit substitution where they have studied the equivalent of some introductory units in their undergraduate qualification. Choice of unit substitution is subject to approval by the Subject Area Coordinator.

Early Exit

Information on early exit options may be found on the Master of Business-Advanced title page.

Abbreviation

MBusAdv(HRM)

Career outcomes

The program prepares graduates for careers in generalist or specialist human resource professional roles. Generalist positions include human resources assistant, officer, manager or director and these may be located in corporate and private firms as well as public institutions. Specialist positions may include those involved with employment relations, recruitment and placement consulting, training and development specialists, management and executive coaching, as well as consulting careers.

Other Majors

See also separate entries for the following majors in this course: Accounting, Applied

Finance, Human Resource Management, Integrated Marketing Communication, International Business, Marketing, Philanthropy and Nonprofit Studies, Professional Accounting, Public Relations and Strategic Advertising.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at:
http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Further Information

To ensure HRM students are provided with a selection of units that best suits their prior knowledge and experience, HRM students must contact Narelle Prior on 3138 6701 or email n.prior@qut.edu.au.

Domestic Course structure

Unit selection

You should consult with the subject area coordinator for advice on units depending on your prior study.

Overview

If you are interested in advertising, promotions or communications, you should consider an Integrated Marketing Communication (IMC) major. Studies in IMC will provide you with a systematic and comprehensive understanding of the theory and research integration of marketing communication.

The course focuses on refinement of analytical skills and knowledge required for decision making in the areas of advertising, marketing and public relations. IMC focuses on the strategic integration of the functions of public relations, advertising, promotion, direct marketing, and personal selling to achieve brand equity and increase the effectiveness of promotional communications with target audiences.

You will be equipped to confront the fragmentation of mass markets, the explosion of new technologies that give consumers more control over the communication process, the emergence of global markets, and rapid changes in economic conditions within which organisations operate.

The Master of Business - Advanced allows you to further your knowledge with the selection of four approved postgraduate option (elective) units.

Course design

Students must undertake 192 credit points consisting of 144 credit points of prescribed units and 48 credit points of approved option (elective) units. Non-standardised course progression may result in unit selection difficulties. Students should contact the for course progression advice.

Students who have completed an undergraduate degree in a Business related or other cognate degree directly related to the discipline area within the previous five years, may be eligible for exemptions up to a maximum of 48 credit points. For further information on exemptions, please refer to the Master of Business Advanced title page.

Some applicants may require unit substitution where they have studied the equivalent of some introductory units in their undergraduate qualification. Choice of unit substitution is subject to approval by the Subject Area Coordinator.

Early Exit

Information on early exit options may be found on the Master of Business-Advanced title page.

Overview

Rules, regulations, government policy and the diversity of cultures and consumer needs and preferences all impact on how companies do business across borders.

International business skills are in high demand. These skills incorporate ethics, sensitivity and responsiveness to local cultures in new and diverse markets, while at the same time providing the planning, decision-making and strategic management these highly competitive operations need.

The international business environment is explored across a range of business disciplines, including accounting, finance, logistics, management and marketing.

The International Business program will give you the expertise and skills to succeed in organisations both in Australia and around the world, including multinational enterprises, smaller firms operating across borders, government agencies and consulting firms that serve international companies.

The Master of Business - Advanced allows you to further your knowledge with the selection of four approved postgraduate option (elective) units.

Course design

Students must undertake 192 credit points consisting of 144 credit points of prescribed units and 48 credit points of approved option (elective) units. Non-standardised course progression may result in unit selection difficulties. Students should contact the School of Advertising, Marketing and Public Relations for course progression advice.

listening	6.0
overall	6.5

Overview

Postgraduate study in public relations is designed for practitioners to sharpen or further their skills, or those seeking a career change to this field. The major is designed as a systematic and comprehensive survey of the discipline of public relations. It provides an overview of the foundations of public relations theory and practice, problems and opportunities in communicating with the corporate audience, theories underpinning public opinion and mass media effects, mass media strategy and tactics, and a systematic exploration of the planning, management and evaluation of public relations campaigns.

The Master of Business - Advanced allows you to further your knowledge with the selection of four approved postgraduate option (elective) units.

Course design

Students must undertake 192 credit points consisting of 144 credit points of prescribed units and 48 credit points of approved option (elective) units. Non-standardised course progression may result in unit selection difficulties. Students should contact the School of Advertising, Marketing and Public Relations for course progression advice.

Students who have completed an undergraduate degree in a Business related or other cognate degree directly related to the discipline area within the previous five years, may be eligible for exemptions up to a maximum of 48 credit points. For further information on exemptions, please refer to the Master of Business Advanced title page.

Some applicants may require unit substitution where they have studied the equivalent of some introductory units in their undergraduate qualification. Choice of unit substitution is subject to approval by the Subject Area Coordinator.

Early Exit

Information on early exit options may be found on the Master of Business-Advanced title page.

International Entry requirements

An undergraduate degree or equivalent in any field with an overall minimum Grade Point Average (GPA) of 4.0 (on a 7 point scale).

Pathways programs

International students who do not meet language requirements can complete pathways units within selected majors.

The Postgraduate Business Pathway program allows international students who have obtained IELTS 6.0 with no sub-band lower than 5.0 0 or TOEFL: 550 (paper-based), 213 (computerised) or 80 with at least 18 in all bands (Internet Based) to enter some majors of the Master of Business and Master of Business Advanced on the condition they undertake two Communication units (QCD111 and QCD211) in the first semester of their postgraduate business course. This option is applicable to following Majors:

- Strategic Advertising
- Applied Finance
- Integrated Marketing Communication
- International Business
- Marketing
- Public Relations

For more information please contact the QUT Business School International Student Office on 3138 1790.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Overview

The Master of Business Advanced gives you the opportunity to extend the Master of Business with an additional 48 credit points usually comprised of either, a research dissertation, further coursework studies in your chosen major, or coursework studies in another business discipline, giving you the opportunity to tailor your studies to suit your interests and professional requirements. Under certain circumstances the Advanced program can also provide a pathway to doctoral-level studies in the PhD or DBA programs.

Course design

Students must undertake 192 credit points consisting of 144 credit points of prescribed units and 48 credit points of approved coursework or research option units to complete the Master of Business Advanced (BS17).

Students should follow the standard course progressions outlined in the discipline specific course structures otherwise difficulties with completing the requirements of the course may be encountered. Students should contact their discipline School for course progression advice if required.

Students who have completed an undergraduate degree in a Business related or other cognate degree directly related to the discipline area within the previous five years, may be eligible for exemptions up to a maximum of 48 credit points.

Approved exemptions will apply to introductory studies or elective components in the discipline area you are studying and are not available for specified advanced units. No exemptions will be granted for non-Business related degrees, even if some business subjects may have been completed as part of the course.

Some applicants may require unit substitution where they have studied the equivalent of some introductory units in their undergraduate qualification. Choice of unit substitution is subject to approval by the Subject Area Coordinator.

Early Exit Option

Students may exit from the Master of Business Advanced (BS17) at the following stages, once those particular course requirements have been met:

- Master of Business (BS16) (Study Area A)
- Graduate Diploma of Business (BS79) (Study Area A)
- Graduate Certificate in Business (BS39)

(Study Area A)

Students seeking to exit early from the Master of Business Advanced course and graduate with an approved exit course should lodge an application during the teaching period in which they expect to complete their studies.

Early exit from the Master of Business course should only be used for students whose circumstances restrict them from completing the original award course. This process in not designed to allow students to obtain multiple qualifications. Students who are approved to early exit from the Master of Business course will not normally be permitted to continue their enrolment in the original award course for a period of 2 years.

Pathways programs

International students who do not meet language requirements can complete pathways units within selected majors.

The Postgraduate Business Pathway program allows international students who have obtained IELTS 6.0 with no sub-band lower than 5.0 0 or TOEFL: 550 (paper-based), 213 (computerised) or 80 with at least 18 in all bands (Internet Based) to enter some majors of the Master of Business and Master of Business Advanced on the condition they undertake two Communication units (QCD111 and QCD211) in the first semester of their postgraduate business course. This option is applicable to following Majors:

- Strategic Advertising
- Applied Finance
- Integrated Marketing Communication
- International Business
- Marketing
- Public Relations

For more information please contact the QUT Business School International Student Office on 3138 1790.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at:
http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Domestic Course structure

Overview

This course is designed to equip you with knowledge and skills for a career in the management of philanthropic and nonprofit organisations. Whether you work in a nonprofit organisation, are a public sector manager whose service delivery is through or partnered with nonprofit organisations, or are a private sector manager who engages in business with the nonprofit sector, this major can help build professional knowledge and skills relevant to the sector. Skills critical to nonprofit management, such as problem solving, creative thinking, negotiation, ethical practices, teamwork, leadership, networking and information management are incorporated into the teaching, learning and assessment.

The Master of Business - Advanced allows you to further your knowledge in another business discipline area with the selection of four approved postgraduate option (elective) units. Alternatively a 48 credit point dissertation may be undertaken.

Course design

Students must undertake 192 credit points consisting of 72 credit points of prescribed units. Complementary Studies units (12 credit points) and 48 credit points of QUT Business School Option (elective) units. Students should follow the standard course progressions as outlined in the below course structures otherwise difficulties with completing the requirements of the course may be encountered. Students should contact the Graduate School of Business for course progression advice.

Students who have completed an undergraduate degree in a Business related or other cognate degree directly related to the discipline area within the last five years, may be eligible for exemptions up to a maximum of 48 credit points. For further information on exemptions, please refer to the Master of Business Advanced overview.

Some applicants may require unit substitution where they have studied the equivalent of some introductory units in their undergraduate qualification. Choice of unit substitution is subject to approval by the Subject Area Coordinator.

Visiting Students and Cross-Institutional Enrolment

Individual units within this course are available to both visiting students and cross-institutional students. Visiting students are students who undertake units at QUT for personal or professional development. Cross-institutional students are enrolled at another institution and opt to undertake individual units at QUT as part of their program. Entry for both visiting students and cross-institutional enrolment is based on merit and applications may be rejected if the applicant does not have an educational background appropriate to the units of study applied for or if there are insufficient places remaining in the class.

Articulation

Students who have articulated from the Graduate Certificate in Business Philanthropy and Nonprofit Studies may receive exemptions for up to 48 credit points. Students who have articulated from the Master of Business Philanthropy and Nonprofit Studies program may receive up to 144 credit point of exemptions.

Graduates completing the Master of Business (Professional Accounting)/Master of Business may meet the academic component of requirements for associate membership of CPA Australia, the Institute of Chartered Accountants in Australia and the National Institute of Accountants, and enrolment in their respective professional programs.

Graduates completing the Master of Business (Applied Finance)/Master of Business meet the academic component of requirements for Senior Associate membership of the Financial Services Institute of Australia, and maybe entitled to full ASIC RG146 Tier 1 accreditation to provide financial product advice. Graduates may also meet the academic component of the requirements for the professional level membership of the Finance and Treasury Association Limited-Certified Finance and Treasury Professional, depending on prior study and elective chosen.

Pathways to further study

The Master of Business/Master of Business (BS18) may be a pathway of study into the Doctor of Business Administration (DBA) (BS25). Additional pathways may be available through consultation with the Director of Graduate Studies.

Master of Business / Master of Business Administration

Handbook

Year	2012
QUT code	BS24
CRICOS	069779A
Duration (full-time)	2 years
Duration (part-time)	4 years
Campus	Gardens Point
Domestic fee (indicative)	2012: $12200 per Semester
International fee (indicative)	2012: $15100 per Semester
Total credit points	192
Start months	February, July
Int. Start Months	February, July
Course Coordinator	Dr Vicky Browning (MBA); Discipline coordinators for MBus: Associate Professor Stuart Tooley (Accounting); Dr William Wild (Applied Finance); Dr Robert Thompson (Human Resource Management); Mr Bill Proud (International Business); Mr Bill Proud (Integrated Marketing Communication, Marketing, Public Relations) and Prof Myles McGregor-Lowndes (Philanthropy and Nonprofit Studies)
Discipline Coordinator	Business Student Services on 3138 2050 or email bus@qut.edu.au

Domestic Entry requirements

Prospective students must meet the MBA entry requirements. For the MBA entry requirements, refer to www.qut.edu.au/study/courses/master-of-business-administration-mba

For all study areas except Accounting, entry requirements are an undergraduate degree in a cognate discipline with an overall minimum Grade Point Average (GPA) of 4.0 (on a 7 point scale). Applicants for the Accounting study area must have an appropriate undergraduate degree in Accountancy.

For the Philanthropy and Nonprofit Studies major, it is compulsory for enrolled students to attend the ACPNS Orientation and Intensive Weekend at the Gardens Point Campus of QUT. During this weekend students will participate in a specialised orientation program and also attend the first lectures of available units. Further information on the ACPNS Orientation and Intensive is available at www.bus.qut.edu.au/research/cpns/whatweteach/orientation.jsp

To be considered for admission, applicants must:

- demonstrate proficiency in the English language
- hold a Bachelor degree in any field from a recognised university with a minimum grade point average (GPA) of 4.5 on QUT's 7-point scale
- have a GMAT score of at least 550
- have a minimum three years full-time equivalent relevant managerial or professional work experience post-degree
- provide two referee reports on proforma.

Prior academic achievement

Prior academic study at the Bachelor level can be in any field at any recognised tertiary institution. Original or certified copies of academic transcripts that show date of completion or conferral of degree(s) and a Grade Point Average (GPA) must be provided. Not all undergraduate degrees from overseas institutions are assessed as being equivalent to Australian bachelor degrees. Applicants who have not completed a recognised bachelor degree, including the three-year diploma in China, will be considered for admission into the Graduate Certificate in Business Administration based on their Graduate Management Admission Test (GMAT) score, prior work experience and referee reports.

Graduate Management Admission Test (GMAT)

As applicants may come from a range of fields and their work experience may be diverse, a management aptitude test score is a useful indicator of an applicant's ability to meet the program's academic requirements. All applicants are required to undertake the GMAT. There will be no exemptions based on prior education or experience. GMAT test scores are valid for five years.

If you have already undertaken the GMAT QUT needs to see a certified copy of your Test Takers Score. If you are planning to take the GMAT, please have the results sent directly to QUT (our identification number is 1677).

GMAT details (PDF file, 271.78 KB)

Work experience

Relevant work experience indicates applicants will be able to contribute to class discussion. A minimum of three years full-time equivalent professional or managerial work experience is required after the completion of an undergraduate degree. To enable us to assess your work experience, a current curriculum vitae providing details of your roles, responsibilities and achievements is required.

Referee reports

All applicants must obtain two referee reports on the referee proforma. At least one referee report should be from your current employer. The referees may choose to send the recommendations directly to QUT (fax, email and postal addresses are provided on the proforma).

Referee Proforma (DOCX file, 106.99 KB)

Course design

The Executive MBA is a prescribed program. Students are required to undertake 24 units of 6 credit points each.

The intake for the EMBA is in January and the program runs for 22 months. Classes are scheduled once every four weeks over a Friday to Sunday weekend session, with 18-21 hours of classes per weekend session each month of the program; plus one intensive session (International Study Tour) in April 2012. The intensive block sessions allow students to schedule some dedicated time to study with minimal interference to their business commitments.

Advanced standing

Advanced standing may be granted only if the course units for which the advanced standing is being sought have been completed in the last five years from an accredited business school or university (eg AACSB, EQUIS, AMBA).

Advanced standing may also be granted at the discretion of the Graduate Studies Director under the following criteria:

1. The business school or university is highly ranked by an international publication or agency
2. There is a pre-existing exchange/cross-institutional agreement
3. The applicant is considered to be in the top third of his/her class cohort or has a GPA of 5.75 or more on a 7-point scale.

Further information

If you have any further questions regarding this course please contact the Corporate Education Office on 3138 6874, via email on emba@qut.edu.au or on Level 5, B Block, Gardens Point campus.

Domestic Entry requirements

To be considered for admission, applicants must:

- demonstrate proficiency in the English language
- hold a Bachelor degree in any field from a recognised university with a minimum grade point average (GPA) of 4.5 on QUT's 7-point scale
- have a GMAT score of at least 550
- have a minimum three years full-time equivalent relevant managerial or professional work experience post-degree
- provide two referee reports on proforma.

Prior academic achievement

Prior academic study at the Bachelor level can be in any field at any recognised tertiary institution. Original or certified copies of academic transcripts that show date of completion or conferral of degree(s) and a Grade Point Average (GPA) must be provided. Not all undergraduate degrees from overseas institutions are assessed as being equivalent to Australian bachelor degrees. Applicants who have not completed a recognised bachelor degree, including the three-year diploma in China, will be considered for admission into the Graduate Certificate in Business Administration based on their Graduate Management Admission Test (GMAT) score, prior work experience and referee reports.

Graduate Management Admission Test (GMAT)

As applicants may come from a range of fields and their work experience may be diverse, a management aptitude test score is a useful indicator of an applicant's ability to meet the program's academic requirements. All applicants are required to undertake the GMAT. There will be no exemptions based on prior education or experience. GMAT test scores are valid for five years.

If you have already undertaken the GMAT QUT needs to see a certified copy of your Test Takers Score. If you are planning to take the GMAT, please have the results sent directly to QUT (our identification number is 1677).

GMAT details (PDF file, 271.78 KB)

Work experience

Relevant work experience indicates applicants will be able to contribute to class discussion. A minimum of three years full-time equivalent professional or managerial work experience is required after the completion of an undergraduate degree. To enable us to assess your work experience, a current curriculum vitae providing details of your roles, responsibilities and achievements is required.

Referee reports

All applicants must obtain two referee reports on the referee proforma. At least one referee report should be from your current employer. The referees may choose to send the recommendations directly to QUT (fax, email and postal addresses are provided on the proforma).

Career impact

QUT's innovative and flexible MBA program is designed for working professionals who are seeking to broaden their business knowledge and advance their career opportunities. The practical nature of our courses means part-time students can apply the concepts they are learning in the classroom directly to their workplace. Full-time students re-enter the job market armed with the latest in global management techniques.

Course design

Students must complete 14 core units and two integrative core units of six credit points each and a further 48 credit points of optional units, which may be selected from any of the MBA concentrations or minors. Other postgraduate units may be undertaken with the Course Coordinator's approval. Students may be able to complete multiple concentrations and minors through careful selection of optional units.

Scholarships

We offer a number of merit-based scholarships to exceptional successful applicants to the MBA and MBA (Major) programs. Eligibility for a scholarship is based on GMAT score, undergraduate grade point average, work experience, plus a written supporting statement from the applicant.

Advanced standing

Advanced standing may be granted only if the course units for which the advanced standing is being sought have been completed in the last five years from an accredited business school or university (e.g. AACSB, EQUIS, AMBA). Advanced standing may also be granted at the discretion of the Graduate Studies Director under the following criteria:

1. The business school or university is highly ranked by an international publication or agency
2. There is a pre-existing exchange/cross-institutional agreement
3. The applicant is considered to be in the top third of his/her class cohort or has a GPA of 5.75 or more on a 7-point scale.

Articulation

Students may articulate from the Graduate Certficate in Business Administration into the MBA provided they have a minimum GPA of 4.5.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at:
http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Further information

If you have any further questions regarding this course please contact the QUT Business School Student Services Office on 3138 2050, via email on bus@qut.edu.au or at Level 1, B Block, Gardens Point campus.

MBA

Domestic Course structure

Flexible study options

Each MBA unit of six credit points is delivered in a seven-week module (six weeks teaching with final assessment in week seven).

Busy professionals who undertake part-time studies are catered for with a flexible structure that helps you incorporate study into your hectic lifestyle. With six teaching periods, you can change your course workload six times a year, and may even take a teaching period off when your work or personal life requires.

Course structure

Core units

- Business Communication
- Business Law
- Economics in Business
- Entrepreneurship
- Financial Management
- Financial Statements Analysis
- Fundamentals of Marketing Management
- Human Resource Management Issues
- Managing in the Global Business Environment
- Managing Technological Innovation
- Organisational Behaviour
- Strategic Management
- Understanding Data
- Understanding Leadership

Integrative core units

- Business Plans
- Corporate Governance and Accountability

Electives

Students can choose from a wide variety of elective units both from within the QUT Graduate School of Business and from other schools and faculties within QUT. For a list of elective units visit www.qut.edu.au/study/courseinfo

Concentrations and minors

The structure of our program enables you to add greater depth in an area of interest by choosing electives to achieve one or more concentrations (up to six units) or minors (up to four units).
It may be possible for you to complete multiple concentrations or minors through careful choice of elective units.

If you have a prior degree in a business area you may be able to substitute some introductory core units with additional

electives. This allows you to study areas that you find personally satisfying, as well as units that are essential for your professional development.

The titles of completed concentrations and minors are recorded on academic transcripts at the completion of study.

Concentrations and minor areas:

- Accounting
- Corporate Governance
- Entrepreneurship
- Finance
- Health Services Management
- Human Resource Management
- Information Technology Management
- International Business
- Leadership
- Marketing
- Philanthropy and Nonprofit Studies
- Project Management
- Strategy.

MBA candidates may also choose from other postgraduate elective units which do not specifically contribute toward a concentration or minor.

Master of Business Administration (Major)

Handbook

Year	2012
QUT code	GS76
CRICOS	045503E
Duration (full-time)	2 years
Duration (part-time domestic)	4 years
Campus	Gardens Point
Domestic fee (indicative)	2012: $14500 per Semester
International fee (indicative)	2012: $18200 per Semester
Total credit points	192
Credit points full-time sem.	48
Start months	March, May, July, September
Int. Start Months	March, May, July, September
Course Coordinator	Dr Vicky Browning
Discipline Coordinator	Dr Amanda Gudmundsson Business Student Services on 3138 2050 or email bus@qut.edu.au

Domestic Entry requirements

To be considered for admission, applicants must:

- demonstrate proficiency in the English language
- hold a Bachelor degree in any field from a recognised university with a minimum grade point average (GPA) of 4.5 on QUT's 7-point scale
- have a GMAT score of at least 550
- have a minimum three years full-time equivalent relevant managerial or professional work experience post-degree
- provide two referee reports on proforma.

Prior academic achievement

Prior academic study at the Bachelor level can be in any field at any recognised tertiary institution. Original or certified copies of academic transcripts that show date of completion or conferral of degree(s) and a Grade Point Average (GPA) must be provided. Not all undergraduate degrees from overseas institutions are assessed as being equivalent to Australian bachelor degrees. Applicants who have not completed a recognised bachelor degree, including the three-year diploma in China, will be considered for admission into the Graduate Certificate in Business Administration based on their Graduate Management Admission Test (GMAT) score, prior work experience and referee reports.

Graduate Management Admission Test (GMAT)

As applicants may come from a range of fields and their work experience may be diverse, a management aptitude test score is a useful indicator of an applicant's ability to meet the program's academic requirements. All applicants are required to undertake the GMAT. There will be no exemptions based on prior education or experience. GMAT test scores are valid for five years.

If you have already undertaken the GMAT QUT needs to see a certified copy of your Test Takers Score. If you are planning to take the GMAT, please have the results sent directly to QUT (our identification number is 1677).

GMAT details (PDF file, 271.78 KB)

Work experience

Relevant work experience indicates applicants will be able to contribute to class discussion. A minimum of three years full-time equivalent professional or managerial work experience is required after the completion of an undergraduate degree. To enable us to assess your work experience, a current curriculum vitae providing details of your roles, responsibilities and achievements is required.

Referee reports

All applicants must obtain two referee reports on the referee proforma. At least one referee report should be from your current employer. The referees may choose to send the recommendations directly to QUT (fax, email and postal addresses are provided on the proforma).

Referee Proforma (DOCX file, 106.99 KB)

International Entry requirements

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

Students must complete the 14 MBA core units and two integrative core units, plus 48 credit points of optional units taken from one of the Major study areas, plus a further 48cp credit points of optional units which may be selected from any of the MBA concentrations or minors. Other postgraduate units may undertaken with the Course Coordinator's approval. Students may be able to complete multiple concentrations and minors through careful selection of optional units.

Scholarships

We offer a number of merit-based scholarships to exceptional successful applicants to the MBA and MBA (Major) programs. Eligibility for a scholarship is based on GMAT score, undergraduate grade point average, work experience, plus a written supporting statement from the applicant.

English language requirements

In addition to the above academic entry requirements, standard English language requirements apply. See the details for 'all degrees' at:
http://www.qut.edu.au/study/applying/english-language-requirements.jsp

Advanced standing

Advanced standing may be granted only if the course units for which the advanced standing is being sought have been completed in the last five years from an accredited business school or university (eg AACSB, EQUIS, AMBA). Advanced standing may also be granted at the discretion of the Graduate Studies Director under the following criteria:

1. The business school or university is highly ranked by an international publication or agency
2. There is a pre-existing exchange/cross-institutional agreement
3. The applicant is considered to be in the top third of his/her class cohort or has a GPA of 5.75 or more on a 7-point scale.

Abbreviation

MBA(Major)

Domestic Course structure

Course design

In addition to the core and elective components of the MBA program, the MBA (major) enables you to study an additional 48 credit points of elective units from one of three major study areas: Entrepreneurship, Information Technology Management or Research.

Each MBA unit of six credit points is delivered in a seven-week module (six weeks teaching with final assessment in week seven).

Busy professionals who undertake part-time studies are catered for with a flexible structure that helps you incorporate study into your hectic lifestyle. With six teaching periods, you can change your course workload six times a year, and may even take a teaching period off when your work or personal life requires.

Course structure

Core units

- Business Communication
- Business Law
- Economics in Business
- Entrepreneurship
- Financial Management
- Financial Statements Analysis
- Fundamentals of Marketing Management
- Human Resource Management Issues
- Managing in the Global Business Environment
- Managing Technological Innovation
- Organisational Behaviour
- Strategic Management
- Understanding Data
- Understanding Leadership

Integrative core units

- Business Plans
- Corporate Governance and Accountability

Electives

Students can choose from a wide variety of elective units both from within the QUT Graduate School of Business and from other schools and faculties within QUT.

Concentrations and minors

The structure of our program enables you to add greater depth in an area of interest by choosing electives to achieve one or more concentrations (up to six units) or minors (up to four units).
It may be possible for you to complete multiple concentrations or minors through careful choice of elective units. If you have a prior degree in a business area you may be able to substitute some introductory core units with additional electives. This allows you to study areas that you find personally satisfying, as well as units that are essential for your professional development.

The titles of completed concentrations and minors are recorded on academic transcripts at the completion of study.

Concentrations and minor areas:

- Accounting
- Corporate Governance
- Entrepreneurship
- Finance
- Health Services Management
- Human Resource Management
- Information Technology Management
- International Business
- Leadership
- Marketing
- Philanthropy and Nonprofit Studies

- Project Management
- Strategy.

MBA candidates may also choose from other postgraduate elective units which do not specifically contribute toward a concentration or minor.

International Course structure

Course design

In addition to the core and elective components of the MBA program, the MBA (major) enables you to study an additional 48 credit points of elective units from one of three major study areas: Entrepreneurship, Information Technology Management or Research.

Each MBA unit of six credit points is delivered in a seven-week module (six weeks teaching with final assessment in week seven).

Busy professionals who undertake part-time studies are catered for with a flexible structure that helps you incorporate study into your hectic lifestyle. With six teaching periods, you can change your course workload six times a year, and may even take a teaching period off when your work or personal life requires.

Course structure

Core units

- Business Communication
- Business Law
- Economics in Business
- Entrepreneurship
- Financial Management
- Financial Statements Analysis
- Fundamentals of Marketing Management
- Human Resource Management Issues
- Managing in the Global Business Environment
- Managing Technological Innovation
- Organisational Behaviour
- Strategic Management
- Understanding Data
- Understanding Leadership

Integrative core units

- Business Plans
- Corporate Governance and Accountability

Electives

Students can choose from a wide variety of elective units both from within the QUT Graduate School of Business and from other schools and faculties within QUT.

Concentrations and minors

The structure of our program enables you to add greater depth in an area of interest by choosing electives to achieve one or more concentrations (up to six units) or minors (up to four units).
It may be possible for you to complete multiple concentrations or minors through careful choice of elective units. If you have a prior degree in a business area you may be able to substitute some introductory core units with additional electives. This allows you to study areas that you find personally satisfying, as well as units that are essential for your professional development.

The titles of completed concentrations and minors are recorded on academic transcripts at the completion of study.

Concentrations and minor areas:

- Accounting
- Corporate Governance
- Entrepreneurship
- Finance
- Health Services Management
- Human Resource Management
- Information Technology Management
- International Business
- Leadership
- Marketing
- Philanthropy and Nonprofit Studies
- Project Management
- Strategy.

MBA candidates may also choose from other postgraduate elective units which do not specifically contribute toward a concentration or minor.

International Course structure

Course structure

The Master of Research Management and Commercialisation is particularly suited to current or aspiring research management leaders, administrators and active researchers in corporations, universities and the public sector. The Masters builds on the content of the Graduate Certificate and allows you to develop a deeper understanding of the context and strategic issues involved in research management and commercialisation. You can tailor the course to your needs by applying these ideas and concepts to issues of relevance to you and, where possible, undertaking assessment through workplace-based projects.

Students enrolled in the masters-level course can choose to exit with an award of Graduate Diploma in Research and Development Management following the completion of eight approved units.

Course design

For entry without an Honours degree, students must complete four approved coursework units (48 credit points) and a dissertation (96 credit points) as per the programs of study described under the individual majors.

For entry with an Honours degree students must complete a dissertation (96 credit points).

The QUT Research Student Centre enrols all research students. However any questions regarding enrolment can be directed to the Research Studies Office in the QUT Business School on 3138 1407 or bus.research@qut.edu.au

Facilities

Full-time students are provided with modern, well-appointed office space (which includes access to a desk, computer and telephone). There are break-out areas and meeting rooms where supervisors and industry partners can meet with their students. Discussion groups and small classes are also held in the meeting rooms. These premises offer new and continuing students a work environment conducive to study and progress and demonstrate a continuing commitment to the postgraduate program.

Supervision

You will receive individual supervision by a highly qualified and experienced academic staff member who will guide you through your advanced study.

Mid-year entry students

Mid-year entry students should contact the Research Studies Office in the QUT Business School on 3138 1320 or bus.research@qut.edu.au for enrolment advice and course progression details.

Prerequisites

Prerequisite requirements for the following units are deemed to have been satisfied upon admission to this course, expect for those specifically identified in brackets and italics. Where option (elective) units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the School Research Coordinator prior to enrolment.

Discipline Coordinator	Professor Janice How QUT Business School Research Support Office phone 3138 1407 or email bus.research@qut.edu.au

Domestic Entry requirements

If applicants have an Honours degree (at level 2B or better) it must be relevant to the chosen discipline for the Master of Business (Research); or if applicants are entering from a pass degree, their undergraduate degree must include a major in an approved area, plus a grade point average of 5.5 or more on a 7 point scale; or applicants can present a case based on evidence of qualifications that demonstrates the applicants capacity to pursue the course of study.

In addition to assessing qualifications, the Business School must also be satisfied that adequate supervision and resources are available to support the applicants proposed research.

Research Proposal - the application for admission to the Master of Business (Research) must include details of the proposed research project.

International Entry requirements

If applicants have an Honours degree (at level 2B or better) it must be relevant to the chosen discipline for the Master of Business (Research); or if applicants are entering from a pass degree, their undergraduate degree must include a major in an approved area, plus a grade point average of 5.5 or more on a 7 point scale; or applicants can present a case based on evidence of qualifications that demonstrates the applicants capacity to pursue the course of study.

In addition to assessing qualifications, the Business School must also be satisfied that adequate supervision and resources are available to support the applicants proposed research.

Domestic Entry requirements

If applicants have an Honours degree (at level 2B or better) it must be relevant to the chosen discipline for the Master of Business (Research); or if applicants are entering from a pass degree, their undergraduate degree must include a major in an approved area, plus a grade point average of 5.5 or more on a 7 point scale; or applicants can present a case based on evidence of qualifications that demonstrates the applicants capacity to pursue the course of study.

In addition to assessing qualifications, the Business School must also be satisfied that adequate supervision and resources are available to support the applicants proposed research.

Research Proposal - the application for admission to the Master of Business (Research) must include details of the proposed research project.

International Entry requirements

If applicants have an Honours degree (at level 2B or better) it must be relevant to the chosen discipline for the Master of Business (Research); or if applicants are entering from a pass degree, their undergraduate degree must include a major in an approved area, plus a grade point average of 5.5 or more on a 7 point scale; or applicants can present a case based on evidence of qualifications that demonstrates the applicants capacity to pursue the course of study.

In addition to assessing qualifications, the Business School must also be satisfied that adequate supervision and resources are available to support the applicants proposed research.

Research Proposal - the application for admission to the Master of Business (Research) must include details of the proposed research project.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

For entry without an Honours degree, students must complete four approved coursework units (48 credit points) and a dissertation (96 credit points) as per the programs of study described under the individual majors.

For entry with an Honours degree students must complete a dissertation (96 credit points).

The QUT Research Student Centre enrols all research students. However any questions regarding enrolment can be directed to the Research Studies Office in the QUT Business School on 3138 1407 or bus.research@qut.edu.au

Facilities

Full-time students are provided with modern, well-appointed office space (which includes access to a desk, computer and telephone). There are break-out areas and meeting rooms where supervisors and industry partners can meet with their students. Discussion groups and small classes are also held in the meeting rooms. These premises offer new and continuing students a work environment conducive to study and progress and demonstrate a continuing commitment to the postgraduate program.

Supervision

You will receive individual supervision by a highly qualified and experienced academic staff member who will guide you through your advanced study.

Mid-year entry students

Mid-year entry students should contact the Research Studies Office in the QUT Business School on 3138 1320 or bus.research@qut.edu.au for enrolment advice and course progression details.

Prerequisites

Prerequisite requirements for the following units are deemed to have been satisfied upon admission to this course, expect for those specifically identified in brackets and italics. Where option (elective) units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the School Research Coordinator prior to enrolment.

Overview

Students can pursue advanced studies within their discipline. Students will develop their capacity to conduct rigorous independent research, as well as undertaking advanced coursework that integrates conceptual and practical issues within their discipline.

Students can study within the following school areas: accountancy, advertising, banking and finance, economics, entrepreneurship and innovation, human resource management, international business, management, marketing and public relations.

Facilities

Full-time students are provided with modern, well-appointed office space (which includes access to a desk, computer and telephone). There are break-out areas and meeting rooms where supervisors and industry partners can meet with their students. Discussion groups and small classes are also held in the meeting rooms. These premises offer new and continuing students a work environment conducive to study and progress and demonstrate a continuing commitment to the postgraduate program.

Domestic Entry requirements

Admission to the DBA course will be based on candidates having completed a minimum of five years senior level business or professional practice experience, and either:

- a Masters degree in Business Administration (MBA) with a GPA of 5.5 (on a scale of 7) or greater from QUT or another recognised institution; or
- a Masters degree in a business discipline area (e.g. Master of Business) with a GPA of 5.5 or greater from QUT or another recognised institution; or
- a Bachelor's degree in a business discipline with first or second class Honours Division A, or equivalent, from QUT or another recognised institution.

Admission is subject to these requirements, plus an interview with the Director Graduate Studies or the Assistant Dean (Research) and mutual acceptance of a study plan on a case-by-case basis, and subject to availability of a suitable supervisor.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course design

Students will complete 288 credit points consisting of:

• Discipline based coursework (48 credit points)
• Research skills training (48 credit points)
• Research project (192 credit points)

Career impact

Graduates will be positioned to be leaders within their industry with particular emphasis on research and development. Specifically, they will be able to:

• practise at a high level in a variety of organisational contexts
• apply innovative solutions to business problems and opportunities, through an understanding of new and relevant scholarship and the role and limitations of research in solving business problems
• present scholarly research to both academic and non-academic audiences.

Weekend doctoral seminars

Students will be expected to attend two intensive weekend doctoral seminars per year.

Assumed knowledge

Applicants are assumed to have postgraduate-level knowledge of their proposed research area, or to develop such knowledge through appropriate discipline based study in the coursework component of the degree.

Abbreviation

DBA

Domestic Course structure

Course design

The program is structured in three phases:

Postgraduate business coursework

This phase consists of 48 credit points of postgraduate discipline units. You will study up to eight coursework units and gain a firm grounding in your chosen field of management.

Research skills training

Phase 2 consists of a further 48 credit points of coursework to prepare you for your research projects. You will be taught how to approach your research using contemporary qualitative and quantitative research methods. There are three compulsory research units (36 credit points) plus an additional 12 credit points of complementary research units.

These 12 credit points may consist of:

- two eGrad School six-credit-point units, or
- one 12-credit-point QUT Business School or University research unit.

The eGrad School brings together a wide range of online activities and resources that are specifically designed for early career researchers, whatever their home university or location. Visit www.egradschool.edu.au

Research component

This phase is the core of the DBA—the research projects. This is where you will show your superior expertise in business administration and your profession. This phase consists of 192 credit points, with

two options for completion:

- one DBA dissertation of approximately 50 000 words documenting the research project or projects, or
- three research papers of publishable quality. Papers are defined as journal articles, book chapters, and other forms of written scholarly works which are subject to a process of peer review similar to that of refereed journals. Each paper would be approximately 15 000 words.

Discipline Coordinator	Accountancy - A/Professor Marion Hutchinson; Advertising - A/Prof Ian Lings; Economics and Finance - Prof Janice How; Marketing - A/Prof Ian Lings; Management - Dr Artemis Chang; Public Relations - A/Prof Ian Lings

International Entry requirements

Candidates must have a relevant first-class or second-class division A (upper division) honours degree or an appropriate masters degree with a recognised research component .

Evidence of financial support such :

- A letter from an approved employer confirming the continuation of your salary; OR
- A signed Scholarship Agreement between QUT and your sponsoring agency; OR
- An accepted letter of offer from QUT for a postgraduate research scholarship; OR
- An approved external scholarship.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

International Student Entry

Admission to the Doctor of Philosophy depends on an applicant's demonstrated research aptitude and the availability of supervision, infrastructure and resources needed for the proposed research project.

An applicant would normally hold:
. a relevant first or second class division A honours degree or equivalent, or
. an appropriate Masters degree or Professional Doctorate (by research or coursework)

Masters and Professional Doctorates degrees by coursework must contain a significant research component, normally no less than 25%.

Holders of Masters and Professional Doctoral by Coursework must:
• have a grade point average of at least 5.0 on a 7 point scale and
• present evidence of research experience and potential for approval

English language proficiency requires International applicants to meet an IELTS overall bandscore of 6.5 with no sub-score below 6.0.

FINANCIAL GUARANTEE
Acceptable forms of evidence include:
- A letter from an approved employer confirming the continuation of your salary; OR
- A signed Scholarship Agreement between QUT and your sponsoring agency; OR
- An accepted letter of offer from QUT for a postgraduate research scholarship; OR
- An approved external scholarship.

Location and duration

The expected duration of the Doctor of Philosophy is three to four years full-time, or six to eight years part-time. Full-time study is normally conducted on-campus at QUT. Part-time and external study options may be available depending on the project, infrastructure requirements and funding arrangements. Although QUT offers this flexibility, candidates must meet minimum attendance requirements and the university must be satisfied that adequate supervision and resources are available.

International student visas require on-campus study to be completed full-time.

Coursework requirement

All PhD students are required to enrol in IFN001 Advanced Information Retrieval Skills. For further information, please refer to Library.

In addition, it is normal for some prescribed coursework to be undertaken to assist in the preparation for the thesis. Generally, the subjects include qualitative methods, quantitative methods, and research methodology. Discipline-specific subjects may also be prescribed. Usually, the coursework is completed at the Gardens Point campus in Brisbane City.

Further information or assistance

For further information about this course, please contact:

Domestic Course structure

Course design

The PhD program normally includes assessed coursework that supports a candidate's research and preparation of a thesis of approximately 100 000 words.

International Course structure

Course design

The PhD program normally includes assessed coursework that supports a candidate's research and preparation of a thesis of approximately 100 000 words.

University Diploma in Information Technology

Handbook

Year	2012
QUT code	IT10
CRICOS	025283M
Duration (full-time international)	
International fee (indicative)	2012: $8436 per Semester
Total credit points	96
Credit points full-time sem.	48
Course Coordinator	Elizabeth McDade
Discipline Coordinator	

International Entry requirements

To be accepted into the program you must have successfully completed senior high school with the required grades. You must also have relevant vocational experience.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	5.0
writing	5.0
reading	5.0
listening	5.0
overall	5.5

QUT International College

International students may upgrade to the QUT Bachelor of Information Technology through QUT International College at our Kelvin Grove campus.

The University Diploma in Information Technology is equivalent to two semesters of the Bachelor of Information Technology degree with a total of 96 credit points (48 standard credit points for a full-time semester).

In the University Diploma program, students study six degree core units as well as two English language units that have been designed to support the other core units.

Progression to the Bachelor of Information Technology

Students who successfully complete these eight units with a grade point average of 4 (on a 7-point scale) and obtain a grade of at least 4 in Professional Communication 2 are given two semesters full-time advanced standing towards their degree and are guaranteed a place in the Bachelor of Information Technology.

Students who complete the University Diploma in Information Technology are also eligible for 96 credit points towards the Bachelor of Corporate Systems Management and Bachelor of Games and Interactive Entertainment.

International Course structure

University Diploma in Information Technology units

- Databases
- Building IT Systems
- Emerging Technology
- Industry Insights
- Programming
- Networks
- Professional Communication 1
- Professional Communication 2

Extension English Sessions

For first-semester students, these sessions take place during weeks two to eight. Other QUTIC students in University Entry Programs may join the sessions, if their timetable permits. The aims of Extension English are to improve the student's English language proficiency in speaking, listening and overall writing ability in a relaxed environment.

In addition to developing these language skills, students have the opportunity to discuss cultural issues and ask questions about studying at university.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Recommended study: Chemistry, Maths C and Physics.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Recommended study: Chemistry, Maths C and Physics.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Professional Recognition

Full professional accreditation from Engineers Australia has been given for all primary majors in this course. In addition, Software Engineering also has full professional accreditation with the Australian Computer Society.

Second Majors

Depending on your choice of primary major, you may have the opportunity to undertake a second major or two minors. A second major is an established set of eight units (96 credit points) in the same discipline. A minor is an established set of four units (48 credit points) in the same discipline or from anywhere in the University. You will select your primary major, second major and/or minors after the completion of your first year.

Special Course Requirements

A candidate for the degree of Bachelor of Engineering must obtain at least 60 days of industrial experience/practice in an engineering environment as approved by the course coordinator.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Domestic Course structure

Work Integrated Learning unit

Students must complete 60 days approved industrial experience in an engineering environment, including 10 days specialist experience in the avionics industry as part of the Work Integrated Learning unit.

Your course

Year 1

Common first-year units include the foundation of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

A solid grounding in the basic terminology and work practices commonly employed in the aerospace industry provide an understanding of air, spacecraft flight control principles and safety aspects of aviation. Exciting wind tunnel tests and understanding of Mach number effects, fundamentals of aircraft performance, estimating range and endurance, take off and landing calculations and light envelopes also feature.

Year 3

Emphasis on the flight control systems of modern aircraft, which is one of the primary subsystems. You are introduced to methods for modelling the dynamic behaviour of aircraft, missiles and spacecraft, and criteria for stability. Systems engineering methodologies and techniques are applied to aerospace engineering projects such as design and operation of a fully autonomous micro air vehicle or rocket.

Year 4

Advanced concepts such as spacecraft guidance and navigation, orbit and altitude determination, dynamics for low earth satellites and also the dynamics of rocket ascent trajectories. Relevant RF and applied electromagnetic aerospace radio radar systems and navigation systems for aircraft are explored. You undertake a one-year project and work integrated learning.

Domestic Course structure

Work Integrated Learning unit

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Your course

Year 1

Common first-year units include the foundations of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

Apply knowledge of fundamental engineering science in design areas of timber and concrete construction. Explore theoretical aspects of geotechnical and materials engineering. Your theoretical understanding is reinforced by practical experience in our laboratories. Develop

skills in construction administration and project management. Engineering statistics mathematical skills also help your understanding of all aspects of engineering design.

Year 3
Increase your knowledge and skills in geotechnical engineering, construction management, law and other related construction practices. Explore steel construction. Continue to develop communication and organisational skills by writing reports, presenting seminars and working in small groups. Choose a second study area.

Year 4
Build on your third year to complete your second study area. Undertake a major project which will bring together all your previously mastered skills, and advance your communication skills in report writing and seminar presentation. You also complete your work integrated learning.

Second majors and minors
You will have the opportunity to undertaken either a 2nd major or two minors (see options below).

Please refer to the rules before making your selection.

Increase your knowledge and skills in geotechnical and water engineering, and explore steel construction, highway and transport engineering. You are also introduced to environmental studies relating to population, resource management and environmental law. Continue to develop communication and organisational skills by writing reports, presenting seminars and working in small groups.

Year 4

Building on your third year by completing a major project which may be industry based will bring together all your previously mastered skills, and advance your communication skills in report writing and seminar presentation. You also complete work integrated learning. There are also additional electives to choose from.

International Course structure

Work Integrated Learning unit

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Your course

Year 1

Common first-year units include the foundations of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

Apply your knowledge of fundamental engineering science in design areas of concrete construction. Explore the theoretical aspects of geotechnical, fluids and sustainable engineering. Your theoretical understanding is reinforced by practical experience in our laboratories. Engineering statistics mathematical skills also help your understanding of all aspects of engineering design.

Year 3

Increase your knowledge and skills in geotechnical and water engineering, and explore steel construction, highway and transport engineering. You are also introduced to environmental studies relating to population, resource management and environmental law. Continue to develop communication and organisational skills by writing reports, presenting seminars and working in small groups.

Year 4

Building on your third year by completing a major project which may be industry based will bring together all your previously mastered skills, and advance your communication skills in report writing and seminar presentation. You also complete work integrated learning. There are also additional electives to choose from.

Discipline Coordinator	Prof Manicka Dhanasekar

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Recommended study: Chemistry, Maths C and Physics.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Recommended study: Chemistry, Maths C and Physics.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Professional Recognition

Full professional accreditation from Engineers Australia has been given for this course.

Second Majors and Minors

You will have the opportunity to undertaken either a 2nd major or two minors (see options below).

CIVIL ENGINEERING Second Major and Minor Options

Second Major:
Structural Engineering
Transport Engineering and Planning
Minors:
Civil Engineering minor
plus
A minor from anywhere in QUT that is outside of the course. (see University Wide Minors)

Please note: The Work Integrated Learning unit (BEB701) and the project unit (BEB801) that are required for professional recognition and were once part of an applications minor have now been moved to the core of the Engineering course.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Special Course Requirements

A candidate for the degree of Bachelor of Engineering (Civil) must obtain at least 60 days of industrial experience/practice in an engineering environment as part of the Work Integrated Learning unit.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Work Integrated Learning unit

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Your course

Year 1

Common first-year units include the foundations of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

Apply knowledge of fundamental engineering science in design areas of timber and concrete construction, and begin to explore theoretical aspects of geotechnical, fluids and sustainable engineering. Your theoretical understanding is reinforced by practical experience in our laboratories. Engineering statistics mathematical skills also help your understanding of all aspects of engineering design.

Year 3

Increase your knowledge and skills in geotechnical and water engineering.

Bachelor of Engineering (Civil)

Explore steel construction, highway and transport engineering. Further develop communication and organisational skills by writing reports, presenting seminars and working in small groups. Choose your second study area.

Year 4

Build on your third year to complete your second study area. Undertake a major project which will bring together all your previously mastered skills, and advance your communication skills in report writing and seminar presentation. You also complete work integrated learning.

Discontinuation

From Semester 1 2010, this primary major has been discontinued. A second major in this discipline is currently under development.

Professional Recognition

Full professional accreditation from Engineers Australia has been given for this course.

Minors

For professional recognition you will undertake an Applications minor which consists of a Work Place Integrated Learning unit, a project unit and two specialised engineering units.

Special Course Requirements

Students must complete at least 60 days industrial experience as part of the Work Integrated Learning unit in order to graduate.

Course Overview

The course is a collaborative program between the areas of Engineering and Information Technology which provides students with the electrical engineering and software development skills to seek employment as software engineers. The engineering component consists of studies in electronic systems engineering while the information technology component concentrates on software engineering. These studies integrate into a cohesive course which gives a wide and advanced study of modern electronic and computing systems. This degree produces computer and electronic engineers especially suited for the development and application of electronic systems and computer systems in all areas of industry.

Career Outcomes

Software Engineers create, maintain and modify computer and software programs such as operating systems or communications software. They may also evaluate and deploy new programming tools and techniques and analyse current software products. You may work in a range of occupational environments. Software engineers can work in Engineering/IT-specific industries, as well as in other organisations requiring software engineering expertise.

Professional Recognition

Full professional accreditation from Engineers Australia and the Australian Computer Society has been given for this course.

Special course requirements

Students are required to complete 60 days approved industrial experience as part of the Work Integrated Learning unit.

Domestic Course structure

Work Integrated Learning unit

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Your course

Year 1

Common first-year units include the foundations of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

You expand your knowledge of software development, and cover the fundamentals of analogue and digital electronics, and the approach to writing software to solve engineering problems. A mathematics unit is completed. Semester two expands on electronics circuit design, introduces fundamentals of telecommunications and networking protocols, and broadens computer programming skills.

Year 3

You build on your knowledge of software engineering principles, covering topics

such as formal software engineering processes with an emphasis on agile methodologies, data structures and algorithms and modern software engineering practices. Microprocessors and embedded digital systems are explored. Principles of systems engineering and project management are introduced and applied through a real-world project.

Year 4

You undertake a major project which may be industry based, in which principles of software engineering learnt to date are brought together. Study also covers embedded systems and security. You also have the opportunity to take one or two electives.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Recommended study: Chemistry, Maths C and Physics.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Recommended study: Chemistry, Maths C and Physics.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Professional Recognition

Full professional accreditation from Engineers Australia has been given for this course.

Second Major and Minors

You will have the opportunity to undertaken either a second major or two minors (see options below).

MECHANICAL ENGINEERING Second Major and Minor Options

Second Major:
Motor Racing Engineering (previously Automotive Engineering)
Engineering Management
Heavy Mechanical Engineering

Minors:
Mechanical Engineering minor
plus
A minor from anywhere in QUT that is outside of the course. (see University Wide Minors)

Please note: The Work Integrated Learning unit (BEB701) and project units (BEB801, BEB802) that are required for professional recognition and were once part of an applications minor have now been moved to the core of the Engineering course.

Special Course Requirements

A candidate for the degree of Bachelor of Engineering (Mechanical) must complete at least 60 days of industrial experience/practice in an engineering environment as part of the Work Integrated Learning unit.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Work Integrated Learning unit

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Your course

Year 1

Common first-year units include the foundations of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

You build your knowledge of engineering science in areas such as fundamentals of design, dynamics, fluid mechanics, manufacturing and mathematics. You also gain practical experience in our laboratories and are introduced to computational fluid dynamics (CFD). Your communication skills will also be advanced with an introduction to engineering drawing and assignment report writing.

Year 3

You increase your knowledge and skills in a number of professional areas, including design, where you are introduced to solids modelling, materials and

manufacture, instrumentation and control, dynamics, thermodynamics and stress analysis. You continue to develop your communication skills by writing assignment reports and presenting seminars. You choose a second study area.

Year 4

In your final year you complete your second study area. You undertake a major project which will bring together all your previously mastered skills, and advance your communication skills in report writing and seminar presentation. You will also undertake your work integrated learning.

Second majors and minors

You will have the opportunity to undertaken either a 2nd major or two minors (see options below).

Please refer to the rules before making your selection.

Mechanical engineering second major and minor options
Second major:

- Motor Racing Engineering (previously Automotive Engineering)
- Engineering Management
- Heavy Mechanical Engineering

Your course

Year 1

Common first-year units include the foundations of engineering mathematics, basic principles of sustainability, electrical engineering, engineering mechanics, engineering design and engineering materials. These units provide a strong, fundamental overview of the three engineering streams: civil, electrical and mechanical.

Year 2

Build your knowledge of fundamental engineering science in areas such as design, dynamics, fluid mechanics, manufacturing and mathematics. You are introduced to technical computing which is a specialist requirement for information technology. You gain practical experience in our laboratories and are introduced to computational fluid dynamics (CFD). Your communication skills are advanced with an introduction to engineering drawing and report writing.

Year 3

You increase your knowledge and skills in professional areas including design and

thermodynamics. You are exposed to specialist areas such as electronics, microprocessors and mechatronics, operations management and machines. Throughout this level you continue to develop your communication skills by writing assignment reports and presenting seminars.

Year 4

In your final year you further your skills in specialised areas such as mechatronic systems design, instrumentation and control and computer intelligence. You also undertake an industry-based project which will bring together all your previously mastered skills, and advance your communication skills in report writing and seminar presentation. You will also complete your work integrated learning.

Course Overview

The course is a collaborative program between the areas of Engineering and Information Technology which provides students with the electrical engineering and software development skills to seek employment as software engineers. The engineering component consists of studies in electronic systems engineering while the information technology component concentrates on software engineering. These studies integrate into a cohesive course which gives a wide and advanced study of modern electronic and computing systems. This degree produces computer and electronic engineers especially suited for the development and application of electronic systems and computer systems in all areas of industry.

Career Outcomes

Software Engineers create, maintain and modify computer and software programs such as operating systems or communications software. They may also evaluate and deploy new programming tools and techniques and analyse current software products. You may work in a range of occupational environments. Software engineers can work in Engineering/IT-specific industries, as well as in other organisations requiring software engineering expertise.

Professional Recognition

Full professional accreditation from Engineers Australia and the Australian Computer Society has been given for this course.

Minors

For professional recognition you will undertake an Applications minor which consists of a Work Place Integrated Learning unit, a project unit and two specialised engineering units.

Special course requirements

Students are required to complete 60 days approved industrial experience as part of the Work Integrated Learning unit.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Minors

For professional recognition you will undertake an Applications minor which consists of a Work Place Integrated Learning unit, a project unit and two specialised engineering units.

International Course structure

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator as part of the Work Integrated Learning unit.

Discipline Coordinator	

Domestic Entry requirements 2012 applications and registrations have closed.

Applications at QTAC and registration with QUT for the 2012 intake were due on the 30 November 2011 and have now closed.

Applicants must:

1. Be a current Year 12 student or returning from a gap year.
2. Complete the Engineering Dean's Scholars questionnaire which will be available via the **Engineering Dean's Scholars website**.
3. Attend an interview.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Recommended study: Chemistry, Maths C and Physics.

International Entry requirements

1. Must be a current Year 12 student or returning from a gap year.
2. Complete the Engineering Dean's Scholars questionnaire which will be available via the **Engineering Dean's Scholars website**.
3. Attend an interview.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Recommended study: Chemistry, Maths C and Physics.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Domestic Student Fees

Students who enrol will receive a full scholarship that includes payment of all undergraduate Higher Education Contribution Scheme (HECS) monies for the bachelor program.

Special Course Requirements

Dean's Scholars are expected to maintain a GPA of 6.0 or above and complete 60 days of Industry experience. For a copy of the program rules and regulations please contact the International and Engagement Portfolio of the Science and Engineering Faculty.

Professional Recognition

Full professional accreditation from Engineers Australia has been given for this course.

Why Choose This Course

This course is a collaboration between the faculties of Science and Engineering, and Creative Industries, allowing you to be taught design and technology skills from the experts in their field.

Massive cultural changes are occuring due to the advent of consumer 3D technology. This has changed the expectations and abilities of people, creating more jobs for the industry.

Queensland is leading the video game industry with figures showing the State earns more than any other from interactive entertainment. The State's game developers generate approximately $55 million per year; a 40 per cent slice of Australia's video games earnings, according to an Australian Bureau of Statistics report. Queensland game companies also employ almost half of the video game industry's workforce, with Brisbane becoming a hub of games talent, producing games for a worldwide audience.

Popular games titles produced in Queensland include Hellboy, Fruit Ninja, the children's game Viva Pinata Party Animals and Star Wars: The Force Unleashed.

Course Structure

The 24-unit degree comprises:

• seven (7) core units including a 24-credit-point final-year project
• eight units in your chosen major
• four units in a secondary area of study, also known as your minor
• four optional units where you can choose units from across QUT to complement your studies.

MAJORS

Choose your primary area of study, also known as your major, from:

Animation This major includes foundation studies in the production of animation and motion graphics; history of animation practices; and programming which includes object orientation, 3D computer graphics and computer generated art. You will develop skills enabling you to work in areas such as computer games, interactive media arts, web applications, sound design, adaptive music and interactive public art works.

Game Design This major provides you with hands-on game design experience, as well as knowledge of narrative and immersion (drawing the player into the game), and game-level design to provide the skills necessary to create interesting and unique game worlds.

Software Technologies This major will prepare you for careers in the game and simulation industries such as software tester, video game tester, game programmer and software tools developer. You will study technological aspects of computer games, games engine and tools development. Companies used to provide 'in-house' training for programming skills, however they are now turning to tertiary institutions to provide appropriately qualified graduates.

MINORS

• Animation
• Advanced Animation*
• Digital Media
• Entrepreneurship
• Game Design
• Legal Issues

• Marketing
• Mathematics for Games
• Mobile and Network Technologies
• Physics for Games
• Software Technologies
• Advanced Software Technologies^
• Sound Design

*Only available to those undertaking the animation major.
^Only available to those undertaking the software technologies major.

Professional Recognition

The Software Technologies major within this course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Your Course

Year 1

In your first year you will undertake five core units, consisting of:

• Computer Games Studies
• Building IT Systems
• Industry Insights
• Introducing Design
• Games Production

You will also undertake three units within your chosen major or minor.

Year 2

Second year consists of units within your chosen major and minor together with electives chosen from anywhere in the University.

Year 3

In your final year, you will extend your professional and technical skills by participating in a major group project to produce a significant piece of digital work using PC, mobile devices, consoles or virtual reality. You will also undertake a Bachelor of Games and Interactive Entertainment design project. You will complete your units for your chosen major, minor and optional units.

Cooperative Education Program

The Cooperative Education Program gives students the opportunity of 10-12 months paid industry placement during your course where they can integrate real experience with what they are learning in their degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.

Students participating in this program enrol in INS011 Cooperative Education 1 and INS012 Cooperative Education 2 in the second semester of the program. The cooperative education program and its mentoring and assessment requirements make up the required contact and assessment of both units. Eligibility criteria apply. International students are not eligible due to visa restrictions.

Part-time students who are working in a professional position related to the BGIE may be able to use their current employment to meet the criteria for completing INS011 Cooperative Edcation 1, after completion of 168 credit points in the Bachelor of Games and Interactive Entertainment, subject to meeting eligibility criteria. Further information about this option is available from Student Services, Level 3, O Block Podium, Gardens Point Campus.

Find out more about the Cooperative Education Program.

Credit for Previous Study

Domestic and international applicants may claim credit for part of the degree, on the basis of completed or partially completed studies, related to the Bachelor of IT.

International students can access advanced standing arrangements on QUT's international site.

Domestic applicants should view the credit information on the Student Services site.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the “Translation Unit Codes” column you are not permitted to enrol in the listed new code.

Why Choose This Course

This course is a collaboration between the Faculties of Science and Engineering, and Creative Industries, allowing you to be taught design and technology skills from the experts in their field. Queensland is leading the video game industry with figures showing the State earns more than any other from interactive entertainment. The State's game developers generate approximately $55 million per year; a 40 per cent slice of Australia's video games earnings, according to an Australian Bureau of Statistics report. Queensland game companies also employ almost half of the video game industry's workforce, with Brisbane becoming a hub of games talent, producing games for a worldwide audience.

Popular games titles produced in Queensland include Hellboy, the children's game Viva Pinata Party Animals and Star Wars: The Force Unleashed.

Course Structure

The 24-unit degree comprises:

• seven (7) core units including a 24 credit-point final-year project
• eight units in your chosen major
• four units in a secondary area of study, also known as your minor
• four optional units where you can choose units from across QUT to complement your studies.

MAJORS

Choose your primary area of study, also known as your major, from:

Animation This major includes foundation studies in the production of animation and motion graphics; history of animation practices; and programming which includes object orientation, 3D computer graphics and computer generated art. You will develop skills enabling you to work in areas such as computer games, interactive media arts, web applications, sound design, adaptive music and interactive public art works.

Game Design This major provides you with hands-on game design experience, as well as knowledge of narrative and immersion (drawing the player into the game), architecture and interior design to encourage the creation of interesting and unique models within the virtual environment.

Software Technologies# This major will

prepare you for careers in the game and simulation industries such as software tester, video game tester, game programmer and software tools developer. You will study technological aspects of computer games, games engine and tools development. Companies used to provide 'in-house' training for programming skills, however they are now turning to tertiary institutions to provide appropriately qualified graduates.

- Advanced Software Technologies^
- Sound Design

#Requirement for this major is an SA or better in Queensland Maths B (or equivalent).
*Only available to those undertaking the animation major.
^Only available to those undertaking the software technologies major.

Professional Recognition
As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

Career Outcomes
Depending on your specialisation, graduates may find employment as a games/digital media programmer, game designer, simulation developer or designer, animator, film and television special effects developer, games/digital media reviewer, video game tester, sound designer, mobile entertainment and communications developer, web developer, digital product strategist, computer systems engineer, multimedia designer, software engineer, or technical officer.

Your Course
Year 1
In your first year you will undertake five core units, consisting of:

- Computer Games Studies
- Building IT Systems
- Industry Insights
- Introducing Design
- Games Production

You will also undertake three units within your chosen major or minor.

Year 2
Second year consists of units within your chosen major and minor together with electives chosen from anywhere in the University.

Year 3
In your final year, you will extend your professional and technical skills by participating in a major group project to produce a significant piece of digital work using PC, mobile devices, consoles or virtual reality. You will also undertake a special topic. You will complete your units for your chosen major, minor and electives.

Note:
The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Financial Support
Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program
The Cooperative Education Program gives students the opportunity of 10-12 months paid industry placement during your course where they can integrate real experience with what they are learning in their degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.

Students participating in this program enrol in INS011 Cooperative Education 1 and INS012 Cooperative Education 2 in the second semester of the program. The cooperative education program and its mentoring and assessment requirements make up the required contact and assessment of both units. Eligibility criteria apply. International students are not eligible due to visa restrictions.

Part-time students who are working in a professional position related to the BGIE may be able to use their current employment to meet the criteria for completing INS011 Cooperative Edcation 1, after completion of 168 credit points in the Bachelor of Games and Interactive Entertainment, subject to meeting eligibility criteria. Further information about this option is available from Student Services, Level 3, O Block Podium, Gardens Point Campus.

Find out more about the Cooperative Education Program.

Choose your primary area of study, also known as your major, from:

Animation
This major includes foundation studies in the production of animation and motion graphics; history of animation practices; and programming which includes object orientation, 3D computer graphics and computer-generated art. You will develop skills enabling you to work in areas such as computer games, interactive media arts, web applications, sound design, adaptive music and interactive public art works.

Digital Media
This major will prepare you for careers as digital game designers, developers and multimedia architects, making use of the rapid convergence of mixing graphics, video, animation and sound to meet the increasingly complex world of digital entertainment. Organisations are also interested in the strategies that multimedia architects contribute to achieving maximum efficiency and competitiveness, such as integrating multimedia content with information in enterprise software systems and the organisation's websites.

Game Design
This major provides you with hands-on game design experience, as well as knowledge of narrative and immersion (drawing the player into the game), and game-level design to provide the skills necessary to create interesting and unique game worlds.

Software Technologies
This major will prepare you for careers in the game and simulation industries such as software tester, video game tester, game programmer and software tools developer. You will study technological aspects of computer games, games engine and tools development. Companies used to provide 'in-house' training for programming skills; however they are now turning to tertiary institutions to provide appropriately qualified graduates.

Minors
- Animation
- Advanced Animation*
- Digital Media
- Entrepreneurship
- Game Design
- Legal Issues
- Marketing
- Mathematics for Games
- Mobile and Network Technologies
- Physics for Games
- Software Technologies
- Advanced Software Technologies^
- Sound Design

Your course
Year 1
In your first year you will undertake five core units, consisting of:
- Computer Games Studies
- Building IT Systems
- Industry Insights
- Introducing Design
- Games Production.

You will also undertake three units within your chosen major or minor.

Year 2
Second year consists of units within your chosen major and minor together with optional units chosen from anywhere in the university.

Year 3
In your final year, you will extend your professional and technical skills by participating in a major group project to produce a significant piece of digital work using PC, mobile devices, consoles or virtual reality. You will also undertake a Bachelor of Games and Interactive Entertainment design project. You will complete your units for your chosen major, minor and optional units.

*Only available to those undertaking the animation major.

^Only available to those undertaking the software technologies major.

International Course structure
Course structure
The 24-unit degree comprises:
- five core units plus a 36-credit-point final-year project (three units equivalent)
- eight units in your chosen major
- four units in a secondary area of study, also known as your minor
- four optional units where you can choose units from across QUT to complement your studies.

Majors
Choose your primary area of study, also known as your major, from:

Animation

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths A, B or C (4, SA)).

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths A, B or C (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Why Choose This Course

You may have a great idea for new mobile software, a new way to conduct business over the net, or even how a business could out-manoeuvre its competitors using information technology. You know the importance of IT and you are excited about what IT can do and either want to develop the next big thing yourself or be able to evaluate, identify, choose and integrate from myriad technologies to arrive at a creative solution. This degree will equip you with the knowledge and skills to realise these aspirations. Whether as a professional within an organisation, as a consultant, or as an entrepreneur, you will be well equipped to take advantage of the demand for business-savvy IT professionals who are able to creatively develop or identify IT solutions to help organisations adapt and grow.

Course Structure

The 24-unit degree comprises:
• 16 core units that build your understanding of the relationships between information, technology, business and people
• eight units in a specialisation of your choice – you could choose to further specialise in information technology, a set of units from a different discipline, or optional units from across QUT to complement your studies.

Specialisation options include:

• adult and community learning
• business systems engineering
• construction management – administration
• creative industries management
• databases
• entrepreneurship
• finance
• forensics
• human resource management
• organisational psychology
• information systems
• information management/information technology management
• international studies
• law
• management
• marketing
• public health

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Your Course

Year 1

In your first semester, you will complete the first four core units:
• Impact of IT
• Industry Insights
• Corporate Systems
• Organisational Databases.

In your second semester, you will complete three more core units:
• Management, People and Organisations
• Project Management Practice
• Information Systems Development.

You will also choose your specialisation and complete your first specialisation unit, or start your electives.

Year 2

In first semester, you will complete three core units:
• Business Analysis

• Technology Management
• Creating New Enterprises.

You will also complete your second specialisation unit or electives.

In second semester, you will complete two core units:
• Marketing
• Web Sites for Electronic Commerce.

You will also complete two more specialisation units or electives.

Year 3
In your first semester, you will complete two core units:
• Enterprise Systems Applications
• Information Systems Consulting.

You will also complete two more specialisation units or electives.

In your second semester, you will complete the last two core units:
• Business Process Modelling
• Corporate Systems Management Project (your final-year showcase project).

You will also complete the last two units of your specialisation or electives.

Course Requirements

Block A: Core Units
16 Units (includes an industry-based project)

Block B: Complementary Studies
Students can select unit set(s) from within the Science and Engineering Faculty or from those offered by other Faculties at QUT. Some options for complementary studies are listed in this document. Alternatively, students may select to take up to 8 elective units with the approval of the Course Coordinator.

If you require assistance in selecting your IT Complementary Studies please contact your Course Coordinator.

UNIT SELECTION PROCESS

• Determine which units you are yet to complete
• Check that you meet the prerequisite requirements for these units
• Check the availability of the unit in the given semester
• Enrol in the appropriate units and ensure you have nominated your major via your online enrolment page

NOTE: It is the student's responsibility to ensure that the correct enrolment program is nominated and prerequisite requirements are met for selected units.

Assistance with planning your enrolment is available from Student Services, Level 3, O Block Podium, Gardens Point campus.

Cooperative Education Program

The Cooperative Education Program gives students the opportunity of 10-12 months paid industry placement during your course where they can integrate real experience with what they are learning in their degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.
Students participating in this program enrol in INB300 Professional Practice in IT in the first semester of the program and in INB325 Corporate Systems Management Project in the second semester of the program. The cooperative education program and its mentoring and assessment requirements make up the required contact and assessment components of both units. Eligibility criteria apply. International students are not eligible due to visa restrictions.

Part-time students who are working in a professional IT position may be able to use their current employment to meet the criteria for completing INB300 Professional Practice in IT, after completion of 168 credit points in the Bachelor of Corporate Systems Management component, subject to meeting eligibility criteria. Further information about this option is available from Student Services, Level 3, O Block Podium, Gardens Point campus or see the unit outline for INB300.

Find out more about the Cooperative Education Program.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the "Translation Unit Codes" column you are not permitted to enrol in the listed new code.

Intermediate Level Electives
If you have not completed ITB008 you will need to replace it with one of the following intermediate level elective units.
• INB120 Corporate Systems
• INB220 Business Analysis
• INB255 Security
• INB272 Interaction Design
Or, an INB300 level unit as approved by the course coordinator

• finance
• forensics
• human resource management
• organisational psychology
• information systems
• information management/information technology management
• international studies
• law
• management
• marketing
• public health

Career Outcomes

Career destinations from this degree are management, analyst or consultant roles such as business analyst, project manager, process analyst, program manager, or data manager in fields

ranging from health to finance to media and entertainment services. If you are interested in creating your own business, you may start your own consultancy service to assist businesses in using information technology and improve their business performance. The career possibilities are numerous and relevant experience is in great demand by industry.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

Your Course

Year 1

In your first semester, you will complete the first four core units:
• Impact of IT
• Industry Insights
• Corporate Systems
• Organisational Databases.

In your second semester, you will complete three more core units:
• Management, People and Organisations
• Project Management Practice
• Information Systems Development.

You will also choose your specialisation and complete your first specialisation unit, or start your electives.

Year 2

In first semester, you will complete three core units:
• Business Analysis
• Technology Management
• Creating New Enterprises.

You will also complete your second specialisation unit or electives.

In second semester, you will complete two core units:
• Marketing
• Web Sites for Electronic Commerce.

You will also complete two more specialisation units or electives.

Year 3

In your first semester, you will complete two core units:
• Enterprise Systems Applications
• Information Systems Consulting.

You will also complete two more specialisation units or electives.

In your second semester, you will complete the last two core units:
• Business Process Modelling
• Corporate Systems Management Project (your final-year showcase project).

You will also complete the last two units of your specialisation or electives.

Note:

The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Financial Support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program

The Cooperative Education Program gives students the opportunity of 10-12 months paid industry placement during your course where they can integrate real experience with what they are learning in their degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.

Students participating in this program enrol in INS011 Cooperative Education 1 and INS012 Cooperative Education 2 in the second semester of the program. The cooperative education program and its mentoring and assessment requirements make up the required contact and assessment of both units. Eligibility criteria apply. International students are not eligible due to visa restrictions.

Part-time students who are working in a professional position related to the BGIE may be able to use their current employment to meet the criteria for completing INS011 Cooperative Edcation 1, after completion of 168 credit points in the Bachelor of Games and Interactive Entertainment, subject to meeting eligibility criteria. Further information about this option is available from Student Services, Level 3, O Block Podium, Gardens Point Campus.

Find out more about the Cooperative Education Program.

Your course
Year 1
In your first semester, you will complete the first four core units:
- Impact of IT
- Industry Insights
- Corporate Systems
- Organisational Databases.

In your second semester, you will complete three more core units:
- Management, People and Organisations
- Project Management Practice
- Information Systems Development.

You will also choose your specialisation and complete your first specialisation unit, or start your electives.

Year 2
In first semester, you will complete three core units:
- Business Analysis
- Technology Management
- Creating New Enterprises.

You will also complete your second specialisation unit or electives.

In second semester, you will complete two core units:
- Marketing
- Web Sites for Electronic Commerce.

You will also complete two more specialisation units or electives.

Year 3
In your first semester, you will complete two core units:
- Enterprise Systems Applications
- Information Systems Consulting.

You will also complete two more specialisation units or electives.

In your second semester, you will complete the last two core units:
- Business Process Modelling
- Corporate Systems Management Project (your final-year showcase project).

You will also complete the last two units of your specialisation or electives.

Course Update

This course is no longer offered to commencing students. Please refer to IT23 for students commencing in 2009.

Course Design

The course structure is divided into three blocks:

Block 1: Common First Year
All students undertake a Common First Year: the first year full-time or first two years part-time of the course. This block is worth 96 credit points.

Block 2: Major
At the end of the Common First Year, students choose a major area of study. Four single majors and three integrated majors are available. The Major extends over the second and third years of the course for full-time students, and the third to sixth years for part-time students. Students select one of the following Majors:

- Data Communications (DAT)
- Electronic Commerce (ELC)
- Emerging Technologies (EMT)
- Information Systems (ISS)
- Software Engineering (SOF)
- Data Communications/Information Systems (DCI)
- Data Communications/Software Engineering (CDC)

Block 3: General Electives
Students choose the composition of the third block of the course, which extends over the later years of the course and is worth:
- 48 credit points for majors: DAT, SOF, ELC, and ISS; OR
- 24 credit points for majors: EMT, DCI and CDC

Students are encouraged to consider selecting units from outside the Faculty in order to broaden their range of skills.

This course is offered for continuing students only. Please refer to IT23 for students commencing from 2009.

Professional Recognition

Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society (ACS) as members.

Co-operative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the "Translation Unit Codes" column you are not permitted to enrol in the listed new code.

Course Structure	
From semester one, 2009 this course will not be available for commencing students. IT22 will only be available for continuing students. New students - please refer to IT23. Please contact enquiry.scitech@qut.edu.au for any enquiries.	
The course structure consists of 10 IT Core Studies Units (Block A), 6 Major Units (Block B) if applicable, and 8 Complementary Studies Area Units (Block C). For those students who choose the Generic No Major option, students replace the major units with any 6 ITBxxx units provided they meet the prerequisites.	
Eight (8) Block A units are completed in the first year, while the remaining two (2) Block A units are completed later in the course.	
Block C Complementary Studies Area (8 units): Students choose the composition which may include: a second IT Major (6 units) or an approved minor (4 units) and 4 electives or 8 specified electives as approved by the Course Coordinator.

Financial Support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Students wishing to participate in the Cooperative Education Program should be aware that they will not receive financial support as a Dean's Scholar for the duration of the placement.

Find out more about the Cooperative Education Program.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4,SA) and Maths A, B or C (4,SA)).

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4,SA) and Maths A, B or C (4,SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Pathways

You have the opportunity to choose a study pathway:

• **professional pathway** – you will learn how to think strategically, identify opportunities and solve problems that we don't even know are problems yet. This pathway will enable you to acquire the business and IT skills to have a career as an IT professional within any industry.

• **research pathway** – if you are interested in shaping the future of the IT industry you can pursue a research career. You will have opportunities to work with researchers on projects and progress on to an honours degree. You will have access to world-leading researchers within the Faculty.

• **entrepreneurship pathway** – you now have the opportunity to gain the entrepreneurial skills to develop an idea into a commercial opportunity. You will be able to take advantage of the Faculty's close relationship with local technology entrepreneurs to learn from their experiences.

In 2001, the Faculty introduced an accelerated Honours program to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of the Bachelor of Information Technology which would be counted both for completion of the degree and towards Honours. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

The Dean's Scholars program was introduced in Semester 1, 2006. This program provides a scholarship for OP 1 and 2 students throughout their Bachelor and Honours degrees. Students in the program are required to maintain a high GPA to continue to qualify for the scholarship each semester. Students in the Dean's Scholars program will be able to take advantage of the Accelerated Honours program. Students in the Dean's Scholars program will have an option to follow an accelerated pathway through the Bachelor of Information Technology, allowing them to complete the Bachelor of Information Technology course plus the Bachelor of Information (Honours) course in a total of three years.

To encourage students to enter the Dean's Scholars program, domestic students have their undergraduate HECS paid by the Faculty and those proceeding to Honour's level will also receive full HECS support. International students who have completed a Year 12 education in Australia and meet the entry requirements for the program will have a third of their tuition fees paid by the Faculty for the undergraduate and Honours program.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete IT23 with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Design Your Own Degree

The Bachelor of Information Technology provides you with the practical skills and theoretical knowledge to become an effective professional.

The 24-unit degree comprises:

• **eight core units** – four introductory units in first semester to introduce you to the breadth of information technology and its relationship to modern society. Then there are four advanced units spread over the rest of your degree program to develop your professional skills in preparation for your career

• **four breadth units** (intermediate level units) – these units give you broad technical experience across a range of fields in information technology. They also give you an introduction to choose the specialisation you wish to focus on

• **four specialisation units** (advanced level units) – these units allow you to focus on your chosen area of study, or you may choose to continue to broaden your information technology skills. This option allows you to study across a selection of study areas rather than focusing on one specialisation

• **eight optional units** – these units allow you to customise your degree by studying in another professional discipline (for example, business, health, or science). Or you may choose to gain further depth in other areas of information technology.

SPECIALISATION AREAS

Business Process Management
Learn how to increase business efficiency. All businesses require IT to effectively and efficiently support their operations. This specialisation provides you with the skills required to improve business performance.

Data Warehousing
Database technology, the software that enables us to buy concert tickets online, download music or book a flight, is sophisticated and complex. You will gain knowledge and skills in the accurate recording, rapid retrieval and management of data that is essential to modern society. You will learn how to mine existing sets of data to extract hidden knowledge.

Digital Environments
Study how developments in IT shape society through applications like FaceBook, MySpace, Second Life, smart phones, iPods and gaming devices.

Enterprise Systems
Enterprise systems from vendors like SAP, Mincom and Oracle form the fundamental structure of organisational processes in most large organisations. You will gain hands-on experience with successful enterprise systems to enable you to put into practice the theory that supports business activities.

Network Systems
Learn to tackle emerging network issues such as security, network monitoring and high availability design, and gain up-to-date technical skills for the administration and management of computer networks.

Software Engineering
Software is the invisible infrastructure of modern society. Almost all aspects of business and social endeavour are facilitated by software applications or devices controlled by software. You will learn how leading-edge techniques and technologies enable you to design and implement complex software systems for use in a wide range of domains.

Web Technologies
Web technologies are the principal mechanism for integrating the various applications that exist within an organisation. They also provide the main user interface for most applications used by internal and external clients, including modern web-based interfaces. You will develop practical skills to help organisations use web technologies effectively in deploying a range of applications and services.

Career Outcomes

Information technology is an integral part of all commercial, industrial, government, social and personal activities. In the long term, your career opportunities are unbounded. Some information technology graduates retain a technical focus in roles such as web developer, database manager, network administrator, electronic commerce developer, data communications specialist, software engineer, systems programmer, computer scientist, systems analyst or programmer. Others evolve into domain experts as chief technology officers, chief information officers, managers, executives, business analysts, entrepreneurs or researchers. Graduates have the opportunity to achieve the highest levels of their profession.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Your Course

Year 1
In your first semester you will explore how information technology has changed the world and what the possibilities are for the future. You will look at the details of information, computing and communication technologies to understand how they work. You will take part in hands-on projects developing small information technology systems.

Core units for Year 1:
• Impact of IT
• Emerging Technology
• Industry Insights
• Building IT Systems

In Semester 2 you will undertake three breadth units and one elective.

Year 2
In your second year you will take part in a collaborative team setting, working on small projects that integrate the skills you learnt during Year 1. You will also start studying more advanced units in your chosen field of specialisation.

Core unit for Year 2:
• Scalable Systems Development

Throughout Year 2 you will undertake one breadth unit, two specialisation units and four elective units.

Year 3
In third year you will be able to undertake workplace experience opportunities offered by the Faculty, while earning credit towards your degree. You will continue studying in your area of specialisation. In your final semester you will develop a major project, showcasing what you have learnt during your degree—providing you with a key part of your portfolio when seeking a job.

Core units for Year 3:
• Professional Practice in IT
• The Business of IT
• IT Capstone Project

Throughout Year 3 you will undertake two specialisation units and three elective units.

Cooperative Education Program

An optional half or full year period of paid work experience is available to eligible full-time students. Students participating in this program enrol in INS011 Co-Operative Education 1 in the first semester of the program and in INS012 Co-Operative Education 2 in the second semester of the program. The cooperative

education program and its mentoring and assessment requirements make up the required contact and assessment components of both units. Eligibility criteria apply. International students are not eligible due to visa restrictions. International students wishing to undertake a similar program should consider applying to take part in a CEED project or for an ACS Foundation scholarship.

Part-time students who are working in a professional IT position may be able to use their current employment to meet the criteria for completing INB300 Professional Practice in IT, after completion of 168 credit points in the Bachelor of Information Technology. Further information about this option is available from the unit outline for INB300.

Find out more about the Cooperative Education Program.

- four breadth units (intermediate level units) - these units give you broad technical experience across a range of fields in information technology. They also give you an introduction to choose the specialisation you wish to focus on
- four specialisation units (advanced level units) - these units allow you to focus on your chosen area of study, or you may choose to continue to broaden your information technology skills. This option allows you to study across a selection of study areas rather than focusing on one specialisation
- eight optional units - these units allow you to customise your degree by studying in another professional discipline (for example, business, health, or science). Or you may choose to gain further depth in other areas of information technology.

Specialisation areas

Business Process Management

Learn how to increase business efficiency. All businesses require IT to effectively and efficiently support their operations. This specialisation provides you with the skills required to improve business performance.

Data Warehousing

Database technology, the software that enables us to buy concert tickets online, download music or book a flight, is sophisticated and complex. You will gain knowledge and skills in the accurate recording, rapid retrieval and management of data that is essential to modern society. You will learn how to search existing sets of data to extract hidden knowledge.

Digital Environments

Study how developments in IT shape society through applications like Facebook, Twitter, Second Life, smart phones, iPods and gaming devices.

Enterprise Systems

Enterprise systems from vendors like SAP, Mincom and Oracle form the fundamental structure of organisational processes in most large organisations. You will gain hands-on experience with successful enterprise systems to enable you to put into practice the theory that supports business activities.

Network Systems

Learn to tackle emerging network issues such as security, network monitoring and high availability design, and gain up-to-date technical skills for the administration and management of computer networks.

Software Engineering

Software is the invisible infrastructure of modern society. Almost all aspects of business and social endeavour are facilitated by software applications or devices controlled by software. You will learn leading-edge techniques and technologies to enable you to design and implement complex software systems for use in a wide range of domains.

Web Technologies

Web technologies are the principal mechanism for integrating the various applications that exist within an organisation. They also provide the main user interface for most applications used by internal and external clients, including modern web-based interfaces. You will develop practical skills to help organisations use web technologies effectively in deploying a range of applications and services.

Your course

Year 1

In your first semester you will explore how information technology has changed the world and what the possibilities are for the future. You will look at the details of information, computing and communication technologies to understand how they work. You will take part in hands-on projects developing small information technology systems.

Core units for Semester 1:
- Impact of IT
- Emerging Technology
- Industry Insights
- Building IT Systems.

In Semester 2 you will undertake three breadth units and one optional unit.

Year 2

In your second year you will take part in a collaborative team setting, working on small projects that integrate the skills you learnt during Year 1. You will also start studying more advanced units in your chosen field of specialisation.

Core unit for Year 2:
- Scalable Systems Development.

Throughout Year 2 you will undertake a mix of breadth, specialisation and optional units.

Year 3

In third year you will be able to undertake workplace experience opportunities offered by the Faculty. In your final semester you will develop a major project, which will showcase what you have learnt during your degree and provide you with a key part of your portfolio when seeking a job.

Core units for Year 3:
- Professional Practice in IT
- The Business of IT
- IT Capstone Project.

Handbook

Year	2012
QUT code	IT23
CRICOS	012656E
Duration (full-time)	3 years
OP	1
Rank	99
Campus	Gardens Point
Domestic fee (indicative)	2012: CSP $4,025 per Semester
International fee (indicative)	2012: $11,700 per Semester
Total credit points	
Start months	February Fixed closing date - 30 November
Int. Start Months	February Fixed closing date - 30 November
Course Coordinator	Richard Thomas
Discipline Coordinator	

Domestic Entry requirements 2012 applications and registrations have closed.

Applications at QTAC and submission of the online questionnaire with QUT for 2012 was due on the 30 November 2011 and have now closed. Late applications and/or questionnaire submissions will not be accepted.

Applicants are required to complete an online questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths A, B or C (4, SA)).

International Entry requirements

Must be a current Year 12 student or students returning from a gap year who completed their Year 12 education in Australia; successful questionnaire; an interview may be required.

Shortlisted registrants may be required to attend an interview in December and will be notified of date and venue after registrations close.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths A, B or C (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Financial support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 6 or 12 months paid industry placement during your course where you can integrate real experience with what you are learning in your degree.

Find out more about the Cooperative Education Program.

Professional Recognition

As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the "Translation Unit Codes" column you are not permitted to enrol in the listed new code

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Design your own degree

The Bachelor of Information Technology provides you with the practical skills and theoretical knowledge to become an effective professional. The 24-unit degree comprises:

- 8 core units - 4 introductory units in

first semester to introduce you to the breadth of information technology and its relationship to modern society. Then there are 4 advanced units spread over the rest of your degree program to develop your professional skills in preparation for your career
- 4 breadth units (intermediate level units) - these units give you broad technical experience across a range of fields in information technology. They also give you an introduction to choose the specialisation you wish to focus on
- 4 specialisation units (advanced level units) - these units allow you to focus on your chosen area of study, or you may choose to continue to broaden your information technology skills. This option allows you to study across a selection of study areas rather than focusing on one specialisation
- 8 optional units - these units allow you to customise your degree by studying in another professional discipline (for example, business, health, or science). Or you may choose to gain further depth in other areas of information technology.

Your course

Year 1

In your first semester you will explore how information technology has changed the world and what the possibilities are for the future. You will look at the details of information, computing and communication technologies to understand how they work. You will take part in hands-on projects developing small information technology systems.

Core units for Year 1:

- Industry Insights
- Building IT Systems.

In Semester 2 you will undertake three breadth units and one optional unit.

Year 2

In your second year you will take part in a collaborative team setting, working on small projects that integrate the skills you learnt during Year 1. You will also start studying more advanced units in your chosen field of specialisation.

Core unit for Year 2:
- Scalable Systems Development.

Throughout Year 2 you will undertake one breadth unit, two specialisation units and four optional units.

Year 3

In third year you will be able to undertake workplace experience opportunities offered by the Faculty, while earning credit towards your degree. You will continue studying in your area of specialisation. In your final semester you will develop a major project, which will showcase what you have learnt during your degree and provide you with a key part of your portfolio when seeking a job.

Core units for Year 3:
- Professional Practice in IT
- The Business of IT
- IT Capstone Project.

Throughout Year 3 you will undertake two specialisation units and three optional units.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Discontinued Course

LS50 has been discontinued and replaced by ST50. LS50 is for continuing students only.

Course Design

The Bachelor of Biotechnology Innovation, a degree with Honours, was the first degree of its type in Australia and aims to provide highly trained and motivated graduates skilled in the science and business and biotechnology. Graduates undertake the same basic and advanced biotechnology science as students in other science-based courses, gaining requisite theoretical and practical skills. In this course, however, basic and advanced business units are undertaken highlighting entrepreneurial skills and biotechnology commercialisation. Integration and synthesis of the disparate disciplines is an essential component of the course.

Unique to the course is the Student BioEnterprise Scheme, a proactive project-based learning exercise promoting the integration of theory and practice in business and science. Students form companies and operate in the company environment over the entire duration of their course. Companies invent biotechnology-oriented products or processes and formulate strategies to bring them from laboratory to the marketplace under the guidance of industry and academic mentors. Students have many opportunities to network with industry through the Student BioEnterprise Scheme and numerous Ausbiotech functions, events and conferences. Companies can also undertake industry-based or consultancy projects with an industry partner in the final year of the course.

Professional Recognition

On graduation, you will be immediately eligible for graduate membership of AusBiotech Ltd and the Australian Society for Biochemistry and Molecular Biology (ASBMB).

Why Choose This Course

The course's flexible structure allows you to choose to study only mathematics units, or include some units from another area of interest, such as science, business or information technology. You will be able to design a program to suit your interests and career aspirations by combining advanced units from a number of mathematical specialisations.

Financial Support

You should consider applying for an industry-sponsored mathematics bursary to help you financially throughout your studies. For further information visit scholarships.

Your Course

Year 1

You will study core units in mathematics and statistics. These core units include studies in calculus, algebra, vectors and matrices, computational mathematics, data analysis and statistical modelling.

Year 2

You will build on your core studies by advancing to more specialised topics such as advanced calculus, linear algebra, differential equations, operations research, data visualisation, statistics or modelling. Your practical assignments will tackle problems faced in the real world. You can choose to study only mathematics units or include units from another area of interest, such as science, business, information technology or a language.

Year 3

Refine your studies by combining advanced units from the following specialisations:

• applied mathematics: using mathematical techniques to solve real-world problems
• computational mathematics: using computers and numerical techniques to find solutions to complex problems which cannot be solved analytically
• discrete mathematics: the mathematics of numbers, including sets, fields, rings and groups which is used extensively in information security
• financial mathematics: applying a wide variety of mathematical techniques for use in a range of financial areas
• mathematical modelling: using mathematical techniques to develop a model or explanation of a real-world problem which can then be tested
• operations research: optimising complex systems including queuing, scheduling or allocation of resources
• scientific computation and visualisation: large-scale scientific modelling and creating graphical representations using visualisation techniques
• statistics: collecting data in an appropriate format, experimental design, analysis of data and using data to make predictions
• statistical modelling: building and analysing models of systems involving probability and variables.

Code	Title
Course Notes	
Students complete at least 192 credit points (16 twelve credit point units) of Mathematics units according to the following requirements:	
Level 1 Mathematics Units	
Students must complete the following Level 1 Mathematics units:	
MAB101	Statistical Data Analysis 1
MAB120	Algebra and Calculus
MAB121	Calculus and Differential Equations
MAB122	Algebra and Analytic Geometry
MAB210	Statistical Modelling 1
MAB220	Computational Mathematics 1
Note: MAB120 is for students who do not have an exit assessment of at least Sound Achievement in four semesters of both Senior Mathematics B and Senior Mathematics C. Students with at least Sound Achievement in both Mathematics B and C (or equivalent) may select a level 2 Mathematics unit instead of MAB120.	
Level 2 and 3 Mathematics Units	
At least 120 credit points (10 twelve credit point units) must be taken from Level 2 and Level 3 Mathematics units with at least 48 credit points (4 twelve credit point units) from Level 3 mathematics units	
Students must complete:	
MAB311	Advanced Calculus
MAB312	Linear Algebra
Other Units - Complementary Studies	
Up to a maximum of 96 credit points may be taken as electives with not more than 48 credit points from first level units.

Overview

The Dean's Scholars Program in Mathematics offers an enriched course of study, with an early introduction to mathematical research, for students who obtain outstanding levels of academic achievement at Secondary School. At the same time it provides the option of an accelerated pathway by which these students are able to complete the Bachelor of Mathematics course plus the Bachelor of Applied Science (Honours) course in a total of just three years.

Mathematics Dean's scholars are able to undertake research enrichment units and individually-tailored tutorial programs:

Sample Structure

Year 2, Semester 2 (48 cp)	
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (48 cp)	
Year 3, Semester 1 (48 cp)	

Bachelor of Mathematics & Bachelor of Applied Science (Honours) - Dean's Scholars Honours Program

Dean's Scholars Program enrichment unit:	
SCB501-1	Research Project for Dean's Scholars
Normal BMaths and BAppSc(Hons) units: BAppSc Coursework (36 cp)	
Year 3, Semester 2 (48 cp)	
Dean's Scholars Program enrichment unit:	
SCB501-2	Research Project for Dean's Scholars
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (36 cp)	
Year 4, Semester 1 (48 cp) and Semester 2 (48 cp)	
Normal BMaths and BAppSc(Hons) units: BAppSc(Hons) Coursework/Research (48 cp)	
Normal BMaths and BAppSc(Hons) units: BAppSc(Hons) Coursework/Research (48 cp)	
Notes:	
- The exact timing of Dean's Scholars Program enrichment units may be varied to suit the student's chosen program of study.	
- It is also possible to complete the program in 3.5 years using a combination of the 3 and 4 year structures. There is also flexibility for students to undertake Dean's Scholars Program enrichment units during the summer semesters between years 1 and 2, and years 2 and 3 to lighten regular semester study loads or to assist in acceleration.

Credit points full-time sem.	48
Credit points part-time sem.	24
Start months	February, July
Int. Start Months	February, July Conditions apply for July entry.
Deferment	You can defer your offer and postpone the start of your course for one year
Course Coordinator	Dr Marion Bateson

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)).

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course update

As of 2013, this course will only be available for continuing Bachelor of Applied Science students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year units.
New students - please refer to ST01 Bachelor of Science. Please contact sef.enquiry@qut.edu.au for any enquiries.

Design your own degree

You have a broad range of options to choose from and the flexibility to create your own personal science degree program. If you are not sure of your career direction, don't worry because this decision can be delayed until after you have sampled a range of science disciplines during your first year of study. The 24 unit degree comprises:

First-year program (eight units)
The first year is designed to give you experience in a wide range of basic science disciplines, consisting of three general foundation units, one maths unit, and four major foundation units. Some of these foundation sciences, such as mathematics and chemistry, will underpin all of your later studies. All of the first-year studies are designed to challenge and engage you in the wonders of science, regardless of your prior exposure to science studies. You should seek advice from our expert staff of your choice of major to suit your interests and capabilities, and your personal and career aspirations.

Major (eight units)
Choose your main specialisation study area (your major) from the list below. This will form the basis for your qualification, for example Bachelor of Applied Science (Biotechnology). As QUT courses are designed in close consultation with industry you will be eligible for the relevant professional accreditation when you graduate. The major areas available are:

Bachelor of Applied Science (Biochemistry)

Career Outcomes

Strong employment opportunities for biochemists exist around the world in both the private and government sectors of industry. QUT graduates skilled in biochemistry can find career opportunities in diagnostic and analytical laboratories, universities, hospitals and health departments, pharmaceutical companies, primary and agricultural industries and departments, food industry laboratories, environmental agencies, and veterinary pathology laboratories. Alternative career paths in the marketing and sales of biotechnology equipment or commercialisation and management of biological products and processes are available.

For those wishing to enter research in honours and PhD programs, biochemistry offers a huge scope of intriguing and intellectually rewarding projects.

Professional Recognition

Graduates are eligible for membership of the Australian Society for Biochemistry and Molecular Biology (ASBMB), and in some cases the Australasian Association of Clinical Biochemists (AACB).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. Following these introductory studies you should be in a position to confirm your choice of a major area of study.

Year 2
You will build on the concepts introduced in first year and you will consider molecular interactions in cell metabolism and function and the flow of energy and information within the cell.

Year 3
You will encounter current experimental theory and practice in biochemistry, including the exciting new developments in molecular modelling, metabolism and proteomics. You will be provided with knowledge and analytical skills that will serve you well in the workforce or lead to further study.

Career Outcomes

As a QUT biotechnology graduate you will have a wide range of exciting career opportunities available to you across a number of existing and emerging global industries. New career opportunities include nanotechnology, proteomics, materials science, molecular farming and bioinformatics. Our biotechnology graduates find career opportunities in medical and agricultural research, product development or marketing, hospitals and diagnostic laboratories, in teaching and in many areas of government and private industry.

Professional Recognition

Graduates are eligible for membership of AusBiotech Ltd, Australian Society for Biochemistry and Molecular Biology (ASBMB) and, depending on unit selection, Australian Society for Medical Research (ASMR) and the Australian Society for Microbiology (ASM).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. You will also be introduced to the structure and function of DNA, RNA and proteins, and their role in cell function. Following these introductory studies you should be in a position to confirm your choice of a major area of study.

Year 2
You will develop a more detailed understanding of biochemical principles, cell biology and the structure and function of biomolecules. A strong focus is placed on developing practical skills in molecular biology and cell culture that will underpin your future studies. You will have access to real-world molecular biology laboratories with modern equipment and highly skilled tutors. You will also be introduced to bioinformatics through hands-on computer-based exercises.

Year 3
You will further develop both theoretical and practical skills in DNA manipulation and genetic engineering as well as advanced bioinformatics. You will also focus on specific applications in biotechnology including current advances in diagnostics and detection, cell culture and tissue engineering in both animal and plant systems, functional genomics, proteomics and microarray technology. Teaching approaches at this level will encourage critical thinking, and problem-

based learning, and you will undertake a mix of independent activities and group work.

New students - please refer to ST01 Bachelor of Science. Please contact sef.enquiry@qut.edu.au for any enquiries.

Career Outcomes

Among a diverse range of employment opportunities, you may become an industrial chemist, materials scientist, environmental chemist, quality control analyst, laboratory supervisor, food chemistry, or an organic/inorganic chemist. Your interactions with QUT experts in current fields of interest including drug development, clay and minerals chemistry, renewable energy sources, nanotechnology, environmental monitoring, and applications of modern analytical instrumentation may lead to careers in these areas.

QUT graduates are sought after by police and other forensics laboratories because of their extensive practical training using modern analytical instrumentation.

With the addition of a postgraduate diploma in education, you may wish to pursue opportunities in the teaching profession.

Professional Recognition

Graduates completing the chemistry major with the chemistry for industry second major or forensic science major are eligible for membership of the Royal Australian Chemical Insitute (RACI).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. If you are taking the chemistry for industry second major you will be provided with opportunities to develop further laboratory skills. If you are taking chemistry with forensic science, you will also cover introductory life science topics that prepare you for important tasks like DNA profiling.

Year 2
You will begin more specialised study of the core chemistry sub-disciplines of analytical inorganic, organic and physical chemistry. In the chemistry for industry second major you will begin extensive studies in analytical chemistry, chemical and nanotechnologies. Problem solving and the development of critical thinking will be emphasised. You should expect plenty of practical work and hands-on experience. The communication skills, generic scientific skills, and report preparation tools you will learn at QUT will be vital to your future employment.

Year 3
You will tackle more challenging

advanced concepts in the core sub-disciplines of chemical science. In this second major, you will have the advantage of field trips to major industrial sites. All third year chemistry studies will undertake a one-semester research project under the guidance of experienced staff. Students will be trained in start-of-the-art techniques and will have the opportunity to pursue a field of interest to them. Whether you are seeking your first job or contemplating higher research degree studies, you will have access to advice from qualified professionals.

overall	6.5

Course update

As of 2013, this course will only be available for continuing Bachelor of Applied Science students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year units.
New students - please refer to ST01 Bachelor of Science. Please contact sef.enquiry@qut.edu.au for any enquiries.

Career Outcomes

Ecologists find rewarding careers in research and monitoring with government departments responsible for sustainability, wildlife conservation and national parks, primary industries, pest management, fisheries, forestry and museums. They also find work in private firms engaged in research and consultancy. Positions include conservation officer, sustainable resources officer, wildlife manager, fisheries biologist, scientific or technical officer, teacher or research scientist. Employment in more specialised areas is available, usually requiring study beyond the first degree.

Professional Recognition

Professional recognition is achieved through membership of a scientific society, for example, the Ecological Society of Australia (ESA) or the Australian Wildlife Management Society (AWMS) and participation in its meetings and professional activities.

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. You will also gain key basic knowledge about the natural systems that exist on plant earth and the way these systems interact.

Year 2
You will focus on background concepts important for understanding ecology and the environment. You will examine in detail the fundamental concepts in ecology and evolution, and the basic processes important in the formation of the physical environment that are fundamental to understanding natural resource systems. You will learn about the dynamics of plant and animal populations and the interactions that influence them, and the basic methods used to describe and monitor populations. A background in fundamental genetics and evolution will provide the framework for understanding and interpreting variation in biological systems. You will expand on basic concepts of data handling and analysis so that you have a sound knowledge of experimental design and its application to experimental studies in ecology and environmental science. You will also learn how to design and conduct ecological field studies and analyse and communicate information.

Year 3
The fundamental knowledge of ecology,

evolution and experimental design is extended to develop the theoretical and applied knowledge used by practising ecologists. You will cover in detail the three main areas where ecology is applied – approaches to the conservation of rare and endangered species and ecosystems, the management of invasives and other pest species, and the sustainable exploitation of wild populations. These aspects are also covered in guest lectures by industry professionals, and by involving you in detailed case studies and field projects that examine particular management questions in ecology.

International Course structure

Domestic Entry requirements

Recommended Study

At least one of the sciences

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)).

International Entry requirements

Recommended Study

At least one of the sciences

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course update

As of 2013, this course will only be available for continuing Bachelor of Applied Science students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year units.
New students - please refer to ST01 Bachelor of Science. Please contact sef.enquiry@qut.edu.au for any enquiries.

Career Outcomes

Environmental scientists are continually needed in a wide variety of planning, management, monitoring and research careers. These roles are usually found in government departments and agencies, in local councils, in consultancy, and in industrial and mining companies. As an environmental science graduate you could be working in urban, rural or remote settings depending on your interests.

Graduates are equipped to assess resources, implement environmental impact programs, analyse and interpret environmental data and formulate contingency plans in a wide variety of areas. These include strategic land-use planning, waste disposal, pollution measurement and control, coastal protection, environmental impact of mining, tourism and urban development, rehabilitation and reforestation of degraded sites, ground water assessment and modelling, flood plain planning, erosion control, and marine science.

Professional Recognition

Graduates are eligible for membership of the Environment Institute of Australia and New Zealand (EIANZ) and a variety of other scientific societies, including the Soil Science Society of Australia (SSSA) and the Ecological Society of Australia (ESA).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. You will be provided with a good introduction to environmental science issues and scientific problem solving as well as a basic knowledge about the natural systems that exist on plant earth and the way these systems interact. Following these introductory studies you should be in a position to confirm your choice of major area of study.

Year 2
You will learn fundamental concepts and gain practical experience in understanding and investigating earth surface systems and processes both in the laboratory and in the field. At the same time, you will be introduced to the design of field and laboratory experiments and you will have the option to pursue a more ecologically or geologically oriented direction. You will then be introduced to elements of environmental chemistry in air, water and soil, including a number of field trips.

Year 3
You will receive more advanced training in the essential areas of environmental systems and how we can model them, and you will survey and map natural resources during field trips. You will be introduced to the use of spatial science to assess and map environmental systems using geographic information systems and remote sensing. Case studies and problem-solving methods are used to introduce you to a wide variety of issues in sustainable management.

Career Outcomes

Forensic science work is popular, rewarding and highly competitive. Generally it involves employment in laboratories handling criminal casework in areas including forensic biology, chemistry, and toxicology. Crime scene investigation is another interesting profession which may be attained by joining the police force.

Professional Recognition

Graduates who complete the forensic science major in conjunction with a life science major in biochemistry, biotechnology or microbiology are eligible for membership of the Australian and New Zealand Forensic Society (ANZFSS), AusBiotech Ltd, and the Australian Society for Biochemistry and Molecular Biology (ASBMB).

Graduates who complete the forensic science major in conjunction with the chemistry major are eligible for membership of the Australian and New Zealand Forensic Science Society (ANZFSS) and the Royal Australian Chemical Institute (RACI).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. Following these introductory studies you should be in a position to confirm your choice of major area of study.

Year 2
Your forensic studies program begins with an introduction to crime scenes and your lectures will be accompanied by laboratory work including mock crime scenes. You will learn about the legal aspects of forensic science, and take a big picture approach to the nature and analysis of physical and biological evidence. You can expand your knowledge through dedicated units in forensic evidence, analytical chemistry and biological methods of analysis.

Year 3
You will build upon your previous studies to further develop your knowledge and skills in areas of crime scene investigation such as forensic photography and fingerprinting as well as interpretation of physical evidence. You will learn about the sophisticated instrumentation and interpretation of results used in the analysis of drugs, poisons and DNA. Hand-on laboratory sessions will provide

knowledge of expanded applications in advanced forensic analysis and toxicology. All theory is complemented and supplemented by focused workshops and laboratory classes.

Career Outcomes

Employment opportunities exist within a variety of government organisations and consulting companies with work ranging from field geologists to research scientists. Exploration geologists are employed by mining and hydrocarbon exploration companies where they may be involved in underground geological mapping, evaluation of ore reserves, production control, or exploration for new mineral or oil and gas deposits. They may be based in remote settings or major cities. Graduates may work in computing, data modelling and remote sensing in any of these areas.

An honours degree has traditionally been required by many employers including the larger mining and exploration companies.

Professional Recognition

Graduates are eligible for membership of the Australasian Institute of Mining and Metallurgy (AIMM), Australian Institute of Geoscientists (AIG), and the Geological Society of Australia (GSA).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. You will also select specific units that will help you decide whether to pursue career paths in exploration or environmental geoscience. Following these introductory studies you should be in a position to confirm your choice of major area of study.

Year 2
You will learn fundamental concepts and gain practical experience in identifying and analysing earth materials, both in the laboratory and in the field. At the same time, you will be introduced to the geological processes that govern the evolution of the earth's surface (sedimentary environments). You will then be introduced to rocks and processes that occur deeper within the earth (igneous and metamorphic realms) and longer term geological processes including structural deformation and stratigraphic evolution. The year culminates with you being able to solve real-world geological problems based on data you collect in the field.

Year 3
You will receive more advanced training in the fundamental areas of petrology and geochemistry with the addition of exploration geophysics and specialised units relevant to the mining, coal,

petroleum and/or hydrogeology-environmental industries. You will be introduced to techniques and case studies that will prepare you for a wide variety of career paths. At the same time, you will learn new skills in subsurface analysis and mapping, remote sensing, and spatial analysis, including computer-based geographical information systems.

Discipline Coordinator	Dr Christine Knox +61 7 3138 8822 c.knox@qut.edu.au (Alternate email: sef.enquiry@qut.edu.au)

Domestic Entry requirements

Recommended Study

Biological Science and Chemistry.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)).

International Entry requirements

Recommended Study

Biological Science and Chemistry.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course update

As of 2013, this course will only be available for continuing Bachelor of Applied Science students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year units.
New students - please refer to ST01 Bachelor of Science. Please contact sef.enquiry@qut.edu.au for any enquiries.

Career Outcomes

Microbiology graduates find employment in a variety of interesting careers. Many microbiologists are employed by human pathology laboratories with the departments of bacteriology, immunology, mycology, parasitology and virology. You may also find employment in laboratories testing for animal and plant diseases, or testing for pathogens or spoilage organisms in food, air, water and soils. Microbiologists can also be employed as metabolic engineers developing microbial production systems.

If working in a laboratory is not for you then there are positions available as technical product and sales representatives, intellectual property specialists/patent attorneys, or even with scientific publishers. Many microbiologists find employment within government departments such as Health, Employment, Economic Development and Innovation, and Environment and Resource Management.

If you wish to study for a higher research degree, you may pursue a research career in university, government or private research laboratories.

Professional Recognition

Graduates are eligible for membership of the Australian Society for Microbiology (ASM).

Domestic Course structure

Year 1
You will undertake introductory core studies in a range of scientific areas including life sciences, chemistry, physics, mathematics and environmental science to give you a solid foundation for your future studies. Following these introductory studies you should be in a position to confirm your choice of major area of study.

Year 2
You will be introduced to diverse micro-organisms and study how they have evolved, their structure, how they obtain nutrients and how they grow and reproduce. Importantly you will also learn how to control microbial growth by sterilisation, disinfection and using antimicrobials. In practical classes you will learn how to stain and visualise micro-organisms using light microscopy and electron microscopy. You will isolate and culture micro-organisms and learn how to control microbial growth. You will practise identifying micro-organisms by their appearance, biochemical testing or by using molecular assays.

Year 3
Advanced studies will allow you to expand your knowledge and expertise in specialised areas including pathogenesis and disease where you can study bacterial, fungal and parasitic diseases. Other advanced topics include animal and plant viral diseases, food microbiology, molecular microbiology, bioremediation and electron microscopy. You will also cover environmental microbiology which includes the testing of soil, air and water.

Semesters

- Year 1, Semester 1
- Year 1, Semester 2 (Life Sciences Pre-Major Strand)
- Year 2, Semester 1
- Year 2, Semester 2 *
- Year 3, Semester 1 *
- Year 3, Semester 2 *
- Recommended Second Majors:
- * Elective Unit for all Majors except Forensic Science:

Code	Title
Year 1, Semester 1	
SCB110	Science Concepts and Global Systems
SCB111	Chemistry 1
SCB112	Cellular Basis of Life
Plus ONE of:	
MAB101	Statistical Data Analysis 1
MAB105	Preparatory Mathematics
MAB120	Algebra and Calculus
MAB121	Calculus and Differential Equations
1. Students without a Sound Achievement (4 semesters) in Maths A should enrol in MAB105.	
2. Students with a Sound Achievement in Maths B and NOT wishing to major in Physics should enrol in MAB101.	
3. Students with a Sound Achievement in Maths C and wishing to major in Physics should enrol in MAB121.	
4. Students without a Sound Achievement in Maths C and wishing to major in Physics should enrol in MAB120.	
5. Students without a Sound Achievement in Maths B or Maths A should consult with the course coordinator.	
Year 1, Semester 2 (Life Sciences Pre-Major Strand)	
SCB120	Plant and Animal Physiology
[Note: students taking forensic science or chemistry second majors should replace SCB120 Plant and Animal Physiology with SCB131 Experimental Chemistry].	
SCB121	Chemistry 2
SCB122	Cell and Molecular Biology
SCB123	Physical Science Applications
Year 2, Semester 1	
LQB381	Biochemistry: Structure and Function
LQB386	Microbial Structure and Function
Plus TWO other units selected according to the second major requirements	
Year 2, Semester 2 *	
LQB483	Molecular Biology Techniques
LQB486	Clinical Microbiology 1
Plus TWO other units selected according to the second major requirements	
Year 3, Semester 1 *	
LQB586	Clinical Microbiology 2
LQB587	Applied Microbiology 1: Water, Air and Soil
Plus TWO other units selected according to the second major requirements	
Year 3, Semester 2 *	
LQB686	Microbial Technology and Immunology
LQB687	Applied Microbiology 2: Food and Quality Assurance
Plus TWO other units selected according to the second major requirements	
Recommended Second Majors:	
Biochemistry, Biotechnology, Forensic Science, Life Science Technologies	
*** Elective Unit for all Majors except Forensic Science:**	
SCB500	Industry Project
SCB500 Industry Project is a unit that will be offered as an elective in all majors. This unit requires 84 credit points of Level 2 and/or 3 Science units, so it may only be taken at the completion of Year 2 in Summer or during Year 3.

Career Outcomes

Physicists are an asset to almost any industry. Employment areas of QUT physics graduates are very wide-ranging. These include research and development departments of large manufacturing companies, mining and exploration companies, research institutions such as the Commonwealth Scientific and Industrial Research Organisation (CSIRO) and the Defence Science and Technology Organisation (DSTO), government bodies such as the Bureau of Meteorology, Environmental Protection Agencies and health departments, schools, universities and hospitals. Broad training in data analysis and problem-solving skills also make physicists well suited to management and consulting roles in a range of technology-based industries.

Professional Recognition

Graduates are eligible for membership of the Australian Institute of Physics (AIP).

Domestic Course structure

Year 1
You will be introduced to a broad range of physics topics including mechanics, electricity, optics, waves, electromagnetism and atomic physics. Mathematics units will provide you with the skills and background knowledge required to support more advanced study in second and third years. You may choose to undertake a foundation unit in one of the other scientific disciplines to broaden your knowledge. You also have the flexibility to select two elective units to add another dimension to your science knowledge.

Year 2
You will begin to study specialist areas of physics at advanced level. Topics include electronics, instrumentation, radiation physics, thermodynamics and solid-state physics. Study of a secondary area of specialisation (second major) also begins. Second majors offered to physics students include astrophysics, mathematics, geoscience, games technology and music.

Year 3
You will proceed to further specialist areas including quantum physics, condensed matter physics, statistical mechanics and advanced electromagnetism. Your studies in experimental physics will help you develop data collection and data processing skills, and allow you to experience the methods used and to acquire the skills required to undertake research.

Discipline Coordinator	Associate Professor John Aaskov (Microbiology, Biochemistry, Biotechnology Majors); Dr Madeleine Schultz (Chemistry Major); Dr Konstantin Momot (Physics major)

Domestic Entry requirements 2012 applications and registrations have closed.

Applications at QTAC and submission of the online questionnaire with QUT for 2012 was due on the 30 November 2011 and have now closed. Late applications and/or questionnaire submissions will not be accepted.

Applicants are required to complete an online questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Physics
- Maths C
- Maths B
- English
- Chemistry

English (4, SA) and Maths B (4, VHA) plus two (2) of Biological Science, Chemistry, Earth Science, Maths C or Physics (4, VHA), We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA) or very high achievement (4, VHA).

International Entry requirements

International students must complete year 12 at an Australian school.

Applicants are required to complete a questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

International Subject prerequisites

- Physics
- Maths C
- Maths B
- English
- Chemistry

English (4, SA) and Maths B (4, VHA) plus two (2) of Biological Science, Chemistry, Earth Science, Maths C or Physics (4, VHA). You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course update

From Semester One 2013 this course will not be available for commencing students. SC01 will only be available for continuing students. New students - please refer to ST01. Please contact sef.enquiry@qut.edu.au for any enquiries.

Overview

The Bachelor of Applied Science Dean's Scholars Accelerated Honours Program is an accelerated program designed specifically for outstanding current, or returning from a gap year, Year 12 students who completed their Year 12 education in Australia. It also offers an accelerated pathway that enables students to complete both the Bachelor of Applied Science and the Bachelor of Applied Science (Honours) courses in just three years. A scholarship is offered to students in the Bachelor of Applied Science Dean's Scholars Accelerated Honours Program. Students are accepted into the program on the basis of outstanding academic ability and an interest in scientific research.

Professional Recognition

As a graduate of the Bachelor of Applied Science Dean's Scholars Accelerated Honours Program you will qualify for professional recognition and employment in fields relevant to the specialisations that you have chosen. It is expected that many Dean's Scholars will proceed to Doctor of Philosophy studies.

Financial support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Course Structure

As a student in the Dean's Scholars Accelerated Honours Program you will choose one of the following nine majors. You will also choose a co-major to accompany your major area of study. The co-major may be one of the other majors, or it could be one of the co-majors listed below:

Majors: Biochemistry, Biotechnology, Chemistry, Ecology, Environmental Science, Forensic Science, Geoscience, Microbiology, Physics.

Co-majors: Applied Geology, Astrophysics, Biodiversity, Chemistry for Industry, Life Science Technologies.

To allow the Dean's Scholars Program to be completed in an accelerated format some changes are made to the first year of the standard Bachelor of Applied Science (SC01) degree. The core units normally studied in first year are replaced by an enriched course of study which includes the following units:

SCB301 Science for Dean's Scholars
An intensive preparatory program immediately preceding the commencement of the first semester. This preparatory program commences mid-January and requires attendance for approximately 18 hours per week for six weeks.

SCB303 Tutorial Program for Dean's Scholars
An individually-tailored tutorial program during the first semester, under the guidance of an academic mentor. This unit is designed in a consultative process involving the student, the academic mentor, and the Dean.

SCB401 Research Methods for Dean's Scholars
The unit allows research skills to be developed through a literature review, experimental design considerations, research proposal formulation and writing, and the presentation of a research proposal.

SCB501 Research Project for Dean's Scholars
An individually tailored research project is carried out under the supervision of a research mentor.

Honours Program
Following the successful completion of the coursework and your initial research project in the first two years of the program, you will then commence the Bachelor of Applied Science (Honours) course. The Honours program continues the study of your chosen scientific major and also provides the opportunity to undertake a large research project. The Honours degree provides an excellent preparation to continue onto postgraduate research.

Note:
The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English
- Chemistry

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

International Subject prerequisites

- Maths B
- English
- Chemistry

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Discontinuation

As of 2013, ST50 will only be available for continuing students. No further intakes will be accepted.
Please contact sef.enquiry@qut.edu.au for any enquiries.

Professional Recognition

On graduation, you will be eligible to join professional organisations relevant to your disciplinary specialisation, the Association of Professional Engineers, Scientists and Managers, Australia and the Australian Institute of Management.

Your Course

Year 1

You will be able to choose subjects from across a range of science and technology areas to help you define your choice of disciplinary major. The introductory core studies will provide you with a solid foundation in your chosen disciplinary skills and build the basis for future studies.

Year 2

You will be introduced to advanced theoretical concepts and practical skills that serve to build your expertise in the science and technology disciplines. A thorough understanding of science and technology theory and practice is necessary to understand, evaluate and communicate aspects of innovation to the business world.

Year 3

In third year, you will complete your science and technology disciplinary advanced studies and take basic and advanced business units that encompass the business of innovation, intellectual property law and professional skills development. Through the action learning framework of the Student Enterprise Scheme, professional skills development will concentrate on communication and team-building skills. These exercises will help prepare you for industry-based consultancy style projects and extra-curricular networking events and an industry career.

Year 4

You will undertake integrative business units that develop the entrepreneurial mindset needed for a career in innovation commercialisation. You will further develop your professional skills through networking events. Student teams will source an industry-based consultancy-style project that will serve to provide real world experience and ready you for your future career.

Why Choose This Course

If you like to work in a dynamic world of translating discovery and creativity into commercial products, meeting people, and working in a high-powered team environment to build money-making enterprises, then this course is for you. The Bachelor of Technology Innovation will allow a rapid entry into the high-flying world of commercialisation and technology transfer. This new degree builds upon the successful Bachelor of Biotechnology Innovation which has seen graduates realise outstanding job outcomes, often successfully competing against graduates with PhDs and MBAs.

Professional Recognition

Graduates are eligible for membership of the Australian Society for Biochemistry and Molecular Biology (ASBMB), and in some cases the Australasian Association of Clinical Biochemists (AACB).

Your course

Year 1

You will be able to choose subjects from across a range of science and technology areas to help you define your choice of disciplinary major. The introductory core studies will provide you with a solid foundation in your chosen disciplinary skills and build the basis for future studies.

Year 2
You will be introduced to advanced theoretical concepts and practical skills that serve to build your expertise in the science and technology disciplines. A thorough understanding of science and technology theory and practice is necessary to understand, evaluate and communicate aspects of innovation to the business world.

Year 3
In third year, you will complete your science and technology disciplinary advanced studies and take basic and advanced business units that encompass the business of innovation, intellectual property law and professional skills development. Through the action learning framework of the Student Enterprise Scheme, professional skills development will concentrate on communication and team-building skills. These exercises will help prepare you for industry-based consultancy style projects and extra-curricular networking events and an industry career.

Year 4
You will undertake integrative business units that develop the entrepreneurial mindset needed for a career in innovation commercialisation. You will further develop your professional skills through networking events. Student teams will source an industry-based consultancy-style project that will serve to provide real world experience and ready you for your future career.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English
- Chemistry

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

International Subject prerequisites

- Maths B
- English
- Chemistry

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Why Choose This Course

If you like to work in a dynamic world of translating discovery and creativity into commercial products, meeting people, and working in a high-powered team environment to build money-making enterprises, then this course is for you. The Bachelor of Technology Innovation will allow a rapid entry into the high-flying world of commercialisation and technology transfer. This new degree builds upon the successful Bachelor of Biotechnology Innovation which has seen graduates realise outstanding job outcomes, often successfully competing against graduates with PhDs and MBAs.

Professional Recognition

On graduation, you will be eligible to join professional organisations relevant to your disciplinary specialisation, the Association of Professional Engineers, Scientists and Managers, Australia and the Australian Institute of Management.

Your Course

Year 1

You will be able to choose subjects from across a range of science and technology areas to help you define your choice of disciplinary major. The introductory core studies will provide you with a solid foundation in your chosen disciplinary skills and build the basis for future studies.

- Chemistry

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

International Subject prerequisites

- Maths B
- English
- Chemistry

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Why Choose This Course

If you like to work in a dynamic world of translating discovery and creativity into commercial products, meeting people, and working in a high-powered team environment to build money-making enterprises, then this course is for you. The Bachelor of Technology Innovation will allow a rapid entry into the high-flying world of commercialisation and technology transfer. This new degree builds upon the successful Bachelor of Biotechnology Innovation which has seen graduates realise outstanding job outcomes, often successfully competing against graduates with PhDs and MBAs.

Professional Recognition

No professional accreditation is currently available for courses in the games and entertainment area.

Your Course

Year 1

You will be able to choose subjects from across a range of science and technology areas to help you define your choice of disciplinary major. The introductory core studies will provide you with a solid foundation in your chosen disciplinary skills and build the basis for future studies.

Year 2

You will be introduced to advanced theoretical concepts and practical skills that serve to build your expertise in the science and technology disciplines. A thorough understanding of science and technology theory and practice is necessary to understand, evaluate and communicate aspects of innovation to the business world.

Year 3

In third year, you will complete your science and technology disciplinary advanced studies and take basic and advanced business units that encompass the business of innovation, intellectual property law and professional skills development. Through the action learning framework of the Student Enterprise Scheme, professional skills development will concentrate on communication and team-building skills. These exercises will help prepare you for industry-based consultancy style projects and extra-curricular networking events and an industry career.

Year 4

You will undertake integrative business units that develop the entrepreneurial mindset needed for a career in innovation commercialisation. You will further develop your professional skills through networking events. Student teams will source an industry-based consultancy-style project that will serve to provide real world experience and ready you for your future career.

- SOUND DESIGN:
- SOFTWARE TECHNOLOGIES:
- PHYSICS FOR GAMES:

Code	Title
The course consists of four blocks of studies	
Core Studies - 13 units (156 credit points)	
Major - 13 units (156 credit points)	
Minor - 4 units (48 credit points)	
Electives - 2 units (24 credit points)	
Year 1 Semester 1	
INB101	Impact of IT
INB104	Building IT Systems
INB180	Computer Games Studies
INB182	Introducing Design
Year 1 Semester 2	
INB103	Industry Insights
INB181	Introduction to Games Production
Block C or Block D Unit	
Block C or Block D Unit	
Year 2 Semester 1	
INB385	Multimedia Systems
KIB101	Visual Communication
KIB204	Web Interface Design
Block C or Block D Unit	
Year 2 Semester 2	
INB386	Advanced Multimedia Systems
KIB102	Visual Interactions
Block C or Block D Unit	
Block C or Block D Unit	
Year 3 Semester 1	
BSB115	Management
INB345	Mobile Devices
KIB309	Embodied Interactions
STB551	Engaging with the Innovation Industry
Year 3 Semester 2	
BSB126	Marketing
KIB314	Tangible Media
MGB223	Entrepreneurship and Innovation
Block C or Block D Unit	
Year 4 Semester 1	
AMB240	Marketing Planning and Management
LWS007	Introduction To Intellectual Property Law
MGB324	Managing Business Growth
STB709-1	Innovation and Commercialisation Project
Year 4 Semester 2	
BSB311	Innovation Commercialisation Strategies
MGB225	Intercultural Communication and Negotiation Skills
STB709-2	Innovation and Commercialisation Project
STB709-3	Innovation and Commercialisation Project
Block C Minor List	
ANIMATION:	
KIB105	Animation and Motion Graphics
KIB108	Animation History and Practices
KIB203	Introduction to 3D Computer Graphics

KIB225	Character Development, Conceptual Design and Animation Layout
KVB105	Drawing for Design
KVB106	Drawing for Animation
GAME DESIGN:	
KIB201	Concept Development for Game Design and Interactive Media
KIB202	Enabling Immersion
INB280	Fundamentals of Game Design
Plus ONE of the following two units:	
INB281	Advanced Game Design
INB272	Interaction Design
MATHEMATICS FOR GAMES:	
MAB120	Algebra and Calculus
MAB122	Algebra and Analytic Geometry
MAB121	Calculus and Differential Equations
MAB312	Linear Algebra
[Students who have completed Maths C can susbtitute MAB120 with one of the following units: MAB311, MAB481 or MAB422]	
MOBILE AND NETWORK TECHNOLOGIES:	
INB102	Emerging Technology
INB251	Networks
INB350	Internet Protocols and Services
INB353	Wireless and Mobile Networks
SOUND DESIGN:	
KMB107	Sound, Image, Text
KMB119	Music and Sound Production 1
KMB129	Music and Sound Production 2
KMB252	Multi-Platform Sound Design
SOFTWARE TECHNOLOGIES:	
INB210	Databases
INB250	Foundations of Computer Science
INB270	Programming
INB371	Data Structures and Algorithms
PHYSICS FOR GAMES:	
MAB121	Calculus and Differential Equations
PQB250	Mechanics and Electromagnetism
PQB251	Waves and Optics
Plus ONE of the following three units:	
PQB450	Energy, Fields and Radiation
PQB460	Astrophysics 1
PCB593	Digital Image Processing

- Year 4, Semester 1
- Year 4, Semester 2

Code	Title
Year 1, Semester 1	
SCB110	Science Concepts and Global Systems
SCB111	Chemistry 1
SCB112	Cellular Basis of Life
Plus ONE from the following four units:	
MAB101	Statistical Data Analysis 1
MAB105	Preparatory Mathematics
MAB120	Algebra and Calculus
MAB121	Calculus and Differential Equations
NOTE: Students with a Sound Achievement in Maths B and NOT wishing to major in Mathematics or Physics should enrol in MAB101	
Students without a Sound Achievement (4 semesters) in Maths B should enrol in MAB105	
Students with a Sound Achievement in Maths C and wishing to major in Mathematics or Physics should enrol in MAB121	
Students without a Sound Achievement in Maths C and wishing to major in Mathematics or Physics should enrol in MAB120	
Year 1, Semester 2	
SCB121	Chemistry 2
SCB122	Cell and Molecular Biology
SCB123	Physical Science Applications
SCB131	Experimental Chemistry
Year 2, Semester 1	
LQB383	Molecular and Cellular Regulation
SCB384	Forensic Sciences - From Crime Scene to Court
Plus TWO units from the relevant options List which may include one unit from outside the Faculty	
Relevant Options List Year 2 Semester 1	
PQB331	Structure and Bonding
Elective	
Year 2, Semester 2	
JSB979	Forensic Scientific Evidence
PQB312	Analytical Chemistry For Scientists and Technologists
Plus TWO units from the relevant options List which may include one unit from outside the Faculty	
Relevant Options List Year 2 Semester 2	
PQB442	Chemical Spectroscopy
Elective	
Year 3, Semester 1	
BSB115	Management
PQB513	Instrumental Analysis
PQB584	Forensic Physical Evidence
STB551	Engaging with the Innovation Industry
Year 3, Semester 2	
BSB126	Marketing
MGB223	Entrepreneurship and Innovation
LQB680	Forensic DNA Profiling
PQB684	Forensic Analysis
Year 4, Semester 1	
AMB240	Marketing Planning and Management
LWS007	Introduction To Intellectual Property Law
MGB324	Managing Business Growth
STB709-1	Innovation and Commercialisation Project
Year 4, Semester 2	
BSB311	Innovation Commercialisation Strategies
MGB225	Intercultural Communication and Negotiation Skills

STB709-2	Innovation and Commercialisation Project
STB709-3	Innovation and Commercialisation Project

Bachelor of Technology Innovation (Games Technology)

Handbook

Year	2012
QUT code	ST50
CRICOS	070694G
Duration (full-time)	4 years
Duration (part-time domestic)	8 years

Deferment	You can defer your offer and postpone the start of your course for one year
Course Coordinator	Associate Professor Chris Collet
Discipline Coordinator	

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English
- Chemistry

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

International Subject prerequisites

- Maths B
- English
- Chemistry

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Why Choose This Course

If you like to work in a dynamic world of translating discovery and creativity into commercial products, meeting people, and working in a high-powered team environment to build money-making enterprises, then this course is for you. The Bachelor of Technology Innovation will allow a rapid entry into the high-flying world of commercialisation and technology transfer. This new degree builds upon the successful Bachelor of Biotechnology Innovation which has seen graduates realise outstanding job outcomes, often successfully competing against graduates with PhDs and MBAs.

Professional Recognition

No professional accreditation is currently available for courses in the games and entertainment area.

Your Course

Year 1

You will be able to choose subjects from across a range of science and technology areas to help you define your choice of disciplinary major. The introductory core studies will provide you with a solid foundation in your chosen disciplinary skills and build the basis for future studies.

Year 2

You will be introduced to advanced theoretical concepts and practical skills that serve to build your expertise in the science and technology disciplines. A thorough understanding of science and technology theory and practice is necessary to understand, evaluate and communicate aspects of innovation to the business world.

Year 3

In third year, you will complete your science and technology disciplinary advanced studies and take basic and advanced business units that encompass the business of innovation, intellectual property law and professional skills development. Through the action learning framework of the Student Enterprise Scheme, professional skills development will concentrate on communication and team-building skills. These exercises will help prepare you for industry-based consultancy style projects and extra-curricular networking events and an industry career.

Year 4

You will undertake integrative business units that develop the entrepreneurial mindset needed for a career in innovation commercialisation. You will further develop your professional skills through networking events. Student teams will source an industry-based consultancy-style project that will serve to provide real world experience and ready you for your future career.

Code	Title
The course consists of four blocks of studies	
Core Studies - 13 units (156 credit points)	
Major - 13 units (156 credit points)	
Minor - 4 units (48 credit points)	
Electives - 2 units (24 credit points)	
Year 1 Semester 1	
INB101	Impact of IT
INB104	Building IT Systems
INB180	Computer Games Studies
INB182	Introducing Design
Year 1 Semester 2	
INB103	Industry Insights
INB181	Introduction to Games Production
INB270	Programming
MAB281	Mathematics for Computer Graphics
Year 2 Semester 1	
INB370	Software Development
INB371	Data Structures and Algorithms
Block C or Block D Unit	
Block C or Block D Unit	
Year 2 Semester 2	
INB210	Databases
INB250	Foundations of Computer Science
INB381	Modelling and Animation Techniques
Block C or Block D Unit	
Year 3 Semester 1	
BSB115	Management
STB551	Engaging with the Innovation Industry
Block C or Block D Unit	
Plus ONE of the following two units:	
INB382	Real Time Rendering Techniques
INB383	AI for Games
Year 3 Semester 2	
BSB126	Marketing
MGB223	Entrepreneurship and Innovation
Block C or Block D Unit	
Block C or Block D Unit	
Year 4 Semester 1	
AMB240	Marketing Planning and Management
LWS007	Introduction To Intellectual Property Law
MGB324	Managing Business Growth
STB709-1	Innovation and Commercialisation Project
Year 4 Semester 2	
BSB311	Innovation Commercialisation Strategies
MGB225	Intercultural Communication and Negotiation Skills
STB709-2	Innovation and Commercialisation Project
STB709-3	Innovation and Commercialisation Project
BLOCK C Minor Units List	
ANIMATION:	

Bachelor of Technology Innovation (Games Technology)

KIB105	Animation and Motion Graphics
KIB108	Animation History and Practices
KIB108	Animation History and Practices
KIB225	Character Development, Conceptual Design and Animation Layout
KVB105	Drawing for Design
KVB106	Drawing for Animation
ADVANCED SOFTWARE TECHNOLOGIES:	
INB365	Systems Programming
INB372	Agile Software Development
INB374	Enterprise Software Architecture
Plus ONE from the following two units:	
INB382	Real Time Rendering Techniques
INB383	AI for Games
DIGITAL MEDIA:	
KIB101	Visual Communication
KIB102	Visual Interactions
INB385	Multimedia Systems
INB386	Advanced Multimedia Systems
GAME DESIGN:	
KIB201	Concept Development for Game Design and Interactive Media
KIB202	Enabling Immersion
INB280	Fundamentals of Game Design
Plus ONE from the following two units:	
INB272	Interaction Design
INB281	Advanced Game Design
MATHEMATICS FOR GAMES:	
MAB120	Algebra and Calculus
MAB121	Calculus and Differential Equations
MAB122	Algebra and Analytic Geometry
MAB312	Linear Algebra
[Students who have completed Maths C can substitute MAB120 with one of the following units: MAB311, MAB481 or MAB422]	
MOBILE AND NETWORK TECHNOLOGIES:	
INB102	Emerging Technology
INB251	Networks
INB350	Internet Protocols and Services
INB353	Wireless and Mobile Networks
SOUND DESIGN:	
KMB107	Sound, Image, Text
KMB119	Music and Sound Production 1
KMB129	Music and Sound Production 2
KMB252	Multi-Platform Sound Design
KKB216	Audio/Visual Interaction
PHYSICS FOR GAMES:	
MAB121	Calculus and Differential Equations
PQB250	Mechanics and Electromagnetism
PQB251	Waves and Optics
Plus ONE from the following three units:	
PQB450	Energy, Fields and Radiation
PQB460	Astrophysics 1
PCB593	Digital Image Processing

Students must complete FOUR units from the following list:	
INB120	Corporate Systems
INB210	Databases
INB220	Business Analysis
INB250	Foundations of Computer Science
INB251	Networks
INB255	Security
INB270	Programming
INB271	The Web
INB272	Interaction Design
Information Technology Specialisation Options List	

Bachelor of Technology Innovation (Information Technology)

Students must complete FOUR units from the following list. Please ensure you have completed a minimum of 36 credit points (3 units) of IT Breadth Option Units before commencing these units.	
ENTERPRISE SYSTEMS:	
INB123	Project Management Practice
INB221	Technology Management
INB311	Enterprise Systems
INB312	Enterprise Systems Applications
WEB TECHNOLOGIES:	
INB313	Electronic Commerce Site Development
INB373	Web Application Development
INB374	Enterprise Software Architecture
INB385	Multimedia Systems
INB386	Advanced Multimedia Systems
BUSINESS PROCESS MANAGEMENT:	
INB320	Business Process Modelling
INB321	Business Process Improvement
INB322	Information Systems Consulting
Smart Services	
DATA WAREHOUSING:	
INB340	Database Design
INB341	Software Development With Oracle
INB342	Enterprise Data Mining and Data Analysis
INB343	Data Warehousing and Mining
NETWORK SYSTEMS:	
INB350	Internet Protocols and Services
INB351	Unix Network Administration
INB352	Network Planning
INB353	Wireless and Mobile Networks
SOFTWARE ENGINEERING:	
INB370	Software Development
INB371	Data Structures and Algorithms
INB372	Agile Software Development
INB374	Enterprise Software Architecture
DIGITAL ENVIRONMENTS	
Information Issues and Values	
INB345	Mobile Devices
INB346	Enterprise 2.0
INB347	Web 2.0 Applications
UNGROUPED UNITS:	
INB355	Cryptology and Protocols
INB365	Systems Programming
INB860	Computational Intelligence for Control and Embedded Systems

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English
- Chemistry

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

International Subject prerequisites

- Maths B
- English
- Chemistry

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Professional Recognition

Graduates are eligible for membership of the Australian Society for Microbiology (ASM).

Your Course

Year 1

You will be able to choose subjects from across a range of science and technology areas to help you define your choice of disciplinary major. The introductory core studies will provide you with a solid foundation in your chosen disciplinary skills and build the basis for future studies.

Year 2

You will be introduced to advanced theoretical concepts and practical skills that serve to build your expertise in the science and technology disciplines. A thorough understanding of science and technology theory and practice is necessary to understand, evaluate and communicate aspects of innovation to the business world.

Year 3

In third year, you will complete your science and technology disciplinary advanced studies and take basic and advanced business units that encompass the business of innovation, intellectual property law and professional skills development. Through the action learning framework of the Student Enterprise Scheme, professional skills development will concentrate on communication and team-building skills. These exercises will help prepare you for industry-based consultancy style projects and extra-curricular networking events and an industry career.

Year 4

You will undertake integrative business units that develop the entrepreneurial mindset needed for a career in innovation commercialisation. You will further develop your professional skills through networking events. Student teams will source an industry-based consultancy-style project that will serve to provide real world experience and ready you for your future career.

Why Choose This Course

If you like to work in a dynamic world of translating discovery and creativity into commercial products, meeting people, and working in a high-powered team environment to build money-making enterprises, then this course is for you. The Bachelor of Technology Innovation will allow a rapid entry into the high-flying world of commercialisation and technology transfer. This new degree builds upon the successful Bachelor of Biotechnology Innovation which has seen graduates realise outstanding job outcomes, often successfully competing against graduates with PhDs and MBAs.

Professional Recognition

Graduates are eligible for membership of the Australian Institute of Physics (AIP).

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA) of English and one of the following: Maths A, Maths B or Maths C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Overview

The course is concerned with the management of the overall process of construction projects and provides detailed understanding of project development from conception, through planning and construction to commissioning and maintenance. It develops skills in how to manage people, materials, equipment and plant while focusing on issues such as cost, time, quality, safety and environment. It educates students to become effective construction managers with comprehensive technological knowledge, management principles and communication skills.

Minors

For accreditation purposes you are required to undertake specified minors which will include employment practice. Please refer to your course rules before making your selection.

CONSTRUCTION MANAGEMENT Minor Options

- All students must take the Construction Management Applications Minor, which is an AIB accreditation requirement.
- Your second minor may be taken from anywhere in QUT but must be from outside UD40.

Special Course Requirements

All students are required to obtain a minimum of 80 days of approved construction management industrial experience.

Professional Recognition

This course has been accredited by the Australian Institute of Building.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Work Integrated Learning unit

In your final year students are required to undertake 100 days approved industrial experience in the construction or allied field.

Your course

Year 1

You start your studies with foundation units including residential construction and engineering, basic professional learning (including an introduction to research writing), sustainability, land stewardship, urban development economics and building measurement.

Year 2

You build on your knowledge of construction management by studying low-rise commercial construction and engineering, structural engineering, building measurement and estimating, construction-related law, building services engineering, basic business skills and minor study units.

Year 3

You increase your knowledge by studying high-rise construction and advanced structural and formwork design. You extend your management learning in business skills, contract administration and statutory construction law and further engage in your chosen minor study units as well as building your research capabilities.

Year 4

Your final year draws together previous learning and integrates it with more advanced concepts of strategic management, program and planning management, and human resources planning, preparing you for entry to the construction industry at managerial level. You have the opportunity to gain

interdisciplinary skills via your minor units and specialist skills in advanced construction management and research methods and report writing.

Minors

For accreditation purposes you are required to undertake specified minors which will include employment practice. Please refer to your course rules before making your selection.

Construction management minor options

- All students must take the Construction Management Applications Minor, which is an AIB accreditation requirement.
- Your second minor may be taken from anywhere in QUT but must be from outside UD40. The Project Collaboration Minor is highly recommended for students in Construction Management.

Overview

This course is concerned with all aspects of property - investment, asset management, development, valuation and research - with a focus on finance and on the commercial property market sector.

Special Course Requirements

You are required to obtain a minimum of 30 days approved professional work experience.

Professional Recognition

The 4 year degree has professional recognition from the Australian Property Institute, the Valuers' Registration Board of Queensland, and from the Royal Institution of Chartered Surveyors.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Second Majors and Minors

In your final two years you will have the opportunity to undertake a major (8 units) or 2 minors (4 units each) from other areas of interest. Please refer to your course rules before making your selection.

PROPERTY ECONOMICS Second Major and Minor Options

Second Major:
A second major from anywhere in QUT

Minors:
Two minors from anywhere in QUT. Remember if you take two Minors one Minor must be from outside of your course.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Work Integrated Learning unit

Students are required to obtain a minimum of 30 days approved professional work experience.

Your course

Year 1

You are introduced to land management, sustainability, construction, economics, law and fundamental property valuation practice. You will have a preliminary understanding of the knowledge required of a property professional including factors that influence the value of property. You develop verbal and written communication skills and work collaboratively on projects with other students.

Year 2

You further develop skills in applying analytical problem solving in property valuation, investment analysis and property development. You continue to build your knowledge and skills in planning and urban development, urban economics, and law associated with interests in land and property transactions. Focus is maintained on developing written and verbal communication to a professional standard. You develop an understanding of your future role as a property professional.

Year 3

You collaborate with other students in related disciplines to determine the feasibility of a hypothetical development project. You explore property finance and property and asset management and hone research expertise. Guest lectures from leading industry practitioners and industry-focused workshops are a feature. You also embark on a specialist focus through elective major/minor units in your

chosen specialisation.

Year 4

You continue to specialise in your chosen area of study through elective major/minor units. You develop skills in property taxation, property marketing and real estate practice. These property skills are supplemented by business study which provides you with a useful understanding of commercial enterprise. The year culminates with industry-focused learning experiences including a work integrated learning unit to ensure you are workforce ready.

Second major and minors

In your final two years you will have the opportunity to undertake a major (8 units) or 2 minors (4 units each) from other areas of interest. Please refer to your course rules before making your selection.

Property economics second major and minor options

Second Major:

- A second major from anywhere in QUT

Minors:

- Two minors from anywhere in QUT. Remember if you take two Minors one Minor must be from outside of your course.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA) of English and one of the following: Maths A, Maths B or Maths C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Overview

The course prepares students to work as quantity surveyors or building economists. The course covers building management, cost planning and control, building development techniques, building research, computer software application, measurement of construction, and legal issues. **Applicants will be initially enrolled in the Bachelor of Urban Development (Construction Management) but will be directed to take suitable units to graduate with a Quantity Surveying primary major.**

Special Course Requirements

You are required to gain a minimum of 80 days of approved employment in the final year of the course.

Professional Recognition

This course is fully accredited by the Australian Institute of Quantity Surveyors, The Royal Institution of Chartered Surveyors (Honours version only), and the Board of Quantity Surveyors Malaysia (with Property Economics second major).

Second Majors and Minors

You will have the opportunity to undertake a second major (8 units) or 2 minors (4 units each) to enhance and broaden your knowledge in a related field or area of interest.

Please refer to your course rules before making your selection.

QUANTITY SURVEYING Second Major and Minor Options

Second Major:
Choose one second major from the following options:

Property Economics Development
Property Economics Investment
Property Economics Valuation
Urban and Regional Planning
Architectural Studies

OR

Minors:
Two minors from anywhere in QUT.
Remember if you take two Minors, one Minor must be from outside the UD40 course.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Work Integrated Learning unit

Students are required to gain a minimum of 80 days of approved employment in the final year of the course.

Your course

Year 1

Complete a common first year with construction management students. You start your studies with foundation units including residential construction and engineering, basic professional learning (including an introduction to research writing), sustainability, land stewardship, urban development economics and building measurement.

Year 2

Apply your construction body of knowledge introduced in first year, and begin to develop the range of graduate capabilities through an introduction to more complex construction techniques, methodologies and management issues relating to your degree in quantity surveying. Your analytical and technical skills continue to be honed through commercial construction and the environment. The law and business skills you gain in the second year will also help further develop lifelong learning skills.

Year 3
Increase your knowledge and skills in construction and quantity surveying. You are introduced to in-depth knowledge of the economic, managerial, legal and technical aspects of construction activity, such as high-rise construction, cost planning and control. Undertake second majors/minors to extend construction and quantity surveying knowledge. These allow you to broaden your education by undertaking units from other faculties within the University, subject to accreditation requirements.

Year 4
In your final year you complete your selected second major/minors, involving a major project which brings together all your previously mastered skills, and advances your communication skills in dissertation writing and seminar presentation. You also complete work integrated learning in the quantity surveying discipline, ensuring you are workforce ready.

Second major and minors
You will have the opportunity to undertake a second major (8 units) or 2 minors (4 units each) to enhance and broaden your knowledge in a related field or area of interest.

Please refer to your course rules before making your selection.

Quantity surveying second major and minor options

Second Major:

Choose one second major from the following options:
- Property Economics Development
- Property Economics Investment
- Property Economics Valuation
- Urban and Regional Planning
- Architectural Studies

OR

Minors:

Choose two minors from the following options. Remember, if you take two Minors, one Minor must be from outside your course:
- Property Economics Development
- Property Economics Investment
- Property Economics Valuation
- Urban and Regional Planning
- Architectural Studies
- Work Integrated Learning Minor
- Sustainability Minor
- International Minor
- Indigenous Studies Minor
- Research Minor
- Project Collaboration Minor
- Collaborative Digital Design Minor

A minor from anywhere in QUT.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Overview

This degree is a broad-based course. The first year is a foundation year designed to prepare students to deliver practical solutions to problems involving spatial information and decision-making. Students study foundation units such as mathematics, professional studies, sustainability as well as geospatial positioning in their first year. In the following years, the areas covered are boundary and control surveying, topographic mapping, photogrammetry, mine and hydrographic surveying, land development design and geographic information systems.

Professional Recognition

The course is recognised by Queensland Surveyors Board and the Surveying and Spatial Science Institute of Australia (SSSI).

Special Course Requirements

You will be required to attend compulsory field practicals off-campus in the Moreton Region and have access to an advanced scientific calculator for use during the course. To graduate you are required to have at least 90 days of approved industrial experience/practice in a spatial science/ surveying environment.

Minors

For professional recognition you will undertake two minors (a minor is four units or 48 credit points in the same discipline) the first is a Science minor which includes Maths and the second an Applications minor which consists of a Work Integrated Learning unit, a project unit and two specialised spatial science units.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Work Integrated Learning unit

To graduate, students are required to undertake at least 90 days of approved industrial experience/practice in a spatial science/surveying environment.

Your course

Year 1

You undertake foundation units where you study broad aspects of the built environment, stewardship of land and foundation mathematics to assist with an understanding of geospatial information and measurement science/surveying. A number of experiential field practicals support the study of introductory surveying techniques.

Year 2

You undertake further measurement-related study applied to cadastral surveying and computations. Digital mapping, GIS and remote sensing studies, that broaden measurement and analysis aspects, are introduced. Land development, measurement science and mapping/GIS themes are structured as a sequential learning process.

Year 3

Multidisciplinary land development units are undertaken to reflect real-world development projects. Land information management study supports the ‘big-picture’ view of sustainable developments while the geodesy theory unit covers high-precision state-of-the-art technology measurement applications. Project-based learning through spatial analysis practice is encouraged in this third year of study.

Year 4

Your final year prepares you for entry into the spatial information industry. Study units provide opportunities to gain interdisciplinary skills and specialist

spatial measurement and presentation skills. Project and work-integrated learning units allow for industry work experiences and exposure to the diversity of workplace cultures.

Minors

For professional recognition you will undertake two minors (a minor is four units or 48 credit points in the same discipline) the first is a Science minor which includes Maths and the second an Applications minor which consists of a Work Integrated Learning unit, a project unit and two specialised spatial science units.

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Overview

This course aims to educate students to become innovative leaders in professional planning, with the capacity and will to create a better world. Graduates will apply perceptive sensibilities and skills to create sustainable natural and human environments. The QUT course emphasises creative design and inclusive community planning. You will have the opportunity to work on live projects with local councils and community groups.

Professional Recognition

This course has received accreditation from the Planning Institute of Australia.

Second Major and Minors

You will have the opportunity to undertake two minors (four units each) to broaden your appreciation of fields related to urban and regional planning. One of these is the Applications Minor, that fulfils important Planning Institute of Australia accreditation requirements. The other minor you are able to choose for yourself; for example: landscape architecture, urban design, surveying, property economics, law or business management. Students wishing to undertake a second major rather than the accredited course model are advised to contact the Study Area Coordinator.

Please refer to your course rules before making your selection.

URBAN AND REGIONAL PLANNING Minor Options

Choose two minors from the following options. Remember, one Minor must be from outside the UD40 course:

Urban and Regional Planning Applications Minor (accreditation requirement)
Landscape Architecture
Spatial Science
Architectural Studies
Property Economics Development
Property Economics Investment
Property Economics Valuation
Sustainability Minor
International Minor
Indigenous Studies Minor
Research Minor
Project Collaboration Minor
Collaborative Digital Design Minor
A minor from anywhere in QUT

Domestic Course structure

Your course

Year 1

Your first year as a planning student will give you a strong foundation in design skills, experience in working in teams on planning projects, and an understanding of the importance of the social, economic and environmental contexts of planning activity.

Year 2

In your second year as a planning student, you will develop your practical skills through working on site-related projects and development assessment. The second year of the degree also explores the philosophical and theoretical basis of planning.

Year 3

In the third year of your degree, you will focus on the application of design skills on a broader scale through urban design principles. You will also be prepared for the public role of planners through negotiation and conflict resolution, and investigate the importance of environmental planning.

Year 4

In the final year of your degree, you will integrate the skills and capacities developed throughout the course through a major research project, a challenging exploration of planning theory and ethics,

and real-world planning projects that move from the community through to the regional level.

Second major and minors

You will have the opportunity to undertake a second major (8 units) or 2 minors (4 units each) to enhance and broaden your knowledge in a related field or area of interest.

Please refer to your course rules before making your selection.

Domestic Entry requirements

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)). Recommended study: Chemistry, Maths C and Physics.

International Entry requirements

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)). Recommended study: Chemistry, Maths C and Physics.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Professional Recognition

This course meets the requirements for membership of Engineers Australia (EA). EA is a signatory to the Washington Accord, which permits graduates from accredited member courses to work in various countries across the world. The course also meets the coursework requirements for accredited graduate membership of the Australian Mathematical Society. You may also become a member of the Statistical Society of Australia.

Financial Support

You should consider applying for an industry-sponsored mathematics bursary or an engineering scholarship to help you financially throughout your studies. For further information visit scholarships.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA). Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies. Accountancy, Finance, Economics and Marketing majors also requires 4 SA in Maths A, B or C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Discontinuation

From Semester 1, 2007, this course has been renamed and recoded to IX28 Bachelor of Business/Bachelor of Engineering. Currently enrolled students who wish to remain in, and graduate from the existing program will be permitted to do so up to the end of 2009. From Semester 1, 2010, all students will be enrolled in the new program.

Course discontinued

This course has been discontinued and is open to continuing students only.

Course Design

A feature of the course design is the flexibility and choice it offers. Students can tailor the double degree to their career interests by combining any one of the 10 majors that are available in the Bachelor of Applied Science (SC01) degree with a specialisation chosen from a wide range of offerings in the humanities.

The program is integrated so that students will study both science and arts units in each semester.

Professional Recognition

Relevant professional bodies for the Bachelor of Applied Science (SC01) are listed under the separate entry for the course. Eligibility for membership depends on the majors undertaken.

Multidisciplinary Majors

In the Arts component students will be required to complete one multidisciplinary major from the following: International and Global Studies; Community Studies; Society and Change; Ethics and Human Rights; Australian Studies.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA) of English and one of the following: Maths A, Maths B or Maths C.

International Subject prerequisites

- English

You must have achieved study at a level comparable to Australian Year 12 or in recognised post-secondary studies in English and one of the following: Maths A, Maths B or Maths C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Career Outcomes

The professional skills gained from this double degree are applicable across all business domains. As a graduate, you can expect to work in roles such as a business analyst or consultant, information and communication technologies project manager or information technology infrastructure manager, information analyst, business process manager, information manager, database manager, data communications specialist, systems analyst or programmer.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Study Areas

IT07 will not have nominated majors and minors and consequently there will not be a Study Area A shown on a graduate's parchment. Instead, IT07 will have specialisations. The specialisation areas that will be available for students will include:

• Business Process Management
• Data Warehousing
• Digital Societies
• Enterprise Systems
• Information Management
• Network Systems
• Software Engineering
• Web Technologies

Pathways to Futher Studies

In 2001, the Faculty introduced an accelerated Honours program to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of their a BIT degree (or double degree) which would be counted both for completion of the degree and towards the Honours program. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete a BIT degree (or double degree) with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Cooperative Education

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Domestic Entry requirements

Literacy course requirements

All Bachelor of Education students are required to satisfactorily complete assessment criteria relating to Queensland College of Teachers' (QCT) literacy standards by the end of year three of their course in order to meet the course and QCT professional accreditation requirements.

Literacy modules have been developed as a remedial action for students who do not attain satisfactory standards on the relevant literacy criterion during their assessment in the first year of their studies. Students will have the support of the First Year Experience Coordinator. Students may attempt these modules any number of times during the first three years of their program.

At the end of year three, unsatisfactory results within course work and these modules may result in a recommendation for an early exit from the four-year degree. The literacy requirement will also apply to double degree students with a slight variation.

Working with Children Check: blue card

A Blue Card is required as you will be working with children and young people as part of this course. You can apply for a Blue Card through QUT at no cost.

If you do not receive your blue card before the start of a unit that requires contact with children, you may not be able to participate and your grades may be affected. You may also still be liable to pay fees for the unit.

Submit your blue card application to the QUT Student Centre as early as possible, ideally as soon as you have received your offer.

How to apply for a blue card

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)). Recommended study: At least one of the sciences. For biochemistry, biotechnology and microbiology majors - Biology and Chemistry; for physics major - Maths C.

International Entry requirements

Literacy course requirements

All Bachelor of Education students are required to satisfactorily complete assessment criteria relating to Queensland College of Teachers' (QCT) literacy standards by the end of year three of their course in order to meet the course and QCT professional accreditation requirements.

Literacy modules have been developed as a remedial action for students who do not attain satisfactory standards on the relevant literacy criterion during their assessment in the first year of their studies. Students will have the support of the First Year Experience Coordinator. Students may attempt these modules any number of times during the first three years of their program.

At the end of year three, unsatisfactory results within course work and these modules may result in a recommendation for an early exit from the four-year degree. The literacy requirement will also apply to double degree students with a slight variation.

Bachelor of Applied Science/Bachelor of Education (Secondary)

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)). Recommended study: At least one of the sciences. For biochemistry, biotechnology and microbiology majors - Biology and Chemistry; for physics major - Maths C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

IMPORTANT NOTE

This course is currently under review for future offerings (2013 onwards).

Enrolling

It is imperative that you enrol in both semester 1 and semester 2 units at the start of each year.

Course Overview

This double degree enables you to work as a science professional or pursue a career in scientific research. Alternatively, the Bachelor of Education (Secondary) prepares you to teach in two curriculum areas in secondary school. The science majors that are most relevant if you are intending to follow a career in secondary school teaching are chemistry, ecology, geoscience, mathematics or physics.

Professional Recognition

This course meets the requirements for registration as a teacher in Queensland. It is recognised nationally and internationally, however additional requirements may be needed for some locations.

Graduates will also satisfy the requirements for membership of the relevant professional body for their chosen science major. See Studyfinder for details on the Bachelor of Applied Science majors.

Other Course Requirements

Blue Card

As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.
You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks, which commence in late January Year 2.
The application form is available at student.qut.edu.au/studying/jobs-and-work-experience/work-experience-and-placements/blue-cards.

Literacy

Students must meet the Queensland College of Teachers' literacy standards by the end of Year 3. For more information please visit AskQUT and enter 'Literacy Modules' in the FAQ.

Course Design

See the Bachelor of Applied Science course information for details of major areas of study. To allow you to complete the double degree in a shorter period of time, co-majors are to be taken from the education technology program.

Domestic Entry requirements

Literacy course requirements

All Bachelor of Education students are required to satisfactorily complete assessment criteria relating to Queensland College of Teachers' (QCT) literacy standards by the end of year three of their course in order to meet the course and QCT professional accreditation requirements.

Literacy modules have been developed as a remedial action for students who do not attain satisfactory standards on the relevant literacy criterion during their assessment in the first year of their studies. Students will have the support of the First Year Experience Coordinator. Students may attempt these modules any number of times during the first three years of their program.

At the end of year three, unsatisfactory results within course work and these modules may result in a recommendation for an early exit from the four-year degree. The literacy requirement will also apply to double degree students with a slight variation.

Working with Children Check: blue card

A Blue Card is required as you will be working with children and young people as part of this course. You can apply for a Blue Card through QUT at no cost.

If you do not receive your blue card before the start of a unit that requires contact with children, you may not be able to participate and your grades may be affected. You may also still be liable to pay fees for the unit.

Submit your blue card application to the QUT Student Centre as early as possible, ideally as soon as you have received your offer.

How to apply for a blue card

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)).

International Entry requirements

Literacy course requirements

All Bachelor of Education students are required to satisfactorily complete assessment criteria relating to Queensland College of Teachers' (QCT) literacy standards by the end of year three of their course in order to meet the course and QCT professional accreditation requirements.

Literacy modules have been developed as a remedial action for students who do not attain satisfactory standards on the relevant literacy criterion during their assessment in the first year of their studies. Students will have the support of the First Year Experience Coordinator. Students may attempt these modules any number of times during the first three years of their program.

At the end of year three, unsatisfactory results within course work and these modules may result in a recommendation for an early exit from the four-year degree. The literacy requirement will also apply to double degree students with a slight variation.

Working with Children Check: blue card

A Blue Card is required as you will be working with children and young people as part of this course. You can apply for a Blue Card through QUT at no cost.

If you do not receive your blue card before the start of a unit that requires contact with children, you may not be able to participate and your grades may be affected. You may also still be liable to pay fees for the unit.

Submit your blue card application to the QUT Student Centre as early as possible, ideally as soon as you have received your offer.

How to apply for a blue card

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

IMPORTANT NOTE

This course is currently under review for future offerings (2013 onwards).

Course Overview

This double degree enables you to work as a science professional or pursue a career in scientific research. Alternatively, the Bachelor of Education (Primary) will prepare you to teach at all levels of primary school. You may also complete a discipline and content studies major in one of the key learning areas of the Queensland school curriculum.

Professional Recognition

This course meets the requirements for registration as a teacher in Queensland. It is recognised nationally and internationally, however additional requirements may be needed for some locations.

Graduates will also satisfy the requirements for membership of the relevant professional body for their chosen science major. See Studyfinder for details on the Bachelor of Applied Science majors.

Literacy Standards

All students are required to satisfactorily complete assessment criteria relating to Queensland College of Teachers' literacy standards by the end of year 3 of their course in order to meet course and QCT professional accreditation requirements. Literacy modules have been developed as a remedial action for students who do not attain satisfactory standards on the relevant literacy criterion during their assessment in the first year of their studies. Students will have the support of the First Year Experience Coordinator.

Students may attempt these modules any number of times during the first three years of their program. At the end of year 3, unsatisfactory results within course work and these modules may result in a recommendation for an early exit from the four year degree.

Literacy modules can be accessed through Blackboard. Select the Community tab, then enter 'literacy modules' in the community search.

Working with Children Check

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card. to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at http://www.student.qut.edu.au/studying/jobs-and-work-experience/work-experience-and-placements/blue-cards.

Field studies units will be taken in Queensland schools.

Course Design

Graduates from this double degree will have a science degree with the same core support and choice of major study areas as the graduates from the Bachelor of Applied Science (SC01) program. Education studies will comprise the co-major component. Field Studies units will be taken in Queensland schools.

Course Update

From Semester 1, 2009, a revised version of this double degree program has been introduced. This course has been recoded IX56 Bachelor of Creative Industries/Bachelor of Information Technology. The current IX27 Bachelor of Creative Industries/Bachelor of Information Technology will be offered for continuing students only.

Course Structure

This course is made up of 384 credit points. Each component (i.e. Creative Industries and Information Technology) comprises 192 credit points.

The Creative Industries component is made up of 24 credit points of Faculty Foundation units, 168 credit points from Creative Industries interdisciplinary units.

The Information Technology component is made up of 120 credit points of Faculty core units and 72 credit points of units from an IT major.

Professional Recognition

Graduates of the Bachelor of Information Technology component meet the knowledge requirements for admission to the Australian Computer Society (ACS).

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the “Translation Unit Codes” column you are not permitted to enrol in the listed new code

Career Outcomes

Electrical and computer engineers design, install and maintain electrical, electronic, telecommunications and computing systems on behalf of governments and private companies. Graduates of the Bachelor of Business are skilled in many aspects of business including: accountancy, advertising, banking and finance, economics, electronic business, human resource management, international business, management, marketing and public relations.

Overview

Students combine engineering knowledge in electronics, computer systems, telecommunications and electric power with a business course majoring in one of accountancy, advertising, economics, finance, human resource management, international business, management, marketing or public relations.

Professional Recognition

This degree meets the requirements for membership of Engineers Australia.

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Special Course Requirements

A candidate for the degree of Bachelor of Engineering must obtain at least 60 days of industrial employment/practice in an engineering environment as part of the Work Integrated Learning unit, before graduating.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Course Design

Students are required to complete 480 credit points comprised of 288 credit points from the Bachelor of Engineering program and 192 credit points from the Bachelor of Business program. Students supplement the engineering component of this program with the 96 credit point Business School Core units in the Bachelor of Business program together with a 96 credit point Major in one of the following: Accountancy, Advertising, Economics, Finance, Human Resource Management, International Business, Management, Marketing or Public Relations.

Important Information

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet.
Other useful information can be found on Student Services website.

Course Update

From semester one, 2009 this course will not be available for commencing students. IX29 will only be available for continuing students. New students - please refer to IX57. Please contact sef.enquiry@qut.edu.au for any enquiries.

Professional Recognition

On graduation, students will be eligible for membership of the Mathematical Society of Australia, the Statistical Society of Australia Inc and, depending on unit selection, the Australian Society for Operations Research. Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society.

Course Design

This double degree comprises 384 credit points with 192 credit points from Information Technology and 192 credit points form Mathematics. All majors in the Bachelor of Information Technology are available.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Students wishing to participate in the Cooperative Education Program should be aware that they will not receive financial support as a Dean's Scholar for the duration of the placement.

Find out more about the Cooperative Education Program.

Mathematics Bursaries

Students enrolled in this course can apply for industry-sponsored bursaries. These bursaries are awarded to Australian citizens or permanent residents on a competitive basis. Applications should be submitted by 1 December of the year preceding entry to the course. For further information see www.maths.qut.edu.au

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:

IMPORTANT NOTE

As of 2013, this course will only be available for continuing Bachelor of Applied Science/Bachelor of Business students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year Bachelor of Applied Science units.
New students - please refer to Bachelor of Science/Bachelor of Business. Please contact sef.enquiry@qut.edu.au for any enquiries.

Overview

Through the combination of science and business, you will equip yourself for an exciting career at the cutting edge of scientific innovation within a range of public, private and non-profit industries.

Your business degree will give you a broad base of commercial knowledge as well as the opportunity to major in a specific business area. This understanding of business makes you more attractive to employers, even if you wish to work predominantly in a science-based career.

Professional Recognition

Both degrees allow you to satisfy the requirements of membership of the relevant professional body for your chosen majors. Please refer to the relevant pages in this prospectus for details on your intended science major, and the QUT Business School prospectus for more information on business majors, or visit www.qut.edu.au/courses

Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year
Course Coordinator	Director of Undergraduate Studies, QUT Business School; email: bus@qut.edu.au; Associate Professor Dann Mallet (Mathematics)
Discipline Coordinator	Ms Sherrena Buckby (Accountancy); ASPRO Gayle Kerr (Advertising); Dr Tommy Tang (Economics); Dr John Chen (Finance); Mr Greg Southey (Human Resource Management); Mr Michael Cox (International Business); Dr Henri Burgers (Management); Mr Bill Proud (Marketing); and Dr Kim Johnston (Public Relations) Business: Student Services - (07) 3138 2050 Business: Student Services - bus@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths B (4, SA)). Accountancy, Finance, Economics and Marketing majors also require 4 SA in Maths A, B or C.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths B (4, SA)). Accountancy, Finance, Economics and Marketing majors also require 4 SA in Maths A, B or C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Professional Recognition

Both degrees allow you to satisfy the requirements of membership of the relevant professional body for your chosen majors. Please refer to the relevant pages in this prospectus for details on the Bachelor of Mathematics and the QUT Business School prospectus for more information on business majors or visit www.qut.edu.au/courses

Financial Support

You should consider applying for an industry-sponsored mathematics bursary or a business scholarship to help you financially throughout your studies. For further information visit Scholarships.

Course Design

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Mathematics program and 192 credit points from the Bachelor of Business program.

Business component:
2009 and 2010 commencing students
• 7 Business School Core units (96 credit points)*
• 8 Major Core units (96 credit points)
• MGB223 Entrepreneurship and Innovation*

2007-2008 commencing students
• 7 Business School Core units (84 credit points)*
• 9 Major Core units (108 credit points)

*Please note that BSB122 Quantitative Analysis & Finance (Replaced by BSB123 Data Analysis) is not required as the content of MAB313 Mathematics of Finance covers similar topics. An additional unit from the chosen major replaces BSB122/BSB123 for 2007 and 2008 commencing students. MGB223 Entrepreneurship and Innovation replaces BSB122/BSB123 for 2009 and 2010 commencing students.

* Please note that EFB101 Data Analysis for Business which is normally undertaken in the Majors of Accountancy, Banking & Finance and Economics, is not required as the content will be covered in the statistics units from the mathematics component of the program.

Important Information for Business Students

QUT Business School rules and procedures are outlined in the Business Undergraduate Guidelines booklet.
Other useful information can be found on the Student Services website.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4,SA) and Maths A, B or C (4,SA)).

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4,SA) and Maths A, B or C (4,SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Career Outcomes

Graduates may develop careers in cyberlaw, intellectual property and privacy, dealing with the legal regulation of the Internet including downloading music, mobile phone camera use or copyright issues. You may become a legal practitioner, barrister, in-house counsel, government lawyer or policy adviser. There is also increased demand for roles in edemocracy both in egovernment service delivery and political campaigning.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord. At the end of your Law degree you will have completed the necessary units for admission to legal practice in Australia. To become a practicing lawyer you will need to complete further practical legal training (e.g. Graduate Diploma in Legal Practice) and then apply for admission.

Study Areas

IX53 will not have nominated majors and minors in the IT component and consequently there will not be a Study Area A shown on a graduate's parchment. Instead, IX53 will have specialisations. The specialisation areas that will be available for students will include:

• Business Process Management
• Data Warehousing
• Digital Societies
• Enterprise Systems
• Information Management
• Network Systems
• Software Engineering
• Web Technologies

Pathways to Futher Studies

In 2001, the Faculty introduced an accelerated Honours program to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of their a BIT degree (or double degree) which would be counted both for completion of the degree and towards the Honours program. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete a BIT degree (or double degree) with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Graduate Destination Streams

The Faculty of Law has identified graduate destination streams for students undertaking a law or law double degree. This means that, as students learn more throughout their degree, they can choose their elective units in the areas of law in which they become interested. Students are not restricted to choose electives from a single stream; the streams are only to provide guidance to students in making

their elective choices.
• Legal Practice
• General Legal Practice (work as a lawyer across a wide range of different legal areas)
• Specialist Legal Practice (work as a lawyer specialising in a particular area of the law, such as property law, family law or corporate law)
• Advocacy and Dispute Resolution (acting for clients in court or resolving disputes through negotiation and mediation processes)
• Public Sector (work as a lawyer in a government department)
• Private Enterprise (for those students not wanting to practise as a lawyer, but perhaps work within business management, human resources, information technology etc)

As students progress towards the end of their degrees there are more opportunities to participate in subjects where they engage in 'real world learning' , for example, working within law firms and government departments in placement electives.

Law School Electives Information

Students who are enrolled in LW34 (straight law undergraduate entry) are required to undertake two contextual electives in the first year of their degree (one in each semester). Contextual electives may also be undertaken by any student as an ordinary elective within their degree. The contextual electives are:
• LWB142 Law Society and Justice
• LWB144 Law and Global Perspectives
• LWB149 Indigenous Legal Issues
• LWB150 Lawyering and Dispute Resolution.

Students who are enrolled in any of the law double degrees commence their law electives in the second semester of their second year.

Students who are enrolled in LW35 (Graduate Entry) commence their law electives in first semester of their second year.

Law students other than Graduate Entry students can undertake 4 non-law units as electives within their law degree. Students may be particularly interested in elective options within the School of Justice which relate to human rights and criminal justice.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Professional Recognition

This course meets the requirements for membership of Engineers Australia (EA). EA is a signatory to the Washington Accord, which permits graduates from accredited member courses to work in various countries across the world. This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Other Course Requirements

Bachelor of Engineering students are required to complete at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

Cooperative Education Program

IT's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Pathways to Further Studies

In 2001, the Faculty introduced an accelerated Honours program to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of their a BIT degree (or double degree) which would be counted both for completion of the degree and towards the Honours program. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete a BIT degree (or double degree) with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Discipline Coordinator	Dr Perry Hartfield (Biochemistry Major); Dr Marion Bateson (Biotechnology Major); Associate Professor Dennis Arnold (Chemistry Major); Dr Ian Williamson (Ecology Major); Dr Ian Williamson (Environmental Science Major); Dr Emad Kirjakous (Forensic Science Major); Dr Craig Sloss (Geoscience Major); Dr Christine Knox (Microbiology Major); Dr Stephen Hughes (Physics Major)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4,SA) and Maths A, B or C (4,SA)). Recommended study: At least one of the sciences. For biochemistry, biotechnology, forensic science, and microbiology majors - Biological Science and Chemistry; for physic major - Maths C.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4,SA) and Maths A, B or C (4,SA)). Recommended study: At least one of the sciences. For biochemistry, biotechnology, forensic science, and microbiology majors - Biological Science and Chemistry; for physic major - Maths C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

IMPORTANT NOTE

This course is currently under review for future offerings (2013 onwards).

Course Overview

This double degree prepares you for an increasing range of careers that involve the application of information technology to science. It gives you the ability to use creative as well as analytical methods to solve scientific problems. Studying this double degree allows you to develop the technical skills required for your relevant field of study in applied science.

The science component of the course offers you the choice of majoring in biochemistry, biotechnology, chemistry, ecology, environmental science, forensic science, geosciences, microbiology or physics. Theoretical aspects are balanced by strong practical components in this science and information technology double degree.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord. Please refer to the Science pages at Studyfinder for more information on the relevant professional body for your chosen science major.

Study Areas

IX55 will not have nominated majors and minors and consequently there will not be a Study Area A shown on a graduate's parchment. Instead, IX55 will have specialisations. The specialisation areas that will be available for students will include:

- Business Process Management
- Data Warehousing
- Digital Societies
- Enterprise Systems
- Information Management
- Network Systems
- Software Engineering
- Web Technologies

Cooperative Education

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Pathways to Further Studies

In 2001, an accelerated Honours program was introduced to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of their BIT degree (or double degree) which

would be counted both for completion of the degree and towards the Honours program. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete a BIT degree (or double degree) with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Course Overview

This double degree allows you to complement your technical skills with creative skills through digital media and film production. You will learn to merge the creative and imaginative with the technical to develop sophisticated and innovative digital products. You can choose to complement your skill set through a range of information technology and creative industries areas of interest to diversify your studies, including:

• animation
• art and design history
• creative and professional writing
• dance studies
• digital media
• entertainment industries
• entrepreneurship
• fashion
• film, television and screen game design
• interactive and visual design
• journalism, media and communication
• literary studies
• music
• online environments

Career Outcomes

As a graduate you can enjoy the more creative side of information technology careers including digital media programmer, simulation designer or developer, games producer or designer, sound designer, mobile entertainment and communications developer, user interface developer, knowledge worker in music and sound, web developer and digital product strategist.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Course Design

You will undertake the Bachelor of Creative Industries core units as well as one creative industries major. Your information technology degree component comprises eight core units, four breadth units, and four units in your information technology specialisation.

Study Areas

The Bachelor of Information Technology will not have nominated majors and minors and consequently there will not be a Study Area A shown on a graduate's parchment. Instead, it will have specialisations. The specialisation areas that will be available for students will include:

• Business Process Management
• Data Warehousing
• Digital Societies
• Enterprise Systems
• Information Management
• Network Systems
• Software Engineering
• Web Technologies

Pathways to Futher Studies

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4,SA); Maths A, B or C (4,SA)).

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4,SA); Maths A, B or C (4,SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course Overview

There is an ever-increasing number of criminal acts resulting from the development and use of technology (such as the Internet and mobile devices), therefore, students with a corporate systems management background have the appropriate skills and knowledge required to work on criminology and policing for these areas. Corporate systems management students also gain information systems knowledge which allows them to more effectively manage, secure and control systems and processing in justice departments.

Corporate systems management teaches students how to analyse business needs and devise IT-enabled business systems that deliver the necessary information to the key people via the most appropriate technologies. The justice component comprises a primary major study area in either criminology or policing, which covers skills in criminology, policing, ethics, crime prevention, justice policy and investigations.

Career Outcomes

Graduates find work in justice areas including corrective services, police, Crime and Misconduct Commission, Department of Justice and Attorney-General, Federal and Family Courts and the Australian Taxation Office.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Domestic Course structure

Course structure

This course consists of 16 corporate systems management units and 16 justice units with both areas studied in each semester.

The justice component comprises a primary major study area in criminology or policing, which covers skills in criminology, policing, ethics, crime

prevention, justice policy and investigations.

You will also study a range of professional skills as a foundation for your career.

International Course structure

Course structure

Professional Recognition

Corporate Systems Management component: The course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Business component: Students may be eligible for membership to a number of professional bodies depending on choice of major and unit selection. Details on professional recognition can be found under the individual majors of the Bachelor of Business (BS05).

Course Design

Students are required to complete 384 credit points (32 units) comprised of 192 credit points (16 units) from the Bachelor of Business program and 192 credit points (16 units) from the Bachelor of Corporate Systems Management program which includes an industry based project and an IT options (elective) unit.

Business students complete 8 Business School Core Units together with 8 Major Core Units from their chosen discipline. (Accountancy students undertake 6 Business School Core Units and 10 Major Core Units to meet professional recognition requirements).

Note the following:

Cooperative Education Program

The Science and Engineering Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Course Overview

This double degree gives you the opportunity to use your problem-solving skills to develop realistic games in a competitive gaming environment. A decade ago, people probably wouldn't have noticed if the cape the game hero was wearing didn't flap in the wind as he ran, or that the boxes in the corner of the room of the dungeon didn't fall over when they are run into in a fight. Nowadays, serious gamers notice and demand this type of realism in their virtual worlds. This is where your maths and problem-solving capabilities come into play. Complex formulae are used in games design to create realistic scenes, and knowledge of mathematics will certainly aid your understanding.

Students undertake core units from both their Bachelor of Mathematics and Bachelor of Games and Interactive Entertainment. They can subsequently select from the strands of applied, computational, discrete and financial mathematics; mathematical modelling; operations research; scientific computation and visualisation; statistics and statistical modelling in their Bachelor of Mathematics
and from the majors of animation, digital media, game design or software technologies in their Bachelor of Games and Interactive Entertainment degree.

Career Outcomes

A graduate may find work in film and television special effects or in the games and interactive entertainment environments making games look more realistic (such as concept artist).

Professional Recognition

Membership of the Australian Mathematical Society, the Statistical Society of Australia and the Australian Society for Operations Research is available. This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Maths B
- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4,SA) and Maths B (4,SA)). Recommended study: At least one of the sciences. For biochemistry, biotechnology, forensic science, and microbiology majors - Biological Science and Chemistry; for physic major - Maths C.

International Subject prerequisites

- Maths B
- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4,SA) and Maths B (4,SA)). Recommended study: At least one of the sciences. For biochemistry, biotechnology, forensic science, and microbiology majors - Biological Science and Chemistry; for physic major - Maths C.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

IMPORTANT NOTE

This course is currently under review for future offerings (2013 onwards).

Career Outcomes

Knowledge of science underpins more than you might think. As a graduate of the Applied Science/Games and Interactive Entertainment double degree you may find work as a graphic/games designer. You may work on such things as making car games realistic, making people move more realistically using your knowledge of the laws of motion, or creating three-dimensional games.

Professional Recognition

Graduates will satisfy the requirements of membership in the relevant professional body for their chosen science major. See Studyfinder for details on the Bachelor of Applied Science majors. The software technologies major of the Bachelor of Games and Interactive Entertainment is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens and permanent residents only.

Find out more about the Cooperative Education Program.

Bachelor of Fine Arts (Interactive and Visual Design) / Bachelor of Information Technology

Handbook

Year	2012
QUT code	IX69
CRICOS	064812A
Duration (full-time)	4 years
OP	10
Rank	81
OP Guarantee	Yes
Campus	Gardens Point and Kelvin Grove
Domestic fee (indicative)	2012: CSP $3,725 per Semester
International fee (indicative)	2012: $10,800 per Semester
Total credit points	384
Dom. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year
Course Coordinator	Director of Undergraduate Studies (Creative Industries); Mr Mike Roggenkamp (Information Technology)
Discipline Coordinator	Mr Gavin Sade (Interactive and Visual Design) ci@qut.edu.au (Interactive and Visual Design)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (4, SA) of English and one of the following: Maths A, Maths B or Maths C.

International Subject prerequisites

- English

You must have achieved study of English and one of the following: Maths A, Maths B or Maths C, at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Career Outcomes

This double degree will set you up for a career in the rapidly expanding fields of contemporary communication and the application of new media technologies.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Course Structure

This course is made up of 384 credit points. Each component (i.e. Information Technology, and Interactive and Visual Design) comprises 192 credit points.

Study Areas

The Bachelor of Information Technology will not have nominated majors and minors and consequently there will not be a Study Area A shown on a graduate's parchment. Instead, it will have specialisations. The specialisation areas that will be available for students will include:

- Business Process Management
- Data Warehousing
- Digital Environments
- Enterprise Systems
- Information Management
- Network Systems
- Software Engineering
- Web Technologies

Pathways to Futher Studies

In 2001, an accelerated Honours program was introduced to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of their a BIT degree (or double degree) which would be counted both for completion of the degree and towards the Honours program. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete a BIT degree (or double degree) with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Alternatively, on successful completion of this course you will be eligible to apply for entry into the Bachelor of Fine Arts (Honours), provided you have achieved the required GPA.

Cooperative Education

The Faculty of Science and Engineering's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments. The Coop Ed Program is available to Australian citizens

and permanent residents only.

Find out more about the Cooperative Education Program.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

IMPORTANT NOTE

As of 2013, this course will only be available for continuing Bachelor of Applied Science/Bachelor of Business students and those students who are commencing in 2013 with advanced standing of 96 credit points of 1st year Bachelor of Applied Science units.
New students - please refer to Bachelor of Science/Bachelor of Business. Please contact sef.enquiry@qut.edu.au for any enquiries.

Professional Recognition

Graduates will satisfy the requirements for membership in the relevant professional body for their science major. See Studyfinder for details on the Bachelor of Applied Science majors.

At the end of your Law degree you will have completed the necessary units for admission to legal practice in Australia. To become a practising lawyer you will need to complete further practical legal training (e.g. Graduate Diploma in Legal Practice) and then apply for admission.

Course Design

The course is designed to cover all major areas of the law as well as allowing students to choose any of the following science majors that are offered in the Bachelor of Applied Science (SC01) course: biochemistry, biotechnology, chemistry, ecology, environmental science, forensic science, geoscience, microbiology and physics.

To complete the double degree in a shorter period of time, the co-major will be taken from the law program therefore it is not possible for students to choose any of the co-majors listed under the Bachelor of Applied Science course.

New students - please refer to Bachelor of Science/Bachelor of Mathematics. Please contact sef.enquiry@qut.edu.au for any enquiries.

Course Overview

Studying a double degree in applied science and mathematics will provide you with advanced knowledge and skills that are highly sought after by employers. A stronger training in mathematics and statistics enhances your capabilities in modelling analysis and design.

This four year double degree course integrates studies in one of the science majors with studies in mathematics. The science majors available are biochemistry, biotechnology, chemistry, ecology, environmental science, forensic science, geoscience, microbiology and physics.

The mathematics component offers studies in core mathematics, applied mathematics, computational mathematics, discrete mathematics, financial mathematics, mathematical modelling, operations research, statistics, statistical modelling, scientific computation and data visualisation.

Professional Recognition

Membership of the Australian Mathematical Society, the Statistical Society of Australia and the Australian Society for Operations Research is available. Graduates will satisfy the requirements for membership in the relevant professional body for their chosen science major.

Financial Support

You should consider applying for an industry-sponsored mathematics bursary to help you financially throughout your studies. For further information visit scholarships.

Sample Structure

Semesters

- Level 1 Units:
- Level 2 and 3 Mathematics Units:
- Level 2 and 3 Science Units:
- Science Elective Units:

Code	Title
Course Notes	
Students must complete at least (a) 192 credit points (16 twelve credit point units) of Mathematics units and (b) 192 credit points (16 twelve credit point units) of Science units, according to the requirements as follows:	
Level 1 Units:	
Students must complete the following Level 1 Mathematics units:	
MAB101	Statistical Data Analysis 1
MAB120	Algebra and Calculus
MAB121	Calculus and Differential Equations
MAB122	Algebra and Analytic Geometry
MAB210	Statistical Modelling 1
MAB220	Computational Mathematics 1
MAB120 is for students who do not have an exit assessment of at least Sound Achievement in four semesters of both Senior Mathematics B and Senior Mathematics C (or equivalent).	
Students with Sound Achievement in both Senior Mathematics B and C take a level 2 Mathematics unit option instead of MAB120.	
Students must complete the following Level 1 Science Foundation units:	
SCB110	Science Concepts and Global Systems
SCB111	Chemistry 1
SCB112	Cellular Basis of Life
In addition, students are required to complete any mandatory units - and should complete all recommended units, specified for the science major selected.	
Level 2 and 3 Mathematics Units:	
At least 120 credit points (10 twelve credit point units) must be taken from Level 2 and Level 3 Mathematics units with at least 48 credit points (4 twelve credit point units) from Level 3 Mathematics units:	
Students must complete:	
MAB311	Advanced Calculus
MAB312	Linear Algebra
Level 2 and 3 Science Units:	
At least 96 credit points (8 twelve-credit point units) must be taken from Level 2 and Level 3 Science units with at least 48 credit points (4 twelve credit point units) from Level 3 Science units. The science units must meet the advanced level requirements of one of the following majors of the SC01 Bachelor of Applied Science course: Biochemistry; Biotechnology; Chemistry; Ecology; Environmental Science; Forensic Science; Geoscience: Microbiology or Physics.	
Science Elective Units:	
The Mathematics unit (or units) normally undertaken in the first year of SC01 Bachelor of Applied Science is replaced by a Science elective unit (or units). This Science elective unit can be from any level. The level 2 Mathematics unit in the Physics major is replaced by a level 2 Science elective unit.	

Bachelor of Applied Science (Honours)

Domestic Entry requirements

Applicants should have completed QUT's Bachelor of Applied Science/ Bachelor of Health Science in a relevant area or equivalent and have attained a grade point average (GPA) of at least 5 overall in the undergraduate degree.

Application should be made at the end of the final year of the pass degree or within 18 months of completing that degree.

If applicants do not satisfy the normal entry requirements but have demonstrated outstanding performance in only the final year of a degree, or their application is based on other factors including work experience or involvement in research, they may be admitted at the discretion of the Executive Dean.

International Entry requirements

Applicants should have completed QUT's Bachelor of Applied Science/ Bachelor of Health Science in a relevant area or equivalent and have attained a grade point average (GPA) of at least 5 overall in the undergraduate degree.

Application should be made at the end of the final year of the pass degree or within 18 months of completing that degree.

If applicants do not satisfy the normal entry requirements but have demonstrated outstanding performance in only the final year of a degree, or their application is based on other factors including work experience or involvement in research, they may be admitted at the discretion of the Executive Dean.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Dissertation

The dissertation is one 48 credit point unit representing 50 per cent of the program. Preparation and presentation of the dissertation in completed under the guidance of a supervisor and is examined externally.

Electives

Students undertake two 12 credit point electives. At least one elective must be a research elective selected from the nominated list of research electives. The second elective may be selected from any honours or postgraduate program offered by the University, subject to prerequisite requirements and with the approval of the student's mentor/supervisor and the Course Coordinator. Normally the elective unit is chosen from within the student's discipline area or from an area that complements or is relevant to the student's study program. For further information on available units contact the Honours Coordinator.

International Student Entry

International students may enrol only in full-time studies.

Further Information

For more information about this course, please phone on +61 7 3138 4822 or email hlthhonours@qut.edu.au

Domestic Course structure

Course structure

Students complete a dissertation which is one 48-credit-point unit representing 50 per cent of the program. Preparation and presentation of the dissertation is completed under the guidance of a supervisor and is examined externally.

International Course structure

Course structure

Students complete a dissertation which is one 48-credit-point unit representing 50 per cent of the program. Preparation and presentation of the dissertation is completed under the guidance of a supervisor and is examined externally.

Dissertation

The Dissertation is one unit valued at 48 credit points and represents 50 per cent of the Honours course. Work on the dissertation commences during semester 1 (full-time mode) or semester 2 (part-time mode) and is completed over the course of the program. Preparation and presentation of the Dissertation is completed under the guidance of a supervisor.

Bachelor of Games and Interactive Entertainment - Dean's Scholars Program

Handbook

Year	2012
QUT code	IT04
CRICOS	059710E
Duration (full-time)	3 years
OP	1
Rank	99
Campus	Gardens Point
Domestic fee (indicative)	2012: CSP $3,875 per Semester
International fee (indicative)	2012: $11,700 per Semester
Total credit points	
Start months	February Fixed closing date - 30 November
Int. Start Months	February Fixed closing date - 30 November
Course Coordinator	Richard Thomas
Discipline Coordinator	

Domestic Entry requirements

2012 applications and registrations have closed.

Applications at QTAC and submission of the online questionnaire with QUT for 2012 was due on the 30 November 2011 and have now closed. Late applications and/or questionnaire submissions will not be accepted.

Applicants are required to complete an online questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths A, B or C (4, SA)).

International Entry requirements

The questionnaire is available from Additional entry requirements or phone (07) 3138 2782. Shortlisted registrants may be required to attend an interview in December and will be notified of date and venue after registrations close.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths A, B or C (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Why Choose This Course

This course is a collaboration between the Faculties of Science and Engineering, and Creative Industries, allowing you to be taught design and technology skills from the experts in their field. Queensland is leading the video game industry with figures showing the State earns more than any other from interactive entertainment. The State's game developers generate approximately $55 million per year; a 40 per cent slice of Australia's video games earnings, according to an Australian Bureau of Statistics report. Queensland game companies also employ almost half of the video game industry's workforce, with Brisbane becoming a hub of games talent, producing games for a worldwide audience.

Popular games titles produced in Queensland include Hellboy, the children's game Viva Pinata Party Animals and Star Wars: The Force Unleashed.

Course Structure

The 24-unit degree comprises:

• seven (7) core units including a 24 credit-point final-year project
• eight units in your chosen major
• four units in a secondary area of study, also known as your minor
• four optional units where you can choose units from across QUT to complement your studies.

MAJORS

Choose your primary area of study, also known as your major, from:

Animation This major includes foundation studies in the production of animation and motion graphics; history of animation practices; and programming which includes object orientation, 3D computer graphics and computer generated art. You will develop skills enabling you to work in areas such as computer games, interactive media arts, web applications, sound design, adaptive music and interactive public art works.

Game Design This major provides you with hands-on game design experience, as well as knowledge of narrative and immersion (drawing the player into the game), architecture and interior design to encourage the creation of interesting and unique models within the virtual environment.

Software Technologies# This major will

prepare you for careers in the game and simulation industries such as software tester, video game tester, game programmer and software tools developer. You will study technological aspects of computer games, games engine and tools development. Companies used to provide 'in-house' training for programming skills, however they are now turning to tertiary institutions to provide appropriately qualified graduates.

MINORS
- Animation
- Advanced Animation*
- Digital Media
- Entrepreneurship
- Game Design
- Legal Issues
- Marketing
- Mathematics for Games
- Mobile and Network Technologies
- Physics for Games
- Software Technologies
- Advanced Software Technologies^
- Sound Design

#Requirement for this major is an SA or better in Queensland Maths B (or equivalent).
*Only available to those undertaking the animation major.
^Only available to those undertaking the software technologies major.

Professional Recognition
As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

Career Outcomes
Depending on your specialisation, graduates may find employment as a games/digital media programmer, game designer, simulation developer or designer, animator, film and television special effects developer, games/digital media reviewer, video game tester, sound designer, mobile entertainment and communications developer, web developer, digital product strategist, computer systems engineer, multimedia designer, software engineer, or technical officer.

Your Course
Year 1
In your first year you will undertake five core units, consisting of:

- Computer Games Studies
- Building IT Systems
- Industry Insights
- Introducing Design
- Games Production

You will also undertake three units within your chosen major or minor.

Year 2
Second year consists of units within your chosen major and minor together with electives chosen from anywhere in the University.

Year 3
In your final year, you will extend your professional and technical skills by participating in a major group project to produce a significant piece of digital work using PC, mobile devices, consoles or virtual reality. You will also undertake a special topic. You will complete your units for your chosen major, minor and electives.

Note:
The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Financial Support
Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program
The Cooperative Education Program gives students the opportunity of 10-12 months paid industry placement during your course where they can integrate real experience with what they are learning in their degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.

Students participating in this program enrol in INS011 Cooperative Education 1 and INS012 Cooperative Education 2 in the second semester of the program. The cooperative education program and its mentoring and assessment requirements make up the required contact and assessment of both units. Eligibility criteria apply. International students are not eligible due to visa restrictions.

Part-time students who are working in a professional position related to the BGIE may be able to use their current employment to meet the criteria for completing INS011 Cooperative Edcation 1, after completion of 168 credit points in the Bachelor of Games and Interactive Entertainment, subject to meeting eligibility criteria. Further information about this option is available from Student Services, Level 3, O Block Podium, Gardens Point Campus.

Find out more about the Cooperative Education Program.

Unit Incompatibility/Translation Information
Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the "Translation Unit Codes" column you are not permitted to enrol in the listed new code

Further Information
Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure
Course structure
The 24-unit degree comprises:
- five core units plus a 36-credit-point final-year project (three units equivalent)
- eight units in your chosen major
- four units in a secondary area of study, also known as your minor
- four optional units where you can choose units from across QUT to complement your studies.

Majors
Choose your primary area of study, also known as your major, from:

This major includes foundation studies in the production of animation and motion graphics; history of animation practices; and programming which includes object orientation, 3D computer graphics and computer-generated art. You will develop skills enabling you to work in areas such as computer games, interactive media arts, web applications, sound design, adaptive music and interactive public art works.

Digital Media
This major will prepare you for careers as digital game designers, developers and multimedia architects, making use of the rapid convergence of mixing graphics, video, animation and sound to meet the increasingly complex world of digital entertainment. Organisations are also interested in the strategies that multimedia architects contribute to achieving maximum efficiency and competitiveness, such as integrating multimedia content with information in enterprise software systems and the organisation's websites.

Game Design
This major provides you with hands-on game design experience, as well as knowledge of narrative and immersion (drawing the player into the game), and game-level design to provide the skills necessary to create interesting and unique game worlds.

Software Technologies
This major will prepare you for careers in the game and simulation industries such as software tester, video game tester, game programmer and software tools developer. You will study technological aspects of computer games, games engine and tools development. Companies used to provide 'in-house' training for programming skills; however they are now turning to tertiary institutions to provide appropriately qualified graduates.

Why Choose This Course

You may have a great idea for new mobile software, a new way to conduct business over the net, or even how a business could out-manoeuvre its competitors using information technology. You know the importance of IT and you are excited about what IT can do and either want to develop the next big thing yourself or be able to evaluate, identify, choose and integrate from myriad technologies to arrive at a creative solution. This degree will equip you with the knowledge and skills to realise these aspirations. Whether as a professional within an organisation, as a consultant, or as an entrepreneur, you will be well equipped to take advantage of the demand for business-savvy IT professionals who are able to creatively develop or identify IT solutions to help organisations adapt and grow.

Course Structure

The 24-unit degree comprises:
• 16 core units that build your understanding of the relationships between information, technology, business and people
• eight units in a specialisation of your choice – you could choose to further specialise in information technology, a set of units from a different discipline, or optional units from across QUT to complement your studies.

Specialisation options include:

• adult and community learning
• business systems engineering
• construction management – administration
• creative industries management
• databases
• entrepreneurship
• finance
• forensics
• human resource management
• organisational psychology
• information systems
• information management/information technology management
• international studies
• law
• management
• marketing
• public health

Career Outcomes

Career destinations from this degree are management, analyst or consultant roles such as business analyst, project manager, process analyst, program manager, or data manager in fields

ranging from health to finance to media and entertainment services. If you are interested in creating your own business, you may start your own consultancy service to assist businesses in using information technology and improve their business performance. The career possibilities are numerous and relevant experience is in great demand by industry.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

Your Course

Year 1

In your first semester, you will complete the first four core units:
• Impact of IT
• Industry Insights
• Corporate Systems
• Organisational Databases.

In your second semester, you will complete three more core units:
• Management, People and Organisations
• Project Management Practice
• Information Systems Development.

You will also choose your specialisation and complete your first specialisation unit, or start your electives.

Year 2

In first semester, you will complete three core units:
• Business Analysis
• Technology Management
• Creating New Enterprises.

You will also complete your second specialisation unit or electives.

In second semester, you will complete two core units:
• Marketing
• Web Sites for Electronic Commerce.

You will also complete two more specialisation units or electives.

Year 3

In your first semester, you will complete two core units:
• Enterprise Systems Applications
• Information Systems Consulting.

You will also complete two more specialisation units or electives.

In your second semester, you will complete the last two core units:
• Business Process Modelling
• Corporate Systems Management Project (your final-year showcase project).

You will also complete the last two units of your specialisation or electives.

Note:

The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Financial Support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program

The Cooperative Education Program gives students the opportunity of 10-12 months paid industry placement during your course where they can integrate real experience with what they are learning in their degree. Companies that QUT's Coop Ed students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.

Further information about this option is available from Student Services, Level 3, O Block Podium, Gardens Point Campus.

Find out more about the Cooperative Education Program.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table
If you have completed the unit(s) listed under the “Translation Unit Codes” column you are not permitted to enrol in the listed new code.

Intermediate Level Electives

If you have not completed ITB008 you will need to replace it with one of the following intermediate level elective units.
• INB120 Corporate Systems
• INB220Business Analysis
• INB255 Security
• INB272 Interaction Design
Or, an INB300 level unit as approved by the course coordinator

Bachelor of Information Technology - Dean's Scholars Program

Handbook

Year	2012
QUT code	IT22
Duration (full-time)	3 years
OP	3
Rank	96
Campus	Gardens Point
Domestic fee (indicative)	2012: CSP $4,025 per Semester
International fee (indicative)	2012: $11,700 per Semester
Total credit points	
Course Coordinator	Mr Richard Thomas
Discipline Coordinator	

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Financial Support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Students are responsible for all other costs associated with their program.

Cooperative Education Program

The Faculty's Cooperative Education Program gives you the opportunity of 10-12 months paid industry placement during your course where you can integrate real experience with what you're learning in your degree. Students wishing to participate in the Cooperative Education Program should be aware that they will not receive financial support as a Dean's Scholar for the duration of the placement.

Find out more about the Cooperative Education Program.

New Unit Translations/Incompatability Table

Details on the translation and incompatibility of old and new units is located here:
Undergraduate Translation Table and
Postgraduate Translation Table
If you have completed the unit(s) listed under the "Translation Unit Codes" column you are not permitted to enrol in the listed new code.

Professional Recognition

As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

Domestic Entry requirements 2012 applications and registrations have closed.

Applications at QTAC and submission of the online questionnaire with QUT for 2012 was due on the 30 November 2011 and have now closed. Late applications and/or questionnaire submissions will not be accepted.

Applicants are required to complete an online questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English

We assume that you have knowledge equivalent to four semesters at high school level (Years 11 and 12) with sound achievement (English (4, SA) and Maths A, B or C (4, SA)).

International Entry requirements

Must be a current Year 12 student or students returning from a gap year who completed their Year 12 education in Australia; successful questionnaire; an interview may be required.

Shortlisted registrants may be required to attend an interview in December and will be notified of date and venue after registrations close.

International Subject prerequisites

- English

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies (English (4, SA) and Maths A, B or C (4, SA)).

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Financial support

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Domestic Course structure

Design your own degree

The Bachelor of Information Technology provides you with the practical skills and theoretical knowledge to become an effective professional. The 24-unit degree comprises:

- 8 core units - 4 introductory units in

first semester to introduce you to the breadth of information technology and its relationship to modern society. Then there are 4 advanced units spread over the rest of your degree program to develop your professional skills in preparation for your career
- 4 breadth units (intermediate level units) - these units give you broad technical experience across a range of fields in information technology. They also give you an introduction to choose the specialisation you wish to focus on
- 4 specialisation units (advanced level units) - these units allow you to focus on your chosen area of study, or you may choose to continue to broaden your information technology skills. This option allows you to study across a selection of study areas rather than focusing on one specialisation
- 8 optional units - these units allow you to customise your degree by studying in another professional discipline (for example, business, health, or science). Or you may choose to gain further depth in other areas of information technology.

Your course

Year 1

In your first semester you will explore how information technology has changed the world and what the possibilities are for the future. You will look at the details of information, computing and communication technologies to understand how they work. You will take part in hands-on projects developing small information technology systems.

Core units for Year 1:
- Impact of IT
- Emerging Technology
- Industry Insights
- Building IT Systems.

In Semester 2 you will undertake three breadth units and one optional unit.

Year 2

In your second year you will take part in a collaborative team setting, working on small projects that integrate the skills you learnt during Year 1. You will also start studying more advanced units in your chosen field of specialisation.

Core unit for Year 2:
- Scalable Systems Development.

Throughout Year 2 you will undertake one breadth unit, two specialisation units and four optional units.

Year 3

In third year you will be able to undertake workplace experience opportunities offered by the Faculty, while earning credit towards your degree. You will continue studying in your area of specialisation. In your final semester you will develop a major project, which will showcase what you have learnt during your degree and provide you with a key part of your portfolio when seeking a job.

Core units for Year 3:
- Professional Practice in IT
- The Business of IT
- IT Capstone Project.

Throughout Year 3 you will undertake two specialisation units and three optional units.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Why Do Honours

The honours program will expand your career options through exposure to the world of research. Honours is also the perfect pathway to an academic career through PhD studies, where you can become an independent researcher in your own right.

An honours degree signals to potential employers that you are someone with exceptional ability, motivation and commitment to your field. It gives you the chance to integrate the practical and conceptual knowledge gained through your degree. As an honours graduate, you can clearly demonstrate an ability to undertake rigorous independent research. These skills are unique to the honours program and will differentiate you from your peers in the employment market.

Course Design

The core of the honours program is a 36, 48, or 60 credit-point project (depending on your study area) that will provide students with the opportunity to learn about research by conducting a research project with an experienced researcher who acts as both supervisor and mentor. Students will learn the types of processes, creativity and analytical thinking that lead to scientific and technological advances and how to communicate such findings in a rigorous, systematic manner.

Career Outcomes

Information technology is an integral part of all commercial, industrial, government, social and personal activities. In the long term, your career opportunities are unbounded. Some information technology graduates retain a technical focus in roles such as web developer, database manager, network administrator, electronic commerce developer, data communications specialist, software engineer, systems programmer, computer scientist, systems analyst or programmer. Others evolve into domain experts as chief technology officers, chief information officers, managers, executives, business analysts, entrepreneurs or researchers. Graduates have the opportunity to achieve the highest levels of their profession.

Professional Recogntion

You will qualify for professional accreditation and employment in the field relevant to the specialisations chosen.

Pathways

You have the opportunity to choose a study pathway:

• **professional pathway** – you will learn how to think strategically, identify opportunities and solve problems that we don't even know are problems yet. This pathway will enable you to acquire the business and IT skills to have a career as an IT professional within any industry.

• **research pathway** – if you are interested in shaping the future of the IT industry you can pursue a research career. You will have opportunities to work with researchers on projects and progress on to an honours degree. You will have access to world-leading researchers within the Faculty.

• **entrepreneurship pathway** – you now have the opportunity to gain the entrepreneurial skills to develop an idea

into a commercial opportunity. You will be able to take advantage of the Faculty's close relationship with local technology entrepreneurs to learn from their experiences.

In 2001, the Faculty introduced an accelerated Honours program to increase the number of Bachelor of Information Technology students continuing their studies to complete the Honours year. The program allowed selected high achieving students the opportunity to undertake one postgraduate unit in the final semester of the Bachelor of Information Technology which would be counted both for completion of the degree and towards Honours. The program also provided students with the opportunity to commence their Honours studies over the Summer Semester.

The Dean's Scholars program was introduced in Semester 1, 2006. This program provides a scholarship for OP 1 and 2 students throughout their Bachelor and Honours degrees. Students in the program are required to maintain a high GPA to continue to qualify for the scholarship each semester. Students in the Dean's Scholars program will be able to take advantage of the Accelerated Honours program. Students in the Dean's Scholars program will have an option to follow an accelerated pathway through the Bachelor of Information Technology, allowing them to complete the Bachelor of Information Technology course plus the Bachelor of Information (Honours) course in a total of three years.

To encourage students to enter the Dean's Scholars program, domestic students have their undergraduate HECS paid by the Faculty and those proceeding to Honour's level will also receive full HECS support. International students who have completed a Year 12 education in Australia and meet the entry requirements for the program will have a third of their tuition fees paid by the Faculty for the undergraduate and Honours program.

An alternative to the Honours program is the Master of Information Technology (Research). Students who complete IT23 with a grade point average equal to, or greater than 5 (7 point scale) and who have decided against enrolling in an Honours program, could undertake this course. In addition, students may wish to enrol in the re-designed postgraduate coursework Masters which has ten specialisations allowing students to either extend their area of interest or specialise in other areas at the Masters level.

Important Information

Duration
Except in special circumstances as approved by the Dean, the requirements for an Honours degree must be completed within two successive years following first enrolment.

Unsatisfactory Progress
Failure to make satisfactory progress with either the course work component of an Honours program or with the dissertation, or both, may lead to exclusion from the program.

Unsatisfactory progress consists of:
- receiving a grade of less than 4 (or Satisfactory, where applicable) in one unit of the course work component.
- failure to make sufficient progress with the dissertation component, in the opinion of the Dean.

A student who is excluded from or otherwise fails to complete an Honours program will not normally be readmitted to that program.

Assessment
The minimum grade which may be credited towards an Honours degree is 4 (or Satisfactory, where applicable).
A minimum of three copies of a dissertation should be presented to the supervisor for examination. Dissertations should be temporarily bound in order to facilitate the making of any revisions and editorial changes required by the examiners before final printing and binding.
Dissertations will be examined by an examining committee appointed by the Dean and consisting of a least two examiners, one of whom may be external to the University. The supervisor of the candidate's work may be a member of the committee but may not chair the committee or act as the primary examiner.

Determination of Level of Honours Awards
The Faculty Academic Board will determine the level of Honours awarded.

Honours degrees will be awarded at the following levels after account is taken of the candidate's performance in all units and appropriate weight applied to the dissertation:
Honours 1 - First Class Honours
Honours 2A - Second Class Honours, Division A
Honours 2B - Second Class Honours, Division B
Honours 3 - Third Class Honours

The level of Honours award is to be determined by guidelines, as follows:
Honours 1 - GPA 6.50-7.00, or equivalent
Honours 2A - GPA 5.50-6.49, or equivalent
Honours 2B - GPA 4.50-5.49, or equivalent
Honours 3 - GPA 4.00-4.49, or equivalent

A candidate who does not reach the standard required for Honours 3 remains with a pass degree.

Note:
The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Elective Units - Students should choose advanced level postgraduate units. Normally units are undertaken in the area of the student's undergraduate major. Students wishing to enrol in a unit that is not of an advanced level should contact the Course Coordinator.	

INN701 enrolment - Though students are required to enrol in INN701 in their first semester of honours, the unit offers flexible enrolment through (a) a choice of modules on offer, and through (b) the option of undertaking the minimum necessary number of modules across more than one semester (see INN701 week 1 document for further details on enrolment flexibility).
Full-time students should be aware that many electives may be offered evenings only.

Overview

The **'Accelerated Honours'** program has been structured to provide an incentive for high achieving IT undergraduate students to continue into the Honours Program. Benefits of this accelerated program are:
* you are approved to undertake a concurrent enrolment in the final semester of your IT undergraduate course, that is to say, the student may enrol in undergraduate units and Honours.
* 12 credit points will be credited towards Block 3 electives in your IT undergraduate course on the basis of coursework studies completed in IT29 Honours.
* you are able to complete a four year program within 3 1/2 years.

Through a combination of research and advanced coursework units students can pursue specialised studies in a particular area of information technology. The course offers the opportunity to develop research and development skills, work on cutting-edge technology, and have access to specialist hardware and software. As a successful Honours graduate you are eligible to start a doctoral program, and can expect to obtain a research or teaching position. A wider range of career opportunities are available.

Please note: tuition fees normally apply for Summer enrolment.

Why Do Honours

The honours program will expand your career options through exposure to the world of research. Honours is also the perfect pathway to an academic career through PhD studies, where you can become an independent researcher in your own right.

An honours degree signals to potential employers that you are someone with exceptional ability, motivation and commitment to your field. Honours 2B - Second Class Honours, Division B
Honours 3 - Third Class Honours

The level of Honours award is to be determined by guidelines, as follows:

Honours 1 - GPA 6.50-7.00, or equivalent
Honours 2A - GPA 5.50-6.49, or equivalent
Honours 2B - GPA 4.50-5.49, or equivalent
Honours 3 - GPA 4.00-4.49, or equivalent

A candidate who does not reach the standard required for Honours 3 remains with a pass degree.

Unsatisfactory Progress
Failure to make satisfactory progress with either the course work component of an Honours program or with the dissertation, or both, may lead to exclusion from the program.

Unsatisfactory progress consists of:
- receiving a grade of less than 4 (or Satisfactory, where applicable) in one unit of the course work component.
- failure to make sufficient progress with the dissertation component, in the opinion of the Dean.

A student who is excluded from or otherwise fails to complete an Honours program will not normally be readmitted to that program.

Note:
The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Futher Information

Domestic Course structure
The Accelerated Honours program has been structured to provide an incentive for high achieving IT undergraduate students to continue into the Honours Program. Benefits of this accelerated program are:

- you are approved to undertake a concurrent enrolment in the final semester of your IT undergraduate course. That is to say, you may enrol in undergraduate units and Honours
- 12 credit points will be credited towards Block 3 electives in your IT undergraduate course on the basis of coursework studies completed in IT29 Honours
- you are able to complete a 4 year program within 3 1/2 years.

Through a combination of research and advanced coursework units students can pursue specialised studies in a particular area of information technology. The course offers the opportunity to develop research and development skills, work on cutting-edge technology, and have access to specialist hardware and software. As a successful Honours graduate you are eligible to start a doctoral program, and can expect to obtain a research or teaching position. A wider range of career opportunities are available.

International Course structure

CRICOS	049433D + 009041G
Duration (full-time)	4 years
OP	1
Rank	99
Campus	Gardens Point
Domestic fee (indicative)	2012: CSP $2,873 per Semester
Total credit points	384 (BMaths 288 cp and BAppSc(Hons) 96cp)
Credit points full-time sem.	48
Start months	February Fixed Closing Date - 30 November 2011
Int. Start Months	February This course is only available to international students completing Year 12 in Australia.
Deferment	You can defer your offer and postpone the start of your course for one year
Course Coordinator	Mr Richard Thomas
Discipline Coordinator	A/Prof Dann Mallet 07 3138 2354 dg.mallet@qut.edu.au

Domestic Entry requirements 2012 applications and registrations have closed.

Applications at QTAC and submission of the online questionnaire with QUT for 2012 was due on the 30 November 2011 and have now closed. Late applications and/or questionnaire submissions will not be accepted.

Applicants are required to complete an online questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Physics
- Maths C
- Maths B
- English
- Chemistry

Assumed knowledge includes English (4, SA) and Maths B (4, VHA) plus two (2) of Biological Science, Chemistry, Earth Science, Maths C or Physics (4, VHA)

International Entry requirements

International Students must have completed year 12 at an Australian school.

Applicants are required to complete a questionnaire, and may be required for interview by QUT Faculty of Science and Technology.

International Subject prerequisites

- Physics
- Maths C
- Maths B
- English
- Chemistry

Subject prerequisites include English (4, SA) and Maths B (4, VHA) plus two (2) of Biological Science, Chemistry, Earth Science, Maths C or Physics (4, VHA)

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Overview

The Dean's Scholars Program in Mathematics offers an enriched course of study, with an early introduction to mathematical research, for students who obtain outstanding levels of academic achievement at Secondary School. At the same time it provides the option of an accelerated pathway by which these students are able to complete the Bachelor of Mathematics course plus the Bachelor of Applied Science (Honours) course in a total of just three years.

Mathematics Dean's scholars are able to undertake research enrichment units and individually-tailored tutorial programs:

Sample Structure

Semesters

- Year 1, Semester 1 (48 cp)
- Year 1, Semester 2 (48 cp)
- Year 2, Semester 1 (48 cp)
- Year 2, Semester 2 (48 cp)
- Year 3, Semester 1 (48 cp)
- Year 3, Semester 2 (48 cp)
- Year 4, Semester 1 (48 cp) and Semester 2 (48 cp)
- Notes:

Code	Title
Year 1, Semester 1 (48 cp)	
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (48 cp)	
Year 1, Semester 2 (48 cp)	
Dean's Scholars Program enrichment unit:	
SCB303	Tutorial Program for Dean's Scholars
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (36 cp)	
Year 2, Semester 1 (48 cp)	
Dean's Scholars Program enrichment unit:	
SCB401	Research Methods for Dean's Scholars
Or other approved unit	
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (36 cp)	
Year 2, Semester 2 (48 cp)	
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (48 cp)	
Year 3, Semester 1 (48 cp)	

Bachelor of Mathematics & Bachelor of Applied Science (Honours) - Dean's Scholars Honours Program

Dean's Scholars Program enrichment unit:	
SCB501-1	Research Project for Dean's Scholars
Normal BMaths and BAppSc(Hons) units: BAppSc Coursework (36 cp)	
Year 3, Semester 2 (48 cp)	
Dean's Scholars Program enrichment unit:	
SCB501-2	Research Project for Dean's Scholars
Normal BMaths and BAppSc(Hons) units: BMaths Coursework (36 cp)	
Year 4, Semester 1 (48 cp) and Semester 2 (48 cp)	
Normal BMaths and BAppSc(Hons) units: BAppSc(Hons) Coursework/Research (48 cp)	
Normal BMaths and BAppSc(Hons) units: BAppSc(Hons) Coursework/Research (48 cp)	
Notes:	
- The exact timing of Dean's Scholars Program enrichment units may be varied to suit the student's chosen program of study.	
- It is also possible to complete the program in 3.5 years using a combination of the 3 and 4 year structures. There is also flexibility for students to undertake Dean's Scholars Program enrichment units during the summer semesters between years 1 and 2, and years 2 and 3 to lighten regular semester study loads or to assist in acceleration.

Course update

From Semester One 2013 this course will not be available for commencing students. SC01 will only be available for continuing students. New students - please refer to ST01. Please contact sef.enquiry@qut.edu.au for any enquiries.

Overview

The Bachelor of Applied Science Dean's Scholars Accelerated Honours Program is an accelerated program designed specifically for outstanding current, or returning from a gap year, Year 12 students who completed their Year 12 education in Australia. It also offers an accelerated pathway that enables students to complete both the Bachelor of Applied Science and the Bachelor of Applied Science (Honours) courses in just three years. A scholarship is offered to students in the Bachelor of Applied Science Dean's Scholars Accelerated Honours Program. Students are accepted into the program on the basis of outstanding academic ability and an interest in scientific research.

Professional Recognition

As a graduate of the Bachelor of Applied Science Dean's Scholars Accelerated Honours Program you will qualify for professional recognition and employment in fields relevant to the specialisations that you have chosen. It is expected that many Dean's Scholars will proceed to Doctor of Philosophy studies.

Financial support

Domestic students offered a place in the Dean's Scholars Program will have their undergraduate HECS paid by the Faculty and those proceeding to Honours will also receive full HECS support.

International students will have one-third of their tuition fees paid by the faculty for the undergraduate and honours programs.

Course Structure

As a student in the Dean's Scholars Accelerated Honours Program you will choose one of the following nine majors. You will also choose a co-major to accompany your major area of study. The co-major may be one of the other majors, or it could be one of the co-majors listed below:

Majors: Biochemistry, Biotechnology, Chemistry, Ecology, Environmental Science, Forensic Science, Geoscience, Microbiology, Physics.

Co-majors: Applied Geology, Astrophysics, Biodiversity, Chemistry for Industry, Life Science Technologies.

To allow the Dean's Scholars Program to be completed in an accelerated format some changes are made to the first year of the standard Bachelor of Applied Science (SC01) degree. The core units normally studied in first year are replaced by an enriched course of study which includes the following units:

SCB301 Science for Dean's Scholars
An intensive preparatory program immediately preceding the commencement of the first semester. This preparatory program commences mid-January and requires attendance for approximately 18 hours per week for six weeks.

SCB303 Tutorial Program for Dean's Scholars
An individually-tailored tutorial program during the first semester, under the guidance of an academic mentor. This unit is designed in a consultative process involving the student, the academic mentor, and the Dean.

SCB401 Research Methods for Dean's Scholars
The unit allows research skills to be developed through a literature review, experimental design considerations, research proposal formulation and writing, and the presentation of a research proposal.

SCB501 Research Project for Dean's Scholars
An individually tailored research project is carried out under the supervision of a research mentor.

Honours Program
Following the successful completion of the coursework and your initial research project in the first two years of the program, you will then commence the Bachelor of Applied Science (Honours) course. The Honours program continues the study of your chosen scientific major and also provides the opportunity to undertake a large research project. The Honours degree provides an excellent preparation to continue onto postgraduate research.

Note:
The Faculty may wish to make your project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Overview

Through a combination of research and advanced coursework units, students can pursue specialised studies in a particular area of information technology. The course offers the opportunity to develop research and development skills, work on cutting-edge technology, and have access to specialist hardware and software. As a successful Honours graduate you are eligible to start a doctoral program, and can expect to obtain a research or teaching position. A wider range of career opportunities are available.

Course Design

The core of the honours program is a 36, 48, or 60 credit-point project (depending on your study area) that will provide students with the opportunity to learn about research by conducting a research project with an experienced researcher who acts as both supervisor and mentor. Students will learn the types of processes, creativity and analytical thinking that lead to scientific and technological advances and how to communicate such findings in a rigorous, systematic manner.

Note:
The Faculty may wish to make your honours project or thesis work available to other students undertaking Honours studies as an exemplar. As the copyright owner of the work you have created, the Faculty will respect your rights and will seek your authorisation to share your work.

Professional Recognition

Relevant scientific professional bodies include Australasian Association of Clinical Biochemists, Australasian Institute of Mining and Metallurgy, AusBiotech Ltd, Australian Institute of Geoscientists, Australian Institute of Physics, Australian Mathematical Society, Australian Society for Biochemistry and Molecular Biology, Australian Society for Medical Research, Australian Society for Microbiology, Australian Society for Operations Research, Ecological Society of Australia, Geological Society of Australia, Royal Australian Chemical Institute, and Statistical Society of Australia. Eligibility for membership is based on the combination of units undertaken in the degree and the Bachelor of Applied Science course that underpins it.

Course Structure

The Honours year comprises coursework and a major research project supervised by QUT staff, in some cases in conjunction with local industry. Majors are offered in chemistry, ecology, environmental science, geology, life science, mathematics and physics.

listening	6.0
overall	6.0

Overview

This course serves as a preparation and pathway program for students wishing to enter a masters program in Engineering or Built Environment in the Science and Engineering Faculty. It is particularly aimed at students with either a three-year undergraduate degree, or a degree in a different area to the masters of their choice.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Special Note

The course structures are divided into two major categories: Standard program and UD50 Articulation program.
All students, except those intending to advance to UD50 Masters of Urban Development (Urban and Regional Planning), must follow the standard program.

Further Information

Science and Engineering Faculty - Phone +61 7 3138 8822, Email: sef.enquiry@qut.edu.au

Sample Structure

Code	Title
Full-time Structure - Year 1, Semester 1	
BEE Undergraduate Unit 1	
BEE Undergraduate Unit 2	
Other Faculty Postgraduate Unit A	
Other Faculty Postgraduate Unit B	
All units to be approved by Postgraduate Coordinator prior to enrolment.	
Part-time Structure	
A part-time course structure will require completion of 1 BEE undergraduate level unit and 1 Other Faculty postgraduate level elective unit each semester (50% of standard load as above.)	

Graduate Certificate in Engineering (Power Generation)

Handbook

Year	2012
QUT code	BX21
Duration (part-time domestic)	2 years
Campus	Gardens Point and University of Queensland
Domestic fee (indicative)	$3480 AUD per unit
Total credit points	48
Start months	Entry into this program is available throughout the year. For further details, contact sef.enquiry@qut.edu.au.
Course Coordinator	Professor Ted Steinberg
Discipline Coordinator	Science and Engineering Faculty 3138 8822 sef.enquiry@qut.edu.au

Domestic Entry requirements

- Bachelor of Engineering degree or equivalent as determined by the Faculty.
- Or Advanced Diploma with industry experience.
- Students with the degree qualification but who do not have second class honours may transfer after completing the Graduate Certificate provided they achieve a grade point average of 5 or more.
- Applicants must provide a letter of support from an industry that utilise power generation to be eligible to enter the program.
- Students who do not meet the entry requirements for the Master of Engineering (Power Generation) may be eligible to enrol in the Graduate Certificate in Engineering (Power Generation) as a pathway to the masters program.
- Students can also study individual power generation units through CPE

Minimum english requirements

Students must meet the English proficiency requirements.

Why study Power Generation

- Designed by industry experts and specialist staff at three of Australia's premier universities
- Study in a number of locations and a variety of formats to enable you to work full time and access the professional development easily
- Enhance your technical competency; increase your knowledge and skill set within the power generation sector
- Tailored program taught by industry experts
- Build a career in the dynamic power generation industry
- Study individual units through Continuing Professional Education .

Overview

Developed collaboratively by industry experts and specialist staff at three partner universities, the program is designed to meet the needs of the Australian power generation industry and its current and future workforce by capturing the knowledge and expertise of power generation engineers working in the power industry.

The program has been designed to enhance the technical competency of professional engineers and those working in Para-professional roles within the power generation sector through professional development.

Graduates will gain skills and knowledge in a range of areas related to the design, construction, maintenance and management of power generation. The degree offers both theoretical understanding and practical applications of advanced professional practice.

Study mode

The Graduate Certificate in Engineering (Power Generation) is delivered in intensive learning sessions on campus and generator sites. Units are delivered in a variety of formats and locations to enable those working in full-time roles to access the professional development easily.

Course Overview

Information technology is now firmly ensconced in society with all the other business practices that constitute modern organisations. This Graduate Certificate course has interfaculty contributions from the Faculties of Science & Engineering, Business, Creative Industries and Law, matching closely to their relevant IT research areas. Recognition of the burgeoning of specialised areas within the Information Industries is reflected in the structure of this course through ten different majors:

• No Major
• Digital Environments
• Enterprise Systems
• Executive Information Practice
• Games Design
• Games Production
• Information Management
• Library and Information Science
• Network Management
• Security
• Software Architecture

The Graduate Certificate in Information Technology IT85 is an entry point that is nested within the IT43 Masters and IT44 Masters Advanced programs. Students who successfully complete the IT85 course may articulate to IT43 Masters or IT44 Masters Advanced Programs.

The IT85 Graduate Certificate in Information Technology does not provide a pathway to follow on with a research degree. However, students who graduate from the IT85 Graduate Certificate in Information Technology may articulate to the IT43 Master of Information Technology or IT44 Master of Information Technology Advanced coursework programs.

Course Structure

Students are required to complete 48 credit points of units. Please refer to the course structures for information on specific unit requirements for each major. This course may be taken over two semesters part-time. However if the timetable permits a student may complete this course full time in one semester.

Course completion rules

Students should meet the following requirements before they are able to complete the Graduate Certificate program:
• Students are required to complete 48 credit points of units.
• Students must complete the specific unit requirements for a graduate certificate in a major.

Students undertaking units from the MBA program (GSN units) in the Graduate School of Business (GSB) must meet the MBA entry requirements. Please see the GSB website for further information.

Further Information

For further information about this course, please contact:

Dr Ross Hayward
Phone: +61 7 3138 8822
Email: sef.enquiry@qut.edu.au

Domestic Course structure

Course design

This course allows students who might like exposure to a number of units across several specialisation areas to undertake 48 credit points from any postgraduate Information Technology units offered. This program suits students who are not looking to undertake a discipline-specific postgraduate program, but rather complementary studies. This study area is the most flexible of the areas offered and thus is the default for students who do not select any major.

International Course structure

Course design

This course allows students who might like exposure to a number of units across several specialisation areas to undertake 48 credit points from any postgraduate Information Technology units offered. This program suits students who are not looking to undertake a discipline-specific postgraduate program, but rather complementary studies. This study area is the most flexible of the areas offered and thus is the default for students who do not select any major.

Overview

These courses enable graduates from any discipline to develop their knowledge and skills in one or more areas of the mathematical sciences. Strands available include mathematical modelling/applied mathematics, computational mathematics, statistics/ statistical modelling, quantitative analysis/financial mathematics and operations research.

These courses recognise that students may not have studied mathematics for some time.

Course Design

The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background and area of interest within the mathematical sciences.

In the Graduate Certificate, at least 36 credit points must be taken from postgraduate mathematics units and up to 12 credit points can be taken from units other than mathematics units.

Further Information

For further information about this course, please contact:

Overview

This course offers students currently employed in industry the opportunity to upgrade their professional qualificiations in one of our science disciplines. The course is a one-year-full-time (or two-year-part-time) postgraduate qualification by coursework, or coursework and a minor research project.

Career Outcomes

Graduates find employment in hospitals, health departments, mining companies, tertiary institutions and medical instrumentation companies, in careers such as medical physicists or biomedical engineers.

Course Design

This coursework program allows students to complete a minor research project of up to 36 credit points in some discipliines (as approved by the Academic Board). The assessed coursework may include advanced lectures, seminars, reading units or independent study designed to focus on information retrieval skills. Coursework units are chosen from those in the Master of Applied Science course and may contain units from other postgraduate courses, the Bachelor of Applied Science (Honours) program or advanced undergraduate programs.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Overview

This course offers an engineering management qualification to practising engineers through formal study in management and advanced engineering skills and knowledge. It provides graduates with analytical tools and methods required to improve operational efficiencies, typically within manufacturing and service organisations. It will prepare engineering graduates to take up management-level roles in operations management, quality control management, logistics or supply chain management.

Advanced Standing

Students completing two Masters courses in the following Master Courses - BN87, BN88, BN89, EN50(Systems), UD50 - will be eligible to apply for a maximum of 24 credit points advanced standing in the second course on the basis of common units already completed. Such students will be required to complete a minimum of 72cp to be determined in consultation with the nominated Course Leader, to achieve the second Masters.

Further Information

Master of Engineering (Power Generation)

Handbook

Year	2012
QUT code	BX20
Duration (part-time domestic)	4 years
Campus	Gardens Point and University of Queensland
Domestic fee (indicative)	$3480 AUD per unit
Total credit points	96
Start months	Entry into this program is available throughout the year. For further details, contact sef.enquiry@qut.edu.au
Course Coordinator	Professor Ted Steinberg
Discipline Coordinator	Science and Engineering Faculty 3138 8822 sef.enquiry@qut.edu.au

Domestic Entry requirements

Applicants for this course must possess a:

- Bachelor of Engineering degree
- and a grade point average of 5 or more (on a 7-point scale)
- or an equivalent qualification as determined by the Faculty.

Applicants must provide a letter of support and sponsorship from an industry with a power generation component to be eligible to enter this program. Sponsorship can range from the employer giving simple approval through to full payment of fees.

Students who do not meet the entry requirements for the Master of Engineering (Power Generation) may be eligible to enrol in the Graduate Certificate in Engineering (Power Generation) as a pathway to the masters program.

International Entry requirements

Please see the Continuing Professional Education Office or the Power Generation Skills Development for details of entry requirements.

Minimum english requirements

Students must meet the English proficiency requirements.

Why study Power Generation

- Designed by industry experts and specialist staff at three of Australia's premier universities
- Study in a number of locations and a variety of formats to enable you to work full time and access the professional development easily
- Enhance your technical competency; increase your knowledge and skill set within the power generation sector
- Tailored program taught by industry experts
- Build a career in the dynamic power generation industry
- Study individual units through Continuing Professional Education .

Study mode

The Master of Engineering (Power Generation) is delivered in intensive learning sessions on campus and generator sites. Units are delivered in a variety of formats and locations to enable those working in full-time roles to access the professional development easily.

Further Information

Please visit here to find out how to apply and for further information

Overview

Developed collaboratively by industry experts and specialist staff at three partner universities, the program is designed to meet the needs of the Australian power generation industry and its current and future workforce by capturing the knowledge and expertise of power generation engineers working in the power industry.

The program has been designed to enhance the technical competency of professional engineers and those working in Para-professional roles within the power generation sector through professional development.

Graduates will gain skills and knowledge in a range of areas related to the design, construction, maintenance and management of power generation. The degree offers both theoretical understanding and practical applications of advanced professional practice.

Early Exit Option

An early exit with BX21 - Graduate Certificate in Engineering (Power Generation) is available.

Domestic Course structure

Program structure

To obtain a Masters qualification, students must complete eight courses: five core courses and three electives. There is an option for students to exit with a Graduate Certificate award after completion of four courses (if requirements for a Graduate Certificate are met).

The Power Generation Masters program is built around five core courses:

- Introduction to Power Plant (QUT)
- Asset Management Systems (CQU)
- Rotating Machinery (UQ)
- Project Delivery (QUT)
- Regulation, Compliance and Safety (UQ)

Students can then choose three electives from the following list:

- Applied Thermodynamics (QUT)
- Advanced Power Plant (CQU)
- Plant Control Systems (UQ)
- Power Plant Chemistry (CQU)
- Bulk Materials and Waste Products (CQU)
- Industrial Electrical Power

Distribution (QUT)
- Plant Materials (CQU)
- Generator Technology Design and Application (UQ)
- Transformer Technology Design and Operation (UQ)
- Industrial Electrical Power Systems (QUT)
- Gas Plant and Systems (UQ)

For more information on any of the units from UQ or CQU visit the Power Generation Skills Development site.

International Course structure

Program structure

Students can undertake any of these units as one-off continuing professional development. International students can enrol in an award program at UQ or CQU.

Core units:
- Introduction to Power Plant (QUT)
- Asset Management Systems (CQU)
- Rotating Machinery (UQ)
- Project Delivery (QUT)
- Regulation, Compliance and Safety (UQ)

Elective units:
- Applied Thermodynamics (QUT)
- Advanced Power Plant (CQU)
- Plant Control Systems (UQ)
- Power Plant Chemistry (CQU)
- Bulk Materials and Waste Products (CQU)
- Industrial Electrical Power Distribution (QUT)
- Plant Materials (CQU)
- Generator Technology Design and Application (UQ)
- Transformer Technology Design and Operation (UQ)
- Industrial Electrical Power Systems (QUT)
- Gas Plant and Systems (UQ)

For more information on any of the units from UQ or CQU visit the Power Generation Skills Development site.

Sample Structure

Code	Title
Core units (QUT)	
EPG001	Introduction To Power Plant
EPG005	Project Delivery
PLUS select one unit from the Power Generation Unit Options. You will be granted 60cp of advanced standing based on completion of approved units from UQ and CQU.	
If you wish to undertake 24cp of this 60cp at QUT, please consult the faculty.	
Unit electives (QUT)	
EPG006	Applied Thermodynamics
EPG011	Industrial Electrical Power Distribution
EPG015	Industrial Electrical Power Systems

Master of Engineering (Railway Infrastructure)

Handbook

Year	2012
QUT code	BX30
CRICOS	External Study Only
Duration (part-time)	4 years
Domestic fee (indicative)	$3044 AUD per unit
International fee (indicative)	$3044 AUD per unit
Total credit points	96
Start months	February, July
Int. Start Months	February, July
Course Coordinator	Dr Martin Murray and Mr Mike Garrett
Discipline Coordinator	Science and Engineering Faculty 3138 8822 sef.enquiry@qut.edu.au

Domestic Entry requirements

Entry to this course is open to employees of companies conducting business in the railway industry and whose employer is prepared to sponsor or support their study of this course. That is, applicants must be working in the railway industry and have the support of their employer.

You will also need a four-year full-time bachelor degree in a civil engineering related field or a three-year full-time diploma and three or more years of relevant professional experience in the railway industry. You will also need a grade point average of 5.0 or more on a 7-point scale in that study, or an equivalent qualification determined by the Faculty. You must supply original copies of qualifications claimed in your application.

English language requirements for the course are an English Language Proficiency level in accordance with QUT requirements (IELTS score of 6.0 with no sub-band below 6.0) if English is not your first language. If you obtained your qualifications overseas you may still require an IELTS or TOEFL test, even if you are now resident in Australia.

International Entry requirements

Entry to this course is open to employees of companies conducting business in the railway industry and whose employer is prepared to sponsor or support their study of this course. That is, applicants must be working in the railway industry and have the support of their employer.

You will also need a four-year full-time bachelor degree in a civil engineering related field or a three-year full-time diploma and three or more years of relevant professional experience in the railway industry. You will also need a grade point average of 5.0 or more on a 7-point scale in that study, or an equivalent qualification determined by the Faculty. You must supply original copies of qualifications claimed in your application.

Minimum english requirements

Students must meet the English proficiency requirements.

listening	6.0
overall	6.0

Why study Railway Infrastructure

- study part-time by flexible online learning – wherever you are in the world
- developed exclusively for engineers employed in the rail industry
- designed by Australian rail industry and academic personnel and fully endorsed by Rail Innovation Australia
- comprehensive best-practice learning material from one of the world's leading heavy haul nations
- study individual units through Continuing Professional Education .

Overview

Developed as a cooperative project between the rail industry and the Queensland University of Technology, this course captures the knowledge and expertise of civil infrastructure engineers working in the Australian rail industry. It is provided as a professional development program for people working in the rail industry. Graduates will gain skills and knowledge in a range of areas related to the design, construction, maintenance and management of railway infrastructure. The degree offers both theoretical understanding and practical applications of advanced professional practice.

Study Mode

The course is delivered via flexible online learning suitable for mature age students studying part-time and working full-time .There are no on-campus classes and you can complete the course from any location world-wide. You will study using a combination of online, CD and print material and submit assignments for assessment.

Further Information

Please visit here to find out how to apply and to register for the newsletter.

Early Exit Option

An early exit with BX31 - Graduate Certificate in Engineering (Railway Infrastructure) is available.

Assumed Knowledge

It is assumed upon entry to the Masters program that students are proficient in prerequisite knowledge relevant to the intended Study Area A:

• **Electrical Engineering:** students are assumed to be proficient in the general areas of electrical engineering, electronic engineering or relevant disciplines.
• **Mechanical Engineering:** students are assumed to be proficient in the general areas of mechanical engineering, metallurgy, materials or relevant disciplines.
• **Sustainable Energy:** students are assumed to be proficient in general engineering including electrical, mechanical and civil or relevant science disciplines.
• **Transport:** students are assumed to be proficent in general engineering, preferably with civil and transport related disciplines.

Course Structure

To graduate with a Master of Engineering students are required to complete 96 credit points (8 units) of course units.

a) 2 Core units + 2 Project units (of a specialisation area) + at least 3 electives with the same specialisation tag to claim Master of Engineering (Specialisation); or

b) 2 Core units + 2 Project units + any 4 electives to claim Master of Engineering, i.e. no specialisation (Students fulfilling the specialisation requirement may choose not to have a specialisation in the award title)

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Early Exit Options

Early exit with the Graduate Diploma in Built Environment and Engineering is available upon completion of the two core units ENN541 and ENN542 and any two Project or specialisation units in the course.

Professional Recognition

The Master of Engineering is a post-professional qualification and, as such, is beyond the usual qualifications required for membership of professional organisations.

Domestic Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)

OR

• Evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

Domestic students:
Domestic students who have completed an undergraduate degree (in any field) with a minimum grade point average (GPA) of at least 4.5 (on a 7-point scale) are eligible for the programs described in this proposal.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Students:
International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)

OR

• Evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

Domestic students:
Domestic students who have completed an undergraduate degree (in any field) with a minimum grade point average (GPA) of at least 4.5 (on a 7-point scale) are eligible for the programs described in this proposal.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Students:
International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

Minimum english requirements

Students must meet the English proficiency requirements.

overall	6.5

Master of Information Technology

Course Overview

Information technology is now firmly ensconced in society with all the other business practices that constitute modern organisations. This Master of Information Technology course has interfaculty contributions from the Faculties of Science & Engineering, Business, Creative Industries and Law, matching closely to their relevant IT research areas. Recognition of the burgeoning of specialised areas within the Information Industries is reflected in the structure of this course through ten different majors other than the "No Major" option:

- Software Architecture
- Network Management
- Enterprise Systems
- Games Production
- Games Design
- Security
- Library and Information Studies (Multi-modal)
- Information Management
- Digital Environments
- Executive Information Practice

The structure of this course is designed so that a student does not have to decide on a major until after the first semester. Elective and core units may be selected first. Students must generally complete the core unit and seven units from within their major. The only exception to this structure is in the Library and Information Studies major.

Students who complete the Master of Information Technology (IT43) may return to complete the Master of Information Technology (Advanced) (IT44) at a later date and claim credit for all units completed in IT43.

Electives:
Students can generally select up to 4 electives; again, the exception is in the Library and Information Studies major, where students can select no more than two electives.

Non-cognate students are recommended to select three Basic Elective Units as their electives.

Students wishing to use the Masters program as a pathway to a PhD program within QUT are recommended to select 4 advanced research or project units as their electives. These students are also advised to enrol in INN700 Introduction to Research as part of their major.

It is possible, for students who wish, to complete dual Master degrees. Students can receive up to four units of credit for a previous Masters degree as part of their elective unit block. Thus, they are only required to complete the major and core. Students may then receive their Masters degree from the Science and Engineering Faculty in two semesters.

Students undertaking units from the MBA program (GSN units) in the Graduate School of Business (GSB) must meet the MBA entry requirements. Please see the GSB website for further information.

The Library and Information Studies major is offered in multimodal delivery allowing students to complete their studies either face-to-face or online.

Online Delivery

The Library and Information Studies major is offered in multimodal delivery allowing students to complete their studies either face-to-face or online.

The Executive Information Practice major is offered in external mode allowing students to complete their studies online.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters program:

- Students are required to complete 144 credit points of units.
- Students are required to complete the specified core unit.
- Students wishing to specialise must complete the specific unit requirements for a major.
- Students wishing to complete their postgraduate studies without a single area of specialisation must satisfy the unit requirements for graduation with no major.
- Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points

Domestic Course structure

Course design

This course allows students who might like exposure to a number of units across several specialisation areas to undertake 84 credit points from any postgraduate Information Technology units offered. This program suits students who are not looking to undertake a discipline-specific postgraduate program, but rather complementary studies. This study area is the most flexible of the areas offered and thus is the default for students who do not select any major.

International Course structure

Domestic Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)

OR

• Evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

Domestic students:
Domestic students who have completed an undergraduate degree (in any field) with a minimum grade point average (GPA) of at least 4.5 (on a 7-point scale) are eligible for the programs described in this proposal.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Students:
International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)

OR

• Evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

Career Progression

Graduates of Executive Information Practice will take on key positions in middle and high level management in a broad range of industries. While the career outcomes from the major are limited only by the drive and imagination of the graduates, key positions could include chief information officer, IT program manager, library director, cultural services manager or senior librarian.

Special entry requirements

Executive Information Practice has core units from the MBS and as such must also meet the MBA entry requirements:
- Demonstrate competency in the English language
- Have a GMAT score of at least 500
- Have at least three years work experience
- At least 10 points from at least two of the three categories - prior work experience, academic achievement and management aptitute

For further information, including details regarding the allocation of points, please see the table at http://www.bgsb.qut.edu.au/study/entryreq/

Course completion rules

Students should meet the following requirements before they are able to complete the Masters program:
• Students are required to complete 144 credit points of units.
• Students are required to complete the specified core unit.
• Students wishing to specialise must complete the specific unit requirements for a major.
• Students wishing to complete their postgraduate studies without a single area of specialisation must satisfy the unit requirements for graduation with no major.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points

Domestic Course structure

Course design

This major is where the Master of Business Administration (MBA) meets IT, with MBA units incorporated into the course. This is the first Australian qualification designed to meet the needs of mid-career information and IT professionals who are seeking to advance their career opportunities. Very few qualifications provide the opportunity for midcareer professionals to further develop and refine their information and IT skills and knowledge while also having the opportunity to acquire a working knowledge of management practice.

Core units are offered by the areas of IT and business. You are able to study units in marketing, international business, accounting, public administration and evidence-based practice along with information security, systems and networks, information management, interaction design, data mining, and library and information science.

Those interested in pursuing a Master of Business Administration at QUT are eligible for advanced standing towards the qualification, making this major an excellent pathway to the MBA.

International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Career Progression

This postgraduate course allows a graduate to learn the process of designing games even when their profession is not in the games industry, e.g. education, training and simulation. A career outcome includes a games or simulation designer.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters program:
• Students are required to complete 144 credit points of units.
• Students are required to complete the specified core unit.
• Students wishing to specialise must complete the specific unit requirements for a major.
• Students wishing to complete their postgraduate studies without a single area of specialisation must satisfy the unit requirements for graduation with no major.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students should meet the following requirements before they are able to complete the Masters program:
• Students are required to complete 144 credit points of units.
• Students are required to complete the specified core unit.
• Students wishing to specialise must complete the specific unit requirements for a major.
• Students wishing to complete their postgraduate studies without a single area of specialisation must satisfy the unit requirements for graduation with no major.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Domestic Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)

OR

• Evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

Domestic students:
Domestic students who have completed an undergraduate degree (in any field) with a minimum grade point average (GPA) of at least 4.5 (on a 7-point scale) are eligible for the programs described in this proposal.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Students:
International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Domestic Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)

OR

• Evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

Domestic students:
Domestic students who have completed an undergraduate degree (in any field) with a minimum grade point average (GPA) of at least 4.5 (on a 7-point scale) are eligible for the programs described in this proposal.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

International Students:
International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Applicants without an undergraduate degree in Information Technology (or equivalent) are recommended to select 3 Basic Elective Units as their electives. These electives are to be taken at the beginning of their studies.

Master of Information Technology (Security)

Course completion rules

Students should meet the following requirements before they are able to complete the Masters program:

• Students are required to complete 144 credit points of units.
• Students are required to complete the specified core unit.
• Students wishing to specialise must complete the specific unit requirements for a major.
• Students wishing to complete their postgraduate studies without a single area of specialisation must satisfy the unit requirements for graduation with no major.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points.

Description

Information technology is now firmly ensconced in society with all the other business practices that constitute modern organisations. This Master of Information Technology (Advanced) course has interfaculty contributions from the Faculties of Science & Engineering, Business, Creative Industries and Law, matching closely to their relevant IT research areas. Recognition of the burgeoning of specialised areas within the Information Industries is reflected in course structures that provide for ten different majors other than the "No Major" option:

• Software Architecture
• Network Management
• Enterprise Systems
• Games Production
• Games Design
• Security
• Library and Information Studies
• Information Management
• Digital Environments
• Executive Information Practice

The structure of this course is designed so that a student does not have to decide on a major until after the first semester. Elective and core units may be selected first. Students must generally complete the core unit and seven units from within their major. The only exception to this structure is in the Library and Information Studies major.

Electives:
Students can generally select up to 4 electives; again, the exception is in the Library and Information Studies major, where students can select no more than two electives.

Non-cognate students are recommended to select three Basic Elective Units as their electives.

Advanced Research Units (Complementary Studies):
Students who enrol in the Masters Advanced program must complete four advanced research or project units. It is recommended that students complete advanced research and project units in the latter half of their course.

Students wishing to use the Masters Advanced program as a pathway to a PhD program within QUT are advised to

enrol in INN700 Introduction to Research as part of their major and take INN701 Advanced Research Methodologies as an elective.

It is possible for students to complete dual Master degrees. Students can receive up to four units of credit for a previous Masters degree as part of their elective unit block. Thus, they are only required to complete the major and core. Students may then receive their Masters degree from the Science and Engineering Faculty in two semesters.

Students undertaking units from the MBA program (GSN units) in the Graduate School of Business (GSB) must meet the MBA entry requirements. Please see the GSB website for further information.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.
• Students seeking a single area of specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.
• Students must complete 48 credit points of project or advanced research units.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points, or with a Masters (IT43) after successful completion of an approved 144 credit points.

Domestic Course structure

Course design

This course allows students who might like exposure to a number of units across several specialisation areas to undertake 84 credit points from any postgraduate Information Technology units offered. This program suits students who are not looking to undertake a discipline-specific postgraduate program, but rather complementary studies. This study area is the most flexible of the areas offered and thus is the default for students who do not select any major.

Overview

Web technologies and applications are reshaping contemporary organisations. This major allows you to study how developments in IT shape society through applications like FaceBook, MySpace, Second Life, Smart Phones, iPods and gaming devices.

This major has been designed to meet the needs of professionals and organisations seeking to harness the benefits of social computing to advance business goals. Students will explore the ways in which IT has altered the production of knowledge, community building collaboration and the design and delivery of organisational activities and services. This major is aimed at professionals and organisations seeking to be not just IT-savvy users but leaders and innovators.

Why study this Major?

Increasingly, web 2.0 technologies such as wikis, blogs and social networks are being used within organisations. A future trend will see successful contemporary professionals and organisations requiring expertise in not just business and management practice but in the critical design, use and consequences of new and emerging social technologies. The Digital Environments major represents a new and emerging field for the IT discipline. It symbolises the growing interlink between IT, business and society.

Career Progression

Graduates from the Digital Environments major will find positions in a broad range of industries and will be well placed to contribute to organisational success. Some key positions include online community manager, social network analyst, community organiser, e-marketer, web analyst, systems administrator, IT project manager, application developer, web developer, communications and marketing manager, IT manager, web manager, knowledge manager, IT analyst, technology officer, technology consultant.

Domestic Course structure

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:

- Students are required to complete 192 credit points of units.
- Students are required to complete the specified core unit.
- Students seeking a single area of specialisation must complete the specific unit requirements for a major.
- Students not seeking a single area of specialisation may graduate with no major.
- Students must complete 48 credit points of project or advanced research units.
- Students may be allowed to take up

to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

International Course structure

Domestic Entry requirements

Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• the Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)
OR
• evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

International Entry requirements

Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• the Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)
OR
• evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0

Overview

This major is where the MBA meets IT: Master of Business Administration units are incorporated into this course. It is the first Australian qualification designed to meet the needs of mid-career information and IT professionals who are seeking to advance their career opportunities. Very few qualifications provide the opportunity for mid-career professionals to further develop and refine their information and IT skills and knowledge while also having the opportunity to acquire a working knowledge of management practice.

Core units are offered by the areas of IT and business. You are able to study units in marketing, international business, accounting, public administration and evidence-based practice along with information security, systems and network, information management, interaction design, data mining and library and information science.

Those interested in pursuing a Master of Business Administration at QUT are eligible for advanced standing towards the qualification, making it an excellent pathway to QUT's Master of Business Administration (MBA).

Why study this Major?

Australia needs information and IT leaders who will help shape the future of our nation's information-rich and technology-driven economy.

Graduates of this course will possess a comprehensive working knowledge of contemporary management issues, advanced-level information and IT skills and the communication and leadership abilities essential for the executive or management role.

Career Progression

Graduates of Executive Information Practice will take on key positions in middle and high level management in a broad range of industries. While the career outcomes from the major are limited only by the drive and imagination of the graduates, key positions could include chief information officer, IT program manager, library director, cultural services manager or senior librarian.

Master of Information Technology (Advanced) (Executive Information Practice)

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.
• Students seeking a single area of specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.
• Students must complete 48 credit points of project or advanced research units.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points, or with a Masters (IT43) after successful completion of an approved 144 credit points.

Overview

This course focuses on developing the design and storytelling skills required to create games and interactive technology. You will have the opportunity to develop and apply these skills to your own discipline area. You will develop advanced project management skills together with the capability to analyse design and requirements appropriate to interactive environments, taking into consideration such aspects as the type of interaction required for your targeted users and the social implications of that interaction. You will also have the opportunity to research and apply the most up-to-date methods and techniques in this discipline. This course allows current industry members to take those skills that they have already acquired and extend them to support career development.

Why study this Major?

As entertainment technologies improve so do the expectations of the users of these technologies. Entertainment technologies have expanded to other applications such as education, simulation, training and more. Young people are growing up in a world of three-dimensional virtual environments. This course gives people within industries not traditionally related to entertainment the opportunity to develop skills within this area to enhance interactive techniques applicable to their own discipline. It allows members of unrelated industries to take the skills developed over many years in the interactive entertainment industries and apply them within a different context.

Career Progression

This postgraduate course allows a graduate to learn the process of designing games even when their profession is not in the games industry, e.g. education, training and simulation. A career outcome includes a games or simulation designer.

Course completion rules

before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.
• Students seeking a single area of

specialisation must complete the specific unit requirements for a major.

Overview

This course focuses on developing managerial skills required to produce games; that is, the management of a team and the production of an interactive project. You will establish an understanding of the production process and the skills relating to the management of a team of people in a creative environment. You will also have the opportunity to gain hands-on experience in this endeavour through the supervision of undergraduate final-year project teams from project inception to completion.

Why study this Major?

As the video games and related industries develop, so does the need for people within those industries, to enhance their skills beyond the technical to production and management. The Games Production stream has been developed to meet the skill sets required at higher management levels. It allows current industry members to take those skills that they have already acquired and extend them to support career development.

Career Progression

Games production is an exciting multibillion dollar emerging industry. Careers include game/simulation developer or game/simulation producer. If you already work in the games or related industries, you could progress your career to management or executive-level positions.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.
• Students seeking a single area of specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.

Overview

The Information Management major provides you with the skill and knowledge to find employment in the information and knowledge management industry. You will gain awareness of the activities in which information management professionals are engaged, in various organisational contexts. You will have the opportunity through electives to tailor your learning to specific contexts such as health services, educational settings, creative industries and information technology.

You will develop skill and knowledge in information management including the alignment of enterprise information and business planning, enterprise information policy, evaluation of information resources and systems, and the design, delivery and evaluation of information services to meet client or organisational needs.

Why study this Major?

Information is now viewed as one of the most significant assets in an organisation. The ability to obtain and manage information on an ongoing basis is an important component of competitive success. Internal and external information resources are used constantly in any organisation. Information managers help organisations to more effectively interact with and utilise information for business development and success. Information managers require the knowledge and expertise to design, plan, develop, manage and evaluate information services to meet the information needs of their organisation.

Career Progression

Careers include information broker, information manager, knowledge manager, database manager, webmaster, information architect, information coordinator, policy officer, research analyst, information services manager, document manager, metadata analyst, community information officer or learning resources officer.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.

• Students seeking a single area of specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.
• Students must complete 48 credit points of project or advanced research units.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points, or with a Masters (IT43) after successful completion of an approved 144 credit points.

Domestic Entry requirements

Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• the Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)
OR
• evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

International Entry requirements

Entry requirements

To be eligible for this Masters Coursework program, students must meet one of the following criteria:

• the Australian equivalent of a bachelor's degree in any discipline with a grade point average of at least 4.5 (on a 7-point scale)
OR
• evidence of recognised prior higher learning in the field of Information and Information Technology (e.g. at least five years of relevant full-time work experience). Industry certification alone is not sufficient evidence.

International students must complete the above requirements and also achieve an IELTS overall band score of 6.5 or more with no sub-band below 6.0.

International students with an IELTS overall band score between 6.0 and 6.5 with no sub-band below 5.0 are permitted to complete communication units offered by QUT International College as elective units within their Masters degree. These units must be successfully completed in the first semester of the Masters program.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0

Overview

The Library and Information Studies major provides graduates with the skills to find employment in the library and information industry. You will acquire the knowledge and expertise required to design, plan, develop, manage and evaluate library and information services to meet the information needs of clients.

This major is offered in a flexible delivery mode, allowing students to complete their studies either face-to-face or online.

Why study this Major?

Libraries play a vital role in our information society. They help to connect people with the ever changing world of information. Librarians help individuals to more effectively interact with, and use, information in all aspects of their lives. Librarians require the knowledge and expertise to design, plan, develop, manage and evaluate library and information services to meet the information needs of their clients and assist them to become information literate. This course provides the core skills and knowledge required by the successful librarian in today's information-rich and technology-driven age.

Professional Recognition

Graduates from the specialisation will be eligible for associate membership of the Australian Library and Information Association (ALIA).

Career Progression

Careers include librarian, information broker, information manager, knowledge manager, database manager, webmaster, information architect, information coordinator, policy officer, research analyst, corporate librarian, information services manager, document manager, web librarian, metadata analyst, specialist liaison librarian, community information officer, cataloguer, digital library coordinator, systems librarian, law librarian, learning resources officer or library media specialist.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the

specified core unit.
• Students seeking a single area of specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.
• Students must complete 48 credit points of project or advanced research units.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points, or with a Masters (IT43) after successful completion of an approved 144 credit points.

Further Information

For further information about this course, please contact:

Overview

The Network Management major provides the practical skills and the theory to make you a more effective network manager. It offers in-depth study of emerging network management issues such as security, network monitoring and high availability design.

You will gain up-to-date technical skills for the administration and management of computer networks using an environment that is currently used in industry as well as the theory and practical aspects of network administration and management. Network Management graduates are required to plan either new networks or the upgrading of existing networks. You will be exposed to methodologies and procedures that are useful in addressing the issues involved in network planning and management. Ensuring that the network is secure is a theme that is maintained throughout the course.

Why study this Major?

Computer networks are essential for the running of today's organisations. Employees spend an ever increasing amount of time remote from their individual workspace. This has led to organisations seeking to deploy appropriate networks that allow real-time access to the corporate network anywhere around the world. The scope of the field of data communications and networks is constantly changing. Voice and data networking technologies are converging to provide more advanced systems with additional functionality and efficiencies. To ensure the effective and efficient operation of computer networks, they need to be designed, deployed and administered by competent technical people, which is why the Faculty has a dedicated major in this field.

Career Progression

Careers include business analyst, systems analyst, systems manager, data communications specialist, network administrator, network manager or Internet professional.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.

• Students are required to complete the specified core unit.

Overview

This course offers advanced studies in information security, both in the business and technical sense. You are introduced to a range of information security issues and its broad context; the people, processes and technologies involved with interacting in this new online era. You will explore these topics through participation in the form of projects (research related and industry related) and practice in the community (small groups focusing on particular advanced topics). You will be exposed to the research and industry best-practice environment within QUT's Information Security Institute (ISI) through collaboration with its staff and students. Students will graduate with an understanding and appreciation of what it means to be a security professional in contemporary global environments.

Why study this Major?

IT systems are increasingly used to store, process and exchange information ranging from e-commerce applications to critical infrastructure such as utilities, financial institutions, transport and telecommunications networks. Security breaches are routinely reported in the mainstream media, making security assurance no longer a choice but a requirement. Associated with this increased awareness and organisational compliance requirement is a growth in demand for IT personnel with management expertise and technical skills in information security.

Career Progression

Careers include information security specialist, information consultant, information assurance professional, information manager and progression to research career in information security.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.
• Students seeking a single area of specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.

• Students must complete 48 credit points of project or advanced research units.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Overview

This major will enhance your capabilities as a software developer. It will provide you with an understanding of the issues, structure and technologies used for developing software architectures. The course will provide you with the theoretical and practical skills needed to develop enterprise critical applications using state-of-the-art technologies. A comparative technology approach is taken, including an analysis of how software development technologies have evolved to date, in order to identify common themes and to better enable you to comprehend and critically evaluate future software technology offerings.

Why study this Major?

A software architect is responsible for the high-level design and structure of an IT system. The systems developed by a software architect form a key part of the critical infrastructure of an organisation and the architect must balance a wide range of issues such as response time, portability, scalability and availability when designing solutions for a client. Consequently the software architect needs a thorough understanding of advanced software development techniques and technologies and how to take advantage of modern development environments and languages.

Understanding how and why programming approaches enable greater efficiency and flexibility is essential for graduates working in the IT industry. There are a wide variety of technologies available for developing software applications and they are continuing to evolve at a rapid pace.

Career Progression

Careers include business analyst, electronic commerce developer, internet professional, multimedia designer, senior programmer, software engineer or systems programmer.

Course completion rules

Students should meet the following requirements before they are able to complete the Masters Advanced program:
• Students are required to complete 192 credit points of units.
• Students are required to complete the specified core unit.
• Students seeking a single area of

specialisation must complete the specific unit requirements for a major.
• Students not seeking a single area of specialisation may graduate with no major.
• Students must complete 48 credit points of project or advanced research units.
• Students may be allowed to take up to four units of electives. These units may be selected from postgraduate units outside of the Science and Engineering Faculty.

Early exit options

Students enrolled in this course may be eligible to exit their courses with a Graduate Certificate (IT85), after successful completion of an approved 48 credit points, or with a Graduate Diploma (IT37), after successful completion of an approved 96 credit points, or with a Masters (IT43) after successful completion of an approved 144 credit points.

Course Overview

The Master of Business Process Management will provide graduates with the skills and knowledge to create and align information systems to effectively support business and enable business strategy.

The program examines business-IT alignment issues through appropriate theory and skill development, and provides career enhancement opportunities into senior management and governance roles.

Students may undertake study in the areas of corporate systems and business process management, IT professional services (including project management and IT consulting), enterprise architecture and systems, and information and knowledge management within business processes.

Course Structure

Students may be eligible to receive a Graduate Certificate in Business Process Management after completing 48 credit points (4 units) consisting of the four specified units.

Students may also be eligible to receive a Graduate Certificate in Corporate Systems Management after completing 48 credit points (4 units) consisting of the four specified units.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:
Postgraduate Translation Table
If you have completed the unit(s) listed under the “Translation Unit Codes” column, you are not permitted to enrol in the listed new code.

International Course structure

Course structure

The Master of Research Management and Commercialisation is particularly suited to current or aspiring research management leaders, administrators and active researchers in corporations, universities and the public sector. The Masters builds on the content of the Graduate Certificate and allows you to develop a deeper understanding of the context and strategic issues involved in research management and commercialisation. You can tailor the course to your needs by applying these ideas and concepts to issues of relevance to you and, where possible, undertaking assessment through workplace-based projects.

Students enrolled in the masters-level course can choose to exit with an award of Graduate Diploma in Research and Development Management following the completion of eight approved units.

Sample Structure

Overview

This course enables graduates from any discipline to develop their knowledge and skills in one or more areas of the mathematical sciences. Strands available include mathematical modelling/applied mathematics, computational mathematics, statistics/statistical modelling, quantitative analysis/financial mathematics and operations research. This course recognises that students may not have studied mathematics for some time.

Course Design

The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background and area of interest within the mathematical sciences.

For the Masters program, at least 36 credit points must be taken from advanced postgraduate mathematics units. Up to 24 credit points can be taken from units other than mathematics units and there is a limit of 48 credit points from project units.

Further Information

For further information about this course, please contact:

Troy Farrell (Course Coordinator) or
James McGree (Assistant Course Coordinator)
Phone: +61 7 3138 8822
Email: sef.enquiry@qut.edu.au

Master of Cardiac Ultrasound

Handbook

Year	2012
QUT code	PH85
Duration (part-time domestic)	3 years
Domestic fee (indicative)	2012: $7600 per Semester
Total credit points	144
Credit points full-time sem.	48
Credit points part-time sem.	24
Dom. Start Months	February, July February: Early Closing Date - 1 December 2011. Stage 1 of this course commences in February and July (students with advanced standing). Stage 2 commences in February and July 2012.
Course Coordinator	Bonita Anderson
Discipline Coordinator	07 3138 1938 medicalradiations@qut.edu.au

Domestic Entry requirements

To be eligible for admission, an applicant:

· will normally have a diploma level qualification with a minimum of 5 years clinical experience in cardiac ultrasound degree or a bachelor degree in a relevant science or allied health field

· must provide written proof of a minimum of three months full-time equivalent prior supervised, hands-on clinical experience in cardiac ultrasound

· must have access to suitable clinical experience for the duration of the course.

July entry into the Master of Cardiac Ultrasound is available only to students who have completed the Graduate Diploma in Cardiac Ultrasound or students with advanced standing.

Advanced standing is granted to students who hold the Diploma in Medical Ultrasonography (Cardiac) awarded by the Australasian Society for Ultrasound in Medicine. An appropriate program of coursework should be discussed with the course coordinator.

Minimum english requirements

Students must meet the English proficiency requirements.

Sample Structure

Semesters

- STAGE 1: Students must complete the units listed below, totalling 96 credit points:
- Year 1, Semester 1
- Year 1, Semester 2
- Year 2, Semester 1
- Semester 2, Semester 2
- STAGE 2:* Students must complete the units listed below, totalling 48 credit points:
- First Semester ** (Project Over Two Semesters)

Code	Title
STAGE 1: Students must complete the units listed below, totalling 96 credit points:	
Year 1, Semester 1	
PCN155	Cardiac Ultrasound 1
PCN162	Principles of Medical Ultrasound
PCN497-1	Clinical Attachment 4
Year 1, Semester 2	
PCN259	Cardiac Ultrasound 2
PCN497-2	Clinical Attachment 4
Year 2, Semester 1	
PCN218	Research Methodology and Professional Studies
PCN359	Cardiac Ultrasound 3
PCN597-1	Clinical Attachment 5
Semester 2, Semester 2	
PCN459	Advanced Cardiac Ultrasound
PCN597-2	Clinical Attachment 5
The PCN497 and PCN597 clinical attachment units are 2 semester units.	
STAGE 2:* Students must complete the units listed below, totalling 48 credit points:	
First Semester ** (Project Over Two Semesters)	
PCN640-1	Project
PCN640-2	Project
Course Notes	
Notes: A student may request an extension of time in which to submit the project report for assessment. A request for an extension of time up to a maximum of six months should be made in writing through the Head of School to the Dean. Any request for a further extension, or any request for an extension to a date later than six months after the original due date, should be made to the Academic Board. The Academic Board may grant the extension under such conditions as it may consider appropriate, or may award the student a "Fail" result in the project unit.	
A student who has received a 'Fail' result in the project unit may re-enrol in the unit only in exceptional circumstances and with the express permission of the Academic Board.	

* Masters project units are offered in both semesters.
** Second Semester enrolments for PH85 will only be accepted under the following circumstances:
1. Students who have successfully completed PH75 Graduate Diploma in Cardiac Ultrasound may enrol into the Masters project (PCN640-1) in second semester.
2. Students who have completed the Cardiac DMU and who are eligible to apply for advanced standing may enrol into PH85 in second semester.#
Under university rules and regulations, these students are required to undertake 50% of the coursework for PH85. Therefore, in addition to the Masters project, students will be required to complete two other units (PCN218 Research Methodology and Professional Studies and PCN459 Advanced Cardiac Ultrasound).
Students in the Master of Cardiac Ultrasound (PH85) wishing to exit with the Graduate Diploma in Cardiac Ultrasound (PH75) are required to submit an Application to Graduate Early with an Approved Exit Course (SRX) Form in their final semester of study.

Discipline Coordinator	Science and Engineering Faculty 3138 8822 sef.enquiry@qut.edu.au

Domestic Entry requirements

A four-year full-time bachelor degree in a relevant urban development discipline area and a grade point average of 5.0 or more (on a 7-point scale) in that study, or an equivalent qualification determined by the Faculty. English language requirements for the course are an English Language Proficiency level in accordance with QUT requirements (IELTS score of 6.0 with no sub-band below 6.0) if English is not your first language. Applicants from a non-relevant background may gain entry through successful completion of BN85, the Graduate Certificate in Built Environment and Engineering.

If requested, supply documentation of professional work experience as detailed in Completing the PG Form.

International Entry requirements

A four-year full-time bachelor degree in a relevant urban development discipline area and a grade point average of 5.0 or more (on a 7-point scale) in that study, or an equivalent qualification determined by the Faculty. English language requirements for the course are an English Language Proficiency level in accordance with QUT requirements (IELTS score of 6.0 with no sub-band below 6.0) if English is not your first language. Applicants from a non-relevant background may gain entry through successful completion of BN85, the Graduate Certificate in Built Environment and Engineering.

If requested, supply documentation of professional work experience as detailed in Completing the PG Form.

Minimum english requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.0

Professional Recognition

Students completing the Graduate Certificate in Built Environment and Engineering, with appropriate unit selection, and the Master of Urban Development (Urban and Regional Planning), will be eligible for graduate membership of the Planning Institute of Australia.

International Student Entry

International students must maintain an enrolment program that will allow them to complete their course within the specified timeframe of their eCoE (electronic Confirmation of Enrolment).

Advanced Standing

Students completing two Masters courses in the following Master Courses - BN87, BN88, BN89, EN50(Systems), UD50 - will be eligible to apply for a maximum of 24 credit points advanced standing in the second course on the basis of common units already completed. Such students will be required to complete a minimum of 72cp to be determined in consultation with the nominated Course Leader, to achieve the second Masters.

Domestic Entry requirements

To be eligible for this course, applicants must have:

· an approved degree in information technology from a recognised tertiary institution or an equivalent qualification, with a grade point average of 5 (on a 7-point scale), or

· an approved degree from a recognised tertiary institution plus evidence of professional experience and skills to satisfy the Academic Board that the applicant possesses the capacity to pursue the course of study. The evidence should include details of any project or research activities undertaken.

In addition to assessing qualifications, the Faculty must also be satisfied that adequate supervision and resources are available to support the applicant's proposed research.

Research Areas

Areas of research interest and contact details can be obtained from the Faculty website

Course Structure

Students entering the degree with second-class honours division A (or better) in an IT-related course will often complete the degree in one year full-time. The length of the program is generally expected to be 18 months full-time (including six months of provisional registration) or three years part-time (including one year of provisional registration).

Assessment for this research masters is based on a program of supervised research and investigation, culminating in a thesis.

Programs may include some coursework in support of the conduct of research and preparation of a thesis. Candidates are required to have regular, face-to-face interaction with supervisors and to participate in University scholarly activities such as research seminars, teaching and publication.

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

Course Design

This degree consists of coursework that can comprise up to one-third of the course and research, which must be at least two-thirds of the course. The assessed coursework may be in the form of advanced lectures, seminars, reading courses or independent study designed to focus on information retrieval skills. The research component is a program of supervised research and investigation at a level of scientific competence significantly higher than that expected from an undergraduate degree and, typically, a masters thesis does not need to be as substantial as a Doctor of Philosophy thesis.

Students undertake a program of research and investigation on a topic approved by the Academic Board. All projects should be sponsored either by outside agencies such as industry, government authorities, or professional organisations, or by the University itself.

Students entering the course with an honours degree or equivalent substantial relevant work experience normally gain exemptions to a maximum of 96 credit points at the discretion of the Academic Board on the recommendation of the Head of School.

Students entering the course with a graduate diploma may gain exemption to a maximum of 96 credit points at the discretion of the Academic Board on the recommendation of the Head of School.

A full-time candidate who does not hold an honours degree appropriate to the course of study will normally be required to complete both course and research work, including submission of the thesis for examination during a period of registration of 24 months. The corresponding period in the case of a part-time candidate shall be 48 months. In special cases the Academic Board may approve a shorter period.

A holder of an honours degree or its equivalent appropriate to the course of study may submit the thesis for examination after not less than 12 months of registration if a full-time student, or 24 months if a part-time student. In special cases the Academic Board may approve a shorter period.

Overview

The objectives of this course are to:

speaking	6.0
writing	6.0
reading	6.0
listening	6.0
overall	6.5

International Student Entry

Admission to the Doctor of Philosophy depends on an applicant's demonstrated research aptitude and the availability of supervision, infrastructure and resources needed for the proposed research project.

An applicant would normally hold:
. a relevant first or second class division A honours degree or equivalent, or
. an appropriate Masters degree or Professional Doctorate (by research or coursework)

Masters and Professional Doctorates degrees by coursework must contain a significant research component, normally no less than 25%.

Holders of Masters and Professional Doctoral by Coursework must:
• have a grade point average of at least 5.0 on a 7 point scale and
• present evidence of research experience and potential for approval
English language proficiency requires International applicants to meet an IELTS overall bandscore of 6.5 with no sub-score below 6.0.

FINANCIAL GUARANTEE
Acceptable forms of evidence include:
- A letter from an approved employer confirming the continuation of your salary; OR
- A signed Scholarship Agreement between QUT and your sponsoring agency; OR
- An accepted letter of offer from QUT for a postgraduate research scholarship; OR
- An approved external scholarship.

Course Structure

QUT adopts a project management approach. PhD candidates work closely with their supervisory team to meet collegially reviewed milestones leading to timely submission of a thesis for examination. QUT is proud of its record of timely completions and low attrition rates realised by this approach.

During candidature the supervisor and other key stakeholders will provide advice and direction to the candidate to encourage their participation in university scholarly activities such as research seminars, teaching and publication. The length of the thesis varies according to the topic, but should normally be no longer than 100,000 words, excluding bibliography

Course Description

When enrolling in the doctoral program, you can undertake an approved project in any field of interest supported by a Science research area within the Faculty of Science and Technology (outlined in the Faculty Prospectus).

Please note that these areas of research specialisation are given as a guide only. Staff are happy to discuss these and any related topics. Please contact the program leader of the relevant research area for further information.

You can undertake the course either full-time or part-time. If studying full-time with an appropriate honours degree, you can expect to complete your Doctor of Philosophy degree in three-and-a-half-years.

Progression

Conditions of progressing to a guaranteed place in first year of a QUT degree :

i) fulfil the Foundation course requirements,
ii) gain a grade of at least 5 (Credit) in Academic English 2 (QCF212) [Built Environment and Engineering students require a grade of 4 (Pass)]. SC45 Bachelor of Pharmacy and PH38 Bachelor of Applied Science – Medical Radiation Technology (Medical Imaging Technology) students require a grade of 6 (Distinction)AND an IELTS of 7.0 (no subscores less that 6.0), and
iii) achieve the relevant faculty Grade Point Average (GPA) - this is calculated on final semester Level 2 units only.

Students who do not meet requirements for a guaranteed place in either a QUT degree or University Diploma Program, may still be considered for entry by the relevant faculty.

Required Foundation Grade Point Average by Faculty

Built Environment - Required GPA 4.6
Business - Required GPA 4.8
Creative Industries - Required GPA 4.4
Education - Required GPA 4.6
Engineering - Required GPA 4.6
Health - Human Services - Required GPA 4.2
Health (except Nutrition & Dietetics, Optometry, Psychology, Podiatry & Human Services) - Required GPA 4.6
Health - Nutrition & Dietetics - Required GPA 5.8
Health - Optometry - Required GPA 5.8
Health - Podiatry - Required GPA 5.8
Health - Psychology - Required GPA 5.0
Law (except Justice Studies) - Required GPA 4.8
Law - Justice Studies - Required GPA 4.2
Science & Technology (except IT, Pharmacy & Medical Imaging Technology) - Required GPA 4.6
Science & Technology - Information Technology - Required GPA 4.8
Science & Technology - Pharmacy & Medical Imaging Technology - Required GPA 5.8

N.B. Grades in each unit are awarded on a scale from 1 to 7, with 7 being the highest.

Science & Technology (except IT, Pharmacy & Medical Imaging Technology) - Required GPA 4.6
Science & Technology - Information Technology - Required GPA 4.8
Science & Technology - Pharmacy & Medical Imaging Technology - Required GPA 5.8

N.B. Grades in each unit are awarded on a scale from 1 to 7, with 7 being the highest.

Progression

Conditions of progressing to a guaranteed place in first year of a QUT degree :

i) fulfil the Foundation course requirements,
ii) gain a grade of at least 5 (Credit) in Academic English 2 (QCF212) [Built Environment and Engineering students require a grade of 4 (Pass)]. SC45 Bachelor of Pharmacy and PH38 Bachelor of Applied Science – Medical Radiation Technology (Medical Imaging Technology) students require a grade of 6 (Distinction)AND an IELTS of 7.0 (no subscores less that 6.0), and
iii) achieve the relevant faculty Grade Point Average (GPA) - this is calculated on final semester Level 2 units only.

Students who do not meet requirements for a guaranteed place in either a QUT degree or University Diploma Program, may still be considered for entry by the relevant faculty.

Course Description

The QUT Study Abroad Certificate is awarded to students who complete one semester of an approved study program. To be eligible, you must successfully complete credit points with a minimum grade of 4 in each unit. These subjects can be used for 48 academic credit at your home institution (subject to approval by the home institution).

What can I study?

You can select from a comprehensive range of QUT subjects and custom-design your program to suit your interests and meet the requirements of your home university. You can choose from over 2200 units, including well over 300 pre-approved units for Study Abroad and Exchange students, in Built Environment and Engineering, Business, Creative Industries, Education, Health, Law, Justice and Science and Technology.

Entry Requirements

To be eligible for the Study Abroad program you need:

• a minimum one year of full-time study at a recognised university (this criteria applies to a majority of applicants however, high school students from some countries may meet the entry requirements).

• a GPA (Grade Point Average) of 2.5 or better (on a 4-point scale) or equivalent.

• an English Language Proficiency level in accordance with QUT requirements* if English is not your first language (QUT requirements are an IELTS overall score of 6.5 with no less than 6.0 in the sub-bands, or a TOEFL score of 575, or a computerised TOEFL score of 230).

* You may be exempt from taking a formal test if your secondary or post-secondary studies were conducted entirely in English and you have passed an English language subject or one or more Communication subjects.

If students meet academic entry requirements but do not meet English requirements please email studyabroad@qut.edu.au for alternative entry options.

IELTS (International English Language Testing System)	
speaking	5.0
writing	5.5
reading	5.5
listening	5.0
overall	5.5

Entry Requirements - Academic

To be eligible for entry, applicants must either:

1. Have an offer of a place in a QUT degree program and successfully complete the relevant EAP entry test; or

2. Degree Entry (IELTS 6.5) - Produce original documentary evidence of an IELTS score with an overall minimum of 5.5 with reading and writing no less than 5.5 and no other sub-band less than 5 (or approved equivalent); OR

3. Degree Entry (IELTS 6.0) - Produce original documentary evidence of an IELTS score with an overall minimum of 5.5 with no sub-band less than 5 (or approved equivalent).

* You should check the English language requirements for a Student Visa from your country of origin.

Progresssion

Successful completion of an EAP course is a pathway into QUT International College Foundation, Diploma, Certificate or Bridging programs; or QUT undergraduate or postgraduate award programs. The course is recognised by all QUT faculties.

Entry Requirements - Academic

To be eligible for entry, applicants must have:

1. A conditional offer for a QUT degree program. Students without a conditional offer who wish to improve their academic English may also apply if they meet the English language entry requirements.

OR

2. Produce original documentary evidence of an IELTS score of a minimum 5.0 with reading and writing sub-scores of at least 5.0 (or approved equivalent). Students will also sit a placement test at the beginning of their course.

* You should check the English language requirements for a Student Visa from your country of origin.

Description

EAP Plus has been specifically developed for students who wish to commence their entry into an English for Academic Purposes course earlier. Successful applicants can enter the course at pre-intermediate level and immediately begin developing their English language and study skills in an academic context.

EAP Plus enables students to begin developing their English language and study skills in an academic context from a pre-intermediate level. The course aims to prepare students to attain the level of proficiency required for gaining entrance to, and succeeding in QUT undergraduate and postgraduate award programs. EAP Plus courses include:

- Academic reading and note-making
- Academic writing
- Listening and note-taking from lectures
- Speaking in academic settings
- Seminars and presentations
- Academic study skills
- Computing and Internet skills
- Library research

During the first 12 weeks of the EAP Plus course, students will develop their paragraph writing, reading, listening and note-taking skills through theme-based topics at an introductory academic level, along with speaking and oral presentation skills in a highly-supported environment. Weekly grammar, paraphrasing and vocabulary development supports the reading, writing and note-taking components. Reading skills are also enhanced via extended reading practice and specific reading skills lessons.

The second half of the course will further develop independent study skills enabling students to operate effectively in an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.

EAP Plus has its own internal assessment consisting of exams and assignments, and successful students will meet QUT's English language requirements.

Course Completion

To be eligible to receive EAP Plus Certificate at the end of the course, studfents must complete all course requirements.

On successful completion of the course, students will receive a Completion & Attendance Certificate and a Statement of Results.

Progression

Successful completion of the EAP Plus course provides a pathway into QUT undergraduate and postgraduate award programs for students who meet the academic requirements for these programs.

Course Enquiries

research.enrolment@qut.edu.au
This course is offered jointly by the 5 ATN universities - Curtin University of Technology ; Queensland University of Technology; RMIT University; University of South Australia ; University of Technology Sydney

Part-time students

Part- time students can enrol in one or two units per semester for up to six semesters maximum.

Early Exit Options

Graduate Certificate and Diploma exit points are available following completion of four and eight units.

Advanced Standing

Students with appropriate prior qualifications and/or professional experience may apply for advanced standing of up to 48CP towards the Master of R&D Management.
Recognition for concurrent Professional Development activities may be possible.
Registered members of professional societies may be eligible to receive advanced standing for approved professional development activities completed during enrolment in the award.

Concurrent Enrolment

Research students are allowed to enrol concurrently in the Graduate Certificate and in their research course subject to the approval of the Research Degrees Committee.
Research students may apply for leave of absence from their research course for the period of full time enrolment in the Graduate Certificate.
For further information relating to enrolment into a Research and Development Course, including pathways, please refer to Research and Development Courses - Enrolment website

Domestic Course structure

Course structure

The Master of Research Management and Commercialisation is particularly suited to current or aspiring research management leaders, administrators and active researchers in corporations, universities and the public sector. The Masters builds on the content of the Graduate Certificate and allows you to develop a deeper understanding of the context and strategic issues involved in research management and commercialisation. You can tailor the course to your needs by applying these ideas and concepts to issues of relevance to you and, where possible, undertaking assessment through workplace-based projects.

Students enrolled in the masters-level course can choose to exit with an award of Graduate Diploma in Research and Development Management following the completion of eight approved units.

Units

Unit Synopses

ADN796 Practice Experience B

Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT)

This practice experience partnership with the architectural profession will enable the students to increase their skills in the practical application of theory in 'real life' architectural projects.

AMB030 Mandarin for Chinese

Anti-requisites	HHB050 and HUB450
Equivalents	HHB030
Credit Points	12
Campus	Gardens Point

In this unit students will receive instructions in listening and speaking Putonghua, reading and writing Pinyin Romanisation and reading and writing simplified characters. They learn differences in structure and nuance between their native dialect and Putonghua.

AMB031 Mandarin 1

Anti-requisites	HHB051 and HUB453
Equivalents	AMX031, HHB031
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students who have little or no prior knowledge of Chinese Mandarin to the four macro skills of listening, speaking, reading and writing through an integrated communicative approach to teaching. Content will include: the Mandarin sound and tonal systems; the Pinyin Romanisation system; introduction to Chinese character writing, greetings and introductions; family, identification of nationalities, places and objects, locations and directions.

AMB032 Mandarin 2

Pre-requisites	AMB031 or HHB031 or HUB453 or HHB051
Anti-requisites	HHB052, HUB454
Equivalents	AMX032, HHB032
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This subject continues to develop the four macro skills of listening, speaking, reading and writing through an integrated communicative approach. While there is further consolidation of the knowledge of the Pinyin Romanisation system, greater attention is devoted to the reading and writing of characters. With acquisition of language, students receive further exposure to aspects and characteristics of Chinese culture.

AMB033 Mandarin 3

Pre-requisites	AMB032 or HHB032
Equivalents	AMX033, HHB033
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit is designed to meet student needs to further develop their basic knowledge and skills for understanding, speaking, reading and writing Mandarin Chinese in a wide range of everyday situations. Eligible students are those who have: successfully completed introductory Mandarin units HHB031/AMB031 and HHB032/AMB032 at QUT; or successfully completed equivalent Mandarin study elsewhere. Graduates from high schools who have completed Year 12 Mandarin should also enrol in this unit. (Students who have undergone primary and secondary education in China and Taiwan are not eligible for this unit. Students who cannot speak Mandarin Chinese but can read and write Chinese script are not eligible either. They should enrol in AMB030 Mandarin for Chinese.)

AMB034 Mandarin 4

Pre-requisites	AMB033 or HHB033
Equivalents	AMX034, HHB034
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit follows on from AMB033. Students further develop their knowledge and skills needed to understand, speak, read and write Mandarin Chinese in a wide range of everyday situations and to give presentations on given topics. Resources include textbook, workbook, CDs, DVDs and online multimedia materials. Students learn about 400 Chinese characters and have further exposure to various aspects of Chinese society and culture.

AMB035 Mandarin 5

Pre-requisites	AMB034 or HHB034
Equivalents	AMX035
Credit Points	12
Campus	Gardens Point

This unit develops students' communication skills in using Mandarin Chinese at the intermediate level. It provides students with opportunities to further practise and consolidate what they have learned in the previous units, and at the same time it expands students' knowledge and skills by engaging them in learning new contents and in participating in various types of communicative tasks. Students are exposed to a wide range of topics of interest to them about Chinese society and culture. Resources include textbook, workbook, CDs, DVDs and online multimedia programs.

AMB037 Mandarin 7

Pre-requisites	AMB036
Equivalents	AMX037
Credit Points	12
Campus	

This unit primarily builds on the language skills students have acquired at the intermediate level. It provides further language instruction and interaction for those students who want to develop their communication skills even further in Mandarin Chinese to an advanced level. Apart from set materials, students are also encouraged to make full use of online recourses and current computer technology to research on topics of their interest about Chinese language, society and culture. In accordance with student makeup, business Chinese may be included.

AMB041 International Intensive Program

Equivalents	HHB056
Credit Points	12
Campus	Gardens Point

AMB042 International Summer School or Equivalent

Equivalents	HHB057
Credit Points	12
Campus	Gardens Point

Units

AMB043 In-Country Study - A

Equivalents	HHB058
Other requisites	Subject to Unit Coordinator approval. Students are required to have completed (AMB031 or HHB031) and (AMB032 or HHB031), GPA of 4.5 or above and completion of 96 credit points of approved study.
Credit Points	48
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit involves an approved course of study at a designated foreign institution for one semester.

AMB044 In-Country Study - B

Pre-requisites	AMB043
Equivalents	HHB059
Credit Points	48
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit involves an approved course of study at a designated foreign institution for one semester.

AMB120 Bridging Cultures

Pre-requisites	Completion of 96 credit points or more of study
Equivalents	HHB001
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 6TP4 (INT); 2012 SEM-2 (INT)

This unit develops students' awareness, understanding, sensitivity and ability to deal with individuals and organisations from different cultural backgrounds. It takes a practical approach to the issues involved by providing not just a theoretical framework for interpreting differences in cultural behaviour, but also skills and strategies which can help in appropriately responding to culturally different situations. This unit will be of particular value to students about to embark on in-country study or exchanges, to incoming international students, or to anyone with a general interest in intercultural communication. It will be a useful complement to the study of a second language, but does not require or assume prior language study.

AMB200 Consumer Behaviour

Pre-requisites	BSB126 or CTB126 or BSB116 or BSB117
Anti-requisites	MIB204
Equivalents	AMX200, CTB200
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides students with the fundamental theories and models to develop a sound understanding of consumers, their needs, and behaviours. It provides a detailed examination of the consumer decision process and the internal and external influences on this core decision process. The unit also assists students in applying this knowledge to the development, implementation and evaluation of marketing activities within an organisation.

AMB201 Marketing and Audience Research

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Anti-requisites	MIB305, MGB220, COB334
Equivalents	AMX201, CTB201
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit provides an introduction to the conduct and evaluation of marketing and audience research across the disciplines of advertising, marketing and public relations. Class members explore how field studies, survey and experimental research are employed to support advertising, marketing and public relations information needs. The unit provides an overview of research process, research design, methods of data collection and analysis, and the development of research proposals to support decision-making. Class members also explore issues related to research on media audiences, research ethics, and the management of client briefings.

AMB202 Integrated Marketing Communication

Pre-requisites	BSB126 or CTB126 or BSB116 or BSB117
Anti-requisites	COB207, MIB309
Equivalents	AMX202
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

In past decades many organisations separated the different forms of marketing communication that convey their corporate and marketing messages. They developed separate plans for their advertising, public relations, direct marketing, personal selling and sales promotion with separate goals, objectives, strategies and budgets. Today many companies recognise the concept of integrated marketing communication which integrates these different functions along with other aspects of the marketing mix that communicate with stakeholders and customers. Integrated marketing communication requires a 'total' approach to planning marketing communication programs and coordinating communication strategies in support of overall brand and product/service marketing objectives.

AMB203 Independent Study

Anti-requisites	COB206
Other requisites	Subject to Unit Coordinator Approval
Credit Points	12
Campus	Gardens Point

An opportunity for advanced level undergraduate students to undertake individual research in an area which is complementary to their course work.

AMB204 Purchasing and Procurement

Pre-requisites	BSB119 or CTB119
Anti-requisites	IBB312
Equivalents	AMX204
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit examines the nature and importance of Procurement in the role of business today. Procurement has become increasingly important and valued by organisations that are part of global supply chains. The management and strategic control of procurement functions in modern businesses adds profit through cost control in businesses and that has gained significance in the drive to maintain profit in internationally competitive markets. Modern procurement professionals require the use of many skills to achieve these outcomes and this unit introduces students to the functions of purchasing and procurement in an organisation.

AMB206 Social Marketing

Pre-requisites	BSB126, CTB126, PUB104, BSB116, XNB151 or BSB117

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Social marketing is the application of commercial marketing principles to solve social problems. It is increasingly being adopted by governments around the world as they seek effective solutions relating to public health and climate change, environmental issues. This unit introduces students to the theory and application of social marketing, explaining how techniques such as branding, segmentation and the marketing mix can be used to respond to social and health issues. Students will learn to analyse real world problems and develop innovative and creative solutions using social marketing frameworks. This is an elective unit for business and public health students

AMB207 Entertainment Marketing

Pre-requisites	BSB126 or CTB126
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The entertainment industry is the second largest in the world, worth nearly US$2 Trillion and offers great opportunities. However the marketing of entertainment provides some unique challenges to the application of marketing tools. Students will complete a marketing case study that will clearly demonstrate to potential employers that students have the necessary skills and abilities to work in an entry-level position/analytical role within a marketing department in the entertainment or arts field.

AMB208 Events Marketing

Pre-requisites	BSB126 or CTB126
Anti-requisites	MIB319
Equivalents	AMB354
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Events have become significant strategic marketing tools for positioning products/services, industries, destinations and community interests at the local, national and global levels. The unit initially explores various types, roles and objectives of events and the profile and motives of event markets and stakeholders. Key topics include: processes of attracting or developing the event experience including bidding processes; partnership creation with sponsors, media and community; venue selection and design relative to market/stakeholder needs; ticketing/pricing or access management and imaging the event from an integrated marketing communication perspective. Local and international cases are used.

AMB209 Tourism Marketing

Pre-requisites	BSB126 or CTB126
Equivalents	AMB351
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit examines the tourism system and the unique characteristics of tourists, segmentation bases for tourist markets, the nature of the tourist destination mix and how marketing is applied within elements of that mix. Services marketing concepts and theories of tourist behaviour are utilised in the analysis of the tourism experience; processes of destination and product development to meet market needs; and, strategy development to accommodate domestic and international tourism marketing environments. Macro-environmental issues impacting on tourism, such as sustainability of the industry and environment, the sociopolitical context in which marketing occurs and global trends in travel are also explored for their marketing implications.

AMB210 Importing and Exporting

Pre-requisites	BSB119 or CTB119
Equivalents	AMX210, IBB210
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Trade has become fundamental to the survival and growth of many businesses in Australia as well as other economies. International business students need an understanding of the many challenges entailed in the management of trade. Import and export practice is an applied, technical and evolving area of international business operations that reflects the dynamic nature of trans-national trade in the global economy. This unit examines the importance of importing and exporting for Australia's economic development. provides key information related to importing and exporting, uses industry perspectives on issues of current importance in international trade and provides a structured tutorial programme to achieve this.

AMB220 Advertising Theory and Practice

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Anti-requisites	COB308
Equivalents	AMX220
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit serves as an introduction to later units in the advertising major and gives learners an overview of the advertising industry and the management of the advertising function. The unit traverses the interrelationship of the institutions of advertising, the advertisers, the advertising agencies and the media. It introduces research and details methods of determining advertising objectives, budgets, establishing target audiences, interpreting audience ratings and circulation figures, and enables learners to gain a preliminary understanding of the creative functions of the advertising industry. It also shows the ethical and legal side of advertising and its important role in society and the economy.

AMB230 Digital Promotions

Pre-requisites	BSB126, CTB126, or BSB112
Anti-requisites	COB218
Equivalents	AMX230
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This subject addresses an important area of business activity and explores the way in which the Internet is changing marketing practice. The foundations of promotion are examined and applied online. The nature, history, and social implications of the Internet are explored. The promotional mix is analysed with a strong focus on developing successfully integrated web sites for organisations. Learners will develop skills in strategic planning, creative strategy, design, web development as it relates to advertising and promotion, research, and campaign evaluation. Learners will gain important skills in the planning, developing and marketing of websites.

AMB231 Marketing Communications Regulations and Ethics

Pre-requisites	BSB126
Anti-requisites	COB307
Credit Points	12
Campus	Gardens Point

This unit uses a case study approach and starts from the fundamentals of legal compliance through trade practices and fair trading legislation, then moves to the adoption and adherence of the variety of industry based and professional codes. It examines regulatory models in sunrise industries such as broadcasting and telecommunications as well as the problems of cross-jurisdictional regulation posed by Internet based commerce. It offers students the opportunity to develop generic attributes in critical thinking, problem solving, and ethical sensitivity.

AMB240 Marketing Planning and Management

Pre-requisites	BSB126 or CTB126
Equivalents	AMX240, CTB240
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit extends the student's knowledge of the fundamental marketing concepts and theories introduced in the Faculty Core unit in Marketing, by adding further breadth and depth of knowledge of marketing and developing skills in the application of this knowledge to marketing planning and management within the business environment. Emphasis is on the role of the marketing manager at the product management level in undertaking analysis, planning, implementation and control of marketing activities.

AMB249 Professional Selling

Pre-requisites	BSB126, CTB126, or BSB116
Anti-requisites	MIB230
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

Many students land their first job in a graduate sales position. Professional selling equips students with a contemporary understanding and knowledge of customer relationship management, the sales force environment, personal selling techniques and communications skills. Further, students will be exposed to international benchmarks from a selling processes perspective such as identifying prospects, planning sales calls, demonstrations, negotiations, and closing the sale. There are many exciting and challenging roles in sales, some of which are: sales representative, sales team leader, client account manager, and eventually: regional, state, national and international sales management positions.

AMB251 Innovation and Brand Management

Pre-requisites	BSB126, BSB116, or CTB126
Anti-requisites	MIB227
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit covers the dynamics of product and service innovation within the marketing function of an organisation. Products are defined in the broadest sense as both tangible and intangible and include the various categories of consumer and industrial products and services. The course covers product market analysis, the product/service development process, design, innovation, research and testing, new product financial analysis, branding and packaging, and new product commercialisation.

AMB252 Business Decision Making

Pre-requisites	BSB126 or CTB126
Equivalents	AMB352
Credit Points	12
Campus	Gardens Point

The nature of decisions and decision models in specific strategic and tactical areas of marketing management are examined in this unit. Decisions related to sales forecasting, market analysis, product planning, pricing, promotion and distribution are viewed from quantitative and qualitative perspectives. Students are exposed to computer software and analysis skills that aid the marketing decision process and build their analytical skills of direct relevance in marketing practice. The unit also embraces the analysis and application of marketing information systems including database marketing and the Internet as a marketing information resource.

AMB263 Introduction To Public Relations

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Equivalents	AMB260, AMX263
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the theory and practice of public relations, the discipline that deals with the creation, maintenance, and enhancement of relationships between organisations and their publics. Topics covered include publicity, events, and public opinion. This unit may be taken concurrently with AMB264 Public Relations Techniques especially by students undertaking a public relations major. However, it may also be taken by those students doing a public relations minor, or as a stand alone unit by those students in a wide variety of study disciplines who wish to understand more about this important area of business.

AMB264 Public Relations Techniques

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Anti-requisites	AMB261, AMB262
Equivalents	AMX264
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit offers an introduction to the main tactics and techniques used in public relations. Topics covered include the development of message strategies as well as a specialised focus on the production of examples of a variety of written public relations genres such as brochures, speeches, and media releases. This unit may be taken concurrently with AMB263 Introduction to Public Relations especially by students undertaking a public relations major. However, it may also be taken by those students doing a public relations minor, or as a stand alone unit by those students in a wide variety of study disciplines who wish to improve and enhance their communication skills.

AMB300 Independent Project 1

Other requisites	Subject to Unit Coordinator Approval

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SUM (INT)

AMB301 Independent Project 2

Other requisites	Subject to Unit Coordinator Approval
Credit Points	12
Campus	Gardens Point

AMB302 Project

Other requisites	Subject to Unit Coordinator Approval
Credit Points	24
Campus	Gardens Point

AMB303 International Logistics

Pre-requisites	AMB210, IBB210, AMB240, or CTB240
Equivalents	AMX303, IBB303
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit examines international logistics through the concepts of international distribution channels and international supply chain management. Strategy in managing international logistical constraints is emphasised with practical studies of contemporary international supply chain management in international industries. Traditional costs and financial aspects of supply chain management are considered. Contemporary issues are incorporated including: the impact of e-business on international logistics; the evolution of new technologies for 'smart' packaging, warehousing and international stock control; the combination of international services with goods products; recent technological developments in international transportation and product quality control.

AMB304 Logistics Operations

Pre-requisites	AMB210
Equivalents	AMX304
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to provide strategic and practical knowledge of the role of logistics operations within the context of contemporary business. This unit extends the study of logistics and completes the logistics major offering.

AMB310 Internship

Other requisites	Completed 192 credit points or more; major in advertising, international business or logistics, marketing or public relations; and GPA of 4.0 or higher. Placements must be approved by Unit Coordinator. Placements are minimum of 120 hours
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Provides the student with experience of professional practice in a suitable company where they actively work on a part-time basis. Students undertake a preferred study program within the Advertising, Marketing or Public Relations framework. Students are required to submit a number of reports reflecting the theoretical concepts acquired during the degree program, and how they might be applied in practice. Students must obtain the approval of the Major Coordinator prior to enrolling in this unit.

AMB318 Advertising Copywriting

Pre-requisites	AMB220 or COB308
Equivalents	AMB221, AMX318
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

There are two parts to any copywriting process the thinking and the writing. In the first part, students learn to solve advertising problems through an understanding of the prospect and the product and the formulation of incisive creative strategy. In the second part, creative thinking techniques are applied and advertising concepts emerge from the creative strategy. Students' thinking and writing skills are refined in weekly workshops and culminate in a group project.

AMB319 Media Planning

Pre-requisites	AMB220
Equivalents	AMB222, AMX319
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces the qualitative and quantitative factors affecting media selection and use by advertisers. It covers the costing and scheduling of media, market targeting, measuring media exposure, media comparisons and trends. In-depth analysis of advertising media will allow learners to develop an understanding of the characteristics of each. The application of the concepts of media decision making, media strategy and research to the development of a media plan are emphasised.

AMB320 Advertising Management

Pre-requisites	(AMB318 or AMB221) and (AMB319 or AMB222)
Equivalents	AMX320
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Advertising Management is designed to shift student thinking from a tactical to a strategic level. Instead of taking the approach of, "This is what happens in advertising", it challenges students by raising important contemporary issues in advertising management practice and asking, "What should be done?". Advertising Management is an issues-based unit, which uses case analysis to foster critical thinking and problem solving. It encourages students to understand and take ownership of the advertising management process and, in doing so, build a better advertising industry.

AMB330 Advertising Planning Portfolio

Pre-requisites	AMB318 or AMB221, and AMB319 or AMB222
Equivalents	AMX330
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This advanced unit builds on the theoretical perspectives and applied skills introduced to students in copywriting, media and advertising management. It explores important issues such as the contribution of research to the creation of advertising; the hierarchical development of strategy from marketing and IMC strategy through to advertising, media and creative strategy; the role of the strategic planner in advertising; the use of planning to deliver more effective advertising solutions. Using problem-based learning, students establish benchmarks to evaluate advertising, develop advertising briefs and devise strategies for on-time and on-budget process management.

Units

AMB331 Direct Marketing

Pre-requisites	AMB202, AMB220, AMB240, CTB240, or AMB249
Anti-requisites	COB315
Equivalents	AMX331
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

The discipline of Direct Marketing has grown in importance because of its precise targeting, easy accountability, its foundations role in Integrated Marketing Communication (IMC), and its increasing share of the marketing communication budget. This unit focuses on the principles of direct marketing and the role of the database in locating prospects, tracking customers, and building relationships. It examines the components of direct marketing telemarketing, personal selling, and direct response advertising. As the main communication discipline of direct marketing, the emphasis is on direct response advertising. Students analyse the offer planning, strategy, creative, media, testing, and evaluation of direct marketing campaigns.

AMB335 E-marketing Strategies

Pre-requisites	AMB240 or CTB240, and AMB201 or CTB201
Equivalents	AMB241, AMX335
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

E-Business and mobile commerce technologies have emerged as defining technologies for companies in the 21st century. This unit focuses on e-marketing applications and strategies and the marketer's role in developing solutions that integrate new and old economies. Drawing on their knowledge of marketing principles, students will examine the diverse applications of technology in product and service design; product distribution/service delivery and logistics; promotional strategies and other marketing components. The unit also explores the role of emerging electronic models and the use of e-marketing strategies to achieve global competitive advantage.

AMB336 International Marketing

Pre-requisites	AMB240, CTB240, AMB210, or IBB210
Equivalents	AMX336, IBB213
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

The aim of this unit is to provide students with a thorough understanding of the multiplicity of issues that impact on the development of international marketing strategies and plans and their operational implementation. The unit is highly applied and provides students with the following opportunities: to analyse global international firms, their marketing strategies and various international marketing issues in a variety of geographic and industry contexts; to evaluate methodologies and new practices for handling problems and issues typical of global and international markets and competition; to develop an operationally sound international marketing plan.

AMB339 Advertising Campaigns

Pre-requisites	AMB320 and AMB330
Equivalents	AMB321, AMX339
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This capstone advertising unit draws from all the theoretical, analytical, and applied material developed throughout the advertising major, and applies it to a client brief. Learners develop advertising solutions that incorporate all aspects of an advertising campaign, including objectives, budgeting, message development, message delivery, and measurement. The key emphasis is on the use of research to develop sound advertising strategy, which is then executed as creative and media ideas and evaluated through ongoing benchmarks.

AMB340 Services Marketing

Pre-requisites	AMB240 or CTB240, and AMB201 or CTB201
Anti-requisites	MIB311
Equivalents	AMX340, CTB340
Credit Points	12
Campus	Gardens Point and Caboolture
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit explores the special characteristics of services that distinguish the marketing of services from goods. Topics include: the distinctive aspects of consumer decision-making relative to services and the implications for marketing strategy formation; the management of demand and supply; customer services and its influence on service satisfaction; service quality management and measurement; internationalisation of the service sector and distribution modes for services that reflect the significant impacts of new technologies on service delivery.

AMB342 Strategic Procurement

Pre-requisites	AMB204
Equivalents	AMX342
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit is designed to provide knowledge of strategic procurement practices and practical knowledge of the role of procurement within the contemporary logistics industry. This unit extends the study of procurement and its place in a modern firm.

AMB350 Sales and Customer Relationship Management

Pre-requisites	AMB240, CTB240, AMB202, COB207, MIB217, or AMB249
Anti-requisites	MIB230
Equivalents	AMX350
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

Theories related to marketing exchange and the concepts of consumer transactions and relationships and their relative importance in different marketing contexts are examined. The growth of customer relationship management including the transition of consumers along the transaction-relationship continuum and the development of accompanying marketing strategies is highlighted. A discussion of the relative emphasis on transactions and/or relationships in interfacing with the market provides a platform for examining sales management including, personal selling principles and ethics, the setting of sales objectives, selling logistics, account and territory management, sales force planning, recruitment and motivation and evaluation of sales performance.

AMB359 Strategic Marketing

Pre-requisites	AMB340, and AMB335 or AMB241
Equivalents	AMB341, AMX359
Credit Points	12
Campus	Gardens Point and Caboolture

Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Emphasis of the capstone Marketing unit is on the role of marketing manager at the corporate and strategic business unit/division levels. Students are exposed to a variety of strategic marketing techniques and issues, and learn how to apply these in corporate planning and management. Topics include: developing and critiquing strategic marketing planning models; recognising the importance of market focus; determining what marketing strategy can realistically be accomplished for a business; identifying underlying factors that must be considered in developing marketing strategy for a market-oriented organisation; discussing problems in successful implementation of marketing strategy; and organising for successful strategy implementation.

AMB369 International Business Strategy

Pre-requisites	AMB336, AMB303, IBB303, or IBB213
Equivalents	AMX369, IBB300
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

‘This unit focuses on the definition and implementation of corporate strategy for worldwide operations. As the capstone unit in the International Business major, it is designed to build upon the knowledge base of previous units, introducing you to the strategic management of firms, and engage you in the strategic choices which international managers face in the international environment.’

AMB372 Public Relations Planning

Pre-requisites	((AMB263 or AMB260) and AMB264)) or (AMB261 and AMB262)
Equivalents	AMX372
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the public relations planning process. Students build skills in planning by analysing the components, execution and evaluation of contemporary public relations campaigns. The public relations planning process, partnered with theoretical concepts and ethical considerations, is examined across practice contexts and areas.

AMB373 Corporate Communication

Pre-requisites	(AMB263 or AMB260 and AMB264) or (AMB261 and AMB262)
Equivalents	AMB360, AMX373
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Corporate Communication provides students with the opportunity to build on and apply their understanding of public relations to an in-house corporate role. Students gain an overview of an organisation relevant to the practice of public relations at a senior level in organisations by investigating internal communication processes, corporate reputation, corporate social responsibility, organisational culture and change and issues and crisis management.

AMB374 Global Public Relations Cases

Pre-requisites	AMB372, AMB261, or AMB262
Equivalents	AMB370, AMX374
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Global Public Relations Cases will apply the theoretical underpinnings of generic practice to specialist areas. Exposure to real-world global situations and public relations responses will improve students' familiarity with the public relations discipline's practice and strengthen students' decision-making and critical thinking skills.

AMB375 Public Relations Management

Pre-requisites	AMB372 and AMB373, or AMB360
Equivalents	AMX375
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit develops student skills in the analysis of public relations public relations programs in line with corporate strategy, integrating long term planning with issue assessment and response. Students extend analytical, interpretive and management skills in the public relations role.

AMB379 Public Relations Campaigns

Pre-requisites	AMB374 or AMB370, and AMB201 or CTB201
Equivalents	AMB361, AMX379
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

As the capstone unit, Public Relations Campaigns sees the student bring together the design, strategic planning and tactical preparation that underpins an effective public relations campaign. Students research, develop and present their plans for a real world client, enhancing their portfolio prior to graduation.

AMN400 Consumer Behaviour

Anti-requisites	MIN419
Equivalents	AMX400
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit provides an introduction to the area of consumer behaviour and a forum for discussion of theory and research in the field. The current state of consumer behaviour research will be reviewed and some of the emerging trends in the area are explored through several avenues of assessment. The unit provides the environment for students to conduct their own research in areas that are relevant, of interest to them and reflect the interdisciplinary nature of consumer behaviour.

AMN401 Integrated Marketing Communication

Anti-requisites	CON421
Equivalents	AMX401
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

Integrated marketing communication (IMC) is a new discipline that seeks synergistic effect from integrating traditional marketing communication disciplines. This unit explores the development of IMC, looking at reasons for growth, barriers to implementation and organisation issues. Students are introduced to the strategic foundations of IMC, from consumer behaviour, to marketing strategy, to IMC campaign evaluation. The disciplines of advertising,

public relations, direct response and sales promotion are then explored to highlight how each contributes to IMC planning.

AMN403 Marketing and Survey Research

Anti-requisites	MIN413
Equivalents	AMX403
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit provides a detailed overview of marketing research to support decision making in the areas of advertising, integrated marketing communication, marketing and public relations. The unit builds an advanced understanding of the use of survey research to support the descriptive and predictive information needs of management in such areas as consumer opinions and behaviour, and stakeholder analyses. Students will explore issues related to survey research design, questionnaire development and administration, sampling, measurement, data analysis including descriptive and multivariate statistics and presentation of research results.

AMN404 Readings in Integrated Marketing Communication

Pre-requisites	AMN401
Anti-requisites	CON416
Equivalents	AMX404
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT), 2012 SEM-2 (INT, EXT); 2012 SUM (INT)

The unit provides participants with the opportunity to make a detailed exploration of the literature on a particular topic or problem in the area of Integrated Marketing Communication under the direction of a supervisor. The readings integrate and consolidate theory and research related to IMC and from other studies undertaken in the course. Students undertake a formal and systematic review of literature in a particular problem area of IMC related to their interests, project or thesis. Students may also explore work covered in other specialisations.

AMN405 Cases in Integrated Marketing Communication

Pre-requisites	AMN401
Equivalents	AMX405
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit provides students with the opportunity to explore a range of topics related to the integration of the elements of the promotional mix-advertising, personal selling, reseller support, publicity, direct marketing, and sales promotion. Through the use of intensive case study analysis and discussion, students will refine conceptual understanding and analytical skills to explore such IMC topics as brand equity and IMC, IMC approaches to promotions management, organisational issues related to structuring corporate IMC functions, environmental analysis and database marketing to inform IMC planning, and IMC strategies and the development of corporate advantage.

AMN406 Project

Pre-requisites	60 credit points of approved prior studies in Advertising, Marketing and Public Relations units (AMN% units)
Anti-requisites	CON405
Equivalents	AMX406
Credit Points	24
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (EXT, INT); 2012 SUM (EXT, INT)

In this unit, students examine in detail a theoretical or empirical problem in one of the disciplines of advertising, marketing, public relations, or integrated marketing communication. the study is based in the published journal literature of the discipline and can involve primary research and analysis. Students can develop a communication audit of an organisation or a case study related to an organisation product or issue. Project supervision will be arranged by the Unit Coordinator through consultation with the student and available staff members.

AMN411 Independent Study

Other requisites	Subject to Unit Coordinator Approval
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

An opportunity for advanced level postgraduate students to undertake short-term, individual studies focusing on a problem area of advertising, marketing, public relations or integrated marketing communication.

AMN420 Advertising Management

Anti-requisites	CON417
Equivalents	AMX420
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT)

This unit empowers students to make effective management decisions within the advertising process. It examines the setting of advertising objectives, and the need for coordination of these with marketing, communication and organisational objectives. It develops a sound understanding of advertising regulations and ethics, budgeting, research and campaign coordination. It further examines management's participation in the creative, media and production processes, and the contribution of advertising management to the cohesion and creativity of the agency.

AMN421 Contemporary Issues in Advertising

Pre-requisites	AMN420
Anti-requisites	CON412
Equivalents	AMX421
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit surveys the intellectual foundations of a number of contemporary issues emerging within the advertising discipline and provides sophisticated, systematic explanations of their societal implications and consequences. It also explores how these issues are addressed by business, government and organisation.

AMN422 Media Strategy

Anti-requisites	CON418
Equivalents	AMX422
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

One of the ultimate determinants of the

effectiveness of any advertising campaign is the media strategy. This unit examines ways to improve efficiency in media planning, buying, coordination and research. It examines concepts of media decision making, market targeting through the creative use of media, and strategic planning. It explores current media campaigns and encourages the development of a more creative and integrated approach to media.

AMN423 Strategies for Creative Advertising

Anti-requisites	CON419
Equivalents	AMX423
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit explores the substantive body of academic research on creative advertising. It follows the creative process, beginning with the development of creative strategy and concluding with campaign evaluation. Through cases and presentations, student examine how copywriters think, the illumination of the 'big idea' and its execution across the very diverse advertising media.

AMN430 International Logistics Management

Equivalents	AMX430, IBN410
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces international logistics functions and develops a strategic approach to international business transactions and integration focusing on supply chain management. The unit introduces traditional and contemporary logistics concepts and describes international logistics operations including global transport systems, inventory management, materials handling and information management. Global supply chain management cases and strategies are integrated throughout the unit.

AMN431 Marketing Internationally

Anti-requisites	MIN421
Equivalents	AMX431, IBN421
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

In this unit students are exposed to the theoretical and planning aspects of marketing internationally. Through an applied approach, theoretical issues such as segmentation of international markets, life cycle, contingency and network approaches to international market entry choice, and market development and extension are addressed. Planning issues cover the strategic marketing processes involved, including international market research, and their application to regions and countries primarily in the Asia/Pacific region or Europe. Students are trained in the practical application of these theoretical and planning aspects through the development of an extensive international marketing plan.

AMN432 Independent Study - International Business

Equivalents	IBN422
Other requisites	Subject to Approval of Subject Area Coordinator: Students are required to complete 96 credit points of approved studies
Credit Points	12
Campus	Gardens Point

This unit enables students to pursue a specific interest beyond the content offered in existing units. In this unit students undertake a guided course of study in an aspect of international business approved prior to enrolment by the Subject Area Coordinator and developed in consultation with an appointed supervisor. The unit may comprise, as established by a learning contract, guided readings, literature critiques, a research paper on a specific topic or a project requiring application of theory to practice. The agreed format of assessment may include a literature review, a research paper, a plan of action, an oral or written examination or a combination of a selection of these items of assessment.

AMN435 Communication, Negotiation and Leadership

Equivalents	GSN235
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit serves as an introduction to effective leadership, communication, and negotiation processes as fundamental skills in today's organisations. In particular, it focuses on the increasing importance of such skills for Engineering, Built Environment , Project management and other professionals to bridge cultural boundaries and enhance organisational performance in an increasingly globalised world.

AMN442 Marketing Management

Anti-requisites	MIN422
Equivalents	AMX442
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

The study of marketing, marketing systems and marketing management and marketing planning within contemporary structure of social, cultural, political, economic, business and organisational environment. Concepts are applied through the study and construction of a marketing plan, which involves market and sales analysis, target market strategies, tactical decision planning, and implementation and control. Marketing management concepts are applied to virtual and physical markets and attention is given to a range of skills in finance, human resources, information and other skills needed by marketing managers in these markets.

AMN443 Product and Service Innovation

Anti-requisites	MIN423
Equivalents	AMX443
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit examines the dynamics of innovation and development within the mix of core marketing activities of organisations. Once establishing the integral role innovation plays in organisations, the unit also reviews the key stages in the process of creating, developing and implementing new product and service concepts including product, service and market analysis, design, innovation, evaluation and testing of ideas, branding and packaging, market testing and investment analysis.

AMN444 Services Marketing

Pre-requisites	AMN442
Anti-requisites	MIN424
Equivalents	AMX444
Credit Points	12

Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit introduces a framework for studying services and explores both strategic and operational issues including the design and delivery of services; the formulation of communication strategies; definition, measurement and implementation of customer focused marketing programs in service industries; the establishment and maintenance of relationships with customers.

AMN445 Strategic Marketing Management

Pre-requisites	AMN442
Anti-requisites	MIN425
Equivalents	AMX445
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (EXT, INT)

This is a capstone unit which aims to ensure students can manage the complete marketing function at a senior level within a corporation, and includes assessing the marketing function's performance with appropriate tools to diagnose, assess, track and evaluate performance and to modify processes to improve the function. Links between the marketing function and other functions of a business such as accounting, operations and human resources are drawn, so that the student would be in a position to move into top management if the opportunity arose.

AMN447 Contemporary Issues in Marketing

Anti-requisites	MIN407
Equivalents	AMX447
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit offers advanced study of topical issues and emerging trends in marketing practice as a result of new technologies, current events and their impact on local, national and international enterprises. In depth interaction with business and public policy leaders expands students research, reflection and strategic thinking abilities.

AMN460 Corporate and Investor Relations

Anti-requisites	CON409
Equivalents	AMX460
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit reviews all aspects of the public relations function in communicating with corporate audiences. Specific focus is placed on how corporate entities meet both regulatory and promotional requirements in communicating with special interest groups including shareholders and employees. Suitable communication tools are examined for use in ongoing communication programs.

AMN461 Corporate Media Strategy and Tactics

Anti-requisites	CON424
Equivalents	AMX461
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT)

This unit examines theories underpinning mass media and links these with the practice of public relations media tactics. Students analyse techniques and skills used in liaison with electronic media, print media, trade media and news media. Producing and evaluating communication materials such as news releases, features and media kits forms an important part of this unit. Students develop strategic thinking through analysis of contemporary media case studies.

AMN462 Community Consultation and Engagement

Equivalents	AMX462
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (INT, EXT)

This unit introduces students to key engagement strategies of community information, consultation and participation. The unit develops student understanding of the theoretical foundations of engagement strategies and provides the skills and knowledge for students to analyse community engagement needs and establish engagement programs. Ethical practice is a key organising framework for this unit.

AMN465 Public Relations Management

Anti-requisites	CON415
Equivalents	AMX465
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit provides learners with an overview of the theory and research that constitute the foundations of public relation practice. The unit provides a detailed inspection of communication processes necessary for the management of organisational relationships with publics. The unit focuses on such topics as issues management, organisational change, public opinion, and mass media effects in order to explore the foundations of contemporary public relations management.

AMN467 Public Relations Campaigns

Equivalents	AMX467
Credit Points	12
Campus	Gardens Point and External
Teaching Periods	2012 SEM-2 (EXT, INT)

This unit provides a systematic exploration of the planning, management and evaluation of public relations campaigns and programs. The primary goal of the unit is to build a detailed understanding of existing theory and research that informs the development and evaluation of public relations campaigns. The unit focuses on key problem areas of campaign management including strategy, design and evaluation.

AMN468 Issues and Crisis Management

Anti-requisites	CON408
Equivalents	AMX468
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT)

This unit examines the strategic management of crisis communication including for organisations. A strategic planning approach will be covered including organisation analysis, issues identification, audience prioritisation, strategy formulation, tactical planning and implementation and evaluation. Pre-crisis issues in management will be addressed as well as proactive and defensive communication strategies during crisis.

Units

The unit will demonstrate the application of general communication tools to a specialised area.

AYB114 Business Technologies

Anti-requisites	BSB212, CTB212
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit looks at the ways in which organisations adopt and use various electronic business applications in areas of e-commerce, business-to-consumer, business-to-business and intra-business relations. Business models and their impact in various industries are analysed, enabling students to assess the underlying business case, and determine the model's viability in a competitive environment. The issues associated with front-end and back-end e-business applications are considered.

AYB115 Governance Issues and Fraud

Equivalents	BSB213
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to a wide range of information technology governance issues which confront business professionals during the implementation and operation of e-business strategies. It aims to provide e-business and IT professionals with an understanding of current IT governance frameworks and to ensure they are familiar with risk management, fraud detection and prevention, audit and legal issues that are relevant to an organisation's e-business operations.

AYB200 Financial Accounting

Pre-requisites	BSB110 or CTB110
Equivalents	AYB121, AYX200
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

Financial Accounting examines of the accounting concepts and procedures relevant to both partnership and corporate structures within the context of the accounting profession's conceptual framework and the relevant accounting standards and Corporations Law requirements. Topics include: the formation, operation, financial reporting and disclosure for both partnerships and companies; accounting for leases; and the professional role of accountants. The emphasis is on the effect of the different forms of ownership on the financial statements.

AYB205 Law of Business Entities

Pre-requisites	BSB111 or CTB111
Anti-requisites	AYB223
Equivalents	AYB305
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit presents advanced topics in company law including protection of minority interests; prospectuses and fundraising; company charges; insider trading; takeovers and buy-backs; and tax law relating to financially troubled companies.

AYB219 Taxation Law

Pre-requisites	BSB111 or CTB111
Anti-requisites	LWB364
Equivalents	AYB325, AYX219
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levy of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also examined. The unit concludes with a brief overview of the taxation of partnerships, trusts and companies and the goods and services tax. Emphasis is placed on developing students' skills in problem solving through research and analysis of taxation issues.

AYB221 Computerised Accounting Systems

Pre-requisites	BSB110 or CTB110
Anti-requisites	AYN443
Equivalents	AYX221
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit provides an examination of the concepts, processes and issues relevant to computerised accounting systems including: accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Excel, database software such as Access, and interactive multimedia software such as Accounting Information Systems Cycles.

AYB225 Management Accounting

Pre-requisites	BSB110 or CTB110
Equivalents	AYX225
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to accounting systems and techniques that provide management at all levels with information for use in planning, controlling and decision making. This can be contrasted with financial accounting, which provides summary financial information principally for external users (ie shareholders, creditors, banks, etc). Emphasis is placed on developing a range of accounting systems (in particular product costing) which may be used in manufacturing firms, although the principles and concepts used to develop such systems can be adapted to service organisations.

AYB227 International Accounting

Pre-requisites	BSB110 or CTB110, and BSB119 or CTB119
Equivalents	AYX227
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

International Accounting is designed to provide students with an insight into, and an appreciation of, many of the accounting problems and issues faced in an international business environment. Issues examined include: comparative international accounting systems and practices; cultural influences on accounting; international financial reporting issues such as international business combinations, intangibles, foreign currency transactions and translation, comparative international analysis of financial statements; and global accounting issues in the twenty-first century. The unit also examines the impact of international harmonization of accounting standards on multinational corporations and the investment communities worldwide.

AYB230 Corporations Law

Pre-requisites	BSB111 or CTB111
Anti-requisites	LWB334
Equivalents	AYX230
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

The unit is intended to equip students with a basic understanding and knowledge relevant to the environment of legal entities, particularly corporations. It also seeks to provide students with sufficient basic understanding of the legal structure of business associations to enable them to recognise the appropriate structure for particular commercial situations.

AYB232 Financial Services Regulation and Law

Pre-requisites	BSB111 or CTB111
Equivalents	AYB312
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This subject looks at the laws and regulations applicable to corporate securities and financial services in Australia, examines disclosure obligations in prospectus and financial products, ASX listing rules, takeovers, and market misconduct.

AYB240 Superannuation Regulation and Practice

Pre-requisites	BSB110 or CTB110, and BSB111 or CTB111
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT)

This unit introduces students to the Australian superannuation system and the regulatory framework under which it operates. The unit aims to develop students' knowledge and understanding of the superannuation system to equip graduates seeking career opportunities in the superannuation industry, or other areas of business dealing with

superannuation-related matters affecting organisations and/or individuals.

AYB250 Personal Financial Planning

Pre-requisites	(BSB111 or CTB111) and (BSB110 or CTB110) and EFB210. EFB210 can be enrolled in the same teaching period.
Anti-requisites	AYB335, EFB230, EFB339
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit introduces students to the fundamental aspects of the financial planning process, the legal framework governing the financial planning industry and the responsibilities of financial planners. The unit will also expose students to alternative strategies of wealth creation while taking into consideration taxation, superannuation and social security issues.

AYB300 Accountancy Work Integrated Learning

Credit Points	24
Campus	Gardens Point

The unit fosters learning through work related experience. Students will be given an extended opportunity to experience the work that is performed by accountants, which will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities; and to reflect on work experience as a form of learning. Admission to this unit is by application and subsequent approval by the Unit Coordinator.

AYB301 Audit and Assurance

Pre-requisites	(AYB221 or INB120) and (AYB340 or AYB220)
Equivalents	AYX301
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT), 2012 SEM-2 (INT); 2012 SUM (INT)

This unit enables students to comprehend the key concepts of auditing as a discipline, to demonstrate the relationship between auditing and the systems of accountability and to demonstrate the differences between manual and EDP audit processes. The unit builds on the knowledge of accounting and accounting standards acquired in prior units by enabling students to understand in detail the audit process (including professional auditing standards and techniques) which leads to the auditor providing an opinion on the financial reports of various types of entities. Ethics and auditor's liability are also covered.

AYB302 Project

Credit Points	24
Campus	Gardens Point

The project is an analytically based applied or theoretical study of a problem/issue in Accounting. Students will develop and write a research paper on the application of a specific body of disciplinary work and/or develop a specific industry case study. This unit will give students experience in identifying, researching and critically analysing information relevant to a business problem or issue. Students will then synthesise that information in order to evaluate potential solutions, make recommendations or otherwise effectively address the problem or issue. Developing and executing comprehensive and systematic research into an issue relevant to the private and/or public sectors is an essential part of undergraduate education in the discipline of Accounting.

AYB311 Financial Accounting Issues

Pre-requisites	AYB340 or AYB220
Equivalents	AYX311
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit introduces students to the nature of accounting theory and integrates theory with practice to assist in the understanding of major Australian and International accounting issues. The following topics are addressed: positive and normative theories of accounting; the external reporting framework including international harmonisation and the conceptual framework; definition, recognition and measurement of assets, liabilities, equity, revenues and expenses; asset revaluations; intangibles; leases and employee entitlements. Accounting in specific industries such as construction, extractive industries and superannuation funds is also examined. This unit complies with the new international accounting standards. Contracting theory is used

AYB320 Advanced Taxation Law

Pre-requisites	AYB219 or AYB325
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit examines the principles governing the taxation treatment of various business entities including partnerships, trusts, companies and superannuation funds from a domestic and international perspective. The unit provides students with an understanding of other considerations which affect the choice of an appropriate business structure from a taxation perspective, including rollover relief and the CGT small business concessions, the importance of legitimate tax planning and the distinction between tax avoidance and tax evasion and some of the more simple aspects of international taxation between Australia and its major trading partners. The unit also covers an analysis of the GST , a review of types of supplies under the Act and the concept of creditable acquisitions. Specific issues such as the GST implications of real property, the margin scheme,GST planning strategies and the GST avoidance provisions are also covered.

AYB321 Strategic Management Accounting

Pre-requisites	AYB225
Equivalents	AYX321
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Strategic management accounting develops a theory of organisations that provides an understanding of the information requirements of management to facilitate the strategic planning, decision-making and control necessary for the achievement of their objectives. Topics include: developing effective performance-evaluation systems and compensation plans; examining how managers can design organisations to motivate individuals to make choices that increase firm value; strategic planning and budgetary systems; pricing and product mix decisions; managing transfer-pricing disputes among divisions; developing an understanding of new management accounting practices, including activity-based costing (ABC), the balanced scorecard (BSC), and economic value added (EVA); and

appreciating the research on the benefits and problems with ABC, BSC and EVA.

AYB338 Accountancy Work Placement

Other requisites	An application, interview and subsequent approval by the unit coordinator is required to enrol, in addition to the completion of AYB200 & AYB221& AYB219; OR AYB114 & AYB341; OR other units approved by the Subject Area Coordinator.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit fosters learning through work related experience. Students will be given the opportunity to experience the work that is performed by accountants and will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities. For additional **important information about this unit** please refer to the current unit outline.

AYB339 Accountancy Capstone

Pre-requisites	(AYB220 or AYB340 and AYB311), OR (AYB220 or AYB340 and AYB321)
Anti-requisites	AYN520
Equivalents	AYX339
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Accountancy Capstone co-ordinates several parts of the accountancy degree that have already been studied by students. At the same time some new concepts are introduced for each topic. The unit attempts to simulate the real world where the professional advisor/consultant is confronted with unstructured multi-disciplined problems on a day-to-day basis. Based on the Problem-Based Learning (PBL) methodology, students will learn the process of how to deal with the problems typically faced by the professional advisor/consultant. These problems require students to work together in teams, research issues, gather information and form conclusions.

AYB340 Company Accounting

Pre-requisites	AYB200 or AYB121
Equivalents	AYX340
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

This unit includes: the preparation of consolidated financial statements; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure orientated accounting standards; accounting for income tax; accounting for the acquisition of assets (including entities); accounting for investments in associates; accounting for foreign currency transactions arising from international trading and financing; and the translation of the results of foreign operations.

AYB341 Forensic and Business Intelligence

Pre-requisites	AYB114, BSB124, or BSB114
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-2 (INT)

This unit focuses on providing skills in forensic and business intelligence through the use of SAS technologies. The unit assists students to analyse large data sources and report their findings to assist managerial decision making. Forensic and business intelligence issues and corporate decision making processes are emphasised. This unit provides students with an important skill base in supporting corporate decision making and investigation in a business environment.

AYN410 Business Law and Ethics

Anti-requisites	GSN412, GSN422 and GSZ412
Credit Points	12
Campus	Gardens Point

This unit provides an introduction to business law and to morality in the business context. It inlcudes the following: the legal framework for business interpretation of statutes; law of torts; contract law and agency; morality and how it works as an aspect of the business community; the origins of moral belief; and the motives that lead people to abide by what they believe to be morally right and to persuade others to do likewise with special emphasis on business aspects of morality.

AYN411 Audit and Assurance

Pre-requisites	AYN416
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

Topics in this unit include: the audit environment; legal liability of auditors; professional ethics; the study and evaluation of audit planning and programming, evidence, internal control theory and review techniques; audit program applications; audit in CIS environment and evaluation of CIS controls; computer-assisted audit techniques; computer fraud; audit sampling techniques; audit reporting.

AYN412 Company Law

Pre-requisites	AYN410
Credit Points	12
Campus	Gardens Point

The unit introduces the law relating to the establishment, operation and dissolution of business association; the forms of business associations, partnerships, trusts, companies and voluntary associations. It also focuses on companies: incorporation requirements, classification, corporate governance, share capital and management issues.

AYN414 Cost and Management Accounting

Pre-requisites	AYN416 Can be enrolled in the same teaching period.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT, EXT); 2012 SEM-2 (INT, EXT)

This unit introduces students to techniques that provide management at all levels with information for use in inventory valuation, planning, controlling and decision-making. The unit's major focus is on product costing systems for manufacturing firms.

AYN415 External Reporting Issues

Pre-requisites	AYN417 and AYN418
Other requisites	In addition to the prerequisite subjects, subject area coordinator approval is required.
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)

AYN416 Financial Accounting 1

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (EXT, INT); 2012 SEM-2 (INT, EXT)

This unit provides an introduction to financial accounting within the context of the accounting profession's conceptual framework, relevant accounting standards and the requirements of the Corporations Law. Topics include: the accounting cycle for both service and merchandising entities: the preparation of general purpose financial reports: cash management and control; non-current assets; the formation, operation, and financial reporting requirements for companies; and statement of cash flows.

AYN417 Financial Accounting 2

Pre-requisites	AYN416
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit covers the preparation of consolidated financial statements; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure orientated accounting standards; accounting for income tax; accounting for the acquisition of assets (including business entities); accounting for investments in associates; the termination of a company's life and the accounting procedures necessitated by winding up/liquidation.

AYN418 Financial Accounting 3

Pre-requisites	AYN416
Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (EXT, INT)

This unit introduces students to the concepts and theories that underlie financial reporting and disclosure practices. The regulatory environment and factors influencing accounting policy choices provide a framework for examining the financial effects and behavioural implications of applying different accounting methods to specific accounting issues. Particular emphasis is placed on both the application of specific accounting techniques/rules and the conceptual/theoretical issues associated with alternative accounting methods.

AYN424 International Accounting

Credit Points	12
Campus	Gardens Point
Teaching Periods	2012 SEM-1 (INT); 2012 SEM-2 (INT)
