PREFACE

HISTORY
QUT is a leading Australian university with a colourful history dating back to the beginning of technical and teacher education in Queensland when the Brisbane School of Arts was established in 1849.

Vocation-linked education
In 1908 the Central Technical College began offering technical education courses on the site of QUT’s present Gardens Point campus, continuing the Central Technical College’s tradition of vocation-linked education.

In the same decade training colleges in Queensland began providing career-centred education for the teaching profession. The institutions which evolved from the teacher training colleges combined in 1982 with the North Brisbane College of Advanced Education to become the Brisbane College of Advanced Education.

Thus, QUT’s emphasis of combining a scholarly ethos with effective professional training builds on its predecessor institutions’ long record of providing professional education in Queensland.

Top artists, sit-ins and a boxing ring
Some of Queensland and Australia’s most important artists trained at the Central Technical College’s art department, and the history of the 13 predecessor institutions also includes radicalism, sit-ins, a College principal who built a boxing ring at what is now Kelvin Grove campus, and drama productions closed down by community groups.

The eventful history of QUT’s predecessor institutions is examined through lively accounts and photographs in the book A Class of its Own: A History of Queensland University of Technology.

The Central Technical College’s courses became the responsibility of the Queensland Institute of Technology (QIT) in 1965 when it was established to meet the growing needs of industry.

Top teaching with industry links
While still an institute of technology, QIT had a strong research and development profile as well as a record of effective teaching. The Queensland University of Technology (QUT) was created in January 1989 by redesignation of the Queensland Institute of Technology.

In May 1990 QUT amalgamated with the Brisbane College of Advanced Education (BCAE) which specialised in courses in arts, business, education and social sciences. The institution resulting from the amalgamation of BCAE with QUT retained the title ‘Queensland University of Technology’.

Today QUT has an enrolment of around 40 000 students. Its prime concerns are the quality of its teaching, the employability of its graduates and the application of its research for the benefit of the community.

MISSION
QUT’s mission is to bring to the community the benefits of teaching, research, technology, and service. The University’s distinctiveness lies in the approaches it takes to realise this mission, which places a strong emphasis on practical engagement with the world of the professions, industry, government, and the broader community.

QUT is committed to the highest quality in teaching, learning, research, and a wide range of professional and community activities.

The University values:
• scholarship, learning, and achievement in all student and staff endeavours
• engagement with, and responsiveness to, its diverse internal and external communities
• social justice and equal opportunity in education and employment
• a safe, supportive, and healthy working environment which supports work-life balance
• honesty, integrity, and ethical behaviour and practices
• a spirit of experimentation, innovation, entrepreneurialism, and client service.

The top priorities for the University as set in the QUT Blueprint are to:
• build research capacity in selected areas
• strengthen QUT’s reputation for quality teaching and learning and provide one of the best learning environments in Australia
• strengthen the ‘real-world’ positioning in teaching and research through better partnerships across internal and external boundaries
• integrate information and communications technology into teaching, research, business/support functions, and infrastructure
• develop environments that foster and reward high-quality scholarship, and build a sense of community.

COMMUNITY SERVICE
QUT’s planning framework comprises three levels of planning:
• Institutional plan (QUT Blueprint)
• Top level plans
  o Research and Innovation
  o Learning and Teaching
  o People and Culture
  o Finance and Infrastructure
• Faculty and Divisional plans.

INFORMATION
In addition to the Handbook, the University produces a range of publications which the public can access. These include the Annual Report and the University’s Manual of Policy and Procedures (MOPP). These publications are available online via QUT’s web site at www.qut.edu.au or from the University’s libraries.

All correspondence should be addressed to:

COUNCIL

Composition, membership, powers and responsibilities of QUT Council are governed by the QUT Act 1998 (see MOPP Appendix 1). Procedures for regulating the University's committee system, including conduct of business by Council, are detailed in Council Procedure 1 — Committees (see MOPP Appendix 2).

QUT Council comprises senior members of the professions for which QUT prepares graduates; appointees from higher education, government, commerce and industry; elected staff, students and members of Alumni; and the University's chief executive officer. Council is responsible for the good governance of the University.

Council is empowered to establish committees and to delegate power to committees or officers of the University. While Council is ultimately responsible for the management and operation of QUT, it has delegated authority to the chief executive officer, the Vice-Chancellor, and to various senior administrators of QUT for much of the day-to-day management of the University (see MOPP Appendix 3). Council has also established a number of committees, some of which have been authorised to make decisions in respect of prescribed policy and procedural matters.

COUNCIL MEMBERSHIP (AS AT 4 JANUARY 2006)

Chancellor (Chair)
Major General P. (Peter) Arnison, AC, CVO (Retd), BEd DLaws Qld, DUniv Griff, DLetters S Qld, DUniv, FAICD, ASIA

Vice-Chancellor
Prof P. (Peter) Coaldrake, BA(Hons) James Cook, PhD Griff, FAIM, FRIPAA

Nominees of the Minister for Education
Dr T. (Terry) Cutler, BA(Hons) Melb, PhD NSW, DUniv. Principal, Cutter & Company Pty Ltd
Mr K. (Keith) Hilless, BE(Elec) Qld. Chairman, Ergon Energy
Mr S. (Stephen) Keim, BA LLB(Hons) Qld. Barrister
Prof A. (Anne) Kelso, BSc(Hon), PhD Melb. Director, CRC for Vaccine Technology
Dr E. (Elizabeth) Mellish, EdD (Leadership). Director, Melissa and Associates
Dr C. (Chris) Sarra, PhD Murd., DipTeach BEd MEd. Director, Institute for Indigenous Leadership and Development
Ms R. (Rosemary) Vilgan, DipSupMgt Macq, BBus, FASFA, FAICD. Chief Executive Officer, Government Superannuation Office; Executive Officer, QSuper

Nominees of Council
Dr D. (Doug) McTaggart, BEc ANU, MA PhD Chicago, FAICD, FAIM. Chief Executive Officer, Queensland Investment Corporation
Mr H. (Hugh) Nalder, B Bus (Acc), MICA, MASCPA, MAIMM. Partner, PriceWaterhouseCoopers

Elected Professional Staff Members
Mr M. (Martin) Waterworth, BSci Lond. Division of Technology, Information and Learning Support
Ms D. (Denise) Redfern, BA W Aust, Hon UCQ, DipEd Syd, GradCert(Services Comm) C Qld. Faculty of Built Environment and Engineering

Elected Academic Staff Members
Dr R. (Bob) Cope, CertT Sydney TC, BEd(Hons) James Cook, MEdSt Qld, PhD. Faculty of Education
Mr R. (Ross) Daniels, BA(SocWk) BA(Econs) MSPD Qld. School of Humanities and Human Services, QUT Carseldine
Prof J. (John) Gough, MSc PhD Well. Faculty of Information Technology

Elected Student Members
Ms R. (Rebecca) Leeks, President, QUT Student Guild
Ms B. (Brittany) McKee, General Secretary, QUT Student Guild

Elected Alumni Members
Mrs M-C. (Marie-Claire) Grady, BBus(HRM) MBus. Strategy Advisor, Human Resources, Suncorp
Dr G. (Graham) Drummond, Dip(C Eng) Grad-Dip(BusAdmin) DUniv. Professional Director.

Secretary
Dr C. (Carol) Dickenson, BBus QIT, PhD Qld. Registrar.

Deputy Vice-Chancellor, Academic (attends by invitation)
Prof D. (David) Gardiner, BA LLB LLM(Hons) Syd. Deputy Vice-Chancellor.

Tenure
Council serves a four-year term from 21 November 2004.

COMMITTEES

QUT committees form the major decision-making structure of the University and student representation is provided for on both University and faculty committees. The major University committees that have student representation as part of their membership are:

- Academic Policy and Procedures Committee
- Appeals Committee
- Community Service Advisory Committee
- Cultural Diversity Committee
- Disability Services Committee
- Equity Awards Committee
- Equity Board
- Outstanding Contribution Award (Academic Staff) Committee
- Outstanding Contribution Award for Professional Staff Committee
- QUT Council
- Teaching and Learning Committee
- University Academic Board
- University Health and Safety Committee

QUT encourages student representation on the above committees. If you are interested in finding out more about University committees contact Governance Services on 07 3138 2088.
CHANCELLERY
Vice-Chancellor: Professor O.P. Coaddrake, BA(Hons)
James Cook, PhD Griff, FAIM, FRIPA
Deputy Vice-Chancellor (Academic): Professor D.G. Gardiner, BA LL(Hons) Syd
Director, Academic Policy and Programs: Dr D.W. Field, BSc(Hons) PhD Adel, DipT Adel CAE, FAIP
Director, Efficiency and Audit: S. Patel, BA(Acctg) S Pacific, CPA
Manager, Oodgeroo Unit: V. Hart

DIVISION OF ADMINISTRATIVE SERVICES
University Registrar and Head, Administrative Services: Dr C. Dickenson, BBus QIT, PhD Qld
Director, Student Support Services: R.P. Morley, BBus QIT, MAdmin Griff
Director, Student Business Services: R. Bryde, BA(Mngt Science) Canberra

Director, Program Development: G. Edmondson, BA Griff

Director, International Relations: K. O'Brien, MA Trinity

Development Office
Director, University Advancement and Alumni: S. Garske, BBus(Com) MBA

QUT Precincts
Director, Precincts: Professor P. Lavery, BA DipEd Qld, DipD Brist, MLitt NE
The University may award medals known as Queensland University of Technology Medals to graduands of certain courses who have achieved an exceptionally high level of performance in their studies. Medals are awarded by University Academic Board on the recommendation of the relevant faculty academic board.

For the award of a medal, a graduand should have reached a distinguished academic standard based on a grade point average in all units, and in a thesis where such is required. The standard should be at a higher level than would normally be expected from an excellent graduand. The medal should be testimony that the recipient not only shows exceptional academic promise at the time of the award, but also exhibits a distinguished and consistent record of achievement throughout the whole of the degree.

Eligibility to be considered for the award of a University Medal is limited to:
- graduands of 'end-on' honours degrees where performance in the related bachelor degree is also taken into account
- graduands of degrees with honours, including components of double degree programs where awards with honours are made
- graduands of bachelor degrees of at least three years normal duration where no honours award is available, including relevant components of double degree programs where no honours award is available.

In completing one of the above degrees, graduands must have been enrolled at QUT for at least two years of full-time study or equivalent. The two years of study at QUT must be directly relevant to the course for which the medal is awarded.

For graduands of double degrees, University medals are awarded as appropriate for each of the component degrees.

As the University medal is awarded only for distinguished achievement, University Academic Board has indicated as a guide to faculties that the proportion of graduands who may receive medals in any year should normally be not more than one per 200 bachelor-level graduands (or part thereof) per faculty.

The award is a silver medallion, suitably embossed and inscribed, together with a certificate attesting the award. The medallion is 5.5 centimetres square with rounded corners. The QUT logo is embossed one side and the reverse carries an inscription citing the year of the award and the name of the awardee. Further details may be placed on the certificate.

---

**Careers and Employment**

Careers and Employment (C&E) assists prospective and enrolled students, as well as recent graduates, to make informed course and career decisions in order to reach their employment goals.

The C&E web site (http://careers.qut.edu.au/) is accessible to all QUT students and staff and provides:
- immediate, international, graduate and vacation job listings
- help on making course and career choices
- graduate destinations information
- employment preparation resources
- career planning web site
- international discussion forum and work placement scheme information
- career resources for postgraduate students
- employer listings
- online resume builder
- workshops schedule
- career mentor scheme information
- online employer services
- work experience insurance information
- links to other useful web sites

For contact details and other services offered, go to the C&E web site (http://careers.qut.edu.au/).

---

**Chaplaincy**

The University caters for the emotional and spiritual needs of students through the provision of chaplaincy services. The chaplaincy centres are ecumenical and, although the chaplains represent the major Christian denominations, they are also available to people of other religions. The chaplains are available at any time and are happy to discuss matters of a spiritual, religious, ethical or personal nature.

A chapel is available at the Gardens Point and Kelvin Grove campuses for quiet prayer, worship services and prayer meetings. The centre has a room with tea and coffee making facilities. At Gardens Point, there is also a Muslim Mosque in rooms adjacent to the main chaplaincy rooms.

At Carseldine campus, the chaplain conducts weekly visits and ecumenical services as well as periodic Catholic Mass.

Chaplaincy Service locations:
- Carseldine Room C310
- Gardens Point Old Government House (near entrance to the Library and U Block)
- Kelvin Grove Room A131 (ground floor near the Library)

You can also contact the chaplain on 07 3138 2700, mobile: 041 464 2700 or email: bj.clarke@qut.edu.au

**Computing and Technology Services**

The Student Computing Guide covers essential computing information for QUT students. The guide is available on
the web at www.scg.qut.edu.au. Details on finding student computer labs, using email, setting up your computer passwords etc can be found in this guide.

**QUT Virtual** is a large, integrated database that contains information relating to QUT students and their courses. Each student has a personal profile within QUT Virtual which displays information personalised to them. QUT Virtual is accessed using your QUT Access username and password. More information is located on the Student Computing Guide web site.

Features found within QUT Virtual include:

- online continuing and change to enrolment forms
- class timetables
- class allocations
- unit outlines
- booklists
- library borrowing information
- Internet access quota balances and usage history
- exam timetables
- exam results and academic history

QUT Virtual is located at: https://qutvirtual.qut.edu.au

**Internet access**: Each semester QUT provides students with a free Internet Access Service allocation to cover educational needs. Details about accessing and using the Internet through QUT can be found at https://ias.qut.edu.au/.

**Email**: All students are given access to the QUT student email service.

The student email service is accessed and used through the World Wide Web. Webmail is located at http://email.qut.edu.au. More information about using email at QUT is available at www.scg.qut.edu.au

**IT Helpdesk**: This service provides phone support for students and staff using QUT’s computing systems, needing to change passwords etc. Phone 07 3138 4000.

**Student Computing Labs**: Students can access the Internet, email, databases, lecture notes, tutorials and much more in the central student computing labs on each campus. Lab advisors are on hand in some central labs to provide assistance.

**Audiovisual Equipment**: Students have access to video camcorders, still cameras, mini-disk recorders, video projectors and a range of other equipment through the Audiovisual Services outlets at each campus. Studio and video duplication, video conversion, video editing and audio recording are also available. (In most cases prior approval from your lecturer is required. Hire fees apply without this approval).

**Counselling Service**

Counselling Services provides professional, confidential and free counselling to students. Students are welcome to contact Counselling Services to make use of the following services:

- **Personal counselling**: Counselling Services provides opportunities for students to discuss in confidence issues and concerns including personal development/growth, relationship/family difficulties, stressful situations, grief, personal concerns, study and course difficulties.

- **Welfare and advocacy**: Counselling Services offers information, advisory, advocacy and referral services on a range of matters including finance, AUSTUDY, loan schemes, QUT rules, and procedures and policies. In certain cases, counsellors may provide a supportive, mediating and advocacy role in assisting you with problems or difficult issues relating to general welfare.

- **Probation or withdrawal**: students placed on probation or considering withdrawal from their course are strongly advised to discuss issues related to this situation with a counsellor.

- **Workshops**: occasionally workshops are offered through the Service. Details of these may be obtained from Counselling Services on each campus.

Students wishing to make an appointment should telephone or visit the Counselling Service at the campus most convenient to them.

**Appointments**: Students wishing to make an appointment should telephone or visit the Counselling Service at the campus most convenient to them. Appointments are available in two forms. A walk-in service of short appointments is available daily at each campus (note that Carseldine counselling service is only open Monday to Wednesday during semester). Longer appointments of 50 minutes are available for students who require more time.

Counselling Service locations:

- Carseldine Level 2, C Block
  Phone: 07 3138 4539
- Gardens Point Ground Floor, Y Block
  Phone: 07 3138 2383
- Kelvin Grove Level 4, C Block
  Phone: 07 3138 3488
- Web: http://www.counselling.qut.edu.au/web/

**Equity Programs and Services**

QUT strives to support cultural and social diversity in our student body by providing a learning environment which:

- promotes the principles of equality and justice
- is inclusive and supportive of people from all backgrounds
- is free from discrimination and harassment.

QUT provides a range of support programs to help remove barriers to success faced by some students including:

- **students from low income backgrounds**: admission, orientation and support services through the Q-Step Program. Phone: 07 3138 3731. Also the Equity Section provides information on a range of financial support measures aimed at low-income students including Commonwealth Learning Scholarships, Equity scholarships and bursaries. Information on faculty-based scholarships and prizes is also available, as well as other financial support measures across the university. Phone 07 3138 5601 for more information on financial support measures or go to the Equity Section web site.

- **Aboriginal students and Torres Strait Islander students**: admission, orientation and support services coordinated by the Oodgeroo Unit. Look out for details on
Aboriginal and Torres Strait Islander pre-orientation activities in the Orientation Program. Phone: 07 3138 3610

- **people from non-English speaking backgrounds**: language and learning skills support provided by International Student Services.

- **people with disabilities**: assistance and support coordinated, or negotiated, by the Disability Officer. Refer to the Enrolment Guide and contact the Equity Section for a copy of the Guide for Students with Disabilities.

The Equity Section also has information on the following:

- **inclusive learning experiences and services**: whether we mean to or not, the language we use can sometimes demean or exclude people. The booklet Working with Diversity: A guide to inclusive language and presentation provides examples of inclusive and non-discriminatory language. It is a valuable guide for all communication, including assignments and presentations.

- **discrimination and harassment**: QUT will not tolerate unfair treatment on the basis of characteristics such as sex, cultural identity, age, disability, religion or sexual orientation. The University has specific policies and procedures regarding sexual and gender-based harassment, and racial discrimination and harassment. These policies are included in the Student Rules section of the QUT Handbook online. If at any time during your study at QUT you experience discrimination or harassment, you should report it - even if you do not want to make a formal complaint. QUT has trained discrimination contact officers to provide you with information and confidential advice on your options (the list of discrimination contact officers is available from the Equity Section).

**Health Service**

QUT Health and Medical Service is an accredited facility available to the University community including students, staff, contractors and visitors to QUT.

Health and Medical Services is a Student Support Service that seeks to assist students with their health needs so that they may achieve an optimal academic performance in the shortest possible time.

Our team of medical practitioners, registered nurses, and administration staff are experienced to provide a safe, confidential and professional environment for students and staff to address medical, health and emotional issues.

A Consultant Psychiatrist is available on site at Kelvin Grove for student appointments. You must be referred initially by one of the doctors at QUT Health Services.

**Library**

QUT Library branches are located at:

- V Block, Gardens point campus
- R Block, Carseldine
- R Block, Kelvin Grove campus
- C Block (Law Library), Gardens Point campus
- E Block, Caboolture campus

The libraries have PC labs, group study rooms, PC and multimedia equipped study rooms, lounge and reading areas and quiet study areas available for your use. You can borrow material from any branch library either in person or using the intercampus loan delivery service.

The Library has the specialised resources you need in your study area, and holds more than 724,000 books, ebooks, multimedia items and internet resources; and 36,000 electronic and print journals and over 500 databases. Book chapters, journal articles and readings recommended by your lecturer are available online from the Course Materials Database, linked from your unit OLTI page; or in print in the Course Reserve Collection, in each library.

The Library web site gives you 24/7 access to many of these electronic resources. Using the online self-service functions of the library catalogue, you can check what you have borrowed, request a book on loan or held at another library, and renew your loans.

For assistance in using the library, finding information or searching databases, you can get expert help from librarians and other staff:

- Information Desks
- Ask a Librarian web chat and email reference service.

You can develop your information retrieval and evaluation skills by doing our web-based tutorial, PILOT: Your Information Navigator or you can attend our free information skills classes on searching databases or how to be an expert ‘googler’.

**Library Hours** vary throughout the year and between each branch library. Check signs or the Library website.

You can contact the Library on the following telephone numbers:

Carseldine: 07 3138 4555
Gardens Point: 07 3138 2083
Kelvin Grove: 07 3138 3079
Law Library: 07 3138 2842

**Oodgeroo Unit**

The Oodgeroo Unit is the centre of QUT’s activities in Aboriginal and Torres Strait Islander education, studies and research. The Unit has a commitment to developing better access to university education for Aboriginal and Torres Strait Islander people. Providing cultural, personal and academic support to Indigenous students, the Oodgeroo Unit actively promotes cultural awareness amongst all students. All Aboriginal and Torres Strait Islander students enrolled at QUT are welcome to use the Unit’s facilities at Carseldine (C Block), Gardens Point (X Block) and Kelvin Grove (B Block).

Further information can be obtained from:

Phone: 07 3138 3610
Fax: 07 3138 3982
Web: www.oodgeroo.qut.edu.au

**Student Centre**

Student Centres are the first point of contact for students seeking information on administrative, course or other student matters. A Student Centre is located on each QUT campus:
QUT Alumni

When you graduate from QUT, you will become a member of the University's Alumni. QUT Alumni promotes friendly communication and cooperation among the University’s graduates, students, faculty staff and close associates. Membership of QUT Alumni is free.

The Alumni Office at QUT provides services and programs for graduates to enhance professional development, promote lifelong learning, and create opportunities for keeping in touch with other graduates and continuing involvement with the University. As a current student of QUT, you can benefit from the news, programs and services organised by QUT Alumni for the University community.

The Alumni web site (http://www.alumni.qut.edu.au/) provides useful information about QUT Alumni and its sponsored activities. Visit the site to:

- discover how to participate in the Mentor Scheme, which is an opportunity for current students to link with graduates for encouragement and support and to get a practical start to understanding the workplace
- learn about the QUT Alumni Student Leadership Awards which recognise students of QUT for their contributions to the University and the wider community and discover how you could become the QUT Alumni Student Leader of the Year
- explore QUT Links magazine online. QUT publishes this magazine for its Alumni, close associates and interested members of the University community including business and industry professionals. The magazine profiles successful graduates and provides information on what’s happening in the lives of QUT Alumni members as well as what is happening at QUT
- discover the latest news on Alumni events and other activities for graduates by checking out the events listing at QUT Events
- learn about the Outstanding Alumni Awards which recognise graduates who have performed exceptionally in their chosen career and who have made outstanding contributions to the community
- learn about the existing Alumni Chapters at QUT
- find out about the benefits and services that the University has to offer its Alumni
- find out about the Alumni Annual Appeal that supports University projects, in particular scholarships for disadvantaged students.

Giving to QUT

QUT is proud of the strong support it receives from the community.

Alumni, individuals, corporations, foundations and government give generously to the University’s teaching, research and community outreach activities.

This ensures support for students through scholarships and prizes, an improved learning environment and world-leading research that solves real world problems.

Donations to QUT are fully tax deductible. Bequests for general or specific purposes may also be made to the University. For further information visit the giving web site or contact QUT Development on 07 3138 1838.
QUT Gardens Cultural Precinct, located at the University's Gardens Point campus, is situated on one of Queensland's most central and historically important sites. The Precinct encompasses QUT Art Museum, one of Australia's most sophisticated contemporary art museums; Gardens Theatre, with a 400 seat state-of-the-art theatre; and Old Government House.

This world class facility for performing and visual arts was launched in July 2000 providing the community with access to a variety of venues to enjoy and nurture the talents of our artists, craftsmen, musicians and performers. It also hosts a broad-based education program through which participants gain valuable insights into their arts and cultural heritage.

Gardens Cultural Precinct is at the centre of a circuit of culture and recreation incorporating the South Bank precinct with its parklands and cultural centre; the city heart with its galleries and shopping; and Gardens Point itself with its Botanic Gardens, Riverstage, historic campus buildings and Parliament House.

In addition to the core activity of exhibitions and performances, Gardens Cultural Precinct offers unique arts-based educational programs that provide practical ways for Queensland University of Technology to extend the benefits of its knowledge, research and services to the wider Queensland community. These programs have a practical emphasis and include hands-on sessions with curators, artists talks, activity booklets, guided tours and demonstrations.

Gardens Cultural Precinct also offers a choice of stunning spaces for hire. QUT Art Museum provides an elegant and sophisticated space for cocktail parties; Gardens Theatre provides a picturesque and spacious function area, within the glass walled foyer overlooking the City Botanic Gardens; and Old Government House adds heritage glamour to any event.

Location
QUT Gardens Point
2 George Street, Brisbane (next to City Botanic Gardens)

Gardens Theatre

Gardens Theatre is a premium and versatile venue offering an annual program of student and professional productions.

Featuring a spacious foyer overlooking the City Botanic Gardens and an auditorium that seats 400, Gardens Theatre provides an intimate performance space for both QUT Creative Industries presentations as well as local and visiting drama, music and dance productions.

During 2006 it will offer a regular program of professional theatre productions, comedy and children's theatre, as well as QUT Showcase productions.

This state-of-the-art venue is located on QUT's Gardens Point campus at the heritage end of George Street in Brisbane's CBD. Acknowledged as one of the city's premier performing arts venues, Gardens Theatre also features exceptional facilities for audiences including a licenced bar, palm tree atrium, disabled access and a Bar Merlo cafe.

Gardens Theatre facilities and foyer area are available for hire (subject to availability).

Location
QUT Gardens Point
2 George Street, Brisbane (next to City Botanic Gardens)

Box Office
Open Monday - Friday (9am - 6pm) and one hour prior to all scheduled performances.

Bookings & Show Information
For advance bookings and information on current shows phone GardensTix on 07 3138 4455 or visit www.gardenstheatre.qut.com

What's On
Free program guides are available from the theatre box office or refer to program listings on the web at www.gardenstheatre.qut.com

QUT Art Museum

QUT Art Museum is an important cultural facility for the city of Brisbane. The Museum plays a vital role in the educational and intellectual life of the University. It houses a significant art collection that has become a valuable cultural resource for the students and staff of the University, and for the wider community.

The collection is one of the largest in Queensland and contains holdings of great quality and diversity, mostly by Australian artists. It includes fine early paintings, choice ceramics and prints, important examples of indigenous art and challenging contemporary works in a range of art forms.

As part of its exciting and dynamic program the Art Museum offers changing exhibitions drawn from the collection, touring exhibitions from other galleries and collections, and works from several creative academic disciplines within the University. The Museum's educational services are designed to complement and enhance the exhibitions program for the benefit and enjoyment of the public.

Location
QUT Gardens Point
2 George Street, Brisbane (next to City Botanic Gardens)

Museum Hours
Tuesday - Friday: 10am – 5pm
Wednesday: until 8pm
Saturday - Sunday: 12noon – 4pm
Closed Mondays and Public Holidays

Admission
Free entry

Old Government House

Old Government House was the official residence of the Governors of Queensland from 1862-1909. Since that time the house has been occupied by the University of Queensland; the National Trust of Queensland; and Queensland University of Technology's predecessor institutions, Central Technical College and Queensland Institute of Technology.
Old Government House is owned by the Queensland Government. In October 2002, a Heads of Agreement was signed between the Queensland Government, National Trust of Queensland and Queensland University of Technology for the future conservation, management and use of Old Government House.

QUT has accepted responsibility for the continued enhancement of Old Government House and the accompanying grounds in accordance with the Government's Conservation Plan.

To celebrate its history and advance knowledge of Queensland's architectural, political and educational heritage, QUT has opened the doors of Old Government House to provide a welcoming environment for all Queenslanders and visitors to enjoy and learn about the building and its site. Guided tours are available on request.

**Location**
QUT Gardens Point
2 George Street, Brisbane (next to City Botanic Gardens)

---

**QUT STUDENT GUILD**

The QUT Student Guild fosters the welfare of all QUT students and protects their rights. It advocates for students who experience difficulties during their time at QUT and represents all students on various University committees. Being a member of the Student Guild is like having an insurance policy; the Guild exists to help students deal with issues that may negatively impact on their performance at QUT.

The QUT Student Guild is owned and operated by and for students.

The Student Guild is governed by Guild Council which consists of the Executive (President, General Secretary, Education Director, International Student Services Director, Women's Services Director, Welfare Services Director, Recreation Director, Indigenous Services Director, Queer Services Director, and three Campus Directors), campus representatives, and specialist representatives (for part-time and external students, Aboriginal and Torres Strait Islander students, and postgraduate students).

Members of the Guild Council are elected at the annual general election and all students are eligible to stand for positions at the election. Students are also able to nominate and vote for campus coordinator positions to help organise activities and services on campuses.

The Student Guild sends representatives to express students' views to many University committees, including the University Academic Board.

The QUT Student Guild is an organisation which offers support, advocacy and representation to all students at QUT on issues ranging from academic appeals to lobbying the state and federal governments on higher education issues. Quite often, access and equity to education can be affected by government policy. The Student Guild will often call on its members to attend rallies to stop regressive changes to the education system. The Student Guild fully supports a free public education system where everyone has equal access.

The QUT Student Guild also operates several commercial services across all campuses. These consist of the Guild Fitness Centres, Guild Bars, Guild Aquatic and Squash Centre, Guild News and Post Office, the Guild Child Care Centres and Creche, Academic Gown Hire and the Guild Second Hand Textbook Shop.

The Guild has a presence on the web which can be accessed at www.guildonline.net. All of the Guild's services are listed there along with an events page where students can find out what is happening on their campus as well as up-to-date accommodation and part-time employment listings.

INTRODUCTION

The QUT Student Rules published here were approved by QUT Council on 23 October 2002, following a major review. Detailed information about procedural aspects of these rules can be obtained by accessing relevant topics at Student Services website or by contacting the Student Business Services Department.

For information on the University’s admission policy and procedures, please refer to the various booklets available from QUT’s Student Business Services.

STUDENTS ARE WARNED THAT PENALTIES (INCLUDING FINES, SANCTIONS, WITHHOLDING RESULTS, EXCLUSION OR EXPULSION) MAY BE IMPOSED ON STUDENTS WHO CONTRAVENE THESE OR ANY OTHER QUT RULE OR POLICY, OR WHO FAIL TO MEET THEIR OBLIGATIONS (INCLUDING FAILING TO PAY PRESCRIBED FEES, LATE FEES OR FINES, OR FOR FAILING TO RETURN LIBRARY/FACULTY MATERIALS OR EQUIPMENT).

These Student Rules are made pursuant to:
• QUT Statute No. 1 (Course of Study) 1999
• QUT Statute No. 2 (Student Discipline) 1999
• QUT Statute No. 3 (Fees) 1999

They should also be read in conjunction with:
• Schedule 1 to the QUT Act 1998 , Conduct on University Land. This Schedule authorises certain University officers to direct disorderly persons or those creating disturbances to leave the University. A person failing to comply with such a direction may be fined
• Information Facilities Rules (pursuant to QUT Statutes 2 and 3, and to the relevant staff conditions and awards)

THE RULES
PART 1 - PRELIMINARY

Division 1 - Interpretation

1. Definitions

In these rules:

‘assessment’ means work (for example, an examination, assignment, practical, performance) which a student is required to complete for any one or more of the following purposes -

(a) the fulfilment of an educational purpose (for example, to motivate learning, to provide feedback);
(b) to provide a basis for a record of achievement or certification of competency;
(c) to permit grading.

‘award course’ means a program of study leading to the award of a degree, diploma or certificate accredited by QUT.

‘cancellation of enrolment’ means that a student has discontinued an award course or a program of non-award studies.

‘course coordinator’ includes a staff member performing the functions of course coordinator specified by the director, QUT international college.

‘course requirements’ means the specific requirements for completing an award course approved by university academic board and includes the following -

(a) the course structure;
(b) any conditions for enrolment in or for completion of particular units required for the course;
(c) any conditions for academic progression through the course;
(d) any requirements for attendance type or mode of study.

‘dean’ means the executive dean of the faculty having responsibility for a unit or an award course and includes -

(a) the executive director, northern campuses, in the case of a unit or an award course for which that officer is responsible; and
(b) the director, QUT international college, in the case of a program of non-award studies for which the director is responsible.

‘faculty academic board’ means the body established by university academic board to manage academic policy and practices within the faculty or QUT Carseldine.

‘international student’ has the same meaning as ‘overseas student’ in the Higher Education Support Act 2003 (Cwth) .

‘non-award studies’ means a unit or group of units which a student undertakes at the university other than as part of an award course of QUT.

‘QUT’ means the Queensland University of Technology.

‘registrar’ means the university’s chief administrative officer.

‘unit coordinator’ includes a staff member performing the functions of unit coordinator specified by the director, QUT international college.

‘university academic board’ means the body established by council to provide leadership on academic policy and practices of QUT.

1A. Academic calendar and teaching periods

(1) In these rules, ‘teaching period’ means a designated period of weeks in which the program of study and instruction for a unit or an award course is undertaken.

(2) The vice-chancellor approves the academic calendar for each year.

(3) The registrar -

(a) designates the teaching periods in which programs of study or instruction may be offered; and
(b) sets the dates for teaching periods within the academic calendar; and
(c) designates unit addition and withdrawal periods in Schedule 1; and
(d) sets the dates for unit addition and withdrawal in accordance with Schedule 1.

2. Attendance type and mode

(1) A student’s attendance type is normally designated as full-time if the enrolment program for the teaching period is -

(a) in the case of a student enrolled in an award course, at least 75 per cent of the number of credit points for a standard enrolment program load for full-time enrolment in that course in a teaching period; or
(b) in the case of a student undertaking non-award studies, at least 75 per cent of the number of credit points for a...
standard enrolment program load designated by the registrar for that purpose.

(2) If a student’s enrolment program load is less than the amount specified in rule 2(1), the student’s attendance type is normally designated as part-time.

(3) Addition or withdrawal of units in accordance with division 2 of part 3 of these rules may be deemed by the registrar to change a student’s attendance type.

(4) For the purposes of these rules and for course requirements, a student’s attendance mode is designated as:

(a) internal, where instruction or supervision in all units in which the student is enrolled in a teaching period is delivered by attendance at a place designated by the registrar as a campus of the university; or

(b) external, where instruction or supervision in all units in which the student is enrolled in a teaching period is delivered other than by attendance at a campus of the university (for example, by posting instructional materials to the student); or

(c) multi-modal, where instruction in some, but not all units, is in internal mode.

Division 2 - Students’ responsibilities under these rules

3. Student responsibility for compliance with these rules and other requirements

(1) It is the student’s responsibility to do all acts associated with admission, enrolment and academic progression in compliance with these rules, including, but not limited to:

(a) providing information to the university under rule 7(2), including statistical information and a mailing address; and

(b) re-enrolling at the university each year; and

(c) submitting an appropriate enrolment program and rectifying any known discrepancies with the enrolment program.

(2) In the case of international students, the student must also comply with any requirements for enrolment or study at the university specified in the Educational Services for Overseas Students Act 2000 (Cwth), including, but not limited to:

(a) any requirements relating to attendance type or mode; and

(b) any conditions for enrolment programs and progress through an award course; and

(c) any conditions relating to leave of absence.

PART 2 - ADMISSION

4. Application for admission

(1) A person must apply for admission to the university before first enrolling in an award course or non-award studies.

(2) Except where specified by the registrar, a person must apply for admission before each teaching period in which they propose to enrol in non-award studies.

(3) A person who seeks to re-enrol in an award course must apply for re-admission following:

(a) cancellation of enrolment in an award course or program of non-award studies; or

(b) an unapproved period of absence; or

(c) a period of exclusion from an award course imposed under part 6 of these rules.

(4) The registrar must prescribe the dates for and the manner of applying for admission to the university.

5. Criteria for admission

(1) University academic board may specify general requirements to be met by a person applying for admission to the university.

(2) The faculty academic board having responsibility for an award course must specify minimum course entry requirements and may specify different requirements for different major areas of study within an award course.

(3) The registrar determines the maximum number of persons to be offered admission to the university.

6. Offer of admission

(1) The registrar makes offers of admission.

(2) An offer of admission may be conditional upon the person providing documents or fulfilling other requirements specified in the offer.

(3) The registrar may withdraw an offer of admission and reject enrolment where:

(a) the person fails to provide documents or to fulfil other requirements specified in the offer of admission; or

(b) the offer of admission has been made as a result of the provision of incomplete or inaccurate information by the person or a certifying authority; or

(c) the person fails to submit an enrolment program in accordance with the offer of admission by the specified date.

PART 3 - ENROLMENT

Division 1 - General requirements for enrolment

7. Enrolment procedures

(1) The registrar -

(a) must prescribe closing dates for submission of an enrolment program for each teaching period; and

(b) may prescribe different closing dates for different categories of students.

(2) The registrar must prescribe the manner of submitting the enrolment program, and the information to be included with the enrolment program.

(3) For each teaching period, the registrar must -

(a) publish the closing dates for addition or withdrawal of units in accordance with schedule 1; and

(b) specify the manner of submitting changes to the enrolment program.

8. Valid enrolment

(1) Subject to rule 8(2), enrolment in any teaching period means that the student has submitted an enrolment program for study, instruction or research at the university in that teaching period.

(2) A student is validly enrolled upon -

(a) submission of an enrolment program for the teaching period by the specified date or such later time as permitted by the registrar; and

(b) acceptance of the enrolment program by the registrar; and

(c) payment of fees and charges required under these rules by the specified date or such later time as permitted by the registrar; and

(d) fulfilment of any other requirements specified in these rules.
Division 2 - Enrolment programs

9. Requirements for enrolment programs

(1) A student's enrolment program must comply with the general requirements specified in this division.

(2) In the case of a student enrolled in an award course, the student's enrolment program must also comply with the course requirements.

10. Addition of a unit to enrolment program

Subject to the requirements of this division, a student may add a unit to their enrolment program in a teaching period if -

(a) the unit is added by the addition date published in accordance with schedule 1; or
(b) where the student proposes to add the unit after the addition date published in accordance with schedule 1 -
   (i) the student pays the administrative charge specified in schedule 2; and
   (ii) the unit coordinator agrees to the addition of the unit; and
   (iii) the registrar is satisfied that the student has demonstrated that exceptional circumstances for addition of the unit exist.

11. Withdrawal from a unit

(1) Subject to the requirements of this division, a student may withdraw from enrolment in a unit -

(a) by the withdrawal date published by the registrar in accordance with schedule 1 - without academic penalty; or
(b) after the withdrawal date published by the registrar in accordance with schedule 1 - with academic penalty.

(2) Despite rule 11(1)(b), the registrar may permit withdrawal without academic penalty if, following advice from the dean, the registrar is satisfied that the student has demonstrated that exceptional circumstances for withdrawal from the unit exist.

(3) In this section, ‘academic penalty’ means that the unit in question is awarded a failing grade.

12. Relationship between units of study

(1) Course requirements may specify any of the following conditions for enrolment in a specified unit -

(a) a student must have achieved a passing grade in a prerequisite unit before enrolment in the specified unit;
(b) a student may enrol in the specified unit only if -
   (i) the student also enrols in a corequisite unit at the same time; or
   (ii) the student has previously achieved a passing grade in the corequisite unit;
(c) a student must not enrol in the specified unit if the student has achieved a passing grade in an incompatible unit.

(2) A unit coordinator may permit a student to enrol in a specified unit without having satisfied the condition listed in rules 12(1)(a) or 12(1)(b) if the unit coordinator is satisfied that the student has demonstrated sufficient knowledge to undertake the unit.

(3) In this section, an ‘incompatible unit’ means a unit in which the subject matter or the body of learning is substantially similar to that included in the specified unit.

13. Maximum and minimum enrolment program load

Course requirements may specify either or both of the following:

(a) the maximum number of credit points for full-time enrolment;
(b) the minimum number of credit points for part-time enrolment.

14. Time limits for completion of an award course

University academic board must specify time limits for completion of an award course, and may impose different time limits for different categories of courses.

15. Acceptance of enrolment program

The registrar may not accept a student's enrolment program in any of the following circumstances -

(a) the student has not enrolled in accordance with their offer of admission, including, where specified, major area of study, attendance type, attendance mode and location of study;
(b) if the student is enrolled in an award course, the student has not submitted an enrolment program which is consistent with course requirements;
(c) except where permitted by the course or unit coordinator, as the case may be, the student has not complied with the requirements of division 2 of part 3 of these rules;
(d) if the student is enrolled in an award course, the student has not met the requirements of part 6 of these rules;
(e) the student is subject to a penalty imposed under rule 29 or Statute No 2 (Student Discipline) 1999 which prohibits their enrolment in the current teaching period;
(f) the student is in breach of any other statute or rule of the university which specifies rejection or suspension of enrolment as a penalty.

16. Amendment of enrolment program

The registrar may amend an enrolment program, after consultation with the course coordinator, if any of the following conditions exist -

(a) the student has not complied with the requirements of rule 13;
(b) the student has not complied with other course requirements;
(c) the student cannot attend classes or meet other unit requirements due to timetable incompatibility;
(d) the student has not complied with any conditions of probationary enrolment imposed under part 6 of these rules.

Division 3 - Credit

17. Credit for previous studies

(1) University academic board may specify the amount and type of credit for previous studies which may be granted in award courses, and may specify different amounts of credit for different categories of award courses or students.

(2) The registrar must specify the procedures to be followed, and the documentation to be supplied, by students applying for credit.

(3) The course coordinator must determine the amount and type of credit to be granted in accordance with university academic board determinations.

Division 4 - Discontinuation or interruption of enrolment

18. Leave of absence
(1) University academic board may specify the circumstances in which a student may take leave of absence from an award course.

(2) A student must apply to the registrar for leave of absence from the award course.

(3) The registrar determines the student's application for leave of absence.

19. Cancellation of enrolment

(1) A student must notify the registrar if they wish to cancel their enrolment in an award course or non-award studies.

(2) A student who cancels their enrolment is deemed to have withdrawn from enrolment in all units in their enrolment program in accordance with rule 11.

PART 4 - FEES

20. Definitions for this part

In this part:

'HES Act' means the Higher Education Support Act (Cwth) as amended from time to time.

'student contribution amount' means an amount being the contribution for the teaching period in question determined by the university in accordance with the HES Act.

21. Imposition of fees and charges

(1) Except as specified under the HES Act, the university may impose student contribution amounts and fees for enrolment and study at the university, or for services and facilities associated with enrolment and study, and may impose different student contribution amounts and fees for different categories of students.

(2) The officer or body listed in schedule 2 sets the student contribution amounts and fees.

(3) For each teaching period, the registrar must prescribe the dates for payment of student contribution amounts and fees.

(4) A student must pay the student contribution amounts and fees specified in these rules by the prescribed dates.

(5) A student is not validly enrolled unless all student contribution amounts and fees specified in these rules have been paid, including any additional student contribution amount or tuition fee required to be paid as a result of addition of a unit to a student's enrolment program in accordance with rule 10.

22. (Repealed - 19.04.06)

23. Liability for a student contribution amount

(1) Except as specified in the HES Act, a student who enrolls in any teaching period in a unit or units for an award course is liable for a student contribution amount.

(2) A student who is liable for a student contribution amount must submit a Commonwealth assistance form specifying the method for payment of the contribution in any of the following circumstances –

(a) when the student first enrolls at the university;
(b) when the student changes to another award course;
(c) if the student elects to pay the contribution by another method.

(3) For each teaching period, the registrar must prescribe the date for submission of the Commonwealth assistance form.

(4) Except as specified in the HES Act, a student may discharge a liability for a student contribution amount by –

(a) paying the required amount directly to the university by the date specified by the registrar; or
(b) supplying a tax file number to the university; or
(c) a combination of (a) and (b).

24. Tuition fee

(1) This rule applies to students who are not liable to pay a student contribution amount for a teaching period or a unit.

(2) A student (other than an international student or a student deemed by the registrar to be liable to pay a student contribution amount) who enrolls in a unit or units for an award course must pay the tuition fee specified in schedule 2.

(3) A visiting student (other than a visiting international student) who enrolls in a unit or units must pay the tuition fee specified in schedule 2, except that the dean may specify a different fee for students undertaking a designated enrolment program.

(4) An international student must pay to the university, for each teaching period, the international student tuition fee specified in the offer of admission.

(5) Where the HES Act specifies, a student who is normally liable to pay a student contribution amount may be required to pay the tuition fee specified in schedule 2 for enrolment in a particular teaching period or unit.

(6) For this rule –

'a visiting student' means a student who enrolls in non-award studies, but does not include a cross-institutional Commonwealth supported student who enrolls in a unit or units at QUT to obtain credit towards an award course at another Australian university.

'Commonwealth supported student' means a student who is liable to pay a student contribution amount for a unit or units for an award course in accordance with the HES Act.

25. Incidental fees

(1) A student or a person applying for admission must pay the relevant incidental fee prior to taking the action or requesting the service listed in schedule 2.

(2) If the fee has not been paid, the student's action or request for the service has no effect.

26. Cancellation fee and refunds

(1) The university may retain a proportion of student contribution amounts or fees paid by a student as a charge for cancellation of enrolment, and may impose different cancellation fees for different categories of students.

(2) Schedule 2 specifies the amount which will be retained by the university where a student cancels their enrolment in a unit or units.

(3) A student who withdraws from enrolment in a unit or units must apply by the date specified by the registrar for a refund of student contribution amounts or fees paid to the university.

26A. Exemption or deferment of payment of fees

(1) The vice-chancellor must specify the circumstances in which students may be granted exemption from payment of fees.
27. Consequences of non-payment of fees and charges

Except where action is taken by the registrar under rule 26A, the registrar may do either or both of the following if a student does not pay by the specified date the full amount of fees required by the university under this part –
(a) reject the student's enrolment in accordance with rule 8; and
(b) require the student to pay an incidental fee specified in schedule 2.

PART 5 - ASSESSMENT

Division 1 - General requirements for assessment

28. Notice of assessment requirements

A student who is enrolled in a unit must receive notification of assessment requirements in the manner and by the time prescribed by university academic board.

29. Academic dishonesty

(1) A student must not act in a manner which constitutes academic dishonesty.
(2) Academic dishonesty means an action or practice which may compromise or defeat the purposes of assessment, and includes, but is not limited to -
(a) cheating, or attempting to cheat;
(b) plagiarism;
(c) misrepresenting or fabricating data or results or other assessable work;
(d) breaching requirements specified by university academic board under rule 32 for conduct during examinations, in a way that may compromise or defeat the purposes of the assessment.
(3) University academic board may prescribe procedures for investigating allegations of academic dishonesty.
(4) The penalties for academic dishonesty are -
(a) mark reduction or zero mark for an assessment item; or
(b) awarding of a failing grade in the unit in which academic dishonesty is detected; or
(c) awarding of a failing grade in the unit in which academic dishonesty is detected and in another unit or all other units undertaken in that teaching period; or
(d) suspension from the university for a specified period of time, together with the allocation of failing grades specified in rule 29(4)(c); or
(e) permanent expulsion from the University, together with the allocation of failing grades specified in rule 29(4)(c).
(5) The dean may impose the penalties listed in rule 29(4)(a) and 29(4)(b).
(6) The registrar may impose any of the penalties listed in rule 29(4).

Division 2 - Examinations

30. Availability for examinations

(1) A student must be available to undertake an examination -
(a) at the time and place specified for the examination in the central examination period; and
(b) at any other time specified for an examination in the notification of assessment requirements.
(2) The registrar publishes an examination timetable for each central examination period.
(3) In this rule, ‘central examination period’ means a period of at least 2 weeks at the end of each semester or other teaching period designated for conducting examinations.

31. Alternative examination sittings

A student who holds religious convictions which preclude attendance at an examination at the time specified in the published examination timetable, may apply in the manner prescribed by the registrar for an alternative examination sitting.

32. Conduct during examinations

University academic board must specify procedures for examinations, including -
(a) requirements for a student entering or leaving the examination room; and
(b) requirements for a student's conduct during the examination.

33. Deferred examinations

(1) A student who, due to exceptional circumstances beyond the student's control, is unable to attend an examination at the prescribed time may apply in the manner prescribed by the registrar for a deferred examination.
(2) The dean determines the outcome of an application for a deferred examination.

Division 3 - Final grades

34. Grading scale

University academic board must specify the grading scale to be used in allocating a record of achievement for studies at the university.

35. Allocation and notification of grades

(1) The dean approves a student's final grade for a unit.
(2) A student will be notified of their grades in the manner determined by the registrar.

36. Special consideration

(1) A student who believes that their performance in completing an assessment item has been adversely affected by exceptional circumstances may apply for special consideration in the manner prescribed by the registrar.
(2) The head of school determines whether the application for special consideration should be granted.
(3) The faculty academic board may specify the manner in which special consideration is to be applied to an assessment item.
(4) The unit coordinator determines whether additional marks for the assessment item should be granted, and must do so in accordance with any faculty academic board determinations made in accordance with rule 36(3).
(5) In this rule -
‘head of school’ means the head of the school in which instruction in a unit is given, or in the case of QUT international college, the director of studies.
PART 6 - UNSATISFACTORY ACADEMIC PERFORMANCE

38. Requirement to perform satisfactorily in studies

(1) In this part, a 'program of study' means an award course or a structured program of non-award studies.

(2) A student undertaking a program of study must maintain a satisfactory level of academic performance in accordance with this part.

39. Probationary enrolment

(1) The registrar must place a student undertaking a program of study on probationary enrolment if the student -
   (a) achieves a grade point average of less than 3.0 for units which the student has undertaken towards the program of study; or
   (b) is awarded a failing grade in a unit which the student has previously failed.

(2) The registrar determines the students to be placed on probationary enrolment at the end of each academic year.

(3) The registrar must notify a student in writing of the decision to place the student on probationary enrolment.

40. Conditions of probationary enrolment

(1) A student is placed on probationary enrolment for 12 months.

(2) While on probationary enrolment, a student must -
   (a) consult the course coordinator about their enrolment program; and
   (b) if the course coordinator specifies an enrolment program, submit the enrolment program as specified.

(3) If a student on probationary enrolment cancels their enrolment in the program of study but is subsequently readmitted by the registrar to the same program of study in accordance with part 2 of these rules, the registrar, upon re-admission -
   (a) must place the student on probationary enrolment for the remainder of the academic year; and
   (b) may require the student to submit an enrolment program specified by the course coordinator.

41. Exclusion from enrolment in an award course

(1) A student is an 'eligible student' for the purposes of exclusion if -
   (a) the student has previously been placed or is currently on probationary enrolment and qualifies for a further period of probationary enrolment on the basis of rule 39; or
   (b) the student is awarded a failing grade in a designated unit; or
   (c) having been readmitted to the program of study following a period of exclusion, the student achieves a grade point average of less than 3.5 for units in which the student has enrolled in the academic year following readmission; or
   (d) in the case of a student enrolled in an award course, the student has exceeded the maximum time limit for the award course imposed in accordance with rule 14.

(2) At the end of each year, the faculty academic board responsible for the program of study may exclude an eligible student from enrolment in that program.

(3) If the faculty academic board does not exclude an eligible student, the registrar may place the eligible student on probationary enrolment in accordance with this part.

(4) The registrar must notify a student in writing of the decision to exclude the student from enrolment in the program of study.

(5) University academic board must specify the circumstances in which the registrar may exclude an eligible student from enrolment in other award courses or programs at the university.

(6) In this rule, 'designated unit' means a unit which a faculty academic board requires a student to complete with a passing grade in order to continue in an award course.

42. Consequences of exclusion

(1) If exclusion is imposed on a student under rule 41, the student is excluded from a program of study indefinitely, unless permitted to re-enrol in accordance with rule 43.

(2) A student who is excluded from a program of study is not permitted to enrol in any units forming part of that program.

43. Enrolment following exclusion

(1) An excluded student may re-enrol in a unit or units as part of the program of study if -
   (a) the student successfully appeals against exclusion; or
   (b) the student, following exclusion for at least 12 months, is re-admitted to the program of study by the registrar.

(2) Where a student re-enrols in the program of study in accordance with rule 43(1), the registrar must place the student on probationary enrolment for the balance of the academic year.

PART 7 - ELIGIBILITY TO GRADUATE

44. Minimum passing grades for graduation

For the purpose of determining a student's eligibility to graduate from an award course, a faculty academic board may designate the maximum number of units for which the student can be awarded a minimum passing grade.

45. Eligibility to graduate from an award course

(1) Subject to rule 44, a student is eligible to graduate from an award course upon completion of all course requirements.

(2) Faculty academic board determines whether a student has completed all course requirements.

(3) University academic board confers the award on a student who is eligible to graduate.

PART 8 - REVIEW AND APPEALS

46. Review of grades and academic rulings

(1) University academic board must prescribe procedures for dealing with applications for review of grades and academic rulings.

(2) A student may apply for a review of -
(a) their grade for a unit; or
(b) other academic rulings made under these rules.

47. Appeal to university academic board

(1) A person who has been refused admission to the university may appeal to university academic board.

(2) A student may appeal to university academic board if -

(a) the student has been excluded from an award course under rule 41; or
(b) the student has been penalised by the dean or the registrar under rule 29.

48. Status pending outcome of review or appeal

Pending the outcome of a review or appeal, the registrar may permit a student to attend classes or undertake examinations.

PART 9 - MISCELLANEOUS

49. Research higher degree students

(1) For students undertaking the doctor of philosophy degree, university academic board must specify general requirements for -

(a) admission as a candidate for the degree; and
(b) enrolment and progression as a candidate; and
(c) submission and examination of the thesis.

(2) For students undertaking another research higher degree, faculty academic board must specify course requirements.

50. Delegation of powers and functions

(1) Where these rules specify that a particular person or body exercises a power or function, that person or body may delegate the power or function to another person or body.

(2) Despite rule 50(1), a course coordinator or a unit coordinator may not delegate a function or power to another person.

End Notes

1 See rule 15.

2 See rule 8.

### Table C - International Student Tuition Fees

These fees are set in accordance with rule 24(4), QUT Student Rules by the authority of the Vice-Chancellor.

Application fee for award courses: $55 (incl GST)

Note: The quoted fee is based on a standard credit point load. The actual cost of the program will depend on the number of credit points enrolled. Pro-rata increase in fees will be charged when more than a normal course load is taken in any semester.

Access to assessment results

The University is committed to a policy of openness with respect to the release of assessment results. QUT policy on access to assessment results and/or marks is as follows.

- For units where percentage marks are calculated, such marks will be placed on the confidential individual student records located in the QUT Virtual web pages (https://qutvirtual.qut.edu.au/).
- Faculty academic boards must make appropriate arrangements for students who request to peruse their own examination scripts or written answers to examination questions or other forms of assessment, provided that the request is made within three months of the release of the examination results. Should students request a photocopy of their script, a fee will be levied.
- Where examination question papers or other forms of assessment will be re-used in successive examinations, faculty academic boards must arrange for students to receive advice on their performance with reference to their own examination scripts in a way which does not prejudice the examination mode.

Assessment for students with disabilities

Students with permanent or temporary disability have the right to alternative arrangements for assessment which provide equality of opportunity to enable students to fulfil course requirements.

Students should contact the relevant campus Disability Officer early in the teaching period and preferably prior to the published date for withdrawal without financial penalty for the relevant teaching period.

Alternative arrangements for assessment are negotiated between the student, Disability Officer and the course coordinator.

Students are required to present evidence to the Disability Officer, usually in the form of documentation from a medical or other relevant specialist practitioner which substantiates the nature of the special need. The University adheres to principles of confidentiality and privacy and documentation together with records of interviews, are maintained by the Disability Officer.

The Disability Officer will develop a service plan which includes recommendations for alternative arrangements for assessment for approval by the relevant course coordinator. Service plans are reviewed and re-negotiated each semester. The student will be advised in writing of any alternative arrangements for their assessment.

Further information on support provided by the University for students with disabilities is contained in the Guide for Students with Disabilities. Refer also to University policy on disability services (see section A/8.3).

a) Centrally organised assessment

For centrally organised examinations, responsibility for the conduct and administration of alternative assessment provisions for students with disabilities, including the costs of employing invigilators, personal assistants and providing examination materials, rests with the Student Business Services Department.

b) School-based assessment

For assessment other than central examinations, administrative and financial responsibility, including organisation of appropriate equipment and support personnel, rests with faculties and schools.

For assessment other than central examinations, administrative and financial responsibility, including organisation of appropriate equipment and support personnel, rests with faculties and schools.

Awards with honours

This policy does not deal with honours programs which are end-on to a bachelor degree course (see MOPP section C/3.3.5).

In degree courses of four or more years, a degree with honours may be awarded to students who have recorded outstanding achievement in the four-year program. Degrees with honours are also awarded to students who have recorded outstanding achievement in a component of a double degree program where that component is a degree for which awards with honours are made (see MOPP section C/3.3.6).

First class honours, second class honours division A and second class honours division B may be awarded. Candidates for a degree with honours must fulfil the requirements for a pass degree and achieve a standard of proficiency in all course units as may from time to time be determined by the relevant faculty academic board and approved by University Academic Board.

Honours are awarded

- to indicate that students may appropriately proceed to higher degrees
- to encourage students to work consistently throughout a course
- to ensure that QUT students can apply equally for employment in competition with honours graduates from other institutions
- to ensure that QUT graduates are eligible for the same level of salary on commencement as graduates from other institutions
- to enable QUT graduates to compete equally for scholarships.

Supplementary assessment

Supplementary assessment is provided to facilitate the course completion of students.

Students may be granted:

- up to two supplementary assessments in the final 96 credit points of study, at the faculty’s discretion, for coursework programs of three or more years full-time duration or equivalent; and
- one supplementary assessment in the final 48 credit points of study, at the faculty’s discretion, for coursework programs of less than three years full-time duration or equivalent (this includes students enrolled in a QUTIC diploma).

Supplementary assessment is not a reassessment of the student’s overall grade or the mark for an individual assessment item. It is a new item of assessment designed to assist students to complete requirements for their qualification, and is thus available for units undertaken in the final semester or year of study (as applicable).

Faculty academic boards are responsible for determining eligibility for supplementary assessment at the time that examination results are considered. Faculty academic
boards will be guided by advice from the relevant school(s) as to whether, given the student's grades for the unit(s) and the nature of the unit(s), it is possible for the student to achieve a passing standard through supplementary assessment.

The form and type of supplementary assessment is at the discretion of the faculty, which will ensure that academic standards are maintained.

Supplementary assessment should only be provided when a student receives:

- a grade of 3 in a unit where a 4 is required for course completion;
- a grade of 2 in a unit where a 3 is required for course completion.

Supplementary assessment will not be granted:

- to students enrolled in designated units listed in the QUT Handbook;
- to students who have been graded 1 low fail or K withdrawn failure.

Students who are not granted supplementary assessment but believe they are entitled to supplementary assessment may request a review of the decision under the University's procedures for reviews of academic rulings (see Student Rules in Appendix 1(c) for details).

The only grades that will be recorded following supplementary assessment are S3 (pass supplementary) and S2 (fail supplementary).

LIFE ON CAMPUS

QUT policy on children on campus

QUT recognises the diversity of needs and demands placed on staff and students when balancing work, study and family responsibilities, and that occasionally it may be necessary to bring a child or children onto campus.

This policy should be read in conjunction with the University's policy on childcare and family responsibilities (see section A/8.6).

Application

The children on campus policy applies to all students and staff members. This policy does not apply to situations where a child is brought on campus for the purpose of attending a registered child care facility, the Early Childhood Development Unit, clinics and approved programs such as vacation care.

Principles

Under the Queensland Workplace Health and Safety Act 1995 QUT has obligations to ensure the health and safety of all, including children, at or near the workplace. The legislation requires that students and staff meet the following obligations:

- to follow instructions related to their study or employment at QUT;
- to not interfere with or misuse anything provided for health and safety;
- to not place others or themselves at risk.

Consistent with these obligations, a student or staff member must consider the following issues prior to bringing a child on campus.

- It is anticipated that students will make all reasonable attempts to arrange alternative childcare before bringing a child to the workplace.
- It is anticipated that staff will make all reasonable attempts to arrange alternative child care before bringing a child to the workplace or avail themselves of flexible work practices (eg flexitime) or leave options (eg Personal leave) where available and appropriate.
- Approval to bring a child on campus should be obtained from the relevant staff member or supervisor as soon as practical, ie in advance if possible or on arrival.
- Children must not enter areas where potentially dangerous equipment or hazardous substances are present or areas that are subject to particular statutory or local regulations.
- A common sense approach is necessary when bringing children on campus. For example, children recently exposed to an infectious illness (eg chicken pox, rubella, mumps etc), or who are known to be ill, must not be brought on campus.
- It is important that the child's presence on campus does not result in disruption to the workplace, including classes and non-teaching areas such as the Library.

Further information and detailed procedures relating to this policy are available from HR Health and Safety Advisory Services.

Policy on smoking

Given the proven health risks of smoking, QUT is moving towards making the University a smoke-free environment.

Smoking is prohibited:

- in all buildings or parts of buildings under QUT's control;
- in QUT vehicles;
- within 10 metres of any entrance to buildings, air conditioning intakes, ventilation louvres or opened windows;
- on all semi-enclosed thoroughfares such as verandahs or colonnades and on all elevated walkways with or without fixed roof structures which require people using building entrances or moving between buildings to pass through tobacco smoke emissions;
- in any other area not specified above where there is signage expressly prohibiting smoking.

Smokers are required to follow directions given by authorised QUT staff and Security personnel in regard to the implementation and enforcement of the University's policy on smoking.

Policy on inclusive language and presentation

Under its equal opportunity policy (1993), QUT aims to 'provide equal employment and educational opportunities within QUT and identify and remove barriers to participation and progression in employment and education.'

To this end, QUT supports a policy of inclusive language and presentation in all administrative and academic activities of the University. This means that QUT will

- actively promote the use of inclusive language and presentation by staff and students in all QUT documents and materials, both written and otherwise;
- actively promote the use of inclusive texts and materials in all QUT teaching and presentations.
works towards the elimination of demeaning or discriminatory language and visual representations at QUT
• take active steps to ensure that all staff and students are aware of their responsibilities under the policy, and take appropriate action to assist staff to comply
• develop and maintain a procedure for resolving complaints of demeaning or discriminatory language and presentation.

For the purpose of this policy
• inclusive language and presentation positively reflects the richness of the social and cultural diversity of Australian society and the QUT community by embracing the lifestyles, experiences and values of all groups of people
• discriminatory language and presentation devalues or demeans people or groups of people by harassing them, highlighting individual characteristics in an offensive or prejudicial manner, or by excluding them.

QUT recognises that use of inclusive language and presentation in all activities will assist in the University's mission to bring the benefits of teaching, research and learning to the community.

Responsibilities
QUT expects all staff, students and other members of the University community to act in accordance with this policy.

Executive deans, heads of division and Chancellery are responsible for ensuring that their staff and, where applicable, students comply with this policy.

Disability services policy
In accordance with QUT's equal opportunity policy (see section A/8.4), the University recognises its social and legal obligation to provide an accessible and inclusive environment for people with disabilities. QUT is bound by the Commonwealth Disability Discrimination Act 1992 and the Queensland Anti-Discrimination Act 1991, under which the University can be vicariously liable for discrimination or harassment against a person with a disability by a member of staff or any of its agents.

This policy seeks to ensure equal opportunities for people with disabilities to participate in all aspects of University life, including education and employment. It is based on the philosophy of inclusion, which promotes strategies to develop a flexible work and study environment which is able to meet the needs of a diverse range of users.

The policy is accompanied by detailed operational guidelines available from the Equity Section, or from the Equity Section webpage (http://www.qut.edu.au/admin/equity/).

Principles
QUT is committed to the creation of an environment which promotes dignity, acknowledges the right to privacy and confidence, and cultivates an awareness of the needs and rights of people with disabilities.

In creating this environment, the University is guided by the following principles:

• Reasonable accommodations are to be provided for people with disabilities. It is the responsibility of the student or staff member to substantiate their eligibility for disability services.
• The needs of people with disabilities are to be assessed in consultation with them by the University's Disability Officer/s on an individual basis.
• Accommodations for people with disabilities will neither advantage nor disadvantage them in comparison to other people not receiving disability support services, but will be designed to ensure that people with a disability have equal access to employment or education.
• Any information in relation to a person's disability remains confidential, is not part of the person's open record of employment or academic progress, and will not be disclosed without prior written consent, except for statistical reports designed for monitoring and evaluation. (See section F/9.1 for policy on confidentiality of staff and student records).
• The University may seek information about a person's disability only insofar as it relates to the request for reasonable accommodation and/or the need for general accountability to funding agencies, policy development or monitoring and evaluation of policies and programs, including affirmative action programs for staff with disabilities.
• By law, access to work and study may not be limited on the basis of the cost of services and accommodations required, unless the adjustments would impose "unjustifiable hardship" on the University.
• People with disabilities should be able to access and negotiate each campus in safety and with ease.
• People with disabilities should have access to existing information networks (e.g endorsements, publications, promotional material) in appropriate formats.

Definitions
Disability
As outlined in the relevant legislation, a disability may be either temporary or permanent, total or partial, physical, psychological or psychiatric, life-long or acquired. Also included are people who require devices or aids for assistance, or are accompanied by guide dogs.

Reasonable Accommodation
Reasonable accommodation refers to administrative, physical or procedural alterations required to ensure equal opportunity for a person with a disability.

Unjustifiable Hardship
In some cases it may be unreasonable for the University to make certain adjustments. Relevant circumstances in determining unjustifiable hardship include:

• the nature of the benefit or detriment likely to accrue or be suffered by any persons concerned
• the financial circumstances of the Institution and the cost of making the required adjustments.

A thorough understanding of the effect of the disability on the individual and the impact of any adjustment or alteration is required in order to determine whether such adjustments are reasonable and necessary. The relevant State and Commonwealth administrative bodies require detailed evidence to support a claim of unjustifiable hardship.

Provisions
QUT's disability services policy makes the following provisions

Entry to Work and Study
QUT does not discriminate on grounds other than academic and merit based criteria when considering applications for admission as a student or staff member.
Access to Academic Programs and Employment
The University will endeavour to make all its academic programs, employment and development opportunities available to prospective students and staff members with a disability, consistent with the entry provisions above.

Support Services
QUT has a wide range of support services available to all staff and students. The University recognises that students and staff with disabilities may require specialised assistance. Support services include note-takers, alternative formatting of learning material, participation assistants etc.

Adapting the Learning and Working Environment
The University supports the practice of job re-design, workplace modifications and alternative teaching and assessment practices to enable a staff member or a student with a disability to fulfil the requirements of a particular position or academic course.

Creation of Employment/Study Opportunities
The University aims to provide equal employment and educational opportunities and to implement affirmative action programs for equity groups (see MOPP section A/8.4). The University develops strategies to take full advantage of funding initiatives by Government agencies aimed at providing employment opportunities for people with disabilities, including its own graduates.

The Physical Environment
The built environment should be accessible to people with disabilities. All new buildings are designed in accordance with the appropriate standards and codes. The University endeavours to improve access to older buildings which do not meet these standards.

Promotion of Disability Awareness
All staff and students will be given the opportunity to acquire the understanding and skills necessary to meet the employment, educational and social support needs of people with disabilities.

Non-Discriminatory Presentation and Practice
In accordance with QUT’s policy and guidelines on inclusive language and presentation (see MOPP section A/8.7), the University will endeavour to ensure that all essential educational, administrative and promotional material is available in alternative formats for access by people with disabilities.

Community Service and Outreach
The University has a responsibility to make its human and physical resources available in a manner which is responsive to the needs and aspirations of people with disabilities, unless to do so would cause unjustifiable hardship for the University.

Quality Assurance Measures
The University is committed to the continued review of policy and procedures, and to the involvement of people with disabilities in matters that affect them. The University will actively seek to involve consumers in decision making, and develop quality assurance mechanisms to support this policy.

Information access and privacy
QUT’s functions necessitate the collection and use of personal information about its students, staff and other clients. QUT recognises that, in collecting, storing, and using this information, it has obligations for the protection of personal privacy.

QUT recognises that, in collecting, storing, and using personal information about its students, staff and other clients, it has obligations for the protection of personal privacy. QUT’s commitment to protecting privacy is part of a broader framework of privacy compliance requirements applying to Queensland government departments and agencies, including statutory authorities such as QUT. The privacy regime is found in Information Standard No 42 - Information Privacy (IS42) and supporting guidelines. Implementation of this standard by QUT is mandatory, as the standard has been issued under the Financial Administration and Audit Act 1977.

General principles and responsibilities for privacy
QUT must comply with 11 information privacy principles, which govern how personal information is collected, stored, used and disclosed. QUT recognises that staff and students, both past and present, and other clients and individuals having links to QUT, have a legitimate expectation that the University will protect and appropriately manage the personal information it collects and holds about them. It is the responsibility of all staff to respect personal privacy in so far as they collect, access or use personal information in the course of their duties, and to comply with the specific requirements of this policy. Privacy must also be appropriately respected in the human research context, and all researchers must comply with the University’s specific policy settings and procedures for research involving personal information.

The functions of many organisational units within the University require the collection or management of personal information, and responsibility for implementing business processes which are consistent with privacy principles rests with the head of each organisational unit. The Registrar, as chief administrative officer, has general responsibility for privacy management, and has designated a Privacy Contact Officer in the University Secretariat to facilitate the implementation of IS42 at QUT.

Definition of personal information
This policy applies to ‘personal information’. This is defined as any information or opinion, whether true or not, and whether recorded in a material form or not, about an individual whose identity is apparent, or can reasonably be ascertained, from the information or opinion. For the purposes of this definition, information includes unique identifiers such as student/staff numbers, tax file numbers, photographs and images, and extends to information in any format. Where data is recorded in a way which does not link it to a known individual, then the privacy principles do not apply.

Collection of personal information
In accordance with Information Privacy Principles 1-3, personal information should be collected by the University for inclusion in its records or publications only where:

- it is collected for a lawful purpose relating to a function or activity of the University;
- the information is relevant to the purpose of collection; and
- the information is as up-to-date and complete as can reasonably be expected.

Moreover, the University must not collect personal information by unlawful, unfair or intrusive means, and must take reasonable steps to ensure that an individual from whom information is collected is generally aware of:

- the purpose for which the personal information is being collected;
- the authority for collecting the information; and
• the University's usual practices for disclosure.

These general principles have a number of implications for an organisational unit engaged in activities requiring the collection of personal information:

• the need to regularly review data collection activities to exclude collection of personal information irrelevant to the business process or where there is no specific and immediate use for the information collected (privacy principles are infringed if personal information is collected just because it might be useful in the future);

• the need to develop appropriate privacy notices when collecting information directly from the person concerned, whether the collection occurs orally (in interviews or telephone calls), in writing or via hard copy or electronic forms;

• the need to determine whether recording names or other identifying details is necessary (for instance, whether data can be recorded in a de-identified way when undertaking surveys or other statistical analysis).

Special considerations apply to data collection practices in the context of human research. Staff or students undertaking research where identified or re-identifiable personal information data is involved must comply with the guidelines issued by the University's Human Research Ethics Committee governing appropriate data collection methodologies and practices.

Guidelines have been developed to assist in the preparation of privacy notices [pending].

Access to personal information records

A significant means of protecting personal privacy within the University is by ensuring that individual staff access personal information records (whether in physical files or computerised formats) only where there is a legitimate need to do so, and only to the extent required to perform the staff member's duties. This is consistent with Information Privacy Principle 4.

Management of access is a responsibility of the head of each organisational unit for personal information records held by that unit. The head of the unit is also responsible for granting, for staff within the unit, appropriate permissions for access to QUT’s information systems. Access to personal information in information systems should be granted on the ‘least privilege principle’ in accordance with the Information Systems Security Policy (MOPP F/1.2), so that rights to modify personal information are granted with particular care. Systems and processes should be in place to revoke access that is no longer required, for example, in the case of a change in position or formal responsibilities or termination of employment.

For personal data in information systems, the system custodian has formal responsibility for access permissions and management. Access rights should be formally documented and reviewed periodically.

Security of personal information

Consistent with Information Privacy Principle 4, the University has a responsibility to implement procedures to protect the security of personal information, to prevent loss and unauthorised access, use, modification, disclosure or any other misuse of such information.

Computerised records

All staff must take responsibility for IT security, as this is an integral means of protecting personal privacy. Detailed arrangements for management of information security are found in the Information Systems Security Policy (MOPP F/1.2). Individual user responsibilities relating to security are outlined in QUT's Information Facilities Rules (MOPP Appendix 1(c)).

Security of physical (hard copy) files and records

Personal information records held in physical files must also be secured - care should be taken by all staff handling physical files to ensure that storage facilities such as filing cabinets, safes and compactuses are locked when not in use and that offices and work areas where these are housed are also adequately secured.

In addition, good records management practices for physical files, for instance, recording file movements, undertaking file audits, placing appropriate security classifications on files, and managing records retention, are designed to safeguard against loss or unauthorised access. Care must be taken to ensure secure and confidential destruction of records containing personal information (which may only be undertaken in accordance with the University's disposal schedule). Refer to QUT's records management policies (MOPP F/8.1 and F/8.2).

Use of personal information records

Use of personal information by the University is governed by several principles:

• the requirement to take reasonable steps to ensure that information is accurate, up-to-date and complete before it is used, since it is important that decisions or actions by the University are based on accurate and complete facts (Information Privacy Principle 8);

• the requirement to use information only in circumstances where it is relevant, and provided that it is used only for the purpose for which it has been collected or a directly related purpose (Information Privacy Principles 9 and 10).

However, there are several recognised but limited exceptions to the restrictions on use of personal information (which mirror the exceptions relating to non-disclosure of personal information described below, and include consent, legal compulsion, law enforcement enquiries, threats to life or safety). Protocols for managing these limited situations are under development [pending].

Prohibition on disclosure of personal information

Disclosure refers to release of personal information out of the effective control of the University (that is, to a body, agency or person separate from the University). Information Privacy Principle 11 prohibits the disclosure of personal information held by the University. Staff must not disclose personal information outside the University except as specified in this policy and in accordance with supporting guidelines and protocols.

Exceptions relating to disclosure of personal information

The general principle is that personal information must not be disclosed outside the University. There are, however, several limited exceptions to this principle.

Consent

Personal information may be disclosed where the individual concerned has consented to that disclosure. A common example is the consent given by staff or students for the release of their photographs via QUT Virtual. Consent must be expressly given and it is expected that the consent will be given in writing. In limited circumstances, verbal consent may be acceptable if it is verifiable and the disclosure is
clearly in the best interests of the individual. Staff proposing to release information without a written consent must discuss the circumstances with the Privacy Contact Officer before disclosure occurs (or the Registrar’s Executive Officer if the Privacy Contact Officer is unavailable).

Implied consent must not generally be relied upon as a basis for disclosure. Where a person seeks personal information as a representative or agent of another, then documentation confirming the scope of the agent’s authority should be obtained before release of any personal information held by the University.

Previous provision of a privacy notice
In addition, personal information may be disclosed where individuals have been informed of the usual practices for disclosure. For instance, the University may routinely disclose information to the Student Guild about students who are members, as this practice has been incorporated into a student privacy notice.

Other situations
In rare circumstances, disclosure of personal information may also be permitted where:

- disclosure is necessary to prevent or lessen an imminent and serious threat to a person’s life or health;
- disclosure is required by law (for example, if the University’s records are subpoenaed, or if there are statutory requirements to provide information to a government department such as the Australian Taxation Office, Centrelink, or DEST);
- disclosure is necessary for enforcement of criminal or other laws imposing penalties such as fines.

With the exception of routine disclosures under statutory authority (eg to ATO, Centrelink or DEST), disclosure of personal information in these three situations should be discussed with the Privacy Contact Officer (or the Registrar’s Executive Officer if the Privacy Contact Officer is unavailable), pending development of protocols for assisting staff in managing these situations.

Register of graduates
Privacy principles do not apply to material which is maintained on a public register. Given that one of QUT’s primary functions is to confer higher education degrees and awards, QUT maintains a register of its graduates (via the student information system). Information concerning a person’s status as a graduate of the University is available to any member of the public upon formal request in writing. The request must be made to the Student Business Services Department, who will confirm a graduate’s name, the degree conferred and the date of conferral only.

No other personal information is regarded as being on a public register.

Access to and amendment of an individual’s own record
Information Privacy Principles 6 and 7 generally entitle an individual to have access to the personal information which the University holds about them, and to amend it where it is inaccurate, incomplete, out-of-date or misleading. Information Standard 42 recognises that, in Queensland, these rights are dealt with in the Freedom of Information Act 1992.

However, QUT is committed to providing, as far as practicable, an open environment which enables members of the QUT community to obtain access to their personal information without recourse to formal procedures contained in the FOI Act (see FOI policy - MOPP F/10.1). To achieve this, QUT has in place administrative procedures for information access by staff and students.

QUT Privacy Plan
As required by Information Standard 42, QUT publishes a privacy plan which is updated regularly. The objective of the plan is to describe the nature of the personal information records held by QUT, conditions within the University for access and use and how long such records are retained. The plan includes a complaint mechanism. The Privacy Contact Officer is responsible for publishing the plan.

Contracts involving personal information
The University has a small number of contractual and other arrangements in place which may involve access to or use of personal information held by QUT. Typically these arrangements may outsource routine support functions, though some contractual arrangements may also relate to commercial research and consultancies.

Any contracts which are entered into by the University must place appropriate safeguards on protection of personal privacy. It is the responsibility of senior officers who are involved in negotiating these agreements on the University’s behalf or who have delegated authority to enter contracts and commercial arrangements, to ensure that privacy is adequately addressed and incorporated into the formal terms of the contract where necessary. Contractual arrangements must ensure compliance with the requirements of IS42.

Queries concerning appropriate contractual provisions covering QUT’s privacy obligations may be directed to the Privacy Contact Officer or the Office of Commercial Services.

Equal opportunity policy
QUT Council is committed to a policy of equal opportunity and freedom from all forms of discrimination as determined by legislation or by Council. The policy is issued on the basis that it is fair and just and contributes to the fulfilment of QUT’s mission and goals.

In fulfilling this policy, the University aims to:

- promote the development of a University culture supportive of equity principles
- ensure all of its management and educational policies and practices reflect and respect the social and cultural diversity contained within the University and the community it serves
- ensure that the appointment and advancement of staff and admission and progression of students within QUT are determined on the basis of merit
- provide equal employment and educational opportunities within QUT and identify and remove barriers to participation and progression in employment and education, and implement an affirmative action program for equity groups
- eliminate unlawful discrimination against staff and students on the grounds of sex, marital status, pregnancy, breastfeeding, race, age, parenthood, physical, intellectual and mental impairment, religious belief, lawful sexual activity, trade union activity, criminal record, social origin, medical record, nationality, political belief or activity
- comply with state and federal legislation on discrimination, equal opportunity and affirmative action and binding international human rights instruments.
The Vice-Chancellor, through the Registrar and the management of the University, is responsible for implementation of this policy. The Registrar is assisted by the Equity Coordinator.

QUT expects all staff, students and members of the University community to act in accordance with this policy.

Notes for BEE undergraduate courses ........................................................................ 64
Notes for BEE postgraduate courses .......................................................................... 45
OVERVIEW

The Faculty of Built Environment and Engineering is one of QUT's largest faculties, enrolling approximately 5000 students in a broad range of undergraduate and postgraduate courses. The Faculty's teaching initiatives and courses are designed and maintained through strong linkages with industry and the professions in order to prepare graduates who are open to change and equipped with the capacity and ability for lifelong learning.

To facilitate this aim, the Faculty promotes problem-based learning and teaching and leadership in applied research that directly benefits industry, the professions, and the community. Our academic staff combine their experience in professional practice with their qualifications in advanced postgraduate research.

The Faculty has undergone an exciting period of change to further enhance the unique opportunity for cross disciplinary teaching, research and applications. The three new Schools of the Faculty offer a variety of courses in Design, Urban Development and Engineering Systems that will further enhance students' career prospects and include the opportunity to gain practical experience.

The School of Design offers undergraduate and postgraduate courses across a number of the Design disciplines: Architecture, Industrial Design, Interior Design, Landscape Architecture, and Urban Design. This unique combination of disciplines offers students and staff an outstanding opportunity for collaborative and inter-disciplinary programs. The School is building an international reputation for innovative interdisciplinary design and research. Courses are designed around a project-oriented studio-centred learning environment. Projects are based in the real world, and through our part-time staff and collaborative projects, we maintain a strong link with practice, the community, government and industry. The School has a vigorous program to attract international and national practitioners and academics, to run studios and lecture programs.

The School of Urban Development offers professional undergraduate and postgraduate programs in Civil and Environmental Engineering, Construction Management, Property Economics, Quantity Surveying, Surveying, and Urban and Regional Planning. We strive to make the learning process productive and imaginative and to equip our graduates with the skills needed for the challenges of modern society. The School maintains a consistently high standard of teaching, fosters industry involvement, and stays at the forefront of the professions through an active research program.

The School of Engineering Systems offers a range of innovative programs that are tailored in response to the challenging demands of industry and the professions. The School offers courses in Mechanical, Medical, Infomechanics, Aerospace Avionics, Computer, Telecommunications, Electrical and Computer and Software Engineering. The School's courses offer a balance of theory and 'hands on experience' which ensures graduates are immediately employable in a very diverse range of organisations and industries.

The School also offers three undergraduate double degrees in Electrical and Computer Engineering/Mathematics; Electrical and Computer Engineering/ Business; and Electronic Engineering/Information Technology.

Research Themes

- Design
- Medical Engineering
- Smart Systems
- Infrastructure

Cooperative Research Centres

- Advanced Automotive Technology
- Australian Centre for Tropical Crops and Biocommodities
- Australian Housing and Urban Research Institute (AHURI)
- Centre for Subtropical Design
- CRC Automotive
- Construction Innovation
- Institute of Sustainable Resources
- Integrated Engineering Asset Management
- Railway Engineering and Technologies
- Queensland Sustainable Energy Industry Development Group

SENIOR STAFF

Faculty Office

Executive Dean: Professor M. Betts, BSc (Hons) Reading, PhD CNA, FCSI, FRICS, FIEAust, FRS

Assistant Dean, Teaching and Learning: Associate Professor S. Savage, BArch (Hons) MArch Qld, DipAdultVocEd Griff

Assistant Dean, Research: Professor Bell, J. M., BSc Syd, PhD NSW

Assistant Dean, External Relations: L. Shutter, BArch Adel MSc (Arch) Columbia, RAIA

School of Design

Acting Head: Associate Professor J. M. Franz, BAppSc (BtEnv) QIT, DipTeach TAFE, MEdSt Qld, PhD QUT, MDIA (Accredited Designer), RegTeach (Qld)

Professors:

Dr S. Lehmann, DipDesign Mainz, PhD Berlin, Architekt BDA V. Popovic, DipEngArch Belgrade, MFA(IndDes) III, PhD Syd, FDIA, MHFS, MAES, MDRS

Associate Professor: G. Thomas, BArch Grad-Dipl`scapeArch MAppSc(Research) QUT

School of Urban Development

Head: Associate Professor S. Kajewski, BEng (Civil) Grad-DipProjMgt MProjMgt PhD QUT, MIEAust, CPEng, MAIB, RPEQ

Professors:

T.P. Boyd, MSc (BldgMan) PhD QUT, AAPI (CPV), ANZIV, SNZPI, MIV(SA)
L. Ferreira, BSc Lond, MSc Westminster, PhD Leeds, FIEAust, FCIT
M. Mahendran, BScEng (Hons) Moratuwa, PhD Monash, MIEAust, CPEng
R.M. Skitmore, MSc PhD Salford, FRICS, MCIOB, FAIB, AAIQS
D.P. Thambiratnam, BScEng (Hons) Ceyl, MSc PhD Manhit, FICE, FIEAust, FASCE, CPEng
R.J. Troutbeck, BE (Hons) MEngSc Melb, PhD Qld, FIEAust, MITE

Associate Professors:

A. Goonetilleke, BSc (Eng) S Lanka, MSc Giff, PhD QUT, CPEng, FIEAust
P. Heywood, BA(Hons) Oxf, DipTP Manc, MRTPI, FRAPI,
School of Engineering Systems

Head: Associate Professor D.J. Hargreaves, BEng QIT, MSc PhD Leeds, CEng, FIQAust, MStLE, MASSCT

Professor of Biomedical Engineering: M.J. Pearcy, BSc
Brist, PhD Strath, CEng, CPEng (Biomed)

Chair in Power Engineering: Professor G. Ledwich, BE (Hons) Qld, PhD Newcastle, FIQAust, SMIEEE

Chair in Telecommunications: Professor S. Sridharan, BSc (Eng) Ceyl, MSc Manc, PhD UNSW, FIQAust, CEng, MIEE, SMIEEE, CPEng

Professors:
R. Crawford, MBBS Qld DPhil Oxon , FRACS(Orth)
M.P. Moody, BE (Hons), BA, MEngSc, PhD Qld, FIQAust, SMIEEE, RPEQ, CPEng
M. Schuetz, DrMed RWTH Aachen , DrMedHabil HU Berlin
S Sridharan, BSc (Eng) Ceyl, MSc Manc., PhD NSW
P. K.D. Yarlagadda, BTech Nagarjuna, ME Bharathiar, PhD (Ind Inst Tech), CEng, CPEng, MMechE, MIEAust, MIE (India ), SrMemSME, MemASME

Associate Professors:
D. Birtwhistle, BEng (Hons) MSc Brad, PhD Syd, FIQAust, MIEE, CEng, CPEng
W. Boles, BSc Assit, MSc PhD Pitt, GradCertEd QUT
D. Campbell, ADElecEng QIT, BSc (Hons), PhD LaTrobe, MIEAust, MIEE
V. Chandran, B Tech IIT Madras, MSEE TexasTech, MSCS
PhD Wash State, GradCertEd QUT, CPEng
W. Enderle, Dip-Ing, Dr-Ing, Berlin, MIEAust
V.O.A. Oloyede, BSc (Hons) Lagos, MSc Cranfield, PhD
DIC Lond, MNSE, MNYAS
P.J. O’Shea, BE (Hons), DipEd, PhD Qld
L. Ma, BEng Beijing, PhD Qld, MESA
C.C. Tan, BSc (Hons) PhD Lond, CEng, MMechE, FIQAust, MIEM
R.A. Walker, BE (Electronics)(Hons), BAppSc (Comp), PhD QUT, MIEE, MSESA, MION
Y. Xiao, BSc, MSc Hubei Med, PhD Qld

RESEARCH THEMES

Design

The design theme includes research in Architecture, Industrial Design, Interior Design, Landscape Architecture and Urban Design. It focuses on Subtropical Design, Digital Design, Human-centred Design Research and Useability, Built Environment Design Areas, Cultural Landscape, Design for Ageing, Design and Research Methodologies, and Design Education. The theme is cross/inter-disciplinary related with relevant fields in the Faculty (eg mechanical/ manufacturing/ medical engineering; transport engineering; structures and designs; electronic systems and informatics environment) and across the University community (eg Institute for Health and Biomedical Innovation (IHB), Institute for Creative Innovation (iCI), Information Security Institute (ISI), Institute for Sustainable Resources and relevant Collaborative Research Centres (CRC).

Medical Engineering

This program aims to engender sustainable improvements in quality of life for everybody through the innovative application of new and emerging technologies which will not only help reduce the economic burden of healthcare provision, but also generate wealth for the nation through the stimulation of local industry. Under two broad headings, the program encompasses the following research areas:

Orthopaedic and Trauma

The Orthopaedic and Trauma group has seven principal areas of focus: bone defects, fracture healing, pathogenesis and repair of osteoarthritis, biomaterials, new approaches to minimally invasive surgery, paediatric and adult spine research, and clinical outcomes.

Biomechanics, Modelling and Simulation

Apart from orthopaedic research, the Medical Engineering program also encompasses many other areas studying the application of mechanical and electrical engineering to clinically related healthcare problems. These include amputee gait analysis; paediatric gait analysis; performance of paralympic athletes; osseointegrated implants; spinal and pelvic mechanics; paediatric spine deformity; artificial organs, specifically ventricular assist devices (artificial heart) and artificial lungs; tissue mechanics; bioelectrical signal analysis; tribology of artificial joints; and the interface between devices and the human body.

Smart Systems

Infrastructure and Asset Management

Infrastructural research, in collaboration with industry, government and professions, aims to strengthen the nation's building and infrastructure systems. Research concentrates on investigating the performance of existing and new building and infrastructure systems under realistic structural and environmental loadings including those due to natural, accidental and man-made hazards. It uses smart materials, systems and technologies, advanced computer analysis and test methods to assess and improve the performance of existing and new building and infrastructure systems.

Asset Management research focuses on innovative industry-directed research and development, education and commercialisation in an integrated approach to lifecycle physical asset management to meet present and future needs to ensure international competitiveness and sustainability of Australian industry. The overall research program will be focused on five main industry sectors: Defence, Water and Waste, Power Generation and Distribution, Extraction and Process, and Transport Infrastructure.

This research is closely aligned to the CRC for Construction Innovation and the CRC for Integrated Engineering Asset Management.

Robotics and Automation

The Robotics and Automation program is focused on world-class research on robotics and navigation systems for unmanned aerial vehicles, and involves collaboration with CSIRO and Boeing. However similar automation strategies and technologies are used in a variety of control applications such as energy network control, and infomechatronic systems, and satellites.

Speech and Signal Processing

This program conducts internationally competitive research in order to solve practical problems, which enable Speech and Signal Processing to be applied in products and processes. Research focuses on, state-of-the-art speech audio and video technologies including speech/speaker recognition and personal identification technologies for forensic and security applications; speech coding for storage and communication; speech synthesis for voice response systems; audio compression for broadcasting, television and...
Internet applications, video compression, and image recognition and restoration.

Infrastructure

Energy
The provision of sustainable energy supplies is of critical importance to the future of Australia, and this research involves experimental and theoretical research on solar cells, wind energy and solar thermal energy generation as well as fundamental research on energy supply networks, including distributed generation technology and energy policy. This research is conducted in collaboration with energy utilities and the Queensland Sustainable Energy Industry Development Group.

Water
The supply of fresh water and the quality of water supply are key issues facing Australia over the next 20 years, and this research looks at water re-use technology and policy. The research is practically focused with significant collaboration with local government in South-East Queensland.

Transport
The aim of this program is to focus research effort in the freight and logistics area with an emphasis on multi-modal transportation systems. The main research areas include freight vehicle impacts, freight and logistics e-business systems, freight corridor evaluation analysis, ITS applications in freight and logistics, emissions modelling, transit evaluation methodologies, rail track modelling and analysis, and intermodal terminal planning and operations.

Housing and Construction
This research makes contributions to improved practice in the specific areas of housing, urban planning, international project management, construction and property performance, construction information and procurement technologies, and property market choice, investments, constraints opportunities, internationalisation, taxation, lifecycles, risk and culture.

Cooperative Research Centres (CRC)
The faculty is also involved in the following Cooperative Research Centres (CRC) and externally-funded collaborative research ventures:

CRC for Construction Innovation
The Centre aims to create and commercially exploit tools, technologies and management systems to deliver innovative constructed assets of financial, environmental and social benefit to the community. The centre combines basic research with strategic research and development in five related programs: virtual environments for lifecycle design and construction; construction project delivery strategies; environmental sustainability; integrated design and construction support systems; and management, adaptability and the future of built assets.

CRC for Integrated Engineering Asset Management
The CRC for Integrated Engineering Asset Management (CIEAM) delivers capabilities and technologies for integrated and sustainable asset management to a wide range of Australian industries in both the private and the public sectors. CIEAM consists of leading edge researchers and practitioners focused on industry directed R&D and education in the management of Australia's major engineering assets in the Defence, Utilities (power, water and gas), Process and extraction, and Transportation industries. CIEAM involves five research program areas. These are Models and decision systems, Advanced sensors, Intelligent diagnostics and life prediction, Systems integration and IT, and Strategic human dimensions.

CRC for Railway Engineering and Technologies
The Centre aims through research to develop an internationally competitive, efficient and sustainable rail industry and to facilitate the development of an Australian export industry in railway technologies. Benefits will flow in terms of improved rail efficiency and infrastructure capacity, energy savings, reduced maintenance cost, and better asset utilisation. The main research areas include 'Smart train' intelligent systems; innovative/automated maintenance and upgrading technologies; optimal traffic control and scheduling; IT systems and standards for rail management; new materials, systems and components for railways; and industry skills development (education and training).

CRC for Advanced Automotive Technology
The CRC for Advanced Automotive Technology brings the automotive industry together with researchers in design, engineering and manufacturing to enhance the industry's international competitiveness. The aim of the research is to reduce the concept-to-product cycle times; improve manufacturing flexibility and efficiency; and the development of new material systems to meet the challenges of weight reduction, increased safety and greater functionality. The CRC will also improve vehicle safety through improvements in the crash worthiness of vehicles and new intelligent products/systems that provide increased comfort, performance and entertainment.

Australian Housing and Urban Institute (AHURI)
The Institute is a consortium of CSIRO Division of Building, Construction and Engineering; Queensland University of Technology; University of Queensland; Monash University; and Royal Melbourne Institute of Technology (RMIT). Its broad objective is to conduct research into issues in housing and urban fields in Australia and the Asia-Pacific region.

Centre for Subtropical Design
The Centre for Subtropical Design is one of the Faculty's first funded units in one of our major targeted areas: sustainable and enhance the enjoyment of the region's cultural, landscape, and climatic characteristics in ways that are sustainable and enhance the enjoyment of the region's subtropical lifestyle.

Queensland Sustainable Energy Industry Development Group
This group, formed in 2004 by QUT, the University of Queensland, Central Queensland University, Stanwell Corporation, CS Energy, and the Queensland Conservation Council, is continuing the work of the Australian CRC for Renewable Energy in areas of energy policy, training for the sustainable energy industry (supply and use), and renewable energy technology.

Australian Centre for Sugar Research Innovation
This Centre is the research division of the former Sugar Research Institute which transferred to QUT in July 2005. This Centre conducts research into the post-harvest processing and economics of sugar cane, and has a particular expertise in milling technology (mechanical engineering and computational fluid dynamics modelling), separation science, and total biomass utilisation, in particular the transformation of sugar cane waste into biofuels (ethanol) and biopolymers to provide renewable fuels and industrial chemicals.
Course progression

It is important that students follow as normal a progression through their courses as possible. Units should be taken in an orderly sequence as set out in published course structures. Units failed should be picked up in the next semester they are offered. Prerequisite units must normally be passed before a student may proceed to a further unit which has the prerequisite so specified. The course coordinator should be consulted regarding variations from the course structure. This is considered to be a major concession. Students who have failed units or have doubts about having the necessary background to proceed should seek the advice of the course coordinator.

Supplementary assessment

Students may be granted up to two supplementary assessments in the final 96 credit points of study, for coursework programs of three or more year’s full-time duration or equivalent; and one supplementary assessment in the final 48 credit points for coursework programs of less than three years full-time duration or equivalent. Eligibility for supplementary assessment will be determined by the Dean and will normally only be considered when a student receives a grade of 2 in a unit where a 3 is required for course completion or a grade of 3 in a unit where a 4 is required for course completion. The only grade that will be recorded following supplementary assessment is S3 (pass supplementary) and S2 (fail supplementary).

Awards with distinction

Awards ‘with distinction’ may be awarded to graduands of graduate diploma courses undertaken in the Faculty of Built Environment and Engineering. Candidates for a graduate diploma ‘with distinction’ must fulfil the requirements for a pass degree and achieve a standard of proficiency in all course units as may from time to time be determined by the Faculty Academic Board and approved by the University Academic Board.

Eligibility for ‘With Distinction’

Eligibility for awards ‘with distinction’ is not affected by the time taken to complete a course. However, to be eligible for such an award, a graduand must have completed the course within the maximum number of calendar years specified in the policy on time limits for completion of courses (see student rules).

Personal Protection Equipment (PPE) Policy

Protective equipment refers to safety glasses/goggles, hearing protection, safety boots, gloves and similar items. While all care is taken to reduce the risks to which students are exposed, protective equipment will be required to be worn in some practical sessions and field excursions. Students are required to wear PPE where and when it has been made clear that it is needed. Students are required to provide certain PPE as indicated by each school within the Faculty.

Students enrolled in units specified by the faculty of Built Environment and Engineering will be required to wear safety shoes for most laboratory practicals and/or field trips. Students not wearing appropriate safety shoes on these occasions will be barred from (i) participating in activities in these units, and (ii) submitting any assessment associated with these activities. Students must provide their own safety shoes, safety glasses/goggles and hearing protection equipment.
Environment and Engineering and be endorsed by the principal supervisor.

2.4 The minimum academic qualifications for admission to the Master of Applied Science (Research) or Master of Engineering are:

- a four-year degree in an appropriate discipline in which the candidate has received at least second class Honours from the Queensland University of Technology, or
- a qualification judged equivalent by the Faculty Research Committee, or
- a grade point average of 5.0 or better in a graduate diploma program, in a relevant discipline, together with demonstrated potential for further study and/or evidence of professional standing, or
- a grade point average of 5.0 or better in a coursework masters degree program in a relevant discipline, together with demonstrated potential for further study and/or evidence of professional standing.

An applicant for the Master of Applied Science (Research) or Master of Engineering program without the minimum entry requirement may present a case for admission based on the submission of evidence of qualifications which demonstrate the applicant's capacity to pursue the course of study.

The case may be based on the following:

(a) three years professional experience in the general field in which the proposed work lies, or
(b) satisfactory completion of an appropriate Masters qualifying program including formal coursework and/or reading program in related fields stipulated by the Faculty Research Committee, or
(c) the submission of technical publications or other appropriate evidence which satisfies the Faculty Research Committee that advanced knowledge has been acquired in a branch of applied science relevant to the built environment or a division of engineering in which the applicant has worked as a professional practitioner in a position of responsibility. This knowledge should be relevant to the field of study proposed.

2.5 A candidate will be eligible to be registered as a graduate student if they are considered by Faculty Research Committee to meet the requirements for entry.

2.6 A candidate shall receive confirmed registration as a graduate student when they:

- have satisfied the requirements for admission and achieved by work and study a standard recognised by Faculty Research Committee, or
- have satisfied Faculty Research Committee that they are a suitable person to undertake the program, and
- have satisfied Faculty Research Committee that they can devote sufficient time to the research and study.

2.7 In considering an applicant for registration, the Faculty Research Committee shall, in addition to assessing the applicants suitability, be satisfied that:

- the proposed program is relevant to the aims and objectives of the University
- the proposed program has relevance to the needs of society or industry, and
- adequate resources are available to support the proposed program.

2.8 An application for registration should set out systematically and fully the candidates intended course of study including the following:

- a description of the area of study within which the candidates course lies
- a summary of the work to be undertaken, the proposed title of the thesis to be written, the aim of the proposed program, its background, the significance and possible application of the research program, and the research plan
- the location at which the work will be undertaken, the amount of time which will be devoted to it and the resources required
- details of academic qualifications and supporting evidence, including copies of results for each year of courses undertaken
- a brief account of industrial experience
- a list of publications
- sponsorship details
- statement of approval by Head of School and/or Post-graduate Research Coordinator, and
- any other relevant material.

2.9 The program is offered on a full-time or a part-time basis and may be undertaken externally. Part-time students normally will be employed in some professional capacity during the day and carry out their research projects on a part-time basis at QUT, in their place of employment or in a sponsoring organisation.

2.10 Full-time students may be on a scholarship from industry or QUT, and may carry out their research at QUT or in a sponsoring organisation. Normally full-time students would be expected to work on their research projects at QUT for not less than three-quarters of a normal working week, averaged over each year of candidacy. Such a candidate may not devote more than 300 hours annually to teaching activities, including preparation and marking.

2.11 A candidate may be based at QUT or at a place of employment or sponsoring institution. Normally, support of the sponsoring institution for the candidate's application is required for registration. A candidate may also be external where their residence is outside of Brisbane.

2.12 The Faculty Research Committee may cancel a candidate's registration if, after consulting a candidate's supervisor and having taken account of all relevant circumstances, the committee is of the opinion that the candidate either has effectively discontinued their studies or has no reasonable expectation of completing the course of study within the maximum time allowed (see Section 4).

2.13 A candidate whose registration has lapsed or has been cancelled, and who wishes subsequently to re-enter the course of study to pursue a research program which is substantially the same as the previous investigation may be re-admitted under such conditions as the Faculty Research Committee shall prescribe.

3 - Course of Study

3.1 A candidate for the degree of Master of Applied Science (Research) or Master of Engineering will undertake a program of research and investigation on a topic approved by the Faculty Research Committee.

3.2 All projects should be supported by outside agencies such as industry, government authorities and professional organisations, or by QUT itself. This provision is to ensure that programs are relevant to the aims of the University and the community. It is important that projects be primarily directed towards society or industry need.

3.3 The program must be such as to enable the candidate to develop and demonstrate a level of scientific competence significantly higher than that expected of a first degree graduate. The required competence normally would include mastery of relevant techniques, investigatory skills, critical thinking, and a high level of knowledge in the specialist area.

3.4 Where advised, a candidate may be required to complete satisfactorily a program of formal coursework in subjects relevant to the field of study up to a total class contact of 32 credit points.
3.5 The course of study normally will include:
- participation in University scholarly activities such as research seminars, teaching and publication
- regular face-to-face interactions with supervisors, and
- a program of supervised research, design, investigation, development, construction, or any combination thereof.

The course of study may also include a program of assessed coursework.

3.6 Coursework at masters level demands a capacity for critical analysis and a specialisation of research interests not normally appropriate for an undergraduate program. Such coursework may be conducted in a number of ways:
- as advanced lecture courses
- as seminars in which faculty and candidates present critical studies of selected problems within the subject field
- as independent study or reading courses, or
- as research projects conducted under faculty supervision.

Candidates will be encouraged to attend conferences where these are related to the field of the research.

In all cases, coursework will be based upon a formal syllabus setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed reading material and the method of assessment of progress through and at the end of the course.

3.7 Maximum and Minimum Coursework Requirements:
- Thesis - 96 credit points minimum (at least two-thirds of the degree content)
- Maximum coursework requirement - 32 credit points
- Minimum coursework requirement - 4 credit points
- IFN001 Advanced Information Retrieval Skills
- Maximum of 16 credit points per semester for each semester of the program

Additional Requirements:
- Attendance and participation in School of Research Centre seminars/workshops (compulsory).
- Students must contact the Postgraduate Research Coordinator in their School to finalise any other coursework component of their program.

4 - Period of Time for Completion of Course of Study

4.1 The duration of study will normally be a minimum of one year and a maximum of two years or the part-time equivalent.

4.2 In order to encourage completion of research degrees within a reasonable timeframe, QUT has set a limit of two years on the length of time for which it will fund a faculty for full-time research masters degree candidates.

4.3 A registered full-time graduate student shall present the thesis for examination after a period of at least one year but not more than two years has elapsed from the time of confirmed registration. A registered part-time graduate student shall present the thesis for examination after a period of at least two years. The maximum time is four years from the time of confirmed registration. In special cases the Faculty Research Committee may approve a shorter period.

4.4 Time limits are measured in years from the time of first registration as a graduate student. Periods of exclusion or absence without approval are included.

4.5 Candidates who exceed these limits may be asked to show cause why they should not have their registration in the program terminated. Such candidates must make formal application to the Faculty Research Committee to have their registration extended beyond the normal time. Details of the candidate's progress shall be presented to the committee together with the reasons for the delay in completing the course and the expected date of completion. Where the committee agrees to an extension, a time limit will be set for the maximum period of registration in the program.

4.6 Candidates are notified of termination by registered mail. They have right of appeal to the Academic Appeals Committee.

5 - Supervision

5.1 The Faculty Research Committee shall appoint at least one supervisor the principal supervisor and also at least one associate supervisor. Each member of the supervisory panel shall bring appropriate experience in the research area of the student.

5.2 The Principal Supervisor shall normally be from the academic staff of the QUT school in which the candidate is enrolled.

5.3 The Supervisory Panel shall supervise all aspects of the candidate's work program, shall receive reports from the candidate on progress and shall recommend to the Faculty Research Committee both on successful and unsuccessful completion of components of the coursework incorporated in the candidate's program, on progress on the thesis research project and on continued enrolment.

5.4 The Supervisory Panel shall receive a formal oral and written report from the candidate at least once every semester on progress on the research project.

5.5 Summary of Faculty Supervisory registration process:
- To ensure that students receive appropriate supervision from experienced supervisors and active researchers the Faculty has introduced a Supervisors Register which requires registered supervisors to demonstrate performance in three areas.
  1. Practice - previous supervisory experience of at least five years.
  2. Research - evidence of active research through grants and publications
  3. Continuous development

6 - Place and Conditions of Work

6.1 The research program will normally be carried out under supervision in a suitable environment within Brisbane. However, external study is possible. External candidates will be required to spend a minimum of four weeks at QUT annually.

6.2 The Faculty Research Committee shall not admit a candidate to a program of research based at the University unless it has received:
- a supporting statement from the Head of the QUT School and/or Postgraduate Research Coordinator in the School in which the study is proposed indicating that, in their opinion, the applicant is a suitable person to undertake a research program leading to the masters degree, that the program is supported, that the school is willing to undertake the responsibility of supervising the work of the applicant and that resources are available to support the proposed research.

6.3 The Faculty Research Committee shall not admit a candidate to a program of research based at a sponsoring establishment unless it has received:
- a supporting statement from the employer or director of the sponsoring institution that they are aware of the course rules and are prepared to sponsor and support the applicant, that the applicant will be provided with facilities and time to undertake the research project and that they are willing to accept responsibility for supervising the applicant's work,
• a supporting statement from the head of the QUT school or Postgraduate Research coordinator in which the study is proposed indicating that, in their opinion, the applicant is a suitable person to undertake a research program leading to the Masters degree, that the program is supported, and that after examination of the proposed external facilities and supervision, the school is willing to accept the responsibility of supervising the work.

7 - Thesis

7.1 In the form of presentation, availability and copyright, the thesis shall comply with all the requirements of the document Requirements for Presenting Theses (Appendix 51 in the Manual of Policies and Procedures).

7.2 A candidate shall submit the title of their thesis for approval by the Faculty Research Committee with their application, and after approval has been granted, no change will be made except with the permission of the committee.

7.3 The candidate shall give two months' written notice of intention to submit their thesis through the Principal Supervisor.

7.4 The thesis shall comply with the following requirements:

• a significant proportion of the work described (as determined by the Faculty Research Committee) must have been carried out subsequent to initial registration for the Masters degree.

• it must describe a program of work carried out by the candidate and must involve either an advanced contribution to the knowledge of the subject or an advanced application of existing knowledge.

• it must reach a satisfactory standard of literary presentation.

• it shall be the candidate's own account of the work. Where work is carried out conjointly with other persons, the Faculty Research Committee shall be advised of the extent of the candidate's contribution to the joint work.

• the thesis shall not contain as its main content any work or material which the candidate has previously submitted for another degree or similar award.

• the thesis may consist primarily of reports, plans and/or documents or may be supported by these if they have a bearing on the subject of the thesis. Other supporting documents such as published papers may also be submitted with the thesis.

• the thesis shall contain an abstract of not more than 300 words.

7.5 Except with the specific permission of the Faculty Research Committee, the thesis must be presented in the English language. Such permission must be sought at the time of application for registration, and will not be granted solely on the grounds that the candidate's ability to satisfy the examiners will be affected adversely by the requirement to present the thesis in English.

7.6 Subject to QUT's Intellectual Property policy, the copyright of the thesis is vested in the candidate.

7.7 Where a candidate, supervisor or the sponsoring establishment wishes the thesis to remain confidential for a period of time after completion of the work, application for approval must be made to the Faculty Research Committee when the thesis is submitted. The period normally shall not exceed two years from the date on which the examiners recommend acceptance of the thesis, during which time the thesis will be held on restricted access in the QUT Library.

7.8 Except where confidentiality of the thesis is necessary, students shall submit their thesis electronically after completion of the examination process and any corrections required to the QUT Library for inclusion in the Australian Digital Thesis Project.
PSP452 Urban Design Studio A  
**Summer Program**

**Summer Program**  
ARB083 Urban Design Masters Studio  

### Master of Engineering BN72  

**Award title:** Master of Engineering  
**CRICOS code:** 003465J  
**Campus:** Gardens Point  
**Duration:** 1 year (minimum), 2 years (maximum) full-time or 2 years (minimum), 4 years (maximum) part-time  

### Master of Engineering Management ME76  

**Award title:** Master of Engineering Management  
**CRICOS code:** 006368G  
**Campus:** Gardens Point  
**Duration:** 1 year full-time or 2 years part-time  
**Credit points:** 96 (full-time standard semester: 48)  
**Course coordinator:** Dr Gopi Chattopadhyay  

**Course Structure**  
Masters students take eight units or 96 credit points. Units MEN172, MEN177, and MEN280 are normally compulsory, but may be substituted with the approval of the course coordinator if the student has adequate prior knowledge in the relevant field. With approval of the Course Coordinator students can take up to two graduate level electives from other disciplines.  

**Block Mode**  
MEN177 Total Quality Management  
MEN171 Advanced Manufacturing Technologies  
MEN241 Reliability and Maintenance Management  
MEN280 Engineering Project Management  
MEN273 Engineering Knowledge Management  
MEN172 Cost Analysis and Asset Management  
MEN175 Energy and Environmental Management  
MEN170 Systems Modelling and Simulation  
MEN272 Enterprise Resource Planning  
Up to two graduate level units from any School within the University*  

**Semester 1 or 2**  
MEN190-1 Project  
MEN190-2 Project  
Project may be taken over one or two semesters. Students taking Project over one semester must enrol in both components of the unit concurrently. Course coordinator approval is required to take Project.  

*Block Mode*  
Block mode classes are held in teaching periods, which run consecutively for 5 weeks at a time, instead of semesters. Classes are held on Tuesday and Thursday from 4pm to 8pm, and Saturday from 9am to 5pm in the first two weeks of a teaching period. Please check QUT Virtual or contact the School Administration Officer for details of teaching periods for the above block mode units.  

**Note:**  
Students complete 8 units. Units MEN172, MEN177 and MEN280 are normally compulsory, but may be substituted with the approval of the course coordinator if the student has adequate prior knowledge in the relevant field.  

* Permission of the course coordinator required.  

### Master of Engineering Science (Civil Engineering) CE74  

**Award title:** Master of Engineering Science (Civil)  
**CRICOS code:** 020300M  
**Campus:** Gardens Point  
**Duration:** 1 year full-time or 2 years part-time  
**Credit points:** 96 (part-time standard semester: 24)  
**Course coordinator:** Mr Yin Foong  

**Course Structure**  
The course consists of units and a thesis project totalling 96 credit points. 24 credit points allocated to a project and the remainder to the non project units. The majority of the units are common with the Graduate Diploma in Civil Engineering (CE64). Students who do not wish to undertake the Environmental major must complete the generic core units plus any combination of elective units as listed below, to make up the minimum total of 96 credit points. Such programs should be devised in consultation with the course coordinator.  

**Course structure (full-time)**  

#### Environmental Engineering Major  

**Semester 1**  
CEP291 Environmental Law and Assessment  
CEP997-1 Project B  
2 Electives  

**Semester 2**  
CEP141 Studies in Environmental Engineering  
CEP997-2 Project B  
2 Electives  
Core Units  

**Semester 1**  
CEP201 Process Modelling  
CEP997-1 Project B  
2 Electives  

**Semester 2**  
CEP295 Civil Engineering Management in a Project Environment  
CEP997-2 Project B  
2 Electives  

**Electives**  

**Semester 1**  
CEP142 Water Pollution Control  
CEP161 Professional Development Studies 1  
CEP201 Process Modelling  
CEP218 Transportation Engineering  
CEP291 Environmental Law and Assessment  
CEP293 Pavement Design  
CEP294 Engineering Contract Development and Administration  

**Semester 2**  
CEP141 Studies in Environmental Engineering  
CEP161 Professional Development Studies 1  
CEP262 Professional Development Studies 2
CEP295 Civil Engineering Management in a Project Environment

Note:
Advice must be sought from the Course Coordinator before enrolling in either CEP161 or CEP262. The School reserves the right to offer the units according to enrolment quotas and staff availability. With permission of the Course Coordinator students may be permitted to take electives from other engineering areas.

- Master of Engineering Science (Computer and Communications Engineering) EE74

Award title: Master of Engineering Science (Computer Engineering) or Master of Engineering Science (Communication Engineering)
CRICOS code: 040343A
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48)
Course coordinator: Dr John Edwards

Masters Upgrade Program
Those who have completed the Graduate Diploma in Computer and Communications Engineering (EE67) may upgrade by undertaking further study in the Master of Engineering Science (Computer & Communications Engineering) and be given credit for the units which they have completed at Graduate Diploma level. The structure of the course dictates that this upgrade program be undertaken on a part-time basis.

Students undertaking the Masters Upgrade Program will enrol in the following units:
EEP301/1 Project
EEP301/2 Project.

Course Structure
Masters students select either a total of six units from Semester 1 and Semester 2 lists and complete a 24 credit point project (EEP301, or seven units plus EEP304 Project Component.

Semester 1
EEP101 Algorithms for Control and Engineering
EEP102 Unix and C for Engineers
EEP103 Computer Hardware and Interfacing
EEP124 Data Communications
EEP126 Communications Digital Signal Processing
EEP301-1 Project
Elective unit 1

Semester 2
EEP104 Real-Time Operating Systems
EEP120 Networks and Distributed Computing
EEP123 Process Control and Robotics
EEP129 Image Processing and Computer Vision
EEP135 Digital Signal Processing and Applications
EEP301-2 Project
or
EEP304 Project Component
Elective unit 2

Elective Units
EEB911 Electrical Energy Systems
EEB941 Modern Signal Processing
EEB960 Wireless Communications
EEB961 RF and Applied Electromagnetics
EEB976 Advanced Industrial Electronics
EEB992 VLSI Circuits and Systems
EEP127 Advanced Topic B

Note:
At the discretion of the course coordinator, students may be allowed to select an elective from any advanced topics offered by the University.

- Master of Engineering Science (Electrical Engineering Studies) EE77

Award title: Master of Engineering Science (Electrical Engineering Studies)
CRICOS code: 042260K
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96
Course coordinator: Dr John Edwards

Full-time Course Structure

Band 1 Units
Choose 3 units from the following Band 1 units. Most of these units are offered once a year (either in Semester 1 or Semester 2). Students are advised to check the unit availability prior to enrolling.

Semester 1
CEP291 Environmental Law and Assessment
CEP201 Process Modelling
EEP101 Algorithms for Control and Engineering
EEP102 Unix and C for Engineers
EEP103 Computer Hardware and Interfacing
MEN101 Research Methodology
MEN172 Cost Analysis and Asset Management
MEN280 Engineering Project Management

Semester 2
CEP141 Studies in Environmental Engineering
CEP295 Civil Engineering Management in a Project Environment
EEP129 Image Processing and Computer Vision
MEN101 Research Methodology
MEN170 Systems Modelling and Simulation

Band 2 Units
Choose 3 units from the range of Band 2 units. The following units are offered in EE61/66/76, and may be cancelled due to insufficient enrolment numbers. Students are advised to check the unit availability prior to enrolling.

Semester 1
EEP101 Algorithms for Control and Engineering
EEP102 Unix and C for Engineers
EEP103 Computer Hardware and Interfacing
EEP124 Data Communications
EEP126 Communications Digital Signal Processing
EEP127 Advanced Topic B

Semester 2
EEP104 Real-Time Operating Systems
EEP120 Networks and Distributed Computing
EEP123 Process Control and Robotics
EEP129 Image Processing and Computer Vision
EEP135 Digital Signal Processing and Applications

Band 3 Units
Students must complete their 24 cp project over one or two semesters by enrolling in the following two 12 cp project units
EEP301-1 Project
EEP301-2 Project

Elective Units
EEB911 Electrical Energy Systems
EEB941 Modern Signal Processing
EEB960 Wireless Communications
EEB961 RF and Applied Electromagnetics
EEB976 Advanced Industrial Electronics
EEB992 VLSI Circuits and Systems
EEP127 Advanced Topic B

Note:
At the discretion of the course coordinator, students may be allowed to select an elective from any advanced topics offered by the University. The School reserves the right to offer the units according to enrolment quotas and staff availability.

- Master of Engineering Science (Mechanical Engineering Studies) ME80

Award title: Master of Engineering Science (Mechanical Engineering Studies)
CRICOS code: 042261J
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96
Course coordinator: Dr Gopi Chattopadhyay

Course Structure
The flexible Master of Engineering Science (Mechanical Engineering Studies) program allows students to choose 3 units from a common pool of units offered by all the Engineering Schools (Band 1). A band of Mechanical Engineering units is then offered from which students choose 3 (Band 2). Any units from Band 1 could also be chosen for Band 2 provided that they come from the School of Mechanical, Manufacturing and Medical Engineering. Mechanical Engineering Specialised units allow students to undertake study in the areas of Medical Engineering, Information Engineering, Management and general mechanical engineering, such as tribology, maintenance, manufacturing etc. Band 3 requires enrolment in a Mechanical Engineering Project (equivalent to 24 credit points).

Full-time Course Structure
Band 1 Units
Choose 3 units from the following Band 1 units.

Semester 1
CEP291 Environmental Law and Administration
CEP294 Engineering Contract Development and Administration
EEP101 Algorithms for Control and Engineering
EEP102 Unix and C for Engineers
EEP103 Computer Hardware and Interfacing
MEN101 Research Methodology

Semester 2
CEP141 Studies in Environmental Engineering
CEP201 Process Modelling
CEP295 Civil Engineering Management in a Project Environment
EEP129 Image Processing and Computer Vision
MEN102 Advanced Mechanical Engineering Studies

Block Mode#
MEN170 Systems Modelling and Simulation
MEN172 Cost Analysis and Asset Management
MEN280 Engineering Project Management

#Block mode classes are held in teaching periods, which run consecutively for 5 weeks at a time, instead of semesters. Classes are held on Tuesday and Thursday from 4pm to 8pm, and Saturday from 9am to 5pm in the first two weeks of a teaching period. Please check QUT Virtual or the School Administration Officer for details of teaching periods for the above block mode units.

Band 2 Units
3 units are to be chosen from the range of Band 2 units.

Block Mode#
MEN171 Advanced Manufacturing Technologies
MEN175 Energy and Environmental Management
MEN177 Total Quality Management
MEN241 Reliability and Maintenance Management
MEN272 Enterprise Resource Planning
MEN273 Engineering Knowledge Management

#For block mode classes see above.

Semester 1, 2 or 3
MEN103 Mechanical Engineering Specialised Unit 1
MEN104 Mechanical Engineering Specialised Unit 2
MEN105 Mechanical Engineering Specialised Unit 3

Students must consult with the course coordinator before enrolling in MEN103, 104 or 105.

Band 3 Project
Project must normally be taken but may be substituted with the approval of the course coordinator for two additional Band 2 units

Semester 1 or 2
MEN190-1 Project
MEN190-2 Project

Note:
Unit MEN177 Total Quality Management, MEN101 Research Methodology and MEN102 Advanced Mechanical Engineering Studies must normally be taken, but may be substituted with the approval of the course coordinator if the student has adequate prior knowledge in the relevant field.

- Master of Engineering Science (Mechanical Engineering Studies) ME81

Award title: Master of Engineering Science (Mechanical Engineering Studies)
CRICOS code: Not required
Campus: Singapore
Duration: 1 Year full-time or 2 Years part-time
Credit points: 96 (full-time standard semester: 48)
Course coordinator: Professor Prasad Yarlagadda

Course structure
Semester 1
MEZ101* Research Methodology
MEZ190-1* Project

Choose 1 unit from the following:
MEZ102** Mechanical Engineering Specialised Studies 5
MEZ103** Mechanical Engineering Specialised Studies 4
MEZ104** Mechanical Engineering Specialised Studies 2
MEZ105** Mechanical Engineering Specialised Studies 3

Semester 2
Choose 2 units from the following:
MEZ102** Mechanical Engineering Specialised Studies 5
MEZ103** Mechanical Engineering Specialised Studies 4
MEZ104** Mechanical Engineering Specialised Studies 2
MEZ105** Mechanical Engineering Specialised Studies 3

Choose 2 units from the following:
MEZ190-2** Project
MEN280 Engineering Project Management
MEN177 Total Quality Management
MEN273 Engineering Knowledge Management

Block mode classes are held in teaching periods instead of semesters, e.g. 6TP1, which runs for 6 weeks at a time.
**Master of Landscape Architecture PS71**

**Award title:** Master of Landscape Architecture  
**CRICOS code:** 020301K  
**Campus:** Gardens Point  
**Duration:** 1 year plus 1 year part-time Built Environment (Landscape Architecture) graduates or equivalent; 2 years plus 1 year part-time (Other graduates) full-time or 3 years Built Environment (Landscape Architecture); 5 years (Other graduates) part-time  
**Credit points:** 228 (excluding any Masters qualifying units)  
**Course coordinator:** Associate Professor Glenn Thomas

**Professional Recognition**
Professional accreditation for the course has been granted by the Australian Institute of Landscape Architects.

**Course Structure**

**Foundation Level Studies**

**Year 1, Semester 1**
(Entry for graduates of 3-year degree other than the Bachelor of Built Environment - Landscape Architecture)
- DLB130 Introducing Landscape Design
- PSB434 Landscape Construction A (L'scape Only)
- PSP263 Landscape Ecology
- PSP264 Spatial Design Theory

**Year 1, Semester 2**
- PSB444 Plant Studies (L'scape Only)
- PSP268 Site Planning
- DEB201 Digital Design Communication

**Year 2, Semester 1**
- PSP263 Landscape Ecology
- PSP264 Spatial Design Theory

**Year 2, Semester 2**
- PSB442 Plant Studies (L'scape Only)
- PSP268 Site Planning

**Professional Level Studies**

**Year 3, Semester 1**
(Entry for Bachelor of Built Environment - Landscape Architecture graduates)
- PSP269 Advanced Construction and Practice 1
- PSP270 Elective
- PSP271 Advanced Landscape Design 1

**Year 2, Semester 2**
- PSP272 Advanced Construction and Practice 2
- PSP273 Landscape Planning
- PSP274 Advanced Landscape Design 2

**Masters Level Studies**

**Year 3, Semester 1**
- PSN211 Research Project 1
- PSN213 Specialisation

**Year 3, Semester 2**
- PSN212 Research Project 2
- PSN213 Specialisation

**Year 4, Semester 1**
- PSN211 Research Project 1
- PSN213 Specialisation

**Year 4, Semester 2**
- PSN212 Research Project 2
- PSN213 Specialisation

**Masters Level Studies**

**Year 5 - Semester 1**
- PSN211 Research Project 1
- PSN213 Specialisation

**Year 5 - Semester 2**
- PSN211 Research Project 1
- PSN213 Specialisation

*Note:* This course structure is under review and subject to University approval.

**Part-Time Course Structure** [NOT AVAILABLE TO INTERNATIONAL STUDENTS]

**Foundation Level Studies**

**Year 1, Semester 1**
(Entry for graduates of 3-year degree or diploma other than the Bachelor of Built Environment - Landscape Architecture)
- DLB130 Introducing Landscape Design
- PSB434 Landscape Construction A (L'scape Only)

**Year 1, Semester 2**
- PSB444 Landscape Construction B (L'scape Only)
- DEB201 Digital Design Communication

**Year 2, Semester 2**
- Elective approved by course coordinator. (program to be agreed with Course Coordinator to suit existing qualifications)

**Professional Level Studies**

**Year 3, Semester 1**
(Entry for Bachelor of Built Environment - Landscape Architecture graduates)
- PSP269 Advanced Construction and Practice 1
- PSP270 Elective

**Year 3, Semester 2**
- PSP272 Advanced Construction and Practice 2
- PSP273 Landscape Planning

**Year 4, Semester 1**
- PSP271 Advanced Landscape Design 1

**Year 4, Semester 2**
- PSP274 Advanced Landscape Design 2

*Note:* This course structure is under review and subject to University approval.

**Master of Project Management CN77**

**Award title:** Master of Project Management  
**CRICOS code:** 016350B  
**Campus:** Gardens Point  
**Duration:** 1.5 years full-time or 3 years part-time  
**Credit points:** 144 (full-time standard semester: 48)  
**Course coordinator:** Professor Martin Skitmore

**Course Structure Information**
The first two semesters full-time or four semesters part-time are identical to the Graduate Diploma in Project Management (CN64). Persons admitted to the Masters program who are graduates of the Graduate Diploma in Project Management (CN64) will need to submit an Application for Academic Credit form for the units they have already completed. At the completion of the coursework component of the Masters Degree program but before the completion of the Dissertation, students may elect to exit with the Graduate Diploma in Project Management.

**Course structure**

**Full-time Course Structure**

**Year 1, Semester 1**
- CNP520 Project Management
- CNP521 Project Cost and Risk Management
- CNP532 Innovation and Technology Management
- CNP551 Project Human Resource Management

**Year 1, Semester 2**
- CNP534 International Project Management
- CNP533 Project Management Law
- Two Electives

**Year 2, Semester 1**
- CNN442-1 Dissertation
- CNN442-2 Dissertation

Includes Research Methodology lectures and incorporates Advanced Information Retrieval Skills

**Part-time Course Structure**

**Year 1, Semester 1**
- CNP520 Project Management
- CNP521 Project Cost and Risk Management

**Year 1, Semester 2**
- CNP533 Project Management Law
- CNP534 International Project Management

**Year 2, Semester 1**
- CNP532 Innovation and Technology Management
- CNP551 Project Human Resource Management

**Year 2, Semester 2**
- Two Electives

**Year 3, Semester 1**
- CNN442-1 Dissertation

**Year 3, Semester 2**
- CNN442-2 Dissertation

**Master of Property Economics CN92**

**Award title:** Master of Property Economics  
**CRICOS code:** 036432A  
**Campus:** Gardens Point  
**Duration:** 1.5 years full-time or 3 years part-time  
**Credit points:** 144 (full-time standard semester: 48)  
**Course coordinator:** Mr Gary Garner

**Additional Information**

The first two semesters full-time or four semesters part-time are identical to the Graduate Diploma in Property Economics (CN91). Persons admitted to the Masters program who are graduates of the Graduate Diploma in Property Economics (CN91) will need to submit an Application for Academic Credit form for the units they have already completed.

At the completion of the coursework component of the Masters Degree program but before the completion of the Dissertation, students may elect to exit with the Graduate Diploma in Property Economics.

**Majors**

While the course provides an overview of property as an asset, there are majors in Property Investment and Management and Property Development. There are several common units across the majors however applicants are required to select one major.

**Course Structure**

Variations to the recommended study program require prior approval from the course coordinator.

**Full-time Course Structure - Property Development Major**

**Year 1, Semester 1**
- CNP520 Project Management
- CNP521 Project Cost and Risk Management
- CNP547 Property Investment
- CNP555 Property Market Analysis

**Year 1, Semester 2**
- CNP545 Project Development
- CNP554 Advanced Land Development
- Two Electives

**Year 2, Semester 1**
- CNN442-1 Dissertation
- CNN442-2 Dissertation

**Full-time Course Structure - Property Investment and Management Major**

**Year 1, Semester 1**
- CNP547 Property Investment
- CNP555 Property Market Analysis
- CNP556 Property Management and Contracts
- EFN406 Managerial Finance

**Year 1, Semester 2**
- CNP554 Advanced Land Development
- CNP557 Property Finance and Capital Markets
- Two Electives

**Year 2, Semester 1**
- CNN442-1 Dissertation
- CNN442-2 Dissertation

**Part-time Course Structure - Property Development Major**

**Year 1, Semester 1**
- CNP547 Property Investment
- CNP555 Property Market Analysis

**Year 1, Semester 2**
- CNP545 Project Development
- CNP554 Advanced Land Development

**Year 2, Semester 1**
- CNP520 Project Management
- CNP521 Project Cost and Risk Management

**Part-time Course Structure - Property Investment and Management Major**

**Year 1, Semester 1**
- CNP547 Property Investment
- CNP555 Property Market Analysis

**Year 1, Semester 2**
- CNP554 Advanced Land Development
- CNP557 Property Finance and Capital Markets

**Year 2, Semester 1**
- CNP556 Property Management and Contracts
- EFN406 Managerial Finance
Master of Urban and Regional Planning

PS70

Award title: Master of Urban and Regional Planning
CRICOS code: 020299K
Campus: Gardens Point
Duration: 1.5 years for Bachelor of Built Environment graduates; 2 years for other graduates full-time or 75% progression; 3 years for Bachelor of Built Environment graduates; 4 years for other graduates part-time
Credit points: 216
Course coordinator: Assoc Prof Phil Heywood

Professional recognition
This course is professionally accredited by the Planning Institute of Australia

Full-Time Course Structure

Structure for non BBE graduates

Year 1, Summer Program
DBP403 Design Communication
DBP406 Computer Applications in Planning
Note: DBP403 is a full-fee paying foundation unit for student from a non-design background.

Year 1, Semester 1
DBP401 Urban Design and Site Analysis
DBP402 Planning Processes

Year 1, Semester 2
DBP404 Economic and Social Foundations of Planning
DBP408 Planning Implementation and Law

Year 2, Semester 1
DBP409 Urban Planning Practice
DBP410 Research Methods in Planning

Year 1, Semester 2
DBP407 Environmental Planning and Management
DBP411 Community Planning
DBP412 Planning Theory and Ethics

Year 2, Semester 2
DBP413 Regional Planning Practice
DBP414 Regional and Metropolitan Policy

Year 2, Semester 1
DBP415 Professional Practice or Research Project
DBP416 Elective
DBP501 Specialisation
DBP502 Professional Practice or Research Dissertation

Part-Time Course Structure - 50% Progression Rate

Structure for non BBE graduates

Year 1, Summer Program
DBP403 Design Communication
DBP406 Computer Applications in Planning
Note: DBP403 is a full-fee paying foundation unit for student from a non-design background.

Year 1, Semester 1
DBP401 Urban Design and Site Analysis
DBP402 Planning Processes

Year 2, Semester 1
DBP407 Environmental Planning and Management
DBP411 Community Planning
DBP412 Planning Theory and Ethics

Year 2, Semester 2
DBP415 Professional Practice or Research Project
DBP417 Comparative Planning
Note: DBP417 can be undertaken any time during the course.

Year 3, Semester 1
DBP501 Specialisation
DBP502 Professional Practice or Research Dissertation

Year 4, Semester 1
DBP503 Masters Seminar
Structure for BBE graduates

Year 1, Semester 1
DBP409 Urban Planning Practice
DBP411 Community Planning
DBP412 Planning Theory and Ethics

Year 2, Semester 1
DBP413 Regional Planning Practice
DBP414 Regional and Metropolitan Policy
DBP415 Professional Practice or Research Project
DBP416 Elective
DBP501 Specialisation
DBP502 Professional Practice or Research Dissertation

Year 3, Semester 2
DBP503 Masters Seminar
Note: The Masters unit may be taken in Semester 4 by those students wishing to undertake 36 credit points in that semester in order to complete the Master Course in 5 semesters.

Course Structure - 75% Progression Rate

Structure for non BBE graduates

Year 1, Summer Program
DBP403 Design Communication
DBP406 Computer Applications in Planning  
Note: DBP403 is a full-fee paying foundation unit for students from a non-design background.

DBP417 Comparative Planning  
Note: DBP417 can be taken anytime during the course.  
DBP503 Masters Seminar  

**Year 3, Semester 1**  
DBP410 Research Methods in Planning  

**Year 3, Semester 2**  
DBP414 Economic and Social Foundations of Planning  
DBP408 Planning Implementation and Law  

---

**Graduate Diploma in Civil Engineering CE64**

**Award title:** Graduate Diploma in Civil Engineering  
**CRICOS code:** 036430C  
**Campus:** Gardens Point  
**Duration:** 1 year full-time or 2 years part-time  
**Credit points:** 96 (full-time standard semester: 48)  
**Course coordinator:** Mr Yin Foong  

**Course structure**

**Environmental Engineering Major**

**Semester 1**  
CEP291 Environmental Law and Assessment  
3 Electives from the list below

**Semester 2**  
CEP141 Studies in Environmental Engineering  
3 Electives from the list below

**Core Units**

**Semester 1**  
CEP201  
3 Electives from the list below

**Semester 2**  
CEP295  
3 Electives from the list below

---

**Electives from the list below**

**Electives - Semester 1**
- CEP142 Water Pollution Control  
- CEP161 Professional Development Studies 1  
- CEP201 Process Modelling  
- CEP218 Transportation Engineering  
- CEP291 Environmental Law and Assessment  
- CEP293 Pavement Design  
- CEP294 Engineering Contract Development and Administration  

**Electives - Semester 2**
- CEP141 Studies in Environmental Engineering  
- CEP161 Professional Development Studies 2  
- CEP262 Professional Development Studies 2  
- CEP295 Civil Engineering Management in a Project Environment  

**Note:** Advice must be sought from the course coordinator before enrolling in either CEP161 or CEP262. The School reserves the right to offer the units according to enrolment quotas and staff availability. With the approval of the course coordinator, students may be permitted to take units from other engineering areas.

---

**Graduate Diploma in Computer and Communications Engineering EE67**

**Award title:** Graduate Diploma in Computer and Communications Engineering  
**CRICOS code:** 015184G  
**Campus:** Gardens Point  
**Duration:** 1 year full-time or 2 years part-time  
**Credit points:** 96 (full-time standard semester: 48)  
**Course coordinator:** Dr John Edwards  

**Course structure**

Graduate Diploma students select a total of eight units from Semester 1 and Semester 2 lists.

**Course structure**

**Semester 1**
- EEP101 Algorithms for Control and Engineering  
- EEP102 Unix and C for Engineers  
- EEP103 Computer Hardware and Interfacing  
- EEP124 Data Communications  
- EEP126 Communications Digital Signal Processing  
- Elective unit 1

**Semester 2**
- EEP104 Real-Time Operating Systems  
- EEP120 Networks and Distributed Computing  
- EEP123 Process Control and Robotics  
- EEP129 Image Processing and Computer Vision  
- EEP135 Digital Signal Processing and Applications  
- Elective unit 2

**Elective Units**
- EEB911 Electrical Energy Systems  
- EEB941 Modern Signal Processing  
- EEB960 Wireless Communications  
- EEB961 RF and Applied Electromagnetics  
- EEB976 Advanced Industrial Electronics  
- EEB992 VLSI Circuits and Systems  
- EEP127 Advanced Topic B  

**Note:** Graduate Diploma students complete 8 units from Semester 1 and 2 lists. At the discretion of the course coordinator, students maybe allowed to select an elective from any advanced topics offered by the University.
Graduate Diploma in Geographic Information Systems PS78

Award title: Graduate Diploma in Geographic Information Systems
CRICOS code: 040337K
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96
Course coordinator: Dr John Hayes

Please note:
The School reserves the right to offer this course according to enrolment quotas and staff availability

Full-time course structure
Year 1, Semester 1
- PSB631 Geographic Information Systems 1
- PSB655 Remote Sensing
Two Electives*

Year 1, Semester 2
- PSB654 Topics in Spatial Information Science
- PSN213 Specialisation
Two Electives*

Electives* (subject to availability)
Please consult with the Course Coordinator before finalising your enrolment.
Please refer to the electives list.

Part-Time course structure
Year 1, Semester 1
- PSB631 Geographic Information Systems 1
- 1 Elective*

Year 1, Semester 2
- PSB654 Topics in Spatial Information Science
- 1 Elective*

Year 2, Semester 1
- PSB655 Remote Sensing
- 1 Elective*

Year 2, Semester 2
- PSN213 Specialisation
- 1 Elective*

Please consult with the Course Coordinator before finalising your enrolment.
Please refer to the electives list.

Electives* (Subject to availability)
Semester 1
- BNB011 Fundamentals of Synthetic Environments
- DBP401 Urban Design and Site Analysis
- DBP402 Planning Processes
- DBP407 Environmental Planning and Management
- PSB612 Spatial and Land Information Management
- PSB630 Cartography and Digital Mapping
- PSB633 Map Production: Principles and Practice
- PSB644 Advanced Geodesy
- PSP311 Professional Practice Management

Semester 2
- BNB011 Fundamentals of Synthetic Environments
- PSB632 Photogrammetry
- PSB643 Geodesy
- PSP268 Site Planning
- PSP273 Landscape Planning

Notes:
Please consult with the course coordinator before finalising your enrolment.
Full-time students are required to enrol in 48 credit points per semester. This includes two core units and two electives per semester (from the list above or from other undergraduate and postgraduate units).
Part-time students are required to enrol in 24 credit points per semester. Select one core unit and any other unit from the electives listed, or from other undergraduate and postgraduate units.

Please note: Electives are subject to availability
The following units and semesters of offer are only available to postgraduate students subject to discussion with the course coordinator:
 Semester 1:
- PSB633 Map Production: Principles & Practice
- PSB644 Advanced Geodesy

Semester 2:
- PSB643 Geodesy
- PSB654 Topics in Spatial Information Science

Graduate Diploma in Industrial Design AR61

Award title: Graduate Diploma in Industrial Design
CRICOS code: 003479C
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48)
Course coordinator: Mr Andrew Scott

Professional Recognition
The Graduate Diploma in Industrial Design has been recognised by the Design Institute of Australia (DIA). Graduates are eligible for associate membership. The QUT program is an educational member of the International Council of the Society of Industrial Design (ICSID).

Full-time course structure
Semester 1
- ADP207 Industrial Design 5
- ADP267 Industrial Design Research 1
- ADP217 Professional Practice and Management
- ADP247 Advanced Computer Aided Industrial Design

Semester 2
- ADP218 Advanced Ergonomics
- ADP268 Industrial Design Research 2A
- ADP269 Industrial Design Research 2B
- ADP943 Elective 3

Part-time course structure
Year 1, Semester 1
- ADP207 Industrial Design 5
- ADP247 Advanced Computer Aided Industrial Design

Year 1, Semester 2
- ADP218 Advanced Ergonomics
- ADP943 Elective 3

Year 2, Semester 1
- ADP267 Industrial Design Research 1
- ADP217 Professional Practice and Management

Year 2, Semester 2
- ADP268 Industrial Design Research 2A
- ADP269 Industrial Design Research 2B

Graduate Diploma in Interior Design AR62

Award title: Graduate Diploma in Interior Design
CRICOS code: 006361D
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48)
Course coordinator: Dr Dianne Smith

Professional Recognition
The Graduate Diploma in Interior Design is recognised by the Design Institute of Australia (DIA).

Course Structure

Full-time Course Structure

Semester 1
- ADP107 Interior Design 7
- ADP114 Professional Studies 1
- ADP161 Interior Research 1
- ADP155 Interior as a Construct 1

Semester 2
- ADP108 Interior Design 8
- ADP156 Interior as a Construct 2
- ADP162 Interior Research 2
- ADP932 Professional Studies 2

Part-time Course Structure

Year 1, Semester 1
- ADP114 Professional Studies 1
- ADP155 Interior as a Construct 1

Year 1, Semester 2
- ADP932 Professional Studies 2
- ADP156 Interior as a Construct 2

Year 2, Semester 1
- ADP107 Interior Design 7
- ADP161 Interior Research 1

Year 2, Semester 2
- ADP108 Interior Design 8
- ADP162 Interior Research 2

---

Graduate Diploma in Landscape Architecture PS66

Award title: Graduate Diploma in Landscape Architecture
CRICOS code: 003478D
Campus: Gardens Point
Duration: 1 year BBlt Env (L'scape Arch) graduates; 2 years other graduates full-time or 2 years BBlt Env (L'scape Arch) graduates; 4 years (other graduates) part-time
Credit points: 192
Course coordinator: Dr Jeannie Sim

Full-Time Course Structure*

Foundation Level Studies

Year 1, Semester 1
(Entry for graduates of 3-year degree or diploma other than the Bachelor of Built Environment - Landscape Architecture)
- DLB130 Introducing Landscape Design
- PSB434 Landscape Construction A (L'scape Only)
- PSB263 Landscape Ecology
- PSB264 Spatial Design Theory

Year 1, Semester 2
- PSB444 Landscape Construction B (L'scape Only)
- PSP268 Site Planning
- DEB201 Digital Design Communication

OR
Elective approved by course coordinator. (program to be agreed with Course Coordinator to suit existing qualifications)

Year 2, Semester 1
- PSP263 Landscape Ecology
- PSP264 Spatial Design Theory

Year 2, Semester 2
- PSP264 Advanced Landscape Design 1

Professional Level Studies

Year 3, Semester 1
(Entry for Bachelor of Built Environment - Landscape Architecture graduates)
- PSP269 Advanced Construction and Practice 1
- PSP270 Elective

Year 3, Semester 2
- PSP272 Advanced Construction and Practice 2
- PSP273 Landscape Planning

Year 4, Semester 1
- PSP271 Advanced Landscape Design 1

Year 4, Semester 2
- PSP274 Advanced Landscape Design 2

Please Note: This course structure is under review and subject to University approval.

Part-Time Course Structure*

Foundation Level Studies

Year 1, Semester 1
(Entry for graduates of 3-year degree or diploma other than the Bachelor of Built Environment - Landscape Architecture)
- DLB130 Introducing Landscape Design
- PSB434 Landscape Construction A (L'scape Only)

Year 1, Semester 2
- PSB444 Landscape Construction B (L'scape Only)
- DEB201 Digital Design Communication

OR
Elective approved by course coordinator. (program to be agreed with Course Coordinator to suit existing qualifications)

Year 2, Semester 1
- PSP263 Landscape Ecology
- PSP264 Spatial Design Theory

Year 2, Semester 2
- PSP264 Advanced Landscape Design 1

Year 3, Semester 1
(Entry for Bachelor of Built Environment - Landscape Architecture graduates)
- PSP269 Advanced Construction and Practice 1
- PSP270 Elective

Year 3, Semester 2
- PSP272 Advanced Construction and Practice 2
- PSP273 Landscape Planning

Year 4, Semester 1
- PSP271 Advanced Landscape Design 1

Year 4, Semester 2
- PSP274 Advanced Landscape Design 2

Graduate Diploma in Project Management CN64

Award title: Graduate Diploma in Project Management
CRICOS code: 006362C
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48)
Course coordinator: Professor Martin Skitmore

Course Structure

In the Graduate Diploma students complete coursework units from the Masters degree with a range of elective options available. Variations to the recommended study program require prior approval from the course coordinator. School electives are offered subject to an appropriate enrollment each semester.

Persons admitted to the Graduate Diploma who are graduates of the Graduate Certificate in Project Management (CN81) will need to submit an application for Academic Credit form for the units they have already completed.
Course structure - February entry

Full-time Course Structure

Year 1, Semester 1
- CNP520 Project Management
- CNP521 Project Cost and Risk Management
- CNP532 Innovation and Technology Management
- CNP551 Project Human Resource Management

Year 1, Semester 2
- CNP534 International Project Management
- CNP533 Project Management Law
Two electives from Electives List

Part-time Course Structure

Year 1, Semester 1
- CNP520 Project Management
- CNP521 Project Cost and Risk Management

Year 1, Semester 2
- CNP533 Project Management Law
- CNP534 International Project Management

Year 2, Semester 1
- CNP532 Innovation and Technology Management
- CNP551 Project Human Resource Management

Year 2, Semester 2
Two electives from Electives List

Course structure - Mid-year entry

Full-time Course Structure

Year 1, Semester 2
- CNP520 Project Management
- CNP533 Project Management Law
- CNP534 International Project Management
1 elective from Electives List

Year 2, Semester 1
- CNP521 Project Cost and Risk Management
- CNP532 Innovation and Technology Management
- CNP551 Project Human Resource Management
1 elective from Electives List

Part-time Course Structure

Year 1, Semester 2
- CNP520 Project Management
- CNP533 Project Management Law

Year 2, Semester 1
- CNP521 Project Cost and Risk Management
- CNP551 Project Human Resource Management

Year 2, Semester 2
CNP534 International Project Management
1 elective from Electives List

Year 3, Semester 1
- CNP532 Innovation and Technology Management
1 elective from Electives List

Electives List
- BSN502 Research Methodology
- CNP545 Project Development
- CNP553 Information Technology for Project Managers
- CNP556 Property Management and Contracts
- Or other elective with the approval of the Course Coordinator.

Course coordinator: Mr Gary Garner

Course Structure

In the Graduate Certificate and Graduate Diploma courses, students complete coursework units from the Masters degree with a range of elective options available. Students who commence mid-year should enrol in Semester 2 units.

Course structure

Full-time Course Structure - Property Development major

Year 1, Semester 1
- CNP520 Project Management
- CNP521 Project Cost and Risk Management
- CNP547 Property Investment
- CNP555 Property Market Analysis

Year 1, Semester 2
- CNP545 Project Development
- CNP554 Advanced Land Development
Two Electives

Full-time Course Structure - Property Investment and Management major

Year 1, Semester 1
- CNP547 Property Investment
- CNP555 Property Market Analysis
- CNP556 Property Management and Contracts
- EFN406 Managerial Finance

Year 1, Semester 2
- CNP554 Advanced Land Development
- CNP557 Property Finance and Capital Markets
Two Electives

Part-time Course Structure - Property Development major

Year 1, Semester 1
- CNP547 Property Investment
- CNP555 Property Market Analysis

Year 1, Semester 2
- CNP545 Project Development
- CNP554 Advanced Land Development

Year 2, Semester 1
- CNP520 Project Management
- CNP521 Project Cost and Risk Management

Year 2, Semester 2
Two Electives

Part-time Course Structure - Property Investment and Management major

Year 1, Semester 1
- CNP547 Property Investment
- CNP555 Property Market Analysis

Year 1, Semester 2
- CNP554 Advanced Land Development
- CNP557 Property Finance and Capital Markets

Year 2, Semester 1
- CNP556 Property Management and Contracts
- EFN406 Managerial Finance

Year 2, Semester 2
Two Electives

Graduate Diploma in Property Economics CN91

Award title: Graduate Diploma in Property Economics
CRICOS code: 036429G
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48)

Graduate Diploma in Urban and Regional Planning PS72

Award title: Graduate Diploma in Urban and Regional Planning
CRICOS code: 003477E
Campus: Gardens Point
**Duration:** 1 year for Bachelor of Built Environment graduates; 1.5 years for other graduates full-time or 75% progression; 1.5 years for Bachelor of Built Environment graduates; 2.5 years for other graduates/50% progression; 2 years for Bachelor of Built Environment graduates; 3 years for other graduates part-time

**Credit points:** 168

**Course coordinator:** Assoc Prof Phil Heywood

**Professional Recognition**

This course is professionally accredited by the Planning Institute of Australia.

### Full-Time Course Structure

#### Structure for non BBE graduates

**Year 1, Summer Program**
- DBP403 Design Communication
- DBP406 Computer Applications in Planning

Note: DBP403 is a full-fee paying foundation unit for student from a non-design background

**Year 1, Semester 1**
- DBP401 Urban Design and Site Analysis
- DBP402 Planning Processes
- DBP409 Urban Planning Practice
- DBP410 Research Methods in Planning

**Year 1, Semester 2**
- DBP404 Economic and Social Foundations of Planning
- DBP408 Planning Implementation and Law
- DBP413 Regional Planning Practice
- DBP414 Regional and Metropolitan Policy
- DBP417 Comparative Planning

Note: DBP417 can be taken any time during the course.

**Year 2, Semester 1**
- DBP407 Environmental Planning and Management
- DBP411 Community Planning
- DBP412 Planning Theory and Ethics
- DBP415 Professional Practice or Research Project

**Structure for BBE graduates**

**Year 1, Semester 1**
- DBP409 Urban Planning Practice
- DBP410 Research Methods in Planning
- DBP411 Community Planning
- DBP412 Planning Theory and Ethics
- DBP415 Professional Practice or Research Project
- DBP416 Elective
- DBP417 Comparative Planning

Note: DBP417 can be taken anytime during the course.

### 75% Progression Rate Course Structure

#### Structure for non BBE graduates

**Year 1, Summer Program**
- DBP403 Design Communication
- DBP406 Computer Applications in Planning

Note: DBP403 is a full-fee paying foundation unit for student from a non-design background

**Year 1, Semester 1**
- DBP401 Urban Design and Site Analysis
- DBP402 Planning Processes
- DBP409 Urban Planning Practice
- DBP410 Research Methods in Planning

**Year 1, Semester 2**
- DBP404 Economic and Social Foundations of Planning
- DBP408 Planning Implementation and Law
- DBP413 Regional Planning Practice
- DBP414 Regional and Metropolitan Policy
- DBP417 Comparative Planning

Note: DBP417 can be taken any time during the course.

**Year 2, Semester 1**
- DBP407 Environmental Planning and Management
- DBP411 Community Planning
- DBP412 Planning Theory and Ethics
- DBP415 Professional Practice or Research Project

**Structure for BBE graduates**

**Year 1, Semester 1**
- DBP409 Urban Planning Practice
- DBP410 Research Methods in Planning
- DBP411 Community Planning
- DBP412 Planning Theory and Ethics
- DBP415 Professional Practice or Research Project
- DBP416 Elective
- DBP417 Comparative Planning

Note: DBP417 may be taken anytime during the course.

### Part-time Course Structure

#### Structure for non BBE graduates

**Year 1, Summer Program**
- DBP403 Design Communication
- DBP406 Computer Applications in Planning

Note: DBP403 is a full-fee paying foundation unit for student from a non-design background

**Year 1, Semester 1**
- DBP401 Urban Design and Site Analysis
- DBP402 Planning Processes

**Year 1, Semester 2**
- DBP404 Economic and Social Foundations of Planning
- DBP408 Planning Implementation and Law

**Year 2, Semester 1**
- DBP409 Urban Planning Practice

**Structure for BBE graduates**

**Year 1, Semester 1**
- DBP409 Urban Planning Practice
- DBP410 Research Methods in Planning
- DBP412 Planning Theory and Ethics
- DBP415 Professional Practice or Research Project
- DBP416 Elective
- DBP417 Comparative Planning
Note: DBP417 can be taken anytime during the course.

### Graduate Diploma in Urban Design DB69

**Award title:** Graduate Diploma in Urban Design  
**CRICOS code:** 014018G  
**Campus:** Gardens Point  
**Duration:** 1 year full-time or 1.5 years part-time  
**Credit points:** 96 (full-time standard semester: 48)  
**Course coordinator:** Dr Danny O’Hare

#### Course Requirements
Students must complete a minimum of 48 credit points per semester in the full-time course and a minimum of 24 credit points per semester in the part-time course. Students with a grade point average of 5 or better may articulate into the Masters program after one semester full-time or two semesters part-time study.

#### Course structure
**Summer Semester - Introductory Unit**  
DBP403 Design Communication

**Full-time Structure**
- **Year 1, Semester 1**  
  ARB081 History, Theory and Criticism of Urban Design  
  ARB082 Urban Design Studio B  
  PSP453 Urban Systems and the Physical Environment  
- **Year 1, Semester 2**  
  PSN214 Elective  
  OR  
  PSN211 Research Project 1  
  PSP452 Urban Design Studio A  
  PSP451 Production and Use of the Built Environment

**Part-time Structure**
- **Year 1, Semester 1**  
  ARB081 History, Theory and Criticism of Urban Design  
  PSP453 Urban Systems and the Physical Environment  
- **Year 1, Semester 2**  
  PSP452 Urban Design Studio A  
  PSP451 Production and Use of the Built Environment  
- **Year 2, Semester 1**  
  ARB082 Urban Design Studio B  
  PSN214 Elective  
  OR  
  PSN211 Research Project 1

### Graduate Certificate in Advanced Landscape Techniques PS77

**Award title:** Graduate Certificate in Advanced Landscape Techniques  
**CRICOS code:**  
**Campus:** Gardens Point  
**Duration:** 2 semesters part-time  
**Credit points:** 48  
**Course coordinator:** Associate Professor Glenn Thomas

Please note
The School reserves the right to offer this course according to enrolment quotas and staff availability.

#### Course structure
**Part-time Course Structure**
- **Semester 1**  
  PSP269 Advanced Construction and Practice 1  
  PSP270 Elective  
- **Semester 2**  
  PSP272 Advanced Construction and Practice 2  
  PSP273 Landscape Planning

### Graduate Certificate in Building Fire Safety AR65

**Award title:** Graduate Certificate in Building Fire Safety  
**CRICOS code:**  
**Campus:** Gardens Point  
**Duration:** 2 semesters part-time  
**Credit points:** 48 (part-time standard semester: 24)  
**Course coordinator:** Mr Jack Williamson

#### Professional Recognition
Support has been received from the Australian Institute of Building Surveyors, the Institution of Fire Engineers, The Institution of Engineers Australia; Society of Fire Safety, Queensland Fire Protection Industry Association Inc., Queensland Department of Local Government and Planning, Queensland Department of Public Works and Housing, The Royal Australian Institute of Architects, Queensland Fire and Rescue Authority.

#### Course structure
**Semester 1**  
ARB801 Fire Technology and Science  
ARB803 Fire and Building Legislation  
**Semester 2**  
ARB802 Human Behaviour and Fire  
ARB804 Fire Safety System Design  
ARB801 and ARB803 are prerequisites to ARB804, ARB802 is a corequisite with ARB804.

Note:  
The units are offered in block mode. It is anticipated that the two week intensive workshops will be in early July and late November for further details please contact the School.

### Graduate Certificate in Civil Engineering CE62

**Award title:** Graduate Certificate in Civil Engineering  
**CRICOS code:** 040341C  
**Campus:** Gardens Point  
**Duration:** Full-time may be available in consultation with course coordinator. full-time or 2 semesters part-time  
**Credit points:** 48  
**Course coordinator:** Mr Yin Foong

#### Articulation
Students who achieve a grade point average of 5.0 or above in the Graduate Certificate will be able to apply for entry to the Master of Engineering Science (Civil) (CE74) on the condition that they possess an undergraduate degree in engineering.

#### Course structure
**Environmental Engineering Major**
- **Semester 1**  
  CEP291 Environmental Law and Assessment  
  Elective  
- **Semester 2**  
  CEP141 Studies in Environmental Engineering  
  Elective  

**Engineering Administration Major**
- **Semester 1**  
  CEP294 Engineering Contract Development and Administration  
  Elective  
- **Semester 2**  
  CEP296 Specialised Project Management  
  Elective
CEP295 Civil Engineering Management in a Project Environment
Elective

Electives

**Semester 1**
CEP142 Water Pollution Control
CEP161 Professional Development Studies 1
CEP201 Process Modelling
CEP218 Transportation Engineering
CEP291 Environmental Law and Assessment
CEP293 Pavement Design
CEP294 Engineering Contract Development and Administration

**Semester 2**
CEP141 Studies in Environmental Engineering
CEP161 Professional Development Studies 1
CEP262 Professional Development Studies 2
CEP295 Civil Engineering Management in a Project Environment

Note:
Advice must be sought from the course coordinator before enrolling in either CEP161 or CEP262. The School reserves the right to offer the units according to enrolment quotas and staff availability. With permission of the Course Coordinator students may be permitted to take an elective from other engineering areas.

Graduate Certificate in Computer and Communications Engineering EE61

**Award title:** Graduate Certificate in Computer and Communications Engineering

**CRICOS code:** 043119G

**Campus:** Gardens Point

**Duration:** 1 semester full-time or 2 semesters part-time

**Credit points:** 48

**Course coordinator:** Dr John Edwards

**Course Structure**
In the Graduate Certificate students select a total of four units from semester 1 or semester 2 lists.

**Course structure**

**Semester 1**
EEP101 Algorithms for Control and Engineering
EEP102 Unix and C for Engineers
EEP103 Computer Hardware and Interfacing
EEP124 Data Communications
EEP126 Communications Digital Signal Processing
Elective Unit 1

**Semester 2**
EEP104 Real-Time Operating Systems
EEP120 Networks and Distributed Computing
EEP123 Process Control and Robotics
EEP129 Image Processing and Computer Vision
EEP135 Digital Signal Processing and Applications
Elective Unit 2

**Elective Units**
EEB911 Electrical Energy Systems
EEB941 Modern Signal Processing
EEB960 Wireless Communications
EEB961 RF and Applied Electromagnetics
EEB976 Advanced Industrial Electronics
EEB992 VLSI Circuits and Systems
EEP127 Advanced Topic B

Note:
At the discretion of the course coordinator, students may be allowed to select an elective from any advanced topics offered by the University.

Graduate Certificate in Electricity Supply Engineering EE82

**Award title:** Graduate Certificate in Electricity Supply Engineering

**CRICOS code:**

**Campus:** Gardens Point and External

**Duration:** 2 semesters (minimum) part-time

**Credit points:** 48

**Course coordinator:** Professor Gerard Ledwich

**Course Structure**
Choose 12 units from list

EEP201 Fundamentals of Power System Earthing
EEP202 Thermal Ratings and Heat Transfer
EEP203 Testing and Condition Monitoring
EEP204 Power System Load Flow Analysis
EEP205 Power System Fault Calculations
EEP206 Project Management
EEP207 Overhead Line Route Selection - Environmental Factors
EEP208 Economic Analysis for Power System Engineers
EEP209 Power System Harmonics
EEP210 Abnormal System Voltages
EEP211 Basic Power System Protection
EEP212 Advanced Power System Protection
EEP213 Statistics
EEP214 Risk Assessment in the Electricity Supply Industry
EEP215 Reliability
EEP216 Overhead Line Design - Electrical
EEP217 Overhead Line Design - Mechanical
EEP218 Introduction to Automated System Control and Supervisory Systems
EEP219 High Voltage Substation Equipment: Power Transformers and Reactive Power Plant
EEP220 Distribution Planning
EEP221 Limits to Power System Stability
EEP222 Maintenance of Electricity Supply Systems
EEP223 Load Forecasting
EEP224 Power System Operation
EEP220 Organisation and Financial Management in the Electricity Supply Industry
EEP241 Distance Protection
EEP242 Efficient Marketing and Utilisation of Electricity: Demand and Supply Side Solutions
EEP243 Contract Administration
EEP244 Circuit Breakers - Switchgear
EEP245 Introduction to Substation Design
EEP246 Customer Metering
EEP248 Introduction to Electricity Markets

Units available by distance education with flexible enrolment year round.

EEP202 Thermal Ratings and Heat Transfer
EEP204 Power System Load Flow Analysis
EEP208 Economic Analysis for Power System Engineers
EEP209 Power System Harmonics
EEP210 Abnormal System Voltages
EEP211 Basic Power System Protection
EEP212 Advanced Power System Protection
EEP213 Statistics

Graduate Certificate in Engineering Management ME74

Award title: Graduate Certificate in Engineering Management
CRICOS code: Not required
Campus: Singapore
Duration: 6 months full-time or 1 year part-time
Credit points: 48
Course coordinator: Professor Prasad Yarlagadda

Course Outline
The course consists of four coursework units. The units are offered on a block basis.

Course Structure
Semester 1
MEZ101* Research Methodology
Choose 1 unit from the following:
MEZ102** Mechanical Engineering Specialised Studies 5
MEZ103** Mechanical Engineering Specialised Studies 4
MEZ104** Mechanical Engineering Specialised Studies 2
MEZ105** Mechanical Engineering Specialised Studies 3

Semester 2
Choose 1 unit from the following:
MEZ102** Mechanical Engineering Specialised Studies 5
MEZ103** Mechanical Engineering Specialised Studies 4
MEZ104** Mechanical Engineering Specialised Studies 2
MEZ105** Mechanical Engineering Specialised Studies 3
Choose 1 unit from the following:
MEZ273 Engineering Knowledge Management
MEZ280 Engineering Project Management
MEZ177 Total Quality Management

Block mode classes are held in teaching periods instead of semesters, e.g. 6TP1, which runs for 6 weeks at a time. Classes will be held Monday to Friday from 9am to 5pm, and Saturday from 9am to 5pm. *MEZ101 is compulsory.
** These units are taught by CAD-IT. Teaching periods/offerings may vary - please contact the office of CAD-IT Consultants, Singapore for further details.

Graduate Certificate in Geographic Information Systems PS79

Award title: Graduate Certificate in Geographic Information Systems
CRICOS code: 040339G
Campus: Gardens Point
Duration: 1 semester full-time or 2 semesters part-time
Credit points: 48
Course coordinator: Dr John Hayes

Notes:
Please consult with the course coordinator before finalising your enrolment.
Full-time students are required to enrol in 48 credit points per semester. This includes two core units per semester and two Electives from the list above, or from other undergraduate and postgraduate units with approval of your course coordinators.
The following units and semesters of offer are only available to postgraduate students subject to discussion with the course coordinator:
Semester 1:
PSB633 Map Production: Principles & Practice
PSB644 Advanced Geodesy
PS311 Professional Practice Management
Semester 2:
BNB011 Fundamentals of Synthetic Environments
DBP401 Urban Design and Site Analysis
DBP402 Planning Processes
DBP407 Environmental Planning and Management
PSB612 Spatial and Land Information Management
PSB630 Cartography and Digital Mapping
PSB633 Map Production: Principles and Practice
PSB644 Advanced Geodesy
PSP268 Site Planning
PSP273 Landscape Planning

Notes:
Please consult with the course coordinator before finalising your enrolment.
Full-time students are required to enrol in 48 credit points per semester. This includes two core units per semester and two Electives from the list above, or from other undergraduate and postgraduate units with approval of your course coordinators.
The following units and semesters of offer are only available to postgraduate students subject to discussion with the course coordinator:
Semester 1:
PSB633 Map Production: Principles & Practice
PSB644 Advanced Geodesy
Semester 2:
PSB643 Geodesy
PSB654 Topics in Spatial Information Science

Part-time course structure
Year 1, Semester 1
PSB631 Geographic Information Systems 1
Choose 1 Elective*
Year 1, Semester 2
Choose 1 Elective*

Electives* (subject to availability)
Please refer to Full-Time Course Structure for list of Electives.

Notes:
Please consult with the course coordinator before finalising your enrolment.
Part-Time students are required to enrol in 24 credit points per semester. Select one core unit and any other unit from the Electives listed, or from other undergraduate and post-graduate units.

- **Graduate Certificate in Landscape Techniques PS75**
  
  **Award title:** Graduate Certificate in Landscape Techniques  
  **CRICOS code:** 037545F  
  **Campus:** Gardens Point  
  **Duration:** 1 semester full-time or 2 semesters part-time  
  **Credit points:** 48  
  **Course coordinator:** Associate Professor Glenn Thomas

- **Full-Time Course Structure**
  
  **Year 1, Semester 1**
  - DLB130 Introducing Landscape Design  
  - PSB434 Landscape Construction A (L'scape Only)  
  - PSP263 Landscape Ecology  
  - PSP264 Spatial Design Theory  
  
  - * Please Note
  
  Course structure under review and subject to University approval.

- **Part-Time Course Structure**
  
  **Year 1, Semester 1**
  - DLB130 Introducing Landscape Design  
  - PSB434 Landscape Construction A (L'scape Only)  
  
  **Year 1 - Semester 2**
  - PSB444 Landscape Construction B (L'scape Only)  
  - DEB201 Digital Design Communication  
  
  - OR
  
  Elective approved by course coordinator. (program to be agreed with Course Coordinator to suit existing qualifications)  
  
  *Please note;
  
  This course structure is under review and subject to University approval.

- **Graduate Certificate in Planning Studies PS82**
  
  **Award title:** Graduate Certificate in Planning Studies  
  **CRICOS code:** 040336M  
  **Campus:** Gardens Point  
  **Duration:** 1 semester full-time or 2 semesters part-time  
  **Credit points:** 48  
  **Course coordinator:** Assoc Prof Phil Heywood

- **Professional Recognition**
  
  This course is registered with the Planning Institute of Australia (formerly RAPI) as a recognised Continuing Professional Development Course rated at ten credit points.

- **Course Structure**
  
  An overview of current planning methods is presented in Planning Processes and applied in Urban Analysis and Design and Planning Implementation. These method and practice units are accompanied by opportunity for focused study within the Elective unit, chosen in discussion with the course coordinator.

- **Full-time Course structure**
  
  Students may choose the Community Planning focus (units listed below) or any four units from the Graduate Diploma in Urban and Regional Planning

  **Semester 1**
  - DBP401 Urban Design and Site Analysis  
  - DBP402 Planning Processes  
  - DBP411 Community Planning  
  - DBP501 Specialisation

  **Part-time Course structure**
  
  Students may choose the Community Planning focus (units listed below) or any four units from the Graduate Diploma in Urban and Regional Planning

  **Semester 1**
  - DBP402 Planning Processes  
  - DBP411 Community Planning  

  **Mid-Year Entry Course structure (Full-time)**
  
  Students may choose the Community Planning focus (units listed below) or any four units from the Graduate Diploma in Urban and Regional Planning

  **Semester 2**
  - DBP404 Economic and Social Foundations of Planning  
  - DBP408 Planning Implementation and Law  
  - DBP414 Regional and Metropolitan Policy  
  - DBP416 Elective  
  
  DBP416 Elective offers Specialisations in Urban Housing, Urban Design and Environmental and Social Planning. Other topics may be offered depending on staff availability.

  **Mid-Year Entry Course structure (Part-time)**
  
  Students may choose the Community Planning focus (units listed below) or any four units from the Graduate Diploma in Urban and Regional Planning

  **Semester 2**
  - DBP404 Economic and Social Foundations of Planning  
  - DBP416 Elective  
  
  DBP416 Elective offers Specialisations in Urban Housing, Urban Design and Environmental and Social Planning. Other topics may be offered depending on staff availability.

- **Graduate Certificate in Project Management CN81**
  
  **Award title:** Graduate Certificate in Project Management  
  **CRICOS code:** 012705A  
  **Campus:** Gardens Point  
  **Duration:** 1 semester full-time or 1 year part-time  
  **Credit points:** 48 (part-time standard semester: 24)  
  **Course coordinator:** Professor Martin Skitmore

- **Course Structure**
  
  The first semester full-time or two semesters part-time are identical to the Graduate Diploma in Project Management (CN64). Students who complete the Graduate Certificate in
Course progression
It is important that students follow as normal a progression through their courses as possible. Units should be taken in an orderly sequence as set out in published course structures. Units failed should be picked up in the next semester that they are offered. Prerequisite units must normally be passed before a student may proceed to a further unit which has the prerequisite so specified. The course coordinator should be consulted regarding variations from the course structure. Students who have failed units, or have doubts about having the necessary background to proceed, should seek the advice of the course coordinator.

Supplementary assessment
Students may be granted up to two supplementary assessments in the final 96 credit points of study, for coursework programs of three or more years full-time duration or equivalent; and one supplementary assessment in the final 48 credit points for coursework programs of less than three years full-time duration or equivalent.
Eligibility for supplementary assessment will be determined by the Dean and will normally only be considered when a student receives a grade of 2 in a unit where a 3 is required for course completion or a grade of 3 in a unit where a 4 is required for course completion. The only grade that will be recorded following supplementary assessment is S3 (pass supplementary) and S2 (fail supplementary).

Awards with honours
Honours may be awarded to graduands of the Bachelor of Architecture, the four-year single degree and five-year double degree Bachelor of Engineering and Surveying courses, the four-year Bachelor of Applied Science courses in Construction Management and Quantity Surveying, and the Bachelor of Property Economics. First class honours, second class honours division A and second class honours division B may be awarded. Candidates for a degree with honours must fulfil the requirements for a pass degree and achieve a standard of proficiency in all course units as may from time to time be determined by the Faculty Academic Board and approved by University Academic Board.

Eligibility for honours
Eligibility for awards with honours is not affected by the time taken to complete a course. However, to be eligible for such an award, a graduand must have completed the
course within the maximum number of calendar years specified in the Student Rules (see the student rules section). Three- and four-year (full-time) courses must be completed in ten years. Combined degree courses must be completed in eleven years. Time limits are measured in calendar years from the first day of the first semester in which the student was enrolled and include periods of interruption such as leave of absence. In addition, to be eligible for an award with honours, a graduand must have been enrolled in the course at QUT for at least two years of full-time study or its equivalent.

Honours based on grade point average
The Built Environment and Engineering Academic Board has resolved that awards with honours for students graduating post-1992 will be based on grades achieved by students throughout the whole of their course as determined by the Grade Point Average (GPA) calculation.

The GPA calculation includes all attempts at units which are awarded a numeric grade, or the result ‘Withdrawn — Failure’ (which is converted to a grade of 1).

Students obtaining a GPA of 6.0 or greater will normally qualify for the award of first class honours. Students obtaining a GPA of 5.5 to 5.99 will normally qualify for the award of second class honours division A. Students obtaining a GPA of 5.0 to 5.49 will normally qualify for the award of second class honours division B.

Students enrolled in double degrees must obtain the required GPA in the Engineering degree component to be eligible for Honours.

Awards with distinction
Awards ‘with distinction’ may be awarded to graduands of the three-year single degree courses and the graduate diploma courses undertaken in the Faculty of Built Environment and Engineering. Candidates for a degree ‘with distinction’ must fulfil the requirements for a pass degree and achieve a standard of proficiency in all course units as may from time to time be determined by the Faculty Academic Board and approved by the University Academic Board.

Eligibility for ‘With Distinction’
See Eligibility for Honours.

With Distinction based on grade point average
The Built Environment and Engineering Academic Board has resolved that awards ‘with distinction’ will be based on grades achieved by students throughout the whole of their course as determined by the grade point average calculation.

The GPA calculation includes all attempts at units which are awarded a numeric grade, or the result ‘Withdrawn — Failure’ (which is converted to a grade of 1).

Students obtaining a GPA of 5.5 or greater will normally qualify for the award of with distinction.

Dean’s list
The Dean’s List comprises students who have achieved a GPA of 6.50 or more within a semester. These students receive a certificate in recognition of their achievement.

Use of calculators in examinations
Restrictions apply on the use of calculators in examinations. Students should consult their unit coordinator for details.

Field trips
Attendance at field trips or field projects in engineering and surveying/mapping courses is compulsory.

Personal Protection Equipment (PPE) Policy
Protective equipment refers to safety glasses/goggles, hearing protection, safety boots, gloves and similar items. While all care is taken to reduce the risks to which students are exposed, protective equipment will be required to be worn in some practical sessions and field excursions. Students are required to wear PPE where and when it has been made clear that it is needed. Students are required to provide certain PPE as indicated by each school within the Faculty.

Students enrolled in units specified by the Faculty of Built Environment and Engineering and Engineering will be required to wear safety shoes for most laboratory practicals and/or field trips. Students not wearing appropriate safety shoes on these occasions will be barred from (i) participating in activities in these units, and (ii) submitting any assessment associated with these activities. Students must provide their own safety shoes, safety glasses/goggles and hearing protection equipment.

All students are bound by the Queensland Workplace Health and Safety Act. In this respect, students carrying out their final year projects will be required to do a risk assessment of such projects, including risk management and control to prevent incident and accidents.

Industrial experience for Engineering and Surveying/Mapping courses (students who commenced prior to 2006)
Industrial Experience forms part of the requirements of engineering and surveying degree courses, in order to provide a realistic background for formal academic studies and to ensure that students become effectively balanced in their professional development. For engineering students, it is a requirement of the Institution of Engineers, Australia, for graduate membership. Industrial Experience is usually undertaken during the long vacation or the mid-semester recess as an employee of a private firm, government agency or local authority, but can also be accumulated during part-time/full-time employment.

Candidates must submit a report no later than the fourth week of the semester, following each period of Industrial Experience. The report is to be written in the required format describing work carried out during the period of Industrial Experience. An Industrial Experience Record Form signed by the employer is also to be submitted. Industrial Experience Record Forms are available from www.bee.qut.edu.au/students/services.

A candidate for the degree of Bachelor of Technology (Civil) must obtain at least 45 days of industrial experience in an engineering environment approved by the course coordinator.

A candidate for the degree of Bachelor of Technology (Mechanical) must obtain at least 50 days of industrial experience approved by the course coordinator.

Engineering students must obtain at least 60 days of Industrial Experience in an engineering environment approved by the course coordinator.

Bachelor of Surveying students must obtain at least 90 days of industrial experience in a surveying environment approved by the course coordinator.
Approved employment means working under the direction of the course.

Industrial Experience information can be obtained from the Student Services Officer, Industrial Experience, on Level 3, D Block, Gardens Point campus.

Enrolment in industrial experience
Surveying/mapping and Engineering students should not formally enrol in industrial experience.

Industrial experience requirements for Bachelor of Architecture (AR48) course
A Bachelor of Architecture student must be engaged in approved employment for at least 72 recognised weeks within the last 2-3 years of the course (ADB796 Practice Experience B). Prior to entering Year 4 Semester 1 students enrolled in the full-time course structure, must have completed 20 recognised weeks of approved employment which will be credited to the requirements of Practice Experience B. Students enrolled in the flexible full-time course structure must be engaged in approved employment for at least 48 recognised weeks within the first 3 years of the course (ADB795 Practice Experience A). Flexible full-time students enrol in ADB795 Practice Experience A in second semester of third year. All students enrol in ADB796 Practice Experience B in the second semester of the final year of the course.

Approved employment means working under the direction of an architect who is registered at the place of practice where the experience is obtained.

A recognised week is 5 days actually worked (7.6 hrs per day with a maximum of 42 hours per week). The minimum period with one employer is 8 weeks.

Allied experience can be obtained in approved areas allied to architecture (eg, Civil Engineering, Interior Design, Industrial Design, Quantity Surveying, Construction Management, Town Planning, Landscape Architecture, Building, etc). The maximum period of allied experience is 12 recognised weeks in ADB795 and 18 recognised weeks in ADB796.

Prior work experience under the direction of a registered architect before enrolment in the course is accepted up to a maximum of 24 weeks in ADB795 and a maximum of 36 weeks in ADB796.

Approved employment during leave of absence is accepted (a) in ADB795 up to a maximum of 24 recognised weeks and (b) in ADB796 after completion of at least one semester of fourth year and prior approval of the course coordinator up to a maximum of 36 recognised weeks.

Reporting each month is required on the electronic logbook. Students without access to the electronic logbook system, are to contact the course coordinator who will establish the reporting arrangements for their work experience. The electronic logbook automatically produces the AACA log-sheets required in ADB796.

Credited employment period only counts once (eg, period required for ADB795 cannot also be used for the 20 week period for entry in the last 2 years full-time mode). The employment period of ADB795 for students admitted directly into the third year of the flexible full-time course is 24 recognised weeks and the employment period of ADB796 for students admitted directly into the last year of the course is one year (52 recognised weeks).

Types of experience required:
- ADB795 Practice Experience A
  At least 50% of time in undertaking design and/or documentation duties.
- ADB796 Practice Experience B
  (a) At least 50% of time in undertaking design and documentation duties.
  (b) Provide the following experiences on the electronic AACA log sheets:
    - contract documentation experience (AACA element 2.2.2); and
    - preliminary site investigation and evaluation of at least one project during the last 2-3 years of the course (AACA element 3.1.2); and
    - some aspect of the administration of the project contract of at least one project during the last 2-3 years of the course which can be ‘observer’ status where direct experience is unavailable (AACA element 3.3.1).

Industrial experience requirements for DE40 Bachelor of Design (Architectural Studies)
Graduates of the DE40 Bachelor of Design (Architectural Studies) will be subject to a GPA requirement to qualify for entry to the postgraduate course DE80 Master of Architecture. Graduates who successfully complete both degrees (DE40 and DE80) will meet the academic requirements for membership of the Royal Australian Institute of Architects (RAIA). Successful graduates of both degrees (DE40 and DE80) who have completed a minimum of 2 years’ practical experience, of which at least one year is postgraduate experience, will be eligible to undertake the Architectural Practice Examination, which (if successful) will enable the graduate to be eligible for registration with any Board of Architects in Australia.

Graduates of the DE40 Bachelor of Design (Architectural Studies) will also meet the academic (technical) requirement for the Building Design Licence with the Queensland Building Services Authority.

Types of experience required: Students will have the opportunity of undertaking a minor or major in Work Integrated Learning, which will count towards their practical experience.

Bachelor of Applied Science (Construction Management) CNS1

Award title: Bachelor of Applied Science (Construction Management)
CRICOS code: 006363B
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr John Hayes
Discipline coordinator: Mr Paul Den Ronden

Special Course Requirements
All students are required to obtain a minimum of 100 days of employment in the final year of the course as a part of CNB409 Professional Practice 1 and CNB423 Professional Practice 2.

Professional Recognition
Graduates with relevant experience are eligible for membership of the Australian Institute of Building.
Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Bachelor of Applied Science (Quantity Surveying) CN53

Award title: Bachelor of Applied Science (Quantity Surveying)
CRICOS code: 003500M
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr John Hayes
Discipline coordinator: Mr Jason Gray

Special Course Requirements
All students are required to obtain a minimum of 100 days of employment in the final year of the course as a part of the units Professional Practice 1 and Professional Practice 2. Only international students are eligible to complete a portion of their work experience offshore, and in this case students will receive no assistance in gaining work experience.

Professional Accreditation and Recognition
The course is offered with or without honours. Both the honours and non-honours versions of the course are fully accredited by the Australian Institute of Quantity Surveyors and the Board of Quantity Surveyors Malaysia (BQSM). Re-accreditation with the Royal Institution of Chartered Surveyors (honours version only) and Singapore Institute of Surveyors and Valuers is currently being sought.

Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion, but this will affect professional accreditation and recognition in relation to RICS and SISV. The course coordinator will therefore need to be satisfied that the student fully understands the implications that the minor will have on professional accreditation and recognition before approval to the minor is granted. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Bachelor of Architecture AR48

Award title: Bachelor of Architecture
CRICOS code: 052308E
Campus: Gardens Point
Duration: 5 years full-time full-time
Credit points: 480 (full-time standard semester: 48)
Course coordinator: Ms Sheona Thomson

Additional Admission Information
The AR48 Bachelor of Architecture course has been replaced by DE40 Bachelor of Design (Architectural Studies) from 2006 onwards. There will be no intake into the AR48 course in 2007 with the exception of QTAC applicants commencing their studies with at least 168 credit points of advanced standing (academic credit); i.e. those students who will be starting in the third year of the program.

If offered a place you are not required to lodge an academic credit form, as academic credit will be awarded by QUT before the census date of your first teaching period.

After being awarded this credit and if you wish to seek for additional academic credit, you are then required to lodge an Application for Academic Credit form for that additional credit by the due date and subject QUT rules.

Professional Recognition
Graduates of the Bachelor of Architecture degree meet the academic requirements for membership of the Royal Australian Institute of Architects and, following one year of post-graduate architectural experience, are eligible to undertake the registration examinations of the Board of Architects of Queensland.

Special course requirements
A Bachelor of Architecture student must be engaged in approved employment for at least 72 recognised weeks within the last 2-3 years of the course (ADB796 Practice Experience B). Prior to entering Year 4 Semester 1 students enrolled in the full time course structure, must have completed 20 recognised weeks of approved employment which will be credited to the requirements of Practice Experience B. Students enrolled in the flexible full-time course structure must be engaged in approved employment for at least 48 recognised weeks within the first 3 years of the course (ADB795 Practice Experience A).

Note:
This course is currently under review.

ADB014 Contextual Studies 4
ADB033 Professional Studies 3
ADB053 Architectural Project
ADB796-1 Practice Experience B
ADB796-2 Practice Experience B

Special Course Notes
1 Students must complete all units in the Years 1, 2 & 3 prior to enrolling in any unit in the Year 4 schedule of AR48. The course coordinator may consider cases of special hardship.
2 Students must meet pre-requisites in all subjects.
3 Students who have not completed 20 recognised weeks of approved employment at the end of year 3 should consult with the course coordinator regarding their 4th year enrolment program.
4 Late penalties for late assignments apply.
Course will involve compulsory field work within some units.

**Course structure - flexible full-time**

**Year 2, Semester 1**
- ADB003 Architectural Design 3
- ADB011 Contextual Studies 1
- ADB022 Technology and Science 2

**Year 2, Semester 2**
- ADB004 Architectural Design 4
- ADB023 Technology and Science 3

**Year 3, Semester 1**
- ADB005 Architectural Design 5
- ADB024 Technology and Science 4
- ADB913 Human Environment 3

**Year 3, Semester 2**
- ADB006 Architectural Design 6
- ADB012 Contextual Studies 2
- ADB795-1 Practice Experience A
- ADB795-2 Practice experience A
- New and continuing students

**Year 4, Semester 1**
- ADB007 Architectural Design 7
- ADB013 Contextual Studies 3
- ADB204 Industrial Design 2
- ADB205 Industrial Design 3
- ADB67 Elective Architectural Applications
- ADB942 Elective 2

**Year 4, Semester 2**
- ADB008 Architectural Design 8
- ADB026 Technology and Science 6
- ADB031 Professional Studies 1

**Year 5 - Semester 1**
- ADB009 Architectural Design 9
- ADB932 Professional Studies 2

**Year 5 - Semester 2**
- ADB226 Industrial Design History Theory and Criticism 2
- ADB206 Industrial Design 4
- ADB236 Manufacturing Technology 4
- ADB942 Elective 2

### Special Course Notes
1. Students must complete all units in the Years 1, 2 and 3 prior to enrolling in any unit in the Year 4 schedule of AR48. The course coordinator may consider cases of special hardship.
2. Students must meet pre-requisites in all subjects.
3. Penalties for late assignments apply.
4. Course will involve compulsory field work within some units.
5. Students currently enrolled in BN31 cannot transfer to AR48 in years 2 and 3.
6. Acceptance into the flexible full-time mode requires approval of the course coordinator and by providing evidence of employment in an Architects office.

## Bachelor of Built Environment (Industrial Design) BN31

**Award title:** Bachelor of Built Environment (Industrial Design)

**CRICOS code:** 003507D

**Campus:** Gardens Point

**Duration:** 3 years full-time

**Course coordinator:** Ms Sheona Thomson

**Discipline coordinator:** Dr Dianne Smith

### Other Majors
See also entries for the following majors in this course: Interior Design, Landscape Architecture, and Urban and Regional Planning.

### Professional Recognition
Graduates of the Bachelor of Built Environment (Industrial Design) who go on to complete the Graduate Diploma in Industrial Design are eligible for associate membership of the Design Institute of Australia. QUT is an Educational Member of the International Council of Societies of Industrial Design (ICSID).

### Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

**Course structure**

**Year 2, Semester 1**
- ADB912 Human Environment 2
- ADB203 Industrial Design 1
- ADB233 Manufacturing Technology 1
- ADB941 Elective 1

**Year 2, Semester 2**
- ADB224 Industrial Design History Theory and Criticism 1
- ADB204 Industrial Design 2
- ADB234 Manufacturing Technology 2
- ADB244 Computer Aided Industrial Design 1

**Year 3, Semester 1**
- ADB913 Human Environment 3
- ADB205 Industrial Design 3
- ADB235 Manufacturing Technology 3
- ADB245 Computer Aided Industrial Design 2

**Year 3, Semester 2**
- ADB226 Industrial Design History Theory and Criticism 2
- ADB206 Industrial Design 4
- ADB236 Manufacturing Technology 4
- ADB942 Elective 2

## Bachelor of Built Environment (Interior Design) BN31

**Award title:** Bachelor of Built Environment (Interior Design)

**CRICOS code:** 003507D

**Campus:** Gardens Point

**Duration:** 3 years full-time

**Credit points:** 288 (full-time standard semester: 48)

**Course coordinator:** Ms Sheona Thomson

**Discipline coordinator:** Dr Dianne Smith

### Other Majors
See also entries for the following majors in this course: Industrial Design, Landscape Architecture, and Urban and Regional Planning.

### Professional Recognition
Successful completion of the Bachelor of Built Environment (Interior Design) satisfies the requirements for entry into the Graduate Diploma in Interior Design. Together the courses are recognised by the Design Institute of Australia as meeting the basic requirements for professional practice.
Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Course structure
Year 2, Semester 1

ADB125 Interior Technology 4
ADB133 Design in Society 2
ADB106 Interior Design 6
ADB124 Interior Technology 3
ADB154 Furniture Studies
ADB942 Elective 2

Bachelor of Built Environment (Landscape Architecture) BN31
Award title: Bachelor of Built Environment (Landscape Architecture)
CRICOS code: 003507D
Campus: Gardens Point
Duration: 3 years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Ms Sheona Thomson
Discipline coordinator: Ms Delwynn Poulton

Other Majors
See also entries for the following majors in this course: Interior Design, Industrial Design, and Urban and Regional Planning.

Professional Recognition
Successful performance in the Bachelor of Built Environment (Landscape Architecture) enables students to gain entry to the Graduate Diploma/Masters in Urban and Regional Planning, which are both fully accredited by the Planning Institute of Australia (PIA).

Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Bachelor of Engineering - Dean's Scholars Program EN40

Award title:
CRICOS code: As per course of study
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384
Course coordinator: Dr R. Mahalinga-Iyer

Special Course Requirements
Students enrolled in the Dean's Scholars program must maintain a GPA of 5.5 throughout their course. For a copy of the program rules and regulations please contact the Faculty Office or www.bee.qut.edu.au/bee/scholarships

Students must complete at least 60 days of industrial experience in order to graduate.

Civil - Dean's Scholars Course Structure

Please note for students commencing 2006.

Year 1, Semester 1
BEB100 Introducing Professional Learning
ENB101 Engineering Mechanics 1
ENB104 Engineering Materials
MAB180 Engineering Mathematics 1

Year 1, Semester 2
BEB200 Introducing Sustainability
ENB102 Engineering Mechanics 2
ENB103 Electrical Engineering
MAB132 Engineering Mathematics 1B

Please note for students commencing prior to 2006.
Year 1, Semester 1
CEB109 Engineering Mechanics 1
MMB131 Engineering Materials
CEB213 Environmental Science
MAB131 Engineering Mathematics 1A
or
MAB180 Engineering Mathematics 1
MAB180 Engineering Mathematics 1 is to be taken by those students not obtaining a SA or better in Queensland Year 12 Mathematics C (or equivalent).

Year 1 - Summer Program
CEB217 Hydraulic Engineering 1
MAB132 Engineering Mathematics 1B

Year 2, Semester 1
CEB207 Professional Studies 2 (Timber Structures & Earthworks)
CEB208 Materials Science
CEB209 Geotechnical Engineering 1
CEB317 Professional Studies 4 (Project Documentation & Roads)
CEB319 Water Engineering

Year 2, Semester 2
CEB214 Professional Studies 3 (Environmental & Transport)
CEB215 Structural Engineering 1
CEB216 Project Engineering 1
CEB321 Water and Wastewater Treatment
CEB322 Geotechnical Engineering 2

Year 3, Semester 1
CEB318 Structural Engineering 2
CEB412 Project Engineering 2
CEB424 Professional Studies 6 (Concrete Structures & Geotechnical Engineering)
MAB138 Engineering Statistics and Numerical Methods

Year 3, Semester 2
CEB323 Transport Engineering 1
CEB329 Professional Studies 5 (Steel Design & Construction)
CEB413 Structural Engineering 3
CEB425 Professional Studies 7 (Civil Design Project)

Year 3 - Summer Program
CEB411 Thesis Project A
Master of Engineering Science unit

Year 4, Semester 1
CEB415 Thesis Project B
Master of Engineering Science unit
Master of Engineering Science unit

Year 4, Semester 2
CEP997-1 Project B
CEP997-2 Project B
Master of Engineering Science unit
Master of Engineering Science unit
Students must complete 60 days industrial experience before graduating.

There may be minor variations in the program as CEB209 and CEB217 are offered in alternate Summer program.

#### Professional Recognition

This degree meets the requirements for membership of Engineers Australia and the Institution of Radio and Electronics Engineers Australia. It is also professionally recognised by many international professional institutions.

#### Minors

Subject to the approval of the course coordinator, students in this course may gain a minor in Systems Engineering by choosing the same group project through the Aerospace Design units and the final year project providing they comply with Systems Engineering principles.

#### Optional Pathway

Subject to normal course entry rules students may transfer internally from the QUT Bachelor of Engineering (Electrical and Computer Engineering) course to this degree after the completion of the first year full-time if they have obtained a sufficiently high grade point average that will meet the course cut-off for that year.

#### Articulation to Masters

Subject to University approval, students achieving a certain minimum performance criteria at the end of year 3 of the Bachelor of Engineering course, may be eligible to study two Master of Engineering Science level units as electives. After successfully completing the Bachelor of Engineering course, students eligible to enrol in the Master of Engineering Science courses can then have these two units credited towards the Masters Program.

## Masters units

See list under ME40 Infomechatronics Dean's Scholars Course Structure

### Year 3, Semester 2

- MEN102 Advanced Mechanical Engineering Studies
- MMB351 Thermodynamics
- MMB376 Professional Practice (Engineering Management)
- MMB382 Design and Maintenance of Machinery
  Group A or B elective

### Year 3 - Summer Program

- MMB401-1 Project
- MMB401-2 Project

### Year 4, Semester 1

- Group A elective
- 2 Masters units from Band 1 or 2

### Year 4, Semester 2

- MEN190-1 Project
- MEN190-2 Project
- 2 Masters units from Band 1 or 2

### Masters units

Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr R. Mahalinga-Iyer
Discipline coordinator: Dr Jon Bunker

Professional Recognition
Professional accreditation will be sought from Engineers Australia (EA).

Minors
You will have the opportunity to undertake two minors (a minor is four units or 48 credit points) in the same discipline. For professional recognition you will undertake an Applications Minor which consists of a Work Place Integrated Learning unit, a project unit and two specialised civil engineering units. The second
minor may be taken from an approved list outside your discipline.

Special Course Requirements
A candidate for the degree of Bachelor of Engineering (Civil and Construction) must complete at least 60 days of industrial experience/practice in an engineering construction environment as approved by the course coordinator.

Bachelor of Engineering (Civil and Environmental Management) CE46

Award title: Bachelor of Engineering (Civil and Environmental Management)
CRICOS code: 040310K
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384
Course coordinator: Dr R.Mahalinga-Iyer
Discipline coordinator: Dr Jon Bunker

Professional Recognition
This course has provisional accreditation from Engineers Australia (EA).

Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Other options
This course is also offered as an accelerated program for mid-year entry students. The course can be completed in three and a half years full-time through attendance at the Summer Program.

Special Course Requirements
A candidate for the degree of Bachelor of Engineering (Civil and Environmental Management) must obtain at least 60 days of industrial experience/practice in an engineering environment approved by the course coordinator.

Bachelor of Engineering (Civil) EN40

Award title:
CRICOS code: 056529D
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr R.Mahalinga-Iyer
Discipline coordinator: Dr Jon Bunker

Professional Recognition
Professional accreditation from Engineers Australia will be sought

Minors
You will have the opportunity to undertake two minors; a minor is four units (48 credit points) in the same discipline. For professional recognition you will undertake an Applications minor which consists of a Work Place Integrated Learning unit, a project unit and two specialised civil engineering units. The second minor may be taken from an approved list outside your discipline.

Early exit option
After completing a designated program you will have the option to exit after 3 years with a Bachelor of Technology (Civil). To be eligible for this option, students must advise the Course Coordinator of their intention by the end of Year 2 at the latest.

Mid-year Entry
This course is also offered as an accelerated program for mid-year entry students, in which the course can be completed in three and a half years full-time through attendance at the Summer Program.

Applicants who are offered place and eligible to receive 72 credit points (or more) of advanced standing will be admitted to the CE45 Bachelor of Engineering (Civil).

Special Course Requirements
A candidate for the degree of Bachelor of Engineering (Civil) must obtain at least 60 days of industrial experi-
ence/practice in an engineering environment as approved by the course coordinator.

- ENB472 Project Engineering 2

**Major/Application Minor Unit**

**Year 4, Semester 2**

**Bachelor of Engineering (Computer Systems) EE46**

- **Award title:** Bachelor of Engineering (Computer Systems)
- **CRICOS code:** 040309C
- **Campus:** Gardens Point
- **Duration:** 4 years full-time
- **Credit points:** 384 (full-time standard semester: 48)
- **Course coordinator:** Dr R. Mahalinga-Iyer
- **Discipline coordinator:** Dr Bouchra Senadji

**Professional Recognition**

The course is provisionally accredited by Engineers Australia (EA).

**Minors**

Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

**Optional Pathways**

Students entering the Bachelor of Engineering (Electronics)/Bachelor of Information Technology course or the Bachelor of Engineering (Telecommunications) course can change to the Bachelor of Engineering (Computer Systems) at the end of the first year without loss of credit, subject to approval from the course coordinator and meeting minimum course requirements.

**Special Course Requirements**

Students must complete at least 60 days industrial experience in order to graduate.

**Course structure**

**Year 2, Semester 1**
- EEB312 Analog and Digital Electronics

EE889-1 Project

Year 4, Semester 2
EE889-2 Project

Special Course Requirements
To graduate, students must complete at least 60 days industrial experience in an engineering environment which is approved by the course coordinator.

Course coordinator: Dr R. Mahalinga-Iyer
Discipline coordinator: Dr Bouchra Senadji

Industry Cooperative Education Program
High achieving domestic students in third year may also be eligible to participate in the Industry Cooperative Education Program, based on a three-way partnership between the student, University and industry, and involving a full-time, one semester, paid and supervised workplace position with the industry partner.

Articulation to Masters
Subject to University approval, students achieving a certain minimum performance criteria at the end of year 3 of the Bachelor of Engineering course, may be eligible to study two Master of Engineering Science level units as electives.

After successfully completing the Bachelor of Engineering course, students eligible to enrol in the Master of Engineering Science courses can then have these two units credited towards the Masters Program.

Cooperative Education Program. (See Course Structure.)
EEB941 Modern Signal Processing
EEB960 Wireless Communications
EEB961 RF and Applied Electromagnetics
EEB976 Advanced Industrial Electronics
EEB992 VLSI Circuits and Systems

Note:
At the discretion of the course coordinator students maybe allowed to select an elective from any advanced topics offered by the University.

Course Structure - EE42-Mid-year entry

General Elective

Note:
At the discretion of the course coordinator students maybe allowed to select an elective from any advanced topics offered by the University.

Course structure - Industry Cooperative Education Program

Year 3, Semester 1
EEB511 Modern Control and Power Electronics
Students must obtain at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

Electives
Refer to elective list under Full-time Course Structure.

- Bachelor of Engineering (Electrical) EN40

Award title: CRICOS code: 056529D
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr R.Mahalinga-Iyer
Discipline coordinator: Dr Bouchra Senadji

Professional recognition
Professional accreditation from Engineers Australia (EA) will be sought.

Minors
You will have the opportunity to undertake two minors; a minor is four units (48 credit points. For professional recognition you will undertake Applications minor which consists of a project unit and specialised engineering units. The second minor may be taken from an approved list. outside your discipline.

Mid-year Entry
This course is also offered as an accelerated program for mid-year entry students, in which the course can be completed in three and a half years full-time through attendance at the Summer Program.

Applicants who are offered place and eligible to receive 72 credit points (or more) of advanced standing will be admitted to the EE42 Bachelor of Engineering (Electrical and Computer Engineering).

Special Course Requirements
To graduate, students must complete at least 60 days industrial experience in an engineering environment which is approved by the course coordinator.

Professional Recognition
Professional accreditation from Engineers Australia (EA) will be sought.

Minors
You will have the opportunity to undertake two minors; a minor is four units (48 credit points). For professional recognition you will undertake an Applications minor which consists of a Work Place Integrated Learning unit, a project unit and 2 specialised engineering units. The second minor may be taken from an approved list outside your discipline.

Special Course Requirements
A candidate for the degree of Bachelor of Engineering (Mechanical) must complete at least 60 days of industrial experience/practice in an engineering environment approved by the course coordinator.

Early Exit Option
After completing a designated program you may have the option to exit after 3 years with a Bachelor of Technology (Mechanical). To be eligible for this option, students must advise the Course Coordinator of their intention by the end of Year 2 at the latest.

Mid-year Entry
This course is also offered as an accelerated program for mid-year entry students, in which the course can be completed in three and a half years full-time through attendance at the Summer Program.

Applicants who are offered place and eligible to receive 72 credit points (or more) of advanced standing will be admitted to the ME42 Bachelor of Engineering (Mechanical).

MMB212 Mechanics 2
MMB232 Materials Technology
MMB252 Thermofluids

Year 3, Semester 1
MMB311 Mechanics 3
MMB352 Fluid Mechanics
MMB371 Manufacturing Processes
MMB381 Design of Mechanical Components and Machines

Year 3, Semester 2
MMB376 Professional Practice (Engineering Management)
MMB385 Thermodynamics
MMB392 Design and Maintenance of Machinery

Elective from Group A

Year 4, Semesters 1 and 2
Option 1
MMB400 Industry Project
3 electives from Group A and 1 elective from Group B
Option 2
MMB401-1 Project
MMB401-2 Project
3 electives from Group A and 1 elective from Group B

Note:
Students in this course must complete 60 days industrial experience before graduating.

Engineering Management Major
Students wishing to undertake the Engineering Management major should consult their course coordinator.

Year 3, Semester 2
MMB376 Professional Practice (Engineering Management)
MMB385 Thermodynamics
MMB392 Design and Maintenance of Machinery

Year 4, Semester 1
MMB470 Engineering Asset Management and Maintenance
MMB375 Industrial Engineering
Two units electives from Group C.

Year 4, Semester 2
MMB402-1 Engineering Management Project
MMB402-2 Engineering Management Project

Electives - Group A
MMB353 Tribology
MMB375 Industrial Engineering
MMB411 Advanced Automatic Control
MMB412 Finite Element Analysis
MMB413 Industrial Noise and Vibrations
MMB430 Advanced Materials
MMB450 Air Conditioning
MMB451 Energy Management
MMB461 Process Systems Design
MMB471 Computer Integrated Manufacturing
MMB472 Design for Manufacturing 2
Any unit from another Faculty approved by the Course Coordinator.

Electives - Group B
MMB470 Engineering Asset Management and Maintenance
MMB476 Operations Management
Any Management unit approved by the Course Coordinator.

Electives Group C
AMB240 Marketing Planning and Management
BSB122 Quantitative Analysis and Finance
MGB211 Organisational Behaviour
MMB451 Energy Management

Electives Note
Not all electives are available every semester. MMB430 is available in odd years only, MMB450 is available in even years only. MMB451, MMB461, MMB472 and MMB470 are available in semester 1 only. MMB411 (odd years), MMB413 (even years), MMB471 and MMB476 are available in semester 2 only.

ME42 BEngineering (Mechanical) Mid-year entry

Year 1: Summer Program
- MAB132 Engineering Mathematics 1B
- MMB112 Dynamics
- BSB115 Management, People and Organisations

Note: BSB115 is to be taken by international students requiring a full-time load in lieu of MGB007.

Year 2, Semester 1
- ENB104 Engineering Materials
- MAB133 Engineering Mathematics 2
- MMB211 Mechanics 1
- MMB281 Fundamentals of Mechanical Design

- MMB352 Fluid Mechanics
- MMB371 Manufacturing Processes
- MMB381 Design of Mechanical Components and Machines

Year 3, Semester 2
- MMB376 Professional Practice (Engineering Management)
- MMB351 Thermodynamics
- MMB382 Design and Maintenance of Machinery

Group A - Elective

Year 4, Semester 1 or 2 Option 1
- MMB400 Industry Project
  3 Group A Electives
  1 Group B Elective

Year 4, Semester 1 or 2 Option 2
- MMB401-1 Project
- MMB401-2 Project
  3 Group A Electives
  1 Group B Elective

Engineering Management Major
See February entry, ME41 B Engineering (Mechanical)

Group A Electives
- MMB375 Industrial Engineering
- MMB411 Advanced Automatic Control
- MMB413 Industrial Noise and Vibrations
- MMB451 Energy Management
- MMB461 Process Systems Design
- MMB471 Computer Integrated Manufacturing
- MMB472 Design for Manufacturing 2
- MMB412 Finite Element Analysis
- MMB430 Advanced Materials
- MMB450 Air Conditioning
- MMB353 Tribology

Any unit approved by the Course Coordinator.

Group B Electives
- MMB470 Engineering Asset Management and Maintenance
- MMB476 Operations Management

Any management unit approved by the Course Coordinator.

Electives Note
See above, ME41 B Engineering (Mechanical), for semesters of offer.

Bachelor of Engineering (Medical) EN40

Award title:
CRICOS code: 056388A
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)

Course coordinator: Dr R. Mahalinga-Iyer
Discipline coordinator: Dr Gary Chadwick

Professional Recognition
Professional accreditation from Engineers Australia (EA) will be sought.

Special Course Requirements
Students must obtain at least 60 days of industrial employment in an engineering environment approved by the course coordinator. Half of this experience must be in an industry related to Biomedical Engineering.

Course structure
Year 1, Semester 1
- ENB101 Engineering Mechanics 1
- LSB142 Human Anatomy and Physiology
- MAB131 Engineering Mathematics 1A
- PCB136 Engineering Physics 1C

Year 1, Semester 2
- BEB100 Introducing Professional Learning
- ENB103 Electrical Engineering
- MAB132 Engineering Mathematics 1B
- PCB136 Engineering Physics 1C

Year 2, Semester 1
- ENB211 Dynamics
- ENB231 Materials and Manufacturing 1
- HMB274 Functional Anatomy
- MMB211 Mechanics 1

Year 2, Semester 2
- BEB200 Introducing Sustainability
- ENB201 Fluid Mechanics
- ENB215 Fundamentals of Mechanical Design
- ENB222 Thermodynamics 1

Year 3, Semester 1
- ENB105 Electrical and Computer Engineering
- ENB311 Stress Analysis
- ENB319 Biomedical Engineering Design
- MAB233 Engineering Mathematics 3

Year 3, Semester 2
- ENB318 Biomechanical Engineering Systems
- ENB322 Biofluids
- ENB335 Modelling and Simulation for Medical Engineers
- ENB338 Biomaterials

Year 4, Semester 1
- BEB801 Project 1
- ENB301 Instrumentation and Control
- MMB432 Engineering Asset Management & Maintenance Applications Minor

Year 4, Semester 2
- BEB701 Work Integrated Learning 1
BEB802 Project 2
ENB437 Health Legislation in the Medical Environment
PCB605 Biomedical Instrumentation

**Bachelor of Engineering (Medical) ME48**

**Award title:** Bachelor of Engineering (Medical)

**CRICOS code:** 003490G

**Campus:** Gardens Point

**Duration:** 4 years full-time

**Credit points:** 384

**Course coordinator:** Dr R.Mahalinga-Iyer

**Discipline coordinator:** Dr Gary Chadwick

**Professional Recognition**

This course is accredited by Engineers, Australia (EA).

**Special Course Requirements**

Students must obtain at least 60 days of industrial employment in an engineering environment approved by the course coordinator. Half of this experience must be in an industry related to Biomedical Engineering.

**Articulation to Masters**

Subject to University approval, students achieving a minimum performance criteria at the end of year 3 of the Bachelor of Engineering course, may be eligible to study two Master of Engineering Science or Master of Engineering Management units as electives. After successfully completing the Bachelor of Engineering course, students eligible to enrol in the Master of Engineering Science or Master of Engineering Management courses can then have these two units credited towards the Masters Program.

**Course structure**

**Year 2, Semester 1**
- HMB274 Functional Anatomy
- MAB133 Engineering Mathematics 2
- MMB211 Mechanics 1
- MMB281 Fundamentals of Mechanical Design

**Year 2, Semester 2**
- ENB103 Electrical Engineering
- MAB136 Engineering Statistics
- MMB252 Thermofluids
- MMB292 Biomaterials
  - even years only
  - or
- MMB362 Biofluids
  - odd years only

**Year 3, Semester 1**
- EEB220 Electrical Engineering 2M
- MMB311 Mechanics 3
- MMB371 Manufacturing Processes
- MMB391 Biomechanical Engineering Systems

**Year 3, Semester 2**
- MMB252 Biomaterials
  - even years only
  - or
- MMB362 Biofluids
  - odd years only
- MMB376 Professional Practice (Engineering Management)
- MMB392 Bioengineering Design 2
- PCB605 Biomedical Instrumentation

**Year 4, Semester 1**
- MMB409-1 Project
- MMB470 Engineering Asset Management and Maintenance
  - Elective from list A

**Year 4, Semester 2**
- MMB409-2 Project
- MMB492 Health Legislation and the Medical Environment
  - Elective from list B

**Elective List A**
- MMB494 Rehabilitation Equipment Design and Evaluation
- PUB112 Workplace Health and Safety
- Any other elective approved by the Course Coordinator.

**Elective List B**
- MMB411 Advanced Automatic Control
- MMB412 Finite Element Analysis
- MMB496 Modelling and Simulation for Medical Engineers
- PCB805 Medical Imaging and Image Processing
- Any other elective approved by the Course Coordinator.
- MMB411 is offered in odd years only

**Bachelor of Engineering (Telecommunications) EE47**

**Award title:** Bachelor of Engineering (Telecommunications)

**CRICOS code:** 040308D

**Campus:** Gardens Point

**Duration:** 4 years full-time

**Credit points:** 384 (full-time standard semester: 48)

**Course coordinator:** Dr R.Mahalinga-Iyer

**Discipline coordinator:** Dr Bouchra Senadji

**Professional Recognition**

The course is provisionally accredited by Engineers Australia (EA).

**Minors**

Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

**Optional Pathway**

Students entering the Bachelor of Engineering (Electronics)/Bachelor of Information Technology course or the Bachelor of Engineering (Computer Systems) course may transfer to the Bachelor of Engineering (Telecommunications) at the end of the first year without loss of credit, subject to approval from the course coordinator, and meeting minimum course requirements.

**Special Course Requirements**

Students must complete at least 60 days of industrial experience in order graduate.

**Course structure**

**Year 2, Semester 1**
- EEB312 Analog and Digital Electronics
- EEB340 Introduction to Telecommunications
- ITB711 Programming Abstraction
- MAB134 Electrical Engineering Mathematics 3

**Year 2, Semester 2**
- EEB412 Advanced Electronics and Embedded Systems
- EEB440 Classical Signal Processing
- MAB134 Electrical Engineering Mathematics 3

**Year 3, Semester 1**
- EEB560 Digital Communications
- EEB584 Introduction to Design
- ITB720 Internet Protocols and Services
- ITB723 Wireless and Mobile Devices

**Year 3, Semester 2**
Any language offered by QUT.

Note:
Please check unit availability as not all units are offered every year.
At the discretion of the course coordinator, students may be allowed to select an elective from any advanced topics offered by the University. Also potential honours students may, with the approval of the course coordinator, select an elective from the postgraduate degree courses offered by the School of Engineering Systems.

Bachelor of Engineering (Telecommunications) EN40

Award title:
CRICOS code: 056529D
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr R Mahalinga-Iyer
Discipline coordinator: Dr Bouchra Senadji

Professional Recognition
Professional accreditation from Engineers Australia (EA) will be sought.

Optional Pathways
If you enter the Bachelor of Engineering (Electrical)/Bachelor of Information Technology course or the Bachelor of Engineering (Computer Systems) course, subject to the approval of the course coordinator, and if you meet the minimum course requirements you can apply to change to the Bachelor of Engineering (Telecommunications) at the end of the first year without loss of credit.

Special Course Requirements
To graduate you must complete at least 60 days of approved industrial experience in an engineering environment.

Course structure
Year 1, Semester 1
BEB100 Introducing Professional Learning
ITB001 Problem Solving and Programming
MAB131 Engineering Mathematics 1A
OR
MAB180 Engineering Mathematics 1
PCB136 Engineering Physics 1C
Year 1, Semester 2
ENB103 Electrical Engineering
ITB711 Programming Abstraction
MAB233 Engineering Mathematics 3
Year 2, Semester 1
ENB242 Introduction to Telecommunications
ENB243 Linear Circuits and Systems
ENB244 Microprocessors and Digital Systems
IT Elective
Year 2, Semester 2
ENB242 Introduction to Telecommunications
ENB243 Linear Circuits and Systems
ENB244 Microprocessors and Digital Systems
IT Elective
Year 3, Semester 1
ENB341 Introduction to Design
ENB342 Signals, Systems and Transforms
ENB343 Fields Transmission and Propagation
Bachelor of Property Economics CN54

Award title: Bachelor of Property Economics
CRICOS code: 040319A
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 or 288 for 3 years early exit option
Course coordinator: Dr John Hayes
Discipline coordinator: Ms Connie Susilawati

Special Course Requirements
All students must undertake 60 days' professional work experience during the course as part of CNB390 Professional Practice. All work experience must approved by the course coordinator to verify that it is appropriate. A work experience diary is to be maintained and available for inspection by the unit coordinator as a formal assessment component.

A student registered in the flexible or part-time study program must be employed full-time in an approved organisation for three of the final four years of the course. Part-time study generally involves around 8 formal contact hours per week and some release from employment is required.

Professional Recognition
Graduates with relevant professional experience are eligible for membership of the Australian Property Institute and registration by the Valuers' Registration Board of Queensland. The course is accredited by the Royal Institution of Chartered Surveyors. Accreditation by the Singapore Institute of Surveyors and Valuers will be sought in 2004.

Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. This will not affect the total number of credit points required for course completion. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Special Note
Students may elect to complete their studies on the completion of 3 years (or flexible part-time equivalent). Students who select this option will graduate with a Bachelor of Applied Science (Property Economics) degree. This degree provides full domestic accreditation with the Australian Property Institute and Valuers' Registration Board of Queensland. Students graduating on the four year program have the potential to graduate with honours according to their overall grade point average.

Course structure
Australia: The Bachelor of Surveying degree meets the requirements for membership of The Spatial Science Institute (Incorporating the Institution of Surveyors, Australia, the Institution of Engineering and Mining Surveyors, Australia and the Mapping Sciences Institute, Australia).

Overseas: Surveying graduates are readily accepted internationally.

Minors
Subject to the approval of the course coordinator, students may be able to choose a minor area of study. A minor is a collection of four units, from the one study area, that totals 48 credit points. Students may choose from the list of minors, available from the office of the Faculty of Built Environment and Engineering.

Special Course Requirements
Students are required to attend compulsory field practicals off-campus in the Moreton Region and have access to an advanced scientific calculator for use during the course. Students must obtain at least 90 days of industrial experience/practice in a surveying/mapping environment, approved by the course coordinator.

Course structure

**Year 2, Semester 1**
- MAB137 Surveying Mathematics 1
- PSB610 Government and Law
- PSB620 Cadastral Surveying and Mapping
- PSB630 Cartography and Digital Mapping

**Year 2, Semester 2**
- MAB730 Surveying Mathematics 2
- PSB611 Introduction to Urban and Regional Economics
- PSB631 Geographic Information Systems 1
- PSB641 Engineering Surveying

**Year 3, Semester 1**
- CEB259 Engineering Design for Land Development
- PSB612 Spatial and Land Information Management
- PSB642 Control Surveying and Analysis
- Elective

**Year 3, Semester 2**
- PSB613 Land Development Principles and Policies
- PSB632 Photogrammetry
- PSB643 Geodesy
- Elective

**Year 4, Semester 1**
- PSB614 Urban and Rural Design Principles
- PSB633 Map Production: Principles and Practice
- PSB644 Advanced Geodesy
- Elective/Project

**Year 4, Semester 2**
- PSB615 Urban and Rural Design Practice
- PSB621 Advanced Cadastral Surveying
- PSB645 Surveying and Mapping Practice
- Elective/Project

Students in this course must complete 90 days industrial experience before graduating.

Recommended Surveying Electives

**Year 3, Semester 1**
- PSB655 Remote Sensing

**Year 3, Semester 2**
- PSB652 Topics in Land Administration

**Year 4, Semester 1**
- PSB655 Remote Sensing
- PSB654 Topics in Spatial Information Science
- PSB650 Project 1

**Year 4, Semester 2**
- PSB652 Topics in Land Administration
- PSB653 Topics in Surveying Engineering
- PSB651 Project 2

**Bachelor of Urban Development (Construction Management) UD40**

**Award title:**
CRICOS code: 056387B
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)

**Course coordinator:** Dr John Hayes

**Discipline coordinator:** Mr Paul Den Ronden

**Special Course Requirements**
All students are required to obtain a minimum of 100 days of approved industrial experience.

**Professional Recognition**
Recognition is being sought from the Australian Institute of Building and the Australian Institute of Building Surveyors.

**Minors**
For accreditation purposes you are required to undertake specified minors which will include employment practice.

Course structure

**Year 1, Semester 1**
- BEB100 Introducing Professional Learning
- UDB101 Stewardship of Land
- UDB110 Residential Construction and Engineering
- UDB111 Engineering Construction Materials

**Year 1, Semester 2**
- BEB200 Introducing Sustainability
- UDB104 Urban Development Economics
- UDB112 Professional Studies 1
- UDB113 Measurement 1

**Year 2, Semester 1**
- UDB210 Commercial Construction and Engineering
- UDB202 Business Skills
- UDB214 Professional Studies 2
- UDB215 Building Services Engineering

**Year 3, Semester 1**
- UDB310 Highrise Construction and Engineering
- UDB311 Structural Engineering Design
- UDB312 Contract Administration

**Year 3, Semester 2**
- UDB314 Statutory Construction Law

Bachelor of Urban Development (Urban and Regional Planning) UD40

Award title:
CRICOS code: 056387B
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr John Hayes
Discipline coordinator: Associate Professor Phil Heywood

Professional Recognition
Accreditation with Australian Institute of Quantity Surveyors and the Royal Institution of Chartered Surveyors (honours version only) is currently being sought.

Minors
You will have the opportunity to undertake a minor (4 Units from one discipline area) which can be used to extend your construction knowledge into more advanced and specialised construction issues. Alternately, the minor can be used to broaden students' education by undertaking units from other faculties within the university subject to accreditation requirements.

Course structure
Year 1, Semester 1
BEB100 Introducing Professional Learning
BEB200 Introducing Sustainability
UDB101 Stewardship of Land
UDB161 Introduction to Planning and Design
UDB162 History of Built Environment

Year 1, Semester 2
BEB200 Introducing Sustainability
UDB104 Urban Development Economics
UDB110 Residential Construction and Engineering
UDB163 Land Use Planning
UDB164 Population and Urban Studies

Year 2, Semester 1
UDB265 Site Planning
UDB266 Planning Processes and Consultations
UDB267 Development Assessment and Infrastructure

Year 2, Semester 2
UDB368 Urban Design
UDB369 Negotiation and Conflict Resolution

Year 3, Semester 1
UDB301 Research Methods
UDB315 Measurement 3

Year 3, Semester 2
UDB320 Development Process
UDB412 Dissertation

Year 4, Semester 1
UDB301 Research Methods
UDB411 Professional Practice
UDB315 Measurement 3

Year 4, Semester 2
UDB302 Development Process
UDB412 Dissertation

Year 5 - Semester 1
UDB312 Contract Administration

Q U T H A N D B O O K  2 0 0 6  P A G E  9 7
Advanced Diploma in Engineering (Mechanical)/Bachelor of Technology (Mechanical) ME37

Award title: Bachelor of Technology (Mechanical)
CRICOS code:
Campus: Gardens Point
Duration: 3 years full-time
Credit points: 288 (including 120 cp advanced standing)
Course coordinator: Dr R. Mahalinga-Iyer
Discipline coordinator: Dr Vladis Kosse

Professional Recognition
This course has provisional accreditation from Engineers Australia (EA).

Special Course Requirements
Students must obtain at least 50 days of industrial experience with a minimum of 25 days in an engineering environment approved by the course coordinator.

Course structure

Year 1, Semester 1 - TAFE
MEM30.2A Produce basic engineering graphics (with MEM30.3A)
MEM30.3A Produce engineering drawings (with MEM30.2A)
MEM16.8A Interact with computer technology
MEM12.25B Use graphical techniques & perform simple Statistical computations (with MEM23.41A)
MEM23.41A Apply basic scientific principles and techniques in mechanical engineering situations (With MEM12.25A)
MEM12.24A Perform Computations (with MEM30.12A)
MEM30.12A Apply mathematical techniques (with MEM12.24A)
MEM30.1A Use CAD systems to produce basic engineering drawings
MEM30.7A Select common Engineering Materials (with MEM23.61A Semester 2)
CEA101 Civil engineering maths (Southbank)

Year 1, Semester 2 - TAFE
MEM9.5B Perform basic engineering detail drafting
MEM23.61A Select and test mechanical engineering materials (with MEM30.7A Semester 1)
MEM23.71A Select and Apply mechanical engineering method, processes and construction techniques
MEM30.5A Calculate force systems within simple beam structures
MEM23.41A Apply basic scientific principles and techniques in mechanical engineering situations (continue from semester 1)
CEA108 Advanced Mathematics (Southbank)

Year 2, Semester 1 - TAFE/QUT
MEM30.8A Apply basic economic and ergonomic concepts to evaluate engineering applications
MEM23.81A Apply scientific principles and techniques in mechanical engineering situations
MEM23.3A Operate and program computers and or controllers in engineering situations
MEM30.6A Calculate stresses in simple structures
MEM23.91A Apply mechanical system design principles and techniques in mechanical engineering situations
MEM23.51A Apply Basic electro and control scientific principles and techniques in mechanical manufacturing engineering situations
MAB132 Engineering Mathematics 1B
MMB211 Mechanics 1
Elective

Year 2, Semester 2 - TAFE/QUT
MEM22.1A Perform Engineering Activities (Occupational Health & Safety)
MEM22.1A Perform Engineering Activities (Machining)
MEM22.1A Perform Engineering Activities (Hand & Power tools)
ENB103 Electrical Engineering
MAB136 Engineering Statistics
MMB232 Materials Technology

Year 3, Semester 1 - QUT
EEB220 Electrical Engineering 2M
MMB300 Project 2T
MMB371 Manufacturing Processes
MMB381 Design of Mechanical Components and Machines

Year 3, Semester 2 - QUT
MMB252 Thermofluids
MMB212 Mechanics 2
MMB312 Mechanical Measurement
MMB376 Professional Practice (Engineering Management)

Note:
MMB, EEB and MAB units = QUT units.

Associate Degree in Civil Engineering/Bachelor of Technology (Civil) CE35

Award title: Bachelor of Technology (Civil)
CRICOS code:
Campus: Gardens Point
Duration: 3 years full-time
Credit points: 288
Course coordinator: Dr R. Mahalinga-Iyer
Discipline coordinator: Dr Jon Bunker

Professional Recognition
The course has provisional recognition by Engineers Australia.

Dual TAFE/QUT Awards
This dual award is a cooperative arrangement between Southbank Institute (SBI) and the Faculty of Built Environment and Engineering, Queensland University of Technology. Initial entry is to a specially designed two-year associate degree at SBI, followed by a third year at QUT, to qualify for the Bachelor of Technology degree. In their second year students study units from QUT and SBI which form part of the Advanced Diploma, and in third year students study one module at SBI together with their QUT units to complete their Bachelor of Technology (Civil) degree.

Subject to final approval.

Special Course Requirements
A candidate for the degree of Bachelor of Technology (Civil) must obtain at least 45 days of industrial experience/practice in an engineering environment approved by the course coordinator.

Course structure

Please Note:
SBIT: 1st Trimester - February-May
2nd Trimester - June-July
3rd trimester - August-December
QUT: 1st Semester - February-July
2nd Semester - July-October

Year 1 - Trimester 1 - SBIT
NBB012 Engineering Drawing Interpretation 1
EA061 Engineering Graphics
EA050 Engineering Computing
BUILT ENVIRONMENT AND ENGINEERING

EA859 Statics  
EB004 University Mathematics 1  
EA860 Surveying Computations  
EA861 Surveying Principles  
NBB002 Occupational Health and Safety  

Year 1 - Trimester 2 - SBiT  
EA065 Computer Aided Drafting B  
EA820 Engineering Surveying 1  
EA812 Drafting Reinforced Concrete 1  
NBB005 Quality Concepts  
EA071 Planning, Estimating and Costing  
EA027 Presenting Reports  
EA033 Writing Workplace Documents  
EA850 Civil Construction Techniques A  
EA851 Civil Construction Techniques B  
EB851 Environment Engineering  
EA805 Load Analysis  
EB006 University Mathematics 2  
OR  
EB870 Engineering Surveying  

Year 1 - Trimester 3 - SBiT  
EA065 Computer Aided Drafting B  
EA820 Engineering Surveying 1  
EA812 Drafting Reinforced Concrete 1  
NBB005 Quality Concepts  
EA071 Planning, Estimating and Costing

OVERVIEW

Business is QUT's largest faculty, attracting over a quarter of the University's enrolments and is also one of the largest business faculties in Australia.

Through various collaborations with industry and professional bodies, we are a key player in the business community with extensive local and international links.

We are the first business school in Australia to have our business courses accredited by the three leading international bodies – EQUIS (the accrediting body of the European Foundation of Management Development), AACSB International (The Association to Advance Collegiate Schools in Business) and AMBA (the Association of MBAs). This ‘triple crown’ of international accreditation means your QUT business degree is even better recognised by employers globally.

We know what employers want in today's business graduates - because we ask them. We regularly involve representatives from the business community in the development and review of our courses. And we employ part-time lecturers and tutors currently working in business.

As a student, you will be encouraged to undertake real-world projects to help you develop your own strong links. And you can take advantage of our extensive exchange program and our international study tours options.

This strong practical component of our courses is complemented by our academic excellence. The diversity of interests, experiences, and expertise of our locally and internationally drawn academic staff creates a rich learning and research environment.

Our innovative 'Business Advantage' program develops business graduates who can contribute effectively as citizens, as leaders in the wider community, and as competent professionals within their chosen disciplines. A variety of short programs provide skills in areas such as leadership, teamwork, public speaking and entrepreneurship. The program also provides the opportunity to work with other students on community projects, development programs, and participate in conferences and seminars.

As a QUT business graduate you will enter the business community with the acumen and entrepreneurial skills needed to turn any good idea into a successful enterprise within today's competitive international environment. And you will be able to anticipate the business challenges and opportunities of the future.

Undergraduate

We recognise that in the ever-changing world of business you need a solid foundation in business principles along with the flexibility to pursue studies in multiple areas. Our Bachelor of Business includes eight core units which will equip you with generic skills and competencies for today's business environment. You also have the opportunity to tailor your studies to suit your own needs and career aspirations. Students enrolling at our Gardens Point campus will choose a major from:

- Accounting
- Advertising
- Banking & Finance
- Economics
- Electronic Business
- Human Resource Management
- International Business

- Management
- Marketing
- Public Relations.

You will then choose other business study areas to steer your future career direction. You can:

- maximise your career options with an added breadth of knowledge by completing another of the business majors
- add a depth of knowledge in your area of interest by extending your studies within the primary business major
- add a flavour or emphasis to your degree with study in another of our business areas.

You will also choose elective units from Business or other faculties within QUT. We encourage you to consider utilising these electives to complete an approved University minor. Double degrees are also a popular option. A number of combinations are available, giving you expanded career options and a competitive edge on graduation.

The Bachelor of Business is also available at the Caboolture campus, with majors in marketing, management, and a minor in small business management.

Our first year program at Carseldine campus allows you to commence study before choosing your business major. At the end of your first year you'll move into their major of choice at our Gardens Point or Caboolture campus.

Postgraduate

There are many reasons for considering postgraduate study. Whether you're looking for career advancement, a change in career direction, personal development, or research opportunities we can help you with postgraduate studies to suit your needs. Choose from:

- Honours
- Graduate Certificate
- Masters (Coursework & Research)
- MBA
- PhD.

Coursework Programs

Our postgraduate programs allow you to enhance your career options by building on existing qualifications, or change careers through study in a different field. For non-degree holders, we offer alternative pathways that build on your work experience.

You can choose from a focused, four-subject Graduate Certificate to a 12-subject coursework Masters qualification in:

- Accounting
- Advertising
- Applied Finance
- Business Administration (MBA)
- Event Marketing and Management
- Human Resource Management
- Integrated Marketing Communication
- International Business
- Marketing
- Philanthropy & Nonprofit studies
- Public Management
- Public Relations.

Innovative MBA Programs

We also offer one of Australia's most innovative MBAs, giving you greater choice and flexibility when designing your course. With shorter, sharper units, you'll cover a wide
range of core units and have a greater choice of electives. This opportunity for greater depth and breadth of knowledge gives you a distinct career advantage.

The MBA is available in a variety of delivery options including our International MBA, which allows students to complete one semester of study overseas. Our Executive MBA is a tailored program for more experienced managers offered in an intensive, flexibly delivered format.

Our MBA was one of three Australian MBAs to be recognised in the ‘Top 100 MBAs of 2004’ in the Financial Times, and in 2005 was ranked as a 'top tier' Australian MBA program by the BOSS magazine from the Australian Financial Review.

Extensive Research Opportunities

As well as being highly respected for the quality of our postgraduate coursework teaching, the Faculty also provides extensive research opportunities.

Our researchers engage in collaborative, cross disciplinary research that impacts on the domestic and international business communities. The Australian Centre for Business Research, housed within the Business Faculty, links QUT's business research strengths to solving industry, government and community problems.

We also offer professional development programs, and contract research and consultancy services. And because we believe in giving something back to the community, our staff - individually and in groups - engage in a wide range of community service activities.

We are a business faculty for the real world.

SENIOR STAFF

Faculty Office
Executive Dean: Professor P. Little, LLB LLM Qld, PhD Bond

Assistant Dean/Director of Accreditations: Associate Professor L. Simpson, DipT Mt Gravatt CAE, BEd Brisbane CAE, MEd James Cook

Director of Research: Professor K.A. Brown, BA(Hum) PhD Griffith, BA(Hons) Murd

Director of Undergraduate and Graduate Studies: A. Patridge, BA BEd(Hons) MEd Qld, GradCert(HigherEd) Griffith

R. Waldersee, BA MA(Psych) Syd, MA(ClinPsych) PhD UN-L

RESEARCH CENTRES

Australian Centre for Business Research
The Australian Centre for Business Research, established in 2003, is a Centre of excellence in business research in Australia and conducts leading research that impacts on both the domestic and international research and business communities. The Centre supports four Major Programs which undertake large scale, high profile research in:

- Applied Modelling in Economics and Finance Research Program;
- Service Leadership and Innovation Research Program;
- Work Effectiveness Research Program; and
- Work and Industry Futures Research Program.

The Faculty fosters a vibrant research community that achieves excellence in targeted areas of business research and supports collaborative, cross-disciplinary and new research to inform and serve business, industry, government and the community. The Centre supports all postgraduate research study undertaken within the Faculty.

Enquiries to Jenny Worthington, Senior Administration Officer, Research Support Office. Phone 07 3138 1407 Email bus.research@qut.edu.au

Centre for Philanthropy and Nonprofit Studies
The Centre for Philanthropy and Nonprofit Studies was established in 2001 as a QUT Collaborative Centre, and aims to bring to the community the benefits of teaching, research, technology and service relevant to philanthropic and nonprofit communities.
The Centre builds on the work of the Program on Nonprofit Corporations (PONC) established in the School of Accounting within the Faculty of Business in 1991. Between 1991 and 2001 the Program involved various QUT staff in research, consultancy and community service in the areas of law, taxation, management, marketing, fundraising and ethics of nonprofit, and philanthropic organisations.

Director: Professor Myles McGregor-Lowndes, BA LLB Qld, MAdmin PhD Griff, JP, Solicitor of Supreme Court of Queensland and High Court of Australia

  - BSN506 Econometric Methods
- Plus two Economics units:
  - EFN500 Contemporary Macroeconomic Theory
  - EFN502 Developments in Microeconomic Theories
- Plus one Elective unit:
  - This elective unit may be taken from any approved 12 credit point postgraduate unit offered by the Faculty of Business, subject to approval of the Subject Area Coordinator.
**Entrepreneurship & Innovation**

Students must complete three prescribed units (36 credit points), one elective unit (12 credit point), and a thesis (96 credit points) as follows:

- **Three Compulsory Core units:**
  - GSN234 Contemporary Issues in Entrepreneurship
  - BSN502 Research Methodology
  - BSN503 Research Seminar

- **Plus one Elective unit:**
  This elective unit may be taken from any approved 12 credit point postgraduate unit in the specialisation area (Entrepreneurship & Innovation), subject to approval of the Subject Area Coordinator.

- **Plus:**
  - BSN600-1 Thesis
  - BSN600-2 Thesis
  - BSN600-3 Thesis
  - BSN600-4 Thesis
  - BSN600-5 Thesis
  - BSN600-6 Thesis
  - BSN600-7 Thesis
  - BSN600-8 Thesis

**Human Resource Management**

Under the umbrella of Human Resources Management, students may also be able to undertake a thesis in Employee Relations.

Students must complete four units (48 credit points) and a thesis (96 credit points) as follows:

- **Two Compulsory Core units:**
  - BSN502 Research Methodology
  - BSN503 Research Seminar

- **Plus:**
  - Elective unit
  - Elective unit

The elective units may be undertaken from any 12 credit point postgraduate unit offered in the School of Management or other postgraduate unit, with the approval of the subject area coordinator.

- **Plus:**
  - BSN600-1 Thesis
  - BSN600-2 Thesis
  - BSN600-3 Thesis
  - BSN600-4 Thesis
  - BSN600-5 Thesis
  - BSN600-6 Thesis
  - BSN600-7 Thesis
  - BSN600-8 Thesis

**International Business**

Students must complete two prescribed units (24 credit points), two elective units (24 credit points), and a thesis (96 credit points) as follows:

- **Two Compulsory Core units:**
  - BSN502 Research Methodology
  - BSN503 Research Seminar

- **Plus two Elective units:**
  These elective units may be taken from any approved 12 credit point postgraduate unit offered by the Faculty of Business in the specialisation area (International Business), subject to approval of the Subject Area Coordinator.

- **Plus:**
  - BSN600-1 Thesis
  - BSN600-2 Thesis
  - BSN600-3 Thesis
  - BSN600-4 Thesis
  - BSN600-5 Thesis
  - BSN600-6 Thesis
  - BSN600-7 Thesis
  - BSN600-8 Thesis

**Management**

Under the umbrella of Management, students may also be able to undertake a thesis in Public Management.

Students must complete two prescribed units (24 credit points), two elective units (24 credit points) and a thesis (96 credit points) as follows:

- **Two Compulsory Core units:**
  - BSN502 Research Methodology
  - BSN503 Research Seminar

- **Plus:**
  - Elective unit
  - Elective unit

The elective units may be undertaken from any 12 credit point postgraduate unit offered in the School of Management or other postgraduate unit, with the approval of the subject area coordinator.

- **Plus:**
  - BSN600-1 Thesis
  - BSN600-2 Thesis
  - BSN600-3 Thesis
  - BSN600-4 Thesis
  - BSN600-5 Thesis
  - BSN600-6 Thesis
  - BSN600-7 Thesis
  - BSN600-8 Thesis

**Marketing**

Students must complete two prescribed units (24 credit points), two elective units (24 credit points), and a thesis (96 credit points) as follows:

- **Select two of the following Compulsory Core units:**
  - AMN403 Marketing and Survey Research
  - BSN502 Research Methodology
  - BSN503 Research Seminar
  - BSN412 Qualitative Research and Analytical Techniques

- **Plus choose two Elective units:**
  These elective units may be taken from any approved 12 credit point postgraduate unit in the specialisation area (Marketing), subject to approval of the Subject Area Coordinator.

- **Plus:**
  - BSN600-1 Thesis
  - BSN600-2 Thesis
  - BSN600-3 Thesis
  - BSN600-4 Thesis
  - BSN600-5 Thesis
  - BSN600-6 Thesis
  - BSN600-7 Thesis
  - BSN600-8 Thesis
BSN600-8 Thesis

Public Relations
Students must complete two prescribed units (24 credit points), two elective units (24 credit points), and a thesis (96 credit points) as follows:

Select two of the following Compulsory Core units:
- AMN403 Marketing and Survey Research
- BSN502 Research Methodology
- BSN503 Research Seminar
- BSN412 Qualitative Research and Analytical Techniques

Plus select two Elective units:

These elective units may be taken from any approved 12 credit point postgraduate unit in the specialisation area (Public Relations), subject to approval of the Subject Area Coordinator.

Plus:
- BSN600-1 Thesis
- BSN600-2 Thesis
- BSN600-3 Thesis
- BSN600-4 Thesis
- BSN600-5 Thesis
- BSN600-6 Thesis
- BSN600-7 Thesis
- BSN600-8 Thesis

Master of Business Administration (Major) GS48

Award title: Master of Business Administration (Study Area A)
CRICOS code: 043117J
Campus: Gardens Point
Duration: 4 semesters full-time or 8 semesters. Alternatively, the course may be undertaken part-time over a period of up to 6 years, part-time
Credit points: 192 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Lyndal Drennan, MBA Director. Email: bgsbend@qut.edu.au

Course Structure
Students must complete 15 core units and 2 integrative core units of 6 credit points each and a major of 60 credit points in a particular study area, plus a further 30 credit points of electives which may be either 6 or 12 credit point units.

BSGB offers six credit point units, delivered in seven-week modules giving students the flexibility to commence study at the beginning or mid-point of any semester, offering six different entry points each year.

The following 15 core units must be completed:
- GSN401 Managing in the Global Business Environment
- GSN403 Understanding Data
- GSN404 Financial Statements Analysis 1
- GSN405 Strategic Management
- GSN406 Human Resource Management Issues
- GSN407 Business Communication
- GSN408 Fundamentals of Marketing Management
- GSN409 Organisational Behaviour 1
- GSN410 Entrepreneurship
- GSN412 Business Law 1
- GSN413 Financial Management 1
- GSN415 Understanding Leadership
- GSN460 Creative Problem Solving
- GSN490 Managing Technological Innovation
- GSN491 Economics in Business 1

Plus the following two Integrative core units:
- GSN416 Business Plans 1
- GSN473 Corporate Governance and Accountability

Plus 90 credit points of which students are required to undertake a major (60 credit points) in one of the study areas below and 30 credit points of elective units. Students may attain concentrations (36 credit points) or minors (24 credit points) in the following areas through careful choice of elective units:

- Accounting
- Arts & Cultural Management (for continuing students only)
- Business Communication
- Corporate Governance
- Economics
- Entrepreneurship
- Finance
- Health Services Management
- Human Resource Management
- International Business
- Information Technology Management
- Leadership
- Marketing
- Philanthropy & Nonprofit Studies
- Project Management
- Strategy

For a list of units to be undertaken for Concentrations and Minors refer to the GS40 Master of Business Administration course structure.

MAJORS

Accounting
Core Units:
- GSN404 Financial Statements Analysis 1

Required Units:
- GSN427 Financial Statement Analysis 2

Elective units:
Choose 48 credit points from the following elective units:
- AYN417 Financial Accounting 2
- AYN414 Cost and Management Accounting
- AYN418 Financial Accounting 3
- AYN424 International Accounting
- AYN439 Management Accounting
- AYN443 Electronic Commerce Cycles

Economics
Core Units:
- GSN491 Economics in Business 1

Required Units:
- GSN492 Economics in Business 2

Elective units:
Choose 48 credit points from the following elective units:
- BSN506 Econometric Methods
- EFN410 Economic and Financial Modelling

Students undertaking EFN500 and EFN502 would need to have completed the equivalent of a second year undergraduate degree at a recognised University. This would
involve completing intermediate undergraduate macro and micro economics at the very least.

**Entrepreneurship**

Core Units:
- GSN410 Entrepreneurship
- GSN416 Business Plans 1
- GSN460 Creative Problem Solving

Required Units:
- GSN420 New Venture Strategy
- GSN426 Business Plans 2
- GSN429 New Venture Marketing
- GSN430 New Venture Funding

Elective units:
Choose 18 credit points from the following elective units:
- GSN427 Financial Statement Analysis 2
- GSN431 New Venture Growth and Transitions
- GSN432 New Venture Leadership and HRM
- GSN434 Venture Capital
- GSN479 Spreadsheet Modelling for Managers
- GSN494 Innovating for Business Competitiveness

**Finance**

Core Units:
- GSN413 Financial Management 1
- GSN491 Economics in Business 1

Required Units:
- GSN423 Financial Management 2

Elective units:
Choose 42 credit points from the following elective units:
- GSN430 New Venture Funding
- GSN434 Venture Capital
- GSN479 Spreadsheet Modelling for Managers
- GSN492 Economics in Business 2
- EFN401 Advanced Financial Institutions Management
- EFN412 Advanced Managerial Finance
- EFN414 International Finance
- EFN415 Security Analysis
- EFN416 Treasury and Portfolio Management
- EFN417 An Introduction to International Finance
- EFN501 Corporate and Commercial Lending
- EFN506 Advanced International Finance

**Information Technology Management**

Core Units:
- GSN490 Managing Technological Innovation

Required Units:
- GSN470 E-Business

GN470 E-Business is no longer offered. However, it may be counted toward this major.

Elective units:
Choose 48 credit points from the following elective units:
- GSN447 Strategic Internet Marketing 1
- ITN220 Major Issues in Information Systems
- ITN252 Process Engineering
- ITN255 Knowledge Management
- ITN266 Information Management
- ITN272 Information Technology Project Management
- ITN330 Information Issues and Values

**Research Studies**

Required Units:
- BSN501-1 Dissertation
- BSN501-2 Dissertation
- BSN501-3 Dissertation
- BSN501-4 Dissertation
- BSN502 Research Methodology

Plus either
- AMN403 Marketing and Survey Research
- or
- BSN412 Qualitative Research and Analytical Techniques

Elective Units:
Students choose 24 credit points of elective units in chosen area of research (selected from required and elective units in the GS40 MBA concentration and minor list, or other units offered within the Faculty of Business and other Facilities at QUT, with the permission from the MBA Director)

### Master of Business Administration (Major) GS76

- Corporate Governance
- Economics
- Entrepreneurship
- Finance
- Health Services Management
- Human Resource Management
- International Business
- Information Technology Management
- Leadership
- Marketing
- Philanthropy & Nonprofit Studies
- Project Management
- Strategy

For a list of units to be undertaken for Concentrations and Minors refer to the GS40 Master of Business Administration course structure.

MAJORS

Accounting
Core Units:
- GSN404 Financial Statements Analysis 1
Required Units:
- GSN427 Financial Statement Analysis 2

Elective units:
Choose 48 credit points from the following elective units:
- AYN417 Financial Accounting 2
- AYN414 Cost and Management Accounting
- AYN418 Financial Accounting 3
- AYN424 International Accounting
- AYN439 Management Accounting
- AYN443 Electronic Commerce Cycles

Economics
Core Units:
- GSN491 Economics in Business 1
Required Units:
- GSN492 Economics in Business 2

Elective units:
Choose 48 credit points from the following elective units:
- BSN506 Econometric Methods
- EFN410 Economic and Financial Modelling
- EFN500 Contemporary Macroeconomic Theory
- EFN502 Developments in Microeconomic Theories

Students undertaking EFN500 and EFN502 would need to have completed the equivalent of a second year undergraduate degree at a recognised University. This would involve completing intermediate undergraduate macro and micro economics at the very least.

Entrepreneurship
Core Units:
- GSN410 Entrepreneurship
- GSN416 Business Plans 1
- GSN460 Creative Problem Solving

Required Units:
- GSN420 New Venture Strategy
- GSN426 Business Plans 2
- GSN429 New Venture Marketing
- GSN430 New Venture Funding

Elective units:
Choose 18 credit points from the following elective units:
- GSN427 Financial Statement Analysis 2
- GSN431 New Venture Growth and Transitions
- GSN432 New Venture Leadership and HRM
- GSN434 Venture Capital
- GSN479 Spreadsheet Modelling for Managers
- GSN494 Innovating for Business Competitiveness

Finance
Core Units:
- GSN413 Financial Management 1
- GSN491 Economics in Business 1

Required Units:
- GSN423 Financial Management 2

Elective units:
Choose 42 credit points from the following elective units:
- GSN430 New Venture Funding
BUSINESS

GSN434 Venture Capital
GSN479 Spreadsheet Modelling for Managers
GSN492 Economics in Business 2
EFN401 Advanced Financial Institutions Management
EFN412 Advanced Managerial Finance
EFN414 International Finance
EFN415 Security Analysis
EFN416 Treasury and Portfolio Management
EFN417 An Introduction to International Finance
EFN501 Corporate and Commercial Lending
EFN506 Advanced International Finance

Information Technology Management
Core Units:
GSN490 Managing Technological Innovation

Required Units:
GSN470 E-Business
GSN470 E-Business is no longer offered. However, it may be counted toward this major.

Elective units:
Choose 48 credit points from the following elective units:
GSN447 Strategic Internet Marketing 1
ITN220 Major Issues in Information Systems
ITN252 Process Engineering
ITN255 Knowledge Management
ITN266 Information Management
ITN272 Information Technology Project Management
ITN330 Information Issues and Values

Research Studies
Required Units:
BSN501-1 Dissertation
BSN501-2 Dissertation
BSN501-3 Dissertation
BSN501-4 Dissertation
BSN502 Research Methodology

Plus either
AMN403 Marketing and Survey Research
or
BSN412 Qualitative Research and Analytical Techniques

Elective Units:
Students choose 24 credit points of elective units in chosen area of research (selected from required and elective units in the GS4 MBA concentration and minor list, or other units offered within the Faculty of Business and other Facilities at QUT, with the permission from the MBA Director)

Master of Business Administration (MBA)
GS75

Executive Master of Business Administration GS50

Award title: Executive Master of Business Administration
Campus: Gardens Point
Duration: 20 months (intensive mode) commencing November full-time
Credit points: 144 (full-time standard semester: 48)
Course coordinator: Dr Lyndal Drennan, MBA Director.
Email: bgsbenq@qut.edu.au

Course Structure
Students are required to undertake 15 core units and 2 integrative core units of 6 credit points each and a further 42 credit points of elective units.

The intake for the EMBA is in December and the program runs for 22 months. Classes are scheduled once a month over a Friday to Sunday weekend session, with 20 hours of classes per weekend session each month of the program plus two residential sessions of 10-14 days in January of each year. The intensive block sessions allow the students to schedule some dedicated time to study with minimal interference to their business commitments.

One intensive sessions of 13-15 days is scheduled each January which includes an International Study Tour to China.

For more information about the EMBA, consult the BGSB website at www.bgsb.qut.edu.au/mbaprograms/mbaexec/index.jsp

Students must complete the following 15 core units:
GSN401 Managing in the Global Business Environment
GSN403 Understanding Data
GSN404 Financial Statements Analysis 1
GSN405 Strategic Management
GSN406 Human Resource Management Issues
GSN407 Business Communication
GSN408 Fundamentals of Marketing Management
GSN409 Organisational Behaviour 1
GSN410 Entrepreneurship
GSN412 Business Law 1
GSN413 Financial Management 1
GSN415 Understanding Leadership
GSN460 Creative Problem Solving
GSN490 Managing Technological Innovation
GSN491 Economics in Business 1

Plus two Integrative core units:
GSN416 Business Plans 1
GSN473 Corporate Governance and Accountability

Plus the following 42 credit points of Elective Units:
GSN425 Leadership Development
GSN428 International Study Tour
GSN455 Special Topic 3
GSN462 Negotiation Strategies
GSN474 Strategy Planning & Development
GSN480 Business Sustainability and Competitive Advantage
GSN496 Public Relations and Crisis Management

Students may choose other electives available in the weekday delivery schedule.

Concentration and minors may be attainable through the choice of elective units other than those listed above. Concentrations and minors are listed within the GS40 Master of Business Administration course structure.

International Master of Business Administration GS44

Award title: Master of Business Administration
Campus: Gardens Point
Duration: 3 semesters. Normally, the course can be completed in 14–16 months. full-time
Credit points: 144 (full-time standard semester: 48)
Course coordinator: Dr Lyndal Drennan, MBA Director. Email: bgsbenq@qut.edu.au

Course Structure
Students must complete 144 credit points. The IMBA course structure is equivalent to that of the existing MBA structure, where the equivalent of one semester full-time study is undertaken at three institutions.

Students undertake studies at QUT and select two of the following partner institutions: ESC-Grenoble, (France); Shanghai Jiao Tong, (China); Copenhagen Business School, (Denmark); Jönköping International Business School, (Sweden); and the Indian Institute of Management-Bangalore, (India).

Each student will be required to write a major paper (12cp) of Master's level standard relating to doing business with each of the overseas countries in which they study, under the supervision of a QUT academic, and submit it for evaluation by that QUT academic for credit to their MBA program.

Units to be completed at QUT:

Core Units:
GSN401 Managing in the Global Business Environment
GSN403 Understanding Data

GSN416 Business Plans 1
GSN473 Corporate Governance and Accountability

Plus 2 Required units:
GSN221 Special Topic 1
GSN222 Special Topic 2

Or

IBN403 Business in Asia
IBN404 Business in Europe

Units to be completed at other universities#:

Core Units:
GSN405 Strategic Management
GSN406 Human Resource Management Issues

EFN504 Finance Honours
EFN505 Financial Risk Management

Plus choose one Elective unit:
The elective unit may be taken from any postgraduate unit offered by the School of Accountancy or School of Economics and Finance subject to the approval of the Course Coordinator or Head of School

Plus
BSN501-1 Dissertation
BSN501-2 Dissertation
BSN501-3 Dissertation
BSN501-4 Dissertation

Whilst enrolled in part one of the Dissertation (BSN501-1) students are required to present a seminar detailing their research proposal.

Economics
Students must complete three prescribed units (36 credit points), one elective (12 credit points), and a dissertation (48 credit points).

One Compulsory Core Unit:
BSN506 Econometric Methods

Plus two Economics Units:
EFN500 Contemporary Macroeconomic Theory
EFN502 Developments in Microeconomic Theories

Plus one Elective unit:
The elective unit may be taken from any postgraduate unit offered by the School of Accountancy or School of Economics and Finance, subject to the approval of the Subject Area Coordinator or Head of School

Plus
BSN501-1 Dissertation
BSN501-2 Dissertation
BSN501-3 Dissertation
BSN501-4 Dissertation

Whilst enrolled in part one of the Dissertation (BSN501-1) students are required to present a seminar detailing their research proposal.

Human Resource Management
Students must complete four units (48 credit points) and a dissertation (48 credit points).

Two Compulsory Core Units:
BSN502 Research Methodology
BSN503 Research Seminar

Plus two of the following units:
MGN506 Contemporary Issues in HRM
MGN508 HRM Cases

Elective unit
The elective unit may be undertaken from any 12 credit point postgraduate unit offered in the School of Management or other postgraduate unit, with the approval of the subject area coordinator.

Plus
BSN501-1 Dissertation
BSN501-2 Dissertation
BSN501-3 Dissertation
BSN501-4 Dissertation

Whilst enrolled in part one of the Dissertation (BSN501-1) students are required to present a seminar detailing their research proposal.

International Business
Students must complete two prescribed units (24 credit points), two electives (24 credit points), and a dissertation (48 credit points).

Two Compulsory Core Units:
BSN502 Research Methodology
BSN503 Research Seminar

Plus two Elective units:
The elective units may be taken from any 12 credit point postgraduate unit offered by the School of International Business, in the specialisation area (International Business), subject to the approval of the Subject Area Coordinator

Plus
BSN501-1 Dissertation
BSN501-2 Dissertation
BSN501-3 Dissertation
BSN501-4 Dissertation

Whilst enrolled in part one of the Dissertation (BSN501-1) students are required to present a seminar detailing their research proposal.

Management
Students must complete four prescribed units (48 credit points) and a dissertation (48 credit points)

Two Compulsory Core Units:
BSN502 Research Methodology
BSN503 Research Seminar

Plus two of the following units:
MGN501 Readings in Management
MGN507 Contemporary Issues in Management

Elective unit
The elective unit may be undertaken from any 12 credit point postgraduate unit offered in the School of Management or other postgraduate unit, with the approval of the subject area coordinator.

- IBB208 European Business Development
- IBB308 Contemporary Business in Europe

Management
- MGB210 Production & Service Management
- MGB211 Organisational Behaviour
double major option unit must be substituted. Approval for the substitute unit should be sought from the Major Coordinator.

Extended Major: an additional group of six specified units in the same discipline area as the primary major core. A list of possible extended majors are provided with the respective primary major structures.

Specialisation: a coherent group of six specified units in a discipline area. Specialisations for business students may be chosen from a number of areas (refer to C above). Six units must be completed for a specialisation. When a unit is common to the major and specialisation, or when a unit that is incompatible has already been completed, an alternative specialisation option unit must be substituted. Approval for the substitute unit should be sought from the Major Coordinator.

Elective: a unit of 12 credit points chosen from any degree course at QUT including approved degree level study tours. Electives may also be taken at other recognised universities if the student obtains written approval from the Course Coordinator and the Head of School.

Prescribed unit: a 12 credit point unit (HBB116 Applied Skills and Scholarship) that all students commencing at Carseldine campus must undertake to develop their generic study and learning competencies.

Bachelor of Business (Accountancy) BS56

Award title: Bachelor of Business (Accountancy)

Professional Recognition
Students completing the Bachelor of Business (Accountancy) degree with an extended major in Professional Accounting meet the academic requirements for Associate membership of CPA Australia and enrolment in the CPA program and the academic requirements for enrolment in the Chartered Accountants Program of the Institute of Chartered Accountants in Australia (ICAA).

Students completing the Bachelor of Business (Accountancy) degree with an extended major in Business Law and Tax will need to select the following elective units to meet the academic requirements for Associate membership of CPA Australia and enrolment in the CPA program and the academic requirements for enrolment in the Chartered Accountants Program of the Institute of Chartered Accountants in Australia:

- EFB210 Finance 1, and...
• AYB311 Financial Accounting Issues or AYB321 Strategic Management Accounting

The School of Accountancy strongly recommends students undertake both AYB311 Financial Accounting Issues and AYB321 Strategic Management Accounting.

Students will also meet the academic requirements for enrolment in the Graduate Diploma in Applied Corporate Governance at the Chartered Secretaries Australia (CSA). On completion of the Graduate Diploma in Applied Corporate Governance, students will meet the academic requirements for professional membership of the Chartered Secretaries Australia (CSA). These programs are also accredited with the Tax Agents’ Board of Queensland.

Students completing the Accountancy major in combination with another business major may meet professional body (CPA Australia/ICAA) requirements by undertaking specified QUT units (normally four) as electives in the course. For further information on professional recognition for double majors and the required units that must be studied as electives, please contact the School of Accountancy on (07) 3138 5292 or email accenq@qut.edu.au

Please note that students with advanced standing (i.e. academic credit) may be required to undertake additional studies in order to meet professional body requirements. Students must also comply with CPA Australia and ICAA policy on conceded and terminal passes.

CRICOS code: 003491G
Campus: Gardens Point and Carseldine
Duration: 3 years full-time or 6 years part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Mr Andrew Paltridge
Discipline coordinator: Dr John Chen

BS56 Course Notes
See BS56 Course Notes entry for information about the course design and definitions.

Other Majors
See also separate entries for the following majors in this course: Accountancy, Advertising, Economics, Electronic Business, Human Resource Management, International Business, Management, Marketing, and Public Relations.

Professional Recognition
Students completing the Bachelor of Business majoring in Banking and Finance meet the academic requirements for enrolment in the Graduate Diploma in Applied Corporate Governance at the Chartered Secretaries Australia (CSA). On completion of the Graduate Diploma in Applied Corporate Governance, students will meet the academic requirement for Professional Membership of the Chartered Secretaries Australia (CSA).

Students completing the Bachelor of Business with a major in Banking and Finance will meet the academic requirements for Associate Membership of the Financial Services Institute of Australasia (FINSIA).

Students completing the Bachelor of Business (Banking and Finance) with a double major in Accountancy, with appropriate elective choices and unit substitution, may meet the academic requirements of one or more of the following professional bodies: CPA Australia (Associate Membership and enrolment in the CPA program); The Institute of Chartered Accountants in Australia (ICAA) (enrolment in the Chartered Accountants Program); Financial Services Institute of Australasia (FINSIA).

Students completing the Bachelor of Business (Banking and Finance) with a double major in Economics meet the academic requirements for Associate Membership of the Financial Services Institute of Australasia (FINSIA). Ordinarily, the Economics Society of Australia (QLD) requires that students have held an Ordinary Membership of the Economics Society of Australia for one year and have completed a Bachelor of Business majoring in Economics.

These courses have been designed to maximise student's ability to meet professional requirements, however students may be required to undertake further units with professional bodies. Please note that students with advanced standing (ie. academic credit) may be required to undertake additional studies in order to meet professional body requirements.

The unit MGB220 Management Research Methods and AMB201 Market and Audience Research are incompatible units. Students undertaking Marketing or Public Relations as a double major should contact the school for enrolment advice. From semester 2, 2003 students who complete both AMB201 & MGB220 will be required to undertake an approved substitute unit to satisfy course requirements.

### Bachelor of Business (International Business) BS56

**Award title:** Bachelor of Business (International Business)

**CRICOS code:** 003491G

**Campus:** Gardens Point and Carseldine

**Duration:** 3 years full-time or 6 years part-time

**Credit points:** 288 (full-time standard semester: 48; part-time standard semester: 24)

**Course coordinator:** Mr Andrew Paltridge

**Discipline coordinator:** Dr Beverley Kitching

**BS56 Course Notes**

See BS56 Course Notes entry for information about the course design and definitions.

### Other Majors

See also separate entries for the following majors in this course: Accountancy, Advertising, Banking and Finance, Economics, Electronic Business, Human Resource Management, Management, Marketing, and Public Relations.

### Languages Option

The course structure for both full-time and part-time International Business students varies depending on whether languages are selected as an option. Alternative course structures are included: one outlines the course structure if no languages are taken, the other outlines the structure for those who wish to undertake a language specialisation. If languages are taken as a specialisation, language units should commence in the first semester of the first year to maintain continuity from earlier pre-QUT language studies. All language units must normally be taken in the same language. International students must take a language that is not their native tongue.

### Full-time Course Structure

**Year 1, Semester 1**
- BSB113 Economics
- BSB115 Management, People and Organisations
- BSB119 International and Electronic Business

OVERVIEW

QUT Creative Industries has a distinctive reputation for its strong vocational focus, links with industry, and breadth of course offerings throughout a growing and changing industry sector.

Exciting creative industries study areas include:

- Acting and Technical Production
- Communication Design
- Creative Writing and Cultural Studies
- Dance
- Fashion
- Film and Television
- Journalism
- Media and Communication
- Music and Sound
- Performance Studies
- Visual Arts

The faculty offers the following undergraduate degree programs:

- Bachelor of Fine Arts degrees characterised by intense studio and/or project-based practice
- Professional Bachelor of Creative Industries degrees that offer a balance between theory and practice with a strong industry focus applied
- Bachelor of Creative Industries that provides flexibility to design your own degree across various study areas
- Accelerated double degree programs with the Faculties of Business, Education, Information Technology and Law.
- Postgraduate coursework programs including graduate certificates, graduate diplomas, masters and doctorates offer students a strong conceptual and practical framework. Postgraduate research is applied in nature and encourages collaborative and interdisciplinary approaches creating innovative partnerships between students, academics, industry experts and sponsors.

Working closely with partners from government and industry, the Faculty has positioned itself as a leader in the development of creative industries and aims to become an internationally networked hub of creative enterprise.

RESEARCH CENTRES

Postgraduate research at the Creative Industries Faculty provides a focus for the ongoing development of the creative industries as an industry sector through applied real-world research. The Faculty provides a strategic and inspiring environment for postgraduate research training.

Priority research areas include:

- Industry and policy research in the creative industries
- Interaction design
- Computer games research and design
- Music production technology
- Performance innovation
- Educational media and learning services
- Visual arts and design
- Indigenous creative enterprise
- Film and television production
- Journalism
- Creative writing
- Chinese media and the media of the region
- Community media.

Research at the Creative Industries Faculty is boosted through its association with the Australasian Cooperative Research Centre for Interaction Design (ACiD) and a new Australian Research Council Centre of Excellence for Creative Industries and Innovation.

The Creative Industries Faculty is also the lead agency in the Institute for Creative Industries and Innovation (iCi) which is a new multi-faculty research institute at QUT. iCi
combines researchers and PhD students from Creative Industries, Business, Information Technology, Education, Law, Built Environment and Engineering, and QUT Carseldine in groundbreaking research and commercialisation ventures.

Doctor of Creative Industries KK49

Award title: Doctor of Creative Industries
CRICOS code: 046050K
Campus: Kelvin Grove
Duration: Normal enrolment is 6 semesters - this can vary depending on entry requirements. full-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Brad Haseman

Course Structure
The course comprises two components - coursework and Professional projects.

Coursework is taken at the beginning of candidature and provides candidates with the essential conceptual tools they need for doctoral level analysis and reflection on their Professional practice and related contextual factors. Candidates will design, implement and evaluate a number of Professional projects during the period of their candidature. The scale, scope and focus of these projects will be determined in consultation with supervisors.

Project Track
Year 1, Semester 1
KKP601 Approaches to Enquiry in the Creative Industries
KKP602 The Reflective Practitioner 1
Elective 1

Year 1, Semester 2
GSN442 Project Management 1
GSN443 Project Management 2
KKP603 Project Development in the Creative Industries
KKP604 Creative Industries Conference 1
Elective 2

Year 2, Semester 1
KKP610-1 DCI Professional Project 1 (1/4)
KKP610-2 DCI Professional Project 1 (2/4)
KKP610-3 DCI Professional Project 1 (3/4)
KKP610-4 DCI Professional Project 1 (4/4)

Year 2, Semester 2
KKP605 The Reflective Practitioner 2
KKP611-1 DCI Professional Project 2 (1/4)
Elective 3
Elective 4

Year 3, Semester 1
KKP611-2 DCI Professional Project 2 (2/4)
KKP611-3 DCI Professional Project 2 (3/4)
KKP611-4 DCI Professional Project 2 (4/4)
KKP612-1 DCI Professional Project 3 (1/4)

Year 3, Semester 2
KKP606 Creative Industries Conference 2
KKP612-2 DCI Professional Project 3 (2/4)
KKP612-3 DCI Professional Project 3 (3/4)
KKP612-4 DCI Professional Project 3 (4/4)

Master of Arts (Research) (Creative Industries) KK51

Award title: Master of Arts (Research)
CRICOS code: 046055E
Campus: Kelvin Grove
Duration: Entry with 3 year qualification 1.5 years full-time; Entry with 4 year qualification (Honours) 1 year full-time full-time or Entry with 3 year qualification 3 years part-time; Entry with 4 year qualification (Honours) 2 years part-time part-time
Credit points: 3-year qualified entry: 144; 4 year qualified entry: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Brad Haseman

Course Structure
* ENTRY WITH 3 YEAR QUALIFICATION: (Bachelors degree or equivalent)
Students normally will undertake 48 credit points of coursework and a 96 credit point research project.

* ENTRY WITH APPROVED 4 YEAR QUALIFICATION: (Bachelors degree plus Honours/Graduate Diploma or equivalent)
Students will not normally undertake coursework units, unless otherwise recommended by the Discipline Coordinator. They will be required to undertake a 96 credit point research project or thesis.

With approval from the relevant Discipline Coordinator, instead of undertaking 96 credit points of research, students may enrol in 12 or 24 credit points of course work, and reduce the weighting of their research project to 84 or 72 credit points.

Research Component
Depending on the discipline, the research component may be undertaken either as a research thesis of 30,000 words, or as a creative practice-based project with an exegesis or written component (7,500-10,000 words).

Students can undertake:
- a significant creative work such as a theatrical or musical production
- a work of fiction or non-fiction
- a screen-based script or production
- a multimedia script or production.

Any project likely to involve University resources must have the support of the appropriate Head of Discipline.

All Disciplines - with 4-year qualified entry

Semester 1
KKP614-1 Research Project
KKP614-2 Research Project
KKP614-3 Research Project
KKP614-4 Research Project

Semester 2
KKP614-5 Research Project
KKP614-6 Research Project
KKP614-7 Research Project
KKP614-8 Research Project

Dance, Drama, Music, Visual Arts, Communication Design - with 3-year qualified entry

Semester 1
KKP601 Approaches to Enquiry in the Creative Industries
KKP614-1 Research Project
KKP614-2 Research Project
KKP614-3 Research Project
KVP400 Contemporary Aesthetic Debates

Semester 2
KKP614-3 Research Project
KKP614-4 Research Project
KKP614-5 Research Project
Elective
Note: An elective of 12 credit points is chosen by students, in consultation with their Principal Supervisor from university wide offerings.

**Semester 3**
- KKP614-6 Research Project
- KKP614-7 Research Project
- KKP614-8 Research Project
- KKP615 Graduate Seminar

**Dance, Drama, Music, Visual Arts, Communication Design - with 3 year qualified entry**

**Semester 1**
- KKP601 Approaches to Enquiry in the Creative Industries
- KVP400 Contemporary Aesthetic Debates

**Semester 2**
- KKP614-1 Research Project
- Elective

Note: that an elective of 12 credit points is chosen by students, in consultation with their Principal Supervisor from university wide offerings.

**Semester 3**
- KKP614-2 Research Project
- KKP614-3 Research Project

Year 3, Semester 2
KCP410 Major Project in Arts and Creative Industries Management

Elective List
Electives may be taken within or outside of the Creative Industries Faculty. Recommended electives include:
GSN404 Financial Statements Analysis 1
GSN488 Fundraising Development Principles
GSN489 Fundraising Development Techniques
KKN320 Workplace Learning
KKN330 Workplace Learning
KKN340-1 Workplace Learning
KKN340-2 Workplace Learning
LWN153 Select Issues in Art, Culture and the Law

■ Master of Creative Industries (Communication Design) KI43

Award title: Master of Creative Industries (Communication Design)
CRICOS code: 031870G
Campus: Kelvin Grove
Duration: 3 semesters full-time or 6 semesters part-time
Credit points: 144 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Michael Docherty
Discipline coordinator: Associate Professor Michael Docherty

Entry Requirements
A bachelor degree with an overall grade point average of 4.5 or above (on a 7-point scale). Applicants without a bachelor degree, with a bachelor degree with a grade point average of less than 4.5, or with a diploma from TAFE or an appropriate non-university private provider, may be required to enrol in the Graduate Certificate, with the possibility of articulation into the Masters degree if they achieve a grade point average of 4.5 or above in the Graduate Certificate.

Advanced standing for prior study and/or Professional experience is at the discretion of the postgraduate coursework degrees coordinator, in consultation with the relevant subject area coordinator. Advanced standing will normally only be granted for Masters-level courses, and will constitute no more than 48 credit points. Students seeking articulation to the Masters must successfully complete the Graduate Certificate with a grade point average of 4.5 or above.

■ Master of Creative Industries (Dance Teaching) KD42

Award title: Master of Creative Industries (Dance Teaching)
CRICOS code: Not required
Campus: External
Duration: 3 semesters and summer (by correspondence and residencies) full-time or 6 semesters (by correspondence and residencies) part-time
Credit points: 144 (full-time standard semester: 48)
Course coordinator: Ms Lesley Graham
Discipline coordinator: Assoc Prof Cheryl Stock

Course Structure
Masters students complete ten units. It is required that Masters students complete the units. The Reflective Practitioner 1 and Professional Practice Project, in the final semester/s of the course.

Students are required to complete 10 units. There are nine core units and one elective unit. It is recommended that
students complete the units The Reflective Practitioner 1 and Professional Practice Project in the final two semesters of the course. The Reflective Practitioner should be undertaken prior to the Professional Practice Project.

**Full time students**
In the first year of the course students should select three to four units from both First and Second Semester, and both units in the Summer Program.

**Part time students**
Select two units from both First and Second Semester, and either one or both units in the Summer Program.

**Semester 1**
- KDP401 Safe Dance Practice
- KDP402 Professional Practice and Business Administration for Dance Teachers
- KDP403 Dance Teaching Methodologies
- KDP404 Dance Analysis and Dance Histories
- KDP410 Professional Practice Project
- KKP602 The Reflective Practitioner 1
  (KKP602 includes an on-campus intensive component)

**Semester 2**
- KDP401 Safe Dance Practice
- KDP402 Professional Practice and Business Administration for Dance Teachers
- KDP403 Dance Teaching Methodologies
- KDP405 Dance Assessment and Reporting
- KDP406 Stagecraft and Costume for Dance
- KDP410 Professional Practice Project
- KKP602 The Reflective Practitioner 1
  (KKP602 includes an on-campus intensive component)

**Summer Program**
Both of the below units are offered via an on-campus intensive in Brisbane, Australia.
- KDP407 Dance Teaching Studies 1
- KDP408 Dance Teaching Studies 2

**Master of Creative Industries (Drama Teaching) KT42**

**Award title:** Master of Creative Industries (Drama Teaching)

**CRICOS code:** 046674M

**Campus:** Kelvin Grove

**Duration:** 3 semesters full-time or 6 semesters part-time (part-time mode may not be available by evening study)

**Credit points:** 144 (full-time standard semester: 48)

**Course coordinator:** Judith McLean; Administrator: Sandra Gattenhof

**Discipline coordinator:** Judith McLean

**Full-time Course Structure**

**Year 1, Semester 1**
- KTP401 Contemporary Performance
- KTP402 Teaching Drama From 1-10
  Select two electives from List A OR List B

**Year 1, Semester 2**
Select two of the following CORE units
- KTP403 Performing Narratives
- KTP404 Applying Information Technology in the Drama Classroom
- KTP405 Implementing Drama From 1-10
  PLUS
  Select two electives from List A OR List B

**Year 2, Semester 1**
- KTP410 Drama Project
  PLUS select one of the following combinations:
  Two units taken from List A
  OR
  One unit from List A and one unit from List B

**Part-time Course Structure**

**Year 1, Semester 1**
- KTP401 Contemporary Performance
- KTP402 Teaching Drama From 1-10

**Year 1, Semester 2**
Select two from the following CORE units:
- KTP403 Performing Narratives
- KTP404 Applying Information Technology in the Drama Classroom

KMB202 Music (Secondary) Curriculum Studies 2
KMB203 Music (Secondary) Curriculum Studies 3

These are suggested pathways. Under advice from the Coordinator, students may choose from other units on the page.

Graduate Certificate in Arts and Creative Industries Management IF01

Award title: Graduate Certificate in Arts and Creative Industries Management
CRICOS code: 056187K
Campus: Gardens Point and Kelvin Grove
Duration: 1 semester full-time or 2 semesters part-time
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Terry Flew

Full-time Course Structure
Semester 1
KCP401 Creative Industries: Theory and Policy
KKP402 Business Development in Creative Industries
KTP406 Creative Industries: Events and Festivals
KTP408 Marketing Arts and Culture
OR
KTP409 Arts and Cultural Management

Part-time Course Structure
Semester 1
KCP401 Creative Industries: Theory and Policy
KKP402 Business Development in Creative Industries
Semester 2
KTP406 Creative Industries: Events and Festivals
KTP408 Marketing Arts and Culture
OR
KTP409 Arts and Cultural Management

Graduate Certificate in Creative Industries (Communication Design) KI35

Award title: Graduate Certificate in Creative Industries (Communication Design)
CRICOS code: 043124K
Campus: Kelvin Grove
Duration: 2 semesters part-time
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Associate Professor Michael Docherty
Discipline coordinator: Associate Professor Michael Docherty

Part-time Course Structure

Semester 1
KIP401 Foundations of Communication Design 1
KIP403 Media Technology 1

Semester 2
KIP402 Foundations of Communication Design 2
KIP404 Media Technology 2

Graduate Certificate in Creative Industries (Creative Writing) KW35

Award title: Graduate Certificate in Creative Industries (Creative Writing)
CRICOS code: 040322F
Campus: Kelvin Grove
Duration: 1 semester full-time or 2 semesters (part-time mode of this course may not be available by evening study)
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Philip Neilsen
Discipline coordinator: Associate Professor Philip Neilsen

Full-time Course Structure

Year 1, Semester 1
Please note: Some of the below units run in Semester 1 only and some run in semester 2 only. Click on each of the unit codes for specific information on semester(s) of offer.

KWP400 Creative Writing: Novel and Genre
OR
KWP404 Editing and Developing the Manuscript
Plus choose three of the following:
KWB101 Introduction to Creative Writing
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction
KWB201 Creative Writing: Digital Media
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children's Writing
KWB303 Writing and Publishing Industry
KWP401 Media Writing
KWP402 Persuasive Writing
KWP403 Creative Writing: The Short Story
KWP405 Corporate Writing and Editing
KWP406 Creative Writing: The Novel

Note:
Please check semester of offer when enrolling in units.

It is recommended that students complete KWP406 Creative Writing: The Novel before KWP400 Creative Writing: Novel and Genre, if possible, as KWP406 helps prepare for KWP400.

Part-time Course Structure

Note:
You may do one, two, or three units in a semester, chosen from the same list as for the full-time structure. The only compulsory unit is KWP400 Creative Writing: Novel and Genre or KWP404 Editing and Developing the Manuscript.

Graduate Certificate in Creative Industries (Dance Teaching) KD35

Award title: Graduate Certificate in Creative Industries (Dance Teaching)
CRICOS code: Not required
Campus: External
Duration: 1 semester full-time; 2 semesters part-time external
Credit points: 48
Course coordinator: Ms Lesley Graham
Discipline coordinator: Assoc Prof Cheryl Stock

Course Structure
Students enrolling in the four-unit Graduate Certificate course will need to complete the core units: Safe Dance Practice, and Professional Practice and Business Administration for Dance Teachers, plus two others from the list of four units. It is recommended students consider Dance Teaching Methodologies as one of their unit choices.

Full-time Students
Select 4 units (2 core and 2 electives) from first or second semester.

Students can replace one elective from Semester 1 or 2 with a residency unit in the Summer Program.

Part-time Students
Select 4 units (2 core and 2 electives) across first and second semester.

Students can replace one elective from Semester 1 or 2 with a residency unit in the Summer Program.

Semester 1
Core Units
KDP401 Safe Dance Practice
KDP402 Professional Practice and Business Administration for Dance Teachers
Electives
KDP403 Dance Teaching Methodologies
KDP404 Dance Analysis and Dance Histories

Semester 2
Core Units
KDP401 Safe Dance Practice
KDP402 Professional Practice and Business Administration for Dance Teachers
Electives
KDP403 Dance Teaching Methodologies
KDP405 Dance Assessment and Reporting
Summer Program
KDP407 Dance Teaching Studies 1
(intensive residency in Brisbane, Australia)

Note:
Students should contact the Course Coordinator to discuss their enrolment program.

Graduate Certificate in Creative Industries (Drama Teaching) KT35

Award title: Graduate Certificate in Creative Industries (Drama Teaching)
CRICOS code: 046043J
Campus: Kelvin Grove
Duration: 1 semester full-time or 2 semesters (part-time mode of this course may not be available by evening study)
Credit points: 48

Course coordinator: Associate Professor Adrian Thomas

Discipline coordinator: Dr Paul Makeham

Full-time Course Structure

Year 1 - Commencing in semester one
KTP401 Contemporary Performance
KTP402 Teaching Drama From 1-10
Select two units from List A
OR

Year 1 - Commencing in semester two
Select two of the following core units
KTP403 Performing Narratives
KTP404 Applying Information Technology in the Drama Classroom
KTP405 Implementing Drama From 1-10
AND
Select two units from List A

Part-time Course Structure
Year 1, Semester 1
KTP401 Contemporary Performance
KTP402 Teaching Drama From 1-10
Year 1, Semester 2
Select two from the following core units:
KTP403 Performing Narratives
KTP404 Applying Information Technology in the Drama Classroom
KTP405 Implementing Drama From 1-10

KVB110 2D Media and Processes
KVB111 3D Media and Processes

KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

Art History, Architecture and Design
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art
Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor.
KK33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.
DEB102 Introducing Design History
DAB420 Architecture, Culture and Space (required) (from 2007)
DAB325 Architecture in the 20th Century (from 2007)
DAB525 Architecture and the City (from 2008)
KVB212 Australian Art, Architecture and Design
KVB307 Theories of Spatial Culture

Communication
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

Creative and Professional Writing
Introductory Units
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children's Writing

Creative Industries Management
Introductory Units:
BSB126 Marketing
KTB207 Staging Australia
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directoring for Events and Festivals
MGB223 Creating New Enterprises

Dance
Introductory Units
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History
Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance  
KDB204 Australian Dance  

**Digital Media**  
Introductory Units:  
KCB102 Media and Society: From Printing Press to Internet  
KCB202 New Media Technologies  

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
KCB201 Virtual Cultures

KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

**Fashion Discipline**
KFB105 Fashion and Modernity

**Journalism Discipline**
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

**Music & Sound Discipline**
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

**Film & Television Discipline**
KPB103 Film Genres
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
KPB206 International Cinema

**Performance Studies Discipline**
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB207 Staging Australia

**Visual Arts Discipline**
KVB103 Australian Art
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture
KVB211 Post 1945 Art
KVB306 Video Art and Culture
KVB307 Theories of Spatial Culture

**Creative Writing & Cultural Studies Discipline**
KWB002 Ozilt
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture
KWB007 Indigenous Writing
KWB102 Media Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing

Dance
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance
KDB204 Australian Dance

Digital Media
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet
KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor

KCDB201 Virtual Cultures
KCDB203 Consumer Cultures
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
KPB106 Australian Television
KVB306 Video Art and Culture

Fashion, Art and Communication
Introductory Units:
KFB103 Introduction to Fashion Design
KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
KVB212 Australian Art, Architecture and Design (required)
KFB203 Fashion, Art and the Body (required)
KCB203 Consumer Cultures
KFB205 Fashion and Style Journalism
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture

Indigenous Studies
Introductory Units:
HHB123 Indigenous Australian Culture Studies
KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KKB004 Indigenous Creative Industries
HHB205 Indigenous Politics And Political Culture
HHB210 Indigenous Australia: Country, Kin And Culture
EDB007 Culture Studies: Indigenous Education
JSB352 Indigenous Justice
HBB276 Indigenous Knowledge: Research Ethics and Protocols

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies
KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB003 Modern Times (Literature and Culture in the 20th Century)

KVB712 Contemporary Art Issues (required)
KVB701 Modernism (required)
KVB444 Contemporary Asian Visual Culture
KVB703 Video Art and Culture
KVB457 Sculpture
KVB704 Theories of Spatial Culture

Communication (KCN)
Introductory Units: - compulsory
KCB101 Communication in the New Economy
KCB213 Strategic Speech Communication

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB314 Corporate Writing and Editing
KWB111 Media Writing
KCB150 Media and Communications Industries
KCB311 Political Communication
KCB334 Media and Communication Research Methods

Communication Design (KCD)
Introductory Units: - compulsory
KIB814 Enabling Immersion
KIB825 Animation Practices

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KIB811 Visual Interactions
KIB808 Media Technology 2
KIB813 Contemporary Issues in Design and Technology
KIB804 3-D Animation 1

Creative and Professional Writing (KCW)
Introductory Units: - compulsory
KWB250 Introduction to Creative Writing
KWB380 Creative Nonfiction: Life Writing

Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KWB315 Persuasive Writing (required)
KWB314 Corporate Writing and Editing (required)
KWB381 Creative Nonfiction: Arts, Humour, Travel
KWB111 Media Writing
KWB712 Youth and Children's Writing
KWB350 Creative Writing: The Short Story

Dance (KDN)
Introductory Units:
KDB125 Deconstructing Dance in History

*Deconstructing Dance in History can be substituted with either World Dance or Architecture of the Body in Year 1, Semester 1.

KDB176 Popular Dance Styles

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KDX104 Architecture of the Body
KDB106 Dance Analysis
KDB172 World Dance
KDB114 Australian Dance

Digital Media (KDM)
Introductory Units: - compulsory
KCB140 Media and Society: From Printing Press to Internet
KCB150 Media and Communications Industries

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KCB295 Virtual Cultures
KCB336 New Media Technologies
KPB209 Australian Television
KCB204 Globalisation and New Media

Indigenous Studies (KIS)
Introductory Units: - compulsory
HHB123 Indigenous Australian Culture Studies
KWB701 Indigenous Writing

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
HHB210 Indigenous Australia: Country, Kin And Culture
HHB255 Indigenous Politics And Political Culture
JSB352 Indigenous Justice
EDB007 Culture Studies: Indigenous Education
KKB704 Indigenous Creative Industries
HHB276 Indigenous Knowledge: Research Ethics and Protocols *to be confirmed

Interaction Design (KIN)
Introductory Units: - compulsory
KIB801 Foundations of Communication Design 1
KIB808 Media Technology 2
Advanced Units - choose all three required units plus one other to complete submajor; or KIB809 plus any other advanced unit to complete minor
KIB809 Interaction Design (required)
KIB815 Interfacing Media (required)
KIB822 Informational Arts (required)
KIB810 Information Architecture
KIB821 Mixed Realities

**Journalism (KJO)**
Introductory Units: - compulsory
KJB101 Journalism Information Systems
KJB120 Newswriting

Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KJB121 Journalistic Inquiry (required)
KJB224 Feature Writing (required)
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB339 Fashion and Style Journalism
KJB337 Public Affairs Reporting

**Literary and Cultural Studies (KLC)**
Introductory Units: - compulsory
KWB716 Introduction to Literary Theory and Cultural Studies
KWB710 Ozlit

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB321 Modern Times: Literature and Culture in the 20th Century
KWB729 Shakespeare: Then and Now
KWB625 American Stories
KWB712 Youth and Children’s Writing
KWB724 Wonderlands: Literature and Culture in the 19th Century
KWB725 Popular Fictions, Popular Culture

**Music and Sound Studies (KMS)**
Introductory Units: - compulsory
KMB640 Sex Drugs Rock N Roll
KMB638 Sound and Image

Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KMB631 World Music (required)
KMB667 Music and Spirituality (required)
KMB621 Sound Recording And Acoustics
KMB619 Music And Sound Technology
KMB649 Introductory Musicianship
KMB650 Introductory Ensemble

**Screen Studies (KSC)**
Introductory Units: - compulsory
KPB130 Media Text Analysis
KPB305 American Film: Genres and Directors
OR
KPB141 Film and Television Languages

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KPB359 Film History
KPB358 Documentary Theory And Practice
KPB343 Australian Film
KPB344 International Cinema

**Television (KTV)**
Introductory Units: - compulsory
KPB370 Principles of Television
KPB141 Film and Television Languages

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies
KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB103 Persuasive Writing
KWB206 Youth and Children's Writing

Music and Sound Studies
Introductory Units:
KMB003 Sex Drugs Rock 'n' roll
KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
KMB002 Music and Spirituality
KMB004 World Music
KMB007 Introductory Ensemble
KMB104 Introductory musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Performance Studies
Introductory Units:
KTB101 20th Century Performance
KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB106 Performing Skills 2: Style and Form
KTB204 Understanding Performance
KTB207 Staging Australia
KTB209 Applied Performance

Screen Studies
Introductory Units:
KPB103 Film Genres
KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB102 Film History
KPB203 Australian Film
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Television
Introductory Units:
KPB106 Australian Television
KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB105 Narrative Production
KPB107 Television Genres
KPB303 Critical Thinking about Television
KPB104 Film and Television Production Resource Management

Advertising
Introductory Units:
BSB126 Marketing
AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing
AMB260 Public Relations Theory and Practice

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns

Creative Industries Faculty Undergraduate Open Electives
These unit offerings are current at the time of publication but are subject to change.
Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen Submajor area.
- you must obey any elective rules as set out in your course requirements.
- you must have successfully completed any pre/co-requisite units applicable.
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability.
- some units are subject to quota restrictions.

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock ‘n’ roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking About Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Fashion Discipline
KFB105 Fashion and Modernity

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

Music & Sound Discipline
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

Film & Television Discipline
KPB103 Film Genres
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Performance Studies Discipline
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB207 Staging Australia

Visual Arts Discipline
KVB103 Australian Art
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture
KVB211 Post 1945 Art
KVB306 Video Art and Culture
KVB307 Theories of Spatial Culture

Creative Writing & Cultural Studies Discipline
KWB002 Ozlit
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture

Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

- Bachelor of Creative Industries (Interdisciplinary) KK33

Award title: Bachelor of Creative Industries (Interdisciplinary)
CRICOS code: 056186M
Campus: Kelvin Grove and Caboolture
Duration: 3 years full-time
Credit points: 288cp (full-time standard semester: 48cp)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Dr Paul Makeham

Course Structure
In order to complete this course, students must undertake 4 Faculty Core Units (selecting from core studies in Creative Industries covering Narrative in the Creative Industries, Creative Industries, Cultures and Creativity, Writing for Creative Industries and Introduction to Multimedia) and by following either:

Structure One:
4 Creative Industries Core Units
3 Submajors (6 units each)
2 Electives

or

Structure Two:
4 Creative Industries Core Units
2 Submajors (6 units each)
1 Minor (4 units)
4 Electives

or

Structure Three:
4 Creative Industries Core Units
2 Submajors (6 units each)
2 Minors (4 units each)
No elective units

Study Areas:
Art and Visual Culture
Art History, Architecture and Design
Communication
Creative and Professional Writing
Creative Industries Management
Dance
Digital Media
Fashion, Art and Communication
Indigenous Studies
Interaction Design
Journalism
Literary and Cultural Studies
Music and Sound Studies
Screen Studies
Television
Performance Studies

Students may complement their studies with units from another QUT Faculty including Business, Information Technology, Science, Law, Health, Built Environment and Engineering, Education and Social Science. Please note that submajors in Entrepreneurship, Advertising and Public Relations are available through the Faculty of Business. In their final year Bachelor of Creative Industries students will have the opportunity to engage in internships, industry placements and practical projects in order to prepare themselves for entry-level positions in their chosen career.

Full-time Course Structure
Students are required to conform to one of the following three course structures:

Structure One
Four Creative Industries Faculty Core Units
Three Submajors (6 units each)
Two elective units

Year 1, Semester 1
Creative Industries Core Unit
Submajor 1
Submajor 2
Submajor 3

Year 1, Semester 2
Creative Industries Core Unit
Submajor 1
Submajor 2
Submajor 3

Year 2, Semester 1
Creative Industries Core Unit
Submajor 1
Submajor 2
Submajor 3

Year 2, Semester 2
Creative Industries Core Unit
Submajor 1
Submajor 2
Submajor 3

Year 3, Semester 1
Submajor 1
Submajor 2
Submajor 3

KKB009 Writing for Creative Industries
KKB010 Cultures and Creativity
KKB018 Creative Industries

Creative Industries Submajors and Minors

Art and Visual Culture
Introductory Units:
KVB102 Modernism
KVB103 Australian Art

Subsequent Units: required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KVB211 Post 1945 Art (required)
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes

KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

Art History, Architecture and Design
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor.
KK33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.
DEB102 Introducing Design History
DAB420 Architecture, Culture and Space (required) (from 2007)
DAB325 Architecture in the 20th Century (from 2007)
DAB525 Architecture and the City (from 2008)
KVB212 Australian Art, Architecture and Design
KVB307 Theories of Spatial Culture

Communication
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

Creative and Professional Writing
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children's Writing

Creative Industries Management
Introductory Units:
BSB126 Marketing
KTB207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directing for Events and Festivals
MGB223 Creating New Enterprises

Dance
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
**Digital Media**
Introductory Units:
- KCB102 Media and Society: From Printing Press to Internet
- KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KCB201 Virtual Cultures
- KCB203 Consumer Cultures
- KIB101 Foundations of Communication Design 1
- KIB103 Media Technology 1
- KPB106 Australian Television
- KVB306 Video Art and Culture

**Fashion, Art and Communication**
Introductory Units:
- KFB103 Introduction to Fashion Design
- KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
- KVB212 Australian Art, Architecture and Design (required)
- KFB203 Fashion, Art and the Body (required)
- KCB203 Consumer Cultures
- KFB205 Fashion and Style Journalism
- KVB104 Photomedia and Artistic Practice
- KVB108 Contemporary Asian Visual Culture

**Indigenous Studies**
Introductory Units:
- HHB123 Indigenous Australian Culture Studies
- KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
- KKB004 Indigenous Creative Industries
- HHB255 Indigenous Politics and Political Culture
- HHB210 Indigenous Australia: Country, Kin and Culture
- EDB007 Culture Studies: Indigenous Education
- JSB352 Indigenous Justice
- HHB276 Indigenous Knowledge: Research Ethics and Protocols

**Interaction Design**
Introductory Units:
- KIB101 Foundations of Communication Design 1
- KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KIB103 Media Technology 1
- KIB104 Media Technology 2
- KIB105 Animation and Motion Graphics
- KIB108 Animation Practices
- KIB210 Design Studio 1: Interaction Design

**Journalism**
Introductory Units:
- KJB101 Journalism Information Systems
- KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KFB205 Fashion and Style Journalism
- KJB121 Journalistic Inquiry
- KJB224 Feature Writing
- KJB239 Journalism Ethics and Issues
- KJB280 International Journalism
- KJB337 Public Affairs Reporting

**Literary and Cultural Studies**
Introductory Units:
- KWB001 Introduction to Literary Theory and Cultural Studies
- KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KWB003 Modern Times (Literature and Culture in the 20th Century)
- KWB004 Shakespeare, Then and Now
- KWB005 Wonderslands: Literature and Culture in the 19th Century
- KWB006 Popular Fictions, Popular Culture
- KWB103 Persuasive Writing
- KWB206 Youth and Children's Writing

**Music and Sound Studies**
Introductory Units:
- KMB003 Sex Drugs Rock 'n' roll
- KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
- KMB002 Music and Spirituality
- KMB004 World Music
- KMB007 Introductory Ensemble
- KMB104 Introductory Musicianship
- KMB105 Music and Sound Technology
- KMB108 Sound Recording and Acoustics
- KMB204 Music and Sound Textures

**Performance Studies**
Introductory Units:
- KTB101 20th Century Performance
- KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KTB102 Process Drama
- KTB103 Performing Skills 1: Body and Voice and Role
- KTB106 Performing Skills 2: Style and Form
- KTB204 Understanding Performance
- KTB207 Staging Australia
- KTB209 Applied Performance

**Screen Studies**
Introductory Units:
- KPB103 Film Genres
- KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KPB102 Film History
- KPB203 Australian Film
- KPB205 Documentary Theory and Practice
- KPB206 International Cinema

**Television**
Introductory Units:
- KPB106 Australian Television
- KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KPB105 Narrative Production
- KPB107 Television Genres
- KPB303 Critical Thinking About Television
- KPB104 Film and Television Production Resource Management

**Advertising**
Introductory Units:
CREATIVE INDUSTRIES

BSB126 Marketing
AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing
AMB260 Public Relations Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns

Creative Industries Faculty Undergraduate Open Electives

These unit offerings are current at the time of publication but are subject to change. Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen submajor area.
- you must obey any elective rules as set out in your course requirements
- you must have successfully completed any pre/co-requisite units applicable
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability
- some units are subject to quota restrictions

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication
Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock 'n' roll
KMB004 World Music
KMB014 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking about Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB204 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Minor One
Minor Two

**Caboolture Pathways**

**Pathway A - Education Submajor**

**Year 1, Semester 1**
KKB007 Introduction to Multimedia Technology
EDB001 Teaching and Learning Studies 1: Teaching in New Times
EDB006 Learning Networks
Choose one unit from:
CLB004 Integrated Foundation Studies 1: Visual and Verbal Language and Literacies
MDB001 Integrated Foundations Studies 2: Scientific and Quantitative Literacy

**Year 1, Semester 2**
KKB018 Creative Industries
EDB007 Culture Studies: Indigenous Education
Choose two units from:
HHB106 Australian Society and Culture
HHB116 Applied Skills and Scholarship
Elective - Choose any Semester 1 unit offered by Humanities OR Business at Caboolture campus

**Years 2 & 3 at Kelvin Grove to complete course:**
2 Creative Industries Faculty Core Units; 2 Creative Industries submajors and 2 electives
OR
2 Creative Industries Faculty Core Units; 1 Creative Industries submajor; 1 Creative Industries Minor and 4 electives
OR
2 Creative Industries Faculty Core Units; 1 Creative Industries submajor; 2 Creative Industries Minors and no electives

**Pathway B - Business Submajor**

**Year 1, Semester 1**
KKB007 Introduction to Multimedia Technology
CTB119 International and Electronic Business
CTB122 Quantitative Analysis and Finance
Choose one unit from:
CTB110 Accounting
CTB114 Government, Business and Society

**Year 1, Semester 2**
KKB018 Creative Industries
CTB115 Management, People and Organisations
CTB126 Marketing
Choose two units from:
CTB111 Business Law and Ethics
CTB113 Economics

**Years 2 & 3 at Kelvin Grove to complete course:**
2 Creative Industries Faculty Core Units; 2 Creative Industries submajors and 2 electives
OR
2 Creative Industries Faculty Core Units; 1 Creative Industries submajor; 1 Creative Industries Minor and 4 electives
OR
2 Creative Industries Faculty Core Units; 1 Creative Industries submajor; 2 Creative Industries Minors and no electives

**Pathway C - Education Minor**

**Year 1, Semester 1**
KKB007 Introduction to Multimedia Technology
EDB006 Learning Networks
Choose one unit from:
HHB106 Australian Society and Culture
HHB116 Applied Skills and Scholarship
Elective - Choose any Semester 1 unit offered by Humanities OR Business at Caboolture campus

**Years 2 & 3 at Kelvin Grove to complete course:**
2 Creative Industries Faculty Core Units; 2 Creative Industries submajors and 2 electives
OR
2 Creative Industries Faculty Core Units; 1 Creative Industries submajor; 1 Creative Industries Minor and 4 electives
OR
2 Creative Industries Faculty Core Units; 1 Creative Industries submajor; 2 Creative Industries Minors and no electives

**Pathway D - Business Minor**

**Year 1, Semester 1**
KKB007 Introduction to Multimedia Technology
Choose one unit from:
HHB106 Australian Society and Culture
HHB116 Applied Skills and Scholarship
Elective - Choose any Semester 1 unit offered by Humanities OR Education at Caboolture campus

**Years 2 & 3 at Kelvin Grove to complete course:**
2 Creative Industries Faculty Core Units; 2 Creative Industries submajors and 2 electives
2 Creative Industries Faculty Core Units; 2 Creative Industries submajors and 2 electives

Pathway E - Humanities Minor

Year 1, Semester 1
KKB007 Introduction to Multimedia Technology
HHB116 Applied Skills and Scholarship
HHB110 Introduction to International and Global Studies
Choose one unit from:
HHB106 Australian Society and Culture
Elective - Choose any Semester 1 unit offered by Business OR Education at Caboolture campus

Year 1, Semester 2
KKB018 Creative Industries
HHB104 Understanding Society: Intro to Sociology
HHB114 Introduction to Human Rights And Ethics
Elective - Choose any semester 2 unit offered by Business or Education at Caboolture campus

Years 2 & 3 at Kelvin Grove to complete course:
2 Creative Industries Faculty Core Units; 2 Creative Industries submajors and 2 electives

Bachelor of Creative Industries (Media & Communication) KK33

Award title: Bachelor of Creative Industries (Media & Communication)
CRICOS code: 056186M
Campus: Kelvin Grove
Duration: 3 years full-time
Credit points: 288 cp (full-time standard semester: 48 cp)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Dr Jason Sternberg

Full-time Course Structure

Year 1, Semester 1
Creative Industries Core Unit
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication

Year 1, Semester 2
Creative Industries Core Unit
KCB104 Media and Communications Industries

KCB301 Media Audiences
KCB302 Political Communication
Elective

Year 3, Semester 2
KCB303 Applied Media Communication
KCB304 Managing Communication Resources
Elective

Creative Industries Core Units
KKB007 Introduction to Multimedia Technology
KKB008 Narrative in the Creative Industries

Creative Industries Submajors and Minors

Art and Visual Culture
Introductory Units:
KVB102 Modernism
KVB103 Australian Art

Subsequent Units: required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KVB211 Post 1945 Art (required)
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes
KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

Art History, Architecture and Design
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor.
KKB33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.

Communication
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

Creative and Professional Writing
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children's Writing

Creative Industries Management
Introductory Units:
BSB125 Marketing
KTB207 Staging Australia
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directing for Events and Festivals
MGB223 Creating New Enterprises

Dance
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance
KDB204 Australian Dance

Digital Media
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet
KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KCB201 Virtual Cultures
KCB203 Consumer Cultures
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
KPB106 Australian Television
KVB306 Video Art and Culture

Fashion, Art and Communication
Introductory Units:
KFB103 Introduction to Fashion Design
KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
KVB212 Australian Art, Architecture and Design (required)
KFB203 Fashion, Art and the Body (required)
KCB203 Consumer Cultures
KCB204 Australian Art, Architecture and Design
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture

Indigenous Studies
Introductory Units:
HHB123 Indigenous Australian Culture Studies
KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KKB004 Indigenous Creative Industries
HHB255 Indigenous Politics and Political Culture
HHB210 Indigenous Australia: Country, Kin and Culture
EDB007 Culture Studies: Indigenous Education
JSB352 Indigenous Justice
HHB276 Indigenous Knowledge: Research Ethics and Protocols

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies
KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB103 Persuasive Writing
KWB206 Youth and Children's Writing

Music and Sound Studies
Introductory Units:
KMB003 Sex Drugs Rock ‘n’ roll
KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
KPB002 Music and Spirituality
KMB004 World Music
KMB007 Introductory Ensemble
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Performance Studies
Introductory Units:
KTB101 20th Century Performance
KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB106 Performing Skills 2: Style and Form
KTB204 Understanding Performance
KTB207 Staging Australia
KTB209 Applied Performance

Screen Studies
Introductory Units:
KPB103 Film Genres
KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB102 Film History
Semester 1

- Art and Visual Culture (KAV)
Creative Industries

Introductory Units: - compulsory
KVB702 Australian and Indigenous Art
KVB447 Drawing

Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KVB712 Contemporary Art Issues (required)
KVB701 Modernism (required)
KVB444 Communication Asian Visual Culture
KVB703 Video Art and Culture
KVB457 Sculpture
KVB704 Theories of Spatial Culture

Communication (KCN)
Introductory Units: - compulsory
KCB101 Communication in the New Economy
KCB213 Strategic Speech Communication

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB314 Corporate Writing and Editing
KWB111 Media Writing
KCB150 Media and Communications Industries
KCB311 Political Communication
KCB334 Media and Communication Research Methods

Communication Design (KCD)
Introductory Units: - compulsory
KIB814 Enabling Immersion
KIB825 Animation Practices

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KIB811 Visual Interactions
KIB808 Media Technology 2
KIB813 Contemporary Issues in Design and Technology
KIB804 3-D Animation 1

Creative and Professional Writing (KCW)
Introductory Units: - compulsory
KWB250 Introduction to Creative Writing
KWB380 Creative Nonfiction: Life Writing

Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KWB315 Persuasive Writing (required)
KWB314 Corporate Writing and Editing (required)
KWB381 Creative Nonfiction: Arts, Humour, Travel
KWB111 Media Writing
KWB712 Youth and Children's Writing
KWB350 Creative Writing: The Short Story

Dance (KDN)
Introductory Units:
KDB125 Deconstructing Dance in History *
*KDeconstructing Dance in History can be substituted with any 2 to complete submajor; or both required units to complete minor
KDB176 Popular Dance Styles

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KDX104 Architecture of the Body
KDB106 Dance Analysis
KDB172 World Dance
KDB114 Australian Dance

Digital Media (KDM)
Introductory Units: - compulsory
KCB140 Media and Society: From Printing Press to Internet
KCB150 Media and Communications Industries

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KCB295 Virtual Cultures
KCB336 New Media Technologies
KPB209 Australian Television
KCB204 Globalisation and New Media

Indigenous Studies (KIS)
Introductory Units: - compulsory
HHB123 Indigenous Australian Culture Studies
KWB701 Indigenous Writing

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
HHB210 Indigenous Australia: Country, Kin and Culture
HHB255 Indigenous Politics and Political Culture
JSB352 Indigenous Justice
EDB007 Culture Studies: Indigenous Education
KKB704 Indigenous Creative Industries
HHB276 Indigenous Knowledge: Research Ethics and Protocols *to be confirmed

Interaction Design (KIN)
Introductory Units: - compulsory
KIB801 Foundations Of Communication Design 1
KIB808 Media Technology 2

Advanced Units - choose all three required units plus one other to complete submajor; or KIB809 plus any other advanced unit to complete minor
KIB809 Interaction Design (required)
KIB815 Interfacing Media (required)
KIB822 Informational Arts (required)
KIB810 Information Architecture
KIB821 Mixed Realities

Journalism (KJO)
Introductory Units: - compulsory
KJB101 Journalism Information Systems
KJB120 Newswriting

Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KJB121 Journalistic Inquiry (required)
KJB224 Feature Writing (required)
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB339 Fashion and Style Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies (KLC)
Introductory Units: - compulsory
KWB716 Introduction to Literary Theory and Cultural Studies
KWB710 Ozlit

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB321 Modern Times: Literature and Culture in the 20th Century
KWB729 Shakespeare: Then and Now
KWB625 American Stories
KWB712 Youth and Children's Writing
KWB724 Wonderlands: Literature and Culture in the 19th Century
KWB725 Popular Fictions, Popular Culture

Music and Sound Studies (KMS)
Introductory Units: - compulsory
KMB640 Sex Drugs Rock N Roll
KMB638 Sound and Image
Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KMB631 World Music (required)
KMB667 Music and Spirituality (required)
KMB621 Sound Recording and Acoustics
KMB619 Music and Sound Technology
KMB649 Introductory Musicianship
KMB650 Introductory Ensemble

Screen Studies (KSC)
Introductory Units: - compulsory
KPB130 Media Text Analysis
KPB305 American Film: Genres and Directors
OR
KPB141 Film and Television Languages

Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KPB359 Film History
KPB358 Documentary Theory and Practice
KPB343 Australian Film
KPB344 International Cinema

Television (KTV)
Introductory Units: - compulsory
KPB370 Principles of Television
KPB141 Film and Television Languages

Advanced Units - choose all 4 to complete submajor; or both required units to complete minor
KPB314 Media Business (required)
KPB155 Media Production (required)
KPB260 Community And Educational Video
OR
KPB185 Informational Production
KPB371 Advanced Principles of Television

Performance Studies (KTP)
Introductory Units: - compulsory
KTB208 Elements of Drama
KTB251 20th Century Performance

Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KSB259 The Performance Instrument: Body and Voice
KTB271 Studies in Directing
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB257 Studies in Acting 1

KCB213 Strategic Speech Communication
Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB314 Corporate Writing and Editing
KCB111 Media Writing
KCB150 Media and Communications Industries
KCB311 Political Communication
KCB334 Media and Communication Research Methods

Communication Design (KCD)
Introductory Units: - compulsory
KIB814 Enabling Immersion
KIB825 Animation Practices
Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KIB811 Visual Interactions
KIB808 Media Technology 2
KIB813 Contemporary Issues in Design and Technology
KIB804 3-D Animation 1

Creative and Professional Writing (KCW)
Introductory Units: - compulsory
KWB250 Introduction to Creative Writing
KWB380 Creative Nonfiction: Life Writing
Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KWB315 Persuasive Writing (required)
KWB314 Corporate Writing and Editing (required)
KWB381 Creative Nonfiction: Arts, Humour, Travel
KWB111 Media Writing
KWB712 Youth and Children's Writing
KWB350 Creative Writing: The Short Story

Dance (KDN)
Introductory Units:
KDB125 Deconstructing Dance in History *
*Deconstructing Dance in History can be substituted with either World Dance or Architecture of the Body in Year 1, Semester 1.

Digital Media (KDM)
Introductory Units: - compulsory
KCB140 Media and Society: From Printing Press to Internet
KCB150 Media and Communications Industries
Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KCB295 Virtual Cultures
KCB336 New Media Technologies
KPB209 Australian Television
KCB204 Globalisation and New Media

Indigenous Studies (KIS)
Introductory Units: - compulsory
HHB123 Indigenous Australian Culture Studies
KWB701 Indigenous Writing
Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
HHB210 Indigenous Australia: Country, Kin and Culture
HHB255 Indigenous Politics and Political Culture
JSB352 Indigenous Justice
EDB007 Culture Studies: Indigenous Education
KKB704 Indigenous Creative Industries
HHB276 Indigenous Knowledge: Research Ethics and Protocols *to be confirmed

Interaction Design (KIN)
Introductory Units: - compulsory
KIB801 Foundations Of Communication Design 1
KIB808 Media Technology 2
Advanced Units - choose all three required units plus one other to complete submajor; or KIB809 plus any other advanced unit to complete minor
KIB809 Interaction Design (required)
KIB815 Interfacing Media (required)
KIB822 Informational Arts (required)
KIB810 Information Architecture
KIB821 Mixed Realities

Journalism (KJO)
Introductory Units: - compulsory
KJB101 Journalism Information Systems
KJB120 Newswriting
Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KJB121 Journalistic Inquiry (required)
KJB224 Feature Writing (required)
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB339 Fashion and Style Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies (KLC)
Introductory Units: - compulsory
KWB716 Introduction to Literary Theory and Cultural Studies
KWB710 OzLit
Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB321 Modern Times: Literature and Culture in the 20th Century
KWB729 Shakespeare: Then and Now
KWB625 American Stories
KWB712 Youth and Children’s Writing
KWB724 Wonderlands: Literature and Culture in the 19th Century
KWB725 Popular Fictions, Popular Culture

Music and Sound Studies (KMS)
Introductory Units: - compulsory
KMB640 Sex Drugs Rock N Roll
KMB638 Sound and Image
Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KMB631 World Music (required)
KMB667 Music and Spirituality (required)
KMB621 Sound Recording and Acoustics
KMB619 Music and Sound Technology
KMB649 Introductory Musicianship
KMB650 Introductory Ensemble

Screen Studies (KSC)
Introductory Units: - compulsory
KPB130 Media Text Analysis
KPB305 American Film: Genres and Directors OR
KPB141 Film and Television Languages
Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KPB359 Film History
KPB358 Documentary Theory And Practice
KPB343 Australian Film
KPB344 International Cinema

Television (KTV)
Introductory Units: - compulsory
KPB370 Principles of Television
KPB141 Film and Television Languages
Advanced Units - choose all 4 to complete submajor; or both required units to complete minor
KPB314 Media Business (required)
KPB155 Media Production (required)
KPB260 Community And Educational Video OR
KPB185 Informational Production
KPB371 Advanced Principles of Television

Performance Studies (KTP)
Introductory Units: - compulsory
KTB208 Elements of Drama
KTB251 20th Century Performance
Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KSB259 The Performance Instrument: Body and Voice
KTB271 Studies in Directing
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB257 Studies in Acting 1
KTB258 Studies in Acting 2

KKB010 Cultures and Creativity
KKB018 Creative Industries

Creative Industries Submajors and Minors

Art and Visual Culture
Introductory Units:
KVB102 Modernism
KVB103 Australian Art

Subsequent Units: required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KVB211 Post 1945 Art (required)
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes

KVB111 3D Media and Processes
KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

Art History, Architecture and Design
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor.
KKB33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.
DEB102 Introducing Design History
DAB420 Architecture, Culture and Space (required) (from 2007)
DAB325 Architecture in the 20th Century (from 2007)
DAB525 Architecture and the City (from 2008)
KVB212 Australian Art, Architecture and Design
KVB307 Theories of Spatial Culture

Communication
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

Creative and Professional Writing
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing

KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children's Writing

Creative Industries Management
Introductory Units:
BSB126 Marketing
KTB207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directing for Events and Festivals
MGB223 Creating New Enterprises

Dance
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
**Creative Industries**

KDB106 Dance Analysis  
KDB108 World Dance  
KDB204 Australian Dance

### Digital Media

**Introductory Units:**
- KCB102 Media and Society: From Printing Press to Internet  
- KCB202 New Media Technologies

**Subsequent Units:**  
- choose any 4 to complete submajor; or any 2 to complete minor  
- KCB201 Virtual Cultures  
- KCB203 Consumer Cultures  
- KIB101 Foundations of Communication Design 1  
- KIB103 Media Technology 1  
- KPB106 Australian Television  
- KVB306 Video Art and Culture

### Fashion, Art and Communication

**Introductory Units:**
- KFB103 Introduction to Fashion Design  
- KFB105 Fashion and Modernity

**Subsequent Units:**  
- both required units plus any 2 to complete submajor; or both required units to complete minor  
- KVB212 Australian Art, Architecture and Design (required)  
- KCB203 Fashion, Art and the Body (required)  
- KCB203 Consumer Cultures  
- KFB205 Fashion and Style Journalism  
- KVB104 Photomedia and Artistic Practice  
- KVB108 Contemporary Asian Visual Culture

### Indigenous Studies

**Introductory Units:**
- HHB123 Indigenous Australian Culture Studies  
- KWB007 Indigenous Writing

**Subsequent Units:**  
- choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor  
- KKB004 Indigenous Creative Industries  
- HHB255 Indigenous Politics And Political Culture  
- HHB210 Indigenous Australia: Country, Kin And Culture  
- EDB007 Culture Studies: Indigenous Education  
- JSB352 Indigenous Knowledge: Research Ethics and Protocols

### Interaction Design

**Introductory Units:**
- KIB101 Foundations of Communication Design 1  
- KIB102 Foundations of Communication Design 2

**Subsequent Units:**  
- choose any 4 to complete submajor; or any 2 to complete minor  
- KIB103 Media Technology 1  
- KIB104 Media Technology 2  
- KIB105 Animation and Motion Graphics  
- KIB108 Animation Practices  
- KIB210 Design Studio 1: Interaction Design

### Journalism

**Introductory Units:**
- KJB101 Journalism Information Systems  
- KJB120 Newswriting

**Subsequent Units:**  
- choose any 4 to complete submajor; or any 2 to complete minor  
- KFB205 Fashion and Style Journalism  
- KJB121 Journalistic Inquiry  
- KJB224 Feature Writing  
- KJB239 Journalism Ethics and Issues  
- KJB280 International Journalism

KJB337 Public Affairs Reporting

### Literary and Cultural Studies

**Introductory Units:**
- KWB001 Introduction to Literary Theory and Cultural Studies  
- KWB002 Ozlit

**Subsequent Units:**  
- choose any 4 to complete submajor; or any 2 to complete minor  
- KWB003 Modern Times (Literature and Culture in the 20th Century)  
- KWB004 Shakespeare, Then and Now  
- KWB005 Wonderlands: Literature and Culture in the 19th Century  
- KWB006 Popular Fictions, Popular Culture  
- KWB103 Persuasive Writing  
- KWB206 Youth and Children’s Writing

### Music and Sound Studies

**Introductory Units:**
- KMB003 Sex Drugs Rock ‘n’ roll  
- KMB107 Sound and Image

**Subsequent Units:**  
- choose any 4 to complete submajor; or both required units to complete minor  
- KMB002 Music and Spirituality  
- KMB004 World Music  
- KMB007 Introductory Ensemble  
- KMB104 Introductory Musicianship  
- KMB105 Music and Sound Technology  
- KMB108 Sound Recording and Acoustics  
- KMB204 Music and Sound Textures

### Performance Studies

**Introductory Units:**
- KTB101 20th Century Performance  
- KTB104 Performance Innovation

**Subsequent Units:**  
- choose any 4 to complete submajor; or any 2 to complete minor  
- KTB102 Process Drama  
- KTB103 Performing Skills 1: Body and Voice and Role  
- KTB106 Performing Skills 2: Style and Form  
- KTB204 Understanding Performance  
- KTB207 Staging Australia  
- KTB209 Applied Performance

### Screen Studies

**Introductory Units:**
- KPB103 Film Genres  
- KPB108 Media Text Analysis

**Subsequent Units:**  
- choose all 4 to complete submajor; or any 2 to complete minor  
- KPB102 Film History  
- KPB203 Australian Film  
- KPB205 Documentary Theory and Practice  
- KPB206 International Cinema

### Television

**Introductory Units:**
- KPB106 Australian Television  
- KPB101 Foundations of Film and Television Production

**Subsequent Units:**  
- choose all 4 to complete submajor; or any 2 to complete minor  
- KPB105 Narrative Production  
- KPB107 Television Genres  
- KPB303 Critical Thinking About Television  
- KPB104 Film and Television Production Resource Management
Advertising
Introductory Units:
BSB126 Marketing
AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing
AMB260 Public Relations Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns

Creative Industries Faculty Undergraduate Open Electives

- KWB102 Media Writing
- KWB103 Persuasive Writing
- KWB104 Creative Writing: The Short Story
- KWB106 Corporate Writing and Editing
- KWB107 Introduction to Creative Non-Fiction
- KWB206 Youth and Children's Writing

**Creative Industries Management**
Introductory Units:
- BSB126 Marketing
- KTB207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- BSB115 Management, People and Organisations
- KTB061 Creative Industries Management
- KTB062 Creative Industries Events and Festivals
- KTB104 Performance Innovation
- KTB306 Directing for Events and Festivals
- MGB223 Creating New Enterprises

**Dance**
Introductory Units:
- KDB109 Funk, Tap and all that Jazz
- KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KDB105 Architecture of the Body
- KDB106 Dance Analysis
- KDB108 World Dance
- KDB204 Australian Dance
**Digital Media**
Introductory Units:
- KCB102 Media and Society: From Printing Press to Internet
- KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KCB201 Virtual Cultures
- KCB203 Consumer Cultures
- KIB101 Foundations of Communication Design 1
- KIB103 Media Technology 1
- KBP106 Australian Television
- KVB306 Video Art and Culture

**Fashion, Art and Communication**
Introductory Units:
- KFB103 Introduction to Fashion Design
- KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
- KFB212 Australian Art, Architecture and Design (required)
- KFB205 Fashion and Style Journalism
- KVB104 Photomedia and Artistic Practice
- KVB108 Contemporary Asian Visual Culture

**Indigenous Studies**
Introductory Units:
- HHB123 Indigenous Australian Culture Studies
- KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
- KKB004 Indigenous Creative Industries
- HHB255 Indigenous Politics and Political Culture
- HHB210 Indigenous Australia: Country, Kin and Culture
- EDB007 Culture Studies: Indigenous Education
- JSB352 Indigenous Justice
- HHB276 Indigenous Knowledge: Research Ethics and Protocols

**Interaction Design**
Introductory Units:
- KIB101 Foundations of Communication Design 1
- KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KIB103 Media Technology 1
- KIB104 Media Technology 2
- KIB105 Animation and Motion Graphics
- KIB108 Animation Practices
- KIB210 Design Studio 1: Interaction Design

**Journalism**
Introductory Units:
- KJB101 Journalism Information Systems
- KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KFB205 Fashion and Style Journalism
- KJB121 Journalistic Inquiry
- KJB224 Feature Writing
- KJB239 Journalism Ethics and Issues
- KJB280 International Journalism
- KJB337 Public Affairs Reporting

**Law and Cultural Studies**
Introductory Units:
- KWB001 Introduction to Literary Theory and Cultural Studies
- KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KWB003 Modern Times (Literature and Culture in the 20th Century)
- KWB004 Shakespeare, Then and Now
- KWB005 Wonderlands: Literature and Culture in the 19th Century
- KWB006 Popular Fictions, Popular Culture
- KWB103 Persuasive Writing
- KWB206 Youth and Children’s Writing

**Music and Sound Studies**
Introductory Units:
- KMB003 Sex Drugs Rock ’n’ roll
- KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
- KMB002 Music and Spirituality
- KMB004 World Music
- KMB007 Introductory Ensemble
- KMB104 Introductory Musicianship
- KMB105 Music and Sound Technology
- KMB108 Sound Recording and Acoustics
- KMB204 Music and Sound Textures

**Performance Studies**
Introductory Units:
- KTB101 20th Century Performance
- KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KTB102 Process Drama
- KTB103 Performing Skills 1: Body and Voice and Role
- KTB106 Performing Skills 2: Style and Form
- KTB204 Understanding Performance
- KTB207 Staging Australia
- KTB209 Applied Performance

**Screen Studies**
Introductory Units:
- KPB103 Film Genres
- KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KPB102 Film History
- KPB203 Australian Film
- KPB205 Documentary Theory and Practice
- KPB206 International Cinema

**Television**
Introductory Units:
- KPB106 Australian Television
- KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KPB105 Narrative Production
- KPB107 Television Genres
- KPB303 Critical Thinking About Television
- KPB104 Film and Television Production Resource Management

**Advertising**
Introductory Units:
- BSB126 Marketing
- AMB220 Advertising Theory and Practice
Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing
AMB260 Public Relations Theory and Practice

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns

Creative Industries Faculty Undergraduate Open Electives
These unit offerings are current at the time of publication but are subject to change.
Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen submajor area.
- you must obey any elective rules as set out in your course requirements.
- you must have successfully completed any pre/co-requisite units applicable.
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability.
- some units are subject to quota restrictions.

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing

KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock ‘n’ roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking about Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking about Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction
**Creative Industries Submajors and Minors**

- **Art and Visual Culture**
  - Introductory Units:
    - KVB102 Modernism
    - KVB103 Australian Art
  - Subsequent Units:
    - required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
    - KVB211 Post 1945 Art (required)
    - KVB108 Contemporary Asian Visual Culture
    - KVB110 2D Media and Processes
    - KVB111 3D Media and Processes
    - KVB304 Contemporary Art Issues
    - KVB306 Video Art and Culture

- **Art History, Architecture and Design**
  - Introductory Units:
    - KVB102 Modernism
    - KVB211 Post 1945 Art
  - Subsequent Units:
    - both required units plus any 2 to complete submajor; or both required units to complete minor.
    - KK33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.
    - DEB102 Introducing Design History
    - DAB420 Architecture, Culture and Space (required) (from 2007)
    - DAB325 Architecture in the 20th Century (from 2007)
DAB525 Architecture and the City (from 2008)
KVB212 Australian Art, Architecture and Design
KVB307 Theories of Spatial Culture

Communication
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

Creative and Professional Writing
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children’s Writing

Creative Industries Management
Introductory Units:
BSB126 Marketing
KTB207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directing for Events and Festivals
MGB223 Creating New Enterprises

Dance
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance
KDB204 Australian Dance

Digital Media
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet
KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KCB201 Virtual Cultures
KCB203 Consumer Cultures
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
KPB106 Australian Television
KVB306 Video Art and Culture

Fashion, Art and Communication
Introductory Units:
KFB103 Introduction to Fashion Design
KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
KVB212 Australian Art, Architecture and Design (required)
KFB203 Fashion, Art and the Body (required)
KCB203 Consumer Cultures
KFB205 Fashion and Style Journalism
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture

Indigenous Studies
Introductory Units:
HHB123 Indigenous Australian Culture Studies
KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KKB004 Indigenous Creative Industries
HHB255 Indigenous Politics And Political Culture
HHB210 Indigenous Australia: Country, Kin And Culture
EDB007 Culture Studies: Indigenous Education
JSB352 Indigenous Justice
HHB276 Indigenous Knowledge: Research Ethics and Protocols

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies
KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB103 Persuasive Writing
KWB206 Youth and Children's Writing

Music and Sound Studies
Introductory Units:
KMB003 Sex Drugs Rock ‘n’ roll
KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
KMB002 Music and Spirituality
KMB004 World Music
KMB007 Introductory Ensemble
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Performance Studies
Introductory Units:
KTB101 20th Century Performance
KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB106 Performing Skills 2: Style and Form
KTB204 Understanding Performance
KTB207 Staging Australia
KTB209 Applied Performance

Screen Studies
Introductory Units:
KPB103 Film Genres
KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB102 Film History
KPB203 Australian Film
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Television
Introductory Units:
KPB106 Australian Television
KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB105 Narrative Production
KPB107 Television Genres
KPB303 Critical Thinking About Television
KPB104 Film and Television Production Resource Management

Advertising
Introductory Units:
BSB126 Marketing
AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns

* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Fine Arts (Creative Writing Production) KW25

Award title: Bachelor of Fine Arts (Creative Writing Production)
CRICOS code: 040306F
Campus: Kelvin Grove
Duration: 3 Years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Glen Thomas

Course Structure
Year 1, Semester 1
KWB250 Introduction to Creative Writing
KWB111 Media Writing
Creative Industries Core Unit
Elective
Year 1, Semester 2
KWB350 Creative Writing: The Short Story
KWB229 Film and Television Scriptwriting
Creative Industries

Creative Industries Core Unit
Elective

Year 2, Semester 1
KWB370 Electronic Writing
KWB381 Creative Nonfiction: Arts, Humour, Travel
Elective
Please select one of the following:
KJB224 Feature Writing
KWB315 Persuasive Writing

Year 2, Semester 2
KWB380 Creative Nonfiction: Life Writing
KWB395 Creative Writing Project 1
Elective
Please select one from the following:
KWB712 Youth and Children's Writing
KWB314 Corporate Writing and Editing

Year 3, Semester 1
KWB382 Editing and Creative Writing [24cp]
Elective

Year 3, Semester 2
KWB396 Creative Writing Project 2
KWB399 The Writing and Publishing Industry

Creative Industries Core Units
KKB007 Introduction to Multimedia Technology
KKB008 Narrative in the Creative Industries
KKB009 Writing for Creative Industries
KKB010 Cultures and Creativity
KKB018 Creative Industries

Submajors
Art and Visual Culture (KAV)
Introductory Units: - compulsory
KVB702 Australian and Indigenous Art
KVB447 Drawing
Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KVB712 Contemporary Art Issues (required)
KVB701 Modernism (required)
KVB444 Contemporary Asian Visual Culture
KVB703 Video Art and Culture
KVB457 Sculpture
KVB704 Theories of Spatial Culture

Communication (KCN)
Introductory Units: - compulsory
KCB101 Communication in the New Economy
KCB213 Strategic Speech Communication
Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
KWB314 Corporate Writing and Editing
KWB111 Media Writing
KCB150 Media and Communications Industries
KCB311 Political Communication
KCB334 Media and Communication Research Methods

Communication Design (KCD)
Introductory Units: - compulsory
KIB814 Enabling Immersion
KIB825 Animation Practices
Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KIB811 Visual Interactions
KIB808 Media Technology 2
KIB813 Contemporary Issues in Design and Technology
KIB804 3-D Animation 1

Creative and Professional Writing (KCW)
Introductory Units: - compulsory
KWB250 Introduction to Creative Writing
KWB380 Creative Nonfiction: Life Writing
Advanced Units - both required units plus any 2 to complete submajor; or both required units to complete minor
KWB315 Persuasive Writing (required)
KWB314 Corporate Writing and Editing (required)
KWB381 Creative Nonfiction: Arts, Humour, Travel
KWB111 Media Writing
KWB712 Youth and Children's Writing
KWB350 Creative Writing: The Short Story

Dance (KDN)
Introductory Units:
KDB125 Deconstructing Dance in History *
*Deconstructing Dance in History can be substituted with either World Dance or Architecture of the Body in Year 1, Semester 1.
KDB176 Popular Dance Styles
Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KDX104 Architecture of the Body
KDB106 Dance Analysis
KDB172 World Dance
KDB114 Australian Dance

Digital Media (KDM)
Introductory Units: - compulsory
KCB140 Media and Society: From Printing Press to Internet
KCB150 Media and Communications Industries
Advanced Units - choose all 4 to complete submajor; or any 2 to complete minor
KCB295 Virtual Cultures
KCB336 New Media Technologies
KPB209 Australian Television
KCB204 Globalisation and New Media

Indigenous Studies (KIS)
Introductory Units: - compulsory
HHB123 Indigenous Australian Culture Studies
KWB701 Indigenous Writing
Advanced Units - choose any 4 to complete submajor; or any 2 to complete minor
HHB210 Indigenous Australia: Country, Kin And Culture
HHB255 Indigenous Politics And Political Culture
JSB352 Indigenous Justice
EDB007 Culture Studies: Indigenous Education
KKB704 Indigenous Creative Industries
HHB276 Indigenous Knowledge: Research Ethics and Protocols *to be confirmed

Interaction Design (KIN)
Introductory Units: - compulsory
KIB801 Foundations Of Communication Design 1
KIB808 Media Technology 2
Advanced Units - choose all three required units plus one other to complete submajor; or KIB809 plus any other advanced unit to complete minor
KIB809 Interaction Design (required)
KIB815 Interfacing Media (required)
KIB822 Informational Arts (required)
KIB810 Information Architecture
KIB821 Mixed Realities

Journalism (KJO)
Introductory Units: - compulsory
KJB101 Journalism Information Systems
**Creative Industries Faculty Undergraduate Open Electives**

These unit offerings are current at the time of publication but are subject to change. Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

  - KMB631 World Music (required)
  - KMB667 Music and Spirituality (required)
  - KMB621 Sound Recording and Acoustics
  - KMB619 Music and Sound Technology
  - KMB649 Introductory Musicianship
  - KMB650 Introductory Ensemble

### Screen Studies (KSC)
- **Introductory Units:** compulsory
  - KPB130 Media Text Analysis
  - KPB305 American Film: Genres and Directors
  - KPB141 Film and Television Languages

- **Advanced Units:** choose any 4 to complete submajor; or any 2 to complete minor
  - KPB359 Film History
  - KPB358 Documentary Theory and Practice
  - KPB343 Australian Film
  - KPB344 International Cinema

### Telecommunications (KTV)
- **Introductory Units:** compulsory
  - KPB370 Principles of Television
  - KPB141 Film and Television Languages

- **Advanced Units:** choose all 4 to complete submajor; or any 2 to complete minor
  - KPB314 Media Business (required)
  - KPB155 Media Production (required)
  - KPB260 Community and Educational Video
  - KPB185 Informational Production
  - KPB371 Advanced Principles of Television

### Performance Studies (KTP)
- **Introductory Units:** compulsory
  - KTB208 Elements of Drama

### Advertising (KAD)
- **Introductory Units:** compulsory
  - BSB126 Marketing
  - AMB200 Consumer Behaviour

- **Advanced Units:** choose any 4 to complete submajor; or any 2 to complete minor
  - AMB220 Advertising Theory and Practice
  - AMB222 Media Planning
  - AMB221 Advertising Copywriting
  - AMB320 Advertising Management
  - AMB321 Advertising Campaigns

### Entrepreneurship (KEN)
- **Introductory Units:** compulsory
  - BSB126 Marketing
  - BSB115 Management, People and Organisations

- **Advanced Units:** choose any 4 to complete submajor; or any 2 to complete minor
  - MGB223 Creating New Enterprises
  - MGB218 Venture Skills
  - BSB212 Electronic Business Applications
  - AMB241 E-Marketing Strategies
  - AMB202 Integrated Marketing Communication
  - AMB251 Innovation and Market Development

### Public Relations (KPR)
- **Introductory Units:** compulsory
  - BSB126 Marketing
  - AMB201 Marketing and Audience Research

- **Advanced Units:** choose all 4 to complete submajor; or any 2 to complete minor
  - AMB260 Public Relations Theory and Practice
  - AMB261 Media Relations and Publicity
  - AMB262 Public Relations Writing
  - AMB361 Public Relations Campaigns

---

**IMPORTANT**

Where it allows, students can take a maximum of 8 units outside the Creative Industries Faculty (depending on the course the student is currently enrolled in). The following submajors/minors are offered through the Faculty of Business. Students may take only ONE of these as a complete submajor. For information about availability of non-Creative Industries Units, contact the Course Coordinator.
• you must have successfully completed any pre/co-
  requisite units applicable
• the offering of elective units is subject to sufficient stu-
  dent enrolment numbers and staff availability
• some units are subject to quota restrictions

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock ’n’ roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking about Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance

KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children's Writing

Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Fine Arts (Dance) KD25

Award title: Bachelor of Fine Arts (Dance)
CRICOS code: 032393B
Campus: Kelvin Grove
Duration: 3 Years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Ms Rachel Mathews

Course Structure
Year 1, Semester 1
KDX111 Performance 1
KDB180 Dance Technique Studies 1
KDX104 Architecture of the Body
KDB125 Deconstructing Dance In History

Year 1, Semester 2
KDX112 Performance 2
KDB181 Dance Technique Studies 2
KDX143 Choreographic Studies 1
KDB106 Dance Analysis

Year 2, Semester 1
Creative Industries Core Unit - List A
KDX141 Performance 3
KDB182 Dance Technique Studies 3
KDX144-1 Choreographic Studies 2

Year 2, Semester 2
KDX142 Performance 4
KDB183 Dance Technique Studies 4
KDX144-2 Choreographic Studies 2
KDB114 Australian Dance
KDB221 Integrated Professional Skills

Year 3, Semester 1
Creative Industries Core Unit - List A
Choose one of the following:
KDB193 Dance Project 1A
KKB320 Workplace Learning
Choose two of the following units:
KDB158 Dance and Technology 1
KDB172 World Dance
KSB011 Music Theatre Skills
Elective

Year 3, Semester 2
Choose one of the following units:
KDB199 Dance Project 1B
KKB320 Workplace Learning
Choose three from the following:
KDB159 Dance and Technology 2
KSB012 Music Theatre Project
KDB171 Theatre Dance Styles
Elective
Elective

Note:
Students wishing to graduate with the Bachelor of Fine Arts (Dance) must have completed two units outside the Dance area.

Creative Industries Core Units
KKB007 Introduction to Multimedia Technology
KKB008 Narrative in the Creative Industries
KKB009 Writing for Creative Industries
KKB100 Cultures and Creativity
KKB108 Creative Industries

AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing

AMB260 Public Relations Theory and Practice
Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
Creative Industries Faculty Undergraduate Open Electives

These unit offerings are current at the time of publication but are subject to change. Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen submajor area.
- you must obey any elective rules as set out in your course requirements
- you must have successfully completed any pre/co-requisite units applicable
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability
- some units are subject to quota restrictions

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock 'n' roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking about Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Fashion Discipline
KFB105 Fashion and Modernity

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

Music & Sound Discipline
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

Film & Television Discipline
KPB103 Film Genres
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
CREATIVE INDUSTRIES

Performance Studies Discipline
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB207 Staging Australia

Visual Arts Discipline
KVB103 Australian Art
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture
KVB211 Post 1945 Art
KVB306 Video Art and Culture
KVB307 Theories of Spatial Culture

Creative Writing & Cultural Studies Discipline
KWB002 Ozlit
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture
KWB007 Indigenous Writing
KWB102 Media Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children's Writing

Notes:
* Only one Workplace Learning unit may be completed
  * KKB290, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Fine Arts (Fashion Design) KF25

Award title: Bachelor of Fine Arts (Fashion Design)
CRICOS code: 046860J
Campus: Kelvin Grove
Duration: 3 years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Associate Professor Suzi Vaughan

Course Structure

Year 1, Semester 1
KFBA01 Design Studio 1
KVB757-1 Drawing For Fashion 1 (1/2)
KFBA07 Textiles (1/2)
Creative Industries Core Unit - List A

Year 1, Semester 2
KFBA02 Design Studio 2
KVB757-2 Drawing for Fashion 1 (2/2)
KFBA07-2 Textiles (2/2)
KFBA08 Fashion in Context

Year 2, Semester 1
KVB758-1 Drawing for Fashion 2 (1/2)
KFBA10-1 Research Seminar (1/2)
KFBA03 Design Studio 3
Creative Industries Core Unit - See List A

Year 2, Semester 2
KFBA04 Design Studio 4
KVB758-2 Drawing for Fashion 2 (2/2)
KFBA10-2 Research Seminar (2/2)
Elective
Fashion Elective - choose one from:
KFBA11 Advanced Textiles
KVB759 Visual Promotion
KJB339 Fashion and Style Journalism

Year 3, Semester 1
KFBA405 Design Studio 5
KKB320 Workplace Learning
KFBA12 Applied Planning
Elective

Year 3, Semester 2
KFBA406 Design Studio 6
KFBA056 Professional Studies (Fashion)
Fashion Elective - choose one from:

KKB018 Creative Industries

Creative Industries Submajors and Minors

**Art and Visual Culture**
Introductory Units:
KVB102 Modernism
KVB103 Australian Art

Subsequent Units: required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KVB211 Post 1945 Art (required)
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes
KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

**Art History, Architecture and Design**
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor.
KK33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.

**Communication**
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

**Creative and Professional Writing**
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children's Writing

**Creative Industries Management**
Introductory Units:
BSB126 Marketing
KTB207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directing for Events and Festivals
MG6223 Creating New Enterprises

**Dance**
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance
KDB204 Australian Dance

**Digital Media**
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet
KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KCB201 Virtual Cultures
KCB203 Consumer Cultures
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
KPB106 Australian Television
KVB306 Video Art and Culture

Fashion, Art and Communication
Introductory Units:
KFB103 Introduction to Fashion Design
KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
KVB212 Australian Art, Architecture and Design (required)
KFB203 Fashion, Art and the Body (required)
KC203 Consumer Cultures
KFB205 Fashion and Style Journalism
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture

Indigenous Studies
Introductory Units:
HHB123 Indigenous Australian Culture Studies
KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KKB004 Indigenous Creative Industries
HHB255 Indigenous Politics And Political Culture
HHB210 Indigenous Australia: Country, Kin And Culture
EDB007 Culture Studies: Indigenous Education
JSB352 Indigenous Knowledge: Research Ethics and Protocols

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies
KWB002 Ozit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now

KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB103 Persuasive Writing
KWB206 Youth and Children's Writing

Music and Sound Studies
Introductory Units:
KMB003 Sex Drugs Rock 'n' roll
KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
KMB002 Music and Spirituality
KMB004 World Music
KMB007 Introductory Ensemble
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Performance Studies
Introductory Units:
KTB101 20th Century Performance
KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB106 Performing Skills 2: Style and Form
KTB204 Understanding Performance
KTB207 Staging Australia
KTB209 Applied Performance

Screen Studies
Introductory Units:
KPB103 Film Genres
KPB018 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB102 Film History
KPB203 Australian Film
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Television
Introductory Units:
KPB106 Australian Television
KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB105 Narrative Production
KPB107 Television Genres
KPB303 Critical Thinking About Television
KPB104 Film and Television Production Resource Management

Advertising
Introductory Units:
BSB126 Marketing
AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introduction Units:
- BSB126 Marketing
- BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- AMB202 Integrated Marketing Communication
- AMB251 Innovation and Market Development
- AMB212 Electronic Business Applications
- MGB218 Venture Skills
- MGB223 Creating New Enterprises

Public Relations
Introduction Units:
- BSB126 Marketing
- AMB260 Public Relations Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
- AMB261 Media Relations and Publicity
- AMB262 Public Relations Writing
- AMB201 Marketing and Audience Research
- AMBS61 Public Relations Campaigns

Year 2, Semester 1
KPB201 Experimental Production
KPB202 Australian Film
KPB301 Documentary Production
KPB306 Film Drama Production

Year 2, Semester 2
KPB203 Documentary Theory and Practice
KPB206 International Cinema

Year 3, Semester 1
KPB307 Theories of Spatial Culture

Year 3, Semester 2
KVB102 Media Writing
**CREATIVE INDUSTRIES**

**OR**
KWB106 Corporate Writing and Editing  
KCB104 Media and Communications Industries  
KCB105 Media and Communication Research Methods  
KCB302 Political Communication  
KKB004 Indigenous Creative Industries

**Creative and Professional Writing**
Introductory Units:
KWB101 Introduction to Creative Writing  
KWB204 Creative Non-Fiction: Life Writing
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
KWB102 Media Writing  
KWB103 Persuasive Writing  
KWB104 Creative Writing: The Short Story  
KWB106 Corporate Writing and Editing  
KWB107 Introduction to Creative Non-Fiction  
KWB206 Youth and Children's Writing

**Creative Industries Management**
Introductory Units:
BSB126 Marketing  
KTB207 Staging Australia
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
BSB115 Management, People and Organisations  
KTB061 Creative Industries Management  
KTB062 Creative Industries Events and Festivals  
KTB104 Performance Innovation  
KTB306 Directing for Events and Festivals  
MGB223 Creating New Enterprises

**Dance**
Introductory Units:
KDB109 Funk, Tap and all that Jazz  
KDB110 Deconstructing Dance in History
Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor  
KDB105 Architecture of the Body  
KDB106 Dance Analysis  
KDB108 World Dance  
KDB204 Australian Dance

**Digital Media**
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet  
KCB202 New Media Technologies
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
KCB201 Virtual Cultures  
KCB203 Consumer Cultures  
KIB101 Foundations of Communication Design 1  
KIB103 Media Technology 1  
KPB106 Australian Television  
KVB306 Video Art and Culture

**Fashion, Art and Communication**
Introductory Units:
KFB103 Introduction to Fashion Design  
KFB105 Fashion and Modernity
Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor  
KVB212 Australian Art, Architecture and Design (required)  
KFB203 Fashion, Art and the Body (required)  
KCB203 Consumer Cultures  
KFB205 Fashion and Style Journalism  
KVB104 Photomedia and Artistic Practice  
KVB108 Contemporary Asian Visual Culture

**Indigenous Studies**
Introductory Units:
HHB123 Indigenous Australian Culture Studies  
KWB007 Indigenous Writing
Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor  
KKB004 Indigenous Creative Industries  
HHB255 Indigenous Politics and Political Culture  
HHB210 Indigenous Australia: Country, Kin and Culture  
EDB007 Culture Studies: Indigenous Education  
JSB352 Indigenous Justice  
HHB276 Indigenous Knowledge: Research Ethics and Protocols

**Interaction Design**
Introductory Units:
KIB101 Foundations of Communication Design 1  
KIB102 Foundations of Communication Design 2
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
KIB103 Media Technology 1  
KIB104 Media Technology 2  
KIB105 Animation and Motion Graphics  
KIB108 Animation Practices  
KIB210 Design Studio 1: Interaction Design

**Journalism**
Introductory Units:
KJB101 Journalism Information Systems  
KJB120 Newswriting
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
KFB205 Fashion and Style Journalism  
KJB121 Journalistic Inquiry  
KJB224 Feature Writing  
KJB239 Journalism Ethics and Issues  
KJB280 International Journalism  
KJB337 Public Affairs Reporting

**Literary and Cultural Studies**
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies  
KWB002 Ozit
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor  
KWB003 Modern Times (Literature and Culture in the 20th Century)  
KWB004 Shakespeare, Then and Now  
KWB005 Wonderlands: Literature and Culture in the 19th Century  
KWB006 Popular Fictions, Popular Culture  
KWB103 Persuasive Writing  
KWB206 Youth and Children's Writing

**Music and Sound Studies**
Introductory Units:
KMB003 Sex Drugs Rock 'n' roll  
KMB107 Sound and Image
Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor  
KMB002 Music and Spirituality  
KMB004 World Music  
KMB007 Introductory Ensemble  
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

**Performance Studies**
Introductory Units:
KTB101 20th Century Performance
KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB106 Performing Skills 2: Style and Form
KTB204 Understanding Performance
KTB207 Staging Australia
KTB209 Applied Performance

**Screen Studies**
Introductory Units:
KPB103 Film Genres
KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB102 Film History
KPB203 Australian Film
KPB205 Documentary Theory and Practice
KPB206 International Cinema

**Television**
Introductory Units:
KPB106 Australian Television
KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB105 Narrative Production
KPB107 Television Genres
KPB303 Critical Thinking about Television
KPB104 Film and Television Production Resource Management

**Advertising**
Introductory Units:
BSB126 Marketing
AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

**Entrepreneurship**
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

**Public Relations**
Introductory Units:
BSB126 Marketing
AMB260 Public Relations Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns

**Creative Industries Faculty Undergraduate Open Electives**
These unit offerings are current at the time of publication but are subject to change. Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:
- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen submajor area.
- you must obey any elective rules as set out in your course requirements
- you must have successfully completed any pre/co-requisite units applicable
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability
- some units are subject to quota restrictions

**Semester 1**

**Media & Communication Discipline**
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

**Dance Discipline**
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

**Journalism Discipline**
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

**Music & Sound Discipline**
KMB003 Sex Drugs Rock 'n' roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

**Film & Television Discipline**
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking about Television
Performance Studies Discipline
KTBM01 Creative Industries Management
KTBM02 Creative Industries Events and Festivals
KTBM101 20th Century Performance
KTBM204 Understanding Performance
KTBM306 Directing for Events and Festivals

Visual Arts Discipline
KVB0102 Modernism
KVB0104 Photomedia and Artistic Practice
KVB1102 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB330 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Fashion Discipline
KFB105 Fashion and Modernity

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

Music & Sound Discipline
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

Film & Television Discipline
KPB023 Film Genres
KPB082 Film and Television Production Resource Management
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Creative Writing & Cultural Studies Discipline
KWB002 Ozlit
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children’s Writing

Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Fine Arts (Film and Television) KP25

Award title: Bachelor of Fine Arts (Film and Television)
CRICOS code: 040299M
Campus: Kelvin Grove
Duration: 3 Years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Ms Jeanette McGown

Course Structure - Production Pathway

Year 1, Semester 1
KWB111 Media Writing
KPB155 Media Production
KPB359 Film History
Creative Industries Core Unit

Year 1, Semester 2
KPB141 Film and Television Languages
KPB185 Informational Production
KPB305 American Film: Genres and Directors
OR
KPB344 International Cinema
Creative Industries Core Unit

Year 2, Semester 1
KPB190 Creative Production
KPB314 Media Business
KPB118 Photomedia: Traditions and Techniques

Year 2, Semester 2
KPB265 Multi-Camera Television Studio Production
KWB229 Film and Television Scriptwriting
KPB358 Documentary Theory and Practice

Year 3, Semester 1

* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Fine Arts (Sound Design)

KK34

Award title: Bachelor of Fine Arts (Sound Design)
CRICOS code: 056185A
Campus: Kelvin Grove
Duration: 3 years full-time
Credit points: 288 cp (full-time standard semester: 48 cp)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Brad Millard

Full-time Course Structure

Year 1, Semester 1
Creative Industries Core Unit
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB110 Music Production 1

Year 1, Semester 2
Creative Industries Core Unit
KMB106 Music and Sound for Multimedia
KMB107 Sound and Image
KMB111 Music Production 2

Year 2, Semester 1
KIB103 Media Technology 1
KIB108 Animation Practices
KMB210 Music Production 3
Choose one of the following:
KMB003 Sex Drugs Rock ‘n’ roll
KMB004 World Music

Year 2, Semester 2
KMB205 Sound Media Musicianship
KMB211 Music Production 4
Elective
Choose one of the following:
KIB104 Media Technology 2
KPB101 Foundations of Film and Television Production
KCB202 New Media Technologies

**Year 3, Semester 1**
KMB310-1 Music Production 5
Elective
Elective

**Year 3, Semester 2**
KMB310-2 Music Production 5
KPB105 Narrative Production
OR
KIB105 Animation and Motion Graphics
Elective

**Creative Industries Core Units**
KKB007 Introduction to Multimedia Technology
KKB008 Narrative in the Creative Industries
KKB009 Writing for Creative Industries
KKB010 Cultures and Creativity
KKB018 Creative Industries

**Creative Industries Submajors and Minors**

**Art and Visual Culture**
Introductory Units:
KVB102 Modernism
KVB103 Australian Art

Subsequent Units: required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KVB211 Post 1945 Art (required)
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes
KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

**Art History, Architecture and Design**
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor.
KK33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.
DEB102 Introducing Design History
DAB420 Architecture, Culture and Space (required) (from 2007)
DAB325 Architecture in the 20th Century (from 2007)
DAB525 Architecture and the City (from 2008)
KVB212 Australian Art, Architecture and Design
KVB307 Theories of Spatial Culture

**Communication**
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

**Creative and Professional Writing**
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children's Writing

**Creative Industries Management**
Introductory Units:
BSB126 Marketing
KTB207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB306 Directing for Events and Festivals
MGB223 Creating New Enterprises

**Dance**
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance
KDB204 Australian Dance

**Digital Media**
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet
KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KCB201 Virtual Cultures
KCB203 Consumer Cultures
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
KPB106 Australian Television
KVB306 Video Art and Culture

**Fashion, Art and Communication**
Introductory Units:
KFB103 Introduction to Fashion Design
KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
KVB212 Australian Art, Architecture and Design (required)
KFB203 Fashion, Art and the Body (required)
KCB203 Consumer Cultures
KFB205 Fashion and Style Journalism
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture

**Indigenous Studies**
Introductory Units:
HHB123 Indigenous Australian Culture Studies
KWB007 Indigenous Writing
Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KKB004 Indigenous Creative Industries
HHB255 Indigenous Politics And Political Culture
HHB210 Indigenous Australia: Country, Kin And Culture
EDB007 Culture Studies: Indigenous Education
JSB352 Indigenous Justice
HHB276 Indigenous Knowledge: Research Ethics and Protocols

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

 Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

Literary and Cultural Studies
Introductory Units:
KWB001 Introduction to Literary Theory and Cultural Studies
KWB002 Ozlit
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB103 Persuasive Writing
KWB206 Youth and Children’s Writing

Music and Sound Studies
Introductory Units:
KMB003 Sex Drugs Rock ‘n’ roll
KMB107 Sound and Image
Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
KMB002 Music and Spirituality
KMB004 World Music
KMB007 Introductory Ensemble
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Performance Studies
Introductory Units:
KTB101 20th Century Performance
KTB104 Performance Innovation
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB106 Performing Skills 2: Style and Form
KTB204 Understanding Performance
KTB207 Staging Australia
KTB209 Applied Performance

Screen Studies
Introductory Units:
KPB103 Film Genres
KPB108 Media Text Analysis
Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB102 Film History
KPB203 Australian Film
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Television
Introductory Units:
KPB106 Australian Television
KPB101 Foundations of Film and Television Production
Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KPB105 Narrative Production
KPB107 Television Genres
KPB303 Critical Thinking About Television
KPB104 Film and Television Production Resource Management

Advertising
Introductory Units:
BSB126 Marketing
AMB220 Advertising Theory and Practice
Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB222 Media Planning
AMB221 Advertising Copywriting
AMB200 Consumer Behaviour
AMB320 Advertising Management

Entrepreneurship
Introductory Units:
BSB126 Marketing
BSB115 Management, People and Organisations
Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
AMB202 Integrated Marketing Communication
AMB251 Innovation and Market Development
BSB212 Electronic Business Applications
MGB218 Venture Skills
MGB223 Creating New Enterprises

Public Relations
Introductory Units:
BSB126 Marketing
AMB260 Public Relations Theory and Practice
Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing
AMB201 Marketing and Audience Research
AMB361 Public Relations Campaigns
Creative Industries Faculty Undergraduate Open Electives

KKB106 Corporate Writing and Editing
KKB204 Creative Non-Fiction: Life Writing
KKB206 Youth and Children's Writing

**Creative Industries Submajors and Minors**

**Art and Visual Culture**
Introductory Units:
KVB102 Modernism
KVB103 Australian Art

Subsequent Units: required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KVB211 Post 1945 Art (required)
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes
KVB304 Contemporary Art Issues
KVB306 Video Art and Culture

Art History, Architecture and Design
Introductory Units:
KVB102 Modernism
KVB211 Post 1945 Art

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor. KK33 (Visual Arts) and KK34 (Visual Arts) students can complete a minor comprising DEB102, DAB420, DAB325 and DAB525.

DEB102 Introducing Design History
DAB420 Architecture, Culture and Space (required) (from 2007)
DAB325 Architecture in the 20th Century (from 2007)
DAB525 Architecture and the City (from 2008)
KVB212 Australian Art, Architecture and Design
KVB307 Theories of Spatial Culture

Communication
Introductory Units:
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
OR
KWB106 Corporate Writing and Editing
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB302 Political Communication
KKB004 Indigenous Creative Industries

Creative and Professional Writing
Introductory Units:
KWB101 Introduction to Creative Writing
KWB204 Creative Non-Fiction: Life Writing

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB106 Corporate Writing and Editing
KWB107 Introduction to Creative Non-Fiction
KWB206 Youth and Children’s Writing

Creative Industries Management
Introductory Units:
BSB126 Marketing
KT207 Staging Australia

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
BSB115 Management, People and Organisations
KT210 Creative Industries Management
KT2061 Creative Industries Events and Festivals
KT204 Performance Innovation
KT2062 Directing for Events and Festivals
MGB223 Creating New Enterprises

Dance
Introductory Units:
KDB109 Funk, Tap and all that Jazz
KDB110 Deconstructing Dance in History

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB108 World Dance
KDB204 Australian Dance

Digital Media
Introductory Units:
KCB102 Media and Society: From Printing Press to Internet
KCB202 New Media Technologies

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KCB201 Virtual Cultures
KCB203 Consumer Cultures
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
KPB106 Australian Television
KVB306 Video Art and Culture

Fashion, Art and Communication
Introductory Units:
KFB103 Introduction to Fashion Design
KFB105 Fashion and Modernity

Subsequent Units: both required units plus any 2 to complete submajor; or both required units to complete minor
KVB212 Australian Art, Architecture and Design (required)
KFB203 Fashion, Art and the Body (required)
KCB203 Consumer Cultures
KFB205 Fashion and Style Journalism
KVB104 Photomedia and Artistic Practice
KVB106 Contemporary Asian Visual Culture

Indigenous Studies
Introductory Units:
HHB123 Indigenous Australian Culture Studies
KWB007 Indigenous Writing

Subsequent Units: choose required unit plus any 3 to complete submajor; or required unit plus any other unit to complete minor
KKB004 Indigenous Creative Industries
HHB255 Indigenous Politics And Political Culture
HHB210 Indigenous Australia: Country, Kin And Culture
EDB007 Culture Studies: Indigenous Education
JSB352 Indigenous Justice
HHB276 Indigenous Knowledge: Research Ethics and Protocols

Interaction Design
Introductory Units:
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KIB103 Media Technology 1
KIB104 Media Technology 2
KIB105 Animation and Motion Graphics
KIB108 Animation Practices
KIB210 Design Studio 1: Interaction Design

Journalism
Introductory Units:
KJB101 Journalism Information Systems
KJB120 Newswriting

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
KFB205 Fashion and Style Journalism
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues
KJB280 International Journalism
KJB337 Public Affairs Reporting

**Literary and Cultural Studies**

Introductory Units:
- KWB001 Introduction to Literary Theory and Cultural Studies
- KWB002 Ozlit

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KWB003 Modern Times (Literature and Culture in the 20th Century)
- KWB004 Shakespeare, Then and Now
- KWB005 Wonderland: Literature and Culture in the 19th Century
- KWB006 Popular Fictions, Popular Culture
- KWB103 Persuasive Writing
- KWB206 Youth and Children’s Writing

**Music and Sound Studies**

Introductory Units:
- KMB003 Sex Drugs Rock ‘n’ roll
- KMB107 Sound and Image

Subsequent Units: choose any 4 to complete submajor; or both required units to complete minor
- KMB002 Music and Spirituality
- KMB004 World Music
- KMB007 Introductory Ensemble
- KMB104 Introductory Musicianship
- KMB105 Music and Sound Technology
- KMB108 Sound Recording and Acoustics
- KMB204 Music and Sound Textures

**Performance Studies**

Introductory Units:
- KTB101 20th Century Performance
- KTB104 Performance Innovation

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- KTB102 Process Drama
- KTB103 Performing Skills 1: Body and Voice and Role
- KTB106 Performing Skills 2: Style and Form
- KTB204 Understanding Performance
- KTB207 Staging Australia
- KTB209 Applied Performance

**Screen Studies**

Introductory Units:
- KPB103 Film Genres
- KPB108 Media Text Analysis

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KPB102 Film History
- KPB203 Australian Film
- KPB205 Documentary Theory and Practice
- KPB206 International Cinema

**Television**

Introductory Units:
- KPB106 Australian Television
- KPB101 Foundations of Film and Television Production

Subsequent Units: choose all 4 to complete submajor; or any 2 to complete minor
- KPB105 Narrative Production
- KPB107 Television Genres
- KPB303 Critical Thinking About Television
- KPB104 Film and Television Production Resource Management

**Advertising**

Introductory Units:
- BSB126 Marketing
- AMB220 Advertising Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
- AMB222 Media Planning
- AMB21 Advertising Copywriting
- AMB200 Consumer Behaviour
- AMB320 Advertising Management

**Entrepreneurship**

Introductory Units:
- BSB126 Marketing
- BSB115 Management, People and Organisations

Subsequent Units: choose any 4 to complete submajor; or any 2 to complete minor
- AMB202 Integrated Marketing Communication
- AMB251 Innovation and Market Development
- BSB212 Electronic Business Applications
- MGB218 Venture Skills
- MGB223 Creating New Enterprises

**Public Relations**

Introductory Units:
- BSB126 Marketing
- AMB260 Public Relations Theory and Practice

Subsequent Units: choose all 4 to complete submajor; or both required units to complete minor
- AMB261 Media Relations and Publicity
- AMB262 Public Relations Writing
- AMB201 Marketing and Audience Research
- AMB361 Public Relations Campaigns

**Creative Industries Faculty Undergraduate Open Electives**

These unit offerings are current at the time of publication but are subject to change.

Creative Industries students may choose elective units from the following list or from outside the Faculty area subject to the following guidelines:
- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen submajor area.
- you must obey any elective rules as set out in your course requirements.
- you must have successfully completed any pre/co-requisite units applicable.
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability.
- some units are subject to quota restrictions.

**Semester 1**

**Media & Communication Discipline**
- KCB101 Communication in the New Economy
- KCB102 Media and Society: From Printing Press to Internet
- KCB103 Strategic Speech Communication
- KCB201 Virtual Cultures
- KCB302 Political Communication

**Dance Discipline**
- KDB105 Architecture of the Body
- KDB108 World Dance
- KDB110 Deconstructing Dance in History

**Fashion Discipline**
- KFB103 Introduction to Fashion Design

**Journalism Discipline**
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries

**University Diploma in Dance Teaching**

KD17

**Campus**: External

**Duration**: 1 year full-time (3 semesters); 2 years part-time external

**Credit points**: 96 (full-time standard semester: 36 cp in First and Second semester; 24 in Summer semester; part-time standard semester: 24 cp in First and Second semester; and either one or both units in the Summer Program)

**Course coordinator**: Ms Lesley Graham

**Discipline coordinator**: Assoc Prof Cheryl Stock

**Course Structure**

Students are required to complete eight units.

Students should contact the Course Coordinator to discuss their enrolment program.

**Full-time students**

Select three units from both first and Semester 2 and both units in the Summer program.

**Part-time students**

Select two units from both first and Semester 2 and either one or both units in the Summer program.

**Course Structure**

Students are required to complete eight units. Students should contact the course coordinator to discuss their enrolment program.

Full time: select three units from both first and second semesters and both units in the summer program.

Part time: select two units from both first and second semesters, and either one or both units in the summer program.

**Semester 1**

KDB190 Professional Practice and Business Administration for Dance Teachers
KDB191 Dance Teaching Methodologies
KDB197 Dance Analysis And Dance Histories
KDB198 Safe Dance Practice

**Semester 2**

KDB189 Dance Assessment and Reporting
KDB190 Professional Practice and Business Administration for Dance Teachers
KDB191 Dance Teaching Methodologies
KDB192 Stagecraft and Costume for Dance
KDB198 Safe Dance Practice

**Summer Program**

KDB195 Dance Teaching Studies 1
KDB196 Dance Teaching Studies 2

* Full time students select both units; part time students select one or both units

KDB195 and KDB196 are offered via intensive residency in Brisbane.

**Advanced Certificate in Dance Teaching**

KD06

**Award title**: Advanced Certificate in Dance Teaching

**Campus**: External

**Duration**: 1 year full-time (3 semesters); 2 years part-time external

**Credit points**: 96

**Course coordinator**: Ms Lesley Graham

**Discipline coordinator**: Assoc Prof Cheryl Stock

**Course Structure**

Students are required to complete eight units. Students should contact the Course Coordinator to discuss their enrolment program.

**Full-time Students**

Select three units from both First and Second semesters and both units in the Summer Program.

**Part-time Students**

Select two units from both First and Second semesters and one or both units in the Summer Program.

**Semester 1**
KDB190 Professional Practice and Business Administration for Dance Teachers
KDB191 Dance Teaching Methodologies
KDB197 Dance Analysis And Dance Histories
KDB198 Safe Dance Practice

Semester 2
KDB189 Dance Assessment and Reporting
KDB190 Professional Practice and Business Administration for Dance Teachers
KDB191 Dance Teaching Methodologies
KDB192 Stagecraft and Costume for Dance
KDB198 Safe Dance Practice

Summer Program
(Full-time students select both units; part-time students select one or both units)
KDB195 Dance Teaching Studies 1
KDB196 Dance Teaching Studies 2
Both KDB195 and KDB196 are on-campus intensive in Brisbane.

Certificate in Dance Teaching KD05

Award title: Certificate in Dance Teaching
Campus: External
Duration: 1 semester (by external study) full-time or 1 year (by external study) part-time
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Ms Lesley Graham
Discipline coordinator: Assoc Prof Cheryl Stock

Course Structure
Students are required to complete four units - the two core units and two electives. All students should contact the Study Area Coordinator to discuss their enrolment program.

Full-time Students
Select four units (two core and two electives) from either First or Second Semester. Students may choose to replace one elective with the Summer residency unit (Third Semester).

Part-time Students
Select four units (two core and two electives) across First and Second Semesters. Students may choose to replace one elective with the Summer residency unit.

Semester 1
KDB198 Safe Dance Practice
KDB190 Professional Practice and Business Administration for Dance Teachers
KDB191 Dance Teaching Methodologies
KDB197 Dance Analysis And Dance Histories

Semester 2
KDB198 Safe Dance Practice
KDB189 Dance Assessment and Reporting
KDB190 Professional Practice and Business Administration for Dance Teachers
KDB191 Dance Teaching Methodologies

Summer Program
KDB195 Dance Teaching Studies 1
(intensive residency in Brisbane) (elective)

OVERVIEW

QUT’s Faculty of Education is one of the largest education faculties in Australia with over 5500 students, of which 2100 are in postgraduate courses.

Based at the Kelvin Grove campus of QUT, the Faculty of Education is a dynamic place for people pursuing a career in education, and for educators seeking to advance their qualifications.

The Faculty is composed of more than 130 academic staff, many of them real-world professionals committed to fostering learning for students of all ages, and ensuring course content is contemporary and relevant.

The strong, practical theme in the faculty's courses provides a balance of theory and practical skills that ensures graduates are not limited by the employment opportunities provided by classroom teaching alone.

SENIOR STAFF

Faculty Office
Executive Dean: Professor V. McLean, DipT BKTC, BEdSt Qld, MEd PhD Arizona
Assistant Dean, Research: Professor E. McWilliam, DipT KGCAE, BA MedSt PhD Qld
Assistant Dean, Learning: Professor P Taylor, CertT KGTC, DipT Salisbury CAE, BEd DIAE, MCurSt UNE, PhD UQ
Faculty Administration Manager: B. Zebergs

RESEARCH CENTRE

Centre for Learning Innovation

The Faculty of Education has a strong research culture driven by a commitment to innovation, enhancing educational professional practice and solving real-world issues. The Faculty has implemented cutting-edge innovations in research training, and has attained a critical mass of educational researchers that attract many competitive and contracted research grants. The Doctor of Education course is one of the most successful in Australia.

The Faculty has been extremely successful in securing Australian Research Council (ARC) grants for major research projects as well as many forms of commercial research projects.

In 2005, the exciting new Centre for Learning Innovation opened. The aim of the CLI is to become a leader in collaborative research with the education professions and a recognised innovator in research education, both nationally and internationally.

Research in the CLI will be clustered into programs:
- Early Years
- Cognition and Creativity
- Indigenous Capacity Building
- Scholarship of teaching in Higher Education
- Advancement of Knowledge in Science, Technology and Maths
- Cultural transformations
- Creative Workforce
- Development and disability.

These research cultures are designed to offer opportunities for joint projects with other faculties and units within QUT, such as the Oodgeroo Unit and the Faculties of Science, Built Environment and Engineering, Creative Industries and Health.

The CLI is also a key partner in the ARC Centre of Excellence.
Doctor of Education ED11

Award title: Doctor of Education  
CRICOS code: 015023C  
Campus: Kelvin Grove  
Duration: 3.5 years part-time for holders of a relevant Masters degree; 4.5 years part-time without a relevant Masters part-time  
Credit points: 288 (part-time standard semester: 24)  
Course coordinator: Dr Susan Danby  

Course Structure  
The degree consists of 288 credit points of which 72 credit points are coursework, followed by a thesis of 216 credit points. All coursework must be completed before work can commence on the thesis. For the unit Interdisciplinary Education Studies (a 24 credit point unit), students undertake a four-day, on-campus study school in January of their commencing year. Subsequently, in the second and third semesters of their enrolment, students attend two four-day study schools on campus (July and the following January) in which they work on the methodology and design of their thesis (each unit worth 24 credit points). The thesis is undertaken in the Faculty's research centre. Students are expected to develop a high level of research skill and analysis and make an original contribution to knowledge and professional practice.

Course Structure  
Year 1, Semester 1  
EDR703 Interdisciplinary Education Studies (Advanced Seminars)  

Year 1, Semester 2  
EDR702/1 Thesis (Preparation)  

Year 2, Semester 1  
EDR702/2 Thesis (Preparation)  

Year 2, Semester 2  
EDR702/3 Thesis (Confirmation)  

Year 2, Summer Program  
EDR702/4 Thesis (Implementation)  

Year 3, Semester 1  
EDR702/5 Thesis (Implementation)  

Year 3, Semester 2  
EDR702/6 Thesis (Implementation)  

Year 3, Summer Program  
EDR702/7 Thesis (Implementation)  

Year 4, Semester 1  
EDR702/8 Thesis (Implementation)  

Year 4, Semester 2  
EDR702/9 Thesis (Submission)  

Master of Education (Research) ED12  

Award title: Master of Education (Research)  
CRICOS code: 002501G  
Campus: Kelvin Grove  
Duration: 1 year full-time or 2 years part-time  
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)  
Course coordinator: Professor Lyn English  

Course Structure  
The course consists of four stages: preparation, confirmation of candidature, implementation and submission of a thesis.

EDU14 Conducting Innovative Research in Educational Contexts. Students who have undertaken prior study of an equivalent nature may apply for an exemption from one or both of these units.

The confirmation of candidacy stage includes the adoption of an appropriate research design for the proposed research, preparation of a research proposal including a draft review of the literature and research methods, and presentation and justification of the proposal to other students and academic staff at a confirmation of candidacy seminar.

The implementation involves execution of the research for the thesis.

The submission stage is the completion and presentation of a thesis at a Final Oral seminar for approval by the final oral review panel, followed by production of the thesis in a suitable form for examination.

Course Requirements  
University and Faculty rules governing credit, supervision, confirmation of candidacy and examination of thesis apply to the Master of Education (Research).

Full-time Course Structure  
First Semester of Study  
EDN611 Professional Applications of Research  
IFN300 Masters Research  
Note: Students must either undertake EDN611 before EDN612 or undertake them concurrently.

Second Semester of Study  
EDN612 Conducting Innovative Research in Educational Contexts  
IFN300 Masters Research  
In instances where a candidate has exceeded the normal course duration and an extension of time has been approved students may enrol in:  
IFN101 Full-Time Masters Research (Extension)

Part-time Course Structure  
First semester of study  
EDN611 Professional Applications of Research  
IFN302 Masters Research  
Note: Students must either undertake EDN611 before EDN612 or undertake them concurrently.

Second semester of study  
EDN612 Conducting Innovative Research in Educational Contexts  
IFN300 Masters Research  
IFN200 Masters Research  
Third semester of study  
IFN200 Masters Research  
Fourth semester of study  
IFN200 Masters Research  
In instances where a candidate has exceeded the normal course duration and an extension of time has been approved students may enrol in:  
IFN201 Part-time Masters Research (extension)

Master of Education (Teaching English to Speakers of Other Languages - TESOL) ED14  

Award title: Master of Education (TESOL)
CRICOS code: 002330K
Campus: Kelvin Grove
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Jane Crawford

Entry requirements
Applicants must possess an appropriate bachelor degree or equivalent at a standard acceptable to the Executive Dean OR other qualifications acceptable to the Executive Dean, which may include substantial work experience in TESOL or involvement in other relevant professional research activities AND at least one year's practical experience in some branch of education acceptable to the Executive Dean.

Applicants who are non-native speakers of English must meet the University's English language proficiency entry requirements.

Course Structure
Students in the Masters program are required to complete 96 credit points of study including the two compulsory units, Second Language Acquisition and Principles of Second Language Methodology, of 12 credit points each. Students then have the choice of pursuing one of two options:

Option 1:
requires the completion of six elective units of 12 credit points each from the list of elective units below:
- Second Language Curriculum Design Options
- Directed Reading in Second Language Education
- Language Assessment and Program Evaluation in TESOL
- Personalised Language Development
- Technology and Second Language Learning
- Adult Literacy and Second Language Learners
- Sociolinguistics
- From Theory to Practice: Practical Applications in the TESOL Classroom
- Grammar for Teachers
- English Language Teaching Management
- Functional Grammar and Discourse
- Language and Culture
- Research Methods in Second Language Education

Option 2:
requires the completion of elective units and a 24 or 36 credit point research project to total 96 credit points. Students must consult with the Course Coordinator to discuss their research topic and complete the appropriate forms before enrolling in research units.

Full-time Course Structure
**First semester of study**
CLN608 Second Language Acquisition
CLN612 Principles Of Second Language Methodology
Elective unit
Elective unit

**Second semester of study**
Elective unit
Elective unit
Elective unit
Elective unit

**Third semester of study**
Elective unit
Elective unit

**Fourth semester of study**
Elective unit
Elective unit

**Elective list**
Note, a selection of these units will be offered each semester.

Some electives may be offered in Summer Program.
CLN613 Second Language Curriculum Design Options
CLN614 Research Methods and Second Language Education
CLN615 Directed Reading in Second Language Education
CLN616 Language Assessment and Program Evaluation In TESOL
CLN617 Personalised Language Development
CLN618 Technology and Second Language Learning
CLN619 Functional Grammar and Discourse
CLN620 Language and Culture
CLN640 Sociolinguistics
CLN641 From Theory To Practice - Practical Applications In The TESOL Classroom
CLN642 Grammar for Teachers
CLN643 English Language Teaching Management
CLB339 Adult Literacy and Second Language Learners
Note Assessment for CLB339 is completed at Masters level.

Students must consult with the Course Coordinator to discuss their research topic and complete the appropriate forms before enrolling in the following:
EDN603 Facilitated Study Unit
EDN608 Project
EDN620 Dissertation
EDN611 Professional Applications of Research
EDN612 Conducting Innovative Research in Educational Contexts

■ Master of Learning Innovation ED09

Award title: Master of Learning Innovation
CRICOS code: 053490E
Campus: External and Kelvin Grove
Duration: 1 year full-time or 2 years part-time or 1 year full-time or 2 years part-time external
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Assoc Prof John Lidstone

Special Entry Requirements (Early Childhood Teaching Study Areas only)
As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission prior to undertaking field experience in a school or centre. Students should apply for a card as soon as they are accepted into the course. It is now a requirement of all Queensland sites that preservice teachers have obtained the Blue Card prior to starting field experience. For more information visit blue-card.qut.com

Course Structure
Students will complete a program of study comprising the two core units and six electives as specified by the course.
rules and chosen to meet their personal and professional learning needs. In addition, there will be opportunities to complete specialised study in Teacher-Librarianship or Early Childhood Teaching as Study Area A options or a range of Study Area B options.

**Study Area A options are:**
- Teacher-Librarianship
- Early Childhood Teaching

Study Area B
To qualify for a Study Area B students must complete a minimum of 3 approved units (36 credit points) in one of the following areas:
- Adult Learning and Knowledge Management
- Asian Studies
- Career Guidance
- Cyberlearning
- Global Studies
- Guidance and Counselling
- Higher Education
- Leadership and Management
- Learning in Scientific Contexts
- Learning Support
- Managing Learners
- Middle Years
- Multiple Languages and Literacies
- Sustainability Education
- The Early Years

Master of Learning Innovation (Early Childhood Teaching) ED09

Award title: Master of Learning Innovation (Early Childhood Teaching)
CRICOS code: 053490E
Campus: Kelvin Grove and Internet
Duration: 1 year full-time or 2 years part-time or 1 year full-time or 2 years part-time external
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Ann Heirdsfield

Special Entry Requirements
As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission prior to undertaking field experience in a school or centre. Students undertaking the practicum unit in Early Childhood may be required to hold a current Blue Card even if they are a registered teacher. This applies to all students who intend undertaking this practicum in a Child Care Centre, Day Care, Long Day Care, Kindergarten or independent pre-school setting. It is essential that you apply for this Blue Card at least 16 weeks prior to the commencement of your field studies. Forms can be downloaded at:

If you require further information on this please contact Ms Shirley Richards from the Field Experience Office on email feo@qut.edu.au. Students who do not have a valid Blue Card and are required to do so for their placement will not be permitted to commence their practicum. You may incur penalties if you failed to submit your application within the recommended time-frame.

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.
If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

Teaching Area Entry Requirements
Students admitted into a teaching area must complete the course in that teaching area. It is assumed that current knowledge in the chosen teaching area has been maintained since completion of the relevant units.

Dance Education (not available mid-year, offered in internal mode only, quota restrictions apply)
A range of units covering Dance theory and practice at a university level. Applicants who satisfy the academic entry requirements will be contacted by Dance, Creative Industries Faculty for an interview. Interviews will be held in December. An audition may be required after the interview.

Drama Education (not available mid-year, offered in internal mode only, quota restrictions apply)
A range of units covering theory and performance at university level. Applicants who satisfy the academic entry requirements will be contacted by Drama, Creative Industries Faculty for an interview. Interviews will be held in December. An audition may be required after the interview.

English Education
A range of English units covering the areas of language and literacy, literary and cultural, and media and film stud-
ies. Applicants may not be accepted if their studies are too narrowly focused on one area.

Languages Education (not available mid-year, offered in internal mode only)
Applicants must have completed at least a minimum of six language units in sequence beyond the secondary school level (or the equivalent). Native speakers can also apply and must be able to demonstrate completion of schooling and/or tertiary study in the first/native language and/or demonstrated/documentated appropriate levels of language proficiency. Interview may be required. Languages available are French, German, Japanese, Indonesian, Chinese and Italian.

Mathematics Education
A range of mathematics units.

Music (Secondary) Education (not avail mid-yr, offered in internal mode only, quota restrictions apply)
A degree in music or approved equivalent at university level. Applicants who satisfy the academic entry requirements will be contacted by Music, Creative Industries Faculty for an interview. Interviews will be held in December. An audition may be required after the interview.

Visual Arts Education (not available mid-year, offered in internal mode only, quota restrictions apply)
A range of Visual Arts units, which must include studio practice and art history/theory units at university level. Applicants who satisfy the academic entry requirements will be contacted by Visual Arts, Creative Industries Faculty for an interview. Interviews will be held in December. A portfolio may be required after the interview.

Business Education (Accounting/Business Management)
A range of units in accounting and business management, with at least three accounting units of appropriate content.

Business Education (Business Communication and Technologies)
A range of units in business and business technology.

Business Education (Information, Communications and Technologies Education)
A range of units in the areas of computer systems and programming, information systems theory, and information technology.

Business Education (Legal Studies)
A range of units from the fields of law, justice studies, and criminology.

Social Education (Geography)
A range of units from the fields of geography, geology, and environmental studies.

Social Education (Legal Studies)
A range of units from the fields of law, justice studies, and criminology.

Social Education (History)
A range of History units. Applicants may not be accepted if their studies of history are too narrowly focused on one geographical area (e.g., Asia, Europe) or on one theme (e.g., warfare, colonisation).

Social Education (Social Science)
Applicants must have completed at least one (1) unit of history. One (1) unit of geography and one (1) unit of sociology is desirable. Other units may be drawn from the fields of ethics, gender studies, political studies, sociology, indigenous studies, and international and global studies.

Science Education (Biology)
A range of Biology units covering the areas of plant and animal studies.

Science Education (Chemistry)
A range of Chemistry units covering the areas of physical, inorganic, bio-organic, analytical and environmental chemistry.

Science Education (Earth Science)
A range of units from the fields of environmental science, geology, geoscience and ecology.

Science Education (Physics)
A range of units from the areas of physics and mathematics.

Science Education (Science Studies)
A range of units from the areas of physics, chemistry, biology, earth science, and astronomy.

Teaching Area Entry Requirements
Students admitted into a teaching area must complete the course in that teaching area. It is assumed that current knowledge in the chosen teaching area has been maintained since completion of the relevant units.

Dance Education (not available mid-year, quota restrictions apply)
A range of units covering Dance theory and practice at a university level. Interview is required (compulsory). An audition may be required after the interview. Contact Dance, Creative Industries Faculty on (07) 3138 5688.

Drama Education (not available mid-year, quota restrictions apply)
A range of units covering theory and performance at university level. Interview is required (compulsory). An audition may be required after the interview. Contact Drama, Creative Industries Faculty on (07) 3138 3468.

English Education
A range of English units covering the areas of language and literacy, literary and cultural, and media and film studies. Applicants may not be accepted if their studies are too narrowly focused on one area.

Languages Education (not available mid-year)
Applicants must have completed at least a minimum of six language units in sequence beyond the secondary school level (or the equivalent). Native speakers can also apply and must be able to demonstrate completion of schooling and/or tertiary study in the first/native language and/or demonstrated/documentated appropriate levels of language proficiency. Interview may be required. Languages available are French, German, Japanese, Indonesian, Chinese and Italian.

Mathematics Education
A range of Mathematics units.

Music (Secondary) Education (not available mid-year, quota restrictions apply)
A degree in music or approved equivalent at university level. Interview is required (compulsory). An audition may be required after the interview. Contact Music, Creative Industries Faculty on (07) 3138 3691.

Visual Arts Education (not available mid-year, quota restrictions apply)
A range of Visual Arts units, which must include studio practice and art history/theory units at university level. Interview is required (compulsory). A folio may be required after the interview. Contact Visual Arts, Creative Industries Faculty on (07) 3138 3092.
Business Education (Accounting/Business Management)
A range of units in accounting and business management, with at least three accounting units of appropriate content.

Business Education (Business Communication and Technologies)
A range of units in business and business technology.

Business Education (Information, Communications and Technologies Education)
A range of units in the areas of computer systems and programming, information systems theory, and information technology.

Business Education (Legal Studies)
A range of units from the fields of law, justice studies, and criminology.

Social Education (Geography)
A range of units from the fields of geography, geology, and environmental studies.

Social Education (Legal Studies)
A range of units from the fields of law, justice studies, and criminology.

Social Education (History)
A range of History units. Applicants may not be accepted if their studies of history are too narrowly focused on one geographical area (e.g., Asia, Europe) or on one theme (e.g., warfare, colonisation).

Social Education (Social Science)
Applicants must have completed at least one (1) unit of history. One (1) unit of geography and one (1) unit of sociology is desirable. Other units may be drawn from the fields of ethics, gender studies, political studies, sociology, indigenous studies, and international and global studies.

Science Education (Biology)
A range of Biology units covering the areas of plant and animal studies. Human biology is included in animal biology and ecology, and environmental sciences are included in plant biology.

Science Education (Chemistry)
A range of Chemistry units covering the areas of physical, inorganic, bio-organic, analytical and environmental chemistry.

Science Education (Earth Science)
A range of units from the fields of environmental science, geology, geoscience and ecology.

Science Education (Physics)
A range of units from the areas of physics and mathematics.

Science Education (Science Studies)
A range of units from the areas of physics, chemistry, biology, earth science, and astronomy.

Graduate Certificate in Education (Teaching English to Speakers of Other Languages - TESOL) ED77
Award title: Graduate Certificate in Education (TESOL)
CRICOS code: 014019G
Campus: Kelvin Grove
Duration: 1 semester full-time or 2 semesters part-time
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)

Course coordinator: Dr Jane Crawford

Course Structure
The Graduate Certificate in Education (TESOL) consists of four units taken from the Master of Education (TESOL) course. Students are required to complete the two core units Second Language Acquisition and Principles of Second Language Methodology and two electives.

Full-time Course Structure
First semester of study
Students enrol in two core units:
CLN608 Second Language Acquisition
CLN612 Principles of Second Language Methodology
and choose two electives from the list of elective units.

Elective unit
Elective unit

Part-time Course Structure
First semester of study
Students enrol in the two core units:
CLN608 Second Language Acquisition
CLN612 Principles Of Second Language Methodology
Second semester of study
and choose two electives from the list of elective units.

Elective unit
Elective unit

Elective List
Note, a selection of these units will be offered each semester.

Some electives may be offered in Summer Program.
CLN613 Second Language Curriculum Design Options
CLN615 Directed Reading in Second Language Education
CLN616 Language Assessment and Program Evaluation In Tesol
CLN617 Personalised Language Development
CLN618 Technology and Second Language Learning
CLB339 Adult Literacy and Second Language Learners

NOTE Assessment for CLB339 is completed at Masters level.
CLN640 Sociolinguistics
CLN641 From Theory To Practice - Practical Applications In The Tesol Classroom
CLN642 Grammar for Teachers
CLN643 English Language Teaching Management
CLN619 Functional Grammar and Discourse
CLN620 Language and Culture
CLN614 Research Methods and Second Language Education

Graduate Certificate in Education ED61
Award title: Graduate Certificate in Education (Study Area A)
CRICOS code: Not required
Campus: External and Kelvin Grove
Duration: 1 semester (subject to unit availability) full-time or 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Mr Alan Roberts

Course Structure
The Graduate Certificate in Education course consists of 48 credit points of study from the Master of Learning Innovation deemed by the Executive Dean to form a coherent program of study. Units can be presented in internal, flexible or block mode (where students are required to attend campus for up to five days normally during the January or July school holiday period). In some instances units can be
completed in a modularised form which allows students to complete the assessment on a credit point basis.

Study Areas
The study areas include:
- Adult Learning and Knowledge Management
- Autistic Spectrum Disorder
- Behaviour Management
- Career Guidance
- Early Childhood
- Educational Counselling
- Executive Leadership
- Higher Education
- Information and Communication Technology
- Leadership and Management
- Learning Futures
- Learning Support and Inclusive Education
- Mathematics Education
- Middle Years of Schooling
- Science education

Course structure

Adult Learning and Knowledge Management
SPN624 Adult and Professional Learning
EDN603 Facilitated Study Unit
SPN637 Managing Knowledge in Learning Organisations
SPN628 Leadership for Change

Bachelor of Adult and Community Learning ED84

Award title: Bachelor of Adult and Community Learning
CRICOS code: 046302F
Campus: Kelvin Grove and External
Duration: 2 years full-time or 2 to 4 years external

Course Structure
The Bachelor of Adult and Community Learning is a four-year undergraduate degree program. On entry students are granted 192 credit points or two years credit as recognition of prior knowledge, experience and skills. The remaining two years full-time or four years part-time focuses on adult and community learning. The development of a professional portfolio throughout the degree enables students to individualise their own program to suit their professional development needs.

Part-time Course structure

Year 1, Semester 1
EDB101 Professional Foundations for Learning Facilitation
1
SPB102 Professional Communication in Adult Learning Contexts
1

Year 1, Semester 2
EDB102 Professional Foundations for Learning Facilitation
2
SPB103 Program Design, Assessment, Reporting and Evaluation
Elective

Year 2, Semester 1
SPB104 Practitioner Research and Inquiry

Year 2, Semester 2
SPB100 Introduction to Adult Learning and Development
SPB101 Getting to Know Great Thinkers in Adult Education

Year 3, Semester 1
SPB105 Politics of Diversity and Identity
SPB106 Managing Learning Organisations

Year 3, Semester 2
SPB107 Knowledge Management and Learning Partnerships
Elective

Year 4, Semester 1
EDB103 Adult and Community Learning: Professional Project 1
Elective

Year 4, Semester 2
EDB104 Adult and Community Learning: Professional Project 2
SPB108 Career Development and Professional Futures

Full-time Course structure

Year 1, Semester 1
EDB101 Professional Foundations for Learning Facilitation
1
SPB100 Introduction to Adult Learning and Development
SPB101 Getting to Know Great Thinkers in Adult Education
SPB102 Professional Communication in Adult Learning Contexts

Year 1, Semester 2

Bachelor of Early Childhood ED83

Award title: Bachelor of Early Childhood
CRICOS code: Not required
Campus: External
Duration: 3 years external
Credit points: 288 (part-time standard semester: 24)
Course coordinator: Dr Julie Davis

Professional Recognition
The Bachelor of Early Childhood is accredited by the Department of Families, Youth and Community Care for employment in the area of child care. Graduates of the Bachelor of Early Childhood are not eligible for registration with the Queensland Board of Teacher Registration.

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.
If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

**Bachelor of Early Childhood Studies**

ED82

- **Award title:** Bachelor of Early Childhood Studies
- **CRICOS code:** 020305F
- **Campus:** Kelvin Grove
- **Duration:** 3 years full-time
- **Credit points:** 288 (full-time standard semester: 48)
- **Course coordinator:** Dr. Julie Davis

**Professional Recognition**

The Bachelor of Early Childhood Studies is an approved child care qualification with the Queensland Government Department of Communities and is accredited by the New South Wales Department of Community Services for employment in children's services.

**Working with Children Check**

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

**Course structure**

**Year 1, Semester 1**

- EDB006 Learning Networks
- EAB364 Academic and Professional Communication
- EAB008 Early Childhood Language and Literacies and Communication 1
- EAB001 Early Childhood Foundations 1: Historical and Comparative Perspectives of Early Childhood Education

**Year 2, Semester 1**

- EAB003 Development and Learning in Early Childhood 1
- EAB201 Early Childhood Health and Nutrition
- EDB016 Early Childhood Field Experience (Child Care)
- EAB002 Early Childhood Foundations 2: Families and Childhoods in Early Childhood Education and Care

**Year 2, Semester 2**

- EAB004 Development and Learning Early Childhood 2
- EDB011 Early Childhood Field Studies 1: Development and Learning in the Field
- EAB027 Early Childhood Mathematics Education 1: Birth to Six Years
- EAB013 Early Childhood Society, Environment and Health Education

**Year 3, Semester 1**

- EAB005 Inclusion in Early Childhood Settings
- EDB013 Early Childhood Field Studies 3: Immersion in Inclusive Educational Practices
- EAB012 Early Childhood Curriculum: Arts 2
- EAB019 Programs for Infants & Toddlers (Birth to three years)

**Year 3, Semester 2**

- EAB017 Integrated Early Childhood Curriculum
- EDB007 Culture Studies: Indigenous Education
- EAB361 Storytelling in Early Childhood Pathway Unit

**List 1: Pathway Studies Electives**

Students will take 2 pathway units, one in Year 2, Semester 2 and one in Year 3, Semester 2.

The two pathway units should be taken from the same area.

Students are only permitted to take EDB440 Independent Study as their final pathway unit if it is offered in their pathway and if staff are available to supervise the study within the faculty to which pathway area belongs.

**Early Childhood Mathematics, Science and ICT Education**

Students may also select units from Exploring the Science, Information and Communication Technologies and/or Life-long Numeracy and Mathematics

- EAB022 Early Childhood Science Education
- EAB023 Mathematical Explorations in Early Childhood
- EAB024 Sociology of Early Childhood Mathematics Education
- EAB422 Information and Communication Technologies and the Young Child
- Integrated Arts Curriculum
- EAB416 Early Childhood Art Education
EAB363 Creating Curriculum With Young Children
EDB440 Independent Study

Studies in Inclusive Education
Students in the Studies in Inclusive Education Pathway are not permitted to take CLB403 Gender & Sexuality Issues for Teachers and/or EDB440 Independent Study
MDB030 Understanding and Education Gifted Learners
SPB003 Teaching Children with Low Incidence Disabilities and Health Problems
SPB004 Teaching Students with Learning Difficulties
SPB007 Human Sexuality and Learning

Studies in Indigenous Education
CLB402 Issues In Indigenous Education
HHB123 Indigenous Australian Culture Studies
KKB701 Indigenous Australian Writing (offering to be confirmed)
HHB210 Indigenous Australia: Country, Kin And Culture
EDB440 Independent Study

Managing Learners and Learning
SPB004 Teaching Students with Learning Difficulties
SPB006 Educational Counselling
SPB010 Education, Law and the Beginning Teacher
SPB012 Classroom and Behaviour Management
SPB018 Teaching Strategies
EDB440 Independent Study

Literature and Media Studies
CLB441 Children's Literature
CLB452 Media Literacy and the School
CLB050 Popular Culture and Future Literacies
EAB361 Storytelling in Early Childhood

Investigating Mathematics
MDB347 Excursions in Number
MDB388 Numeracy in Games of Skill and Chance
MDB396 Excursions in Geometry
MDB021 Mathematics Curriculum Studies 1
MDB529 Diagnostic Assessment & Remedial Intervention in Mathematics
EAB023 Early Childhood Mathematics Education

Exploring Science
MDB389 Life and Living Processes
MDB390 Natural and Processed Materials
MDB391 Earth and Space
MDB454 Science, Technology and Society
EAB022 Early Childhood Science Education

Information and Communication Technologies
MDB392 Educational Computing Environments
MDB393 Networked Communities
MDB397 Digital Media in Education
EAB422 Information and Communication Technologies and the Young Child

Studies of Society and Environment
CLB049 Introductory Musicianship
KMB619 Music and Sound Technology
KMB650 Introductory Ensemble
KMB631 World Music
KMB621 Sound Recording and Acoustics

Visual Arts
KVB007 Drawing
KVB007 Painting
KVB457 Sculpture
KVB503 Clay Materials
KVB509 Photomedia and Artistic Practice
KVB702 Australian and Indigenous Art

Intercultural and International Teacher
Students may also select units from Studies in Indigenous Education & Studies in Inclusive Education.

Bachelor of Education (Early Childhood) ED92

Award title: Bachelor of Education (Early Childhood)
CRICOS code: 000783G
Campus: Kelvin Grove
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr Kerryn Walsh

Professional Recognition
The Bachelor of Education (Early Childhood) is recognised by the Queensland College of Teachers as meeting the requirements for registration as a teacher in Queensland. Graduates looking for employment in other parts of Australia and overseas may be required to meet additional conditions.
The Bachelor of Education (Early Childhood) is an approved child care qualification with the Queensland Government Department of Communities and is accredited by the New South Wales Department of Community Services for employment in children’s services.

**Working With Children Check**

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

**Course structure**

**Year 1, Semester 1**
- EDB006 Learning Networks
- EDB001 Teaching and Learning Studies 1: Teaching in New Times
- EAB008 Early Childhood Language and Literacies and Communication 1
- EAB001 Early Childhood Foundations 1: Historical and Comparative Perspectives of Early Childhood Education

**Year 1, Semester 2**
- EDB007 Culture Studies: Indigenous Education
- EAB003 Development and Learning in Early Childhood 1
- EAB011 Early Childhood Curriculum: Arts 1
- EAB002 Early Childhood Foundations 2: Families and Childhoods in Early Childhood Education and Care

**Year 2, Semester 1**
- EAB004 Development and Learning Early Childhood 2
- EDB011 Early Childhood Field Studies 1: Development and Learning in the Field
- EAB013 Early Childhood Society, Environment and Health Education
- EAB027 Early Childhood Mathematics Education 1: Birth to Six Years

**Year 2, Semester 2**
- EDB003 Teaching and Learning Studies 3: Practising Education
- EDB012 Early Childhood Field Studies 2: Practising Education in the Field
- EAB015 Early Childhood Science and Information and Communication Technologies Education
- EAB009 Early Childhood Language and Literacies and Communication 2

**Year 3, Semester 1**
- EAB005 Inclusion in Early Childhood Settings
- EDB013 Early Childhood Field Studies 3: Immersion in Inclusive Educational Practices
- EAB012 Early Childhood Curriculum: Arts 2
- EAB016 Research in Early Childhood Education

**Year 3, Semester 2**
- EAB028 Early Childhood Mathematics 2: Four to 8 Years
- EAB010 Early Childhood Language and Literacies and Communication 3
- Pathway Studies 1
- Pathway Studies 2

**Year 4, Semester 1**
- EAB026 Early Childhood Community Arts Project
- EAB006 Leadership and Management in Early Childhood Services
- Pathway Studies 3
- Pathway Studies 4

**Year 4, Semester 2**
- EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
- EDB014 Early Childhood Field Studies 4: Professional Work of Teachers - Induction into the Field
- EDB015 Internship (Early Childhood)
- EAB017 Integrated Early Childhood Curriculum

**Research Pathway Option**

Students with a GPA of 5.5 or above will be invited to undertake the research pathway option.

The research pathway option is designed to meet the needs of students wishing to undertake research-based higher degree study in the course of their future career. The pathway is designed to develop research skills and a research oriented, reflective approach to teaching. The amended structure for Research Pathway students will be:

**Year 3, Semester 1**
- EAB005 Inclusion in Early Childhood Settings
- EDB013 Early Childhood Field Studies 3: Immersion in Inclusive Educational Practices
- EAB012 Early Childhood Curriculum: Arts 2
- EDB410 Introduction to Research Methods In Education

**Year 3, Semester 2**
- EAB010 Early Childhood Language and Literacies and Communication 3
- EAB028 Early Childhood Mathematics 2: Four to 8 Years
- EDB411 Dissertation Elective

**Year 4, Semester 1**
- EAB006 Leadership and Management in Early Childhood Services
- EAB026 Early Childhood Community Arts Project
- EDB411 Dissertation
- EDB411 Dissertation

**Year 4, Semester 2**
- EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
- EDB014 Early Childhood Field Studies 4: Professional Work of Teachers - Induction into the Field
- EDB015 Internship (Early Childhood)
- EAB017 Integrated Early Childhood Curriculum

**List 1: Pathway Studies Electives**

All students (except those following the LOTE pathway) take a total of four units from this list during Years 2 - 4 (refer to course structure on previous pages for exact semesters).

The 4 units should be drawn from one of the specified groups below.

Students electing to undertake EDB440 Independent Study, will undertake this unit if offered in their chosen pathway and in the final semester of study. The opportunity to take EDB440 is dependent upon staff availability within the Faculty. The area of study will be specific to the chosen pathway area.
Research Pathway
(see above for complete research pathway)
EDB410 Introduction To Research Methods In Education
EDB411/1 Dissertation (Part 1)
EDB411/2 Dissertation (Part 2)
EDB411/3 Dissertation (Part 3)

Middle Years of Schooling Pathway
CLB323 Teaching Adolescent Literature
MDB021 Mathematics Curriculum Studies 1
SPB022 The Middle Years Curriculum
SPB008 The Middle Years of Schooling
SPB020 Classroom Assessment Practices
SPB018 Teaching Strategies
EDB440 Independent Study

Studies in Inclusive Education
Students may also select units from Studies in Indigenous Education and Intercultural and International Teacher
EAB005 Inclusion in Early Childhood Settings
MDB030 Understanding and Education Gifted Learners
SPB003 Teaching Children with Low Incidence Disabilities and Health Problems
SPB004 Teaching Students with Learning Difficulties
SPB007 Human Sexuality and Learning

Studies In Indigenous Education
Students may also select units from Intercultural and International Teacher and/or Studies in Inclusive Education
CLB402 Issues in Indigenous Education
CLB403 Gender and Sexuality Issues for Teachers
HHB123 Indigenous Australian Culture Studies
HHB210 Indigenous Australia: Country, Kin and Culture
KKB701 Indigenous Australian Writing (to be confirmed)

Health and Physical Activity
HMB315 Performance Skills 2
PUB251 Contemporary Public Health
HMB376 Motor Development in Children
PUB201 Food and Nutrition
PUB406 Health Promotion Strategies

THE ARTS
Students choose four units from the Creative Industries discipline areas of: Music, Visual Arts, Drama and Dance or the Early Childhood Arts units listed below.
Students must satisfy any specific entry requirements for Arts units.

Integrated Arts Curriculum
EAB416 Early Childhood Art Education
EAB361 Storytelling in Early Childhood
EAB363 Creating Curriculum with Young Children
EDB440 Independent Study

Drama
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role
KTB209 Applied Performance
KTB003 Applying Information Technology in the Drama Classroom

Music
KMB003 Sex Drugs Rock 'n' roll
KMB104 Introductory Musicianship
KMB004 World Music
KMB007 Introductory Ensemble
KMB107 Sound and Image
KMB002 Music and Spirituality

Dance
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB110 Deconstructing Dance in History
KDB204 Australian Dance
KDB205 Dance in Education
KDB108 World Dance
KDB109 Funk, Tap and all that Jazz

Visual Arts
KVB104 Photomedia and Artistic Practice
KVB103 Australian Art
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes
KVB202 Visual Imaging - Process and Theory
KVB213 Graphic Investigation
KVB306 Video Art and Culture
KVB511 Printmaking

Bachelor of Education (Preservice Early Childhood) ED93

Award title: Bachelor of Education (Preservice Early Childhood)
CRICOS code: Not required
Campus: External
Duration: 5 years external
Credit points: 384 CP (part-time standard semester: 24 CP)
Course coordinator: Dr Julie Davis

Professional Recognition
The Bachelor of Education (Preservice Early Childhood) is recognised by the Queensland College of Teachers as meeting the requirements for registration as a teacher in Queensland. Graduates looking for employment in other parts of Australia and overseas may be required to meet additional conditions.

The Bachelor of Education (Preservice Early Childhood) is an approved child care qualification with the Queensland Government Department of Communities and is accredited...
by the New South Wales Department of Community Services for employment in children's services.

**Working With Children Check**

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

**Part-time course structure**

Students are required to complete 20 units over 5 years part-time.

**Year 1, Semester 1**

MDB440 Computers and Education
EAB364 Academic and Professional Communication

**Year 1, Semester 2**

EAB011 Early Childhood Curriculum: Arts 1

- **Bachelor of Education (Primary) ED91**

  **Award title:** Bachelor of Education (Primary)
  **CRICOS code:** 000783G
  **Campus:** Kelvin Grove and Caboolture
  **Duration:** 4 years full-time
  **Credit points:** 384 (full-time standard semester: 48)
  **Course coordinator:** Dr Annah Healy

**Professional Recognition**

Graduates are eligible for registration as teachers in Queensland through the Queensland College of Teachers.

**Working with Children Check**

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

**Languages Other Than English (LOTE) Pathway**

Students undertaking a LOTE pathway may be required to attend other campuses. Students wishing to undertake studies in French, German, Indonesian or Japanese are required to select a specified sequence of six units (72 credit points). Students who have taken their LOTE to Year 12 or equivalent do not take the introductory units.

**Research Pathway**

Certain students will be invited to undertake the Research Pathway Option. This option is designed to meet the needs of students wishing to undertake research-based higher degree study in the course of their future career. The pathway is designed to develop research skills and a research-oriented, reflective approach to teaching.

**Course Structure**

**Year 1, Semester 1**

- EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
- EDB025 Internship (Primary)
- EDB411/3 Dissertation (Stage 3)

**List 1: Pathway Studies Electives**
All students (except those following the LOTE pathway) take a total of four units from this list during Years 2 - 4 (refer to course structure on previous pages for exact semesters).

The 4 units should be drawn from one of the specified groups below.

Students electing to undertake EDB440 Independent Study, will undertake this unit if offered in their chosen pathway and in the final semester of study. The opportunity to take EDB440 is dependent upon staff availability within the Faculty. The area of study will be specific to the chosen pathway area.

**Research Pathway**
(see above for complete research pathway)
- EDB410 Introduction To Research Methods In Education
- EDB411/1 Dissertation (Part 1)
- EDB411/2 Dissertation (Part 2)
- EDB411/3 Dissertation (Part 3)

**Middle Years of Schooling Pathway**
- CLB323 Teaching Adolescent Literature
- MDB021 Mathematics Curriculum Studies 1
- SPB022 The Middle Years Curriculum
- SPB008 The Middle Years of Schooling
- SPB020 Classroom Assessment Practices
- SPB018 Teaching Strategies
- EDB440 Independent Study

**Studies in Inclusive Education**
- Students may also select units from Studies in Indigenous Education and Intercultural and International Teacher
- EAB005 Inclusion in Early Childhood Settings
- MDB030 Understanding and Education Gifted Learners
- SPB003 Teaching Children with Low Incidence Disabilities and Health Problems
- SPB004 Teaching Students with Learning Difficulties
- SPB007 Human Sexuality and Learning

**Studies in Indigenous Education**
- Students may also select units from Intercultural and International Teacher and/or Studies in Inclusive Education
- CLB402 Issues in Indigenous Education
- CLB403 Gender and Sexuality Issues For Teachers
- HHB123 Indigenous Australian Culture Studies
- HHB210 Indigenous Australia: Country, Kin And Culture
- KKB701 Indigenous Australian Writing (to be confirmed)
- EDB440 Independent Study

**Managing Learners and Learning**
- SPB004 Teaching Students with Learning Difficulties
- SPB006 Educational Counselling
- SPB010 Education, Law and the Beginning Teacher
- SPB012 Classroom and Behaviour Management
- SPB018 Teaching Strategies
- EDB440 Independent Study

**Intercultural and International Teacher**
- Students may also select units from Studies in Inclusive Education and/or Studies in Indigenous Education.
- CLB045 Becoming a second language user
- CLB049 The Global Teacher
- CLB347 Teaching English as an Additional Language
- CLB401 Cultural Diversity and Education
- CLB403 Gender and Sexuality Issues for Teachers
- EDB440 Independent Study

**DISCIPLINE-BASED PATHWAYS**

**Literature and Media Studies**
- CLB441 Children’s Literature
- CLB452 Media Literacy and the School
- CLB323 Teaching Adolescent Literature
- CLB050 Movies and Popular Culture
- EAB361 Storytelling in Early Childhood
- EDB440 Independent Study

**Lifelong Numeracy and Mathematics**
- Students may select units from Exploring the Science, Information and Communication Technologies and/or ED Maths, Science and ICT
- EAB023 Mathematical Explorations in Early Childhood
EAB024 Sociology of Early Childhood Mathematics Education
MDB349 Numeracy and Mathematical Reasoning for the 21st Century
MDB388 Numeracy in Games of Skill and Chance
MDB453 Middle School Mathematics Education
MDP529 Assessment and Intervention in Mathematics
EDB440 Independent Study

Exploring the Sciences
MDB389 Life and Living Processes
MDB390 Natural and Processed Materials
MDB391 Earth and Space
MDB454 Science, Technology and Society
EAB022 Early Childhood Science Education
EDB440 Independent Study

Information and Communication Technologies
MDB392 Educational Computing Environments
MDB393 Networked Communities
MDB397 Digital Media in Education
EAB422 Information and Communication Technologies and the Young Child
MDB377 Project Planning And Implementation For Educational Purposes
MDB414 Learning Environments Using Information Technology

Early Childhood Mathematics, Science and ICT Education
EAB022 Early Childhood Science Education
EAB023 Mathematical Explorations in Early Childhood
EAB024 Sociology of Early Childhood Mathematics Education
EAB422 Information and Communication Technologies and the Young Child

Studies of Society and Environment
CLB371 Knowing Your Environment: From Global Issues to Local Action
CLB372 Sustainable Consumption: From Coca-Cola to the Community Co-op
CLB373 Environmental Futures Australia and the Asia Pacific
CLB375 Exploring Outdoors; Education in the Environment
CLB049 The Global Teacher
EDB440 Independent Study

Health and Physical Activity
HMB315 Performance Skills 2
PUB251 Contemporary Public Health
HMB376 Motor Development in Children
PUB201 Food and Nutrition
PUB406 Health Promotion Strategies

THE ARTS
Students choose four units from the Creative Industries discipline areas of: Music, Visual Arts, Drama and Dance or the Early Childhood Arts units listed below.

Students must satisfy any specific entry requirements for Arts units.

Integrated Arts Curriculum
EAB416 Early Childhood Art Education
EAB361 Storytelling in Early Childhood
EAB363 Creating Curriculum With Young Children
EDB440 Independent Study

Drama
KTB102 Process Drama
KTB103 Performing Skills 1: Body and Voice and Role

KTB209 Applied Performance
KTB003 Applying Information Technology in the Drama Classroom

Music
KMB003 Sex Drugs Rock 'n' roll
KMB104 Introductory Musicianship
KMB004 World Music
KMB007 Introductory Ensemble
KMB107 Sound and Image
KMB002 Music and Spirituality

Dance
KDB105 Architecture of the Body
KDB106 Dance Analysis
KDB110 Deconstructing Dance in History
KDB204 Australian Dance
KDB205 Dance in Education
KDB108 World Dance
KDB109 Funk, Tap and all that Jazz

Visual Arts
KVB104 Photomedia and Artistic Practice
KVB103 Australian Art
KVB108 Contemporary Asian Visual Culture
KVB110 2D Media and Processes
KVB111 3D Media and Processes
KVB202 Visual Imaging - Process and Theory
KVB213 Graphic Investigation
KVB306 Video Art and Culture
KVB511 Printmaking

List 2 : Languages Other Than English (LOTE) Units

LOTE Units
General primary/LOTE students are required to complete 72 credit points of:
- discipline/content studies plus 12 credit points of curriculum studies in one of the
- four languages available.

Students who have taken their LOTE to Year 12 or equivalent do not take the introductory units.

The language units in the discipline/content strand are as follows:

French
HHB060 French for the Tourism Industry
HHB061 French 1
HHB062 French 2
HHB063 French 3
HHB064 French 4
HHB065 French 5
HHB066 French 6
HHB067 French 7
HHB068 French 8
HHB069 French 9
HHB070 French 10

German
HHB091 German 1
HHB092 German 2
HHB093 German 3
HHB094 German 4
HHB095 German 5
HHB096 German 6
HHB097 German 7
HHB098 German 8
Indonesian
HHB071 Indonesian 1
HHB072 Indonesian 2
HHB073 Indonesian 3
HHB074 Indonesian 4
HHB075 Indonesian 5
HHB076 Indonesian 6
HHB077 Indonesian 7
HHB078 Indonesian 8

Japanese
HHB081 Japanese 1
HHB082 Japanese 2
HHB083 Japanese 3
HHB084 Japanese 4
HHB085 Japanese 5
HHB086 Japanese 6
HHB087 Japanese 7
HHB088 Japanese 8

Course Structure 2007 Year 3 - Middle Years - Caboolture

Year 3, Semester 1 - Caboolture
KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media
KKB202 Primary Curriculum and Pedagogies: Dance and Drama
Pathway Studies 3
Discipline-Based Pathway Studies Unit
CLB007 Primary Curriculum and Pedagogies: Language and Literacies 2

Year 3, Semester 2 - Caboolture
EDB003 Teaching and Learning Studies 3: Practising Education
EDB022 Primary Field Studies 2: Practising Education in the Field
MDB003 Primary Curriculum & Pedagogies: Mathematics 2
MDB005 Primary Curriculum & Pedagogies: Design and Technology Education

Course structure - Year 4 Middle Years Pathway - Caboolture

Year 4, Semester 1 - Caboolture
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices
SPB036 Primary Curriculum and Pedagogies: Assessment and Reporting

Year 4, Semester 2 - Caboolture
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)
Pathway Studies 4

Bachelor of Education (Secondary) ED90

Award title: Bachelor of Education (Secondary)
CRICOS code: 00783G
Campus: Kelvin Grove, Carseldine and Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr Peter Bond

Professional Recognition

The Bachelor of Education (Secondary) is recognised by the Queensland College of Teachers as meeting the requirements for registration as a teacher in Queensland. Applicants for teacher registration in Queensland are subject to national criminal history checks.

Working With Children Check
As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

Course Structure
The Bachelor of Education is an exciting new learning opportunity, which will challenge students to investigate, question, and create new knowledge about teaching and learning. The course has been designed using the principles of outcomes-based education; an educational approach that not only describes the long-term learning outcomes that are desired from the course, but which accepts that the learning pathway towards these outcomes may be different for individual students.

Each program consists of several different types of units:
- core units cover material which is considered essential
- parallel units are specific to each program
- strand units focus on issues related to that program
- specialist pathway units allow students to undertake a specific area of study of at least 48 credit points.

Students complete a total of 384 credit points of study and will specialise in two teaching areas appropriate for teaching grades 8-12 in Queensland. The teaching area studies are also referred to as discipline studies.

Students will undertake discipline studies, education-related studies and a minimum of 100 days of field study experience in a range of classrooms and other educational settings, and curriculum studies relevant to the selected teaching areas. Core education units will cover teaching and learning studies, technology studies, Indigenous and sociocultural studies. Applied curriculum tasks give students the opportunity to relate their practical school experiences to their theoretical studies.

Successful applicants receive an offer in one of three streams: General, Home Economics or Physical Education. Restrictions apply to some teaching area combinations.

Students will select their two teaching areas from the following lists (one from Group X and one from Group Y):

Course structure
Possible Combinations of Subject Areas

Group X
Accounting/Business Management
Business Communication & Technologies
Computing
English
Home Economics (available only to students entering through the Home Economics entry point)
Mathematics
Physical Education (available only to students entering through the Physical Education entry point)
Science Studies
Social Science
English as a Second Language (ESL)

**Group Y**
Accounting/Business Management
Biology
Business Communications & Technologies
Chemistry
Earth Science
English
Film & Media Studies (subject to quota)
French
Geography
German
Health Education
History
Indonesian
Japanese
Legal Studies
Mathematics
Physics

**Note:**
Where the same subject is listed in both Groups X and Y (eg. English), it may only be selected once.

There may be limited places in some disciplines as a second teaching area

Students selecting Home Economics or Physical Education are to complete 96 credit points in these areas.

Some subjects are taught at Gardens Point and Carseldine campuses and timetable incompatibilities may exist with subjects taught at Kelvin Grove.

Students wishing to take biology, chemistry, earth science, or physics with subject areas other than mathematics or science studies should check for possible timetable difficulties.

Mathematics has an Assumed Knowledge of Maths B (4 SA)

OVERVIEW

The Faculty of Health is an industry leader that educates professionals for a range of health related areas, conducts research and is actively engaged in continuing education and community service.

The Faculty has more than 3500 students enrolled in undergraduate and postgraduate programs. Undergraduate degree programs are delivered through five discipline-based schools of Human Movement Studies, Nursing, Optometry, Psychology and Counselling, and Public Health.

The School of Human Movement Studies offers programs that respond to the increasing community awareness of health, exercise, well-being, and fitness. A degree in Human Movement Studies equips graduates with the knowledge and skills for an active career in physical education, health education, rehabilitation, weight management, or exercise and sports science.

The School of Nursing is Queensland's oldest provider of nursing education. Always at the cutting-edge of its field, the School offers the latest in clinical facilities and equipment, and a wide range of local, rural, and overseas opportunities for practical placements. Nursing graduates go on to work in a range of areas, including and beyond the traditional hospital ward. The School offers an undergraduate program in nursing, as well as specialised postgraduate programs.

The School of Optometry is the only optometry training facility in Queensland and one of three in Australia. As such, Optometry graduates are always in demand. The optometry degree prepares graduates for entry into the professional workforce and for Australia-wide registration. Students apply their knowledge through supervised clinical practice both in the School's purpose-built public optometry clinic and in the community. Postgraduate research programs are offered by the School at Masters and PhD level.

The School of Psychology and Counselling is located in the School of Psychology and Counselling at Carseldine campus. The School offers excellent teaching, technology and research facilities for its undergraduate and postgraduate courses. Programs provide graduates with the opportunity to gain practical qualifications that are well regarded in the community. The Bachelor of Behavioural Science (Psychology) is a three-year degree program that prepares graduates for further studies in psychology and for employment in a number of fields. Graduates aiming for professional registration may seek admission to a fourth year of study in either the Bachelor of Psychology (Honours) or the Postgraduate Diploma in Psychology. The School's postgraduate offerings include Masters in Counselling, Clinical Psychology and Psychology (Educational and Developmental), and Graduate Diplomas or Certificates in Psychology and Road Safety. Studies can also be undertaken at doctorate level.

The School has a Family and Counselling Clinic, which is open to the public, and a research centre in Road Safety and Accident Prevention.

The School of Public Health is the most diverse of the Faculty's schools, offering undergraduate majors in podiatry, nutrition and dietetics, health information management, health services management, paramedic and public health. A range of articulated postgraduate programs is also offered in a number of specialised fields such as environmental health, health promotion, occupational health and safety, risk management, and health science.

Staff in the Faculty maintain excellent ties with the health industry and work closely with national and international health and welfare organisations. These industry ties ensure that the Faculty's programs deliver relevant skills and respond rapidly to new and emerging needs in health education in an era of advancing health technology.

The Faculty of Health is primarily based at QUT's Kelvin Grove campus, with the School of Psychology and Counselling located at Carseldine campus in the northern suburbs of Brisbane. At Kelvin Grove campus, two purpose-built complexes house state-of-the-art facilities including:

- teaching clinics for Podiatry, Optometry and Human Movement Studies (children's activity and weight management programs, balance and gait assessment, health and fitness appraisals, and exercise prescriptions)
- a Nursing clinical practice laboratory
- Human Movement laboratories for biomechanics, exercise physiology, motor control, and functional anatomy
- student computer laboratories with the latest in general and health-related software
- multimedia lecture theatres and tutorial rooms
- fully equipped research laboratories
- and an ergonomics laboratory.

At Carseldine, a Family Therapy and Counselling Clinic provides supervised clinical experience for Counselling students.

SENIOR STAFF

Faculty Office

Dean: Professor K. J. Bowman AM, MScOptom Melb, LOSc, FAAO
Assistant Dean (Research): J.E. Lovie-Kitchin, MSc(Optom) Melb, GradDipRehab La Trobe, PhD QUT, LOSc, FAAO
Assistant Dean (Teaching and Learning): R.E. Nash, DipAppSc QIT, BA Qld, MHlthSc C Sturt, FRANA

Faculty Administration Manager: M. Rimland, BA Qld
Health Project Manager: C.J. Cliff, BSc ANU, PhD Keele, DipEnvStud Macq, GradDipOutdoorEd Brisbane CAE, GradDipBusAdmin QUT, CCChem

School of Human Movement Studies

Head: Professor K Davids, BEd (Hons) Lond, PhD Leeds
Professor: A.P. Hills, BEd Tas, MSc Oregon, PhD Qld

School of Nursing

Head: Professor H.E. Edwards, DipApSc QIT, BA (Hons) PhD Qld, RN, FRkNA

Professors:

J.A. Abbey, PhD Deakin
A.M. Chang, DipNEd, BEdSt(Hons), MEdSt, PLD, RN, FRkNA
M.D. Courtney, BAdmin(Acctg) Griff, MHP UNSW, PhD UNE, RN, FRkNA
G. Gardner, BAppSc(AdvNursing) La Trobe, MEdSt Monash, PhD Qld
P. Yates, DipAppSc QIT, MSocSc PhD Qld, FRkNA

School of Optometry

Head: Professor L.G. Carney, BAppSc MSc(Optom) PhD Melb, DSc QUT, LOSc, FAAO

QUT HANDBOOK 2006 PAGE 279
Professors:
D.A. Atchison, MSc(Optom) PhD Melb, GradCertEd, FAAO
J. M. Wood, BSc(Hons) PhD Aston, MCompOptom, FAAO

Associate Professors:
M. J. Collins, DipAppSc QIT, MAAppSc PhD QUT, FAAO
K.L. Schmid, BAppSci(Optom)(Hons) GradCertEd(HigherEd) PhD QUT
P. G. Swann, BSc(Hons) Aston, MAAppSc QUT, FCOptom, FAAO

School of Psychology and Counselling
Head: Professor R.M. Young, BSc(Hons) MSc Dip-ClinPsych Otago, PhD Qld, MAPS
Professor: M.C. Sheehan, BA(Hons) GradDip(Clinical Psych) Psyd, PhD Qld

Associate Professors:
J.D. Davey, DipTeach BEd MED PhD Qld
R. Schweitzer, BScoc(Hons) UCT, MA ClinPsy, PhD Rhodes
I.M. Shochet, BA(Hons) MA(ClinPsych) PhD Johannesburg

School of Public Health
Head (Acting): M.Fleming, DipTeach BEd QUT, MA OhioS, PhD Qld

Professors:
B.M. Newman, BA UC Santa Cruz, MS UC Davis, PhD Berkeley
B.F. Oldenburg, BSc(Hons) MPsyCh PhD NSW

Associate Professors:
S. Ash, BSc DipNutrDiet Syd, MHP NSW, PhD Syd
M.P. Dunne, BA(Hons) PhD Murdoch

RESEARCH CENTRES

Centre for Health Research
The Centre for Health Research is a multidisciplinary research centre, fostering collaboration and groundbreaking research across a number of health-related areas. The key strengths of the Centre for Health Research are:

Ageing
The effect of an ageing population has been identified as a global health and social issue. Research questions related to both the impact of age-related disease and successful ageing underpin current research projects in the Centre for Health Research. Research activities in this area relate to community and residential care; pain and symptom management; palliative care; ocular disease and the effects of vision impairment; foot health; gait; mobility and posture analysis; disorders of movement; injury in older people; social identity; families; mental health; nutrition; cognition and cognitive/memory deficit; the older driver; the older worker; and active ageing.

Physical Activity, Disability, Injury and Rehabilitation
The role of physical activity in the maintenance and restoration of health is a significant emerging area. There is increasing evidence of the role of physical activity in the prevention, treatment and management of a range of chronic disorders. This program of research is aimed at the promotion of physical activity during childhood and adolescence and the prescription of exercise in the context of chronic disease, and at community-based health behaviour interventions. Research into prevention and rehabilitation of occupational and sporting injuries requires assessment of biomechanical, physiological, metabolic, neurological, sensory and psychological factors, concentrating on highrisk groups and prevention of older peoples’ injuries. Other research into a range of disorders including neurological injury, vision loss, emotional or behavioural disorders in children, peripheral arterial disease, and sleep apnoea is also being conducted.

Human Health and Wellbeing
Research activities in this area relate to health services, policy and management, and population health. Areas of strength include the management of chronic diseases such as cancer, diabetes, obesity, coronary heart disease, and other emerging health conditions. These include quality of life and resilience; improving the care of hospitalised patients and managing early discharge; health outcomes for disadvantaged populations; health-promoting schools and early childhood environments; and prevention and management of mental health problems. Other research areas include environmental health, child maltreatment awareness and prevention, development and implementation of nutrition assessment and screening tools, and evaluation of nutritional status.

Human Behaviour
Research in human behaviour embraces fundamental social, cognitive and developmental processes in psychology. This includes research in attitude theory, group behaviour and decision making, child and adolescent development, memory, psycholinguistics, and the development of reading. Opportunities include research in addictive behaviour, eating, exercise, organic mental disorder, and health promotion. A range of research methods has also informed the development of psychological therapies and counselling, including rehabilitation, treatment of psychological trauma, anxiety disorders and depression, narrative therapy, family therapy, and counselling supervision.

Vision
Vision research provides an important resource for the community, industry, government and eye-care professions. There are a number of areas of collaboration with research activities in the other programs and across faculties deriving from the main research activities in this program which are visual optics, including aberrations of the eye and their correction; lens design and performance; myopia and optics of the eye; visual performance studies, including vision rehabilitation, vision and driving, and vision and falls; and clinical research into the ocular surface, effects of refractive surgery, colour vision and electroretinography.

Centre for Accident Research and Road Safety (CARRS-Q)

Accident and Injury Prevention Research
Road safety and workplace accident prevention are key areas of research that have already led to the successful implementation of behaviour intervention and education programs. The Centre for Accident Research and Road Safety—Queensland (CARRS–Q) is a major collaborative research centre established as a joint venture initiative of the Motor Accident Insurance Commission (MAIC) and QUT. The Centre was created to address the enormous human, economic and social costs resulting from road crashes. It has expanded its research scope to include the broader area of injury prevention with a particular interest in youth and risk-taking behaviours.

The Centre’s charter is to identify, assess and initiate innovative priority-driven research and teaching programs leading to the development and implementation of strategies to improve safety on roads, in workplaces and in communities.
The Centre aims to strengthen and broaden research and intervention development in the areas of vulnerable road users; illegal and high-risk behaviours; the human behaviour and technology interface; school and community-based road safety education; and workplace safety.

Institute of Health and Biomedical Innovation

The Institute of Health and Biomedical Innovation (IHBI) will be based in a state-of-the-art facility at the Kelvin Grove Urban Village in Brisbane, Australia.

As the largest institute of the Queensland University of Technology (QUT), IHBI benefits from QUT’s highly successful track record in real-world commercial partnerships and sustainable biotech companies.

Due for completion in May 2006, the $60 million, seven-floor facility was made possible due to generous donations by The Atlantic Philanthropies, the Queensland State Government and QUT.

IHBI has continuous links with local and interstate hospitals, medical researchers world-wide, clinical specialists and industry professionals. By working together, IHBI believes it is possible to bridge the gap between science and better health for everyone.

We are making it our business to:

- bring together Australia’s most creative and innovative minds in health, science and biomedical engineering research
- create teams to seek solutions that would not be possible if each research area worked in isolation
- contribute to a better health care industry by ensuring our knowledge is transferred into public policy
- develop new products and generate new companies to bring our research solutions into your world
- advance health and biomedical innovation to make better health a reality—in your lifetime.

IHBI is an exciting new endeavour that is redefining models for traditional university-based biomedical research. Postgraduate training is a core element of IHBI’s mission and the Institute offers world-class career opportunities across the spectrum of health, science, and biomedical engineering research. Postgraduate students enrol in QUT through one of the faculties and are then able to conduct research through IHBI according to the nature of their projects. The research programs at IHBI encompass:

**Human Health and Wellbeing**
Exploring critical health issues and designing better community healthcare options

**Advanced Diagnostics and Medical Devices**
Developing technologies to assist practitioners diagnose illness and injuries more accurately

**Injury Prevention and Rehabilitation**
Analysing and modifying human behaviour to avoid dangerous situations, and developing strategies for damage recovery

**Tissue Repair and Bio-regeneration**
Restoring functionality to damaged human tissue—skin, muscles, bones, joints and eyes

**Tropical Crops and Biocommodity**
Growing plants that produce beneficial materials for human nutrition and therapy

**Vision Improvement**
Caring for the eyes by advancing the techniques used to correct and maintain clear sight.
Doctor of Health Science HL90

Award title: Doctor of Health Science  
CRICOS code: 037680K  
Campus: Kelvin Grove  
Duration: 3 Years full-time or 6 Years part-time  
Credit points: 288 (96 coursework credit points and 192 research portfolio credit points) (full-time standard semester: 48 (average))  
Course coordinator: Dr Elizabeth Parker

Major Study Areas  
- Health Services Management and Policy Sciences  
- Nursing  
- Occupational and Environmental Health Sciences  
- Public Health

Application for Admission  
Before submitting an application, potential candidates should contact the Course Coordinator who will assist in the preparation of the application.

Candidates should apply on the appropriate form, supplying any specified documentation. The application should be accompanied by a brief proposal for the course of study and the research field.

Advanced Standing and Articulation  
Advanced standing of up to a maximum of 96 credit points may be granted to candidates who have completed an appropriate Masters qualification or its equivalent.

The Doctor of Health Science articulates with the Master of Health Science. Students in the MHlthSc who select their program of study to be consistent with the coursework requirements for the Doctor of Health Science will be eligible for the full credit of 96 credit points.

Course Structure  
Students undertake 96 credit points of coursework units and 192 research portfolio credit points. The coursework is chosen from the major study areas and must be completed before proceeding to the research component.

To achieve the appropriate advanced levels students:

a) choose one of the major study areas list above  
b) complete four (4) units from this major study area (at least two units must be from List B)  
c) complete two (2) units in research methods  
d) complete one unit from the major study areas list or other approved unit.

Full-time Course Structure  

**Year 1, Semester 1**  
Research Methods Core Unit 1  
Research Methods Core Unit 2  
Major Study Unit 1  
Major Study Unit 2  

**Year 1, Semester 2**  
Major Study Unit 3  
Major Study Unit 4  
PUR202 Advanced Doctoral Studies  
Elective Unit  

**Year 2, Semester 1**  
HLR710-1 Research Project  
HLR710-2 Research Project  

**Year 2, Semester 2**  
HLR710-3 Research Project  
HLR710-4 Research Project  

**Year 3, Semester 1**  
HLR710-5 Research Project  
HLR710-6 Research Project  

**Year 3, Semester 2**  

**Year 4, Semester 1**  

**Year 5, Semester 1**  

**Year 6, Semester 1**  

**Part-time Course Structure**  

**Year 1, Semester 1**  
Research Methods Core Unit 1  
Major Study Unit 1  

**Year 1, Semester 2**  
Major Study Unit 2  
PUR202 Advanced Doctoral Studies  

**Year 2, Semester 1**  
Research Methods Core Unit 2  
Major Study Unit 3  

**Year 2, Semester 2**  
Major Study Unit 4  
Elective Unit  

**Year 3, Semester 1**  
HLR710-1 Research Project  

**Year 3, Semester 2**  

**Year 4, Semester 1**  

**Year 5, Semester 1**  

**Year 6, Semester 1**  

Research Methods Core Units  
Two units must be completed from the following:  
HLN405 Qualitative Research  
HLN705 Introduction to Quantitative Research Methods  
HLN706 Advanced Quantitative Research Methods  
PUN105 Health Statistics  
PUN743 Foundations and Practice of Epidemiology

Note:  
Students who have completed PUB316 (or equivalent) are ineligible to undertake HLN705.

Major Study Area Units  
Students must complete four units from their major study area. Two additional elective units can be chosen from the list. Please check unit availability for 2006.

Health Services Management and Policy Sciences  
HLN701 Independent Study  
PUN608 Health Economics  
PUN610 Health Services Management  
PUN615 Advanced Health Service Management  
PUN634 International Health Management and Planning  
PUN635 Evidence Based Health Policy

Public Health  
HLN701 Independent Study  
PUN103 Advanced Epidemiology  
PUP034 Advanced Studies and Practice in Health Promotion  
PUP037 Health Program Evaluation

Occupational and Environmental Health Sciences  
HLN701 Independent Study  
PUN008 Risk Assessment
PUN010 Implementing Risk Management
PUN106 Population Health
PUN617 Environmental Health Management
PUP250 Occupational and Environmental Monitoring
PUP415 Occupational and Environmental Health

Nursing
(Only available to candidates eligible for registration as a nurse in Australia.)
HLN701 Independent Study
NSN424 Evidence Based Practice
NSN507 Contemporary Practice Issues
NSN508 Advanced Readings in Nursing
NSN515 Clinical Leadership and Management

Electives
Electives may be selected from the Major Study Areas List or from units in other discipline fields following consultation with the Course Coordinator.

■ Doctor of Psychology (Clinical) PY50

Award title: Doctor of Psychology (Clinical)
Campus: Carseldine
Duration: 3 years full-time or 6 years part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Robert Schweitzer

Advanced Standing
Advanced standing of up to a maximum of 144 credit points may be granted to candidates who have completed an appropriate masters qualification or its equivalent. Credit will not be granted for previously completed research work.

Course Structure
The doctorate comprises 24 units made up of 10 professional coursework units, 8 research units and 6 practicum units.

Professional Recognition
The Doctor of Psychology (Clinical) has been designed to meet the Psychologists Board of Queensland (PBQ) requirements for full registration as a Psychologist.

Full-time Course Structure
Year 1, Semester 1
PYN026 Clinical Psychological Interventions 1
PYN027 Clinical Psychological Assessment
PYN028 Clinical Psychopathology
PYN035 Supervised Practicum 1
Year 1, Semester 2
PYN030 Professional Practice in Clinical Psychology
PYN036 Supervised Practicum 2
PYN005 Research Methods and Issues; Evidence Based Practice
PYN029 Clinical Psychopathology
PYN052-1 Research Thesis (Part 1)
Year 2, Semester 1
PYN034 Childhood Psychopathology and Treatment
PYN053 Advanced Integrative Psychotherapy
PYN052-2 Research Thesis (Part 2)
Year 2, Semester 2
PYN038 Supervised Practicum 4
PYN052-3 Research Thesis (Part 3)
PYN052-4 Research Thesis (Part 4)
PYN054 Advanced Assessment Across the Lifespan
Year 3, Semester 2
PYN052-5 Research Thesis (Part 5)
PYN052-6 Research Thesis (Part 6)
PYN041 Supervised Practicum 5
PYN052-7 Research Thesis (Part 7)
PYN052-8 Research Thesis (Part 8)
Year 4, Semester 1
PYN042 Supervised Practicum 6
PYN052-9 Research Thesis (Part 8)
Year 4, Semester 2
PYN054 Advanced Assessment Across the Lifespan
Year 5, Semester 2
PYN052-10 Research Thesis (Part 9)
PYN052-11 Research Thesis (Part 10)
PYN052-12 Research Thesis (Part 11)
PYN052-13 Research Thesis (Part 12)
Year 5, Semester 3
PYN052-14 Research Thesis (Part 13)
PYN052-15 Research Thesis (Part 14)
PYN052-16 Research Thesis (Part 15)
PYN052-17 Research Thesis (Part 16)
Year 6, Semester 1
PYN052-18 Research Thesis (Part 17)
PYN052-19 Research Thesis (Part 18)
PYN052-20 Research Thesis (Part 19)
PYN052-21 Research Thesis (Part 20)
Year 6, Semester 2
PYN052-22 Research Thesis (Part 21)
PYN052-23 Research Thesis (Part 22)
PYN052-24 Research Thesis (Part 23)
PYN052-25 Research Thesis (Part 24)
PYN052-26 Research Thesis (Part 25)
PYN052-27 Research Thesis (Part 26)
PYN052-28 Research Thesis (Part 27)
PYN052-29 Research Thesis (Part 28)
PYN052-30 Research Thesis (Part 29)
PYN052-31 Research Thesis (Part 30)
PYN052-32 Research Thesis (Part 31)
PYN052-33 Research Thesis (Part 32)
PYN052-34 Research Thesis (Part 33)
PYN052-35 Research Thesis (Part 34)
PYN052-36 Research Thesis (Part 35)
PYN052-37 Research Thesis (Part 36)
PYN052-38 Research Thesis (Part 37)
PYN052-39 Research Thesis (Part 38)
PYN052-40 Research Thesis (Part 39)
PYN052-41 Research Thesis (Part 40)
PYN052-42 Research Thesis (Part 41)
PYN052-43 Research Thesis (Part 42)
PYN052-44 Research Thesis (Part 43)
PYN052-45 Research Thesis (Part 44)
PYN052-46 Research Thesis (Part 45)
PYN052-47 Research Thesis (Part 46)
PYN052-48 Research Thesis (Part 47)
PYN052-49 Research Thesis (Part 48)
PYN052-50 Research Thesis (Part 49)
PYN052-51 Research Thesis (Part 50)
PYN052-52 Research Thesis (Part 51)
PYN052-53 Research Thesis (Part 52)
PYN052-54 Research Thesis (Part 53)
PYN052-55 Research Thesis (Part 54)
PYN052-56 Research Thesis (Part 55)
PYN052-57 Research Thesis (Part 56)
PYN052-58 Research Thesis (Part 57)
PYN052-59 Research Thesis (Part 58)
PYN052-60 Research Thesis (Part 59)
PYN052-61 Research Thesis (Part 60)
PYN052-62 Research Thesis (Part 61)
PYN052-63 Research Thesis (Part 62)
PYN052-64 Research Thesis (Part 63)
PYN052-65 Research Thesis (Part 64)
PYN052-66 Research Thesis (Part 65)
PYN052-67 Research Thesis (Part 66)
PYN052-68 Research Thesis (Part 67)
PYN052-69 Research Thesis (Part 68)
PYN052-70 Research Thesis (Part 69)
PYN052-71 Research Thesis (Part 70)
PYN052-72 Research Thesis (Part 71)
PYN052-73 Research Thesis (Part 72)
PYN052-74 Research Thesis (Part 73)
PYN052-75 Research Thesis (Part 74)
PYN052-76 Research Thesis (Part 75)
PYN052-77 Research Thesis (Part 76)
PYN052-78 Research Thesis (Part 77)
PYN052-79 Research Thesis (Part 78)
PYN052-80 Research Thesis (Part 79)

PYN054 Advanced Assessment Across the Lifespan

■ Master of Applied Science (Research) HL84

Award title: Master of Applied Science (Research)
CRICOS code: 007897G
Campus: Carseldine and Kelvin Grove
Duration: 1-2 years full-time or 2-4 years part-time
Course coordinator: Professor Mary Courtney

Application for Admission
The Master of Applied Science (Research) program is administered by the Health Academic Board through its Faculty Research Committee.

Applications for admission should set out fully the candidate’s intended course of study. The proposed course of study should include the area of study, the coursework to be undertaken, the proposed title of the thesis to be written, the aim of the proposed program of research and investigation, its background, the significance and possible application of the research program, and the research plan.
Approval of applications is subject to the receipt of a statement of support from the Head of School and Director of Centre in which the proposed research program is to be undertaken.

**Course Structure**

Students undertake a program of research and investigation on a topic approved by the Faculty Research Committee. Students may be required to undertake an appropriate course of study concurrently with the research program. The course of study normally includes: a program of assessed coursework; participation in University scholarly activities such as research seminars, teaching and publication; regular face-to-face interaction with supervisors; and a program of supervised research and investigation.

**Course Coordination**

Students undertake their program of research through one of the Faculty’s Schools. Research expertise within the Faculty covers activities in ageing; physical activity, disability, injury and rehabilitation; health and wellbeing; human behaviour; vision; and accident research. Potential students are encouraged to contact the relevant School or Research Centre prior to submitting an application to discuss the proposed research project, supervision and facilities.

### Master of Clinical Psychology PY18

**Award title:** Master of Clinical Psychology  
**CRICOS code:** 052769J  
**Campus:** Carseldine  
**Duration:** 4 semesters full-time or 8 semesters part-time  
**Credit points:** 192 (full-time standard semester: 48; part-time standard semester: 24)  
**Course coordinator:** Associate Professor Robert Schweitzer

**Entry Requirements**

Entry to this course is competitive. To be considered for admission, candidates:

- should hold an Australian Psychology Accreditation Council (APAC) approved four years training or its equivalent from QUT or another recognised institution; and
- must have a minimum Grade Point Average (GPA) of 5 or above in their fourth year; and
- must provide the names of two referees who can comment on the academic and personal suitability of the candidate and their overall level of support for the candidate’s application.

Candidates are shortlisted in priority order on the basis of their GPAs. Shortlisted candidates are required to attend an interview for assessment of their interpersonal skills in a clinical context. Admission is based on the candidate’s GPA and his or her interview.

In addition to the above requirements, international candidates require:

- an IELTS score of 7.0;  
- certification by the Australian Psychology Accreditation Council that their degree is equivalent to an APAC approved four years training in psychology or its equivalent from QUT or another recognised institution.

Interviews for shortlisted international students will be conducted via telephone.

**Professional recognition**

The course is designed to meet the accreditation requirements of the Australian Psychology Accreditation Council (APAC), the College of Clinical Psychologists and the Psychologists Board of Queensland and provides a graduate with eligibility to apply to register as a Psychologist in Queensland or any other state or territory in Australia.

**Full-time Course Structure**

**Year 1, Semester 1**  
- PYN026 Clinical Psychological Interventions 1  
- PYN027 Clinical Psychological Assessment  
- PYN028 Clinical Psychopathology  
- PYN036 Supervised Practicum 1

**Year 1, Semester 2**  
- PYN005 Research Methods and Issues; Evidence Based Practice  
- PYN029 Clinical Psychological Interventions 2  
- PYN030 Professional Practice in Clinical Psychology  
- PYN036 Supervised Practicum 2

**Year 2, Semester 1**  
- PYN031-1 Research Thesis (Part 1)  
- PYN031-2 Research Thesis (Part 2)  
- PYN034 Childhood Psychopathology and Treatment  
- PYN037 Supervised Practicum 3

**Year 2, Semester 2**  
- PYN031-3 Research Thesis (Part 3)  
- PYN031-4 Research Thesis (Part 4)  
- PYN038 Supervised Practicum 4  
- PYN039 Health Psychology and Rehabilitation

**Part-time Course Structure**

**Year 1, Semester 1**  
- PYN026 Clinical Psychological Interventions 1  
- PYN027 Clinical Psychological Assessment  
- PYN028 Clinical Psychopathology  
- PYN029 Clinical Psychological Interventions 2  
- PYN030 Professional Practice in Clinical Psychology

**Year 2, Semester 1**  
- PYN028 Clinical Psychopathology  
- PYN035 Supervised Practicum 1  
- PYN036 Supervised Practicum 2

**Year 3, Semester 1**  
- PYN034 Childhood Psychopathology and Treatment  
- PYN031-1 Research Thesis (Part 1)

**Year 3, Semester 2**  
- PYN031-2 Research Thesis (Part 2)  
- PYN039 Health Psychology and Rehabilitation

**Year 4, Semester 1**  
- PYN031-3 Research Thesis (Part 3)  
- PYN037 Supervised Practicum 3

**Year 4, Semester 2**  
- PYN038 Supervised Practicum 4  
- PYN031-4 Research Thesis (Part 4)

### Master of Counselling PY12

**Award title:** Master of Counselling  
**CRICOS code:**  
**Campus:** Carseldine  
**Duration:** 6 semesters part-time  
**Credit points:** 144  
**Course coordinator:** Mr David Axten

**Entry requirements**

An approved degree in a human service or related area, at least 2 years of work experience, access to ongoing counselling work and personal suitability. Candidates with other qualifications/appropriate work experience may be admitted subject to approval by the Dean.
Course Structure

Year 1, Semester 1
PYN000 Counselling Studies 1
PYN001 Professional Studies 1

Year 1, Semester 2
PYN002 Counselling Studies 2
PYN003 Group Studies

Year 2, Semester 1
PYN004 Counselling Studies 3
PYN006 Professional Studies 2

Year 2, Semester 2
PYN014 Research for Counselling Practice
Plus ONE unit from:
PYN013 Advanced Counselling Studies
Elective

Year 3, Semester 1
PYN007 Professional Studies 3
PYN008-1 Project (Part 1)

Year 3, Semester 2
PYN008-2 Project (Part 2)
PYN008-3 Project (Part 3)

Special Notes

Students can only graduate with one specified major (ie only one major will appear on the official academic record). Students may elect to change majors during their course as appropriate but should seek academic advice before doing so.

Students cannot normally enrol directly in the Masters Degree in the area of Health, Safety and Environment unless they have completed relevant undergraduate qualifications in this area to the satisfaction of the course coordinator. Special consideration may be given on an individual basis.

Course Articulation
Student who complete the Master of Health Science may be eligible for up to one year of advanced standing in HL90 Doctor of Health Science.

After successfully completing the equivalent of two semesters full-time study, students may exit the program with a Graduate Diploma in Health Science.

After successfully completing the equivalent of one semester of full-time study, students may exit the program with a Graduate Certificate in Health Science.

### Accountancy
- AYN410 Business Law and Ethics
- AYN416 Financial Accounting 1

### Legal and Justice Studies
The following additional entry requirements for the specific major of Nursing.

relevant experience at the discretion of the Head of School.

Credit points:
3 semesters (full-time) or 6 semesters (part-time) external

duration: 3 semesters full-time or 6 semesters part-time or 3 semesters (full-time) or 6 semesters (part-time) external

Course coordinator: Dr Fiona Coyer

Entry Requirements – Domestic Students
Domestic students:
• must be registered as a nurse with the Queensland Nursing Council (QNC) or the nurse regulatory authority in the student’s state or territory of residence;
• have gained a degree in nursing (or equivalent) from a recognised institution at a grade point average of 5 or above;
• normally have at least one year of appropriate post-registration clinical experience.

Alternatively, applicants may be admitted on the basis of relevant experience at the discretion of the Head of School of Nursing.

The following additional entry requirements for the specific majors apply:

Intensive Care
Students enrolling in the Intensive Care major must also have had at least three months recent clinical experience in an Intensive Care Unit and be working at least 0.6 FTE in an Intensive Care Unit.

Cancer Nursing and Paediatic, Child and Youth Health Nursing
Students enrolling in the Cancer Nursing and Paediatric, Child and Youth Health majors must normally be working at least 0.6 FTE in the practice setting relevant to the major in which they are enrolling. Students not working within these settings may be required to undertake additional supernumerary clinical experience to meet the requirements of the course.

Medical/Surgical
Students are required to undertake suitable workplace-based clinical experience during the program to meet the requirements of the course by either:
(a) maintaining employment in a medical/surgical practice setting; or
(b) undertaking supernumerary clinical experience which will be organised by the School of Nursing.

Midwifery
A student who enters the Midwifery major must be registered as a nurse with the Queensland Nursing Council.

Entry Requirements - International Students
International students who enter the Cancer Nursing, Women’s Health, Aged Care, Medical/Surgical, Paediatric, Child and Youth Nursing, Community Practice and Professional Studies strands must:
• have gained from a recognised institution a qualification equivalent, on the University’s assessment, to that of a registered nurse in Australia;
• be registered or authorised to practise in their country of origin or residence;
• have gained a degree in nursing (or equivalent) from a recognised institution; and
• normally have at least one year of appropriate post-registration clinical experience.

Students enrolling in the Intensive Care major must:
• have current temporary or full registration as a nurse with the Queensland Nursing Council (QNC);
• have gained a degree in nursing (or equivalent) from a recognised institution; and
• normally have at least one year of appropriate post-registration clinical experience.

Students enrolling in the Intensive Care major must also have had at least three months recent clinical experience in an Intensive Care Unit.

International students may also apply for Alternative Entry, on the basis of relevant experience at the discretion of the Head of School of Nursing.

To apply for temporary registration with the QNC students are required to submit appropriate application forms and to pay an application fee (currently AUS $45) plus an annual license fee (currently AUS $72). Eligibility for temporary registration is assessed by the Queensland Nursing Council. This process may take up to 3 months.

For enquiries regarding entry requirements or eligibility, please call Dr Debra Anderson on +61 7 3138 3881.

Course Structure
The course structures offer a wider range of pathways for nurses working in diverse settings, while at the same time ensuring opportunities for in-depth study to develop an advanced level of competence in selected areas of nursing.
practice. Students may undertake one of ten different majors.

The Master of Nursing consists of the content of the Graduate Diploma in Nursing plus a further 48 credit points. Students who wish to graduate with a specified major in the Master of Nursing (except Professional Studies) will be required to complete the 96 credit points of the Graduate Diploma in Nursing units relevant to that major and undertake either a 48 credit point thesis or an additional 24 credit points of the remaining 48 credit points at the masters level in units also relevant to that major. These 24 credit points can be undertaken by completing relevant coursework units, a 24 credit point clinical project or a 24 credit point thesis relevant to the major.

Students who wish to graduate from the Master of Nursing with a major in Professional Studies will be required to complete the 96 credit points of the Graduate Diploma in Nursing, and can then choose to complete the remaining 48 credit points at the masters level either by coursework, project or thesis. The coursework units may be selected from any postgraduate level units offered within the University for which the student has the necessary prerequisite.

The Master of Nursing may be undertaken both in the full-time and part-time modes. Students may complete their program by internal or external mode.

Course Articulation
The Graduate Diploma in Nursing and the Master of Nursing fully articulate and are offered for domestic and overseas students who are eligible for registration as a nurse with the Queensland Nurses Council (QNC).

Student who complete the Master of Nursing may also be eligible for up to 96 credit points advanced standing in HL90 Doctor of Health Science.

Full-time Course Structure
Year 1, Semesters 1 and 2
Students are required to complete the two semesters of the Graduate Diploma in Nursing content in their major area of study or the Graduate Diploma in Midwifery before continuing onto the third semester of the Master of Nursing

Year 2, Semester 1
OPTION 1
Two electives from List A
NSN422 Pharmacology and Therapeutics in Extended Nursing Practice
AND a choice of either:
NSN421 Assessment and Diagnosis in Extended Practice
OR
NSN424 Evidence Based Practice

OPTION 2
One elective from List A
NSN422 Pharmacology and Therapeutics in Extended Nursing Practice
NSN506 Clinical Project

OPTION 3
NSN850 Thesis

Year 2, Semesters 1 and 2
Students are required to complete two semesters of the Graduate Diploma in Nursing content in their major area of study before continuing onto the third year of the Master of Nursing.

Year 3, Semester 1
OPTION 1
One elective from List A
NSN422 Pharmacology and Therapeutics in Extended Nursing Practice

OPTION 2
One elective from List A
NSN422 Pharmacology and Therapeutics in Extended Nursing Practice

OPTION 3
NSN825-1 Thesis (Part 1)

Year 3, Semester 2
OPTION 1
One elective from List B
NSN424 Evidence Based Practice

OPTION 2
NSN506 Clinical Project

OPTION 3
NSN825-2 Thesis (Part 2)

Elective Lists
List A (Semester 1)
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
HLN706 Advanced Quantitative Research Methods
NSN002 Key Issues in Child and Youth Health Nursing
NSN508 Advanced Readings in Nursing
NSN721 Key Issues in Emergency and Intensive Care Nursing
NSN517 Women's Health Issues
NSN701 Advanced Health Assessment
NSN801 Health Assessment in Aged Care
NSN821 Key Issues in Ageing
NSN421 Assessment and Diagnosis in Extended Practice
NSN421 is only available to Master of Nursing students

List B (Semester 2)
HLN405 Qualitative Research
NSN324 Critical Issues in Neonatal Care
NSN427 Prevention of Violence Against Women
NSN508 Advanced Readings in Nursing
NSN516 Sexual and Reproductive Health
NSN523 Clinical Studies
NSN626 Dementia and Aged Care Services
NSN722 Principles of Intensive Care Nursing
NSN723 Specialisation in Critical Care Nursing
NSN725 Specialisation in Medical/Surgical and Cancer Nursing
NSN822 Practice Issues in Ageing
NSN929 Psychosocial Rehabilitation
NSN424 Evidence Based Practice
NSN424 is only available to Master of Nursing students
* In selected modules, students studying NSN723 and NSN725 must be working in a practice setting relevant to the areas of study, or be willing to undertake additional clinical experiences. Contact the course coordinator for further information.

Master of Nursing Science (Nurse Practitioner) NS86
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time or 2 semesters full-time or 4 semesters part-time external
Course coordinator: Dr Fiona Coyer

Course Structure
The proposed course consists of seven units - six theoretical units and an internship. The six theoretical units will all be offered from the Faculty of Health and will include an elective. The internship aims to provide extended, supervised and supported clinical practice exposure to consolidate and apply coursework learning, enabling the candidate to meet the competency and capability standards for the nurse practitioner. This is a field-based unit that is focused towards consolidation of skills and knowledge related to nurse practitioner practice in a specialty area of health care.

Full-time Course Structure (February entry)

Year 1, Semester 1
- NSN421 Assessment and Diagnosis in Extended Practice
- NSN422 Pharmacology and Therapeutics in Extended Nursing Practice
- NSN423 Nurse Practitioner Role Development
- NSN425-1 Nurse Practitioner Internship

Year 1, Semester 2
- NSN424 Evidence Based Practice
- NSN426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- Elective *
  The elective is a 12 credit point unit approved by the Course Coordinator

Year 1, Semester 2
- NSF421 Assessment and Diagnosis in Extended Practice
- NSF422 Pharmacology and Therapeutics in Extended Nursing Practice
- NSF423 Nurse Practitioner Role Development
- NSF424 Evidence Based Practice
- NSF426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- Elective *
  The elective is a 12 credit point unit approved by the Course Coordinator

Year 1, Semester 2
- NSF425-2 Nurse Practitioner Internship
- NSF426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- Elective *
  The elective is a 12 credit point unit approved by the Course Coordinator

Year 2, Semester 1
- NSF425-1 Nurse Practitioner Internship
- NSF426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- Elective *
  The elective is a 12 credit point unit approved by the Course Coordinator

Year 2, Semester 2
- NSF423 Nurse Practitioner Role Development
- NSF425-2 Nurse Practitioner Internship

Part-time Course Structure (February entry)

Year 1, Semester 1
- NSF421 Assessment and Diagnosis in Extended Practice
- NSF422 Pharmacology and Therapeutics in Extended Nursing Practice

Year 1, Semester 2
- NSF424 Evidence Based Practice
- NSF426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- NSF425-2 Nurse Practitioner Internship
- Elective *
  * The elective is a 12 credit point unit approved by the Course Coordinator

Year 1, Semester 2
- NSF425-1 Nurse Practitioner Internship
- NSF423 Nurse Practitioner Role Development
- Elective *
  * The elective is a 12 credit point unit approved by the Course Coordinator

Year 2, Semester 2
- NSF425-2 Nurse Practitioner Internship

Part-time Course Structure (July entry)

Year 1, Semester 1
- NSF424 Evidence Based Practice
- NSF426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- NSF425-1 Nurse Practitioner Internship
- Elective *
  * The elective is a 12 credit point unit approved by the Course Coordinator

Year 1, Semester 2
- NSF421 Assessment and Diagnosis in Extended Practice
- NSF422 Pharmacology and Therapeutics in Extended Nursing Practice
- NSF423 Nurse Practitioner Role Development
- NSF425-2 Nurse Practitioner Internship

Full-time Course Structure (July entry)

Year 1, Semester 1
- NSF421 Assessment and Diagnosis in Extended Practice
- NSF422 Pharmacology and Therapeutics in Extended Nursing Practice
- NSF423 Nurse Practitioner Role Development
- NSF425-1 Nurse Practitioner Internship

Year 2, Semester 1
- NSF425-2 Nurse Practitioner Internship
- NSF426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice
- Elective *
  The elective is a 12 credit point unit approved by the Course Coordinator

Year 2, Semester 2
- NSF423 Nurse Practitioner Role Development
- NSF425-2 Nurse Practitioner Internship

Master of Public Health PU85

Award title: Master of Public Health (Study Area A)
CRICOS code: 009029C
Campus: Kelvin Grove
Duration: 3 semesters full-time or 6 semesters part-time or 3 semesters (full-time) or 6 semesters (part-time) external
Credit points: 144
Course coordinator: Dr Elizabeth Parker

Overview
The Master of Public Health is offered under the auspices of the Queensland Centre for Public Health through QUT, Griffith University and the University of Queensland. Students have opportunities to undertake electives at these institutions only after consultation with the course coordinator.

Course Structure
Students elect between three options:
(1) The first option is for full coursework, with no project or thesis component:
  • four core units (Part A),
  • one research methods unit (HLN405, HLN705 or HLN706) and
  • seven advanced elective units (Part B)
(2) Option two is to undertake coursework with a project component:
  • four core units (Part A)
  • one research methods unit (HLN405, HLN705 or HLN706) and
  • five advanced elective units (Part B) and
  • one project unit (HLN703).
(3) Option three is coursework with a thesis component:
  • four core units (Part A)
  • four advanced elective units (Part B)
  • dissertation component of one semester or two semesters part-time (HLN700 or HLN750-1 and HLN750-2)
Elective units (from Part B) will normally be selected according to choice of a major, or more than one stream of study where the no major option is chosen.

Full-time Course Structure

PART A

Semester 1
Core Units (Option 1, 2, 3)
- PUN105 Health Statistics
- PUN692 Health Care Delivery Systems
- PUN106 Population Health
- PUN743 Foundations and Practice of Epidemiology

PART B - Semester 2 - Advanced Elective Units offered by QUT (Option 1, 2, 3)
- 4 electives from same major
- 4 electives across majors
PART C

Semester 3
Coursework (Option 1 only)
Students select further electives from advanced elective list, one of which must be from HLN405, HLN705 or HLN706

OR

PART C

Semester 3
Project (Option 2 only)
HLN703 Project A
plus electives from advanced elective list, one of which must be from HLN405, HLN705 or HLN706

OR

PART C

Semester 3
Dissertation (Option 3 only)
HLN700 Thesis

Part-time Course Structure

PART A

Semester 1
Core Units
PUN743 Foundations and Practice of Epidemiology
PUN105 Health Statistics

PART B - Semester 2 - Advanced Elective Units Offered By QUT (Option 1, 2, 3)
2 electives from same major
or
2 electives across majors

PART C

Semester 5 & 6
Coursework (Option 1 only)
Students select further electives from advanced elective list.

OR

PART C

Semester 5 & 6
Project (Option 2 only)
HLN703 Project A

OR

PART C

Semester 5 & 6
Dissertation (Option 3 only)
HLN750-1 Thesis
AND
HLN750-2 Thesis

Advanced Elective Unit List

Health Services Management and Policy Sciences
PUN634 International Health Management and Planning
PUN635 Evidence Based Health Policy

PUN610 Health Services Management

Occupational and Environmental Health Science
EFN418 Introduction to Financial Risk Management
PUN500 Systems Safety for Health, Safety and Environment
PUN001 Contemporary Risk Management
PUN008 Risk Assessment
PUN010 Implementing Risk Management
PUN301 Health, Safety and Environmental Law and Management
PUN467 Public Health Risk Assessment
PUN617 Environmental Health Management
PUN620 Concepts of Environmental Health
PUP116 Ergonomics
PUP250 Occupational and Environmental Monitoring
PUP415 Occupational and Environmental Health

Health Promotion
PUP032 Intervention Design and Theories of Change
PUP034 Advanced Studies and Practice in Health Promotion
PUP037 Health Program Evaluation
PUP038 New Developments in Health Promotion
PUB644 Health Promoting Schools

Epidemiology and Research Methods
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
HLN706 Advanced Quantitative Research Methods
PUN103 Advanced Epidemiology

Graduate Diploma in Environmental Health PU67

Award title: Graduate Diploma in Environmental Health
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time or 4 semesters part-time (from 2007) external
Course coordinator: Dr Elizabeth Parker

Course Structure
Students follow a prescribed enrolment program and are required to complete seven units in environmental health and one elective unit.

Course Articulation
This program articulates into the Master of Health Science.

Course Structure
Year 1, Semester 1
PUN620 Concepts of Environmental Health
PUN363 Environmental Health Law
PUN364 Food Safety
PUN106 Population Health
Year 1 Semester 2
PUN617 Environmental Health Management
PUN466 Communicable diseases
PUN465 Environmental Protection
PUN467 Public Health Risk Assessment

Graduate Diploma in Health Science HL68

Award title: Graduate Diploma in Health Science (Study Area A)
CRICOS code: 020308C
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time or 2 semesters (full-time) or 4 semesters (part-time) external
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Elizabeth Parker

Majors
Majors are offered in the following areas: environmental health, health services management, health promotion, risk management, women's health, aged care and cross specialisation. To complete a major, students must complete at least four units from the same discipline area from with the Faculty of Health.

Students can only graduate with one specified major (ie only one major will appear on the official academic record). Students may elect to change majors during their course as appropriate but should seek academic advice before doing so.

Course Structure
The Graduate Diploma in Health Science consists of eight units totally 96 credit points selected from units offered by Schools within the Faculty of Health (List A units). No more than two (24 credit points) advanced undergraduate health units can be included in the total.

Completion of four units (48 credit points) in an area of specialisation entitles the graduate to a Graduate Diploma in Health Science within a specific discipline, eg. Graduate Diploma in Health Science (Health Promotion).

Course Articulation
This course articulates fully into HL88 Master of Health Science.

HL38 Graduate Certificate in Health Science fully articulates into this course.

After successfully completing the equivalent of one semester of full-time study, students may exit the program with a Graduate Certificate in Health Science.

Graduate Diploma in Health, Safety and Environment PU65

Award title: Graduate Diploma in Health, Safety and Environment
CRICOS code: 020307D
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time or 4 semesters external
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Margaret Cook

Course Structure
Students complete eight specified units. The course is available full-time and part-time. Internal and external mode is available (within Australia only).

Course Articulation
This course fully articulates into the Master of Health Science.

Graduate Diploma in Midwifery NS68

Award title: Graduate Diploma in Midwifery
CRICOS code: 040342B
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time or 2 semesters (full-time) or 4 semesters (part-time) external
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Fiona Coyer

Full-time Course Structure
Year 1, Semester 1
NSN311 Clinical Studies in Midwifery A
NSN321 Foundations of Midwifery Practice
NSN507 Contemporary Practice Issues
AND select ONE of the following:
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
HLN706 Advanced Quantitative Research Methods
Year 1, Semester 2
NSN322 Complex Issues for Childbearing Families
NSN332 Clinical Studies in Midwifery B
NSN324 Critical Issues in Neonatal Care
AND one elective (see elective list)

Part-time Course Structure
Year 1, Semester 1
NSN311 Clinical Studies in Midwifery A
NSN321 Foundations of Midwifery Practice
NSN507 Contemporary Practice Issues
Year 1, Semester 2
NSN322 Complex Issues for Childbearing Families
AND one elective (see elective list)
Year 2, Semester 1
NSN311 Clinical Studies in Midwifery A
AND select ONE of the following units:
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
HLN706 Advanced Quantitative Research Methods

Year 2, Semester 2
NSN323 Clinical Studies in Midwifery B
NSN324 Critical Issues in Neonatal Care

Elective List
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
HLN706 Advanced Quantitative Research Methods

Graduate Diploma in Nursing NS64
Award title: Graduate Diploma in Nursing (Study Area A)
CRICOS code: 015086K
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time
Credit points: 96
Course coordinator: Dr Fiona Coyer

Majors
The following majors are offered in this course:
• Aged Care
• Cancer Nursing
• Community Practice
• Intensive Care Nursing
• Medical/Surgical Nursing
• Paediatric, Child and Youth Health Nursing
• Professional Studies
• Women's Health

For the July intake this major is only offered a part-time basis

Aged Care
Full-time Structure

Graduate Diploma in Public Health PU60
Award title: Graduate Diploma in Public Health (Study Area A)
CRICOS code: 020306E
Campus: Kelvin Grove
Duration: 2 semesters full-time or 4 semesters part-time or 2 semesters (full-time) or 4 semesters (part-time) external
Credit points: 96 (full-time standard semester: 48)
Course coordinator: Dr Elizabeth Parker

Overview
The Graduate Diploma in Public Health and Master of Public Health Programs are offered and taught jointly by a consortium of three universities (QUT, Griffith University, and The University of Queensland). Students enrol through one of these universities and are required to complete four compulsory core units and four elective units selected from a specialised stream.

Majors
Majors are offered in the areas of:
- Health Services Management and Policy Sciences
- Occupational and Environmental Health Science
- Health Promotion
- Epidemiology and Research Methods

Course Structure
Full-time students in the program undertake a coursework component for two semesters (or four semesters part-time - two units per semester). The coursework comprises four core units and four advanced elective units. Elective units will normally be selected according to choice of a stream of study.

Course Articulation
This course fully articulates into the Master of Public Health.

Course Structure
Part A - Core Units
PUN105 Health Statistics
PUN106 Population Health
PUN692 Health Care Delivery Systems
PUN743 Foundations and Practice of Epidemiology

Part B - Advanced elective units offered by QUT
Health Services Management and Policy Sciences
PUN608 Health Economics
PUN610 Health Services Management
PUN634 International Health Management and Planning
PUN635 Evidence Based Health Policy

Occupational and Environmental Health Science
EFN418 Introduction to Financial Risk Management
PUN001 Contemporary Risk Management
PUN008 Risk Assessment
PUN010 Implementing Risk Management
PUN301 Health, Safety and Environmental Law and Management
PUN467 Public Health Risk Assessment
PUN500 Systems Safety for Health, Safety and Environment
PUN617 Environmental Health Management
PUN620 Concepts of Environmental Health
PUP116 Ergonomics
PUP250 Occupational and Environmental Monitoring
PUP415 Occupational and Environmental Health
HEALTH

Health Promotion
PUB644 Health Promoting Schools
PUP032 Intervention Design and Theories of Change
PUP034 Advanced Studies and Practice in Health Promotion
PUP037 Health Program Evaluation
PUP038 New Developments in Health Promotion

Epidemiology and Research Methods
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
HLN706 Advanced Quantitative Research Methods
PUN103 Advanced Epidemiology

Graduate Diploma in Road Safety PY41
Award title: Graduate Diploma in Road Safety
CRICOS code: 040335A
Campus: Carseldine
Duration: 2 semesters full-time or 4 semesters part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Barry Watson

Course Structure
The Graduate Diploma in Road Safety course consists of two core units plus six electives. The program structure is designed to be flexible and accessible. The majority of the units are delivered on a semester basis, although two are available in intensive week-long blocks. The program has recently been enhanced with the introduction of distance education delivery for select units.

Full-time Course Structure
Year 1, Semester 1
PYP401 Introduction to Road Safety
and three of the following units
PYP402 Traffic Psychology and Behaviour
CEP127 Road and Traffic Engineering
PYP504 Applying Traffic Psychology
PYP407 Independent Study
Elective as approved by Course Coordinator

Year 1, Semester 2 and Summer Semester
PYP406 Road Safety Theory to Practice
and three of the following units not previously taken
PYP404 Applying Traffic Psychology
PYP407 Independent Study
PYP405 Road Safety Evaluation Models
CEP151 Road Safety Audit - Principles and Practice
Elective as approved by the Course Coordinator

Notes:
CEP151 Road Safety Audit is conducted jointly by QUT and Main Roads and may be offered at other times of the year, subject to demand.
PYP501, PYP502, PYP504 and PYP506 are all flexible delivery versions of the campus-based units and can be undertaken in distance education mode.

Postgraduate Diploma in Psychology PY20
Award title: Post Graduate Diploma in Psychology
CRICOS code: 034714G
Campus: Carseldine
Duration: 2 semesters full-time or 4 semesters (may not be available by evening study) part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Herbert Biggs

QUT Applicants
For applicants with a QUT Bachelor's award, the base level requirements for consideration for inclusion in the Postgraduate Diploma in Psychology program will be:
- a minimum overall GPA of 5 in the prescribed second and third year Psychology units listed below, or their equivalent.

Entry is competitive based on GPA in these prescribed units:
PYB201 Perception
PYB203 Developmental Psychology
PYB205 Social Psychology
PYB206 Personality
PYB208 Counselling Theory and Practice 1
PYB210 Research Design and Data Analysis
PYB302 Industrial and Organisational Psychology
PYB303 Cognitive Psychology
PYB304 Physiological Psychology
PYB306 Psychopathology
PYB311 Psychological Assessment

Non-QUT Applicants
For applicants with Bachelor's awards other than from QUT, similar requirements will be expected.
Certified copies of complete academic transcripts must be provided with applications.
Course Structure
The course comprises eight 12 credit point units. Coursework includes the compulsory unit PYB407 Research and Professional Development Seminar; plus elective units chosen from advanced cognitive, organisational, counseling, developmental and social theory. The research component of the program entails one Research Methods unit and a thesis. PYB450 Research Thesis is undertaken in modules throughout the program. Initially students will complete an independent review of the literature and prepare an outline for a research proposal. This will then form the basis of a negotiated group project, for which students independently collect, write up and analyse agreed specific components of the data. All coursework units have 3 contact hours per week. The contact for research thesis units is as required by the supervisor.

Full-time Course Structure

**Year 1, Semester 1**
- PYB450-1 Research Thesis (Part 1)
- Plus ONE research methods unit selected from the following options:
  - PYB401 Advanced Research Methods
  - HHB232 Survey Methods
- Plus TWO advanced psychology units selected from the following options:
  - PYB402 Counselling Psychology
  - PYB403 Cognitive Neuropsychology
  - PYB404 Issues in Social Developmental Psychology
  - PYB405 Advanced Organisational Psychology
  - PYB408 Advanced Social Cognition

**Year 1, Semester 2**
- PYB407 Research and Professional Development Seminar
- PYB450-2 Research Thesis (Part 2)
- PYB450-3 Research Thesis (Part 3)
- Plus ONE cognate elective, at 3rd year level or above, selected from a list approved by the Course Coordinator.

Part-time Course Structure

**Year 1, Semester 1**
- Option A
  - Two units from the following options:
    - PYB402 Counselling Psychology
    - PYB403 Cognitive Neuropsychology
    - PYB404 Issues in Social Developmental Psychology
    - PYB405 Advanced Organisational Psychology
    - PYB408 Advanced Social Cognition
  - OR
- Option B
  - One unit from the following options:
    - PYB402 Counselling Psychology
    - PYB403 Cognitive Neuropsychology
    - PYB404 Issues in Social Developmental Psychology
    - PYB405 Advanced Organisational Psychology
    - PYB408 Advanced Social Cognition
  - AND
  - One unit from the following options:
    - PYB401 Advanced Research Methods
    - HHB232 Survey Methods

**Year 1, Semester 2**
- PYB407 Research and Professional Development Seminar
- PYB450-1 Research Thesis (Part 1)
- AND

Graduate Certificate in Aged Care NS39

**Award title:** Graduate Certificate in Aged Care  
**Campus:** Kelvin Grove  
**Duration:** 2 semesters part-time or 2 semesters external  
**Credit points:** 48 (part-time standard semester: 24)  
**Course coordinator:** Dr Fiona Coyer

**Part-time Course Structure**

**Year 1, Semester 1**
- NSN801 Health Assessment in Aged Care
- NSN821 Key Issues in Ageing

**Year 1, Semester 2**
- NSN822 Principles of Aged Care Practice
- Elective OR
  - Any other 12 credit point postgraduate unit offered by the Faculty of Health for which the student has the necessary pre-requisites.

**Elective List**
- HLN405 Qualitative Research
- NSN427 Prevention of Violence Against Women
- NSN508 Advanced Readings in Nursing
- NSN516 Sexual and Reproductive Health
- NSN626 Dementia and Aged Care Services

Graduate Certificate in Cancer Nursing NS31

**Award title:** Graduate Certificate in Cancer Nursing  
**CRICOS code:**  
**Campus:** Kelvin Grove  
**Duration:** 2 semesters part-time or 2 semesters external  
**Credit points:** 48 (part-time standard semester: 24)  
**Course coordinator:** Dr Fiona Coyer  
**Discipline coordinator:** Prof Patsy Yates

**Course Articulation**
The Graduate Certificate in Cancer Nursing has full articulation with NS64 Graduate Diploma of Nursing or NS85 Master of Nursing.

**Part-time Course Structure**

**Year 1, Semester 1**
- NSN701 Advanced Health Assessment
- NSN724 Advanced Nursing Practice

**Year 1, Semester 2**
- NSN726 Advanced Clinical Practice
- NSN723 Specialisation in Critical Care Nursing
- OR
- NSN725 Specialisation in Medical/Surgical and Cancer Nursing
Graduate Certificate in Community Practice NS34

Award title: Graduate Certificate in Community Practice
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Fiona Coyer
Discipline coordinator: Ms Fran Sanders

Course Articulation
The Graduate Certificate in Community Practice has full articulation with NS64 Graduate Diploma in Nursing and NS85 Master of Nursing programs.

Part-time Course Structure
Year 1, Semester 1
NSN701 Advanced Health Assessment
or
NSN801 Health Assessment in Aged Care
Select one of:
PUN106 Population Health
PUN634 International Health Management and Planning
PUP038 New Developments in Health Promotion
Year 1, Semester 2
Elective (List B)
OR any other 12 credit point postgraduate unit offered by the Faculty of Health for which the student has the necessary prerequisites
AND
Select one of the following three units:
NSN726 Advanced Clinical Practice
(available to registered nurses only)
OR
PUP034 Advanced Studies and Practice in Health Promotion
OR
PUP037 Health Program Evaluation

Electives (List B)
HLN405 Qualitative Research
NSN508 Advanced Readings in Nursing
NSN427 Prevention of Violence Against Women
NSN626 Dementia and Aged Care Services
NSN516 Sexual and Reproductive Health

Graduate Certificate in Emergency Nursing NS41

Award title: Graduate Certificate in Emergency Nursing
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 12)
Course coordinator: Dr Fiona Coyer
Discipline coordinator: Dr Fiona Coyer

Course Structure
The Graduate Certificate comprises 48 credit points made up of 24 credit points advanced standing from accredited programs, plus 24 credit points from units offered by the School of Nursing.

The course may be undertaken in internal or external mode and is available for mid-year entry.

Course Articulation
All units successfully completed may be credited towards NS64 Graduate Diploma in Nursing or NS85 Master of Nursing.

Part-time Course Structure
Year 1, Semester 1
NSN721 Key Issues in Emergency and Intensive Care Nursing
Year 1, Semester 2
NSN723 Specialisation in Critical Care Nursing

Graduate Certificate in Environmental Health PU32

Award title: Graduate Certificate in Environmental Health
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters part-time external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Elizabeth Parker

Part-time Course Structure
Semester 1
PUN363 Environmental Health Law
PUN620 Concepts of Environmental Health
Semester 2
PUN465 Environmental Protection
PUN467 Public Health Risk Assessment

Graduate Certificate in Health Promotion PU39

Award title: Graduate Certificate in Health Promotion
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Elizabeth Parker

Part-time Course Structure
Year 1, Semester 1
PUP032 Intervention Design and Theories of Change
PUP038 New Developments in Health Promotion
Year 1, Semester 2
PUP034 Advanced Studies and Practice in Health Promotion
AND
PUP037 Health Program Evaluation
OR
PUB644 Health Promoting Schools

Graduate Certificate in Health Science HL38

Award title: Graduate Certificate in Health Science
CRICOS code: 027285D
Campus: Kelvin Grove
Duration: 1 semester full-time or 2 semesters part-time or 2 semesters part-time external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Elizabeth Parker

Course Structure
Students are required to complete any four units (totaling 48 credit points) from List A. No more than two (24 credit points) senior undergraduate units can be included in the total.

Course Articulation
This course articulates fully into HL68 Graduate Diploma in Health Science and HL88 Master of Health Science

Special Note
Completion of units in Health, Safety and Environment or Environmental Health does not qualify graduands to practice in these areas.

Graduate Certificate in Intensive Care Nursing NS30

Award title: Graduate Certificate in Intensive Care Nursing
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Fiona Coyer
Discipline coordinator: Ms Joanne Ramsbotham

Course Articulation
The Graduate Certificate in Intensive Care Nursing has full articulation with NS64 Graduate Diploma in Nursing and NS85 Master of Nursing programs.

Part-time Course Structure
Year 1, Semester 1
NSN701 Advanced Health Assessment
NSN724 Advanced Nursing Practice
Year 1, Semester 2
NSN726 Advanced Clinical Practice
NSN723 Specialisation in Critical Care Nursing
or
NSN725 Specialisation in Medical/Surgical and Cancer Nursing

Graduate Certificate in Paediatric Intensive Care Nursing NS38

Award title: Graduate Certificate in Paediatric Intensive Care Nursing
Campus: Kelvin Grove
Duration: 2 semesters part-time
Credit points: 48 (including 24 credit points advanced standing) (part-time standard semester: 12)
Course coordinator: Dr Jenny Fraser to 31.12.05; Dr Fiona Coyer from 1.1.06

Course Design
The Graduate Certificate comprises 48 credit points made up of 24 credit points advanced standing from the Queensland Health Transition to Practice Intensive Care Nurse Education Program (Paediatric), plus 24 credit points from units offered by the School of Nursing.

Articulation
All units successfully completed may be credited towards NS64 Graduate Diploma in Nursing or NS85 Master of Nursing.

Part-time Course Structure
Year 1, Semester 1
NSN002 Key Issues in Child and Youth Health Nursing
Year 1, Semester 2
NSN006 Specialisation in Paediatric, Child and Youth Health Nursing

Graduate Certificate in Medical/Surgical Nursing NS33
Award title: Graduate Certificate in Paediatric, Child and Youth Health Nursing
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Fiona Coyer
Discipline coordinator: Dr Jenny Fraser

Part-time Course Structure
Year 1, Semester 1
NSN002 Key Issues in Child and Youth Health Nursing
NSN003 Principles of Paediatric, Child and Youth Health Nursing
Year 1, Semester 2
NSN006 Specialisation in Paediatric, Child and Youth Health Nursing
NSN004 Acute Paediatric Nursing
or
NSN005 Community Child and Youth Health Nursing

Graduate Certificate in Public Health PU30

Award title: Graduate Certificate in Public Health
CRICOS code: 048295F
Campus: Kelvin Grove
Duration: 1 semester full-time or 1 semester external
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Elizabeth Parker

Course Structure
The course consists of 4 core units (48 credit points) from the Master of Public Health (PU85)/Graduate Diploma in Public Health (PU60). The course is offered under the auspices of the Queensland Centre for Public Health through QUT, Griffith University and the University of Queensland.

Course Structure
Semester 1
PUN692 Health Care Delivery Systems
PUN106 Population Health
PUN743 Foundations and Practice of Epidemiology
PUN105 Health Statistics

Graduate Certificate in Risk Management IF88

Award title: Graduate Certificate in Risk Management
Campus: Kelvin Grove
Duration: 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Elizabeth Parker

Course Structure
Students complete four specified units part-time over two semesters. This course is offered by external study only.

Course Articulation
This course fully articulates into the Master of Health Science.

Part-time Course Structure
Year 1, Semester 1
PUN001 Contemporary Risk Management
PUN008 Risk Assessment
Year 1, Semester 2
EFN418 Introduction to Financial Risk Management
PUN010 Implementing Risk Management

Graduate Certificate in Road Safety PY40

Award title: Graduate Certificate in Road Safety
CRICOS code: 040334B
Campus: Carseldine
Duration: 1 semester full-time or 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Barry Watson

Course Structure
The Graduate Certificate in Road Safety consists of one core unit plus three electives. The majority of the units are delivered on a semester basis, although two are delivered as intensive week-long blocks at the Carseldine campus. The program has recently been enhanced with the introduction of distance education delivery for select units.

Distance Education Units
Four units have been approved for delivery in distance education mode:
PYP501 Introduction to Road Safety
PYP502 Traffic Psychology and Behaviour
PYP504 Applying Traffic Psychology
PYP506 Road Safety Theory to Practice

Course Structure
Year 1, Semester 1
PYP401 Introduction to Road Safety
and one of the following units:
PYP402 Traffic Psychology and Behaviour
CEP127 Road and Traffic Engineering
Year 1, Semester 2
PYP406 Road Safety Theory to Practice
PYP404 Applying Traffic Psychology
The above units can be replaced with one or two units offered in Summer Program
Year 1, Summer Program
PYP405 Road Safety Evaluation Models
CEP151 Road Safety Audit - Principles and Practice
Consideration will be given to offering core or elective units in block mode, as demand warrants
* CEP151 is conducted jointly by QUT and Main Roads and may be offered at other times of the year, subject to demand.

Notes:
PYP501, PYP502, PYP504 and PYP506 are all flexible delivery versions of the campus-based units and can be undertaken in distance education mode.

Graduate Certificate in Women's Health NS36

Award title: Graduate Certificate in Women's Health
Campus: Kelvin Grove
Duration: 2 semesters part-time or 2 semesters external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Fiona Coyer
Discipline coordinator: Dr Deborah Anderson

Course Articulation
The Graduate Certificate in Women's Health has full articulation with NS64 Graduate Diploma in Nursing and NS85 Master of Nursing, and HL68 Graduate Diploma in Health Science and HL88 Master of Health Science.

Part-time Course Structure
Year 1, Semester 1
NSN517 Women's Health Issues
Elective unit or any other 12 credit point postgraduate unit offered by the Faculty of Health for which the student has the necessary prerequisites

**Year 1, Semester 2**
NSN427 Prevention of Violence Against Women
NSN516 Sexual and Reproductive Health

**Elective List**
HLN405 Qualitative Research
HLN705 Introduction to Quantitative Research Methods
NSN002 Key Issues in Child and Youth Health Nursing
NSN508 Advanced Readings in Nursing
NSN701 Advanced Health Assessment
NSN801 Health Assessment in Aged Care
NSN821 Key Issues in Ageing

### Bachelor of Applied Science (Honours) HL52

**Award title:** Bachelor of Applied Science (Honours)
**CRICOS code:** 043118G
**Campus:** Kelvin Grove
**Duration:** 2 semesters full-time or 4 semesters part-time
**Credit points:** 96 (full-time standard semester: 48; part-time standard semester: 24)
**Course coordinator:** Professor Mary Courtney

**Full-time Course Structure**

**Year 1, Semester 1**
HLP101 Advanced Discipline Readings
HLP103 Dissertation

Select one of the following units:
HLN405 Qualitative Research
HLN706 Advanced Quantitative Research Methods
PUN105 Health Statistics

AND

one elective unit

**Year 1, Semester 2**
HLP102 Research Seminars
HLP103
HLP103 Dissertation
HLP103 Dissertation

**Electives**

Students undertake a 12 credit point elective. This may be selected from any honours or postgraduate program offered by the University, subject to prerequisite requirements and with the approval of the students supervisor and the course coordinator. Normally the elective unit is chosen from within the student’s discipline area or from an area that complements or is germane to the students study program. For further information on available units contact the relevant school honours coordinator. Students may also select either HLN405 Qualitative Research or HLN706 Advanced Quantitative Research Methods or MAN009 Experimental Design and Statistical Analysis for Research as an elective.

**Dissertation**
The Dissertation is one unit valued at 48 credit points and represents 50 per cent of the Honours course. Work on the dissertation commences during semester 1 (full-time mode) or semester 2 (part-time mode) and is completed over the course of the program. Preparation and presentation of the Dissertation is completed under the guidance of a supervisor.

**Part-time Course Structure**

**Year 1, Semester 1**
Select one of the following units:

HLN706 Advanced Quantitative Research Methods
HLN405 Qualitative Research
PUN105 Health Statistics
AND

One elective unit

**Year 1, Semester 2**
HLP101 Advanced Discipline Readings
HLP103 Dissertation

**Year 2, Semester 1**
HLP103 Dissertation
HLP103 Dissertation

**Bachelor of Health Science (Honours) HL55**

**Award title:** Bachelor of Health Science (Honours)
**CRICOS code:** 027284E
**Campus:** Kelvin Grove
**Duration:** 1 year full-time or 2 years part-time
**Credit points:** 96 (full-time standard semester: 48; part-time standard semester: 24)
**Course coordinator:** Professor Mary Courtney

**Full-time Course Structure**

**Year 1, Semester 1**
HLP101 Advanced Discipline Readings
HLP103 Dissertation

Select one of the following units:
HLN405 Qualitative Research
HLN706 Advanced Quantitative Research Methods
PUN105 Health Statistics

AND

one elective unit

**Year 1, Semester 2**
HLP102 Research Seminars
HLP103
HLP103 Dissertation
HLP103 Dissertation

**Electives**

Students undertake a 12 credit point elective. This may be selected from any honours or postgraduate program offered by the University, subject to prerequisite requirements and with the approval of the students supervisor and the course coordinator. Normally the elective unit is chosen from within the student’s discipline area or from an area that complements or is germane to the students study program. For further information on available units contact the relevant school honours coordinator. Students may also select either HLN405 Qualitative Research or HLN706 Advanced Quantitative Research Methods or MAN009 Experimental Design and Statistical Analysis for Research as an elective.

**Dissertation**
The Dissertation is one unit valued at 48 credit points and represents 50 per cent of the Honours course. Work on the dissertation commences during semester 1 (full-time mode) or semester 2 (part-time mode) and is completed over the course of the program. Preparation and presentation of the Dissertation is completed under the guidance of a supervisor.

**Part-time Course Structure**

**Year 1, Semester 1**
Select one of the following units:
HLN706 Advanced Quantitative Research Methods
Bachelor of Nursing (Honours) HL50

Award title: Bachelor of Nursing (Honours)
CRICOS code: 016355G
Campus: Kelvin Grove
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Professor Mary Courtney

Full-time Course Structure
Year 1, Semester 1
HLP101 Advanced Discipline Readings
HLP103 Dissertation
Select one of the following units:
HLN405 Qualitative Research
PN706 Advanced Quantitative Research Methods
PUN105 Health Statistics
AND

Bachelor of Applied Science (Human Movement Studies) HM42

Award title: Bachelor of Applied Science (Human Movement Studies)
CRICOS code: 012659B
Campus: Kelvin Grove
Duration: 4 Years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr Michael McDonald

Professional Membership
Graduates are eligible for membership of the Australian Association for Exercise and Sports Science.

Special Course Requirements
Students must complete units totalling 384 credit points including foundation units, a major and a minor study, elective units, practicum experiences and fourth-year studies.

A major (10 units-120 credit points) must be completed in the specified discipline area of Exercise and Sport Science. This includes six compulsory second-level units (72 credit points), two compulsory third-level units (HMB379 and HMB382) (24 credit points), a Practicum unit (HMB470) (12 credit points) and one additional third-level unit (12 credit points).

As a professional degree, the program has a number of compulsory practicum experiences throughout the first two years in preparation for the third year practicum and substantive practicum period in Year 4.

Two minors must be completed. One minor (48 credit points) consisting of four units from level three Human Movement Electives. The second minor (48 credit points) may be undertaken from any approved discipline within QUT. It should consist of at least two units from level two and three.

The degree may be awarded with Honours: First Class Honours; Second Class Honours Division A; and Second Class Honours Division B. Candidates for the degree with Honours must fulfil the requirements for the pass degree and achieve such a standard of proficiency in all the units of the course as may from time to time be determined by the Health Academic Board and approved by the University Academic Board.

Full-time Course Structure

Year 1, Semester 1
- HMB171 Fitness Health and Wellness
- HMB313 Socio-Cultural Foundations of Physical Activity
- LSB131 Anatomy
- PYB012 Psychology

Year 1, Semester 2
- LSB231 Physiology
- HMB272 Biomechanics
- HMB275 Exercise and Sport Psychology
- HMB172 Nutrition and Physical Activity

Year 2, Semester 1
- HMB271 Foundations of Motor Control, Learning and Development
- HMB274 Functional Anatomy
- Elective

Year 2, Semester 2
- HMB276 Research in Human Movement
- PYB007 Interpersonal Processes and Skills
- HMB273 Exercise Physiology 1
- HMB282 Resistance Training

Year 3, Semester 1
- HMB379 Disorders of Human Movement
- HMB382 Principles of Exercise Prescription
- Elective

Year 3, Semester 2
- HMB470 Practicum 1
- or Elective

Year 4, Semester 1
- HMB471 Project 1
- HMB470 Practicum 1
- or Elective

Year 4, Semester 2
- HMB472 Project 2
- HMB475 Practicum 2

Third Level Units
All third level units are not available in every semester. Students should consult School noticeboards for availability.

- HMB277 Exercise and Sport Nutrition
- HMB361 Exercise Physiology 2
- HMB362 Biomechanics 2
- HMB363 Independent Study
- HMB364 Seminars in Human Movement
- HMB371 Motor Control And Learning 2
- HMB379 Disorders of Human Movement
- HMB374 Psychology of Rehabilitation
- HMB375 Adapted Physical Activity
- HMB376 Motor Development in Children
- HMB377 Children in Sport
- HMB381 Exercise Physiology 2
- HMB383 Workplace Health
- HMB384 Injury Prevention and Rehabilitation
- HMB480 Advanced Exercise Prescription

Note:
Students who have successfully completed 288 credit points and have met the general requirements for a three year degree, may graduate with a Bachelor of Applied Science after seeking approval through the School of Human Movement Studies Student Affairs Officer on (07) 3138 5846.

Bachelor of Applied Science (Optometry)

Award title: Bachelor of Applied Science (Optometry)
CRICOS code: 09031J
Campus: Kelvin Grove
Duration: 4 Years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Assoc Prof Peter Swann

Professional Membership
In each State and Territory of Australia, the practice of optometry is regulated by Boards of Optometrical Registration which are statutory bodies set up under the Acts of the respective State Parliaments. Under these Acts, the practice of optometry is restricted to persons whose names appear on the Register. On completion of the degree at QUT, the graduate will have satisfied the requirements of the Optometrists’ Board of Queensland and may apply for registration to practise as an optometrist in Queensland and all States and Territories of Australia.

Special Course Requirements
The degree may be awarded with Honours, First Class Honours, Second Class Honours Division A and Second Class Honours Division B. Candidates for the degree with Honours must fulfil the requirements for the pass degree and achieve such standard of proficiency in all the units of the course as may from time to time be determined by the Health Academic Board.

Ophthalmic instruments are required by students for the clinical program from the beginning of the second and third years of the course. Academic staff provide advice regard-
ing the purchase of these instruments. Costs are estimated to be $5000. Students are also required to undertake first aid certification before entering the clinical program.

Course Structure

Year 1, Semester 1
LSB119 Life Science for Optometrists
LSB152 Anatomy
MAB140 Quantitative Methods for Optometry and Health Science
PCB141 Chemistry for Clinical Health Professionals

Year 1, Semester 2

OPB651 Contact Lens Studies
OPB652 Pharmacology
OPB653 Clinical Practice 6

Year 4, Semester 1
OPB750 Topics in Optometry 7
OPB751 Advanced Optometry 7
OPB752 Clinical Practice 7

Year 4, Semester 2
OPB850 Topics in Optometry 8
OPB851 Advanced Optometry 8
OPB852 Clinical Practice 8
OPB853 Specialist Clinical Practice 8

Bachelor of Behavioural Science (Honours Psychology) PY09

Award title: Bachelor of Behavioural Science (Honours Psychology)
CRICOS code: 034711K
Campus: Carseldine
Duration: 2 Semesters full-time or 4 Semesters (may not be available by evening study) part-time
Credit points: 96
Course coordinator: Dr Herbert Biggs

QUT Applicants
For applicants with a QUT Bachelor's award, the base level requirements for consideration for inclusion in the Honours program will be:

- a minimum GPA of 5 in the overall undergraduate degree program
- at least a pass in PYB350 Advanced Statistical Analysis (or its equivalent)
- a minimum overall GPA of 5 in the prescribed second and third year Psychology units listed below, or their equivalent. Entry is competitive based on GPA in these prescribed units:
  - PYB201 Perception
  - PYB203 Developmental Psychology
  - PYB205 Social Psychology
  - PYB206 Personality
  - PYB208 Counselling Theory and Practice 1
  - PYB210 Research Design and Data Analysis
  - PYB302 Industrial and Organisational Psychology
  - PYB303 Cognitive Psychology
  - PYB304 Physiological Psychology
  - PYB306 Psychopathology
  - PYB311 Psychological Assessment

Non-QUT Applicants
For applicants with Bachelor's awards other than from QUT, similar requirements will be expected.

They will also be required to provide certified copies of complete academic transcripts and evidence of their eligibility to undertake an Honours program at their home institution.

Course Structure

The courses comprises of eight 12 credit point units. Coursework includes the compulsory unit PYB407 Research and Professional Development Seminar; plus elective units, chosen from advanced cognitive, organisational/counselling theory. The research component of the program entails one Research Methods unit and an individual thesis. PYB400 Thesis is undertaken in modules throughout the program and initially students complete a research plan which sets out the project. This is followed by the collection, analysis and writing-up of the data. All coursework units have 3 contact hours per week. Research thesis units contact is as required by the supervisor.

Full-time Course Structure

Year 1, Semester 1
PYB400-1 Thesis (Part 1)
PYB401 Advanced Research Methods
Two Elective Units

Year 1, Semester 2
PYB400-2 Thesis (Part 2)
PYB400-3 Thesis (Part 3)
PYB400-4 Thesis (Part 4)
PYB407 Research and Professional Development Seminar

Part-time Course Structure

Year 1, Semester 1
PYB401 Advanced Research Methods
One Elective Unit

Year 1, Semester 2
PYB400-1 Thesis (Part 1)
PYB407 Research and Professional Development Seminar

Year 2, Semester 1
PYB400-2 Thesis (Part 2)
One Elective Unit

Year 2, Semester 2
PYB400-3 Thesis (Part 3)
PYB400-4 Thesis (Part 4)

Elective Units
PYB402 Counselling Psychology
PYB403 Cognitive Neuropsychology
PYB404 Issues in Social Developmental Psychology
PYB405 Advanced Organisational Psychology
PYB408 Advanced Social Cognition
Bachelor of Behavioural Science (Psychology) PY45

Award title: Bachelor of Behavioural Science (Psychology)
CRICOS code: 034136C
Campus: Carseldine
Duration: 3 years full-time or 6 years part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Julie Hansen

Professional Membership
The Bachelor of Behavioural Science (Psychology) provides students with a degree accredited by the Australian Psychology Accreditation Council (APAC).

Full-time Course Structure

Year 1, Semester 1
PYB000 Scholarship and Skills (Psychology)
PYB101 Introduction to Psychology 1A
PYB007 Interpersonal Processes and Skills
Social Science Foundation Unit (see List A)

Year 1, Semester 2
PYB110 Psychological Research Methods
PYB102 Introduction to Psychology 1B
PYB208 Counselling Theory and Practice 1
PYB158 Introduction to Substance Abuse in Australia or Elective

Year 2, Semester 1

PYB311 Psychological Assessment
Elective
Elective*

Notes:
* PYB350 is compulsory if you wish to continue into the Bachelor of Psychology (Honours) program. Otherwise another elective can be taken.

List A: Social Science Foundation Units
In your first year of study (or first two years of study for part-time students), you are required to study one compulsory Social Science Foundation Unit from the list below, and one other elective unit. The Social Science Foundation unit can be completed in either 1st or 2nd semester, depending on your choice of unit and its availability. You should enrol in an elective unit in the other semester.

HHB103 Contemporary Social and Community Issues
HHB104 Understanding Society: Intro. To Sociology
HHB105 Exploring Change
HHB110 Introduction to International and Global Studies
HHB114 Introduction to Human Rights and Ethics
HHB115 Human Identity and Change
HHB210 Indigenous Australia: Country, Kin and Culture

Psychology Electives
The following electives are offered in the Psychology program to enable diversity of choice at undergraduate and early postgraduate level and to allow innovative approaches to current and perceived community needs. However, such electives will be offered subject to staff availability and sufficient student enrolment to justify running the unit.

PYB205 Social Psychology
PYB210 Research Design and Data Analysis

Notes:
PYB350 is compulsory if you wish to continue into the Bachelor of Psychology (Honours) program. Otherwise another elective can be taken.

Psychology Electives
The following electives are offered in the Psychology program to enable diversity of choice at undergraduate and early postgraduate level and to allow innovative approaches to current and perceived community needs. However, such electives will be offered subject to staff availability and sufficient student enrolment to justify running the unit.

PYB054 Psychology & Gender
PYB067 Human Sexuality
PYB158 Introduction to Substance Abuse in Australia
PYB159 Alcohol & Other Drug Studies
PYB215 Forensic Psychology and the Law
PYB257 Group Work
PYB258 Introduction to Theory and Research in Hypnosis
PYB260 Psychopharmacology of Addictive Behaviour
PYB305 Applied Social Psychology
PYB307 Health Psychology
PYB353 Occupational and Vocational Psychology
PYB356 Counselling Theory and Practice 2
PYB358 Advanced Developmental Psychology
PYB359 Introduction to Family Therapy
PYB360 Interventions for Addictive Behaviours
Elective units are subject to prerequisite requirements. Minor sequences are available in public health and human services. Alternatively, students may wish to develop a major or minor sequence in any other School of the University, particularly within courses that have relevance to psychology.

- **Bachelor of Health Science (Health Information Management, Health Services Management and Public Health) PU40**

  **Award title:** Bachelor of Health Science (Health Information Management, Health Services Management and Public Health)  
  **CRICOS code:** 022142D  
  **Campus:** Kelvin Grove  
  **Duration:** 3 Years full-time  
  **Credit points:** 288 (full-time standard semester: 48)  
  **Course coordinator:** Mrs Melinda Service  
  **Discipline coordinator:** Health Information Management: Dr Josie Di Donato; Health Services Management: Dr Josie Di Donato

**Majors**

This course has been to offer a common first year for the Health Information Management, Health Services Management and Public Health majors. Students are able to choose one of these majors in their second year.

See also the separate entry for the Nutrition major.

**Professional Membership**

**Health Information Management**

Graduates of the Bachelor of Health Science (Health Information Management) are eligible for membership of the Health Information Management Association of Australia, the Clinical Coders Society of Australia, and the Australian College of Health Service Executives.

**Health Services Management**

Graduates of the Bachelor of Health Science (Health Services Management) are eligible for membership of the Australian College of Health Service Executives.

**Public Health**

Graduates are eligible for membership of the Public Health Association of Australia and the Australian Health Promotion Association.

**Full-time Course Structure - Health Information Management major**

Health Services Management Elective List

Minor Elective Information for the Health Services Management Major

The course structure for the Health Services Management major consists of:

a) a major in Health Services Management PLUS the opportunity to select from one of the following:
b) a major in Public Health (Major 2) comprised of 84cp including the following core units: PUB201, PUB329, PUB416, PUB461, PUB561, PUB565, PUB406, and one 12cp unit selected from the minor elective lists below. OR
c) two minors (Minor 1 and Minor 2) each of which are comprised of 48cp selected from the minor electives lists below. OR
d) one minor and four electives (Minor 1 and Electives) selected from the minor elective lists below. You must ensure that you satisfy all prerequisites and that only one of the four electives is at an introductory level.

Please note:

* To select a minor or elective from outside the recommended list below, you must seek approval from the Academic Affairs Officer.
* You may only select up to four minor elective units (48 credit points) from outside of the School of Public Health.

Accounting and Finance

AYB121 Financial Accounting
AYB220 Company Accounting
AYB225 Management Accounting
BSB110 Accounting

Human Resource Management

BSB122 Quantitative Analysis and Finance
MGB211 Organisational Behaviour
MGB220 Management Research Methods
MGB222 Managing Organisations
MGB309 Strategic Management
MGB314 Organisational Consulting and Change
MGB207 Human Resource Issues and Strategy

Indigenous Health

PUB406 Health Promotion Strategies
PUB557 Health Needs of Indigenous Australians and Other Populations
PUB644 Health Promoting Schools

International Business

BSB119 International and Electronic Business
IBB208 European Business Development
IBB213 International Marketing

Management

BSB119 Marketing
MGB222 Managing Organisations
MGB309 Strategic Management
MGB334 Managing in a Changing Environment

Marketing

AMC200 Consumer Behaviour
AMC240 Marketing Planning and Management
AMC341 Strategic Marketing
BSB126 Marketing

Women's Health

PUB336 Women's Health
PUB406 Health Promotion Strategies
PUB632 Independent Study
PYB054 Psychology & Gender

General Electives

A list of General Electives is available on the current PU40 Course Summary Sheet.

Public Health Major Elective Lists

Minor Elective Information for the Public Health Major

The course structure consists of:

a) a major in Public Health PLUS the opportunity to select from one of the following:
b) one minor or four electives selected from the minor elective lists below. You must ensure that you satisfy all prerequisites and that only one of the four electives is at an introductory level.

Please note:

* To select a minor or elective from outside the recommended list below, you must seek approval from the Academic Affairs Officer.

Alcohol and Drug Studies

PYB158 Introduction to Substance Abuse in Australia
PYB159 Alcohol & Other Drug Studies
PYB260 Psychopharmacology of Addictive Behaviour
PYB360 Interventions for Addictive Behaviours

Community Nutrition

PUB341 Nutrition Education
PUB474 Food Studies
PUB509 Nutrition
PUB632 Independent Study
PYB054 Psychology & Gender

Health Education

HMB171 Fitness Health and Wellness
PUB632 Independent Study
PUB644 Health Promoting Schools

Indigenous Health

PUB557 Health Needs of Indigenous Australians and Other Populations
Choose three from the following:
HHB123 Indigenous Australian Culture Studies
HHB255 Indigenous Politics and Political Culture
HHB264 Public and Professional Ethics
HHB265 The Just Society
HHB275 Human Rights: Australian Activism
JSB352 Indigenous Justice

Science
LSB118 Life Science
LSB142 Human Anatomy and Physiology
PCB140 Introductory Chemistry
PCB142 Chemistry 1
PCB150 Physics 1H

Note that completion of the Science minor is a prerequisite for entry to the Graduate Diploma in Environmental Health and the Graduate Diploma in Health, Safety and Environment.

Women’s Health
PUB336 Women’s Health
PUB632 Independent Study
PYB054 Psychology & Gender
SPB007 Human Sexuality and Learning

General Electives
PUB105 Introduction to Family Studies
PUB480 Health Administration Finance
PUB490 Quality Management in Health
PUB611 Risk Management

Bachelor of Health Science (Nutrition and Dietetics) PU43

Award title: Bachelor of Health Science (Nutrition and Dietetics)
CRICOS code: 022143C
Campus: Kelvin Grove
Duration: 4 Years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Mrs Melinda Service

Other Majors
See also the separate entry for the following major in this course: Podiatry.

Professional Membership
Graduates are eligible for membership of the Dietitians Association of Australia, and may enrol in the APD (Accredited Practising Dietitian Program). They are also eligible for membership of the Public Health Association of Australia, the Australian Health Promotion Association, Sports Dietitian Association, and Sports Medicine Australia.

Full-time Course Structure

Year 1, Semester 1
PCB142 Chemistry 1
PUB104 Introduction to Health Services Management
PUB251 Contemporary Public Health
PUB474 Food Studies

Year 1, Semester 2
LSB255 Human Anatomy
PCB242 Chemistry 2
PUB201 Food and Nutrition
PYB012 Psychology

Year 2, Semester 1
LSB308 Biochemistry
LSB359 Physiology 1
PUB326 Epidemiology
PUB341 Nutrition Education

Year 2, Semester 2
LSB408 Metabolism
LSB458 Physiology 2
PUB405 Nutrition Science
HMB273 Exercise Physiology 1
OR
LSB658 Clinical Physiology

Year 3, Semester 1
PUB506 Foodservice Management
PUB509 Nutrition
PUB541 Medical Nutrition Therapy 1
PUB561 Quantitative Analysis for Health

Year 3, Semester 2
PYB208 Counselling Theory and Practice 1
PUB628 Advanced Food Studies
PUB641 Medical Nutrition Therapy 2
PUB875 Professional Practice

Year 4, Semester 1
PUB723 Clinical Dietetic Practice
PUB821-1 Practice in Community Nutrition
PUB822-1 Practice in Food Service Management
Elective

Year 4, Semester 2
PUB606 Dietetic Management
PUB821-2 Practice in Community Nutrition
PUB822-2 Practice in Food Service Management
Elective
Elective

Note
* Credentialling requirements are for four semesters of study in anatomy/physiology. Students must choose either HMB273 Exercise Physiology 1 or LSB658 Clinical Physiology as their fourth unit.

Elective Units for the Nutrition and Dietetics Major
Students are required to select three electives from the one area of study or from a variety of areas as listed below.

Elective units are subject to prerequisite requirements, credit points and availability of the unit. With the approval of the Subject Area Coordinator or the Course Coordinator other electives may be selected.

Alcohol and Drug Studies
PYB158 Introduction to Substance Abuse in Australia
PYB159 Alcohol & Other Drug Studies
PYB260 Psychopharmacology of Addictive Behaviour
PYB360 Interventions for Addictive Behaviours

Clinical Science
LSB365 Pathology
LSB438 Immunology 1
LSB508 Advanced Metabolism
LSB658 Clinical Physiology
PUB632 Independent Study

Counselling
PYB007 Interpersonal Processes and Skills
Choose one of the following:
PYB159 Alcohol & Other Drug Studies
PYB257 Group Work
PYB356 Counselling Theory and Practice 2
PYB359 Introduction to Family Therapy
PYB360 Interventions for Addictive Behaviours

Dietetic Management
LWS001 Medicine and The Law
PUB480 Health Administration Finance
PUB490 Quality Management in Health
Graduates are eligible for membership of the Dietitians Association of Australia and may enrol in the APD (Accredited Practising Dietitian) program. Graduates are also eligible for membership in the Australian Association for Exercise and Sports Science.

**Full-time Course Structure**

**Year 1, Semester 1**
- LSB131 Anatomy
- HMB276 Research in Human Movement
- PCB242 Chemistry 2
- PUB210 Food and Nutrition
- PYB007 Interpersonal Processes and Skills

**Year 2, Semester 1**
- HMB271 Foundations of Motor Control, Learning and Development
- HMB274 Functional Anatomy
- LBN308 Biochemistry
- LSN358 Physiology 1

**Year 2, Semester 2**
- HMB272 Biomechanics
- HMB273 Exercise Physiology 1
- LSB408 Metabolism
- LSB458 Physiology 2
- PUB405 Nutrition Science

**Year 3, Semester 2**
- HMB275 Exercise and Sport Psychology
- PUB628 Advanced Food Studies
- PUB641 Medical Nutrition Therapy 2
- HMB282 Resistance Training

**Year 4, Semester 1**
- HMB277 Exercise and Sport Nutrition
- HMB382 Principles of Exercise Prescription
- PUB509 Nutrition
- HMB313 Socio-Cultural Foundations of Physical Activity

**Year 4, Semester 2**
- HMB470 Practicum 1
- HMB471 Project 1
- PYB208 Counselling Theory and Practice 1
- PUB875 Professional Practice

**Year 5, Semester 1**
- HMB472 Project 2
- PUB723 Clinical Dietetic Practice
- PUB821-1 Practice in Community Nutrition
- PUB822-1 Practice in Food Service Management

**Year 5, Semester 2**
- HMB475 Practicum 2
- PUB606 Dietetic Management
- PUB821-2 Practice in Community Nutrition
- PUB822-2 Practice in Food Service Management

**Bachelor of Health Science (Nutrition)**

Award title: Bachelor of Health Science (Nutrition)
CRICOS code: 022142D
Campus: Kelvin Grove
Duration: 3 years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Ms Melinda Service
Discipline coordinator: Ms Jan Payne

Other Majors
See also the separate entries for the following majors in this course: Health Information Management or Health Services Management; or Public Health.

Professional Membership
Graduates are eligible for membership of the Public Health Association of Australia and the Australian Health Promotion Association.

Full-time Course Structure

**Year 1, Semester 1**
- PCB142 Chemistry 1
- PUB104 Introduction to Health Services Management
- PUB251 Contemporary Public Health
- PUB474 Food Studies

**Year 1, Semester 2**

- Minor Elective

**NUT Minor Elective Lists**

Minor Elective Lists
Students are required to select a minor which constitutes a coherent body of study. Examples of what constitutes a minor appear below. Minor elective units are subject approval of the Course Coordinator.

Alcohol and Drug Studies
- PYB158 Introduction to Substance Abuse in Australia
- PYB159 Alcohol & Other Drug Studies
- PYB260 Psychopharmacology of Addictive Behaviour
- PYB360 Interventions for Addictive Behaviours

Clinical Science
- LSB658 Clinical Physiology
- PLUS
- 36 credit points selected from the following:
  - LSB365 Pathology
  - LSB438 Immunology 1
  - LSB508 Advanced Metabolism
  - PUB632 Independent Study

Counselling
- PYB012 is a prerequisite for this minor
- PYB007 Interpersonal Processes and Skills
- PYB208 Counselling Theory and Practice 1
- PLUS
- Choose two of the following:
  - PYB159 Alcohol & Other Drug Studies
  - PYB257 Group Work
  - PYB356 Counselling Theory and Practice 2
  - PYB359 Introduction to Family Therapy
  - PYB360 Interventions for Addictive Behaviours

Exercise
- HMB273 Exercise Physiology 1
- PLUS
- 36 credit points selected from the following:
  - HMB272 Biomechanics
  - HMB274 Functional Anatomy
  - HMB277 Exercise and Sport Nutrition
  - HMB332 Health Related Fitness
  - HMB333 Child and Adolescent Health
  - HMB379 Disorders of Human Movement
  - HMB381 Exercise Physiology 2
  - HMB383 Workplace Health
  - PUB632 Independent Study

Health Management
- PUB480 Health Administration Finance
- PUB511 Health Policy, Planning and Evaluation
- PUB514 Contract/Project Management

Bachelor of Health Science (Paramedic)

**Award title:** Bachelor of Health Science (Paramedic)
**Campus:** Kelvin Grove
**Duration:** 3 years full-time
**Credit points:** 288 (full-time standard semester: 48)

Professional recognition
Graduates from this course will be eligible for membership of the Australian College of Ambulance Professionals.
### Full-time Course Structure

**Year 1, Semester 1**
- LSB182 Bioscience 1
- PUB104 Introduction to Health Services Management
- PUB180 Foundations of Paramedic Practice 1
- PUB251 Contemporary Public Health

**Year 1, Semester 2**
- LSB282 Bioscience 2
- PUB209 Health, Culture and Society
- PUB280 Foundations of Paramedic Practice 2
- PUB486 Ethics and the Law in Health Service Delivery

**Year 1, Semester 3 (Summer)**
- PUB270 Paramedic Clinical Practice 1

**Year 2, Semester 1**
- LSB382 Bioscience 3
- PUB326 Epidemiology
- PUB390 Paramedic Management of Medical and Surgical Emergencies A
- PUB391 Paramedic Management of Medical and Surgical Emergencies B

**Year 2, Semester 2**
- PUB416 Research Methods
- PUB450 Paramedic Management of Trauma Emergencies
- PUB470 Paramedic Clinical Practice 2
- PYB111 Paramedic Communication Skills

**Year 3, Semester 1**
- PUB550 Paramedic Management of Obstetric, Paediatric and Behavioural Emergencies
- PUB555 Paramedic Management of Infectious Diseases, Toxicological and Environmental Emergencies
- PUB570 Paramedic Clinical Practice 3

**Year 3, Semester 2**
- PUB670 Paramedic Clinical Practice 4
- PUB680 Professional Development in Paramedic Practice

### Bachelor of Health Science (Podiatry)

**Award title:** Bachelor of Health Science (Podiatry)  
**CRICOS code:** 022143C  
**Campus:** Kelvin Grove  
**Duration:** 4 years full-time  
**Credit points:** 384 (full-time standard semester: 48)  
**Course coordinator:** Ms Melinda Service  
**Discipline coordinator:** Mr Alan Crawford  

### Other Majors

See also the separate entry for the following major in this course: Nutrition and Dietetics.

### Professional Membership

Graduates are eligible for State Registration throughout Australia. This qualification is also acceptable for registration in the United Kingdom, New Zealand and some European countries. Graduates may also become Members of the Australian Podiatry Association and are eligible to apply for membership of Sports Medicine Australia.

### Full-time Course Structure

**Year 1, Semester 1**
- LSB131 Anatomy
- PCB141 Chemistry for Clinical Health Professionals
- PUB251 Contemporary Public Health
- PYB012 Psychology

**Year 1, Semester 2**
- HMB272 Biomechanics
- LSB235 Advanced Anatomy
- LSB275 Biomolecular Science
- LSB475 Disease Processes 4

**Year 2, Semester 1**

- PUB565 International Health

### Research

- PUB416 Research Methods
- PUB461 Qualitative Inquiry in Public Health
- PUB561 Quantitative Analysis for Health

### Bachelor of Health Science (Podiatry)/Bachelor of Applied Science (Human Movement Studies)

**Award title:** Bachelor of Health Science (Podiatry)/Bachelor of Applied Science (Human Movement Studies)  
**CRICOS code:** HL43
Award title: Bachelor of Applied Science (Human Movement Studies)/Bachelor of Health Science (Podiatry)
CRICOS code: 047455C
Campus: Kelvin Grove
Duration: 5 years full-time
Credit points: 528
Course coordinator: Podiatry: Dr Melinda Service; Human Movement Studies: Dr Michael McDonald

Professional Membership
Graduates are eligible for membership of the Australian Podiatry Association and can also apply for membership of Sports Medicine Australia and the Australian Association for Exercise and Sports Science.

Full-time Course Structure

**Year 1, Semester 1**
- LSB131 Anatomy
- PCB141 Chemistry for Clinical Health Professionals
- PUB251 Contemporary Public Health
- PYB012 Psychology

**Year 1, Semester 2**
- HMB171 Fitness Health and Wellness
- HMB272 Biomechanics
- LSB235 Advanced Anatomy
- LSB275 Biomolecular Science
- LSB475 Disease Processes 4

**Year 2, Semester 1**

**Bachelor of Health Science (Public Health) PU40**

Award title: Bachelor of Health Science (Public Health)
CRICOS code: 022142D
Campus: Kelvin Grove
Duration: 3 Years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Mrs Melinda Service
Discipline coordinator: Dr Michael Dunne

Professional Membership
Graduates are eligible for membership of the Public Health Association of Australia and the Australian Health Promotion Association.

Public Health Major Elective Lists

Minor Elective Information for the Public Health Major
The course structure consists of:
a) a major in Public Health PLUS the opportunity to select from one of the following:
b) one minor or four electives selected from the minor elective lists below. You must ensure that you satisfy all prerequisites and that only one of the four electives is at an introductory level.

Please note:
* To select a minor or elective from outside the recommended list below, you must seek approval from the Academic Affairs Officer.

Alcohol and Drug Studies
- PYB158 Introduction to Substance Abuse in Australia
- PYB159 Alcohol & Other Drug Studies
- PYB260 Psychopharmacology of Addictive Behaviour
- PYB360 Interventions for Addictive Behaviours

Community Nutrition
- PUB341 Nutrition Education
- PUB474 Food Studies

### Bachelor of Nursing NS40

**Award title:** Bachelor of Nursing  
**CRICOS code:** 003501K  
**Campus:** Kelvin Grove and Caboolture  
**Duration:** 3 Years full-time or 6 Years (Kelvin Grove campus - February entry only) part-time  
**Credit points:** 288 (full-time standard semester: 48; part-time standard semester: 24)  
**Course coordinator:** Dr Alan Barnard

### Streams in NS40 Bachelor of Nursing

The Bachelor of Nursing (NS40) course provides streams of study for both preregistration and postregistration students (ie those who have already completed a qualification leading to registration as a nurse).

### Professional Membership

This course is recognised by the Royal College of Nursing, Australia as satisfying the academic requirements for admission as a professional member. The Bachelor of Nursing is an accredited Nursing Pre-registration course of the Queensland Nursing Council. Domestic or international students who complete the pre-registration stream of studies (288 credit points) are eligible to apply for registration with the Queensland Nursing Council. For further information on registration requirements please refer to www.qnc.qld.gov.au.

### Full-time Course Structure - Mid-year intake

#### Year 1, Semester 1 (July)
- LSB182 Bioscience 1  
- NSB117 Nursing and the Health Care System  
- NSB225 Promoting Health Across the Lifespan  
- PYB073 Introduction to Behavioural Science & Health Care

#### Year 1, Semester 2
- LSB282 Bioscience 2  
- NSB113 Diversity and Health: Introduction to Indigenous and Multicultural Perspectives  
- NSB118 Health Assessment and Nursing Practice  
- NSB122 Clinical Practice 1

#### Year 2, Semester 1
- LSB382 Bioscience 3  
- NSB212 Clinical Practice 2  
- NSB223 Mental Health Nursing  
- NSB324 Medical-Surgical Nursing 1

#### Year 2, Semester 2
- HHB120 Ethics, Law and Health Care  
- NSB222 Clinical Practice 3  
- NSB224 Research Approaches in Nursing  
- NSB423 Medical-Surgical Nursing 2

#### Year 3, Semester 1
- NSB322 Clinical Practice 4  
- NSB424 Nursing Therapeutics  
- NSB500 Medical-Surgical Nursing 3  
- NSB501 Politics, Technology and Nursing

#### Year 3, Semester 2
- NSB321 Professional Nursing Development  
- NSB333 Clinical Practice 5

### Part-time Course Structure

#### Year 1, Semester 1
- LSB182 Bioscience 1  
- NSB117 Nursing and the Health Care System

#### Year 1, Semester 2
- LSB282 Bioscience 2  
- NSB113 Diversity and Health: Introduction to Indigenous and Multicultural Perspectives

#### Year 2, Semester 1
- NSB225 Promoting Health Across the Lifespan  
- PYB073 Introduction to Behavioural Science & Health Care

#### Year 2, Semester 2
- LSB182 Bioscience 1  
- NSB117 Nursing and the Health Care System  
- NSB225 Promoting Health Across the Lifespan  
- PYB073 Introduction to Behavioural Science & Health Care

#### Year 3, Semester 1
- NSB118 Health Assessment and Nursing Practice  
- NSB122 Clinical Practice 1

#### Year 3, Semester 2
- LSB382 Bioscience 3  
- NSB324 Medical-Surgical Nursing 1

#### Year 4, Semester 1
- NSB223 Mental Health Nursing  
- NSB212 Clinical Practice 2

#### Year 4, Semester 2
- NSB222 Clinical Practice 3  
- NSB224 Research Approaches in Nursing

### Bachelor of Nursing - Graduate Entry

**NS40**

- **Award title:** Bachelor of Nursing
- **CRICOS code:** 046054F
- **Campus:** Kelvin Grove
- **Duration:** 2 Years full-time
- **Credit points:** full-time standard semester: 48; part-time standard semester: 24
- **Course coordinator:** Dr Alan Barnard

### Streams in NS40 Bachelor of Nursing

The Bachelor of Nursing (NS40) course provides streams of study for both preregistration and postregistration students (ie those who have already completed a qualification leading to registration as a nurse).

### Professional Membership

This course is recognised by the Royal College of Nursing, Australia as satisfying the academic requirements for admission as a professional member. The Bachelor of Nursing is an accredited Nursing Pre-registration course of the Queensland Nursing Council. Domestic or international students who complete the pre-registration stream of studies (288 credit points) are eligible to apply for registration with the Queensland Nursing Council. For further information on registration requirements please refer to www.qnc.qld.gov.au.

### Course Requirements

The clinical practice units require students to undertake block practicums of two or more weeks duration. Students will be required to wear a uniform while on clinical practice, the cost of which is approximately $150. Students enrolling in this program are required to complete a course of vaccinations for Hepatitis B before commencing their clinical practice units. They are also required to have a current Senior First Aid Certificate or the equivalent prior to commencement of Clinical Practice 1.

It is a requirement of Queensland Health that all students undertaking a clinical placement in a Q health facility complete The Essentials component of the student orientation package which is available on the Queensland Health website www.health.qld.gov.au/SOP/html/Essentials_Homepage.asp.

### Full-time Course Structure - February Entry

Bachelor of Nursing/Bachelor of Applied Science (in Human Movement Studies) HL40

Award title: Bachelor of Nursing/Bachelor of Applied Science
CRICOS code: 031578A
Campus: Kelvin Grove
Duration: 4 Years full-time
Credit points: 432
Course coordinator: Nursing: Dr Alan Barnard; Human Movement Studies: Dr Michael McDonald

Professional Membership
The Bachelor of Nursing is recognised by the Royal College of Nursing, Australia as satisfying the academic requirements for admission as a professional Member. Graduates are eligible for membership of the Australian Association for Exercise and Sports Science.

Course Requirements
Students are required to complete 432 credit points within the integrated course. The clinical practice units require students to undertake block practicums of two or more weeks duration during semester. Students will be required to wear a uniform while on clinical practice, the cost of which is approximately $150.

Students in the Nursing program are required to complete a course of vaccinations for Hepatitis B before commencing their clinical practice units. They are also required to have a current Senior First Aid Certificate or the equivalent prior to commencement of Clinical Practice 1.

OVERVIEW
The School of Humanities and Human Services within QUT Carseldine is focused on multidisciplinary teaching and research and offers a range of subjects which focus on contemporary international, local and community issues.

- The Bachelor of Arts offers students the opportunity for professional majors in International and Global Studies, Ethics and Human Rights, Society and Change, Community Studies, and Australian Studies. Discipline majors in History, Geography, Languages, Social Sciences (Sociology and Political Studies) are also available together with a broad range of co-majors from other areas of the University. The first year of this program can also be undertaken at the Caboolture Campus.

- The Bachelor of Social Science offers majors in Applied Ethics, Geography and Environmental Studies, Human Services and Social Policy, International and Global Studies, Political Studies, and Sociology. The first year of this program can also be undertaken at the Caboolture Campus.

- The Bachelor of Social Science (Human Services) focuses on contemporary issues and offers a suite of skills units that will prepare students for work in aged services, disability services, and corrections; and for working with children and family, and with young people.

- Associated postgraduate research and course-work programs and honours programs are also available in the School.

Staff of QUT Carseldine are committed to maintaining strong links with industry and the professions served by the courses on offer. QUT Carseldine is also responsible for the coordination of academic and support activities at the Carseldine campus, and for the continued development of the campus and its relationships with community partners. Research and community service activities are regarded as key strategies for ensuring the on-going relevance of the academic programs at all levels and for maintaining the strong success record of graduates.

SENIOR STAFF
QUT Carseldine
Executive Director: Professor R.L. Matchett, BSoWk(Hons) Qld, MAASW

G. Kendall, MA Camb, MSc Manc, PhD Lond

RESEARCH CENTRE
Centre for Social Change Research
The Centre's purpose is to develop a research environment that promotes understanding of the drivers of social change and the implications of change for individuals, families, communities and nations. The Centre's mission is:

To create an environment that promotes change and transformation, engagement and leadership through research that is careful, independent, critical and ethical, and that contributes to a sustainable world and better outcomes for people and communities.

The Centre facilitates research with a strong applied social research orientation, which allows the human, ethical and societal dimensions of technological, environmental, economic and political change to be assessed, and responses to these changes to be identified. This is achieved through careful, critical, independent and ethical research, which contributes to better outcomes for individuals and communities, and addresses issues of national and global significance.

Staff and students are offered

- a centre of excellence in the ‘craft of research’, with a recognised reputation
- a distinctive, applied research culture, underpinned by a solid research base
- a focus on international and local issues related to the humanities, social sciences and human services
- an ethical engagement with a wide range of public policy and practices related to government, business and the community, including human services, health care, biotechnology and the professions
- strong collaborative partnerships with community, government, academic, and private organisations
- cutting edge critical public debate
- an open, people-centred and change-oriented approach
- a nurturing environment for the development of excellence in the next generation of researchers through expert mentoring and guidance by experienced researchers.

The Centre's strengths include:

- expertise in topical and important areas within the social research arena, including
  - Applied Ethics
  - Asia-Pacific Studies
  - Community Services
  - European Studies
  - Family and Social Policy
  - History
  - Gender Studies
  - Sustainability
  - Geography and Environmental Studies
  - Gerontology
  - Human rights
  - Politics
  - Sociology
  - Disability
  - Youth Services
  - Social Capital
  - Triple Bottom Line
Community Engagement

- experience in the use of diverse research approaches, including political, sociological, applied ethics, historical, and social science research approaches
- solid links with the community, industry, business and government organisations that enable the development of collaborative research alliances
- cross-disciplinary linkages at the local, national and international level
- a high publication rate.

The Centre aims to foster:

- a positive research culture that supports postgraduate candidates and staff researchers of an international standard
- solid links with the community, business, government and professional organisations that enable the development of collaborative research alliances and consultancies, working with people to deal with real issues in real time
- cross-disciplinary teams able to work together to offer alternative approaches to solve complex problems
- linkages with other faculties and departments throughout Australia and overseas, as well as within the Queensland University of Technology.

Doctor of Social Science HH50

Award title: Doctor of Social Science
CRICOS code: 048293G
Campus: Carseldine
Duration: 6 semesters (3 years) full-time or 12 semesters (6 years) part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Assoc Prof Gavin Kendall

Course Structure
The course is divided into coursework and three theses. All three theses have conference presentation/communication of research finding units attached to them. Students will first complete their coursework and their first project, as well as HHR510 before they will be permitted to work on their second project. Similarly students must complete the second project as well as HHR520 before they are permitted to begin work on their third project. The course therefore has a three-part format and students are required to pass three stages in turn to guarantee progression.

Full-time Course Structure

Year 1, Semester 1
HHR540 Logic of Social Inquiry
HHR551-1 Professional Practice Project 1 1/4
Elective 1

Year 1, Semester 2

Master of Arts (Research) (Humanities and Human Services) HH40

Award title: Master of Arts (Research)
CRICOS code: 012707K
Campus: Gardens Point and Carseldine
Duration: 3 semesters (3-year qualified entry); 2 semesters (4-year qualified entry) full-time or 6 semesters (3-year qualified entry); 4 semesters (4-year qualified entry) part-time
Credit points: 144 (3-year qualified entry); 96 (4-year qualified entry) (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Barbara Hanna

Overview
The Master of Arts by Research is offered in various disciplines by the academic units that make up the School of Humanities and Human Services. Study areas available include:

- Aged Services
- Applied Ethics
- Asia-Pacific Studies
- Child and Family Services
- Disability Services
- European Studies
- Geography and Environmental Studies
- History
- Human Services
- International and Global Studies
- Languages (French, German, Indonesian, Japanese, Mandarin)
- Political Studies
- Services to Young People
- Sociology.

Course Structure
For those with a three-year degree, the Master of Arts (Research) normally comprises 48 credit points of coursework and a 96 credit point research project. For those with a four-year degree it normally comprises a 96 credit point research project. However, with the approval of the postgraduate studies coordinator it is possible to enrol in a 12 credit point coursework plus 84 credit point research project; or a 24 credit point coursework plus 72 credit point research project.

Research Component
Dependent on the discipline, the research component may be undertaken as a research thesis (30 000-50 000 words).

Master of Social Science (Human Services) HH32

Award title: Master of Social Science (Human Services)
CRICOS code: 027281G
Campus: Cramseldine
Duration: 3 semesters full-time or 6 semesters part-time
Credit points: 144 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Judith Burton

Course Structure
You will study four core units and have a wide choice of elective units. You may choose electives from those listed here or, in consultation with the course coordinator, any advanced unit across the University. The scope of elective choice depends on your undergraduate degree. For the Practice Related Research units, you will select and work under the supervision of a member of academic staff to undertake a research project. The resulting report, the thesis (15 000 - 18 000 words), should demonstrate your in-depth knowledge of a topic of your choice as well as your ability to design and conduct research.

All Graduate Studies units are offered subject to availability.

Please contact the course coordinator for advice on nominating a part-time course load.

Full-time Course Structure

Year 1, Semester 1
HHP011 Critical Issues in The Human Services
HHN410 Logic of Social Inquiry
Two elective units selected from the following, or any postgraduate unit as approved by the postgraduate coordinator:
HHP012 Leadership in The Human Services
MGN517 Program Management and Evaluation
HHB201 Initial Professional Practice
HHB210 Indigenous Australia: Country, Kin and Culture
HHB212 Community Work
HHB215 Crisis and Conflict Resolution
HHB232 Survey Methods
HHB303 Aged Services: Advanced
HBB304 Child and Family Services: Advanced
HBB306 Disability Services: Advanced
HBB305 Corrective Services: Advanced
HBB307 Services to Young People: Advanced
PYB159 Alcohol & Other Drug Studies
GSN230 Ethics and Management for Philanthropic and Nonprofit Organisations
DBP411 Community Planning

Year 1, Semester 2
HHP013 Managing Human Service Organisations
HHP015 Contracting and Policy in the Human Services
Two units selected from the following, or any postgraduate unit as approved by the postgraduate coordinator:
HHP004 Child and Family Services - Graduate Studies
HHP006 Disability Services - Graduate Studies
HHP007 Youth Services - Graduate Studies
HHB210 Indigenous Australia: Country, Kin and Culture
HHB211 Casework and Case Management
HHB213 Social Policy Processes
HHB214 Team Practice and Group Processes
HHB216 The Human Dimensions Of Space
HHB224 Qualitative Research Methods
HHB300 Current Developments in Human Services
HHB328 Researching Applied Ethics
HHN016 Research Methods for Professional and Organisational Development
GSN224 Corporate Philanthropy
GSN231 Legal and Accounting Issues for PandP Organi- sations
MGN516 Policy Analysis
PYB208 Counselling Theory and Practice 1

Note:
Students will be encouraged to select only one undergraduate unit per semester

Year 2, Semester 1

CRICOS code: 027280J
Course Structure
You will study four core units and have a wide choice of elective units. You may choose electives from those listed here or, in consultation with the course coordinator, any advanced unit across the University. The scope of elective choice depends on your undergraduate degree.

All Graduate Studies units are offered subject to availability.

Please contact the course coordinator for advice on nominating a part-time course load.

Full-time Course structure

Year 1, Semester 1
HHP011 Critical Issues In The Human Services
HHP012 Leadership In The Human Services
HHP013 Managing Human Service Organisations
HHP015 Contracting and Policy in the Human Services

Year 1, Semester 2
HHP016 Research Methods for Professional and Organisational Development

Year 2, Semester 1
HHP007 Youth Services - Graduate Studies
HHP006 Disability Services - Graduate Studies
HHP004 Child and Family Services - Graduate Studies
HHP003 Aged Services - Graduate Studies

Year 2, Semester 2
HHP015 Contracting and Policy in the Human Services
HHP014 Research Methods for Professional and Organisational Development

• Bachelor of Arts (Honours) HH21
  Award title: Bachelor of Arts (Honours)
  CRICOS code: 020294D
  Campus: Carseldine
  Duration: 2 Semesters full-time or 4 Semesters part-time
  Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
  Course coordinator: Dr Judith Burton

Course Structure
The course consists of three coursework units and the equivalent of five units of supervised independent study, resulting in a 15 000-18 000 word thesis. The requirements for graduating are satisfactory (or better) performance in all units.

The Honours thesis will be marked by two assessors, one of whom will normally be external to QUT. Marks awarded by assessors, plus the mark awarded to the thesis, will be used to determine the final mark for the course.

The final mark for the course is determined on the basis of marks assigned in the coursework units: The Logic of Social Inquiry, Literature Review, and the advanced elective, plus the mark awarded to the thesis, with weighting being given according to the proportion of credit points within the total. The Honours thesis will be marked by two assessors, one of whom will normally be external to QUT.

Full-time Course Structure

Year 1, Semester 1
HHN410 Logic of Social Inquiry
The course consists of three coursework units and the equivalent of five units of supervised independent study, resulting in a 15 000-18 000 word thesis. The requirements for graduating are satisfactory (or better) performance in all units. The final mark for the course is determined on the basis of marks assigned in the coursework units The Logic of Social Inquiry, Literature Review, and the advanced elective, plus the mark awarded to the thesis, with weighting being given according to the proportion of credit points within the total. The Honours thesis will be marked by two assessors, one of whom will normally be external to QUT.

Part-time Course Structure
Part-time students, and students wishing to enrol mid-year, should contact the course coordinator for advice on alternative sequences of study.

Full-time Course Structure
Semester 1
HHN410 Logic of Social Inquiry
HHB403 Literature Review
HHB404 Honours Thesis 1
Advanced Elective: An advanced Unit selected in consultation with supervisor and approved by the honours coordinator. The recommended elective is HHP011 Critical Issues in the Human Services
Semester 2
HHB405 Honours Thesis 2
HHB406 Honours Thesis 3
HHB407 Honours Seminar

Part-time Course Structure
Year 1, Semester 1
HHN410 Logic of Social Inquiry
OR Elective Unit (An advanced unit selected in consultation with supervisor and approved by the Honours coordinator)
(Recommended elective is HHP011 Critical Issues in the Human Services)
HHB403 Literature Review
Year 1, Semester 2

Year 2, Semester 2
HHB406 Honours Thesis 3
HHB407 Honours Seminar

Bachelor of Arts HH01
Award title: Bachelor of Arts
CRICOS code: 037577J
Campus: Gardens Point, Carseldine and Caboolture
Duration: 3 years full-time or 6 years part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr John Synott

Course Requirements
The Bachelor of Arts consists of 24 units of study.

You are REQUIRED to complete:
One Multi-disciplinary Major (7 units)

You MAY also include:
- an additional Multi-disciplinary Major (7 units)
- a Discipline major (6 units)
- a Co-major in another QUT course (or up to 8 units)
- a work-based Internship (2 units)
**First Year at Caboolture**

By including the Caboolture option on your QTAC application you have the opportunity to take the first year of the Bachelor of Arts at QUT’s Caboolture campus. It is the same course as at Carseldine campus with the exception that the first year is tailored towards the availability of units offered at that campus. After completing your first year (or 96 credit points), you must then continue with the remainder of the course at the Carseldine campus.

It should be noted that credit/advanced standing will not be granted for Caboolture students - excluding START QUT studies. To receive credit, you must apply for entry to the program offered at Carseldine.

**International and Global Studies Multidisciplinary Major**

The International and Global Studies major is an ideal choice if you wish to work in areas that demand and value knowledge of trends and outcomes in internationalisation; understanding of cultural diversity; knowledge of world regions, cultures and societies; and skills associated with global literacy. You may choose to concentrate on global perspectives or international studies (Asian studies, European studies or Pacific studies). You may combine this major with language study in Indonesian, French, Japanese, German or Mandarin.

**Society and Change Multidisciplinary Major**

The Society and Change major provides a multidisciplinary approach to understanding the dynamics of social change with particular emphasis on the environment, change and society; societies in transition; and the individual and society. You will acquire substantive knowledge on social and cultural aspects of change, and will be challenged to take a critical and analytical approach to your study. Many of the units provide case studies of social change, and as a graduate of this major, you will be equipped with transferable analytical, research and interpersonal skills that are in demand in policy, research and community work.

**Ethics and Human Rights Multidisciplinary Major**

The Ethics and Human Rights major provides you with the opportunity to develop as a socially responsible and responsive practitioner. Dramatic changes in the human condition, such as those already emerging from globalisation and biotechnology, will be a significant feature of life in the twenty-first century. This major will equip you with understanding, skills and strategies that will enable you to address change in ways that promote the wellbeing of individuals and communities. The major is organised around five themes: ethical understandings and theory, human rights, identity studies, ethics and technology, and ethical practice.

**Australian Studies Multidisciplinary Major**

The Australian Studies major examines past, present and future Australia from a variety of discipline and interdisciplinary approaches. Australian studies is a contested, endless conversation and the units reflect the many perspectives which researchers now adopt in trying to understand what Australia is like as a society, a nation, a place and a home to Indigenous and non-Indigenous citizens. The major will equip you with knowledge about Australians and Australia and its role in the world. In addition, as a graduate you will have the confidence to engage in empirical and theoretical debates about what has happened and should happen in Australia.

**Community Studies Multidisciplinary Major**

In the Community Studies major the ‘knowledge explosion’ is addressed by an open-ended teaching and learning approach to equip you to better understand the communities to which you belong from past, present and future perspectives. As you get to know how communities are structured, you will consider what holds communities together and what undermines them, and consider how communities can be enhanced. The major encompasses the concept of community and a detailed investigation of community processes.

**Minors**

All multidisciplinary and discipline majors in the Bachelor of Arts can also be taken as four-unit minors. Note also that all QUT faculties offer agreed sets of units as ‘university minors’.

**Example of Full-Time Course Structure**

**Year 1, Semester 1**
- Core unit (major)
- Core unit (major)
- Core unit (major or skills)
- Core unit (major or skills)
- Major unit
- Major unit
- Co-major unit*/Professional major/Discipline sequence
- Elective unit

**Year 1, Semester 2**
- Major unit
- Co-major unit*/Professional major/Discipline sequence
- Co-major unit*/Professional major/Discipline sequence
- Core unit (research methods)

**Year 2, Semester 1**
- Major unit
- Co-major unit*/Professional major/Discipline sequence
- Co-major unit*/Professional major/Discipline sequence
- Core unit (research methods)
- Elective unit
- Core unit (research methods)

**Year 3, Semester 1**
- Major unit
- Co-major unit*/Professional major/Discipline sequence
- Core unit (internship)
- Core unit (internship)

**Year 3, Semester 2**
- Major unit
- Co-major unit*/Professional major/Discipline sequence
- Elective unit
- Elective unit

**Note:**
- * or second professional major or discipline sequence

**Core Program**

**First Year Core: International and Global Studies**
- HHB110 Introduction to International and Global Studies
- HHB111 Issues in International and Global Studies

**First Year Core: Society and Change**
- HHB105 Exploring Change
- HHB104 Understanding Society: Intro to Sociology

**First Year Core: Ethics and Human Rights**
- HHB114 Introduction to Human Rights and Ethics
- HHB115 Human Identity and Change

**First Year Core: Community Studies**
- HHB102 The Human Condition
- HHB103 Contemporary Social and Community Issues

**First Year Core: Australian Studies**
- HHB106 Australian Society and Culture
HHB112 Australian Politics
HHB116 Applied Skills and Scholarship
HHB117 Introduction to Social Research Methods

Second Year Core: Research Methods
HHB224 Qualitative Research Methods
HHB232 Survey Methods
HHB121 Interpreting The Past
HHB312 Geographical Research Design

Third Year Core: Internship
HHB330 Internship Program

Electives - International and Global Studies Professional Major
Strand A - Global Perspectives
HHB107 World Regions
HHB226 Consuming Cultures
HHB241 Gender and Globalisation
HHB263 Politics of Globalisation
HHB269 Ethics, Technology and the Environment
HHB310 Globalisation and Social Theory
HHB311 Colonial Fantasies and Postcolonial Identities
HHB331 Advanced Seminar -
HHB315 Sex and Drugs In South-East Asia
HHB248 The USA and the Asia Pacific Region
HHB223 Islam and Islamic Societies

Strand B - International Studies
HHB245 Australia and the South Pacific
HHB238 Asian Cultures and Societies
HHB260 Nations and Nationalism In Modern Europe
HHB229 Windows on Japan
HHB238 Korean Culture and Societies
HHB256 Europe Since 1945
HHB243 The Pacific Since 1945
HHB244 Southeast Asia in Focus
HHB246 Modern China
HHB323 Fieldwork Studies

Language Studies/International and Global Studies
Upon consultation with the Languages coordinator, students may select one language unit as an elective in the International & Global Studies Strand.

Students may also undertake a Combined Major in Languages/International and Global Studies, comprising:
1. 1 Introductory Unit
2. 2 Elective units, preferably one from each strand
4 units in a chosen language

Electives - Society and Change Professional Major

Introductory Units
HHB104 Understanding Society: Intro To Sociology
HHB105 Exploring Change

Strand A - The Individual and Society
HHB102 The Human Condition
HHB113 Interpersonal Communication
HHB215 Crisis and Conflict Resolution
HHB225 Political Sociology
HHB230 Political Behaviour
HHB233 Sex, Gender and Society
HHB234 Sociological Theory
HHB236 Virgins, Saints and Sinners: Sociology of Religion
HHB240 Sociology of Crime and Deviance
HHB268 Vulnerable Identities

Strand B - Environment Society and Change
HHB127 Environment and Society
HHB210 Indigenous Australia: Country, Kin and Culture
HHB226 Consuming Cultures
HHB228 Environmental Hazards
HHB231 Health, Society and Environment
HHB251 Australian Resource Management

Strand C - Societies in Transition
HHB242 Pacific Culture Contact
HHB249 Social Movements in Australia
HHB253 Conspiracy and Dissent in Australian History
HHB257 The Classical World
HHB258 Foundations of Modern Europe
HHB259 War and Revolution in Europe 1914-1945
HHB261 Medieval Europe
HHB262 Political Ideologies
HHB315 Sex and Drugs in South-East Asia

Change Management and Project Units
HHB212 Community Work
HHB213 Social Policy Processes
HHB214 Team Practice and Group Processes

Electives - Ethics and Human Rights Professional Major
Strand A - Ethical Understanding and Theory
HHB265 The Just Society
HHB267 Feminism and Ethics
HHB271 Ethical Theory

Strand B - Human Rights
HHB274 Human Rights: International and Regional Activism
HHB275 Human Rights: Australian Activism

Strand C - Identity Studies
HHB268 Vulnerable Identities
HHB272 Composing Identities: The Artistry of Living

Strand D - Ethics and Technology
HHB269 Ethics, Technology and the Environment
HHB270 Gene Technology and Ethics
HHB273 Reshaping Life and Death

Strand E - Ethical Practice
HHB284 Public and Professional Ethics
HHB266 Ethical Decision Making
HHB328 Researching Applied Ethics

Electives - Community Studies Professional Major

Introductory Units
HHB103 Contemporary Social and Community Issues
HHB102 The Human Condition

Elective Units
HHB100 Introduction to Human Services
HHB113 Interpersonal Communication
HHB203 Aged Services: Introduction
HHB204 Child and Family Services: Introduction
HHB205 Corrective Services: Introduction
HHB206 Disability Services: Introduction
HHB207 Services to Young People: Introduction
HHB212 Community Work
HHB214 Team Practice and Group Processes
HHB215 Crisis and Conflict Resolution
HHB216 The Human Dimensions Of Space
HHB319 Child Protection Intervention Skills

Caboolture students should note that after completion of 96 credit points of study they will need to transfer to the QUT Carseldine campus to continue their course.

- **Bachelor of Arts/Bachelor of Social Science (Human Services) HH10**

  **Award title:** Bachelor of Arts/Bachelor of Social Science (Human Services)
  **Campus:** Carseldine
  **Duration:** 4 years full-time or 8 years part-time
  **Credit points:** 384 (full-time standard semester: 48; part-time standard semester: 24)
  **Course coordinator:** Dr Phil Crane

**Course Structure**

This course consists of 16 units each from the Bachelor of Arts and Bachelor of Human Services. The arts course structure allows you maximum flexibility to mix and match study units in a diverse range of themes including international, Australian, contemporary, historical, environmental, ethics, social change and language studies.

In human services, you will acquire a range of professional skills and will specialise in a practice field from child and family services, aged services, corrective services, disability services, or services to young people.

Refer to the Bachelor of Arts (HH01) and Bachelor of Human Services (HH02) entries for further details.

**Course Structure**

**Year 1, Semester 1**
BA Skills Unit (HHB116 Applied Skills & Scholarship OR HHB117 Introduction to Social Research Methods
Introductory Unit Professional Major BA
Introductory Unit 2nd Professional Major OR Introductory Unit Disciplinary Major BA
HHB114 Introduction To Human Rights And Ethics

Bachelor of Social Science HH03

Award title: Bachelor of Social Science
CRICOS code: 001819D
Campus: Carseldine
Duration: 3 years full-time or 6 years part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Hossein Adibi

Course Requirements

Students are required to complete the first year program as follows:
- HHB116 Applied Skills and Scholarship
- Two Foundation Units
- Two to three Introductory Units
- Two to three Elective Units

Students are REQUIRED to complete (over their entire course):
- 6 Social Science Skills Units
- 1 (7 unit) Primary Major

Students must ENSURE that:
- They maintain a 50% enrolment in the units that are HHB-coded until they have completed eight units;
- That a minimum of 12 of the total of 24 course units must be chosen from units that are HHB-coded.

Students who enter the course with advanced standing should discuss their enrolment with the Course Coordinator.

Part-time Students - Year 1

During their first year, part-time students normally enrol in four units.

Example of Course Structure for Full-time Students

Year 1, Semester 1
- Foundation Unit (List A)
- Course Foundation Unit or HHB116
- Course Foundation Unit (Primary Major) (List B)
- Elective Unit

Year 1, Semester 2
- Foundation Unit (List A)
- Course Foundation Unit or HHB116
- Course Foundation Unit (Secondary Major) (List C or other Faculty)
- Elective Unit

Year 2, Semester 1

Bachelor of Social Science HH04

Award title: Bachelor of Social Science
CRICOS code: 001819D
Campus: Carseldine and Caboolture
Duration: 3 years; Caboolture campus: After the completion of first year (ie 96 credit points of study), students must transfer to Carseldine campus for the remainder of the course. full-time or 6 years; Caboolture campus: After the completion of first year (ie 96 credit points of study), students must transfer to Carseldine campus for the remainder of the course. part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Hossein Adibi

Course Requirements
The Bachelor of Social Science consists of 24 units of study.
You are REQUIRED to complete:
• One social science Major (7 units)
• Social science skills units (6 units)
You MAY also complete:
• an additional social science Major (7 units)
• a social science Minor (4 units)
• a foreign language (4-6 units)
• a co-major in another QUT course (up to 8 units)
• a work-based Internship (2 units)
• a social science project (2 units)

First Year at Caboolture
By including the Caboolture option on your QTAC application, you have the opportunity to take the first year of the Bachelor of Social Science at QUT's Caboolture campus. After completing first year (or 96 credit points), you must then continue with the remainder of the course at the Carseldine campus.
It should be noted that credit/advanced standing will not be granted for Caboolture students - excluding START QUT studies. To receive credit, applicants must apply for the course offered at the Carseldine Campus.

Minors
All the social science majors can also be taken as four-unit minors.
Note also that all QUT faculties offer agreed sets of units as ‘university minors’.

Social Science Skills Units
Students choose a minimum of six units from the following options (with advice that they do a maximum of three at first year level)

First Year Units
HHB113 Interpersonal Communication
HHB116 Applied Skills And Scholarship
HHB117 Introduction To Social Research Methods
HHB121 Interpreting The Past
BSB113 Economics
PYB110 Psychological Research Methods
HHB213 Social Policy Processes
HHB214 Team Practice and Group Processes
HHB215 Crisis And Conflict Resolution
HHB217 Conflict Management Skills for Professionals
HHB220 Intervention Theories And Methods
HHB221 Intervention Processes And Ethics
HHB224 Qualitative Research Methods
HHB225 Islamic And Islamic Societies
HHB226 Public And Professional Ethics
HHB227 Indigenous Knowledge: Research Ethics and Protocols

Third Year Units
HHB312 Geographical Research Design
HHB316 Social Science Project

Major Electives

Sociology Major
Introductory Unit: HHB104 Understanding Society: Intro. To Sociology
Students must complete the Introductory Unit plus six Sociology units from the following:
HHB216 The Human Dimensions Of Space
HHB224 Qualitative Research Methods
HHB223 Islam and Islamic Societies
HHB225 Political Sociology
HHB226 Consuming Cultures
HHB231 Health, Society And Environment
HHB232 Survey Methods
HHB233 Sex, Gender And Society
HHB234 Sociological Theory
HHB236 Virgins, Saints And Sinners: Sociology Of Religion
HHB240 Sociology Of Crime And Deviance
HHB335 Bodies, Cyborgs and Cyberspace
HHB340 Globalisation And Social Theory

Politics and History Major
Introductory Unit (Politics): HHB112 Australian Politics
Introductory Unit (History): HHB109 Australian Historical Studies
Students must complete the Introductory Unit plus six Politics/History units from the following:

Politics Units
HHB213 Social Policy Processes
HHB224 Qualitative Research Methods
HHB225 Political Sociology
HHB230 Political Behaviour
HHB232 Survey Methods
HHB249 Social Movements In Australia
HHB255 Indigenous Politics And Political Culture
HHB262 Political Ideologies

HHB263 Politics Of Globalisation
HHB265 The Just Society

History Units
HHB121 Interpreting The Past
HHB122 Colonialism And Independence In Asia Pacific
HHB237 Brisbane in the Twentieth Century
HHB238 Asian Cultures And Societies
HHB239 Korean Culture And Societies
HHB242 Pacific Culture Contact
HHB243 The Pacific Since 1945
HHB245 Australia And The South Pacific
HHB246 Modern China
HHB248 The USA and The Asia Pacific Region
HHB253 Conspiracy And Dissent In Australian History
HHB256 Europe Since 1945
HHB257 The Classical World
HHB258 Foundations of Modern Europe
HHB259 War And Revolution In Europe 1914-1945
HHB261 Medieval Europe
HHB260 Nations And Nationalism In Modern Europe
HHB311 Colonial Fantasies And Postcolonial Identities
HHB315 Sex And Drugs In South-East Asia

Geography and Environment Major
Introductory Unit; HHB107 World Regions
Students must complete the Introductory Unit plus six Geography and Environment units from the following:
HHB127 Environment And Society
HHB228 Environmental Hazards
HHB229 Windows On Japan
HHB244 Southeast Asia In Focus
HHB250 Australian Geographical Studies
HHB251 Australian Resource Management
HHB269 Ethics, Technology And The Environment
HHB312 Geographical Research Design
NRB100 Environmental Science
NRB501 Spatial Analysis of Environmental Systems
PSB443 Population and Urban Studies
PSB631 Geographic Information Systems 1
PSB655 Remote Sensing

Indigenous Perspectives and Issues Major
Introductory Unit: HHB123 Indigenous Australian Culture Studies
Students must complete the Introductory Unit plus six Indigenous Perspectives and Issues units from the following:
HHB210 Indigenous Australia: Country, Kin And Culture
HHB255 Indigenous Politics And Political Culture
HHB276 Indigenous Knowledge: Research Ethics and Protocols
EDB007 Culture Studies: Indigenous Education
JSB135 Unlocking Criminal Justice
JSB137 Politics of Law
JSB352 Indigenous Justice

Human Services and Social Policy
Introductory Unit: HHB103 Contemporary Social And Community Issues
Students must complete the Introductory Unit plus six Human Services and Social Policy units from the following list
HHB100 Introduction To Human Services
HHB113 Interpersonal Communication
HHB200 Working In Human Service Organisations
HHB203 Aged Services: Introduction
HHB204 Child And Family Services: Introduction
HHB205 Corrective Services: Introduction
HHB206 Disability Services: Introduction
HHB207 Services To Young People: Introduction
HHB210 Indigenous Australia: Country, Kin And Culture
HHB211 Casework And Case Management
HHB212 Community Work
HHB213 Social Policy Processes
HHB214 Team Practice and Group Processes

First Year Caboolture
Year 1, Semester 1
HHB116 Applied Skills And Scholarship
HHB106 Australian Society And Culture
Elective

OR Elective Unit (preferably from List A)

Year 1, Semester 2
HHB100 Introduction To Human Services
HHB113 Interpersonal Communication
HHB102 The Human Condition
HHB114 Introduction To Human Rights And Ethics
OR Elective Unit (preferably from List A) NOTE: HHB114 must be selected in either Semester 1 or 2.

Year 2, Semester 1
HHB220 Intervention Theories And Methods
HHB201 Initial Professional Practice
One unit from List B (Introductory Service Units)

Bachelor of Social Science (Human Services) HH02

Award title: Bachelor of Social Science (Human Services)
CRICOS code: 001819D
Campus: Caboolture

Professional Membership
Graduates are entitled to apply for membership of the Australian Institute of Welfare and Community Workers.

Full-time Course Structure
Year 1, Semester 1
HHB116 Applied Skills And Scholarship
HHB103 Contemporary Social and Community Issues
HHB104 Understanding Society: Intro To Sociology
HHB114 Introduction To Human Rights And Ethics
OR Elective Unit (preferably from List A)

Year 1, Semester 2
HHB100 Introduction To Human Services
HHB113 Interpersonal Communication
HHB102 The Human Condition
HHB114 Introduction To Human Rights And Ethics
OR Elective Unit (preferably from List A) NOTE: HHB114 must be selected in either Semester 1 or 2.

Year 2, Semester 1
HHB220 Intervention Theories And Methods
HHB201 Initial Professional Practice
One unit from List B (Introductory Service Units)
Year 2, Semester 2
HHB200 Working In Human Service Organisations
HHB221 Intervention Processes And Ethics
HHB222 Human Service Practice: Legal Dimension
One unit from List C (Professional Skills Units)

Year 3, Semester 1
One unit from List C (Professional Skills Units)
One unit from List D (Advanced Service Units)
One unit from Lists B or C
Any other elective unit

Year 3, Semester 2
HHB300 Current Developments In Human Services
HHB301 Advanced Professional Practice

Electives (Lists A-D)
List A - Elective Units
HHB105 Exploring Change
HHB106 Australian Society And Culture
HHB110 Introduction To International And Global Studies
HHB111 Issues In International And Global Studies
HHB112 Australian Politics
HHB115 Human Identity And Change
HHB210 Indigenous Australia: Country, Kin And Culture

List B - Introductory Service Contexts Units
(Available Semester 1 only)
HHB203 Aged Services: Introduction
HHB204 Child And Family Services: Introduction
HHB205 Corrective Services: Introduction
HHB206 Disability Services: Introduction
HHB207 Services To Young People: Introduction

List C - Professional Skills Units
HHB211 Introduction To Social Research Methods
HHB210 Indigenous Australia: Country, Kin And Culture
HHB211 Casework And Case Management
HHB212 Community Work
HHB213 Social Policy Processes
HHB214 Team Practice and Group Processes
HHB215 Crisis And Conflict Resolution
HHB216 The Human Dimensions Of Space
HHB319 Child Protection Intervention Skills

List D - Advanced Service Contexts Units (Available Semester 1 only)
HHB303 Aged Services: Advanced
HHB304 Child And Family Services: Advanced
HHB305 Corrective Services: Advanced
HHB306 Disability Services: Advanced
HHB307 Services To Young People: Advanced

Part-time Course Structure
Students wishing to study on a part-time basis should consult the timetable and the course coordinator before selecting an enrolment program

NOTE:
It may not be possible to undertake all units in the evening.

OVERVIEW

QUT's Faculty of Information Technology is one of the leading providers of information technology courses in Australia. The Faculty is also well known internationally for research excellence in five key areas:

- Complex Systems Engineering
- Security and Trust
- Business Process Management
- Social Technical Systems
- Human Centred Smart Systems.

The Faculty is located at QUT's inner-city Gardens Point campus and also offers courses at the University’s north campus in Brisbane—Carseldine.

The Faculty comprises two schools:

- School of Information Systems
- School of Software Engineering and Data Communications.

QUT benefits from close linkages with industry in our education and research activities. Industry representatives actively contribute to the development and continual refinement of our course offerings, collaborate on multiple research projects with the University, and utilise our expertise through consulting engagements. The Faculty of Information Technology coordinates a very successful student internship program—the Cooperative Education Program—with its industry and government partners. This program offers high achieving IT students the option of completing 10-12 months paid professional experience in the workforce.

The Faculty has almost 3000 students, with a third being international students from some 54 countries. Our courses are geared to develop graduates who can face today’s challenges and also tackle an unimaginable future with confidence and innovation.

Students are attracted to QUT’s focus on real-world experience which involves practical teaching in addition to leadership in applied research that directly benefits industry and the professions. Our lecturers are real-world professionals with years of relevant experience in a variety of industry sectors.

The Faculty draws on the talents of academic staff from diverse backgrounds allowing a dynamic exchange of culture, knowledge and expertise.

SENIOR STAFF

Faculty Office

Executive Dean: Professor S.M. Kaplan, BSc PhD Cape Town, FACS, HonFIEAust, MACM, MIEEE

Assistant Dean (Research): Professor B. Pham, BSc(Hons) PhD Tas, DipEd Monash, ACM, IEEE, ACSA, APRS

Assistant Dean (Teaching and Learning): Associate Professor C. Bruce, BA Qld, GradDipLibSc MEd(Res) QUT, PhD UNE

Assistant Dean (External Relations): M.G. Roggenkamp, BED James Cook, DipCompSc MScSt Qld, MACS, MACM, AIEEE

Assistant Dean (Strategy and Innovation): Professor W. Caelli, BSc(Hons) Newcastle (NSW), PhD ANU, FACS, FTICA, MIEEE

Director, Business Development and International: E. Armstrong, BCom Griff, MCom(IntSys) Qld

Director, Postgraduate Studies: H.H. Bentley, CertED Exe, BSc(Hons) ManC, MSc Qld, MACS, MACM

Director, Undergraduate Studies: R. Christie, Dip Teach NCAE, BA(Maths) DipCompSc UNE, MAppSc QUT

Administration Manager: P. Smith, BBus(Com) Grad-CertEd(HigherEd) QUT

School of Information Systems

Head: Dr A.B. Tickle, BSc DipCompSc MSc Qld, Grad-DipMgt CQU, PhD QUT

Deputy Head: Dr J. Reye, BSc(Hons) Qld, PhD Griff

Professors:

P. Bruza, BSc Qld, MSc KUN, PhD KUN
G.G. Gable, DipCompSys NAIT, BCom Alta, MBA W Ontario, PhD Brad, ACS, AIR, IRMA
M. Rosemann, MBA PhD Univ of Münster Germany
A. Spink, BA ANU, DipLib UNSW, MBA Fordham Univ NY, PhD Rutgers Univ New Jersey

Associate Professors:

G. Stewart, BA DipEd MLitt (CompSci) Qld, PhD QUT, FACS, PCP, AIMM, MIEEE, MACM
A. ter Hofstede, MSc PhD KUN

School of Software Engineering and Data Communications

Head: Professor M. Looi, BEng(Hons) BAppSc PhD QUT, MIEEE, MACS, CDec

Deputy Head: Associate Professor P. Roe, MEng(Hons) York, PhD Glas, MACM

Professors:

C. Boyd, BSc, PhD Warwick, CMath
E. Dawson, BSc DipEd Wash, MA Syd, MLittStu MSc Qld, PhD QUT, FTICA, MIEEE, MCMSA, MACR, MACS
C. Fidge, BAppSc RMIT, MAppSc RMI, PhD ANU
K. Raymond, BSc BSc(Hons) PhD Qld

Adjunct Professors:

D. Longley, BSc(Physics)(Hons) ManC, MSc(Tech) UMIST, PhD Leic, CEng, FIEE, FAIM
G. Mohay, BSc(Hons) W Aust, PhD Monash

Associate Professors:

A. Josang, BSc Telematics Newcastle, MSc Security Univ of London, PhD NTNU
J. Sitte, PhD Uppsala, SIEEE

RESEARCH CENTRE

Information Security Institute (ISI)

The Information Security Institute (ISI) is a collaborative research undertaking of the Faculty of Built Environment and Engineering (BEE), the Faculty of Business (BUS), the Faculty of Information Technology (IT), and the Faculty of Law (LAW). The ISI has been established to pursue multi-disciplinary research in technology, legal, policy and governance issues related to information security. The ISI undertakes research in eight broad research domains: Cryptology, E-Business and E-Government, Governance and Information Protection, Trusted Systems and Network Security, Computer Intrusion, Forensics and Evidence, Technology, Law and Policy, Biometric Person Authentication, and Social and Behavioural Issues.
Research Director: Professor E. Dawson, BSc DipEd Wash, MA Syd, MLitStu MSc Qld, PhD QUT, FTICA, MIEEE, MCMSA, MIACR Phone: +61 7 3138 9551 Email: e.dawson@qut.edu.au

General Manager, Director Business Development: Mr Eric Hall Phone: +61 7 3138 9547 Email: eric.hall@qut.edu.au
Master of Information Management IT70

Award title: Master of Information Management
CRICOS code: 053705F
Campus: Gardens Point
Duration: 3 semesters full-time or 6 semesters part-time
Credit points: 144
Course coordinator: Dr Gillian Hallam

Course Structure
To graduate from the Master of Information Management (IT70) students are required to complete the 12 units (10 compulsory and 2 electives).

To exit the Masters course with a Graduate Diploma in Information Management (IT72) students are required to complete the eight specified units.

In addition, there are four Graduate Certificate in Information Management programs available. Students are required to complete four specified units to graduate.

Professional Recognition
Course recognition will be sought from the Australian Library and Information Association (ALIA) for the Master of Information Management. Recognition will also be sought from the Records Management Association Australia for both the Graduate Diploma and the Master of Information Management.

Full-time Course Structure

**Year 1, Semester 1**
- ITN200 Database Systems
- ITN201 Enterprise Architecture
- ITN273 Information Retrieval
- ITN274 Management Issues for Info Professionals

**Year 1, Semester 2**
- ITN275 Information Organisation
- ITN276 Information Services
- ITN266 Information Management
- Specialisation Unit 1

**Year 2, Semester 1**
- ITN278 Web Content Reliability
- ITN279 Information Literacy Education
- ITN280 Professional Practice
- Specialisation Unit 2

Students who choose to undertake ITS010 Cooperative Education Program substitute for ITN280. Specialisations (select two (2) units from a specialisation)

Part-time Course Structure

**Year 1, Semester 1**
- ITN200 Database Systems
- ITN273 Information Retrieval

**Year 1, Semester 2**
- ITN201 Enterprise Architecture
- ITN266 Information Management

**Year 2, Semester 1**
- ITN274 Management Issues for Info Professionals
- Specialisation Unit 1

**Year 2, Semester 2**
- ITN275 Information Organisation
- ITN276 Information Services

**Year 3, Semester 1**
- ITN278 Web Content Reliability
- ITN279 Information Literacy Education

**Year 3, Semester 2**
- ITN280 Professional Practice
- Specialisation Unit 2

Students who choose to undertake ITS010 Cooperative Education Program substitutes for ITN280. Specialisations (select two (2) units from a specialisation)

Library Studies
- ITN315 Information Management Project
- ITN316 Digital Library Systems
- ITN317 Advanced Information Services
- ITN318 Information Organisation 2
- ITN320 Law Library Management
- ITN321 Law Librarianship - Legal Research
- ITN330 Information Issues and Values
- CLN601 Cyberlearning: Information & Knowledge in the Digital Age
- CLN603 Designing Spaces for Learning
- CLN647 Youth, Popular Culture, and Texts
- EDB007 Culture Studies: Indigenous Education
- HHB123 Indigenous Australian Culture Studies
- SPN624 Adult and Professional Learning

Information and Knowledge Management
- ITN255 Knowledge Management
- ITN315 Information Management Project
- SPN621 Adult and Workplace Education: Principles And Practices

Records Management
- ITN315 Information Management Project
- ITN319 Records Systems

Web Management
- ITN007 Web Development
- ITN239 Enterprise Data Mining
- ITN315 Information Management Project

Specialisation Lists
Specialisations (select two (2) units from a specialisation)

Library Studies
- ITN315 Information Management Project
- ITN316 Digital Library Systems
- ITN317 Advanced Information Services
- ITN318 Information Organisation 2
- ITN330 Information Issues and Values

- ITN319 Records Systems

Web Management
- ITN007 Web Development
- ITN239 Enterprise Data Mining
- ITN295 XML: Data and Document Processing
- ITN315 Information Management Project
Award title: Master of Information Technology (Advanced)
CRICOS code: 053123F
Campus: Gardens Point
Duration: 2 years (4 semesters) full-time or 4 years (8 semesters) part-time
Credit points: 192 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Hamish Bentley

Course Structure
To graduate from the Master of Information Technology (Advanced) students are required to complete 16 units, consisting of:
- 1 x Compulsory Unit - ITN272 IT Project Management
- a maximum of 4 Intermediate Units
- a minimum of 7 Advanced Level 1 Units
- a minimum of 1 Advanced Level 2 Units; and
- a maximum of 3 x PG level Elective Units selected from outside the Faculty, in consultation with the Course Coordinator

Advanced Level 1 Units
ITN220 Major Issues in Information Systems
ITN233 Enterprise Systems Applications
ITN237 Advanced Databases
ITN239 Enterprise Data Mining
ITN245 R/3 Systems Administration
ITN254 Interactivity Design
ITN255 Knowledge Management
ITN257 Multimedia Systems
ITN260 E-Commerce Site Development
ITN264 Information Systems Consulting
ITN267 Business Analytics
ITN272 Information Technology Project Management
ITN293 Java for E-Commerce Applications
ITN297 Web Site Design
ITN298 Process Engineering
ITN341 Strategic Information and Knowledge Management
ITN713 Advanced Java Programming
ITN715 Web Services
ITN716 Advanced Web Applications Development
ITN717 Enterprise Software Architecture
ITN722 Network Planning and Deployment
ITN723 Wireless and Mobile Networks
ITN731 Security Technologies
ITN733 Network Security
ITN741 Information Retrieval Technology
ITN742 Computational Intelligence
ITN746 Modelling and Animation Techniques
ITN748 Configurable Computing
ITN341 Strategic Information and Knowledge Management
ITS702 Ccna 3 & 4: Switching and Wide Area Networking
ITS703 Ccnp 1: Advanced Routing
ITS704 Ccnp 2: Remote Access Networks
ITS705 Ccnp 3: Multilayer Switching
ITS706 Ccnp 4: Network Troubleshooting
ITS707-1 Securing Cisco Hardware
Project - 12 and 24 credit points (See Project Units for codes)

Advanced Level 2 Units
ITN100 Introduction to Research
ITN232 Database Management
ITN235 Distributed Object Information Systems
ITN253 Case Studies In Enterprise Systems
ITN259 Advanced Multimedia Systems
ITN269 Special Topic 2B
ITN299 Workflow Management
ITN747 Real Time Rendering Techniques
ITN761 SEDC Special Topic 1
ITN765 SEDC Special Topic 5
ITN770 Internationalisation of Software
ITN771 Advanced Network Management
ITN773 Trusted Systems
ITN774 Computer Forensics
Project - 48 credit points (See Project Units for codes)

Project Units
Students in the Masters may complete a maximum of 48 credit points in project units. Students in the Graduate Diploma may complete a maximum of 24 credit points in project units. Advanced Level 1 project units are 12 and 24 credit points. Advanced Level 2 units are 48 credit points.

ITN246 Minor Project 1 (IS)
ITN248 Minor Project 2 (IS)
ITN162 Project (IS)
ITN172 Project (IS) (Part-time)
ITN142 Major Project (IS) Full-Time
ITN791 Minor Project 1 (SEDC)
ITN792 Minor Project 2 (SEDC)
ITN793 Project (SEDC)
ITN794-1 Project (SEDC) PT
ITN794-2 Project (SEDC) PT
ITN795 Major Project (SEDC)
ITN796-1 Major Project (SEDC) PT
ITN796-2 Major Project (SEDC) PT
ITN152-1 Major Project (IS) Part Time
ITN152-2 Major Project (IS) Part Time
ITN172-1 Project (IS) Part Time
ITN172-2 Project (IS) Part Time

Intermediate Level Units
With the approval of the Course Coordinator, students seeking skills in a new IT specialisation can select up to two (2) units from the following list of units.

ITN007 Web Development
ITN218 Applications Programming
ITN222 Business Systems Analysis and Design
ITN223 Software Development with Oracle
ITN228 Enterprise Systems
ITN229 Database Design
ITN241 Information Technology Management
ITN266 Information Management
ITN294 Information Quality
ITN295 XML: Data and Document Processing
ITN296 Information Systems Theory and Applications
ITN322 Information Resources
ITN330 Information Issues and Values
ITN710 Fundamentals of Computer Science
ITN711 Programming Abstraction
ITN712 Software Engineering Principles
ITN720 Internet Protocols and Services
ITN721 Computer Network Administration
ITN730 Information Security Fundamentals
ITN732 Cryptology and Protocols
ITN740 Agent Based Software Engineering
ITN743 Artificial Intelligence
ITN744 Computer Architecture
ITN745 Operating Systems
ITN749 Scientific Programming
ITS701 Ccna 1 & 2: Internetworking and Routing Basics

- Master of Information Technology (IT Graduates) IT40

Award title: Master of Information Technology (Study Area A)
Advanced Level 1 Units
ITN220 Major Issues in Information Systems
ITN233 Enterprise Systems Applications
ITN237 Advanced Databases
ITN239 Enterprise Data Mining
ITN245 R/3 Systems Administration

- Master of Information Technology (Non-IT Graduates) IT45

**Award title:** Master of Information Technology  
**CRICOS code:** 003776E  
**Campus:** Gardens Point  
**Duration:** 3 semesters full-time or 6 semesters part-time  
**Credit points:** 144  
**Course coordinator:** Hamish Bentley

**Course Structure**

To graduate from the Master of Information Technology (IT45) students are required to complete 12 units, including:

- 1 x Compulsory Unit - ITN272 IT Project Management
- a minimum of 3 x Basic Level Units
- a minimum of 3 x Advanced Level 1 Units

To exit the Masters course with a Graduate Diploma in Information Technology (IT38), students are required to have completed 8 units, including:

- 1 x Compulsory Unit - ITN272 IT Project Management
- a minimum of 3 x Basic Level Units
- 4 x chosen from Intermediate or Advanced Level 1 Units

**Compulsory Unit**

ITN272 Information Technology Project Management

* For students who commenced Semester 2, 2006 or later

**Basic Level Units**

ITN200 Database Systems  
ITN201 Enterprise Architecture  
ITN700 Programming Principles  
OR  
ITB001 Problem Solving and Programming  
ITN701 Networks and Systems

**Intermediate Level Units**

ITN007 Web Development  
ITN218 Applications Programming  
ITN222 Business Systems Analysis and Design  
ITN223 Software Development with Oracle  
ITN228 Enterprise Systems

- Master of Information Technology (Research) IT60

**Award title:** Master of Information Technology (Research)  
**CRICOS code:** 020309B  
**Campus:** Gardens Point  
**Duration:** 1.5 years or 3 semesters full-time or 3 years or 6 semesters part-time  
**Credit points:** 144  
**Course coordinator:** Associate Professor Colin Boyd

**Course Structure**

The length of the program is generally expected to be one-and-a-half years if the candidate enrols as a full time student (including six months of provisional registration) and three years for part time (including one year of provisional registration).

Students with second class Honours division A (or better) in an information technology-related course will normally be enrolled in the Master of Information Technology (Research) and complete the degree in one year full-time.

Assessment for the award of Masters by Research is based on a program of supervised research and investigation, culminating in a thesis. Programs may include some coursework in support of the conduct of research and preparation of the thesis. Candidates are required to have regular interaction with supervisors and to participate in scholarly activities such as research seminars and publication.

**Course Structure**

**Full-time Course Structure**

A program of research and investigation developed in conjunction with the Principal Supervisor and approved by the Faculty Research Committee (Workload equivalent to 48 credit points per semester)
### Part-time Course Structure
A program of research and investigation developed in conjunction with the Principal Supervisor and approved by the Faculty Research Committee (Workload equivalent to 24 credit points per semester)

#### Graduate Diploma in Information Technology (IT Graduates) IT35

**Award title:** Graduate Diploma in Information Technology (Study Area A)

**CRICOS code:** 018771J

**Campus:** Gardens Point

**Duration:** 1 years full-time or 2 years part-time

**Credit points:** 96

**Course coordinator:** Hamish Bentley

#### Course Structure
To graduate from the Graduate Diploma in IT, students are required to have completed 8 units, including:
- 1 x Compulsory Unit - ITN272 IT Project Management
- a minimum of 5 x Advanced Level 1 Units
- a minimum of 1 x Advanced Level 2 Units

Students may also gain credit for one or more graduate certificate awards while completing the Grad Dip or Masters program.

#### Articulation
Students who successfully complete the Graduate Diploma (96 credit points) are eligible for admission to the Masters and are only required to undertake an additional four units to meet the requirements for the Masters degree.

#### Advanced Level 1 Units
- ITN220 Major Issues in Information Systems
- ITN233 Enterprise Systems Applications
- ITN237 Advanced Databases
- ITN239 Enterprise Data Mining
- ITN245 R/3 Systems Administration
- ITN254 Interactivity Design
- ITN255 Knowledge Management
- ITN257 Multimedia Systems
- ITN260 E-Commerce Site Development
- ITN264 Information Systems Consulting
- ITN267 Business Analytics
- ITN272 Information Technology Project Management
- ITN293 Java for E-Commerce Applications
- ITN297 Web Site Design
- ITN298 Process Engineering
- ITN341 Strategic Information and Knowledge Management
- ITN713 Advanced Java Programming
- ITN715 Web Services
- ITN716 Advanced Web Applications Development
- ITN717 Enterprise Software Architecture
- ITN722 Network Planning and Deployment
- ITN723 Wireless and Mobile Networks
- ITN731 Security Technologies
- ITN733 Network Security
- ITN741 Information Retrieval Technology
- ITN742 Computational Intelligence
- ITN746 Modelling and Animation Techniques
- ITN748 Configurable Computing
- ITN341 Strategic Information and Knowledge Management
- ITS702 CCNA 3 & 4: Switching and Wide Area Networking
- ITS703 CCNP 1: Advanced Routing
- ITS704 CCNP 2: Remote Access Networks
- ITS705 CCNP 3: Multi-layer Switching
- ITS706 CCNP 4: Network Troubleshooting
- ITS707-1 Securing Cisco Hardware

**Project:** 12 and 24 credit points (See Project Units for codes)

#### Advanced Level 2 Units
- ITN100 Introduction to Research
- ITN232 Database Management
- ITN235 Distributed Object Information Systems
- ITN253 Case Studies In Enterprise Systems
- ITN259 Advanced Multimedia Systems
- ITN269 Special Topic 2B
- ITN299 Workflow Management
- ITN747 Real Time Rendering Techniques
- ITN761 SEDC Special Topic 1
- ITN765 SEDC Special Topic 5
- ITN770 Internationalisation of Software
- ITN771 Advanced Network Management
- ITN773 Trusted Systems
- ITN774 Computer Forensics

**Project:** 48 credit points (See Project Units for codes)

**Project Units**
- Students in the Masters may complete a maximum of 48 credit points in project units. Students in the Graduate Diploma may complete a maximum of 24 credit points in project units. Advanced Level 1 project units are 12 and 24 credit points. Advanced Level 2 units are 48 credit points.

- ITN246 Minor Project 1 (IS)
- ITN248 Minor Project 2 (IS)
- ITN162 Project (IS)
- ITN172 Project (IS) (Part-time)
- ITN142 Major Project (IS) Full-Time
- ITN791 Minor Project 1 (SEDC)
- ITN792 Minor Project 2 (SEDC)
- ITN793 Project (SEDC)
- ITN794-1 Project (SEDC) PT
- ITN794-2 Project (SEDC) PT
- ITN795 Major Project (SEDC)
- ITN796-1 Major Project (SEDC) PT
- ITN796-2 Major Project (SEDC) PT
- ITN152-1 Major Project (IS) Part Time
- ITN152-2 Major Project (IS) Part Time
- ITN172-1 Project (IS) Part Time
- ITN172-2 Project (IS) Part Time

#### Intermediate Level Units
With the approval of the Course Coordinator, students seeking skills in a new IT specialisation can select up to two (2) units from the following list of units.

- ITN007 Web Development
- ITN218 Applications Programming
- ITN222 Business Systems Analysis and Design
- ITN223 Software Development with Oracle
- ITN228 Enterprise Systems
- ITN229 Database Design
- ITN241 Information Technology Management
- ITN266 Information Management
- ITN294 Information Quality
- ITN295 XML: Data and Document Processing
- ITN296 Information Systems Theory and Applications
- ITN322 Information Resources
- ITN330 Information Issues and Values
Graduate Diploma in Information Technology (Non-IT Graduates) IT38

Award title: Graduate Diploma in Information Technology
CRICOS code: 018771J
Campus: Gardens Point
Duration: 2 semesters full-time or 4 semesters part-time
Credit points: 96
Course coordinator: Hamish Bentley

Course Structure
To graduate with a Graduate Diploma in Information Technology (IT38), students are required to have completed 8 units, including:

- 1 x Compulsory Unit - ITN272 Information Technology Project Management
- a Minimum of 3 x Basic Level Units
- 4 x Chosen from Intermediate or Advanced Level 1 Units

Compulsory Unit*
ITN272 Information Technology Project Management
* For students who commenced Semester 2, 2006 or later

Basic Level Units
ITN200 Database Systems
ITN201 Enterprise Architecture
ITN700 Programming Principles
OR
ITB001 Problem Solving and Programming
ITN701 Networks and Systems

Intermediate Level Units
ITN007 Web Development
ITN218 Applications Programming
ITN222 Business Systems Analysis and Design
ITN223 Software Development with Oracle
ITN228 Enterprise Systems
ITN229 Database Design
ITN241 Information Technology Management
ITN266 Information Management
ITN294 Information Quality
ITN295 XML: Data and Document Processing
ITN296 Information Systems Theory and Applications
ITN322 Information Resources
ITN330 Information Issues and Values
ITN710 Fundamentals of Computer Science
ITN711 Programming Abstraction
ITN712 Software Engineering Principles
ITN720 Internet Protocols and Services
ITN730 Information Security Fundamentals
ITN731 Computer Network Administration
ITN732 Cryptology and Protocols
ITN740 Agent Based Software Engineering
ITN743 Artificial Intelligence
ITN744 Computer Architecture
ITN745 Operating Systems
ITN749 Scientific Programming

Advanced Level 1 units
ITN220 Major Issues in Information Systems
ITN233 Enterprise Systems Applications
ITN237 Advanced Databases
ITN239 Enterprise Data Mining
ITN245 R/3 Systems Administration
ITN254 Interactivity Design
ITN255 Knowledge Management
ITN257 Multimedia Systems
ITN260 E-Commerce Site Development
ITN267 Business Analytics
ITN272 Information Technology Project Management
ITN293 Java for E-Commerce Applications
ITN298 Process Engineering
ITN297 Web Site Design
ITN341 Strategic Information and Knowledge Management
ITN713 Advanced Java Programming
ITN715 Web Services
ITN716 Advanced Web Applications Development
ITN717 Enterprise Software Architecture
ITN722 Network Planning and Deployment
ITN723 Wireless and Mobile Networks
ITN731 Security Technologies
ITN733 Network Security
ITN741 Information Retrieval Technology
ITN742 Computational Intelligence
ITN746 Modelling and Animation Techniques
ITN748 Configurable Computing

Project Units
ITN246 Minor Project 1 (IS)
ITN248 Minor Project 2 (IS)
ITN791 Minor Project 1 (SEDC)
ITN792 Minor Project 2 (SEDC)

Graduate Certificate in Information Management (Information and Knowledge Management) IT74

Award title: Graduate Certificate in Information Management (Information and Knowledge Management)
Campus: Gardens Point
Duration: 2 semesters part-time
Credit points: 48
Course coordinator: Dr Gillian Hallam

Course Structure
Core Units
ITN255 Knowledge Management
SPN621 Adult and Workplace Education: Principles And Practices
ITN315 Information Management Project
OR
ITN280 Professional Practice
Choose one unit from the following
ITN201 Enterprise Architecture
ITN266 Information Management

Graduate Certificate in Information Management (Library Studies) IT73

Award title: Graduate Certificate in Information Management (Library Studies)
Campus: Gardens Point
Duration: 2 semesters part-time
Credit points: 48
Course coordinator: Dr Gillian Hallam
Course Structure
Core Units
ITN279 Information Literacy Education
ITN315 Information Management Project
OR
ITN280 Professional Practice
Choose two (2) units from the following:
ITN276 Information Services
ITN316 Digital Library Systems
ITN317 Advanced Information Services
ITN318 Information Organisation 2
ITN320 Law Library Management
ITN321 Law Librarianship - Legal Research
CLN601 Cyberlearning: Information & Knowledge in the Digital Age
CLN603 Designing Spaces for Learning
CLN647 Youth, Popular Culture, and Texts
EDB007 Culture Studies: Indigenous Education
SPN624 Adult and Professional Learning

Graduate Certificate in Information Management (Records Management) IT75

Award title: Graduate Certificate in Information Management (Records Management)
Campus: Gardens Point
Duration: 2 semesters part-time
Credit points: 48
Course coordinator: Dr Gillian Hallam

Course Structure
Core Units
ITN219 Records Systems
ITN266 Information Management
ITN280 Professional Practice
OR
ITN315 Information Management Project
Choose one unit from the following
ITN255 Knowledge Management
ITN200 Database Systems
ITN278 Web Content Reliability

Graduate Certificate in Information Management (Web Management) IT76

Award title: Graduate Certificate in Information Management (Web Management)
Campus: Gardens Point
Duration: 2 semesters part-time
Credit points: 48
Course coordinator: Dr Gillian Hallam

Course Structure
Core Units
ITN278 Web Content Management
ITN315 Information Management Project
OR
ITN280 Professional Practice
Choose two (2) units from the following
ITN007 Web Development
ITN201 Enterprise Architecture
ITN200 Database Systems
ITN295 XML: Data and Document Processing

Graduate Certificate in Information Technology (Component Software and Web Services) IT99

Award title: Graduate Certificate in Information Technology (Component Software and Web Services)
Campus: Gardens Point
Duration: 2 semesters or 26 weeks (based on completing 2 units/sem) part-time
Credit points: 48
Course coordinator: Hamish Bentley

Course Structure
Core Units
ITN220 Internet Protocols and Services
ITN221 Computer Network Administration
Select 2 units from the following
ITN223 Wireless and Mobile Networks
ITN771 Advanced Network Management
ITS701 Cosn 1 & 2: Internetworking and Routing Basics
ITS702 Cosn 3 & 4: Switching and Wide Area Networking
ITS703 Cosn 1: Advanced Routing
ITS704 Cosn 2: Remote Access Networks
ITS705 Cosn 3: Multi-layer Switching
ITS706 Cosn 4: Network Troubleshooting
ITS707-1 Securing Cisco Hardware

Graduate Certificate in Information Technology (Computer Networks) IT90

Award title: Graduate Certificate in Information Technology (Computer Networks)
Campus: Gardens Point
Duration: 2 semesters or 26 weeks (based on completing 2 units/sem) part-time
Credit points: 48
Course coordinator: Hamish Bentley

Course Structure
Core Units
ITN220 Internet Protocols and Services
ITN221 Computer Network Administration
Select 2 units from the following
ITN223 Wireless and Mobile Networks
ITN771 Advanced Network Management
ITS701 Cosn 1 & 2: Internetworking and Routing Basics
ITS702 Cosn 3 & 4: Switching and Wide Area Networking
ITS703 Cosn 1: Advanced Routing
ITS704 Cosn 2: Remote Access Networks
ITS705 Cosn 3: Multi-layer Switching
ITS706 Cosn 4: Network Troubleshooting
ITS707-1 Securing Cisco Hardware

Graduate Certificate in Information Technology (Enterprise Wide Software) IT93

Award title: Graduate Certificate in Information Technology (Enterprise Wide Software)
Campus: Gardens Point
Duration: 2 semesters or 26 weeks (based on completing 2 units/sem) part-time
Credit points: 48
Course coordinator: Hamish Bentley

Course Structure
Core Units
Four (4) units to be selected from the following
ITN220 Major Issues in Information Systems
ITN228 Enterprise Systems
ITN233 Enterprise Systems Applications
ITN245 R/3 Systems Administration
ITN253 Case Studies In Enterprise Systems
ITN298 Process Engineering

Graduate Certificate in Information Technology (Information Security) IT92
Award title: Graduate Certificate in Information Technology (Information Security)
Campus: Gardens Point
Duration: 2 semesters or 26 weeks (based on completing 2 units/sem) part-time
Credit points: 48
Course coordinator: Hamish Bentley

Course Structure
Four (4) units to be selected from the following
ITN730 Information Security Fundamentals
ITN731 Security Technologies
ITN732 Cryptology and Protocols
ITN733 Network Security
ITN765 SEDC Special Topic 5
ITN773 Trusted Systems

Graduate Certificate in Information Technology (Information Technology Management) IT96

Award title: Graduate Certificate in Information Technology (Information Technology Management)
Campus: Gardens Point
Duration: 2 semesters or 26 weeks (based on completing 2 units/sem) part-time
Credit points: 48
Course coordinator: Hamish Bentley

Course Structure
Four (4) units to be selected from the following
ITN220 Major Issues in Information Systems
ITN241 Information Technology Management
ITN255 Knowledge Management
ITN264 Information Systems Consulting
ITN266 Information Management
ITN272 Information Technology Project Management

Graduate Certificate in Information Technology (Multimedia) IT98

Award title: Graduate Certificate in Information Technology (Multimedia)
Campus: Gardens Point
Duration: 2 semesters or 26 weeks (based on completing 2 units/sem) part-time
Credit points: 48
Course coordinator: Hamish Bentley

Course Structure
Four (4) units to be selected from the following
ITN007 Web Development
ITN254 Interactivity Design
ITN257 Multimedia Systems
ITN259 Advanced Multimedia Systems
ITN295 XML: Data and Document Processing
ITN297 Web Site Design

Bachelor of Information Technology (Honours) IT28

Award title: Bachelor of Information Technology (Honours)
CRICOS code: 017323G
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96
Course coordinator: Dr Wayne Kelly

The "Accelerated" Honours Program

The 'Accelerated Honours' program has been structured to provide an incentive for high achieving Bachelor of Information Technology (IT21 or IT22) students to continue into the Faculty's Honours Program. See IT29 for further information.

Full-time Course Structure
Year 1, Semester 1
ITN100 Introduction to Research
ITN150-1 Honours Dissertation Elective

Year 1, Semester 2
ITN150-2 Honours Dissertation
ITN150-3 Honours Dissertation
ITN150-4 Honours Dissertation Elective

Year 2, Semester 1
ITN150-5 Honours Dissertation
Elective

Year 2, Semester 2
ITN150-6 Honours Dissertation
Elective

Part-time Course Structure
Year 1, Semester 1
ITN100 Introduction to Research
ITN150-1 Honours Dissertation Elective

Year 1, Semester 2
ITN150-2 Honours Dissertation
Elective

Year 2, Semester 1
ITN150-3 Honours Dissertation
Elective

Year 2, Semester 2
ITN150-4 Honours Dissertation
Elective

Elective Units - Students should choose from the list of advanced level postgraduate units. Normally units are undertaken in the area of the student's undergraduate major. Students wishing to enrol in a unit other than those listed should contact the Course Coordinator.

Full-time students should be aware many electives may be offered evenings only.

IT Honours Elective Units

Elective units should normally be chosen from the following list of approved honours electives. At least one of your three electives must be chosen from the list of Advanced Honours Electives. You may enrol in at most one unit not listed below (including units offered by other Faculties) if your supervisor submits a request to the course coordinator indicating that said unit will directly support your honours dissertation. Please note that many units are only offered once per year and many have prerequisite requirements, so you will need to carefully plan ahead. If you require assistance in selecting suitable units from the lists below, please discuss it with your supervisor and course coordinator as soon as possible.

Approved Honours Electives
ITN007 Web Development
ITN220 Major Issues in Information Systems
ITN233 Enterprise Systems Applications
ITN237 Advanced Databases
ITN239 Enterprise Data Mining
ITN241 Information Technology Management
ITN245 R/3 Systems Administration
ITN254 Interactivity Design
ITN255 Knowledge Management
ITN257 Multimedia Systems
ITN260 E-Commerce Site Development
ITN264 Information Systems Consulting
ITN267 Business Analytics
ITN272 Information Technology Project Management
ITN293 Java for E-Commerce Applications
ITN295 XML: Data and Document Processing
ITN297 Web Site Design
ITN298 Process Engineering
ITN710 Fundamentals of Computer Science
ITN713 Advanced Java Programming
ITN715 Web Services
ITN716 Advanced Web Applications Development
ITN717 Enterprise Software Architecture
ITN720 Internet Protocols and Services
ITN722 Network Planning and Deployment
ITN723 Wireless and Mobile Networks
ITN730 Information Security Fundamentals
ITN731 Security Technologies
ITN733 Network Security
ITN740 Agent Based Software Engineering
ITN741 Information Retrieval Technology
ITN742 Computational Intelligence
ITN744 Computer Architecture
ITN746 Modelling and Animation Techniques
ITN748 Configurable Computing
ITN749 Scientific Programming

Advanced Honours Electives
ITN232 Database Management
ITN235 Distributed Object Information Systems
ITN253 Case Studies In Enterprise Systems
ITN259 Advanced Multimedia Systems
ITN299 Workflow Management
ITN747 Real Time Rendering Techniques
ITN761 SEDC Special Topic 1
ITN765 SEDC Special Topic 5
ITN770 Internationalisation of Software
ITN771 Advanced Network Management
ITN773 Trusted Systems
ITN774 Computer Forensics

Bachelor of Information Technology (Honours) - Accelerated Program IT29

Award title: Bachelor of Information Technology (Honours)  
CRICOS code: 017323G
Campus: Gardens Point
Duration: 2 semesters full-time
Credit points: 96
Course coordinator: Dr Wayne Kelly

Course Structure

Year 3, Semester 1*
Elective
Year 3, Semester 2
ITN100 Introduction to Research
ITN150-1 Honours Dissertation
Elective
Year 3, Semester 3
ITN150-2 Honours Dissertation
ITN150-3 Honours Dissertation
ITN150-4 Honours Dissertation

* The first semester of the Accelerated Honours Program occurs in the final semester of the IT22 course (48 credit points remaining). This involves a concurrent enrolment with IT22 (36 credit points enrolment) and 12 credit points Honours elective undertaken within the IT29 course.

Please note: tuition fees normally apply for Summer enrolment. Deans Scholars should contact the IT22 Course Coordinator for further details.

Mid-year Entry

Year 3, Semester 2*
Elective
Year 3, Semester 3
ITN100 Introduction to Research
ITN150-1 Honours Dissertation
ITN150-2 Honours Dissertation

Year 4, Semester 1
ITN150-3 Honours Dissertation
ITN150-4 Honours Dissertation
Elective

Elective

* The first semester of the Accelerated Honours Program occurs in the final semester of the IT22 course (48 credit points remaining). This involves a concurrent enrolment with IT22 (36 credit points enrolment) and 12 credit points Honours elective undertaken within the IT29 course.

Elective Units - Students should choose from the list of advanced level postgraduate units. Normally units are undertaken in the area of the student's undergraduate major. Students wishing to enrol in a unit other than those listed should contact the Course Coordinator. Students should note that many electives might be offered in the evenings only.

IT Honours Elective Units

Elective units should normally be chosen from the following list of approved honours electives. At least one of your three electives must be chosen from the list of Advanced Honours Electives. You may enrol in at most one unit not listed below (including units offered by other Faculties) if your supervisor submits a request to the course coordinator indicating that said unit will directly support your honours dissertation. Please note that many units are only offered once per year and many have prerequisite requirements, so you will need to carefully plan ahead. If you require assistance in selecting suitable units from the lists below, please discuss it with your supervisor and course coordinator as soon as possible.

Approved Honours Electives

ITN007 Web Development
ITN220 Major Issues in Information Systems
ITN233 Enterprise Systems Applications
ITN237 Advanced Databases
ITN239 Enterprise Data Mining
ITN241 Information Technology Management
ITN245 R/3 Systems Administration
ITN254 Interactivity Design
ITN255 Knowledge Management
ITN257 Multimedia Systems
ITN260 E-Commerce Site Development
ITN264 Information Systems Consulting
ITN267 Business Analytics
ITN272 Information Technology Project Management
ITN293 Java for E-Commerce Applications
ITN295 XML: Data and Document Processing
ITN297 Web Site Design
### Bachelor of IT/Bachelor of IT (Honours) Dean’s Scholars Program IT22/IT29

**CRICOS code:** 012656E / 017323G  
**Campus:** Gardens Point  
**Duration:** 3 years full-time  
**Course coordinator:** Ruth Christie

#### Professional Recognition
As a graduate of the Dean's Scholars Program you will be qualified for professional accreditation and employment in fields relevant to your specialisation.

### Business Systems Engineering Major

#### Compulsory Units
- ITB222 Systems Analysis and Design  
- ITB228 Enterprise Systems  
- ITB298 Business Process Engineering  
- ITB292 Enterprise Architecture  
- ITB245 R/3 System Administration  
- ITB296 Information Systems Theory and Applications  

Note: Replace ITB292 with ITB245; Replace ITB296 with any ITB2xx or ITB3xx unit.

#### Elective Units
Select one (1) unit from the following list  
- ITB218 Applications Programming  
- ITB223 Software Development with ORACLE  
- ITB230 Project  
- ITB237 Advanced Databases  
- ITB267 Business Analytics  
- ITB272 Information Technology Project Management  
- ITB330 Information Issues and Policy  
- ITB293 Java for Electronic Commerce Applications

### Databases Major

#### Compulsory Units
- ITB229 Database Design  
- ITB232 Database Management  
- ITB239 Enterprise Data Mining  
- ITB295 XML: Data and Document Processing  
- ITB299 Workflow Management

#### Elective Units
Select one (1) unit from the following list  
- ITB218 Applications Programming  
- ITB223 Software Development with ORACLE  
- ITB230 Project  
- ITB237 Advanced Databases  
- ITB245 R/3 System Administration  
- ITB267 Business Analytics  
- ITB293 Java for Electronic Commerce Applications  
- ITB272 Information Technology Project Management  
- ITB330 Information Issues and Policy

### Electronic Business Major

#### Compulsory Units
- ITB233 Enterprise Systems Applications  
- ITB239 Enterprise Data Mining  
- ITB260 E-Commerce Site Development  
- BSB212 Electronic Business Applications  
- BSB213 Governance Issues in E-Business  
- BSB314 E-Business Intelligence

#### Games Technology Major

#### Compulsory Units
- ITB711 Programming Abstraction  
- ITB743 Artificial Intelligence  
- ITB746 Modelling and Animation Techniques  
- ITB747 Real Time Rendering Techniques  
- ITB749 Scientific Programming  
- MAB281 Mathematics for Computer Graphics

#### Information and Knowledge Management Major

#### Compulsory Units
- ITB266 Information Management  
- ITB294 Information Quality  
- ITB297 Web Site Design  
- ITB322 Information Resources  
- ITB341 Strategic Information and Knowledge Management  

Note: ITB297 is replaced with any ITB2xx or ITB3xx unit for semester 2, 2006  
Note: ITB341 is replaced with one unit from the following list for semester 2, 2006

- ITB264 Information Systems Consulting  
- ITB241 Information Technology Management  
- ITB272 Information Technology Project Management  
- ITB330 Information Issues and Policy

#### Elective Units
Select one (1) unit from the following list  
- ITB218 Applications Programming  
- ITB223 Software Development with ORACLE  
- ITB230 Project  
- ITB237 Advanced Databases  
- ITB245 R/3 System Administration  
- ITB267 Business Analytics  
- ITB293 Java for Electronic Commerce Applications  
- ITB330 Information Issues and Policy

### Information Systems Major

#### Compulsory Units
- ITB222 Systems Analysis and Design  
- ITB228 Enterprise Systems
ITB229 Database Design
ITB260 E-Commerce Site Development
ITB296 Information Systems Theory and Applications
Note: ITB296 is replaced with any ITB2.. or ITB3xx unit for semester 2, 2006

IS Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB230 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration
ITB267 Business Analytics
ITB272 Information Technology Project Management
ITB293 Java for Electronic Commerce Applications
ITB330 Information Issues and Policy

Information Technology Management Major

Compulsory Units
ITB222 Systems Analysis and Design
ITB241 Information Technology Management
ITB264 Information Systems Consulting
ITB272 Information Technology Project Management
ITB296 Information Systems Theory and Applications
Note: ITB296 is replaced with any ITB2xx or ITB3xx unit for semester 2, 2006

Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB230 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration
ITB267 Business Analytics
ITB272 Information Technology Project Management
ITB293 Java for Electronic Commerce Applications
ITB330 Information Issues and Policy

Intelligent Systems Major

Compulsory Units
ITB239 Enterprise Data Mining
ITB295 XML: Data and Document Processing
ITB740 Agent Based Software Engineering
ITB741 Information Retrieval Technology

Elective Units
Select two (2) units from the following list
ITB322 Information Resources
ITB710 Fundamentals of Computer Science
ITB715 Web Services
ITB742 Computational Intelligence
ITB743 Artificial Intelligence

Interactive Media Major

Compulsory Units
ITB254 Interactivity Design
ITB257 Multimedia Systems
ITB259 Advanced Multimedia Systems
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Elective Units
Select one (1) unit from the following list
KIB103 Media Technology 1
KIB105 Animation and Motion Graphics
KIB108 Animation Practices

Network Systems Major

Compulsory Units
ITB720 Internet Protocols and Services
ITB721 Unix Network Administration
ITB722 Network Planning and Deployment

Elective Units
Select three (3) units from the following list
ITB710 Fundamentals of Computer Science
ITB723 Wireless and Mobile Devices
ITB745 Operating Systems
ITS601 Networking and Routing Basics
OR
ITS701 CCNA 1 & 2: Internetworking and Routing Basics
ITS602 Switching and WAN Technologies
OR
ITS702 CCNA 3 & 4: Switching and Wide Area Networking

Security Major

Compulsory Units
ITB720 Internet Protocols and Services
ITB721 Unix Network Administration
ITB730 Information Security Fundamentals
ITB731 Security Technologies
ITB732 Cryptography and Protocols
ITB733 Network Security

Software Architecture Major

Compulsory Units
ITB229 Database Design
ITB295 XML: Data and Document Processing
ITB715 Web Services
ITB297 Web Site Design
ITB717 Enterprise Software Architecture

Web Services and Applications Major

Compulsory Units
ITB295 XML: Data and Document Processing
ITB715 Web Services
ITB297 Web Site Design
ITB717 Enterprise Software Architecture
ITB716 Advanced Web Applications Development
Note: ITB297 is replaced with ITB260 for semester 2, 2006

Bachelor of Information Technology IT21

Award title: Bachelor of Information Technology (Study Area A)
CRICOS code: 012656E
Campus: Gardens Point and Carseldine
Duration: 3 years (International students must study at Gardens Point) full-time or 6 years (not available at Carseldine) part-time
Credit points: 288
Course coordinator: Ruth Christie

Professional Recognition
Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society (ACS) as members.

Co-operative Education Program
The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Students have the opportunity to undertake 10-12 months of paid industry employment between the second and third years of an IT degree.
Entry to the program is based on academic performance in the first two years of the Bachelor of Information Technology. Companies that QUT’s Cooperative Education students have worked with include Energex, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

Please note this program is only offered to Australian residents and permanent residents.

**Course Outline**

**Block 1: Common First Year (8 Units)**
- Data Communications
- Electronic Commerce
- Information Systems
- Software Engineering

**Block 2: Major (12 Units)**
- Data Communications
- Electronic Commerce
- Information Systems
- Software Engineering

**Block 2: Major (14 Units)**
- Emerging Technologies
- Data Communications and Information Systems
- Data Communications and Software Engineering

**Block 3: General Electives**
- 4 Units for the following majors
  - Data Communications
  - Electronic Commerce
  - Information Systems
  - Software Engineering
  - Emerging Technologies
- 2 Units for the following majors
  - Data Communications
  - Information Systems
  - Software Engineering
- 2 Units for the following majors
  - Emerging Technologies
  - Data Communications and Information Systems
  - Data Communications and Software Engineering

**Common First Year**
- ITB001 Problem Solving and Programming
- ITB002 IT Professional Studies
- ITB003 Object Oriented Programming
- ITB004 Database Systems
- ITB005 Systems Architecture
- ITB006 Networks
- ITB008 Modelling, Analysis and Design
- IT Elective Unit

**Data Communications Major**
- ITB710 Fundamentals of Computer Science
- ITB711 Programming Abstraction
- ITB720 Internet Protocols and Services
- ITB721 Unix Network Administration
- ITB722 Network Planning and Deployment
- ITB723 Wireless and Mobile Devices
- ITB730 Information Security Fundamentals
- Five (5) Major Elective Units to be chosen from the IT Elective List

**Electronic Commerce Major**
- BSB213 Governance Issues in E-Business
- ITB007 Web Development
- ITB222 Systems Analysis and Design
- ITB228 Enterprise Systems
- ITB229 Database Design
- ITB260 E-Commerce Site Development
- ITB720 Internet Protocols and Services
- ITB730 Information Security Fundamentals
- Four (4) Major Elective Units to be chosen from the IT Elective List

**Emerging Technologies Major**
- ITB222 Systems Analysis and Design
- ITB712 Software Engineering Studies
- ITB009 Core Project Initiation
- ITB272 Information Technology Project Management
- MGB218 Venture Skills
- OR
- MGB223 Creating New Enterprises
- Ten (10) Major Elective Units to be chosen from the IT Elective List

**Information Systems Major**
- ITB007 Web Development
- ITB009 Core Project Initiation
- ITB222 Systems Analysis and Design
- ITB228 Enterprise Systems
- ITB229 Database Design
- ITB232 Database Management
- Six (6) Major Elective Units to be chosen from the IT Elective List

**Software Engineering Major**
- ITB009 Core Project Initiation
- ITB710 Fundamentals of Computer Science
- ITB711 Programming Abstraction
- ITB712 Software Engineering Studies
- ITB008 must be completed prior to completing ITB712
- ITB720 Internet Protocols and Services
- ITB744 Computer Architecture
- ITB745 Operating Systems
- Five (5) Major Elective Units to be chosen from the IT Elective List

**Data Communications & Information Systems Major**
- ITB007 Web Development
- ITB222 Systems Analysis and Design
- ITB228 Enterprise Systems
- ITB229 Database Design
- ITB232 Database Management
- ITB710 Fundamentals of Computer Science
- ITB720 Internet Protocols and Services
- ITB721 Unix Network Administration
- ITB723 Wireless and Mobile Devices
- ITB730 Information Security Fundamentals
- Four (4) Major Elective Units to be chosen from the IT Elective List

**Data Communications & Software Engineering Major**
- ITB009 Core Project Initiation
- ITB710 Fundamentals of Computer Science
- ITB711 Programming Abstraction
- ITB712 Software Engineering Studies
- ITB008 must be completed prior to completion of ITB712
- ITB720 Internet Protocols and Services
- ITB721 Unix Network Administration
- ITB723 Wireless and Mobile Devices
- ITB730 Information Security Fundamentals
- Four (4) Major Elective Units to be chosen from the IT Elective List

**Elective Unit List**
- ITB007 Web Development
- ITB009 Core Project Initiation
- ITB010 Core Project Implementation
- ITB218 Applications Programming
- ITB222 Systems Analysis and Design
- ITB223 Software Development with ORACLE
- ITB228 Enterprise Systems
INFORMATION TECHNOLOGY

ITB229 Database Design
ITB232 Database Management
ITB230 Project
ITB233 Enterprise Systems Applications
ITB237 Advanced Databases
ITB239 Enterprise Data Mining
ITB241 Information Technology Management
ITB245 R/3 System Administration
ITB254 Interactivity Design
ITB257 Multimedia Systems
ITB259 Advanced Multimedia Systems
ITB260 E-Commerce Site Development
ITB264 Information Systems Consulting
ITB266 Information Management

Special Topics may be available. Please check with the relevant School for further information.

Bachelor of Information Technology IT22

Award title: Bachelor of Information Technology (Study Area A)
CRICOS code: 012656E
Campus: Carseldine and Gardens Point

Duration: 3 years full-time or 6 years (not available at Carseldine) part-time
Credit points: 288
Course coordinator: Ruth Christie

Professional Recognition
Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society (ACS) as members.

Cooperative Education Program
The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Students have the opportunity to undertake 10-12 months of paid industry employment between the second and third years of an IT degree.

Students’ entry to the program is based on academic performance in the first two years of their undergraduate studies. Companies that QUT’s Cooperative Education students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNITAB, RACQ and many Queensland Government departments.

Please note this program is only offered to Australian residents and permanent residents.

Course Structure
The course structure consists of 10 Faculty Core Studies Units (Block A), 6 Major Units (Block B) and 8 Complementary Studies Area Units (Block C).

Eight (8) Block A units are completed in the first year, while the remaining two (2) Block A units are completed later in the course.

Block C Complementary Studies Area (8 units): Students choose the composition which may include: a second IT Major (6 units) or an approved minor (4 units) and 4 electives or 8 specified electives as approved by the Course Coordinator.

Recommended Core Unit Progression

Year 1, Semester 1
ITB001 Problem Solving and Programming
ITB002 IT Professional Studies
ITB004 Database Systems
ITB005 Systems Architecture

Year 1, Semester 2
ITB003 Object Oriented Programming
ITB006 Networks
ITB007 Web Development
ITB008 Modelling, Analysis and Design

Year 2, Semester 1
Block B or Block C Unit
Block B or Block C Unit
Block B or Block C Unit
Block B or Block C Unit

Year 2, Semester 2
ITB009 Core Project Initiation
Block B or Block C Unit
Block B or Block C Unit
Block B or Block C Unit

Year 3, Semester 1
ITB010 Core Project Implementation
Block B or Block C Unit
Block B or Block C Unit
Block B or Block C Unit

Year 3, Semester 2
Block B or Block C Unit
Block B or Block C Unit
Block B or Block C Unit
Block B or Block C Unit

Course Structure (Carseldine)
First year only is offered at Carseldine. Students complete remainder of course at Gardens Point
The course structure consists of 10 Faculty Core Studies Units (Block A), 6 Major Units (Block B) and 8 Complementary Studies Area Units (Block C).

Eight (8) Block A units are completed in the first year. While the remaining two (2) Block A units are completed later in the course.

Block C Complementary Studies Area (8 units): Students choose the composition which may include: a second IT Major (6 units) or an approved minor (4 units) and 4 electives or 8 specified electives as approved by the Course Coordinator.

Year 1, Semester 1
ITB001 Problem Solving and Programming
ITB002 IT Professional Studies
ITB004 Database Systems
ITB005 Systems Architecture

Year 1, Semester 2
ITB003 Object Oriented Programming
ITB008 Modelling, Analysis and Design
ITB006 Networks
OR
Block C Unit
ITB007 Web Development
OR
Block C Unit
ITB006 and ITB007 are only offered at Gardens Point campus.

Business Systems Engineering Major

Compulsory Units
ITB222 Systems Analysis and Design
ITB228 Enterprise Systems
ITB298 Business Process Engineering
ITB292 Enterprise Architecture
ITB245 R/3 System Administration
ITB296 Information Systems Theory and Applications

Note: Replace ITB292 with ITB245; Replace ITB296 with any ITB2xx or ITB3xx unit.

Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB230 Project
ITB237 Advanced Databases
ITB267 Business Analytics
ITB272 Information Technology Project Management
ITB330 Information Issues and Policy
ITB293 Java for Electronic Commerce Applications

Databases Major

Compulsory Units
ITB229 Database Design
ITB232 Database Management
ITB239 Enterprise Data Mining
ITB295 XML: Data and Document Processing
ITB299 Workflow Management

Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB229 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration
ITB267 Business Analytics
ITB293 Java for Electronic Commerce Applications
ITB296 Information Systems Theory and Applications
ITB330 Information Issues and Policy

Games Technology Major

Compulsory Units
ITB711 Programming Abstraction
ITB743 Artificial Intelligence
ITB746 Modelling and Animation Techniques
ITB747 Real Time Rendering Techniques
ITB749 Scientific Programming
MAB281 Mathematics for Computer Graphics

Information and Knowledge Management Major

Compulsory Units
ITB266 Information Management
ITB294 Information Quality
ITB297 Web Site Design
ITB322 Information Resources
ITB341 Strategic Information and Knowledge Management
Note: ITB297 is replaced with any ITB2.. or ITB3xxunit for semester 2, 2006
Note: ITB341 is replaced with one unit from the following list for semester 2, 2006
ITB264 Information Systems Consulting
ITB241 Information Technology Management
ITB272 Information Technology Project Management
ITB330 Information Issues and Policy

Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB229 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration
ITB267 Business Analytics
ITB293 Java for Electronic Commerce Applications
ITB330 Information Issues and Policy

Information Systems Major

Compulsory Units
ITB222 Systems Analysis and Design
ITB228 Enterprise Systems
ITB229 Database Design
ITB260 E-Commerce Site Development
ITB296 Information Systems Theory and Applications
Note: ITB296 is replaced with any ITB2xx or ITB3xx unit for semester 2, 2006

IS Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB229 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration
ITB267 Business Analytics
ITB293 Java for Electronic Commerce Applications
ITB330 Information Issues and Policy

Electronic Business Major

Compulsory Units
ITB233 Enterprise Systems Applications
ITB239 Enterprise Data Mining
ITB260 E-Commerce Site Development
BSB212 Electronic Business Applications
BSB213 Governance Issues in E-Business
BSB314 E-Business Intelligence

Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB229 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration
ITB267 Business Analytics
ITB293 Java for Electronic Commerce Applications
ITB330 Information Issues and Policy

Information Systems Major

Compulsory Units
ITB222 Systems Analysis and Design
ITB228 Enterprise Systems
ITB229 Database Design
ITB260 E-Commerce Site Development
ITB296 Information Systems Theory and Applications
Note: ITB296 is replaced with any ITB2xx or ITB3xx unit for semester 2, 2006

IS Elective Units
Select one (1) unit from the following list
ITB218 Applications Programming
ITB223 Software Development with ORACLE
ITB229 Project
ITB237 Advanced Databases
ITB245 R/3 System Administration

Intelligent Systems Major

Compulsory Units
ITB239 Enterprise Data Mining
ITB295 XML: Data and Document Processing
ITB740 Agent Based Software Engineering
ITB741 Information Retrieval Technology

Elective Units
Select two (2) units from the following list
ITB322 Information Resources
ITB710 Fundamentals of Computer Science
ITB715 Web Services
ITB742 Computational Intelligence
ITB743 Artificial Intelligence

Interactive Media Major

Compulsory Units
ITB254 Interactivity Design
ITB257 Multimedia Systems
ITB259 Advanced Multimedia Systems
KIB101 Foundations of Communication Design 1
KIB102 Foundations of Communication Design 2

Elective Units
Select one (1) unit from the following list
KIB103 Media Technology 1
KIB105 Animation and Motion Graphics
KIB108 Animation Practices

Network Systems Major

Compulsory Units
ITB720 Internet Protocols and Services
ITB721 Unix Network Administration
ITB722 Network Planning and Deployment

Elective Units
Select three (3) units from the following list
ITB710 Fundamentals of Computer Science
ITB723 Wireless and Mobile Devices

Security Major

Compulsory Units
ITB270 Internet Protocols and Services
ITB721 Unix Network Administration
ITB730 Information Security Fundamentals
ITB731 Security Technologies
ITB732 Cryptology and Protocols
ITB733 Network Security

Software Architecture Major

Compulsory Units
ITB229 Database Design
ITB710 Fundamentals of Computer Science
ITB711 Programming Abstraction
ITB712 Software Engineering Studies
ITB713 Advanced Java Programming
ITB717 Enterprise Software Architecture

Web Services and Applications Major

Compulsory Units
ITB295 XML: Data and Document Processing
ITB715 Web Services
ITB229 Database Design
ITB297 Web Site Design
ITB717 Enterprise Software Architecture
ITB716 Advanced Web Applications Development
Note: ITB297 is replaced with ITB260 for semester 2, 2006

OVERVIEW

The QUT Faculty of Law is Australia’s largest tertiary educator in Law and Justice Studies. The Faculty is an acknowledged leader in its field and provides a sound balance of practical and theoretical training, which enables graduates to progress into the real world with ease. The Faculty consists of the School of Law, the School of Justice Studies and the Legal Practice Unit.

The Faculty is also the home of the first specially designed electronic moot court in the southern hemisphere.

The Faculty’s teaching and learning programs develop legal research and analysis skills within contextual and conceptual frameworks. A global approach to education is adopted which includes international visiting scholars, exchange programs for staff and students, and offshore programs.

The Faculty is continually striving for excellence in learning and teaching in response to the demands of its graduates, their employers, professional bodies and the practising professions. The Bachelor of Laws keeps abreast of the changing and challenging demands of a modern and relevant legal education while the Bachelor of Justice provides students with more flexibility and a greater degree of specialisation. The Legal Practice Unit offers its Graduate Diploma in Legal Practice online to graduates who are working full-time in law firms or other workplaces. The online course provides students with an electronic learning environment in which they can work on realistic practical legal problems.

Other initiatives to enhance the quality of students’ tertiary legal and justice education are online delivery of teaching and curricula designed to develop graduate capabilities, a field in which the Faculty is an acknowledged leader. The Faculty’s online teaching sites provide electronic access to course materials and other Internet resources, together with greater opportunities for communication between academic staff and students.

A feature that sets QUT Faculty of Law apart is its focus on education ‘for the real world’ through liaison and collaboration with the legal profession and justice industries. Emphasis on real world experience, projects and case studies is an essential part of the education process.

The Faculty offers undergraduate study through the Bachelor of Laws and Bachelor of Justice courses. A range of double degree programs is also available, offering the Bachelor of Laws in conjunction with the Bachelor of Justice or with a bachelor degree in Applied Science, Arts, Business, Creative Industries, Journalism or Information Technology.

A three-year accelerated Bachelor of Laws program is available for students who already hold a bachelor degree in another discipline. These students may also have the opportunity to select their elective units from the Law School's postgraduate program and graduate concurrently with a Graduate Certificate in Law.

The Faculty offers a range of postgraduate study options, including graduate certificate and graduate diploma courses, masters degrees by coursework or research, and doctoral programs. Many of these courses provide students with the opportunity to build on relevant undergraduate study or professional experience, and develop their expertise in a specialist area.

The Faculty offers a Legal Practice Course (the Graduate Diploma in Legal practice) that prepares law graduates for admission as legal practitioners. The course satisfies the practical training requirements of Queensland’s legal practitioner admission rules. We offer the course twice a year in full-time, part-time (in-practice) and part-time (general) modes. Our part-time in-practice mode is specially designed for persons who are already working in private or government law offices. Our part-time courses are delivered online for the convenience of persons who are working full-time or who otherwise do not wish to study on campus. The course premises are being refurbished in February 2006 to provide every person who completes the course on a full-time on-campus basis with a purpose-built work station and networked PC while they are working on campus. We are Queensland’s longest established practical legal training course and we have successfully prepared over 1000 law graduates for admission as legal practitioners.

The Faculty of Law achieves consistently high graduate employment rates which support its position as one of Australia’s leading law faculties. The Law School prepares students for careers in law firms, government and other industries. The School of Justice Studies produces graduates with qualifications for employment in policing, justice, defence, security and other social justice areas.

The Faculty has staff qualified to supervise research in many fields including, but not limited to:

- Commercial Leases
- Commercial/Business Law
- Competition
- Consumer Protection
- Contract Law
- Crime and Criminology
- Cyber Law / E-Commerce
- Environmental Law
- Health Law
- Human Rights
- Indigenous Issues
- Intelligence and Security
- Legal / Justice Education
- Media Law
- Natural Resources Law
- Negligence
- Policing
- Property Law
- Public Law
- Tax Law
- Technology and Law
- Trade Practices.

SENIOR STAFF

Faculty Office
Dean: Professor the Honourable M. Lavarch, LLB QIT
Administration Manager: W.A. Smith, BA(Hons) Syd, GradDipCourt & Parliamentary Reporting Canb

Assistant Dean, Teaching and Learning: M. Shirley, BA LLB(Hons) Qld, GradDipLegalPrac LLM Bond
Assistant Dean, Research and Commercialisation: Profesor W.D. Duncan, LLB Qld, LLM Lond, Solicitor
Assistant Dean, International and Community: I. Davies, LLB(Hons) GradDipLegalPrac LLM Qld
Law School

L. Willmott, BCom LLB (Hons) Qld, LLM Camb

Legal Practice

*Director:* A.J. Chay, LLB LLM Qld

Justice Studies

*Head of School:* Professor R. Broadhurst, BA BEd PhD WAust, MPhil Cantab
Doctor of Juridical Science LW50

Award title: Doctor of Juridical Science
CRICOS code: 012652J
Campus: Gardens Point and Kelvin Grove
Duration: 1 1/2 years (minimum) full-time or 3 years (minimum) part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Assistant Dean, Research

Award
The SJD will be awarded subject to the Faculty of Law Academic Board receiving:
(i) a certificate of satisfactory completion of the candidate’s approved course of study signed by the Principal Supervisor and the Assistant Dean, Research;
(ii) a declaration signed by the candidate that he/she has not been a candidate for another tertiary award during the tenure of his/her SJD candidature;
(iii) a declaration signed by the candidate stating original authorship of a thesis;
(iv) a certificate signed by the Principal Supervisor, and Assistant Dean, Research stating that the candidate has satisfactorily completed the examination process, including completing any revisions or re-examination required by the external examiners; and
(v) two final copies of the thesis in the prescribed format.

For the purposes of these Rules the Assistant Dean, Research acts as the delegate of the Dean, Faculty of Law and Faculty of Law Research Committee acts as the delegate of the Law Academic Board.

1. Entry Requirements
1.1 The Faculty of Law Research Committee may admit to candidature an applicant who:
(i) holds or has completed the requirements for the degree of (a) Bachelor of Laws or (b) Bachelor of Justice with at least Second Class Honours Division A at the Queensland University of Technology or its equivalent from another institution; or
(ii) holds or has completed the requirements for the degree of (a) Master of Laws by Coursework or (b) Master of Arts (Justice Studies) with a grade point average of at least 5.0 on a 7 point scale at the Queensland University of Technology or its equivalent from another institution which, in the opinion of the Assistant Dean (Research) maintains standards comparable with those required for the award of the degree of Master of Laws and Master of Arts (Justice Studies) respectively at the Queensland University of Technology;
and, in the case of (i) or (ii) an applicant must also satisfy the following:
(iii) has a minimum of two years professional experience appropriate to the proposed course of study; and
(iv) that the applicant can demonstrate a level of research experience and potential which is deemed acceptable to the Assistant Dean (Research) for example, by the publication of articles in refereed research journals; and
(v) can demonstrate a sufficient command of the English language to complete the proposed course of study in that language.

1.2 Alternative Entry
In exceptional circumstances, applicants with lesser academic qualifications but with exemplary professional experience may be given provisional enrolment on the approval of the Assistant Dean, Research. Applicants seeking entry under this rule would normally have completed a three-year bachelor level degree from the Queensland University of Technology or another recognised institution. In addition, in order to assess the adequacy of the professional experience of the applicant, they will be required to address the following criteria as it relates to the proposed area of research:
(i) evidence of professional leadership
(ii) quality of academic achievement
(iii) evidence of professional involvement in research and/or consultancy
(iv) referees reports

Overview
As an experienced legal professional, you will follow a program of advanced coursework study and applied research that relates directly to your professional and educational needs.

Course Structure
The value of the course is set at 288 credit points, comprising 96 credit points of postgraduate coursework units and a dissertation of 50,000-60,000 words. Students must complete or have completed LWN048 Advanced Legal Research (or equivalent) as part of the coursework component.

2. Application Procedure
2.1 An application for admission shall be made on the prescribed form (PR/FR Form) which shall involve a two-stage process.

2.2 Stage 1 of the application process must include:
• the completion of the PR Form for admission (if the applicant holds citizenship or permanent residency in Australia or New Zealand);
• the completion of the FR Form for admission (if the applicant is an international candidate);
• a certified copy of the results of the degree relied upon for admission;
• personal data;
• details of relevant research experience. (In the case of a candidate relying upon a Master of Laws by Coursework for admission, this criterion may be satisfied if the student demonstrates that they have completed the unit Advanced Legal Research at a grade of 5 or above at the Queensland University of Technology or some equivalent unit from a comparable institution during the course of their masters studies or can demonstrate other relevant research experience, eg by publication. In the case of a candidate relying upon a Master of Arts (Justice Studies) for admission, the candidate shall demonstrate that the degree relied upon is at a comparable level in the area of research methodology at a grade of 5 or above or some equivalent unit from a comparable institution during the course of Masters studies or can demonstrate relevant research experience, eg by publication). Where an applicant cannot satisfy this criteria by way of completion of an advanced research unit or publications as set out above, the applicant will be required to undertake the unit Advanced Legal Research or Advanced Information Retrieval Skills or an equivalent unit from a comparable institution during their candidature; and

LAW
2.10 Upon approval by the Faculty Research Committee of the Stage 2 Application the applicant will be admitted to candidature unconditionally (except for those being admitted under alternative entry provisions) and the appointment of the supervisors shall be confirmed. Those candidates admitted under alternative provisions will continue on provisional enrolment until such time as the requirements of this enrolment have been fulfilled (refer to 4).

3. Studies during the Candidature
A candidate for the degree of SJD is required to successfully complete a planned research program that should result in a notable contribution to professional knowledge and practice in the field of study. This contribution may be in the form of new knowledge in practice, or of significant and original adaptation, application and interpretation of existing knowledge and practice.

3.1 The degree comprises both a coursework (33%) and a thesis component (66%). Candidates will pursue an approved course of advanced study and research, comprising 96 credit points of coursework selected from within the unit offerings for the LLM by Coursework or the MA(Justice Studies) by Coursework (as appropriate) at the Queensland University of Technology or an equivalent institution at a grade point average of at least 5. The candidate will also pursue a thesis in accordance with Rule 3.2. Candidates must successfully complete all coursework requirements at the appropriate standard prior to commencing the thesis. As far as possible, the topic of the thesis should extend the coursework component. Whilst enrolled in the coursework component of the degree all policies and procedures relevant to the Master of Laws by Coursework or the Master of Arts (Justice Studies), as the case may be, form part of these rules.

3.2 Candidates must successfully complete all coursework requirements at the appropriate standard prior to commencing the thesis. As far as possible, the topic of the thesis should extend the coursework component. Whilst enrolled in the coursework component of the degree all policies and procedures relevant to the Master of Laws by Coursework or the Master of Arts (Justice Studies), as the case may be, form part of these rules.

3.3 The planned research program will normally include:
- participation in university scholarly activity such as research seminars, teaching and publication;
- regular interaction with supervisors; and
- a program of supervised research and investigation.

3.4 The course of study must be such to enable a candidate to acquire competence in relevant methods of research and scholarship relating to the subject of the proposed investigation and to demonstrate sustained independent research effort.

3.5 The Faculty of Law Research Committee may on the recommendation of the Assistant Dean (Research) approve a variation in the candidate’s course of study and research, an application for variation must be supported in writing by the Principal Supervisor.

4. Provisional Enrolment
Applicants with lesser academic qualifications but with exemplary professional experience may be given provisional enrolment on the approval of the Assistant Dean, Research (refer to rule 1.2).

4.1 A candidate so admitted shall be required to complete designated qualifying units at a grade point average of at
least 5 on a 7 point scale. The designated qualifying units will include the unit LWN048 or equivalent as stipulated by the Assistant Dean, Research on the advice of the Faculty Research Committee.

4.2 A candidate who completes coursework units at a satisfactory level during the period of provisional enrolment will be permitted to count that coursework towards the degree.

4.3 Unless exceptional circumstances justify extension of provisional status, the stipulated enrolment program must be completed within one calendar year from enrolment in the course.

4.4 If an extension to the provisional enrolment period is required application should be made in writing to the Assistant Dean, Research setting out the exceptional circumstances. In any event, the period of extension of provisional enrolment shall be no more than six months.

5. Advanced Standing and Articulation

5.1 Advanced standing up to a maximum of 96 credit points may be granted to candidates who have completed the Master of Laws by Coursework or Master of Arts (Justice Studies) at the Queensland University of Technology, or its equivalent at another institution, at a grade point average of at least 5 on a 7 point scale.

5.2 Where a candidate has undertaken part of a postgraduate degree deemed to be equivalent to the Master of Laws by Coursework or Master of Arts (Justice Studies), that candidate may be granted advanced standing provided that the work for which a candidate seeks credit has been completed at a grade point average of at least 5 on a 7 point scale.

5.3 The Doctor of Juridical Science will fully articulate with the Master of Laws (Research) and Master of Arts (Justice Studies) by Research.

5.4 In exceptional circumstances, a student exiting prior to completion of the program may be eligible to receive the award of Master of Laws by Coursework or Master of Arts (Justice Studies) if this has not previously been awarded. In such cases, as these courses normally attract up-front tuition fees, students exiting in this way will be liable for any fees which would otherwise have been payable. Payment of any such fees is required to be made before conferral of the degree.

6. Period of Time for Completion of Program

6.1 The minimum period of candidature is:
- Full-time candidates _ eighteen months from date of commencement;
- Part-time candidates _ thirty-six months from date of commencement;

In exceptional cases the Law Faculty Research Committee may approve submission of the thesis within a shorter period.

6.2 The maximum period of candidature is:
- Full-time candidates _ forty-eight months from date of commencement;
- Part-time candidates _ ninety-six months from date of commencement;

6.3 The candidate may change from full-time to part-time candidature or vice versa by making application on a prescribed form to the Faculty Research Committee through the office of the Assistant Dean, Research. International students studying on student visas are unable to alter their mode of study from full-time to part-time unless they are in their final semester of study.

6.4 A candidate who does not expect to submit his/her thesis by the maximum candidature date must apply for an extension of time on the prescribed form (SJD3) through the Assistant Dean, Research for consideration by the Faculty Research Committee. The application must include the reasons for the delay, written endorsement of the request for extension by the Principal Supervisor and a revised timeline for completion. Applications for extensions will not normally be considered by the Faculty Research Committee unless the reasons for the delays have been documented in previous supervisor’s reports. Extensions will only be given in exceptional circumstances. Minor breakdown of computer equipment or absence of a Principal Supervisor are not usually considered exceptional.

7. Candidate May Take Leave of Absence for a Specified Period from the Program

7.1 Application must be made on the prescribed form (SJD4) through the Assistant Dean, Research and approved by the Faculty Research Committee. The application must include reasons for the leave of absence, the written endorsement of the Principal Supervisor and the exact start and finish dates of the period of leave. If the leave is approved, the duration of the specified time will be added to the maximum and minimum submission dates of the candidature. International students studying on student visas are not normally permitted to take leave of absence unless there are exceptional circumstances, eg bereavement. International students should consult the Assistant Dean, Research and Office of International Students if a period of leave is required.

7.2 The maximum period of leave of absence for which a candidate may be given approval (for any reasons) is twelve months for a full-time candidate and twenty-four months for a part-time candidate.

8. Supervision

8.1 Supervision shall be conducted according to the QUT Code of Good Practice for Postgraduate Research Studies and Supervision (MOPP Appendix 66).

8.2 A Principal Supervisor from QUT and one Associate Supervisor shall be appointed.

8.3 The Principal Supervisor has responsibility for supervising a candidate on a frequent basis and must be a current member of the QUT staff or an emeritus professor of QUT still active in research. The Principal Supervisor shall normally have undertaken successful supervision of research degree candidates, and shall have an established research record in the area of the proposed project.

8.4 The Associate Supervisor may be a member of the QUT staff but must possess appropriate expertise in the research field and would normally be a person who has undertaken successful supervision of research degree candidates.

8.5 Where the Principal Supervisor is absent from QUT for a period of three consecutive months or longer during the period of candidature, the Associate Supervisor (if that person is a QUT staff member) will normally become the Acting Principal Supervisor for this period.

8.6 If the Principal Supervisor leaves the staff of QUT, the QUT Associate Supervisor will normally fill the role of Acting Principal Supervisor immediately until a new Principal Supervisor is appointed by the Faculty Research Commit-
tee in consultation with the candidate. A formal appointment of a new Principal Supervisor must be made within three months of the original Principal Supervisor’s departure.

9. Confirmation of Candidature

9.1 Within six months of commencement of the thesis component for full-time candidates and twelve months for part-time candidates, the candidate shall present (in consultation with his/her supervisors) a plan of the research program for the remainder of the candidature and report of the work done to that tie. The confirmation report form (SJD5) shall incorporate a substantial literature review and shall provide evidence of the research capacity of the candidate including the rate of progress to date. The plan shall include details of:

- The area of study in which the candidate’s course is located;
- The nature of participation in scholarly activities in the Centre in which the degree is being undertaken;
- The objectives of the program of research and its relationship to published research in the same field;
- Research methods followed and to be followed;
- The title of the thesis; and
- A timeline for completion of the research program.

9.2 The candidate shall present the confirmation report and details of the research program at a Confirmation Seminar open to the public.

9.3 A candidate who is not able to complete a Confirmation of Candidature within the timeframe required must apply for an extension at least one month in advance of that deadline through the Assistant Dean, Research to the Faculty Research Committee. A maximum of three months extension may be granted.

9.4 A Review Panel shall review the candidate’s progress and planned research program and shall make recommendations on Form SJD5 to the Faculty Research Committee. These recommendations shall include:

- An appraisal of the candidate’s progress and suitability for continuation of the program;
- Documents prepared by the candidate;
- A statement that the research program is of a standard required for an SJD;
- A statement of whether the studies continue to be within the aims and objectives and physical and human resources of the Centre; and
- A report on the candidate’s seminar.

9.5 The Faculty Research Committee will, if satisfied:

- Confirm the candidature and notify the candidate; or
- May require changes to the planned research program; or
- If the recommendation is not to confirm the candidature immediately, place the candidate under review for three months. At the end of the review period the Assistant Dean, Research must advise the Faculty Research Committee whether the conditions of review have been met.

9.6 Where a candidate is placed under review following the Confirmation Seminar, the Principal Supervisor must advise the candidate in writing within seven days of the conditions to be met, in the form of clear written guidelines of the work required and due dates for submission and whether a further Confirmation Seminar is required. The conditions must be endorsed by the candidate, the supervisor (supervisors), Director of the Centre and Assistant Dean, Research.

9.7 Where a candidate’s progress remains unsatisfactory after the review period, the Faculty Research Committee, on advice from the Assistant Dean, Research shall either grant a further extension of the period of up to three months or may ask the candidate to show cause in writing why action should not be taken to terminate the candidature.

10. Reporting Procedures

10.1 The Principal Supervisor and candidate are required to report annually by 30 September on the prescribed form on the candidate’s progress and future plans. Reports shall be signed by both the candidate and by the Principal Supervisor and submitted through the Law Faculty Research Committee to the Office of Research for consideration by the Research Degrees Committee. At its discretion, the Faculty Research Committee may request an additional six monthly report if it has concerns for the candidate’s progress or feels that the candidate would benefit from such process.

10.2 Where a candidate’s progress is deemed satisfactory, the Research Degrees Committee shall approve the continuation of the candidature.

10.3 Where the progress is deemed unsatisfactory, in the Confirmation of Candidature, six monthly report or other interim faculty report, the Research Degrees Committee, on advice from the Faculty Research Committee will normally place a candidate under review for a period of up to three months from the date that the candidate is advised in writing of the decision. The candidate will be advised of the required remedial action to be followed taking account of the advice provided by the Principal Supervisor and the Faculty Research Committee.

10.4 A report on the action taken to resolve the deficiencies in the program must be made to the Faculty Research Committee and the Research Degrees Committee may then approve continuation of candidature if these deficiencies have been redressed and progress is again satisfactory.

10.5 If progress is still unsatisfactory after the review period, the Research Degrees Committee, on the advice of the Faculty Research Committee shall ask the candidate to show cause in writing why the enrolment shall not be terminated.

10.6 When a candidate’s progress has been reported as unsatisfactory in any two consecutive reports during candidature, the Research Degrees Committee shall ask the candidate to show cause in writing why the enrolment of the candidate shall not be terminated.

10.7 If a candidate fails to submit an annual report through their Principal Supervisor to Research Degrees Committee by the due date without applying, in writing, for an extension on the prescribed form two weeks prior to the due date, the Research Degrees Committee may ask the candidate to show cause why the enrolment of the candidate should not be terminated.

10.8 If the candidate does not show cause why the enrolment shall not be terminated, the Research Degrees Committee may terminate the candidate’s enrolment.

11. Thesis Guidelines

11.1 The thesis must be presented in accordance with the requirements of the University, including any accompanying declarations and in accordance with Appendix S1 of the Manual of Policies and Procedures . Requirements for
Presenting Theses (MOPP 51). The main body of the text should be between 50,000 and 60,000 words.

11.2 The thesis must be presented in the English language.

11.3 A candidate may submit with the thesis other kinds of relevant material (such as films, audio tape recordings, video tape recordings, CD-ROMS, software programs etc) which shall be accompanied by evidence of the extent to which the candidate has been responsible for their preparation.

11.4 An SJD degree may not be awarded on the basis of the submission of published papers.

11.5 A candidate's name will not be placed on the graduation list until the final copies of the thesis (one bound and one electronic) are received in the Research Students' Centre, Office of Research. These copies shall be in the prescribed form as set out in the University Requirements for Presenting Theses and be provided at the candidate's expense. An additional copy shall be bound at the Faculty's expense for inclusion in the Faculty Office collection. Any corrections resulting from the examiners' assessment shall be made prior to binding, and by retyping if they would otherwise be obtrusive.

11.6 When these final copies of the thesis have been lodged with the Research Students' Centre, Office of Research, the names of examiners will be released to the candidate upon request, providing that the examiner has not indicated otherwise.

12. Examination of Thesis

12.1 At least three months prior to the maximum candidature date or anticipated completion date, the Principal Supervisor having obtained the agreement of the Faculty Committee, shall recommend to the Faculty Research Committee, the composition of the proposed Examination Committee and the title of the candidate's thesis.

12.2 The Examination Committee shall comprise two external examiners who will examine the thesis plus an external examiner to be called upon only if the first two examiners are in disagreement.

12.3 In exceptional circumstances, the University Research Degrees Committee may act directly to facilitate the examination process of a thesis including the appointment of examiners.

12.4 A candidate's Principal or Associate Supervisor may not be nominated by the Faculty as an examiner.

12.5 Examiners must have demonstrable and substantial publications and research experience in the area under investigation and one examiner would normally have a research degree. At least one of the nominated examiners should be an academic from a recognised university or equivalent research institution. At least one examiner would normally be a specialist practitioner recognised as an expert in the particular field of the research constituting the thesis. Preferably, at least one examiner should also have substantial experience of examining research degree candidates at doctoral level.

12.6 Agreement will be sought from examiners to examine the thesis within eight weeks of receipt.

12.7 If more than six months has elapsed between the nomination of examiners and the submission of the thesis, the faculty must notify the Research Degrees Committee that the nominated examiners are still willing and able to examine the thesis within two months of its receipt. If any previously nominated examiner is unable to examine the thesis, a replacement examiner must be nominated by the Principal Supervisor (with the agreement of the Faculty) for approval by the Research Degrees Committee.

12.8 In order to determine whether the thesis is acceptable for examination by the Examination Committee, the candidate shall be required to present a Final Seminar based on the work described in the thesis to the Faculty to which he/she is attached.

- The final seminar shall normally take place no more than six months prior to the anticipated submission date.
- The Faculty shall constitute a panel of three including the Principal Supervisor to attend the seminar and to report on the readiness of the thesis for external examination. The panel shall be chaired by the Principal Supervisor, and shall question the candidate on the content of the thesis at the conclusion of the seminar. Each member of the panel must receive a copy of the draft thesis 14 days prior to the final seminar.
- The panel may required changes to the thesis or ask that further work be done prior to submission of the thesis. The thesis is accepted by the University for external examination only when the panel signifies its belief that the degree requirements have been met. The Faculty panel shall use the prescribed form when advising Research Degrees Committee that the thesis is ready for external examination.
- The final seminar shall be open to the public and shall be widely advertised by the Faculty so as to ensure attendance by researchers and research students within the Faculty.
- In all other matters the form and timing of the final seminar is determined by the Faculty.

12.9 The thesis must be accompanied by a certificate form (SJD7) endorsed by the Principal Supervisor, Assistant Dean, Research and the Faculty panel, stating that all reasonable efforts have been made by the Faculty to ensure that:

- The thesis makes notable contribution to professional knowledge and practice;
- The methodology applied in the candidate's research is effective and appropriate for the thesis topic;
- The thesis reflects competence in the survey of literature and documentation of statements;
- The thesis is of the required standard for external examination;
- The thesis is within the prescribed word limit;
- The candidate has presented a Final Seminar;
- That acknowledgment is given regarding the inclusion of all published and other sources of information together with any substantial financial assistance received for the project.

12.10 In exceptional circumstances the Research Degrees Committee may allow a candidate to submit his or her thesis for external examination without the requirement for certification. The candidate must apply in writing to the Research Degrees Committee for such permission, outlining reasons why the certification is not included.

12.11 Three copies of the thesis in the prescribed format must be submitted to the Research Students Centre, Office of Research, no later than the maximum candidature date.

12.12 The Office of Research, on the advice of the Research Degrees Committee, shall provide the examiners with a copy of the thesis and of the Regulations for the
Award of the Degree of the Doctor of Juridical Science and any other relevant information.

12.13 Each examiner will be asked to provide a written report to the Office of Research on the candidate's thesis and to recommend on the following courses of action:

Recommendation 1: The candidate should be awarded the degree without the requirement for revision, further examination or modification (minor corrections and typographical errors only); or

Recommendation 2: The candidate should be awarded the degree subject to minor nominated revisions being completed to the satisfaction of the Assistant Dean, Research and Principal Supervisor; or

Recommendation 3: The candidate should be awarded the degree following the completion of major nominated revisions to the satisfaction of the Assistant Dean, Research and Principal Supervisor; or

Recommendation 4: The candidate should be permitted to substantially revise and submit the thesis for re-examination within twelve months after a specified amount of further work, which may alter the substantive conclusions of the thesis, has been completed under approved supervision and the thesis appropriately amended to reflect the additional research; or

Recommendation 5: The thesis should be rejected, the degree should not be awarded and the candidate should not be permitted to submit the thesis for re-examination for the degree.

12.14 After both examiners' reports are received the Office of Research will forward them to the Assistant Dean, Research, the Principal Supervisor and the candidate with an appropriate covering letter. (Until such time as the examiners unless:

The Research Degrees Committee replaces one or more examiners unless:

• Any of the examiners is unable to re-examine the thesis in which case the Assistant Dean, Research or nominee must certify to the Research Degrees Committee that they recommend acceptance of the thesis in fulfillment of the conditions for the award of the SJD degree.

13. Examiners in Agreement

13.1 Where both examiners recommend that the candidate should be awarded the degree (recommendation 1, 2 or 3), the Assistant Dean, Research will consult with the Principal Supervisor and Centre Director to discuss any corrections or revisions that the candidate may be required to make and where revisions are required.

13.2 Where corrections or revisions are to be made to the satisfaction of the Assistant Dean, Research or nominee, the Head of School or nominee must certify to the Research Degrees Committee that they recommend acceptance of the thesis in fulfillment of the conditions for the award of the SJD degree.

13.3 Where both examiners recommend that the thesis be revised and resubmitted for examination (Examiners Report Recommendation 4), after consultation with the Principal Supervisor and the Centre Director, the Assistant Dean, Research will make written recommendation to the Research Degrees Committee within seven days of the receipt of the Examiners Reports listing any revisions required.

Once these are approved by the Research Degrees Committee, the Research Degrees Committee will inform the candidate of the revisions and/or any action required.

14. Examiners Not in Agreement

14.1 Where the recommendations of the external examiners are not in agreement as to whether the thesis should be accepted for the award of SJD or as to whether the thesis may be revised and resubmitted, the thesis will be sent to the third nominated examiner.

14.2 Upon receipt of the third examiner's report, a majority decision shall be adopted.

14.3 Where the majority decision is that the thesis be accepted or that the thesis be rejected, this shall be the decisions of the examiners as the case may be.

14.4 Where the majority decision is that the candidate be required to submit for re-examination or the thesis fail, the procedures in Section 11.3 shall apply.

14.5 Where the recommendation of three examiners clearly differ and no clear majority exists, the Assistant Dean, Research or nominee shall liaise with the Principal Supervisor to determine the further course of action.

15. Re-Examination

15.1 A candidate who is required to submit for re-examination may be re-examined only once except in the case of an upheld appeal.

15.2 Re-examination shall take place within twelve months from the date on which the candidate is advised in writing by the Assistant Dean, Research or nominee of such re-examination. The Research Degrees Committee may, on written application by the candidate and supported by the Principal Supervisor and Centre Director with suitable justification, approve an extension to this period which, under normal circumstances, may be a maximum of a further twelve months.

15.3 A candidate who is required to submit his/her thesis for re-examination must re-enrol in the SJD program.

15.4 The thesis shall be re-examined by the same two examiners unless:

• Any of the examiners is unable to re-examine the thesis in which case the Assistant Dean, Research or nominee must certify to the Research Degrees Committee that they recommend acceptance.

15.5 Examiners re-examining a thesis will be asked to provide a written report on the candidate's thesis and to recommend one of the following courses of action:

(a) the candidate should be awarded the degree with or without minor nominated revisions; or

(b) the candidate should be awarded the degree a masters level with or without minor nominated revisions; or

(c) the thesis should be rejected and the degree should not be awarded.

15.6 Regulations applicable to SJD examination shall apply to the re-examination.

16. Appeals

16.1 A candidate whose thesis has failed may lodge an appeal against the outcome of the examination process.

16.2 The grounds for appeal may be on matters of process only, i.e. procedural irregularities in the conduct of the examination or documented evidence of examiner bias as evidenced by comments in the examiners reports.

16.3 An appeal must be lodged within sixty (60) days of the date of written advice from the Office of Research on the
outcome of the examination. This appeal must include the specific grounds on which the appeal is based.

16.4 Appeals must be submitted in writing to the Office of the Pro-Vice-Chancellor (Research and Advancement). The Director, Postgraduate Research Studies, will determine whether a potential conflict of interest exists in relation to his/her consideration of the appeal.

16.5 In cases where a conflict of interest exists, the Director, Postgraduate Research Studies, will appoint a member of academic staff, with expertise in research candidate supervision, to consider the appeal.

16.6 The Director, Postgraduate Research Studies, or appointee will decide whether a case exists and may seek the advice of the Faculty, school or centre/research concentration as appropriate.

16.7 The appeal may be allowed or dismissed. If an appeal is allowed, the Director, Postgraduate Research Studies, or appointee cannot recommend that the degree be awarded but shall recommend that that thesis be re-examined. This re-examination shall be carried out in accordance with the Section 6.143 taking account of the issues raised in the successful appeal.

16.8 The Director, Postgraduate Research Studies, or appointee will make a determination on the appeal as soon as practicable and will advise appellants, in writing, of the result of the appeal.

Course Structure

Full-time Course Structure

Year 1, Semesters 1 & 2
Coursework units selected from the list of available units in the Master of Laws (by Coursework) or Master of Justice (by Coursework) to the value of 48 credit points per semester.

Year 2, Semesters 1 & 2
LWR003-1 Thesis
LWR003-2 Thesis
LWR003-3 Thesis
LWR003-4 Thesis

Year 3, Semesters 1 & 2
LWR003-5 Thesis
LWR003-6 Thesis
LWR003-7 Thesis
LWR003-8 Thesis

Year 4, Semesters 1 & 2
LWR003-9 Thesis
LWR003-10 Thesis

Year 5, Semesters 1 & 2
LWR003-11 Thesis
LWR003-12 Thesis

Year 6, Semesters 1 & 2
LWR003-13 Thesis
LWR003-14 Thesis

Part-time Course Structure

Year 1, Semesters 1 & 2
Coursework units selected from the list of available units in the Master of Laws (by Coursework) or Master of Justice (by Coursework) to the value of 24 credit points per semester.

Year 2, Semesters 1 & 2
Coursework units selected from the list of available units in the Master of Laws (by Coursework) or Master of Justice (by Coursework) to the value of 24 credit points per semester.

LWR003-18 Thesis

LAW

QUT HANDBOOK 2006 PAGE 365
4.2 Where the candidate’s progress is deemed satisfactory, the Research Degrees Committee shall approve continuation of candidature.

4.3 Where progress is deemed unsatisfactory, the Research Degrees Committee, on advice from the Faculty Research Committee, will normally place the candidature under review for a period of up to three months from the date that the candidate is advised in writing of the decision. The Research Degrees Committee will inform the candidate of the required remedial action to be followed taking account of the advice provided by the Principal Supervisor and the Faculty.

4.4 A report on the action taken to resolve the deficiencies in the program must be made to the Faculty Research Committee and the Research Degrees Committee may then approve continuation of candidature if these deficiencies have been redressed and progress is again satisfactory.

4.5 If progress is still unsatisfactory after the Review Period, the Research Degrees Committee, on advice from the Faculty Research Committee, shall ask the candidate to show cause why the enrolment of the candidate should not be terminated.

4.6 If a candidate fails to submit an annual report through their Principal Supervisor to Research Degrees Committee by the due date without applying, in writing, for an extension on the prescribed form two weeks prior to the due date, the Research Degrees Committee may ask the candidate to show cause why the enrolment of the candidate should not be terminated.

4.7 Upon failure of the candidate to show cause the candidate's enrolment will be terminated.

5. Thesis Requirements

5.1 Students undertake applied research on an approved topic, which involves both an appropriate theoretical perspective and a specific orientation to professional practice and application. The thesis submitted for the degree shall be not less than 50,000 words and should constitute a substantial contribution to knowledge and understanding in criminal justice (eg criminology, law enforcement, strategic intelligence). It shall include a title page, table of contents and bibliography, and shall otherwise comply with the University’s requirements for presenting theses.

5.2 The candidate shall submit a detailed research outline to the Course Coordinator within two months of admission to candidature. The research outline should include the following:

- The proposed title of the thesis;
- The objectives of the program of research and investigation;
- An outline of the proposed research;
- The Research methods and plan;
- The relation of the study to previous work in the same field by the candidate and others;
- A preliminary literature review;
- A substantial bibliography;
- A timeline for the completion of the research
- A copy of the Research Ethics Review Checklist
- The proposed supervisor(s) and their credentials
- An intellectual property agreement if required
- Memo of Understanding for any external supervisor.

5.3 The Law Faculty Research Committee may, upon the recommendation of the Course Coordinator vary the title of the thesis topic.

5.4 A candidate enrolled for the degree shall, at least once per semester during the period of candidature, consult with the Principal Supervisor and, where appropriate, any Associate Supervisor appointed by the Law Faculty Research Committee on the advice of the Course Coordinator.

5.5 A candidate shall submit three copies of the thesis in the form prescribed by the University for the submission of theses to the Course Coordinator not later than the end of November or May, as the case may be, in the year in which the candidate is required to complete the degree. On submission of the thesis, the candidate shall furnish a written statement to the effect that the thesis is that candidate’s work alone, except where due acknowledgment is made in the text, and does not include material which has been previously submitted or accepted for a degree or diploma.

5.6 The Principal Supervisor shall recommend to the Faculty Research Committee the names of two examiners for the thesis, at least one of whom must be external to the University and neither of whom are the candidate’s supervisor.

5.7 The Law Faculty Research Committee, through the Office of Research, shall refer the thesis to two examiners. Each examiner shall report, normally within two months of receipt of the thesis, whether in the examiner’s opinion, the thesis is of the standard required for the award of the degree. Each examiner shall also recommend that the thesis:

(i) be accepted
(ii) not be accepted, or
(iii) be accepted subject to amendments to be made to the satisfaction of the Principal Supervisor.

5.8 After both examiners' reports are received the Office of Research will forward them to the Course Coordinator, the Principal Supervisor and the candidate with an appropriate covering letter. (Until such time as the examination process is complete the identity of the examiners will be withheld from the candidate.)

Examiners in Agreement

Where both examiners recommend that the thesis be accepted (recommendations (i) or (iii)), the Course Coordinator will consult with the Principal Supervisor to discuss any corrections or revisions that the candidate may be required to make and where revisions are required.

Where corrections or revisions are to be made to the satisfaction of the Principal Supervisor, the Principal Supervisor must certify to the Research Degrees Committee that they recommend acceptance of the thesis in fulfilment of the conditions for the award of the MJust (Research) degree.

Examiners not in Agreement

Where the recommendations of the examiners are not in agreement as to whether the thesis should be accepted for the award of MJust (Research) or as to whether the thesis may be revised, the Law Faculty Research Committee will refer the thesis to a third examiner.

Upon receipt of the third examiner's report, a majority decision shall be adopted. Where the majority decision is that the thesis be accepted or that the thesis be rejected, this shall be the decision of the examiners as the case may be. Where the recommendation of three examiners clearly differs and no clear majority exists, the Course Coordinator or
nominee shall liaise with the Principal Supervisor to determine the further course of action.

Appeals
A candidate whose thesis has failed may lodge an appeal against the outcome of the examination process. The grounds for appeal may be on matters of process only, i.e., procedural irregularities in the conduct of the examination or documented evidence of examiner bias as evidenced by comments in the examiners reports.

An appeal must be lodged within sixty (60) days of the date of written advice from the Office of Research on the outcome of the examination. This appeal must include the specific grounds on which the appeal is based. Appeals must be submitted in writing to the Office of the Pro-Vice-Chancellor (Research and Advancement). The University Director, Postgraduate Research Studies, will determine whether a potential conflict of interest exists in relation to his/her consideration of the appeal. In cases where a conflict of interest exists, the University Director, Postgraduate Research Studies, will appoint a member of academic staff, with expertise in research candidate supervision to consider the appeal.

The University Director, Postgraduate Research Studies, or appointee will decide whether a case exists and may seek the advice of the Faculty or school as appropriate. The appeal may be allowed or dismissed. If an appeal is allowed, the University Director, Postgraduate Research Studies, or appointee cannot recommend that the degree be awarded but shall recommend that the thesis be re-examined.

The University Director, Postgraduate Research Studies, or appointee will make a determination on the appeal as soon as practicable and will advise appellants, in writing, of the result of the appeal.

5.9 Following final acceptance of the thesis one bound copy and one electronic copy of the thesis must be submitted to the Office of Research for inclusion in the QUT Faculty of Law Library. These copies shall be in the prescribed form as set out in the University Requirements for Presenting Theses and be provided at the candidate’s expense. An additional copy shall be bound at the Faculty’s expense for inclusion in the Faculty Office collection. Any corrections resulting from the examiners’ assessment shall be made prior to binding, and by retyping if they would otherwise be obtrusive.

6. Credit for Research Work Done Elsewhere
6.1 The Course Coordinator may grant credit toward the Master of Justice degree by Research for work done at another institution of similar standing. Such credit shall not be granted unless the candidate provides to the Course Coordinator:
(i) evidence that the candidate has cancelled or terminated enrolment at the other institution, and
(ii) a written undertaking that the candidate will not seek credit in any form or manner for work done at the other institution or any other institutions except to complete the degree at QUT.

7. Time for Completion Requirements
7.1 Except in special circumstances and with the approval of the Course Coordinator:
(i) a full-time candidate shall complete all the requirements for the degree not earlier than the end of the second semester and not later than the end of the sixth semester of candidature;
(ii) a part-time candidate shall complete all the requirements for the degree not earlier than the end of the fourth semester and not later than the end of the eighth semester of the candidature. International students studying on student visas must be enrolled on a full-time basis.

8. Award of Degree
8.1 A candidate who has fulfilled the requirements of these rules and who has otherwise complied with the provisions of all statutes and other rules applicable may be admitted to the degree of Master of Justice (Research) by the University Academic Board on the recommendation of the Law Academic Board and the University Research Degrees Committee.

Master of Laws (Research) LW52

Award title: Master of Laws (Research and Thesis)
CRICOS code: 012654G
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Assistant Dean (Research)

2. Entry Requirements
The following persons shall be eligible to apply for admission as a student for the degree:

2.1 A person who has completed the requirements for the degree of Bachelor of Laws of QUT with at least Second Class Honours Division A, or its equivalent from another institution which, in the opinion of the Assistant Dean, Research, maintains standards comparable with those required for the award of the degree of Bachelor of Laws of QUT, or

2.1.1 A person who has completed the requirements for the degree of Bachelor of Laws of QUT at a standard of Second Class Honours Division B or a lesser standard, or its equivalent from another institution which, in the opinion of the Assistant Dean, Research, maintains standards comparable with those required for the award of the degree of Bachelor of Laws of QUT, or

2.1.2 A person admitted or entitled to be admitted to practice in the State of Queensland.

2.2 Candidates falling within sub-clauses 2.1.1 and 2.1.2 must also satisfy the following to be eligible for admission:

2.2.1 Three years' professional experience in the field in which the proposed research work is to be undertaken, or

2.2.2 Satisfactory completion of an appropriate Masters qualifying program stipulated by the Assistant Dean, Research on the recommendation of the Law Faculty Research Committee. Pending satisfactory completion of a qualifying program, provisional status may be granted to the candidate, or

2.2.3 The submission of professional publications or other appropriate evidence which satisfies the Assistant Dean, Research on the recommendation of the Law Faculty Research Committee that advanced knowledge and research ability has been acquired in the field of law in which the proposed research work is to be undertaken, and

2.2.4 The Assistant Dean, Research is satisfied of the ability of the candidate to complete the required research and thesis towards the degree.

3. Admission and Enrolment

3.1 An application for admission shall be made on the prescribed form:

(i) The Postgraduate Research application form (PR Form) (if the applicant holds citizenship or permanent residency in Australia or New Zealand); or

(ii) The Foreign Research application form (FR Form) (if the applicant is an international candidate).

3.2 Admission of a person as a candidate for the degree shall be at the discretion of the Assistant Dean, Research on the recommendation of the Law Faculty Research Committee.

3.3 A person applying for admission as a candidate for the degree shall apply in accordance with the requirements of the Registrar and shall pay all prescribed fees.
3.4 A person admitted as a candidate may enrol as either a full-time student or a part-time student. International students studying in Australia on student visas may only enrol in full-time programs.

4. Progress Reports

4.1 The Principal Supervisor and candidate are required to report on a six monthly basis (by 30 April and 30 September) on the prescribed form on the candidate's progress and research plans. Reports shall be signed by both the candidate and by the Principal Supervisor and submitted through the Law Faculty Research Committee to the Office of Research for consideration by the Research Degrees Committee.

4.2 Where the candidate's progress is deemed satisfactory, the Research Degrees Committee shall approve continuation of candidature.

4.3 Where progress is deemed unsatisfactory, the Research Degrees Committee, on advice from the Faculty Research Committee, will normally place the candidate under review for a period of up to three months from the date that the candidate is advised in writing of the decision. The Research Degrees Committee will inform the candidate of the required remedial action to be followed taking account of the advice provided by the Principal Supervisor and the Faculty.

4.4 A report on the action taken to resolve the deficiencies in the program must be made to the Faculty Research Committee and the Research Degrees Committee may then approve continuation of candidature if these deficiencies have been redressed and progress is again satisfactory.

4.5 If progress is still unsatisfactory after the Review Period, the Research Degrees Committee, on advice from the Faculty Research Committee, shall ask the candidate to show cause why the enrolment of the candidate should not be terminated.

4.6 If a candidate fails to submit an annual report through their Principal Supervisor to Research Degrees Committee by the due date without applying, in writing, for an extension on the prescribed form two weeks prior to the due date, the Research Degrees Committee may ask the candidate to show cause why the enrolment of the candidate should not be terminated.

4.7 Upon failure of the candidate to show cause, the candidate's enrolment will be terminated.

5. Thesis Requirements

5.1 The thesis submitted for the degree shall be not less than 50,000 words and not more than 60,000 words in length and shall constitute a substantial contribution to knowledge and understanding in the area of the law and subject of the research. It shall include a title page, table of contents and bibliography, and shall otherwise comply with the University's requirements for presenting theses.

5.2 The candidate shall submit a detailed research outline to the Assistant Dean, Research within two months of admission to candidature. The research outline should address the following:

- The proposed title of the thesis;
- The objectives of the program of research and investigation;
- An outline of the proposed research;
- The Research methods and plan;
- The relation of the study to previous work in the same field by the candidate and others;
- A preliminary literature review;
- A substantial bibliography;
- A timeline for the completion of the research;
- A copy of the Research Ethics Review Checklist;
- The proposed supervisor(s) and their credentials;
- An intellectual property agreement if required;
- Memo of Understanding for any external supervisor.

5.2 The Law Faculty Research Committee may, upon the recommendation of the Assistant Dean, Research vary the title of the thesis topic.

5.3 A candidate enrolled for the degree shall, at least once per semester during the period of candidature, consult with the Principal Supervisor and, where appropriate, any Associate Supervisor appointed by the Law Faculty Research Committee on the advice of the Assistant Dean, Research.

5.4 A candidate shall submit three copies of the thesis in the form prescribed by the University for the submission of theses to the Assistant Dean, Research not later than the end of November or May, as the case may be, in the year in which the candidate is required to complete the degree. On submission of the thesis, the candidate shall furnish a written statement to the effect that the thesis is that candidate's work alone, except where due acknowledgment is made in the text, and does not include material which has been previously submitted or accepted for a degree or diploma.

5.5 The Principal Supervisor shall recommend to the Faculty Research Committee the names of two examiners for the thesis, at least one of whom must be external to the University and neither of whom are the candidate's supervisors.

5.6 The Law Faculty Research Committee, through the Office of Research, shall refer the thesis to two examiners. Each examiner shall report, normally within two months of receipt of the thesis, whether in the examiner's opinion, the thesis is of the standard required for the award of the degree. Each examiner shall also recommend that the thesis:

(i) be accepted
(ii) not be accepted, or
(iii) be accepted subject to amendments to be made to the satisfaction of the Principal Supervisor.

5.8 After both examiners' reports are received the Office of Research will forward them to the Assistant Dean, Research, the Principal Supervisor and the candidate with an appropriate covering letter. (Until such time as the examination process is complete the identity of the examiners will be withheld from the candidate.)

Examiners in Agreement

Where both examiners recommend that the thesis be accepted (recommendations (i) or (iii)), the Assistant Dean, Research will consult with the Principal Supervisor to discuss any corrections or revisions that the candidate may be required to make and where revisions are required.

Where corrections or revisions are to be made to the satisfaction of the Principal Supervisor, the Principal Supervisor must certify to the Research Degrees Committee that they recommend acceptance of the thesis in fulfilment of the conditions for the award of the LLM (Research) degree.

Examiners not in Agreement

Where the recommendations of the examiners are not in agreement as to whether the thesis should be accepted for
the award of LLM(Research) or as to whether the thesis may be revised, the Law Faculty Research Committee will refer the thesis to a third examiner.

Upon receipt of the third examiner's report, a majority decision shall be adopted. Where the majority decision is that the thesis be accepted or that the thesis be rejected, this shall be the decision of the examiners as the case may be. Where the recommendation of three examiners clearly differ and no clear majority exists, the Assistant Dean, Research or nominee shall liaise with the Principal Supervisor to determine the further course of action.

Appeals
A candidate whose thesis has failed may lodge an appeal against the outcome of the examination process. The grounds for appeal may be on matters of process only, i.e., procedural irregularities in the conduct of the examination or documented evidence of examiner bias as evidenced by comments in the examiners' reports.

An appeal must be lodged within sixty (60) days of the date of written advice from the Office of Research on the outcome of the examination. This appeal must include the specific grounds on which the appeal is based. Appeals must be submitted in writing to the Office of the Pro-Vice-Chancellor (Research and Advancement). The Director, Postgraduate Research Studies, will determine whether a potential conflict of interest exists in relation to his/her consideration of the appeal. In cases where a conflict of interest exists, the Director, Postgraduate Research Studies, will appoint a member of academic staff, with expertise in research candidate supervision to consider the appeal.

The Director, Postgraduate Research Studies, or appointee will decide whether a case exists and may seek the advice of the Faculty or school as appropriate. The appeal may be allowed or dismissed. If an appeal is allowed, the Director, Postgraduate Research Studies, or appointee cannot recommend that the degree be awarded but shall recommend that the thesis be re-examined.

The Director, Postgraduate Research Studies, or appointee will make a determination on the appeal as soon as practicable and will advise appellants, in writing, of the result of the appeal.

5.9 Following final acceptance of the thesis, one bound copy and one electronic copy of the thesis must be submitted in writing to the Office of the Pro-Vice-Chancellor (Research and Advancement). The Director, Postgraduate Research Studies, will determine whether a procedural irregularity in the conduct of the examination or documented evidence of examiner bias as evidenced by comments in the examiners' reports exists, the Director, Postgraduate Research Studies, or appointee shall liaise with the Principal Supervisor to determine the further course of action.

The Director, Postgraduate Research Studies, or appointee cannot reconsider the examination or documents evidence of examiner bias as evidenced by comments in the examiners' reports. Appeals

7. Time for Completion Requirements
7.1 Except in special circumstances and with the approval of the Assistant Dean, Research:
(i) a full-time candidate shall complete all the requirements for the degree not earlier than the end of the second semester and not later than the end of the sixth semester of candidature;
(ii) a part-time candidate shall complete all the requirements for the degree not earlier than the end of the fourth semester and not later than the end of the eight semester of the candidature.

International students studying on student visas must be enrolled on a full-time basis.

8. Award of Degree
8.1 A candidate who has fulfilled the requirements of these rules and who has otherwise complied with the provisions of all statutes and other rules applicable may be admitted to the degree of Master of Laws by the University Academic Board on the recommendation of the Law Academic Board and the University Research Degrees Committee.

Master of Laws LW51

Award title: Master of Laws (Study Area A)
CRICOS code: 006380A
Campus: Gardens Point
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Director, Graduate Programs

Articulation
This course articulates with the Doctor of Juridical Science (SJD).

Course Structure

Students must undertake a total of 96 credit points (8 units). This can be achieved in one of two ways:
1. Students may nominate a major from the list below and choose units to the value of 96 credit points from that particular major*
2. Students can complete a "generic" major by choosing any postgraduate law unit to the value of 96 credit points.

The units from which 96 credit points shall be chosen are subject to availability.
Advanced Standing
Graduates of QUT's Graduate Diploma in Legal Practice (LP41), who graduated from the first course in 2000 or from subsequent courses, may be deemed to have passed the equivalent of 48 credit points of units in LW51 and may be granted unspecified credit for such units.

Graduates from QUT's Graduate Diploma in Legal Practice prior to 2000 or from another Australian university, the Leo Cussens Institute or the College of Law are eligible for up to 24 credit points of unspecified credit.

Course Structure
Students must undertake a total of 96 credit points (8 units). This can be achieved in 1 of 2 ways:
- Option 1 Students may nominate a major from the lists below and choose all 8 units from within that particular major; OR
- Option 2 Students can complete a "generic" major by choosing 8 units from any of the lists below to the value of 96 cps

Note: International students may normally only be able to undertake a "generic" major

Graduate Certificate in Critical Criminology JS26
Award title: Graduate Certificate in Critical Criminology
CRICOS code: Not required
Campus: Kelvin Grove and External
Duration: 1 year multimodal or external part-time or 1 year external
Credit points: 48
Course coordinator: Professor Rod Broadhurst

Course Requirements
The Graduate Certificate in Critical Criminology consists of four units of twelve credit points each. The four units focus on foundations in criminology, juvenile justice, crime prevention and crime control.

Articulation to Master of Justice
A student who has successfully completed the Graduate Certificate in Critical Criminology with a GPA of 5.0 or better, may articulate to the Master of Justice (Critical Criminology) and receive credit for their specialist area study of 48 credit points.

Part time/External Course Structure
Semester 1
JSP131 Juvenile Justice
JSP132 Foundations in Criminology
Semester 2
JSP133 Crime Prevention
JSP134 Crime Control and Governance

Graduate Certificate in Justice JS25
Award title: Graduate Certificate in Justice
Campus: External and Kelvin Grove
Duration: 6 months multimodal or external full-time or 1 year part-time or 1 year part-time multimodal or external
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Professor Rod Broadhurst

Course Requirements
The Graduate Certificate in Justice consists of four units of 12 credit points each. The four units will be chosen from across any of the Graduate Certificate Programs (Strategic Intelligence JS29; Critical Criminology JS26; Organised Crime and Corruption Investigation JS27; and Justice Policy JS28).

Articulation to Master of Justice
A student who has successfully completed the Graduate Certificate in Justice with a GPA of 5.0 or better, may articulate to the Master of Justice and receive credit of 48 credit points.

Course Structure
Full-time Course Structure
Semester 1
Select any four units from:
JSP131 Juvenile Justice
JSP141 Organised Crime and Corruption
JSP142 Forensic Investigation Methods and Strategies
JSP161 Fundamentals of Intelligence
JSP162 Managing Intelligence
Semester 2 (MID-YEAR ENTRY)
Select any four units (48 cps) from the following:
JSP134 Crime Control and Governance
JSP143 Proceeds of Crime and Money Laundering
JSP144 Evidence in Organised Crime Investigations
JSP154 Human Rights and Global Justice
JSP163 Intelligence Research Issues & Methodology
JSP164 Intelligence and National Security

Part-time/External Course Structure
Select any 2 units from both Sem 1 & 2 Full Time Programs above (total of 48cps)
NB: Students may take underload of one unit only per semester

Graduate Certificate in Law LW60
Award title: Graduate Certificate in Law (Study Area A)
CRICOS code: 027286C
Campus: Gardens Point
Duration: 1 semester (Generic course and select majors only) full-time or 2 semesters part-time
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Director, Graduate Programs

Course Structure
Students must undertake a total of 48 credit points (4 units). This can be achieved in one of two ways:
1. Students may nominate a major from the list below and choose 4 units from that particular major* (or to the value of 48 credit points);
   or
2. Students can complete a "generic" major by choosing any 4 postgraduate law units (or to the value of 48 credit points)

The units from which 48 credit points shall be chosen are subject to availability.

Majors
Commercial Transactions, Corporate Law, Criminal Justice, Environment, International Law, Media and Communications Law, Planning and Resources, Property, Public Law, Generic

*currently under review

NOTE: International students are normally only able to undertake a "generic" major

Articulation to the Master of Laws by Coursework
A student who has successfully completed the Graduate Certificate in Law and who does not hold a Bachelor of Laws degree or equivalent, may be permitted to enter the Master of Laws course if they achieve a minimum GPA of 5.5 in the Graduate Certificate in Law, and with the approval of the Director of Graduate Programs.

Course Structure
Students must undertake a total of 48 credit points (4 units). This can be achieved in 1 of 2 ways:
Option 1 Students may nominate a major from the lists below and choose all 4 units from within that particular major;
OR
Option 2 Students can complete a "generic" major by choosing 4 units from any of the lists below to the value of 48cps

Note: International students may normally only be able to undertake a "generic" major

List of Majors available:
Commercial Transactions
LWN022 Banking and Finance Law
LWN025 Research Project 1A
LWN030 Dispute Resolution/Mediation

LWN161 Law and Policy of the World Trade Organisation
LWN162 The Common Law System

Schedule of Unit Offerings for current year:
Please refer to
http://www.law.qut.edu.au/courses/pgrad/units.jsp

NOTE: the units in the majors for this course are currently
under review and are subject to approval

Graduate Certificate in Legal Studies
LW65
Award title: Graduate Certificate in Legal Studies
CRICOS code: 040307E
Campus: Gardens Point and External
Duration: 1 semester full-time or 2 semesters part-time
Credit points: 48 (full-time standard semester: 48; part-
time standard semester: 24)
Course coordinator: Director, Graduate Programs

Advanced Standing
Students who have previously undertaken undergraduate
law units (equivalent to core units in LW65) at QUT may
apply for a maximum of 24 credit points for these units to-
wards the LW65 Graduate Certificate in Legal Studies

Full-time Course Structure
Introduction to Legal Research
LWB136 Contracts A
LWB138 Fundamentals of Torts
LWB141 Legal Institutions and Method
PLUS
LWB142 Law, Society and Justice
OR
LWB143 Legal Research and Writing
Depending on Semester on entry, students will undertake
either LWB142 OR LWB143

Part-time Course Structure
Option 1: LWB142 Law, Society & Justice
Year 1, Semester 1
Introduction to Legal Research
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice
Year 1, Semester 2
LWB136 Contracts A
LWB138 Fundamentals of Torts

Option 2: LWB143 Legal Research & Writing
Year 1, Semester 1
Introduction to Legal Research
LWB136 Contracts A
LWB141 Legal Institutions and Method
Year 1, Semester 2
LWB138 Fundamentals of Torts
LWB143 Legal Research and Writing
These course structures are based on Semester 1 entry to
the course

Graduate Certificate in Organised Crime and Corruption Investigation JS27

Award title: Graduate Certificate in Organised Crime and Corruption Investigation
CRICOS code: Not required
Campus: Kelvin Grove and External
Duration: 1 year multimodal or external part-time or 1 year
external
Credit points: 48
Course coordinator: Professor Rod Broadhurst

Course Requirements
The Graduate Certificate in Organised Crime and Corruption Investigation consists of four units of twelve credit
points each. They comprise: Organised Crime & Corruption; Forensic Investigation Methods and Strategies; Pro-
ceeds of Crime and Money Laundering; Evidence in Organ-
ised Crime Investigations.

Articulation to Master of Justice
A student who has successfully completed the Graduate Certificate in Organised Crime and Corruption Investigation with a GPA of 5.0 or better, may articulate to the Master of Justice (Organised Crime and Corruption Investigation) and receive credit for their specialist area study of 48 credit points.

Course Structure
Part time/External Course Structure
Semester 1
JSP141 Organised Crime and Corruption
JSP142 Forensic Investigation Methods and Strategies
Part time/External Course Structure
Semester 2
JSP143 Proceeds of Crime and Money Laundering
JSP144 Evidence in Organised Crime Investigations
NB: Students may take underload of one unit only per se-
semester

Graduate Certificate in Strategic Intelligence JS29

Award title: Graduate Certificate in Strategic Intelligence
CRICOS code: Not required
Campus: External
Duration: 1 year part-time external
Credit points: 48
Course coordinator: Dr Ian Wells
Discipline coordinator: Dr Ian Wells

Course Requirements
The Graduate Certificate in Strategic Intelligence consists of four units of twelve credit points each: Fundamentals of Intelligence; Intelligence Research Issues & Methodology; Intelligence & National Security; & Managing Intelligence.

Articulation to Master of Justice
A student who has successfully completed the Graduate Certificate in Strategic Intelligence with a GPA of 5.0 or better, may articulate to the Master of Justice (Strategic Intelligence) and receive credit for their specialist area study of 48 credit points.

Course Structure
Part time/External Course Structure
Semester 1
JSP161 Fundamentals of Intelligence
JSP162 Managing Intelligence
Part time/External Course Structure
Semester 2
Bachelor of Justice (Honours) JS40

Award title: Bachelor of Justice (Honours)
CRICOS code: 020313F
Campus: Kelvin Grove
Duration: 1 year full-time or 2 years part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Professor Rod Broadhurst

Course Structure
The Bachelor of Justice (Honours) is a 96 credit-point course. Students complete four (4) prescribed units (48 credit points) and a dissertation (48 credit points). The dissertation calls for students to design, develop and implement a substantial research project. Students can pursue original lines of thought, formulate and test hypotheses, develop problem-solving strategies and make decisions. Students are expected to demonstrate high ethical standards, awareness of sociocultural and equity issues, and professional accountability. Students should contact the Honours Coordinator to discuss thesis and supervisor.

Full-time Course Structure
Year 1, Semester 1
JSB411 Theories Of Justice
JSB415 Advanced Research Management
One approved research methods unit
Approved Elective

Bachelor of Justice JS31

Award title: Bachelor of Justice
CRICOS code: 006117E
Campus: Kelvin Grove and External
Duration: 3 years full-time or 6 years part-time or 6 years (February entry only) external
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Prof. Rod Broadhurst

Course Requirements
The course will be offered over 3 years full-time, 6 years part-time and external mode. The course structure consists of 24 units - a total of 288 credit points. Students must complete eight Justice Studies core units (96 credit points) and a primary major comprising six units (72 credit points), to be selected from ONE of three areas of specialisation available in Critical Criminology; Investigations and Policing, and Justice Policy. The remaining ten units (120 credit points) may consist of either a second major of six units (72 credit points) and 4 electives OR 10 elective units selected from the Justice Studies areas of specialisation and electives. Students may enrol in up to four units (48 credit points) offered outside of the School, which may include up to two units (24 credit points) from another institution, subject to prior approval from the course coordinator.

Course structure
Full-time Course Structure
Year 1, Semester 1
JSB131 Framing Social Justice
JSB132 Professional Skills
JSB133 Law and Government
JSB134 Social Ethics and the Justice System

Year 1, Semester 2
JSB135 Unlocking Criminal Justice
JSB136 Forensic Psychology and the Law
JSB137 Politics of Law
JSB138 Crimes of Violence

Year 2, Semester 1
Select four units (48 cps) from the following:
EITHER
Critical Criminology Major
JSB231 Understanding Criminology
JSB232 Youth Justice
Secondary Major / Elective
Secondary Major / Elective

Investigations and Policing Major
JSB241 Introduction to Investigations and Policing
JSB242 Criminal Law in Context
Secondary Major / Elective
Secondary Major / Elective

OR
Justice Policy Major
JSB251 Policy, Governance and Justice
Secondary Major / Elective
Secondary Major / Elective
Elective

Year 2, Semester 2
Select four units (48 cps) from the following:
EITHER
Critical Criminology Major
JSB233 Crime and Community Corrections
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective

Investigations and Policing Major
JSB243 Intelligence Led Investigations
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective
Elective

OR
Justice Policy Major
JSB252 Citizenship and Justice
JSB254 Public Ethics and Responsibility
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective

Year 3, Semester 1
Select four units from the following:
EITHER
Critical Criminology Major
JSB331 Prisons as Industry
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective

Investigations and Policing Major
JSB341 Investigations, Evidence and Police Powers
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective
Secondary Major / Elective
Elective

OR
Justice Policy Major
JSB351 Administrative Justice
Students study a combination of Justice Studies and Law units in the first three years of the course, whilst the final two years are devoted to the study of Law units only. In the Bachelor of Justice component of the course, students are required to select a major (6 units) from one of the following fields: Critical Criminology *Investigations and Policing *Justice Policy.

**Course Structure**

**Year 1, Semester 1**
JSB131 Framing Social Justice  
JSB132 Professional Skills  
JSB134 Social Ethics and the Justice System  
LWB141 Legal Institutions and Method  
LWB142 Law, Society and Justice

**Year 1, Semester 2**
JSB135 Unlocking Criminal Justice  
JSB136 Forensic Psychology and the Law  
JSB138 Crimes of Violence  
LWB143 Legal Research and Writing  
LWB144 Laws and Global Perspectives

**Year 2, Semester 1**
LWB136 Contracts A  
Select three units (36 cps) from:  
Critical Criminology Major (CCL)  
JSB231 Understanding Criminology  
JSB232 Youth Justice  
Elective/Secondary Major unit OR  
Investigations and Policing Major (IVP)  
JSB241 Introduction to Investigations and Policing  
JSB242 Criminal Law in Context  
Elective/Secondary Major unit OR  
Justice Policy Major (JPL)  
JSB251 Policy, Governance and Justice  
Elective/Secondary Major unit  
Elective/Secondary Major unit

**Year 2, Semester 2**
LWB137 Contracts B  
Select three units (36 cps) from:  
Critical Criminology Major (CCL)  
JSB233 Crime and Community Corrections  
Elective/Secondary Major unit OR  
Investigation and Policing Major (IVP)  
JSB243 Intelligence Led Investigations  
Elective/Secondary Major unit OR  
Justice Policy Major (JPL)  
JSB252 Citizenship and Justice  
JSB253 Watchdogs: Warriors, Wimps and Witch-Hunts  
Elective/Secondary Major unit

**Year 3, Semester 1**
LWB138 Fundamentals of Torts  
Select three units (36 cps) from:  
Critical Criminology Major (CCL)  
JSB331 Prisons as Industry  
Elective/Secondary Major unit OR  
Investigation and Policing Major (IVP)  
JSB341 Investigations, Evidence and Police Powers  
Elective/Secondary Major unit  
Elective/Secondary Major unit
Other Course Requirements

It is a requirement that distance education students participate in two three-day attendance schools per year in addition to the orientation attendance school for commencing students only. The attendance schools are an integral component of the distance education course and are compulsory. When undertaking the course via distance education, it is the students' responsibility to ensure they have access to a suitable law library.

Professional Recognition

The QUT Bachelor of Laws course is an approved degree for the purposes of the Legal Practitioners Admission Rules. Accordingly, it enables graduates to satisfy the academic requirements for admission to practise as a solicitor and/or barrister in all Australian states and territories. The QUT LLB degree qualification is also recognised for admission purposes in West and East Malaysia, Fiji and Papua New Guinea.

Full-time Course Structure

**Year 1, Semester 1**
- Introduction to Legal Research
- LWB136 Contracts A
- LWB137 Contracts B
- LWB138 Fundamentals of Torts
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- LWB143 Legal Research and Writing
- LWB144 Laws and Global Perspectives

**Year 2, Semester 1**
- LWB231 Introduction to Public Law
- LWB235 Australian Federal Constitutional Law
- LWB236 Real Property A
- LWB237 Real Property B
- LWB238 Fundamentals of Criminal Law
- LWB239 Criminal Responsibility
- LWB240 Principles of Equity
- LWB241 Trusts
- LWB242 Evidence
- LWB243 Commercial and Personal Property Law
- LWB244 Corporate Law
- LWB245 Advanced Research and Legal Reasoning

**Year 3, Semester 1**
- LWB332 Commercial and Personal Property Law
- LWB333 Theories of Law
- LWB334 Corporate Law
- LWB335 Administrative Law
- LWB336 Administrative Law
- LWB337 Professional Responsibility
- LWB338 Principles of Equity
- LWB339 Criminal Responsibility
- LWB340 Trusts

**Year 4, Semester 1**
- LWB431 Civil Procedure
- LWB432 Evidence
- LWB433 Professional Responsibility
- LWB434 Advanced Research and Legal Reasoning

**Year 4, Semester 2**
- LWB435 Corporate Law
- LWB436 Corporate Law
- LWB437 Criminal Responsibility
- LWB438 Trusts
- LWB439 Professional Responsibility
- LWB440 Advanced Research and Legal Reasoning

**Year 5, Semester 1**
- LWB531 Administrative Law
- LWB532 Commercial and Personal Property Law
- LWB533 Theories of Law
- LWB534 Corporate Law
- LWB535 Administrative Law
- LWB536 Administrative Law
- LWB537 Professional Responsibility
- LWB538 Principles of Equity
- LWB539 Criminal Responsibility
- LWB540 Trusts

**Year 5, Semester 2**
- LWB531 Administrative Law
- LWB532 Commercial and Personal Property Law
- LWB533 Theories of Law
- LWB534 Corporate Law
- LWB535 Administrative Law
- LWB536 Administrative Law
- LWB537 Professional Responsibility
- LWB538 Principles of Equity
- LWB539 Criminal Responsibility
- LWB540 Trusts

Part-time/External Course Structure

**Year 1, Semester 1**
- Introduction to Legal Research
- LWB136 Contracts A
- LWB137 Contracts B
- LWB138 Fundamentals of Torts
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- LWB143 Legal Research and Writing
- LWB144 Laws and Global Perspectives

**Year 2, Semester 1**
- LWB231 Introduction to Public Law
- LWB235 Australian Federal Constitutional Law
- LWB236 Real Property A
- LWB237 Real Property B
- LWB238 Fundamentals of Criminal Law
- LWB239 Criminal Responsibility
- LWB240 Principles of Equity
- LWB241 Trusts
- LWB242 Evidence
- LWB243 Commercial and Personal Property Law
- LWB244 Corporate Law
- LWB245 Advanced Research and Legal Reasoning

OVERVIEW

The Faculty of Science seeks to provide graduates with interesting and rewarding careers.

Fully equipped scientific and computing laboratories and state-of-the-art lecture theatres assist in the practical delivery of innovative teaching programs.

Science education in the Faculty is further enriched by a number of research programs which come under the control of the Science Research Centre.

The Deans Scholars Accelerated Honours Program for high achieving students fast tracks science studies while workplace learning links with industry provide students with the opportunity to earn a salary while progressing through their degree.

Double degree options are available as part of a flexible program of academic studies.

The Bachelor of Pharmacy course offered at Gardens Point focuses on community and hospital pharmacy practice.

The Faculty offers a range of courses within its four multi-disciplinary schools: School of Life Sciences, School of Mathematical Sciences, School of Natural Resource Sciences and School of Physical and Chemical Sciences.

The School of Life Sciences offers studies in courses focused on biomedical and medical sciences, biotechnology, microbiology, and biochemistry. The School enjoys close working relationships with industry which, in turn, help to provide students with a ‘hands-on’ approach to all of its courses.

The School of Mathematical Sciences offers studies in applied mathematics, mathematical finance, applied statistics, scientific computation and visualisation, and operations research. There is an emphasis on the applications of mathematics and many of the units are enriched by examples from business and industry.

The School of Natural Resource Sciences offers major studies in environmental science, ecology and geoscience, complemented with the co-majors in biodiversity, and applied geology.

The School of Physical and Chemical Sciences offers majors in both Physics and Chemistry with co-majors in astrophysics, applied physics, forensic science and industrial chemistry. Forensic science can also be taken as a double major with chemistry or biotechnology. The School also offers courses in medical imaging technology and radiotherapy technology, leading to careers in diagnostic and therapeutic radiography.

The first year of the Applied Science course is offered at the Carseldine campus as well as at Gardens Point.

RESEARCH CENTRES

Science Research Centre

The Science Research Centre (SRC) provides an environment within which a variety of programs interact, developing new and innovative collaborations at the interface be-
tween disciplines. Our knowledge of nature is expanding at virtually an exponential rate and with this comes opportunities in complex areas requiring multi-disciplinary research teams. The SRC has been structured so as to capture opportunities in these multi-disciplinary projects, bringing together the expertise from different research programs to focus on a complex research problem.

The SRC has a broad range of programs which are grouped within four clusters: molecular biotechnology, physical and chemical sciences, natural resources and mathematical sciences. These clusters provide and maintain state of the art technology equipment and facilities; importantly, these facilities are shared across the SRC and are available to all programs giving researchers and research students access to the extensive range of equipment and technologies with the SRC.

**Cooperative Research Centre for Diagnostics**

The CRC for Diagnostics (http://diagnosticscrc.org) based at QUT is a cooperative venture between research organisations (QUT, LaTrobe University, CSIRO and Child Health Research Institute) and Queensland Medical Laboratory. Centre participants are located in Queensland, Victoria and South Australia. Through effective technology transfer, outcomes will be: reduced health care costs through the better targeting of therapeutics, earlier diagnosis, and exploitation of genomics and proteomics information to allow greater specificity in diagnosis and treatment of an individual. Achievements to date include the multi-million dollar sale of a DNA detection method to Affymetrix (a large US biotechnology company) and the formation in 2002 of a new company, Evogenix, based in Melbourne. Other achievements include numerous patented DNA detection methods and diagnostic kits. Originally formed as the CRC for Diagnostic Technologies in 1995, this $80 million centre was re-funded as a new centre in 2001 and is jointly funded by the participants and the Commonwealth and State Governments.

**Research programs**

- Protein profiling: expression profiles for the diagnosis and monitoring of autoimmune diseases
- High Affinity Reagents: identification of novel reagents and platforms for library construction
- Genome Diagnostics: discovery of SNPs for human physical characteristics and disease
- Infectious Disease Diagnostics: novel methods and reagents for improved detection
- Homogenous Reporter Systems for one-step diagnostic assays.
Master of Applied Science (Medical Physics) PH80

Award title: Master of Applied Science (Medical Physics)
CRICOS code: 043548G
Campus: Gardens Point
Duration: 3 semesters (1.5 years) full-time or 6 semesters (3 years) part-time
Credit points: 144 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Brian J Thomas
Discipline coordinator: Dr Andrew Fielding

Other Majors
See also the separate entry for the following major in this course: Master of Applied Science (Medical Ultrasound).

Course Design
This degree consists of two stages. Stage 1 (which is equivalent to the Graduate Diploma - PH71) comprises assessed coursework such as advanced lectures, seminars, reading courses or independent study. If undertaken full-time, students will need an average of 14 hours a week of formal contact.

In Stage 2 (Master of Applied Science - PH80) students undertake a program of supervised research and investigation that can be completed at QUT, or in a suitable external institution. Students can graduate with a Graduate Diploma in Medical Physics after satisfactory completion of Stage 1.

Course Structure - First Semester Entry
STAGE 1: Students must complete units from the list below, totalling 96 credit points:

Year 1, Semester 1 (February to June)
- LSB142 Human Anatomy and Physiology
- PCN113 Radiation Physics
- PCN114 Microprocessors and Instrumentation
- PCN211 Physics of Medical Imaging

Year 1, Semester 2 (July to October)
- PCN112 Medical Imaging Science
- PCN212 Radiotherapy
- PCN214 Health and Occupational Physics
- PCN218 Research Methodology and Professional Studies

STAGE 2: (Project units in Stage 2 are offered in all semesters)
- Project Over One Semester or Summer Program
- Project Over Two Semesters
- PCN540-1 Project (Part-time)
- PCN540-2 Project (Part-time)

Note:
A student may request an extension of time in which to submit the project report for assessment. A request for an extension of time up to a maximum of six months shall be made in writing through the Head of School to the Dean. Any request for a further extension, or any request for an extension to a date later than six months after the original due date, should be made in writing to the Academic Board. The Academic Board may grant the extension under such conditions as it may consider appropriate, or may award the student a "Fail" result in the project unit. A student who has received a "Fail" result in the project unit may re-enrol in the unit only in exceptional circumstances and with the express permission of the Academic Board.

Course structure - Mid-year Entry

STAGE 1: Students must complete units from the list below, totalling 96 credit points:

First Semester (July to October)
- LSB258 Principles of Human Physiology
- PCN112 Medical Imaging Science
- PCN212 Radiotherapy
- PCN214 Health and Occupational Physics

Second Semester (February to June)
- PCN113 Radiation Physics
- PCN114 Microprocessors and Instrumentation
- PCN211 Physics of Medical Imaging
- PCN218 Research Methodology and Professional Studies

Stage 2: (Project units in Stage 2 are offered in all semesters)
- Project Over One Semester or Summer Program
- PCN520 Project (Full-time)
- Project Over Two Semesters
- PCN540-1 Project (Part-time)
- PCN540-2 Project (Part-time)

Note:
A student may request an extension of time in which to submit the project report for assessment. A request for an extension of time up to a maximum of six months shall be made in writing through the Head of School to the Dean. Any request for a further extension, or any request for an extension to a date later than six months after the original due date, should be made in writing to the Academic Board. The Academic Board may grant the extension under such conditions as it may consider appropriate, or may award the student a "Fail" result in the project unit. A student who has received a "Fail" result in the project unit may re-enrol in the unit only in exceptional circumstances and with the express permission of the Academic Board.

Master of Applied Science (Medical Ultrasound) PH80

Award title: Master of Applied Science (Medical Ultrasound)
CRICOS code:
Campus: Gardens Point
Duration: 6 semesters (3 years) part-time
Credit points: 144 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Brian Thomas
Discipline coordinator: Natasha Kazich

Other Majors
See also the separate entry for the following major in this course: Master of Applied Science (Medical Physics).

Professional Recognition
This course is accredited with the Australasian Sonographer Accreditation Registry (ASAR).

Course Design
This degree consists of two stages. Stage 1 (Graduate Diploma - PH71) takes four semesters of part-time study to complete. Students must show that they have access to suitable clinical experience for the duration of Stage 1 before beginning the degree. Lectures are conducted in intensive four to five week blocks in each semester. Students undertake clinical experience throughout the semester.

Stage 2 (Master of Applied Science - PH80) involves completion of a research project and submission of a thesis. Students can undertake this project externally under QUT staff supervision on appointment of a suitable external su-
supervisor. This stage takes two semesters part-time to complete after successful completion of Stage 1.

**Course Structure**

STAGE 1: Students must complete the units listed below (total 96 credit points)

**Semester 1**
- PCN159 Ultrasonic Examination 1
- PCN162 Principles of Medical Ultrasound
- PCN197-1 Clinical Attachment 1

**Semester 2**
- PCN197-2 Clinical Attachment 1
- PCN356 Ultrasonic Examinations 2

**Semester 3**
- PCN297-1 Clinical Attachment 2
- PCN355 Vascular Ultrasound
- PCN357 Advanced Ultrasound Topics

**Semester 4**
- PCN218 Research Methodology and Professional Studies
- PCN297-2 Clinical Attachment 2

**Notes:**

The PCN197 and PCN297 clinical attachment units are 2-semester units.
Each clinical attachment unit (ie PCN197 and PCN297) involves clinical experience in the order of 3 days per week or equivalent.

STAGE 2:
- Project Over One Semester or Summer Program
- PCN520 Project (Full-time)
- Project Over Two Semesters
- PCN540-1 Project (Part-time)
- PCN540-2 Project (Part-time)

**Note:**

A student may request an extension of time in which to submit the project report for assessment. A request for an extension of time up to a maximum of six months shall be made in writing through the Head of School to the Dean. Any request for a further extension, or any request for an extension to a date later than six months after the original due date, shall be made in writing to the Academic Board. The Academic Board may grant the extension under such conditions as it may consider appropriate, or may award the student a "Fail" result in the project unit. A student who has received a "Fail" result in the project unit may re-enrol in the unit only in exceptional circumstances and with the express permission of the Academic Board.

### Master of Applied Science (Research)

**SC80**

**Award title:** Master of Applied Science  
**CRICOS code:** 014020C  
**Campus:** Gardens Point  
**Duration:** 4 semesters (2 years) full-time or 8 semesters (4 years) part-time  
**Credit points:** 192 (full-time standard semester: 48; part-time standard semester: 24)  
**Course coordinator:** Associate Professor Peter Fredericks  
**Discipline coordinator:** Dr Godwin Ayoko (Chemistry); Associate Professor Terry Walsh (Life Sciences); Professor Vo Anh (Mathematics); Associate Professor Peter Mather (Natural Resource Sciences); Associate Professor Brian J Thomas (Physics)

**Course Design**

This degree consists of coursework that can comprise up to one-third of the course and research, which must be at least two-thirds of the course. The assessed coursework may be in the form of advanced lectures, seminars, reading courses, or independent study designed to focus on information retrieval skills. The research component is a program of supervised research and investigation at a level of scientific competence significantly higher than that expected from an undergraduate degree and, typically, a masters thesis does not need to be as substantial as a Doctor of Philosophy thesis.

Students undertake a program of research and investigation on a topic approved by the Academic Board. All projects should be sponsored either by outside agencies such as industry, government authorities, or professional organisations, or by the University itself.

Students entering the course with an honours degree or its equivalent to candidates with substantial relevant work experience normally gain exemptions to a maximum of 96 credit points at the discretion of the Academic Board on the recommendation of the Head of School.

Students entering the course with a graduate diploma may gain exemption to a maximum of 96 credit points at the discretion of the Academic Board on the recommendation of the Head of School.

**A full-time candidate who does not hold an honours degree appropriate to the course of study will normally be required to complete both course and research work, including submission of the thesis for examination during a period of registration of 24 months. The corresponding period in the case of a part-time candidate shall be 48 months. In special cases the Academic Board may approve a shorter period.**

**A holder of an honours degree or its equivalent appropriate to the course of study may submit the thesis for examination after not less than 12 months of registration if a full-time student, or 24 months if a part-time student. In special cases the Academic Board may approve a shorter period.**

**1. General Conditions**

1.1 The Council of the Queensland University of Technology was established in 1989 under the Queensland University of Technology Act 1988.

1.2 The Council’s power to approve recommendations from faculty academic boards regarding the registration, supervision and examination of research degree candidates and to develop policy and procedure relating to research degrees is exercised through a Research Management Committee which shall be a subcommittee of University Academic Board.

1.3 Research Management Committee has delegated responsibility for day-to-day administration of research masters degree courses to Faculty academic boards. Academic boards shall report semi-annually to the Research Management Committee on progress made by research masters degree candidates.

1.4 Unless the context otherwise indicates or requires, the words academic board and faculty shall refer to the faculty in which the candidate registers.

1.5 In order to qualify for the award of the degree of Master of Applied Science, a candidate must:

- have completed the approved course of study under the supervision prescribed by the Academic Board
- have submitted, and the Academic Board have accepted, a thesis prepared under the supervision of the supervisor
3.2 The program must be such as to enable the candidate to develop and demonstrate a level of scientific competence significantly higher than that expected of a first degree graduate. The required competence normally would include mastery of relevant techniques, investigatory skills, critical thinking, and a high level of knowledge in the specialist area.

3.3 The program includes both coursework and research. For all Schools except Mathematical Sciences the coursework is a program of up to 52 credit points as defined in sections 3.9 and 3.12 as appropriate for each candidate. The unit IFN001 Advanced Information Retrieval Skills (4 credit points) should normally be included.

The research component is a program of supervised research and investigation of at least 140 credit points as described in 3.1 and 3.2.

For Mathematical Sciences the proportion of coursework to research work is tailored to the individual student and will be approved by the School Director of Research.

3.4 The student's progress will be monitored throughout the first 96 credit points of the course. Between 9 and 12 months into the program the student is required to undertake a Confirmation process. Where the School Research & Postgraduate Training Committee, or the School Director of Research, on the advice of the examination panel, is of the opinion that progress is not satisfactory, the student will be advised to transfer his/her enrolment to the SC71 Graduate Diploma in Applied Science course.

3.5 The Confirmation will comprise several elements:
   (i) a literature survey of the topic under study
   (ii) a seminar on the background to the topic, progress to date, and future work to be presented to the School
   (iii) a plan of work (including timeline) which will lead to submission of the thesis by the defined submission date.

3.6 At Confirmation an Examination Panel will be appointed consisting of three members, two of whom should be the Principal Supervisor and the Associate Supervisor (if one has been appointed) and other Academic Staff member(s) appointed by the School Director of Research. This Panel will decide if progress is satisfactory and if the plan of research is realistic. If necessary, they will assist the student to formulate an improved plan.

3.7 The student is normally required to submit their thesis by a particular date 1 year and nine months after commencing the Program. This date will be calculated when the student commence the Program and the student will be advised of its significance.

3.8 If a student is unable to undertake confirmation or submit his/her thesis then he/she may request an extension from the School Research & Postgraduate Training Committee. Such a request should be made at least one month before the due date. The student is expected to have a good reason, backed by hard evidence, for such a request.

3.9 Coursework at masters level may be conducted in a number of ways such as:
   • advanced lecture courses
   • seminars in which faculty and students present critical studies of selected problems within the subject field
   • independent study or reading courses.

In all cases, coursework is based upon a formal syllabus setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed read-
ing material and the method of assessment of progress through and at the end of the course.

3.10 A candidate shall be required to participate in and present seminars as considered appropriate by the Principal Supervisor. The candidate shall be notified of minimum attendance requirements at the time of acceptance of enrolments.

3.11 Students entering the course with an Honours degree or its equivalent, or candidates with substantial relevant work experience, may gain exemptions to a maximum of 96 credit points at the discretion of the Academic Board on the recommendation of the Head of School.

3.12 Students entering the course with a Graduate Diploma may gain exemption to a maximum of 96 credit points at the discretion of the Academic Board on the recommendation of the Head of School.

3.13 An application for registration should set out the candidate’s intended course of study in broad outline but with specific objectives for the first year. The description should include the area of study within which the candidate’s course lies, the coursework to be undertaken and the proposed title of the thesis to be written.

4. Period of Time for Completion of Course of Study
4.1 A full-time candidate who does not hold an Honours degree appropriate to the course of study will normally be required to complete both course and research work, including submission of the thesis for examination during a period of registration of 24 months. To assist in meeting this goal there is a fixed submission date for the thesis 1 year and 9 months after commencing the Program. For students enrolled part-time the thesis submission date will be 3 years and 6 months after commencement.

4.2 A holder of an Honours degree or its equivalent appropriate to the course of study may submit the thesis for examination after not less than 12 months of registration if a full-time student, or 24 months if a part-time student. In special cases the Academic Board may approve a shorter period.

4.3 Where application is made for permission to extend the fixed submission date, details of the candidate’s progress shall be presented to the School Research & Postgraduate Studies Committee together with the reasons for the delay in completing the work and the expected date of completion. Where the Committee agrees to an extension, it will set a new submission date and may set a limit to the maximum period of registration in the program.

5. Transfer of Registration
5.1 Where a candidate has undertaken part of a proposed course of study as a registered student in another institution, this period of registration may, on application in writing to the Academic Board at the time of application for registration, be counted towards the candidate’s period of registration in the QUT course. The application must include details of the work already undertaken, the reasons for the transfer and the expected date of completion.

5.2 Applications for transfer normally should be submitted at least 12 months in advance of the probable date of submission of the thesis.

6. Supervision
6.1 For each candidate the Academic Board shall appoint one or more supervisors with appropriate experience provided that, where more than one supervisor is appointed, one shall be nominated as the Principal Supervisor and the others as Associate Supervisors.

6.2 In the case of an internal student, the Principal Supervisor normally shall be from the academic staff of the school where the student carries out the work.

6.3 In the case of an external student, the Principal Supervisor normally shall be from the academic staff of the school supporting the work and at least one Associate Supervisor shall be from the sponsoring organisation.

7. Place and Conditions of Work
7.1 The research program is carried out under supervision in a suitable environment normally in Australia.

7.2 The Academic Board shall not admit a candidate to undertake a program of research based at the University unless it has received a statement from the Head of School in which the study is proposed that, in their opinion, the applicant is a fit person to undertake a research program leading to the masters degree, that the program is supported, and that the school/centre is willing to undertake the responsibility of supervising the applicants work.

7.3 The Academic Board shall not admit a candidate to undertake a research program based at a sponsoring establishment unless it has received:

- a statement from the employer or director of the sponsoring institution that the applicant will be provided with facilities to undertake the research project and that they are willing to accept responsibility for supervising the applicants work, and
- a statement from the Head of School or the Director of the Centre in which the study is proposed that, in their opinion, the applicant is a fit person to undertake a research program leading to the Masters degree, that the program is supported, and that after consideration of the proposed external facilities and supervision, the school is willing to accept the responsibility of supervising the work.

8. Thesis
8.1 In the form of presentation, availability and copyright, the thesis shall comply with the provisions of the document Requirements for Presenting Theses.

8.2 The candidate’s application for registration should set out the intended course of study in broad outline but with specific objectives for the first year. The description should include the area of study within which the candidate’s course lies, the coursework to be undertaken and the proposed title of the thesis to be written.

Between 9 and 12 months into the program the student is required to undertake a Confirmation process which will include a plan of work (including timeline) which will lead to submission of the thesis by the defined submission date. The candidate shall give two months notice of intention to submit the thesis. Such notice shall be accompanied by the appropriate fee, if any.

8.3 The thesis shall comply with the following requirements:

- a significant portion of the work described must have been carried out subsequent to initial registration for the degree.
- it must describe a program of work carried out by the candidate, and must involve either an original contribu-
tion to knowledge or an original application of existing knowledge.
- It must reach a satisfactory standard of literary presentation.
- It shall be the candidate's own account of the work. Where work is carried out jointly with other persons, the Academic Board shall be advised of the extent of the candidate's contribution to the joint work.
- The thesis shall not contain as its main content any work or material which the student has previously submitted for another degree or similar award.
- Supporting documents, such as published papers, may be submitted with the thesis if they have a bearing on the subject of the thesis.
- The thesis shall contain a concise abstract.

8.4 Except with the specific permission of the Academic Board, the thesis must be presented in the English language. Such permission must be sought at the time of application for registration, and will not be granted solely on the grounds that the candidate's ability to satisfy the examiners will be affected adversely by the requirement to present the thesis in English.

8.5 Subject to QUT's Intellectual Property policy, the copyright of the thesis is vested in the candidate.

8.6 Where a candidate or the sponsoring establishment wishes the thesis to remain confidential for a period of time after completion of the work, application for approval must be made to the Academic Board when the thesis is submitted. The period of confidentiality normally shall not exceed two years from the date on which the examiners recommend acceptance of the thesis, during which time the thesis will be held on restricted access in the QUT Library.

9. Examination of Thesis

9.1 The Academic Board shall appoint at least two examiners, of whom at least one shall be from outside the University. Normally examiners will be required to agree to read and report upon the thesis within two months of its receipt.

9.2 A candidate may be required to make an oral defence of the thesis.

9.3 On receipt of satisfactory reports from the examiners, and when the provisions of 7.1 have been fulfilled, the Academic Board shall recommend to University Academic Board that the candidate be awarded the degree.

9.4 If the examiners' reports are conflicting, the Academic Board may, after appropriate consultation with the Principal Supervisor, seek advice from a further external examiner.

9.5 If, on the basis of the examiner's reports, the Academic Board does not recommend that the degree be awarded, then it shall:

- permit the student to resubmit the thesis within one year for re-examination, or cancel the student's registration.

If a candidate is required to revise and resubmit a thesis, the examiner's reports will be made available to the candidate, the anonymity of the examiners being maintained.

9.6 After the examination process is complete, examiner's reports are to be made available to the candidate on request. The names of examiners will be released on request providing the examiner has indicated willingness to have his/her identity revealed to the candidate.

Coursework

The unit IFN001 Advanced Information Retrieval Skills (4 credit points) should normally be included.
IFN301 Masters Research
IFN302 Masters Research
IFN303 Masters Research
IFN304 Masters Research

Part-time Students
The maximum number of credit points per semester for part-time status is 36. The standard number is 24. At the end of each semester a grade of T - Assessment Continues will be awarded in any IFNXXX units provided satisfactory progress is being maintained. A final grade (S - Satisfactory or U - Unsatisfactory) will be awarded once the thesis has been examined according to degree rules.

Part-time Course Structure
Part-time students undertaking research but no coursework units enrol in:
IFN200 Part-Time Masters Research

Part-time students who are required to undertake coursework units in addition to their research as part of their masters enrolment should enrol in a combination of the following units. These should total (in combination with the coursework unit/s) as close as possible to 24 credit points: IFN302 Masters Research
IFN303 Masters Research
IFN304 Masters Research

Master of Biotechnology LS86

Award title: Master of Biotechnology
CRICOS code: 018479B
Campus: Gardens Point
Duration: 3 semesters (1.5 years) full-time or 6 semesters (3 years) part-time
Credit points: 144 (full-time standard semester: 48; part-time standard semester: 24)

Professional Recognition
Graduates are eligible to join the AusBiotech, the Australian Society for Biochemistry and Molecular Biology, and the Australian Society for Microbiology.

Course Design
The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background in the bi-molecular sciences and area of interest in biotechnology. The LS86 Master of Biotechnology program follows on from successful completion of core and elective units offered in both LS66 Graduate Certificate in Biotechnology and LS76 Graduate Diploma in Biotechnology. The program not only offers students opportunities to pursue study in several relevant focus areas including the theoretical and practical aspects of biotechnology, but also the business of biotechnology, marketing, commercialisation, as well as the legal and ethical aspects of biotechnological applications. LS86 Master of Biotechnology is comprised of 144 credit points of assessed coursework and is designed to give students further training and specialisation in general, medical and/or plant biotechnology. Advanced standing may be given for the suite of units offered in the foundation program, LS66 Graduate Certificate in Biotechnology and LS76 Graduate Diploma in Biotechnology. The program not only offers students opportunities to pursue study in several relevant focus areas including the theoretical and practical aspects of biotechnology, but also the business of biotechnology, marketing, commercialisation, as well as the legal and ethical aspects of biotechnological applications. LS86 Master of Biotechnology is comprised of 144 credit points of assessed coursework and is designed to give students further training and specialisation in general, medical and/or plant biotechnology. Advanced standing may be given for the suite of units offered in the foundation program, LS66 Graduate Certificate in Biotechnology, if the student has a bachelor degree or equivalent with a recent and appropriate undergraduate-level knowledge and practical experience in the key areas of molecular biology, cell biology, biochemistry and/or microbiology at an advanced level. If advanced standing is granted, students can enrol directly in LS86 in their first semester.

Full-time Course Structure

Year 1, Semester 2 (MODULE 1)
LSN101 Molecular Biosciences
LSN102 Cellular Biosciences
LSN103 Postgraduate Learning and Research Skills
LSB468 Molecular Biology

Year 2, Semester 1 (MODULE 2)
LSP127 Business Aspects of Biotechnology
Either
LSB509 Medical Biotechnology 1
Or
LSB577 Plant Biotechnology 1

In consultation with the course coordinator, choose 24 credit points from the following units:
LSB509 Medical Biotechnology 1
LSB527 Biomedical Research Technologies
LSB537 Genetic Engineering
LSB577 Plant Biotechnology 1
LSN103 Postgraduate Learning and Research Skills
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development
HHB270 Gene Technology And Ethics
IBN408 Global Business Operations
MAB523 Introduction to Quality Management
JSN014 Law, Justice and New Genetic Technologies

Note: JSN014 Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details

Year 2, Semester 2 (MODULE 3)
BSB311 Research, Development and Commercialisation Strategies
Either
LSB609 Medical Biotechnology 2
Or
LSB677 Plant Biotechnology 2

In consultation with the course coordinator, choose 24 credit points from the following units:
LSB605 Protein Engineering and Bioprocessing
LSB607 Protein Purification
LSB608 Protein Science
LSB609 Medical Biotechnology 2
LSB619 Genomics and Bioinformatics
LSB677 Plant Biotechnology 2
LSN103 Postgraduate Learning and Research Skills
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development
MGN409 Introduction to Management
MGN428 Creating New Businesses

Part-time Course Structure

Year 1, Semester 2 (MODULE 1)
LSN101 Molecular Biosciences
LSN102 Cellular Biosciences
LSN103 Postgraduate Learning and Research Skills
LSB468 Molecular Biology

Year 2, Semester 1 (MODULE 1)
LSN103 Postgraduate Learning and Research Skills
LSB468 Molecular Biology

Year 2, Semester 2 (MODULE 3)
In consultation with the course coordinator, choose 12 credit points from the following units:
LSB605 Protein Engineering and Bioprocessing
LSB607 Protein Purification
LSB608 Protein Science
LSN103 Postgraduate Learning and Research Skills
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development
MGN409 Introduction to Management
MGN428 Creating New Businesses

Year 3, Semester 1 (MODULE 2)
LSP127 Business Aspects of Biotechnology
Either
LSB509 Medical Biotechnology 1
Or
LSB577 Plant Biotechnology 1

Year 3, Semester 2 (MODULE 3)
BSB311 Research, Development and Commercialisation Strategies
Either
LSB609 Medical Biotechnology 2
Or
LSB677 Plant Biotechnology 2

Year 4, Semester 1 (MODULE 2)
In consultation with the course coordinator, choose 24 credit points from the following units:
LSB509 Medical Biotechnology 1
LSB527 Biomedical Research Technologies
LSB537 Genetic Engineering
LSB577 Plant Biotechnology 1
LSN103 Postgraduate Learning and Research Skills
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development
HHB270 Gene Technology And Ethics
IBN408 Global Business Operations
MABS23 Introduction to Quality Management
JSN014 Law, Justice and New Genetic Technologies
Note: JSN014 Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details

Master of Biotechnology (Advanced)
LS96

Award title: Master of Biotechnology (Advanced)
CRICOS code: 054279M
Campus: Gardens Point
Duration: 4 semesters (2 years) full-time or 8 semesters (4 years) part-time
Credit points: 192 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Mark O'Brien

Professional Recognition
Graduates are eligible to join the AusBiotech, the Australian Society for Biochemistry and Molecular Biology, and the Australian Society for Microbiology.

Course Design
The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background in the bio-molecular sciences and area of interest in biotechnology. LS96 Master of Biotechnology (Advanced) completes the comprehensive training of students and follows successful completion of core and elective units offered in LS66, LS76 and LS86. It is comprised of 192 credit points of assessed coursework in general, medical and/or plant biotechnology. In their final semester of the program, students may undertake a supervised research project either at QUT or in the workplace. Students must discuss research project areas prior to enrolment in this course to select both a suitable project and a project supervisor(s) prior to entry (or as soon as possible thereafter). While the School of Life Sciences has a wide range of research project areas available, it may not always be possible for students to conduct a research project exactly in the area they desire. Part-time students may also elect to do a research project at their place of work, with both a workplace supervisor and a QUT supervisor. Alternative options are available. For students not undertaking a research project, additional coursework must be completed. Students will need to consult with the course coordinator in selecting additional coursework units. The LS96 Master of Biotechnology (Advanced) program not only offers students opportunities to pursue study in several relevant focus areas including the theoretical and practical aspects of biotechnology, but also the business of biotechnology, marketing, commercialisation, as well as the legal and ethical aspects of biotechnological applications. Advanced standing may be given for the suite of units offered in the foundation program, LS66 Graduate Certificate in Biotechnology, if the student has a bachelor degree or equivalent with a recent and appropriate undergraduate-level knowledge and practical experience in the key areas of molecular biology, cell biology, biochemistry and/or microbiology at an advanced level. If advanced standing is granted, students can enrol directly in LS96 in their first semester.

Full-time Course Structure
Year 1, Semester 2 (MODULE 1)
LSN101 Molecular Biosciences
LSN102 Cellular Biosciences
LSN103 Postgraduate Learning and Research Skills
LSB468 Molecular Biology

Year 2, Semester 1 (MODULE 2)
LSP127 Business Aspects of Biotechnology
Either
LSB509 Medical Biotechnology 1
Or
LSB577 Plant Biotechnology 1

In consultation with the course coordinator, choose 24 credit points from the following units:
LSB509 Medical Biotechnology 1
LSB527 Biomedical Research Technologies
LSB537 Genetic Engineering
LSB577 Plant Biotechnology 1
LSN103 Postgraduate Learning and Research Skills
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development
HHB270 Gene Technology And Ethics
IBN408 Global Business Operations
MABS23 Introduction to Quality Management
JSN014 Law, Justice and New Genetic Technologies
Note: JSN014 Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details

Year 2, Semester 2 (MODULE 3)
BSB311 Research, Development and Commercialisation Strategies
Either
LSB609 Medical Biotechnology 2
Or
LSB677 Plant Biotechnology 2

In consultation with the course coordinator, choose 24 credit points from the following units:
LSB608 Protein Purification
LSB608 Protein Sciences
LSB609 Medical Biotechnology 2
LSB619 Genomics and Bioinformatics
LSB677 Plant Biotechnology 2
LSN103 Postgraduate Learning and Research Skills
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development
MGN409 Introduction to Management
MGN428 Creating New Businesses
Year 3, Semester 1 (MODULE 4)
LSN710 Project
For those students NOT undertaking LSN710 Project, in consultation with the course coordinator, choose 48 credit points from the following units:
- LSB509 Medical Biotechnology 1
- LSB527 Biomedical Research Technologies
- LSB537 Genetic Engineering
- LSB577 Plant Biotechnology 1
- LSN103 Postgraduate Learning and Research Skills
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development
- HHB270 Gene Technology And Ethics
- IBN408 Global Business Operations
- MAB523 Introduction to Quality Management
- JSN014 Law, Justice and New Genetic Technologies

Note: JSN014 Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details

Part-time Course Structure
Year 1, Semester 2 (MODULE 1)
- LSN101 Molecular Biosciences
- LSN102 Cellular Biosciences

Year 2, Semester 1 (MODULE 1)
- LSN103 Postgraduate Learning and Research Skills
- LSB468 Molecular Biology

Year 2, Semester 2 (MODULE 3)
In consultation with the course coordinator, choose 12 credit points from the following units:
- LSB605 Protein Engineering and Bioprocessing
- LSB607 Protein Purification
- LSB608 Protein Science
- LSN103 Postgraduate Learning and Research Skills
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development
- MGN409 Introduction to Management
- MGN428 Creating New Businesses

Year 3, Semester 1 (MODULE 2)
- LSP127 Business Aspects of Biotechnology
  Either
  - LSB509 Medical Biotechnology 1
  - LSB577 Plant Biotechnology 1

Year 3, Semester 2 (MODULE 3)
- BSB311 Research, Development and Commercialisation Strategies
  Either
  - LSB609 Medical Biotechnology 2
  - LSB677 Plant Biotechnology 2

Year 4, Semester 1 (MODULE 2)
In consultation with the course coordinator, choose 24 credit points from the following units:
- LSB509 Medical Biotechnology 1
- LSB527 Biomedical Research Technologies
- LSB537 Genetic Engineering
- LSB577 Plant Biotechnology 1
- LSN103 Postgraduate Learning and Research Skills
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development
- HHB270 Gene Technology And Ethics
- IBN408 Global Business Operations
- MAB523 Introduction to Quality Management
- JSN014 Law, Justice and New Genetic Technologies

Note: JSN014 Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details

Year 4, Semester 2 (MODULE 4)
LSN711 Project 1
For those students NOT undertaking LSN711 Project 1, in consultation with the course coordinator, choose 24 credit points from the following units:
- LSB605 Protein Engineering and Bioprocessing
- LSB607 Protein Purification
- LSB608 Protein Science
- LSB609 Medical Biotechnology 2
- LSB619 Genomics and Bioinformatics
- LSB677 Plant Biotechnology 2
- LSN103 Postgraduate Learning and Research Skills
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development
- MGN409 Introduction to Management
- MGN428 Creating New Businesses

Year 5, Semester 1 (MODULE 4)
LSN712 Project 2
For those students NOT undertaking LSN712 Project 2, in consultation with the course coordinator, choose 24 credit points from the following units:
- LSB605 Protein Engineering and Bioprocessing
- LSB607 Protein Purification
- LSB608 Protein Science
- LSB609 Medical Biotechnology 2
- LSB619 Genomics and Bioinformatics
- LSB677 Plant Biotechnology 2
- LSN103 Postgraduate Learning and Research Skills
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development
- MGN409 Introduction to Management
- MGN428 Creating New Businesses

Note: JSN014 Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details

Master of Biotechnology (For Continuing Students Only) LS80

Award title: Master of Applied Science (Life Science)
CRICOS code: 018479B
Campus: Gardens Point
Duration: 3 semesters (1.5 years) full-time or 6 semesters (3 years) part-time
Credit points: 144 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Mark O'Brien

Full-time Course Structure
Year 1, Semester 1
- LSP127 Business Aspects of Biotechnology
  Either
  - LSB509 Medical Biotechnology 1
  - LSB577 Plant Biotechnology 1

Year 1, Semester 2
- LSB509 Medical Biotechnology 1
  Or
  - LSB577 Plant Biotechnology 1

Year 2, Semester 1
- LSB509 Medical Biotechnology 1
  Or
  - LSB577 Plant Biotechnology 1

Year 2, Semester 2
- LSB509 Medical Biotechnology 1
  Or
  - LSB577 Plant Biotechnology 1

Year 3, Semester 1
- LSB509 Medical Biotechnology 1
  Or
  - LSB577 Plant Biotechnology 1

Year 3, Semester 2
- LSB509 Medical Biotechnology 1
  Or
  - LSB577 Plant Biotechnology 1

Year 4, Semester 1
- LSB509 Medical Biotechnology 1
  Or
  - LSB577 Plant Biotechnology 1
MAB523 Introduction to Quality Management
GSN408 Fundamentals of Marketing Management
GSN418 Marketing Strategy Development

Students who qualify for an exemption from LSB509 or LSB577 on the basis of undergraduate studies are required to undertake an additional unit from the list above.

**Year 1, Semester 2**

- BSB311 Research, Development and Commercialisation Strategies
- Either
  - LSB609 Medical Biotechnology 2
  - LSB677 Plant Biotechnology 2

In consultation with the course coordinator, choose 24 credit points from the following units:

- LSB619 Genomics and Bioinformatics
- LSB609 Medical Biotechnology 2
- LSB677 Plant Biotechnology 2
- LSB850-1 Research Strategies
- LSB607 Protein Purification
- MGN409 Introduction to Management
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development
- MGN428 Creating New Businesses

Students who qualify for an exemption from LSB609 or LSB677 on the basis of undergraduate studies are required to undertake an additional unit from the list above.

**Year 2, Semester 1**

- LSBN710 Project

Please note: Students who will NOT be undertaking a research project choose 48 credit points from the following units in consultation with the course coordinator. No credit will be given for any units already taken within an undergraduate degree. You are expected to undertake a program of study that extends the coursework within your undergraduate degree.

- LSB509 Medical Biotechnology 1
- LSB77 Plant Biotechnology 1
- LSB53 Genetic Engineering
- LSB850-1 Research Strategies
- JSN014 Law, Justice and New Genetic Technologies
- LSN160 Epidemiology for Life Scientists
- HHH270 Gene Technology And Ethics
- IBN408 Global Business Operations
- MAB523 Introduction to Quality Management
- GSN408 Fundamentals of Marketing Management
- GSN418 Marketing Strategy Development

Students who qualify for an exemption from LSB509 or LSB77 on the basis of undergraduate studies are required to undertake an additional unit from the list above.

**Part-time Course Structure**

**Year 1, Semester 1**

- LSP127 Business Aspects of Biotechnology

Either

- LSB509 Medical Biotechnology 1
- LSB577 Plant Biotechnology 1

**Year 1, Semester 2**

- BSB311 Research, Development and Commercialisation Strategies

Either

- LSB609 Medical Biotechnology 2
- LSB677 Plant Biotechnology 2

**Year 2, Semester 1**

In consultation with the course coordinator, select 24 credit points under Year 1 Semester 1 in the above full-time course.

**Year 2, Semester 2**

In consultation with the course coordinator, select 24 credit points under Year 1 Semester 2 in the above full-time course.

**Year 3, Semester 1**

- LSBN711 Project 1

For those students who will not be undertaking a research project, in consultation with the course coordinator, select 24 credit points under Year 1 Semester 1 in the above full-time course.

**Year 3, Semester 2**

- LSBN712 Project 2

For those students who will not be undertaking a research project, in consultation with the course coordinator, select 24 credit points under Year 1 Semester 2 in the above full-time course.

- **Master of Cardiac Ultrasound PH85**

**Award title:** Master of Cardiac Ultrasound

**Campus:** Gardens Point

**Duration:** 6 semesters (3 years) part-time

**Credit points:** 144 (full-time standard semester: 48; part-time standard semester: 24)

**Course coordinator:** Bonita Anderson

**Professional Recognition**

This course is accredited with the Australasian Sonographer Accreditation Registry (ASAR).

**Course Design**

This course consists of two stages. Stage 1 (Graduate Diploma in Cardiac Ultrasound - PH75) takes two years of part-time study to complete. Students must be employed in a suitable clinical practice with adequate access to clinical cardiac ultrasound experience for the duration of the course. If students are not based in Brisbane, this structure allows attendance by offering the formal classroom component in an intensive one-week block in each semester.

Stage 2 (Master of Cardiac Ultrasound - PH85) involves the completion of a research project and submission of a thesis. Students can undertake this project internally at QUT, or externally under QUT staff supervision and the guidance of a suitable external supervisor. This stage would normally take one year part-time to complete.

**Course Structure**

**STAGE 1:** To complete Stage 1, students must complete the units listed below (total 96 credit points):

**Year 1, Semester 1**

- LSBN529 Cardiac Anatomy, Embryology and Pathology
- PCN162 Principles of Medical Ultrasound
- PCN497-1 Clinical Attachment 4

**Year 1, Semester 2**

- PCN259 Cardiac Ultrasound 1
- PCN497-2 Clinical Attachment 4

**Year 2, Semester 1**

- PCN218 Research Methodology and Professional Studies
- PCN359 Cardiac Ultrasound 2
- PCN597-1 Clinical Attachment 5

**Year 2, Semester 2**

- PCN459 Advanced Cardiac Ultrasound
- PCN597-2 Clinical Attachment 5

Note: The PCN497 and PCN597 clinical attachment units are 2 semester units.
STAGE 2: To complete Stage 2, students must complete the units listed below (48 credit points):

**First Semester** *(Project Over Two Semesters)*
PCN640-1 Project
PCN640-2 Project

**Notes:**
A student may request an extension of time in which to submit the project report for assessment. A request for an extension of time up to a maximum of six months should be made in writing through the Head of School to the Dean. Any request for a further extension, or any request for an extension to a date later than six months after the original due date, should be made to the Academic Board. The Academic Board may grant the extension under such conditions as it may consider appropriate, or may award the student a “Fail” result in the project unit.

A student who has received a “Fail” result in the project unit may re-enrol in the unit only in exceptional circumstances and with the express permission of the Academic Board.

* Masters project units are offered in both semesters.
** Second Semester enrolments for PH85 will only be accepted under the following circumstances:
1. Students who have successfully completed PH75 Graduate Diploma in Cardiac Ultrasound may enrol into the Masters project (PCN640-1) in second semester.
2. Students who have completed the Cardiac DMU and who are eligible to apply for advanced standing may enrol into PH85 in second semester#

# Under university rules and regulations, these students are required to undertake 50% of the coursework for PH85. Therefore, in addition to the Masters project, students will be required to complete two other units (PCN218 Research Methodology and Professional Studies and PCN459 Advanced Cardiac Ultrasound).

Students in the Master of Cardiac Ultrasound (PH85) wishing to exit with the Graduate Diploma in Cardiac Ultrasound (PH75) are required to submit an Application to Graduate Early with an Approved Exit Course (SRX) Form in their final semester of study.

**Master of Lighting (off-shore) PH83**

**Award title:** Master of Lighting

**Campus:** City University of Hong Kong

**Duration:** 3 semesters (1 year) full-time and 6 semesters (2 years) part-time (Hong Kong) external

**Credit points:** 144 (part-time standard semester: 24)

**Course coordinator:** Dr Ian Cowling

**Course Design**
Masters students will undertake a 24 credit point research project, which may be based within their place of employment and two units (24 credit points) of coursework which may be reading topics associated with their project or other electives taken from any relevant units within the University, on approval of the Course Coordinator.

**Full-time Course Structure**

**First Semester (September to December)**
PCZ121 Vision Colour and Photometry
PCZ123 Sustainability and Human Factors
PCZ124 Lamps and Luminaires
PCZ224 Applied Lighting

**Second Semester (January to April)**
PCZ122 Lighting Design
PCZ221 Best Practices in Lighting
PCZ321 Reading Topic 1

PCZ322 Reading Topic 2

**Third Semester (May to August)**
PCZ222 Advanced Lighting Design
PCZ223 Lighting Applications
PCZ320 Lighting Project

**Part-time Course Structure**

**First Semester (September to December)**
PCZ121 Vision Colour and Photometry
PCZ124 Lamps and Luminaires

**Second Semester (January to April)**
PCZ122 Lighting Design
PCZ123 Sustainability and Human Factors

**Third Semester (May to August)**
PCZ222 Advanced Lighting Design
PCZ223 Lighting Applications

**Fourth Semester (September to December)**
PCZ221 Best Practices in Lighting
PCZ224 Applied Lighting

**Fifth Semester (January to April)**
PCZ321 Reading Topic 1
Or approved elective
PCZ322 Reading Topic 2
Or approved elective

**Sixth Semester (May to August)**
PCZ320 Lighting Project

**Note:**
PH83 will be offered full-time and part-time in a combination of face-to-face lecture/tutorial/practical format, and on-line. Some units will have a computer-design type component and all units will incorporate learning through assignment work, all of which will be incorporated into the assessment program. For the first three semesters the two units offered each semester will be presented sequentially. The face-to-face teaching component will be offered in block form over a weekend, usually on the first weekend of the teaching period assigned to that unit. There will then be a follow-up face-to-face session about three weekends later. For the fourth and fifth semesters both units will commence together at the start of the semester.

Students in the Master of Lighting (PH83) wishing to exit with the Graduate Certificate in Lighting (PH63) or Graduate Diploma in Lighting (PH73) are required to submit an Application to Graduate Early with an Approved Exit Course (SRX) Form in their final semester of study.

**Master of Lighting (on-shore) PH82**

**Award title:** Master of Lighting

**Campus:** Gardens Point

**Duration:** 3 semesters (1.5 years) (Internal only) full-time or 6 semesters (3 years) (Internal and External) part-time

**Credit points:** 144 (part-time standard semester: 24)

**Course coordinator:** Dr Ian Cowling

**Course Design**
Masters students will undertake a 24 credit point research project, which may be based within their place of employment and two units (24 credit points) of coursework which may be reading topics associated with their project or other electives taken from any relevant units within the University, on approval of the Course Coordinator.

**Full-time Course Structure**

**Year 1, Semester 2 (July to October)**
PCN121 Vision Colour and Photometry
PCN123 Sustainability and Human Factors
PCN124 Lamps and Luminaires

Elective - One unit from:
Students in the Master of Lighting (PH82) wishing to exit days per semester for intensive practical and tutorial work. The external mode will be required to attend QUT for 4 to 5 offered in block format on weekends. Students enrolling in assessment program. Most units in the internal mode will be ment work, all of which will be incorporated into the as-ment and all units will incorporate learning through assign-ments will have a significant computer-design type compo-ments will study some mathematics as part of the core curri-ment, and where appropriate practical and field work. Some units will have a significant computer-design type compo-nent and all units will incorporate learning through assign-ment work, all of which will be incorporated into the as-essment program. Most units in the internal mode will be offered in block format on weekends. Students enrolling in the external mode will be required to attend QUT for 4 to 5 days per semester for intensive practical and tutorial work.

Students in the Master of Lighting (PH82) wishing to exit with the Graduate Certificate in Lighting (PH62) or Gradu ate Diploma in Lighting (PH72) are required to submit an Application to Graduate Early with an Approved Exit Course (SRX) Form in their final semester of study.

International students wishing to change courses should consult International Student Business Services.

- Master of Mathematical Science MA85

**Course Design**

The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background and area of interest within the mathematical sciences.

For the Masters program, at least 36 credit points must be taken from postgraduate mathematics units other than Mathematical Foundations and/or Mathematics. Up to 24 credit points can be taken from units other than mathematics units and there is a limit of 48 credit points from project units.

**Course Structure**

At least 36 credit points must be taken from postgraduate mathematics units other than MAN200 Mathematical Foundations and/or MAN201 Mathematics.

Up to 24 credit points can be taken from other than mathematics units.

Limit of 48 credit points can be taken from project units.

A planned program of study should be decided in consulta-tion with the Course Coordinator. It will take into account the student's background and area of interest within the mathematical sciences. Strands represent areas of the mathematical sciences which may be of interest to students and the units listed under each strand can guide students in developing their planned program. Students will usually select units from one or two strands only.

The following postgraduate mathematics units are available in all strands (subject to the limit on credit points from project units):

- MAN200 Mathematical Foundations
- MAN201 Mathematics
- MAN700 Project
- MAN717 Minor Project
- MAN787-1 Project
- MAN787-2 Project
- MAN787-3 Project

To undertake any of the project units, permission from the Course Coordinator is required. If students wish to take any of the above units they will need to discuss their plans and the proposed content with the Course Coordinator.

**Strand Information**

The following strand information is to assist students with unit selection. Students do not have to enrol in all units listed for a strand. The prerequisite units are given as a guide. Depending on a student's background, they may have already covered some of the units listed (or equivalent units) in their undergraduate studies. If students have not studied any mathematics for some time, they may need to discuss their plans and the proposed unit selection with the Course Coordinator.

**Mathematical Modelling/Applied Mathematics**

Postgraduate Mathematics Units:
- MAN761 Analysis
- MAN764 Applied Mathematical Modelling

**Award title:** Master of Mathematical Science

**CRICOS code:** 046042K

**Campus:** Gardens Point

**Duration:** 3 semesters (1.5 years) full-time or 6 semesters (3 years) part-time

**Credit points:** 144 (full-time standard semester: 48; part-time standard semester: 24)

**Course coordinator:** Dr Troy Farrell
**Computational Mathematics**
Postgraduate Mathematics Unit:
MAN771 Computational Mathematics 4
Prerequisite Units:
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB220 Computational Mathematics 1
MAB311 Advanced Calculus
MAB312 Linear Algebra
MAB420 Computational Mathematics 2
MAB522 Computational Mathematics 3
Note: MAB480 Introduction to Scientific Computation or knowledge of programming is required.

**Discrete Mathematics**
Postgraduate Mathematics Unit:
MAN778 Applications of Discrete Mathematics
Prerequisite Units:
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB621 Discrete Mathematics

**Statistics/Statistical Modelling**
Postgraduate Mathematics Units:
MAN526 Time Series Analysis
MAN624 Applied Statistics
MAN765 Bayesian Data Analysis
MAN766 Applied Time Series Analysis
MAN775 Statistical Modelling of Financial Processes
Prerequisite Units:
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1
MAB314 Statistical Modelling 2
MAB414 Applied Statistics 2
MAB524 Statistical Inference

**Quantitative Analysis/Financial Mathematics**
Postgraduate Mathematics Units:
MAN526 Time Series Analysis
MAN624 Applied Statistics
MAN765 Bayesian Data Analysis
MAN766 Applied Time Series Analysis
MAN769 Mathematics of Finance
MAN775 Statistical Modelling of Financial Processes
Prerequisite Units:
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1
MAB314 Statistical Modelling 2
MAB413 Differential Equations
MAB414 Applied Statistics 2
MAB524 Statistical Inference
MAB623 Financial Mathematics

**Operations Research**
Postgraduate Mathematics Units:
MAN788 Advanced Techniques in Operations Research
Prerequisite Units:
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1
MAB315 Operations Research 2
MAB525 Operations Research 3A
MAB625 Operations Research 3B

**Scientific Computation and Visualisation**
MAN681 Advanced Visualisation and Data Analysis
Prerequisite Mathematics Units:
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB281 Mathematics for Computer Graphics
MAB480 Introduction to Scientific Computation
MAB481 Visualisation and Data Analysis
MAB580 Scientific Computation

**Mathematics for Secondary Teaching**
Postgraduate mathematics units:
MAN700 Project
Plus at least one other postgraduate mathematics unit (or other combination to give at least 36 credit points from appropriate postgraduate mathematics units)
Other mathematics units:
Students would usually select across a range of areas of mathematics and statistics
Non-mathematics units:
Students can select up to 24 credit points from units offered by the Faculty of Education related to the teaching of mathematics

**Graduate Diploma in Applied Science**
SC71

Award title: Graduate Diploma in Applied Science
CRICOS code: 020314E
Campus: Gardens Point
Duration: 2 semesters (1 year) full-time or 4 semesters (2 years) part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Peter Fredericks
Discipline coordinator: Dr Godwin Ayoko (Chemistry); Dr Mark O’Brien (Life Science); Dr Troy Farrell (Mathematics); Associate Professor Peter Mather (Natural Resource Sciences); Associate Professor Brian Thomas (Physics)

Course Design
This coursework program allows students to complete a minor project in some disciplines. The assessed coursework may include advanced lecture courses, seminars, reading courses or independent study designed to focus on information retrieval skills. Coursework units are chosen from those in the Master of Applied Science course, and may contain units from other postgraduate courses, the Bachelor of Applied Science (Honours) program or advanced undergraduate programs.

Candidates of the Graduate Diploma in Applied Science undertake a program of coursework, or coursework and a minor research project, as approved by the Academic Board on the advice of the Head of School.

Students must complete a total of 96 credit points which may consist of between 60 and 96 credit points of course-
work, and up to 36 credit points as a minor research project.

Coursework units will be selected from the specific units available within the Master of Applied Science (PH80) course and may contain units selected from other postgraduate courses or advanced undergraduate courses where the background of the student requires this.

Course Structure

Chemistry Strand
PCN701 Topics in Advanced Chemistry 1
PCN705.1 Research Methodology
PCN705.2 Research Methodology
PCN710 Chemical Instrumentation
PCN720 Chemometrics
PCN730 Advanced Physical Methods in Chemistry
PCN740 Laboratory Techniques for Preparative Chemistry
PCN801 Topics in Advanced Chemistry 2

Ecology, Environmental Science & Geoscience Strands
NRR100 Readings in Natural Resource Sciences 1
NRR101 Readings in Natural Resource Sciences 2
NRR102 Confirmation of Candidature Seminar
NRR104 Advanced Topics in Natural Resource Sciences 1
NRR105 Advanced Topics in Natural Resource Sciences 2
And units approved by the Strand Coordinator

Life Science Strand
LSN011 Research Seminars in Life Science 1
LSN013 Readings in Life Science 3
LSN023 Research Seminars in Life Science 3

Mathematics Strand
Units selected from other programs, such as MA75 Graduate Diploma in Mathematical Science and MA85 Master of Mathematical Science, offered by the School of Mathematical Sciences and approved by the Mathematics coordinator.

Physics Strand
PCN715 Advanced Topics in Physics 1
PCN716 Advanced Topics in Physics 2
And/or alternative unit(s) approved by the Physics Coordinator

Graduate Diploma in Applied Science (Medical Physics) PH71

Award title: Graduate Diploma in Applied Science (Medical Physics)
CRICOS code: 020315D
Campus: Gardens Point
Duration: 4 semesters (2 years) part-time
Credit points: 96 (part-time standard semester: 24)
Course coordinator: Associate Professor Brian J Thomas
Discipline coordinator: Natasha Kazich

Professional Recognition
This course is accredited with the Australasian Sonographer Accreditation Registry (ASAR).

Course Design
This degree consists of two stages. Stage 1 (Graduate Diploma - PH71) takes four semesters of part-time study to complete. Students must show that they have access to suitable clinical experience for the duration of Stage 1 before beginning the degree. Lectures are conducted in intensive 4-5 week blocks in each semester. Students undertake clinical experience throughout the semester.

Stage 2 (Master of Applied Science - PH80) involves completion of a research project and submission of a thesis. Students can undertake this project externally under QUT staff supervision on appointment of a suitable external supervisor. This stage takes two semesters part-time to complete after successful completion of Stage 1.

Part-time Course Structure
Students must complete the units listed below (total 96 credit points)

Year 1, Semester 1
PCN159 Ultrasonic Examination 1
PCN162 Principles of Medical Ultrasound
PCN197-1 Clinical Attachment 1

Year 1, Semester 2
PCN197-2 Clinical Attachment 1
PCN356 Ultrasonic Examinations 2

Year 2, Semester 1
PCN297-1 Clinical Attachment 2
PCN355 Vascular Ultrasound

and investigation that can be completed at QUT, or in a suitable external institution.

Course structure - First Semester Entry
First Semester (February to June)
LSB142 Human Anatomy and Physiology
PCN113 Radiation Physics
PCN114 Microprocessors and Instrumentation
PCN211 Physics of Medical Imaging
Second Semester (July to October)
PCN112 Medical Imaging Science
PCN212 Radiotherapy
PCN214 Health and Occupational Physics
PCN218 Research Methodology and Professional Studies

Course structure - Mid-Year Entry
First Semester (July to October)
LSB258 Principles of Human Physiology
PCN112 Medical Imaging Science
PCN212 Radiotherapy
PCN214 Health and Occupational Physics
Second Semester (February to June)
PCN113 Radiation Physics
PCN114 Microprocessors and Instrumentation
PCN211 Physics of Medical Imaging
PCN218 Research Methodology and Professional Studies

Graduate Diploma in Applied Science (Medical Ultrasound) PH71

Award title: Graduate Diploma in Applied Science (Medical Ultrasound)
Campus: Gardens Point
Duration: 2 semesters (1 year) full-time or 4 semesters (2 years) part-time
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Associate Professor Brian J Thomas
Discipline coordinator: Natasha Kazich

Professional Recognition
This course is accredited with the Australasian Sonographer Accreditation Registry (ASAR).

Course Design
This degree consists of two stages. Stage 1 (Graduate Diploma - PH71) takes four semesters of part-time study to complete. Students must show that they have access to suitable clinical experience for the duration of Stage 1 before beginning the degree. Lectures are conducted in intensive 4-5 week blocks in each semester. Students undertake clinical experience throughout the semester.

Stage 2 (Master of Applied Science - PH80) involves completion of a research project and submission of a thesis. Students can undertake this project externally under QUT staff supervision on appointment of a suitable external supervisor. This stage takes two semesters part-time to complete after successful completion of Stage 1.

Part-time Course Structure
Students must complete the units listed below (total 96 credit points)

Year 1, Semester 1
PCN159 Ultrasonic Examination 1
PCN162 Principles of Medical Ultrasound
PCN197-1 Clinical Attachment 1

Year 1, Semester 2
PCN197-2 Clinical Attachment 1
PCN356 Ultrasonic Examinations 2

Year 2, Semester 1
PCN297-1 Clinical Attachment 2
PCN355 Vascular Ultrasound
PCN357 Advanced Ultrasound Topics
Year 2, Semester 2
PCN218 Research Methodology and Professional Studies
PCN297-2 Clinical Attachment 2
Notes The PCN197 and PCN297 clinical attachment units are 2 semester units
Each clinical attachment unit (ie PCN197 and PCN297) involves clinical experience in the order of 3 days per week or equivalent.

- **Graduate Diploma in Biotechnology LS76**

  Award title: Graduate Diploma in Biotechnology
  CRICOS code: 016975B
  Campus: Gardens Point
  Duration: 2 semesters (1 year) full-time or 4 semesters (2 years) part-time
  Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
  Course coordinator: Dr Mark O’Brien

  **Professional Recognition**

  Graduates are eligible to join the AusBiotech, the Australian Society for Biochemistry and Molecular Biology, and the Australian Society for Microbiology.

  **Course Design**

  The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student’s background in the biomolecular sciences and area of interest in biotechnology. The LS76 Graduate Diploma in Biotechnology builds upon concepts covered in the foundation program, LS66 Graduate Certificate in Biotechnology. The Graduate Diploma in Biotechnology not only offers students opportunities to pursue study in several relevant focus areas including the theoretical and practical aspects of biotechnology, but also the business of biotechnology, marketing, commercialisation, as well as the legal and ethical aspects of biotechnological applications. The Graduate Diploma in Biotechnology is comprised of 96 credit points of assessed coursework. Advanced standing may be given for the suite of units offered in the foundation program, LS66 Graduate Certificate in Biotechnology, if the student has a bachelor degree or equivalent with a recent and appropriate undergraduate level knowledge and practical experience in the key areas of molecular biology, cell biology, biochemistry and/or microbiology at an advanced level. If advanced standing is granted, students can enrol directly in LS76 in their first semester.

  **Full-time Course Structure**

  **Year 1, Semester 2 (MODULE 1)**
  LSN101 Molecular Biosciences
  LSN102 Cellular Biosciences
  LSN103 Postgraduate Learning and Research Skills
  LSB468 Molecular Biology

  **Year 2, Semester 1 (MODULE 2)**
  LSP127 Business Aspects of Biotechnology
  Either
  LSB509 Medical Biotechnology 1
  Or
  LSB577 Plant Biotechnology 1
  In consultation with the course coordinator, choose 24 credit points from the following units:
  LSB509 Medical Biotechnology 1
  LSB527 Biomedical Research Technologies
  LSB537 Genetic Engineering
  LSB577 Plant Biotechnology 1
  LSB608 Protein Science
  LSB607 Protein Purification
  LSB605 Protein Engineering and Bioprocessing
  LSB608 Protein Science
  LSN103 Postgraduate Learning and Research Skills
  GSN408 Fundamentals of Marketing Management
  GSN418 Marketing Strategy Development
  GSN408 Fundamentals of Marketing Management
  GSN418 Marketing Strategy Development
  MGN409 Introduction to Management
  MGN428 Creating New Businesses

  **Year 3, Semester 1 (MODULE 2)**
  LSP127 Business Aspects of Biotechnology
  Either
  LSB509 Medical Biotechnology 1
  Or
  LSB577 Plant Biotechnology 1

- **Graduate Diploma in Biotechnology (For Continuing Students Only) LS70**

  Award title: Graduate Diploma in Biotechnology
  CRICOS code: 016957B
  Campus: Gardens Point
  Duration: 2 semesters (1 year) full-time or 4 semester (2 years) part-time
  Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)
  Course coordinator: Dr Mark O’Brien

  **Professional Recognition**

  Graduates are eligible to join the AusBiotech, the Australian Society for Biochemistry and Molecular Biology, and the Australian Society for Microbiology.

  **Course Design**

  The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student’s background and area of interest in biotechnology.

  The course consists of two stages: Stage 1 (Graduate Diploma in Biotechnology - LS70) and Stage 2 (Master of Biotechnology - LS80).

  The Graduate Diploma in Biotechnology comprises 96 credit points of assessed coursework in medical, plant and/or general biotechnology. Students can graduate with a Graduate Diploma in Biotechnology after successfully completing Stage 1. Students commencing in July enrol in semester two units first. Credit will not be given for any units already taken within an undergraduate degree, as students

  Note: LSN1124, Law, Justice and New Genetic Technologies will be offered in the 2007 semester break - please contact the unit coordinator for further details
are expected to undertake a program of study that extends the coursework studied within an undergraduate degree.

In Stage 2, the Master of Biotechnology - LS80), students may undertake a supervised research project either at QUT or in the workplace. Students must discuss research project areas prior to enrolment in this course to select both a suitable project and a project supervisor(s) prior to entry (or as soon as possible thereafter). While the School of Life Sciences has a wide range of research project areas available, it may not always be possible for students to conduct a research project exactly in the area they desire. Part-time students may also elect to do a research project at their place of work, with both a workplace supervisor and a QUT supervisor. Alternative options are available.

If students do not undertake a research project, additional coursework must be completed. Students will need to consult with the course coordinator in selecting additional coursework units. Please contact the course coordinator for further information and assistance in this regard.

Full-time Course Structure

**Year 1, Semester 1**
- LSP127 Business Aspects of Biotechnology
- LSB509 Medical Biotechnology 1
  - Either LSB577 Plant Biotechnology 1
    - In consultation with the course coordinator, choose 24 credit points from the following units:
      - LSB537 Genetic Engineering
      - LSB509 Medical Biotechnology 1
      - LSB577 Plant Biotechnology 1
      - LSB850-1 Research Strategies
      - JSN014 Law, Justice and New Genetic Technologies
      - HNB270 Gene Technology And Ethics
      - IBN408 Global Business Operations
      - MAB523 Introduction to Quality Management
      - GSN408 Fundamentals of Marketing Management
      - GSN418 Marketing Strategy Development
      - Students who qualify for an exemption from LSB509 or LSB577 on the basis of undergraduate studies are required to undertake an additional unit from the list above.

**Year 1, Semester 2**
- BSB311 Research, Development and Commercialisation Strategies
  - Either
    - LSB609 Medical Biotechnology 2
      - LSB677 Plant Biotechnology 2
        - In consultation with the course coordinator, choose 24 credit points from the following units:
          - LSB619 Genomics and Bioinformatics
          - LSB609 Medical Biotechnology 2
          - LSB677 Plant Biotechnology 2
          - LSB850-1 Research Strategies
          - LSB607 Protein Purification
          - MGN409 Introduction to Management
          - GSN408 Fundamentals of Marketing Management
          - GSN418 Marketing Strategy Development
          - MGN428 Creating New Businesses
          - Students who qualify for an exemption from LSB609 or LSB677 on the basis of undergraduate studies are required to undertake an additional unit from the list above.

Part-time Course Structure

**Year 1, Semester 1**
- LSP127 Business Aspects of Biotechnology
  - Either
    - LSB509 Medical Biotechnology 1
      - Or
      - LSB577 Plant Biotechnology 1

**Year 2, Semester 1**
- BSB311 Research, Development and Commercialisation Strategies
  - Either
    - LSB609 Medical Biotechnology 2
      - Or
      - LSB677 Plant Biotechnology 2

**Year 2, Semester 2**
- In consultation with the course coordinator, select 24 credit points under Year 1 Semester 1 in the above full-time course.

### Graduate Diploma in Cardiac Ultrasound PH75

**Award title:** Graduate Diploma in Cardiac Ultrasound  
**Campus:** Gardens Point  
**Duration:** 4 semesters (2 years) part-time  
**Credit points:** 96 (full-time standard semester: 48; part-time standard semester: 24)  
**Course coordinator:** Bonita Anderson

**Professional Recognition**
This course is accredited with the Australasian Sonographer Accreditation Registry (ASAR).

**Course Design**
This course consists of two stages. Stage 1 (Graduate Diploma in Cardiac Ultrasound - PH75) takes two years of part-time study to complete. Students must be employed in a suitable clinical practice with adequate access to clinical cardiac ultrasound experience for the duration of the course. If students are not based in Brisbane, this structure allows attendance by offering the formal classroom component in an intensive one-week block in each semester.

Stage 2 (Master of Cardiac Ultrasound - PH85) involves the completion of a research project and submission of a thesis. Students can undertake this project internally at QUT, or externally under QUT staff supervision and the guidance of a suitable external supervisor. This stage would normally take one year part-time to complete.

**Course Structure**

**Year 1, Semester 1**
- LSN259 Cardiac Anatomy, Embryology and Pathology  
- PCN162 Principles of Medical Ultrasound  
- PCN497-1 Clinical Attachment 4

**Year 1, Semester 2**
- PCN259 Cardiac Ultrasound 1  
- PCN497-2 Clinical Attachment 4

**Year 2, Semester 1**
- PCN218 Research Methodology and Professional Studies  
- PCN359 Cardiac Ultrasound 2  
- PCN597-1 Clinical Attachment 5

**Year 2, Semester 2**
- PCN459 Advanced Cardiac Ultrasound  
- PCN597-2 Clinical Attachment 5

**Notes:**
- The PCN497 and PCN597 clinical attachment units are 2 semester units.
Domestic students in the Graduate Diploma in Cardiac Ultrasound (PH75) will be invited, on successful completion of 96 credit points, to continue with studies in the Master of Cardiac Ultrasound (PH85).

Graduate Diploma in Lighting (off-shore) PH73

Award title: Graduate Diploma in Lighting  
Campus: City University of Hong Kong  
Duration: 4 semesters part-time (Hong Kong) external  
Credit points: 96 (part-time standard semester: 24)  
Course coordinator: Dr Ian Cowling

Course Design

Graduate Diploma students will undertake 24 credit points (two units) of advanced lighting design and applications studies and two other units (24 credit points) which could include at least one unit in Project Management, Project Cost and Risk Management or Quality.

Part-time Course Structure

First Semester (September to December)
PCZ121 Vision Colour and Photometry  
PCZ124 Lamps and Luminaires

Second Semester (January to April)
PCZ122 Lighting Design  
PCZ123 Sustainability and Human Factors

Third Semester (May to August)
PCZ222 Advanced Lighting Design  
PCZ223 Lighting Applications

Fourth Semester (September to December)
PCZ221 Best Practices in Lighting  
PCZ224 Applied Lighting

Notes:

PH73 is offered part-time in a combination of face-to-face lecture/tutorial/practical format, and on-line. Some units will have a computer-design type component and all units will incorporate learning through assignment work, all of which will be incorporated into the assessment program. Except for the fourth semester, the two units offered each semester will be presented sequentially. The face-to-face teaching component will be offered in block form over a weekend, usually on the first weekend of the teaching period assigned to that unit. There will then be a follow-up face-to-face session about three weekends later. In the fourth semester both units will commence at the start of the semester.

Students in the Graduate Diploma in Lighting (PH73) wishing to continue their studies in the Master of Lighting (PH83), on successful completion of 96 credit points, are required to seek admission using an International Student Degree Program Application (F) Form.

Students in the Graduate Diploma in Lighting (PH73) wishing to exit with the Graduate Certificate in Lighting (PH83) are required to submit an Application to Graduate Early with an Approved Exit Course (SRX) Form in their final semester of study.

Graduate Diploma in Lighting (on-shore) PH72

Award title: Graduate Diploma in Lighting  
Campus: Gardens Point  
Duration: 4 semesters (2 years) (Internal and External) part-time  
Credit points: 96 (part-time standard semester: 24)  
Course coordinator: Dr Ian Cowling

Course Design

Graduate Diploma students will undertake 24 credit points (two units) of advanced lighting design and applications studies and two other units (24 credit points) which could include at least one unit in Project Management, Project Cost and Risk Management or Quality Management.

Part-time Course Structure

Year 1, Semester 2 (July to October)
PCN121 Vision Colour and Photometry  
PCN124 Lamps and Luminaires

Year 2, Semester 1 (February to June)
PCN122 Lighting Design  
PCN123 Sustainability and Human Factors

Year 2, Semester 2 (July to October)
PCN223 Lighting Applications  
Elective - One unit from:  
MEN272 Enterprise Resource Planning  
PCN222 Advanced Lighting Design  
PCN224 Applied Lighting

Year 3, Semester 1 (February to June)
PCN221 Best Practices in Lighting  
Elective - One unit from:  
CNP520 Project Management  
CNP521 Project Cost and Risk Management  
MEN177 Total Quality Management  
PCN224 Applied Lighting

Notes:

PH72 is offered part-time internally and externally. The course comprises a lecture/tutorial format, and where appropriate practical and field work. Some units will have a significant computer-design type component and all units will incorporate learning through assignment work, all of which will be incorporated into the assessment program. Most units in the internal mode will be offered in block format on weekends. Students enrolling in the external mode will be required to attend QUT for 4 to 5 days per semester for intensive practical and tutorial work.

Domestic students in the Graduate Diploma in Lighting (PH72) will be invited, on successful completion of 96 credit points, to continue with studies in the Master of Lighting (PH82).

Students in the Graduate Diploma in Lighting (PH72) wishing to exit with the Graduate Certificate in Lighting (PH82) are required to submit an Application to Graduate Early with an Approved Exit Course (SRX) Form in their final semester of study.

International students wishing to change courses should consult International Student Business Services.

Graduate Diploma in Mathematical Science MA75

Award title: Graduate Diploma in Mathematical Science  
CRICOS code: 046041M  
Campus: Gardens Point  
Duration: 2 semesters (1 year) full-time or 4 semesters (2 years) part-time  
Credit points: 96 (full-time standard semester: 48; part-time standard semester: 24)  
Course coordinator: Dr Troy Farrell

Course Design

The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background and area of interest within the mathematical sciences.
In the Graduate Diploma, at least 24 credit points must be taken from postgraduate mathematics units other than Mathematical Foundations and/or Mathematics. Up to 24 credit points can be taken from units other than mathematics units and there is a limit of 36 credit points from project units.

**Course Structure**
At least 24 credit points must be taken from postgraduate mathematics units other than MAN200 Mathematical Foundations and/or MAN201 Mathematics.

Up to 24 credit points can be taken from units other than mathematics units.

Limit of 36 credit points from project units.

A planned program of study should be decided in consultation with the Course Coordinator. It will take into account the student's background and area of interest within the mathematical sciences. Strands represent areas of the mathematical sciences which may be of interest to students and the units listed under each strand can guide students in developing their planned program. Students will usually select units from one or two strands only. The unit MAN700 Project can be used to satisfy the rule requiring at least 24 credit points from postgraduate mathematics units other than MAN200 and/or MAN201.

The following postgraduate mathematics units are available in all strands (subject to the limit on credit points from project units):

- MAN200 Mathematical Foundations
- MAN201 Mathematics
- MAN700 Project
- MAN717 Minor Project
- MAN787-1 Project
- MAN787-2 Project
- MAN787-3 Project

To undertake any of the project units, permission from the Course Coordinator is required. If students wish to take any of the above units they will need to discuss their plans and the proposed content with the Course Coordinator.

**Strand Information**
The following strand information is to assist students with unit selection. Students do not have to enrol in all units listed for a strand. The prerequisite units are given as a guide. Depending on a student's background, they may have already covered some of the units listed (or equivalent units) in their undergraduate studies. If students have not studied any mathematics for some time, they may need to undertake one or two units prior to commencing those listed in the strand information.

**Mathematical Modelling/Applied Mathematics**
Postgraduate Mathematics Units:
- MAN761 Analysis
- MAN764 Applied Mathematical Modelling
- MAN774 Perturbation Methods

Prerequisite Units:
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB311 Advanced Calculus
- MAB312 Linear Algebra
- MAB413 Differential Equations
- MAB422 Mathematical Modelling
- MAB521 Applied Mathematics 2
- MAB613 Partial Differential Equations
- MAB672 Advanced Mathematical Modelling

**Computational Mathematics**
Postgraduate Mathematics Unit:
- MAN771 Computational Mathematics 4

Prerequisite Units:
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB220 Computational Mathematics 1
- MAB311 Advanced Calculus
- MAB312 Linear Algebra
- MAB420 Computational Mathematics 2
- MAB522 Computational Mathematics 3

Note: MAB480 Introduction to Scientific Computation or knowledge of programming is required.

**Discrete Mathematics**
Postgraduate Mathematics Unit:
- MAN778 Applications of Discrete Mathematics

Prerequisite Units:
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB621 Discrete Mathematics

**Statistics/Statistical Modelling**
Postgraduate Mathematics Units:
- MAN526 Time Series Analysis
- MAN624 Applied Statistics
- MAN765 Bayesian Data Analysis
- MAN766 Applied Time Series Analysis
- MAN775 Statistical Modelling of Financial Processes

Prerequisite Units:
- MAB101 Statistical Data Analysis 1
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB210 Statistical Modelling 1
- MAB314 Statistical Modelling 2
- MAB414 Applied Statistics 2
- MAB524 Statistical Inference

**Quantitative Analysis/Financial Mathematics**
Postgraduate Mathematics Units:
- MAN526 Time Series Analysis
- MAN624 Applied Statistics
- MAN765 Bayesian Data Analysis
- MAN766 Applied Time Series Analysis
- MAN769 Mathematics of Finance
- MAN775 Statistical Modelling of Financial Processes

Prerequisite Units:
- MAB101 Statistical Data Analysis 1
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB210 Statistical Modelling 1
- MAB312 Linear Algebra
- MAB313 Mathematics of Finance
- MAB314 Statistical Modelling 2
- MAB413 Differential Equations
- MAB414 Applied Statistics 2
- MAB524 Statistical Inference
- MAB623 Financial Mathematics

**Operations Research**
Postgraduate Mathematics Units:
- MAN768 Advanced Techniques in Operations Research

Prerequisite Units:
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB210 Statistical Modelling 1
- MAB315 Operations Research 2
- MAB525 Operations Research 3A
- MAB625 Operations Research 3B

**Scientific Computation and Visualisation**
MAN681 Advanced Visualisation and Data Analysis
Prerequisite Mathematics Units:
MAB101 Statistical Data Analysis
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB281 Mathematics for Computer Graphics
MAB480 Introduction to Scientific Computation
MAB481 Visualisation and Data Analysis
MAB580 Scientific Computation

Mathematics for Secondary Teaching
Postgraduate mathematics units:
MAN700 Project
Or other postgraduate mathematics units provided you are able to satisfy the prerequisites.
Other mathematics units:
Students would usually select across a range of areas of mathematics and statistics.
Non-mathematics units:
Students could select up to 24 credit points from units offered by the Faculty of Education related to the teaching of mathematics.

Graduate Certificate in Applied Science (Breast Ultrasound) PH60
Award title: Graduate Certificate in Applied Science (Breast Ultrasound)
Campus: Gardens Point
Duration: 2 semesters (1 year) part-time
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Associate Professor Brian J Thomas
Discipline coordinator: Natasha Kazich

Professional Recognition
This course is accredited with the Australasian Sonographer Accreditation Registry (ASAR).

Course Structure
To complete the Graduate Certificate in Applied Science (Breast Ultrasound) students must complete the units listed below (total 48 credit points)

Semester 1
PCN162 Principles of Medical Ultrasound
PCN187 Specialist Studies
PCN397-1 Clinical Attachment

Semester 2
PCN184 Breast Imaging
PCN397-2 Clinical Attachment
Note: The PCN397 clinical attachment unit is a 2 semester unit

Graduate Certificate in Biotechnology LS66
Award title: Graduate Certificate in Biotechnology
CRICOS code: 054278A
Campus: Gardens Point
Duration: 1 semester (0.5 year) full-time or 2 semesters (1 year) part-time
Credit points: 48 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Mark O'Brien

Professional Recognition
Graduates are eligible to join the AusBiotech, the Australian Society for Biochemistry and Molecular Biology, and the Australian Society for Microbiology.

Course Design

Graduate Certificate in Lighting (off-shore) PH63
Award title: Graduate Certificate in Lighting
Campus: City University of Hong Kong
Duration: 2 semesters part-time (Hong Kong) external
Credit points: 48 (part-time standard semester: 24)
Course coordinator: Dr Ian Cowling

Course Design
Graduate Certificate students will undertake four units (12 credit points each) covering the perception, specification and measurement of light, lamp and luminaire design, lighting design, daylighting and the human factors of lighting.

Part-time Course Structure
Year 1, Semester 2 (MODULE 1)
PCZ121 Vision Colour and Photometry
PCZ124 Lamps and Luminaires
Year 2, Semester 1 (MODULE 1)
PCZ122 Lighting Design
PCZ123 Sustainability and Human Factors

Notes:
PH63 is offered part-time in a combination of face-to-face lecture/tutorial/practical format, and on-line. Some units will have a computer-design type component and all units will incorporate learning through assignment work, all of which will be incorporated into the assessment program. The two units offered each semester will be presented sequentially. The face-to-face teaching component will be offered in block form over a weekend, usually on the first weekend of the teaching period assigned to that unit. There will then be
a follow-up face-to-face session about three weekends later.

Students in the Graduate Certificate in Lighting (PH63) wishing to continue their studies in the Graduate Diploma of Lighting (PH73), on successful completion of 48 credit points, are required to seek admission using an International Student Degree Program Application (F) Form.

- **Graduate Certificate in Lighting (on-shore) PH62**
  
  **Award title:** Graduate Certificate in Lighting  
  **Campus:** Gardens Point  
  **Duration:** 2 semesters (1 year) (Internal and External) part-time  
  **Credit points:** 48 (part-time standard semester: 24)  
  **Course coordinator:** Dr Ian Cowling

**Course Design**

Graduate Certificate students will undertake four units (12 credit points each) covering the perception, specification and measurement of light, lamp and luminaire design, lighting design, sustainability issues and human factors.

**Part-time Course Structure**

- **Year 1, Semester 2 (July to October)**  
  PCN121 Vision Colour and Photometry  
  PCN124 Lamps and Luminairea

- **Year 2, Semester 1 (February to June)**  
  PCN122 Lighting Design  
  PCN123 Sustainability and Human Factors

**Notes:**

PH62 is offered part-time comprising a lecture/tutorial format, and where appropriate practical and field work. Some units will have a significant computer-design type component and all units will incorporate learning through assignment work, all of which will be incorporated into the assessment program. Most units in the internal mode will be offered in block format on weekends.

Domestic students in the Graduate Certificate in Lighting (PH62) will be invited, on successful completion of 48 credit points, to continue with studies in the Graduate Diploma in Lighting (PH72).

International students wishing to change courses should consult International Student Business Services.

- **Graduate Certificate in Mathematical Science MA65**
  
  **Award title:** Graduate Certificate in Mathematical Science  
  **CRICOS code:** 046044G  
  **Campus:** Gardens Point  
  **Duration:** 1 semester (0.5 year) full-time or 2 semesters (1 year) part-time  
  **Credit points:** 48 (full-time standard semester: 24; part-time standard semester: 24)  
  **Course coordinator:** Dr Troy Farrell

**Course Design**

The program of study for an individual student will be decided in consultation with the course coordinator and will take into account the student's background and area of interest within the mathematical sciences.

In the Graduate Certificate, at least 36 credit points must be taken from mathematics units and up to 12 credit points can be taken from units other than mathematics units.

**Course Structure**

At least 36 credit points must be taken from mathematics units.

Up to 12 credit points can be taken from units other than mathematics units.

The program of study for an individual student will be decided in consultation with the Course Coordinator and will take into account the student's background and area of interest within the mathematical sciences.

Students must contact the course Coordinator prior to commencing.

The units selected may include:

- MAB100 Mathematical Sciences 1A  
- MAB101 Statistical Data Analysis 1  
- MAB111 Mathematical Sciences 1B  
- MAB112 Mathematical Sciences 1C

These units listed are units suitable for students who have not studied mathematics at university but who have achieved a background equivalent to having successfully studied Senior Mathematics B (or B and C). The actual units recommended for an individual student will depend upon their secondary mathematics background, length of time since they have studied mathematics, any tertiary mathematics studies and their area of interest. For other available units please see the list of Undergraduate and Postgraduate Mathematics Units which is obtainable from the School of Mathematical Sciences or go to Unit Outlines under Course Information on the QUT website and enter MA for unit code. Your Course Coordinator can assist with non-mathematics units.

- **Bachelor of Applied Science (Honours) SC60**
  
  **Award title:** Bachelor of Applied Science (Honours) (Study Area A)  
  **CRICOS code:** 009041G  
  **Campus:** Gardens Point  
  **Duration:** 1 Year full-time or 2 Years part-time  
  **Credit points:** 96 (full-time standard semester: 48)  
  **Course coordinator:** Associate Professor Peter Fredericks  
  **Discipline coordinator:** Dr John Bartley (Chemistry); Dr Tony Clarke (Ecology); Dr Robin Thwaites (Environmental Science); Dr Gary Huffer (Geology); Associate Professor Perry Walsh (Life Science); Dr Troy Farrell (Mathematics); Dr Esa Jaatinen (Physics)

**Professional Recognition**

Relevant scientific professional bodies include Australasian Association of Clinical Biochemists, Australasian Institute of Mining and Metallurgy, AusBiotech Ltd, Australian Institute of Geoscientists, Australian Institute of Physics, Australian Mathematical Society, Australian Society for Biochemistry and Molecular Biology, Australian Society for Medical Research, Australian Society for Microbiology, AusBiotech Ltd, Australian Institute of Field Research, Ecological Society of Australia, Geological Society of Australia, Royal Australian Chemical Institute, and Statistical Society of Australia. Eligibility for membership is based on the combination of units undertaken in the degree and the Bachelor of Applied Science course that underpins it.

**Course Structure**

The Honours year comprises coursework and a major research project supervised by QUT staff, in some cases in conjunction with local industry. Majors are offered in Chem-

**Course Structure**

### Chemistry Major

**Year 1, Semester 1**
- PCB700-1 Research Project
- PCB700-2 Research Project
- PCB742 Elective Unit
- PCB780-1 Advanced Topics in Chemistry 1

**Year 1, Semester 2**
- PCB700-3 Research Project
- PCB700-4 Research Project
- PCB700-5 Research Project
- PCB780-2 Advanced Topics in Chemistry 1

Note: Students wishing to apply for entry to BAppSc(Hons) should consult with the contact person for the relevant science discipline before applying (see contact details link above).

### Ecology, Environmental Science, Geology Major

**Year 1, Semester 1**
- NRB720-1 Project
- NRB730-1 Research Methods and Strategies
- NRB730-2 Research Methods and Strategies
- NRB735 Advanced Studies in Resource Sciences

**Year 1, Semester 2**
- NRB720-2 Project
- NRB720-3 Project
- NRB720-4 Project
- NRB720-5 Project

Note: Students wishing to apply for entry into BAppSc(Hons) should consult with the contact person for the relevant science discipline before applying (see contact details link above).

### Life Science Major

**Year 1, Semester 1**
- LSB850-1 Research Strategies
- LSB851-1 Readings in Life Science 1
- LSB852-1 Project

**Year 1, Semester 2**
- LSB850-2 Research Strategies
- LSB851-2 Readings in Life Science 1
- LSB852-2 Project

Note: Students wishing to apply for entry into BAppSc(Hons) should consult with the contact person for the relevant science discipline before applying (see contact details link above).

### Mathematics Major

**Year 1, Semester 1**
- MAN787-1 Project
- 36 credit points of elective units selected from the list below*

**Year 1, Semester 2**
- MAN787-2 Project
- MAN787-3 Project
- 24 credit points of elective units selected from the list below*

**Elective List (Mathematics)**
- 60 credit points to be selected
- MAN717 Minor Project
- MAN761 Analysis
- MAN764 Applied Mathematical Modelling
- MAN765 Bayesian Data Analysis
- MAN766 Applied Time Series Analysis
- MAN768 Advanced Techniques in Operations Research
- MAN769 Mathematics of Finance
- MAN771 Computational Mathematics 4
- MAN774 Perturbation Methods
- MAN775 Statistical Modelling of Financial Processes
- MAN778 Applications of Discrete Mathematics

Up to 12 credit points from the following lists can be included in the 60 credit points of electives:
- MAB522 Computational Mathematics 3
- MAB524 Statistical Inference
- MAB526 Statistical Science 3
- MAB613 Partial Differential Equations
- MAB672 Advanced Mathematical Modelling

Up to two units of a quantitative nature from another Faculty or School may be included with the permission of the Mathematics Coordinator. The unit(s) must be of honours level and relevant to the proposed program. Examples of suitable units are:
- EFN505 Financial Risk Management
- PCB706 Quantum Mechanics

* The Course Coordinator may approve a student taking 24 credit points of elective units (together with MAN787-1 and MAN787-2) in Semester 1 and 36 credit points of elective units (together with MAN787-3) in Semester 2.

**Note:**
Students wishing to apply for entry to BAppSc(Hons) should consult with the contact person for the relevant science discipline before applying (see contact details link above).

### Physics Major

**Year 1, Semester 1**
- PCB700-1 Research Project
- PCB700-2 Research Project
- PCB706 Quantum Mechanics
- Elective

**Year 1, Semester 2**
- PCB700-3 Research Project
- PCB700-4 Research Project
- PCB700-5 Research Project
- Elective

Note: An alternative to PCB706 Quantum Mechanics may be permitted

**Elective List (Physics)**
- PCB664 Lasers and Photonics
- PCB669 Astrophysics 2
- PCB708 Advanced Topics in Physics
- PCN716 Advanced Topics in Physics 2

Note: PCB708 and PCN716 typically comprise two components chosen from atmospheric aerosol physics, classical mechanics, non-linear optics, quantum electrodynamics, advanced general relativity or aspects of units from the Masters in Medical Physics course.

### Bachelor of Applied Science and Bachelor of Applied Science (Honours) - Dean's Scholars Accelerated Honours Program

SC01 + SC60

**Award title:** Bachelor of Applied Science (Honours) (Study Area A)
**CRICOS code:** 003502J
**Campus:** Gardens Point
Duration: 3 Years (plus initial summer term) full-time
Credit points: 384 [BAppSc 288 cp and BAppSc(Hons) 96 cp]
Course coordinator: Associate Professor Bruce Cornish
Discipline coordinator: Dr John Aaskov (Life Sciences); Dr Graeme Pettet (Mathematics); Associate Professor David Gust (Natural Resource Sciences); Dr Dennis Arnold (Physical and Chemical Sciences - Chemistry); Dr Dmitri Gramotnev (Physical and Chemical Sciences - Physics)

Professional Recognition
As a graduate of the Dean's Scholars Accelerated Honours Program you will qualify for professional recognition and employment in fields relevant to the specialisations that you have chosen. It is expected that many Dean's Scholars will proceed to Doctor of Philosophy studies.

Course Design
This course is designed to allow Dean's Scholars to complete both the Bachelor of Applied Science and Bachelor of Applied Science (Honours) courses in an enriched and accelerated manner.

All of the majors and co-majors offered in the SC01 course are available within the Bachelor of Applied Science component of the Dean's Scholars Accelerated Honours Program. The majors available are: Biochemistry, Biotechnology, Chemistry, Ecology, Environmental Science, Geoscience, Mathematics, Microbiology and Physics. Co-majors include: Applied Geology, Applied Physics, Astrophysics, Biodiversity, Biomolecular Sciences, Environmental Studies, Forensic Science, Scientific Computation and Visualisation, Statistics. In addition all of the majors offered in the Bachelor of Applied Science (Honours) course are available to Dean's Scholars. (Full details of the SC01 BAppSc and SC60 (Hons) courses are available under the separate entries for these programs.)

Dedicated Dean's Scholars units that facilitate the acceleration and provide enrichment are indicated below:
SCB301 Science for Dean's Scholars
SCB303 Tutorial Program for Dean's Scholars (substituted by a mathematics unit for mathematics majors)
SCB401 Research Methods for Dean's Scholars (substituted by MAB640 Industry Project for Mathematics majors)

Course Structure

Biochemistry, Biotechnology and Microbiology Majors

Year 1, Summer (24 cp)
Dean's Scholars Program enrichment unit:
SCB301 Science for Dean's Scholars

Year 1, Semester 1 (60 cp)
Dean's Scholars Program enrichment unit:
SCB303 Tutorial Program for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

Year 1, Semester 2 (60 cp)
Dean's Scholars Program enrichment unit:
SCB401 Research Methods for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

Year 2, Semester 1 (72 cp)
Dean's Scholars Program enrichment unit:
SCB501-1 Research Project for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

Year 2, Semester 2 (60 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)
Normal BAppSc and BAppSc(Hons) unit:
LSB657 Perspectives in Life Science

Year 3, Semester 1 (60 cp) and Semester 2 (48 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc + BAppSc(Hons) Coursework (12 cp + 36 cp respectively)
Normal BAppSc and BAppSc(Hons) units: BAppSc(Hons) Research (60 cp)

Chemistry Major

Year 1, Summer (24 cp)
Dean's Scholars Program enrichment unit:
SCB301 Science for Dean's Scholars

Year 1, Semester 1 (60 cp)
Dean's Scholars Program enrichment unit:
SCB303 Tutorial Program for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

Year 1, Semester 2 (60 cp)
Dean's Scholars Program enrichment unit: Elective (12 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

Year 2, Semester 1 (60 cp)
Dean's Scholars Program enrichment unit:
SCB401 Research Methods for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

Year 2, Semester 2 (70 cp)
Dean's Scholars Program enrichment unit:
SCB501-1 Research Project for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc + BAppSc(Hons) Coursework (12 cp + 36 cp respectively)
Normal BAppSc and BAppSc(Hons) units: BAppSc(Hons) Research (60 cp)

Mathematics Major

Year 1, Summer (24 cp)
Dean's Scholars Program enrichment unit (MS module + MA module + one of the PH, CH, and LS modules):
SCB301 Science for Dean's Scholars

Year 1, Semester 1 (60 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (60 cp)

Year 1, Semester 2 (60 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (60 cp)

Year 2, Semester 1 (60 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (60 cp)

Year 2, Semester 2 (60 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (60 cp)

Year 3, Semester 1 (60 cp) and Semester 2 (48 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc + BAppSc(Hons) Coursework (12 cp + 36 cp respectively)
Normal BAppSc and BAppSc(Hons) units: BAppSc(Hons) Research (60 cp)

Physics Major

Year 1, Summer (24 cp)

Dean's Scholars Program enrichment unit:
SCB301 Science for Dean's Scholars

**Year 1, Semester 1 (60 cp)**
Dean's Scholars Program enrichment unit:
SCB303 Tutorial Program for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

**Year 1, Semester 2 (60 cp)**
Dean's Scholars Program enrichment unit: Elective (12 cp)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

**Year 2, Semester 1 (60 cp)**
Dean's Scholars Program enrichment unit (approved Physics elective)
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (48 cp)

**Year 2, Semester 2 (72 cp)**
Dean's Scholars Program enrichment unit:
SCB501-1 Research Project for Dean's Scholars
Normal BAppSc and BAppSc(Hons) units: BAppSc Coursework (24 cp)

**Year 3, Semester 1 (60 cp) and Semester 2 (48 cp)**
Normal BAppSc and BAppSc(Hons) units: BAppSc + BAppSc(Hons) Coursework (12 cp + 36 cp respectively)
Normal BAppSc and BAppSc(Hons) units: BAppSc(Hons) Research (60 cp)

### Bachelor of Applied Science SC01

**Award title:** Bachelor of Applied Science (Study Area A)
**CRICOS code:** 003502J
**Campus:** Gardens Point and Carseldine
**Duration:** 3 Years full-time; Carseldine campus: After the completion of first year (ie 96 credit points of study), students must transfer to Gardens Point campus for the remainder of the course. 6 Years part-time; Carseldine campus: After the completion of first year (ie 96 credit points of study), students must transfer to Gardens Point campus for the remainder of the course.
**Credit points:** 288 (minimum) (full-time standard semester: 48; part-time standard semester: 24)
**Course coordinator:** Dr Megan Hargreaves
**Discipline coordinator:** Dr Peter Cooke (Biochemistry); Dr Marion Bateson (Biotechnology); A/Prof Dennis Arnold (Chemistry); Dr Ian Williamson (Ecology); Graham Kimber (Environmental Science); Dr Serge Kokot (Forensic Science); Dr Gregg Webb (Geoscience); Dr Glenn Fulford (Mathematics); Dr Christine Knox (Microbiology); Dr Greg Michael (Physics)

**Course Design**
The Bachelor of Applied Science course program comprises a set of foundation core science units studied in your first year, after which you choose a major and a co-major area of study during your second and third years. A choice of ten science majors and a range of co-major areas of study are available across both science and non-science disciplines.

The QUT Applied Science course is the only science course offered that gives you such a broad range of science options and the flexibility to create your own personal science degree program. If you are not sure what major to choose, don't worry because this decision can be delayed until after you have completed your first semester of study. Academic staff are available to advise on how best to structure your degree to suit your personal and career aspirations and ensure you meet eligibility criteria for membership of professional bodies when you graduate.

Our first semester core units are designed as a foundation to broaden your science experience and give you a sample of the breadth of disciplines available. The four first-semester units you study will generally include at least three of the following:

**Life Science:** an introduction to the study of life processes, with cells and organisms as the central point of reference.

**Statistical Data Analysis:** how to extract valid results from data collected.

**Environmental Science:** incorporating the chemical, physical and biological processes that influence the air, the earth and the atmosphere.

**Physical Science:** involving the basic concepts of physics and chemistry.

**Science Majors, Science Co-majors and Non-Science Co-majors**

**Science Majors:**
- Biochemistry
- Biotechnology
- Chemistry
- Ecology
- Environmental Science
- Forensic Science*
- Geoscience
- Mathematics
- Microbiology
- Physics

* The Forensic Science major must be taken as a double major with another science area eg Chemistry or Biotechnology.

**Science Co-majors:**
- One of the majors listed above or:
  - Applied Geology
  - Applied Physics
  - Astrophysics
  - Biodiversity
  - Biomolecular Sciences
  - Industrial Chemistry
  - Scientific Computation and Visualisation
  - Statistics
  - Or a non-science co-major

**Examples of Non-Science Co-majors:**
- Accountancy
- Aviation
- Banking and Finance
- Communication
- Economics
- Environmental Studies
- Human Resource Management
- Marketing
- Psychology

**Course Rules**
1. To fulfil the requirements for the award of the Bachelor of Applied Science degree, a student must complete a total of at least 288 credit points, comprising at least 192 credit points in units offered by the Faculty of Science. The units completed for the award of the degree must include:
   (a) at least six faculty core units, including at least three foundation units, and three other first year science units
   (b) a major study
   (c) a co-major study (or group of units constituting 72 credit points at advanced level in any approved area of study in the University).
Major and co-major studies are defined in terms of the discipline area and the academic level at which the units are offered.

A major must be completed in one of the following discipline areas: biochemistry; biotechnology; chemistry; ecology; environmental science; geoscience; mathematics; microbiology; physics. A major comprises 96 credit points of units at advanced level, including at least 48 credit points at the third level.

A co-major may be completed by selecting appropriate units from another major, or from the following discipline areas: applied geology; applied physics; astrophysics; biodiversity, biomolecular science, environmental management, environmental science, forensic science, industrial chemistry, scientific computation and visualisation, statistics. A co-major comprises 72 credit points at advanced level. Alternatively, the co-major may be constituted by an approved group of units comprising 72 credit points at advanced level in any approved area of study in the university. Major and co-major studies may be taken in closely related discipline areas.

2. The maximum number of credit points that may be counted from units other than those at advanced level is 120 credit points.

3. Elective units may be chosen from (a) SCO1 majors/co-majors other than those undertaken by a student, (b) other appropriate units offered by the Faculty of Science, and (c) units offered by other faculties.

4. Students are normally expected to complete the course in minimum time. A full-time student normally enrols in an average of 48 credit points per semester for six semesters and a part-time student normally enrols in 24 credit points per semester for 12 semesters. (A full-time student is one who is enrolled in 36 or more credit points per semester, whereas a part-time student is one who is enrolled in less than 36 credit points per semester.)

5. All commencing and certain continuing students may attend scheduled academic advising sessions to plan their progression through the course, and should obtain the approval of an academic adviser prior to effecting any change of enrolment.

Notes on the Rules

1. For offerings in the Faculty of Science, the term advanced level refers to units in Schedules 2 and 3. For units offered outside the Faculty of Science, the term advanced level refers to units for which there is at least one prerequisite unit.

2. Level 2 and level 3 units are listed in Schedules 2 and 3 respectively according to their unit codes. For each unit, the major(s) and/or co-major(s) in which the unit is offered are shown. It should be noted that not every advanced level unit offered in each major/co-major is mandatory.

3. The major undertaken by a student will qualify the student to apply to undertake the Industrial Internship Program.

Industrial Internship Program

A registered student who has successfully completed the equivalent of the first and second year of the standard full-time course, normally with a grade point average (GPA) of not less than 4.5 overall, may, at the discretion of the Industrial Internship Coordinator, apply to undertake the Industrial Internship Program.

This program involves 10-12 months of paid full-time employment in an approved industrial/commercial environment during which time the student is enrolled in the unit SCB100 Cooperative Education. On completion of the approved industrial internship placement the student resumes formal studies.

General Requirements for Majors

The units referred to in the general requirements for majors are listed in Schedules 1, 2 and 3.

Course Structure

Biochemistry

First Level Units

Semester 1

MANDATORY UNIT:
LSB118 Life Science
MAB101 Statistical Data Analysis 1
PLUS EITHER:
PCB140 Introductory Chemistry
OR
PCB142 Chemistry 1
Plus ONE other unit, for example:
MAB105 Preparatory Mathematics
NRB100 Environmental Science
PCB101 Physical Science

Semester 2

MANDATORY UNITS:
LSB238 Cell and Molecular Biology 1
NRB270 Animal and Plant Structure and Function
PCB242 Chemistry 2
Plus ONE other unit, for example:
LSB258 Principles of Human Physiology
MAB101 Statistical Data Analysis 1
PYB012 Psychology

Second Level Units

Semester 1

MANDATORY UNITS:
LSB308 Biochemistry
LSB338 Cell and Molecular Biology 2
Plus TWO other units selected according to the comajor requirements

Semester 2

MANDATORY UNITS:
LSB408 Metabolism
LSB468 Molecular Biology
Plus TWO other units selected according to the comajor requirements

Third Level Units

Semester 1

MANDATORY UNIT:
LSB508 Advanced Metabolism
PLUS:
LSB527 Biomedical Research Technologies
Or choose a unit from:
LSB509 Medical Biotechnology 1
LSB537 Genetic Engineering
Plus TWO other units selected according to the comajor requirements

Semester 2

MANDATORY UNIT:
LSB608 Protein Science
PLUS
LSB607 Protein Purification
Or choose a unit from:
LSB609 Medical Biotechnology 2
LSB619 Genomics and Bioinformatics
Plus TWO other units selected according to the comajor requirements

Recommended Comajors:
Biomolecular Sciences, Biotechnology, Chemistry, Forensic Science, Microbiology

Biotechnology Major

First Level Units

Semester 1
MANDATORY UNITS:
LSB118 Life Science
MAB101 Statistical Data Analysis 1
PLUS EITHER:
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1
Plus ONE other unit, for example:
MAB105 Preparatory Mathematics
NRB100 Environmental Science
PCB101 Physical Science

Semester 2
MANDATORY UNITS:
LSB238 Cell and Molecular Biology 1
NRB270 Animal and Plant Structure and Function
PCB242 Chemistry 2
Plus ONE other unit, for example:
LSB258 Principles of Human Physiology
MAB101 Statistical Data Analysis 1

Second Level Units

Semester 1
MANDATORY UNITS:
LSB308 Biochemistry
LSB338 Cell and Molecular Biology 2
Plus TWO other units selected according to the comajor requirements

Semester 2
MANDATORY UNITS:
LSB449 Human Cell Biology
LSB468 Molecular Biology
Plus TWO other units selected according to the comajor requirements

Third Level Units

Semester 1
MANDATORY UNITS:
LSB537 Genetic Engineering
PLUS EITHER:
LSB509 Medical Biotechnology 1
Or
LSB577 Plant Biotechnology 1
Plus TWO other units selected according to the comajor requirements

Semester 2
MANDATORY UNITS:
LSB609 Medical Biotechnology 2
Or
LSB677 Plant Biotechnology 2
Plus TWO other units selected according to the comajor requirements, for example:
LSB605 Protein Engineering and Bioprocessing
LSB619 Genomics and Bioinformatics

Recommended Comajors:
Biomolecular Sciences, Biochemistry, Forensic Science, Microbiology

Chemistry Major

First Level Units

Semester 1
MANDATORY UNITS:
PCB101 Physical Science
PCB142 Chemistry 1
PLUS EITHER:
MAB100 Mathematical Sciences 1A
Or
MAB105 Preparatory Mathematics
Or
MAB111 Mathematical Sciences 1B
Plus either:
LSB118 Life Science
Or
NRB100 Environmental Science

Semester 2
MANDATORY UNITS:
MAB101 Statistical Data Analysis 1
PCB242 Chemistry 2
Plus TWO other units, for example:
PCB150 Physics 1H
PCB200 Chemical Technology 1
PYB012 Psychology

Second Level Units

Semester 1
MANDATORY UNITS:
PCB334 Inorganic Chemistry
PCB354 Structure and Mechanism in Organic Chemistry
Plus TWO other units selected according to the comajor requirements

Semester 2
MANDATORY UNITS:
PCB405 Principles of Physical Chemistry
PCB444 Spectroscopy
Plus TWO other units selected according to the comajor requirements

Third Level Units

Semester 1
MANDATORY UNITS:
PCB505 Advanced Physical Chemistry
PCB554 Synthesis and Reactivity in Organic Chemistry
Plus TWO other units selected according to the comajor requirements

Semester 2
MANDATORY UNITS:
PCB634 Organometallic and Coordination Chemistry
PCB644 Frontiers in Chemistry
Plus TWO other units selected according to the comajor requirements

Recommended Comajors:
Biochemistry, Biotechnology, Forensic Science, Industrial Chemistry

Ecology Major

First Level Units

Semester 1
MANDATORY UNITS:
LSB118 Life Science
NRB100 Environmental Science
PCB101 Physical Science
PLUS EITHER:
MAB101 Statistical Data Analysis 1
Or
MAB105 Preparatory Mathematics
Or
NRB230 Planet Earth

**Semester 2**
MANDATORY UNIT:
NRB270 Animal and Plant Structure and Function

**OPTIONAL UNITS:**
LSB238 Cell and Molecular Biology 1
MAB101 Statistical Data Analysis 1
NRB240 History of Life on Earth

Second Level Units

**Semester 1**
MANDATORY UNITS:
NRB301 Earth Surface Systems
NRB311 Population Ecology
Plus TWO other units selected according to the comajor requirements

**Semester 2**
MANDATORY UNITS:
NRB410 Genetics and Evolution
NRB412 Experimental Design
Plus TWO other units selected according to the comajor requirements

Third Level Units

**Semester 1**
MANDATORY UNITS:
NRB510 Population Genetics
NRB511 Population Management
Plus TWO other units selected according to the comajor requirements

**Semester 2**
MANDATORY UNITS:
NRB610 Ecological Applications
NRB611 Conservation Biology
Plus TWO other units selected according to the comajor requirements

Recommended Comajors:
- Biodiversity, Environmental Science

**Environmental Science Major**

First Level Units

**Semester 1**
MANDATORY UNITS:
LSB118 Life Science
NRB100 Environmental Science
PLUS EITHER:
MAB101 Statistical Data Analysis 1
Or
MAB105 Preparatory Mathematics
Plus either:
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1
Or
NRB230 Planet Earth

**Semester 2**
MANDATORY UNIT:
NRB270 Animal and Plant Structure and Function

**OPTIONAL UNITS:**
LSB238 Cell and Molecular Biology 1
MAB101 Statistical Data Analysis 1
NRB240 History of Life on Earth

Second Level Units

**Semester 1**
MANDATORY UNITS:
NRB301 Earth Surface Systems
PLUS EITHER:
NRB311 Population Ecology
Or
NRB370 Invertebrate Biology
Or
NRB371 Plant Biology
Plus TWO other units selected according to the comajor requirements

**Semester 2**
MANDATORY UNITS:
NRB410 Genetics and Evolution
NRB440 Environmental Chemistry
Plus TWO other units selected according to the comajor requirements

**Recommended Comajors:**
- Biodiversity, Ecology, Geoscience
- Forensic Science Major
  Note: Must be taken as a double major with Biochemistry, Biotechnology, Chemistry or Microbiology

First Level Units

**Semester 1**
MANDATORY UNITS:
LSB118 Life Science
MAB101 Statistical Data Analysis 1
PLUS EITHER:
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1
Plus either:
NRB100 Environmental Science
Or
PCB101 Physical Science

**Semester 2**
MANDATORY UNITS:
LSB238 Cell and Molecular Biology 1
NRB270 Animal and Plant Structure and Function
PCB242 Chemistry 2
Plus ONE other unit, for example:
LSB258 Principles of Human Physiology
MAB101 Statistical Data Analysis 1
PYB012 Psychology
Semester 1
MANDATORY UNITS:
LSB468 Molecular Biology
PCB414 Industrial and Environmental Analytical Chemistry
SCB384 Forensic Science
Plus ONE or TWO other units selected according to the second-major requirements

Semester 2
MANDATORY UNITS:
JSB937 Forensic Scientific Evidence
LSB468 Molecular Biology
PCB414 Industrial and Environmental Analytical Chemistry
Plus ONE or TWO other units selected according to the second-major requirements

Third Level Units

Semester 1
MANDATORY UNITS:
PCB514 Instrumental Analysis
PCB584 Forensic Examination of Physical Evidence
Plus TWO other units selected according to the second-major requirements

Semester 2
MANDATORY UNITS:
LSB684 Forensic DNA Profiling
PCB684 Forensic Analysis and Toxicology
Plus TWO other units selected according to the second-major requirements

Geoscience Major

First Level Units

Semester 1
MANDATORY UNITS:
MAB101 Statistical Data Analysis 1
NRB100 Environmental Science
NRB230 Planet Earth
PCB101 Physical Science

Semester 2
MANDATORY UNITS:
MAB100 Mathematical Sciences 1A
NRB240 History of Life on Earth
PCB142 Chemistry 1
Plus ONE other unit, for example:
SCB222 Exploration of the Universe

Second Level Units

Semester 1
MANDATORY UNITS:
NRB301 Earth Surface Systems
NRB333 Mineralogy
Plus TWO other units selected according to the comajor requirements, for example:
NRB331 Sedimentary Geology

Semester 2
MANDATORY UNITS:
NRB434 Structural Geology
NRB436 Introduction to Igneous and Metamorphic Petrology
Plus TWO other units selected according to the comajor requirements, for example:
NRB437 Stratigraphy and Depositional Environments

Third Level Units

Semester 1
MANDATORY UNITS:
NRB534 Geophysics
NRB536 Petrology and Geochemistry
NRB601 Field Mapping and Monitoring of Natural Resources
Plus ONE other unit selected according to the comajor requirements, for example:
NRB535 Geology of Fossil Fuels

Semester 2
ONE OF:
NRB633 Hydrogeology
NRB635 Plate Tectonics and Advanced Structural Geology
NRB636 Stratigraphy and Basin Analysis
PSB655 Remote Sensing
Plus THREE other units selected according to the comajor requirements

Recommended Comajors:
Applied Geology, Environmental Science

Mathematics Major

First Level Units

Semester 1
MANDATORY UNITS:
MAB100 Mathematical Sciences 1A
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
PLUS ONE OR TWO OF FOUNDATION UNITS:
LSB118 Life Science
NRB100 Environmental Science
PCB101 Physical Science

Semester 2
MANDATORY UNITS:
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1
MAB220 Computational Mathematics 1
PLUS ONE OR TWO OF FOUNDATION UNITS:
LSB118 Life Science
NRB100 Environmental Science
PCB101 Physical Science

Second Level Units

Semester 1
Note: Select 96 credit points of advanced level units from Levels 2 and 3. Students must complete at least one of MAB311, MAB312 or MAB413
OPTIONAL UNITS:
MAB311 Advanced Calculus
MAB312 Linear Algebra
MAB313 Mathematics of Finance
MAB314 Statistical Modelling 2
MAB481 Visualisation and Data Analysis

Semester 2
OPTIONAL UNITS:
MAB315 Operations Research 2
MAB413 Differential Equations
MAB414 Applied Statistics 2
MAB420 Computational Mathematics 2
MAB422 Mathematical Modelling
MAB480 Introduction to Scientific Computation

Third Level Units

Semester 1
OPTIONAL UNITS:
MAB521 Applied Mathematics 3
MAB522 Computational Mathematics 3
MAB523 Introduction to Quality Management
MAB525 Operations Research 3A
MAB526 Statistical Science 3
MAB580 Scientific Computation
MAB672 Advanced Mathematical Modelling

**Semester 2**

OPTIONAL UNITS:
MAB526 Statistical Science 3
MAB613 Partial Differential Equations
MAB621 Discrete Mathematics
MAB623 Financial Mathematics
MAB624 Applied Statistics 3
MAB625 Operations Research 3B
MAB681 Advanced Visualisation and Data Analysis

**Recommended Comajors:**
Maths, Physics, Statistics, Scientific Computation and Visualisation

**Microbiology Major**

First Level Units

**Semester 1**
MANDATORY UNIT:
LSB118 Life Science
MAB101 Statistical Data Analysis 1
PLUS EITHER:
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1
Plus ONE other unit, for example:
MAB105 Preparatory Mathematics
NBR100 Environmental Science
PCB101 Physical Science

**Semester 2**
MANDATORY UNITS:
LSB238 Cell and Molecular Biology 1
PCB242 Chemistry 2
OPTIONAL UNIT:
NBR270 Animal and Plant Structure and Function
Plus ONE other unit, for example:
LSB258 Principles of Human Physiology
MAB101 Statistical Data Analysis 1
PYB012 Psychology

Second Level Units

**Semester 1**
MANDATORY UNITS:
LSB308 Biochemistry
LSB328 Microbiology 1
Plus TWO other units selected according to the comajor requirements

**Semester 2**
MANDATORY UNIT:
LSB428 Microbiology 2
Plus either:
LSB408 Metabolism
Or
LSB449 Human Cell Biology
Or
LSB468 Molecular Biology
Plus TWO other units selected according to the comajor requirements

Third Level Units

**Semester 1**
Select TWO units from:
LSB528 Environmental Microbiology
LSB547 Bacterial Pathogenesis and Disease Diagnosis
LSB568 Electron Microscopy
LSB578 Virology
Plus TWO other units selected according to the comajor requirements

**Semester 2**
Select TWO units from:
LSB628 Food Microbiology
LSB647 Clinical Mycology and Parasitology
LSB648 Molecular Microbiology
Plus TWO other units selected according to the comajor requirements

**Recommended Comajors:**
Biochemistry, Biomolecular Sciences, Biotechnology, Forensic Science

**Physics Major**

First Level Units

**Semester 1**
MANDATORY UNITS:
MAB111 Mathematical Sciences 1B
PCB101 Physical Science
OPTIONAL UNITS:
PCB107 Physics and Quantitative Techniques
Plus either:
LSB118 Life Science
Or
NBR100 Environmental Science

**Semester 2**
MANDATORY UNITS:
MAB112 Mathematical Sciences 1C
PCB250 Physics 1
PCB260 Physics 1A
Select ONE other unit

Second Level Units

**Semester 1**
MANDATORY UNITS:
MAB311 Advanced Calculus
PCB361 AC Theory and Electronics
PCB362 Physics 2
Plus TWO other units selected according to the comajor requirements

**Semester 2**
MANDATORY UNITS:
PCB460 Instrumentation and Computational Methods
PCB462 Thermodynamics and Solid State Physics
Plus TWO other units selected according to the comajor requirements

Third Level Units

**Semester 1**
MANDATORY UNITS:
PCB561 Quantum and Condensed Matter Physics
PCB562 Physical Methods of Analysis
Plus TWO other units selected according to the comajor requirements

**Semester 2**
MANDATORY UNITS:
PCB661 Experimental Physics
PCB665 Physics 3
Plus TWO other units selected according to the comajor requirements

**Recommended Comajors:**
Applied Physics, Astrophysics, Mathematics

**Applied Geology Comajor**

First Level Units
First year units as for Geoscience major

Second Level Units
ENVIRONMENTAL GEOLOGY EMPHASIS
NBR331 Sedimentary Geology
NRB437 Stratigraphy and Depositional Environments
NRB440 Environmental Chemistry

EXPLORATION GEOLOGY EMPHASIS
NRB331 Sedimentary Geology
NRB437 Stratigraphy and Depositional Environments
NRB440 Environmental Chemistry

Third Level Units
ENVIRONMENTAL GEOLOGY EMPHASIS
NRB501 Spatial Analysis of Environmental Systems
NRB633 Hydrogeology

NRB440 Environmental Chemistry

RECOMMENDED MAJOR:
This comajor is recommended for Geoscience majors

APPLIED PHYSICS COMAJOR
First Level Units
First year units as for Physics major, plus ITB111 Software Development

Second Level Units
PCB445 Nanotechnology and Nanoscience
PCB563 Global Energy Balance and Climate Change

Third Level Units
MAB312 Linear Algebra
PCB562 Physical Methods of Analysis
PCB593 Digital Image Processing
PCB664 Lasers and Photonics

RECOMMENDED MAJOR:
This comajor is recommended for Physics majors

ASTROPHYSICS COMAJOR
First Level Units
First year units as for Physics major, plus SCB222 Exploration of the Universe

Second Level Units
PCB469 Astrophysics 1
PCB563 Global Energy Balance and Climate Change

Third Level Units
MAB312 Linear Algebra
PCB593 Digital Image Processing
PCB669 Astrophysics 2
PCB666 Physical Methods of Analysis
Or
PSB655 Remote Sensing

RECOMMENDED MAJOR:
This comajor is recommended for Physics majors

BIODIVERSITY COMAJOR
First Level Units
First year units as for Ecology major

Second Level Units
LSB397 Plant Physiology
Or
NRB501 Spatial Analysis of Environmental Systems
NRB370 Invertebrate Biology
NRB371 Plant Biology
NRB470 Vertebrate Biology

Third Level Units
NRB572 Terrestrial Ecosystems
NRB672 Marine and Freshwater Ecosystems

RECOMMENDED MAJOR:
This comajor is recommended for Ecology majors

BIOMOLECULAR SCIENCES COMAJOR
First Level Units
First year units as for Life Science majors

Second and Third Level Units
Six (6) approved units chosen from advanced level Life Science units. May include Physiology units: LSB358, LSB458, LSB558 and LSB658.

RECOMMENDED MAJOR:
This comajor is recommended for Life Science majors

INDUSTRIAL CHEMISTRY COMAJOR
First Level Units
First year units as for Chemistry major, but including PCB200 Chemical Technology 1

Second Level Units
PCB314 Concepts in Analytical Chemistry
PCB414 Industrial and Environmental Analytical Chemistry

Third Level Units
PCB514 Instrumental Analysis
PCB524 Unit Operations
PCB614 Advanced Analysis
PCB624 Chemistry in Industry and Technology

RECOMMENDED MAJOR:
This comajor is recommended for Chemistry majors

SCIENTIFIC COMPUTATION AND VISUALISATION COMAJOR
First Level Units
First year units as for Maths major, except do not need MAB210 Statistical Modelling 1. Recommended: MAB112 Mathematical Sciences 1C

Second Level Units
MAB480 Introduction to Scientific Computation
MAB481 Visualisation and Data Analysis

Third Level Units
MAB580 Scientific Computation
(Note: MAB580 not offered after 2006)
Or
MAB681 Advanced Visualisation and Data Analysis

RECOMMENDED MAJOR:
This comajor is recommended for Mathematics or Physics majors (others please see coordinator)

STATISTICS COMAJOR
First Level Units
MAB100 Mathematical Sciences 1A
Or
SA in Senior Maths B
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C

Second Level Units
MAB210 Statistical Modelling 1
MAB414 Applied Statistics 2

Third Level Units
Plus four approved advanced level Mathematics units

RECOMMENDED MAJOR:
This major is recommended for most other majors, particularly Mathematics, Physics and Ecology

ADDITIONAL COMAJOR
You may choose your comajor from one of the Majors
Biochemistry
LSB308 Biochemistry
LSB408 Metabolism
LSB508 Advanced Metabolism
LSB608 Protein Science
Plus TWO approved units

Biotechnology
LSB308 Biochemistry
LSB338 Cell and Molecular Biology 2
LSB468 Molecular Biology
LSB537 Genetic Engineering
LSB408 Metabolism
Or
LSB497 Plant Molecular Biology
Plus ONE approved unit

Chemistry
SIX of the mandatory units in the Chemistry major

Ecology
SIX of the mandatory units in the Ecology major

Environmental Science
FOUR of the mandatory units from the major
Plus TWO approved Science units at advanced level

Forensic Science
JSB937 Forensic Scientific Evidence
LSB468 Molecular Biology
PCB414 Industrial and Environmental Analytical Chemistry
SCB384 Forensic Science
Plus TWO other units as approved by the coordinator

Geoscience
SIX approved units from the Geoscience major
Mathematics
SIX approved level Mathematics units (may include MAB210/MAB220)

Microbiology
LSB328 Microbiology 1
LSB428 Microbiology 2
Plus FOUR third level Microbiology units selected from the major list

Physics
MAB134 Electrical Engineering Mathematics 3
PCB361 AC Theory and Electronics
PCB362 Physics 2
PCB460 Instrumentation and Computational Methods
PCB462 Thermodynamics and Solid State Physics

Aviation Comajor
Suitable aviation studies (an approved Associate Diploma in aviation or equivalent) can be accepted as a comajor within the Bachelor of Applied Science course SC01. A total of 96 credit points can be credited for the aviation studies; this is based on 72 credit points for the comajor plus an additional 24 credit points generally required to underpin a comajor.

In the BAAppSc with aviation, students can either (a) study for the BAAppSc degree and the aviation Associate Diploma concurrently, or (b) obtain credit for the SC01 course for an approved Associate Diploma in aviation that had been completed prior to gaining entry to the SC01 course. Students who have already completed an approved Associate Diploma prior to admission to the SC01 course will be granted 96 credit points towards the BAAppSc degree.

Non-Science Comajors (subject to timetable restrictions)
For comajors in humanities, business, IT or Psychology, please consult with your major coordinator, or the Course Coordinator, Dr Megan Hargreaves (phone 3138 2244 or email m.hargreaves@qut.edu.au)

Bachelor of Applied Science - Medical Radiation Technology (Medical Imaging Technology) PH38

Award title: Bachelor of Applied Science (Medical Radiation Technology)
CRICOS code: 037588F
Campus: Gardens Point
Duration: 3 Years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Associate Professor Pam Rowntree

Other Majors
See also the separate entry for the following major in this course: Bachelor of Applied Science - Medical Radiation Technology (Radiotherapy Technology).

Special Requirements
Students are required to undertake clinical experience in hospital departments and private practices during the course and, as a result, will have direct patient contact during their clinical placement, and may be exposed to blood and body fluids of patients. Students must be vaccinated for Hepatitis B and must provide a post-vaccination pathological report or similar certification showing proof of immunity, prior to undertaking their first clinical placement. CPR certification is also required to undertake clinical placements.

Professional Recognition
On graduation, students will be eligible for provisional accreditation by the Australian Institute of Radiography. Full membership requires the completion of an additional professional development year of clinical experience.

Course Structure

Medical Imaging Technology

Year 1, Semester 1
LSB145 Anatomy 1
PCB007 Patient Care in Professional Practice
PCB107 Physics and Quantitative Techniques
PCB178 Principles of Medical Radiations

Year 1, Semester 2
LSB245 Anatomy 2 and Introductory Pathology
PCB375-1 Radiographic Equipment
PCB377 Clinical Radiography 1
PCB379 Clinical Radiography 2

Year 2, Semester 1
LSB321 Systematic Pathology
LSB345 Regional & Imaging Anatomy 1
PCB375-1 Radiographic Equipment
PCB377 General Radiography 2
PCB379 Clinical Radiography 1

Year 2, Semester 2
LSB445 Regional and Imaging Anatomy 2
PCB375-2 Radiographic Equipment
PCB476 Special Procedures
PCB477 Complementary Imaging Techniques
PCB479 Clinical Radiography 2

**Year 3, Semester 1**
PCB567 Advanced Radiographic Technique 1
PCB580-1 Clinical Radiography 3
PCB593 Digital Image Processing
PCB672-1 Project
PCB681 Computed Tomography Imaging

**Year 3, Semester 2**
PCB580-2 Clinical Radiography 3
PCB667 Advanced Radiographic Technique 2
PCB672-2 Project
PCB675 Radiation Safety and Biology
PCB682 Magnetic Resonance Imaging

- **Bachelor of Applied Science - Medical Radiation Technology (Radiotherapy Technology) PH38**

  **Award title:** Bachelor of Applied Science (Medical Radiation Technology)
  **CRICOS code:** 037588F
  **Campus:** Gardens Point
  **Duration:** 3 Years full-time
  **Credit points:** 288 (full-time standard semester: 48)
  **Course coordinator:** Associate Professor Pam Rowntree
  **Discipline coordinator:** Michelle Oppelaar

- **Other Majors**
  See also the separate entry for the following major in this course: Bachelor of Applied Science - Medical Radiation Technology (Medical Imaging Technology).

- **Special Course Requirements**
  Students are required to undertake clinical experience in hospital departments and private practices during the course and, as a result, will have direct patient contact during their placement, and may be exposed to blood and body fluids of patients. Students must be vaccinated for Hepatitis B and must provide a post-vaccination pathological report or similar certification showing proof of immunity, prior to undertaking their first clinical placement. CPR certification is also required to undertake clinical placements.

- **Professional Recognition**
  On graduation, students will be eligible for provisional accreditation by the Australian Institute of Radiography. Full membership requires the completion of an additional professional development year of clinical experience.

- **Radiotherapy Technology Major**
  **Year 1, Semester 1**
  LSB145 Anatomy 1
  PCB007 Patient Care in Professional Practice
  PCB107 Physics and Quantitative Techniques
  PCB178 Principles of Medical Radiations
  **Year 1, Semester 2**
  LSB245 Anatomy 2 and Introductory Pathology
  PCB272 Radiation Physics
  PCB286 Treatment Planning 1
  PCB287 Megavoltage Therapy 1
  **Year 2, Semester 1**
  LSB321 Systematic Pathology
  LSB345 Regional & Imaging Anatomy 1
  PCB389 Clinical Radiotherapy 1
  PCB396 Radiotherapy Planning and Physics
  PCB397-1 Megavoltage Therapy 2
  **Year 2, Semester 2**
  LSB445 Regional and Imaging Anatomy 2
  PCB397-2 Megavoltage Therapy 2

- **Bachelor of Applied Science (Carseldine First-year Experience Program) SC01**

  **Award title:** Bachelor of Applied Science (Study Area A)
  **CRICOS code:** 003502J
  **Campus:** Carseldine
  **Duration:** 1 year at Carseldine and then 2 years at Gardens Point full-time or 2 years at Carseldine and then 4 years at Gardens Point part-time
  **Credit points:** 96 (full-time standard semester: 48; part-time standard semester: 24)
  **Course coordinator:** Dr Megan Hargreaves
  **Discipline coordinator:** Dr Habib Yezdani (Science Carseldine Coordinator); Dr Peter Cooke (Biochemistry); Dr Marion Bateson (Biotechnology); Dr Dennis Arnold (Chemistry); Dr Ian Williamson (Ecology); Mr Graham Kimber (Environmental Science); Dr Serge Kokot (Forensic Science); Dr Gregg Webb (Geoscience); Dr Christine Knox (Microbiology)

- **Professional Recognition**
  For graduates with approved study: Australian Society for Biochemistry and Molecular Biology, Australasian Association of Clinical Biochemists, AusBiotech Ltd, Australian Society for Biochemistry and Molecular Biology, Australian Society for Medical Research, Australian Society for Microbiology, Royal Australian Chemical Institute, Ecological Society of Australia, Environment Institute of Australia and New Zealand, Australasian Institute of Mining and Metallurgy, Australian Institute of Geoscientists, Geological Society of Australia, Australian Society for Microbiology.

- **Course Design**
  The Bachelor of Applied Science course allows students to major in one of 10 scientific fields. The first year program at Carseldine will allow students to transfer to all Science majors at Gardens Point campus to complete the Bachelor of Applied Science degree, except for Physics and Mathematics majors which must be done wholly at Gardens Point.

  Students should undertake THREE of the four foundation units (LSB118 Life Science, MAB101 Statistical Data Analysis 1, NRB100 Environmental Science, PCB101 Physical Science), according to the requirements of their intended major. Most majors require MAB101, and if students have not done Maths B at year 12 level, they will need to take MAB105 in semester 1, before progressing to MAB101 in second semester.

  Upon completion of the first year program students will transfer to the Bachelor of Applied Science (SC01) at Gardens Point Campus. For further details of the major areas of study offered, see the Bachelor of Applied Science (SC01) course offered at Gardens Point Campus.
Semester 1
Four units from:
LSB118 Life Science
MAB105 Preparatory Mathematics
NRB100 Environmental Science
PCB101 Physical Science
PCB140 Introductory Chemistry
Note: Select MAB105 if no Maths B

Semester 2
Four units from:
LSB238 Cell and Molecular Biology 1
MAB101 Statistical Data Analysis 1
NRB230 Planet Earth
NRB270 Animal and Plant Structure and Function
PCB242 Chemistry 2
Note: Select NRB230 for Geoscience majors

Bachelor of Applied Science (Medical Science) LS37
Award title: Bachelor of Applied Science (Medical Science)
CRICOS code: 020331D
Campus: Gardens Point
Duration: 3 Years full-time or 6 Years part-time
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr Trevor Forster

Special Course Requirements
Students are required to undertake a minimum four-week work experience program in a practising pathology laboratory. This takes place at the end of the second year in the full-time program and in a suitable vacation period during the part-time program. Proof of successful vaccination against Hepatitis B must be provided by students at the end of first semester of year two of the program.

Professional Recognition
Graduates are immediately eligible for graduate membership of the Australian Institute of Medical Scientists and will have completed the academic requirements for admission as Members.

Full-time Course Structure
Year 1, Semester 1
LSB118 Life Science
MAB141 Mathematics and Statistics for Medical Science
PCB142 Chemistry 1
PCB150 Physics 1H

Year 1, Semester 2
LSB238 Cell and Molecular Biology 1
LSB250 Human Physiology
LSB255 Human Anatomy
PCB242 Chemistry 2

Year 2, Semester 1
LSB325 Biochemistry
LSB328 Microbiology 1
LSB338 Cell and Molecular Biology 2
LSB365 Pathology

Year 2, Semester 2
LSB425 Quantitative Medical Science
LSB435 Diagnostic Microbiology 1
LSB480 Professional Practice

Year 3, Semester 1
LSB525 Clinical Biochemistry 2
LSB535 Diagnostic Microbiology 2
LSB555 Haematology 2
LSB565 Immunohaematology

Year 3, Semester 2
LSB625 Clinical Biochemistry 2
LSB635 Diagnostic Microbiology 2
LSB655 Haematology 2
LSB665 Immunohaematology

Part-time Course Structure
Year 1, Semester 1
LSB118 Life Science
MAB141 Mathematics and Statistics for Medical Science

Year 1, Semester 2
LSB238 Cell and Molecular Biology 1
PCB142 Chemistry 1

Year 2, Semester 1
PCB150 Physics 1H
PCB242 Chemistry 2

Year 2, Semester 2
LSB250 Human Physiology
LSB255 Human Anatomy

Year 3, Semester 1
LSB325 Biochemistry
LSB328 Microbiology 1

Year 3, Semester 2
LSB425 Quantitative Medical Science
LSB435 Diagnostic Microbiology 1

Year 4, Semester 1
LSB480 Professional Practice

Year 4, Semester 2
LSB525 Clinical Biochemistry 2
LSB535 Microbial Immunology

Year 5, Semester 1
LSB555 Haematology 1
LSB565 Histopathology 2

Year 5, Semester 2
LSB555 Haematology 2
LSB665 Immuno haematology

Bachelor of Applied Science/Bachelor of Mathematics SC20
Award title: Bachelor of Applied Science (Study Area A)/Bachelor of Mathematics
CRICOS code: 049434C
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr Megan Hargreaves (Science); Dr Graeme Pettet (Mathematics)

Professional Recognition
Membership of the Australian Mathematical Society, the Statistical Society of Australia Inc and the Australian Society for Operations Research is available. For professional recognition relating to the science majors refer to Bachelor of Applied Science (SC01).

Course Design
This four year double degree course integrates studies in one of the science majors with studies in Mathematics. The Science majors available are Biochemistry, Biotechnology,

Course Structure
Students must complete at least (a) 192 credit points (16 twelve credit point units) of Mathematics units and (b) 192 credit points (16 twelve credit point units) of Science units, according to the requirements as follows:

Level 1 Units:
Students must complete the following Level 1 Mathematics units:
- MAB100 Mathematical Sciences 1A
- MAB101 Statistical Data Analysis 1
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB210 Statistical Modelling 1
- MAB220 Computational Mathematics 1
Note: MAB100 is for students who do not have an exit assessment of at least Sound Achievement in four semesters of both Senior Mathematics B and Senior Mathematics C (or equivalent).

Students must complete at least TWO of the following Level 1 Science Foundation units:
- LSB118 Life Science
- NRB100 Environmental Science
- PCB101 Physical Science

In addition, students are required to complete any mandatory units - and should complete all recommended units, specified for the science major selected.

Level 2 and 3 Mathematics Units:
At least 120 credit points (10 twelve credit point units) must be taken from Level 2 and Level 3 Mathematics units with at least 48 credit points (4 twelve credit point units) from Level 3 Mathematics units:

Students must complete:
- MAB311 Advanced Calculus
- MAB312 Linear Algebra
And at least one of:
- MAB315 Operations Research 2
- MAB413 Differential Equations
- MAB414 Applied Statistics 2
- MAB422 Mathematical Modelling

Level 2 and 3 Science Units:
At least 96 credit points (8 twelve-credit point units) must be taken from Level 2 and Level 3 Science units with at least 48 credit points (4 twelve credit point units) from Level 3 Science units. The science units must meet the advanced level requirements of one of the following majors of the SC01 Bachelor of Applied Science course: Biochemistry; Biotechnology; Chemistry; Ecology; Environmental Science; Forensic Science; Geoscience; Microbiology or Physics.

Elective Units:
Elective units (number depends upon major selected) can be taken from Faculty of Science units. Because up to two MAB units may normally be specified in a Science degree depending on the major selected, an equivalent number of units may be substituted with units from another Faculty if such units are required as prerequisites.

Science Units: Level 1 Science Foundation Units
Students must select at least TWO of these units:
- LSB118 Life Science
- NRB100 Environmental Science
- PCB101 Physical Science

Science Units: Biochemistry Major
Level 1
- LSB118 Life Science
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function
- PCB242 Chemistry 2
Either
- PCB140 Introductory Chemistry
Or
- PCB142 Chemistry 1
Recommended Unit:
- LSB258 Principles of Human Physiology
Level 2
- LSB308 Biochemistry
- LSB408 Metabolism
Two other Level 2 units from:
- LSB338 Cell and Molecular Biology 2
- LSB449 Human Cell Biology
- LSB468 Molecular Biology
- LSB605 Protein Engineering and Bioprocessing
Level 3
- LSB508 Advanced Metabolism
- LSB608 Protein Science
Two other Level 3 units from:
- LSB509 Medical Biotechnology 1
- LSB527 Biomedical Research Technologies
- LSB537 Genetic Engineering
- LSB607 Protein Purification
- LSB609 Medical Biotechnology 2
- LSB619 Genomics and Bioinformatics

Science Units: Biotechnology Major
Level 1
- LSB118 Life Science
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function
- PCB242 Chemistry 2
Either
- PCB140 Introductory Chemistry
Or
- PCB142 Chemistry 1
Recommended Unit:
- LSB258 Principles of Human Physiology
Level 2
- LSB308 Biochemistry
- LSB338 Cell and Molecular Biology 2
- LSB408 Metabolism
- LSB468 Molecular Biology
One other Level 2 unit from:
- LSB328 Microbiology 1
- LSB397 Plant Physiology
- LSB408 Metabolism
- LSB449 Human Cell Biology
- LSB497 Plant Molecular Biology
- LSB605 Protein Engineering and Bioprocessing
Level 3
- LSB537 Genetic Engineering
Three other Level 3 units from:
- LSB509 Medical Biotechnology 1
- LSB577 Plant Biotechnology 1
- LSB609 Medical Biotechnology 2
- LSB619 Genomics and Bioinformatics
- LSB677 Plant Biotechnology 2
### Science Units: Chemistry Major

**Level 1**
- PCB101 Physical Science
- PCB142 Chemistry 1
- PCB242 Chemistry 2
- Recommended Units: PCB200 Chemical Technology 1, PCB260 Physics 1A

**Level 2**
- PCB334 Inorganic Chemistry
- PCB354 Structure and Mechanism in Organic Chemistry
- PCB405 Principles of Physical Chemistry
- PCB444 Spectroscopy

**Level 3**
- PCB505 Advanced Physical Chemistry
- PCB554 Synthesis and Reactivity in Organic Chemistry
- PCB634 Organometallic and Coordination Chemistry
- PCB644 Frontiers in Chemistry

### Science Units: Ecology Major

**Level 1**
- LSB118 Life Science
- NRB100 Environmental Science
- NRB270 Animal and Plant Structure and Function
- PCB101 Physical Science
- Recommended Units: NRB230 Planet Earth, NRB240 History of Life on Earth

**Level 2**
- NRB301 Earth Surface Systems
- NRB311 Population Ecology
- NRB410 Genetics and Evolution
- NRB412 Experimental Design

**Level 3**
- NRB510 Population Genetics
- NRB511 Population Management
- NRB610 Ecological Applications
- NRB611 Conservation Biology

### Science Units: Environmental Science Major

**Level 1**
- LSB118 Life Science
- NRB100 Environmental Science
- NRB240 History of Life on Earth
- Either PCB140 Introductory Chemistry or PCB142 Chemistry 1
- Recommended Units: NRB230 Planet Earth, NRB270 Animal and Plant Structure and Function

**Level 2**
- NRB301 Earth Surface Systems
- NRB311 Population Ecology
- NRB412 Experimental Design

**Level 3**
- NRB500 Environmental Systems and Modelling
- NRB522 Marine and Freshwater Ecosystems
- NRB600 Sustainable Environmental Management
- NRB672 Marine and Freshwater Ecosystems

### Science Units: Forensic Science Major

**Level 1**
- LSB118 Life Science
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function
- PCB101 Physical Science
- PCB242 Chemistry 2
- Either PCB140 Introductory Chemistry or PCB142 Chemistry 1
- Recommended: LSB258 Principles of Human Physiology

**Level 2**
- JSB937 Forensic Scientific Evidence
- LSB468 Molecular Biology
- PCB414 Industrial and Environmental Analytical Chemistry
- SCB384 Forensic Science

**Level 3**
- NRB684 Forensic DNA Profiling
- PCB514 Instrumental Analysis
- PCB584 Forensic Examination of Physical Evidence
- PCB684 Forensic Analysis and Toxicology

### Science Units: Geoscience Major

**Level 1**
- NRB100 Environmental Science
- NRB230 Planet Earth
- NRB240 History of Life on Earth
- Either PCB140 Introductory Chemistry or PCB142 Chemistry 1

**Level 2**
- NRB331 Sedimentary Geology
- NRB333 Mineralogy
- NRB434 Structural Geology
- NRB436 Introduction to Igneous and Metamorphic Petrology

**Level 3**
- NRB534 Geophysics
- NRB536 Petrology and Geochemistry
- NRB601 Field Mapping and Monitoring of Natural Resources
- One other Level 3 unit from: NRB535 Geology of Fossil Fuels, NRB633 Hydrogeology, NRB635 Plate Tectonics and Advanced Structural Geology, NRB636 Stratigraphy and Basin Analysis, PSB655 Remote Sensing

### Science Units: Microbiology Major

**Level 1**
- LSB118 Life Science
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function
- PCB242 Chemistry 2
- Either
PCB140 Introductory Chemistry  
Or  
PCB142 Chemistry 1  
Recommended Unit:  
LSB258 Principles of Human Physiology  

Level 2  
LSB308 Biochemistry  
LSB328 Microbiology 1  
LSB428 Microbiology 2  
One other Level 2 unit from:  
LSB338 Cell and Molecular Biology 2  
LSB358 Physiology 1  
LSB408 Metabolism  
LSB458 Physiology 2  
LSB468 Molecular Biology  

Level 3  
Select at least four units from:  
LSB528 Environmental Microbiology  
LSB547 Bacterial Pathogenesis and Disease Diagnosis  
LSB568 Electron Microscopy  
LSB578 Virology  
LSB628 Food Microbiology  
LSB647 Clinical Mycology and Parasitology  
LSB648 Molecular Microbiology  

Science Units: Physics Major  

Level 1  
PCB101 Physical Science  
PCB250 Physics 1  
PCB260 Physics 1A  
Recommended:  
PCB107 Physics and Quantitative Techniques  
Mathematics units equivalent to:  
MAB131 Engineering Mathematics 1A  
MAB132 Engineering Mathematics 1B  

Level 2  
PCB361 AC Theory and Electronics  
PCB362 Physics 2  
PCB460 Instrumentation and Computational Methods  
PCB462 Thermodynamics and Solid State Physics  
Mathematics unit equivalent to:  
MAB134 Electrical Engineering Mathematics 3  
# Note: Engineering Mathematics units have been listed under this major as these are the requirements for the Physics major in SC01 Bachelor of Applied Science. *You should not enrol in these units.* The equivalent Mathematics units are MAB100, MAB111, MAB112 and MAB311. Students who may have already completed some or all of the Engineering Mathematics units should consult the Mathematics Course Coordinator for SC20.  

Level 3  
PCB561 Quantum and Condensed Matter Physics  
PCB562 Physical Methods of Analysis  
PCB661 Experimental Physics  
PCB665 Physics 3  

Mathematics Units  

Level 1  
MAB100 Mathematical Sciences 1A  
MAB101 Statistical Data Analysis 1  
MAB111 Mathematical Sciences 1B  
MAB112 Mathematical Sciences 1C  
MAB210 Statistical Modelling 1  
MAB220 Computational Mathematics 1  
Note: MAB100 for students who do not have an exit assessment of at least Sound Achievement in four semesters of both Senior Mathematics B and Senior Mathematics C  

Level 2  
MAB311 Advanced Calculus  
MAB312 Linear Algebra  
At least one of:  
MAB315 Operations Research 2  
MAB413 Differential Equations  
MAB414 Applied Statistics 2  
MAB422 Mathematical Modelling  
Other Level 2 units:  
MAB313 Mathematics of Finance  
MAB314 Statistical Modelling 2  
MAB420 Computational Mathematics 2  
MAB480 Introduction to Scientific Computation  
MAB481 Visualisation and Data Analysis  

Level 3  
Select at least four units from:  
MAB521 Applied Mathematics 3  
MAB522 Computational Mathematics 3  
MAB524 Statistical Inference  
MAB525 Operations Research 3A  
MAB526 Statistical Science 3  
MAB580 Scientific Computation  
MAB613 Partial Differential Equations  
MAB623 Financial Mathematics  
MAB624 Applied Statistics 3  
MAB625 Operations Research 3B  
MAB640 Industry Project  
MAB672 Advanced Mathematical Modelling  
MAB681 Advanced Visualisation and Data Analysis  
Other Level 3 units:  
MAB523 Introduction to Quality Management  
MAB621 Discrete Mathematics  
Students should check semester of offer, prerequisites and corequisites  
Note: MAB420 Computational Mathematics 2 and MAB481 Visualisation and Data Analysis require ITB111 Software Development 1 to be taken as an elective and MAB380 Introduction to Supercomputing requires ITB111 Software Development 1 and ITB112 Software Development 2 to be taken as electives.  

Bachelor of Biomedical Science SC40  

Award title: Bachelor of Biomedical Science  
CRICOS code: 052768K  
Campus: Gardens Point  
Duration: 3 Years full-time or 6 Years part-time  
Credit points: 288 (full-time standard semester: 48; part-time standard semester: 24)  
Course coordinator: Dr Catherine Dallemagne  

Professional Recognition  
Depending on the subjects selected in the final year of the course, graduates will be eligible for membership of one or more of the following organisations: Australian Association of Clinical Biochemists, AusBiotech Ltd, Australian Society for Microbiology.  

Full-time Course Structure  
Year 1, Semester 1  
LSB118 Life Science  
MAB141 Mathematics and Statistics for Medical Science
**PCB142 Chemistry 1**  
**PYB007 Interpersonal Processes and Skills**  
**Year 1, Semester 2**

**Bachelor of Mathematics MA54**

**Award title:** Bachelor of Mathematics

**CRICOS code:** 049433D

**Campus:** Gardens Point

**Duration:** 3 Years full-time or 6 Years part-time

**Credit points:** 288 (full-time standard semester: 48; part-time standard semester: 24)

**Course coordinator:** Professor Ian Turner

**Professional Recognition**

Membership of the Australian Mathematical Society, the Statistical Society of Australia Inc and the Australian Society for Operations Research is available.

**Course Structure**

Students complete at least 192 credit points (16 twelve credit point units) of Mathematics units according to the following requirements:

**Level 1 Mathematics Units**

Students must complete the following Level 1 Mathematics units:

- MAB100 Mathematical Sciences 1A
- MAB101 Statistical Data Analysis 1
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C

**Level 2 and 3 Mathematics Units**

At least 120 credit points (10 twelve credit point units) must be taken from Level 2 and Level 3 Mathematics units with at least 48 credit points (4 twelve credit point units) from Level 3 Mathematics units.

Students must complete:

- MAB100 Mathematical Sciences 1A
- MAB101 Statistical Data Analysis 1
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB210 Statistical Modelling 1
- MAB220 Computational Mathematics 1

Note: MAB100 is for students who do not have an exit assessment of at least Sound Achievement in four semesters of both Senior Mathematics B and Senior Mathematics C

---

- PCB242 Chemistry 2

**Year 3, Semester 1**

- BSB113 Economics
- LSB338 Cell and Molecular Biology 2

**Year 3, Semester 2**

- BSB126 Marketing
- LSB468 Molecular Biology

---

**Other Units**

Up to a maximum of 96 credit points may be taken, normally from Information Technology and/or Business units, with not more than 48 credit points from first level units.
Note: A first level unit is classified as a unit that is normally taken in the first year of a single degree.

Units from other areas, including Science, Creative Industries or a language, can be selected with the approval of the Course Coordinator. The Course Coordinator will assist with correct unit enrolment in these areas. A maximum of 96 credit points may be taken, with no more than 48 credit points from first level units.

The balance of credit points needed to complete the minimum requirement of 288 credit points will be Mathematics units.

Mathematics Units
Students should not enrol in Mathematics units other than those listed below:

Level 1 Mathematics Units
MAB100 Mathematical Sciences 1A
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1
MAB220 Computational Mathematics 1

Level 2 Mathematics Units
MAB281 Mathematics for Computer Graphics
MAB311 Advanced Calculus
MAB312 Linear Algebra
MAB313 Mathematics of Finance
MAB314 Statistical Modelling 2
MAB315 Operations Research 2
MAB413 Differential Equations
MAB414 Applied Statistics 2
MAB420 Computational Mathematics 2
MAB422 Mathematical Modelling
MAB480 Introduction to Scientific Computation
MAB481 Visualisation and Data Analysis

Level 3 Mathematics Units
MAB521 Applied Mathematics 3
MAB522 Computational Mathematics 3
MAB524 Statistical Inference
MAB525 Operations Research 3A
MAB526 Statistical Science 3
MAB580 Scientific Computation
MAB613 Partial Differential Equations
MAB623 Financial Mathematics
MAB624 Applied Statistics 3
MAB625 Operations Research 3B
MAB640 Industry Project
MAB672 Advanced Mathematical Modelling
MAB681 Advanced Visualisation and Data Analysis
Other Level 3 Mathematics Units
MAB523 Introduction to Quality Management
MAB621 Discrete Mathematics

Non-Mathematics Units
Up to a maximum of 96 credit points (8 twelve credit point units) can be taken from units other than mathematics units, with not more than 48 credit points (4 twelve credit point units) from first level units. A first level unit is classified as a unit that is normally taken in the first year of a single degree.

First Level Information Technology Units
These units are all 12 credit points and available Semester 1 and Semester 2. No more than four first level units can be included in the course.

ITB001 Problem Solving and Programming
ITB002 IT Professional Studies
ITB003 Object Oriented Programming
ITB004 Database Systems
ITB005 Systems Architecture
ITB006 Networks
ITB007 Web Development
ITB008 Modelling, Analysis and Design
Refer to IT22 Bachelor of Information Technology or your Course Coordinator for more information on information technology units. Note: if you have already completed any information technology units you will need to check for incompatibility or equivalence with the new units

First Level Business Units
These units are all 12 credit points and available Semester 1 and Semester 2. No more than four first level units can be included in the course.

BSB110 Accounting
BSB111 Business Law and Ethics
BSB113 Economics
BSB114 Government, Business and Society
BSB115 Management, People and Organisations
BSB119 International and Electronic Business
BSB122 Quantitative Analysis and Finance
BSB126 Marketing

FINANCE: Select a maximum of 8 units from the list below:
BSB110 Accounting
BSB111 Business Law and Ethics
BSB113 Economics
EFB102 Economics 2
EFB201 Financial Markets
EFB210 Finance 1
EFB307 Finance 2
EFB308 Finance 3
EFB309 Financial Derivatives
EFB312 International Finance
EFB318 Portfolio and Security Analysis

ECONOMICS: Select a maximum of 8 units from the list below:
BSB113 Economics
EFB102 Economics 2
EFB200 Applied Regression Analysis
EFB202 Business Cycles and Economic Growth
EFB211 Firms, Markets and Resources
EFB314 International Trade and Economic Competitive-ness
EFB323 Financial and Monetary Economics
EFB324 Macroeconomics and Global Financial Markets
EFB325 Financial Microeconomics
Refer to BSB6 Bachelor of Business or your Course Coordinator for more information on the units available for the various areas of business.

Bachelor of Pharmacy SC45

Award title: Bachelor of Pharmacy
CRICOS code: 055902G
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr Fraser Ross

Professional Recognition
Following graduation, approximately 12 months of pre-registration training performed under the supervision of a registered pharmacist is required to meet the registration requirements of the Pharmacists Board of Queensland. Graduates will be eligible for membership of a number of professional associations, including the Pharmaceutical Society of Australia (PSA), the Pharmacy Guild and the Society of Hospital Pharmacists of Australia (SHPA).
Course Design
The Bachelor of Pharmacy comprises four years of study in areas ranging from pharmacy practice, pharmaceutics, pharmacology, drug metabolism, physiology and chemistry. Students will also undertake professional practice units in QUT’s on-campus dispensary and counselling facilities before embarking on a series of professional placements in hospitals and community pharmacy environments.

In 2006 only the first and second years of the course are available.

Course Structure

**Year 1, Semester 1**

- LSB118 Life Science
- MAB141 Mathematics and Statistics for Medical Science
- PCB142 Chemistry 1

OVERVIEW

QUT International College (QUTIC), an integral part of QUT, offers a range of programs to assist international students to meet university entry requirements at QUT and other Australian universities. In addition, the College offers English Language Programs for students who wish to upgrade their English Language skills for work or other purposes.

The programs, designed to meet the different needs of international students, include English for Academic Purposes, General English, Foundation, University Diplomas, Bridging and Postgraduate Pathway Programs.

Students receive high quality tuition and support in small classes and excellent College facilities while at the same time enjoying the full use of all University facilities including libraries, student services, recreational and computer facilities.

SENIOR STAFF

Director, QUT International College: E. McDade, TDipCom Strathclyde, TCert Jordanhill, BEdSt Qld, MAcc C.Sturt

Director of Studies, University Entry Programs: S. Leisemann, DEd BA Qld, PGDip La Trobe, MBA Bond

Director of Studies, English Language Programs: I. McGregor, BA Griff, GradDipEd PGDipSocSc Qld, MEd (TESOL) NE

Senior Administration Coordinator, QUTIC Administration: N.Marsh, BA (Hons) Soton
Bridging Program QC03

CRICOS code: 003518A
Campus: Kelvin Grove
Duration: 1 semester full-time
Credit points: 48 (full-time standard semester: 48)
Course coordinator: Scott Leisemann

Entry Requirements - English Language
IELTS 6.0 with no sub-score less than 5.0 or TOEFL 550 (paper) or TOEFL 213 (CBT) or equivalent, or successful completion of the EAP program (N.B. Students should also check visa requirements).

Description
This program provides two alternative streams. Stream A is designed for students who have not met English and/or prerequisite requirements for their chosen undergraduate or postgraduate course. Most students may undertake one degree unit (for credit) whilst enrolled in a Bridging program. Those with advanced standing may be able to undertake two degree units. Stream B is for students who have met English requirements but not prerequisite requirement for their degree, or who may wish to improve the standard of their academic English. These students may take one or two degree units (for credit) whilst enrolled in the Bridging Program. Both streams include intensive preparation for academic language, lateral thinking, research and presentation skills required for successful tertiary study. Small classes and dedicated staff ensure an excellent learning environment. Additional support is provided by Language and Welfare Advisers.

Progression
In order to progress to an award course, students must:
1. fulfil the Bridging course requirements
2. gain a minimum grade of 4 (Pass) in Communication 2 or an IELTS 6.5 or equivalent,
3. meet any other conditions detailed in the 'letter of offer' from International Student Business Services.

Full-time Course Structure
Stream A # (for those with IELTS 6.0)
QCD111 Communication 1
QCD211 Communication 2
QCS230 Computing
DEGREE UNIT
Undergraduate students will need to enrol in the units QCD110 and QCD210

Stream B (for those with IELTS 6.5)
QCD111 Communication 1
QCD211 Communication 2
DEGREE UNIT One
DEGREE UNIT Two
Undergraduate students will need to enrol in the units QCD110 and QCD210

Note:
# If you have advanced standing, you may be able to undertake two degree units during your Bridging Program

English for Academic Purposes for Foundation and University Diploma Programs QC10

CRICOS code: 011424G
Campus: Kelvin Grove
Duration: 12 weeks full-time
Credit points: 48
Course coordinator: Judith Douse

Entry requirements*
To be eligible for entry, applicants must either:
1. Have an offer of a place in a QUT Foundation or Diploma program and successfully complete the relevant EAP entry test; or
2. Produce original documentary evidence of an IELTS score of a minimum 5.0 with no sub-score less than 5.0 (or approved equivalent).
* You should check the English language requirements for a Student Visa from your country of origin.

Progression
Successful completion of this EAP course is a pathway into QUT International College Foundation and Diploma programs and the Associate Degree in Dance.

Modules
QCE004 English for Academic Purposes for QUTIC Courses
The EAP course consists of the following integrated modules:
- Seminars and Presentations
- Academic Reading and Note-taking
- Academic Writing
- Listening and Note-taking from Lectures
- Speaking in Academic Settings
- Academic Study Skills
- Computer Word-processing and Internet research skills
- Library research skills

QUT HANDBOOK 2006 PAGE 423
• Academic Study Skills
• Computer Word-processing and Internet research skills
• Library research skills

**English for Tertiary Preparation QC22**

**CRICOS code:** 045062C  
**Campus:** Kelvin Grove  
**Duration:** 2 weeks full-time  
**Credit points:** 8  
**Course coordinator:** Michael Miller

**Entry Requirements**

**Academic requirements:**
An offer of acceptance for a QUT Foundation or University Diploma course.

**English requirements:**
An IELTS score of at least 5.5 (with sub-scores of at least 5.0) or approved equivalent.

**English for Tertiary Preparation**  
QCE005 English for Tertiary Preparation Studies

**Extended Foundation Program (3 Semesters) QC04**

**CRICOS code:** 050167G  
**Campus:** Kelvin Grove  
**Duration:** 3 Semesters full-time  
**Credit points:** 132 (full-time standard semester: 13TP1 - 48CP, 13TP2 - 60CP, 13TP3 - 24CP)  
**Course coordinator:** Scott Leisemann

**Entry Requirements - English Language**
IELTS 5.5 with no sub-score less than 5.0 or TOEFL 525 (paper) or TOEFL 193 (CBT) or equivalent, or successful completion of the EAP program. (N.B. Students should also check visa requirements).

**Progression**

Conditions of progressing to a guaranteed place in the first year of a QUT degree:

i) fulfil the Foundation course requirements,

ii) obtain a grade of 5 in Communication 2 or an IELTS 6.5 or equivalent,

iii) obtain a Grade Point Average (GPA) as indicated in the table of Faculty Requirements below - calculated on five (5) Level 2 units.

Students who do not meet requirements for a guaranteed place in either a QUT degree of University Diploma Program, may still be considered for entry by the relevant faculty.

**Required Foundation Grade Point Average by Faculty**

- Law - Justice Studies - Required GPA 4.2
- Humanities & Human Services - Required GPA 4.2
- Creative Industries - Required GPA 4.4
- Built Environment - Required GPA 4.6
- Engineering (except Aerospace Avionics) - Required GPA 4.6
- Education - required GPA 4.6
- Health (except Optometry & Psychology) - Required GPA 4.6
- Science - Required GPA 4.6
- Business - Required GPA 4.8
- Law (except Justice Studies) - Required GPA 4.8
- Information Technology - Required GPA 4.8
- Health - Psychology - Required GPA 5.0

- Engineering - Aerospace Avionics - Required GPA 5.8
- Health - Optometry - Required GPA 5.8

Note: Grades in each unit are awarded on a scale from 1 to 7, with 7 being the highest.

**Semester One**

- QCF115 Foundation English
- QCF156 Mathematics A1
- OR
- QCF157 Mathematics B1
- + TWO ELECTIVES from the following list
- QCF120 Accounting 1
- QCF121 Economics 1
- QCF153 Physical Sciences 1
- QCF122 Organisations And Management
- QCF252 Life Science
- QCF240 Legal Studies

**Notes:**

QCF240 is offered subject to demand and may be offered in alternate semesters. Students should seek advice from the Course Coordinator.

QCF252 is only offered in ALTERNATE semesters. Students should seek advice from the Course Coordinator.

In some semesters some elective units may not be offered if there is insufficient demand.

**Semester Two**

- QCF111 Tertiary Preparation Studies 1
- QCF112 Communication 1
- QCF256 Mathematics A2
- OR
- QCF257 Mathematics B2
- OR
- QCF260 Professional Studies
- + TWO ELECTIVES from the following list
- QCF122 Organisations And Management
- QCF160 Introduction to Creativity
- QCF220 Accounting 2
- QCF221 Economics 2
- QCF254 Physics
- QCF255 Chemistry
- QCF210 Applied Psychology
- QCF230 Information Processing
- QCF240 Legal Studies
- QCF252 Life Science

Approved diploma units (Business, IT or Professional Communication students only). Diploma units can only be taken under special circumstances and with the approval of the Course Coordinator.

**Notes:**

QCF240 is offered subject to demand and may be offered in alternate semesters. Students should seek advice from the Course Coordinator.

QCF252 is only offered in ALTERNATE semesters. Students should seek advice from the Course Coordinator.

In some semesters some elective units may not be offered if there is insufficient demand.

**Semester Three (8 Week Teaching Period)**

- QCF211 Tertiary Preparation Studies 2
- QCF212 Communication 2

**Note:**

In this semester students focus on the higher level tertiary preparation and communication skills and attend 18 hours
of study per week in their classes over a 8 week teaching period.

- **Foundation Program (2 Semesters) QC02**

  **CRICOS code:** 003287M  
  **Campus:** Kelvin Grove  
  **Duration:** 2 semesters full-time  
  **Credit points:** 120 (full-time standard semester: 60)  
  **Course coordinator:** Scott Leisemann

**Entry Requirements - English Language**  
IELTS 5.5 with no sub-score less than 5.0 or TOEFL 525 (paper) or TOEFL 193 (CBT) or equivalent, or successful completion of the EAP program. (N.B. Students should also check visa requirements).

**Progression**  
Conditions of progressing to a guaranteed place in first year of a QUT degree:  
- i) fulfil the Foundation course requirements,  
- ii) obtain a grade of 5 in Communication 2 or an IELTS 6.5 or equivalent,  
- iii) achieve the relevant faculty Grade Point Average (GPA) - this is calculated on final semester Level 2 units only.

Students who do not meet requirements for a guaranteed place in either a QUT degree or University Diploma Program, may still be considered for entry by the relevant faculty.

**Required Foundation Grade Point Average by Faculty**  
- Law - Justice Studies - Required GPA 4.2  
- Humanities & Human Services - Required GPA 4.2  
- Creative Industries - Required GPA 4.4  
- Built Environment - Required GPA 4.6  
- Engineering (except Aerospace Avionics) - Required GPA 4.6  
- Education - Required GPA 4.6  
- Health (except Optometry & Psychology) - Required GPA 4.6  
- Science - Required GPA 4.6  
- Business - Required GPA 4.8  
- Law (except Justice Studies) - Required GPA 4.8  
- Information Technology - Required GPA 4.8  
- Health - Psychology - Required GPA 5.0  
- Engineering - Aerospace Avionics - Required GPA 5.8  
- Health - Optometry - Required GPA 5.8

N.B. Grades in each unit are awarded on a scale from 1 to 7, with 7 being the highest.

- **Semester One**  
  QCF112 Communication 1  
  QCF111 Tertiary Preparation Studies 1  
  QCF156 Mathematics A1  
  OR  
  QCF157 Mathematics B1  
  + TWO ELECTIVES from the following list  
  QCF115 Foundation English  
  QCF120 Accounting 1  
  QCF121 Economics 1  
  QCF122 Organisations And Management  
  QCF153 Physical Sciences 1  
  QCF160 Introduction to Creativity  
  QCF240 Legal Studies  
  QCF252 Life Science

**Note:**  
QCF240 is offered subject to demand and may be offered in alternate semesters only. Students should seek advice from the Course Coordinator.

QCF252 is only offered in ALTERNATE semesters. Students should seek advice from the Course Coordinator.

In some semesters some elective units may not be offered if there is insufficient demand.

- **Foundation Program (1 Semester) QC01**

  **CRICOS code:** 003287M  
  **Campus:** Kelvin Grove  
  **Duration:** 1 semester full-time  
  **Credit points:** 60  
  **Course coordinator:** Scott Leisemann

**Entry Requirements - English Language**  
IELTS 6.0 with no sub-score less than 5.5 or TOEFL 550 (paper) or TOEFL 213 (CBT) or equivalent, or successful completion of the EAP program (N.B. Students should also check visa requirements).

**Progression**  
Conditions of progressing to a guaranteed place in first year of a QUT degree:  
- i) fulfil the Foundation course requirements,  
- ii) obtain a grade of 5 (Credit) in Communication 2 or an IELTS 6.5 or equivalent,  
- iii) achieve the relevant faculty Grade Point Average (GPA) - this is calculated on final semester Level 2 units only.

**Required Foundation Grade Point Average by Faculty**  
- Law - Justice Studies - Required GPA 4.2  
- Humanities & Human Services - Required GPA 4.2  
- Creative Industries - Required GPA 4.4
Built Environment - Required GPA 4.6  
Engineering (except Aerospace Avionics) - Required GPA 4.6  
Education - Required GPA 4.6  
Health (except Optometry & Psychology) - Required GPA 4.6  
Science - Required GPA 4.6  
Business - Required GPA 4.8  
Law (except Justice Studies) - Required GPA 4.8  
Information Technology - Required GPA 4.8  
Health - Required GPA 5.0  
Engineering - Aerospace Avionics - Required GPA 5.8  
Health - Optometry - Required GPA 5.8  

N.B. Grades in each unit are awarded on a scale from 1 to 7, with 7 being the highest.

General English QC20

CRICOS code: 011426E  
Campus: Kelvin Grove  
Duration: 5 weeks full-time  
Credit points: 20  
Course coordinator: Ian Davies

Progression

Progress is monitored on a student profile which is created for each student over the length of the course. All assessment results (formative/summative/diagnostic) are recorded.

Students can progress from General English into the EAP course or other programs. Progression is subject to entry requirements.

General English Extension QC21

Campus: Kelvin Grove  
Duration: 5 weeks full-time  
Credit points: 20  
Course coordinator: Ian Davies

Progression

Progress is monitored on a student profile which is created for each student over the length of the course. All assessment results (formative/summative/diagnostic) are recorded.

Students can progress from General English into the EAP course or other programs. Progression is subject to entry requirements.

University Diploma in Business BS40

Award title: University Diploma in Business  
CRICOS code: 025282A  
Campus: Kelvin Grove  
Duration: 2 semesters full-time  
Credit points: 96 (full-time standard semester: 48)  
Course coordinator: Elizabeth McDade

Entry Requirements - English Language

Queensland Senior English (Low Achievement) or IELTS 5.5 with no sub-score less than 5.0 or TOEFL 525 (paper), TOEFL 193 (CBT) or equivalent, or successful completion of the EAP program. (NB Students should also check visa requirements).

Progression

Requirements for progression to the second year of QUT Bachelor of Business:  
i) fulfil the Diploma course requirements,  
ii) a minimum Grade Point Average (GPA) of 4, and  
iii) an IELTS score of 6.5 or its equivalent.

Full-time Course Structure

Semester One
BSD110 Accounting  
BSD113 Economics  
BSD126 Marketing  
QCD110 Communication for Business 1

Semester Two
**Course Coordinators**

- Elizabeth McDade

**Entry Requirements**

- English language:
  - Queensland Senior English (Low Achievement) or IELTS 5.5 with no sub-score less than 5.0 or TOEFL 525 (paper), TOEFL 193 (CBT) or equivalent, or successful completion of the EAP program. (N.B. Students should also check visa requirements).

**Course Completion**

Students must obtain at least a grade of 4 (Pass) in seven units and a grade of 3 (Low pass) in the remaining unit.

**Progression**

Requirements for progression to the second year of QUT Bachelor of Information Technology:

i) fulfill the Diploma course requirements,

ii) a minimum Grade Point Average (GPA) of 4, and

iii) an IELTS score of 6.5 or its equivalent.

**Full-time Course Structure**

**Semester One**

- ITD001 Problem Solving and Programming
- ITD004 Database Systems
- ITD005 Systems Architecture
- QCD120 Communication for Information Technology 1

**Semester Two**

- ITD002 IT Professional Studies
- ITD003 Object Oriented Programming
- ITD006 Networks
- QCD220 Communication for Information Technology 2

**University Diploma in Professional Communication IF06**

**Award title:** University Diploma in Professional Communication

**CRICOS code:** 039083D

**Campus:** Kelvin Grove

**Duration:** 2 semesters full-time

**Credit points:** 96 (full-time standard semester: 48)

**Course coordinator:** Elizabeth McDade

**Entry Requirements** - English language

Queensland Senior English (Low Achievement) or IELTS 5.5 with no sub-score less than 5.0 or TOEFL 525 (paper), TOEFL 193 (CBT) or equivalent, or successful completion of the EAP program. (N.B. Students should also check visa requirements).

**Progression**

Requirements for a guaranteed place in the second year of the following QUT Bachelor's degrees:

i) fulfill the University Diploma course requirements,

ii) an IELTS score of 6.5 or its equivalent,

iii) achieve a minimum Grade Point Average (GPA) as detailed below for the following course:

- Grade Point Average of at least 4 for:
  - Bachelor of Mass Communication
  - Bachelor of Creative Industries (Interdisciplinary Studies)
- Grade Point Average of at least 4.5 for:
  - Bachelor of Creative Industries (Media and Communication)
  - Bachelor of Creative Industries (Creative Writing)
  - Bachelor of Journalism
- Grade Point Average of at least 5.0 for:
  - Bachelor of Creative Industries (Communication Design)
  - Bachelor for Fine Arts (Film and Television)*

*Please note that students articulating to Bachelor of Fine Arts (Film and Television) will only receive 1 semester of credit.

**Full-time Course Structure**

**Semester One**

- KKD009 Writing For Creative Industries
- KKD010 Cultures and Creativity
- BSD126 Marketing
- QCD110 Communication for Business 1

Note: KKD009 and KKD010 are offered in ALTERNATE semesters.

**Semester Two**

- KKD018 Creative Industries
- KKD007 Introduction To Multimedia Technology
- QCD210 Communication for Business 2
- Elective

Note: KKD018 and KKD007 are offered in ALTERNATE semesters.

**Electives**

- BSD110 Accounting
- BSD113 Economics
- BSD115 Management, People and Organisations
- BSD119 International and Electronic Business
- BSD122 Quantitative Analysis and Finance
- ITD001 Problem Solving and Programming
- ITD002 IT Professional Studies
- ITD004 Database Systems
- ITD005 Systems Architecture
- ITD006 Networks

- Bachelor of Mathematics/Bachelor of Information Technology IF58
- Bachelor of Music/Bachelor of Education (Secondary) IX07
Doctor of Philosophy Regulations IF49

Please contact individual faculties for details on individual PhD programs.

Introduction

The main purpose of graduate study is to encourage independence and originality of thought in the quest for knowledge. The Doctor of Philosophy degree is awarded in recognition of a student’s erudition in a broad field of learning and for notable accomplishment in that field through an original and substantial contribution to knowledge. The candidate’s research must reveal high critical ability and powers of imagination and synthesis, and may be in the form of new knowledge, or of significant and original adaptation, application and interpretation of existing knowledge.

1. General Conditions

1.1 The Council of the Queensland University of Technology was established in 1989 under the Queensland University of Technology Act.

1.2 This document sets out the Regulations governing the award of the degree of Doctor of Philosophy (PhD) at the Queensland University of Technology (QUT).

1.3 The Council's power to approve arrangements for the registration and examination of candidates for the degree of PhD at QUT is exercised through a Research Degrees Committee, which shall be a subcommittee of the University Research Committee. In exercising this power, the Research Degrees Committee shall be advised by faculty academic boards, deans of faculties and heads of schools as appropriate.

1.4 The PhD will be awarded subject to the Research Degrees Committee receiving:

- a certificate of satisfactory completion of the candidate’s approved course of study signed by the Principal Supervisor, Head of School and endorsed by the faculty;
- a declaration signed by the candidate that she/he has not been a candidate for another tertiary award during the tenure of her/his PhD candidature without the permission of the Research Degrees Committee;
- a declaration signed by the candidate stating original authorship of the thesis;
- an application for the conferral of the degree, signed by the Principal Supervisor, Director of Centre/Res Con, Head of School, stating that the candidate has satisfactorily completed the examination process including completing any revisions or re-examination required by the external examiners; and
- at least one final copy of the thesis in the prescribed format.

2. Definitions

2.1 Candidate means any person admitted to the planned program of research leading to the degree of PhD.

2.2 Candidature means the period of study towards the degree of PhD being the period from the date of commencement as advised by the Office of Research until the thesis is submitted for examination or until the candidature is terminated, after which time the candidate holds the status of 'Under Examination'.

2.3 Confirmed candidature means the period of study towards the degree of PhD from the date of successful completion of Confirmation of Candidature as approved by Research Degrees Committee to the approval of the award of the degree of PhD by the University Academic Board.

2.4 Collaborative research group means the group of researchers which is directly involved with the candidate's research project or a larger research project of which the candidate's study forms a part. This does not include other researchers from any collaborating organisation who do not have input into the specific research project.

2.5 The degree of Doctor of Philosophy or (PhD) at QUT signifies that the holder has undertaken a substantial piece of original research which has been conducted and reported under proper academic supervision and in a research environment for a prescribed period. The PhD's contribution to knowledge rests on the originality of the approach and/or interpretation of findings and, in some cases, the discovery of new knowledge. The award of a PhD demonstrates that the candidate has the ability to communicate research findings effectively in the professional arena and in an international context.

2.6 Examination means the formal testing of the candidate's thesis to critically evaluate whether the conditions for the award of the degree of PhD have been met.

2.7 Examination Committee means the committee of external examiners appointed to undertake examination of the candidate's thesis.

2.8 External candidate means a candidate who will undertake his or her study overseas, interstate, remote from Brisbane or at a place of professional employment or another research institution in Brisbane (for example Queensland Institute of Medical Research).

2.9 Faculty means the relevant faculty of QUT.

2.10 Faculty Committee means the duly constituted committee responsible for the management and oversight of postgraduate candidates within the faculty.

2.11 A Final Seminar means the public seminar called by the faculty to determine whether the thesis is acceptable for examination by the Examination Committee.

2.12 Internal candidate means a candidate who will complete his or her study whilst physically attending a campus of QUT.

2.13 Masters by coursework means a master's degree, which has a research component comprising less than 66% of the total course of study.

2.14 Masters by research means a master's degree, which has a research component comprising 66% or more of the total course of study.

2.15 Prescribed Form means the relevant form found via the Research Students Section of the QUT Office of Research Home Page.

2.16 Professional Doctorate (Research) means a doctoral degree at QUT, which has a significant formal coursework component, which is no more than 33% of the total course of study.

2.17 Recognised institution means any tertiary education institution accepted by the Research Degrees Committee for the purposes of these Regulations.

2.18 Research centre/research concentration means the relevant research centre/research concentration of QUT.

2.19 Review Period means a period of up to three months after completion of a progress report, eg the Confirmation of Candidature, Annual report or interim faculty report during which the candidate is required to do more work until
the faculty advises the Research Degrees Committee that the candidature should be continued or terminated.

2.20 School means the relevant school of QUT.

2.21 Thesis means the collection of materials submitted by the candidate to the Examination Committee for examination.

3. Admission to Candidature

3.1 To gain admission into a planned research program leading to the award of PhD a candidate normally shall hold a relevant first class or second class division A honours degree or equivalent, an appropriate masters degree (by research or coursework), or a professional doctorate, from a recognised institution.

3.2 Masters degrees by coursework and professional doctorates must contain a significant research component, which would normally be no less than 33% of the total degree in order to qualify an applicant for admission to the PhD program. Normally, applicants holding a masters by coursework or a coursework professional doctorate must have a GPA of at least 5.0 on a 7 point scale or equivalent standing as certified by the faculty in which the candidate wishes to enrol before they may be admitted to PhD candidature.

3.3 Coursework masters and professional doctorates which do not contain the research component defined in Regulation 3.2 are not considered adequate to allow admission to the PhD program unless (a) the applicant can demonstrate a grade point average of at least 5.0 on a 7 point scale in such a course; and (b) an additional level of research experience and potential which is deemed acceptable to the faculty and approved by the Research Degrees Committee. For example, by the publication of articles in refereed research journals.

3.4 Applicants must demonstrate sufficient command of English to complete the proposed course of study in English, that is, the Confirmation Seminar, the Final Seminar, and the written thesis. (Exceptions may apply, see Section 13.2).

4. Application Procedure and Commencement

4.1 Candidature shall have commenced on the date of admission or at some later date as determined by the Research Degrees Committee.

4.2 An application for admission shall be made on the prescribed form and shall involve a two-stage process.

4.3 Stage 1 of the application process must include:

- Doctor of Philosophy Stage 1 Application Form (if the applicant holds citizenship or permanent residency in Australia or New Zealand);
- Application for Admission to QUT as an International Candidate Form F (if the applicant is an international candidate);
- personal data;
- details of relevant professional research experience;
- the proposed field of study;
- brief (200-300 words) outline of the project to be undertaken;
- the centre/research concentration in which the research is to be undertaken; and
- a certified copy of the candidate’s academic record.

The application must be approved by the duly constituted faculty committee which will determine whether the applicant meets the criteria for admission (Section 3) or, if deficiencies exist, what they are and how they can be remedied.

4.4 The Stage 2 application must be completed and submitted to the Research Degrees Committee within three months of conditional admission (up to six months for part-time candidates and international candidates) and must include:

- a completed Doctor of Philosophy Stage 2 Application form;
- the proposed title of the thesis;
- the objectives of the program of research and investigation;
- an outline of the proposed research;
- the research methods and plan;
- the relation of the study to previous work in the same field by the candidate and others;
- a preliminary literature review;
- a substantial bibliography;
- a timeline for completion of the proposed research;
- a statement of individual contribution if the proposed plan of study is part of a group project;
- the coursework to be completed;
- a Research Ethics Review Checklist;
- the proposed supervisors and their credentials; and
- an Intellectual Property Agreement if required (ref. Regulation 6.7).

Stage 2 of the application must be approved by the faculty committee and then recommended to the Research Degrees Committee for final approval.

4.5 If the Stage 2 application is not submitted to the Research Degrees Committee within the time specified, the Research Degrees Committee may, on advice from the faculty committee and Principal Supervisor, terminate the candidature. In exceptional cases an extension of approximately three months may be granted in order to meet the conditions of the Stage 2 application.

4.6 To complete Stage 2 of the application process, the faculty shall confirm to the Research Degrees Committee:

- that the applicant’s proposed topic of research is consistent with the aims and objectives of the centre/research concentration; and
- that the centre/research concentration is willing and able to provide appropriate accommodation, facilities and physical, human and financial resources for the proposed study for the duration of the candidature.

4.7 Following receipt of the faculty’s advice on the Stage 2 application, the Research Degrees Committee shall determine:

- the applicant be admitted to PhD candidature in which case it shall confirm the appointment of supervisors; or
- the applicant be required to submit further information which shall be considered at a subsequent meeting of Research Degrees Committee; or
- the applicant be admitted to masters by research candidature with the option of later applying to upgrade to PhD candidature (ref. Section 7), or
- the applicant not be admitted; and
- may set conditions regarding the offer of admission. An applicant who is not admitted to candidature may re-apply for admission at a later date after addressing issues raised.

5. Enrolment

5.1 Once admitted to PhD candidature, a candidate may enrol either as a full-time or a part-time internal candidate.
or a full-time or part-time external candidate though restrictions apply to some Scholarship holders.

5.2 To be enrolled as a full-time candidate, a candidate must be able to commit to the course 30 hours per week averaged over each year of candidature. Paid work, including preparation, teaching, marking and research assistant duties, may be undertaken but must not interfere with a candidate's study program. A candidate in receipt of a scholarship is subject to additional restrictions on the amount of paid work allowable as described in the relevant scholarship guidelines.

5.3 A candidate who is unable to devote to the course the proportion of time specified in Regulation 5.2 may enrol as a part-time candidate. A part-time candidate will be expected to progress at half the rate of a full-time candidate; an average of 15 hours per week.

5.4 It is the candidate's responsibility to remain enrolled from the date of commencement until the thesis is submitted for external examination to the Research Students' Section, Office of Research (ref. Section 9).

5.5 The Research Degrees Committee may cancel a candidate's enrolment, having taken account of all relevant documented circumstances and having given the candidate opportunity to show cause why enrolment should not be cancelled if:

- It is of the opinion that the candidate either has effectively discontinued his/her studies or has no reasonable expectation of completing the course of study within the maximum time allowed (ref. Section 8); or
- the quality and progress of research gives no reasonable expectation of successful completion of the degree based on written/formal communications between the candidate and relevant staff members including supervisor and Centre Director as recorded in progress reports; or
- the candidate's grade point average in coursework undertaken is below 5.00 on a scale of seven or other measure agreed to between candidate and supervisor.

5.6 A candidate whose enrolment has lapsed or has been cancelled and who wishes subsequently to re-enter the course of study to pursue an investigation, which is substantially the same as her/his previous investigation, must provide the necessary supervision and/or support;

- the centre/research concentration ceases to exist;
- the centre/research concentration cannot continue to provide the necessary supervision and/or support;
- the Principal Supervisor transfers to another centre/research concentration, faculty or institution; and
- the candidate asks to be transferred with supportable justification.

Any request for transfer must be made on the prescribed form.

6. Planned Research Program

6.1 A candidate for the degree of PhD is required to complete successfully a planned research program that will result in the candidate making a significant individual contribution to the body of knowledge. This contribution may be in the form of new knowledge or of significant and original adaptation, application and interpretation of existing knowledge.

6.2 The planned research program will normally include:

- a program of assessed coursework including the Advanced Information Retrieval Skills unit;
- participation in university scholarly activities such as research seminars, teaching and publication;
- regular interaction with supervisors;
- a program of supervised research and investigation;
- and must be such as to enable the candidate to acquire competence in relevant methods of research and scholarship related to the subject of the proposed investigation and to demonstrate sustained independent research effort.

6.3 Coursework in the PhD program demands a capacity for critical analysis and a specialisation of research interests not normally appropriate for an undergraduate program. Such coursework may be conducted in a number of ways:

- as advanced lecture courses;
- as seminars in which faculty and candidates present critical studies of selected problems within the subject field;
- as independent study or reading courses under faculty supervision;
- as research projects conducted under faculty supervision.

In all cases, coursework will be based upon a written plan briefly setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed reading material and the method of assessment of progress through and at the end of the course. This coursework will be planned by the candidate and the Principal Supervisor to contribute to, and or, provide structure to the overall program of research.

6.4 Assessed coursework as described in 6.3 will comprise not more than one third of candidature and will normally be completed within the first half of the candidature.

6.5 A candidate is normally expected to pursue the approved program of research and investigation throughout the period of candidature. Where circumstances make significant modification of the program desirable, approval for the proposed change must be sought in writing from the Research Degrees Committee through the faculty committee. Permission to continue the candidature may be given by the Research Degrees Committee in such circumstances provided that the planned research program remains in the same field.

6.6 Where an approved program of research and investigation forms part of the work of a research team or a larger research project, the application must indicate clearly the individual contribution expected to be made by the candidate, her/his individual research activities and responsibi-
ties and the extent to which the work is to be carried out in collaboration with others.

6.7 Where an approved program of research and investigation is carried out jointly in QUT and in an industrial, commercial, professional or research establishment, an outline of the interrelationship of the work to be undertaken at each of the sites in relation to the whole project must be provided as part of the Stage 2 application. An intellectual property agreement must also be completed on the prescribed form.

7. Transfer of Candidature from other Research Degrees

7.1 Internal Applicants From Within QUT

7.1.1 A person who has completed 12 months full-time equivalent of candidature in a QUT masters by research program or a QUT professional doctorate (research) may apply to the Research Degrees Committee for entry into the PhD if the following conditions have been met:

(a) meets the requirements outlined in Section 3;
(b) has demonstrated the capacity to undertake research at the PhD level;
(c) has a research project that is clearly capable of being extended and converted to PhD level; and
(d) has completed the Confirmation of Candidature process including the Confirmation Seminar.

A request for transfer must be made on the prescribed form (the Confirmation of Candidature form) and returned to the Office of Research, through the faculty committee, for consideration by the Research Degrees Committee.

7.1.2 A candidate enrolled in a masters by research will only be approved for transfer to PhD candidature when the candidate is able to satisfy all the requirements outlined in Regulation 7.1.1. Where course work has been undertaken as part of the masters by research degree or professional doctorate (research), a transfer normally will be approved only if the candidate has attained a grade point average of at least five on a seven point scale or equivalent standing as certified by the faculty in which the candidate wishes to enrol. Normally a maximum of twelve months credit from the masters program or professional doctorate (research) may be carried forward to the PhD program.

7.1.3 Applications to transfer into the PhD shall be made on the prescribed form and submitted via the faculty committee, to the Research Degrees Committee for consideration. Such application shall consist of:

- required administrative details;
- reasons for transfer;
- substantial details of progress to date;
- full course of study;
- a time-line for completion of the project;
- a certified copy of the candidate’s academic record (if transferring from another recognised institution);
- a formal request for the amount of credit to be granted for previous candidature;
- a Research Ethics Checklist or a copy of QUT Ethics Committee Clearance;
- proposed supervisors and their credentials; and
- an Intellectual Property Agreement if required (ref. Regulation 6.7).

7.2 External Applicants From Another Institution

7.2.1 PhD, masters or professional doctorate (research) candidates transferring enrolment to a QUT PhD program from another institution will normally be required to undergo the full QUT Confirmation of Candidature process including presentation of a seminar if transferring after twelve months or more of full-time candidature or part-time equivalent at their former institution unless they have successfully completed an equivalent procedure at their previous institution. Candidates seeking transfer to QUT in under twelve months/full-time or twenty-four months/part time will normally be required to submit a Stage 2 application.

7.2.2 External Transfer application to the PhD shall be made on the prescribed form.

7.2.3 The faculty shall first review the candidate’s progress and planned research program and append to the Application for Transfer, a statement which sets out:

- the nature, duration and quality of the work already done, its relevance to the proposed PhD thesis and the recommended amount of credit;
- an appraisal of the candidate’s progress and suitability for transfer of candidature and confirmation of PhD candidature;
- an agreement that the proposed research is within the aims and objectives and physical and human resources of the centre/research concentration; and
- an agreement that the centre/research concentration is willing and able to provide the accommodation, facilities and physical and human resources for the duration of the study.

7.2.4 In considering the application for Transfer of Candidature, the Research Degrees Committee shall:

- approve the transfer of candidature, normally confirming PhD candidature, and determine the amount of credit to be allowed, the date of admission and minimum and maximum candidature dates; or
- request changes to the planned research program which must be addressed by the candidate and resubmitted to the Research Degrees Committee; or
- not approve the transfer.

8. Place and Conditions of Work

8.1 Internal candidates (part-time and full-time) are expected to carry out their research program in a suitable environment at a QUT Campus.

8.2 The Research Degrees Committee must be satisfied that appropriate arrangements as set out in these Regulations regarding coursework, participation in scholarly activities, supervision, facilities in training and research methods can be made for each candidate including part-time candidates. The Head of School must ensure that accommodation, equipment and access to library and computing facilities meet the needs of the approved planned research program for the duration of the candidature.

8.3 The Research Degrees Committee may permit a PhD candidate to conduct his/her research as an external candidate either elsewhere in Australia or overseas or to approve a change of enrolment from internal to external status or vice versa.

8.4 The candidate and the Principal Supervisor, at Stage 1 of the application process or prior to the requested transfer to external status, must provide written evidence to the Research Degrees Committee that:

- the arrangement for the research at the external location (normally a recognised research establishment or place of professional employment) meets the normal requirements of the PhD program;
- the candidate has opportunity to participate in scholarly activities;
• academic standards in the conduct of the PhD research can be assured;
• a suitable program of contacts between the candidate and the Principal Supervisor can be maintained and the methods by which this will be achieved are explained;
• a suitable Associate Supervisor will be responsible for regular supervision is available at the external establishment or an explanation as to why this is unnecessary is given;
• a letter of support from the external establishment stating that the resources required for the study are available and accessible to the candidate and will continue to be available for the duration of candidature is provided; and
• in exceptional circumstances the candidate, Principal Supervisor and Centre Director may present a case for exemption from the above requirements.

8.5 External candidates must normally spend a minimum of three months at QUT during the course of their candidature and must normally be present for the Confirmation of Candidature and for the Final Seminar presentation (ref. Regulation 16.9) of the thesis.

8.6 In exceptional circumstances, the candidate may be permitted to complete the Final Seminar by videoconference. At least three months notice must be given of this intention to allow the school to make adequate arrangements.

9. Period of Time for Completion of Planned Research Program

9.1 The minimum period of candidature is:
• full-time candidates: twenty-four months from the date of commencement
• part-time candidates: forty-eight months from the date of commencement

In special cases, the Research Degrees Committee may approve a shorter period.

9.2 The maximum period of candidature is:
• full-time candidates: forty-eight months from the date of commencement
• part-time candidates: ninety-six months from the date of commencement

9.3 Where a candidate wishes to change from full-time to part-time candidature or vice versa, application must be made on the prescribed form and returned to the Office of Research, through the faculty committee, for consideration by the Research Degrees Committee.

9.4 A candidate must submit his/her thesis to the Research Students_ Section, Office of Research, for external examination no later than the maximum candidature date.

9.5 A candidate who does not expect to submit her/his thesis by the maximum candidature date must apply for an extension on the prescribed form and returned to the Office of Research, through the faculty committee, for consideration by the Research Degrees Committee prior to the expiry of her/his maximum candidature date. The application must include the reasons for the delay, the written endorsement of the Principal Supervisor and a revised time-line for completion. Applications for extensions will not normally be considered by the Research Degrees Committee unless the reasons for the delays have been documented in previous annual reports (ref. Section 11).

9.6 The maximum period of extension for which a candidate may be given approval is 12 months past the original maximum candidature date for full-time candidates and 24 months for part-time candidates. In exceptional circumstances, which must be documented, the Research Degrees Committee may approve a further extension. Minor breakdown of computer equipment or absence of the Principal Supervisor are not usually considered exceptional.

9.7 A candidate who wishes to take leave of absence for a specified period from his/her PhD program must apply in advance on the prescribed form and return it to the Office of Research, through the faculty committee, for consideration by the Research Degrees Committee. The application must include the reasons for the leave of absence, the written endorsement of the Principal Supervisor and the start and end dates of the period of leave. If the Research Degrees Committee approves the period of leave of absence, the duration of the specified period will be added to the minimum and maximum submission dates of the candidate.

9.8 The maximum period of leave of absence for which a candidate may be given approval is 12 months for a full-time candidate and 24 months for a part-time candidate during the term of his/her candidature. A candidate who wishes to take leave of absence for a longer period must withdraw from candidature and apply for re-entry at a later date, on the prescribed form.

9.9 A candidate who remains not currently enrolled for a period greater than twelve months will be deemed to have ceased his/her program of study and his/her candidature will be terminated. If a candidate is unable to complete the approved course of study the candidate may apply for transfer to an appropriate master degree.

9.10 Candidates are entitled to receive up to twelve months parental (maternity/paternity/ adoption) leave. The Research Degrees Committee must be notified on the prescribed form and supplied with a medical certificate (and in the case of paternity leave a marriage certificate or statutory declaration showing the candidate’s relationship to the mother), and the written endorsement of the Principal Supervisor. Periods of parental leave shall not be included as part of the 12 or 24 month leave of absence maximum.

10. Supervision

10.1 Supervision of PhD candidates shall be conducted according to the QUT Code of Good Practice for Postgraduate Research Studies and Supervision (see MOPP Appendix 66)

10.2 A Principal Supervisor and at least one Associate Supervisor from QUT shall be appointed.

10.3 The Principal Supervisor has responsibility for supervising the candidate on a frequent basis and must be a current member of QUT staff or an Emeritus Professor of QUT still active in research. The Principal Supervisor shall have undertaken successful supervision of research degree candidates, shall normally have a PhD and shall have an established research record in the area of the proposed project.

10.4 One Associate Supervisor must be a member of QUT staff. Where appropriate, more than one Associate Supervisor may be appointed and additional Associate Supervisors may be from either QUT or another appropriate industrial, professional, commercial or research establishment. Associate Supervisors should possess appropriate expertise in the research field and normally have undertaken successful supervision of research degree candidates and must indicate their agreement to supervise on the pre-
scribed form. An Associate Supervisor must be appointed from an establishment formally collaborating on a research project.

10.5 For a candidate studying externally, an Associate Supervisor from the external institution linked to the project will normally be appointed. In such cases there will be no requirement for a QUT based Associate Supervisor as Centre Director would be considered as ex-officio associate.

10.6 A person who is currently a candidate for a PhD (at QUT or elsewhere) may not act as a Principal Supervisor for a PhD candidate at QUT, and should not normally act as an Associate Supervisor unless approved by Research Degrees Committee.

10.7 Where the Principal Supervisor will be absent from QUT for a period of three consecutive months or longer during the period of candidacy, the QUT Associate Supervisor will become acting Principal Supervisor for this period.

10.8 If the Principal Supervisor leaves the staff of QUT, the QUT Associate Supervisor will normally fill the role of acting Principal Supervisor immediately and until a new Principal Supervisor is appointed by the faculty, with the agreement of the candidate. A formal appointment of a new Principal Supervisor must be made within three months of the original Principal Supervisor’s departure.

11. Reporting Procedures
11.1 The Principal Supervisor and candidate are required to report annually on the prescribed form to the Research Degrees Committee on the candidate’s progress and research plans. Reporting dates shall be tied to the candidate’s commencement date. Reports shall be signed by both the candidate and by the Principal Supervisor and submitted through the faculty committee, Head of School and director of the centre/research concentration to the Office of Research for consideration by the Research Degrees Committee.

11.2 Faculties should develop additional internal policies and procedures for review of candidates’ progress between annual reports that ensure unsatisfactory progress is dealt with expeditiously.

11.3 Where the candidate’s progress is deemed satisfactory, the Research Degrees Committee shall approve continuation of candidature.

11.4 Where progress is deemed unsatisfactory, in the Confirmation of Candidature, Annual Report or other interim faculty report, the Research Degrees Committee, on advice from the Faculty Research Committee, will normally place the candidate under review for a period of up to three months from the date that the candidate is advised in writing of the decision. The Research Degrees Committee will inform the candidate of the required remedial action to be followed taking account of the advice provided by the Principal Supervisor and the faculty.

11.5 After the Review Period the Faculty Research Committee must forward to the Research Degrees Committee a report on the Candidate’s progress which will include written documentation of the steps that have been taken to resolve the specified deficiencies in the candidate’s program and an assessment of progress during the Review Period. The Research Degrees Committee will then approve continuation of candidature if the progress is deemed satisfactory.

11.6 If progress is still unsatisfactory after the Review Period, the Research Degrees Committee, on advice from the faculty committee, shall ask the candidate to show cause why the enrolment of the candidate should not be terminated (ref. Regulation 12.8).

11.7 A candidate who has been placed under review after an unsatisfactory annual report or interim report established by the faculty may not take leave of absence until the continuation of the candidature has been approved by the Research Degrees Committee.

11.8 When a candidate’s progress has been reported to the Research Degrees Committee as unsatisfactory in any two consecutive reports during the candidature, the Research Degrees Committee shall ask the candidate to show cause why the enrolment of the candidate should not be terminated.

11.9 If a candidate fails to submit an annual report through their Principal Supervisor to Research Degrees Committee by the due date without applying, in writing, for an extension on the prescribed form two weeks prior to the due date, the Research Degrees Committee may ask the candidate to show cause why the enrolment of the candidate should not be terminated.

11.10 Applications for extensions of candidature or scholarships or leave of absence due to delays or problems with the planned research program will not normally be considered by the Research Degrees Committee unless the delays or problems have been documented in previous reports.

11.11 If the candidate does not show cause (refer Regulations 11.6, 11.8) why the enrolment should not be terminated, the Research Degrees Committee may terminate the candidate's enrolment or with the agreement of the faculty offer admission to candidature for the degree of master (research).

12. Confirmation of Candidature
12.1 Within twelve months of admission for full-time candidates and twenty-four months for part-time candidates, eighteen months for International Candidates, the candidate shall present (in consultation with her/his supervisors) a plan of the research program for the remainder of the candidature and a report on the work done to this point. This confirmation report shall incorporate a substantial literature review and shall provide evidence of the research capacity of the candidate including the rate of progress to this point. The plan shall include:
• the area of study in which the candidate’s course is located;
• any remaining coursework to be completed including an assessment plan;
• the nature of participation in scholarly activities of the centre/research concentration, school, or faculty in which the study is being undertaken;
• the objectives of the program of research and investigation and its relationship to published research in the same field;
• the research methods to be followed;
• the title of the thesis; and
• a time-line for completion of the research program.

12.2 The candidate shall present this confirmation report and planned research program at a Confirmation Seminar open to faculty members and the public.

12.3 A candidate who is not able to complete Confirmation of Candidature within the timeframe listed in Regulation
At the end of the Review Period, the faculty must advise any conditions are met:

- an appraisal of the candidate’s progress and suitability for continuation in the PhD program;
- the documents prepared by the candidate pursuant to Regulation 12.1;
- a statement that the research program is of the standard required for a PhD program;
- statements of whether the studies continue to be within the aims and objectives and physical and human resources of the centre/research concentration; and
- a report on the candidate’s seminar.

Candidates who are undertaking confirmation in order to transfer from a masters by research or a professional doctorate (research) at QUT must complete the confirmation process and should refer to Regulation 7.1.

In considering the application for Confirmation of Candidature, the Research Degrees Committee will, if the conditions are met:

- confirm the candidature and notify the candidate; or
- may require changes to the planned research program; or
- if the recommendation of the faculty is not to confirm the candidature immediately, place the candidate under review for up to three months.

At the end of the Review Period, the faculty must advise the Research Degrees Committee whether the conditions of the review have been met.

Where a candidate is placed under review following the Confirmation Seminar, the Principal Supervisor must advise the candidate within seven days of the seminar of the conditions to be met in the form of clear, written guidelines on the work to be completed and due dates for the submission of materials and whether a further Confirmation Seminar is required. The conditions must be endorsed by the candidate, supervisor(s), director of centre/research concentration, the Head of School, chair of the appropriate faculty committee or dean as appropriate and be forwarded within fourteen days to the Office of Research for noting by the Director, Postgraduate Research Studies.

Where a candidate’s progress remains unsatisfactory after the Review Period the Research Degrees Committee, on advice from the faculty, shall either grant a further extension of the Review Period of up to three months or, after giving the candidate the opportunity to show why one of the following courses of action should not be taken:

- terminate the candidature with an offer of admission to the degree of master, or
- terminate the candidature with no such offer.

13. Thesis Guidelines

The thesis must be presented in accordance with the requirements of the Council, including any accompanying declarations and in accordance with Appendix 51 of the Manual of Policies and Procedures _ Requirements for Presenting Theses (see MOPP Appendix 51) and the main body of the text must not exceed 100,000 words.

Except with the specific permission of the Research Degrees Committee the thesis must be presented in the English language. Such permission must be sought at Stage 1 of the application for admission to the PhD program and will not be granted solely on the grounds that the candidate’s ability to satisfy the External Examination Committee will be affected adversely by the requirement to present the thesis in English.

Where a candidate’s research program forms part of the work of a research team or larger research project, the thesis must indicate clearly the candidate’s individual contribution and the extent to which co-workers contributed to the candidate’s program.

Subject to Quits intellectual property policy (see MOPP Appendix 22 - 3.1) the copyright of the thesis is vested in the candidate.

Where a candidate or the sponsoring establishment wishes the thesis to remain confidential for a period of time after the completion of the work, written application for approval stating the reasons must be made to the Research Degrees Committee when the thesis is submitted for external examination. The period normally shall not exceed two years from the date on which the Head of School or nominee recommends acceptance of the thesis to the Research Degrees Committee.

A candidate may not present in the thesis any work for which another degree or diploma has been awarded by QUT or any other academic institution, but such a candidate shall not be precluded from incorporating extracts from such work in the thesis provided that the sum of any such extracts does not constitute more than 10% of the thesis and provided also that the source of each such extract is stated explicitly.

Prior approval must be obtained from the Research Degrees Committee for any course of PhD study leading to the presentation of a thesis other than in writing. Full details of the alternative course of study should be provided formally at Stage 2 together with a proposal regarding the form the final thesis and its examination is expected to take.

A candidate may submit with the thesis other kinds of relevant material (such as films, audio tape recordings, video tape recordings, CD -ROMS, models, software programs, evidence of exhibitions, or other materials for the purposes of illustration) which shall be accompanied by an appraisal of the candidate’s progress and suitability for continuation of the alternative course of study should be provided for continuing the candidature immediately, place the candidate under review for up to three months.

Where a candidate’s research program forms part of the work of a research team or larger research project, the thesis must indicate clearly the candidate’s individual contribution and the extent to which co-workers contributed to the candidate’s program.

A PhD may be awarded on the basis of the submission of published papers as per the Section 14.

A PhD may be awarded on the basis of the submission of a creative work as per the Regulations set out in Section 15.

A candidate’s name will not be placed on the list for graduation until the final copy of the thesis is received in the Research Students_ Section, Office of Research.

A candidate who passes but is required to make revisions to the thesis after external examination must lodge the final copy of the thesis with the Research Students_ Section, Office of Research, no later than 12 months after the date of receipt of examiners_ reports or the candidate wishes the thesis to remain confidential for a period of time.

When the final copy of the thesis has been lodged with the Research Students_ Section, Office of Research,
the names of the examiners will be released to the candidate on request, providing that the examiner has not indicated otherwise.

14. Presentation of PhD Theses by Published Papers
14.1 Introduction

14.2.5 The abstract summarises the main findings presented in each published paper or submitted manuscript.

14.2.4 Normally, the thesis shall include the following:
- title page;
- abstract and key words;
- list of publications and/or manuscripts;
- contents;
- statement of original authorship;
- acknowledgments;
- introduction;
- literature review; published papers and submitted manuscripts; and
- general discussion.

14.2.7 The literature review will, of necessity, replicate literature cited in subsequent chapters but must contain a clear statement on the significance of the project aims, a critical review of relevant literature, identification of knowledge gaps, and the relationship of the literature to the experimental program.

14.2.8 Published papers/papers submitted in the following categories may be included but each must be presented as an individual chapter in the thesis:
- published papers;
- manuscripts accepted for publication;
- manuscripts submitted and under review by referees; and
- manuscripts under revision following referees' reports.

14.2.9 Only papers which have been published by or submitted to journals approved by the faculty committee are allowable under these Regulations. Whilst Short Communications and Letters are acceptable, their number should be less than that of full length papers.

14.2.10 Manuscripts which have been rejected by a journal must not be included unless they have been substantially rewritten to address referees' comments as certified in the Final Seminar documentation.

14.2.11 Each chapter comprised of a published paper or submitted manuscript must begin with a clear statement of the contribution made by each author of any jointly authored paper. The description must be sufficiently detailed to describe accurately the contribution of each author.

14.2.12 The thesis must contain an overarching discussion of the main features linking the publications and include a statement of the significance of the findings, problems encountered and the future directions of the work.

14.3 Presentation

14.3.1 The thesis must be presented in accordance with the requirements of the Council, including any accompanying declarations and in accordance with MOPP Appendix 51.

15. Presentation of PhD Theses by Creative Works
15.1 Introduction

15.1.1 In the case of a thesis submitted in the area of artistic practice, presentation may be in one of two forms: a theoretical thesis or artwork and exegesis. The artwork may be in the form of exhibition, performance, literary work, film, CD Rom or other approved format. The artwork and exegesis will be examined as an integrated whole. The artwork should provide a coherent demonstration that the candidate has reached an appropriate standard in the research and has made a significant and original contribution to knowledge in the discipline. The exegesis should describe the research process and elaborate, elucidate and place in context the artistic practice undertaken. In the case of visual or performing arts, the examiners will attend the exhibition/performance, at which time they will be given a copy of the exegesis in temporary binding. A final copy of the exegesis will be provided to the examiners within three months of their viewing the artwork.

15.2 Examination of a Creative Work Other Than a Printed Thesis

15.2.1 Where other materials are to be examined, such as in the areas of visual, performing, literary or media arts, the candidate must seek approval from Research Degrees Committee for the form and presentation of the thesis at the time of the Stage 2 application for entry to the PhD program.

15.2.2 Artistic practice may be examined by a theoretical thesis or by artwork and exegesis. The artwork and the exegesis will not be examined separately but as an inte-
the faculty must notify the Research Degrees Committee
nomination of examiners and the submission of the thesis,
16.7 If more than six months has elapsed between the
weeks of receipt of the thesis. It should also contain a description of the form
and presentation of the artistic practice which constitutes
the remainder of the thesis.
15.3 Presentation
15.3.1 The thesis must be presented in accordance with
the requirements of the Council, including any accompany-
ing declarations and in accordance with MOPP Appendix
51.
16. Examinations
16.1 Any fees payable in relation to the examination of a
candidate shall be determined by the Council.
16.2 At least three months prior to the maximum candida-
ture date (or anticipated completion date) the Principal Su-
ervisor having obtained the agreement of the faculty
committee, shall recommend to the Research Degrees
Committee, on the prescribed form, the composition of a
proposed Examination Committee and the title of the can-
didate’s thesis.
16.3 The Examination Committee shall comprise two exter-
nal examiners who will examine the thesis plus an addi-
tional external examiner to be called upon only if the first
two examiners are in disagreement. (ref. Section 18)
16.4 In exceptional circumstances, the Research Degrees
Committee may act directly to facilitate the examination
process of a thesis including the appointment of examiners.
16.5 Any person who has acted as the candidate’s Princi-
pal or Associate Supervisor; or participated in the candi-
date’s research group or in any capacity where a conflict of
interest is seen to exist may not be nominated by the fac-
culty as an examiner. (refer to MOPP Appendix 9 _ QUT
Code of Conduct _ Integrity _ section (e))
16.6 Examiners must have demonstrable and substantial
publications and research experience in the area under
investigation, preferably have a PhD and be widely recog-
nised in the relevant field. At least one of the nominated
examiners should be from an internationally recognised
institution. However all of the examiners must be from Australian institutions provided
that they are widely recognised as experts with demonstra-
tive and substantial publications and research experience in
the relevant field of research. At least one examiner must
also have substantial experience of examining re-
search degree candidates at the doctoral level. Agreement
will be sought from examiners to examine the thesis within
8 weeks of receipt of the thesis.
16.7 If more than six months has elapsed between the
nomination of examiners and the submission of the thesis,
the faculty must notify the Research Degrees Committee
that the nominated examiners are still willing and able to
examine the thesis within two months of its receipt. If any
previously nominated examiner is unable to examine the
thesis, a replacement examiner must be nominated by the
Principal Supervisor with the agreement of the faculty for
approval by the Research Degrees Committee.
16.8 In order to determine whether the thesis is acceptable
for examination by the Examination Committee, the candi-
date shall be required to present a Final Seminar based on
the work described in the thesis to the faculty to which he/she is attached.
• This final seminar shall normally take place no more
than six months prior to the anticipated submission date.
• The faculty shall constitute a panel of three including the
Principal Supervisor to attend the seminar and to report
on the readiness of the thesis for external examination.
The panel shall be chaired by the Principal Supervisor,
and shall question the candidate on the content of the
thesis at the conclusion of the seminar. Each member of
the panel must receive a copy of the draft thesis 14 days
prior to the final seminar.
• The panel may require changes to the thesis or ask that
further work be done prior to submission of the thesis.
The thesis is accepted by the University for external ex-
amination only when the panel signifies its belief that the
degree requirements have been met. The faculty panel
shall use the prescribed form when advising Research
Degrees Committee that the thesis is ready for external
examination.
• The final seminar shall be open to the public and shall
be widely advertised by the faculty so as to ensure at-
tendance by researchers and research students within
the faculty.
• In all other matters the form and timing of the final semi-
nar is determined by the faculty.
16.9 The thesis must be accompanied by a certificate en-
dorsed by the Principal Supervisor, Head of School or
nominee, and the faculty committee stating that all reason-
able efforts have been made by the faculty to ensure that:
• the thesis makes an original and significant contribution
to the field of research;
• the methodology applied in the candidate’s research is
effective and appropriate for the thesis topic and the
PhD;
• the thesis reflects competence in the survey of literature
and documentation of statements;
• the thesis is of the required standard for external exami-
nation;
• the thesis is within the prescribed word limit;
 • the candidate has presented a Final Seminar;
• that an external candidate has spent at least three
months minimum at QUT during the course of his/her
enrolment; and
• original correspondence from editors has been sighted
and that editorial advice has been followed in the manu-
scripts submitted for examination (if applicable) and
acknowledgment is given regarding the inclusion of all
published and other sources of information, together with
any substantial financial assistance received for the pro-
ject.
16.10 In exceptional circumstances, the Research Degrees
Committee may allow a candidate to submit his or her
thesis for external examination without the requirement for
certification (ref. Regulation 16.9). The candidate must ap-
ply in writing to the Research Degrees Committee for such
permission, outlining the reasons why the required certifica-
tion is not included.
16.11 Three copies of the thesis, in the prescribed format must be submitted to the Research Students' Section, Office of Research, no later than the maximum candidature date.

16.12 The Office of Research, on the advice of the Research Degrees Committee, shall provide the examiners with a copy of the thesis and of the Council's Regulations for the Award of the Degree of Doctor of Philosophy, and any other relevant information.

16.13 Each examiner will be asked to provide a written report to the Office of Research on the candidate's thesis and to recommend one of the following courses of action:

Recommendation 1: The candidate should be awarded the degree without the requirement for revision, further examination, or modification (minor corrections and typographical errors only); or

Recommendation 2: The candidate should be awarded the degree subject to minor nominated revisions being completed to the satisfaction of the Head of School and Principal Supervisor; or

Recommendation 3: The candidate should be awarded the degree following the completion of major nominated revisions to the satisfaction of the Head of School and Principal Supervisor; or

Recommendation 4: The candidate should be permitted to substantially revise and submit the thesis for re-examination within twelve months after a specified amount of further work, which may alter the substantive conclusions of the thesis, has been completed under approved supervision and the thesis appropriately amended to reflect the additional research; or

Recommendation 5: The candidate should be awarded the degree at Masters level: without the requirement for further revision or further examination; subject to nominated revisions being completed to the satisfaction of the Head of School and Principal Supervisor; subject to revision and submission for re-examination after completion of further work; or

Recommendation 6: The thesis should be rejected, the candidate not be permitted to resubmit, the procedures accepted for the award or the thesis be rejected and the candidate not be permitted to resubmit, the procedures in Section 17 shall apply.

16.14 After both examiners' reports are received the Office of Research will forward them to the Head of School or nominee, the Principal Supervisor and the candidate with an appropriate covering letter. (Until such time as the examination process is complete the identity of the examiners will be withheld from the candidate.)

17. Examiners in Agreement
17.1 Where both examiners recommend that the candidate should be awarded the degree (recommendation 1, 2 or 3) the Head of School, or nominee will consult with the Principal Supervisor, Centre Director and Postgraduate Studies coordinator to discuss any corrections or revisions that the candidate may be required to make and where revisions are required.

17.2 When all corrections or revisions have been made to the satisfaction of the Head of School or nominee and the Principal Supervisor, the Head of School, or nominee and the Principal Supervisor must certify to the Research Degrees Committee that they recommend acceptance of the thesis in fulfilment of the conditions for the award of the PhD degree.

17.3 Where both examiners recommend that the thesis be revised and resubmitted for examination (Examiners Report Recommendation 4), after consultation with the Principal Supervisor and the Centre Director, the Head of School or nominee will make written recommendation to the Research Degrees Committee within 7 days of the receipt of the Examiners Reports listing any revisions required. Once these are approved by the Research Degrees Committee, the Research Degrees Committee will inform the candidate of the revisions and/or any action required.

17.4 Where both examiners recommend that the candidate should be awarded the degree at masters level, (Recommendation 5), the Head of School or nominee will consult with the Principal Supervisor to discuss any revisions that the candidate may be required to make and forward a recommendation to the Research Degrees Committee. Once approved the Head of School will meet with the Centre Director and Principal Supervisor to discuss outcome with the Principal Supervisor responsible for informing the candidate of the decision.

18. Examiners Not in Agreement
18.1 Where the recommendations of the external examiners are not in agreement as to whether the thesis should be accepted for the award of PhD or as to whether the thesis may be revised and resubmitted the thesis will be sent to the third nominated examiner.

18.2 Upon receipt of the third examiner’s report, a majority decision shall be adopted.

18.3 Where the majority decision is that the thesis be accepted for the award or the thesis be accepted for the award of a masters degree or the thesis be rejected and the candidate not be permitted to resubmit, the procedures in Section 17 shall apply.

18.4 Where the majority decision is that the candidate be required to submit for re-examination or the thesis fail, the procedures in Section 17 shall apply.

18.5 Where the recommendations of the three examiners clearly differ and no clear majority exists, the Head of School or nominee shall liaise with the Director, Postgraduate Research Studies, and the Principal Supervisor to determine the further course of action which may involve any of the outcomes listed in Regulation 16.13.

19. Re-examination
19.1 A candidate who is required to submit for re-examination may be re-examined only once except in the case of an upheld appeal.

19.2 Re-examination shall take place within twelve months from the date on which the candidate is advised in writing by the Head of School or nominee of such re-examination. The Research Degrees Committee may, on written application by the candidate and supported by the Principal Supervisor and Centre Director with suitable justification, approve an extension to this period which, under normal circumstances, may be a maximum of a further twelve months.

19.3 A candidate who is required to submit his/her thesis for re-examination must re-enrol in the PhD program.

19.4 The thesis shall be re-examined by the same two examiners unless:
any of the examiners is unable to re-examine the thesis in which case the Head of School or nominee with the agreement of the Principal Supervisor and the faculty shall nominate a replacement examiner(s) who must be approved by the Research Degrees Committee; or the Research Degrees Committee replaces one or more of the examiners on advice from the RDC Chair and with suitable justification.

19.5 Examiners re-examining a thesis will be asked to provide a written report on the candidate’s thesis and to recommend one of the following courses of action:
(a) the candidate should be awarded the degree with or without minor nominated revisions; or
(b) the candidate should be awarded the degree at masters level with or without minor nominated revisions; or
(c) the thesis should be rejected and the degree should not be awarded.

19.6 Regulations applicable to PhD examination shall apply to the re-examination.

20. Appeals
20.1 A candidate whose thesis has been failed or whose thesis has been recommended for the award of the degree of master may lodge an appeal against the outcome of the examination process.

20.2 The grounds for appeal may be on matters of process only, i.e. procedural irregularities in the conduct of the examination or documented evidence of examiner bias as evidenced by comments in the examiners reports.

20.3 An appeal must be lodged within sixty (60) days of the date of written advice from the Office of Research on the outcome of the examination. This appeal must include the specific grounds on which the appeal is based.

20.4 Appeals as described in Section 20 must be submitted, in writing, to the Office of the Pro-Vice-Chancellor (Research and Advancement). The Director, Postgraduate Research Studies, will determine whether a potential conflict of interest exists in relation to her/his consideration of the appeal.

20.5 In cases where a conflict of interest exists, the Director, Postgraduate Research Studies, will appoint a member of academic staff, with expertise in research candidate supervision, to consider the appeal.

20.6 The Director, Postgraduate Research Studies, or appointee will decide whether a case exists and may seek the advice of the faculty, school or centre/research concentrate as appropriate.

20.7 The appeal may be allowed or dismissed. If an appeal is allowed, the Director, Postgraduate Research Studies, or appointee cannot recommend that the degree be awarded but shall recommend that: the thesis be re-examined. This re-examination shall be carried out in accordance with the Section 19 taking account of the issues raised in the successful appeal.

20.8 The Director, Postgraduate Research Studies, or appointee will make a determination on the appeal as soon as practicable and will advise appellants, in writing, of the result of the appeal.

- **Master of Advertising (Creative Advertising)** IX96

  Award title: Master of Advertising (Creative Advertising)

Bachelor of Applied Science (in Human Movement Studies)/Bachelor of Education (Secondary) IX04

Award title: Bachelor of Applied Science (in Human Movement Studies)/Bachelor of Education (Secondary)
CRICOS code: 020323D
Campus: Kelvin Grove, Carseldine and Gardens Point
Duration: 4 years full-time
Credit points: 432
Course coordinator: Education Coordinator: Dr Peter Bond, Human Movement Studies Coordinator: Dr Tom Cuddihy
Discipline coordinator:

Professional Recognition
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration, and for associate membership of the Australian Association for Sports Science.

Working with Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

Full-time Course Structure

Year 1, Semester 1
LSB131 Anatomy
HMB313 Socio-Cultural Foundations of Physical Activity

Bachelor of Applied Science/Bachelor of Business IF61

Award title: Bachelor of Applied Science (Study Area A)/Bachelor of Business (Study Area A)
CRICOS code: 042263G
Campus: Gardens Point
Duration: 4 years full-time

Credit points: 432 (full-time standard semester: 54 (average))
Course coordinator: Dr Megan Hargreaves (Science); Mr Andrew Paltridge (Business)
Discipline coordinator: Ms Ros Kent (Accountancy); Dr Gayle Kerr (Advertising); Ms Sherrena Buckby (Electronic Business); Dr Amanda Gudmundsson (Human Resource Management); Mr Simon Ridings (International Business); Dr Paul Barnes (Management); Mr Bill Proud (Marketing); Ms Robina Xavier (Public Relations); Dr John Chen (Banking & Finance) and Dr Radhika Lahiri (Economics); Science Discipline Coordinator details are listed under Contact Details below

Professional Recognition
Graduates will satisfy the requirements for membership of the relevant professional body for their chosen science major. See the Bachelor of Applied Science (SC01) course for details.

The Bachelor of Business degree may, subject to choice of major, extended major, or specialisation, allow graduates to satisfy the academic requirements for membership of: CPA Australia; Institute of Chartered Accountants in Australia; Chartered Secretaries Australia; Advertising Federation of Australia; Australian Association of National Advertisers; Australian Direct Marketing Association; Queensland Commercial Radio Association; Financial Services Institute of Australasia (FINSIA); Economics Society of Australia; Australian Human Resources Institute; Australian Institute of Management; Australian Institute of Training and Development; Australian Institute of Export; Australian Marketing Institute; Marketing Research Society of Australia; American Marketing Association and Public Relations Institute of Australia.

Course Design
Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Applied Science program and 240 credit points from the Bachelor of Business program.

The Bachelor of Applied Science allows multi-disciplinary programs of study to help position students within the broad range of science disciplines and qualify them as competent professionals within their chosen fields. Students can major in Biochemistry, Biotechnology, Chemistry, Ecology, Environmental Science, Forensic Science, Geoscience, Microbiology or Physics. See the Bachelor of Applied Science (SC01) course for more details. So that students can complete the double degree in a shorter period of time, core majors are to be taken from the business program.

Students can specialise in one or more of the following business majors: Accountancy, Advertising, Banking and Finance, Economics, Electronic Business, Human Resource Management, International Business, Management, Marketing or Public Relations.

Business Double Major / Extended Major / Specialisation Unit
Business Double Major / Extended Major / Specialisation Unit
Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units

Course Structure

Economics

Note: These Business Units are studied in conjunction with Science units each semester
Year 1, Semester 1
BSB113 Economics
BSB122 Quantitative Analysis and Finance
Year 1, Semester 2
BSB119 International and Electronic Business
EFB102 Economics 2
Year 2, Semester 1
BSB110 Accounting
BSB126 Marketing
EFB202 Business Cycles and Economic Growth
Year 2, Semester 2
BSB114 Government, Business and Society
Business Double Major / Extended Major / Specialisation Unit
Year 3, Semester 1
EFB211 Firms, Markets and Resources
Business Double Major / Extended Major / Specialisation Unit
Year 3, Semester 2
EFB211 Firms, Markets and Resources
Business Double Major / Extended Major / Specialisation Unit
BSB115 Management, People and Organisations
EFB314 International Trade and Economic Competitive-ness
EFB329 Contemporary Applications of Economics Theory
Year 4, Semester 1
BSB111 Business Law and Ethics
Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.

Course Structure

Human Resource Management

Note: These Business Units are studied in conjunction with Science units each semester

Year 1, Semester 1
BSB115 Management, People and Organisations
BSB122 Quantitative Analysis and Finance

Year 2, Semester 1
BSB111 International and Electronic Business
BSB126 Marketing

BSB201 Market and Audience Research

MGB220 Management Research Methods

IBB210 Export Management

International Business Area Study Options:
Students must select one of the following pairs of area study units:
IBB208 European Business Development  
IBB308 Contemporary Business in Europe  
OR  
IBB217 Asian Business Development  
IBB317 Contemporary Business in Asia

Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.

### Course Structure

#### Management

**Note:** These Business Units are studied in conjunction with Science units each semester

**Year 1, Semester 1**  
BSB115 Management, People and Organisations  
BSB122 Quantitative Analysis and Finance

**Year 1, Semester 2**  
BSB113 Economics  
BSB114 Government, Business and Society  
MGB222 Managing Organisations

**Year 2, Semester 1**  
BSB119 International and Electronic Business  
BSB126 Marketing  
MGB220 Management Research Methods

**Year 2, Semester 2**  
BSB110 Accounting  
BSB111 Business Law and Ethics

**Year 3, Semester 1**  
MGB210 Production and Service Management  
MGB211 Organisational Behaviour

**Year 3, Semester 2**  
MGB334 Managing in a Changing Environment  
Business Double Major/Extended Major/Specialisation Unit

**Year 4, Semester 1**  
Business Double Major/Extended Major/Specialisation Unit  
Business Double Major/Extended Major/Specialisation Unit  
Business Double Major/Extended Major/Specialisation Unit

**Year 4, Semester 2**  
MGB309 Strategic Management  
Business Double Major/Extended Major/Specialisation Unit  
Business Double Major/Extended Major/Specialisation Unit

Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.

The units AMB201 Market and Audience Research and MGB220 Management Research Methods are incompatible units. Students undertaking HRM or Management as a double major should contact the school for enrolment advice. From Semester 2, 2003 students who complete both MGB220 and AMB201 will be required to undertake an approved substitute unit to satisfy course requirements.

#### Marketing

**Note:** These Business Units are studied in conjunction with Science units each semester

**Year 1, Semester 1**  
BSB122 Quantitative Analysis and Finance  
BSB126 Marketing

**Year 1, Semester 2**  
AMB200 Consumer Behaviour  
AMB240 Marketing Planning and Management

**Year 2, Semester 1**  
BSB114 Government, Business and Society  
AMB201 Marketing and Audience Research  
BSB115 Management, People and Organisations  
BSB119 International and Electronic Business

**Year 2, Semester 2**  
AMB241 E-Marketing Strategies  
Business Double Major/Extended Major/Specialisation Unit

**Year 3, Semester 1**  
BSB113 Economics  
Business Double Major/Extended Major/Specialisation Unit

**Year 3, Semester 2**  
BSB110 Accounting  
BSB111 Business Law and Ethics  
Business Double Major/Extended Major/Specialisation Unit

**Year 4, Semester 1**  
AMB340 Services Marketing  
Business Double Major/Extended Major/Specialisation Unit  
Business Double Major/Extended Major/Specialisation Unit

**Year 4, Semester 2**  
AMB341 Strategic Marketing  
Business Double Major/Extended Major/Specialisation Unit

Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.

The units AMB201 Market and Audience Research and MGB220 Management Research Methods are incompatible units. Students undertaking HRM or Management as a double major should contact the school for enrolment advice. From Semester 2, 2003 students who complete both MGB220 and AMB201 will be required to undertake an approved substitute unit to satisfy course requirements.

#### Public Relations

**Note:** These Business Units are studied in conjunction with Science units each semester

**Year 1, Semester 1**  
BSB122 Quantitative Analysis and Finance  
BSB126 Marketing

**Year 1, Semester 2**  
AMB260 Public Relations Theory and Practice  
BSB114 Government, Business and Society  
BSB119 International and Electronic Business

**Year 2, Semester 1**  
AMB201 Marketing and Audience Research  
AMB261 Media Relations and Publicity

**Year 2, Semester 2**  
AMB262 Public Relations Writing  
Business Double Major/Extended Major/Specialisation

**Year 3, Semester 1**  
BSB113 Economics  
Business Double Major/Extended Major/Specialisation

**Year 3, Semester 2**  
BSB110 Accounting  
BSB111 Business Law and Ethics  
Business Double Major/Extended Major/Specialisation

**Year 4, Semester 1**  
AMB360 Corporate Communication Management  
Business Double Major/Extended Major/Specialisation  
Business Double Major/Extended Major/Specialisation

**Year 4, Semester 2**  
AMB361 Public Relations Campaigns  
Business Double Major/Extended Major/Specialisation
Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.

The units AMB201 Market and Audience Research and MGB220 Management Research Methods are incompatible units. Students undertaking HRM or Management as a double major should contact the school for enrolment advice. From Semester 2, 2003 students who complete both MGB220 and AMB201 will be required to undertake an approved substitute unit to satisfy course requirements.

### Science Component

#### Faculty Core Units
6 faculty core units, including three Foundation units

#### Foundation Units
- LSB118 Life Science
- MAB101 Statistical Data Analysis 1
- NRB100 Environmental Science
- PCB101 Physical Science

#### Other Science Units
- LSB238 Cell and Molecular Biology 1
- LSB258 Principles of Human Physiology
- MAB100 Mathematical Sciences 1A
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- NRB230 Planet Earth
- NRB240 History of Life on Earth
- NRB270 Animal and Plant Structure and Function
- PCB140 Introductory Chemistry
- PCB142 Chemistry 1
- PCB242 Chemistry 2
- PCB250 Physics 1
- PCB260 Physics 1A

#### Course Structure

### Biochemistry

**Note:** These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
- LSB118 Life Science
- PCB101 Physical Science

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function

**Year 2, Semester 1**
- MAB101 Statistical Data Analysis 1
- Either PCB140 Introductory Chemistry
  Or PCB142 Chemistry 1

**Year 2, Semester 2**
- PCB242 Chemistry 2
- PCB250 Physics 1
- PCB260 Physics 1A

### Course Structure

### Biotechnology

**Note:** These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
- LSB118 Life Science
- PCB101 Physical Science

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function

**Year 2, Semester 1**
- MAB101 Statistical Data Analysis 1
- Either PCB140 Introductory Chemistry
  Or PCB142 Chemistry 1

**Year 2, Semester 2**
- PCB242 Chemistry 2
- PCB250 Physics 1
- PCB260 Physics 1A

**Year 3, Semester 1**
- LSB308 Biochemistry
- LSB338 Cell and Molecular Biology 2

**Year 3, Semester 2**
- LSB449 Human Cell Biology
- LSB468 Molecular Biology

**Year 4, Semester 1**
- LSB509 Medical Biotechnology 1
- LSB537 Genetic Engineering

**Year 4, Semester 2**
- LSB609 Medical Biotechnology 2
- LSB619 Genomics and Bioinformatics
UNIVERSITY-WIDE AND INTERFACULTY COURSES

Note: These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
NRB100 Environmental Science
PCB101 Physical Science

**Year 1, Semester 2**
LSB118 Life Science
NRB240 History of Life on Earth

**Year 2, Semester 1**
MAB101 Statistical Data Analysis 1
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

**Year 2, Semester 2**
LSB238 Cell and Molecular Biology 1
NRB301 Earth Surface Systems
NRB311 Population Ecology

**Year 3, Semester 1**
NRB510 Population Genetics
NRB511 Population Management

**Year 4, Semester 2**
NRB610 Ecological Applications
NRB611 Conservation Biology

**Course Structure**

**Environmental Science**

Note: These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
NRB100 Environmental Science
PCB101 Physical Science

**Year 1, Semester 2**
LSB118 Life Science
NRB240 History of Life on Earth

**Year 2, Semester 1**
MAB101 Statistical Data Analysis 1
Either
NRB230 Planet Earth
Or
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

**Year 2, Semester 2**
NRB270 Animal and Plant Structure and Function
PCB414 Industrial and Environmental Analytical Chemistry

**Year 3, Semester 1**
NRB301 Earth Surface Systems
NRB311 Population Ecology

**Year 3, Semester 2**
NRB331 Sedimentary Geology
NRB333 Mineralogy

**Year 4, Semester 1**
NRB534 Geophysics
NRB536 Petrology and Geochemistry

**Year 4, Semester 2**
NRB633 Hydrogeology
NRB635 Plate Tectonics and Advanced Structural Geology

**Microbiology**

Note: These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
NRB118 Life Science
PCB101 Physical Science

**Year 1, Semester 2**
MAB101 Statistical Data Analysis 1
PCB140 Introductory Chemistry

**Year 2, Semester 1**
NRB100 Mathematical Sciences 1A
PCB242 Chemistry 2

**Year 2, Semester 2**
LSB238 Cell and Molecular Biology 1
NRB270 Animal and Plant Structure and Function

**Year 3, Semester 1**
LSB468 Molecular Biology
SCB384 Forensic Science

**Year 3, Semester 2**
JSB937 Forensic Scientific Evidence
PCB414 Industrial and Environmental Analytical Chemistry

**Year 4, Semester 1**
PCB514 Instrumental Analysis
PCB584 Forensic Examination of Physical Evidence

**Year 4, Semester 2**
LSB684 Forensic DNA Profiling
PCB684 Forensic Analysis and Toxicology

**Course Structure**

**Geoscience**

Note: These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
NRB100 Environmental Science
PCB101 Physical Science

**Year 1, Semester 2**
NRB240 History of Life on Earth

**Year 2, Semester 1**
MAB100 Mathematical Sciences 1A
NRB230 Planet Earth

**Year 2, Semester 2**
NRB101 Statistical Data Analysis 1
NRB100 Environmental Science
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

**Year 3, Semester 1**
NRB301 Earth Surface Systems
NRB311 Population Ecology

**Year 3, Semester 2**
NRB331 Sedimentary Geology
NRB333 Mineralogy

**Year 4, Semester 1**
NRB534 Geophysics
NRB536 Petrology and Geochemistry

**Year 4, Semester 2**
NRB633 Hydrogeology
NRB635 Plate Tectonics and Advanced Structural Geology

**Course Structure**

**Forensic Science**

Note: These Science units are studied in conjunction with Business Units each semester

**Year 1, Semester 1**
LSB118 Life Science
PCB101 Physical Science

**Year 1, Semester 2**
MAB101 Statistical Data Analysis 1
PCB140 Introductory Chemistry

UNIVERSITY-WIDE AND INTERFACULTY COURSES

Note: These Science units are studied in conjunction with Business Units each semester

Year 1, Semester 1
LSB118 Life Science
PCB101 Physical Science

Year 1, Semester 2
LSB238 Cell and Molecular Biology 1
NRB270 Animal and Plant Structure and Function

Year 2, Semester 1
MAB101 Statistical Data Analysis 1
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

Year 2, Semester 2
LSB258 Principles of Human Physiology
PCB242 Chemistry 2

Year 3, Semester 1
LSB308 Biochemistry
LSB328 Microbiology 1

Year 3, Semester 2
LSB428 Microbiology 2
LSB468 Molecular Biology

Year 4, Semester 1
Two units from:
LSB528 Environmental Microbiology
LSB547 Bacterial Pathogenesis and Disease Diagnosis
LSB568 Electron Microscopy
LSB578 Virology

Course Structure

Physics

Note: These Science units are studied in conjunction with Business Units each semester

Year 1, Semester 1
MAB111 Mathematical Sciences 1B
PCB101 Physical Science

Year 1, Semester 2
MAB112 Mathematical Sciences 1C

Year 2, Semester 1
MAB311 Advanced Calculus
PCB107 Physics and Quantitative Techniques

Year 2, Semester 2
MAB101 Statistical Data Analysis 1
PCB250 Physics 1
PCB260 Physics 1A

Year 3, Semester 1
PCB361 AC Theory and Electronics
PCB362 Physics 2

Year 3, Semester 2
PCB460 Instrumentation and Computational Methods
PCB462 Thermodynamics and Solid State Physics

Year 4, Semester 1
PCB561 Quantum and Condensed Matter Physics
PCB562 Physical Methods of Analysis

Year 4, Semester 2
PCB661 Experimental Physics
PCB665 Physics 3

- Bachelor of Applied Science/Bachelor of Education (Primary) IX14

Courses Structure

Biochemistry Major

Year 1, Semester 1
EDB002 Teaching and Learning Studies 2: Development and Learning
LSB118 Life Science
PCB101 Physical Science
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

Year 1, Semester 2
EDB021 Primary Field Studies 1: Development and Learning in the Field

One Science Elective

Year 3, Semester 2
EDB003 Teaching and Learning Studies 3: Practising Education
EDB022 Primary Field Studies 2: Practising Education in the Field
HMB300 Primary Curriculum and Pedagogies: Health and Physical Education
CLB123 Multiliteracies: Designs for Learning

Year 4, Semester 1
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices

Environmental Science Major
Year 1, Semester 1
EDB002 Teaching and Learning Studies 2: Development and Learning
NRB100 Environmental Science
NRB230 Planet Earth
PCB101 Physical Science

Year 1, Semester 2
EDB021 Primary Field Studies 1: Development and Learning in the Field
LSB118 Life Science
MAB101 Statistical Data Analysis 1
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

Year 2, Semester 1
MDB120 Mathematics Curriculum and Pedagogies
NRB301 Earth Surface Systems
NRB311 Population Ecology
One of
NRB321 Sedimentary Geology
NRB370 Invertebrate Biology
NRB371 Plant Biology

Year 2, Semester 2
CLB008 Primary Curriculum and Pedagogies: Studies of Society and Environment
NRB412 Experimental Design
NRB440 Environmental Chemistry
NRB600 Sustainable Environmental Management

Year 3, Semester 1
NRB500 Environmental Systems and Modelling
NRB501 Spatial Analysis of Environmental Systems
NRB572 Terrestrial Ecosystems
One Science Elective

Year 3, Semester 2
EDB003 Teaching and Learning Studies 3: Practising Education
EDB022 Primary Field Studies 2: Practising Education in the Field
HMB300 Primary Curriculum and Pedagogies: Health and Physical Education
CLB123 Multiliteracies: Designs for Learning

Year 4, Semester 1
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices

Q U T H A N D B O O K  2 0 0 6  P A G E  4 5 9
KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media
OR
KKB202 Primary Curriculum and Pedagogies: Dance and Drama
MDB006 Primary Curriculum & Pedagogies: Science

**Year 4, Semester 2**
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)

KKB202 Primary Curriculum and Pedagogies: Dance and Drama
MDB006 Primary Curriculum & Pedagogies: Science

**Year 4, Semester 2**
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)
MDB004 Primary Curriculum & Pedagogies: Information and Communication Technologies

**Mathematics Major (WITH Maths C)**

**Year 1, Semester 1**
EDB002 Teaching and Learning Studies 2: Development and Learning
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C

**Year 1, Semester 2**
EDB021 Primary Field Studies 1: Development and Learning in the Field
MAB210 Statistical Modelling 1
MAB220 Computational Mathematics 1
PCB101 Physical Science

**Year 2, Semester 1**
MDB120 Mathematics Curriculum and Pedagogies
One Science unit - selected from:
LSB118 Life Science
NRB100 Environmental Science
Two Level 2 Mathematics units - available units are:
MAB311 Advanced Calculus
MAB312 Linear Algebra
MAB313 Mathematics of Finance
MAB314 Statistical Modelling 2
Note: Students must complete at least one of MAB311, MAB312, MAB413

**Year 2, Semester 2**
CLB008 Primary Curriculum and Pedagogies: Studies of Society and Environment
Two Level 2 Mathematics units - available units are:
MAB315 Operations Research 2
MAB413 Differential Equations
MAB414 Applied Statistics 2
MAB420 Computational Mathematics 2
MAB422 Mathematical Modelling
MAB480 Introduction to Scientific Computation
One Level 3 Mathematics units - available units are:
MAB621 Discrete Mathematics
MAB623 Financial Mathematics
Note: Students must complete at least one of MAB311, MAB312, MAB413

**Year 3, Semester 1**
One Science Elective
Three Level 3 Mathematics units - available units are:
MAB521 Applied Mathematics 3
MAB522 Computational Mathematics 3
MAB523 Introduction to Quality Management
MAB525 Operations Research 3A
MAB526 Statistical Science 3
MAB672 Advanced Mathematical Modelling

**Year 3, Semester 2**
EDB003 Teaching and Learning Studies 3: Practising Education
EDB022 Primary Field Studies 2: Practising Education in the Field
HMB300 Primary Curriculum and Pedagogies: Health and Physical Education
CLB123 Multiliteracies: Designs for Learning

**Year 4, Semester 1**
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices
KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media
OR
KKB202 Primary Curriculum and Pedagogies: Dance and Drama
MDB006 Primary Curriculum & Pedagogies: Science

**Year 4, Semester 2**
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)
MDB004 Primary Curriculum & Pedagogies: Information and Communication Technologies

**Course Structure**

**Mathematics Major (WITHOUT Maths C)**

**Year 1, Semester 1**
EDB002 Teaching and Learning Studies 2: Development and Learning
MAB100 Mathematical Sciences 1A
MAB101 Statistical Data Analysis 1
PCB101 Physical Science

**Year 1, Semester 2**
EDB021 Primary Field Studies 1: Development and Learning in the Field
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1

**Year 2, Semester 1**
MDB120 Mathematics Curriculum and Pedagogies
MAB220 Computational Mathematics 1
Two Level 2 Mathematics units - available units are:
MAB311 Advanced Calculus
MAB312 Linear Algebra
MAB313 Mathematics of Finance
MAB314 Statistical Modelling 2
Note: Students must complete at least one of MAB311, MAB312, MAB413

**Year 2, Semester 2**
CLB008 Primary Curriculum and Pedagogies: Studies of Society and Environment

MAB525 Operations Research 5A
MAB526 Statistical Science 3

**Microbiology Major**

**Year 1, Semester 1**
EDB002 Teaching and Learning Studies 2: Development and Learning
LSB118 Life Science
PCB101 Physical Science
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

**Year 1, Semester 2**
EDB021 Primary Field Studies 1: Development and Learning in the Field
LSB308 Biochemistry
LSB328 Microbiology 1
MAB101 Statistical Data Analysis 1
MDB120 Mathematics Curriculum and Pedagogies

**Year 2, Semester 2**
CLB008 Primary Curriculum and Pedagogies: Studies of Society and Environment
LSB338 Environmental Microbiology
LSB408 Metabolism
LSB428 Microbiology 2
Either
LSB647 Clinical Mycology and Parasitology
Or
LSB648 Molecular Microbiology

**Year 3, Semester 1**
LSB538 Environmental Microbiology
LSB547 Bacterial Pathogenesis and Disease Diagnosis
LSB568 Electron Microscopy
One Science Elective (eg LSB338)

**Year 3, Semester 2**
EDB003 Teaching and Learning Studies 3: Practising Education

**MAB672 Advanced Mathematical Modelling**

**Year 3, Semester 2**
EDB003 Teaching and Learning Studies 3: Practising Education
EDB022 Primary Field Studies 2: Practising Education in the Field
HMB300 Primary Curriculum and Pedagogies: Health and Physical Education
CLB123 Multiliteracies: Designs for Learning

**Year 4, Semester 1**
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices
KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media
OR
KKB202 Primary Curriculum and Pedagogies: Dance and Drama
MDB006 Primary Curriculum & Pedagogies: Science

**Year 4, Semester 2**
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)
MDB004 Primary Curriculum & Pedagogies: Information and Communication Technologies
EDB022 Primary Field Studies 2: Practising Education in the Field
HMB300 Primary Curriculum and Pedagogies: Health and Physical Education
CLB123 Multiliteracies: Designs for Learning

Year 4, Semester 1
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices
KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media
OR
KKB202 Primary Curriculum and Pedagogies: Dance and Drama
MDB006 Primary Curriculum & Pedagogies: Science

Year 4, Semester 2
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)
MDB004 Primary Curriculum & Pedagogies: Information and Communication Technologies

Bachelor of Applied Science/Bachelor of Education (Secondary) IX02

Award title: Bachelor of Applied Science (Study Area A)/Bachelor of Education (Secondary)
CRICOS code: 020322E
Campus: Kelvin Grove and Gardens Point
Duration: 4 years full-time
Credit points: 432 (full-time standard semester: 48 (semesters 1, 6-8), 60 (semesters 2-5))
Course coordinator: Dr Megan Hargreaves (Science); Dr Peter Bond (Secondary)

Professional Recognition
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration.
Graduates will satisfy the requirements for membership of the relevant professional body for their chosen science major. See the Bachelor of Applied Science (SC01) course for details.

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.
As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

Year 4, Semester 1
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practices
KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media
OR
KKB202 Primary Curriculum and Pedagogies: Dance and Drama
MDB006 Primary Curriculum & Pedagogies: Science

Year 4, Semester 2
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB025 Internship (Primary)
MDB004 Primary Curriculum & Pedagogies: Information and Communication Technologies

Course Structure
Biochemistry Major
Year 1, Semester 1
LSB118 Life Science

Year 2, Semester 1
PCB101 Physical Science
PCB107 Physics and Quantitative Techniques

Year 2, Semester 2
PCB361 AC Theory and Electronics
PCB362 Physics 2

Year 3, Semester 1
PCB561 Quantum and Condensed Matter Physics
PCB562 Physical Methods of Analysis
PCB661 Experimental Physics

Year 3, Semester 2
EDB003 Teaching and Learning Studies 3: Practising Education
EDB022 Primary Field Studies 2: Practising Education in the Field
HMB300 Primary Curriculum and Pedagogies: Health and Physical Education
CLB123 Multiliteracies: Designs for Learning
UNIVERSITY-WIDE AND INTERFACULTY COURSES

PCB101 Physical Science
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

Year 1, Semester 2
LSB238 Cell and Molecular Biology 1
MAB101 Statistical Data Analysis 1
NRB270 Animal and Plant Structure and Function
PCB242 Chemistry 2
SCB222 Exploration of the Universe

Year 2, Semester 1
EDB002 Teaching and Learning Studies 2: Development and Learning
EDB031 Secondary Field Studies 1: Development and Learning in the Field
LSB308 Biochemistry
LSB338 Cell and Molecular Biology 2
Curriculum Studies 1X

Year 2, Semester 2
MDB454 Science, Technology and Society
LSB408 Metabolism
LSB468 Molecular Biology
LSB608 Protein Science
Either
LSB497 Plant Molecular Biology
Or
LSB605 Protein Engineering and Bioprocessing

Year 3, Semester 1
LSB508 Advanced Metabolism
LSB527 Biomedical Research Technologies
Either
LSB568 Electron Microscopy
Or
LSB537 Genetic Engineering
NRB230 Planet Earth
Curriculum Studies 1Y

Year 3, Semester 2
EDB003 Teaching and Learning Studies 3: Practising Education
EDB032 Secondary Field Studies 2: Practising Education in the Field
Curriculum Studies 2X

### Course Structure

#### Physics Major

**Year 1, Semester 1**
PCB101 Physical Science
PCB107 Physics and Quantitative Techniques
Either
MAB180 Engineering Mathematics 1
Or
MAB131 Engineering Mathematics 1A
Either
NRB100 Environmental Science
Or
ITB111 Software Development 1

**Year 1, Semester 2**
MAB132 Engineering Mathematics 1B
MDB454 Science, Technology and Society 1
PCB250 Physics 1
PCB260 Physics 1A
SCB220 Exploration of the Universe

**Year 2, Semester 1**
EDB002 Teaching and Learning Studies 2: Development and Learning
EDB031 Secondary Field Studies 1: Development and Learning in the Field
MAB134 Electrical Engineering Mathematics 3
PCB361 AG Theory and Electronics
Curriculum Studies 1X

**Year 2, Semester 2**
LSB118 Life Science
PCB445 Nanotechnology and Nanoscience
PCB460 Instrumentation and Computational Methods
PCB462 Thermodynamics and Solid State Physics
PCB469 Astrophysics 1

**Year 3, Semester 1**
PCB561 Quantum and Condensed Matter Physics
PCB562 Physical Methods of Analysis
PCB563 Global Energy Balance and Climate Change
PCB661 Experimental Physics
Curriculum Studies 1Y

**Year 3, Semester 2**
EDB003 Teaching and Learning Studies 3: Practising Education
EDB032 Secondary Field Studies II: Practising Education in the Field
Curriculum Studies 2X
Curriculum Studies 2Y

**Year 4, Semester 1**
EDB004 Teaching and Learning Studies IV: Inclusive Education
EDB033 Secondary Field Studies III: Immersion in Inclusive Educational Practices
Curriculum Studies 3X
Curriculum Studies 3Y

**Year 4, Semester 2**
EDB005 Teaching and Learning Studies V: Professional Work of Teachers
EDB034 Secondary Field Studies IV: Professional Work of Teachers: Induction into Practice
EDB035 Internship (Secondary)
Education Elective

### Science Component

**Major in Physics (with Mathematics Studies)**

Replace one science unit (not Physics units) with MAB101 Statistical Data Analysis 1.
Optional - replace up to two other science units (not Physics units) with mathematics units from MAB210, MAB220 or Level 2 or Level 3 units.

**Mathematics Studies for Majors other than Mathematics or Physics**
The following four mathematics units should be included:
MAB100 Mathematical Sciences 1A
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
Up to two other mathematical units may also be selected.

**List 1: Curriculum Studies 1X & 1Y**
Prerequisite: Normally minimum of 24 credit points of relevant discipline
MDB021 Mathematics Curriculum Studies 1
MDB031 Science Education Curriculum Studies 1

**List 2: Curriculum Studies 2X & 2Y**
Prerequisites: Curriculum Studies 1X & 1Y
MDB010 Biology Curriculum Studies 2
MDB013 Chemistry Curriculum Studies 2
MDB019 Earth Science Curriculum Studies 2
MDB022 Mathematics Curriculum Studies 2
MDB025 Physics Curriculum Studies 2
MDB028 Science Curriculum Studies 2

**List 3: Curriculum Studies 3X & 3Y**
Prerequisites: Curriculum Studies 2X & 2Y
MDB023 Mathematics Curriculum Studies 3
MDB033 Science Education Curriculum Studies 3

### Bachelor of Applied Science/Bachelor of Information Technology IF29

**Award title:** Bachelor of Applied Science (Study Area A)/Bachelor of Information Technology

**CRICOS code:** 020327M

**Campus:** Gardens Point

**Duration:** 4 Years full-time

**Credit points:** 408 (Note: The minimum course load per semester required for full-time enrolment may be more than 36 credit points) (full-time standard semester: 48)

**Course coordinator:** Dr Megan Hargreaves (Science); Ruth Christie (InfTech)

### Professional Recognition

Graduates will satisfy the requirements for membership in the relevant professional body for their chosen science major. See the Bachelor of Applied Science (SC01) course for details. Graduates are also eligible for membership of the Australian Computer Society (ACS).

### Course Design

The science component of the course offers students a choice of one of eight majors: Biochemistry, Biotechnology, Chemistry, Ecology, Environmental Science, Forensic Science, Geoscience, Microbiology and Physics. See the
Bachelor of Applied Science (SC01) course information for more details. So that students can complete the double degree in a shorter period of time, co-majors are to be taken from the information technology program.

The information technology component gives students the opportunity to undertake a combined major in Data Communications and Software Engineering. Theoretical aspects are balanced by strong practical components in both of the science and information technology degrees.

Cooperative Education Program
An optional one-year period of paid work experience in an area of information technology is available to eligible full-time students. The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Companies that QUT’s Cooperative Education students have worked with include Energex, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

- Bachelor of Applied Science/Bachelor of Laws IF39

**Award title:** Bachelor of Applied Science (Study Area A)/Bachelor of Laws

**CRICOS code:** 012661G

**Campus:** Gardens Point

**Duration:** 5 Years full-time

**Credit points:** 528 (Note: The minimum course load per semester required for full-time enrolment may be more than 36 credit points) (full-time standard semester: 60 (years 1 and 4), 48 (years 2, 3 and 5))

**Course coordinator:** Dr Megan Hargreaves (Science); Director, Undergraduate Programs (Law)

**Course Design**

The course is designed to cover all major areas of the law as well as allowing students to choose any one of the science majors that are offered in the Bachelor of Applied Science (SC01) course.

To complete the double degree in a shorter period of time, the co-major will be taken from the law program therefore it is not possible for students to choose any of the co-majors listed under the Bachelor of Applied Science course.

**Professional Recognition**

Graduates will satisfy the requirements of membership in the relevant professional body for their chosen science major. See the Bachelor of Applied Science (SC01) course for details. The Bachelor of Laws component covers the areas of law required for admission as a legal practitioner and/or barrister in all Australian states and territories.

UNIVERSITY-WIDE AND INTERFACULTY COURSES

One of:
LSB509 Medical Biotechnology 1
LSB577 Plant Biotechnology 1

Year 3, Semester 2
LSB619 Genomics and Bioinformatics
LWB139 Select Issues in Torts
LWB239 Criminal Responsibility

One of:
LSB609 Medical Biotechnology 2
LSB677 Plant Biotechnology 2

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity
LWB332 Commercial and Personal Property Law
LWB333 Theories of Law

Year 4, Semester 2
LWB235 Australian Federal Constitutional Law
LWB237 Real Property B
LWB241 Trusts
LWB331 Administrative Law
LWB334 Corporate Law

Year 5, Semester 1
LWB431 Civil Procedure
LWB432 Evidence
LWB434 Advanced Research and Legal Reasoning
Elective Units *

Year 5, Semester 2
LWB433 Professional Responsibility
Elective Units *

Course Structure

Chemistry Major

Year 1, Semester 1
Introduction to Legal Research #
LSB118 Life Science
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice
PCB101 Physical Science
Either
PCB140 Introductory Chemistry
Or
PCB142 Chemistry 1

Year 1, Semester 2
LWB143 Legal Research and Writing
LWB144 Laws and Global Perspectives
MAB101 Statistical Data Analysis 1
PCB150 Physics 1H
PCB242 Chemistry 2

Year 2, Semester 1
LWB136 Contracts A
MAB100 Mathematical Sciences 1A
PCB334 Inorganic Chemistry
PCB354 Structure and Mechanism in Organic Chemistry

Year 2, Semester 2
LWB137 Contracts B
PCB405 Principles of Physical Chemistry
PCB414 Industrial and Environmental Analytical Chemistry
PCB444 Spectroscopy

Year 3, Semester 1
LWB138 Fundamentals of Torts
LWB238 Fundamentals of Criminal Law
PCB505 Advanced Physical Chemistry
PCB554 Synthesis and Reactivity in Organic Chemistry

Year 3, Semester 2
LWB139 Select Issues in Torts
LWB239 Criminal Responsibility
PCB634 Organometallic and Coordination Chemistry
PCB644 Frontiers in Chemistry

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity
LWB332 Commercial and Personal Property Law
LWB333 Theories of Law

Year 4, Semester 2
LWB235 Australian Federal Constitutional Law
LWB237 Real Property B
LWB241 Trusts
LWB331 Administrative Law

Year 5, Semester 1
LWB431 Civil Procedure
LWB432 Evidence
LWB434 Advanced Research and Legal Reasoning
Elective Units *

Year 5, Semester 2
LWB433 Professional Responsibility
Elective Units *

Ecology Major

Year 1, Semester 1
Introduction to Legal Research #
LSB118 Life Science
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice
NRB100 Environmental Science
PCB101 Physical Science

Year 1, Semester 2
LWB238 Cell and Molecular Biology 1
LWB143 Legal Research and Writing
LWB144 Laws and Global Perspectives
MAB101 Statistical Data Analysis 1
NRB270 Animal and Plant Structure and Function

Year 2, Semester 1
LWB136 Contracts A
NRB301 Earth Surface Systems
NRB311 Population Ecology
NRB370 Invertebrate Biology

Year 2, Semester 2
LWB137 Contracts B
NRB410 Genetics and Evolution
NRB412 Experimental Design
NRB470 Vertebrate Biology

Year 3, Semester 1
LWB138 Fundamentals of Torts
LWB238 Fundamentals of Criminal Law
NRB510 Population Genetics
NRB511 Population Management

Year 3, Semester 2
LWB139 Select Issues in Torts
LWB239 Criminal Responsibility
NRB610 Ecological Applications
NRB611 Conservation Biology

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity
LWB332 Commercial and Personal Property Law
LWB333 Theories of Law

Year 4, Semester 2
LWB235 Australian Federal Constitutional Law
LWB237 Real Property B
LWB241 Trusts
LWB331 Administrative Law
Course Structure

### Environmental Science Major

**Year 1, Semester 1**
- Introduction to Legal Research #
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- NRB100 Environmental Science
- NRB230 Planet Earth
- PCB101 Physical Science

**Year 2, Semester 1**
- LWB143 Legal Research and Writing
- LWB144 Laws and Global Perspectives
- MAB101 Statistical Data Analysis 1
- NRB240 History of Life on Earth
- PCB142 Chemistry 1

**Year 2, Semester 2**
- LWB136 Contracts A
- NRB301 Earth Surface Systems
- NRB311 Population Ecology
- NRB500 Environmental Systems and Modelling
- NRB601 Field Mapping and Monitoring of Natural Resources

**Year 3, Semester 1**
- LWB138 Fundamentals of Torts
- LWB238 Fundamentals of Criminal Law
- NRB500 Environmental Systems and Modelling
- NRB601 Field Mapping and Monitoring of Natural Resources

**Year 3, Semester 2**
- LWB139 Select Issues in Torts
- LWB239 Criminal Responsibility
- NRB501 Spatial Analysis of Environmental Systems
- NRB600 Sustainable Environmental Management

**Year 4, Semester 1**
- LWB231 Introduction to Public Law
- LWB236 Real Property A
- LWB240 Principles of Equity
- LWB332 Commercial and Personal Property Law
- LWB333 Theories of Law

**Year 4, Semester 2**
- LWB235 Australian Federal Constitutional Law
- LWB237 Real Property B
- LWB241 Trusts
- LWB331 Administrative Law
- LWB334 Corporate Law

**Year 5, Semester 1**
- LWB431 Civil Procedure
- LWB432 Evidence
- LWB434 Advanced Research and Legal Reasoning
- Elective Units *

**Year 5, Semester 2**
- LWB433 Professional Responsibility
- Elective Units *

### Forensic Science Major

**Year 1, Semester 1**
- LSB118 Life Science
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- Introduction to Legal Research
- PCB101 Physical Science

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
- LWB143 Legal Research and Writing
- LWB144 Laws and Global Perspectives
- MAB101 Statistical Data Analysis 1
- PCB242 Chemistry 2

**Year 2, Semester 1**
- LSB336 Cell and Molecular Biology 2
- LWB136 Contracts A
- PCB354 Structure and Mechanism in Organic Chemistry
- SCB384 Forensic Science

**Year 2, Semester 2**
- LSB684 Forensic DNA Profiling
- LWB139 Select Issues in Torts
- LWB239 Criminal Responsibility
- PCB684 Forensic Analysis and Toxicology

**Year 3, Semester 1**
- LSB468 Molecular Biology
- LWB138 Fundamentals of Torts
- LWB238 Fundamentals of Criminal Law
- PCB514 Instrumental Analysis
- PCB584 Forensic Examination of Physical Evidence

**Year 3, Semester 2**
- LSB937 Forensic Scientific Evidence
- LSB137 Contracts B
- PCB414 Industrial and Environmental Analytical Chemistry

**Year 4, Semester 1**
- LSB231 Introduction to Public Law
- LSB236 Real Property A
- LSB240 Principles of Equity
- LSB332 Commercial and Personal Property Law
- LSB333 Theories of Law

**Year 4, Semester 2**
- LSB235 Australian Federal Constitutional Law
- LSB237 Real Property B
- LSB241 Trusts
- LSB331 Administrative Law
- LSB334 Corporate Law

**Year 5, Semester 1**
- LSB431 Civil Procedure
- LSB432 Evidence
- LSB434 Advanced Research and Legal Reasoning
- Elective Units

**Year 5, Semester 2**
- LSB433 Professional Responsibility
- Elective Units

### Geoscience Major

**Year 1, Semester 1**
- Introduction to Legal Research #
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- NRB100 Environmental Science
- NRB230 Planet Earth
- PCB101 Physical Science

**Year 1, Semester 2**
- LWB431 Civil Procedure
- LWB432 Evidence
- LWB434 Advanced Research and Legal Reasoning
- Elective Units *

**Year 5, Semester 2**
- LSB433 Professional Responsibility
- Elective Units

Mathematics Major [WITHOUT Mathematics C from Senior]

**Year 1, Semester 1**
- Introduction to Legal Research #
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- MAB100 Mathematical Sciences 1A
- MAB101 Statistical Data Analysis 1

**Year 1, Semester 2**
- LWB143 Legal Research and Writing
- LWB144 Laws and Global Perspectives
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C
- MAB210 Statistical Modelling 1

**Year 2, Semester 1**
- LWB136 Contracts A
- MAB220 Computational Mathematics 1
  One Science unit - selected from:
  - LSB118 Life Science
  - NRB100 Environmental Science
  - PCB101 Physical Science
- Two Level 2 Mathematics units* - available units are:
  - MAB311 Advanced Calculus
  - MAB312 Linear Algebra
  - MAB313 Mathematics of Finance
  - MAB314 Statistical Modelling 2
  * Students must complete at least one of MAB311, MAB312, MAB413

**Year 2, Semester 2**
- LWB137 Contracts B
- One Science unit - selected from:
  - LSB118 Life Science
  - PCB101 Physical Science
- Two Level 2 Mathematics units* - available units are:
  - MAB315 Operations Research 2
  - MAB413 Differential Equations
  - MAB414 Applied Statistics 2
  - MAB420 Computational Mathematics 2
  - MAB422 Mathematical Modelling
  - MAB480 Introduction to Scientific Computation
  * Students must complete at least one of MAB311, MAB312, MAB413

**Year 3, Semester 1**
- LWB138 Fundamentals of Torts
- LWB238 Fundamentals of Criminal Law
- Two Level 3 Mathematics units - available units are:
  - MAB521 Applied Mathematics 3
  - MAB522 Computational Mathematics 3
  - MAB523 Introduction to Quality Management
  - MAB525 Operations Research 3A
  - MAB526 Statistical Science 3
  - MAB672 Advanced Mathematical Modelling

**Year 3, Semester 2**
- LWB139 Select Issues in Torts
- LWB239 Criminal Responsibility
- Two Level 3 Mathematics units - available units are:
  - MAB524 Statistical Inference
  - MAB613 Partial Differential Equations
  - MAB621 Discrete Mathematics
  - MAB623 Financial Mathematics
  - MAB624 Applied Statistics 3
  - MAB625 Operations Research 3B

**Year 4, Semester 1**
- LWB231 Introduction to Public Law
- LWB236 Real Property A
- LWB240 Principles of Equity
- LWB332 Commercial and Personal Property Law
- LWB333 Theories of Law

**Year 4, Semester 2**
- LWB235 Australian Federal Constitutional Law
- LWB237 Real Property B
- LWB241 Trusts

Microbiology Major

**Year 1, Semester 1**
- Introduction to Legal Research #
- LSB118 Life Science
- LWB141 Legal Institutions and Method
- LWB142 Law, Society and Justice
- PCB101 Physical Science
- Either
  - PCB140 Introductory Chemistry
  - Or
  - PCB142 Chemistry 1

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
- LWB143 Legal Research and Writing
- LWB144 Laws and Global Perspectives
- MAB101 Statistical Data Analysis 1
- Either
  - PCB242 Chemistry 2

**Year 2, Semester 1**
- LSB308 Biochemistry
- LSB328 Microbiology 1
- LSB338 Cell and Molecular Biology 2
- LWB136 Contracts A

**Year 2, Semester 2**
- LSB408 Metabolism
- LSB428 Microbiology 2
- LSB468 Molecular Biology
- LWB137 Contracts B

**Year 3, Semester 1**
- LSB528 Environmental Microbiology
- LSB547 Bacterial Pathogenesis and Disease Diagnosis
- LSB568 Electron Microscopy
- LSB578 Virology

**Year 3, Semester 2**
- LSB138 Fundamentals of Torts
- LSB238 Fundamentals of Criminal Law
- Two Level 3 units from the following:
  - LSB528 Environmental Microbiology
  - LSB547 Bacterial Pathogenesis and Disease Diagnosis
  - LSB568 Electron Microscopy
  - LSB578 Virology

**Year 4, Semester 1**
- LWB231 Introduction to Public Law
- LWB236 Real Property A
- LWB240 Principles of Equity
- LWB332 Commercial and Personal Property Law
- LWB333 Theories of Law

**Year 4, Semester 2**
- LWB235 Australian Federal Constitutional Law
- LWB237 Real Property B
- LWB241 Trusts
LWB331 Administrative Law
LWB334 Corporate Law

Year 5, Semester 1
LWB431 Civil Procedure
LWB432 Evidence
LWB434 Advanced Research and Legal Reasoning
Elective Units*

Year 5, Semester 2
LWB433 Professional Responsibility
Elective Units*

Course Structure

Physics Major
Year 1, Semester 1
Introduction to Legal Research #
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice
MAB111 Mathematical Sciences 1B
PCB101 Physical Science
PCB107 Physics and Quantitative Techniques

Year 1, Semester 2
LWB143 Legal Research and Writing
LWB144 Laws and Global Perspectives
MAB112 Mathematical Sciences 1C
PCB250 Physics 1
PCB260 Physics 1A

Year 2, Semester 1
LWB136 Contracts A
MAB311 Advanced Calculus
PCB361 AC Theory and Electronics
PCB362 Physics 2

Year 2, Semester 2
LWB137 Contracts B
PCB460 Instrumentation and Computational Methods
PCB462 Thermodynamics and Solid State Physics
SCB222 Exploration of the Universe

Year 3, Semester 1
LWB138 Fundamentals of Torts
LWB238 Fundamentals of Criminal Law
PCB561 Quantum and Condensed Matter Physics
PCB562 Physical Methods of Analysis

Year 3, Semester 2
LWB139 Select Issues in Torts
LWB239 Criminal Responsibility
PCB661 Experimental Physics
PCB665 Physics 3

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity
LWB332 Commercial and Personal Property Law
LWB333 Theories of Law

Year 4, Semester 2
LWB235 Australian Federal Constitutional Law
LWB237 Real Property B
LWB241 Trusts
LWB331 Administrative Law
LWB334 Corporate Law

Year 5, Semester 1

LWB432 Evidence
LWB434 Advanced Research and Legal Reasoning
Elective Units*

Year 5, Semester 2
LWB433 Professional Responsibility
Elective Units*

Footnotes for Law Units

# Introduction to Legal Research is a two (2) hour lecture conducted in the first week only of Semester 1, 2004. It is designed to introduce students to the basics of legal research and provide an orientation to use of the Law Library. Students will be expected to undertake a library exercise in LWB141 Legal Institutions and Method using the skills and information outlined in this lecture.

* Law Elective Units - In order to satisfy the requirements for the Bachelor of Laws component of the double degree, a student is required to complete a total of 48 credit points of elective units.

Bachelor of Arts/Bachelor of Applied Science IF86

Award title: Bachelor of Arts/Bachelor of Applied Science (Study Area A)
CRICOS code: 031581F
Campus: Gardens Point and Carseldine
Duration: 4 Years full-time
Credit points: 384 (192 cp in the Bachelor of Arts and 192 cp in the Bachelor of Applied Science) (full-time standard semester: 48)

Course coordinator: Dr John Synott (Humanities); Dr Megan Hargreaves (Science)

Course Design

A feature of the course design is the flexibility and choice it offers. Students can tailor the double degree to their career interests by combining any one of the 10 majors that are available in the Bachelor of Applied Science (SC01) degree with a specialisation chosen from a wide range of offerings in the humanities.

To allow students to complete the double degree in a shorter period of time, co-majors are to be taken from the arts program. The program is integrated so that students will study both science and humanities units in each semester.

Professional Recognition

As this double degree meets requirements for the award of the component degrees, the award is recognised by professional bodies in both Arts and Science. Relevant professional bodies for the Bachelor of Applied Science (SC01) are listed under the separate entry for the course. Eligibility for membership depends on the majors undertaken.

Bachelor of Arts Course Requirements - Commencing Students

Students are required to complete:
- One Interdisciplinary Professional Major (1 core unit + 6 units in the major)

It is suggested that students complete the Core Units Program consisting of the following:
- Two core units in first semester (from a selection of core introductory and core skills units)

(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)
- Year Two: research methods unit. Students are advised to take at least two of these units.

In making these decisions, students should consider the structure of the Discipline Studies Sequences and/or Minors they may be planning to undertake. (see below)

Students must maintain a minimum of 50% enrolment in units from the BA program until they have completed eight of these units (96 credit points)

Students may wish to
• develop a Minor (48 credit points) in one of the interdisciplinary professional areas
• develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course
• take a series of elective units

Students wishing to complete a full discipline studies sequence (6 units) will need to amend their core units program.

Students planning to complete a full Language sequence (6 units) will need to discuss their program with the relevant Course Coordinator in order to ensure that they begin their Language studies in first semester and that their language units can be continued into their third year.

Note: Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units i.e. HHB coded units.

Bachelor of Arts Course requirements - Continuing Students

YEARS 1 and 2
• Students are required to complete 8 units including:
  • HHB116 Applied Skills and Scholarship
  • Two Foundation Units (if students have not already completed two Faculty Foundation Units as part of the BA component of the student course)
  • Two to three Course Foundation Units
  • Two to three Elective Units

Note: A minimum of 4 of these 8 units must be chosen from units in the BA component of the double degree i.e. HHB coded units).

YEARS 3 and 4
Students are required to do a further 8 units to complete:
• One Major Study Sequence from those offered in the BA component, and
• One Minor Study Sequence chosen from those offered in the BA component (i.e. HHB coded units) or from other Minor Study Sequences offered elsewhere within QUT.

Note: A minimum of 12 of the 16 units must be chosen from units in the BA.

Interdisciplinary Professional Majors
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Discipline Sequences
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Minor Study Sequences
For details, refer to the Co-Majors list in the Bachelor of Arts (HH01) entry in the Humanities and Human Services section as these co-majors are able to be taken as Minors.

Bachelor of Applied Science Course Requirements
Students are required to complete:
• At least six Faculty of Science Core Units, including at least three Foundation units in schedule 1 of the Bachelor of Applied Science course SC01.
• A major (Biochemistry, Biotechnology, Chemistry, Ecology, Environmental Science, Forensic Science, Geoscience, Mathematics, Microbiology, Physics).

Students are required to attend an academic advising session to discuss and enrol in their Bachelor of Applied Science program of study.

Example of Full-time Course Structure for Commencing Students

Year 1, Semester 1
Core Arts unit (major)
Core Arts unit (major)
Two Science units (SC01 Level 1): Foundation units

Year 1, Semester 2
Arts Major unit
Arts Major unit
Two Science units (SC01 Level 1): at least one Foundation unit

Year 2, Semester 1
Core Arts unit (major or skills)
Core Arts unit (major or skills)
Two Science units (SC01 Levels 1 and 2: Level 2 from Major)

Year 2, Semester 2
Arts Major unit
Arts Minor unit
Two Science Units (SC01 Levels 1 and 2: Level 2 from Major)

Year 3, Semester 1
Arts Major unit
Arts Minor unit
Two Science Major units (SC01 Level 2)

Year 3, Semester 2
Arts Minor unit
Core Arts unit (research methods)
Two Science Major units (SC01 Level 3)

Year 4, Semester 1
Arts Major unit
Arts Minor unit
Two Science Major units (SC01 Level 3)

Year 4, Semester 2
Arts Major unit
Arts Minor unit
Two Science Major units (SC01 Level 3)

CORE PROGRAM - BA Students
This core program for the degree consists of the following selection of units:

First Year Core: Core Units for Professional Majors
INTERNATIONAL AND GLOBAL STUDIES
HHB110 Introduction To International And Global Studies
HHB111

SOCIETY AND CHANGE
HHB105 Exploring Change
HHB104 Understanding Society: Introduction to Sociology

ETHICS AND HUMAN RIGHTS
HHB114 Introduction To Human Rights And Ethics
HHB115 Human Identity And Change

COMMUNITY STUDIES
HHB103 Contemporary Social And Community Issues
HHB102 The Human Condition

AUSTRALIAN STUDIES
HHB106 Australian Society And Culture
HHB112 Australian Politics
First Year Core: Skills Units
HHB116 Applied Skills And Scholarship
HHB117 Introduction To Social Research Methods

Second Year Core: Research Methods
HHB224 Qualitative Research Methods
HHB232 Survey Methods
HHB121 Interpreting The Past
HHB312 Geographical Research Design
### Course Structure

#### Biochemistry Major

**Year 1, Semester 1**
- LSB118 Life Science
- PCB101 Physical Science

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
  - Either PCB140 Introductory Chemistry
  - Or PCB142 Chemistry 1

**Year 2, Semester 1**
- MAB101 Statistical Data Analysis 1
- PCB242 Chemistry 2

**Year 2, Semester 2**
- LSB258 Principles of Human Physiology
- NRB270 Animal and Plant Structure and Function

**Year 3, Semester 1**
- LSB308 Biochemistry
- LSB338 Cell and Molecular Biology 2

**Year 3, Semester 2**
- LSB408 Metabolism
- LSB468 Molecular Biology

**Year 4, Semester 1**
- LSB508 Advanced Metabolism
- LSB527 Biomedical Research Technologies

**Year 4, Semester 2**
- LSB607 Protein Purification
- LSB608 Protein Science

#### Biotechnology Major

**Year 1, Semester 1**

- PCB101 Physical Science

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
  - Either PCB140 Introductory Chemistry
  - Or PCB142 Chemistry 1

**Year 2, Semester 1**
- MAB101 Statistical Data Analysis 1
- PCB242 Chemistry 2

**Year 2, Semester 2**
- LSB258 Principles of Human Physiology
- NRB270 Animal and Plant Structure and Function

**Year 3, Semester 1**
- LSB308 Biochemistry
- LSB338 Cell and Molecular Biology 2

**Year 3, Semester 2**
- LSB408 Metabolism
- LSB468 Molecular Biology

**Year 4, Semester 1**
- LSB508 Advanced Metabolism
- LSB527 Biomedical Research Technologies

**Year 4, Semester 2**
- LSB607 Protein Purification
- LSB608 Protein Science

#### Chemistry Major

**Year 1, Semester 1**
- MAB100 Mathematical Sciences 1A
- PCB101 Physical Science

**Year 1, Semester 2**
- PCB142 Chemistry 1
- PCB260 Physics 1A

**Year 2, Semester 1**
- NRB100 Environmental Science
- PCB242 Chemistry 2

**Year 2, Semester 2**
- MAB101 Statistical Data Analysis 1
- PCB150 Physics 1H

**Year 3, Semester 1**
- PCB334 Inorganic Chemistry
- PCB354 Structure and Mechanism in Organic Chemistry

**Year 3, Semester 2**
- PCB405 Principles of Physical Chemistry
- PCB444 Spectroscopy

**Year 4, Semester 1**
- PCB505 Advanced Physical Chemistry
- PCB554 Synthesis and Reactivity in Organic Chemistry

**Year 4, Semester 2**
- PCB634 Organometallic and Coordination Chemistry

#### Ecology Major

**Year 1, Semester 1**
- LSB118 Life Science
- NRB100 Environmental Science

**Year 1, Semester 2**
- LSB238 Cell and Molecular Biology 1
- NRB270 Animal and Plant Structure and Function

**Year 2, Semester 1**
- NRB370 Invertebrate Biology

**Year 2, Semester 2**
- MAB101 Statistical Data Analysis 1
- NRB470 Vertebrate Biology

**Year 3, Semester 1**
- NRB301 Earth Surface Systems
- NRB311 Population Ecology

**Year 3, Semester 2**
- NRB410 Genetics and Evolution
- NRB412 Experimental Design

**Year 4, Semester 1**
- NRB510 Population Genetics
- NRB511 Population Management

**Year 4, Semester 2**
- NRB610 Ecological Applications
- NRB611 Conservation Biology

#### Environmental Science Major

**Year 1, Semester 1**
- NRB100 Environmental Science
- PCB101 Physical Science

**Year 1, Semester 2**
- LSB118 Life Science
- NRB240 History of Life on Earth

**Year 2, Semester 1**
- MAB101 Statistical Data Analysis 1
- NRB230 Planet Earth

**Year 2, Semester 2**
- NRB270 Animal and Plant Structure and Function
  - Either PCB140 Introductory Chemistry
  - Or PCB142 Chemistry 1

**Year 3, Semester 1**
- NRB301 Earth Surface Systems
- NRB311 Population Ecology

**Year 3, Semester 2**
- NRB410 Genetics and Evolution
- NRB412 Experimental Design

**Year 4, Semester 1**
- NRB510 Population Genetics
- NRB511 Population Management

**Year 4, Semester 2**
- NRB610 Ecological Applications
- NRB611 Conservation Biology
PCB142 Chemistry 1  
**Year 3, Semester 1**  
NRB301 Earth Surface Systems  
NRB311 Population Ecology  
**Year 3, Semester 2**  
NRB412 Experimental Design  
NRB440 Environmental Chemistry  
**Year 4, Semester 1**  
NRB500 Environmental Systems andModelling  
NRB572 Terrestrial Ecosystems  
**Year 4, Semester 2**  
NRB600 Sustainable Environmental Management  
NRB672 Marine and Freshwater Ecosystems

Course Structure

**Forensic Science Major**  
**Year 1, Semester 1**  
LSB118 Life Science  
PCB101 Physical Science  
**Year 1, Semester 2**  
MAB101 Statistical Data Analysis 1  
Either  
PCB140 Introductory Chemistry  
Or  
PCB142 Chemistry 1  
**Year 2, Semester 1**  
MAB100 Mathematical Sciences 1A  
PCB242 Chemistry 2  
**Year 2, Semester 2**  
LSB238 Cell and Molecular Biology 1  
NRB270 Animal and Plant Structure and Function  
**Year 3, Semester 1**  
LSB468 Molecular Biology  
SCB384 Forensic Science  
**Year 3, Semester 2**  
JSB937 Forensic Scientific Evidence  
PCB414 Industrial and Environmental Analytical Chemistry  
**Year 4, Semester 1**  
PCB514 Instrumental Analysis  
PCB584 Forensic Examination of Physical Evidence  
**Year 4, Semester 2**  
LSB684 Forensic DNA Profiling  
PCB684 Forensic Analysis and Toxicology

Course Structure

**Geoscience Major**  
**Year 1, Semester 1**  
MAB100 Mathematical Sciences 1A  
NRB230 Planet Earth  
**Year 1, Semester 2**  
MAB101 Statistical Data Analysis 1  
PCB101 Physical Science  
**Year 2, Semester 1**  
NRB100 Environmental Science  
Either  
PCB140 Introductory Chemistry  
Or  
PCB142 Chemistry 1  
**Year 2, Semester 2**  
NRB240 History of Life on Earth  
NRB440 Environmental Chemistry  
**Year 3, Semester 1**  
NRB331 Sedimentary Geology  
NRB333 Mineralogy  
**Year 3, Semester 2**  
NRB434 Structural Geology  
NRB436 Introduction to Igneous and Metamorphic Petrol-
ogy  
**Year 4, Semester 1**  
NRB534 Geophysics  
NRB536 Petrology and Geochemistry  
**Year 4, Semester 2**  
NRB601 Field Mapping and Monitoring of Natural Re-
sources  
One unit from:  
NRB633 Hydrogeology  
NRB635 Plate Tectonics and Advanced Structural Geology  
NRB636 Stratigraphy and Basin Analysis

Course Structure

**Mathematics Major (WITH Mathematics C from Senior)**  
**Year 1, Semester 1**  
MAB101 Statistical Data Analysis 1  
MAB111 Mathematical Sciences 1B  
**Year 1, Semester 2**  
MAB112 Mathematical Sciences 1C  
MAB210 Statistical Modelling 1  
**Year 2, Semester 1**  
MAB220 Computational Mathematics 1  
One Science unit - selected from:  
LSB118 Life Science  
NRB100 Environmental Science  
PCB101 Physical Science  
**Year 2, Semester 2**  
Science elective unit  
One Science unit - selected from:  
LSB118 Life Science  
PCB101 Physical Science  
**Year 3, Semester 1**  
Two Level 2 Mathematics units* - available units are:  
MAB311 Advanced Calculus  
MAB312 Linear Algebra  
MAB313 Mathematics of Finance  
MAB314 Statistical Modelling 2  
* Students must complete at least one of MAB311, 
MAB312, MAB413  
**Year 3, Semester 2**  
Two Level 2 Mathematics units* - available units are:  
MAB315 Operations Research 2  
MAB413 Differential Equations  
MAB414 Applied Statistics 2  
MAB420 Computational Mathematics 2  
MAB422 Mathematical Modelling  
MAB480 Introduction to Scientific Computation  
* Students must complete at least one of MAB311, 
MAB312, MAB413  
**Year 4, Semester 1**  
Two Level 3 Mathematics units - available units are:  
MAB521 Applied Mathematics 3  
MAB522 Computational Mathematics 3  
MAB523 Introduction to Quality Management  
MAB525 Operations Research 3A  
MAB526 Statistical Science 3  
MAB672 Advanced Mathematical Modelling  
**Year 4, Semester 2**  
Two Level 3 Mathematics units - available units are  
MAB524 Statistical Inference  
MAB613 Partial Differential Equations  
MAB621 Discrete Mathematics  
MAB623 Financial Mathematics  
MAB624 Applied Statistics 3  
MAB625 Operations Research 3B
Course Structure

Mathematics Major (WITHOUT Mathematics C from Senior)

Year 1, Semester 1
- MAB100 Mathematical Sciences 1A
- MAB101 Statistical Data Analysis 1

Year 1, Semester 2
- MAB111 Mathematical Sciences 1B
- MAB112 Mathematical Sciences 1C

Year 2, Semester 1
- MAB220 Computational Mathematics 1
One Science unit - selected from:
  - LSB118 Life Science
  - NRB100 Environmental Science
  - PCB101 Physical Science

Year 2, Semester 2
- MAB210 Statistical Modelling 1
One Science unit - selected from:
  - LSB118 Life Science
  - PCB101 Physical Science

Year 3, Semester 1
Two Level 2 Mathematics units* - available units are:
- MAB311 Advanced Calculus
- MAB312 Linear Algebra
- MAB313 Mathematics of Finance
- MAB314 Statistical Modelling 2
* Students must complete at least one of MAB311, MAB312, MAB413

Year 3, Semester 2
Two Level 2 Mathematics units* - available units are:
- MAB315 Operations Research 2
- MAB413 Differential Equations
- MAB414 Applied Statistics 2
- MAB420 Computational Mathematics 2
- MAB422 Mathematical Modelling
- MAB480 Introduction to Scientific Computation
* Students must complete at least one of MAB311, MAB312, MAB413

Year 4, Semester 1
Two Level 3 Mathematics units - available units are:
- MAB521 Applied Mathematics 3
- MAB522 Computational Mathematics 3
- MAB523 Introduction to Quality Management
- MAB525 Operations Research 3A
- MAB526 Statistical Science 3
- MAB672 Advanced Mathematical Modelling

Year 4, Semester 2
Two Level 3 Mathematics units - available units are:
- MAB524 Statistical Inference
- MAB613 Partial Differential Equations
- MAB621 Discrete Mathematics
- MAB623 Financial Mathematics
- MAB624 Applied Statistics 3
- MAB625 Operations Research 3B

Course Structure

Microbiology Major

Year 1, Semester 1
- LSB118 Life Science
- PCB101 Physical Science
- NRB100 Environmental Science

Year 1, Semester 2
- LSB238 Cell and Molecular Biology 1
  Either
  - PCB140 Introductory Chemistry

Bachelor of Arts/Bachelor of Behavioural Science (Psychology) IF12

Award title: Bachelor of Arts/Bachelor of Behavioural Science (Psychology)
Campus: Carseldine
Duration: 4 years full-time
Credit points: full-time standard semester: 48

Recommended Study
Maths A, B or C is recommended.

Course Structure - Overview

Year 1, Semester 1
Major in the Bachelor of Arts - International and Global Studies

**Introductory Units**
HHB110 Introduction To International And Global Studies
HHB111 Issues In International And Global Studies

**Strand A - Global Perspectives**
HHB107 World Regions
HHB122 Colonialism And Independence In Asia Pacific
HHB226 Consuming Cultures
HHB223 Islam and Islamic Societies
HHB241 Gender and Globalisation
HHB248 The USA and The Asia Pacific Region
HHB263 Politics Of Globalisation
HHB269 Ethics, Technology And The Environment
HHB310 Globalisation And Social Theory
HHB311 Colonial Fantasies And Postcolonial Identities
HHB315 Sex And Drugs In South-East Asia
HHB331 Advanced Seminar

**Strand B - International Studies**
HHB229 Windows On Japan
HHB238 Asian Cultures And Societies
HHB239 Korean Culture And Societies
HHB243 The Pacific Since 1945
HHB244 Southeast Asia In Focus
HHB245 Australia And The South Pacific
HHB246 Modern China
HHB256 Europe Since 1945
HHB260 Nations And Nationalism In Modern Europe

**Major in the Bachelor of Arts - Society and Change**
HHB104 Understanding Society: Intro To Sociology
HHB105 Exploring Change

**Strand A - The Individual and Society**
HHB102 The Human Condition
HHB113 Interpersonal Communication
HHB215 Crisis And Conflict Resolution
HHB225 Political Sociology
HHB230 Political Behaviour
HHB233 Sex, Gender And Society
HHB234 Sociological Theory
HHB236 Virgins, Saints And Sinners: Sociology Of Religion
HHB240 Sociology Of Crime And Deviance
HHB268 Vulnerable Identities
HHB335 Bodies, Cyborgs and Cyberspace

**Strand B - Environment, Society and Change**
HHB127 Environment And Society
HHB210 Indigenous Australia: Country, Kin And Culture
HHB226 Consuming Cultures
HHB228 Environmental Hazards
HHB231 Health, Society And Environment
HHB251 Australian Resource Management

**Strand C - Societies in Transition**
HHB242 Pacific Culture Contact
HHB249 Social Movements In Australia
HHB253 Conspiracy And Dissent In Australian History
HHB257 The Classical World
HHB258 Foundations of Modern Europe
HHB259 War And Revolution In Europe 1914-1945
HHB261 Medieval Europe
HHB262 Political Ideologies
HHB315 Sex And Drugs In South-East Asia

**Change Management and Project Units**
HHB212 Community Work
HHB213 Social Policy Processes
HHB214 Team Practice and Group Processes
HHB329 Advanced Project
Major in the Bachelor of Arts - Ethics and Human Rights

**Introductory Units**
HHB114 Introduction To Human Rights And Ethics
HHB115 Human Identity And Change

**Strand A - Ethical Understanding and Theory**
HHB265 The Just Society
HHB267 Feminism And Ethics
HHB271 Ethical Theory

**Strand B - Human Rights**
HHB274 Human Rights: International And Regional Activism
HHB275 Human Rights: Australian Activism

**Strand C - Identity Studies**
HHB268 Vulnerable Identities
HHB272 Composing Identities: The Artistry Of Living

**Strand D - Ethics and Technology**
HHB260 Nations And Nationalism In Modern Europe
HHB270 Gene Technology And Ethics
HHB273 Reshaping Life And Death

**Strand E - Ethical Practice**
HHB264 Public And Professional Ethics
HHB266 Ethical Decision Making
HHB328 Researching Applied Ethics

Major in the Bachelor of Arts - Community Studies

**Introductory Units**
HHB106 Australian Society And Culture
HHB113 Contemporary Social And Community Issues

**Community Studies**
HHB100 Introduction To Human Services
HHB113 Interpersonal Communication
HHB203 Aged Services: Introduction
HHB204 Child And Family Services: Introduction
HHB205 Corrective Services: Introduction
HHB206 Disability Services: Introduction
HHB207 Services To Young People: Introduction
HHB212 Community Work
HHB214 Team Practice and Group Processes
HHB215 Crisis And Conflict Resolution
HHB216 The Human Dimensions Of Space
HHB319 Child Protection Intervention Skills

Major in the Bachelor of Arts - Australian Studies

**Introductory Units**
HHB106 Australian Society And Culture
HHB112 Australian Politics

**Additional Units**
HHB109 Australian Historical Studies
HHB123 Indigenous Australian Culture Studies
HHB210 Indigenous Australia: Country, Kin And Culture
HHB237 Brisbane in the Twentieth Century
HHB245 Australia And The South Pacific
HHB249 Social Movements In Australia
HHB250 Australian Geographical Studies
HHB251 Australian Resource Management
HHB253 Conspiracy And Dissent In Australian History
HHB255 Indigenous Politics And Political Culture
HHB275 Human Rights: Australian Activism

**Discipline Major - Geography and Environmental Studies**

**Introductory Units**
HHB107 World Regions
HHB127 Environment And Society

**Elective Units**

**Environment and Resources**
HHB228 Environmental Hazards
HHB251 Australian Resource Management
HHB269 Ethics, Technology And The Environment

**Regional Studies**
HHB229 Windows On Japan
HHB244 Southeast Asia In Focus
HHB250 Australian Geographical Studies

**Other Geography Electives**
HHB312 Geographical Research Design
HHB232 Survey Methods
NRR100 Environmental Science
NRR501 Spatial Analysis of Environmental Systems
PSB443 Population and Urban Studies
PSB631 Geographic Information Systems 1
PSB655 Remote Sensing

**Discipline Major - History**

**Introductory Units**
HHB109 Australian Historical Studies
HHB121

**Elective Units**

**Modern Histories**
HHB122 Colonialism And Independence In Asia Pacific
HHB237 Brisbane in the Twentieth Century
HHB238 Asian Cultures And Societies
HHB239 Korean Culture And Societies
HHB242 Pacific Culture Contact
HHB243 The Pacific Since 1945
HHB245 Australia And The South Pacific
HHB246 Modern China
HHB248 The USA and The Asia Pacific Region
HHB253 Conspiracy And Dissent In Australian History
HHB256 Europe Since 1945
HHB259 War And Revolution In Europe 1914-1945
HHB260 Nations And Nationalism In Modern Europe
HHB311 Colonial Fantasies And Postcolonial Identities
HHB315 Sex And Drugs In South-East Asia

**Pre-Modern Histories**
HHB257 The Classical World
HHB258 Foundations of Modern Europe
HHB261 Medieval Europe

**Discipline Major - Languages**

**French**
SIX SEQUENCED UNITS FROM THE FOLLOWING:
HHB061 French 1
HHB062 French 2
HHB063 French 3
HHB064 French 4
HHB065 French 5
HHB066 French 6
HHB067 French 7
HHB068 French 8
HHB069 French 9
HHB070 French 10
HHB060 French For The Tourism Industry

**German**
SIX SEQUENCED UNITS FROM THE FOLLOWING:
HHB091 German 1
HHB092 German 2
HHB093 German 3
HHB094 German 4
UNIVERSITY-WIDE AND INTERFACULTY COURSES

HHB095 German 5
HHB096 German 6
HHB097 German 7
HHB098 German 8

Indonesian
SIX SEQUENCED UNITS FROM THE FOLLOWING:
HHB071 Indonesian 1
HHB072 Indonesian 2
HHB073 Indonesian 3
HHB074 Indonesian 4
HHB075 Indonesian 5
HHB076 Indonesian 6
HHB077 Indonesian 7
HHB078 Indonesian 8

Japanese
SIX SEQUENCED UNITS FROM THE FOLLOWING:
HHB081 Japanese 1
HHB082 Japanese 2
HHB083 Japanese 3
HHB084 Japanese 4
HHB085 Japanese 5
HHB086 Japanese 6
HHB087 Japanese 7
HHB088 Japanese 8

Mandarin
HHB050 Mandarin For Chinese
HHB051 Introductory Mandarin 1
HHB052 Introductory Mandarin 2
HHB053 Intermediate Mandarin
HHB054 Advanced Mandarin

Overseas Units - All Languages
HHB056 International Intensive Program
HHB057 International Summer School Or Equivalent
HHB058 In-Country Study - A
HHB059 In-Country Study - B

Discipline Major - Social Science

Sociology
Introductory Unit
HHB104 Understanding Society: Intro To Sociology

Elective Units
HHB216 The Human Dimensions Of Space
HHB223 Islam and Islamic Societies
HHB224 Qualitative Research Methods
HHB225 Political Sociology
HHB226 Consuming Cultures
HHB231 Health, Society And Environment
HHB232 Survey Methods
HHB233 Sex, Gender And Society
HHB234 Sociological Theory
HHB236 Virgins, Saints And Sinners: Sociology Of Religion
HHB240 Sociology Of Crime And Deviance
HHB310 Globalisation And Social Theory
HHB335 Bodies, Cyborgs and Cyberspace

Political Studies
Introductory Unit
HHB112 Australian Politics

Elective Units
HHB213 Social Policy Processes
HHB224 Qualitative Research Methods
HHB225 Political Sociology
HHB230 Political Behaviour
HHB232 Survey Methods
HHB249 Social Movements In Australia
HHB255 Indigenous Politics And Political Culture
HHB262 Political Ideologies
HHB263 Politics Of Globalisation
HHB265 The Just Society

Bachelor of Arts/Bachelor of Business (Accountancy, Banking and Finance, Economics or Marketing) IF30

Award title: Bachelor of Arts/Bachelor of Business (Study Area A)
CRICOS code: 037539D
Campus: Gardens Point and Carseldine
Duration: 4.5 years (9 semesters) full-time
Credit points: 432 (192 cp in Arts and 240 cp in Business) (full-time standard semester: 48)
Course coordinator: Dr John Synott (Humanities and Human Services); Mr Andrew Paltridge (Business)
Discipline coordinator: Ms Ros Kent (Accountancy); Mr Bill Proud (Marketing); Dr Adam Clements (Banking & Finance) and Dr Radhika Lahiri (Economics)

Other Majors
See also the separate entry for the following majors in this course: Bachelor of Arts/Bachelor of Business (Advertising, Electronic Business, Human Resource Management, International Business, Management, or Public Relations).

Professional Recognition
The Bachelor of Business degree may, subject to choice of major, extended major, or specialisation, allow graduates to satisfy the academic requirements for membership as follows:
• All majors: Chartered Secretaries Australia (CSA) - enrolment in the Graduate Diploma in Applied Corporate Governance.
• Accountancy: CPA Australia (associate membership & enrolment in the CPA Program), Institute of Chartered Accountants in Australia (ICAA)(enrolment in the CA Program).
• Banking and Finance: Australasian Institute of Banking and Finance (AIBF).
• Economics: Economic Society of Australia (Queensland Division).

Course Design
Students are required to complete 432 credit points comprised of 192 credit points from the Bachelor of Arts program and 240 credit points from the Bachelor of Business program.

BA Course Requirements - Commencing Students

Years 1-4
Students are required to complete:
• One Interdisciplinary Professional Major (1 core unit + 6 units in the major)
It is suggested that they complete the Core Units Program consisting of the following:
• Two core units in first semester (from a selection of core introductory and core skills units)
(Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major).
• Year 2: research methods unit. Students are advised to take at least two of these units.
Students must maintain a minimum of 50% enrolment in units from the BA program until they have completed eight of these units (96 credit points).

Students may wish to:
• develop a Minor (48 credit points) in one of the interdisciplinary professional areas
• develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course
• take a series of elective units.

Students wishing to complete a full discipline studies sequence (6 units) will need to amend their core units program.

Students planning to complete a full Language sequence (6 units) will need to discuss their program with the relevant Course Coordinator in order to ensure that they begin their Language studies in first semester and that their language units can be continued into their third year.

Note: Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units i.e. HHB coded units.

**Interdisciplinary Professional Majors**
For details, refer to the Bachelor of Arts (HH01).

**Discipline Sequences**
For details, refer to the Bachelor of Arts (HH01).

**Minor Sequences**
For details, refer to the Co-Majors entry in the Bachelor of Arts (HH01) entry as any of these are available to be taken as Minors.

**Key Terms - BA**

**Professional Major** - one of five interdisciplinary study sequences in the BA degree (International and Global Studies, Society and Change, Ethics and Human Rights, Community Studies, Australian Studies), consisting of one core unit plus six further units from the appropriate list (making a total of 84 credit points). Students must complete at least one of these to fulfil the requirements of the degree. Note - a unit may not be counted in more than one professional major, discipline sequence or minor.

**Discipline Sequence** - a set of six units (72 credit points) in a given discipline (Geography, History, Languages, Social Science). In Languages, this consists of six sequenced units in one Language. In other disciplines the six units must include one introductory unit to the discipline.

**Minor Study Sequence** - a study sequence of any four units (48 credit points) in a given subject area. NB - a unit may not be counted in more than one minor.

**Elective Units** - units selected by students to fit into their study program.

**Key Terms - BA**
For details of key terms used in the BA, refer to the Bachelor of Arts (Humanities) HU22 course entry in the Humanities and Human Services section.

**Arts Major/Minor Sequences**
For details of foundation units, and major and minor sequences (Lists A, B and C), refer to the Bachelor of Arts (Humanities) (HH01) course entry in the Humanities and Human Services section.

**Course Structure**

**Accountancy (For students not seeking professional recognition)**

**Year 1, Semester 1**
BSB110 Accounting
BSB113 Economics

**Year 2, Semester 1**
BSB111 Business Law and Ethics
BSB115 Management, People and Organisations

**Year 2, Semester 2**
BSB119 International and Electronic Business
BSB126 Marketing

**Year 3, Semester 1**
EFB101 Data Analysis for Business
Double Major / Specialisation Unit

**Year 3, Semester 2**
AYB211 Financial Accounting
BSB122 Quantitative Analysis and Finance

**Year 4, Semester 1**
BSB111 Business Law and Ethics
BSB115 Management, People and Organisations

**Year 2, Semester 2**
BSB119 International and Electronic Business
BSB126 Marketing

**Year 3, Semester 1**
EFB101 Data Analysis for Business
Double Major / Specialisation Unit

**Year 3, Semester 2**
AYB221 Computerised Accounting Systems
Double Major / Specialisation Unit

**Year 4, Semester 1**
AYB220 Company Accounting  
Double Major / Specialisation Unit  
**Year 4, Semester 2**  
AYB225 Management Accounting  
Double Major / Specialisation Unit  
**Year 5, Semester 1**  
AYB301 Auditing  
BSB114 Government, Business and Society

McArdle (Education)

**Professional Recognition**
Graduates are eligible for registration as teachers in
Queensland through the Board of Teacher Registration.
The Early Childhood specialisation is also accredited by the
Department of Families for employment in the area of child
care.

**Working With Children Check**
Working With Children Check - As required by the Com-
misson for Children and Young People and Child Guardian
Act (2000), student teachers must undergo a criminal his-
tory check and be issued with a Suitability Card (Blue Card)
by the Commission.

As soon as you enter your enrolment program for the
course, you must submit your Blue Card application to the
QUT Student Centre immediately. You must hold a Blue
Card to undertake activities in any unit which involves con-
tact with children, including the required field studies
blocks.

If you do not apply for a Blue Card immediately upon en-
rolment in the course and allow sufficient time for the police
check and issuing of the Card, you will be unable to partici-
pate in the required activities and may need to be with-
drawn from the unit(s) and incur both financial and aca-
demic penalty. It may take up to 8 weeks for the Commiss-
on to issue the Card. The application form is available at
bluecard.qut.com.

Bachelor of Arts/Bachelor of Laws IF43

Award title: Bachelor of Arts/Bachelor of Laws
CRICOS code: 027276E
Campus: Gardens Point and Carseldine
Duration: 5 Years full-time
Credit points: 528 (192 cp BA and 336 cp BLaws) (full-time standard semester: 48; part-time standard semester: 24)
Course coordinator: Dr John Synott (Arts); Director, Undergraduate Programs (Law)

Professional Recognition
The Bachelor of Laws degree covers the areas of law required for the purposes of admission to practise as a Solicitor and/or Barrister in all Australian states and territories.

Course Structure BA component - Continuing Students

Years 1 and 2
Students should have completed the following components of the degree:
- The first year requirements (8 units) which include:
  - HHB116 Applied Skills and Scholarship
  - Two Foundation Units (if you have not already completed 2 Faculty Foundation Units in Year 1)
  - Two to three Course Foundation Units
  - Two to three Elective Units
Note: A minimum of 4 of these 8 units must be chosen from the BA component of your course.

In second year, a further 8 units are to be completed:
- One Major Study Sequence chosen from those offered in the BA component, and
- One Minor Study Sequence chosen from those offered in the component of your course or from other minor Study Sequences offered elsewhere within QUT.

Students must ensure that a minimum of 12 of the 16 units must be chosen from units in the BA.

Course Structure BA component - Commencing Students

Years 1 and 2
Students are required to complete:
- One Interdisciplinary Professional Major (1 core introductory unit + 6 units in the major)
  It is suggested that students complete the Core Units Program consisting of the following:
- Four core units in first semester (from a selection of core introductory units and core skills units)
  (Note: one of the core introductory units will sit within the chosen Interdisciplinary Professional Major)
- Two core units in second year (2 research methods units)

Students must maintain a 50% enrolment in units from the BA program until they have completed 8 of these units (96 credit points).
Students may wish to:
- develop a Minor (48 credit points) in one of the Interdisciplinary Professional areas
- develop a Minor (48 credit points) in a disciplinary study sequence or in another QUT course
- take a series of elective units

Students wishing to complete a full discipline studies sequence (6 units) will need to amend their core units program.

Students planning to complete a full language sequence (6 units) will need to discuss their program with the relevant Course Coordinator to ensure that their language studies begin in semester one and continue into their third year.

Note: Students are required to complete 16 units in the BA component of the double degree. Of these 12 must be BA units i.e. HHB coded units.

Key Terms in the BA

Professional Major - one of five interdisciplinary study sequences in the BA degree (International & Global Studies, Society and Change, Ethics and Human Rights, Community Studies, Australian Studies), consisting of one core unit plus six from the appropriate list (making a total of 84 credit points). Students must complete at least one of these to fulfil the requirements of the degree.

Note: a unit may not be counted in more than one professional major, discipline sequence, or Minor.

Discipline Sequence - a set of six units (72 credit points) in a given discipline (Geography, History, Languages and Social Science). In Languages, this consists of six sequenced units in one Language. In other disciplines it must include one introductory unit to the discipline.

Minor Study Sequence - a study sequence of any four units (48 credit points) in a given subject area.

Interdisciplinary Professional Majors - Commencing Students
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Discipline Sequences
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Minor Sequences
For details, refer to the Co-majors section of the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

CORE PROGRAM - BA Students
This core program for the degree consists of the following selection of units:

First Year Core: Core Units for Professional Majors
International and Global Studies
HHB110 Introduction To International And Global Studies
HHB111
Society and Change
HHB105 Exploring Change
HHB104 Understanding Society: Introduction to Sociology
Ethics and Human Rights
HHB114 Introduction To Human Rights And Ethics
HHB115 Human Identity And Change
Community Studies
HHB103 Contemporary Social And Community Issues
HHB102 The Human Condition
Australian Studies
HHB106 Australian Society And Culture
HHB112 Australian Politics

First Year Core: Skills Units
HHB116 Applied Skills And Scholarship
HHB117 Introduction To Social Research Methods

Second Year Core: Research Methods
HHB224 Qualitative Research Methods
HHB232 Survey Methods
HHB121 Interpreting The Past
HHB312 Geographical Research Design

Example of Full-time Course Structure

Year 1, Semester 1
Introductory Core unit (Major)
1st Year Core Skills unit (HHB116)
Introductory Core unit (2nd Major or Minor)
Elective Unit (General)

Year 1, Semester 2
Elective Unit (Major)
Elective Unit (Major)
Elective Unit (Minor)
Elective Unit (General)

Year 2, Semester 1
Elective Unit (Major)
Elective Unit (Major)
Elective Unit (Minor)
Elective Unit (General)
Year 2, Semester 2
Elective Unit (Major)
Elective Unit (Major)
Elective Unit (2nd Major or Minor)
Elective Unit (General)

BA Core Program
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Professional Major Study Sequences
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Discipline Sequences
For details, refer to the Bachelor of Arts (HH01) entry in the Humanities and Human Services section.

Minor Study Sequences in other QUT Courses
For details of Minor Study Sequences available, refer to the Co-Majors section of the Bachelor of Arts (HH01) entry in the Humanities and Human Services section as any of these are able to be taken as Minors.

- Bachelor of Business (Accountancy and Economics) / Bachelor of Education (Secondary) IF72

Award title: Bachelor of Business (Study Area A)/Bachelor of Education
Campus: Gardens Point and Kelvin Grove
Duration: 4 Years full-time
Credit points: 432 (full-time standard semester: 54 (average))
Course coordinator: Mr Andrew Paltridge (Business); Dr Peter Bond (Education)
Discipline coordinator: Ms Ros Kent (Accountancy); Dr Radhika Lahiri (Economics)

Course Design
Students are required to complete 240 credit points in units from the Faculty of Business plus 192 credit points in units offered by the Faculty of Education. The following four units are to be undertaken over the first five semesters of the course:
EDB001 Teaching and Learning Studies I: Teaching in New Times
SPB001 Human Development and Education
SPB002 Psychology of Learning and Teaching
CLB341 Language, Technology And Education

Teaching areas for students completing this award are Accounting and Economics. In the final semester, students may undertake the Middle Years of Schooling Pathway, developing the knowledge, skills and understanding required to participate fully in the middle schooling reform movement.

Professional Membership
Students may be eligible for membership of the Economic Society of Australia (Queensland Division), CPA Australia, the Institute of Chartered Accountants, the Institute of Chartered Secretaries and other professional associations, depending on unit selection. The Bachelor of Education (Secondary) is recognised by the Queensland Board of Teacher Registration as meeting the requirements for registration as a teacher in Queensland. Applicants for teacher registration in Queensland are subject to national criminal history checks.

Course Structure

Accountancy and Economics component

Year 1, Semester 1
BSB110 Accounting
BSB113 Economics
BSB119 International and Electronic Business
BSB122 Quantitative Analysis and Finance

Year 1, Semester 2
AYB121 Financial Accounting
BSB111 Business Law and Ethics

Bachelor of Business (Accountancy and Economics)/Bachelor of Education (Secondary) IX03

Award title: Bachelor of Business (Study Area A)/Bachelor of Education (Secondary)
CRICOS code: 020321F
Campus: Kelvin Grove and Gardens Point
Duration: 4 years full-time
Credit points: 432 (full-time standard semester: 54 (average))
Course coordinator: Mr Andrew Paltridge (Business), Dr Peter Bond (Education)
Discipline coordinator: Ms Ros Kent (Accountancy); Dr Radhika Lahiri (Economics)

Professional Recognition
The Bachelor of Business degree may, subject to unit selection, allow graduates to satisfy the academic requirements for membership of CPA Australia, Institute of Chartered Accountants in Australia and Economic Society of Australia. Students may also meet the academic requirements for the Chartered Secretaries Australia (CSA) for enrolment in the Graduate Diploma in Applied Corporate Governance. Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration.

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at http://www.studentservices.qut.edu.au/enrolling/enrolling/specific_requirements/blue_card.jsp

Bachelor of Business/Bachelor of Information Technology IF48

Award title: Bachelor of Business (Study Area A)/Bachelor of Information Technology
CRICOS code: 022137A
Campus: Gardens Point
Duration: 4 or 4.5 years full-time
Credit points: 432 (full-time standard semester: 54 (average) for 8 semesters; 48 for 9 semesters)
Course coordinator: Ruth Christie (InfoTech); Mr Andrew Paltridge (Business)
Discipline coordinator: Ms Ros Kent (Accountancy); Ms Gayle Kerr (Advertising); Ms Sherrena Buckby (Electronic Business); Dr Amanda Gudmundsson (Human Resource Management); Mr Simon Ridings (International Business); Dr Paul Barnes (Management); Mr Bill Proud (Marketing); Ms Robina Xavier (Public Relations); Dr John Chen (Banking & Finance) and Dr Radhika Lahiri (Economics)

Cooperative Education Program
An optional one-year period of paid work experience in an area of information technology is available to eligible full-time students. The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Companies that QUT's Cooperative Education students have worked with include Energetic, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

For more information visit the Faculty's Cooperative Education program home page at www.fit.qut.edu.au/courses/undergrad/coop/

Professional recognition
The Bachelor of Business degree may, subject to choice of major, extended major, or specialisation, allow graduates to satisfy the academic requirements for membership of: CPA Australia; Institute of Chartered Accountants in Australia; Chartered Secretaries Australia; Advertising Federation of Australia; Australian Association of National Advertisers; Australian Direct Marketing Association; Queensland Commercial Radio Association; Financial Services Institute of Australasia (FINSIA); Economics Society of Australia; Australian Human Resources Institute; Australian Institute of Management; Australian Institute of Training and Development; Australian Institute of Export; Australian Marketing Institute; Marketing Research Society of Australia; American Marketing Association and Public Relations Institute of Australia.

Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society.

Course Structure
Accountancy (for students seeking professional recognition)
### UNIVERSITY-WIDE AND INTERFACULTY COURSES

**Year 1, Semester 1**  
- BSB110 Accounting  
- BSB113 Economics  
- ITB001 Problem Solving and Programming  
- ITB004 Database Systems

**Year 1, Semester 2**  
- BSB111 Business Law and Ethics  
- BSB122 Quantitative Analysis and Finance  
- ITB002 IT Professional Studies  
- ITB005 Systems Architecture

**Year 2, Semester 1**  
- AYB121 Financial Accounting  
- BSB115 Management, People and Organisations  
- ITB003 Object Oriented Programming  
- ITB008 Modelling, Analysis and Design

ITB232 Database Management
Year 3, Semester 1
AMB261 Media Relations and Publicity
Business Double Major / Extended Major / Specialisation
Unit
ITB007 Web Development
ITB229 Database Design
Year 3, Semester 2
AMB262 Public Relations Writing
Business Double Major / Extended Major / Specialisation Unit
ITB228 Enterprise Systems
IT Elective Unit selected from list

Year 4, Semester 1
AMB360 Corporate Communication Management
Business Double Major / Extended Major / Specialisation unit
IT Elective Unit selected from list
Year 4, Semester 2
AMB361 Public Relations Campaigns
Business Double Major / Extended Major / Specialisation unit
IT Elective Unit selected from list

Business Faculty Core units:
Students must choose two of the following Faculty Core units:
BSB111 Business Law and Ethics
BSB114 Government, Business and Society
BSB119 International and Electronic Business
BSB122 Quantitative Analysis and Finance

Business Units
Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.
The units AMB201 Market and Audience Research and MGB220 Management Research Methods are incompatible units. Students undertaking HRM or Management as a double major should contact the school for enrolment advice. From Semester 2, 2003 students who complete both MGB220 & AMB201 will be required to undertake an approved substitute unit to satisfy course requirements.

Information Technology Elective Unit List
ITB007 Web Development
ITB009 Core Project Initiation
ITB010 Core Project Implementation
ITB218 Applications Programming
ITB222 Systems Analysis and Design
ITB223 Software Development with ORACLE
ITB228 Enterprise Systems
ITB229 Database Design
ITB232 Database Management
ITB230 Project
ITB233 Enterprise Systems Applications
ITB237 Advanced Databases
ITB239 Enterprise Data Mining
ITB241 Information Technology Management
ITB245 R/3 System Administration
ITB254 Interactivity Design
ITB257 Multimedia Systems
ITB259 Advanced Multimedia Systems
ITB260 E-Commerce Site Development
ITB264 Information Systems Consulting

Bachelor of Business/Bachelor of Laws
IF41
Award title: Bachelor of Business (Study Area A)/Bachelor of Laws
CRICOS code: 006386F
Campus: Gardens Point
Duration: 5 Years full-time
Credit points: 528 (full-time standard semester: 60)
Course coordinator: Mr Andrew Paltridge (Business); Director, Undergraduate Programs (Law)
Discipline coordinator: Ms Ros Kent (Accountancy); Ms Gayle Kerr (Advertising); Ms Sherrina Buckby (Electronic Business); Dr Amanda Gudmundsson (Human Resource Management); Mr Simon Ridings (International Business); Prof Robert Waldersse (Management); Mr Bill Proud (Marketing); Ms Robina Xavier (Public Relations); Dr Adam Clements (Banking & Finance) and Dr Radhika Lahiri (Economics)

Professional Recognition
The Bachelor of Laws degree satisfies the academic requirements for admission to practise as a Solicitor or Barrister in Queensland.

The Bachelor of Business degree may, subject to choice of major, extended major, or specialisation, allow graduates to satisfy the academic requirements for membership of: CPA Australia; Institute of Chartered Accountants in Australia; Chartered Secretaries Australia; Advertising Federation of Australia; Australian Association of National Advertisers; Australian Direct Marketing Association; Queensland Commercial Radio Association; Australasian Institute of Banking and Finance; Economics Society of Australia; Australian Human Resources Institute; Australian Institute of Management; Australian Institute of Training and Development; Australian Institute of Export; Australian Institute of Management; American Marketing Association and Public Relations Institute of Australia.

Course Design
Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Business program and 336 credit points for the Bachelor of Laws program.

For the Business component, students undertake 7 Faculty core units and 6 units from one of the following Majors plus 3 specialisation units.

Course Structure

Banking and Finance major

Year 1, Semester 1
BSB113 Economics
BSB115 Management, People and Organisations
BSB122 Quantitative Analysis and Finance
Introduction to Legal Research
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice

Year 1, Semester 2
BSB110 Accounting
BSB126 Marketing
EFB102 Economics 2
LWB143 Legal Research and Writing
LWB144 Laws and Global Perspectives

Year 2, Semester 1
BSB114 Government, Business and Society
EFB101 Data Analysis for Business
EFB210 Finance 1
LWB136 Contracts A

Year 2, Semester 2
BSB119 International and Electronic Business
EFB307 Finance 2
EFB312 International Finance
LWB137 Contracts B

Year 3, Semester 1
EFB201 Financial Markets
LWB138 Fundamentals of Torts
LWB238 Fundamentals of Criminal Law
Business Specialisation unit

Year 3, Semester 2
Business Specialisation unit
Business Specialisation unit
LWB139 Select Issues in Torts
LWB239 Criminal Responsibility

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity
LWB332 Commercial and Personal Property Law
LWB333 Theories of Law

Year 4, Semester 2
LWB235 Australian Federal Constitutional Law
LWB237 Real Property B
LWB241 Trusts
LWB331 Administrative Law
LWB334 Corporate Law

Year 5, Semester 1
LWB431 Civil Procedure
LWB432 Evidence
LWB434 Advanced Research and Legal Reasoning
Law Elective unit

Year 5, Semester 2
LWB433 Professional Responsibility
Law Elective unit
Law Elective unit
Law Elective unit

Economics major

Year 1, Semester 1
BSB110 Accounting
BSB113 Economics
BSB115 Management, People and Organisations
Introduction to Legal Research
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice

Year 1, Semester 2
BSB122 Quantitative Analysis and Finance
BSB126 Marketing
EFB102 Economics 2

EFB101 Data Analysis for Business
EFB202 Business Cycles and Economic Growth
EFB211 Firms, Markets and Resources
LWB136 Contracts A

Year 2, Semester 2
BSB119 International and Electronic Business
EFB314 International Trade and Economic Competitiveness
Business Specialisation unit
LWB137 Contracts B

Year 3, Semester 1
BSB114 Government, Business and Society
LWB138 Fundamentals of Torts
LWB238 Fundamentals of Criminal Law
Business Specialisation unit

Year 3, Semester 2
LWB239 Select Issues in Torts
LWB239 Criminal Responsibility
EFB329 Contemporary Applications of Economics Theory
Business Specialisation unit

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity
LWB332 Commercial and Personal Property Law
LWB333 Theories of Law

Year 4, Semester 2
LWB235 Australian Federal Constitutional Law
LWB237 Real Property B
LWB241 Trusts
LWB331 Administrative Law
LWB334 Corporate Law
UNIVERSITY-WIDE AND INTERFACULTY COURSES

Year 5, Semester 1
LWB431 Civil Procedure
LWB432 Evidence
LWB434 Advanced Research and Legal Reasoning
Law Elective unit

Year 5, Semester 2
LWB433 Professional Responsibility
Law Elective unit
Law Elective unit
Law Elective unit

Course Structure
Marketing major
Year 1, Semester 1
BSB122 Quantitative Analysis and Finance
BSB115 Management, People and Organisations
BSB126 Marketing
Introduction to Legal Research
LWB141 Legal Institutions and Method
LWB142 Law, Society and Justice

Year 1, Semester 2
AMB200 Consumer Behaviour
AMB240 Marketing Planning and Management
BSB119 International and Electronic Business
LWB143 Legal Research and Writing
LWB144 Laws and Global Perspectives

Year 2, Semester 1
AMB201 Marketing and Audience Research
BSB113 Economics
BSB114 Government, Business and Society
LWB136 Contracts A

Year 2, Semester 2
AMB241 E-Marketing Strategies
BSB110 Accounting
LWB137 Contracts B
Business Specialisation unit

Year 3, Semester 1
AMB340 Services Marketing
LWB138 Fundamentals of Torts
LWB238 Fundamentals of Criminal Law
Business Specialisation unit

Year 3, Semester 2
AMB341 Strategic Marketing
LWB139 Select Issues in Torts
LWB239 Criminal Responsibility
Business Specialisation unit

Year 4, Semester 1
LWB231 Introduction to Public Law
LWB236 Real Property A
LWB240 Principles of Equity

Year 5, Semester 2
LWB433 Professional Responsibility
Law Elective unit
Law Elective unit
Law Elective unit

The units AMB201 Market and Audience Research and MGB220 Management Research Methods are incompatible units. Students undertaking Management as a double major should contact the school for enrolment advice. From semester 2, 2003 students who complete both MGB220 & AMB201 will be required to undertake an approved substitute unit to satisfy course requirements.

Business Specialisations
Students should note that not all specialisations will be timetabled in every year or semester. Hence it is important that you confirm that the specialisation in which you are interested is offered.

Any deviation from the list of specialisations requires approval from the Faculty of Business, Director of Undergraduate Studies.

Students are required to undertake an alternative specialisation unit where the same unit constitutes part of their Business major.

Accounting
AYB121 Financial Accounting
AYB220 Company Accounting
AYB225 Management Accounting

Advertising - for students with an Advertising Major
AMB330 Advertising Strategy and Planning
Plus two from
AMB230 Internet Promotion
AMB231 Marketing Communications Regulations and Ethics
AMB331 Direct Marketing

Advertising - for students without an Advertising Major
AMB220 Advertising Theory and Practice
AMB221 Advertising Copywriting
AMB222 Media Planning

Banking and Finance for students with a Banking and Finance major
EFB208 Finance 3
Plus two from
AYB225 Management Accounting
EFB309 Financial Derivatives
EFB310 Financial Institutions - Control
EFB311 Financial Institutions - Lending
EFB318 Portfolio and Security Analysis

Banking and Finance for students without a Banking and Finance major
EFB210 Finance 1
EFB307 Finance 2
Plus
EFB201 Financial Markets
Or
EFB312 International Finance

Economics - for students with an Economics major
Any three units from
EFB200 Applied Regression Analysis
EFB201 Financial Markets
EFB210 Finance 1
EFB234 Macroeconomics and Global Financial Markets
EFB325 Financial Microeconomics
EFB327 Econometrics of Financial Markets
EFB328 Public Economics and Finance

Economics - for students without an Economics major
EFB102 Economics 2
EFB202 Business Cycles and Economic Growth
EFB211 Firms, Markets and Resources
UNIVERSITY-WIDE AND INTERFACULTY COURSES

Electronic Business
BSB212 Electronic Business Applications
BSB314 E-Business Intelligence
MGB334 Managing in a Changing Environment

Human Resource Management- for students with an HRM major
MGB221 Performance and Reward
MGB304 Human Resource Information Management
MGB315 Personal and Professional Development

International Business- for students with an IB major
IBB205 Cross-Cultural Communication and Negotiation
IBB304 Global Industry Analysis
IBB311 Globalisation and Theoretical Perspectives on Internationalisation

International Business- for students without an IB major
IBB210 Export Management
IBB213 International Marketing
IBB300 International Business Strategy

Management- for students with a Management major
MGB216 Managing Technological Innovation in Global Business
MGB315 Personal and Professional Development
Plus
MGB218 Venture Skills
Or
MGB223 Creating New Enterprises

Management- for students without a Management major
MGB220 Management Research Methods
MGB222 Managing Organisations
MGB334 Managing in a Changing Environment

Marketing- for students with a Marketing major
Choose any three from
AMB250 Business to Business Marketing
AMB251 Innovation and Market Development
AMB350 Relationship and Sales Management
AMB351 Tourism Marketing
AMB352 Marketing Decision Making
AMB353 Retail Marketing
AMB354 Events Marketing
IBB213 International Marketing

Marketing- for students without a Marketing major
AMB200 Consumer Behaviour
AMB240 Marketing Planning and Management
AMB341 Strategic Marketing

Public Relations- for students with a PR major
AMB202 Integrated Marketing Communication
AMB370 Public Relations Cases
AMB371 Corporate Communication Strategies

Public Relations- for students without a PR major
AMB260 Public Relations Theory and Practice
AMB261 Media Relations and Publicity
AMB262 Public Relations Writing

Bachelor of Creative Industries (Communication Design)/Bachelor of Information Technology IF90

Award title: Bachelor of Creative Industries (Communication Design)/Bachelor of Information Technology
CRICOS code: 040317C
Campus: Gardens Point and Kelvin Grove

Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Associate Professor Adrian Thomas (Creative Industries); Ruth Christie (Info Tech)
Discipline coordinator: Dr Gavin Sade (Creative Industries)

Cooperative Education Program
An optional one-year period of paid work experience in an area of information technology is available to eligible full-time students. The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Companies that QUT’s Cooperative Education students have worked with include Energeix, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

Professional Recognition
Graduates of the Bachelor of Information Technology component meet the knowledge requirements for admission to the Australian Computer Society (ACS).

Course Structure
Year 1, Semester 1
KIB101 Foundations of Communication Design 1
KIB103 Media Technology 1
ITB001 Problem Solving and Programming
ITB004 Database Systems

Year 1, Semester 2
KIB102 Foundations of Communication Design 2
KIB104 Media Technology 2
ITB002 IT Professional Studies
ITB003 Object Oriented Programming

Year 2, Semester 1
ITB005 Systems Architecture
ITB008 Modelling, Analysis and Design
Creative Industries Core Unit
Creative Industries Elective

Year 2, Semester 2
ITB007 Web Development
ITB711 Programming Abstraction
Creative Industries Core Unit
Creative Industries Elective

Year 3, Semester 1
KIB210 Design Studio 1: Interaction Design
ITB749 Scientific Programming
MAB281 Mathematics for Computer Graphics

Year 3, Semester 2
KIB211 Design Studio 2: Web Development
ITB006 Networks
ITB746 Modelling and Animation Techniques

Year 4, Semester 1
KIB310 Design Studio 3: Virtual Environments
ITB009 Core Project Initiation
ITB747 Real Time Rendering Techniques
OR
ITB649 Object Modelling for Games Design
ITB649 will not be offered after 2006

Year 4, Semester 2
KIB311 Design Studio 4: Tangible Media
ITB010 Core Project Implementation
ITB743 Artificial Intelligence

Information Technology Elective Unit List
ITB007 Web Development
ITB009 Core Project Initiation
ITB010 Core Project Implementation
ITB218 Applications Programming
ITB222 Systems Analysis and Design
ITB223 Software Development with ORACLE
ITB228 Enterprise Systems
ITB229 Database Design
ITB232 Database Management

ITS705 Ccnp 3: Multilayer Switching
ITS706 Ccnp 4: Network Troubleshooting
ITS707-1 Securing Cisco Hardware
MAB281 Mathematics for Computer Graphics

Special Topics may be available. Please check with the relevant School for further information.

Creative Industries Faculty Undergraduate Open Electives

These unit offerings are current at the time of publication but are subject to change.

Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:
- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen sub-major area.
- you must obey any elective rules as set out in your course requirements
- you must have successfully completed any pre/co-requisite units applicable
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability
- some units are subject to quota restrictions

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock ‘n’ roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking About Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
UNIVERSITY-WIDE AND INTERFACULTY COURSES

KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Fashion Discipline
KFB105 Fashion and Modernity

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

Music & Sound Discipline
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

Film & Television Discipline
KPB103 Film Genres
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Performance Studies Discipline
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation

KTB207 Staging Australia

Visual Arts Discipline
KVB103 Australian Art
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture
KVB211 Post 1945 Art
KVB306 Video Art and Culture
KVB307 Theories of Spatial Culture

Creative Writing & Cultural Studies Discipline
KWB002 Ozlit
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture
KWB007 Indigenous Writing
KWB102 Media Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children's Writing

Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Creative Industries (Creative Writing) / Bachelor of Laws IF93

Award title: Bachelor of Creative Industries (Creative Writing) / Bachelor of Laws
CRICOS code: 040289B
Campus: Gardens Point and Kelvin Grove
Duration: 5 Years full-time
Credit points: 528 (full-time standard semester: 48 (Semesters 3, 4, 5, 6, 9, 10) 60 (Semesters 1, 2, 7, 8))
Course coordinator: Creative Writing - Associate Professor Adrian Thomas: Law - Director, Undergraduate Programs
Discipline coordinator: Creative Writing - Dr Glen Thomas

Professional Recognition
The law degree component covers all the law units required for admission as a legal practitioner in Australia and is approved for the purposes of the Solicitors' and Barristers' Admission Rules.

Course Structure
Year 1, Semester 1
KWB101 Introduction to Creative Writing
KWB107 Introduction to Creative Non-Fiction
Creative Industries Core Unit

**Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary) IX05**

- Award title: Bachelor of Creative Industries (Dance)/Bachelor of Education (Secondary)
- CRICOS code: 040314F
- Campus: Kelvin Grove and Carseldine
- Duration: 4 years full-time
- Credit points: 432 (full-time standard semester: 54 (average))
- Course coordinator: Creative Industries: Associate Professor Adrian Thomas; Education Coordinator: Dr Peter Bond
- Discipline coordinator: Dance Study Area Coordinator: Rachel Mathews

**Professional Recognition**

Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration

**Working With Children Check**

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

**Dance with STA in English, Film and Media, Geography, History or LOTE**

**Year 1, Semester 1**

- Creative Industries Core Unit
- KDB103 Dance Technique Studies 1

Creative Industries Core Units

KKB007 Introduction to Multimedia Technology
KKB008 Narrative in the Creative Industries
KKB009 Writing for Creative Industries
KKB010 Cultures and Creativity
KKB018 Creative Industries

List B Electives

Semester 1 Drama Electives
IX06 students may choose either a Drama elective unit or a Creative Industries Faculty elective unit if/when on offer, provided it is not required as a Second Teaching Area (STA) unit.

KTB061 Creative Industries Management
KTB252 The Sound of Theatre
KTB275 Understanding Performance
KTB277 Physical Theatre
KTB306 Directing for Events and Festivals

Semester 2 Drama Electives
KTB003 APPLYING INFORMATION TECHNOLOGY IN THE DRAMA CLASSROOM
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB258 Studies in Acting 2
KTB307 Writing for Performance

Creative Industries Faculty Undergraduate Open Electives

These unit offerings are current at the time of publication but are subject to change.

Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen sub-major area.
- you must obey any elective rules as set out in your course requirements
- you must have successfully completed any pre/co-requisite units applicable
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability
- some units are subject to quota restrictions

Semester 1

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
UNIVERSITY-WIDE AND INTERFACULTY COURSES

KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning
KKB340-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock ‘n’ roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking About Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB320 Workplace Learning
KKB330 Workplace Learning
KKB340-1 Workplace Learning

KKB340-2 Workplace Learning

Fashion Discipline
KFB105 Fashion and Modernity

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

Music & Sound Discipline
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

Film & Television Discipline
KPB103 Film Genres
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Performance Studies Discipline
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB207 Staging Australia

Visual Arts Discipline
KVB103 Australian Art
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture
KVB211 Post 1945 Art
KVB306 Video Art and Culture
KVB307 Theories of Spatial Culture

Creative Writing & Cultural Studies Discipline
KWB002 Ozlit
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture
KWB007 Indigenous Writing
KWB102 Media Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children’s Writing

Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

Bachelor of Creative Industries
(Drama)/Bachelor of Education (Secondary) IX16

Award title: Bachelor of Creative Industries
(Drama)/Bachelor of Education (Secondary)
CRICOS code: 056189G
Campus: Kelvin Grove
Duration: 4 years full-time
Credit points: 432 cp (full-time standard semester: 54 cp average)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Ms Sharon Hogan

Professional Recognition
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

List of Languages
The same language must be studied for at least four levels and unit codes are sequential (eg. French HHB061, HHB062, HHB063, HHB064). With the permission of the Major Coordinator, and where available, languages other than those listed may be taken, including languages studied at another university. International students must take a language that is not their native tongue. The language units are as follows:

**French**
1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:
   - HHB061 French 1
   - HHB062 French 2
   - HHB063 French 3
   - HHB064 French 4
   - HHB065 French 5
   - HHB066 French 6
2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:
   - HHB063 French 3
   - HHB064 French 4
   - HHB065 French 5
   - HHB066 French 6
   - HHB067 French 7
   - HHB068 French 8

**Indonesian**
1. Students without Year 12 Language qualifications in Indonesian should undertake the following unit sequence:
   - HHB071 Indonesian 1
   - HHB072 Indonesian 2
   - HHB073 Indonesian 3
   - HHB074 Indonesian 4
   - HHB075 Indonesian 5
   - HHB076 Indonesian 6
2. Students with Year 12 Language qualifications or equivalent in Indonesian should undertake the following unit sequence:
   - HHB073 Indonesian 3
   - HHB074 Indonesian 4
   - HHB075 Indonesian 5
   - HHB076 Indonesian 6
   - HHB077 Indonesian 7
   - HHB078 Indonesian 8

**Japanese**
1. Students without Year 12 Language qualifications in Japanese should undertake the following unit sequence:
   - HHB081 Japanese 1
   - HHB082 Japanese 2
   - HHB083 Japanese 3
   - HHB084 Japanese 4
   - HHB085 Japanese 5
   - HHB086 Japanese 6
2. Students with Year 12 Language qualifications or equivalent in Japanese should undertake the following unit sequence:
   - HHB083 Japanese 3
   - HHB084 Japanese 4
   - HHB085 Japanese 5
   - HHB086 Japanese 6
   - HHB087 Japanese 7
   - HHB088 Japanese 8

**German**
1. Students without Year 12 Language qualifications in German should undertake the following unit sequence:
   - HHB091 German 1
   - HHB092 German 2
   - HHB093 German 3
   - HHB094 German 4
   - HHB095 German 5
   - HHB096 German 6
2. Students with Year 12 Language qualifications or equivalent in German should undertake the following unit sequence:
   - HHB093 German 3
   - HHB094 German 4
   - HHB095 German 5
   - HHB096 German 6
   - HHB097 German 7
   - HHB098 German 8

### Bachelor of Creative Industries (Media and Communication)/Bachelor of Laws IF10

**Award title:** Bachelor of Creative Industries (Media and Communication)/Bachelor of Laws

**Bachelor of Creative Industries (Visual Arts)/Bachelor of Education (Secondary)**

**Award title:** Bachelor of Creative Industries (Visual Arts)/Bachelor of Education (Secondary)

**CRICOS code:** 040316D

**Campus:** Kelvin Grove

**Duration:** 4 years full-time

**Credit points:** 432 (full-time standard semester: 54 (Average))

**Course coordinator:** Mr Mark Webb (Creative Industries); Dr Peter Bond (Education)

**Professional Recognition**
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration

**Working With Children Check**

Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

Discipline coordinator: Mr Mark Webb

Professional Recognition
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card, immediately upon enrolment in the course, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

Visual Arts STA in English, Film & Media, Geography or LOTE
UNIVERSITY-WIDE AND INTERFACULTY COURSES

Year 1, Semester 1
Creative Industries Core Unit
KVB102 Modernism

Creative Industries Core Units
UNIVERSITY-WIDE AND INTERFACULTY COURSES

KKB007 Introduction to Multimedia Technology
KKB008 Narrative in the Creative Industries
KKB009 Writing for Creative Industries
KKB010 Cultures and Creativity
KKB018 Creative Industries

Second Teaching Area Units

English (48 credit points)

Required Unit
CLB320 Studies In Language

Up to 12 credit points from Introductory Level Units:
KCB102 Media and Society: From Printing Press to Internet
KWB001 Introduction to Literary Theory and Cultural Studies

No less than 24 credit points from Advanced Level Units
CLB321 Writing Workshop
CLB322 Literature In Secondary Teaching
CLB323 Teaching Adolescent Literature
KWB002 Ozlit
KWB206 Youth and Children's Writing
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now

Film and Media (48 credit points)

Four units from:
KPB101 Foundations of Film and Television Production
KPB102 Film History
KPB103 Film Genres
KPB105 Narrative Production
KPB108 Media Text Analysis
KPB205 Documentary Theory and Practice

Geography (48 credit points)

Up to 24 credit points from Introductory Units
HHB127 Environment And Society
HHB107 World Regions
HHB250 Australian Geographical Studies
HHB251 Australian Resource Management
HHB228 Environmental Hazards
HHB229 Windows On Japan
HHB269 Ethics, Technology And The Environment
HHB244 Southeast Asia In Focus

History (48 credit points)

Note: Students should seek to select units from each of areas of Australian, Asian, European and the Ancient World. Students should check with QUT Carseldine Faculty on availability of units.

Up to 24 credit points from Introductory Units
HHB121 Interpreting The Past
HHB122 Colonialism And Independence In Asia Pacific
HHB238 Asian Cultures And Societies
HHB239 Korean Culture And Societies
HHB245 Australia And The South Pacific
HHB246 Modern China
HHB248 The USA and The Asia Pacific Region
HHB253 Conspiracy And Dissent In Australian History
HHB257 The Classical World
HHB258 Foundations of Modern Europe
HHB260 Nations And Nationalism In Modern Europe
HHB261 Medieval Europe
HHB109 Australian Historical Studies

Bachelor of Engineering (Electrical)/ Bachelor of Mathematics IF21

Award title: Bachelor of Engineering (Electrical)/ Bachelor of Mathematics
CRICOS code: 020329J
Campus: Gardens Point
Duration: 5 years full-time
Credit points: 480 (full-time standard semester: 48)
Course coordinator: Dr R.Mahalinga-Iyer (Engineering); Professor Helen MacGillivray (Mathematics)
Discipline coordinator: Dr Ed Palmer (Engineering)

Special Course Requirements
A candidate for this course must obtain at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

Professional Recognition
This degree meets the requirements for membership of Engineers Australia, and the coursework requirements for accredited graduate membership of the Australian Mathematical Society. Students may also become a member of the Statistical Society of Australia.

Course Structure

For students with four semesters of Senior Mathematics B and Senior Mathematics C

For students with four semesters of both Senior Mathematics B and Senior Mathematics C (or equivalent) with an exit assessment of at least Sound Achievement in both subjects.

STUDENTS COMMENCING IN 2006

Year 1, Semester 1
BEB100 Introducing Professional Learning
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
PCB136 Engineering Physics 1C

Year 1, Semester 2
ENB101 Engineering Mechanics 1
ENB103 Electrical Engineering
MAB101 Statistical Data Analysis 1
MAB210 Statistical Modelling 1

STUDENTS COMMENCING PRIOR TO 2006

Year 2, Semester 1
EEB312 Analog and Digital Electronics
EEB340 Introduction to Telecommunications
MAB101 Statistical Data Analysis 1
MAB311 Advanced Calculus

Year 2, Semester 2
EEB412 Advanced Electronics and Embedded Systems
EEB440 Classical Signal Processing
MAB413 Differential Equations
Mathematics elective (Level 2 or 3)

Year 3, Semester 1
EEB311 Electrical Measurement and Machines
EEB560 Digital Communications
MAB314 Statistical Modelling 2
MAB311 Advanced Calculus
OR
MAB312 Linear Algebra

Year 3, Semester 2
EEB411 Classical Control and Power Systems
EEB640 Digital Signal Processing
MAB420 Computational Mathematics 2
EITHER
Computing elective
OR
MAB480 Introduction to Scientific Computation

Year 4, Semester 1
EEB511 Modern Control and Power Electronics
EEB584 Introduction to Design
Electrical Engineering elective
Mathematics elective (Level 3)

Year 4, Semester 2
EEB684 Advanced Design
Electrical Engineering elective
MAB414 Applied Statistics 2
Mathematics elective (Level 3)

Year 5, Semester 1
EEB889-1 Project
Electrical Engineering elective
Electrical Engineering elective
Mathematics elective (Level 3)

Year 5, Semester 2
EEB889-2 Project
Electrical Engineering elective
Electrical Engineering elective
Mathematics elective (Level 3)

Electrical Engineering Elective Units
EEB512 Industrial Electronics and Digital Design
EEB612 Software Systems Design
EEB641 Fields Transmission and Propagation
EEB650 Power Systems Analysis
EEB911 Electrical Energy Systems
EEB941 Modern Signal Processing
EEB960 Wireless Communications
EEB961 RF and Applied Electromagnetics
EEB976 Advanced Industrial Electronics
EEB992 VLSI Circuits and Systems

Not all electives may be offered. At the discretion of the course coordinator, students may be allowed to select an elective from any advanced topics offered by the University. Also potential honour students may, with the approval of the course coordinator, select an elective from the post-graduate degree courses offered by the School of Electrical and Electronic Systems Engineering.

Mathematics Electives (Level 2)
MAB315 Operations Research 2

Course Structure

For students with fours semesters of Senior Mathematics B (or equivalent) only
For students with four semesters of Senior Mathematics B (or equivalent) only, with an exit assessment of at least Sound Achievement.

STUDENTS COMMENCING IN 2006

Year 1, Semester 1
BEB100 Introducing Professional Learning
MAB100 Mathematical Sciences 1A
MAB101 Statistical Data Analysis 1
PCB136 Engineering Physics 1C

Year 1, Semester 2
ENB101 Engineering Mechanics 1
ENB103 Electrical Engineering
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB422 Mathematical Modelling
MAB480 Introduction to Scientific Computation

Mathematics Electives (Level 3) Four units required:
MAB521 Applied Mathematics 3
MAB522 Computational Mathematics 3
MAB523 Introduction to Quality Management
MAB524 Statistical Inference
MAB526 Statistical Science 3
MAB613 Partial Differential Equations
MAB621 Discrete Mathematics
MAB624 Applied Statistics 3
MAB672 Advanced Mathematical Modelling

Notes:
- For students commencing in 2004 onwards, the units MAB523 Introduction to Quality Management and MAB621 Discrete Mathematics do not contribute to the mandatory 48 credit points minimum from Level 3 Mathematics units. This does not apply to students who commenced prior to 2004
- Some deviations from the above course structure may be possible with the permission of the course coordinator. This is more likely to apply in the later years than the earlier years of the course.

Bachelor of Engineering (Electrical)/Bachelor of Business IF28

Award title: Bachelor of Engineering (Electrical)/Bachelor of Business
CRICOS code: 027278C
Campus: Gardens Point
Duration: 5 years full-time
Credit points: 480 (full-time standard semester: 48 (average))
Course coordinator: Dr R.Mahalinga-Iyer (Engineering); Mr Andrew Patridge (Business)
Discipline coordinator: Dr Ed Palmer (Engineering); Ms Ros Kent(Accountancy); Dr Gayle Kerr (Advertising); Dr Adam Clements (Banking and Finance); Dr Radhika Lahiri (Economics); Ms Sherrena Buxby (Electronic Business); Dr Amanda Gudmundsson (Human Resource Management); Mr Simon Ridings (International Business); Prof Robert Walderssee (Management); Mr Bill Proud (Marketing); Ms Robina Xavier (Public Relations);

Professional Recognition
This degree meets the requirements for membership of Engineers Australia and the Institution of Radio and Electronics Engineers Australia.

The Bachelor of Business degree may, subject to choice of major, extended major, or specialisation, allow graduates to satisfy the academic requirements for membership of: CPA Australia; Institute of Chartered Accountants in Australia; Chartered Secretaries Australia; Advertising Federation of Australia; Australian Association of National Advertisers; Australian Direct Marketing Association; Queensland Commercial Radio Association; Financial Services Institute of Australasia (FINSIA); Economics Society of Australia; Australian Human Resources Institute; Australian Institute of Management; Australian Institute of Training and Development; Australian Institute of Export; Australian Institute of Management; Australian Marketing Institute; Marketing Research Society of Australia; Australian Institute of Management; American Marketing Association and Public Relations Institute of Australia.

Special Course Requirements
A candidate for the degree of Bachelor of Engineering must obtain at least 60 days of industrial employment/practice in an engineering environment approved by the course coordinator, before graduating.

Course Structure
Accountancy

STUDENTS COMMENCING IN 2006.
Year 1, Semester 1
BEB100 Introducing Professional Learning
BSB110 Accounting
BSB113 Economics
MAB180 Engineering Mathematics 1

Course Structure
STUDENTS COMMENCING PRIOR TO 2006.

**Year 1, Semester 1**
BSB115 Management, People and Organisations
BSB122 Quantitative Analysis and Finance
EEB112 Electrical and Computer Engineering 1
MAB180 Engineering Mathematics 1
OR
MAB131 Engineering Mathematics 1A
MAB180 Engineering Mathematics 1 is to be taken by those students not obtaining a SA or better in Queensland Mathematics C

**Year 1, Semester 2**
BSB126 Marketing
EEB212 Electrical and Computer Engineering 2
MGB220 Management Research Methods
MAB132 Engineering Mathematics 1B
OR
MAB182 Engineering Mathematics 2B

**Year 2, Semester 1**
BSB110 Accounting
EEB340 Introduction to Telecommunications
MAB134 Electrical Engineering Mathematics 3
PCB136 Engineering Physics 1C

**Year 2, Semester 2**
EEB440 Classical Signal Processing
MAB135 Electrical Engineering Mathematics 4
MGB207 Human Resource Issues and Strategy
MGB211 Organisational Behaviour

**Year 3, Semester 1**
BSB113 Economics
BSB114 Government, Business and Society
EEB311 Electrical Measurement and Machines
EEB312 Analog and Digital Electronics

**Year 3, Semester 2**
BSB111 Business Law and Ethics
EEB411 Classical Control and Power Systems
EEB412 Advanced Electronics and Embedded Systems
MGB222 Managing Organisations

**Year 4, Semester 1**
EEB584 Introduction to Design
Electrical and Computer Engineering elective unit
Business Double Major / Extended Major / Specialisation Unit

**Year 4, Semester 2**
EEB684 Advanced Design
Electrical and Computer Engineering elective unit
Business Double Major / Extended Major / Specialisation Unit

**Year 5, Semester 1**
EEB889-1 Project
Electrical and Computer Engineering elective unit
MGB314 Organisational Consulting and Change
Business Double Major / Extended Major / Specialisation Unit

**Year 5, Semester 2**
EEB889-2 Project
Electrical and Computer Engineering elective unit
MGB309 Strategic Management
Business Double Major / Extended Major / Specialisation Unit

**Course Structure**

### International Business - No Language

STUDENTS COMMENCING IN 2006.

**Year 1, Semester 1**
EEB100 Introducing Professional Learning
BSB113 Economics
BSB119 International and Electronic Business
MAB180 Engineering Mathematics 1
OR
MAB131 Engineering Mathematics 1A
MAB180 Engineering Mathematics 1 is to be taken by those students not obtaining a SA or better in Queensland Mathematics C

**Year 1, Semester 2**
BSB115 Management, People and Organisations
BSB126 Marketing
EEB103 Electrical Engineering
MAB132 Engineering Mathematics 1B
OR
MAB182 Engineering Mathematics 2B

STUDENTS COMMENCING PRIOR TO 2006.

**Year 1, Semester 1**
BSB113 Economics
BSB119 International and Electronic Business
EEB112 Electrical and Computer Engineering 1
MAB180 Engineering Mathematics 1
OR
MAB131 Engineering Mathematics 1A
MAB180 Engineering Mathematics 1 is to be taken by those students not obtaining a SA or better in Queensland Mathematics C

**Year 1, Semester 2**
BSB115 Management, People and Organisations
BSB126 Marketing
EEB212 Electrical and Computer Engineering 2
MAB132 Engineering Mathematics 1B
OR
MAB182 Engineering Mathematics 2B

**Year 2, Semester 1**
BSB114 Government, Business and Society
EEB340 Introduction to Telecommunications
MAB134 Electrical Engineering Mathematics 3
PCB136 Engineering Physics 1C

**Year 2, Semester 2**
EEB440 Classical Signal Processing
EEB202 Fundamentals of International Finance
EEB213 International Marketing
MAB135 Electrical Engineering Mathematics 4

**Year 3, Semester 1**
BSB110 Accounting
EEB311 Electrical Measurement and Machines
EEB312 Analog and Digital Electronics
EEB210 Export Management

**Year 3, Semester 2**
EEB440 Classical Signal Processing
IBB202 Fundamentals of International Finance
IBB213 International Marketing
MAB135 Electrical Engineering Mathematics 4

**Year 4, Semester 1**
EEB584 Introduction to Design
Electrical and Computer Engineering elective unit

**Year 4, Semester 2**
EEB684 Advanced Design
Electrical and Computer Engineering elective unit

**Year 5, Semester 1**
EEB889-1 Project
Electrical and Computer Engineering elective unit
MGB314 Organisational Consulting and Change

**Year 5, Semester 2**
EEB889-2 Project
Electrical and Computer Engineering elective unit
MGB309 Strategic Management

**Business Units**

Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units.

The units AMB201 Market and Audience Research and MGB220 Management Research methods are incompatible units. Students undertaking Marketing or Public Relations as a double major should contact the school for enrolment advice. From semester 2, 2003 students who complete both MGB220 & AMB201 will be required to undertake an approved substitute unit to satisfy course requirements.

**Bachelor of Engineering (Electrical)/Bachelor of Information Technology**  
IF59

**Award title:** Bachelor of Engineering (Electrical)/Bachelor of Information Technology  
**CRICOS code:** 006384G  
**Campus:** Gardens Point  
**Duration:** 5 years full-time  
**Credit points:** 480 (full-time standard semester: 48)  
**Course coordinator:** Dr R. Mahalinga-Iyer (Engineering), Ruth Christie (Information Technology)  
**Discipline coordinator:** Dr Ed Palmer (Engineering)

**Cooperative Education Program**  
An optional one-year period of paid work experience in an area of information technology is available to eligible full-time students. The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Companies that QUT’s Cooperative Education students have worked with include Energex, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

**Professional Recognition**  
This degree meets the requirements for membership of Engineers Australia and the Institution of Radio and Electronics Engineers Australia. Graduates of the Bachelor of Information Technology component meet the knowledge requirements for admission to the Australian Computer Society (ACS).

**Special Course Requirements**  
A candidate for the degree of Bachelor of Engineering (Electronics)/Bachelor of Information Technology must obtain at least 60 days of industrial experience in an engineering environment approved by the course coordinator.

**Full-time Course Structure**  
STUDENTS COMMENCING IN 2006.

EEB976 Advanced Industrial Electronics
EEB992 VLSI Circuits and Systems
EEP123 Process Control and Robotics
EEP129 Image Processing and Computer Vision

At the discretion of the Course Coordinator, students may be allowed to select an elective from any advanced topics offered by the University. Also, potential honours students may, with the approval of the Course Coordinator, select an elective from the postgraduate degree courses offered by the School of Electrical and Electronic Systems Engineering. IT and Electrical Engineering Electives may be interchanged provided at least one elective is chosen from each discipline.

IT Elective units - please see IT Elective Unit list

Industrial Experience
Students must obtain at least 60 days industrial experience in an engineering environment as approved by the Course Coordinator.

Information Technology Elective Unit List
ITB007 Web Development
ITB009 Core Project Initiation
ITB010 Core Project Implementation
ITB218 Applications Programming

MAB281 Mathematics for Computer Graphics

Special Topics may be available. Please check with the relevant School for further information.

Bachelor of Engineering (Software Engineering) IX25

Award title: Bachelor of Engineering (Software Engineering)
CRICOS code: 053707D
Campus: Gardens Point
Duration: 4 years full-time
Credit points: 384 (full-time standard semester: 48)
Course coordinator: Dr R. Mahalinga-Iyer
Discipline coordinator: Dr Ed Palmer

Professional Recognition
Professional accreditation from Engineers Australia and the Australian Computer Society is being sought.

Special course requirements
Students are required to complete 60 days approved industrial experience.
Course Structure

Elective

Note:
* This course is subject to University approval

Students are required to undertake five electives as follows:
One General Elective, two from Electrical Engineering and two from Information Technology.

Students who opt to complete the Cooperative Education Program will substitute ITS010 for ITB613

General Elective
A QUT degree level unit in the areas of Commercialisation or internationalisation (foreign language) selected in consultation with the Course Coordinator.

Electrical Engineering electives (Two to be selected)
EEB992 VLSI Circuits and Systems
EEP104 Real-Time Operating Systems
EEP120 Networks and Distributed Computing
EEP123 Process Control and Robotics
EEP129 Image Processing and Computer Vision

Information Technology electives
ITB713 Advanced Java Programming
ITB716 Advanced Web Applications Development
ITB743 Artificial Intelligence
ITB745 Operating Systems
ITB746 Modelling and Animation Techniques
ITB747 Real Time Rendering Techniques

Bachelor of Information Technology/Bachelor of Education (Secondary) IX09

Award title: Bachelor of Information Technology/Bachelor of Education (Secondary)
CRICOS code: 022136B
Campus: Kelvin Grove, Carseldine and Gardens Point
Duration: 4 years full-time
Credit points: 432
Course coordinator: Dr Peter Bond (Education), Ruth Christie (InfTech)

Professional Recognition
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration. Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society as members.

Working With Children Check
Working With Children Check - As required by the Commission for Children and Young People and Child Guardian Act (2000), student teachers must undergo a criminal history check and be issued with a Suitability Card (Blue Card) by the Commission.

As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.

If you do not apply for a Blue Card immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at http://www.studentservices.qut.edu.au/enrolling/enrolling/specific_requirements/blue_card.jsp

■ Bachelor of Information Technology/Bachelor of Laws IF38

Award title: Bachelor of Information Technology/Bachelor of Laws
CRICOS code: 006385G
Campus: Gardens Point
Duration: 5 Years full-time
Credit points: 528
Course coordinator: IT: Ruth Christie; Law, Director, Undergraduate Programs

Cooperative Education Program
An optional one-year period of paid work experience in an area of information technology is available to eligible full-time students. The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Companies that QUT’s Cooperative Education students have worked with include Energex, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

Professional Recognition
The Bachelor of Information Technology component meets the knowledge requirements for membership of the Australian Computer Society. The Bachelor of Laws component covers the areas of law required for the purposes of admission to practise as a Solicitor and/or Barrister in all Australian states and territories.

Course Structure

Year 1, Semester 1
ITB001 Problem Solving and Programming
ITB002 IT Professional Studies

**Bachelor of Journalism/Bachelor of Business (Advertising, International Business, Public Relations) IF05**

**Award title:** Bachelor of Journalism/Bachelor of Business (Study Area A)

**CRICOS code:** 040312G

**Campus:** Gardens Point and Kelvin Grove

**Duration:** 4/4.5 Years (8 or 9 Semesters - students may choose) full-time

**Credit points:** 432 (full-time standard semester: 48 (Years 1 & 2); 60 (Years 3 & 4))

**Course coordinator:** Associate Professor Adrian Thomas (Creative Industries); Mr Andrew Paltridge (Business)

**Discipline coordinator:** Dr Leo Bowman (Journalism); Dr Gayle Kerr (Advertising); Mr Simon Ridings (International Business); Ms Robina Xavier (Public Relations)

**Professional Recognition**

The Bachelor of Business degree may, subject to choice of major, extended major, or specialisation, allow graduates to satisfy the academic requirements for membership as follows:

- All majors: Chartered Secretaries Australia (CSA) - enrolment in the Graduate Diploma in Applied Corporate Governance.
- International Business - Australian Institute of Export;
- Public Relations - Public Relations Institute of Australia.

The Journalism degree is recognised by the Australian Journalists Association section of the Media Entertainment and Arts Alliance.

**Course Design**

Students are required to complete 432 credit points, comprised of 240 credit points from the Bachelor of Business program and 192 credit points from the Bachelor of Journalism program.

For the Business component, students must complete the 96 credit point Faculty Core Units together with a 72 credit point Major and a further 72 credit points in which the student must complete one of the following: Double Major, Extended Major or Specialisation.

**Course Structure**

Advertising (8 Semester concurrent model)

**Year 1, Semester 1**

Creative Industries Faculty Core Unit

- BSB122 Quantitative Analysis and Finance

KWB105 Film and Television Scriptwriting
KWB106 Corporate Writing and Editing
KWB204 Creative Non-Fiction: Life Writing
KWB206 Youth and Children’s Writing

Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

List of Languages
The same language must be studied for at least four levels and unit codes are sequential (eg. French HHB061, HHB062, HHB063, HHB064). With the permission of the Major Coordinator, and where available, languages other than those listed may be taken, including languages studied at another university. International students must take a language that is not their native tongue. The language units are as follows:

French
1. Students without Year 12 Language qualifications in French should undertake the following unit sequence:
   HHB061 French 1
   HHB062 French 2
   HHB063 French 3
   HHB064 French 4
   HHB065 French 5
   HHB066 French 6
2. Students with Year 12 Language qualifications or equivalent in French should undertake the following unit sequence:
   HHB063 French 3
   HHB064 French 4
   HHB065 French 5
   HHB066 French 6
   HHB067 French 7
   HHB068 French 8

Indonesian
1. Students without Year 12 Language qualifications in Indonesian should undertake the following unit sequence:
   HHB071 Indonesian 1
   HHB072 Indonesian 2
   HHB073 Indonesian 3
   HHB074 Indonesian 4
   HHB075 Indonesian 5
   HHB076 Indonesian 6
2. Students with Year 12 Language qualifications or equivalent in Indonesian should undertake the following unit sequence:
   HHB073 Indonesian 3
   HHB074 Indonesian 4
   HHB075 Indonesian 5
UNIVERSITY-WIDE AND INTERFACULTY COURSES

HHB076 Indonesian 6
HHB077 Indonesian 7
HHB078 Indonesian 8

Japanese
1. Students without Year 12 Language qualifications in Japanese should undertake the following unit sequence:
   HHB081 Japanese 1
   HHB082 Japanese 2
   HHB083 Japanese 3
   HHB084 Japanese 4
   HHB085 Japanese 5
   HHB086 Japanese 6
2. Students with Year 12 Language qualifications or equivalent in Japanese should undertake the following unit sequence:
   HHB083 Japanese 3
   HHB084 Japanese 4
   HHB085 Japanese 5
   HHB086 Japanese 6
   HHB087 Japanese 7
   HHB088 Japanese 8

German
1. Students without Year 12 Language qualifications in German should undertake the following unit sequence:
   HHB091 German 1
   HHB092 German 2
   HHB093 German 3
   HHB094 German 4
   HHB095 German 5
   HHB096 German 6
2. Students with Year 12 Language qualifications or equivalent in German should undertake the following unit sequence:
   HHB093 German 3
   HHB094 German 4
   HHB095 German 5
   HHB096 German 6
   HHB097 German 7
   HHB098 German 8

Bachelor of Journalism/Bachelor of Laws
IF07

Award title: Bachelor of Journalism/Bachelor of Laws
CRICOS code: 040313G
Campus: Gardens Point and Kelvin Grove
Duration: 5 Years full-time

Bachelor of Mass Communication IF27

Award title: Bachelor of Mass Communication
CRICOS code: 037542J
Campus: Gardens Point and Kelvin Grove
Duration: 3 Years full-time
Credit points: 288 (full-time standard semester: 48)
Course coordinator: Associate Professor Adrian Thomas
Discipline coordinator: Dr Jason Sternberg (Media & Communication); Ms Jeanette McGown (Television); Dr Leo Bowman (Journalism); Ms Robina Xavier (Advertising & Public Relations)

Course Structure
Students commencing the Bachelor of Mass Communication must complete 24 units of equal weighting totalling 288 credit points comprised of:
- Faculty Core (six faculty core units)
- Major Core (two majors of six units each) and
- Electives (six units).

Although studies can be tailored to meet a specific career goal or create a wide variety of career choices, there is a set of recommended combinations of majors. Students are not required to take these combinations, however they do represent the more common and logical choices within a mass communication qualification.

The recommended combinations are:
- Public Relations and International Journalism
- Public Relations and Media and Communication
- Advertising and Television
- International Journalism and Media and Communication.

Professional Recognition
Graduates of the Bachelor of Mass Communication (depending on their choice of majors) may satisfy the academic requirements for membership of the Advertising Institute of Australia and the Society of Business Communicators.

General Course Structure

FACULTY CORE UNITS - 6 units required
KKB018 Creative Industries
KKB007 Introduction to Multimedia Technology
KKB009 Writing for Creative Industries
BSB126 Marketing
AMB201 Marketing and Audience Research
EITHER
AMB220 Advertising Theory and Practice
OR
AMB260 Public Relations Theory and Practice

* Students intending to take the Television sub-major are required to take KWB102 Media Writing in place of KKB009 Writing for the Creative Industries.

MAJOR CORE UNITS - 12 units required - Select two of the following 6 units majors
Advertising
AMB220 Advertising Theory and Practice
AMB200 Consumer Behaviour

Creative Industries Faculty Undergraduate Open Electives

These unit offerings are current at the time of publication but are subject to change.

Creative Industries students may choose elective units from the following list OR from outside the Faculty area subject to the following guidelines:

- you cannot select a unit that forms part of the compulsory units of your course or the compulsory units of your chosen sub-major area.
- you must obey any elective rules as set out in your course requirements
- you must have successfully completed any pre/co-requisite units applicable
- the offering of elective units is subject to sufficient student enrolment numbers and staff availability
- some units are subject to quota restrictions

Semester 1
UNIVERSITY-WIDE AND INTERFACULTY COURSES

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB102 Media and Society: From Printing Press to Internet
KCB103 Strategic Speech Communication
KCB201 Virtual Cultures
KCB302 Political Communication

Dance Discipline
KDB105 Architecture of the Body
KDB108 World Dance
KDB110 Deconstructing Dance in History

Fashion Discipline
KFB103 Introduction to Fashion Design

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB239 Journalism Ethics and Issues

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB390 Workplace Learning
KKB391 Workplace Learning
KKB390-1 Workplace Learning
KKB390-2 Workplace Learning

Music & Sound Discipline
KMB003 Sex Drugs Rock 'n' roll
KMB004 World Music
KMB104 Introductory Musicianship
KMB105 Music and Sound Technology
KMB108 Sound Recording and Acoustics
KMB204 Music and Sound Textures

Film & Television Discipline
KPB102 Film History
KPB106 Australian Television
KPB108 Media Text Analysis
KPB203 Australian Film
KPB303 Critical Thinking About Television

Performance Studies Discipline
KTB061 Creative Industries Management
KTB062 Creative Industries Events and Festivals
KTB101 20th Century Performance
KTB204 Understanding Performance
KTB306 Directing for Events and Festivals

Visual Arts Discipline
KVB102 Modernism
KVB104 Photomedia and Artistic Practice
KVB110 2D Media and Processes
KVB212 Australian Art, Architecture and Design
KVB304 Contemporary Art Issues

Creative Writing & Cultural Studies Discipline
KWB001 Introduction to Literary Theory and Cultural Studies
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB101 Introduction to Creative Writing
KWB102 Media Writing
KWB103 Persuasive Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
KWB107 Introduction to Creative Non-Fiction

Semester 2

Media & Communication Discipline
KCB101 Communication in the New Economy
KCB103 Strategic Speech Communication
KCB104 Media and Communications Industries
KCB105 Media and Communication Research Methods
KCB202 New Media Technologies
KCB203 Consumer Cultures

Dance Discipline
KDB106 Dance Analysis
KDB109 Funk, Tap and all that Jazz
KDB204 Australian Dance

Faculty
KKB004 Indigenous Creative Industries
KKB290 Supervised Group Project
KKB357 Independent Study
KKB390 Workplace Learning
KKB391 Workplace Learning
KKB390-1 Workplace Learning
KKB390-2 Workplace Learning

Fashion Discipline
KFB105 Fashion and Modernity

Journalism Discipline
KJB101 Journalism Information Systems
KJB120 Newswriting
KJB121 Journalistic Inquiry
KJB224 Feature Writing
KJB280 International Journalism
KJB337 Public Affairs Reporting

Music & Sound Discipline
KMB002 Music and Spirituality
KMB007 Introductory Ensemble
KMB105 Music and Sound Technology
KMB107 Sound and Image
KMB108 Sound Recording and Acoustics

Film & Television Discipline
KPB103 Film Genres
KPB104 Film and Television Production Resource Management
KPB107 Television Genres
KPB205 Documentary Theory and Practice
KPB206 International Cinema

Performance Studies Discipline
KTB062 Creative Industries Events and Festivals
KTB104 Performance Innovation
KTB207 Staging Australia

Visual Arts Discipline
KVB103 Australian Art
KVB104 Photomedia and Artistic Practice
KVB108 Contemporary Asian Visual Culture
KVB211 Post 1945 Art
KVB306 Video Art and Culture
KVB307 Theories of Spatial Culture

Creative Writing & Cultural Studies Discipline
KWB002 Ozlit
KWB004 Shakespeare, Then and Now
KWB006 Popular Fictions, Popular Culture
KWB007 Indigenous Writing
KWB102 Media Writing
KWB104 Creative Writing: The Short Story
KWB105 Film and Television Scriptwriting
Notes:
* Only one Workplace Learning unit may be completed
* KKB290, KKB357, KKB320, KKB330, KKB340-1 and KKB340-2 are only available to students enrolled in Creative Industries courses.

- **Bachelor of Mathematics/Bachelor of Business (Accountancy, Banking and Finance or Economics) IF60**

  **Award title:** Bachelor of Mathematics/Bachelor of Business (Study Area A)
  **CRICOS code:** 027274G
  **Campus:** Gardens Point
  **Duration:** 4 Years full-time
  **Credit points:** 432 (full-time standard semester: 54 (Average))
  **Course coordinator:** Dr Jack Wrigley (Mathematics); Mr Andrew Paltridge (Business)
  **Discipline coordinator:** Ms Ros Kent (Accountancy); Dr John Chen (Banking & Finance) and Dr Radhika Lahiri (Economics)

  **Professional Recognition**
  Graduates will be eligible for membership of the Mathematical Society of Australia, the Statistical Society of Australia and, depending on unit selection, the Australian Society of Operations Research. Depending on the choice of major, extended major or specialisation graduates may be eligible for membership of the Economic Society of Australia (Queensland Division), Australian Institute of Management, Financial Services Institute of Australasia (FINSIA), Chartered Secretaries Australia, CPA Australia and the Institute of Chartered Accountants in Australia (ICAA).

  **Course Design**
  The course offers the opportunity to combine Mathematics with a business course majoring in Accountancy, Banking and Finance, which can be combined with an extended major in the same field, or with a double major from any of the Bachelor of Business majors, including Electronic Business.

  **Course Combinations**
  Recommended combinations for the Business component are:
  - Accountancy: Extended major in Professional Accounting
  - Banking & Finance: Extended major in Banking, Financial Economics or Funds Management; or double major in Economics
  - Economics: Extended major in Financial Economics or double major in Banking & Finance

  *Please note that EFB101 Data Analysis for Business which is normally undertaken in the majors of Accountancy, Banking and Finance & Economics, is not required as the content will be covered in the statistics units from the mathematics component of the program.

  Students also note that enrolment in the unit EFB326 Applied Portfolio Management is restricted to students undertaking the Financial Economics specialisation (FES) and the following extended majors: Banking (BFX); Financial Economics (FEX); and Funds Management (FDX).

  **Course Structure**
  **Accountancy Major (For students with SA in Senior Maths B & C)**
  **Year 1, Semester 1**
  - BSB110 Accounting
  - BSB113 Economics
  - MAB101 Statistical Data Analysis 1
  - MAB111 Mathematical Sciences 1B
  **Year 1, Semester 2**
  - AYB121 Financial Accounting
  - BSB119 International and Electronic Business
  - BSB122 Quantitative Analysis and Finance
  - MAB112 Mathematical Sciences 1C
  - MAB210 Statistical Modelling 1
  **Year 2, Semester 1**
  - AYB220 Company Accounting
  - BSB111 Business Law and Ethics
  - MAB311 Advanced Calculus
  - MAB313 Mathematics of Finance
  **Year 2, Semester 2**
  - AYB221 Computerised Accounting Systems
  - BSB126 Marketing
  - MAB220 Computational Mathematics 1
  - Mathematics Elective (Level 2 or 3)
  - Business Double Major / Extended Major / Specialisation Unit
  **Year 3, Semester 1**
  - AYB225 Management Accounting
  - BSB115 Management, People and Organisations
  - MAB312 Linear Algebra
  - Mathematics Elective (Level 2 or 3)
  - Business Double Major / Extended Major / Specialisation Unit
  **Year 3, Semester 2**
  - BSB114 Government, Business and Society
  - Mathematics Elective (Level 2 or 3)
  - Mathematics Elective (Level 2 or 3)
  - Business Double Major / Extended Major / Specialisation Unit
  **Year 4, Semester 1**
  - AYB301 Auditing
  - Mathematics Elective (Level 2 or 3)
  - Mathematics Elective (Level 2 or 3)
  - Mathematics Elective (Level 2 or 3)
  - Business Double Major / Extended Major / Specialisation Unit
  **Year 4, Semester 2**
  - Mathematics Elective (Level 2 or 3)
  - Mathematics Elective (Level 2 or 3)
  - Business Double Major / Extended Major / Specialisation Unit
  **Business Units**
  Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units

  **Course Structure**
  **Accountancy Major (For students with SA in Senior Maths B only)**
  **Year 1, Semester 1**
  - BSB110 Accounting
  - BSB113 Economics
  - MAB100 Mathematical Sciences 1A
  - MAB101 Statistical Data Analysis 1
  **Year 1, Semester 2**
  - AYB121 Financial Accounting
BSB122 Quantitative Analysis and Finance
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C
MAB210 Statistical Modelling 1

Year 2, Semester 1
AYB220 Company Accounting
BSB111 Business Law and Ethics
MAB311 Advanced Calculus
MAB313 Mathematics of Finance

Year 2, Semester 2
AYB221 Computerised Accounting Systems
BSB126 Marketing
MAB220 Computational Mathematics 1
Mathematics Elective (Level 2 or 3)
Business Double Major / Extended Major / Specialisation Unit

Year 3, Semester 1
AYB225 Management Accounting
BSB115 Management, People and Organisations
MAB312 Linear Algebra
Mathematics Elective (Level 2 or 3)
Business Double Major / Extended Major / Specialisation Unit

Year 3, Semester 2
BSB114 Government, Business and Society
Mathematics Elective (Level 2 or 3)
Business Double Major / Extended Major / Specialisation Unit

Year 4, Semester 1
AYB301 Auditing
Mathematics Elective (Level 2 or 3)
Mathematics Elective (Level 2 or 3)
Business Double Major / Extended Major / Specialisation Unit

Year 4, Semester 2
Mathematics Elective (Level 2 or 3)
Mathematics Elective (Level 2 or 3)
Business Double Major / Extended Major / Specialisation Unit

Note:
Students must select BSB119 International & Electronic Business to replace one of the Mathematics Electives.

Students should refer to the BS56 Course Notes entry for information on double major/extended major/specialisation units

Course Structure
Banking and Finance Major (for students with SA in Senior Maths B & C)

Year 1, Semester 1
BSB110 Accounting
BSB113 Economics
MAB101 Statistical Data Analysis 1
MAB111 Mathematical Sciences 1A

Year 1, Semester 2

BSB111 Business Law and Ethics
Mathematics Elective (Level 2 or 3)
Mathematics Elective (Level 2 or 3)
Mathematics Elective (Level 2 or 3)
Business Double Major/Extended Major/Specialisation

Year 4, Semester 2
Mathematics Elective (Level 2 or 3)

Mathematics Elective (Level 2 or 3)
Business Double Major/Extended Major/Specialisation

Extended Major in Banking
AYB225 Management Accounting
AYB312 Financial Institutions Law
EFB310 Financial Institutions - Control
EFB311 Financial Institutions - Lending
Plus two units from the Banking Extended Major Options listed below:
EFB200 Applied Regression Analysis
EFB308 Finance 3
EFB309 Financial Derivatives
EFB318 Portfolio and Security Analysis
EFB326 Applied Portfolio Management

Extended Major in Financial Economics (for Banking & Finance Major)
EFB200 Applied Regression Analysis
EFB202 Business Cycles and Economic Growth
EFB211 Firms, Markets and Resources
EFB325 Financial Microeconomics
Plus two units from the Financial Economics Extended Major Options list below:
EFB308 Finance 3
EFB309 Financial Derivatives
EFB318 Portfolio and Security Analysis
EFB324 Macroeconomics and Global Financial Markets
EFB326 Applied Portfolio Management

Extended Major in Financial Economics (for Economics Major)
EFB200 Applied Regression Analysis
EFB210 Finance 1
EFB324 Macroeconomics and Global Financial Markets
EFB325 Financial Microeconomics
Plus two units from the Financial Economics Extended Major Options list below:
EFB201 Financial Markets
EFB326 Applied Portfolio Management
EFB327 Econometrics of Financial Markets
EFB328 Public Economics and Finance

Extended Major in Funds Management
AYB225 Management Accounting
EFB308 Finance 3
EFB309 Financial Derivatives
EFB318 Portfolio and Security Analysis
Plus two units from the Funds Management Extended Major Options list below:
AYB312 Financial Institutions Law
EFB200 Applied Regression Analysis
EFB310 Financial Institutions - Control
EFB311 Financial Institutions - Lending
EFB326 Applied Portfolio Management

Extended Major in Professional Accounting
AYB223 Law of Business Associations
AYB325 Taxation Law
EFB102 Economics 2
EFB210 Finance 1
AYB311 Financial Accounting Issues
AYB321 Strategic Management Accounting

Course Structure
Mathematics Units
Level 2 units
MAB311 Advanced Calculus
MAB312 Linear Algebra
MAB313 Mathematics of Finance
MAB314 Statistical Modelling 2
MAB315 Operations Research 2
MAB413 Differential Equations
MAB414 Applied Statistics 2

MAB420 Computational Mathematics 2
MAB422 Mathematical Modelling
MAB480 Introduction to Scientific Computation
MAB481 Visualisation and Data Analysis

Level 3 units
MAB521 Applied Mathematics 3
MAB522 Computational Mathematics 3
MAB523 Introduction to Quality Management
MAB524 Statistical Inference
MAB525 Operations Research 3A
MAB526 Statistical Science 3
MAB613 Partial Differential Equations
MAB621 Discrete Mathematics
MAB623 Financial Mathematics
MAB624 Applied Statistics 3
MAB625 Operations Research 3B
MAB640 Industry Project
MAB672 Advanced Mathematical Modelling
MAB681 Advanced Visualisation and Data Analysis

Notes:
MAB311 Advanced Calculus and MAB312 Linear Algebra are mandatory for students who commenced in 2004 onwards. They can be taken in a different semester 1 to that suggested in the programs above.

For students commencing in 2004 onwards, the units MAB523 Introduction to Quality Management and MAB621 Discrete Mathematics do not contribute to the mandatory 48 credit points minimum from Level 3 Mathematics units. This does not apply for students who commenced prior to 2004.

Bachelor of Mathematics/Bachelor of Information Technology IF58

Award title: Bachelor of Mathematics/Bachelor of Information Technology
CRICOS code: 020327M
Campus: Gardens Point
Duration: 4 Years full-time
Credit points: 420 (Note: The minimum course load per semester required for full-time enrolment may be more than 36 credit points)

Course coordinator: Professor Helen MacGillivray (Science)
Discipline coordinator: Dr Gary Carter (Mathematics), Ruth Christie (Information Technology)

Professional Recognition
On graduation, students will be eligible for membership of the Mathematical Society of Australia, the Statistical Society of Australia Inc and, depending on unit selection, the Australian Society for Operations Research. Graduates of the Bachelor of Information Technology meet the knowledge requirement for admission to the Australian Computer Society.

Course Design
The double degree offers a foundation in mathematics and information technology in the first year. Students will then select integrated strands combining units from the areas of applicable mathematics, computational mathematics, operations research, statistics, or financial mathematics with a combined major in Data Communications and Software Engineering.

Cooperative Education Program
An optional one-year period of paid work experience in an area of information technology is available to eligible full-
time students. The Cooperative Education Program is a joint venture between employers and educators to better prepare students for employment upon graduation. Companies that QUT’s Cooperative Education students have worked with include Energex, Boeing, CITEC, Global Banking and Securities Transaction, various Queensland Government departments, Dialog, TABQ, RACQ and Sun Microsystems.

Course Structure

For students with four semesters of Senior Mathematics B and Senior Mathematics C

For students with four semesters of Senior Mathematics B and Senior Mathematics C (or equivalent) with an exit assessment of at least Sound Achievement in both

Year 1, Semester 1
ITB001 Problem Solving and Programming
ITB004 Database Systems
MAB111 Mathematical Sciences 1B
MAB112 Mathematical Sciences 1C

Year 1, Semester 2
ITB002 IT Professional Studies
ITB003 Object Oriented Programming
ITB005 Systems Architecture
MAB210 Statistical Modelling 1
MAB220 Computational Mathematics 1

MAB525 Operations Research 3A
MAB526 Statistical Science 3
MAB580 Scientific Computation
MAB613 Partial Differential Equations
MAB621 Discrete Mathematics
MAB623 Financial Mathematics
MAB624 Applied Statistics 3
MAB625 Operations Research 3B
MAB640 Industry Project
MAB672 Advanced Mathematical Modelling
MAB681 Advanced Visualisation and Data Analysis

Notes:
For students commencing in 2004 onwards, the units MAB311 Advanced Calculus and MAB312 Linear Algebra are mandatory. The suggested locations can be swapped.
For students commencing in 2004 onwards, the units MAB523 Introduction to Quality Management and MAB621 Discrete Mathematics do not contribute to the mandatory 48 credit points minimum from Level 3 Mathematics units.

All Mathematics units have 4 contact hours per week.

Information Technology Elective Unit List
ITB007 Web Development
ITB009 Core Project Initiation
ITB010 Core Project Implementation
ITB218 Applications Programming
ITB222 Systems Analysis and Design
ITB223 Software Development with ORACLE
ITB228 Enterprise Systems
ITB229 Database Design
ITB232 Database Management
ITB230 Project
ITB233 Enterprise Systems Applications
ITB237 Advanced Databases
ITB239 Enterprise Data Mining
ITB241 Information Technology Management
ITB245 R/3 System Administration
ITB254 Interactivity Design
ITB257 Multimedia Systems
ITB259 Advanced Multimedia Systems
ITB260 E-Commerce Site Development
ITB264 Information Systems Consulting
ITB266 Information Management
ITB267 Business Analytics
ITB272 Information Technology Project Management
ITB292 Enterprise Architecture
ITB293 Java for Electronic Commerce Applications
ITB294 Information Quality
ITB295 XML: Data and Document Processing
ITB296 Information Systems Theory and Applications
ITB297 Web Site Design
ITB298 Business Process Engineering
ITB299 Workflow Management
ITB322 Information Resources
ITB330 Information Issues and Policy
ITB341 Strategic Information And Knowledge Management
ITB710 Fundamentals of Computer Science
ITB711 Programming Abstraction
ITB712 Software Engineering Studies
ITB713 Advanced Java Programming
ITB715 Web Services
ITB716 Advanced Web Applications Development
ITB717 Enterprise Software Architecture
ITB720 Internet Protocols and Services
ITB721 Unix Network Administration
ITB722 Network Planning and Deployment
ITB723 Wireless and Mobile Devices
ITB730 Information Security Fundamentals
ITB731 Security Technologies
ITB732 Cryptology and Protocols
ITB733 Network Security
ITB740 Agent Based Software Engineering
ITB741 Information Retrieval Technology
ITB742 Computational Intelligence
ITB743 Artificial Intelligence
ITB744 Computer Architecture
ITB745 Operating Systems
ITB746 Modelling and Animation Techniques
ITB747 Real Time Rendering Techniques
ITB748 Configurable Computing
ITB749 Scientific Programming
ITS701 Ccna 1 & 2: Internetworking and Routing Basics
ITS702 Ccna 3 & 4: Switching and Wide Area Networking
ITS703 Ccnp 1: Advanced Routing
ITS704 Ccnp 2: Remote Access Networks
ITS705 Ccnp 3: Multilayer Switching
ITS706 Ccnp 4: Network Troubleshooting
ITS707-1 Securing Cisco Hardware
MAB281 Mathematics for Computer Graphics

Special Topics may be available. Please check with the relevant School for further information.

- Bachelor of Music/Bachelor of Education (Secondary) IX07

Award title: Bachelor of Music/Bachelor of Education (Secondary)
CRICOS code: 020319M
Campus: Kelvin Grove and Carseldine
Duration: 4 years full-time
Credit points: 432 (full-time standard semester: 54 (average). (Note that the minimum enrolment for full-time status varies each year.)
Course coordinator: Creative Industries: Associate Professor Adrian Thomas; Education Coordinator: Dr Peter Bond
Discipline coordinator: Music: Mr Brad Millard

Professional Recognition
Graduates are eligible for registration as teachers in Queensland through the Board of Teacher Registration
As soon as you enter your enrolment program for the course, you must submit your Blue Card application to the QUT Student Centre immediately. You must hold a Blue Card to undertake activities in any unit which involves contact with children, including the required field studies blocks.
If you do not apply for a Blue Card, immediately upon enrolment in the course and allow sufficient time for the police check and issuing of the Card, you will be unable to participate in the required activities and may need to be withdrawn from the unit(s) and incur both financial and academic penalty. It may take up to 8 weeks for the Commission to issue the Card. The application form is available at bluecard.qut.com.

Second Teaching Area - Instrumental Music

Year 1, Semester 1
Creative Industries Core Unit
KMB120 Music Performance 1
KMB130 Core Musicianship 1
KMB105 Music and Sound Technology
Choose one unit from List E

**Semester 2**
KMB113 Multi-Instrumental Music A
KMB107 Sound and Image
KMB002 Music and Spirituality
KMB212 Arranging
KMB005-2 Group Music
KMB213 Multi-Instrumental Music B

Education Component

**Year 3, Semester 2**
EDB002 Teaching and Learning Studies 2: Development and Learning
EDB031 Secondary Field Studies 1: Development and Learning in the Field
KMB201 Music (Secondary) Curriculum Studies 1
Curriculum Studies 1 Y

**Year 3, Semester 2**
EDB003 Teaching and Learning Studies 3: Practising Education
EDB032 Secondary Field Studies 2: Practising Education in the Field
KMB202 Music (Secondary) Curriculum Studies 2
Curriculum Studies 2Y

Year 4, Semester 1
EDB004 Teaching and Learning Studies 4: Inclusive Education
EDB033 Secondary Field Studies 3: Immersion in Inclusive Educational Practices
KMB203 Music (Secondary) Curriculum Studies 3
Curriculum Studies 3Y

Year 4, Semester 2
EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
EDB034 Secondary Field Studies 4: Professional Work of Teachers - Induction into the Field
EDB035 Internship (Secondary)
Education Elective

Curriculum Studies - Second Teaching Area

Curriculum Studies 1
KVB301 Visual Arts Curriculum Studies 1
KTB201 Drama Curriculum Studies 1
CLB018 English Curriculum Studies 1
CLB024 Film and Media Curriculum Studies 1
CLB036 LOTE Curriculum Studies 1
CLB054 Social Education Curriculum Studies 1
KMB101 Music (Primary/Instrumental) Curriculum Studies 1

Curriculum Studies 2
KVB302 Visual Arts Curriculum Studies 2
KTB202 Drama Curriculum Studies 2
CLB019 English Curriculum Studies 2
CLB025 Film and Media Curriculum Studies 2
CLB028 Geography Curriculum Studies 2
CLB031 History Curriculum Studies 2
CLB037 LOTE Curriculum Studies 2
KMB102 Music (Primary/Instrumental) Curriculum Studies 2

Curriculum Studies 3
KVB303 Visual Arts Curriculum Studies 3
KTB203 Drama Curriculum Studies 3
CLB020 English Curriculum Studies 3
CLB026 Film and Media Curriculum Studies 3
CLB056 Social Education Curriculum Studies 3
CLB038 LOTE Curriculum Studies 3
KMB103 Music (Primary/Instrumental) Curriculum Studies 3

Second Teaching Area Units

English (48 credit points)
Required Unit
CLB320 Studies In Language
Up to 12 credit points from Introductory Level Units:
KCB102 Media and Society: From Printing Press to Internet
KWB001 Introduction to Literary Theory and Cultural Studies
No less than 24 credit points from Advanced Level Units
CLB321 Writing Workshop
CLB322 Literature In Secondary Teaching
CLB323 Teaching Adolescent Literature
KWB002 Ozlit
KWB206 Youth and Children's Writing
KWB005 Wonderlands: Literature and Culture in the 19th Century
KWB006 Popular Fictions, Popular Culture
KWB003 Modern Times (Literature and Culture in the 20th Century)
KWB004 Shakespeare, Then and Now

Film and Media (48 credit points)
Four units from:
KPB101 Foundations of Film and Television Production
KPB102 Film History
KPB103 Film Genres
KPB105 Narrative Production
KPB108 Media Text Analysis
KPB205 Documentary Theory and Practice

Geography (48 credit points)
Up to 24 credit points from Introductory Units
HHB127 Environment And Society
HHB107 World Regions
HHB251 Australian Resource Management
No less than 24 credit points from Advanced Units
HHB250 Australian Geographical Studies
HHB228 Environmental Hazards
HHB229 Windows On Japan
HHB269 Ethics, Technology And The Environment
HHB244 Southeast Asia In Focus

History (48 credit points)
Note: Students should seek to select units from each of areas of Australian, Asian, European and the Ancient World. Students should check with QUT Carseldine Faculty on availability of units.
Up to 24 credit points from Introductory Units
HHB121 Interpreting The Past
HHB122 Colonialism And Independence In Asia Pacific
No less than 24 credit points from Advanced Units
HHB238 Asian Cultures And Societies
HHB245 Australia And The South Pacific
HHB315 Sex And Drugs In South-East Asia
HHB248 The USA and The Asia Pacific Region
HHB259 War And Revolution In Europe 1914-1945
HHB246 Modern China
HHB237 Brisbane in the Twentieth Century
HHB253 Conspiracy And Dissent In Australian History
HHB257 The Classical World
HHB258 Foundations of Modern Europe
HHB260 Nations And Nationalism In Modern Europe
HHB261 Medieval Europe
HHB109 Australian Historical Studies
HHB239 Korean Culture And Societies

Section Four

Unit Synopses

Unit Coding and Numbering

Unit Synopses
This section provides synopses of the units offered in the academic programs section.

The synopses are presented in alpha-numeric order according to their codes.

UNIT CODING AND NUMBERING
The unit code is of the format XXX999. The first two characters indicate the faculty or school administering the unit. The third character indicates the level of the course in which the unit is normally taught.

UNIT CODING
• AD Design and Built Environment
• AM Advertising, Marketing and Public Relations
• AR Design and Built Environment
• AY Accountancy
• BE Built Environment and Engineering
• BN Built Environment and Engineering
• BS Business
• CE Civil Engineering
• CL Cultural and Language Studies in Education
• CN Construction Management
• CT Caboolture
• DB Design and Built Environment
• DE Design and Built Environment

• Ext = External
• GP = Gardens Point
• KG = Kelvin Grove

SEMESTER CODING
• 1 = Semester 1
• 2 = Semester 2
• 3 = Summer Program

PREREQUISITE AND COREQUISITE UNITS
For definitions of the terms prerequisite and corequisite unit(s), refer to Rule 12 of the Student Rules section.

Disclaimer
Some schools have indicated the availability of their units for semester 1 (1), semester 2 (2), or Summer Program (3). These indications are preliminary only and are subject to change.
UNIT SYNOPTICES

ADB003 Architectural Design 3
Design theory: physical context, landscape, social context, ethics and values. This unit integrates contextual studies, technology, specifically building construction and design for climate. Projects are generally of domesticscale.
Courses: BN31, AR48
Prerequisites: ADB002
Corequisites: ADB011, ADB013
Contact hours: 6 per week
Campus: GP
Credit points: 12
Semester: 1

ADB004 Architectural Design 4
Design theory: physical context, landscape, social context, ethics and values. This unit involves the integration of contextual studies and of technology, specifically building con-
struction and design for climate. Projects are generally of domesticscale.
Courses: BN31, AR48
Prerequisites: ADB003
Contact hours: 6 per week
Campus: GP
Credit points: 12
Semester: 2

ADB005 Architectural Design 5
Design theory, sustainability, sociological and contextual concerns related to particular design
problems. The unit often includes a 'community service' project, generally a collabora-
tive, participatory design with selected community groups as 'client'.
Courses: BN31, AR48
Prerequisites: ADB004
Corequisites: ADB013
Contact hours: 6 per week
Campus: GP
Credit points: 12
Semester: 1

ADB006 Architectural Design 6
This unit includes design theory, urban sustain-
sability, sociological and contextual concerns related to particular design problems.
Courses: BN31, AR48
Prerequisites: ADB005
Contact hours: 6 per week
Campus: GP
Credit points: 12
Semester: 2

ADB007 Architectural Design 7
The content of the unit is project-dependent.
Courses: AR48
Prerequisites: ADB006
Corequisites: ADB006
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 1

ADB008 Architectural Design 8
The content of the unit is project-dependent.
Courses: AR48
Prerequisites: ADB007
Corequisites: ADB026
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 2

ADB009 Architectural Design 9
Design projects and associated lectures and presentations relevant to developing the unit objectives. A high degree of resolution is expected in design projects in intellectual conceptualisation and strategy, spatial organ-
isation, form, detail and technical understanding. Building economics, services, con-
struction technology, theory and critical analysis will be integrated into the unit.
Courses: AR48
Prerequisites: ADB008
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 1

ADB011 Contextual Studies 1
The course considers the emergence of modern architecture in Europe and America in the late nineteenth and early twentieth century, and the development of the ideas and proposals arrived at through the heroic phase of the 1920s and 30s. The dominance of modern architecture following the war and the early critiques will be examined. An analysis of the emergence of postmodern thought and the various architectural direc-
tions being pursued throughout the world in the late twentieth century to find viable and meaningful designs will be present.
Courses: BN31, AR48
Prerequisites: ADB931
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

ADB012 Contextual Studies 2
Australian and Oceanic architecture is examined from pre-European settlement to the present. The work is looked at in the context of European and American influences and the Asian-Oceanic context. The examples are studied in relation to broad social, his-
torical and aesthetic backgrounds. Course work will include an introduction to research of local architectural history and visits to key buildings.
Courses: BN31, AR48
Prerequisites: ADB011
Contact hours: 2 per week
Campus: GP
Credit points: 12
Semester: 2

ADB013 Contextual Studies 3
This unit looks at the architectural traditions of the diverse cultures of Asia and examines how traditional architecture is shaped by culture and society. It focuses on the geo-
graphic regions of the continent including China, Japan and Korea and that of South Asia including India, Nepal and Sri Lanka. Design of cities across geographic regions, including Europe, America and Asia are studied from an historical and contemporary perspective to understand city form, culture, politics, economics and function, ecology and sustainability.
Courses: AR48
Prerequisites: ADB012
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

ADB014 Contextual Studies 4
This unit aims to consolidate for students a theoretical contemporary framework in which to locate key moments in contemporary ar-
chitectural and cultural production from di-
verse contexts. It introduces students to contemporary debates and endeavours to demystify the language of contemporary architectural ideas and aesthetics in order to promote self-directed interest in contempo-
rary theory and criticism.
Courses: AR48
Prerequisites: ADB013
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

ADB022 Technology and Science 2
This unit considers detail domestic scale building, basic design for climate and energy conservation. The implications of these prin-
ciples on the form and fabric of buildings are illustrated.
Courses: BN31, AR48
Prerequisites: ADB021
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

ADB023 Technology and Science 3
This unit considers in detail domestic scale building and design for natural ventilation, lighting, acoustics and solar controls. The implications of these principles on the form and fabric of buildings are illustrated.
Courses: BN31, AR48
Prerequisites: ADB022
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

ADB024 Technology and Science 4
This unit addresses building construction. It includes an overview of construction sys-
tems used in medium to high-rise commer-
cial buildings, including analysis of the prin-
ciples, advantages, disadvantages and de-
tails of such systems. It also includes an integrated overview of medium to high-rise building services including hydraulics, light-
ing, electrical services, mechanical equip-
ment and vertical transportation.
Courses: AR48
Prerequisites: ADB024
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

ADB025 Technology and Science 5
This unit addresses building construction. It includes an overview of construction sys-
tems used in medium to high-rise commer-
cial buildings, including analysis of the prin-
ciples, advantages, disadvantages and de-
tails of such systems. It also includes an integrated overview of medium to high-rise building services including hydraulics, light-
ing, electrical services, mechanical equip-
ment and vertical transportation.
Courses: AR48
Prerequisites: ADB025
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

ADB031 Professional Studies 1
This unit includes theory and some estimat-
ing and specifications techniques. The the-
ory includes an analysis of various concepts of professionalism, characteristics of profes-
sions and a discussion of various contempo-
rary critiques of architectural practice. Esti-
mating involves choice of technique, accur-
acy, square and cube rates, cost control, feasibility and quantity surveying. The role of specification is included.
Courses: AR48
Prerequisites: ADB031
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

ADB033 Professional Studies 3
This is a self-paced national course (BPA 2) prepared by the Royal Australian Institute of Architects as a Continuing Education pro-
gram which will attract certification from the RAIA. The course covers ethical, administra-
tive and management issues in relation to architectural practice.
Courses: AR48
Prerequisites: ADB932
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

ADB051 Architectural Research 1
This unit provides students with an overview of research methodology. Students examine the differences between various research methods and products. A number of issues are addressed in the chosen area of re-
search including definition of study area, research aims and objectives, initial proposi-

Q U T H A N D B O O K  2 0 0 6  •  P A G E  5 7 5
tion, structuring research approach, analysis and preliminary conclusions based on the literature review.

Courses: AR48
Prerequisites: AR48
Contact hours: 4 per week  Credit points: 12  Semester: 1  
► ADB052 Architectural Research 2
Students continue their studies on an approved topic commenced in Architectural Research 1. By means of a thesis presentation, students demonstrate their ability to define and logically argue propositions, and to conduct research to prove its validity by means of a well-constructed research project that includes critical analysis.

Courses: AR48
Prerequisites: ADB051
Contact hours: 4 per week  Credit points: 12  Semester: 1  
► ADB053 Architectural Project
The major project, selected by students and approved by the unit coordinator, will have a focus work study that demonstrates the particular skills and interests of the individual. This work should be completed to a highly developed and resolved standard.

Courses: AR48
Prerequisites: ADB009, ADB067
Contact hours: 4 per week  Credit points: 12  Semester: 2  
► ADB063 Architectural Applications 3
The unit is used to increase the student’s experience in applying theory to architectural problems, including the following: site analysis, levels and contours; practical experiments in Design Science; construction detailing and documentation through drawings, models and computer simulation.

Courses: BN31
Prerequisites: ADB062
Contact hours: 3 per week  Credit points: 12  Semester: 1  
► ADB064 Architectural Applications 4
This unit is used to increase the student’s experience in applying theory to architectural problems. It includes exercises in construction detailing and documentation.

Courses: BN31
Prerequisites: ADB063
Contact hours: 4 per week  Credit points: 12  Semester: 1  
► ADB065 Architectural Applications 5
The unit is used to increase the student’s experience in applying theory to architectural problems. It includes exercises in construction detailing and documentation.

Courses: BN31
Prerequisites: ADB064
Contact hours: 3 per week  Credit points: 12  Semester: 1  
► ADB066 Architectural Applications 6
The unit is used to increase the student’s experience in applying theory to architectural problems. It includes exercises in construction detailing and documentation.

Courses: BN31
Prerequisites: ADB065
Contact hours: 3 per week  Credit points: 12  Semester: 2  
► ADB067 Elective Architectural Applications
This unit provides an opportunity for students to develop and strengthen areas of interest in a program of their choice, to be approved by the Course Coordinator. For example, it may be used to develop the Architectural Research 2 program to the presentation of a dissertation or enhance knowledge and skills in other subject areas.

Courses: AR48
Contact hours: 3 per week  Credit points: 12  Semester: 1  
► ADB103 Interior Design 3
This unit includes an introduction to the theoretical constructs of person-environment interaction and modes of interaction incorporating theories from disciplines including philosophy, psychology, social science and cultural and communication studies. Other conceptual frameworks are introduced and explored including modernism, postmodernism, feminism and pluralism. Issues of design incorporating site, values, activities and technology are also examined.

Courses: BN31
Prerequisites: ADB102
Corequisites: ADB123  
Contact hours: 6 per week  Credit points: 12  Semester: 1  
► ADB104 Interior Design 4
This unit includes the following areas of study: ethics and topical social issues; the responsibilities of a designer in a contemporary context; application and development of an integrated design approach explicitly informed by theory, philosophy, ethics and current demands and considerations.

Courses: BN31
Prerequisites: ADB103  
Corequisites: ADB124  
Contact hours: 6 per week  Credit points: 12  Semester: 2  
► ADB105 Interior Design 5
This unit includes the following areas of study: designing as practice; a critical approach to design and designing; tools for fostering alternative ways of thinking and imagining person-environment relationships and interaction; the work of national and international designers; future scenarios.

Courses: BN31
Prerequisites: ADB104  
Corequisites: ADB125  
Contact hours: 6 per week  Credit points: 12  Semester: 1  
► ADB106 Interior Design 6
The content covered in this unit includes major aspects covered in the course to date and content identified by the student as significant in their response to the project.

Courses: BN31
Prerequisites: ADB105  
Corequisites: ADB126  
Contact hours: 6 per week  Credit points: 12  Semester: 2  
► ADB123 Interior Technology 2
This unit includes the following topics: documentation; analysis and recording of small-scale commercial interiors; building regulations and their relationship to public responsibility; building materials; sustainability.

Courses: BN31
Prerequisites: ADB122  
Corequisites: ADB124  
Contact hours: 4 per week  Credit points: 12  Semester: 1  
► ADB124 Interior Technology 3
This unit includes the following topics: documentation techniques; sustainable design and construction; services; consultants; codes and standards.

Courses: BN31  
Prerequisites: ADB123  
Contact hours: 4 per week  Credit points: 12  Semester: 2  
► ADB125 Interior Technology 4
This unit includes the following topics: theoretical analysis of interior construction and materials; analysis of partition and furniture systems; comparative analysis of building types; CAD documentation; basic estimating and quoting; and introductory specification writing.

Courses: BN31  
Prerequisites: ADB124  
Contact hours: 4 per week  Credit points: 12  Semester: 1  
► ADB126 Interior Technology 5
This unit includes the following topics: documentation; critical investigation of interior construction processes; environmental system analysis; the interface with consultants, builders and contractors; leasing and other tenancy occupation issues.

Courses: BN31  
Prerequisites: ADB125  
Contact hours: 4 per week  Credit points: 12  Semester: 2  
► ADB132 Design in Society 1
Issues of the international design community are explored in this unit. The historical framework is reassessed in relation to changing technology, communication, transport systems and the advent of shifts in space and time such as virtual reality. The merging of cultures and understandings of design are critiqued in light of their potential to influence contemporary and future designers. Specific attention is given to interior design. Other aspects covered include belief systems and their influence on design and design practice (eg economic rationalism, capitalism, modernism, etc).

Courses: BN31  
Contact hours: 3 per week  Credit points: 12  Semester: 2  
► ADB133 Design in Society 2
Issues covered in this unit include the following: the current context of the contemporary Australian interior designer; theoretical perspectives and exploration of their limitations and potential; relevant legal issues, ethics and professionalism.

Courses: BN31  
Contact hours: 3 per week  Credit points: 12  Semester: 1  
► ADB153 Material Studies
This unit addresses the following topics: textile manufacture and application; interior decorative finishes; building codes and standards relevant to material quality and performance; documentation and specification of finishes and fittings; the relationship between design technology and material selection; the role of contextual frameworks on designers' decisions about materials.

Courses: BN31  
Campus: GP  
Credit points: 12  Semester: 2  
► ADB154 Furniture Studies
This unit addresses the following topics: a focus on visual cues, psychological responses and other interaction factors through an historical analysis of the role of furniture design; furniture and contemporary
and future trends; furniture design and documentation approaches.

Courses: BN31
Credit points: 6

ADB203 Industrial Design 1
Students in this unit focus on studio exercises dealing with a range of different product designs. The following theoretical topics are associated with them: scope of problem solving; special characteristics of design problems; design and application transfer; design heuristic, creativity and innovation and general psychological theories of creativity; visual thinking and the design process; design ethics and culture, and designers' responsibilities toward the environment.

Courses: BN31
Prerequisites: ADB202
Contact hours: 3 per week
Credit points: 12

ADB204 Industrial Design 2
Students in this unit focus on studio exercises dealing with a range of different product designs. The following theoretical topics are associated with them: methodological issues of design; design process and creativity; innovation and product innovation; design ethics and culture; designers' responsibilities toward the environment. The complexity and depth of the design project will increase according to the semester level.

Courses: BN31
Prerequisites: ADB203, ADB224
Contact hours: 6 per week
Credit points: 12

ADB205 Industrial Design 3
Students in this unit focus on studio exercises dealing in depth with the design of products or systems. The emphasis is on an integration of knowledge and skills acquired in the previous semesters. The following theoretical topics are associated with them: methodological issues of design; design process and creative thinking; creativity and product innovation; working with an industry client; interdisciplinary teamwork; design ethics and culture; and the designer's responsibilities toward the environment.

Courses: BN31
Prerequisites: ADB204
Contact hours: 6 per week
Credit points: 12

ADB206 Industrial Design 4
The studio exercises in this unit focus on the design of products or systems in depth. The emphasis is on integration of knowledge and skills acquired in the previous semesters. The following theoretical topics are associated with them: methodological issues of design; design process and creative thinking; creativity and product innovation; working with an industry client; interdisciplinary teamwork; design ethics and culture; and the designer's responsibilities toward the environment.

Courses: BN31
Prerequisites: ADB205
Contact hours: 6 per week
Credit points: 12

ADB226 Industrial Design History Theory and Criticism
This unit addresses the following topics: pre-historical artefacts and their evolutions; innovations in Asia; arts and crafts movements; development of mass-production and its impact on society; social and cultural changes influenced by design; design and politics; ideology of industrialisation.

Courses: BN31
Corequisites: ADB204
Contact hours: 3 per week
Credit points: 12

ADB226 Industrial Design History Theory and Criticism
This unit addresses the following topics: product evolution; Australian inventions; contemporary design; social and cultural changes influenced by design; design and politics; ideology of industrialisation; the meaning of products; designers' responsibilities toward the users and environment; design activity and design knowledge.

Courses: BN31
Corequisites: ADB226
Contact hours: 3 per week
Credit points: 12

ADB233 Manufacturing Technology 1
This unit addresses the following topics: application of engineering mechanisms to products or systems; analysis of the performances of mechanical, electrical, hydraulic and pneumatic mechanisms in relation to particular functions; modelling methods and techniques for determining the behaviour of a system or product; introduction to electronics; plastics manufacturing techniques: the relationships between the properties of material and the industrial processes available for their fabrication. The unit also includes an introduction to technical documentation and communication.

Courses: BN31
Corequisites: ADB921
Contact hours: 4 per week
Credit points: 12

ADB234 Manufacturing Technology 2
This unit addresses the following topics: electronics; plastic; production techniques in relation to different materials; various methods for different finishing operations; various methods for forming; automatic and semi-automatic assembly quality control methods; production cost; technical documentation and communication. Field studies consist of site visits to selected manufacturing industries.

Courses: BN31
Corequisites: ADB233
Contact hours: 4 per week
Credit points: 12

ADB235 Manufacturing Technology 3
This unit addresses the following topics: product analysis; product development strategies; industrial production economics; organisation, planning and technologies required for advanced manufacturing and the impact on product design solutions.

Courses: BN31
Corequisites: ADB234
Contact hours: 4 per week
Credit points: 12

ADB236 Manufacturing Technology 4
This unit addresses the following topics: value analysis, technical documentation and communication. Field studies complement the lecture series.

Courses: BN31
Corequisites: ADB235
Contact hours: 4 per week
Credit points: 12

ADB244 Computer Aided Industrial Design
This unit includes the following topics: an overview of the development of the use of computer Aided Industrial Design (CAID) by industrial designers in the design process; application of CAID to 3D solid modelling concepts; 3D spatial relationships; design documentation; 3D model to 2D engineering drawings; development of skills in the use of CAID for evaluating; documenting and presenting design proposals through computer rendering and animated images.

Courses: BN31
Contact hours: 3 per week
Credit points: 12

ADB245 Computer Aided Industrial Design 2
This unit addresses the following topics: introduction to 3D surface modelling concepts for complex form development and documentation; introduction to NURBS based surface modelling: case studies on CAID as applied to industrial design; application of complex 3D Surface modelling techniques, as applied to design form evaluations and form refinement using rapid prototyping; further development of shading techniques; advanced animation; design documentation.

Courses: BN31
Corequisites: ADB244
Contact hours: 3 per week
Credit points: 12

ADB795-2 Practice experience A
This practice experience partnership with the architectural profession will enable students to increase their skills in the practical application of theory in 'real life' architectural projects. Students need to complete parts 1 and 2 of this unit to achieve the 36 credit points.

Courses: AR48
Credit points: 18

ADB795-1 Practice Experience A
This practice experience partnership with the architectural profession will enable students to increase their skills in the practical application of theory in 'real life' architectural projects. Students need to complete parts 1 and 2 of this unit to achieve the 36 credit points.

Courses: AR48
Credit points: 30

ADB796-2 Practice Experience B
This practice experience partnership with the architectural profession will enable students to increase their skills in the practical application of theory in 'real life' architectural projects. Students need to complete parts 1 and 2 of this unit to achieve the 60 credit points.

Courses: AR48
Credit points: 18
UNIT SYNOPTES

Credit points: 30  Semester: 1, 2, 3
► ADB912 Human Environment 2
The unit focuses on the following: psychosocial issues and privacy, perception, personal space, territoriality, cognition, way finding and cultural diversity.
Courses: BN31
Prerequisites: ADB911
Corequisites: ADB013 (Arch), ADB123
(IntDes)
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB913 Human Environment 3
This unit addresses the following topics: theories of cultural development and social change; consideration of the role of designed artefacts in those processes; political and social theories pertaining to design and development of the built environment; contemporary theories of post-industrialism, post-colonialism and multiculturalism; implications for design for the built environment; the roles and responsibilities of design professionals, historically and in contemporary society.
Courses: BN31, AR48
Prerequisites: ADB912
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB932 Professional Studies 2
This unit offers a self-paced national course (SPA 1) prepared by the RAIA as a basis for the formal examination for registration as an Architect. It covers the context of profession, professional ethics and the range of professional services from engagement to completion of a project. Completion of course will attract RAIA certification.
Courses: AR48
Prerequisites: ADB031
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB941 Elective 1
The student will choose elective units to extend and expand an area of knowledge or experience to develop, in-depth, a particular professional expertise. These units may be drawn from an existing range of units available within the school. The electives are to be approved by the course coordinator.
Courses: BN31
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► ADB942 Elective 2
The student will choose elective units to extend and expand an area of knowledge or experience to develop, in-depth, a particular professional expertise. These units may be drawn from an existing range of units available within the school, faculty or university. The electives are to be approved by the course coordinator.
Courses: BN31
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► ADB943 Elective 3
Elective units chosen will extend and expand an area of knowledge or experience to develop, in depth, a particular professional expertise. Units may be drawn from an existing range of units available within the university and must be approved by the course coordinator.
Courses: BN31, AR48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3
► ADB944 Elective 4
Elective units chosen will extend and expand an area of knowledge or experience to develop, in-depth, a particular professional expertise. Units may be drawn from an existing range of units available within the university and must be approved by the course coordinator.
Courses: BN31, AR48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► ADB107 Interior Design 7
This unit provides students with the opportunity to pursue a topic of personal and professional relevance in consultation with staff. The topic will form the focus of a major design/research project incorporating this unit and ADB108. The unit covers topic identification, qualification and substantiation, context exploration and consolidation.
Courses: AR62
Corequisites: ADB916
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB108 Interior Design 8
This unit provides students with the opportunity to develop an in-depth understanding of an area of interior design of personal and professional relevance in consultation with staff. The unit covers project development and the exploration of associated issues.
Courses: AR62
Prerequisites: ADB107
Corequisites: ADB162
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ADB114 Professional Studies 1
This unit addresses the following topics: the interior design profession, its organisation and theoretical and practical relationship with other professions and disciplines; professionalism incorporating ethics, industry product safety standards and continuing education; specific responsibilities involving brief development; post-occupancy evaluation.
Courses: AR62
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB155 Interior as a Construct 1
Designers require a deep conceptual understanding of the relationship between artefact and culture and they need a vehicle for supporting this development. The focus in this unit is on the conservation of historic interiors and includes: historic interior exemplars; social and cultural identity; conservation; preservation and restoration; relevant charters and policies.
Courses: AR62
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB156 Interior as a Construct 2
In this unit, stage design will be used as a frame-of-reference for exploring various aspects of person-environment interaction such as play and imagining. In addition, the unit provides a basis for exploring notions of temporary, transitory space and virtual reality.
Courses: AR62
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2
► ADB161 Interior Research 1
This unit provides methodological support for the major project in ADB107. It includes the following: empirical research with an emphasis on qualitative research relevant to person-environment interaction; research rigour incorporating attention to validity, reliability and generalisation; advanced information retrieval; literature search and review.
Courses: AR62
Corequisites: ADB107
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1
► ADB162 Interior Research 2
This unit provides methodological support for the major project in ADB108. The ability to undertake empirical research is considered an integral aspect of responsible designing. The unit content covers data collection, analysis and reporting.
Courses: AR62
Corequisites: ADB108
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2
► ADP207 Industrial Design 5
Students in this unit focus on studio exercises dealing in-depth with product or system design. The emphasis is on integration of knowledge and skills acquired in the previous semesters, including the following: design process and creative thinking; applied research, creativity and product innovation; work with a client; multidisciplinary teamwork; product integration and development; design ethics and culture; the designer's responsibilities toward the environment.
Courses: AR61
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► ADP217 Professional Practice and Management
This unit addresses the following topics: the role of professional practice management; management of design projects; types of contracts; design documentation; the role of design administration; liability; design law; intellectual property; designer-client relationships.
Courses: AR61
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ADP218 Advanced Ergonomics
This unit addresses the basics of cognitive ergonomics, product usability evaluation methods and their applications, and case studies.
Courses: AR61
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2
► ADP247 Advanced Computer Aided Industrial Design
This unit introduces parametric based modeling, hybrid based modeling, application of rapid prototyping and rapid tooling to the design process, and the application of concurrent engineering to the design process.
Courses: AR61
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ADP267 Industrial Design Research 1
The unit allows applied research to be selected by a student, approved and supervised by the industrial design staff. External specialists may be involved as required.
Courses: AR61
Contact hours: 5 per week  Campus: GP

Q U T H A N D B O O K  2 0 0 6  •  P A G E  5 7 8
Buildings.

This unit depends on the topic selected by a student in the previous semester. Students are responsible for the project as a part of their project work, which will be approved and supervised by the industrial design staff.

Courses: AR61
Prerequisites: ADP207, ADP267
Corequisites: ADP269
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1, 2

► ADP269 Industrial Design Research 2B

This unit depends on the topic selected by a student in the previous semester. Students are responsible for the project as a part of their project work, which will be approved and supervised by the industrial design staff.

Courses: AR61
Prerequisites: ADP207, ADP267
Corequisites: ADP269
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1, 2

► ADP932 Professional Studies 2

This unit offers a self-paced national course (CUHK 200) prepared by the RAIA as a basis for the formal examination for registration as an Architect. It covers the context of profession, professional ethics, and the range of professional services from engagement to completion of a project. Completion of course will attract RAIA certification.

Courses: AR62
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

► ADP943 Elective 3

The student chooses elective units to extend and expand an area of knowledge or experience to develop, in depth, a particular professional expertise. These units may be drawn from an existing range of units available within the faculty and university. The electives are to be approved by the course coordinator.

Courses: AR61
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► ADZ005 Architectural Design 5

Design theory, sustainability, sociological and contextual concerns related to particular design problems. The unit often includes a ‘community service’ project, generally a collaborative, participatory design with selected community groups as ‘client’.

Credit points: 12
Campus: City University of Hong Kong
Semester: 1, 2

► ADZ006 Architectural Design 6

This unit includes design theory, urban sustainability, sociological and contextual concerns related to particular design problems.

Credit points: 12
Campus: City University of Hong Kong
Semester: 1, 2

► AMB201 Marketing and Audience Research

This unit provides an introduction to the conduct and evaluation of marketing and audience research across the disciplines of advertising, marketing and public relations. Class members explore how field studies, surveys and experimental research are employed to support advertising, marketing and public relations information needs. The unit provides an overview of research process, research design, methods of data collection and analysis and the development of research proposals to support design and making. Class members also explore issues related to research on media audiences, research ethics and the management of client briefings.

Courses: BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BS8126 or BS8116 or BS8117 or CTB126
Incompatible with: MB305, MGB220 or COB334 or CTB201
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2, 3

► AMB202 Integrated Marketing Communication

In past decades many organisations separated the different forms of marketing communication that convey their corporate and marketing messages. They developed separate plans for their advertising, public relations, direct marketing, personal selling and sales promotion with separate goals, objectives, strategies and budgets. Today many companies recognise the concept of integrated marketing communication which integrates these different functions along with other aspects of the marketing mix that communicate with stakeholders and customers. Integrated marketing communication requires a “total” approach to planning marketing communication programs and coordinating communication strategies in support of overall brand and product/service marketing objectives.

Courses: BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BS8126 or BS8116 or BS8117 or CTB126
Incompatible with: COB207, MGB309
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

► AMB203 Independent Study

An opportunity for advanced level graduate students to undertake individual research in an area which is complementary to their course work.

Courses: BS56
Credit points: 12
Contact hours: 3 per week
Campus: GP

► AMB220 Advertising Theory and Practice

This unit serves as an introduction to later units in the advertising major and gives learners an overview of the advertising industry and the management of the advertising function. The unit traces the interrelationship of the institutions of advertising, the advertisers, the advertising agencies and the media. It introduces research and details methods of determining advertising objectives, budgets, establishing target audiences, interpreting audience ratings and circulation figures, and enables learners to gain a pre-
UNIT SYNOPSIS

liminary understanding of the creative functions of the advertising industry. It also shows the ethical and legal side of advertising and its important role in society and the economy.

Courses: BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB126 or BSB116 or BSB117 or AMB210 or 48 credit points of approved prior study for non-Bachelor of Business students only
Incompatible with: COB308
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB221 Advertising Copywriting

There are two parts to any copywriting process: the thinking and the writing. In the first part, students learn to solve advertising problems through an understanding of the prospect, the product and the formulation of incisive creative strategy. In the second part, creative thinking techniques are applied and advertising concepts emerge from the creative strategy. Students’ thinking and writing skills are refined in weekly workshops and culminate in a group project.

Courses: BS56, IF05, IF27, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB220 or COB308
Incompatible with: COB304
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB222 Media Planning

This unit introduces the qualitative and quantitative factors affecting media selection and use by advertisers. It covers the costing and scheduling of media, market targeting, measuring media exposure, media comparisons and trends. In-depth analysis of advertising. Learners will have an understanding of the characteristics of each. The application of the concepts of media decision making, media strategy and research to the development of a media plan are emphasised.

Courses: BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB220
Incompatible with: COB317
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB230 Internet Promotion

This subject addresses an important area of business activity and explores the way in which the Internet is changing marketing practice. The foundations of promotion are examined and applied online. The nature, history, and social implications of the Internet are explored. The promotional mix is analysed with a strong focus on developing successfully integrated websites for organisations. Learners will develop skills in strategic planning, creative strategy, design, web development as it relates to advertising and promotion, research and campaign evaluation. Learners will gain important skills in the planning, developing and marketing of websites.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB112 and BSB117; or BSB126.
Incompatible with: COB218
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB231 Marketing Communications Regulations and Ethics

This unit uses a case study approach and starts from the fundamentals of legal compliance through trade practices and fair trading legislation, then moves to the adoption and adherence of the various industry based and professional codes. It examines regulatory models in sunrise industries such as broadcasting and telecommunications as well as the problems of cross-jurisdictional regulation posed by Internet based commerce. It offers students the opportunity to develop generic attributes in critical thinking, problem solving, and ethical activity.

Courses: BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: AMB202 or AMB220 or AMB240 or AMB260
Incompatible with: COB307
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 2

► AMB240 Marketing Planning and Management

This unit extends the student’s knowledge of the fundamental marketing concepts and theories introduced in the faculty core unit in marketing, by adding further breadth and depth of knowledge of marketing and developing skills in the application of this knowledge to marketing planning and management within the business environment. Emphasis is on the role of the marketing manager at the product management level in undertaking analysis, planning, implementation and control of marketing activities.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB126 or CTB126
Incompatible with: MIB217 or CTB240
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB241 E-Marketing Strategies

E-Business and mobile commerce technologies have emerged as defining technologies for companies in the 21st century. This unit focuses on e-marketing applications and strategies and the marketer’s role in developing new applications that integrate new and old economies. Drawing on their knowledge of the diverse applications of technology in commercialisation. It also be addressed.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB116 or BSB126; and AMB240
Incompatible with: MIB224
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB250 Business to Business Marketing

This unit addresses the special characteristics of business markets and Business-to-Business (B2B) marketing programs. It involves the study of organisational buyer behaviour and the special customer/client relationships that form an important part of the Business-to-Business marketing process. Business markets constitute a powerful and essential part of the world economy, being a preliminary source for retailing and manufacturing operations and the force behind major services sectors in supplying government and non-government services including health and education both domestically and internationally.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: AMB202 or AMB240 or CTB240
Incompatible with: MIB220 or MIB219
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1

► AMB251 Innovation and Market Development

This unit covers the dynamics of product and service innovation within the marketing function of an organisation. Products are defined in the broadest sense as both tangible and intangible and include the various categories of consumer and industrial products and services. The course covers product market analysis, the product/service development process, design, innovation, research and testing, new product financial analysis, branding and packaging, and new product commercialisation.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: BSB126 or BSB116
Incompatible with: MIB227
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB260 Public Relations Theory and Practice

This unit introduces the student to the theory and research that serves as the foundation of the practice of public relations. The unit surveys the history of the discipline, the theories on which the discipline is based, and current models of practice. The unit focuses on understanding how to research and analyse the opinions of organisational publics in order to develop mutually beneficial relationships with external publics.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB116 or BSB117 or MIB216
Incompatible with: COB325
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB261 Media Relations and Publicity

This unit will reflect the strong emphasis within public relations practice of media relations. It will introduce students to the theory of media effects and the role of mass media in public opinion formation and how these concepts contribute to campaign planning. It will also provide students with practical instruction in the development of media tools including media releases, media kits and media plans, and the use of publicity events in campaigns. New/interactive media will also be addressed.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB260
Incompatible with: COB329
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB262 Public Relations Writing

This unit will introduce students to a range of public relations writing needs. With heavy practical emphasis, the students will create a
UNIT SYNOPSES

substantial portfolio of writing across controlled and uncontrolled media. Writing for print and electronic forms is covered as well as new/interactive media. The writing process will be examined from the perspective of audience needs and emphasis will be placed on the research components of the writing exercise as well as the writing/rewriting cycle.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB320
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► AMB310 Internship
Provides the student with experience of professional practice in a suitable company where they actively work on a part-time basis. Students undertake a preferred study program within the Advertising, Marketing or Public Relations framework. Students are required to submit a number of reports reflecting the theoretical concepts acquired during the degree program, and how they might be applied in practice. Students must obtain the approval of the major coordinator prior to enrolling in this unit.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: AMB221 and AMB222 or AMB241 or AMB261, AMB262
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► AMB320 Advertising Management
This unit takes the perspective of the Advertising Manager and addresses the uses of research in developing, implementing, managing, and assessing a successful advertising campaign. In Advertising Management, learners use the case method of learning to examine advertising process from research to implementation, marketing campaign processes including legal and ethical issues, implementation of strategy and the client-agency relationship are discussed.

Courses: BS56, IF05, IF09, IF27, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB221 and AMB222
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► AMB321 Advertising Campaigns
This capstone advertising unit draws from all the theoretical, analytical, and applied material developed throughout the advertising major, and applies it to a client brief. Learners develop advertising solutions that incorporate all aspects of an advertising campaign, including objectives, budgeting, message development, message delivery, and measurement. The key emphasis is on the use of research to develop sound advertising strategy, which is then executed as creative and media ideas and evaluated through ongoing benchmarks.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB221 and AMB222
Corequisites: AMB330
Incompatible with: COB303
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► AMB330 Advertising Strategy and Planning
This advanced unit builds on the theoretical perspectives and applied skills introduced to students in copywriting, media and advertising management. It explores important issues such as the contribution of research to the creation of advertising; the hierarchical development of strategy from marketing and IMC strategy through to advertising, media, and creative strategy; the role of the strategic planner in advertising; the use of planning to deliver more effective advertising solutions. Using problem-based learning, students establish benchmarks to evaluate advertising, develop advertising briefs and devise strategies for on-time and on-budget process management.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: AMB221 and AMB222
Incompatible with: COB300
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► AMB331 Direct Marketing
The discipline of Direct Marketing has grown in importance because of its precise targetting, easy accountability, its foundations role in Integrated Marketing Communication (IMC) and its increasing share of the marketing communication budget. This unit focuses on the principles of direct marketing and the role of the database in locatig prospects, tracking customers and building relationships. It examines the components of direct marketing telemarketing, personal selling and direct response advertising. As the main communication discipline of direct marketing, the emphasis is on direct response advertising. Students analyse the offer planning, strategy formulation, market research, direct mail, testing, and evaluation of direct marketing campaigns.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB220 or AMB220 or COB308
Incompatible with: COB308
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► AMB340 Services Marketing
This unit explores the special characteristics of services that distinguish the marketing of services from goods. Topics include: the distinctive aspects of consumer decision-making relative to services and the implications for marketing strategy formation; the management of demand and supply; customer services and its influence on service satisfaction; service quality management and measurement; internationalisation of the service sector and distribution modes for services that reflect the significant impacts of new technologies on service delivery.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB240 or CTB240 or MIB217
Incompatible with: MIB311, CTB340
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► AMB341 Strategic Marketing
Emphasis of the capstone Marketing unit is on the role of marketing manager at the corporate and strategic business unit/division levels. Students are exposed to a variety of strategic marketing techniques and issues, and learn how to apply these in corporate planning and management. Topics include: developing and critiquing strategic marketing planning models; recognising the importance of market focus; determining what marketing strategy can realistically be accomplished for a business; identifying underlying factors that must be considered in developing marketing strategy for a market-oriented organisation; diagnosing problems in successful implementation of marketing strategy; and organising for successful strategy implementation.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB240 or CTB240 or MIB217
Incompatible with: MIB315, CTB341
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► AMB350 Relationship and Sales Management
Topics related to marketing exchange, the concepts of consumer transactions and relationships and their relative importance in different marketing contexts are examined. The growth of customer relationship management including the transition of consumers along the transaction continuum and the development of accompanying marketing strategies is highlighted. A discussion of the relative emphasis on transactions and/or relationships in interfacing with the market provides a platform for examining sales management including, personal selling principles and ethics, the setting of sales objectives, selling logistics, account and territory management, sales force planning, recruitment and motivation and evaluation of sales performance.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB240 or AMB202 or COB207 or CTB240 or MIB217
Incompatible with: MIB230
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► AMB351 Tourism Marketing
This unit examines the tourism system and the unique characteristics of tourists, segmentation bases for tourist markets, the nature of the tourist destination mix and how marketing is applied within elements of that mix. Services marketing concepts and theories of tourist behaviour are utilised in the analysis of the tourism experience; processes of destination and product development to meet market needs; and, strategies to develop accommodates current needs and international tourism marketing environments. Macro-environmental issues impacting on tourism, such as sustainability of the industry and environment, the socio-political context in which marketing occurs and global trends in travel are also explored for their marketing implications.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: AMB240 or CTB240
Incompatible with: MIB321
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2
► AMB352 Marketing Decision Making
The nature of decisions and decision models in specific strategic and tactical areas of marketing management are examined in this unit. Decisions related to sales forecasting, market analysis, product planning, pricing, promotion and distribution are viewed from quantitative and qualitative perspectives. Students are exposed to computer software and analysis skills that aid the marketing decision process and build their analytical skills of direct relevance in marketing practice. The unit also embraces the analysis and application of marketing information systems including database marketing and the Internet as a marketing information resource.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62

Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB361 Public Relations Campaigns
This unit focuses on the public relations campaign planning process from problem identification and research through to strategy development, campaign development and evaluation. It is designed to meet the students' interests in understanding how various campaign elements come together to test their ability to integrate their prior learning in the introductory theory and practice units. To service the practice elements of public relations implementation, the unit incorporates a number of client service aspects. Students are expected to research, develop and present their plans. This unit incorporates real world clients to enhance students' portfolios.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

Prerequisites: AMB260 or MGB220, AMB261 and AMB262

Incompatible with: COB323, AMB381

Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMB371 Corporate Communication Strategies
This unit provides students with an understanding of the development and analysis of communication strategy in public relations and corporate communication. Students learn theory and practice for systematic analysis of the "fit" between environmental factors and organisational resources, the resulting communication problems and development of communication strategies. Students integrate theory and research in such areas as media effects, organisational change, diffusion, and persuasion for analysis and development of communication strategy.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61, IF62

Prerequisites: AMB260 or AMB361

Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 2

► AMN400 Consumer Behaviour
This unit provides an introduction to the area of consumer behaviour and a forum for discussion of theory and research in the field. The current state of consumer behaviour research will be reviewed and some of the emerging trends in the area are explored through several avenues of assessment. The unit provides the environment for students to conduct their own research in areas that are relevant, of interest to them and reflect the interdisciplinary nature of consumer behaviour.

Courses: BS39, BS63, BS93, GS40, GS75, GS85, IF94, IF96, IX95, IX96

Incompatible with: MIN419

Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMN401 Integrated Marketing Communication
Integrated marketing communication (IMC) is a new discipline that seeks synergistic effect from integrating traditional marketing communication disciplines. This unit explores the development of IMC, looking at reasons for growth, barriers to implementation and organisation issues. Students are introduced to the strategic foundations of IMC, from consumer behaviour, to marketing strategy, to IMC campaign evaluation. The disciplines of advertising, public relations, direct response and sales promotion are then explored to highlight how each contributes to IMC planning.

Courses: BS39, BS63, BS93, GS40, GS75, GS85, IF96

Incompatible with: CON421

Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMN403 Marketing and Survey Research
This unit provides a detailed overview of marketing research to support decision making in the areas of advertising, integrated marketing communication, marketing and public relations. The unit builds an advanced understanding of the use of survey research to support the descriptive and predictive information needs of management in such areas as consumer opinions and behaviour, and stakeholder analysis. Students will explore issues related to survey research design, questionnaire development and administration, sampling, measurement, data analysis including descriptive and multivariate statistics and presentation of research results.

Courses: BS39, BS93, GS40, GS48, GS75, GS76, GS85, GS97, IF96

Incompatible with: MIN413

Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► AMN404 Readings in Integrated Marketing Communication
This unit provides participants with the opportunity to make a detailed exploration of the literature on a particular topic or problem in the area of Integrated Marketing Communication under the direction of a supervisor. The readings integrate and consolidate the theory and research related to IMC and from other studies undertaken in the course. Students undertake a formal and systematic review of literature in a particular problem area of IMC related to their interests, project or thesis. Students may also explore work covered in other specialisations.

Courses: BS39, BS93

Prerequisites: AMN401

Incompatible with: CON416

Campus: GP
UNIT SYNOPSIS

Credit points: 12  Semester: 1, 2, 3
► AMN405 Cases in Integrated Marketing Communication
This unit provides students with the opportunity to explore a range of topics relating to the integration of the elements of the promotional mix—advertising, personal selling, reseller support, publicity, direct marketing and sales promotion. Through the use of intensive case study analysis and discussion, students will refine conceptual understanding and analytical skills to explore such IMC topics as brand equity and IMC; IMC approaches to promotions management; organisational issues related to structuring communication functions; environmental analysis and database marketing to inform IMC planning; and IMC strategies and the development of corporate advantage.

Courses: BS39, BS93
Prerequisites: AMN401
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AMN406 Project
In this unit, students examine in detail a theoretical or empirical problem in one of the disciplines of advertising—marketing, public relations, or integrated marketing communication. The study is based in the published journal literature of the discipline and can involve primary research and analysis. Students can develop a communication audit of an organisation or a case study related to an organisational product or issue. Project supervision will be arranged by the unit coordinator through consultation with the student and available staff members.

Courses: BS93, IF96
Prerequisites: Postgraduate enrolment with 96 credit points of approved prior studies
Incompatible with: CON405
Contact hours: 2-6 per week  Campus: GP
Credit points: 24  Semester: 1, 2, 3

► AMN411 Independent Study
An opportunity for advanced level postgraduate students to undertake short-term, individual study focusing on a problem area of advertising, marketing, public relations or integrated marketing communication.

Courses: BS39, BS93, IF96
Campus: GP
Credit points: 12  Semester: 3

► AMN420 Advertising Management
This unit empowers students to make effective management decisions within the advertising process. It examines the setting of advertising objectives, and the need for coordination of these with marketing, communication and organisational objectives. It develops a sound understanding of advertising regulations and ethics, budgeting, research and campaign coordination. It further examines management's participation in the creative, media and production processes, and the contribution of advertising management to the cohesion and creativity of the agency.

Courses: BS39, BS93, GS40, GS75, GS85, IF94, IF96, IX95, IX96
Incompatible with: CON417
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AMN421 Contemporary Issues in Advertising
This unit surveys the intellectual foundations of a number of contemporary issues emerging within the advertising discipline and provides sophisticated, systematic explanations of their societal implications and consequences. It also explores how these issues are addressed by business, government and organisation.

Courses: BS93, GS40, GS75, GS85, IF94, IF96, IX95, IX96
Incompatible with: CON412
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AMN422 Media Strategy
One of the ultimate determinants of the effectiveness of any advertising campaign is the media strategy. This unit examines ways to improve efficiency in media planning, buying, coordination and research. It examines concepts of media decision making, market targeting through the creative use of media, and strategic planning. It explores current media campaigns and encourages the development of a more creative and integrated approach to media.

Courses: BS93, BS93, IF96
Incompatible with: CON418
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► AMN423 Strategies for Creative Advertising
This unit explores the substantive body of academic research on creative advertising. It follows the creative process, beginning with the development of creative strategy and concluding with campaign evaluation. Through case studies and presentations, students examine how copywriters think, the influence of the ‘big idea’ and its execution across the very diverse advertising media.

Courses: BS39, BS93, GS40, GS75, GS85, IF96
Incompatible with: CON419
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► AMN442 Marketing Management
The study of marketing, marketing systems and marketing management and marketing planning with a contemporary structure of social, cultural, political, economic, business and organisational environment. Concepts are applied through the study and construction of a marketing plan, which involves marketing and sales analysis, target market strategies, tactical decision planning, and implementation and control. Marketing management concepts are applied to virtual and physical markets and attention is given to a range of skills in finance, human resources, information and other skills needed by marketing managers in these markets.

Courses: BS39, BS83, BS93, IF96
Incompatible with: MIN422
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AMN443 Product and Service Innovation
This unit examines the dynamics of innovation and development within the mix of core marketing activities of organisations. After establishing the integral role innovation plays in organisations, the unit reviews the key stages in the process of creating, developing and implementing new product and service concepts including product, service and market analysis; design, innovation, evaluation and testing of ideas; branding and packaging; market testing and investment analysis.

Courses: BS39, BS83, BS93, GS40, GS48, GS75, GS76, GS85, GS97
Incompatible with: MIN423
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► AMN444 Services Marketing
This unit introduces a framework for studying services and explores both strategic and operational issues including the design and delivery of services; the formulation of communication strategies; definition, measurement and implementation of customer focused marketing programs in service industries; the establishment and maintenance of relationships with service customers.

Courses: BS39, BS83, BS93, GS40, GS75, GS85,
Prerequisites: AMN42
Incompatible with: MIN424
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► AMN445 Strategic Management
This is a capstone unit which aims to ensure students can manage the complete marketing function at a senior level within a corporate environment and includes assessing the marketing function’s performance with appropriate tools to diagnose, assess, track and evaluate performance and to modify processes to improve the function. Links between the marketing function and other functions of a business such as accounting, operations and human resources are drawn, so that the student would be in a position to move into top management if the opportunity arose.

Courses: BS39, BS83, BS93
Prerequisites: AMN42
Incompatible with: MIN425
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AMN447 Contemporary Issues in Marketing
This unit offers advanced study of topical issues and emerging trends in marketing practice as a result of new technologies, current events and their impact on local, national and international enterprises. In depth interaction with business and public policy leaders expands students research, reflection and strategic thinking abilities.

Courses: BS39, BS83, BS93
Incompatible with: MIN407
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► AMN460 Corporate and Investor Relations
This unit reviews all aspects of the public relations function in communicating with corporate audiences. Specific focus is placed on how corporate entities meet both regulatory and promotional requirements in communicating with special interest groups including shareholders and employees. Suitable communication tools are examined for use in ongoing communication programs.

Courses: BS39, BS93
Incompatible with: CON409
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► AMN461 Corporate Media Strategy and Tactics
This unit examines theories underpinning mass media and links these with the practice
of public relations media tactics. Students analyse techniques and skills used in liaison with electronic media, print media, trade media and news media. Producing and evaluating communication materials such as news releases, features and media kits forms an important part of this unit. Students develop strategic thinking through analysis of contemporary media case studies.

Courses: BS39, BS93, GS40, GS75, GS85
Incompatible with: CON442
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

- AMN463 Public Opinion and Public Relations
This unit provides a detailed overview of the theoretical foundations and empirical research on public opinion and the implications of that theory and research to public relations management. The unit includes detailed examination of the role of mass media in the development and change of public opinion and problems related to the measurement and interpretation of public opinion. It builds an advanced understanding of the use of survey research to support the descriptive, diagnostic, and predictive information needs of management related to public opinion. The unit treats the role of public relations in efforts to shape and manage public opinion.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 2

- AMN465 Public Relations Management
This unit provides learners with an overview of the theory and research that constitute the foundations of public relation practice. The unit provides a detailed inspection of common processes necessary for the management of organisational relationships with publics. The unit focuses on such topics as issues management, organisational change, public opinion, and mass media effects in order to explore the foundations of contemporary public relations management.

Courses: BS39, BS93, GS40, GS75, GS85
Incompatible with: CON415
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

- AMN467 Public Relations Campaigns
This unit provides a systematic exploration of the planning, management and evaluation of public relations campaigns and programs. The primary goal of the unit is to build a detailed understanding of existing theory and research that informs the development and evaluation of public relations campaigns. The unit focuses on key problem areas of campaign management including strategy, design and evaluation.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 2

- AMN468 Issues and Crisis Management
This unit examines the strategic management of crisis communication including for organisations. A strategic planning approach will be covered including organisation analysis, stakeholder identification, issue prioritisation, strategy formulation, tactical planning and implementation and evaluation. Precrisis issues in management will be addressed as well as proactive and defensive communication strategies during crisis. The unit will demonstrate the application of general communication tools to a specialised area.

Courses: BS39, BS93
Incompatible with: CON408
Contact hours: 3 per week
Credit points: 12
Semester: 1

- AMN488 Events Marketing
This unit introduces a framework for studying and exploring both strategic and operational issues including the design and delivery of events; the formulation of communication strategies; definition, measurement and implementation of customer focus, marketing programs in service industries; and the establishment and maintenance of relationships with customers.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 2

- AMN489 Events Management
This unit builds an understanding of the fundamental principles of events management. The unit focuses on the application of concepts and theories that serve as the foundation for events management as they relate to a business environment. Emphasis is on building an understanding of the role of the events manager in terms of the analysis, planning, implementations and control of event activities.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 2

- ARB081 History, Theory and Criticism of Urban Design
This unit includes the analysis of urban forms and systems in the pre-industrial, industrial and post-industrial periods. Specific history topics include urban activities, urban culture and diversity, urban services and urban form. This unit addresses concepts of ‘good theory’ of urban design in relation to the work of a number of theoretical writers and schools. Specific theoretical topics include the ‘kunstlerischen Grundsatzen’ of Camillo Sitte, the Garden City movement, Le Corbusier and modernism, the counter-modern influences of the townscape movement, Jane Jacobs, Kevin Lynch and the Responsive Environments approaches, Christopher Alexander, Rapoport, phenomenological approaches, and recent movements such as ‘the new urbanism’.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 1

- ARB082 Urban Design Studio B
This studio covers identification and classification of approaches to urban design, the setting of objectives, urban design rationales, the adoption of a method and the testing of implications for a particular urban design problem type. The unit typically involves a theory based preparation of an urban design proposal for an urban/suburban/low density area, and/or an urban design issue. Where applicable, work in other units of study will be incorporated into this unit. The 24 credit points focus allow depth and, where appropriate, joint project work with senior students in other faculty courses. Field work is incorporated.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 2

- ARB083 Urban Design Masters Studio
This unit is an advanced level urban design project, supported by seminars presented by staff, students and visiting lecturers and distinguished practitioners. This studio focuses on changes in the production and consumption of the city, including the effects of globalisation, space-time compression, economic rationalism, and the privatisation of space, services and professional activities.

Courses: BS39, BS93
Contact hours: 3 per week
Credit points: 12
Semester: 2
on the effect of the different forms of ownership on the financial statements.

Courses: BS56, ED50, IF28, IF30, IF37, IF47, IF48, IF60, IF61, IF62, IX03

Prerequisites: BSB110

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► AYB220 Company Accounting

This unit includes: the preparation of consolidated financial statements; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure oriented accounting standards; accounting for income tax; accounting for the acquisition and disposal of assets (including entities); accounting for investments in associates; accounting for foreign currency transactions arising from international trading and financing; and the translation of the results of foreign operations.

Courses: BS56, ED50, IF28, IF30, IF37, IF47, IF48, IF60, IF61, IF62, IX03

Prerequisites: AYB121

Contact hours: 3.5 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AYB221 Computerised Accounting Systems

This unit provides an examination of the concepts, processes and issues relevant to computerised accounting systems including: accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. The impact of international harmonisation of accounting standards on multinational corporations and the investment communities worldwide.

Courses: BS56

Prerequisites: BSB110

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► AYB301 Auditing

This unit enables students to comprehend the key concepts of auditing as a discipline, to demonstrate the relationship between auditing and accountability and to demonstrate the differences between manual and EDP audit processes. The unit builds on the knowledge of accounting and accounting standards acquired in prior units by enabling students to understand in detail the audit process (including professional auditing standards and techniques) which leads to the auditor providing an opinion on the financial reports of various types of entities. Ethics and auditor’s liability are also covered.

Courses: BS56, ED50, IF28, IF30, IF37, IF47, IF48, IF60, IF61, IF62

Prerequisites: BSB110, BSB122 or equivalent.

Incompatible with: CTB221

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AYB223 Law of Business Associations

The unit is intended to equip students with a basic understanding and knowledge relevant to the environment of legal entities, particularly corporations. It also seeks to provide students with sufficient basic understanding of the legal structure of business associations to enable them to recognise the appropriate structure for particular commercial situations.

Courses: BS56, ED50, IF30, IF48, IF60, IF61, IF62

Prerequisites: BSB111

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AYB225 Management Accounting

This unit introduces students to accounting systems and techniques that provide management at all levels with information for use in planning, controlling and decision making. This can be contrasted with financial accounting, which provides summary financial information principally for external users (ie shareholders, creditors, banks, etc). Emphasis is placed on developing a range of accounting systems (in particular product costing) which may be used in manufacturing the firms, although the principles and concepts used to develop such systems can be adapted to service organisations.

Courses: BS56, ED50, IF28, IF30, IF37, IF47, IF48, IF50, IF61, IF62, IX03

Prerequisites: BSB110

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AYB321 Strategic Management Accounting

This unit presents advanced topics in company law including protection of minority interests; prospectuses and fundraising; company charges; insider trading; takeovers and buy-backs; and tax law relating to financially troubled companies. The unit also uses the balanced scorecard (BSC), and economic value added (EVA); and appreciating the research on the benefits and problems with ABC, BSC and EVA.

Courses: BS56, ED50, IF30, IF37, IF48, IF60, IF62

Prerequisites: AYB225

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► AYB323 Tax Planning

The aim of this unit is to develop students’ tax planning abilities within the context of the Australian Income Tax legislation by applying their knowledge and understanding of taxation law obtained in previous taxation law subjects. The subject covers the various types of business entities as well as individual taxpayers giving students a broad understanding of the application of the income tax legislation and other revenue laws to typical tax planning situations including employment, business structures and restructuring. The unit also provides students with an understanding of other considerations that affect tax planning in professional practice.

Courses: BS56, IF60

Prerequisites: AYB325

Corequisites: AYB328

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► AYB325 Taxation Law
This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levy of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also examined. The unit concludes with a brief overview of the taxation of partnerships, trusts and companies and the goods and services tax. Emphasis is placed on developing students’ skills in problem solving through research and analysis of taxation issues.

Courses: BS56, IF30, IF48, IF60, IF61, IF62
Prerequisites: AYB223
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYB328 Taxation of Business Entities
The aim of this unit is to develop students’ knowledge and understanding of the Australian Income Tax legislation applicable to various forms of business entities as at 1 July 2004. This unit examines the principles governing the taxation treatment of various business entities from a domestic and international perspective. The taxation processes for partnerships, companies, trusts and superannuation funds will be analysed so that students are able to advise clients on the tax effectiveness of various business structures from a commercial and professional aspect. Emphasis is placed on developing students’ skills in problem solving through research and analysis of taxation issues.

Courses: BS56, IF61, IF60
Prerequisites: AYB223
Incompatible with: AYB326
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYB337 Goods and Services Tax
The aim of this unit is to help students understand the GST law, how it applies to business transactions and how to identify and solve GST problems. The unit introduces the general principles of the GST system applicable to business entities. It makes a comparative analysis of the different types of supplies permissible under the legislation and includes tax planning advice. Some of the simpler aspects of international taxation between Australia and its major trading partners are considered. Recent tax reforms applicable to business entities are included.

Courses: BS56, IF60, IF61
Prerequisites: AYB223
Incompatible with: AYB122
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYB338 Accountancy Workplace Learning Experience
This unit fosters learning through work related experience. Students will be given the opportunity to experience the work that is performed by accountants and will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities. Admission to this unit is by application and subsequent approval by the unit coordinator.

Courses: BS56
Campus: GP
Credit points: 12  Semester: 2
► AYB339 Accountancy Capstone
Accountancy Capstone co-ordinates several parts of the accountancy degree that have already been studied by students. At the same time some new concepts are introduced for each topic. The unit attempts to simulate the real world where the professional advisor/consultant is confronted with unstructured multi-disciplined problems on a day-to-day basis. Based on the Problem Based Learning (PBL) methodology, students will learn the process of how to deal with the problems typically faced by the professional advisor/consultant. These problems require students to work together in teams, research issues, gather information and form conclusions.

Courses: BS56
Prerequisites: AYB220 and one of either AYB311 or AYB321
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► AYN410 Business Law and Ethics
This unit provides an introduction to business law and to morality in the business context. It includes the following: the legal framework for business interpretation of statutes; contract law and agency; morality and how it works as an aspect of the business community; the origins of moral belief; and the motives that lead people to abide by what they believe to be morally right. Also, to persuade others to do likewise with special emphasis on business aspects of morality.

Courses: BS93
Incompatible with: GSN412, GSN222
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN411 Company Auditing
Topics in this unit include: the audit environment; legal liability of auditors; professional ethics; the study and evaluation of audit planning and programming; evidence, internal control theory and review techniques; audit program applications; audit in CIS environment and evaluation of CIS controls; computer-assisted audit techniques; computer fraud; audit sampling techniques; and audit reporting.

Courses: BS93
Prerequisites: AYN417
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN412 Company Law
This unit introduces the law relating to the establishment, operation and dissolution of business association; the forms of business associations, partnerships, trusts, companies and voluntary associations. It also focuses on companies: incorporation requirements, classification, corporate governance, share capital and management issues.

Courses: BS93
Prerequisites: AYN410
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN413 Information Systems Governance and Audit
The impact of Computer Information Systems (CIS) on controls and auditing: general controls, application controls, generalised audit software, static and concurrent computer-assisted audit techniques, and special CIS environments are addressed in this unit. A focus on the audit of the SAP R/3 system is provided.

Courses: BS56, BS93
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► AYN414 Cost and Management Accounting
This unit introduces students to techniques that provide management at all levels with information for use in inventory valuation, planning, controlling and decision-making. The unit’s major focus is on product costing systems for manufacturing firms.

Courses: BS93, GS40, GS48, GS50, GS75, GS76, GS85, GS86
Prerequisites: AYN416 or equivalent
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN416 Financial Accounting
This unit provides an introduction to financial accounting within the context of the accounting profession’s conceptual framework, relevant accounting standards and the requirements of the Corporations Act 2001 and the major disclosure oriented accounting standards; accounting for income tax; accounting for the acquisition of assets (including business entities); accounting for investments in associates; the termination of a company’s life and the accounting procedures necessitated by winding up/liquidation.

Courses: BS93, GS40, GS41, GS48, GS50, GS75, GS76, GS85, GS86
Prerequisites: AYN416
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN417 Financial Accounting
This unit covers the preparation of consolidated financial statements; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure oriented accounting standards; accounting for income tax; accounting for the acquisition of assets (including business entities); accounting for investments in associates; the termination of a company’s life and the accounting procedures necessitated by winding up/liquidation.

Courses: BS93, GS40, GS48, GS50, GS75, GS76, GS85, GS86
Prerequisites: AYN416
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN418 Financial Accounting
This unit introduces students to the nature and development of accounting theory and to the application of theory to practice. The following topics are addressed: positive and normative theories of accounting; the external reporting framework including international harmonisation and the conceptual framework; definition, recognition and measurement of assets, liabilities, equity, revenues and expenses; asset revaluations; intangibles; financial instruments; leases; and employee entitlements. Accounting in specific industries such as general insurers, construction, extractive industries and superannuation funds is also examined. Contracting theory is used throughout to help explain accounting policy choices.

Courses: BS93, GS40, GS48, GS50, GS75, GS76, GS85, GS86
Prerequisites: AYN417
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2
► AYN433 Research Topics in Accounting

UNIT SYNOPSES
This unit focuses on features, uses and design strategies for IT-enabled managerial decision support and business intelligence systems and their applications to fraud prevention and detection. Model-based, data-based and knowledge-based applications for financial forensics are examined. SAS data analysis, interrogation and mining software is examined.

Courses: BS63, BS93
Credit points: 12
Semester: 1

► AYN438 Taxation Law and Practice

This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levying of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also examined. The unit concludes with a brief overview of the taxation of partnerships, trusts and companies and the goods and services tax. Emphasis is placed on developing students’ skills in problem solving through research and analysis of taxation issues.

Courses: BS63, BS93
Credit points: 12
Semester: 1

► AYN439 Management Accounting

This unit builds on AYN414 and covers the following: planning and control; decision-making and relevant costs; responsible accounting; cost allocation; pricing techniques; transfer pricing; performance evaluation; operations research techniques; and contemporary management accounting issues such as activity based costing, value-added management, just-in-time systems, total quality management and strategic management accounting.

Courses: BS93, GS40, GS48, GS50, GS75, GS76, GS85, GS86
Prerequisites: AYN414
Credit points: 12
Semester: 1, 2

► AYN443 Electronic Commerce Cycles

This unit examines the concepts, processes and issues relevant to computerised accounting systems including: accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. Practical application of these concepts is enhanced by the use of computer applications such as MYOB, spreadsheet software such as Excel, database software such as Access, and interactive multimedia software such as Accounting Information Systems Cycles.

Courses: BS93, GS40, GS48, GS50, GS75, GS76, GS85, GS86
Prerequisites: AYN416 or GSN404
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

► AYN453 Financial Forensics and Business Intelligence

This unit provides students with a knowledge of critical factors that contribute to fraud and corporate failure, and forensic examination. Students develop an understanding of the risks of fraud and corporate failure occurring and an appreciation for the subsequent forensic review and litigation processes that may follow.

Courses: BS63, BS93
Incompatible with: AYN441, AYN404, AYN426
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► AYN505 Dissecting Financial Statements

This unit is about the analysis of financial information arising primarily from the financial reports of entities. Fundamental analytical techniques are examined in detail with particular emphasis on the application of these techniques in equity (share) valuation decisions. The unit comprises three related parts. Part one outlines the four basic steps in the fundamental analysis framework: business analysis, accounting analysis, financial analysis and prospective analysis. The next part combines these skills in addressing the question of valuation, while the final section of the unit applies the skills in different contexts, such as credit analysis, security analysis, mergers and acquisitions and financial policy decisions.

Courses: BS63, BS93
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► AYN507 Governance Issues in Accounting

This unit adopts an accounting perspective to examine issues relating to sound corporate governance, accountability and transparency. Topics covered include the following: the role of the board of directors and board committees; internal control and risk management; audit committees, internal and external audit; duties of directors and management; codes of conduct and ethics; compensation issues; conflict of interest and insider trading.

Courses: BS63, BS93
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► BEB100 Introducing Professional Learning

This unit will introduce students to a range of skills and knowledge sets required to support professional practice in design, engineering and urban development disciplines. It will include information literacy, communication skills and knowledge development. In addition the unit will provide orientation to design, engineering and urban development professions through an introduction to their history, their place in society, the importance of ethical conduct to their practice and to the particular qualities of professional knowledge especially with regard to practice knowledge. The importance of integrated scholarship and collaborative links with other professions will be highlighted.

Courses: DE40, EN40, UD40
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

► BEB200 Introducing Sustainability

This unit will address issues of sustainability from a number of perspectives thus providing students with a variety of lenses on the ways in which the human-made environment impacts on the future of human settlement. The unit will include an introduction to sustainability from a variety of perspectives, including indigenous and other cultural perspectives, and from ecological, economic and technological perspectives. It will demonstrate to students the ways in which contrasting, and sometimes conflicting, ideas about sustainability are prioritised and how these priorities contribute to the impact that design, engineering and urban development professions have on a sustainable future.

Courses: DE40, EN40, UD40
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► BNB301 Field Studies in Sustainable Development

This elective is offered across the Faculty of Built Environment and Engineering to provide opportunities for students to deepen their knowledge and experience of the importance of multi-disciplinary collaborations contributing to sustainable development within the design and built environment and engineering fields. Students will travel and engage people with very different cultural beliefs and practices. They will participate in the trans-disciplinary exploration of alternative technologies and development ideologies appropriate to the cultural context.

Courses: Elective in BEE
Credit points: 12
Campus: GP

► BSN110 Accounting

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with a basic level of knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, analysis and interpretation of financial statements and planning, control and business decision making.
UNIT SYNOPSES

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Incompatible with: BSD110, CTB110
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB111 Business Law and Ethics
This unit integrates the concepts and principles of business law with the theories and applications of business ethics. The unit makes extensive use of cases in law and ethics to develop knowledge and skills that enable students to analyse, apply and evaluate the legal principles and ethical decision-making processes relevant to modern business practice.

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Incompatible with: AYB120, CTB111
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB113 Economics
This unit introduces students to the key economic concepts and their practical applications. It comprises twelve topics each focusing on a current economic issue. Microeconomic topics include demand and supply, elasticity, production and cost theory and market structure. Macroeconomic topics include measuring GDP, inflation and unemployment, money and banking, and fiscal and monetary policies.

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Incompatible with: CTB113, BSD113
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB114 Government, Business and Society
This unit provides a basic grounding in the principles, institutions and functions of government and their interactions with business and society. Its principal focus is the structure and key features of Australia's constitutional and government framework including the judicial and administrative processes, especially as they affect business. Students develop a comparative appreciation of the principles, institutional arrangements and practices of contemporary government in a global context. This includes consideration of law-making and policy processes and the impact of the changing national and international environment.

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Incompatible with: HUB694, HUB682, SB5028, BSD114, CTB114
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB115 Management, People and Organisations
The unit provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that are needed in all areas of management and in all areas of organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis will be on knowledge, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Incompatible with: BSD115, CTB115
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB119 International and Electronic Business
This unit integrates two rapidly expanding areas of business studies: international business and e-business. Doing business across international borders is facilitated by e-business technologies. This unit explores the nature and models of international business and e-business and how e-business technologies facilitate international business and add value to the business. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments.

Courses: BSB56, ED50, IF05, IF09, IF27, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IF72, IX03
Incompatible with: BSB116, BSB112, CTB119
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB122 Quantitative Analysis and Finance
To maintain the competitiveness of, and add value to, an organisation, today's managers have to make critical business and financial decisions. This unit is a preliminary study of the techniques for analysing business information, and will provide students with a framework for understanding the fundamentals of business and financial decision making. Topics include the following: the basic techniques of organising and analysing data; the application of probability and probability distributions; understanding a firm’s invest­ment, financing and dividend decisions; and the three main ideas underlying financial decisions (time value of money, diversification and arbitrage).

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03, ME41
Incompatible with: BSB117, CTB122
Contact hours: 3 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB126 Marketing
This introductory subject examines the role and importance of marketing to the contemporary organisation. Emphasis is placed on understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, management information systems and consumer behaviour. The unit covers various elements of the marketing mix, with special reference to product, price, distribution, and promotion, including advertising and public relations. By way of introduction only, key issues relating to services marketing, e-marketing and strategic marketing are also canvassed.

Courses: BSB56, ED50, IF05, IF09, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03, LS50
Incompatible with: BSB116, CTB126
Contact hours: 4 per week
Campus: CA, GP
Credit points: 12  Semester: 1, 2, 3
► BSB212 Electronic Business Applications
This unit looks at the ways in which organisations adopt and use various electronic business applications in areas of e-commerce, business-to-consumer, business-to-business and intra-business relations. Business models and their impact in various industries are analysed, enabling students to assess the underlying business case and determine the model's viability in a competitive environment. The issues associated with front-end and back-end e-business applications are considered.

Courses: BSB56, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB112 or BSB119 or equivalent
Incompatible with: AYB333, CTB212
Contact hours: 3 per week
Campus: GP
Credit points: 12  Semester: 1
► BSB213 Governance Issues in E-Business
This unit introduces students to a wide range of information technology governance issues which confront business professionals during the implementation and operation of e-business strategies. It aims to provide e-business and IT professionals with an understanding of current IT governance frameworks and to ensure they are familiar with risk management, fraud detection and prevention, audit and legal issues that are relevant to an organisation’s e-business operations.

Courses: BSB56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IT21
Prerequisites: BSB111 and BSB119
Incompatible with: AYB332, CTB213
Contact hours: 3 per week
Campus: GP
Credit points: 12  Semester: 2
► BSB310 Business and Biotechnology
This unit develops business skills that will enhance the ability of those operating within biotechnology firms to capitalise on their research and development efforts. In essence this unit provides the skills-based mechanisms to develop graduates who are effective catalysts in recognising, developing and commercialising opportunities in biotechnology. 

Courses: LS50
Prerequisites: MGB218
Contact hours: 3 per week
Campus: GP
Credit points: 12  Semester: 1
► BSB311 Research, Development and Commercialisation Strategies
Students study strategies and approaches used in industry and government organisations for the research, development and commercialisation of biotechnology innovations. The unit offers the opportunity to read widely as well as in depth about the commercialisation of molecular biology and biotechnology research. Theoretical concepts are integrated with prepared case studies prior to guest speaker seminars.

Courses: LS50
Prerequisites: BSB310
UNIT SYNOPSIS

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

BSB314 E-Business Intelligence
This unit looks at corporate strategic decisions and the information technology decision support systems and e-business intelligence needed to support management in this process. Group and enterprise IT decisions, data warehousing and corporate portals will be examined together with e-business technologies. Soft skills for decision support and data mining and visualisation will be covered. An introduction to advanced intelligent systems, artificial intelligence and knowledge based systems will also form part of the unit.
Courses: BSB56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

BSD110 Accounting
Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with some basic knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, and the analysis and interpretation of financial statements for planning, control and business decision making purposes.
Courses: BSA40, IF06
Credit points: 12
Incompatible with: BSB110

BSD113 Economics
This unit introduces students to the key economic concepts and their practical applications. It comprises 12 topics each focusing on a current economic issue. Microeconomic topics include demand and supply, elasticity, production and cost theory, and market structure. Macroeconomic topics include money supply, GDP, inflation and unemployment, money and banking, and fiscal and monetary policy.
Courses: BSA40, IF06
Credit points: 12
Incompatible with: BSB113

BSD115 Management, People and Organisations
This unit provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that will be needed at all areas of management and in all areas of organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis will be on knowledge, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.
Courses: BSA40, IF06
Credit points: 12
Incompatible with: BSB115

BSD119 International and Electronic Business
This unit integrates two rapidly expanding areas of business studies: international business and e-business. Doing business across international borders is facilitated by e-business technologies. This unit explores the nature and models of international business and e-business and how e-business technologies facilitate international business and add value to the business. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments.
Courses: BSA40, IF06
Credit points: 12

Contact hours: 4 per week  Campus: KG

BSD122 Quantitative Analysis and Finance
To maintain the competitiveness of, and add value to, an organisation, today's managers have to make critical business and financial decisions. This unit is a preliminary study of the techniques for analysing business information, and will provide you with a framework for understanding the fundamentals of business and financial decision making. Topics include the following: the basic techniques of probability, the use of data in making decisions, application of probability and probability distributions; understanding a firm's investing, financing and dividend decisions; and the three main ideas underpinning financial decisions (time value of money, diversification and arbitrage).
Courses: BSA40, IF06
Credit points: 12

Contact hours: 4 per week  Campus: KG

BSD126 Marketing
This introductory unit examines the role and importance of marketing to the contemporary organisation. Emphasis is given to understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, marketing information systems and consumer behaviour. The unit explores the various elements of the marketing mix, with special reference to product, price, distribution, promotion. Promotion includes advertising and public relations. By way of introduction only, key issues relating to services marketing, strategic marketing and marketing planning are also canvassed.
Courses: BSA40, IF06
Credit points: 12
Incompatible with: BSB126

Credit points: 12

Contact hours: 4 per week  Campus: KG

BSN404 Project 1
This unit is designed to permit the student to undertake a research project, subject to the approval of the course coordinator.
Courses: BSN93
Credit points: 12
Credit points: 12

Semester: 1, 2, 3

BSN405 Project 2
This unit is designed to permit the student to undertake a research project, subject to the approval of the course coordinator.
Courses: BSN93
Credit points: 12
Credit points: 12

Semester: 1, 2, 3

BSN406 Project 3
For this project students undertake a detailed examination of a theoretical or empirical problem in one of the disciplines of advertising, marketing, public relations, or integrated marketing communication. The study is based on the published journal literature of the discipline and can involve primary research and analysis. Students develop a short empirical research study, refine a theoretical problem, develop a communication audit of an organisation or develop a case study related to an organisation or product. Project supervision is arranged by the unit coordinator through consultation with the student and available staff members.
Courses: BSN93

Incompatible with: CON405, AMN411

Campus: GP
Credit points: 24  Semester: 1, 2, 3

BSN409 Research Project
This is to produce a major piece of applied research. The research project provides the opportunity to apply and reinforce the education and knowledge gained from the course by research report, case study or application of technology. The final project must demonstrate an ability to identify and research a complex business problem in accountancy or banking and finance or a related discipline.
Courses: BSN93

Requisites: BSN506 or BSN507

Campus: GP
Credit points: 24  Semester: 1, 2
UNIT SYNOPSES

Courses: BSN600-2 Dissertation
Students undertake a study of an issue as the culmination of their honours program. The dissertation must have a well-developed conceptual foundation and include a primary research component.

Courses: BSN600-3 Thesis
This is the major component of a research Masters and consists of a substantial study of an applied or theoretical issue. Students are expected to present a seminar each semester on their progress to date and, in the final semester, on the outcomes of their study. The thesis is expected to have a sound conceptual and theoretical foundation for the exploration of a significant communication topic using primary research data.

Courses: BSN600-4 Thesis
This is the major component of a research Masters and consists of a substantial study of an applied or theoretical issue. Students are expected to present a seminar each semester on their progress to date and, in the final semester, on the outcomes of their study. The thesis is expected to have a sound conceptual and theoretical foundation for the exploration of a significant communication topic using primary research data.

Courses: BSN600-5 Thesis
This is the major component of a research Masters and consists of a substantial study of an applied or theoretical issue. Students are expected to present a seminar each semester on their progress to date and, in the final semester, on the outcomes of their study. The thesis is expected to have a sound conceptual and theoretical foundation for the exploration of a significant communication topic using primary research data.

Courses: BSN600-7 Thesis
This is the major component of a research Masters and consists of a substantial study of an applied or theoretical issue. Students are expected to present a seminar each semester on their progress to date and, in the final semester, on the outcomes of their study. The thesis is expected to have a sound conceptual and theoretical foundation for the exploration of a significant communication topic using primary research data.

Courses: BSN92
Campus: GP
Credit points: 12 Semester: 1, 2

Courses: BSN600-8 Thesis
This is the major component of a research Masters and consists of a substantial study of an applied or theoretical issue. Students are expected to present a seminar each semester on their progress to date and, in the final semester, on the outcomes of their study. The thesis is expected to have a sound conceptual and theoretical foundation for the exploration of a significant communication topic using primary research data.
The unit provides students with a sound and practical approach to material properties and selection so that they may adapt to scientific and technological changes in the variety of products entering the market. They understand where the engineer fits in a quality assurance program and become aware of the numerous components of quality assurance involved in the costs generated by quality control and assurance. Students become aware of the effect of the working environment on different engineering materials. Among other things, they study the behaviour of concrete from the time it is manufactured to the end of its life, and develop knowledge of the parameters involved in manufacturing good concrete, and the consequences of delivering poor concrete.

Courses: CE44, CE45, CE35
Prerequisites: MMB131
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► CEB209 Geotechnical Engineering 1

Soil mechanics is a part of geotechnical engineering, soil types, their description, classification and engineering properties. The student learns to pump a granular and cohesive soil classification systems; volume and mass components; density and air voids; determination of soil geostatic vertical pressures; pore water pressures and effective stress; permeability theory and fluid seepage in soil, with erosion and piping analysis; soil shear strength assessment and application to retaining wall lateral pressures; retaining wall design; slope stability analysis and stabilisation. Computer simulation and analysis programs are used where appropriate.

Courses: CE44, CE45, CE35
Prerequisites: CEB110
Corequisites: CEB207
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► CEB212 Environmental Science

This unit is designed to provide students with the fundamental understanding of how the earth's physical and environmental systems normally function and the challenges imposed on the environment as a result of human activity. This understanding is developed through the study of relevant principles of physical geology, ecology, chemistry, microbiology, energy, resources, pollution, and the interaction among population, resources and the environment. The unit also prepares students to undertake further studies in civil and environmental engineering.

Courses: CE44, CE45, CE46, CE35
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► CEB214 Professional Studies 3 (Environmental & Transport)

The knowledge and skills associated with assessing, investigating, and managing the economic, social and environmental impacts of developmental projects are essential for today's civil and environmental engineers. So too is an appreciation of the skills needed to work with and communicate with interdisciplinary teams to develop balanced solutions to environmental problems associated with development. This unit of the Professional Studies strand develops students' abilities to practise in a civil engineering project environment.

Courses: CE44, CE45, CE35
Prerequisites: CEB207, CEB213
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► CEB215 Structural Engineering 1

This unit includes the following: development of the method of moments distribution and its application in analysis of continuous beams and frames; theory of influence lines and its application to determine the effects of moving loads on beams and trusses; 'pattern loading' on frames and continuous beams; behaviour of reinforced concrete members; applications in the design of beams and columns.

Courses: CE44, CE45, CE46, CE35
Prerequisites: CEB207, CEB208, CEB110
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► CEB216 Project Engineering 1

This unit commences with the development of the construction techniques common to site investigation, earthworks, pile driving, deep foundations, reinforced and prestressed concrete construction. This operational understanding is extended into a study of the practices used to estimate cost and to administer contracts, including planning and the legal implications of operating in a commercial environment. The unit concludes with the issues surrounding the uncertainty of weather and of operating in remote environments.

Courses: CE44, CE45
Prerequisites: CEB208, CEB207
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► CEB217 Hydraulic Engineering 1

This unit includes the following: units and properties of fluids; pressure and pressure measurement; forces in static fluids, buoyancy and accelerating fluids; kinematics, continuity and flow nets; the energy equation; the momentum equation; experimental fluid mechanics; lift and drag; fluid flow in pipes and the application of pipe resistance formulae, fitting losses; pipes in series and parallel; pipe network analysis; hydraulic analysis of pump and pipe systems; pump types, characteristics and selection.

Courses: CE44, CE45, CE46, CE35
Prerequisites: CEB109, MAB131
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► CEB218 Geotechnical Engineering 1A

Soil mechanics is a part of geotechnical engineering and includes a study of the following: soil types, their description, classification and engineering properties; granular and cohesive soil classification systems; volume and mass components; density and air voids; determination of soil geostatic vertical pressures; pore water pressures and effective stress; permeability theory and fluid seepage in soil, with erosion and piping analysis; soil shear strength assessment and application to retaining wall lateral pressures; retaining wall design; slope stability analysis and stabilisation. Computer simulation and analysis programs are used where appropriate.

Courses: CE35
Prerequisites: CEB110
Corequisites: CEB207
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► CEB219 Structural Engineering 1A

This unit includes the following: moment distribution; statically indeterminate structures; continuous beams and simple frames; moving loads on structures such as bridges and crane girders; influence line diagrams; 'pattern loads' in statically indeterminate structures; fundamentals of reinforced concrete analysis and design and its behaviour in bending; shear and carrying axial loads; analysis and design of beams, slabs and columns.

Courses: CE35, CE44, CE45, CE46
Prerequisites: CEB207, CEB208, CEB110
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► CEB222 Hydraulic Engineering 1A

This unit includes the following: units and properties of fluids; pressure and pressure measurement; forces in static fluids, buoyancy and accelerating fluids; kinematics, continuity and flow nets; the energy equation; the momentum equation; experimental fluid mechanics; lift and drag; fluid flow in pipes and the application of pipe resistance formulae, fitting losses; pipes in series and parallel; pipe network analysis; hydraulic analysis of pump and pipe systems; pump types, characteristics and selection.

Courses: CE35
Prerequisites: CEB109, MAB131
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► CEB230 Engineering Materials and the Environment

This unit provides information about engineering materials required before they are applied in the design context. The course begins with an in-depth presentation of the material properties and their application of civil engineering projects. An engineer requires in-depth knowledge of the concepts and principles involved but also the ability to apply them in real life. An emphasis on environmental implication is discussed as part of the requirements.

Courses: CE46
Prerequisites: MMB131
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► CEB232 Geotechnical Engineering 1 and the Environment

Geomechanics (soil mechanics and rock mechanics) and its application to geotechnical engineering is one of the most important areas of study for civil engineers. It is concerned with the use of soil and/or rock as an engineering material and includes a wide range of activities: site investigation and design for building, bridge and other foundations; materials selection, design and construction control for dams, road pavements and embankments; landslide stabilisation and tunnel excavation and design. The course emphasises environmental issues such as acid sulfate soils and their effects on geotechnical designs, landfill leachate control and how they impact on the design of landfills.

Courses: CE46
Prerequisites: CEB110
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► CEB233 Environmental Professional Studies 3 (Impacts of Projects and Sustainable Development)
The knowledge and skills associated with assessing, investigating, and managing the social and environmental impacts of development projects are essential for today's civil and environmental engineers. Environmental engineers need to be trained to conduct and manage investigative studies related to assessing air, water, soil, and noise pollution, and to understand and address the social implications. They also need the breadth of studies required to work and communicate with interdisciplinary teams designing balanced solutions to environmental problems associated with development. This unit addresses these needs.

Courses: CEB46
Prerequisites: CEB213
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► CEB259 Engineering Design for Land Development
This unit introduces the student to the basic civil engineering design processes and procedures associated with the development of subdivided urban/rural land for residential, industrial or commercial purposes. The unit covers the following: subdivisional road design types, hierarchy, longitudinal and cross sections, earthworks; stormwater design, basic urban hydrology, catchment properties, rational formula, pipe/gully parameters, pipe and open channel flows; water reticulation system features; sewer reticulation system features and basic design procedures. Modern trends in the above (including sustainability considerations) together with the general construction procedures and basic costs are introduced.

Courses: PS47, PS48
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

► CEB317 Professional Studies 4 (Project Documentation & Roads)
Civil engineers as professionals are responsible for the delivery of major transport infrastructure items through the stages of inception, planning, design, development, maintenance and management. The purpose of such projects is to improve the quality of life of the community by offering safe and efficient access to activity locations and mobility between locations. In delivering such infrastructure it is imperative that social, economic, and environmental impacts and benefits are considered and addressed. This unit offers students an opportunity to explore the role of the civil engineer in the preparation of a feasibility design study for a road as a major transport infrastructure item.

Courses: CE44, CE45, CE46
Prerequisites: CEB207, CEB214, BNB007
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

► CEB318 Structural Engineering 2
This unit considers the following: limit states design of steel structures; buckling and ultimate strength behaviour of steel structures; tension members, compression members; local and global buckling (flexural and flex-torsional buckling modes) concepts as applied to compression members and beams; effective lengths of compression members and beams; design of beams; effect of lateral restraints on buckling; web stresses including web crippling and buckling; beam-columns; bolted and welded connections; unsymmetric bending of beams including principal second moments of area; shear stresses in beams of thin-walled open cross-sections and their shear centres.

Courses: CE44, CE45, CE46
Prerequisites: CEB207, CEB110
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

► CEB319 Water Engineering
The main topics to be covered in this unit follow: the hydrologic cycle and its application to the estimation of runoff from small catchments; probability and risk and the selection of design floods; hydrologic data; estimation of peak runoff using the Rational Formula estimation of runoff hydrographs using rainfall-runoff routing models; the hydraulic characteristics of open channels; uniform flow, gradually varied flow and rapidly varied flow; the hydraulic characteristics of culverts and retention basins; the operation of urban drainage systems.

Courses: CE44, CE45, CE46
Prerequisites: CEB217
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

► CEB321 Water and Wastewater Treatment
The provision of a safe, wholesome and adequate supply of water and the proper treatment, disposal, and reuse of wastewater are essential for protecting human health and well-being. Water and wastewater treatment are required for the control of water-borne diseases and the provision of proper plantation for urban, rural, and recreational areas. Water and wastewater treatment engineering is a major field of civil and environmental engineering and is manifested by sound principles and practice in terms of solving sanitation problems.

Courses: CE44, CE45, CE46
Prerequisites: CEB213, CEB217
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► CEB322 Geotechnical Engineering 2
This unit includes: further study on the behaviour of soil and rocks; determination of subsurface pressures from surface loadings; soil settlement including time related clay consolidation settlement and immediate settlements on sand and clay as related to shallow foundations; assessment of bearing capacity and allowable bearing pressures under shallow foundations; pile foundation systems and analysis for capacity and settlement; rock mass behaviour, classification and joint shear strength applied to slope stability assessment and stabilisation measures.

Courses: CE44, CE45, CE46
Prerequisites: CEB209
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2

► CEB323 Transport Engineering 1
The transport system is an essential part of our physical infrastructure. It is imperative that civil engineers are able to undertake typical road and traffic engineering investigations, analyses and designs. These require an understanding of the intent of individual road system elements, how they operate, and how they are designed and managed: this understanding is developed in this unit. Further, it is important that civil engineers are able to undertake multi-modal transport surveys to gain an understanding of the operation of a particular transport system.

Courses: CE44, CE45
Prerequisites: CEB117
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► CEB327 Municipal Design Project
Students will be exposed to the broader design aspects of larger engineering projects as undertaken by local government, state government and land developers. An integrated approach will be studied including planning, design, construction and future developments.

Courses: CE42, CE43, IF42
Credit points: 12  Campus: GP

► CEB328 Investigation Project
This unit gives the student the opportunity to gather a body of information relating to a selected topic from the available literature, and to reach conclusions by critical analysis of this material. The investigation may include analysis and experimental work. The results will be presented as a written report supported by a seminar presentation.

Courses: CE35
Credit points: 12  Semester: 1, 2

► CEB329 Professional Studies 5 (Steel Design & Construction)
This unit includes the study of steelwork: design and construction; structural systems; load paths; rules of thumb; building layout; function and form; cladding; element and wind loading evaluation; idealisation, analysis, design action effects; space gas, columns and rafters; trusses and bracing; connections; knee ridges; base plate design; procurement and fabrication; scheduling and erection.

Courses: CE44
Prerequisites: CEB207, CEB208, CEB215, CEB318
Credit points: 12  Semester: 2

► CEB330 Environmental Management for Engineers
This unit is designed to help students identify and develop the skills required to be environmentally aware, the environmental engineer and specifically, the engineer as a project manager. This may involve making decisions to direct and manage the environmental aspects of a major project. This unit aims to help develop and encourage life long learning throughout a career as an environmental engineer.

Courses: CE46
Prerequisites: CEB233
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► CEB411 Thesis Project A
This is a written report of the literature on an area of civil engineering practice where research and development has been undertaken and reported. Students demonstrate skills in problem definition, work planning, critical analysis of the study material, information retrieval, and appropriate citation procedures. Report writing and seminar presentation is a major feature. Guided instruction and exercises are given on information retrieval and bibliographic listing and citation.

Courses: CE44, CE45
Campus: GP
Credit points: 12  Semester: 1, 2, 3
UNIT SYNOPSES

CEB412 Project Engineering 2
The unit builds on the understanding of the physical aspect of construction gained in Project Engineering 1 to develop the skills needed to manage a project. Further studies in estimating, contracts administration and cost control provide support for a major computer simulation exercise based on the construction management of a complex industrial project. This experiential component provides a framework for the exploration of issues in the legal, managerial and technical areas which form the basis for the professional presentations that conclude the unit.

Prerequisites: CEB44, CEB45
Credit points: 12
Campus: GP
Semester: 1

CEB413 Structural Engineering 3
This unit includes the following: advanced structural engineering topics: 'Space Gas', 'Microtanal', the stiffness method. This method is developed and illustrated by application to some structures. Plastic analysis and the concept of plastic hinge is introduced and applied. Basic structural dynamics is introduced and some simple illustrative examples are provided. Principles of earthquake engineering, aesthetics in bridge design, load paths in structures, and approximate methods in the analysis of complex structures are examined.

Prerequisites: CEB215, CEB318
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

CEB415 Thesis Project B
This is an optional elective and extension of Thesis A CEB411. Various avenues of investigation will have been identified from Thesis A and students undertake a program of investigation which may have experimental, design and analysis aspects. A written report with critical analysis of results and conclusions is prepared, and a seminar presented.

Credit points: 12
Campus: GP
Semester: 1, 2

CEB416 Environmental Law and Assessment
The adverse consequences of human activity have resulted in the adoption of various international treaties, enactment of stringent legislative requirements, and a growing demand for improved management practices. Engineers need to be aware of the way in which the law works, to be able to communicate with lawyers and to recognise the legal and political implications of their projects. An understanding of the local, state, and federal governments’ power to regulate development and the legal and planning requirements and assessment procedures is essential for professional engineering practice.

Credit points: 12
Campus: GP
Semester: 1

CEB418 Waste Resource Management
This unit addresses management of solids and hazardous wastes generated from domestic, commercial and industrial sources. It includes the following: waste minimisation; promotion of efficient use of resources; promotion the use of waste through recycling and energy production; viewing waste as a resource; reducing the mass, volume and toxicity of the waste; disposing of waste in a socially and environmentally acceptable manner; waste avoidance; recycling; energy production; treatment; disposal. Waste management is an important aspect of civil and environmental engineering education.

Credit points: 12
Campus: GP
Semester: 2

CEB419 Environmental Transport & Infrastructure Management
The environmental engineer must be familiar with the role of each transport mode in the overall transport task, along with current issues associated with each mode. This must be overarched by an understanding of the system for planning and management of transport projects and systems, particularly in context with economic, environmental and social attributes. This final year core unit provides students who wish to pursue a career in environmental engineering with an understanding of these areas. The unit also includes case studies covering the environmental impacts for some of the urban and rural transport and infrastructure projects especially in the area of community consultation.

Credit points: 12
Campus: GP
Semester: 1

CEB420 Environmental Thesis Project A

Professional engineers must be able to define and solve problems in areas which are not covered in textbooks and manuals of good practice. Research and development work is required to assimilate critically the available information and to plan and carry out a program of investigation. This subject helps students develop the skills required for this type of work.

Credit points: 12
Campus: GP
Semester: 1, 2, 3

CEB424 Professional Studies 6 (Concrete Structures & Geotechnical Engineering)
This unit includes studies of concrete; design and construction; roles of building professionals; design of current structures; structural systems; load paths; rules of thumb; building layout, function and form, design effects; seismic and element loads; structural element loading; formwork and placement constraints; reinforced and prestressed concrete slabs, beams and columns; architectural changes, connections and detailing; footings and foundations; bar scheduling.

Credit points: 12
Campus: GP
Semester: 1

CEB425 Professional Studies 7 (Civil Design Project)
In their design project, students should consider a selection of the following: development planning and design; site location; layout; characteristics; client requirements; financial; consultancy project planning and costing; development style; site civil design; transport impact assessment, network; SIDRA; trip generation; impact mitigation; intersection design; parking; site storm water design; wastewater treatment design; environmental geotechnical design; contaminated ground; slope stability.

Credit points: 12
Campus: GP
Semester: 2

CEB426 Environmental Professional Studies (Civil Project)
Students should consider the following in their civil project: development planning and design; site location; layout; characteristics; client requirements; financial; consultancy project planning and costing; development style; site civil design; transport impact assessment; network; SIDRA; trip generation; impact mitigation; intersection design; parking; site storm water design; wastewater treatment design; environmental geotechnical design; contaminated ground; slope stability.

Credit points: 12
Campus: GP
Semester: 2

CEB507 Finite Element Methods
The Finite Element Method is the 20th century’s solution for dealing with complex problems, which had hitherto remained impossible to solve, in several areas of engineering such as structural, geotechnical, hydraulic, electrical, heat conduction etc. For example the displacements and stresses in dams, deep beams with openings, shell structures, soil-anchors, etc, can be obtained by finite element analysis. Basic theory and some of the important features of the method, analysis actions, modelling, choice of elements, boundary conditions, input data and interpretation of results are included in this unit.

Credit points: 12
Campus: GP
Semester: 1

CEB508 Transport Engineering 2
This is a final year elective unit to prepare students for a career in transportation engineering, as well as to provide them with an understanding of the analytical processes involved in urban transport planning. It covers all transport modes and places emphasis on the planning and evaluation of transport systems. The unit is designed to highlight the economic, environmental and social impacts of transportation projects. The unit complements CEB323 Transport Engineering 1 by dealing in-depth with urban transportation planning and evaluation.

Credit points: 12
Campus: GP
Semester: 2

CEB509 Project Management and Administration
This unit introduces some of the issues relating to the management of construction projects from both practical and theoretical points of view. Topics covered include the following: leadership and management of organisations and people; planning of a project; engaging of consultants, subcontractors and suppliers; co-ordination of project activities; cost control and claims; legal and insurance issues; information technology issues; written and verbal communication skills; problem solving, and managing and preventing disputes. Assessment is practical
and progressive during the semester and includes a final examination.

Courses: CE44, CE43
Prerequisites: CEB216, CEB412
Credit points: 12
Campus: GP Semester: 1

► CEB513 Advanced Construction Practice
Professional engineers generally work in a highly stressed commercial environment with competing pressures. A student in final year should be exposed to realistic experiences. This subject integrates what has already been taught in the specific civil engineering disciplines and requires the student to prepare and submit a commercial tender for a construction project. Teams of students competitively bid for the project. In addition, relevant legal and commercial issues associated with the tender and subsequent administration of the particular construction contract are covered so that the student appreciates the realities associated with a construction project.

Courses: CE44, CE45
Prerequisites: CEB216
Credit points: 12
Contact hours: 4 per week
Campus: GP Semester: 2

► CEB514 Project Control
Contemporary engineering demands that the practising engineer needs to master not only basic design and construction concepts but also current management practices. Engineers, whether they are in construction, design or maintenance need to understand the effect that economic decisions made at federal and state level have on their organisations. They must also realise that everyone has a different leadership style that must be understood to lead their own's management structure. The subject is designed to provide an insight into the requirements, precepts and problems of project management of interdisciplinary projects.

Courses: CE44, CE45,
Credit points: 12
Campus: GP Semester: 2

► CEB516 Masonry Design
A structural engineer must have the ability to analyse and design engineering components and systems which use masonry as a load bearing and in-fill non-structural panels. This course develops a basic understanding of Masonry Technology and Design using the Australian Standard 3700. It provides an understanding of the differences in the material properties of clay, concrete, calcium silicate bricks and blocks. This unit also provides an understanding of workmanship, site practices and construction details of masonry. Students develop the design skills needed for the design of masonry walls, reinforced or un-reinforced and discuss the difference in design procedures for the different masonry materials.

Courses: CE42, CE43, IF42
Credit points: 12
Campus: GP Semester: 2

► CEB517 Advanced Engineering Studies
Teaching objectives have an opportunity for students to learn how practicing engineers design cold-formed steel and composite structures. The unit has the following aims: to develop an understanding of the design process and how it interacts with the fundamental knowledge of materials and structural analysis; to use advanced computer tools for analysis and design; to work as part of a design team; to present written reports. Students in groups of two will participate in projects to analyse and design cold-formed steel and composite structures.

Courses: CE44, CE45
Credit points: 12
Semester: 2

► CEB518 River and Coastal Engineering
Many civil engineers are involved in the analysis and design of engineering works in the river and coastal environment. An understanding of the physical processes taking place is a fundamental requirement if engineers are to take an active role in the management of this dynamic environment. This unit builds on the fundamental principles of fluid behaviour covered in Hydraulic Engineering CEB217 and Water Engineering CEB319 and extend these principles to the river and coastal environment. It relies on a prior understanding of physics, mathematics and solid mechanics, and basic hydraulic engineering principles.

Courses: CE44, CE45
Prerequisites: CEB319
Credit points: 12
Campus: GP Semester: 2

► CEB522 Geotechnical Engineering Practice
This unit considers the use of soil and/or rock as an engineering material. The unit includes a wide range of activities such as: site investigation and design for building, bridge and other foundations; materials selection, design and construction control for dams, road pavements and embankments; landslide stabilisation; and tunnel excavation and support. Following on from the work done in Geotechnical Engineering 1 and Geotechnical Engineering 2, this elective strengthens the understanding of geomechanics and develops geotechnical investigation, design and construction skills. Three case studies are undertaken.

Courses: CE44, CE45
Prerequisites: CEB322
Credit points: 12
Contact hours: 4 per week
Campus: GP Semester: 2

► CEB523 Environmental Geotechnology
Graduates may work as part of a team investigating, designing and constructing solutions to waste and water contamination and ground-water pollution problems. This subject prepares them for this work by developing an understanding of the engineering concepts and processes and also by introducing them to specialist techniques, such as contaminant transport modelling, which will be used by more specialist members of these teams. It also prepares students for further post-graduate study in these specialist areas.

Courses: CE44, CE43, IF42
Prerequisites: CEB209, CEB213
Credit points: 12
Campus: GP Semester: 1

► CEP127 Road and Traffic Engineering
The municipal engineers' task involves the provision of a safe and effective road system. This unit is included in the course to ensure that students have an effective and comprehensive understanding of the principles of road construction and traffic management. The aim of this unit is to provide the student with not only the techniques to be used but also the principles behind these techniques. A secondary aim is to provide students with an understanding of when a technique is more appropriate. The objectives of the unit are to develop skills in the analysis and design of intersections, urban networks and freeways.

Courses: CE62, CE64, CE74, CE75
Credit points: 12
Semester: 1

► CEP141 Studies in Environmental Engineering
These studies relate to waste and resource management and risk analysis. Waste management topics include the following: waste avoidance and minimisation, recycling and re-use; waste exchange; energy production; treatment; disposal. Risk analysis studies include risks posed by waste material to human health and the environment, and optimisation of resource management.

Courses: CE74, CE75, CE62, CE64
Credit points: 12
Campus: GP Semester: 2

► CEP142 Water Pollution Control
This unit involves various studies related to waste and resource management and risk analysis. Waste management topics are included: waste avoidance and minimisation, recycling and re-use; waste exchange; energy production; treatment; disposal. Risk analysis studies include studies of risk posed by waste material to human health and the environment, and optimisation of resource management.

Courses: CE62, CE64, CE74, CE75
Credit points: 12
Campus: GP Semester: 2

► CEP143 Biological Treatment Processes
This unit considers the design and operation of water and waste water treatment systems, focusing on conventional and advanced biological treatment processes, current practice and development.

Courses: CE64
Credit points: 12
Campus: GP Semester: 2

► CEP151 Road Safety Audit - Principles and Practice
Road safety auditing is a specialised skill that is developed from an understanding of the principles involved and practical examples. This course provides this understanding and practice and enables graduates to become accredited auditors. The unit can be studied by people with a large range of backgrounds and education levels. This unit is offered in block mode.

Courses: CE62, CE64, CE74, CE75
Credit points: 12
Campus: GP Semester: 2

► CEP161 Professional Development Studies 1
The unit is presented to provide students with an advanced understanding of both the qualitative and quantitative processes involved in industrial and professional activities. Emphasis is placed on the planning, operation, management and evaluation of projects and systems, particularly in context with economic, environmental and social attributes.

Courses: CE62, CE64, CE74
Credit points: 12
Campus: GP Semester: 1, 2

► CEP201 Process Modelling
This unit considers the role of models in engineering design and investigation, and the principles of modelling techniques, their uses, limitations and relevant applications.

Courses: CE62, CE64, CE74, CE75
Contact hours: 3 per week
Campus: GP, Ext
Credit points: 12
Semester: 1

► CEP216 Advanced Traffic Engineering
This unit considers traffic flow theory and traffic management, and presents analytical and computer analysis routines for urban traffic management, and presents analytical and computer analysis routines for urban traffic management. Emphasis is placed on the planning, operation, management and evaluation of transport projects and systems, particularly in context with economic, environmental and social attributes.

Courses: CE62, CE64, CE74, CE75
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► CEP218 Transportation Engineering
This unit is presented to provide students with an advanced understanding of the transport engineering discipline, with emphasis on both the qualitative and quantita-

► CEP226 Professional Development Studies
2
This unit provides students with an advanced understanding of the civil/environmental engineering profession with an emphasis on enabling the students to gain an understanding of their contribution in their workplace.

Courses: CE62, CE64, CE74
Contact hours: 4 per week
Credit points: 12
Semester: 2

► CEP291 Environmental Law and Assessment
This unit introduces environmental law. It considers Commonwealth and state legislature, development controls, trends in environmental control, the framework for environmental assessment, description of the environmental setting, and impact assessment and analysis.

Courses: CE62, CE64, CE74, CE75
Contact hours: 4 per week
Credit points: 12
Semester: 1

► CEP292 Engineering Practice 2
This subject is designed to teach the basic precepts in site management and to provide an insight into the requirements, precepts and problems of construction management. Good engineering requires much more than a demonstrated ability in project management or design specialisation. It requires engineers that possess vision and organisation but, more importantly, it requires the skill to be able to deal with the personnel problems that arise on any project.

Courses: CE62, CE64, CE74, CE75
Credit points: 12
Semester: 1

► CEP293 Pavement Design
The unit includes investigatory and design procedures as outlined in the AUSTROADS Pavement Design Manual. A section on materials discusses specification requirements and the testing procedures used by authorities to assess the quality of pavement materials and to predict their performance. Other topics, sourced from conference proceedings and industry, deal with the collection and analysis of traffic data, empirical and mechanistic design procedures, maintenance and rehabilitation, and an introduction to pavement management systems. The background information on the history of pavement design and the origins of pavement design theories is also discussed.

Courses: CE62, CE64, CE74, CE75
Credit points: 12

► CEP294 Engineering Contract Development and Administration
Good engineering requires much more than a demonstrated ability in project management or design specialisation. It requires engineers that possess vision, strategy, communication skills and the ability to enable others to work together as an effective organisation. To achieve this financial and legal knowledge is necessary. Contemporary engineering demands that the practising engineer masters not only basic concepts in either design or construction but also current engineering approaches to contract management methods.

Courses: CE62, CE64, CE74, CE75
Credit points: 12
Campus: GP
Semester: 1

► CEP295 Civil Engineering Management in a Project Environment
Contemporary engineering demands that the practising engineer has not only mastered basic concepts in either design or construction but also has a strong background in current engineering approaches and management methods. This course will provide an insight into the requirements, precepts and problems of engineering management of interdisciplinary projects.

Courses: CE62, CE64, CE74, CE75
Credit points: 12
Campus: GP
Semester: 2

► CEP997-2 Project B
Professional engineers must be able to define and solve problems that are not covered in textbooks and manuals of good practice. Critical assessment of research and development work develops this ability. A plan of action is needed to obtain this information. Students enrol in this unit over two semesters, completing 12 credit points in each semester. The aim of this unit is to help the student to develop skills in reviewing literature and reporting on their area of investigation.

Courses: CE44, CE46, CE74, CE75
Credit points: 12
Campus: GP
Semester: 1, 2

► CEP997-1 Project B
Professional engineers must be able to define and solve problems in areas that are not covered in textbooks and manuals of good practice. Critical assessment of research and development work develops this ability. To obtain this information and to carry out its study needs a plan of action. Students enrol in this unit over two semesters, completing 12 credit points in each semester. The aim of this unit is to help the student to develop skills in reviewing literature and reporting on their area of investigation.

Courses: CE44, CE46, CE74, CE75
Credit points: 12
Campus: GP
Semester: 1, 2

► CLB001 Records Management
This unit introduces the paper-based and electronic records and information systems operating within and between organisations and the impact that changes in communication technology have had on these systems.

Courses: ED90
Incompatible with: COB121
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1

► CLB002 Computer Applications in BCT
This unit includes the study of the use of technology for document preparation, analysis of underlying principles of skills acquisition, traditional and technological perspectives on: document design, document formatting, business correspondence, tabulation, financial statements, business forms, and document formatting for specialised businesses.

Courses: ED90
Incompatible with: COB119
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 2

► CLB003 Administrative Procedures
This unit includes an analysis of business environments in a variety of industries: communication practices, communication flows, functions and operations procedures, and the influence and impact of communication technology.

Courses: ED90
Corequisites: COB173
Incompatible with: COB122
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 2

► CLB004 Integrated Foundation Studies 1: Visual and Verbal Language and Literacies
This unit examines literacy from contemporary perspectives. Literacy education has tended to make an artificial divide between the printed word and visual information. Increasingly, contemporary literate practices combine multiple text forms employing a range of media and technologies to communicate. Texts are spoken, written, visual images, maps and other symbolic forms, and are presented in multimedia combinations and digital interactive contexts. This unit examines the complex simultaneity of texts, delivery modes and media that have specific and more general, social and cultural meaning.

Courses: ED91
Credit points: 12
Contact hours: 3 per week
Campus: CB, KG
Semester: 1

► CLB005 Integrated Foundation Studies 3: Wellness and Active Citizenship
This unit explores the links between a holistic notion of health and wellness and the practice of active citizenship. It investigates the connections between human wellness, behaviour and particular social, cultural, civic, economic and environmental relationships that characterise communities at particular times and places. Students are encouraged to critically analyse such connections and utilise their knowledge and understanding to develop a sense of purpose about wellness and active citizenship in an increasingly globalised world.

Courses: ED91
Incompatible with: CLB369
Credit points: 12
Contact hours: 3 per week
Campus: CB, KG
Semester: 2

QUT HANDBOOK 2006 • PAGE 595
▸ CLB006 Primary Curriculum and Pedagogies: Language and Literacies 1

The privileged status of print as the almost exclusive basis for literacy has diminished. Postmodern culture is powerful and pervasive, and knowledge communication today is as much through multimedia as it is through print. This unit acknowledges that children now form their early concepts about literacy from textual environments that are considerably more complex than for those of their predecessors. Contemporary language and literacy education must base its practices on texts from a range of technologies, involving different media, and in recognition of diverse contexts and social purposes for communicating.

Courses: ED91
Incompatible with: CLB348
Credit points: 12
Campus: CB, KG
Semester: 2

▸ CLB007 Primary Curriculum and Pedagogies: Language and Literacies 2

In this unit, students are required to engage with socio-critical and inclusive principles and practices relating to language and literacy education. They will plan for literacy development in a range of contexts, and examine how strategic practice is linked to particular theories of language and literacy development.

Courses: ED91
Incompatible with: CLB349
Credit points: 12
Campus: KG
Semester: 1, 2

▸ CLB008 Primary Curriculum and Pedagogies: Studies of Society and Environment

This unit focuses on recent developments within the social education curriculum area with particular reference to Studies of Society and Environment (SOSE), a national key learning area, and explores teaching and learning approaches in SOSE. Understanding the processes of curriculum development and being able to interpret curriculum documents and their implications for classroom practice are essential professional skills. Students will investigate SOSE as a curriculum area and to consider ways of translating syllabus requirements into worthwhile teaching and learning activities. Students will critically reflect upon both the theory and the practical suggestions throughout the unit and to consider how effective teaching can be achieved.

Courses: ED91, IX14
Prerequisites: CLB005
Corequisites: CLB005
Incompatible with: CLB376, CLB122, CLB374
Credit points: 12
Contact hours: 3 per week
Campus: CB, KG
Semester: 1, 2

▸ CLB010 Accounting and Business Management Curriculum Studies 2

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior Accounting and Business Organisation and Management Syllabus to understand mandatory aspects of each syllabus. This unit will prepare students for their professional role as a teacher of secondary business education subjects, in particular, Accounting and Business Organisation and Management.

Courses: ED90, ED95, IX03, IX09, ED55
Prerequisites: CLB009 or CLB051
Campus: KG, Ext
Credit points: 12
Semester: 2

▸ CLB011 Accounting and Business Management Curriculum Studies 3

This unit develops an understanding of advanced teaching methods including inquiry-based, cooperative based and problem based learning strategies, and the application of higher order thinking skills.

Courses: ED90, ED95, IX03, IX09, ED55
Prerequisites: CLB010
Campus: KG, Ext

▸ CLB013 Business and Communication Technologies Curriculum Studies 2

This unit provides opportunities to develop further an understanding of teaching and learning in Business Communication and Technology through a greater understanding of the syllabus and the use of advanced teaching strategies. The principles of assessment are explored and unit development is undertaken.

Courses: ED90, ED95, IX09, ED55
Prerequisites: CLB012 or CLB051
Campus: KG, Ext
Credit points: 12
Semester: 2

▸ CLB016 Economics Curriculum Studies 2

This unit provides pre-service teachers with the opportunities to develop an understanding of teaching and learning in Economics and Studies of Society and Environment (SOSE). The significance of critical approaches and outcomes based approaches are explored in the context of the principles of SOSE/Social Education, pedagogical approaches, syllabus and assessment requirements.

Courses: ED90, ED95, IX03, IX09, ED55
Prerequisites: CLB015 or CLB054 or CLB051
Campus: KG, Ext
Credit points: 12
Semester: 2

▸ CLB018 English Curriculum Studies 1

This introduction to English teaching in secondary schools, provides an indispensable foundation on which English Curriculum Studies II and III are built. Students will develop an understanding of the theories of language and texts that underpin secondary English curriculum and pedagogy and which condition students learning within secondary English classrooms. Students will have opportunities to apply their learning to their field observations and to plan to put theory of language, texts and learners into practice for English teaching.

Courses: ED55, ED90, ED95, IX01, IX04, IX05, IX08, IX09
Campus: KG, Ext
Credit points: 12
Semester: 1

▸ CLB019 English Curriculum Studies 2

This unit provides an opportunity to develop a theorized understanding of the Queensland English Syllabus for years 1-10 and to implement this understanding by developing lessons and curriculum units that are appropriate for the needs and interests of diverse learners in a range of sociocultural contexts.

Courses: ED90, ED95, IX01, IX04, IX05, IX08, IX09, ED55
Prerequisites: CLB018
Campus: KG, Ext
Credit points: 12
Semester: 2

▸ CLB020 English Curriculum Studies 3

This unit provides opportunities to develop a theorized understanding of the Queensland English Syllabus for Years 11 and 12, Senior English Communication (SAS) and the Senior English Extension (Literature) Syllabus, and to implement this understanding by analysing and developing senior English programs, teaching and assessment strategies that are appropriate for the needs and interests of diverse learners in particular socio-cultural contexts.

Courses: ED90, ED95, IX01, IX04, IX05-08, IX09, ED55
Prerequisites: CLB019
Campus: KG, Ext
Credit points: 12
Semester: 1, 2

▸ CLB021 ESL Curriculum Studies 1

Effective ESL practitioners require a knowledge and understanding of the many factors that impact on the effective learning of a second (or an additional) language and on learning curriculum content through an additional language. They also need to know how these factors influence planning for learning and how they can be managed to maximise learning outcomes. In this first curriculum unit, students will engage with some of the theories that influence approaches to teaching English as an additional language across the curriculum. Students will engage with the documents that impact on planning for ESL teaching and learning eg ESL Framework of Stages and NLLIA ESL Bandscapes.

Courses: ED55, ED90, ED95
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1

▸ CLB022 ESL Curriculum Studies 2

This unit introduces the theoretical and practical knowledge and skills required by an effective practitioner in the complex social environment of the classroom.

Courses: ED90, 95, ED55
Prerequisites: CLB021
Campus: KG
Credit points: 12
Semester: 2

▸ CLB023 ESL Curriculum Studies 3

This unit introduces the theoretical and practical knowledge and skills required by an effective practitioner in the complex social environment of the classroom.

Courses: ED90, ED95, ED55
Prerequisites: CLB022
Campus: KG
Credit points: 12
Semester: 1

▸ CLB024 Film and Media Curriculum Studies 1

This unit is designed to develop competencies needed for planning and teaching in Junior secondary Media (Years 8-10). Students will be introduced to the current curriculum directions and frameworks for junior media (1-10) and its applications across the curriculum. The unit will build on the understandings and skills students developed in the unit Teaching and Learning Studies I and II and relate also to Field Studies I. This should assist in preparing students for the further field studies components of the course.

Q U T H A N D B O O K 2 0 0 6  •  P A G E 5 9 6
UNIT SYNOPSES

Courses: ED55, ED90, ED95, IX01, IX05-IX08
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1  ► CLB025 Film and Media Curriculum Studies 2
This unit allows students to apply theoretical knowledge of the curriculum and their Film and Media discipline units to senior secondary contexts. The unit offers the opportunity to develop research and presentation skills by formally researching and discussing the teaching implications of a number of current topics in film and media education.
Courses: ED90, ED95, IX01, IX05-IX08, ED55  Prerequisites: CLB024  Campus: KG  Credit points: 12  Semester: 2  ► CLB026 Film and Media Curriculum Studies 3
This unit allows students to apply technological concepts and skills in senior and junior media studies and across other curriculum areas. The unit helps students understand and design pre-production texts investigating the role of technologies in the senior curriculum.
Courses: ED90, ED95, IX01, IX05-IX08, ED55  Prerequisites: CLB025  Campus: KG, Ext  Credit points: 12  Semester: 1  ► CLB028 Geography Curriculum Studies 2
This unit provides opportunities to develop an understanding of teaching and learning in Geography and Studies of Society and Environment.
Courses: ED90, ED95, IX01, IX05-IX08, IX09, ED55  Prerequisites: CLB054 or CLB027  Campus: KG, Ext  Credit points: 12  Semester: 2  ► CLB029 Geography Curriculum Studies 3
This unit provides opportunities to develop an understanding of recent developments that have influenced teaching and learning in geography.
Courses: ED90, ED95, IX01, IX05-IX08, IX09, ED55  Prerequisites: CLB028  Credit points: 12  ► CLB031 History Curriculum Studies 2
This unit provides opportunities to develop an understanding of teaching and learning in History and Studies of Society and Environment (SOSE).
Courses: ED90, ED95, IX01, IX05-IX08, IX09, ED55  Prerequisites: CLB054 or CLB030  Campus: KG, Ext  Credit points: 12  Semester: 2  ► CLB034 Legal Studies Curriculum Studies 2
The second of three complementary units in Legal Studies Curriculum. Units are designed to help prepare students for a professional role as a teacher of secondary school Senior Legal Studies, and also to prepare them to teach in lower secondary subjects which are law-related, particularly the Civics syllabus of SOSE.
Courses: ED90, ED95, IX09, ED55  Prerequisites: CLB051 or CLB054 or CLB033  Campus: KG, Ext  Credit points: 12  Semester: 2  ► CLB035 Legal Studies Curriculum Studies 3
This is the third of three complementary units in Legal Studies Curriculum. The unit draws on your knowledge and understanding of the previous units and applies it to law-related education in both the senior and junior secondary school.
Courses: ED90, ED95, IX09, ED55  Prerequisites: CLB034  Credit points: 12  Campus: KG  ► CLB036 LOTE Curriculum Studies 1
This unit allows students to develop an understanding of the language learning process and their awareness of the place of languages in the school curriculum. Students will be encouraged to become reflective learners/teachers who can analyse the contexts in which they work, are familiar with policy and curriculum issues and are able to make soundly-based professional judgments designed to maximize learning for all students.
Courses: ED90, ED95, IX01, IX05-IX08, ED55  Campus: KG  Credit points: 12  Semester: 1  ► CLB037 LOTE Curriculum Studies 2
Practising teachers need to be aware that syllabuses, policy documents, classroom practices and teaching strategies they use reflect underlying views of language and learning.
Courses: ED90, ED95, IX01, IX05-IX08, ED55  Prerequisites: CLB036  Campus: KG  Credit points: 12  Semester: 2  ► CLB038 LOTE Curriculum Studies 3
This unit builds on the two previous units and explores in greater depth a range of practical and theoretical issues in the area of LOTE curriculum development and implementation.
Courses: ED90, ED95, IX01, IX05-IX08, ED55  Prerequisites: CLB037  Campus: KG  Credit points: 12  Semester: 1  ► CLB040 Social Science Curriculum Studies 2
This unit involves translating the syllabuses into modules or units of work, as well as placing an emphasis on assessment principles in Social Science. Students will also be involved in the development of advanced teaching strategies.
Courses: ED90, ED95, IX01, IX09, ED55  Prerequisites: CLB054 or CLB039  Campus: KG, Ext  Credit points: 12  Semester: 2  ► CLB042 Primary LOTE Curriculum Studies 1
This unit develops an understanding of the second language learning process and awareness of the place of languages in the primary school curriculum. Students will analyse the contexts in which they work, deal confidently with policy and curriculum issues and make soundly-based professional judgments designed to maximize learning for all students.
Courses: ED91, ED95, ED55, ED90 LOTE  Corequisites: Nil  Campus: KG  Credit points: 12  Semester: 1, 2  ► CLB044 Primary LOTE Curriculum Studies 3
This unit builds on the previous two units and explores in greater depth a range of practical and theoretical issues in the area of LOTE curriculum development and implementation.
Courses: ED95, ED55  Prerequisites: CLB043  Campus: KG, Ext  Credit points: 12  Semester: 1  ► CLB045 Becoming a Second Language User
This unit aims to develop understanding of the processes of second language acquisition from both a practical and theoretical perspective. Students will gain an insight into the attributes of second language users and the issues facing them in contemporary education.
Courses: ED26, ED90, ED91, ED92, ED82 - pathway  Campus: KG  Credit points: 12  Semester: 2  ► CLB049 The Global Teacher
This unit enhances the skills of educators to design curriculum and pedagogy in ways that address global citizenship and educational and human rights.
Courses: ED90, ED91, ED92, ED82 - pathway  Campus: KG  Credit points: 12  Semester: 1  ► CLB051 Business Education Curriculum Studies 1
This is the first of three complementary units in the teaching of Business Education. The three units have been designed to help prepare you for a professional role as a teacher of lower and senior secondary school Business Education subjects (Accounting Business Management, Business Communication Technologies, Economics, Legal Studies, and ICT). In this first unit, the focus will be on curriculum development and teaching approaches in Lower Secondary Business and ICT Education.
Courses: ED90, ED95, IX03, IX09, ED55  Campus: KG  Credit points: 12  Semester: 1  ► CLB053 Business Education Curriculum Studies 3
This unit, the final of three complementary units in the teaching of Business and ICT Education, will further develop your professional knowledge and skills as a learner-focused educator, a skilled curriculum developer and a reflective practitioner. The unit explores relevant issues, pedagogy and professional requirements essential for teachers of Business and ICT Education in the 21st century classroom.
Courses: ED90, ED95, IX03, IX09, ED55  Campus: KG  Credit points: 12  Semester: 1, 2  ► CLB054 Social Education Curriculum Studies 1
This is the first of three complementary units in Social Education curriculum aimed at preparing you to teach Social Science subjects in the lower secondary school. This unit focuses on recent developments within the curriculum area of social education, with particular reference to the field of Studies of...
Society and Environment (SOSE), a national Key Learning Area. It explores the theoretical context for these curriculum areas, and places emphasis on the links between theory and practice.

Courses: ED90, ED95, ED55, IX01, IX09
Campus: KG
Credit points: 12 Semester: 1

► CLB056 Social Education Curriculum Studies 3

This is the third of three complementary units in Social Education curriculum. The aim of this unit is to provide you with opportunities to develop an understanding of the ways in which new policies and initiatives have impacted on teaching and learning in social sciences and specific discipline studies in the senior school.

Courses: ED90, ED95, ED55, IX01, IX09
Campus: KG
Credit points: 12 Semester: 1, 2

► CLB122 SOSE Curriculum and Pedagogies

This unit enhances understanding of the nature of SOSE as a curriculum area, and of the SOSE Syllabus and related curriculum documents.

Courses: ED96, IX12
Campus: KG, Ext
Credit points: 12 Semester: 1

► CLB123 Multiliteracies: Designs for Learning

Through engagement with critical and sociocultural principles of language and literacy education, and within a new literacies organisation, student teachers have opportunities to develop concepts of themselves as life-long learners in the area of language and literacy-related pedagogy and to demonstrate their capacity as effective communicators.

Courses: ED96, IX12, IX14
Campus: KG, Ext
Credit points: 12 Semester: 2

► CLB320 Studies in Language

This unit addresses the following topics: the language basis in current approaches to the teaching of English; nature and function of language; the dynamics involved in interactive situations; the appropriateness of language forms used in various social contexts; the educational implications of linguistic diversity within the community; the recognition of the developmental features of adolescents.

Courses: ED47, ED90, IX01, IX03, IX05
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2

► CLB321 Writing Workshop

The student, as writer, uses all the language modes in social contexts (either genuine or simulated) to lead to writing in a range of situations. Engagement in these writing situations is designed to bring about personal understanding of the following: the nature of the writing process; the influence of audience and purpose on the final written product; the range of genres (or forms) falling within the writing activity.

Courses: ED90
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

► CLB322 Literature In Secondary Teaching

This unit covers the following topics: literature teaching in historical perspective; recent developments in theory; poetry in the senior school; teaching drama in the senior school; teaching the novel in the senior school; shorter works (novellas, short stories) and their use in the English curriculum.

Courses: ED26, ED90
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► CLB323 Teaching Adolescent Literature

This unit addresses the following topics: scope and nature of young adult literature; strategies for evaluation and selection; recent research into adolescents' reading needs, interests and responses; using young adult books in the curriculum.

Courses: ED26, ED90, ED91*, ED92*, ED82*, IX01-09 *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► CLB347 Teaching English as an Additional Language

This elective unit for students in all teaching specialisations will develop understanding of specific language and learning needs of students for whom English is a second language. It deals with differences in first and second language development, professional implications of significant policy initiatives related to second language learners, and issues in analysis, assessment and cross-cultural communication. Participants will also investigate language demands of their own area of specialisation and develop appropriate teaching techniques and resources.

Courses: ED26, ED54, ED55, ED90*, ED91*, ED92*, ED82* - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► CLB371 Knowing Your Environment: From Global Issues to Local Action

This unit uses an interdisciplinary social science approach to explore the origins, nature and impact of various environmental issues that threaten the continuing viability of our planet. Its aim is to develop a sound skills and knowledge base enabling students to analyse, synthesise and respond positively to many of the controversial and vital environmental problems at a local, national and global level.

Courses: ED90*, ED91*, ED92*, ED82* - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

► CLB372 Sustainable Consumption: From Coca-Cola to the Community Co-op

Designed to enhance the knowledge and skills of the individual in one of the most important roles in a market oriented economy. Content includes the following: the role and functions of consumers in the Australian economy; the interrelationship between consumers, business and government; consumer protection laws and the need for them; ways of developing pro-active consumerism; consuming for the environment - the green consumer.

Courses: ED90*, ED91*, ED92*, ED82* - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► CLB373 Environmental Futures Australasia and the Asia Pacific

This unit provides a futures approach in the study of the rapidly changing Asia-Pacific region. An introduction to the study of the future is made through an analysis of principal methods and contemporary contributors such as Toffler and Jones. Methods and models that are applied are relevant to Australia, Asia and the Pacific; covering themes including: population and migration; international relations; political institutions and systems; resource allocation and utilisation; sustainable development; environment issues and structural change.

Courses: ED90*, ED91*, ED92*, ED82* - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

► CLB375 Exploring Outdoors; Education in the Environment

This unit is designed to identify and value a wide range of field study resources and venues. Extensive involvement with field study experiences will assist students in developing appropriate skills for investigating environmental issues and concerns as well as helping students reflect and refine the usefulness and value of field experience in developing effective environmental education programs.

Courses: ED90*, ED91*, ED92*, ED82* - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► CLB401 Cultural Diversity and Education

This unit explores the multicultural nature of Australian society and its educational approaches to addressing the needs of cultural diversity. Participants will analyse the role of the school and the teacher with respect to schooling and pluralism. Students will learn how to identify and challenge various forms of discrimination, and recognise the kinds of social, curriculum, and classroom management policies which are sensitive to the needs of students from diverse socio-cultural backgrounds.

Courses: ED90*, ED91*, ED92*, ED82*, ED26, ED53, ED54, ED55 - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2

► CLB402 Issues in Indigenous Education

This unit addresses the following topics: factors influencing the position of Aborigines and Torres Strait Islanders in Australian society; government policies; indigenous cultures and education; current initiatives; participation of indigenous communities in policies and programs.

Courses: ED90*, ED91*, ED92*, ED82*, ED26, ED53, ED54, ED55 - *pathway
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2

► CLB403 Gender and Sexuality Issues for Teachers

This unit addresses the following topics: gender and sexualities in cultural and school contexts; historical overview of gender relations; theoretical frameworks for gender and current debates in Australia about gender and equity; femininity and masculinity as social constructs; sexuality and the body; violence and gender; debates about boys'
behaviour and performance in Australian schools.

Courses: ED26, ED54, ED55, ED90*, ED91*, ED92*, ED92*, "pathway

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► CLB413 Programming and Assessment in Language and Mathematics

The unit has two main components: a lecture sequence which provides generic information on state and national initiatives and practices in assessment and intervention in both language and mathematics; and two practical strands in which students will plan for unit development, assessment and intervention in both language and mathematics.

Courses: ED26

Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1

► CLB441 Children's Literature

This unit provides students with the opportunity to extend their knowledge of children's literature written by both Australian and overseas writers. It examines traditional and emerging genres, develops critical approaches to texts, and considers ways of using children's literature in the classroom.

Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 2

► CLB446 Understanding Texts and Writing

Over the past twenty years, linguistic studies have increasingly informed the development of language curriculum, the assessment of language, and the processes of language and literacy learning in schools. Over the same time the need for teachers to have systematic knowledge of language and how it works has been recognised. In much of Australia this systematic approach to describing language comes principally from the systemic functional school of linguistics. This unit provides an organised, contextualised introduction to that linguistic model through workshop sessions involving the writing and reading of a range of genres. In this unit, students will learn to critically evaluate texts, their purposes and the language resources employed by writers.

Courses: ED90

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2

► CLB452 Media Literacy and the School

The unit aims to equip future teachers with an understanding of media literacy that they can apply to their own professional growth and incorporate into an educational environment. Aspects of media techniques and practices, relationships between culture and meaning; the nature of an audience, and concepts of agents and industry will be explored.

Courses: ED26, ED90*, ED91*, ED92*, ED92*, ED47 - "pathway
Incompatible with: LAP513

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► CLN601 Cyberlearning: Information & Knowledge in the Digital Age

Cyberlearning occurs in digitally navigable environments which shape and are shaped by a variety of discourses: social, cultural, political, institutional, technological and economic. Current pedagogical issues and evolving epistemologies pertaining to information creation and knowledge construction need to be addressed by educators and other learners who will participate in cyberlearning experiences in their professional and personal lives. This unit addresses the essential elements for understanding potential new pedagogical practices and epistemologies which will inevitably be shaped by the changing nature of communications technologies.

Courses: ED09, ED13, ED61, ED25

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► CLN602 Diversity and Multilingualism

The unit aims to provide students with opportunities to take investigative and critical approaches to multilingualism in education. It is designed for students to identify, justify, and highlight a school or work place 'work order' that addresses changing contexts of communication and social justice agendas.

Courses: ED09, ED13

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2

► CLN603 Designing Spaces for Learning

This unit provides a foundation for understanding the complex relations among space and place and learning pedagogies appropriate to the design of innovative, adaptable supportive spaces for learning in future-oriented educational contexts.

Courses: ED09, ED13, ED25, ED61

Campus: KG, Ext

Credit points: 12  Semester: 2

► CLN604 Globalisation and Educational Change

This unit explores how different paradigms interpret globalisation, global change and the implications for education. It undertakes a comparative analysis of the impact of globalisation on schooling, higher education and the work of multilateral agencies in education across different national and local contexts.

Courses: ED09, ED13

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► CLN608 Second Language Acquisition

Research into second language acquisition is providing new insights into the complex processes involved in natural and instructed language development. This unit extends participants knowledge of research into, and theories of, second language acquisition; and explores pedagogical implications and the relevance of research and theories to the enhancement of second language acquisition and learning.

Courses: ED14, ED11, ED77

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► CLN612 Principles of Second Language Methodology

This unit considers the range of approaches to second language learning and the theories of language and learning which underpin them: theories of language and learning and their implications for TESOL; the social context of learning and its impact on methodological decision-making; current approaches and methods in TESOL; the roles of teachers and learners in the TESOL classroom.

Courses: ED14, ED77

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► CLN613 Second Language Curriculum Design Options

This unit introduces the factors that influence teachers in the development of language programs. It includes analysis of the following areas: learner profiles and needs; aims and objectives; processes and criteria for selecting methodology; content selection and sequencing; choice and evaluation of materials and resources.

Courses: ED14, ED77

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2

► CLN615 Directed Reading In Second Language Education

This unit provides an opportunity for teachers and others involved in TESOL to review current research articles to gain an overview of developments in TESOL/Applied Linguistics and to explore one or two personal interest areas in greater depth.

Courses: ED14, ED77

Prerequisites: CLN618

Contact hours: 3 per week  Campus: KG, Ext

Credit points: 12  Semester: 1, 2

► CLN616 Language Assessment And Program Evaluation In Tesol

This unit introduces the theories and practices in program evaluation, language testing and proficiency assessment. It examines and evaluates standardised tests and instruments that are used to assess the English language proficiency of speakers for whom English is a second language.

Courses: ED14, ED77

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► CLN617 Personalised Language Development

Language learning is a lifelong task. This unit allows teachers to take a program of language development aimed at improving their level of proficiency and enhancing their cultural awareness. Students wishing to take this unit should discuss options with the coordinator.

Courses: ED14, ED77

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► CLN618 Technology and Second Language Learning

The 20th century saw a rapid change in the technology available to language teachers. This unit explores the creative teaching potential of this technology in areas such as computer enhanced language learning (CEL), interactive multimedia (including CD-ROM and video disc) and the use of linear video, word processing and audio materials. The unit will also explore access to and pedagogical uses of electronic communication such as email, list servers and bulletin boards.

Courses: ED14, ED77

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► CLN619 Functional Grammar and Discourse

When we use language to enact our everyday lives, to teach and to learn, we use discourse to do so. Through this unit, students develop both the knowledge and the tools to
This unit explores the relationship between language and culture drawing on insights from linguistics, sociolinguistics and cultural theory. It analyses the co-constitutive nature of language and culture, and examines how this relationship can be explored in the TESOL context.

**Courses:** ED14, ED77
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **CLN640 Sociolinguistics**
This unit is an introduction to sociolinguistics, the study of language as social process and practice. Topics covered include the following: language functions and varieties; regional and social dialects, styles and registers; pidgin and Creole languages; language as social practice; discourse; speech communities; language and power; sociolinguistics and language teaching.

**Courses:** ED14, ED77  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1, 2

► **CLN641 From Theory to Practice - Practical Applications in the TESOL Classroom**
This unit focuses on Communicative Language Teaching (CLT). It extends students' knowledge of the general trends in methodology learned in CLN612, by providing a theoretical framework for CLT and various opportunities to apply the theoretical framework to classroom practice.

**Courses:** ED14, ED77  
**Prerequisites:** CLN612  
**Corequisites:** CLN612  
**Contact hours:** 3 per week  
**Campus:** KG, Ext  
**Credit points:** 12  
**Semester:** 1, 3

► **CLN642 Grammar for Teachers**
This unit assists language teachers develop a better understanding of grammar and its place in the teaching and learning of a second language. Participants will develop their own language awareness and explore a range of strategies and techniques for the effective integration of grammar instruction into language programs.

**Courses:** ED14, ED77  
**Prerequisites:** CLN608, CLN612  
**Corequisites:** CLN608, CLN612  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1, 3

► **CLN643 English Language Teaching Management**
This unit examines a range of issues of relevance for ESL program directors and managers: organisational cultures; educational leadership and human resource management in TESOL; the role of teachers in the TESOL service industry; legal and industrial contexts of TESOL in Australia; TESOL marketing, promotion and funding; the implications of globalisation for the TESOL profession.

**Courses:** ED14, ED77  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **CLN645 Studies of Asia: New Pedagogies**
This unit employs several theoretical frameworks to explore significant aspects of Asian societies, their relationships with Australia and their role in empowering Australians for regional engagement.

**Courses:** ED09, ED13  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **CLN646 The Knowledge Hub: Information Services for Dynamic Learning**
This unit explores the relationship between language and culture, and examines how this relationship can be explored in the TESOL context.

**Courses:** ED14, ED77  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1, 2

► **CLP400 Middle Years: Multiliteracies**
This unit provides students with the opportunity to develop concepts of themselves as life-long learners and to demonstrate capacities as effective communicators across media through engagement with critical and socio-cultural principles of language and literacy education. Students will develop a range of knowledge, skills, values and attitudes. Educators need to understand the ways popular cultural texts (literary, mass media, computer-based and digital) form the cultural capital of youth and give meaning to their lived experiences.

**Courses:** ED09, ED13  
**Campus:** Ext  
**Credit points:** 12  
**Semester:** 1, 2

► **CLP401 Middle Years: Transdisciplinary Arts**
This unit aims to enhance students' understanding of the nature of SOSE and the arts as curriculum areas and to highlight the advantages of bringing these areas of learning together. It also aims to provide the opportunity to engage with the relevant syllabus and curriculum documents by translating goals and outcomes into innovative middle-years teaching units.

**Courses:** ED26, ED38  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1, 2

► **CLP402 Business Education Curriculum Studies 1**
This is the first of three complementary units in the teaching of Business Education. The three units have been designed to help prepare students to teach business education, and to prepare them to teach secondary business education subjects, in particular Accounting and Business Management.

**Courses:** ED38  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1, 2

► **CLP403 Business Education Curriculum Studies 2 (Accounting and Business Management)**
This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior BCT syllabus and develop a range of knowledge, skills, values and attitudes. Educators need to understand their role as a teacher of secondary business education subjects, in particular Accounting and Business Organisation and Management.

**Courses:** ED38  
**Prerequisites:** CLP402  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **CLP404 Business Education Curriculum Studies 2 (Accounting and Business Management)**
This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior Accounting and Business Organisation and Management syllabuses, and ICT. This unit will provide students with the opportunity to develop concepts of themselves as life-long learners and to demonstrate capacities as effective communicators across media through engagement with critical and socio-cultural principles of language and literacy education. Students will develop a range of knowledge, skills, values and attitudes. Educators need to understand the ways popular cultural texts (literary, mass media, computer-based and digital) form the cultural capital of youth and give meaning to their lived experiences.

**Courses:** ED09, ED13  
**Campus:** Ext  
**Credit points:** 12  
**Semester:** 1, 2

► **CLP405 Economics Education Curriculum Studies**
This unit is the second in a suite of three complementary units which can be undertaken in either the Business Education or Social Education streams. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Economics Syllabus to understand mandatory aspects of the syllabus and to prepare students for their professional role as a teacher of Economics.

**Courses:** ED38  
**Prerequisites:** CLP402 or CLP414  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **CLP406 Legal Studies Education Curriculum Studies**
This unit is the second in a suite of three complementary units which can be under-
taken in either the Business Education or Social Education streams. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Legal Studies Syllabus to understand mandatory aspects of the syllabus. This unit will prepare students for their professional role as a teacher of secondary Legal Studies.

Courses: ED38
Prerequisites: CLP402 or CLP414
Campus: KG
Credit points: 12 Semester: 2

► CLP407 Business Education Curriculum Studies 3
This unit, the final of three complementary units in the teaching of Business and ICT Education, will develop further your professional knowledge and skills as a learner-focused educator, a skilled curriculum developer and a reflective practitioner. The unit explores relevant issues, pedagogy and professional requirements essential for teachers of Business and ICT Education in the twenty-first century classroom.

Courses: ED38
Corequisites: CLP403 or CLP404 or MDP455
Campus: KG
Credit points: 12 Semester: 1, 2

► CLP408 English Education Curriculum Studies 1
An introduction to English teaching in secondary schools, providing an indispensable foundation for subsequent English Curriculum Studies. You will develop an understanding of language learners, and of the theories of language and texts which underpin secondary English curriculum and pedagogy and which condition students' learning within English classrooms. You will have opportunities during your field studies to conduct inquiry-oriented language-focused observations of a range of students, evaluate their language learning needs and devise appropriate learning experiences for them.

Courses: ED38
Corequisites: Field Studies 1
Campus: KG
Credit points: 12 Semester: 1, 2

► CLP409 English Education Curriculum Studies 2
This unit aims to provide you with opportunities to develop a critical understanding of the theories and principles which inform the Queensland English Syllabus for Years 1-10 and to implement this understanding by developing junior secondary curriculum units and lessons which are appropriate for the needs and interests of diverse learners in a range of sociocultural contexts.

Courses: ED38
Prerequisites: CLP408
Campus: KG
Credit points: 12 Semester: 2

► CLP410 English Education Curriculum Studies 3
In this unit, you will develop and implement your understanding of the range of disciplinary approaches (such as Literary and Cultural Studies, Film and Media Studies, and sociolinguistics) which contribute to secondary English curriculum and pedagogy. The policy context is the Queensland English Syllabus for Years 11 and 12, Senior English Communication (SAS), the Senior English Extension (Literature) Syllabus, and school to work transition programs. You will learn to evaluate and develop English work programs for students in the post-compulsory years.

Courses: ED38
Corequisites: CLP409
Campus: KG
Credit points: 12 Semester: 1, 2
► CLP411 Languages Education Curriculum Studies 1
Languages Education Curriculum Studies 1 aims to develop your understanding of the language learning process and your awareness of the place of languages in the school curriculum. This unit will focus on developing your understanding of language learning, the place of languages and literacies in the school curriculum and the role of the language teacher in developing linguistic and cultural awareness.

Courses: ED38
Campus: KG
Credit points: 12 Semester: 1
► CLP412 Languages Education Curriculum Studies 2
This unit involves further discussion of the theoretical fundamentals of language curriculum development and methodology and exploration of the major issues faced by language teachers in their daily pedagogical decision making. It will develop your capacity to plan learning experiences which support students' involvement in multi-literacy practices and develop strategic language learning skills which they can use beyond the classroom.

Courses: ED38
Prerequisites: CLP411
Campus: KG
Credit points: 12 Semester: 2
► CLP413 Languages Education Curriculum Studies 3
This unit focuses on the development of effective language programs and assessment practices for secondary students, including senior assessment and outcomes-based assessment in a variety of contexts. This unit aims to support you in expanding your teaching repertoire so that you can provide all learners with an effective learning environment based on a critical awareness of good professional practice.

Courses: ED38
Campus: KG
Credit points: 12 Semester: 1
► CLP414 Social Education Curriculum Studies 1
This is the first of three complementary units in Social Education curriculum aimed at preparing you to teach Social Science subjects in the lower secondary school. This unit focuses on recent developments within the curriculum area of social education, with particular reference to the field of Studies of Society and Environment (SOSE), a national Key Learning Area. It explores the theoretical context for these curriculum areas, and places emphasis on the links between theory and practice.

Courses: ED38
Campus: KG
Credit points: 12 Semester: 1, 2
► CLP415 Social Education Curriculum Studies 2 (Geography)
This is the second of three complementary units to be taken in the Social Education stream. This unit has been designed specifically to prepare you for a professional role as a teacher of geography in the years of secondary school. It will build on the planning and teaching strategies developed in your first curriculum studies unit. In this second curriculum unit you will explore in depth theories that influence approaches to teaching in geography and ways of catering for diversity in the classroom.

Courses: ED38
Prerequisites: CLP414
Campus: KG
Credit points: 12 Semester: 2
► CLP416 Social Education Curriculum Studies 2 (History)
This is the second of three complementary units in Social Education curriculum designed to prepare you for a professional role as a teacher of Senior Social Science subjects in the secondary school. This unit builds on the focus of your first curriculum studies unit and extends your knowledge and understanding of the nature of history and historical inquiry developed in the History Curriculum Elective.

Courses: ED38
Prerequisites: CLP414
Campus: KG
Credit points: 12 Semester: 2
► CLP417 Social Education Curriculum Studies 2 (Senior Social Science)
This is the second in a suite of three complementary units which are undertaken in the Social Education Stream. This unit has been designed to prepare you for a professional role as a teacher of secondary school Senior Social Science subjects. The aim of this unit is to provide you with opportunities to develop an understanding of teaching and learning in the social sciences within the senior secondary school.

Courses: ED38
Prerequisites: CLP414
Campus: KG
Credit points: 12 Semester: 2
► CLP418 Social Education Curriculum Studies 3
This is the third of three complementary units in Social Education curriculum. The aim of this unit is to provide you with opportunities to develop an understanding of the ways in which new policies and initiatives have impacted on teaching and learning in social sciences and specific discipline studies in the senior school.

Courses: ED38
Prerequisites: NIL
Campus: KG
Credit points: 12 Semester: 1, 2
► CLP419 Social Education Curriculum Studies - Senior History
The aim of this elective unit is to provide you with opportunities to develop an understanding of teaching and learning in history. You will investigate how learning through historical inquiry develops specific historical understandings and skills that are the foundations for historical literacy. This unit provides opportunities for you to critique how recent developments in historical education are impacting upon curriculum development and teaching approaches in Senior Ancient and/or Senior Modern History.

Courses: ED38
Campus: KG
Credit points: 12  
Semester: 1

CLP420 Vocational Education
This unit provides you with an opportunity to develop an understanding of teaching and learning in Vocational Education. It will provide you with knowledge of processes for teaching, managing and auditing in VE programs. You will develop an understanding of senior school pedagogical approaches to teaching and learning in the vocational education area.

Courses: ED38
Credit points: 12  
Campus: KG

CLP530 Accessing Information Sources
This unit addresses the following topics: the search process and search strategies; effective utilisation of library catalogues and other services for the retrieval of information; basic reference and information sources; effective searching the World Wide Web; evaluation of information and of methods of finding it.

Courses: ED25
Credit points: 12  
Semester: 1  
Campus: Ext

CLP531 Field Program
This unit addresses the following topics: principles and practice of school library resource centre administration and management, including study of library environment, administrative systems and staff management; study of the literature of the field; work practices through experience in at least two sites.

Courses: ED09, ED13, ED61, ED25
Credit points: 12  
Semester: 1  
Campus: KG, Ext

CNB201 Construction 3
Students learn how to construct a high rise structure from the basement to the roof. The unit focuses on protection to the public during construction; temporary support; demolition; temporary services; deep excavation and foundations; retention and shoring systems; structural components; multilevel formwork; interaction of building components; systems and services; common building faults, failures and rectification; alternative forms of external cladding; and waterproofing problems.

Courses: CN51, CN53
Prerequisites: CNB207
Corequisites: CNB202
Contact hours: 5 per week  
Campus: GP
Credit points: 12  
Semester: 1

CNB202 Building Technology 3
This unit includes the study and analysis of engineering components and systems to develop a sound understanding of how a building achieves structural stability and equilibrium through its load paths. This includes basic structural member design for tension and compression, bending and shear loads through detailed examination and the use of relevant Australian Standards as the basis for examination. Emphasis is on approximate or first order of magnitude techniques suitable for estimating and checking purposes. Structural systems analysis includes trusses and retaining walls with an emphasis on qualitative and quantitative techniques. Construction stability is examined in detail including cranes, shoring, scaffolding and slings.

Courses: CN51
Prerequisites: CNB108
Contact hours: 3 per week  
Campus: GP
Credit points: 12  
Semester: 1

CNB203 Building Services
The following building services are introduced in this unit: Fire Services: fire detection, suppression and extinguishment; statutory requirements for maintenance of essential active fire services; Hydraulics Services: building hydraulic services including water supply, fire protection and sanitary waste disposal systems; Mechanical Services: air movement; types of ventilation; air-conditioning systems and heating; installation procedures and the issue of confined spaces; basis of design and effect of architectural style; Electrical Services: transformers; sub-stations; switchboards; protection devices; lighting systems; stand-by generators; security systems; systems monitoring and energy management; vertical transportation systems; Energy Efficient Service

Courses: CN51, CN53
Contact hours: 3 per week  
Campus: GP
Credit points: 12  
Semester: 1

CNB204 Measurement 2
Measurement is a core skill among building professionals. This skill is particularly important in relation to the production of quantified documents for the purposes of tendering and estimating. This unit examines the following: techniques for estimating and checking measurement of various work sections (concrete, formwork, reinforcement, groundworks, underpinning, tanking, structural steelwork, exterior elements, and bored piers); and the development and application of builders’ quantities.

Courses: CN51, CN53
Prerequisites: CNB110
Contact hours: 5 per week  
Campus: GP
Credit points: 12  
Semester: 1

CNB206 Law 1
Tort law is introduced under the following headings: negligence; professional negligence; duty of care; liability; occupier liabilities; nuisance; fraud and conversion; contract law parties; formation of contracts (agreement, intention, consideration, estoppel); enforcement of contracts (privy and formalities); contents of contracts (oral statements, express and implied terms); tendering issues; variations; time; payment and liquidated damages. Environmental law examines such components as water, noise and dust, vibration from blasting, heritage, erosion and sediment control, contaminated land, safety, sustainable development and waste management and control.

Courses: CN51, CN53
Contact hours: 5 per week  
Campus: GP
Credit points: 12  
Semester: 2

CNB207 Professional Studies 2
The aim of this unit is to provide the opportunity for students to experience the type of decisions met in professional practice and to acquire the investigating skills needed to support a rational approach to problem solving. Students undertake projects that are normally related to environmental matters and special construction techniques. Each project is set to develop self-learning skills in the areas of environmental issues, construction practice, planning, community negotiations, commercial decisions and statutory responsibilities, planning, community negotiations, commercial decisions and statutory responsibilities.

Courses: CN51, CN53
Prerequisites: CNB109, CNB101
Contact hours: 4 per week  
Campus: GP
Credit points: 12  
Semester: 2

CNB208 Construction Business Management
Examination of a range of general business management practices and issues as they relate to the construction industry. Specific topics to be examined include understanding individuals and organisations; personality and attitudes; personal and professional business ethics; motivation and employee performance; managing stress, conflict, change, power and politics; communication; group functions; decisions making processes. Further, this unit examines industrial relations including the impact of industrial relations in the construction industry; the role of unions; labour management; health and safety; workplace reform and workplace agreements.

Courses: CN51, CN53
Contact hours: 3 per week  
Campus: GP
Credit points: 12  
Semester: 2

CNB209 The Environment and the Quantity Surveyor
This unit will involve professional quantity surveying including image and status, fees, ethics, professional competence and continuing professional development. In terms of employment, professional engagement in the workplace will be covered including terms of engagement, professional indemnity insurance, quality assurance and financial asset management. The work of quantity surveying takes place within a social and environmental context and this relates to the interactions between business and environmental interests including the natural environment, environment economics and ecologically sustainable development.

Courses: CN53
Contact hours: 3 per week  
Campus: GP
Credit points: 12  
Semester: 1

CNB227 Applied Computing
This unit assists the construction manager to select and use the relevant construction software to measure, estimate, manage, plan, schedule and organise on and off site activities on a construction site. This unit comprises three major components: (a) the advanced application of spreadsheets and databases; (b) the application of construction management packages; and (c) the integration of computer software. A range of computer products are introduced to cover construction management topics such as project planning, project control, estimation, and cost monitoring.

Courses: CN52, CN53
Incompatible with: CNB304
Contact hours: 4 per week  
Campus: GP
Credit points: 12  
Semester: 2

CNB228 Construction Business Administration
This unit addresses the following construction administration topics: structuring the budget documents to provide control mechanisms for cost monitoring and purchasing; dealings with sub-contractors during initial negotiations and subsequent execution of the contract on a conceptual and operational level; dealing with the client on variations in the physical work and the consequences on time in both commercial and contractual terms, with the implications traced through to the sub-contract level; techniques for the prediction of profitability and the procedures for claiming final payment at the conclusion of the contract. The unit also examines the Workers Compensation Act, the Workplace Health and Safety Act, and the Regulations and Codes of Practice.

Courses: C51
Credit points: 12
Campus: GP
Semester: 2

► C5209 Building Studies 2
Building Studies 2 continues to develop the students' construction knowledge with reference to larger commercial and high-rise buildings. Lectures provide a general overview of advanced construction methods while developing students' appreciation of such issues as material finishes, interior fit-outs, typical problems and solutions, interior and exterior component finishes, and fault identification and remedy. The unit also examines the history and need for cost control comparisons between cost planning and approximate estimating. It also considers NPWC cost control systems, the effect of height, shape and building efficiency upon cost and value, the functional requirements and cost implications of construction methods.

Courses: C524
Incompatible with: C5228
Credit points: 12
Campus: GP
Semester: 1

► C52291 Urban Land Economics
The unit builds on the student's previous exposure to economic theory and applies that knowledge to assist the student's appreciation of the economic imperatives which drive and shape urban development. Topics covered include the following: economic processes in spatial and land use development; urban growth theory; competing land use; supply and demand in the pricing of urban property; the concept of the 'rent bid curve'; business location theory; the impact of land based communications corridors on price; technology and footloose location theory; planning and government control on free market pricing; environmental and heritage issues; and local government regulation and by-laws.

Prerequisites: E51113, E51102
Credit points: 12
Campus: GP
Semester: 1

► C52292 Property Investment Valuation
This unit further develops the basic property valuation principles introduced in C52194 Principles in Property Valuation. The emphasis now moves to the valuation of income producing property assets which are more commonly termed 'investment properties'. Topics covered include the mathematics of freehold and leasehold property valuation utilising the time value of money formula as exhibited in the capitalisation of net income and discounted cash flow approaches.

Courses: C524
Prerequisites: C52194
Credit points: 12
Campus: GP
Semester: 1

► C52293 Real Estate Accounting and Taxation
This unit addresses the following: introduction to the business environment surrounding the property industry; introduction to accounting; financial accounting (recording accounting information and basic financial statements, company accounts and other business structures, cash flow statements, interpretation of accounts); cost and management accounting (accounting for inventory and manufacturing, basic cost accounting procedures and direct and indirect costs); financial management (accounting systems, cash control and payroll); accounting for real estate trust accounts; taxation (interpretation of income and capital gains tax and GST deductions and allowance, gearing, negative gearing, depreciation and build amortisation).

Courses: C524
Credit points: 12
Campus: GP
Semester: 1

► C52294 Agency Practice and Marketing
The focus of this unit is to provide students with a grounding in real estate agency practice and marketing as it applies to the diverse real estate property types of commercial, industrial, retail and residential. By the completion of the unit, students will have a good understanding of real estate agency management and practice methodologies and contemporary real estate marketing theory and practice. Reference is also made to legislative instruments including the: Property Agents and Motor Dealers Act; the Trade Practices Act; the Retail Shop Leases Act and Common Law.

Courses: C524
Credit points: 12
Campus: GP
Semester: 2

► C52295 Planning Theory and Processes
Development of land use in most western democracies is a controlled and regulated activity. This unit examines the history and morphology of urban growth in Queensland; statutory planning process and current Queensland legislation; urban and regional planning on matters of equity and social responsibility; types of planning controls; current development planning approval and appeals processes; conservation and heritage protection and its impact on development; land use rights and economic value; concepts and impact of regional planning.

Courses: C524
Credit points: 12
Campus: GP
Semester: 2

► C52296 Contemporary Issues
This unit is deliberately open ended and flexible with regard to content. Issues facing the property industry can be varied and wide-ranging. Content therefore is likely to vary from year to year as issues gain prominence and then recede. Current topics which may be covered might include the following: native title; heritage; contamination; environment and sustainability; professional issues; internationalisation of property markets; water rights; demographics; regional and rural issues; and common property rights.

Courses: C524
Incompatible with: C52285
Credit points: 12
Campus: GP
Semester: 2

► C52297 Property Finance
This unit covers the role of property and its financing for development or investment. It considers property in relation to institutional assets; a shorter term class; debt; capital and general decision making principles. It develops students' understanding of the nature and impact of loan finance on investment property and the place of property assets within capital markets, relevant to subsequent employment in property as a graduate of property economics.

Courses: C524
Prerequisites: C52292
Credit points: 12
Campus: GP
Semester: 2

► C52302 Contract Administration
This unit addresses the following: administration of standard form contracts used by the building industry; special conditions of contract; contract addenda; financial management of contracts from formation to discharge; construction procurement and evaluation systems; tender code; construction insurances; sub-contractors and nominated sub-contractors; adjustment of provisional sums; variations; correction of bill errors; liquidated and ascertained damages; prolongation costs; dispute clauses; practical completion; completion; defects liability; warranties; collateral warranties.

Courses: C51, C53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► C52303 Construction Business Accounting
This unit includes the following content: introduction to accounting; financial accounting (recording accounting information and basic financial statements, company accounts, interpretation of accounts); cost and management accounting (basic cost accounting procedures, direct and indirect costs, fixed and variable cost analysis and budgetary control); financial management (taxation, payroll, cost of capital, managing working capital, and financing); use of accounting/financial management software.

Courses: C51, C53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► C52304 Construction Estimating
This unit addresses the following: estimating techniques to quantify cost; fundamental elements of cost and methods of evaluating labour, materials and equipment to realistic levels of accuracy; unit rate approach to assessing the base estimate for major trades; assessment of offers from subcontractors and implications for tendering
with respect to risk, quality and ethical re-
responsibilities; functional estimating and the
significance of method, time and assembly of
information to estimating; review of an esti-
mate; determination of profit; letters of offer;
subsequent negotiations prior to award of a
contract; application of estimating to varia-
tions and profit monitoring.
Courses: CN51, CN53
Contact hours: 4 per week Campus: GP
Credit points: 12
Semester: 1

► CNB307 Building Economics and Cost
Management
This unit considers the following: the interre-
relationship between construction industry and
economy; the fundamental principles of cost
management; design and construction cost
planning and cost control; the nature and
importance of cost planning and cost control
systems; contract costing (historical account-
and) and anticipatory (forecasted final cost);
design economics, including cost and value
concepts, cost information systems, cost
modelling, cost analyses, cost
indices, cost data and cost implications of
design variables; life cycle costing and mod-
eling including design knowledge in virtual
environments; value management including
energy efficiency in buildings and value
alignment process for project delivery; asset
management and building maintenance.
Courses: CN51, CN53
Contact hours: 3 per week Campus: GP
Credit points: 12
Semester: 2

► CNB308 Professional Studies 3
The aim of this unit is to help students un-
derstand the nature of the decisions re-
quired from a construction manager in a
project environment. Students advance to
duties of project manager, including overall
management of a building company such as staffing,
tendering and tactical positioning using the
computer simulation ‘Arousal’. Students also
examine the natures of managing con-
struction, the significance of bidding strate-
gies, the management of projects - broad
goals/specific goals, project status (pro-
gress/profit), corporate entities, project entity analysis, com-
parison of firm biding with other procure-
ment methods, estimating fee bidding, over-
heads, tendering, profit and risk, project
concept, proposals and commercial aware-
ness.
Courses: CN51, CN53
Prerequisites: CNB207
Contact hours: 4 per week Campus: GP
Credit points: 12
Semester: 2

► CNB309 Law 2
This unit addresses the following commercial
law topics: sale of goods; hire purchase;
trade practices; negotiable instruments; in-
surance law; partnership law and company
law; bankruptcy and liquidation; arbitration
law topics: sale of goods; hire purchase;
valuation as an expert witness. For statu-
tory purposes this might include: valuations
for tax and taxation of capital gains; statutory
rating purposes under relevant legislation
including computer assisted mass appraisal;
appeals procedure; compulsory acquisition;
assessment of compensation resulting from
acquisition, resumption and damage. For
evidence purposes valuers may be required
to provide expert witnesses in regard to pro-
fessional liability, moot court and the valua-
tion of special purpose properties and busi-
dnesses as a going concern.
Courses: CN54
Prerequisites: CNB191, CNB194, CNB292
Credit points: 12
Semester: 1

► CNB393 Property Investment Analysis
Topics covered in this unit include the follow-
ing: the principles and strategies of invest-
ment; alternative forms of investment; real
estate as an investment medium; the real
estate investment process; property owner-
ship structures; initial feasibility analysis;
detailed cash flow analysis involving NPV
and IRR analysis; the modified internal rate
of return (MIRR) approach; sensitivity and
probability analysis; market analysis and real
estate cycles; institutional property invest-
ment; risk analysis and risk management.
Courses: CN54
Prerequisites: CNB194, CNB292
Credit points: 12
Semester: 2

► CNB394 Property Development
Data is provided on the Australian urban
economic environment and enables students
to gain knowledge of the various development
sectors. Students are exposed to various
planning, building, legal, financial and envi-
ronmental acts and conditions. Knowledge
gained is applied to a range of case studies
across various development sectors.
Courses: CN54
Prerequisites: CNB292, CNB295, CNB297
Credit points: 12
Semester: 1

► CNB395 Research Methods
This unit provides students with the opportu-
nity to develop an understanding of research
skills, techniques and methodologies appro-
priate for the completion of a full research
proposal or for the development of advanced
data analysis skills. To facilitate this topics cov-
cered include: research and retrieval skills;
research methodologies and strategies; data
collection and analyses; and presentation and
dissertation writing.
Courses: CN54

tudents gaining relevant professional experience and varied management knowledge and skills in approved employment for a minimum of 100 days. A diary and logbook are to be completed and signed by the employer. A key learning feature of this unit is the identification of a problem at the students' place of employment and the preparation of a case study report on an actual development project, providing direct insight into the task of problem solving and delivering real projects.

Courses:
CN51, CN53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB408 Advanced Building and Civil Construction

This unit focuses on non-standard buildings and structures in terms of constructability, construction methodology, planning, estimating, scheduling and site organisation. Significance of temporary works and the inherent need for planning and safety are included. Students study in detail the methods and equipment employed in the construction of earthworks, heavy foundations, steel fabrication and erection, marine and water retaining structures, roadworks and bridges, mechanical erection and electrical structures. The unit concludes with the broader issues of environmental management, construction weather forecasting and the management and social issues of work in remote locations.

Courses:
CN51, CN53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB409 Professional Practice 1

Professional experience forms an integral part of the academic program, allowing the students the opportunity to put into practice accumulated theory and simulated practical work. The aim of this unit is to facilitate students gaining relevant professional experience and varied management knowledge and skills in approved employment for a minimum of 100 days. A diary and logbook are to be completed and signed by the employer. A key learning feature of this unit is the identification of a problem at the students' place of employment and the preparation of a case study report on an actual development project, to provide direct insight into the task of problem solving and delivering real projects.

Courses:
CN51, CN53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB424 Specialist Measurement

Measurement is a core skill amongst building professionals. This skill is particularly important to students in relation to the production of quantified documents for the purposes of tendering and estimating. This unit is offered in the final year of the course due to the unusual and advanced nature of the construction technology to be measured. The unit covers the following: unusual building works; civil engineering works including earthworks, foundations and piling; heavy engineering works including refinery/processing plant, mining and offshore platforms.

Courses:
CN53
Prerequisites: CN310
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB425 International Construction

In this unit students examine history, culture, language, government and business structure and practices, construction methodology, construction management, and general business practices in a country or countries other than Australia, specifically those where issues and practices differ from common Australian practice. An optional student-funded international trip may be offered (likely to be 2-4 weeks) to allow students to experience first-hand the country studied during the semester allowing students to immerse themselves in the culture and further enhance their language skills. Students will be involved in site visits and workshop (studio) type activities during the tour.

Courses:
CN51, CN53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB433 Dissertation A

This unit allows students to explore underlying theory and maximise the opportunity to investigate and develop an area of personal interest. The focus is on the following: research methodology; data collection and analysis; information literacy; information retrieval skills; literature review and research proposal writing activities. Statistical analysis is also included: introduction to statistics including the role of statistics; data types and properties; data reduction and pictorial presentation; a numerical description of data such as population and samples; descriptive statistics; measure of central tendency; measures of dispersion; grouped data and misuse of descriptive statistics.

Courses:
CN51, CN53
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB434 Dissertation B

Research and development is an important success factor in today's competitive and global environment. As a student researcher you will be exposed to research theory behind your chosen area of interest. On the other hand, as a practitioner, the unit helps you to identify valuable and profitable research. This unit involves collection, analysis and interpretation of primary data in relation to work completion in the BA433, and generation of conclusions and recommendations for further research.

Courses:
CN51, CN53
Prerequisites: CNB433
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

 ► CNB480 Building Surveying Practice

Building certifiers must have the ability to locate, interpret and assess building plans to legislative requirements, a code of practice and ethical obligations. This unit ensures building certifiers have the fundamental knowledge in order to practice in Queensland. The unit includes the following: the examination of ethical responsibilities; legislative framework; integrated development assessment system (IDAS); interpretation of local planning instruments (e.g. special state approval; energy efficiency; and documenting performance based assessments to the Building Code of Australia.

Courses:
CN51, CN53
Credit points: 12
Semester: 1

 ► CNB481 Construction Dispute Management

A claim or dispute may arise between an owner and a contractor in contract negligence, nuisance or trespass relating to the performance of commercial or domestic building work. Rights and obligations exist in
UNIT SYNONYSES

the performance of building work and participants should use appropriate techniques to avoid and manage disputes. This unit helps students develop the skills required to avoid and manage disputes. It includes the following: analysis of reasons that disputes occur; sources of disputes; statutory obligations to rectify defects; formal dispute resolution through tribunal and courts systems; pro-active dispute avoidance techniques; preparation and presentation of a claim/response to a claim; role of an expert witness in disputes; and costs of disputes.

Courses: CN51, CN53
Credit points: 12
Campus: GP Semester: 1

► CNB482 Measurement 4

Measurement is a core skill amongst building professionals. This skill is particularly important in relation to the production of quantified documents for the purposes of tendering and estimating. This unit covers the following: an examination of the latest software used in the generation of quantities, estimates and capital cost/life cycle cost plans including advanced CAD applications; measurement used to produce financial asset management statements including due diligence and sinking funds; and measurement and assessment of environmental impact of buildings.

Courses: CN53
Prerequisites: CNB310
Credit points: 12
Campus: GP Semester: 1

► CNB483 Smart and Sustainable Construction

This is an assignment based group project work where students from different disciplines undertake project work on a project case study considering key smart and sustainable construction issues, sustainability and its impact on commercial construction development, flexible design considerations, innovative construction techniques, smart engineering, and intelligent building development. Project cases may include any of the following: multi-storey office building projects in the CBD; marina resort development on the tropical Queensland coast; KG Urban Village development; and/or sustainable housing development utilising specific site characteristics.

Courses: CN51, CN53
Credit points: 12
Campus: GP Semester: 1

► CNB490-1 Research Dissertation

To produce a written dissertation on a topic of their choice, students will embark on a research project culminating in its presentation. Progression will be closely monitored and assistance will be provided by individual supervisors who will guide the student through the process.

Courses: CN54
Prerequisites: CNB395
Credit points: 12
Campus: GP Semester: 1, 2

► CNB491 Rural Valuation

The unit utilises skills and knowledge learned from earlier units and applies these to the valuation of rural assets. In particular this unit examines the physical and economic factors of rural land and its development; land utilisation and degradation; farm management and productivity; and extraneous factors influencing rural valuations. Rural sales and valuation procedures are analysed and physical inspections organised to assist the student with gaining practical experience.

Courses: CN54
Prerequisites: CNB194
Credit points: 12
Campus: GP

► CNB492 Business and Specialist Valuation

Knowledge and skills developed in earlier units are applied to the process of valuing special purpose properties and going concerns. Content includes the following: applications of the profits method of valuation; valuation of business assets; tangible, intangible and technical plant and machinery valuation; valuation of licensed premises, hotels and resorts; valuation of regional shopping areas; heritage valuations and valuation of transferable development rights; valuation of terminable interests; and public sector and institutional investment valuation.

Courses: CN54
Credit points: 12
Campus: GP

► CNB493 Advanced Property Valuation and Analysis

The unit explores and analyses a variety of contemporary property valuation and analysis techniques as well as techniques used in connection with other asset classes to assess their relevance to investment property analysis. Special attention is paid to a study of the effects of taxation and finance and the analysis methods associated with net of tax and finance investment performance measurement. A case study approach is used.

Courses: CN54
Prerequisites: CNB392
Credit points: 12
Campus: GP

► CNB494 Advanced Market Research Analysis

This unit introduces students to published property market data sources and methods of interpretation. It develops skills to source, analyse, interpret and report on primary property market data using appropriate analysis methods. Students are introduced to statistical software packages as a tool to assist the data analysis process.

Courses: CN54
Incompatible with: CNB385
Credit points: 12
Campus: GP

► CNB497 Project Cost and Risk Management

This unit introduces project management as a growing discipline/profession. It focuses on theories related to project definition, project scope, project tools and implementation. Key aspects covered include professional development, organisation design and project structure, communication, managing change and performance measurement (time, cost and quality).

Courses: CN54
Incompatible with: CNP520
Credit points: 12
Campus: GP Semester: 1

► CNB497 Project Cost and Risk Management

This unit introduces fundamental project management principles that relate to economics, cost, risk management, the key elements of pro-active cost management and the implementation of risk evaluation. It revisits the macro-economic and micro-financial contexts of project, construction and property management and provides students with an understanding of the practical applications of responsibility, accountability, motivation, reporting and implementation of project cost and risk management. Furthermore, it covers the area of risk management analysis functions, techniques and theories, cost management systems applicable to design cost, value management and project life cycle management.

Courses: CN54
Incompatible with: CNP521
Credit points: 12
Campus: GP Semester: 1

► CNB498 Project Human Resource Management

Effective project delivery requires effective utilisation of all project resources. The cornerstone of the project management process is management of the diverse professional team brought together to complete the project on time to specification and within budget. Topics covered will include the following: principles of human behaviour; aspects of personal development and motivation; communication skills; characterisitics and styles of leadership; group dynamics and interactions; and conflict management and arbitration. An integral part of the unit is a field trip, the aim of which is to increase students understanding of and skills in human processes relevant to project management.

Courses: CN54
Credit points: 12
Campus: GP

► CNB499 International Project Development Management

The unit develops concepts of project development management introduced to the student in CNB496 Project Management, and places them in an international, or more specifically, Asia-Pacific regional context. To this end, the content will be similar to CNB496 with a focus on theories relating to project definition and scope, project implementation and termination, and the latest developments affecting the practice of project management in organisations.

Courses: CN54
Incompatible with: CNP534
Credit points: 12
Campus: GP Semester: 2

► CNN442-2 Dissertation

Students develop the skills necessary for conducting independent research by completing a dissertation on a chosen topic under the guidance of an appointed supervisor. The approved research topic must be in an area related to project management or property development. The unit also incorporates lectures in research methodology, and information retrieval skills.

Courses: CN77, CN82
Credit points: 24
This unit provides students with the opportunity to take part in virtual small group seminars and RMIT web-based ‘chatgroup’ sessions with students and staff to help the student produce a case study report on how knowledge and IT management is applied to the student’s working project environment. The report is in the order of 5-6000 words and will be of a publishable standard, allowing enhancement of students’ communication and presentation skills. Students also make a formal presentation of the work. The reflection on the unit theory undertaken in CNP001 Knowledge and IT Management forms the basis of this unit and thus this unit must be undertaken at least concurrently with CNP001. Students are expected to maintain a reflective portfolio for this unit.

Courses: CN89
Corequisites: CNP001
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► CNP012 Project Procurement and Ethics Reflective Learning
This unit provides students with the opportunity to take part in virtual small group seminars and RMIT web-based ‘chatgroup’ sessions with students and staff to help the student produce a case study report on how project procurement strategies and the related ethical aspects are applied to the student’s working project environment. The report is in the order of 5-6000 words and will be of a publishable standard, allowing enhancement of students’ communication and presentation skills. Students also make a formal presentation of the work. The reflection on the unit theory undertaken in CNP002 Project Procurement and Ethics forms the basis of this unit. Students are expected to maintain a reflective portfolio for this unit.

Courses: CN89
Corequisites: CNP002
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► CNP013 Project Management Leadership Reflective Learning
This unit provides students with the opportunity to take part in virtual small group seminars and RMIT web-based ‘chatgroup’ sessions with students and supervisors to help the student produce a case study report on how PM leadership is applied to the student’s working project environment. The report is in the order of 5-6000 words and of a publishable standard allowing enhancement of student’s communication and presentation skills. Students also make a formal presentation of the work. The reflection on the unit theory undertaken in CNP003 Project Management Leadership forms the basis of this unit and thus this unit must be undertaken at least concurrently with CNP003. Students are expected to maintain a reflective portfolio for the unit.

Courses: CN89
Corequisites: CNP003
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► CNP014 Elective Reflective Learning
This unit provides students with the opportunity to take part in virtual small group seminars and RMIT web-based ‘chatgroup’ sessions with students and staff to help the student produce a case study report on how the elective is applied to the student’s work-
The research encompasses discovery and reflection on PM practice with focus upon case studies drawn from practice; participants compare best practice; with observations made concerning the research cases. The reflexive process is based upon not only review of what has been seen to have occurred in the case studies but also on the course participants’ reflections on their attitudes, beliefs and actions. The depth and originality of the research needs to be demonstrated as being of doctorate level. It is expected that the learning experience will be diffused to industry and course participant colleagues, as progress seminars will be open to industry and peer review. The unit ends with a six-month report.

Courses: CN89
Prerequisites: CNP051, CNP052, CNP053, CNP054
Contact hours: 3 per week
Credit points: 24
Campus: GP

► CNP061-2 Research Project 5
The research encompasses discovery and reflection on PM practice with focus upon case studies drawn from practice; participants compare best practice; with observations made concerning the research cases. The reflexive process is based upon not only review of what has been seen to have occurred in the case studies but also on the course participants’ reflections on their attitudes, beliefs and actions. The depth and originality of the research needs to be demonstrated as being of doctorate level. It is expected that the learning experience will be diffused to industry and course participant colleagues, as progress seminars will be open to industry and peer review. The unit ends with a six-month report.

Courses: CN89
Prerequisites: CNP051, CNP052, CNP053, CNP054
Contact hours: 3 per week
Credit points: 24
Campus: GP

► CNP062-1 Research Project 6
This unit continues from CNP061-1&2 Research Project 5 in encompassing discovery and reflection upon practice and focusing upon case studies drawn from practice, with the course participant’s reflection on their attitudes, beliefs and actions resulting from their reflections. It is expected that the learning experience will be further diffused to industry and course participant colleagues via progress seminars. The thesis research is drawn together into a single thesis of approximately 40,000 to 50,000 words in length.

Courses: CN89
Prerequisites: CNP061-1, CNP061-2
Contact hours: 3 per week
Credit points: 24
Campus: GP

► CNP062-2 Research Project 6
This unit continues from CNP061-1&2 Research Project 5 in encompassing discovery and reflection upon practice and focusing upon case studies drawn from practice, and the course participants’ reflection on their attitudes, beliefs and actions resulting from their reflections. It is expected that the learning experience will be further diffused to industry and course participant colleagues via progress seminars. The thesis research is drawn together into a single thesis of approximately 40,000 to 50,000 words in length.
UNIT SYNOPSES

This unit addresses the revolution in information technology and the widespread use of personal computers. It provides project managers with skills in using a range of appropriate software, an appreciation of information resources and the impact of information technology on construction management and property development processes. The unit will provide competency in the selection and use of appropriate information technology through the study of essential computer packages and advanced project management software.

Courses: CN64, CN77, CN81
Incompatible with: CNP434, CNP668
Contact hours: 3 per week
Credit points: 12
Campus: GP

► CNP554 Advanced Land Development

This unit focuses on the overall development process appropriate to the use of land in a variety of environments. It considers the drivers of development and the correct processes that should be followed to ensure both an economic and a functional result. It looks at land development within the Central Business District (CBD), suburban commercial, residential and industrial areas.

Courses: CN64, CN77, CN81
Incompatible with: CNP404
Contact hours: 3 per week
Credit points: 12
Semester: 2

► CNP555 Property Market Analysis

This unit covers the principles of property economics and market research methodology focusing on surveys and hypotheses testing, property market data available in Australia, and supply and demand studies of property.

Courses: CN90, CN91, CN92
Credit points: 12
Campus: GP
Semester: 1

► CNP556 Property Management and Contracts

This unit covers the following: property contracts (especially leases, partial rights, purchase and sale; lease management; rent strain and accounting procedures; computer based property management programs; property type differentials; and property portfolio management.

Courses: CN90, CN91, CN92
Credit points: 12
Campus: GP
Semester: 1

► CNP557 Property Finance and Capital Markets

This unit deals with property in a capital markets environment. It examines property as an asset class and the financing of property assets. It considers property in relation to institutional asset allocation, risk diversification and general decision making principles.

Courses: CN90, CN91, CN92
Prerequisites: CNP547
Credit points: 12
Campus: GP
Semester: 2

► CTB101 Data Analysis for Business

The unit introduces the common statistical methods and tools for inference and decision making in business. It builds upon the concepts developed in the unit CTB122 Quantitative Analysis and Finance and covers important methods of data analysis with an emphasis on interpreting and understanding reported business and economic data. Topics include the concept of sampling error and sampling distributions, estimation and hypothesis testing, regression analysis, time series and an introduction to non-parametric statistical methods.

Courses: BS58
Prerequisites: CTB122
Incompatible with: EB101
Contact hours: 4 per week
Credit points: 12
Semester: 2
Campus: CB

► CTB110 Accounting

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with a basic level of knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, analysis and interpretation of financial statements and planning, control and business decision making.

Courses: BS58
Incompatible with: BB5110, BB5110
Contact hours: 3 per week
Credit points: 12
Semester: 1
Campus: CB

► CTB111 Business Law and Ethics

This unit integrates the concepts and principles of business law and ethics, theories and applications of business ethics. The unit makes extensive use of cases in law and ethics to develop knowledge and skills that enable students to analyse, apply and evaluate the legal principles and ethical decision-making processes relevant to modern business practice.

Courses: BS58
Incompatible with: BB5111
Contact hours: 3 per week
Credit points: 12
Semester: 2
Campus: CB

► CTB113 Economics

Introduces students to the key economic concepts and their practical applications. It comprises twelve topics each focusing on a current economic issue. Microeconomic topics include demand and supply, elasticity, production, cost and market structure. Macroeconomic topics include measuring GDP, inflation and unemployment, money and banking, and fiscal and monetary policy.

Courses: BS58
Incompatible with: BB5113
Contact hours: 3 per week
Credit points: 12
Semester: 2
Campus: CB

► CTB114 Government, Business and Society

Provides a basic grounding in the principles, institutions and functions of government and their interactions with business and society. Its principal focus is the structure and key features of Australia's constitutional and government framework including the judicial and administrative processes, especially as they affect business. Students will develop a comparative appreciation of the principles, institutional arrangements and practices of contemporary government in a global context. This will include consideration of law-making and policy processes and the impact of the changing national and international environment.

Courses: BS58
Incompatible with: BB5114, BB5114
Contact hours: 3 per week
Credit points: 12
Semester: 1
Campus: CB

► CTB115 Management, People and Organisations

The unit provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that are needed in all areas of management and organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis will be on knowledge, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.

Courses: BS58
Incompatible with: BB5115
Contact hours: 3 per week
Credit points: 12
Semester: 2
Campus: CB

► CTB119 International and Electronic Business

This unit integrates two rapidly expanding areas of business studies: international business and e-business. Doing business across international borders is facilitated by e-business technologies. This unit explores the nature and models of international business and e-business, and how e-business technologies facilitate international business and add value to the business. It develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments.

Courses: BS58
Incompatible with: BB5119
Contact hours: 3 per week
Credit points: 12
Semester: 1
Campus: CB

► CTB122 Quantitative Analysis and Finance

To maintain the competitiveness of, and add value to, an organisation, today's managers have to make critical business and financial decisions. This unit is a preliminary study of the techniques for analysing business information, and provides students with a framework for understanding the fundamentals of business and financial decision making. Topics include the following: the basic techniques of organising and analysing data; application of probability and probability distributions; understanding a firm's investing, financing and dividend decisions; the three main ideas underpinning financial decisions - time value of money, diversification and arbitrage.

Courses: BS58
Incompatible with: BB5122
Contact hours: 3 per week
Credit points: 12
Semester: 1
Campus: CB

► CTB126 Marketing

This introductory subject examines the role and importance of marketing to the contemporary organisation. Emphasis is given to understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, management information systems and consumer behaviour. The unit explores the various elements of the marketing mix, with special reference to product, price, distribution, and promotion including advertising and public relations. By way of introduction only, key issues relating to services marketing, e-marketing and strategic marketing are also canvassed.

Courses: BS58
Incompatible with: BB5126

Semester: 1
Campus: CB

QUT HANDBOOK 2006 • PAGE 609
UNIT SYNOPSIS

Incompatible with: BS1126
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 2

► CTB200 Consumer Behaviour
This unit provides students with the fundamental theories and models to develop a sound understanding of consumers, their needs, and behaviours. It provides a detailed examination of the consumer decision process and the internal and external influences on this core decision process. The unit also assists students in applying this knowledge to the development, implementation and evaluation of marketing activities within an organisation.

Courses: BS58
Prerequisites: CTB126
Incompatible with: AMB200
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 2

► CTB201 Marketing and Audience Research
This unit provides an introduction to the conduct and evaluation of marketing and audience research across the disciplines of advertising, marketing and public relations. Class members explore how field studies, survey and experimental research are employed to support advertising, marketing and public relations information needs. The unit provides an overview of research process, research design, methods of data collection and analysis, and the development of research proposals to support decision-making. Class members also explore issues related to research on media audiences, research ethics, and the management of client briefings.

Courses: BS58
Prerequisites: CTB126
Incompatible with: AMB201, MB220
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB207 Human Resource Issues and Strategy
This unit identifies a range of contemporary human resource management issues facing Australian organisations. These are explored and analysed through examining a range of alternative human resource programs, policies, and strategies. This unit introduces a range of human resource functions and provides a foundation for the development and professional practice in HRM in later units. This unit provides students with the knowledge and skills to address contemporary human resource issues in order to contribute to organisational efficiency and effectiveness.

Courses: BS58
Prerequisites: CTB115
Incompatible with: MB207
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB211 Organisational Behaviour
The unit examines research related to individual and collective human behaviour in organisations. A multi-level approach that focuses on individuals, groups, the organisation as an entity, and the relationships among these elements is adopted. In addition, the unit addresses major themes in the field and provides students with an opportunity to use the body of knowledge to diagnose, interpret and understand issues within these themes. This unit helps students to understand the role that people, as individuals and in groups, play in organisations and to apply this knowledge in creating more effective and efficient work places.

Courses: BS58
Prerequisites: CTB201
Incompatible with: MBG211
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 2

► CTB212 Electronic Business Applications
This unit looks at the ways in which organisations adopt and use various electronic business applications in areas of e-commerce, business-to-consumer, business-to-business and intra-business relations. Business models and their impact in various industries are analysed, enabling students to assess the underlying business case, and determine the model's viability in a competitive environment. The issues associated with front-end and back-end applications associated with e-business are considered.

Courses: IF11
Prerequisites: CTB112
Incompatible with: BS5212
Contact hours: 3 per week  Campus: CB

► CTB221 Computerised Accounting Systems
This unit provides an examination of the concepts, processes and issues relevant to computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; access and accounting information; accounting in an electronic environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Excel, databases and software such as Access, and interactive multimedia software such as Accounting Information Systems Cycles.

Courses: BS58
Prerequisites: CTB110
Incompatible with: ABY221
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB232 Managing Organisations
This unit develops an understanding of the organisation in both its internal and external environment and of the demands involved in managing the organisation's resources and performance. It raises contemporary issues in management and their implications for competitive advantage, focusing on various organisational sub-systems including HR, technology, structure and design. This unit provides a foundation of knowledge for the management and HRM majors. In this unit there is a focus on strategy, leadership and internationalisation.

Courses: BS58
Prerequisites: CTB115
Incompatible with: MGB222
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB234 Production and Service Management
This unit extends general management approaches to the production operations sub-systems of service and manufacturing organisations. The unit focuses on the deployment of productive resources in order to maximise the added value of services and products. Issues of quality and efficiency are considered analytically in terms of production strategies and constraints. It considers the opportunities that new technology brings to operational strategies in both manufacturing and service. Project management principles are considered in relation to resource deployment and continuous improvement.

Courses: BS58
Prerequisites: CTB201
Incompatible with: MBG210
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 2

► CTB240 Marketing Planning and Management
This unit extends the student’s knowledge of the fundamental marketing concepts and theories introduced in the faculty core unit in marketing, by adding further breadth and depth of knowledge of marketing and developing skills in the application of this knowledge to marketing planning and management within the business environment. Emphasis is on the role of the marketing manager at the product management level in undertaking analysis, planning, implementation and control of marketing activities.

Courses: BS58
Prerequisites: CTB126
Incompatible with: AMB240
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB290 Finance 1
This unit addresses the following topics: an introduction to the Australian institutional framework; terminology; debt and equity instruments; financial mathematics applied to the pricing of debt and equity securities; a firm’s investment decision; New Present Value (NPV) and Internal Rate of Return (IRR); introduction to risk and uncertainty; Capital Asset Pricing Model (CAPM) and Weighted Average Cost Capital (WACC).

Courses: BS58
Prerequisites: CTB122
Incompatible with: EFB210
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB334 Managing in a Changing Environment
This unit provides students with conceptual and analytic tools required for managing changing environments. The emphasis is on developing an understanding of the management competencies required for managing flexibility, innovation and change. The unit moves beyond a focus on dot.com companies’ to examine how a range of organisations both small and large are engaging with issues associated with an increasing emphasis on technology.

Courses: IF11, BS58
Prerequisites: CTB212
Incompatible with: MBG334
Contact hours: 3 per week  Campus: CB
Credit points: 12  Semester: 1

► CTB340 Services Marketing
This unit explores the special characteristics of services that distinguish the marketing of services from goods. Topics include: the distinctive aspects of consumer decision-making relative to services and the implications for marketing strategy formation; the management of demand and supply; cus-
Courses: BS58
Prerequisites: CTB240
Incompatible with: AMB340
Contact hours: 3 per week Campus: CB
Credit points: 12 Semester: 2

► CTB72 Web Applications
This unit provides students with the theoretical and practical skills to construct a web-enabled, interactive media database (IMDB). Students are introduced to design elements to create innovative web front ends with the associated security requirements for Internet transaction based systems. Students learn how to build an interactive web site that accesses a database back-end, such as SQL-Server. In addition, students refine their understanding of database modelling and explore and apply new interactive media elements that will enhance such web applications.

Courses: IF11
Prerequisites: CTB721, CTB225
Contact hours: 3 per week Campus: CB
Credit points: 12 Semester: 2

► CTB724 Fundamentals of Enterprise Systems
This unit presents the Information Systems issues relating to the selection, adoption, implementation and infusion of Enterprise Systems (otherwise known as Enterprise Resource Planning Systems). It introduces the technical architecture of such systems as 3-tiered client server environments. It shows how an integrated database environment meets business needs and presents and discusses the Enterprise Systems Lifecycle model, orienting students to the requirements of addressing total cost of ownership, change management requirements and processes for modelling requirements in order to achieve business benefits. A series of case studies are used to examine each of the problem domains.

Courses: IF12
Prerequisites: CTB721
Contact hours: 3 per week Campus: CB
Credit points: 12 Semester: 1

► DAB110 Introductory Architectural Design 1
This unit offers a broad introduction to the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Analysis of the constructed environment leads to a number of design projects that engage with issues of context, tectonics, planning, form, and spatial quality. Orthogonal drawing exercises, freehand sketching, presentation graphics, and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

Courses: DE40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► DAB220 Theories and Contexts of Place-making in Architecture
The unit aims to promote students’ awareness of concepts of environmental psychology such as territory, community, privacy, personal space and spatial perception from a variety of cultural perspectives. It also includes an introduction to the ways in which architecture is practiced and the concept of professionalism as it pertains to architectural practice. Further the unit explores social and cultural relationships between people and the institutions of society through the study of introductory sociology, cultural analysis and political economy. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

Courses: DE40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► DBB656 Global Positioning Systems
This unit includes the following: concepts and theory of Global Positioning Systems including the space segment, control segment and user segment; satellite signal structures and the importance of precise timing; introduction to global and local coordinate systems and heights; error sources and accuracy in GPS; temporal and spatial variation; mission planning and data collection management; mission planning and data collection techniques; point positioning and analysis; introduction to broadcast differential GPS positioning methods. Practical exercises are conducted in small groups.

Courses: PS47, PS48, PS73, PS74, PS78, PS79
Campus: GP
Credit points: 12 Semester: 1, 2

► DBP401 Urban Design and Site Analysis
Planning students need to understand the various issues relating to the design of urban land and as well as learning site planning processes for the development of urban land. This planning unit is designed to assist students develop basic skills of urban and site analysis.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 1

► DBP402 Planning Processes
Graduate students from other disciplines learn how to develop and apply reflexive planning processes applicable to a variety of situations and scales. This involves understanding how land uses are generated and the processes by which they may be planned. The unit examines and explains the logic, role and methods of successful planning of the planning process, from objective formulation, information and resource analysis through policy and strategy development to evaluation, development of proposals and monitoring.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 1

► DBP403 Design Communication
Students entering the course from non-design disciplines require basic skills in graphic communication for use in planning practice and design units. This unit, which is normally taught intensive mode preceding the start of the semester, has two elements. Perception and Basic Design includes how and what we see, design vocabulary and comparative models of design. Planning Graphics introduces students to different forms of representation, methods, presentation, visual imagery, and graphic tools for analysis and synthesis.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 2

► DBP404 Economic and Social Foundations of Planning
This is an introductory unit which deals with the economic, social and technological processes that have shaped and still shape our communities and settlements. Urban and regional planners need to appreciate these processes in order to understand their impacts and to utilise them in planning human settlements.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 2

► DBP406 Computer Applications in Planning
Planning professionals need both a conceptual understanding and concrete skills in the application of computers to analyse and interpret digital and spatial information that forms the basis of decision making. Across both government and private sectors, information is communicated within the digital environment, and as the associated technology, software and methods rapidly develop, planners need to possess the necessary computer skills to continue using digital tools effectively.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 2

► DBP407 Environmental Planning and Management
This unit seeks to introduce students to the theories, processes and tools of environmental planning and management. The unit provides the student with a basic understanding of a range of environmental issues and concerns relevant to planning issues and problems. It addresses the broad range of planning decisions that affect the environment.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 1

► DBP408 Planning Implementation and Law
Professional competence in planning requires a detailed understanding of the theory and implementation of planning procedure, planning law and other related legislation. This unit in planning implementation and law is designed to give students basic skills and knowledge of planning law and its associated procedures.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 2

► DBP409 Urban Planning Practice
Planners need the skills to understand and analyse local issues and develop plans and strategies to address them. This will involve the preparation of integrated local area plans in consultation with local communities and stakeholders. This unit, normally consisting of a real world project conducted in conjunction with local governments and communities, provides students with these skills of integrated local area planning.

Courses: PS70, PS72
Prerequisites: DBP402
Credit points: 12 Semester: 1

► DBP410 Research Methods in Planning
This unit introduces students to the range of research methods available to the planner and provides a critical format in which they can assess the efficacy and suitability of these methods. It also provides practical experience in using relevant methods and techniques to address current planning issues.

Courses: PS70, PS72
Prerequisites: DBP402
Credit points: 12 Semester: 1

► DBP411 Community Planning
Planners work with wide range of communities and therefore need to understand and address a diverse range of concerns. This unit applies knowledge and skills acquired elsewhere in the course to help students understand and inter-relate a wide range of community concerns including land use and development assessment, employment, human services, environmental quality, urban design, access and culture. In exploring the practices and theories of community planning, particular emphasis is placed on community involvement, consultation and conflict resolution.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 1

► DBP412 Planning Theory and Ethics
Students learn about the conceptual basis to their profession and are inculcated with a sound basis of professional ethics. This unit explores the theoretical underpinnings of urban and regional planning through an investigation of a variety of ideas about planning. It also links ideas about the nature and purpose of planning with ideas about professional ethics. Because it is based on utilising students' previous experience it comes in a later semester of the course.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 1

► DBP413 Regional Planning Practice
This unit provides the opportunity to develop and apply wide-ranging skills of analysis and synthesis in a real world problem-solving situation, linked to policy formulation issues explored in parallel in DBP414. As the second of two practice-focused units, Regional Planning Practice concentrates on the broader regional and metropolitan scales to develop skills in dealing with larger scale, strategic-level planning.

Courses: PS70, PS72
Prerequisites: DBP409
Corequisites: DBP414
Credit points: 12 Semester: 2

► DBP414 Regional and Metropolitan Policy
Relevant and effective regional and metropolitan policies must draw upon a wide range of knowledge and skills integrating regionalism, demography, economics, human activities, central place theory, regional resource evaluation, social organisation and public administration. These operate and need to be understood at both global and regional scales. The resulting synthesis must be applied within specific regions. In order to achieve this, the unit is designed to focus and apply material from diverse disciplines and locations to current regional and metropolitan policy issues in South East Queensland.

Courses: PS70, PS72
Prerequisites: DBP402
Credit points: 12 Semester: 1

► DBP415 Professional Practice or Research Project
This unit offers students the choice of undertaking a supervised individual research project or a structured period of professional practice. The two are offered in the one unit in order to encourage synthesis between research and professional activities. Both activities are most appropriate in the final semester of the course, allowing students to build on and integrate their previous experience. This unit also provides a stepping stone for students considering to do a Masters of Urban and Regional Planning by providing either a first stage to an advanced research project or an introduction to an advanced professional practice project.

Courses: PS70, PS72
Prerequisites: DBP410, DBP409
Credit points: 12 Semester: 1, 2

► DBP416 Elective
This unit enables students to choose an elective from the offerings of any course in QUT or another university, provided that it will enhance learning in the core discipline. Selection requires the approval of the Course Coordinator.

Courses: PS70, PS72
Credit points: 12 Campus: GP Semester: 1 and 2

► DBP417 Comparative Planning
This unit focuses the comparative dimension within the course by introducing students to the practice of urban and regional planning in specific locations and contexts either through attendance on a field course or an approved conference.

Courses: PS70, PS72
Campus: GP
Credit points: 12 Semester: 1, 2

► DBP501 Specialisation
This unit enables students to extend their knowledge in areas supporting their main area of practice or research interest. This personalised unit may incorporate study in specific programs offered within the School or from advanced units within QUT or another university, or through specialist guidance by staff in their areas of expertise and approved by the Head of School on the recommendation of their research project supervisor.

Courses: PS70
Campus: GP
Credit points: 12 Semester: 1, 2

► DBP502 Professional Practice or Research Dissertation
This unit is the central element of the Master of Urban and Regional Planning. Because the Masters is designed for students with advanced professional or advanced academic intentions, this unit allows either for professional development through a period of mentored professional practice or research development through supervised individual advanced research. The two are combined into a single unit in order to encourage synthesis between research and professional activities. The unit is an extension of the study completed in DBP415 Professional Practice or Research Project in the Graduate Diploma in Urban and Regional Planning. The unit will normally be linked to the student/staff seminars in DBP503 Masters Seminar.

Courses: PS70
Prerequisites: DBP415
Credit points: 24 Semester: 1, 2

► DBP503 Masters Seminar
In order to derive full benefit from their advanced studies, Master students need to exercise their views on theory and practice with each other and with experienced practitioners and academics. They also need to explore the significance of their studies for issues of major planning significance. This unit thus provides an integrated forum as a communicative core to the Masters Program, linking individual dissertations and professional practice experience to a wider contemporary context.

Courses: PS70
Prerequisites: DBP502, DBP414
Credit points: 12 Semester: 2

► DEB101 Introducing Design
Please note: this unit is only available to First Year DE40 and IT04 students. This unit offers a uniquely broad introduction to the field of design as applied across the design disciplines. It uses exercises to enhance student perceptions of the natural and human-made environments in a problem-based learning context. The unit is block taught over several weeks during Semester 1 and will include students from a range of design disciplines participating in a four day field trip (students unable to attend participate in an alternative program). Students work individually and in cross-disciplinary teams in a stimulating and immersive environment. This unit covers content of problem solving, team work, visualisation and communication, and environmental awareness.

Courses: DE40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► DEB102 Introducing Design History

Q U T H A N D B O O K 2 0 0 6 • P A G E 6 1 2
Designers within any discipline should possess the ability to appreciate the history of design. This involves appreciation of developments in design history and theory from multiple perspectives. This unit encompasses a broad survey of the history of design from the civilizations of antiquity to the opening of the 20th century. It is a first year foundation unit and serves as preparation for more detailed and specialised studies in history and theory in subsequent years. Key designs, ideas and artefacts and the aesthetic, environmental, technological, socio-cultural and political factors that related to their production will be analysed. Teaching and learning takes place through three forms of structured activity: lectures, tutorials, and online.

**Courses:** DE40

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**DEB201 Digital Design Communication**  
This unit introduces students to the foundational aspects of digital design communication, placing generic design in context and focusing on multidisciplinarity in the stages of the design process. This unit is an approach to the theory and practice of digital media, exploring the translation from manual to digital media in design communication and presentation.

**Courses:** DE40

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

**DLB130 Introducing Landscape Design**  
This unit provides the foundation knowledge in design theory and the communication skills to understand the process and articulation of a design resolution as the focal point of landscape architecture. It will concentrate on the theory, language and universal rules of design and development of the manual graphic skills that underpin this problem solving activity. It will enable students to progress to the higher order theories, processes and contexts of landscape design in subsequent design units. The unit provides the opportunity for developing these foundation skills in a range of real world and abstract problem solving situations. The program includes an exploration of leading contemporary landscape design around the world.

**Courses:** DE40

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**DLB210 Environmental Design 1**  
This studio will be underpinned by a sustainability theme its two main themes are: (a) water management - introduces responsible approaches to water (and waste) in the designed landscape, including more sustainable uses of ‘blackwater’, ‘greywater’ and ‘blackwater’; and (b) sustainable landscape management - introduces the basics of climatically sensitive spatial and planting design to minimise energy use, creating ‘eco-cities’ for sustainable living that emphasises such strategies as alternative traffic planning for maximum human benefit. Continued development of graphic skills in design exploration and communication is integrated into the program. It is block taught in the first half of the semester.

**Courses:** DE40

**Prerequisites:** DLB130  
**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2
Courses: ED92, ED82
Incompatible with: EAB351, EAB364
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► EAB003 Development and Learning in Early Childhood
This unit examines the major theories, features and processes of early development. The pace and direction of development are shaped by biological predispositions and personal attributes, as well as by the interactions and experiences afforded to the child. Knowledge of contexts, their impact on individual development, and an awareness of the interrelationships between each area of development is necessary in order to develop an understanding of how children think and learn. Early childhood teachers also require a range of skills for observing and analysing behaviour in order to plan and organise appropriate educational opportunities in early childhood settings.
Courses: ED92, ED82
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► EAB004 Development and Learning Early Childhood 2
To facilitate learning during early childhood, teachers must have a sound knowledge of the major theories, features and processes of development. The units in the developmental strand are underpinned by sociocultural theory, which takes into account both the psychological and the social mechanisms of development and learning. Development and Learning in Early Childhood will foreground the social mechanisms of learning by discussing children's learning and development in a social context, integrating the social, emotional and cognitive elements of development. The units in the developmental strand are underpinned by sociocultural theory. The focus is on young children learning literacies in family and community contexts in the years prior to formal schooling. Students are encouraged to appreciate each child’s journey as they encounter a range of multimodal practices that constitute literacies.
Courses: ED26, ED92, ED82, ED93, ED83, EAB413
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1
► EAB005 Inclusion in Early Childhood Settings
This unit aims to promote an understanding and valuing of inclusive educational programs and practices for working with young children with special needs in diverse early childhood settings. Students are expected to develop knowledge of behavioural and developmental characteristics presented by young children with specific needs, as well as understand principles and practices related to assessment, planning and implementation of educational programs for these children.
Courses: ED26, ED91*, ED92*, ED93, ED82*, ED83, IX11 - "pathway
Incompatible with: EAB444
Credit points: 12  Semester: 1, 2, 3
► EAB006 Leadership and Management in Early Childhood Services
Early childhood settings, including primary schools, operate by using site-based management practices that rely heavily on participation by teachers, staff from all levels of the organisation, and parents. Early childhood teachers need excellent leadership and management strategies to participate effectively in group decision-making for the development of high-quality programs and services. They also need an understanding of how management structures impact on programs and service provision. This understanding, together with a high level of personal power, helps individual teachers influence and lead decisions about what happens in early childhood settings.
Courses: ED26, ED92, ED82, ED93, ED83, IX11
Incompatible with: EAB413
Credit points: 12  Semester: 1, 2, 3
► EAB008 Early Childhood Language and Literacies and Communication 1
This is an introductory unit in which students examine literacies from contemporary perspectives. The focus is on young children learning literacies in family and community contexts in the years prior to formal schooling. Students are encouraged to appreciate each child’s journey as they encounter a range of multimodal practices that constitute literacies.
Courses: ED26, ED92, ED82, ED93, ED83, ED44, IX11
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1
► EAB009 Early Childhood Language and Literacies and Communication 2
In this unit a literacy as social practice approach is examined critically. Students explore matters related to instructional experiences, literacy resources and materials, diversity, and partnerships with children’s families. Although print will be the focus in reading and writing instruction, images/graphic text will be a significant consideration, so that literacy practices reflect new and changing ways of operating with texts. Teachers use pedagogies and assessment that provide opportunities for access for all students, particularly those individuals and groups who may perform at lower levels of proficiency.
Courses: ED92, ED93, ED82, ED44
Prerequisites: EAB008
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 2
► EAB010 Early Childhood Language and Literacies and Communication 3
This unit focuses on enabling students to build competencies by planning classroom discourses and learning programs that will enable young children to establish confident use of a repertoire of language, literacy and communications understandings and practices as a basis for ongoing learning and cultural participation.
Courses: ED26, ED92, ED93
Credit points: 12  Semester: 2
► EAB011 Early Childhood Curriculum: Arts 1
We are surrounded by visual images, in many cases as much more powerful than any other form of communication. It is important that we are aware of how these images are working on us, and for that, we need to be visually literate. Childhood cultures are made up of interwoven narratives and commodities, the arts enable young children to give form to thought, to develop multiliteracies for exploring and expressing ideas and feelings through representation. This unit examines the characteristic features of the early childhood arts curriculum, its philosophical and theoretical underpinnings, beliefs about the nature of the learner, the child/teacher relationship, and the educational process.
Courses: ED92, ED93, ED82, ED83, IX11
Credit points: 12  Semester: 2
► EAB012 Early Childhood Curriculum: Arts 2
Relevant theories, principles and philosophies are presented and analysed as a basis for developing appropriate teaching strategies for a quality arts program in the early years. Desired outcomes will be achieved through descriptive, interpretive, analytic and expressive processes and shared knowledge between students and staff.
Courses: ED92
Prerequisites: EAB011
Credit points: 12  Semester: 1
► EAB013 Early Childhood Society, Environment and Health Education
This unit promotes a broad view of science. However, that includes the social sciences, health and environmental perspectives. Appropriate curriculum approaches that support a broader, more integrated view of science are a key goal. Through this unit, students should achieve the following: develop a deepening of their own understandings of concepts pertinent to science, studies of society and environment, and health; learn to critique and broaden their views of science; understand a range of age-based approaches relevant to these areas; learn to apply these approaches to facilitate young children’s learning in the sciences.
Courses: ED92, ED93, ED82, ED83, IX11
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1, 2
► EAB015 Early Childhood Science and Information and Communication Technologies Education
It is essential that children are provided with opportunities to develop their abilities and interests by using a variety of learning modes and that children have opportunities to develop concepts that are foundational to understanding in mathematics, and which form the basis of learning in all curriculum areas. Students require understanding of how children apply active inquiry processes to tasks designed to further concept development in mathematics. This unit will engage them in learning about foundational concepts in mathematics and exploring ways in which teachers can develop appropriate learning opportunities to encourage and foster their development.
Courses: ED92, ED93
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 2
► EAB016 Research in Early Childhood Education
This unit aims to foster critical understanding of research with young children. The unit will provide opportunities for students to become lifelong learners and effective communicators.

#### EAB019 Programs for Infants & Toddlers (Birth to three years)

This unit focuses on young children in formalised care settings. It is aimed at ensuring that students have both the reason for and the capability to benchmark high quality care and education of under 3s. The unit also supports students’ capacity to design, implement and/or supervise high quality programs for very young children.

There is concern in the community about the general health of young children. Therefore it is important for students to understand current health policies and practices for various early childhood education settings. This includes the daily food needs of young children and how to provide appropriate everyday food education and social food experiences. The unit provides students with the knowledge to lead, plan, implement, and evaluate health practices in services and to balance the nutritional needs of individual children. Personal health and health practices including preventative strategies are addressed.

#### EAB022 Early Childhood Science Education

This unit examines the importance of developing children's creativity, curiosity, problems solving skills and sense of wonder and appreciation of the environment, in the exploration of science. The unit focuses on the different approaches to teaching science and the development of positive attitudes for life long learning while taking into account children's cultural and diverse backgrounds.

#### EAB026 Early Childhood Community Arts Project

This unit has a focus on pedagogies, planning and assessment within the curriculum. Organisers of the New Basics, the Preschool Curriculum Guidelines and the key learning areas. It aims to increase knowledge and understanding of how curriculum organisers and outcomes can be used to plan intellectually challenging curricula for young children.

| Courses: ED92 |
| Prerequisites: EAB011/EAB012 |
| Campus: KG |
| Credit points: 12 | Semester: 1 |

#### EAB027 Early Childhood Mathematics Education 1: Birth to Six Years

This unit aims to develop concepts that are foundational to understandings in early childhood mathematics, and to generally enhance students’ understandings, attitudes, values and skills in relation to early childhood mathematics, supported by concrete materials and computer environments. This unit will also investigate teaching methods and key sequences for developing concepts and skills for number, space, measurement, chance and data, and patterns and algebra.

| Courses: ED26, ED92 ED82 ED93 ED83 |
| Campus: KG, Ext |
| Credit points: 12 | Semester: 1 |

#### EAB028 Early Childhood Mathematics 2: Four to 8 Years

Children’s successful participation in mathematical contexts is mediated by the effectiveness of a teacher’s pedagogical practice, understandings of how learners learn, and knowledge and understanding of mathematics. This unit aims to develop an understanding of the pedagogical practices which inform the teaching and learning of mathematics in early childhood contexts, in particular, a sound understanding of the knowledge, skills and processes required to support learners in the early years of schooling.

| Courses: ED92 ED93 ED83 ED82 |
| Campus: KG, Ext |
| Credit points: 12 | Semester: 2 |

#### EAB134 Early Childhood Curriculum: SOSE and Health

This unit broadens and deepens students’ understandings of key concepts that are foundational to social, environmental, health and physical education in the early childhood years, birth to 8 years. Allied with this conceptual understanding is the development of appropriate teaching and learning approaches that support young children as proactive learners.

| Courses: ED97, IX11 |
| Campus: KG, Ext |
| Credit points: 12 | Semester: 1 |

#### EAB135 Early Childhood Curriculum: Mathematics and Young Children

This unit develops concepts that are foundational to understandings in early childhood mathematics, and to generally enhance students’ understandings, attitudes, values, and skills in relation to early childhood mathematics.

| Courses: ED97, IX11 |
| Campus: KG, Ext |
| Credit points: 12 | Semester: 1 |

#### EAB346 Early Childhood Curriculum: Science, Society And The Environment

Students deepen their understanding of concepts pertinent to science, studies of society and environment, and health. They also learn to critique and broaden their views of science, and understand a range of appropriate inquiry-based approaches relevant to these areas and to apply these approaches to learning in the sciences for young children.

| Courses: ED44, ED57 |
| Campus: KG, Ext |
| Credit points: 12 | Semester: 1, 2 |

#### EAB361 Storytelling in Early Childhood

A major consideration for the teacher of early childhood is to provide children with rich experiences of ‘storying’. This unit introduces students to the following: the value of storytelling with young children; the selection of appropriate children’s literature suitable for storytelling; various storytelling strategies in terms of their impact on a young audience; the use of appropriate props for storytelling; ways of integrating storytelling across the curriculum.

| Courses: ED26, ED47, ED90*, ED91*, ED82*, ED92* |
| Contact hours: 3 per week | Campus: KG |
| Credit points: 12 | Semester: 1, 2 |

#### EAB363 Creating Curriculum with Young Children

The concept of curriculum in early childhood education evokes much discussion and debate. In this unit, more encompassing concepts of curriculum for young children will be considered in the light of theories and research that suggest that children construct their own knowledge. Ways in which teachers and children can work together in creating a curriculum that is meaningful to children while meeting the expectations of parents and society in relation to child care, kindergarten/preschool and lower primary settings are considered. Practical strategies for setting up supportive learning environments and methods for evaluating teaching and learning are included.

| Courses: ED47, ED90*, ED91*, ED82*, ED92 | *pathway |
| Campus: KG |
| Credit points: 12 | Semester: 1, 2 |

#### EAB364 Academic and Professional Communication

This unit includes the following: the development of an understanding of the general processes of communication in an academic and professional contexts; application of information literacy skills to a range of print and electronic sources; conventions for communicating using a range of academic text-types using print and electronic media; key concepts relating to the study topic: Families in Context.

| Courses: ED44, ED82, ED83, ED93 |
| Contact hours: 3 per week | Campus: KG, Ext |
| Credit points: 12 | Semester: 1, 2 |

#### EAB412 Advanced Integrated Early Childhood Curriculum

This unit includes the following: examination of key ideas informing holistic curriculum approaches; theories and practices associated with play in the curriculum in all early childhood settings, and particularly the lower primary school; implications of implementing an inclusive curriculum; issues of equity and social justice reviewed in relation to the
transacting the curriculum in early childhood settings; critical analysis of approaches to designing curriculum for the expanding range of services for young children and families in Australia.

**Courses:** ED43, ED52, ED53

**Incompatible with:** EAB017

**Contact hours:** 4 per week

**Campus:** KG, Ext

**Credit points:** 12

**Semester:** 1, 2

**EAB416 Early Childhood Art Education**

This unit includes the following: historical and contemporary trends in art education; philosophy and practice in early childhood visual arts education; in-depth exploration of young children's artistic development and learning; assessment and evaluation of visual arts in early childhood; methods of reporting and record-keeping; studio art experiences; curating children's art exhibitions; public information about children's artistry; advocacy for improving options for young children in the visual arts.

**Courses:** ED47, ED91*, ED82*, ED90*, ED92* - *pathway

**Credit points:** EAB011

**Contact hours:** 4 per week

**Campus:** KG

**Credit points:** 12

**Semester:** 1, 2

**EAB422 Information and Communication Technologies and the Young Child**

This unit includes the following: selection, use and critical evaluation of computers and associated software, and related technologies in early childhood programs, linking technology and problem-solving; applications and use of computers and associated software for language, number and problem-solving; creating teaching materials.

**Courses:** ED90*, ED91*, ED82*, ED92* - *pathway

**Contact hours:** 4 per week

**Campus:** KG

**Credit points:** 12

**Semester:** 2

**EAB445 Applied Studies Of Children in Early Childhood Contexts**

This unit includes the following: synthesis of individual students' knowledge from the previous foundation units; development of skills in preparation and conduct of debates and case study reporting; children with special needs; social, personal, and professional issues in the provision of early childhood education and services.

**Courses:** EAN63

**Prerequisites:** EAB011

**Corequisites:** EAB444

**Contact hours:** 4 per week

**Campus:** Ext

**Credit points:** 12

**Semester:** 2

**EAN601 Investigating Curriculum and Pedagogy in Early Childhood**

The aims for this unit are to assist students in developing a critically-informed and research-based understanding of the current issues that are under scrutiny in the field of Early Childhood Education. Recognition and appreciation of gender, culture and customs are essential to the consideration of the issues, and students will make active contributions to promoting codes of practice relevant to the specific professional area of education/learning.

**Courses:** ED09, ED13, ED61

**Campus:** KG, Ext

**Credit points:** 12

**Semester:** 1, 2

**EAN603 Child Development in Context**

The aim of the unit is to foster critical understanding of current developmental theory, the conduct of developmental research and the application of research findings to practice in early childhood education and other fields in which professionals work with children and families.

**Courses:** ED09, ED61, ED13

**Campus:** KG, Ext

**Credit points:** 12

**Semester:** 2

**EAN604 Children, Families and Communities**

Critical understandings drawn from a range of theoretical perspectives serve to critique research and policy around children, families and communities.

**Courses:** ED09, ED13

**Campus:** KG, Ext

**Credit points:** 12

**Semester:** 1

**EAN608 Foundations of Childhood and Early Education**

This unit equips students to use sociological theoretical perspectives to constructively and critically examine childhood and early education ideas and practices.

**Courses:** ED09, ED13

**Campus:** KG, Ext

**Credit points:** 12

**Semester:** 1

**EAN614 Arts and Sciences in Early Childhood**

The unit challenges students, as leaders in early childhood teaching and learning, to interrogate and problem-solve; applications and use of computers and associated software, and related technologies in early childhood programs, linking technology and problem-solving; applications and use of computers and associated software for language, number and problem-solving; creating teaching materials.

**Courses:** ED90*, ED61, ED13

**Campus:** Ext

**Credit points:** 12

**Semester:** 1

**EAN615 Mathematics in Early Childhood**

This unit aims to develop concepts that are foundational to understanding early childhood mathematics and the teaching and learning of mathematics. Students develop a broad knowledge of mathematical content specifically for early childhood contexts.

**Courses:** ED09, ED61, ED13

**Campus:** Ext

**Credit points:** 12

**Semester:** 2

**EAN616 Language, Literacies and Communication in Early Childhood**

The focus of this unit is to help students to understand recent research-based practices for literacy learning and teaching in the years before compulsory schooling and the early school years. Emphasis is placed on a broad definition of literacy that highlights the importance of all children becoming active participants in society and of knowing and engaging in a range of literacy practices, rather than just learning a set of reading and writing "skills".

**Courses:** ED09, ED61, ED13

**Campus:** Ext

**Credit points:** 12

**Semester:** 2

**EAP400 Early Years: Literacies**

In this unit you will examine literacy from critical contemporary perspectives - as a repertoire of contextualised social practices. You will gain insight into different pathways children take to literacy as their learning and development is shaped in family, community and school contexts. A key focus is on helping you to understand early reading and writing processes in the print medium, as well as multimedia. You will learn to use the framework of four literacy practices: code breaker, text-participant, text-user and text-analyst to explore operational, cultural and critical dimensions of literacy. You will build a repertoire of strategies that will allow you to meet the needs of diverse learners.

**Courses:** ED20, ED38

**Campus:** KG

**Credit points:** 12

**Semester:** 1, 2

**EAP401 Early Years: Mathematical Understandings**

This unit aims to develop concepts that are foundational to understandings in early childhood Mathematics, and to generally enhance your understandings, attitudes, values, and skills in relation to early childhood Mathematics. You will investigate teaching approaches, and key sequences for developing concepts and skills for various aspects of Mathematics education.

**Courses:** ED26, ED38

**Campus:** KG

**Credit points:** 12

**Semester:** 1, 2

**EAP402 Early Years: Arts and Humanities**

This unit aims to develop students' capacities as scholars, educators and researchers, through adopting a problem-finding, problem-solving and inquiry-based approach to learning. Through engaging in their own inquiry-based investigation of a social/ environmental issue, students learn how the arts can be used as a learning and teaching tool. Students will investigate Indigenous studies and SOSE through descriptive, interpretive, analytic and expressive processes, to share and create knowledge with students and staff.

**Courses:** ED26, ED38

**Campus:** KG

**Credit points:** 12

**Semester:** 2

**EAP403 Early Years: Science and Technology Education**

This unit aims to extend your prior understanding of science and technology education, and to enhance their understandings, dispositions and skills in relation to early childhood science and technology education. It also aims to augment students' understandings of teaching strategies, planning and evaluation for diverse groups of young children in a variety of school and centre settings.

**Courses:** ED26, ED38

**Campus:** KG

**Credit points:** 12

**Semester:** 2

**EAP536 Curriculum in Early Childhood 3**

This unit includes the following: current approaches to the teaching of literacy and numeracy in the early years; diagnosis and assessment in early literacy and numeracy; the expressive arts and the sciences as modes of learning and teaching in the early years; applications of technology with young children; planning and teaching for individual and group needs.

**Courses:** ED20, ED52

**Prerequisites:** EAP534, EAP535

**Campus:** KG, Ext

**Credit points:** 12

**Semester:** 1

**EAZ015 Early Childhood Science and Technology Education**

**Credit points:** 12
UNIT SYNOPSIS

Semester: 2
► EAZ364 Academic and Professional Communication
Credit points: 12
Semester: 1
► EAZ354 Curriculum in Early Childhood
This unit will enable early childhood professionals to draw on a range of knowledge in designing and evaluating learning and teaching opportunities in the arts and sciences in early childhood as part of the pedagogical repertoire of the early childhood professional.
Courses: E46
Credit points: 12
► EAZ355 Curriculum in Early Childhood
2
This unit aims to enable early childhood professionals to develop a repertoire of knowledge and skills in curriculum decision-making and pedagogy in early childhood settings in order to provide meaningful learning opportunities for children.
Courses: E46
Corequisites: EAZ354
Credit points: 12
► EAZ356 Curriculum in Early Childhood
3
This unit explores current conceptualisations of literacy and numeracy and the way teachers integrate technology to facilitate learning in these areas. Students will refine their ability to observe, analyse and evaluate young children’s literacy and numeracy behaviours in order to plan in ways that support further learning and development.
Courses: E46
Credit points: 12
► EAZ357 Contexts of Early Childhood Education
Students have the opportunity to explore both the historical and contemporary dimensions of early childhood education in the socio-cultural context and critically reflect on the connections that bind current early childhood education practices with the contemporary socio-cultural context.
Courses: E46
Credit points: 12
► EAZ601 Investigating Curriculum and Pedagogy in Early Childhood
Credit points: 12
► EAZ604 Young Children, Families and Community
Credit points: 12
► EDB001 Teaching and Learning Studies 1: Teaching in New Times
Teaching today is being practised in a changing world. New forms of culture and society have emerged in recent decades alongside new and more globalised diagrams of economy, power and government. Schooling and education in all domains are being affected by these shifts and transformations. Educational sites, for instance, are becoming more differentiated and enterprising; learners themselves increasingly more diverse, active and autonomous. Teaching in New Times challenges students, in the early stages of their course, to develop an insightful and research-based conceptual framework, drawn from social theory and cultural studies, so that they may respond to these transformations in an informed, ethical and professional manner.
Courses: ED90, ED91, ED92, IX09, IX11
Incompatible with: CLB305
Contact hours: 4 per week
Campus: CB, KG, Ext
Credit points: 12
Semester: 1, 2
► EDB002 Teaching and Learning Studies 2: Development and Learning
This unit has the dual purposes of promoting your own personal and professional development as life long, creative, autonomous learners, capable of reflection and high level thinking, and of enabling you, as educators, to promote similar development in your learners. Pursuit of these aims will involve an exploration of human development, from personal and interpersonal perspectives, with sensitivity to socio-cultural contexts, and with a particular focus on the theory, research and practice which informs educators about how learners construct knowledge and become creative, self-motivated thinkers and problem solvers.
Courses: ED90, ED91, IX01-IX09
Incompatible with: SPB001
Contact hours: 3 per week
Campus: CB, KG
Credit points: 12
Semester: 1
► EDB003 Teaching and Learning Studies 3: Practising Education
Education is a social and cultural activity. This unit provides a sociological and cultural studies framework that provides an insightful explanation of the varied sites and contexts in which constructed and studied. The unit includes a socio-cultural analysis of an educational site which will be undertaken in conjunction with the Field Studies unit.
Courses: ED90, ED91, ED92, ED93, IX01-IX09
Incompatible with: CLB306
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1, 2
► EDB004 Teaching and Learning Studies 4: Inclusive Education
This unit aims to develop students’ understanding and appreciation of the contributions that diversity, belonging and trust make towards a quality learning environment for all learners. Students will learn to engage in teaching a broad range of students in diverse and inclusive ways utilising pedagogies and curriculum practices that enhance learning for all students and generate inclusive cultures within the school and classroom settings. Desired outcomes are achieved through descriptive, interpretative, analytic and expressive processes to share learning with fellow students and staff.
Courses: ED90, ED91, ED92, IX01-IX09
Campus: KG
Credit points: 12
Semester: 1
► EDB005 Teaching and Learning Studies 5: Professional Work of Teachers
Students will share the responsibility for shaping their beginning career learnings through a process of professional induction with a number of key significant stakeholders. The process will be proactive, collaborative and self determined and students will need to become professionally responsible for developing a professional development program that best accommodates their needs at the close of the teacher education program.
Courses: ED90, ED91, X01-IX09
Campus: KG
Credit points: 12
Semester: 2
► EDB006 Learning Networks
This unit explores the concept of learning networks: interacting socio-technical systems that lead to collective sense-making and knowledge construction. Topics include the nature and use of information and communication technologies (ICTs), learning theories and technologies and socio-technical practices in learning networks.
Courses: ED26, ED47, ED90, ED91, ED92, ED93
Incompatible with: MB3835, CLB341
Contact hours: 3 per week
Campus: CB, KG
Credit points: 12
Semester: 1
► EDB007 Culture Studies: Indigenous Education
Numerous government reports and recent discussions about reconciliation have called for an increased commitment to Indigenous education in Australia. Teachers are increasingly being asked to improve their skill, knowledge and understanding to teach Indigenous students, and to teach curricula which incorporates Indigenous viewpoints on family, social, cultural and historical matters. This unit begins with an analysis of the students’ own cultural place in the Australian context and afterwards moves towards an understanding of Aboriginal and Torres Strait Islander perspectives on history and contemporary issues, and an understanding of why Aboriginal and Torres Strait Islander students have been so disadvantaged by the Australian education system.
Courses: ED26, ED90, ED91, ED92, ED93, IX01-IX09
Contact hours: 3 per week
Campus: CB, KG
Credit points: 12
Semester: 1, 2
► EDB010 Field Studies: Development and Learning in the Teaching of English
This unit has the dual purpose of promoting your own personal and professional development as life long, creative, autonomous learners, capable of reflection and high level thinking, and enabling you, as educators, to promote similar development in your learners. This unit will contribute to the overall aims of the BEd by giving attention to two sets of teacher practitioner attributes. In the first set, emphasis is placed on your personal and professional development in the course and in the second set, the emphasis is on the attributes required of educators to facilitate learning in their students.
Courses: ED47
Credit points: 12
Semester: 1
► EDB011 Early Childhood Field Studies 1: Development and Learning in the Field
Designated Unit. This unit focuses on students’ professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs in a wide range of settings for children aged from birth to eight years. In this unit of the professional practices strand, students will have opportunities to undertake activities.
designed to help them refine an increasing number of strategies for teaching and working collaboratively with children and their parents, and with other professional colleagues.

Courses: ED92, ED83, ED53, ED82, ED93
Incompatible with: EDB422
Credit points: 12 Semester: 1

► EDB012 Early Childhood Field Studies 2: Practising Education in the Field
Designated Unit This unit focuses on students’ professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the second set of teaching experiences, in a graduated sequence over the course of the BEd. In this second unit of the professional practices strand, students will focus upon program planning and implementation in settings for children in lower primary. Students will focus upon teaching in lower primary school classrooms, with an emphasis upon the development of knowledge of relevant policies and resources in curriculum provision. An emphasis will be maintained on understanding Early Childhood approaches to curriculum.

Courses: ED92, ED93, ED52, ED57, IF81, IF82
Incompatible with: EDB421
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1, 2

► EDB013 Early Childhood Field Studies 3: Immersion in Inclusive Educational Practices
Designated Unit The aim in this unit is to develop professional support relationships that transfer to the role of the tertiary student to that of a professional early childhood practitioner who is able to work across diverse settings. Students are encouraged to engage in reflection about their professional development and their future career paths and options.

Courses: ED92, ED93
Prerequisites: EDB013
Incompatible with: EDB423
Credit points: 12 Semester: 1

► EDB014 Early Childhood Field Studies 4: Professional Work of Teachers - Induction into the Field
Designated Unit This final early childhood practice unit is designed to provide a means of transition from the role of the tertiary student to that of a professional early childhood practitioner who is able to work across diverse settings. Students are encouraged to engage in reflection about their professional development and their future career paths and options.

Courses: ED92, ED93
Prerequisites: EDB014
Credit points: 12 Semester: 2

► EDB016 Early Childhood Field Experience (Child Care)
Designated Unit This practicum unit is aimed at providing an initial experience in care and supervision in a child care setting. Students are encouraged to adopt a responsive approach in their work with children and adults. Students will undertake 20 days of field studies in a child care setting.

Courses: EDB2
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► EDB021 Primary Field Studies 1: Development and Learning in the Field
Designated Unit This unit focuses on students’ professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs. This requires an understanding of learner needs, curriculum knowledge, procedures for creating supportive classroom environments, and sensitivity to socio-cultural contexts.

Courses: ED91, IX12, IX14
Contact hours: 3 per week
Campus: CB, KG
Credit points: 12 Semester: 1, 2

► EDB022 Primary Field Studies 2: Practising Education in the Field
Designated Unit Through critical examination of the socio-cultural dimensions of these sites, this unit aims to utilise aspects of social enquiry to analyse the practice of teaching as a social and cultural activity. At the same time, the unit aims to develop students’ pedagogical and curriculum skills as a teacher.

Courses: ED91
Prerequisites: EDB021
Credit points: 12 Semester: 1, 2

► EDB023 Primary Field Studies 3: Immersion in Inclusive Educational Practises
Designated Unit As a final year teacher education student you will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. This field experience is designed for students to engage in teaching, learning and assessment practices in their field, interacting with individual students, small groups of students and whole class situations. Students will be required to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of the students in classes.

Courses: ED91
Prerequisites: EDB022
Credit points: 12 Semester: 1, 2

► EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field
Designated Unit Learners remain central to the work of teams and must be recognised as culturally and socially diverse as well as intellectually diverse. Within these constructs the graduating teachers are required to provide a range of educational opportunities that facilitate high quality and meaningful learning engagement for all students across differing educational contexts and sectors. This unit is designed to fully immerse the pre-service teacher into the field with a view to scaffold their repositioning as autonomous, critically reflective, inclusive professional teachers on completion.

Courses: ED91
Prerequisites: EDB023
Credit points: 12 Semester: 2

► EDB025 Internship (Primary)
Designated Unit This unit aims to induce you into the professional work of teachers. The aim of this unit is for you to apply the knowledge, skills and understandings of teaching and learning that you have acquired throughout the course in an extended time in the workplace.

Courses: ED91
Corequisites: EDB024
Credit points: 12 Semester: 2

► EDB031 Secondary Field Studies 1: Development and Learning in the Field
Designated Unit This unit focuses on the students’ professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs. This requires an understanding of learner needs, curriculum knowledge, procedures for creating supportive classroom environments, and sensitivity to socio-cultural contexts.

Courses: ED90, IX01-IX09
Contact hours: 3 per week
Campus: KG
Credit points: 12 Semester: 1, 2

► EDB032 Secondary Field Studies 2: Practising Education in the Field
Designated Unit Through critical examination of the socio-cultural dimensions of these sites, this unit aims to utilise aspects of social enquiry to analyse the practice of teaching as a social and cultural activity. At the same time, the unit aims to develop students’ pedagogical and curriculum skills as a teacher.

Courses: ED90, IX01-IX09
Prerequisites: EDB031
Credit points: 12 Semester: 2

► EDB033 Secondary Field Studies 3: Immersion in Inclusive Educational Practises
Designated Unit. Students will be required to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of the students in your classes. Students will be required to argue that their orientations to curriculum, teaching and assessment reflect practices that offer all students access to quality learning experiences.

Courses: ED90, IX01-IX09
Prerequisites: EDB032
Credit points: 12 Semester: 2

UNIT SYNOPSES

QUT HANDBOOK 2006 • PAGE 618
UNIT SYNOPSIS

Credit points: 12
Semester: 1, 2

EDB034 Secondary Field Studies 4: Professional Work of Teachers - Induction into the Field
Designated Unit. This unit is designed to fully immerse the pre-service teacher into the field with a view to scaffolding their repositioning as an autonomous, critically reflective, inclusive professional teacher on completion.
Courses: ED90, IX01-IX09
Prerequisites: EDB033
Campus: KG
Credit points: 12
Semester: 2

EDB035 Internship (Secondary)
Designated Unit. This unit aims to induct students into the professional work of teachers. The aim of this unit is to apply the knowledge, skills and understandings of teaching and learning that students have acquired throughout the course in an extended time in the workplace.
Courses: ED90, IX01-IX09
Campus: KG, Ext
Credit points: 12
Semester: 2

EDB101 Professional Foundations for Learning Facilitation 1
This unit will allow students to examine their learning preferences and reflect on how these preferences may influence, positively and negatively, their own personal and professional development and that of the clients with whom they work. Students are introduced to their legal obligations in designing and conducting learning experiences.
Courses: EDB84
Corequisites: SPB102
Campus: KG, Ext
Credit points: 12
Semester: 1

EDB102 Professional Foundations for Learning Facilitation 2
This unit provides opportunities for students to develop understandings of the importance of the underlying processes (such as group dynamics) in learning situations and to have practical experiences in managing these processes.
Courses: EDB84
Prerequisites: EDB101, SPB102
Campus: KG, Ext
Credit points: 12
Semester: 2

EDB103 Adult and Community Learning: Professional Project 1
Students are able to transfer the skills, knowledge and attitudes they have developed through their study in the Bachelor of Adult and Community Learning to a professional work site or context. They will develop appropriate risk management strategies for their professional project.
Courses: EDB84
Corequisites: EDB101, EDB102, SPB102, SPB103, SPB104
Campus: KG
Credit points: 12
Semester: 1

EDB104 Adult and Community Learning: Professional Project 2
Students continue to transfer the skills, knowledge and attitudes they have been developing through their study in the Bachelor of Adult and Community Learning to a professional work site or context.
Courses: EDB84
Prerequisites: EDB103

EDB200 Insights into Early Childhood Development
The unit aims to develop knowledge and understanding of early childhood development with a focus on children’s thinking and communicating in a social context.
Courses: EDB93, EDB97, IX11
Campus: KG, Ext
Credit points: 12
Semester: 1

EDB201 Engaging in Learning
Increasingly rich and complex opportunities are offered to today’s learners to engage in personal, social and technological approaches to knowledge construction.
Courses: EDB95, EDB96, IX12, IX14
Campus: KG, Ext
Credit points: 12
Semester: 1

EDB202 Teaching in a Knowledge Society
This unit builds professional capacity by developing a socio-cultural studies framework for understanding and analysing teaching, schooling and education in today’s knowledge society.
Courses: EDB95, EDB96, EDB97, IX11, IX12, IX14
Campus: KG, Ext
Credit points: 12
Semester: 2

EDB203 Inclusivity in Educational Practice
This unit engages the student in an investigation of the international nature of inclusion and trends that address socio-cultural issues through quality educational experiences.
Courses: EDB95, EDB96, EDB97, IX11, IX12, IX14
Campus: KG, Ext
Credit points: 12
Semester: 2

EDB204 The Professional Work of Educators
This unit facilitates the process of induction within an educational professional learning community. It enhances the student’s awareness of, and associates their knowledge with, the needs of Indigenous Australians.
Courses: EDB95, EDB96, EDB97, IX11, IX12, IX14
Campus: KG
Credit points: 12
Semester: 2

EDB205 Primary Curriculum Project
This unit consolidates contextual skills and understandings in the use of information and communication technologies to support teaching and learning in a school context.
Courses: EDB95, IX12, IX14
Campus: KG, Ext
Credit points: 12
Semester: 2, 3

EDB206 Secondary Curriculum Project
This unit consolidates contextual skills and understandings in the use of information and communication technologies to support teaching and learning in a school context. It incorporates an investigation of current policy relating to the use of ICT in schools and the theoretical literature pertaining to ICT and education.
Courses: EDB95
Campus: KG, Ext
Credit points: 12
Semester: 2, 3

EDB211 Early Childhood Field Studies A: Insights into Early Childhood Development
Designated Unit. This unit focuses on students’ professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner.
Courses: EDB97, IX11
Credit points: 12
Campus: KG, Ext

EDB212 Early Childhood Field Studies B: Teaching in the Knowledge Society
Designated Unit. This unit focuses on program planning and implementation in settings for children in lower primary. Emphasis is on the development of knowledge of relevant policies and resources in curriculum provision.
Courses: EDB97, IX11
Credit points: 12
Campus: KG, Ext

EDB213 Early Childhood Field Studies C: Inclusivity in Educational Practice
Designated Unit. This unit develops professional support relationships that early childhood practitioners must provide for all children and their families, and an awareness of the need for the teacher to work as a member of the community and as a partner with parents and other colleagues.
Courses: EDB97, IX11
Credit points: 12
Campus: KG, Ext

EDB214 Early Childhood Field Studies D: The Professional Work of Educators
Designated Unit. The final early childhood practice unit is designed to provide a means of transition from the role of the tertiary student to that of a professional early childhood practitioner who is able to work across diverse settings.
Courses: EDB97, IX11
Credit points: 12
Campus: KG, Ext

EDB215 Early Childhood Professional Internship
Designated Unit. This unit inducts the student into the professional work of early childhood teachers. It aims to have students apply the knowledge, skills and understandings of teaching and learning that they have acquired throughout their course to an authentic workplace setting.
Courses: EDB97, IX11
Corequisites: EDB214
Campus: KG, Ext
Credit points: 12
Semester: 1

EDB221 Primary Field Studies A: Engaging in Learning
Designated Unit. This unit focuses on the student’s professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner.
Courses: EDB96, IX12, IX14
Campus: KG, Ext
Credit points: 12
Semester: 1

EDB222 Primary Field Studies B: Teaching in the Knowledge Society
Designated Unit. This unit facilitates pedagogical and curriculum development in terms of the socio-cultural contexts in which education takes place. The unit aims to utilise social enquiry as a social and cultural activity.
Courses: EDB96, IX12, IX14
Prerequisites: EDB221
Campus: KG, Ext

QUT HANDBOOK 2006 • PAGE 619
UNIT SYNOPSES

Designated Unit. This unit focuses on the critical link between inclusive theory and inclusive classroom practice. It is designed to demonstrate the student's ability to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways.

Courses: ED96, IX12, IX14
Prerequisites: EDB223
Campus: KG, Ext
Credit points: 12
Semester: 1, 3

► EDB224 Primary Field Studies D: The Professional Work of Educators
Designated Unit. This unit enhances the student's ability to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of students in specific classes.

Courses: ED96, IX12, IX14
Prerequisites: EDB223
Campus: KG, Ext
Credit points: 12
Semester: 1, 2

► EDB225 Primary Professional Internship
Designated Unit. This unit provides an induction into the professional work of primary teachers. It aims to have students apply the knowledge, skills and understandings of teaching and learning that they have acquired throughout their course to an authentic workplace setting.

Courses: ED96, IX12, IX14
Corequisites: EDB224
Campus: KG, Ext
Credit points: 12
Semester: 1, 2

► EDB231 Secondary Field Studies A: Engaging in Learning
Designated Unit. This unit focuses on the student’s professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner.

Courses: ED95
Corequisites: EDB231
Campus: KG, Ext
Credit points: 12
Semester: 1

► EDB232 Secondary Field Studies B: Teaching in the Knowledge Society
Designated Unit. This unit develops pedagogical and curriculum development in terms of socio-cultural contexts in which education takes place.

Courses: ED95
Prerequisites: EDB231
Campus: KG, Ext
Credit points: 12
Semester: 2

► EDB233 Secondary Field Studies C: Inclusivity in Educational Practice
Designated Unit. This unit allows the student to engage in the implementation of authentic teaching, learning and assessment practices in a supportive environment. Students reflect on a range of experiences in order to extend and consolidate their developing teaching.

Courses: ED95
Prerequisites: EDB232
Campus: KG, Ext
Credit points: 12
Semester: 1, 3

► EDB234 Secondary Field Studies D: The Professional Work of Educators
Designated Unit. This unit immerses preservice teachers in the field with a view to scaffolding their repositioning as an autonomous, critically reflective, inclusive professional teacher on completion.

Courses: ED95
Prerequisites: EDB233
Campus: KG, Ext
Credit points: 12
Semester: 1, 2

► EDB235 Secondary Professional Internship
Designated Unit. This unit provides an induction to the preservice teacher into the professional work of secondary teachers. It aims to have students apply the knowledge, skills and understandings of teaching and learning that they have acquired throughout their course to an authentic workplace setting.

Courses: ED95
Corequisites: EDB234
Campus: KG, Ext
Credit points: 12
Semester: 1, 2, 3

► EDB350 English for Teachers
This unit aims to continue the development of participants’ own language proficiency and intercultural competence and to further develop their understandings of the importance of effective and appropriate use of language in successful TESOL classrooms.

Courses: ED26, ED61, ED47, ED43
Campus: KG
Credit points: 12
Semester: 1

► EDB351 TESOL Methodology 1
This unit is designed to help TESOL teachers to develop a range of understandings so that they can plan and implement effective TESOL programs for young learners and interpret and manage the classroom as a complex social environment for teaching and learning.

Courses: ED26, ED61, ED46, ED47, ED43
Corequisites: EDB350
Incompatible with: CLB351
Campus: KG
Credit points: 12
Semester: 1

► EDB352 TESOL Methodology 2
Language teachers are required to make informed pedagogical decisions which are responsive to the learning needs of their students and to the curriculum frameworks of the context in which they work. This unit extends the understandings and strategies developed TESOL Methodology 1 and encourages participants to expand their pedagogical repertoire as they refine their own developing teaching philosophy.

Courses: ED26, ED61, ED46, ED47, ED43
Corequisites: EDB350, EDB351
Campus: KG
Credit points: 12
Semester: 1

► EDB353 TESOL Materials and Curriculum Development
Effective language teachers working with young children need to be able to critically analyse, evaluate, develop and generate course materials and activities that engage young learners and support their language development in a principled and coherent fashion across the Semester.

Courses: ED26, ED61, ED46, ED47, ED43
Corequisites: EDB350, EDB351, EDB352
Campus: KG
Credit points: 12
Semester: 1

► EDB354 Resources, Design and Evaluation for English as a Foreign Language
This unit improves and expands the English language of participants. Helps them to select, develop and critically analyse resources in which EFL teachers of young children can work with resources in teaching/learning contexts.

Courses: ED26, ED61, ED47, ED43
Campus: KG
Credit points: 12
Semester: 2

► EDB402 Field Experience 3
In Part 5 (In-Field), students learn how to implement a training program for a target group. This involves planning a series of training sessions to meet the requirements of a target group. During Part 6 (In-Field), students learn the requirements for planning assessment in a specific context, how to determine evidence requirements, select appropriate assessment methods and develop assessment tools in specific contexts. Students also learn how to employ the above components in practice.

Courses: ED54
Prerequisites: EDB400
Campus: Ext
Credit points: 12
Semester: 1, 2

► EDB403 Field Experience 4
In Part 7 (In-Field), students learn how to review assessment procedures in specific contexts, such as those stated in Part 6, check the consistency of the assessment decision, and report review findings. During Part 8 (Private Study), students reflect upon what they have learnt from Parts 2-7, how they overcame barriers/problems of learners in the training/education context, and how these experiences should assist them to become effective trainers/educators.

Courses: ED54
Prerequisites: EDB400, EDB401, EDB402
Campus: Ext
Credit points: 12
Semester: 1, 2

► EDB410 Introduction to Research Methods in Education
This unit provides a foundation for understanding research design and methods in education. It focuses on reading, understanding and evaluating educational research both within and across different paradigms and on enabling students to develop their own plan for a small-scale research project. It includes the development of skills in understanding, appreciating, and using the processes and techniques of research. Students are made aware of the variety of research cultures and theoretical perspectives, to become informed consumers of the research findings of others.

Courses: ED90, ED91, ED92
Campus: KG
Credit points: 12
Semester: 1

► EDB411-1 Dissertation (Stage 1)
Courses: ED90, ED91, ED92
Corequisites: EDB410
Credit points: 12
Semester: 1, 2

► EDB411-2 Dissertation (Stage 2)
Courses: ED90, ED91, ED92
Credit points: 12
Semester: 1, 2

► EDB411-3 Dissertation (Stage 3)
Credit points: 12
Semester: 1, 2

► EDB423 Early Childhood Professional Practice: Choice
UNIT SYNOPSES

Designated Unit. This unit includes the following: refining strategies for teaching and working collaboratively with children, parents and colleagues in early childhood contexts; students' reflection on development of their own practices; roles of early childhood educators with regard to ethics, advocacy for young children, policy development and administration; curriculum vitae and resume. Twenty days of supervised practice in an early childhood setting of the student's choice is included.

Courses: EDB3, EDB5
Prerequisites: EDB420, EDB421, EDB012, EDB422
Incompatible with: PRB354
Contact hours: 2.5 per week
Campus: KG, Ext
Credit points: 12  Semester: 1
► EDB431 Primary Professional Practice 2: Curriculum Decision Making
Designated Unit. This unit includes an examination of aspects of curriculum decision making to acquire the knowledge, skills and processes necessary for short-term and long-range planning. Curriculum development, implementation and curriculum evaluation are investigated to refine daily, weekly and term programs. Particular attention is given to co-operative teaching of an integrated unit of work. It includes twenty days of practice teaching in a primary school.

Courses: ED51, ED56, IF82, IF84
Prerequisites: EDB430
Contact hours: 2 per week, 20 days school placement
Credit points: 12  Campus: Ext
► EDB432 Primary Professional Practice 3: Inclusive Curriculum
Designated Unit. This unit addresses the social, political and material relations that exist in differing classroom curriculum practices, examining both the constraining and enabling factors that impact on and generate possibilities within the conceptualising of the inclusive curriculum. This is done with the support of practising teachers, and critical self-analysis of classroom practices and possibilities. Includes twenty days of practice teaching in a primary school.

Courses: EDB5
Prerequisites: EDB431
Contact hours: 2 per week, 20 days school placement
Campus: KG, Ext
Credit points: 12  Semester: 1, 2
► EDB433 Primary Professional Practice 4: Beginning Teaching
Designated Unit. In this unit, students synthesise the range of skills, attitudes and knowledge sources that they have experienced to ensure an effective transition into professional practice as beginning teachers, taking responsibility for the shaping of educational practice from their own perspective and those of the learners. Emphasis is on planning and implementation of the total program. It includes thirty days of practice teaching in a primary school.

Courses: EDB6
Prerequisites: EDB432
Contact hours: 30 days school placement
Campus: KG, Ext
Credit points: 12  Semester: 1, 2
► EDB440 Independent Study
This unit involves self-initiated and self-directed academic study in an area of educational management interest that allows study either to a depth not possible in electives, or in an area not covered by the course.

Courses: EDB90, EDB91, EDB26, EDB47, EDB25, EDB5
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3
► EDB443 Professional Internship of Associate Teaching
The Professional Internship is a period of associate teaching in schools under the guidance of a teacher mentor. Authorisation to teach is provided by the Queensland Board of Teacher Registration provided that all academic studies and professional practice units have been completed. Student interns are prepared for the experience in weekly one hour seminars. It includes thirty days of associate teaching in a school.

Courses: EDB5
Contact hours: 1 per week, school internship placement (6+ weeks)
Campus: KG
Credit points: 12  Semester: 2
► EDB452 Secondary Professional Practice 3: The Inclusive Curriculum
Designated Unit. This unit addresses the social, political and material relations in differing classroom curriculum practices, with a view to examining both the constraining and enabling factors that impact on and generate possibilities within the conceptualising of the inclusive curriculum. Critical analysis of classroom practices and possibilities is effected in the professional practice component. The unit includes twenty days of practice teaching in a secondary school.

Courses: EDB5
Prerequisites: EDB451
Contact hours: 2 per week, 20 days school placement
Campus: KG, Ext
Credit points: 12  Semester: 1, 2
► EDB453 Secondary Professional Practice 4: The Beginning Teacher
Designated Unit. In this unit students synthesise the range of skills, attitudes and knowledge sources that they have experienced to ensure an effective transition into professional practice as beginning teachers, taking responsibility for the shaping of educational practice from their own perspective and those of the learners. Emphasis is on planning and implementation of the total program. It includes thirty days of practice teaching in a secondary school.

Courses: EDB5
Prerequisites: EDB452
Campus: KG, Ext
Credit points: 12  Semester: 1, 2
► EDN602 Advanced Seminars
This unit provides for the special needs and interests of students. Small groups of students interact at an advanced level with specialists or visiting scholars in seminars, conferences and research projects.

Courses: EDB9, EDB13, EDB11, EDB61
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3
► EDN603 Facilitated Study Unit
The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance.

Courses: ED60, ED61, ED67
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3
► EDN604-1 Facilitated Study Unit 1/2
The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation. The unit also aims to develop skills and understandings about how issues of professional interest can be explored and reported for professional and academic audiences.

Courses: ED60, ED61
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3
► EDN605-2 Facilitated Study Unit 2/3
See EDN604-1
Courses: ED60, ED69, ED13, ED61
Credit points: 12  Semester: 1, 2, 3
► EDN605-3 Facilitated Study Unit 3/3
See Part 1 of unit
Courses: ED60
Credit points: 12  Semester: 1, 2, 3
► EDN608-2 Project (stage 2)
The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation.

Courses: ED13, ED14, ED77
Prerequisites: EDN611
Credit points: 12  Semester: 1, 2
► EDN608-1 Project (stage 1)
Refer to EDN608
Courses: ED60, ED13, ED14, ED61, ED77
Credit points: 12
► EDN610 The Learning Innovator
This unit aims to develop understanding of what it means to be an innovator and a leader in a contemporary professional context. The unit is underpinned by the notion that innovation means being more critical, being open, being able to engage with greater uncertainty and complexity, and being able to learn from the past in order to manage the future.

Courses: ED60, ED61
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3
UNIT SYNOPSES

EDN611 Professional Applications of Research
The unit focuses on the needs of professionals to seek research knowledge that addresses specific problems or issues in their practice and to develop a positive attitude towards research in general. It assists students to search databases and other sources to locate published research reports in their field and evaluate them critically.

Courses: ED09, ED13, ED11
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3

EDN612 Conducting Innovative Research in Educational Contexts
The unit aims to enhance capacities for undertaking research in educational and other learning contexts that are innovative in both its focus and its approach. The unit engages students in a comprehensive examination of relevant research theory and practical application.

Courses: ED09, ED13, ED11, ED12
Prerequisites: EDN611 or equivalent
Campus: KG, Ext
Credit points: 12  Semester: 1, 2

EDN613-1 Thesis 1/3
This unit allows students to identify an area of research germane to their personal and professional interests and to develop and undertake an original piece of research.

Courses: ED09
Prerequisites: EDN611, EDN612
Incompatible with: EDN620
Campus: KG, Ext
Credit points: 12  Semester: 1, 2

EDN613-2 Thesis 2/3
See Stage 1
Courses: ED09
Credit points: 12  Semester: 1, 2, 3

EDN613-3 Thesis 3/3
See Stage 1
Courses: ED09
Credit points: 12  Semester: 1, 2, 3

EDN614-1 Thesis 1/4
For students to identify an area of research germane to their personal and professional interests and to develop and undertake an original piece of research. The unit provides opportunity to extend and synthesise knowledge from the core and elective units into a research study.

Courses: ED09
Prerequisites: EDN611, EDN612
Campus: KG, Ext
Credit points: 12  Semester: 1, 2, 3

EDN614-2 Thesis 2/4
See Stage 1
Courses: ED09
Prerequisites: EDN611, EDN612
Credit points: 12  Semester: 1, 2, 3

EDN614-3 Thesis 3/4
See Stage 1
Courses: ED09
Credit points: 12  Semester: 1, 2, 3

EDN614-4 Thesis 4/4
See Stage 1
Courses: ED09
Credit points: 12  Semester: 1, 2, 3

EDN620-3 Dissertation
The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation.

Courses: ED13
Prerequisites: EDN611, EDN612
Credit points: 12  Semester: 1, 2

EDN626 Learning and Teaching in Higher Education
This unit aims to develop the student's capacity to take a theoretically grounded approach to teaching and learning in higher education, specifically through increasing their knowledge of formal and informal theories of learning and teaching.

Courses: ED09, ED13, ED61
Campus: Ext
Credit points: 12  Semester: 1

EDN627 Contexts and Issues In Higher Education
This unit aims to provide students with opportunities to develop an understanding of a range of contemporary historical, policy and social issues that impact on higher education at institutional, school, department, course and individual levels.

Courses: ED09, ED13, ED61
Campus: Ext
Credit points: 12  Semester: 2

EDN629 Presentation and Delivery Modes in Higher Education
This unit aims to provide students with the opportunity to gain the knowledge, skills and confidence to use a variety of delivery methods appropriate to their post-secondary student cohort, and to be able to evaluate and critique each mode of delivery within a pedagogical framework, which is student-centred and context-specific.

Courses: ED09, ED13, ED61
Campus: Ext
Credit points: 12  Semester: 2

EDN630 Higher Education: Curriculum Design, Assessment and Evaluation
The unit aims to introduce students to key concepts and practices underpinning contemporary curriculum design, development, assessment and evaluation in rapidly changing global and local contexts.

Courses: ED09, ED13, ED61
Campus: Ext
Credit points: 12  Semester: 2

EDN631 Supervised Practicum 1
The aim is to provide students with a basic level of professional knowledge and skills in the practice of educational and development psychology and an awareness of ethical guidelines. Students will also develop a high standard of professional conduct through supervised practice.

Courses: IX20
Corequisites: SPN640, SPN641, PYN601
Campus: KG
Credit points: 12  Semester: 1

EDN632 Supervised Practicum 2
This unit aims to provide students with supervised experience in applying diagnostic, assessment and intervention skills in educational settings. This unit will also develop students' written and oral communication skills and provide them with practice in using these skills to communicate results of assessments and recommendations for interventions to school staff, parents and other stakeholders.

Courses: IX20
Prerequisites: EDN631
Corequisites: SPN642
Campus: KG
Credit points: 12  Semester: 2

EDN633 Supervised Practicum 3
This unit provides students with supervised experience in applying their diagnostic, assessment and intervention skills within non-educational settings. It will further develop their written and oral communication skills, and provide them with practice in using these skills to communicate results of assessments and intervention strategies within teams from non-educational settings.

Courses: IX20
Prerequisites: EDN631
Campus: KG
Credit points: 12  Semester: 1

EDN634 Supervised Practicum 4
This unit aims to provide students with support in ensuring that they have attained the level of knowledge and skill required to meet the competencies of the Psychologists Board of Queensland.

Courses: IX20
Prerequisites: EDN631, EDN632, EDN633
Campus: KG
Credit points: 12  Semester: 2

EDP415 Engaging Diverse Learners
Increasingly rich and complex opportunities are offered to today's learners to engage in personal, contextual and technological approaches to knowledge construction. To participate effectively in modern learning environments, and to be able, in the future, to support the learning of diverse learners, students completing this unit will develop an understanding of the processes of learning, and the influence of both individual differences and socio-cultural contexts in personal, social and professional development.

Courses: ED26, ED38
Campus: KG
Credit points: 12  Semester: 1, 2

EDP416 The Professional Practice of Educators
This Education Studies unit builds your professional and ethical capacity as an Early, Middle or Senior Phase Educator by developing a social science framework for understanding and analysing the professional practice of educators in local and global contexts. The unit will develop your knowledge of the social, cultural, and political 'strategies' shaping professional practice and education today. It will also develop your understanding of the 'identities' produced by these strategies and of the ways in which they might be ethically and equitably managed in all phases of learning.

Courses: ED26, ED38
Campus: KG
Credit points: 12  Semester: 2
UNIT SYNOPSIS

► EDP421 Early Years Field Studies 1: Engaging Diverse Learners
Designated Unit. Inclusive philosophies and pedagogies are fundamental for schools and educators who seek to provide rich educational experiences for all learners in the early years of schooling. Teachers must be able to identify and reduce barriers to learning and maximize educational outcomes in response to the needs and interests of all students. This unit provides students with the opportunity to investigate and develop their ability to identify a range of social, cultural and political issues which may create barriers to learning and engages students with various pedagogical responses that may provide inclusive educational experiences for students in the early years. (22 days Field Studies).

Courses: EDP421
Credit points: 12
Semester: 1, 2

► EDP422 Early Years Field Studies 2: The Professional Practice of Educators
Designated Unit. This unit prepares you for your work as a beginning teacher, on completion of this course. It provides you with the opportunity to identify and discuss professional issues for beginning teachers in the early years. It aims to develop strong links between research, theory and practice by emphasising inquiry- and evidence-based approaches to teaching and learning in early childhood settings and professional development for teachers. (33 days Field Studies).

Courses: EDP422
Prerequisites: EDP421
Campus: KG
Credit points: 12
Semester: 2

► EDP431 Middle Years Field Studies 1: Engaging Diverse Learners
Designated Unit. This unit integrates and applies the current perspectives, issues and theoretical frameworks of inclusion and diversity. It enhances the student’s ability to identify and address social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners. Students will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. To do this effectively students will need to identify barriers to student learning and develop strategies to maximize educational outcomes for all students. (22 days Field Studies).

Courses: EDP431
Credit points: 12
Semester: 1, 2

► EDP441 Senior Years Field Studies 1: Engaging Diverse Learners
Designated Unit. This field studies unit integrates and applies the current perspectives, issues and theoretical frameworks of inclusion and diversity. It enhances the student’s ability to identify and address social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners. Students will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. To do this effectively students will need to identify barriers to student learning and develop strategies to maximize educational outcomes for all students. (22 days Field Studies).

Courses: EDP441
Credit points: 12
Semester: 2

► EDP509 Practicum in Early Childhood 2
This unit includes the following: observations; design, implementation and evaluation of programs for children in the early childhood age range; communication with children, parents and colleagues; increased responsibility for control and management in the early childhood setting; catering for children in the early childhood age range. It includes 10 days of practice.

Courses: EDP509
Credit points: 12
Semester: 2

► EDR702-1 1-9 Thesis
This unit provides students with an opportunity to extend and synthesise knowledge from the coursework section. It allows the coursework to be applied as it may be used in future work situations and provides a means of extending the skills and understandings gained from formal units to investigate in-depth some aspects of the student\'s professional practice. The unit focuses on the extension of acquired knowledge to increase the understanding and competence of skilled professional educators and facilitates the application of innovative research but grows out of the professional coursework. All candidates will proceed through the three required thesis steps. Namely, Step A; Thesis Preparation; Step B, Thesis Confirmation of Candidature; and Step C; Thesis Imp

Courses: EDP702
Credit points: 24
Semester: 1, 2, 3

► EDR702-2 1-9 Thesis
This unit provides students with an opportunity to extend and synthesise knowledge from the coursework section. It allows the coursework to be applied as it may be used in future work situations and provides a means of extending the skills and understandings gained from formal units to investigate in-depth some aspects of the student\'s professional practice. The unit focuses on the extension of acquired knowledge to increase the understanding and competence of skilled professional educators and facilitates the application of innovative research but grows out of the professional coursework. ► EDR702-8 1-9 Thesis
This unit provides students with an opportunity to extend and synthesise knowledge from the coursework section. It allows the coursework to be applied as it may be used in future work situations and provides a means of extending the skills and understandings gained from formal units to investigate in-depth some aspects of the student’s professional practice. The unit focuses on the extension of acquired knowledge to increase the understanding and competence of skilled professional educators and facilitates the application of innovative research but grows out of the professional course-work. All candidates will proceed through the three required thesis steps.
Courses: ED11
Prerequisites: EDR703
Credit points: 24  Semester: 1, 2, 3
► EDR702-9 1-9 Thesis
This unit provides students with an opportunity to extend and synthesise knowledge from the coursework section. It allows the coursework to be applied as it may be used in future work situations and provides a means of extending the skills and understandings gained from formal units to investigate in-depth some aspects of the student’s professional practice. The unit focuses on the extension of acquired knowledge to increase the understanding and competence of skilled professional educators and facilitates the application of innovative research but grows out of the professional course-work. All candidates will proceed through the three required thesis steps.
Courses: ED11
Prerequisites: EDR703
Credit points: 24  Semester: 1, 2, 3
► EDR703 Interdisciplinary Education Studies (Advanced Seminars)
This unit is a reading and seminar program that aims to broaden and deepen the student’s initial perspective to include elements derived from theoretical perspectives drawn from a number of disciplines. The unit seeks to provide a context of learning for educators who seek the personal and professional benefits that the broadening and deepening of their professional knowledge affords.
Courses: ED11  Campus: KG
Credit points: 24  Semester: 1
► EDR2001 Human Development
The unit is designed to develop in the student a basic understanding of the nature and complexity of the growth and development from birth to adulthood with emphasis on primary/secondary school-age children.
Courses: ED47
Credit points: 12  Semester: 1
► EDR2002 Philosophy of Malaysian Education
This unit introduces students to the philosophy of Malaysian education including elements of Western and Islamic philosophical reasoning and its origins. Focus will be on the philosophy of Education and its purpose in achieving excellence in education.
Courses: ED47
Credit points: 12  Semester: 1
► EDR2003 Linguistics for the Language Teacher
Students are introduced to linguistics and its applications for language teachers, providing basic understandings about the nature and function of language, including phonology, morphology and syntax, as well as semantics. The student will be able to translate their understanding of language into effective classroom practice.
Courses: ED47
Credit points: 12  Semester: 1
► EDR2004 Malaysian Studies 1: Competency in the Malay Language
This unit will extend the student’s command and control over Bahasa Melayu, the national and official language of Malaysia. They will be able to operate efficiently and effectively in Malaysian schools where the medium of instruction is Bahasa Melayu. To further enrich their communication skills in Bahasa Melayu they will be exposed to literature and Malay culture.
Courses: ED47
Credit points: 12  Semester: 1
► EDR2005 Classroom Management and School Experience
This unit will develop skills necessary for the teaching of English in primary/secondary classrooms and is linked to the School Experience where each student is placed in a selected school to work with a cooperating teacher. It will introduce the students to the organization of learning within the classroom and specifically to the role and behaviour of the teacher in the Malaysian primary/secondary classroom and school.
Courses: ED47
Credit points: 12  Semester: 2
► EDR2006 Learning and the Learner
This unit introduces students to learning theory, research and practice and to the role teachers play in facilitating learning among children. Attention is paid to the development of thinking skills, and the development of creative problem solving skills.
Courses: ED47
Credit points: 12  Semester: 2
► EDR2007 Introduction to English as Foreign Language Methodology
Students are introduced to a range of approaches to second language teaching and the theories of language and learning which underpin them. They will explore the basic concepts related to current approaches to ELT in Malaysia and the social context of learning.
Courses: ED47
Credit points: 12  Semester: 2
► EDR2008 Malaysian Studies 2: Ethics and Civilisation
This unit focuses on the concepts and principles of Asian and Islamic Civilisations. It aims to develop a sense of respect and tolerance towards other civilisations and its peoples and explore the importance of ethical and moral reasoning in the development of moral character.
Courses: ED47
Credit points: 12  Semester: 2
► EDR2014 Learning Networks
This unit explores the concept of learning networks: interacting social and technical systems that lead to collective sense-making and knowledge construction. Topics include the nature and use of Information and Communication Technologies (ICTs), learning theories and technologies and socio-technical practices in learning networks.
Courses: ED49
Incompatible with: MDB385 / CLB341 / EDB006
Credit points: 12  Semester: 2
► EDR2015 Technical Drawing
This unit aims to engender an awareness of the fundamental principles associated with the use of technical drawing at the ideation and the production phase of the design process. In particular, attention will be given to exploring the associated technical drawing content and the associated pedagogical application of this within the classroom.
Courses: ED48
Credit points: 12  Semester: 2
► EDR2350 English For Teachers
This unit aims to continue the development of participants’ own language proficiency and intercultural competence and to further develop their understandings of the importance of effective and appropriate use of language in successful TESOL classrooms.
Courses: ED48
Incompatible with: EDB350
Credit points: 12  Semester: 2
► EDR2602 Advanced Seminars
This unit provides for the special needs and interests of students, and provides an opportunity for students to engage in an advanced seminar series. This allows students the possibility of studying in a group with academic staff to develop expertise in a specific area, working with visiting scholars with special expertise, involvement in special seminars and conferences occurring in Australia and overseas, or working in particular research projects that are running for a limited time.
Courses: ED08
Credit points: 12  Semester: 1
► EDR2603 Facilitated Study Unit
Credit points: 12
► EDR2604-1 Facilitated Study Unit
The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation.
Courses: ED08
Credit points: 12

QUT HANDBOOK 2006 • PAGE 624
UNIT SYNOPSES

► ED2604-2 Facilitated Study Unit

The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation.

Courses: ED08
Credit points: 12

► ED2610 The Learning Innovator

This unit aims to develop understanding of what it means to be an innovator and a leader in a contemporary professional context. The unit is underpinned by the notion that innovation means being more critical, being open, being able to engage with greater uncertainty and complexity, and being able to learn from the past in order to manage the future.

Courses: ED08
Credit points: 12

► ED2611 Understanding Educational Research

Credit points: 12

► ED2619 Professional Applications of Research

The unit focuses on the needs of professionals to seek research knowledge that addresses specific problems or issues in their practice and to develop a positive attitude towards research in general. It assists students to search databases and other sources to locate published research reports in their field and evaluate them critically.

Courses: ED08
Credit points: 12

► EE8112 Electrical and Computer Engineering 1

The unit comprises two modules: Electric Circuits and Introductory Computing. The first module covers fundamental quantities in circuits and network laws, response to sinusoidal sources, and circuit measurements. The second module covers fundamentals of problem solving using computers and programming and techniques for writing correct and efficient programs.

Courses: EE41, EE42, EE48, IF21, IF28, IF59
Contact hours: 5 per week
Campus: GP
Credit points: 12

► EE8212 Electrical and Computer Engineering 2

The unit comprises three modules: Network Theory, Engineering Computing, and the Laplace Transform. The first module covers network laws, ac power calculations, three-phase systems, series and parallel resonance, magnetic coupling and linear transformer, and using PSPICE to solve and analyze complex circuits. The second module covers an introduction to Software Engineering and Design. The basics of Laplace transforms are taught in the third module.

Courses: EE41, EE42, EE48, IF21, IF28, IF59
Prerequisites: EE8112
Contact hours: 5 per week
Campus: GP
Credit points: 12 Semester: 2

► EE8220 Electrical Engineering 2M

The unit covers basic network laws, response to sinusoidal sources, real and reactive power calculation, power factor improvement, electric and magnetic fields, three-phase system, transformer theory, dc and ac rotating machines and their applications, basic electronic circuits, filters, PLC and operational amplifier circuits and applications.

Courses: ME36, ME41, ME42, ME48, IF57
Prerequisites: EE8112
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 1

► EEB811 Electrical Measurement and Machines

This unit includes the following: electrical measurements and instrumentation; magnetic circuits; sensors, PLC’s, DSC, and industrial networks; single phase and three phase transformers; electric machines including electromechanical energy conversion, reluctance motors, induction motors, synchronous machines, D.C. machines, stepper motors, P.C. motors; motor control; heating, cooling and rating.

Courses: EE41
Prerequisites: EEB212 or EEB213
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 1

► EEB812 Analog and Digital Electronics

Analogue and digital electronics devices, circuits and systems are the foundation for all electronic systems. This foundation serves all electronics engineering disciplines and also provides a good hardware basis for computer engineering students. The aim of this unit is to provide awareness of the characteristics and operation of discrete semiconductor components, to introduce analogue circuit design and to provide a good grounding in the basics of digital design.

Courses: EE41, EE46, EE47
Prerequisites: EEB212 or EEB213
Contact hours: 6 per week
Campus: GP
Credit points: 12 Semester: 1

► EEB840 Introduction to Telecommunications

Telecommunications systems and the principles underlying their operations are introduced starting from mathematical preliminaries such as the Fourier series and the Fourier transform. Basic radio receivers and antennas, analogue modulation techniques, (AM, SSB, VSB and FM), systems and circuits for generation and demodulation and basic properties of noise and its effects on modulation systems are studied using time and frequency domain analyses.

Courses: EE41, EE46, EE47
Prerequisites: MAB132
Contact hours: 3 per week
Campus: GP
Credit points: 12 Semester: 1

► EEB8411 Classical Control and Power Systems

The unit is a core unit with the modules Control Systems and Power Systems. It instils the foundation of feedback control theory for engineers and introduces the student to basic classical feedback control theory, analysis and synthesis. The second module covers power generation, and energy sources, electricity market operation, fault calculations, basic protection, and power system operation, in particular real and reactive power control.

Courses: EE41, EE42

Prerequisites: EEB311, MAB132
Corequisites: EEB840
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

► EEB8412 Advanced Electronics and Embedded Systems

The two modules of this unit, Electronics B and Embedded Systems, provide a basis for electronic circuit design in general but also in connection with microprocessor systems. Operational amplifiers and comparators for use in signal conditioning and instrumentation amplifiers are presented as well as integrated circuits as building blocks for system design. Students are given a good grounding in the basic principles and practical use of embedded microprocessor/microcontroller systems.

Courses: EE41, EE46, EE47
Prerequisites: EEB312
Contact hours: 5 per week
Campus: GP
Credit points: 12 Semester: 2

► EEB8431 Aircraft Systems and Flight Control

This unit places emphasis on the flight control systems of modern aircraft which is one of the primary subsystems. As part of this, methods for modeling the dynamic behaviour of aircraft, missiles and spacecraft are introduced, along with the criteria for stability.

Courses: EE48
Prerequisites: EEB130, EEB212, MMB251
Contact hours: 6 per week
Campus: GP
Credit points: 12 Semester: 2

► EEB8440 Classical Signal Processing

The unit covers the area of Signals in Linear Systems for which a detailed study of Fourier theory applied to analog signals and to the analysis of linear systems is given. System analysis is presented in time as well as in frequency and various characteristics and relationships in the two domains are discussed. Students are introduced to the classical design of filters such as the Butterworth and Chebyshev type along with a brief exposure to their realization as analog circuits. The sampling theorem and Nyquist criteria are discussed in detail and an introduction to discrete-time signal processing using the z-transform is provided.

Courses: EE41, EE46, EE47
Prerequisites: EEB340, MAB134
Corequisites: MAB135
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

► EEB851 Modern Control and Power Electronics

The unit comprises the modules Control Systems B and Power Electronics. Control Systems B introduces students to discrete-time control by extending the conventional control into the discrete-time domain. As a second part of Control Systems B, the state model oriented approach for designing con-
control systems is introduced. The second module covers power rectification, controlled rectification, inverters, AC and DC drives, understanding power supplies, power switching components.

Courses: EEE41, EEE42
Prerequisites: EEB411
Contact hours: 4 per week  Credit points: 12 Semester: 1

EEB521 Digital Electronics and Digital Design

Modules Electronics C and Digital Systems Design provide a basic understanding of linear and switch applications in industrial electronics. Practical knowledge associated with interfacing and design is developed. Students will also study the theory and design of advanced embedded digital systems and practical implementation. The practical application of these circuits including interfacing and environment factors is considered.

Courses: EEE41, EEE46
Prerequisites: EEB412
Contact hours: 4 per week  Credit points: 12 Semester: 1

EEB535 Modern Flight Control Systems

The unit comprises the modules 'Control Systems B' and 'Digital Systems Design'. Control Systems B introduces to discrete-time control by extending the conventional control into the discrete-time domain. As a second part of Control Systems B, the state space approach for designing control systems is introduced. As second module, it provides the theory and design of advanced digital systems and practical implementation.

Courses: EEE40
Prerequisites: EEB411, EEB412
Contact hours: 4 per week  Credit points: 12 Semester: 1

EEB566 Real-Time Computer-Based Systems

This unit covers the area of embedded systems and real-time computing. It provides an in-depth review of the concepts and provides an overview of the use of discrete-time signal processing. Topics include system design, real-time operating systems, hardware and software design, and implementation. The unit also covers the use of digital signal processing for real-time systems.

Courses: EEE41, EEE46, EEE47
Prerequisites: EEB440
Contact hours: 4 per week  Credit points: 12 Semester: 1

EEB640 Digital Signal Processing

The course provides an introduction to the design and implementation of digital signal processing systems. It covers topics such as digital filters, spectral estimation, and non-linear signal processing. Students will also learn how to design and implement digital filters using computer programming languages.

Courses: EEE41, EEE46, EEE47
Prerequisites: EEB440, MAB135
Contact hours: 4 per week  Credit points: 12 Semester: 2

EEB641 Advanced Design

This unit introduces advanced design and implementation of digital signal processing systems. Students will learn how to design and implement complex digital systems using computer programming languages.

Courses: EEE41, EEE46
Prerequisites: EEB412, ITB421
Contact hours: 4 per week  Credit points: 12 Semester: 2

QUT HANDBOOK 2006  PAGE 626
part of the advanced design, this unit also covers a number of engineering skills including high-level thinking, project planning, information retrieval techniques, writing report and oral presentation skills. The student is required to write a detailed technical report and also to give an oral presentation on her/his design.

Courses: EE41, EE42, IF21, IF28, IF59, EE46, EE47
Prerequisites: EEB584
Contact hours: 1 per week Campus: GP
Credit points: 12 Semester: 2
► EEB685 Advanced Systems Design
This unit presents detailed design and realisation of typical electronic subsystems used in all areas of electrical and electronic systems engineering. The unit enhances the student’s ability in solving complex engineering problems. The design builds on the theoretical knowledge gained in other units. The student is required to write a detailed technical report and also give an oral presentation on her/his design.

Courses: EEB685
Prerequisites: EEB585
Contact hours: 1 per week Campus: GP
Credit points: 12 Semester: 2
► EEB686 Industry Practice
Industry Practice provides high achieving students with the opportunity to participate in a co-operative education environment created by a partnership between the student, industry and the University. The unit aims at developing knowledge of, and experience in, the practices and procedures in the workplace environment. Students will apply for paid employment with an industry partner registered for this program. The process will be open and competitive, and an interview will be conducted as for a typical job application process. The duration of the employment is expected to be from 4 to 6 months, with 24 to 40 required weekly hours and must overlap the teaching period of Semester 2.

Courses: EE41, EE42
Prerequisites: Completion of the first two years of the full-time course
Contact hours: 1 per week Campus: GP
Credit points: 24 Semester: 2
► EEB732 Space Technology
This unit offers a general introduction to space technology. It includes the following: coordination of systems and time references used within space flight dynamics; discussion of rocket ascent trajectories and satellite orbit dynamics; detailed description and discussion of satellite as a system and subsystems; description and discussion of rocket as a system; introduction to satellite launch systems and satellite applications.

Courses: EEB732
Prerequisites: EEB435 or EEB431
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1
► EEB760 Aerospace Radio and Radar Systems
Radio and radar systems provide the backbone and arteries of all aerospace and avionics systems. A knowledge of the effects of electromagnetic compatibility and interference and the standards which apply as well as a detailed knowledge of the theory and techniques of ground, air and space based radio and radar systems is essential for all avionics engineers. Radio and radar systems are an integral part of the safe and efficient operation of aircraft movements and must be considered as part of the system as a whole.

Courses: EEB760
Prerequisites: EEB560, EEB641
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1
► EEB766 Communication Technologies
The unit covers various communication and signal processing technologies that are used in point to point and multi-point; wired and wireless communications including microwave terrestrial and satellite communication; last mile solutions including ADSL, VDSL and wireless local loops; ad hoc radio transmission such as the Bluetooth and Home RF, Wireless LANs including wireless infrared transmission and IEEE8012.11 standard.

Courses: EEB766
Prerequisites: EEB560
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1
► EEB781 Professional Studies 2
This is to provide adequate skills for young professional engineers to start a small business or be a key player in a larger company. Persuasive management skills are developed including: assertion training; interpersonal relationships; organisational change; professional ethics and negotiation. As well the unit covers the basics of accounting practice, types of companies, marketing principles, business plans, intellectual property and statutory obligations on company managers.

Courses: EEB41, EE42, EE48, IF59, EE46, EE47
Prerequisites: BNB007
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1
► EEB782-1 Systems Project
In this unit an engineering project on a specified topic is completed; the work will require design, computing, construction, experimental work and practical testing with the submission of appropriate reports. The topic is selected from any area which involves electronics, computing, control, communication, signal processing, and power and may include programming, circuit and system design.

Courses: EE48 IX25
Contact hours: 1 per week Campus: GP
Credit points: 12 Semester: 1
► EEB782-2 Systems Project
In this unit an engineering project on a specified topic is completed; the work will require design, computing, construction, experimental work and practical testing with the submission of appropriate reports. The topic is selected from any area which involves electronics, computing, control, communication, signal processing, and power and may include programming, circuit and system design.

Courses: EE48 IX25
Prerequisites: First part of project Campus: GP
Credit points: 12 Semester: 2
► EEB831 Military Combat Electronics
This unit addresses the following: sound generation propagation and analysis in the military environment; principles and application of lasers to sighting and guidance systems; principles of detection of submarines using magnetometers; infra red propagation and its use in detection systems; guidance/ECM; sonar processing; laser processing and guidance; radar guidance/sighting; gun sights; weapons control systems. IFF/transponders; command and control; magnetic anomaly detection; tactical navigation systems; infra red. Some ethical, social and moral aspects concerning military systems will be discussed.

Courses: EEB831
Prerequisites: EEB435, EEB560, EEB640, EEB641
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2
► EEB833 Spacecraft Guidance and Navigation
This unit includes the following: general introduction to spacecraft guidance and navigation systems and concepts; coordination of systems and time references applied within spacecraft guidance and navigation; discussion of spacecraft orbit and attitude dynamics; detailed description and discussion of spacecraft orbit and attitude determination satellite as a system and subsystems; IFF/transponders; command and control; magnetic anomaly detection; tactical navigation systems; infra red. Some ethical, social and moral aspects concerning military systems will be discussed.

Courses: EEB833
Prerequisites: EEB732
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2
► EEB882 Industry Project
The CEED Industry Project may be completed in the first or second semester of the final year full time course. CEED is intended to introduce students to industry practices under the guidance of a qualified engineer/supervisor and prepare them with design, technical, teamwork and communication skills such as they are likely to encounter upon graduation. Because the project is industry based, the student will be required to complete a majority of their allocated project time performing practical engineering at the industry premises. Individually structured projects are offered to final year students on a competitive basis through a formal application and selection process.

Courses: EE41, EE42
Contact hours: 4 per week Campus: GP
Credit points: 36 Semester: 1
This unit is divided into two parts: EEB889-1 and EEB889-2. Students normally would complete part 1 in semester 1 and part 2 in semester 2 in their final year of study. An engineering project on a specified topic is completed; the work will require design, computing, construction, experimental work and practical testing with the submission of appropriate reports. The topic is selected from any area which involves electronics, computing, control, communication, signal processing, electrical power, or aerospace/avionics. The project may include programming, circuit and system design.

**Courses:** EE41, EE42, IF21, IF28, IF59, EE46, EE47

**Contact hours:** 1 per week

**Campus:** GP

**Credit points:** 12

**Semester:** 1, 2, 3

**EEB976 Advanced Industrial Electronics**

Two of the following modules will be offered each year: 1. Switching converters and speed drive control, power system compensation converters, UPSs, transformer switched mode power supplies, resonant power supplies. 2. Basic microprocessor systems, M68332 CPU, architecture, assembly language, MC6832 modules, system integration, queued serial communications, time processor unit, peripheral devices and interfacing, parallel/serial communications, ADC's, DAC's, waveform synthesizers. 3. RF systems, transmitters and receivers, super-heterodyne, antenna, filters, LNA, mixer, LO, IF amplifier, demodulator, duplexer, RF switches, impedance matching, high frequency effect on components, microstrip techniques, CAD RF design.

**Courses:** EE41, EE42, EE48, IF21, IF28, IF59

**Prerequisites:** EEB61, EEB67, EEB74, EEB77

**Contact hours:** 4 per week

**Campus:** GP

**Credit points:** 12

**Semester:** 2

**EEPB101 Algorithms for Control and Engineering**

This unit addresses the following: solution of equations using numerical analysis methods and computer algorithms; differential and difference equations; numerical approximations and computational flow diagrams; computer control of closed-loop systems; continuous and discrete systems; system hardware; sampled data systems design techniques; system simulation; state-space analysis and digital filtering; discrete time processing techniques; linear filters, digital control of neural networks and to fuzzy logic.

**Courses:** EE65, EE66, EE76

**Contact hours:** 3 per week

**Campus:** GP

**Credit points:** 12

**Semester:** 1

**EEPB102 Unix and C for Engineers**

This unit covers C programming and the Unix operating system. Unix commands, file structure, processes, shells and shell scripts are discussed. C programming is covered without assumed prior knowledge but at a level and pace suited for the postgraduate or advanced undergraduate student. Data types, operators and expressions, control flow, functions, pointers and arrays, strings, data structures, memory allocation, input and output and support for real-time applications are discussed. Self-study tutorials are used to reinforce fundamental concepts. An engineering application is chosen for the assignment that is conducted in a problem-based learning framework.

**Courses:** EE61, EE67, EE74, EE77

**Contact hours:** 3 per week

**Campus:** GP

**Credit points:** 12

**Semester:** 1

**EEPB103 Computer Hardware and Interfacing**

This unit includes the following: state-of-the-art digital devices; design and implementation of digital systems; microprocessors and microcontroller systems; systems and interfacing; computer architectures, subsystems and peripherals.

**Courses:** EE61, EE67, EE74, EE77

**Contact hours:** 3 per week

**Campus:** GP

**Credit points:** 12

**Semester:** 1

**EEPB104 Real-Time Operating Systems**

This unit covers operating systems principles with emphasis on real-time operating systems. Operating system fundamentals are introduced and concepts such as process management, input/output management, file
management, resource allocation and scheduling, and protection are discussed in detail with a Unix-like operating system such as Minix or Linux as the example. Students enhance their C programming skills in assignments on multitasking, interrupt-driven input-output and device driver modification. Current commercial real-time operating systems such as QNX are reviewed.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► EEP120 Networks and Distributed Computing

This unit includes the following: the open system interconnection model and the more common standards which support the model; layers 3-7 covered in depth, layers one and two covered by reference; computers, software packages; network topologies, software techniques, data transfer protocols; examples of local and wide area networks; hardware implementation of OSI layers and protocols; modern high performance networking protocols such as FDDI and ATM, treated as extensions of the OSI model.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► EEP123 Process Control and Robotics

This unit includes the following: introduction to robotics; introduction to CNC machine tools; process control; controller tuning, plant characterisation and process optimisation; computer simulation and algorithms.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► EEP124 Data Communications

This unit will provide an in-depth knowledge of the following: data transmission channels; the various types of modems, their use and specifications; the different aspects of interfacing for data communications; coding; compression and encryption of data; network modelling and specialised topics.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► EEP126 Communications Digital Signal Processing

This unit includes the following: source and channel coding; waveform coding and adaptation; filtering in communication; applications of speech technology in communication; applications of DSP technology; real time DSP devices and their applications in communication.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► EEP127 Advanced Topic B

An advanced topic in the field of computers and communication engineering.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► EEP129 Image Processing and Computer Vision

The aim of this unit is to provide theoretical and practical understanding of the fundamentals of image processing and computer vision with exposure to important algorithms and applications. It covers image acquisition, image representation and modelling, image enhancement, image restoration, edge detection, image segmentation, morphological techniques, shape description, classification and fundamentals of projective geometry and stereo vision.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► EEP135 Digital Signal Processing and Applications

This unit includes the following: general properties of stationary processes; basic spectral properties of the processes; practical aspects of digital spectral estimation; identification of linear systems; digital higher-order spectral estimation; identification of non-linear systems; an update in the advances in digital signal processing.

Courses: EE61, EE67, EE74, EE77
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► EEP201 Fundamentals of Power System Earthing

This unit includes the following: electrode resistance, potential gradient areas of common types of electrodes; multiple electrodes; stratified grounds electric shock; calculation of step and touch potentials; introduction to substation earthing; ground potential rise; connection of services; grid and mesh potentials; measurement of soil resistivity and electrode resistance; earthing of transmission lines; tower foot resistance; current division between ground and aerial earth wires; division of earth currents at substations; earth current distribution on faulted lines; distribution systems; MEN; SWER; safety during faults; flow of lightning currents to ground.

Courses: EE60, EE78, EE82
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

► EEP202 Thermal Ratings and Heat Transfer

This unit includes the following: thermal conduction in simple geometries; forced and natural convection from plates and cylinders; common heat transfer correlations; radiation from hot surfaces; view factors; calculation of steady-state and time-varying temperatures in conductors; temperature measurement methods for high voltage equipment; thermal ratings of overhead lines; steady-state, cyclic and short-time ratings; cable rating; temperature rise due to step current, cyclic and emergency loads; temperature rise of power transformers; cooling methods; emergency overloads.

Courses: EE60, EE78, EE82
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

► EEP203 Testing and Condition Monitoring

This unit includes the following: HV testing; DC, 50 Hz, and impulse-equipment; measurement systems; standard test methods; certification and traceability; evaluation of test reports; HV test methods for insulators, bushings, circuit breakers, isolators and surge arresters; temperature rise testing of electrical equipment, lines cables, and switchgear; current withstand testing; current interruption tests for fuses and circuit breakers; evaluation of test reports; accuracy and traceability; insulation testing; oil testing; DLA and PD tests; condition monitoring systems; plant temperature; circuit breaker dynamics; insulation condition; in situ methods.

Courses: EE60, EE78, EE82
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4
UNIT SYNOPSES

EEP208 Overhead Line Route Selection - Environmental Factors
This unit includes an overview of legislation, standards and guides; radio interference, electromagnetic fields, low frequency induction, touch potentials, structure earthing, electrolytic corrosion, clearances, land legislation, and environmental impact statements. Current safety and environmental issues are addressed. Requirements of other public utilities, for example telcos, railways, roadworks, marine, water, gas and oil are also considered with cost of environmental enhancements and alternative technologies, right-of-way, and route selection principles; structure types, terrain shielding, identification of natural and man-made features.

Courses: EE60, EE78, EE82
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

EEP209 Economic Analysis for Power System Engineers
This unit considers the principles of economic analysis for a tax paying entity. Various evaluation techniques are addressed including both discounted and non-discounted techniques. The net present value approach is settled on as being the most appropriate approach. Issues such as the effect of interest and inflation on nominal cash flows are addressed. Cost benefit analysis for engineering decision making: econometric models for ESI, maintenance, refurbishment and replacement are included as well as budgeting and cost control, budget preparation with spreadsheets, cash flows, monitoring expenditure and budget review, profit and loss and balance sheets and risk analysis including WACC calculations.

Courses: EE60, EE78, EE82
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

EEP209 Power System Harmonics
This unit includes the following: generation of harmonics, converters, arc furnaces, SVC, inverters, electronic control; system responses; characteristics; resonances; conditions, effect of load, typical system responses; effects of harmonics, motors, generators, power cables, capacitors, electronic equipment, metering, relaying, telephone interference; reactive power compensation and harmonic control, converter power factor, reactive power compensation, control of harmonic currents; measurement of harmonics, recommended practices including AS2279.

Courses: EE60, EE78, EE82
Prerequisites: EEP205
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

EEP210 Abnormal System Voltages
This unit considers the following: supply quality standards, review of criteria, statutory requirements, emergency and short term limits; 50 Hz voltage, cause of voltage deviations, voltages during faults, motor starting, motor-inertia, monitoring voltage qualities, AS1359 requirements, voltage unbalance studies, modelling, measurement, voltage transients and flicker: AS2279 requirements, disturbing loads, remedial measures, transient disturbances and power system plant; power system transient analysis, ATP studies.

Courses: EE60, EE78, EE82
Prerequisites: EEP205
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

EEP211 Basic Power System Protection
This unit includes the following: protection systems, reliability and security; methods of grading relays; ‘unit’ and ‘non-unit’ protection; causes of faults occurring on power systems and the relays for detection; examination of local back-up protection; effects of substation configurations on protection system design and performance; current and voltage transformers; protection of HV buses; transformer protection; inverse time relays; settling overcurrent and earth fault relays to achieve a coordinated scheme; reclosers, sectionalisers and fuses application and coordination; commissioning and maintenance of protection systems; performance of protection under fault conditions; insulation coordination for the analysis of protection performance.

Courses: EE60, EE78, EE82
Prerequisites: EEP205
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

EEP212 Advanced Power System Protection
This unit includes the following: high impedance protection of power system plant including CT requirements and use of shunt and series resistors, non-linear resistors, check schemes; single phase and multi phase CT supervision; protection of transformers, bi-ased and high impedance differential schemes; feeder differential protection: pilot wire, current differential and phase comparison schemes; protection of HV capacitor banks; application of single phase pole auto-reclosing schemes to transmission systems; protection of large motors; protection of large generators.

Courses: EE60, EE78, EE82
Prerequisites: EEP211
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

EEP213 Statistics
This unit includes the following: the role of statistics in electricity supply engineering; strategies for collecting and recording valid data from which statistical inferences can be made; use of operational and inventory data; graphical and numerical techniques to summarise data using statistical or spreadsheet packages; review of probability concepts, random variables, probability distribution; specific distributions used in system and component reliability studies.

Courses: EE60, EE78, EE82
Prerequisites: EEP211
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

EEP214 Risk Assessment in the Electricity Supply Industry
This unit includes the following: identification of hazards, failure modes and effects analysis, failure modes effects and criticality analysis; outcomes from possible failure modes; hazard and operability studies; assessment of frequency, fault tree analysis, event tree analysis; assessment of consequence analysis, criticality assessment in terms of chance of failure and consequences, incident scenario, damage criteria, damage identification; legal and economic consequences; case studies in incident identification of hazards; assessment of risks, and consequences in ESI; loss of load models in generation.

Courses: EE60, EE78, EE82
Prerequisites: EEP215
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

EEP215 Reliability
This unit includes the following: basic reliability concepts, methods, and analysis methods; application of important distributions; failure rate/repair time/mean time failure; reliability of series/parallel/complex systems; discrete Markov Chains and processes, frequency and duration in reliability, the reliability evaluation of repairable systems; application of reliability evaluation in power distribution systems, including cost estimates; reliability assessment; in subtransmission system planning, including non-constant transition rate; study of contingencies with switching to restore supply; maintenance in system modelling; probability and frequency of loss of load; unsupplied energy and average load at risk; maximum load at risk; average outage duration.

Courses: EE60, EE78, EE82
Prerequisites: EEP213
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

EEP216 Overhead Line Design - Electrical
This unit includes the following: electrical design of transmission lines with ratings of 33kV to 500kV; economic conductor size; characteristics of conductors; standard and new technology insulators, power frequency, impulse and switching flashover voltage, pollution and creepage, wet and dry flashover, mechanical characteristics; feasible structure types; tower footing resistance and counterpoise; insulation coordination methodology; determination of overvoltage withstand, design for required outage; determination of RI using state of the art methods; design to ensure that electrostatic and electromagnetic fields do not exceed NH and MRC guidelines.

Courses: EE60, EE78, EE82
Prerequisites: EEP201, EEP203, EEP205, EEP210
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

EEP217 Secure Overhead Line Design - Mechanical
This unit includes the following: conductor selection; catenary theory; sag-tension calculations; requirement survey data; statutory and enterprise requirements for line layout, clearances, mechanical loading, safety criteria; definition of loading conditions, structure capacities, layout clearances; applied mechanics of strung conductors; determination of everyday tensions from allowable stress or tension/mass ratio; determination of vibration protection;
transmission line estimating techniques; selection of structure type based on optimum capitalised costs; line layout.
Courses: EE60, EE78, EE82
Prerequisites: EEP208, EEP216
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: 4
► EEP218 Introduction to Automated System Control and Supervisory Systems
This unit includes the following: SCADA fundamentals and protocols; SCADA equipment, master station, remote terminal units; transmission SCADA systems, distribution automation systems, distribution control systems, PC software applications; alarm philosophy and control principles, definition of system displays, data logging, database point processing and attributes, master station configuration; specification of MMI, identification of system functional requirements; computer system platforms, computer technology, computer hardware; communication system principles, communications bearer, data networks and protocols; data communications and I/O capacities and type; cooling processing; application of SCADA systems to transmission and distribution systems.
Courses: EE60, EE78, EE82
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP219 High Voltage Substation Equipment: Power Transformers and Reactive Power Plant
This unit includes the following: principles of transformer design; distribution transformers to EHV transformers; ratings/windings/core systems; winding and materials isolation; winding cooling methods/insulation/lifetime; leakage and magnetising reactance; losses/harmonics/inrush currents; short circuit forces; tests to measure ratio/losses/impedance/phasing/temperature rise/capacity/traceability of tests/interpretation of test reports; surge phenomena in windings, RSG and impulse testing of power transformers, interpretation of test results; oil cooling systems; fire protection; tap changers and controls; analysis of transformer failure modes; in-phase and quad-boost regulators; series and shunt reactors; reactors for harmonic filters; SVCs; design considerations.
Courses: EE60, EE78, EE82
Prerequisites: EEP203
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP220 Distribution Planning
In this unit students are required to complete the following: identify data and techniques used in load forecasting; examine typical distribution network problems and identify performance limitations based on standards; relate network problems to different configurations and the effects on customers; study network improvement options on a situation package including regulators, series and shunt capacitors and reconductoring; consider the above options to address a realistic network problem assessing line losses and voltage results; analyse network reliability and assess the impact of ties, switches and various network configurations; compare alternatives based on economic and technical considerations; prepare a logical case which recommends one option.
Courses: EE60, EE78, EE82
Prerequisites: EEP208, EEP211, EEP219
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP221 Limits to Power System Stability
This unit includes the following: time domain models and characteristics of synchronous machines; induction generator models; excitation system models, turbine governor models, boiler models, hydraulic system models; characteristics of load plant; evaluation of small signal adequacy by eigenvalue analysis; determination of modes of electromagnetic and control systems; identification of modes with insufficient damping, eigenvalue participating states and eigenvectors; time domain dynamic simulations of power system operation; numerical models for prediction of large disturbance behaviour of interconnected power systems; stability of system under contingency and emergency conditions; stability improvement techniques.
Courses: EEP219, EEP220
Prerequisites: EEP214, EEP215
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP222 Maintenance of Electric Supply Systems
This unit includes the following: establishment of maintenance policies; review of failure rates; emergency spares; identify maintenance liabilities and critical success factors; dissemination of policy; maintenance planning; identify constraints; review of existing maintenance programs; establishment of plans for periodic actions; documentation of procedures; data recording and analysis; registers of defects; design of data collection and reporting; preparation of control charts; computer systems; database development; maintenance operations; resource evaluations; work procedures; acts and regulations; staff training; auditing; maintenance program evaluation; assessment against KPI; program modification.
Courses: EE60, EE78, EE82
Prerequisites: EEP214, EEP215
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP223 Load Forecasting
This unit includes the following: nature of load patterns; historical patterns; links between customers and loads and between energy and demand demographics; categories of DSM; costs of DSM options; benefits and limitations to DSM; tariffs and their impact; impact of economic trends on demand growth; load manipulation; load forecast methods: data collection and availability; weather correction; interpreting data; synthesising missing data; developing load forecast data; developing alternative scenario load forecasts; establishment of base loads from; historical load data; customer load predictions and other contributing factors; prediction of growth rates; generation of load forecasts.
Courses: EE60, EE78, EE82
Prerequisites: EEP213
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP224 Power System Operation
This unit includes the following: frequency control and AGC under normal load conditions; operation under emergency and contingency conditions; black starting; load shedding philosophy; generation operation; contract fuel prices; variations; automatic generation control systems; analysis of power station operating costs; establishment of optimum operating costs; management of forced outages; management of resources to restore system to normal in minimum time; abnormality control to prevent plant damage and maintain safety; logging and reporting of forced outages; coordination of planned outages including assessment of risks and contingency planning; control of reactive power and voltage levels under normal and abnormal conditions; load reduction.
Courses: EE60, EE78, EE82
Prerequisites: EEP202, EEP212, EEP214, EEP221, EEP223
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: GP
► EEP230 Thesis A
In this unit, students work in industry for 100 days of supervised practice. As part of this practical training, one or more linked topics are identified that are related to the work of the section in which the training is carried out. A Masters thesis is prepared describing results of studies done by the student during the practical training. It is expected that the thesis will demonstrate that students have a deep background knowledge of the topic, can apply advanced skills to formulation and solution of engineering problems, and have an understanding of the relationship of the work to the overall objectives of the work group. The thesis will be examined by internal and external examiners appointed by the University.
Courses: EE78
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: 12
► EEP231 Thesis B
Work done in this unit and the related unit EEP230 is examined by submission of a single Masters thesis.
Courses: EE78
Contact hours: 15 hours short course/distance education
Campus: GP Credit points: 12
► EEP240 Organisation and Financial Management in the Electricity Supply Industry
This unit includes the following: financial reporting, including profit and loss; interpretation of financial data and commercial practices with respect to various line items in financial reports; key performance indicators, the derivation, interpretation and pitfalls; financing arrangements; taxation issues that affect the industry including income tax, repairs, tax effect of depreciation and capital gains tax; various asset management issues including inventory and fixed assets; cost volume profit
Course: EEP241 Distance Protection

This unit includes the following: current transformers; transient performance; saturation factors; effects on relay performance; voltage transformers; transient performance; distance protection; relay selection, characteristic - relay comparator operation; non-switched distance protection schemes; switched distance protection, effects of multiple constraints; design of protection schemes and setting relays for complex feeder systems with arc resistance, prevention of inadvertent tripping, prevention of load degradation of distance relay performance; developing grading plans to ensure coordination; understanding relay functions - switching fault logic, VT supervision, memory, power swing blocking and healthy phase polarisation; protection signal.

Courses: E600, E78, E82
Prerequisites: EEP211
Contact hours: 15 hours short course/distance education
Campus: GP, Ext
Credit points: 4

Course: EEP242 Efficient Marketing and Utilisation of Electricity: Demand and Supply Side Solutions

This unit includes the following: assessment of future DSM options; state, national and international programs; local opportunities; impact of new and evolving technology.
Comparison of options; determination of avoidable costs; assessment of marginal cost; supply and identification and avoidable costs; survey of customers: conducting market research; application of existing tariffs or new tariffs; planning market potential for DSM: comparison of options to meet current needs or an increased need; requirements; economic comparison of DSM and DSM options including combined options; design and implementation of DSM programs: targets, resources, in-house or contract; monitoring program performance; assessment of DSM.

Courses: E600, E78, E82
Prerequisites: EEP208, EEP233
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

Course: EEP243 Contract Administration

This unit includes the following: categories of contracts: supply, maintenance, period; general conditions of contract: terms of payment and security deposit; QA procedures; retention conditions; special conditions: delivery and penalties for delay; technical provisions; penalty/bonus for such factors as efficiency/performance/maintenance/reliability; pre-tender negotiation practice; evaluation of tenders: tender adjustments; determination of the lowest price; tender acceptance; contract completion; tenders: drawings, standards, amendment; contract law, dispute resolving procedures; contract monitoring: approval of drawings and documents; approval of delivery; erection; site testing; acceptance; take-over; maintenance period retention provisions.

Courses: E600, E78, E82
Prerequisites: EEP208

Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

Course: EEP244 Circuit Breakers - Switchgear

This unit includes the following: SF6, Vacuum, GIS, minimum air, airbreak, bulk oil circuit breakers; circuit-breaking principles; calculation of switching surges; TRV and ITRV, current inrush; interruption of load current, and small inductive current; capacitive switching; short-line-faults and out-of-phase switching; selection of circuit breakers; Australian and international standards; selection of circuit breakers; analysis of tender breaches and failure modes; catastrophic failures; condition monitoring techniques; maintenance and refurbishment; circuit breaker testing and test report evaluation; new circuit breaker technologies.

Courses: E600, E78, E82
Prerequisites: EEP210
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

Course: EEP245 Introduction to Substation Design

This unit includes the following: preparation of design/site options; standard layouts (indoors, outdoor, GIS, package, single bus, 1.5 CB, etc) - cost, site, reliability lead time and communication factors; estimating procedures; comparison of design/site options; whole-of-life cost comparison including capital and operating costs; environmental and public issues; identification of design parameters; voltages, ratings, protection, metering, SCADA, communication, operational - preparation of one-line diagram and general arrangement design scope; review with other parties.

Courses: E600, E78, E82
Prerequisites: EEP202, EEP219, EEP244
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

Course: EEP246 Customer Metering

This unit includes the following: tariff structures network and retail; metered parameters kW, kWh, var, VAR, VAh, power factor, demand and their interrelationships; electronic metering multifunction, measurement methods, standards and limitations; HV metering, export/import metering, limitations, Blondel's theorem, safety aspects; current and voltage transformers - theory of operation and accuracy limitations; metering in the deregulated market; single and polyphase electromechanical metering - theory of operation and techniques used to measure reactive power; electronic registers, summation registers and other techniques for customers' multiple points of supply; communication methods in remote meter reading; standards and regulatory bodies.

Courses: E600, E78, E82
Prerequisites: EEP202
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

Course: EEP248 Introduction to Electricity Markets

This unit addresses the following: problems associated with monopoly utilities and the central planning model; economic models of markets including perfect competition, monopoly and oligopoly; deregulation of the electricity supply industry; applied competition on electricity generation: the spot market; theory of derivative instruments; applied management: the electricity derivatives market; electricity market simulation; potential failures in the deregulation environment.

Courses: E600, E78, E82
Contact hours: 15 hours short course/distance education
Campus: GP
Credit points: 4

Course: EEP301 Project Component

Students carry out research or development work on a project in specified areas. This can be done over two semesters.

Courses: E600, E78
Semester: 1, 2

Course: EEP302 Project Component

Students carry out research or development work on a project in specified areas. This can be done over two semesters.

Courses: E600, E78
Semester: 1, 2

Course: EFB101 Data Analysis for Business

The unit introduces the common statistical methods and tools for inference and decision making in business. It builds upon the concepts developed in the unit BSB122 Quantitative Analysis and Finance and covers important methods of data analysis with an emphasis on interpreting and understanding reported business and economic data. Topics include the concept of sampling error and sampling distributions, estimation and hypothesis testing, regression analysis, time series and an introduction to non-parametric statistical methods.

Courses: B56, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Prerequisites: BSB122

Course: MBA101, MBA237, MAB347

Course: MBA101, MBA237, MAB347

Contact hours: 4 per week
Semester: 1, 2, 3

Course: EFB102 Economics 2

Consumer behaviour, the role of the government in market intervention, allocative efficiency and market structure are some of the fundamental issues in microeconomics addressed in this unit. Business cycles and the related issue of macroeconomic stabilisation policy are analysed and explained within the Australian context. The significance of the international economy is described through a discussion of foreign ex-
change markets, the Australian dollar and the terms of trade.

Courses: BS56, ED50, IF28, IF30, IF37, IF47, IF48, IF60, IF61, IF62, IX03
Prerequisites: BSB113
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1, 2, 3
► EFB200 Applied Regression Analysis

This unit expands on the basic multiple regression model introduced in EFB101, by examining the practical problems encountered in using the single equation econometric model. In particular, the major problems encountered using real data, such as multicolinearity, serial correlation in time series data and heteroskedasticity in the case of cross-sectional data, specification error, and alternative functional form issues will be illustrated in the context of published Australian data. The unit includes extensive use of a commonly used computer package to allow the practical application of the various techniques.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62
Prerequisites: EFB101 or MAB101
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1
► EFB201 Financial Markets

This unit introduces students to the institutional structure of global financial markets, and thereby complements the understanding of theoretical finance gained in either BSB122 or EFB210. Topics covered include the functions of financial markets, the banking and payments system, financial system deregulation, non-bank financial institutions, stock exchange operations, debt markets, financial derivatives, and the functions of financial markets and markets for financial derivatives.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB122 completed from Sem 2 2004, or EFB210
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1, 2
► EFB202 Business Cycles and Economic Growth

This unit develops an analytical framework in order to evaluate the macroeconomic performance of the Australian economy and the policy actions taken by government. Key issues addressed include business cycle stabilisation, unemployment, inflation, economic growth, the balance of payments, the Commonwealth budget and national saving.

Courses: BS56, ED50, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Prerequisites: EFB102
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1
► EFB210 Finance 1

This unit covers the following topics: an introduction to the financial institutional framework; an introduction to debt and equity instruments; financial mathematics applied to the pricing of debt and equity securities; a firm's investment decision including Net Present Value (NPV) and Internal Rate of Return (IRR); introduction to risk and uncertainty using the Capital Asset Pricing Model (CAPM) and Weighted Average Cost of Capital (WACC) concept and risk management.

Courses: BS56, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Prerequisites: BSB110 and BSB113, OR BSB122 completed from Sem 2 2004
Incompatible with: EFB206, CTV290
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1, 2
► EFB211 Firms, Markets and Resources

This unit is concerned with the economic analysis of the decisions of consumers, firms, and governments in modern economies. It develops student understanding of that body of economics that is expressly concerned with the operations of, and inter-relationships between, the individual units of the economy. The unit is designed, not only to foster both clear thinking about the interplay between government, private firms, and consumers, but also to develop the student's ability to apply micro-economic concepts to economic problems that the student has not previously encountered.

Courses: BS56, ED50, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IX03
Prerequisites: EFB102
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1
► EFB307 Finance 2

This unit includes the following topics: the financing decision - capital structure, debt versus equity, lease versus debt, term structure versus default structure of interest rates; the dividend decision - dividends versus capital gains, franched versus unfranked income; firm valuation; free cash flow model; evaluation of takeovers; Risk and Return - diversification, the CAPM model, its practical application and to efficient market hypothesis; introduction to forwards, futures, options, warrants, convertibles and risk management using financial derivatives.

Courses: BS56, IF28, IF30, IF37, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: EFB210
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1, 2
► EFB308 Finance 3

This unit includes the following topics: a study of contemporary finance research; CAPM; beta estimation; valuation theory; market efficiency; value at risk; use of finance research tools; anomalies and extension of finance theories. Students are required to complete a research project combining theory and practice. This unit covers many topical areas in contemporary finance research. These include, but are not limited to: asset pricing; beta estimation; market efficiency; value at risk; mutual fund performance; volatility modelling; and the term structure of interest rates. Students are required to complete a research project combining theory and practice.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: EFB307
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 2
► EFB309 Financial Derivatives

This unit extends students' knowledge of financial derivatives as obtained in Finance 1. Topics include: advanced option pricing models; advanced option trading strategies; exotic options; forward and futures pricing models; hedging commodities and equities by using futures; forward rate agreement and interest rate swaps; financial risk management issues.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62
Prerequisites: EFB307
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 2
► EFB310 Financial Institutions - Control

This unit introduces students to the fundamental principles of controlling the risk profile and capital position of a deposit-taking financial institution to maintain solvency. The basic framework of the unit is based on the regulatory, capital adequacy norms, the implementation by consideration of the more sophisticated internal models of risk developed by financial institutions themselves. Relevant case studies demonstrate the imperative for, and application of, the risk management framework.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62
Prerequisites: EFB206 or EFB210
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 2
► EFB311 Financial Institutions - Lending

This unit examines the fundamental motivations for lending by financial institutions, and the ways in which these are reflected in loan market practice. Specific topics cover the theoretical basis of lending as financial intermediation, the purpose and utilisation of loans by borrowers, the major costs of lending for financial intermediaries (including a strong focus on credit costs), lenders' comparative advantage and the structuring of loan agreements. These include, but are not limited to: asset pricing; beta estimation; market efficiency; value at risk; mutual fund performance; volatility modelling; and the term structure of interest rates. Students are required to complete a research project combining theory and practice. This unit covers many topical areas in loan agreements. These include, but are not limited to: asset pricing; beta estimation; market efficiency; value at risk; mutual fund performance; volatility modelling; and the term structure of interest rates. Students are required to complete a research project combining theory and practice.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62
Prerequisites: EFB210
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1
► EFB312 International Finance

This unit examines the theory and practice of international finance, including the mechanical and uses of the spot, forward, swap, and futures markets and options markets in foreign exchange; the relationship between domestic and international capital markets; interest rate and exchange rate determination; risk management of foreign exchange; international trade finance; evaluation of offshore investment.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62
Prerequisites: EFB206 or EFB210 Incompatible with: EFB122, IBB202
Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 2
► EFB314 International Trade and Economic Competitiveness

The unit analyses the increasing globalisation of world trade and investment, and develops an analytical framework to assess the impact of these flows on the Australian economy, its businesses, people and policy makers. It examines the patterns of trade and capital flow.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IX03
UNIT SYNOPSES

Prerequisites: EFB211 & EFB202

Incompatible with: EFB212

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

EFB318 Portfolio and Security Analysis

This unit addresses the following topics: management of investment portfolios; diversification; performance management; risk management; advanced asset pricing models; equity valuation strategies and fixed interest risk analysis.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF62

Prerequisites: EFB307

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

EFB323 Financial and Monetary Economics

This unit emphasises the economics of financial markets and their interaction with the real sector of the economy. Major attention is devoted to the flow of funds, the theory and behavior of interest rates, the structure and regulation of financial markets, the role of the central bank and the operation of monetary policy. The unit builds on the microeconomic and macroeconomic foundations laid in EFB202 and EFB211.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IX03

Prerequisites: EFB202

Incompatible with: EFB215

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

EFB354 Macroeconomics and Global Financial Markets

The unit provides an in-depth understanding of the interplay between macroeconomic policies and global financial markets. Macroeconomic frameworks adopted in this unit are practically oriented and much of the material with which they deal is drawn from relevant events of recent decades. The unit discusses various analytical tools and policy approaches to the macroeconomy as they affect both developed and developing countries. Particular emphasis is given to how a good knowledge of macroeconomics helps in understanding international financial market developments and also, to some extent, how fluctuations in such markets can have serious implications for macroeconomic conditions and economic policy.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62

Prerequisites: EFB202

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

EFB325 Financial Microeconomics

This unit addresses the theoretical microeconomic foundations of financial economics, focussing on how individuals and firms deal with uncertainty and situations involving strategic interactions. The theoretical concepts are illustrated with application from both the private and public sector. Contents include game theory and its economic applications, expected utility theory, risk analysis, intertemporal preferences, cost of capital, demand for capital, and asymmetric information.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62

Prerequisites: EFB211

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

EFB326 Applied Portfolio Management

This unit introduces the student to the treasurer environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate. Students must make decisions concerning source of funds, term and duration, interest rate risk and risk management, with derivatives. Trading will be conducted over a simulated four quarter year.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62

Prerequisites: EFB210

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

EFB327 Econometrics of Financial Markets

This unit provides a comprehensive introduction to models of economic behaviour in financial markets, using the tools of discrete time-series analysis. This unit aims to give grounding in the necessary econometric methods before demonstrating how competing theoretical models may be tested. It provides illustrative empirical results from the stock, bond and foreign exchange markets.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60

Prerequisites: EFB200

Contact hours: 3 per week  Campus: GP

EFB328 Public Economics and Finance

This unit applies microeconomic principles to a range of public finance issues. In particular, the role of government expenditure and finance in the areas of education, health and the environment is examined, with an emphasis on the critical analysis of economic arguments and against government intervention. The topics in this unit are unified by a concern with the sources of market failure and their impacts on efficiency; the role, if any, of government in their presence; and the economic and financial instruments available to governments to improve the efficiency of resource allocation.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF60

Prerequisites: EFB211

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

EFB329 Contemporary Applications of Economics Theory

This capstone unit reinforces and extends the economic theory introduced to students in the major, and applies it to a number of topical issues that lend themselves to critical analysis using economic principles. Both macroeconomic and microeconomic theories are used with the emphasis placed on usefulness of the theory in development of a framework which assists with decision-making and informs critiques of public policy. Some of the perspectives taken in studying these topics will include: their impacts on efficiency and on specific economic agents and institutions; the role, if any, of government in their resolution; and the economic instruments available to analysts by which to frame their detailed consideration.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62, IX03

Incompatible with: EFB323

EFN401 Advanced Financial Institutions Management

This unit covers a selection of major topics facing financial institutions. Important mathematical techniques will be used to understand the management of international financial institutions. The theory and regulation of financial institution management are placed in the context of major events in the international financial markets. Case studies include the Asian financial crisis, Japanese banking system 1990-2003, Enron, LDC sovereign debt crisis, Savings & Loan crisis and the Basel Capital Accord.

Courses: BS39, BS40, BS48, BS75, BS76, BS85, BS97

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

EFN405 Managerial Economics

This unit addresses the following topics: managerial decision making in an economic environment; an introduction to economics, demand analysis, cost analysis, market and macroeconomic environment; issues including problems of resource allocation at the firm, in industry and in the economy.

Courses: BS39, BS93

Incompatible with: GSN203, GSN411, GSN414, GSN491, GSN492

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

EFN406 Managerial Finance

This unit is an introduction to the world of finance and financial management. Topics include: the finance function, the role of the financial manager; the Australian financial environment; sources of funds; present and future value; time value of money; financial mathematics; introduction to valuation; cost of funds; the firm investment decision; investment evaluation techniques; capital budgeting; portfolio theory; risk and return; capital asset pricing model; dividend policy; financial structure policy; futures; options.

Courses: BS39, BS93

Incompatible with: GSN413, GSN423

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

EFN408 Special Topic—Economics, Banking and Finance A

This unit provides the opportunity to study in detail, at a postgraduate level, specific current issues relating to economics, banking or finance. The nature of the unit varies from year to year depending upon contemporary issues and the interests of staff.

Courses: BS39, BS93

Contact hours: 3 per week  Campus: GP
Credit points: 12

EFN410 Economic and Financial Modelling

This unit introduces students to the modelling techniques which are frequently used in a business and financial environment. Modelling is used as an aid to decision-making, as a means of forecasting important variables such as the planning and analysis tool. Various modelling exercises are used to illustrate the use of these modelling techniques in an economic and financial context.

- **EFN411 Special Topic—Economics, Banking and Finance B**
  This unit provides the opportunity to study in detail, at a postgraduate level, specific current issues relating to economics, banking or finance. The nature of the unit varies from year to year depending upon contemporary issues and the interests of staff.
  - **Courses:** BS93
  - **Contact hours:** 3 per week
  - **Credit points:** 12

- **EFN412 Advanced Managerial Finance**
  This unit expands on material introduced and developed in EFN406 Managerial Finance. Its objective is to examine the key decisions made by corporate financial managers (that is, the investment, financing, and dividend decisions). Topics include: the financing decision, capital structure, debt versus equity, lease versus debt, term structure versus default structure of interest rates; the dividend decision, dividends versus capital gains tax, franked versus unfranked income; firm valuation, free cash flow model; evaluation of takeovers; Risk and Return diversification, the CAPM model, its practical application and its relationship to efficient market hypothesis; and decision making under uncertainty.
  - **Courses:** BS39, BS93, GS40, GS48, GS75, GS76, GS85, GS97
  - **Prerequisites:** EFN406
  - **Contact hours:** 2 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1, 2

- **EFN413 Securities Law**
  This unit provides an introduction to the aspects of business law, particularly as the legal framework impacts upon those working in the securities industry. The unit looks at the system of law operating in Australia, provides a study of the law of contract and tort law, particularly negligent mis-statement. Corporations and aspects of consumer protection law are provided as insight of the laws that impact on marketplace participants, including securities dealers and advisors. The law of business associations, takeovers and market offences are examined.
  - **Courses:** BS39, BS93
  - **Incompatible with:** GSN412
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 2

- **EFN414 International Finance**
  This unit introduces the theory and practice of international finance, the relationship between domestic and international financial markets, international parity conditions and arbitrage, forward exchange risk management, country and political risk management, international trade finance, international portfolio investment, multinational capital and capital structure, international capital budgeting and foreign direct investment.
  - **Courses:** BS39, BS93, GS40, GS48, GS75, GS76, GS85, GS97
  - **Prerequisites:** EFN406
  - **Incompatible with:** EFN417
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 2

- **EFN415 Security Analysis**
  This unit deals with security analysis and portfolio management. The unit is both practical and theoretical. Topics covered include: portfolio theory and the capital asset pricing model; bond and equity portfolio management; fundamental valuation techniques; portfolio hedging; active vs. passive investment strategies; and the evaluation of portfolio performance. The ultimate purpose of this unit is to provide the necessary tools for students to manage investment risk and return, select mispriced securities, design and administer investment portfolios, and accomplish goals in portfolio management, and measure the performance of investment management.
  - **Courses:** BS39, BS93, GS40, GS48, GS75, GS76, GS85, GS97
  - **Prerequisites:** EFN406
  - **Incompatible with:** EFN408
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1, 2

- **EFN416 Treasury and Portfolio Management**
  This unit introduces the student to the treasury environment, in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate and decisions must be made concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading is conducted over a simulated four quarter year.
  - **Courses:** GS40, GS48, GS75, GS76, GS85, GS97
  - **Prerequisites:** EFN406
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1

- **EFN417 An Introduction to International Finance**
  This unit provides an introduction to international financial issues involved in managing the multinational corporation’s (MNC) financial environment. Material covered includes: the theories that are necessary for the sound understanding of MNC’s financial environment; the foreign exchange and other international financial markets; the key techniques for the management of international financial risk; the exchange rate risk, country risk and interest rate risk, and the sourcing and investment of the MNC’s funds both in the short-term and the long-term.
  - **Courses:** BS93, GS40, GS41, GS48, GS85, GS86
  - **Incompatible with:** EFN414
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 2

- **EFN418 Introduction to Financial Risk Management**
  This is a risk management unit at the intermediate level, which provides students with the ability to identify, assess, and subsequently reduce common financial risks of business within an open economy. The role of the financial risk manager is central to this understanding, particularly in relation to how the manager makes decisions in relation to financial risks, which of those risks need to be controlled, the extent of mitigation, and the techniques used to neutralise them.
  - **Courses:** BS93
  - **Prerequisites:** PUN008 or BSB113 or equivalent
  - **Incompatible with:** EFN406 or GSN413
  - **Campus:** Ext
  - **Credit points:** 12 | **Semester:** 2

- **EFN419 Data Analysis**
  The unit introduces the common statistical methods and tools for inference and decision making in business. It covers important methods of data analysis with an emphasis on interpreting and understanding reported business and economic data. Topics include the concept of sampling error and sampling distributions, estimation and hypothesis testing, regression analysis, time series and an introduction to non-parametric statistical methods.
  - **Courses:** BS93, BS33
  - **Incompatible with:** EFB101
  - **Contact hours:** 4 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1, 2, 3

- **EFN420 Introduction To Financial Management**
  This unit introduces students to the latest theoretical developments in the field of macroeconomics using both qualitative and quantitative approaches. It places these theories in their historical, philosophical and societal contexts. This unit looks at New Classical, New Keynesian and other theoretical approaches to a range of issues. These include: theories of expectation formation, supply side economics, labour markets, monetary theory, real business cycle theory and growth theory.
  - **Courses:** GS40, GS41, GS48, GS85, GS86
  - **Prerequisites:** P/G enrolment; with an U/G degree in Economics or Finance.
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1

- **EFN500 Contempory Macroeconomic Theory**
  This unit introduces students to the latest theoretical developments in the field of macroeconomics using both qualitative and quantitative approaches. It places these theories in their historical, philosophical and societal contexts. This unit looks at New Classical, New Keynesian and other theoretical approaches to a range of issues. These include: theories of expectation formation, supply side economics, labour markets, monetary theory, real business cycle theory and growth theory.
  - **Courses:** GS40, GS41, GS48, GS85, GS86
  - **Prerequisites:** P/G enrolment; with an U/G degree in Economics or Finance.
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1

- **EFN501 Corporate and Commercial Lending**
  This unit addresses the theory and practice of corporate and structured senior bank lending, at the level of the individual loan transaction. Major topics covered include loan pricing and structuring, euro-market practice and documentation, credit risk analysis, relationship lending, syndicated and project finance.
  - **Courses:** BS39, BS93, GS40, GS48, GS75, GS76, GS85, GS97
  - **Contact hours:** 3 per week | **Campus:** GP |
  - **Credit points:** 12 | **Semester:** 1

- **EFN502 Developments in Microeconomic Theory**
  This unit involves the discussion and analysis of contemporary developments in microeconomic theory, such as game theory and its applications, consumer behaviour, problems of collective action, evolutionary eco-
UNIT SYNOPSES

Economics

This unit builds on BSN506 Econometric methods and provides a second course in applied econometrics using EViews. While BSN506 is essentially a single equation based course this unit focuses on non-linear estimation and systems of equations.

Courses: BSN63, BSN92
Prerequisites: BSN506
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

EBN101 Engineering Mechanics 1
Introduction to statics, forces, moments and couples; resolution and resultant of forces acting on a particle or rigid body; equilibrium of particle or rigid body under forces and/or moments; analytical methods for plane truss analysis; shear force and bending moment in beams; the properties of sections. Dynamics (for electrical engineering students).

Courses: EBN40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1, 2

EBN102 Engineering Mechanics 2
Free body diagram, stresses in beams and bars, moments, shear and deflections in beams and frames, torsion in shafts, stress transformation and buckling. Module 2: (Mech): thin walled structures, combined loading of structures and machine members; yield criteria for safe elastic loading.

Courses: EBN40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2, 3

EBN103 Electrical Engineering
Fundamental quantities in circuits and network laws, response to sinusoidal sources, and circuit measurements, real and reactive power calculation, power factor improvement, electric and magnetic fields, three-phase system and applications, transformer theory.

Courses: EBN40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2, 3

EBN104 Engineering Materials
Atomic bonding; crystal structure; elastic deformation; plastic deformation; defects; alloying and strengthening in metals; diffusion; fracture, fatigue and creep; phase and phase diagrams; iron-carbon phase diagram; transformation of phases; introduction to corrosion; ceramics, polymers and composite materials, electronic materials.

Courses: EBN40
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2, 3

EBN140 Introduction to Avionics
The unit introduces students to avionics in a non-technical way. It focuses primarily on aviation navigation and provides a basic understanding of avionics. A complete flight system is studied at an introductory level.

Courses: EBN40
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

EBN141 Engineering Problem Solving
This unit introduces students to the use of computers as tools for solving engineering problems. MATLAB is introduced as a numerical computing environment with the capacity to support complex mathematics and to be programmed to solve specific engineering problems. Stand alone application development using C++ is introduced as a means of exposing students to the high and low level computer programming concepts that are necessary to the implementation of engineering solutions in hardware specific programming environments.

Courses: EBN40
Contact hours: 4 per week Campus: GP
Credit points: 12

GSN233 Special Topic in Philanthropy and Nonprofit Studies
This unit is developed around the visiting adjunct professors or visiting scholars to the Centre of Philanthropy and Nonprofit Studies. It provides students with access to contemporary issues and experts in the field and involves in-depth examination of an issue of importance.

Courses: EBN40
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1

GSN234 Contemporary Issues in Entrepreneurship
The unit introduces the students to the field of entrepreneurship research and the problems, theories and methods that are prevalent in (empirical) research on entrepreneur students. Students learn to "know the field" including its historical development; its "infrastructure" of journals, conferences and search centres, and its contemporary research questions and approaches. The students will develop an ability to assess the strengths and weaknesses of the field and gain insights into where and how they can contribute to its research frontier.

Courses: EBN92, EBN93, GS97, GS67, GS48
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1

GSN401 Managing in the Global Business Environment
Competence in managing is the key to success for any organisation and for any person within that organisation. The knowledge and ability to manage within the global business environment are crucial requirements for today’s and tomorrow’s managers. This unit introduces the planning, leading, organising and controlling functions of management to elucidate current trends in management practice in the global environment.

Courses: ESN40, ESN42, ESN44, ESN48, ESN50, ESN57, ESN58, ESN59, ESN97
Semester: 1, 2

GSN403 Understanding Data
This unit is designed to provide students with a clear understanding of different types of data and techniques to present and analyse real world problems relevant to business and managers. Students are introduced to various techniques of organizing, presenting and analysing economic and business data. Topics include probability theory, descriptive and inferential statistics.

Courses: ESN40, ESN42, ESN44, ESN48, ESN50, ESN57, ESN58, ESN59, ESN97
Semester: 1, 2
UNIT SYNOPSIS

Incompatible with: EFN409
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN404 Financial Statements

Analysis 1
This unit introduces students to basic accounting concepts and financial statements, and then explores methods of analysing them to give an informed understanding of the financial well being of the entity. Throughout, it takes the perspective of the user of financial statements, and in this role, explores the information in financial statements and how the three basic accounting statements are linked, and interdependent.

The course guides students through the process of analysing financial statements, how to interpret findings and how to understand what the analysis and other contextual data tell them about the business.

Courses: GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97, IPD
Incompatible with: GSN202
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN405 Strategic Management

Strategy is the process of determining goals and moving towards the achievement of those goals in a business, government, or not-for-profit setting. This unit introduces the concept of strategy and explores the basic tenets of the strategy process, competitive advantage, and strategic management in a changing global environment. It lays the foundations for students in terms of understanding contemporary thinking in the strategy field. The learning process is enhanced by practical real-time examples of strategy in action utilising the case study method of learning.

Courses: GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN401
Corequisites: GSN401
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN406 Human Resource Management Issues

This unit examines the challenges faced by managers in achieving effective human resource management in the contemporary business environment. An issues-based approach is adopted to focus attention on the need for the individual managers to complement their technical expertise with knowledge and skills in people management. Specific attention is given to the human resource management implications arising from the global business environment and the changing nature of organisations.

Courses: GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN401, GSN409
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN407 Business Communication

Business Communication is an introductory unit that promotes effective written and spoken communication skills in a range of situations encountered by managers. Students will better understand the principles of effective written and spoken communication by exploring communication theory and undertaking several practical exercises and tasks.

Courses: GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: CON404
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN408 Fundamentals of Marketing Management

This unit provides students with the opportunity to critically examine and evaluate the role of marketing and its contribution to the strategic thrusts of the modern firm operating in an increasingly competitive national and international environment. Key marketing decision areas are examined, including the marketing concept, the marketing mix, marketing information systems and marketing research, market segmentation, targeting and positioning, and the process of marketing planning, implementation and control.

Students have the opportunity to consider the evolution of marketing philosophy, determinants of consumer and organisational behaviour and the influences of environmental forces on marketing decision-making within the firm.

Courses: BS39, BS93, GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: GSN206
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN409 Organisational Behaviour 1

Organisational Behaviour 1 is an introductory unit which analyses human behaviour at work with a focus on issues of personality, motivation, group interaction, occupational stress, and health and organisational change. The unit examines issues related to aspects of the working environment and to the relationship between managerial strategies, organisational structures and their effects on performance, health and autonomy.

Courses: BS47, BS91, GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Corequisites: GSN401
Incompatible with: MGN412
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN410 Entrepreneurship

This unit introduces the student to the field of entrepreneurship and the management of innovation. Entrepreneurial behaviour can take place within existing organisations (as intrapreneurship) or by starting a new business venture that is created to exploit a new technology or to introduce a new product, service, or business process. Topics include entrepreneurial attitudes, abilities and behaviours and culture; opportunity recognition and the development of new venture ideas; viability screening for initial and sustainable new ventures; and the process of starting and shaping a business.

Courses: GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: MGN412
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN411 Business Plans 1

This unit offers students the opportunity to write a formal business plan for a new business venture or offshoot of an existing venture. As business planning is an intensive viability screening exercise in which the business plans must consider all strategic alternatives, students are required to choose a preferred ‘business model’ and analyse whether or not the business appears to be viable. The business plan is a document that communicates this viability to an investor or other potential stakeholders in the new business and the structure and content of the business plan is crafted according to its intended role in a multi-stage communication process with the target reader.

Courses: GS40, GS42, GS44, GS48, GS50, GS75, GS76, GS85, GS97
UNIT SYNOPSES

Prerequisites: 96cp, including GSN404, GSN408, GSN410, GSN413, GSN415
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN417 Effective Advocacy for Managers
This unit builds on work completed in GSN407. It is designed to enhance students' presentation skills. It covers the practical application of key theories of speech communication to create managers who are effective persuaders, opinion leaders, and facilitators of change in a business environment. The issues covered include: structuring and designing for an audience; developing a persuasive theme; using imagery and language effectively; developing presentations.
Courses: GSN407
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN418 Marketing Strategy Development
This unit builds on the foundation provided by GSN408 and examines the managerial process involved in identifying and developing strategic marketing strategies. It examines the role of marketing within the strategic processes of the modern firm and considers the process involved in strategic marketing in the global business context. It takes a case-based approach to illustrating the effective management of strategies to marketing strategy development and highlights the importance of new and emerging fields of marketing practice.
Courses: GSN408
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN419 Organisational Behaviour 2
This unit builds on work completed in Organisational Behaviour 1. It provides an extensive analysis of human behaviour with particular emphasis on behaviour in groups and the larger organisation. Topics include: organisational structure and design; teamwork and group work; organisational culture; power and politics; communication; conflict and negotiation; innovation and organisational development.
Courses: GSN419
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN420 New Venture Strategy
This unit considers and the requirements for resource-based sustainable competitive advantage in the context of new business ventures and the need to be strategically competitive. Topics include new venture strategic constraints; entry strategies; opportunalty selection, connection between new venture strategy and marketing, disruptive strategy, strategy creation using applied Morphological Box, Value Innovation and TERMS methodologies. Students complete a Strategic Plan for a new venture as part of this unit.
Courses: GSN420
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN421 Business Law 2
Business Law 2 provides a continuing overview of key areas of commercial law in the Australian environment. The subject builds on the basic principles of contract, property law, sales of goods, self-employment, consumer law, agency and franchising, company law principles, covered in Business Law 1. Students focus on the essential elements of legal compliance programs and specific elements of the rules that impact on business operations in the areas of insurance law, law of torts and professional negligence, personal and corporate insolvency, environmental law, employment law, occupational health and safety and privacy law.
Courses: GSN421
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN422 International Study Tour
This unit involves a group excursion to one or more international countries for students interested in learning more about doing business with that country. Students study the business environment and the underlying socio-political, geographical and historical aspects of that country in considerable detail. The international study tour will normally be scheduled during the semester break period, and involve 10-14 days overseas, accompanied by an academic advisor. The group attends organised briefings, meeting, presentations and site visits in the host countries. Assessment includes attendance and participation at all events and submission of a detailed daily journal.
Courses: GSN422
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN425 New Venture Funding
This unit builds on the material covered in GSN413 Financial Management 1. It extends the analysis of firms' decisions in the areas of investment, dividends and financing. Topics include capital budgeting and taxation, dividends and imputation, capital structures, credit risk management using options and futures, and an introduction to international finance.
Courses: GSN425
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN426 New Venture Marketing
New Venture Marketing is concerned with the special marketing needs of entrepreneurial businesses. In new ventures, market ignorance is often greater than in existing firms. Needs of potential customers must be analysed, product design and prototypes must be developed in line with marketing research results, new marketing channels must be created and access to existing channels must be secured. Potential customers must be identified, informed, and persuaded to try the new product. Pricing is also a problem area.
Courses: GSN426
Contact hours: 3 per week
Campus: GP  Credit points: 6

► GSN427 New Venture Funding
This unit is concerned with raising funds to establish, launch and grow a new business venture. Sources of funding considered include one's own resources, family and friends, 'social capital' transactions, business angels, venture capitalists, banks, and the public equity market. Methods of bootstrap-
The pivotal concept of management is that the organisation is a dynamic system affected by both external and internal forces. Operations management narrows the focus of general management philosophies to consider the production/operations subsystems. These sub-systems physically produce goods and services, which are the value-adding transformation of inputs. Forecasting, process selection and design, layout and capacity planning, location planning and aggregate planning are considered. Issues of quality and efficiency are introduced analytically with respect to strategies and constraints.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN401
Contact hours: 3 per week
Campus: GP
Credit points: 6

► GSN440 Project Management 1

Managers are increasingly placed in a position of project manager, to manage projects as diverse as the construction of new facilities, expansion to global markets, implementation of change, information technology systems installation, or planning the major conference. This unit provides the fundamental skills in both the operational and strategic aspects of project management. Academic requirements are met through a minimum of fortnightly contact with the lecturer by each student, through reading of the text and associated publications, and through the preparation and submission of a written project proposal.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN401
Contact hours: 3 per week
Campus: GP
Credit points: 6

► GSN443 Project Management 2

Managers are increasingly placed in the position of project manager, to manage projects as diverse as the construction of new facilities, expansion to global markets, implementation of change, information technology systems installation, or planning a major conference. This unit builds on the fundamental skills in both the operational and strategic aspects of project management, which are covered in GSN442. In distance mode, academic requirements are met through fortnightly contact with the lecturer by each student, through reference to the text and associated publications, and through the preparation and presentation of a written project proposal.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, KK48, KK49
Prerequisites: GSN401
Contact hours: 3 per week
Campus: GP
Credit points: 6

► GSN444 Special Topic 1

This unit is offered to temporarily ‘house’ subject matter that is not routinely offered by the Graduate School of Business, but which is offered when specific subject matter is considered especially timely and/or in a semester when a visiting or adjunct professor is available with expertise that is not normally resident in the Faculty of Business.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Contact hours: 3 per week
Campus: GP
Credit points: 6

► GSN444 Special Topic 2

This unit is offered to temporarily ‘house’ matter that is not routinely offered by the Graduate School of Business, but which is offered when specific subject matter is considered especially timely and/or subject in a semester when a visiting or adjunct professor is available with expertise that is not normally resident in the Faculty of Business.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Contact hours: 3 per week
Campus: GP
Credit points: 6

► GSN446 Applied Research Project 1

The applied research project unit is an opportunity for accomplished students who are far into their studies to further deepen their knowledge in a particular area and apply it to a practical problem. The emphasis is on using academic tools - theories, methods and previous research findings - and linking them to practice. Under the guidance of a staff member who has agreed to supervise the project, and after approval by the Unit Coordinator, the student works in a self-motivated and self-driven mode, but which requires the preparation of a concise but content-rich final report of approximately 3000 words, which forms the basis for assessment.

Courses: GS40, GS48, GS50, GS75, GS76, GS85, GS87
Prerequisites: 48 Credit points, Unit Coordinator approval. GPA>5.5

Campus: GP
Credit points: 6

► GSN447 Strategic Internet Marketing 1

Strategic Internet Marketing 1 introduces students to the key concepts and issues involved in using the Internet in marketing. The unit explains how, why and when to incorporate the Internet into marketing activities. Specific areas investigated include the role of new technologies in changing and complementing traditional marketing practices. Internet based market research and consumer behaviour.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN408
Contact hours: 3 per week
Campus: GP
Credit points: 6

► GSN452 International Human Resource Management

This unit provides students with an understanding of some of the key factors affecting the management of human resources in an international environment. The integrating theme to studying this area of HRM is the management of expatriate managers. The topic is considered from the perspective of the international management generally, through the recruitment and selection of
UNIT SYNOPSIS

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS97
Prerequisites: GSN406
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN455 Special Topic 3

This unit is offered to temporarily ‘house’ subject matter that is not routinely offered by the Graduate School of Business. This unit is offered to students who have already taken GSN444 and GSN445 and who wish to take an additional ‘Special Topic’ unit in the same award program.

Courses: GS40, GS41, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN456 Personal Development and Ethics for Managers

This unit provides students with an opportunity to increase their understanding of themselves and how their interactions with others impact on their effectiveness as managers in a global environment. This unit also provides a framework of basic principles for ethical decision making. The roles of the individual and ethics in business decision making are explored through the use of international case studies. Students get the opportunity to evaluate, critically, the role of individual behaviour and ethical decision making, from not only a personal career perspective but as determining factors of management and business effectiveness in an international context.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: GSN208
Credit points: 6
Contact hours: 3 per week
Campus: GP

GSN457 Organisational Communication and Influence

This unit focuses on how people relate with each other in modern organisational settings, from small businesses to multi-national organisations in the public and private sector. Drawing together theories of communication as they apply to workplace settings, this unit provides the opportunity to analyse and reflect on the role of communication in constructing the conditions for achieving effective leadership and participation in organisations.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN407
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN460 Creative Problem Solving

This unit introduces the student to the field of creative thinking for new business initiatives in the global business environment. The problem solving methods presented also have application for ‘intrapreneurs’ in established firms. Topics include organisational issues for managing creativity; methods of thinking; formal analysis approaches; individual creative techniques; and group based problem solving. Candidates will apply specific techniques to case studies during the semester. Video records of tutorials will be used to facilitate feedback for improved learning outcomes.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN461 Making Change Work

This unit builds on the material covered in both GSN401 and GSN409 with the intention of making organisational change work optimally for organisations and the people in them. As such, it relies on a general knowledge of management and its objectives and functions, as well as of individual and group behaviour.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN401, GSN409
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN462 Negotiation Strategies

This unit explores the theory and practice of business negotiation strategies. By focusing on distributive and integrative negotiation strategies and exploring business negotiation practices within selected contexts, the unit provides students with the opportunity to develop understanding and skills of negotiation in general and business negotiation under selected contexts in particular.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN407
Incompatible with: IBN409
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN474 Strategy Planning & Development

The understanding of strategic planning, development and implementation and the implications for the modern organisation underpin this unit. Based on the case study method of teaching, the unit discusses the strategy development process in the modern business context, and takes into account the various stakeholders and influences that determine the eventual success or failure of strategy initiatives.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN405
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN475 Corporate Governance

This unit explores the theory and practice of corporate governance. The unit provides the opportunity for developing an understanding of corporate governance, as practiced by the Boards of Directors of companies. This subject provides an overview of the main concepts and history of corporate governance as a global trend, the core legal principles that underpin corporate governance including: relationships between key stakeholders; corporate governance in different organisational contexts including small proprietary companies and large listed and unlisted entities and current issues; and includes arguments propounded for self regulation versus government intervention.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN412
Incompatible with: GSN229, GSN481
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN476 Sales Management

This unit introduces the student to the field of sales management in the business environment whether local, national or international. The unit provides the opportunity for developing an understanding of sales processes and the associated management concepts and processes that support business strategy initiatives. The unit also focuses on the management of sales and the widespread impact of the costs of these failures have resulted in greater regulation and ethical outcomes, and the people involved in the selling. Students examine various sales models and their applicability to different industries and critique several commission, reward and recognition plans and their effectiveness.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN405, GSN406, GSN408
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN477 Contract Management

This unit provides managers with an understanding of some of the key factors involved in the management of contracts. Competence in this area is increasingly important as greater attention is paid to the negotiation and implementation of contracts, and as the trend to outsourcing various functions to other organisations continues.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN405
Corequisites: GSN442
Contact hours: 3 per week
Campus: GP
Credit points: 6

GSN478 Australian Workplace Connections

This unit provides students with the opportunity to site visit three Australian organisa-
tions in different sectors, across large and SME organisations, meeting senior staff, observing operations and gaining first-hand access to contemporary organisational problems and dilemmas. The unit has a multi-disciplinary problem-based learning approach. The unit takes ‘real world’ problems or dilemmas as the curriculum, and the teacher activates disciplinary knowledge and skills to respond to the issues encountered. The unit provides a concrete basis for comparison with prior workplace experience and thereby enriches the international learning experience.

Courses: GS40, GS48, GS50, GS75, GS76, GS85, GS97
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN479 Spreadsheet Modelling for Managers
This unit provides students with the analytical modelling skills to enhance abilities in making business decisions under uncertainty. Students are introduced to a range of techniques that involve structuring, analysing and solving managerial business decisions problems using Excel spreadsheets and add-ins. Topics include optimisation modelling, simulations models, decision analysis and forecasting.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS97
Prerequisites: GSN403, GSN413
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN480 Business Sustainability and Competitive Advantage
This unit develops the business case for sustainability. Students will develop an understanding of sustainable development and triple bottom line thinking and practice within business strategy. The course explores the processes of sustainable value creation and organisational change for business sustainability. Students will learn how to evaluate critically the likely competitive effects on an organisation of a business model founded on sustainable development and corporate sustainability strategy.

Courses: GS40, GS42, GS48, GS50, GS75, GS85, GS97, IF05
Prerequisites: GSN411 or GSN414 or GSN491
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN481 Philanthropic and Non-profit Frameworks of Governance
The unit explores contemporary understandings of philanthropic and nonprofit governance in the context of social, economic and political systems. It locates these understandings in various theoretical and descriptive frameworks and teaches students to become competent in the knowledge and analytical skills that are necessary to reflect critically on philanthropy and nonprofit governance systems and their environments.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: GSN472, GSN297
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN482Philanthropic and Non-profit Economics
The unit examines the role that economic theory can play in aiding decision-making in nonprofit organisations. It introduces students to the principles of microeconomics and explores their practical application to a range of decisions that confront nonprofits. Production theory, cost theory, elasticity and market failure are some of the topics explored in the nonprofit context.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: GSN229
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN483 Ethics for Philanthropic and Nonprofit Organisations
This course introduces students to ethical theories and constructs with a focus on producing effective personal and professional resolutions to those ethical dilemmas specifically associated with Philanthropic and Nonprofit (PNFP) organisations. The unit recognises the distinctive mission and character of PNFP organisations, their managers and governing bodies.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: CON427, AMN480, GSN230
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN484 Management for Philanthropic and Nonprofit Organisations
In the context of managing for excellence with integrity, this unit introduces students to the major management sub-disciplines of human resource management and industrial relations, governance, financial management, and marketing which may confront Philanthropic and Nonprofit (PNFP) organisations, their managers and governing bodies.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: CON427, AMN480, GSN230
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN485 Legal Issues for Philanthropic and Nonprofit Organisations
The unit introduces students to critical issues of philanthropic and nonprofit law and taxation. The unit examines the regulatory, taxation and governance framework of nonprofit organisations and philanthropic transactions in Australian Federal and State jurisdictions.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: GSN251
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN486 Accounting Issues for Philanthropic & Nonprofit Organisations
This unit introduces students to an overview of financial reporting. The unit begins with an overview of the purpose of accounting and the types of financial statements that comprise a financial report. The unit also focuses on the Australian financial reporting framework and whether an Australian accounting standard for nonprofit organisations is required. International comparisons are made.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Incompatible with: GSN231
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN487 Marketing for the Nonprofit Sector
The theory and application of strategic marketing in the nonprofit sector is studied in this unit. The unit reviews key topics such as: competitive positioning; marketing mix formulation; issues and characteristics that differentiate nonprofit marketing and allegiances to multiple markets. Within the not-for-profit marketing mix, topics examined by students encompass the social cause as service/product, service delivery options (offline and online) and integrated marketing communication including database marketing and relationship management.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN408
Incompatible with: AMN482
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN488 Fundraising Development Principles
This unit considers the broad factors that influence fundraising/development success. It applies theories of marketing, public relations and management to fundraising and development and builds an understanding of the philanthropic environment. It re-examines the principles of fundraising/development, institutional readiness, case statement preparation, leadership, constituencies and research to build understanding of the context in which good development practice occurs.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97, IF04
Incompatible with: GSN232, MIN409, AMN481
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN489 Fundraising Development Techniques
This unit builds on GSN488 to delve into particular techniques of resource mobilisation in nonprofit organisations. It considers a range of income generation vehicles and techniques including capital and major gifts, special events, bequests, direct mail, telemarketing, e-fundraising, gift clubs and the art of building donor relationships. It also examines professional evaluation of fundraising programs.

Courses: BS39, BS93, GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, IF04
Prerequisites: GSN488
Incompatible with: GSN232, MIN409, AMN481
Contact hours: 3 per week
Campus: GP Credit points: 6
► GSN490 Managing Technological Innovation
The role of technological innovation is crucial for the effective performance of modern enterprises. This unit explores the concepts of innovation and provides a managerial understanding of the major types of contemporary information technologies. These are used to explore the way technological innovation integrates and supports a broad range of business functions and processes and can be used strategically to provide advantage to an enterprise.
Courses: GS40, GS44, GS48, GS50, GS75, GS76, GS85, GS97
Incompatible with: GSN402
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  GSN491 Economics in Business 1
This unit is designed to show how economics provides a framework of analysis, and a powerful set of tools that can be used by managers to understand the market conditions affecting business performance. It examines the forces that influence production and pricing decisions in individual markets and how market forces interact to determine the level of macroeconomic activity. The course provides a self-contained treatment of the major themes in micro and macro economics. It also provides a solid foundation for further study of the subject.

Courses: BS47, BS91, GSN405, GSN410, GSN411, GSN414
Incompatible with: GSN491, GSN414
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  GSN492 Economics in Business 2
This unit builds on the analysis developed in GSN491. It provides a basic understanding of some of the key micro and macroeconomic factors that influence business performance. On the micro side, the unit examines the nature of the firm as an organisation, business objectives and constraints, strategic pricing decisions, the influence of market structure on pricing, and the rationale for government policy intervention in market. The macro analysis examines the forces that determine the growth of the national economy, and the relationship between growth, inflation and unemployment. It also examines how monetary and fiscal policy influence the business environment and how exchange rates are determined.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN491
Incompatible with: EFN405, GSN411, GSN414
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  GSN493 Customer Relationship Management
This unit introduces the student to the field of customer relationship management in the business environment whether local, national or international. The unit provides the opportunity for developing an understanding of customer relationship management (CRM) as a core business strategy with the associated technology dependencies and customer marketing concepts. Students will examine various business components of CRM, the CRM value chain technology tools, implementation processes and from case studies understand their applicability to different businesses and industries.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN405, GSN408
Corequisites: GSN415
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  GSN494 Innovating for Business Competitiveness
Innovation is increasingly being recognised as a key driver of business competitiveness. Fundamentally there are two types of innovation - process or product. Product innovation is concerned with developing new products or services to meet market needs. Process innovation is focused on developing better or cheaper ways of delivering product and services. This course is concerned with the link between innovation and the achievement of organisational goals. As such, it could alternatively be titled Strategic Management of Innovation. In fact, the unit adopts the familiar analysis, formulation, implementation and control model of strategy, but focuses on the strategic role of innovation.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Prerequisites: GSN405, GSN410
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  GSN495 Special Topic 4
This unit is offered to temporarily 'house' subject matter that is not routinely offered by the Graduate School of Business. This unit is offered to students who have already taken GSN444; GSN445 or GSN455 and who wish to take an additional 'Special Topic' unit in the same award program.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  GSN496 Public Relations and Crisis Management
This unit has been designed to introduce managers to the role of public relations in managing stakeholder relationships and to specifically address this role during times of crisis. Crisis management is growing in importance as organisations face increased scrutiny at a local and global level. The ability to identify issues, negotiate with stakeholders where possible and handle effectively, communication during times of crisis is critical to the ongoing success of organisations. Managers require an understanding of the types of issues and crises that can occur and various action strategies to address the particular needs of their organisation.

Courses: GS40, GS42, GS48, GS50, GS75, GS76, GS85, GS87, GS97
Contact hours: 3 per week
Campus: GP  Credit points: 6

►  HHB050 Mandarin for Chinese
In this unit students will receive instructions in listening and speaking Putonghua, reading and writing Pinyin romanisation and reading and writing simplified characters. They learn differences in structure and nuance between their native dialect and Putonghua.

Courses: All
Incompatible with: HUB453 or HHB051
Campus: GP  Credit points: 12

►  HHB051 Introductory Mandarin
This unit introduces students who have little or no prior knowledge of Chinese Mandarin to the four macro skills of listening, speaking, reading and writing through an integrated communicative approach to teaching. Content will include: the Mandarin sound and tone system; the Pinyin Romanisation system; introduction to Chinese character writing, greetings and introductions; family, identification of nationalities, places and objects, locations and directions.

Courses: All
Incompatible with: HUB453 or HHB051
Campus: GP  Credit points: 12  Semester: 3

►  HHB052 Introductory Mandarin
This unit continues to develop the four macro skills of listening, speaking, reading and writing through an integrated communicative approach. While there is further consolidation of the knowledge of the Pinyin Romanisation system, greater attention is devoted to the reading and writing of characters. With acquisition of language, students receive further exposure to aspects and characteristics of Chinese culture.

Courses: All
Prerequisites: HUB453 or HHB051
Incompatible with: HUB454
Campus: GP  Credit points: 12  Semester: 3

►  HHB053 Intermediate Mandarin
This unit provides for in-country studies.

Campus: GP  Credit points: 48  Semester: 1

►  HHB054 Advanced Mandarin
This unit provides for in-country studies.

Campus: GP  Credit points: 48  Semester: 2

►  HHB056 International Intensive Program
This unit involves a short period of intensive language study conducted at an approved institution in the country where the target language is used. It aims to enhance language skills and introduce students to the culture of the country in an immersion situation.

Courses: HH01, HU22, IF43, IF70, IF81, IF82, IF86, IF86, IF50, BS56, SS60
Incompatible with: HUB646
Campus: GP  Credit points: 24  Semester: 2

►  HHB057 International Summer School or Equivalent
This unit involves four to six weeks of concentrated learning at an approved institution.

Courses: BS50, ED50, HH01, HU20, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF86, IF30, SS60
Incompatible with: HUB647
Campus: GP  Credit points: 48  Semester: 1

►  HHB058 In-Country Study - A
This unit involves an approved course of study at a designated foreign institution for one semester.

Courses: ED50, HH01, HU20, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60
Incompatible with: HUB648
Campus: GP  Credit points: 48  Semester: 1

►  HHB059 In-Country Study - B
This unit involves an approved course of study at a designated foreign institution for one semester.

Courses: HH01, HU22, HU20, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60
Incompatible with: HUB647
Campus: GP  Credit points: 48  Semester: 2

►  HHB061 French 1
This unit aims to give students who have not reached senior or the equivalent the grounding necessary for the post-senior course. The unit allows students to develop conver-
sational skills, and introduces them to reading and writing.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH23, IF43, IF47, IF70, IF81, IF82, IF83, IF84, IF86 IF70, SC30, IF30, SS60, IF12

Incompatible with: HUB670

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2

► **HHB062 French 2**

This unit aims to give students who have not reached senior or the equivalent the grounding necessary for the post-senior course. The unit also equips students for a range of basic professional encounters requiring French.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60, IF12

Incompatible with: HUB670

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB063 French 3**

The course concentrates on developing cross cultural skills for communication in French with particular reference to student experiences abroad. The course encourages students to make contacts in the French speaking community in Brisbane.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF43, IF70, IF81, IF82, IF83, IF84, IF86 IF70, SC30, IF30, SS60, IF12

Incompatible with: HUB672

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB064 French 4**

This course expands on work done in the first semester, to allow students to discuss a number of current issues in French society. Magazine articles, news reports, the Internet, videos and a novel develop reading, writing, speaking and listening skills, as well as cultural awareness.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB673

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB065 French 5**

This unit has two components: a) An introduction to Business French. Students work on the skills necessary to the recruitment process; reading job offers, preparation of a CV and so on. b) The study of coherence and cohesion in longer texts. Computer mediated communication puts students in contact with classes of French peers.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB674

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **HHB066 French 6**

How do you argue in French? This course equips students to explain and debate issues, using written and video materials. Students prepare their own video report.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF47, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB675

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB067 French 7**

This advanced course in business French equips students for working in Europe or in French-speaking companies in Australia. Students have the option of sitting for the Diplome de francais des affaires dixieme degre.

**Courses:** BS56, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 IF70, SC30, IF30, SS60, IF12

Incompatible with: HUB678

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **HHB068 French 8**

This unit allows students to play with verbal and non-verbal aspects of French by studying gestures and idiomatic expressions. A final project allows students to relate the content to their own interests (e.g. translation, advertising, education). Students write and present a short play at the end of the course.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 IF70, SC30, IF30, SS60, IF12

Incompatible with: HUB677

**Contact hours:** 2 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB071 Indonesian 1**

This entry level unit aims to equip beginning students with elementary communicative competence in a variety of everyday situations. At the end of the year, students will have been exposed to about 2000 words and should be able to use most of the productive sentence patterns of Indonesian in comprehending and expressing information about basic needs in mostly familiar and predictable situations.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB650

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **HHB072 Indonesian 2**

This entry level unit aims to equip beginning students with elementary communicative competence in a variety of everyday situations. At the end of the year, students will have been exposed to around 2000 words and should be able to use most of the productive sentence patterns of Indonesian in comprehending and expressing information about basic needs in mostly familiar and predictable situations.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB654

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB076 Indonesian 4**

This unit advances learners’ competence to intermediate level, with some analytical focus on sentence construction and word formation (the affix system). Authentic texts, especially reading materials, are increasingly used during this year, and by the end of the second semester, with the use of a dictionary, students can make good sense of straightforward Indonesian reading material from newspapers, books and magazines. An interview assignment each semester provides opportunities for interaction with native speakers.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB652

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **HHB074 Indonesian 4**

This unit advances learners’ competence to intermediate level, with some analytical focus on sentence construction and word formation (the affix system). Authentic texts, especially reading materials, are increasingly used during this year, and by the end of the second semester, with the use of a dictionary, students can make good sense of straightforward Indonesian reading material from newspapers, books and magazines. An interview assignment each semester provides opportunities for interaction with native speakers.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB654

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB075 Indonesian 5**

At this level students view weekly audio-visual (tape-slide and video) programs produced in Indonesia for local consumption. Conversation, reading and writing classes reinforce and extend students’ ability to communicate on a range of everyday topics relevant to modern Indonesian society. Students give weekly classroom presentations in the language.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB674 or equivalent

**Incompatible with:** HUB654

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **HHB076 Indonesian 6**

At this level, students view weekly audio-visual (tape-slide and video) programs produced in Indonesia for local consumption. Conversation, reading and writing classes reinforce and extend students’ ability to communicate on a range of everyday topics relevant to modern Indonesian society. Students give weekly classroom presentations in the language.

**Courses:** BS56, ED50, ED51, HH01, HH20, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

Incompatible with: HUB654, HHB075 or equivalent

**Incompatible with:** HUB654

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **HHB077 Indonesian 7**

At this level, students are comfortable in using authentic Indonesian source materials dealing with a range of sophisticated and complex issues. Students have the opportunity to pursue, in some depth, topics of special interest and relevance to their individual vocational, career or research needs.
**Courses:** BS56, ED50, ED51, HH01, HH02, IF22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

**Prerequisites:** HUB655, HUB076 or equivalent

**Incompatible with:** HUB656

**Contact hours:** 4 per week

**Campus:** GP

**Credit points:** 12

**HHB087 Indonesian 8**

At this level, students are comfortable in using authentic Indonesian source materials dealing with a range of sophisticated and complex issues. Students have the opportunity to pursue, in some depth, topics of special interest and relevance to their individual vocational, personal and research needs.

Courses: BS56, ED50, ED51, HH01, HU20, IF22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

**Prerequisites:** HUB655, HUB077 or equivalent

**Incompatible with:** HUB667

**Contact hours:** 4 per week

**Campus:** GP

**Credit points:** 12

**HHB091 German 1**

This unit assumes no prior knowledge of German. It aims to equip students with the necessary German language and socio-cultural skills to communicate in a variety of specific situations. Students will be able to talk and write simply about a number of topics; self; how to get to know someone; how to interact with other students; how to talk about family, friends, pets, home, the weather, likes/dislikes, and interests and feelings. Students will also become aware of the role and importance of extra-linguistic features in spoken and written communication.

Courses: BS56, ED50, ED51, HH01, HU20, IF22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

**Prerequisites:** HUB664 or HHB085

**Incompatible with:** HUB665

**Contact hours:** 4 per week

**Campus:** GP

**Credit points:** 12

**Semester:** 2

**HHB088 Japanese 8**

The focus of this unit is business Japanese. The entire unit is based on a simulation of a Japanese company based in Australia. Since the formal and informal language of the company is Japanese, students learn how to conduct themselves in formal situations, observing appropriate etiquette. The skills engendered in this unit include speaking formal Japanese, making telephone calls, expressing opinions appropriately, understanding job advertisements, writing a CV, writing formal letters and going for a job interview. These are skills needed by anyone who wants to reach an advanced standard of Japanese - not only business students.

Courses: BS56, ED50, ED51, HH01, HU20, IF22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86 SC30, IF30, SS60, IF12

**Prerequisites:** HUB666 or HUB087

**Incompatible with:** HUB667

**Contact hours:** 4 per week

**Campus:** GP

**UNIT SYNOPTES**

QUT HANDBOOK 2006 • PAGE 644
UNIT SYNOPSES

supported by written compositions, grammatical analyses and Web quests. Students use more complex sentences to describe events and improve their ability to distinguish oral styles from written narratives. Topics covered include holidays and transport, food, cooking, restaurant meals, childhood and youth, stories and fairy-tales.

Courses: BS56, ED50, ED51, HH01, HH02, HH03, IF43, IF45, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60, IF12

Prerequisites: HHUB736 or HHRB092

Incompatible with: HHUB737

Contact hours: 4 per week

Credit points: 12

Semester: 1

► HHB094 German 4

German 4 builds on skills acquired in German 3 to get students to the point where they will manage well in everyday situations in a German-speaking country. Writing exercises and grammatical analyses prepare students for oral performance and, as in German 3, there is a great deal of pair work and small-group communication. Students study the forms of polite requests, instructions and directions. Topics include finding one’s way around cities, travel, clothing and shopping, accommodation, health and accidents, families and multiculturalism. Students are encouraged to apply to do an exchange to one of the five QUT exchange universities located in Germany and Austria.

Courses: BS56, IF43, IF70, HH02, HH03, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60, IF12

Prerequisites: HHUB737, HHRB093 or equivalent

Incompatible with: HHUB738

Contact hours: 4 per week

Credit points: 12

Semester: 2

► HHB095 German 5

The units German 5, 6, 7 and 8 form consecutive advanced units that repeat every four semesters. Students in German 5 and German 7 complete the same content but with different assessment items and levels of difficulty. Two content streams are offered in parallel to prepare students for employment in different professional areas and to enhance intercultural competence. Strand A, which is designed for students with Arts and Education majors, deals with everyday German one year and Computers & High Technology the next. Strand B is for students planning to enter international business environments. Topics covered include planning and arranging meetings, establishing customer and client contacts, and composing business letters.

Courses: BS56, ED50, ED51, HH01, HH02, HH03, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60, IF12

Prerequisites: HHUB738, HHRB094 or equivalent

Incompatible with: HHUB739

Contact hours: 4 per week

Credit points: 12

Semester: 1

► HHB096 German 6

The units German 5, 6, 7 and 8 form consecutive advanced units that repeat every four semesters. Students in German 6 and German 8 complete the same content but with different assessment items and levels of difficulty. Two content streams are offered in parallel to prepare students for employment in different professional areas and to enhance intercultural competence. Strand A, which is designed for students with Arts and Education majors, deals with German TV news in the first year and idiomatic language the next. Strand B is for students planning to enter international business environments. Topics covered include social and linguistic skills regarding routine business practices, problem solving and forward planning, and employment policies.

Courses: BS56, ED50, ED51, HH01, HH02, HH03, IF43, IF70, IF81, IF82, IF83, IF84, IF86, SC30, IF30, SS60, IF12

Prerequisites: HHUB741, HHRB097 or equivalent

Incompatible with: HHUB742

Contact hours: 4 per week

Credit points: 12

Semester: 2

► HHB100 Introduction to Human Services

This unit provides an introduction to human services and locates this within the broader context of the welfare state. It examines both the history, and global and national forces, which shape the current direction of welfare policy and the human service industry. The purpose of human service work and the various roles a human service worker may undertake or utilise are explored. The unit challenges students to reflect on their own understandings of human services and human service work, and provides a foundation for detailed study in later years of the course.

Courses: HH02, HH04, HH01, IF12, IF43, IF86, IX01, IX11, IX12

Incompatible with: HJBI10

Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 2

► HHB102 The Human Condition

This unit introduces students to a range of individual, familial and social conditions that impact on the lives and lifestyles of Australians. Attention is directed toward the impact of factors such as age, ability, gender, culture and class, and the identification and exploration of key processes in human growth and development. Students become informed about theories from a range of disciplines and develop a critical and reflective approach to understanding human development. By examining how societies define and respond to human need and adversity, students develop a framework for examining the dynamic interaction of individual, interpersonal and social issues.

Courses: HH01, HH02, IF12, IF43, IF86, IX01, IX11, IX12

Incompatible with: HJBI12

Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 2

► HHB103 Contemporary Social and Community Issues

This unit explores a number of contemporary social issues relating to social marginalisation and human disadvantage. It locates these issues in a theoretical and descriptive framework thus providing students with both knowledge and analytical skills that are necessary for the ongoing exploration of social issues. It explores the connection between forces at a macro level and human disadvantage and examines the value assumptions that sustain structural inequality. It encourages students to reflect on the implications of structural disadvantage for human service practice and the role of the human service worker as a participant in civil society.

Courses: HH02, HH04, HH01, IF12, IF43, IF86, IX01, IX11, IX12

Incompatible with: HJBI12

Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 1

► HHB104 Understanding Society: Intro. To Sociology

This unit introduces students to the way sociology approaches the understanding of the social world in general and Australian society in particular. The following important issues will be covered throughout the semester. Firstly, students will learn about the role and significance of sociology and sociological knowledge. The development of sociology and sociological knowledge will be outlined and students will learn about the major sociological themes and authors. Secondly, the importance and placement of sociology in the context of social science will be discussed. Thirdly, students will learn how to understand and utilize some of the central sociological concepts such as...
Public access to history is increasing, but what is told about the past in books, plays, films, encyclopaedia, documentaries, museums, galleries and national celebrations is contested, uncertain, and controversial. Who should tell history, what should be told and what should be left out are hotly debated. History is no longer dominated by celebratory, chronological narratives. Multidisciplinary approaches, alternative viewpoints and a wide range of media are now used to project private, family, community and national myths and stories. Current Australian historical studies, research and teaching reflect these uncertainties.

UNIT SYNOPTES

QUT HANDBOOK 2006  PAGE 646
UNIT SYNOPSIS

Credit points: 12 Semester: 1, 2
► HHA117 Introduction to Social Research Methods
Part of human service work involves the capacity to analyse, critique, and understand the logic and relationship to practice of research findings. The emphasis of the unit is on becoming a good consumer of research through the adoption of a critical approach to the reading and utilisation of research. This unit is also designed to develop basic research skills and to prepare students for postgraduate research. Social scientific knowledge, its uses and ethical implications in the human service context, research design and methodologies, and data collection techniques are discussed.
Courses: HHA02, HHA01, HHA04, HUA22, SS560, IF43, IF70, IF81, IF82, IF86, IF30, IF12, IX01, IX11, IX12
Incompatible with: HSB222
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA120 Ethics, Law and Health Care
Nursing practice involves making decisions with and for others. This involves making evaluations of what is in the best interest of others, what are nurses' obligations to others and what will best protect or enhance their well-being. Hence, decision-making in nursing practice is bounded by normative considerations and these normative considerations fall into two groups: those constituted by the law and those and ethics in nursing and a professional awareness of current legal constituted by ethics. This unit has been designed to provide for nursing students and practitioners an opportunity to develop a reflective understanding of the place of law statutes and ethical discussions as they apply to nursing practice.
Courses: NS40, NS48
Incompatible with: HUB009
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2
► HHA121 Interpreting the Past
This unit examines how the history discipline deals with the past, including questions of evidence and interpretation. It investigates, from a critical perspective, the status and value of historical knowledge, its construction, dissemination and meaning.
Courses: ED50, HHA01, HHA04, HUA20, HUA22, HUA21, HUA22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, IX01, IX11, IX12
Incompatible with: HUB649
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA122 Colonialism And Independence In Asia Pacific
This unit is a general introduction to the history and geography of the Asia-Pacific region with a focus on the impacts of western imperialism, nationalism and economic organisation. The unit also considers issues of population, the environment and urbanisation.
Courses: ED50, ED51, HHA01, HHA04, HUA20, HUA22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, IF12, IX11, IX01, IX12
Incompatible with: HUB610
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2
► HHA123 Indigenous Australian Culture Studies
This unit encourages an appreciation of the two distinct indigenous cultures of Australia and how external forces to Aboriginal and Torres Strait Islander cultures caused social, economic and political changes. It looks at traditional family life and organisation.
Courses: HHA01, HHA04, IF12, IF43, IF86, IX01, IX11, IX12
Incompatible with: HUB700, HHA227
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA127 Environment and Society
This unit includes a geographical systems approach to investigations of the natural and social environments, and human-environmental interactions. The emphasis is on explaining spatial patterns and variability in social and natural landscapes through the understanding of physical, social and cultural processes and systems at regional and local spatial scales. Through practical sessions, the acquisition of basic geographical field and mapping skill is fostered.
Courses: HHA01, HHA04, IF07, IF81, IF82, IF12, IF43, IF86, IX01, IX11, IX12
Incompatible with: HUB201, HHA227
Credit points: 12 Semester: 1
► HHA200 Working in Human Service Organisations
This unit includes the following: service quality and the organisational dimension; in- dustrialisation and development of human service work organisations; power based and empowering organisational paradigms; organisational cultures and gender; personal skills for human service workers including career, time and stress management; interpersonal skills for working collaboratively and resolving disagreement.
Courses: HHA02, HHA07, HHA04
Prerequisites: HSJ10, HSB120
Incompatible with: HSB211
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2
► HHA201 Initial Professional Practice
Only enrolled Bachelor of Social Science (Human Services) students can undertake this unit. It prepares students with an orientation to the human services industry and the organisational context of practice. A broad range of practice methods and approaches is introduced. Students undertake 200 hours of professional training consisting of an on-the-job, vocationally based experience supervised by an experienced practitioner. Attendance at seven university seminars is also required. The student and their agency supervisor devise an individual learning plan with work performance assessed on six core competencies. Students assess their own suitability for the different types of human service practice.
Courses: HHA02, HHA07
Incompatible with: HSB201
Credit points: 12 Semester: 1
► HHA203 Aged Services: Introduction
This unit focuses specifically on human service work with older adults. It introduces the developmental, social and cultural environment which impact on ageing, including aspects of intelligence, memory and learning and perspectives of work and retirement. In addition, the home environment and living with change, relations with family members and dealing with loss and grief are discussed.
Courses: HHA02, HHA07, SS560
Incompatible with: HSB213
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA204 Child and Family Services: Introduction
This unit is designed to introduce second year students to child and family welfare studies and focuses on approaches to supporting families and promoting change. Initially students will gain a overview of issues facing contemporary Australian families that contribute to family adversity and examine responses to the welfare needs of children and families, including Indigenous families. Students will then critically examine characterisations of successful family relationships and parenting, theories on causes and effects of domestic violence and child maltreatment and the effect of maltreatment on children.
Courses: HHA02, HSA07, SS560
Incompatible with: HSB214
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA205 Corrective Services: Introduction
This unit introduces students to the development and function of corrective services within the Australian criminal justice system. Examining the history and changing role and functions of prisons, and the emergence of community corrections, the unit assists students in understanding key legal questions facing contemporary Australian families that contribute to family adversity and examine responses to the welfare needs of children and families, including Indigenous families. Students will then critically examine characterisations of successful family relationships and parenting, theories on causes and effects of domestic violence and child maltreatment and the effect of maltreatment on children.
Courses: HHA02, HSA07, SS560
Incompatible with: HSB215
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA206 Disability Services: Introduction
This unit links social justice, human rights and empowerment philosophies underpinning disability, the principles underpinning current service provision and their impact on the lives of people with disabilities. The unit explores the theoretical, social and political frameworks for analysing and understanding disability, the processes by which these values are translated into human service activity. Finally, the unit examines individual program planning and skill development practices.
Courses: HHA02, HSA07, SS560
Incompatible with: HSB216
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► HHA207 Services to Young People: Introduction
This unit provides an introduction to human services practice with young people. It gives students an overview from both theoretical and operational perspectives. The various
UNIT SYNOPSES

security, immigration and family policies at federal, state and local government level.
Courses: HH01, HH02, HS07, HH04, IF12
Incompatible with: HSB231
Contact hours: 3 per week Course: CA
Credit points: 12 Semester: 2
► HSB214 Team Practice and Group Processes
A significant methodology used in human service work involves facilitating, supporting or consulting with various groups of people...
This unit focuses on the development of skills to utilise this type of intervention appropriately. The unit aims to provide a basic understanding of the various uses to which group processes may be applied. Group work is located as an intervention process within the human service arena as distinguished from other processes at individual, community and societal level.
Courses: HH02, HS07, HH04, HH01, IF12
Incompatible with: HSB332
Contact hours: 3 per week Course: CA
Credit points: 12 Semester: 2
► HSB215 Crisis and Conflict Resolution
This unit identifies the physiological, psychological and social impacts of human crises and interpersonal conflict. It further aims to provide students with an understanding of such crises on individuals, social units and communities, and to prepare students for professional roles involving responses to crises services. It assists students to develop specific intervention skills for professional practice in a variety of settings requiring crisis intervention, family mediation, dispute resolution, grievance hearings and critical incident debriefing services.
Courses: HH02, HS07, HH04, HH01, IF12
Incompatible with: HSB234
Contact hours: 3 per week Course: CA
Credit points: 12 Semester: 2
► HSB216 The Human Dimensions of Space
This unit is a component of the community studies major and covers the role of space in contemporary societies: key types of spaces and patterns in their usage; spaces as sites for cultural and symbolic expression; understanding the way inequality can and is reproduced through the configuration and management of space; understanding the way particular public spaces are used and experienced by particular sections of the community eg young people; key issues in public space configuration, management and policy and examining social inclusion, safety and security; links between the economic and social, new urbanism; emerging theory and ideas about good practice in the development or reconfiguration of public and community accessed public spaces.
Courses: HH01, HH04, IF12
Incompatible with: HSB234
Contact hours: 3 per week Course: CA
Credit points: 12 Semester: 2
► HSB217 Conflict Management Skills for Professionals
This unit presents the psychological, relational and contextual aspects of interpersonal and organisational conflict. It examines relevant theoretical discourses and practice frameworks in order to enhance the student’s capacity to manage and resolve conflict. The unit explores the nature and sources of conflict. It also presents a range of conflict management and resolution techniques, including negotiation and mediation. Experiential and action learning exercises are used in order to allow students to trial alternative interventions and practice new skills. The unit is built around an integrated and self-reflective framework.
Courses: HH01, HH03, HS07
Incompatible with: HSB217
Campus: GP
Credit points: 12
► HSB220 Intervention Theories and Methods
Sound human services practice involves the assessment of complex social and client issues and the application of relevant theories and practice frameworks to implement effective change strategies and processes. In this unit, students apply and integrate theory with practice realities and dilemmas. Problem based learning is a major feature along with exploration and analysis of relevant theoretical perspectives and models. Students are assisted toward the development of their initial framework for human services practice. The influences of ideologies, values, ethics, cultural diversity and contexts upon service delivery options are explored. Assessment includes an oral presentation and two exams.
Courses: HH02, HS07, HH04
Incompatible with: HSB217
Contact hours: 4 per week Course: CA
Credit points: 12 Semester: 1
► HSB221 Intervention Processes and Ethics
This unit focuses on knowledge and skills for human services practice. Its particular focus is enabling students to apply core human services processes (such as engagement, assessment, intervention, case management, closure), and to develop skills in considering the ethical and cultural dimensions of human service practice. Critical examination of these will further assist students in the ongoing development of their own practice framework especially in respect to the dynamic interplay between personal and professional influences. The unit plays an important role in preparing students to undertake their professional practice placement in the third year.
Courses: HH02, HS07
Prerequisites: HSB218
Incompatible with: HSB228
Contact hours: 3 per week Course: CA
Credit points: 12 Semester: 2
► HSB221 Intervention Processes and Ethics
This unit focuses on knowledge and skills for human services practice. Critical examination of these will further assist students in the ongoing development of their own practice framework especially in respect to the dynamic interplay between personal and professional influences. The unit plays an important role in preparing students to undertake their professional practice placement in the third year.
Courses: HH02, HS07
Prerequisites: HSB218
UNIT SYNOPSIS

Incompatible with: HSB228
Contact hours: 3 per week
Credit points: 12 Semester: 2
► HHB222 Human Service Practice: Legal Dimension
This unit focuses on the connection between the law, judicial and legal systems, and human service practice. It provides a detailed description of the legal, criminal and judicial systems and processes in Australia and Queensland. It includes a critical analysis of the relationship between the law and justice, exploring the notion of law as a social construct reflecting differentials in power. Throughout, an emphasis is placed on those aspects of law and legal processes that have particular application for human services and human service practice.
Courses: HH02, HS07
Incompatible with: HSB229
Credit points: 12 Semester: 2

► HHB223 Islam and Islamic Societies
This unit provides a valuable learning opportunity for students to explore the origin and development of Islam. It will examine the influence of Islam on various areas of life including social, economic, political and human values. This unit employs a wide range of learning tools to construct a comprehensive and critical understanding of Islam.
Courses: HH01, HH03, HH04, IF12, IF43, IF86, IX01, IX11, IX12
Credit points: 12 Semester: 1
► HHB224 Qualitative Research Methods
This unit introduces students to the logic’s, techniques and contributions of qualitative methods. First, it focuses on the processes and logics involved in qualitative research, paying particular attention to theory construction, the inductive method and issues of reliability and validity. The unit looks at these processes with respect to the contribution and logic of the qualitative case study. Students acquire both conceptual and hands on skills in the application of a number of qualitative research techniques. These include ethnography and observational methods, accessing documents through Internet search techniques and the analysis of spoken interaction through conversation analysis.
Courses: HH01, PY07, SS60, HH02, HH22, IF30, IF36, IF43, IF70, IF81, IF82, IF86, ED50, HH04, IF12, IX01, IX11, IX12
Prerequisites: SSB969 or HUB133
Incompatible with: HUB140
Credit points: 12 Semester: 2
► HHB225 Political Sociology
This unit examines a variety of sociological theories that have shaped political development. Central to the unit is an examination of sociological conceptions of power. Typically, sociologists have examined power in connection with the state; power has frequently been regarded as flowing from the state. The unit examines these debates, and considers recent theorisations that have begun to detach power from the state. Case studies to make these distinctions clearer, including the construction of an Australian administrative elite, the notion of police in seventeenth and eighteenth century Europe, and the compulsory education as the sphere of the reproduction of social relationships will be explored.
Courses: HH01, HH03, HH04, HH22, SS60, HH20, IF30, IF36, IF70, IF81, IF82, IF86, IF43, IF12, IX01, IX11, IX12
Incompatible with: HUB134
Credit points: 12 Semester: 2
► HHB226 Consuming Cultures
Consumption is usually understood in economic terms as the ‘flip-side’ to production. However, the act of consuming can also be considered as a practice which has particular cultural/social connotations. Additionally, although the social relations of consumption and the way that consuming practices are read culturally are often understood in local or community terms, much contemporary debate centres on the implications of globalisation in the (re)formulation of cultures and cultural values. For example, does globalisation and its associated mass production of goods and services imply increasingly homogenised consumer cultures or are there other processes at work that challenge or unsettle such homogenising tendencies?
Courses: HH01, HH22, SS60, IF30, IF36, IF70, IF81, IF82, IF86, IX01, IX11, IX12
Credit points: 12 Semester: 1
► HHB228 Environmental Hazards
This unit includes the following: the nature of hazard, risk and disaster; origins of hazards; nature of disaster; influences on the perception of risk; disaster prediction, preparation, response and recovery strategies.
Courses: ED50, HS01, HH02, HH22, IF70, IF30, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12
Incompatible with: HUB207
Credit points: 12 Semester: 2
► HHB229 Windows on Japan
The focus of this unit is contemporary Japan and Japanese people. Topics include a geographical overview of Japan, its natural resources and population; contemporary political, social and environmental change; Japan’s role in the Asia Pacific region.
Courses: ED50, HH01, HH20, HH22, IF30, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12
Incompatible with: HUB220
Credit points: 12 Semester: 1
► HHB231 Health, Society and Environment
This unit provides sociological analysis of the health care models and institutions, healing relationships (between patients, nurses and doctors), theories of disease causation, and relationships in illness situations and illness behaviours. It also covers sociology of the body including exploration of the experience of illness and professional practice from the patient’s perspectives, the influence of gender, age, ethnicity, social class and disability in their experience and the importance of social and cultural approach to environmental health issues.
Courses: SS07, HH01, HH20, SS60, SS40, NS48, IF30, IF36, IF70, IF81, IF82, IF86, HH04, IF12, IX01, IX11, IX12
Incompatible with: HUB127
Credit points: 12 Semester: 2
► HHB232 Survey Methods
This unit introduces students to the principles and procedures of survey research using a practical, applied approach that stresses the uses of survey research for investigating a range of different social problems and social science questions. It covers the fundamentals of designing and conducting surveys and then introduces students to the basics of how to analyse survey data once they have been collected. No prior knowledge of or experience with survey research or statistics is assumed.
Courses: SS07, SS60, HH01, HH20, HH22, IF30, IF36, IF43, IF70, IF81, IF82, IF86, HH04, IF12, IX01, IX11, IX12
Credit points: 12 Semester: 1
► HHB233 Sex, Gender and Society
This unit focuses on the history of feminist thought and contemporary perspectives with reference to issues of sociological inquiry. It examines the significance of perspectives from critical theory, structuralism, post-structuralism and action approaches in the development of feminist theory. The implications of feminist perspectives for research strategies are considered with reference to feminist philosophers of science and figures such as Sandra Harding and Dorothy Smith.
Courses: SS07, SS60, HH01, HH22, HH20, IF30, IF36, IF43, IF70, IF81, IF82, IF86
Incompatible with: HUB131
Credit points: 12 Semester: 1
► HHB238 Asian Cultures and Societies
This is an introductory survey of Asian societies and cultures. It presents the diverse array of cultures, languages and peoples that comprise the many identities of the Asia Pacific region. It aims to introduce students to the environment, the cultures, and the societies of the Asia Pacific at the current time. Focus is placed on the nature of economic political development in the region and the costs and benefits of that experience.
Courses: HH01, IF30, IF36, IF81, IF82, IF86, IX01, IX11, IX12
Incompatible with: HUB331
Credit points: 12 Semester: 1
► HHB239 Korean Culture and Society
Korea has important trading, historical and cultural links with Australia. In this introductory unit, students examine the histories, culture and societies of South and North Korea, with foundations in pre-modern history and the philosophies of shamanism, Taoism, Buddhism and Confucianism. The unit examines the experiences in Korea of colonialism, communism and modernisation. Students critically evaluate contemporary...
politics, society and social relations in Korea, the impacts of globalisation and Korea's place in regional and world affairs.

Courses: HH01, HH02, HH22, SS60, IF36, IF43, IF70, IF81, IF82, IF86, IF30, IF12, IX01, IX11, IX12

Incompatible with: HUB332

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB240 Sociology of Crime and Deviance

Crime, justice and deviance are central features of our social and political lives. A sociological approach to the study of crime and deviance takes it for granted that social values, processes and institutions shape the form and the content of crime and deviance. Students learn about the causes and forms of crime and deviance, and the unit gives students some of the theoretical and methodological skills necessary to collect, interpret and evaluate information about crime and deviance. While this unit is offered as an elective in the sociology major, it deals with one of the core concerns in sociology.

Courses: HH02, HH22, HH01, SS60, HH03, IF36, IF30, IF81, IF82, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB150

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB242 Pacific Culture Contact

This unit includes key concepts including mobility, religion, morality, leadership, civilisation, society, change and continuity. It develops an appreciation of culture and sensitivity towards cultural heritage and considers case studies and comparative analysis that focus on the people of the Pacific in the context of their society and culture.

Courses: HH01, HH03, ED50, IF36, IF43, IF70, IF81, IF82, HH04, IF12, IX01, IX11, IX12

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB244 Southeast Asia in Focus

Australia's interaction with South-East Asia, including our most populous nearest neighbour, Indonesia, has increased dramatically over the last fifty years. This unit examines aspects of South-East Asian geography, environment, society and culture in a contemporary framework.

Courses: HH01, HH03

Contact hours: 3 per week  Campus: CA

► HHB245 Australia and the South Pacific

This unit includes a critical analysis of the history of Australian bilateral and multilateral links with the Pacific islands region, including Pacific frontier theory, sub-imperialism, colonial rule and contemporary dialogue over aid, trade, regionalism, defence, cultural exchange and migration.

Courses: HH01, HH02, HH22, IF36, IF43, IF70, IF81, IF82, IF86, SS60

Incompatible with: HUB627

Contact hours: 3 per week  Campus: CA

► HHB246 Modern China

This unit includes a historical survey of China during the nineteenth and twentieth centuries. The primary focus is on the decline of the traditional Chinese state and the impact of foreign imperialism. Stress is placed on the growth of nationalism and the Chinese revolution. The modernisation of Chinese culture, the position of women and the forces which have brought China to assume its place as the major Asian force are studied.

Courses: HH01, HH03, HH04, IF12, IF43, IF86, IX01, IX11, IX12

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 1

► HHB248 The USA and the Asia Pacific Region

Despite claims that it was not a colonial/imperial power, the USA had extensive territories - Hawaii, Philippines, Samoa, Micronesia - and historically was active in China, Vietnam, Korea, Taiwan and was the occupation force in post-war Japan. How did the USA acquire this interest in the Asia-Pacific? How was it administered and why did the USA withdraw? How did Asia-Pacific peoples react to USA control? What role did Asia play in the USA's concept of their Mani-fest Destiny, the Open Door policy, the Nixon Doctrine and the Cold War? How is the USA situated now in Asia-Pacific? This unit addresses these questions from a global, regional and historical perspective.

Courses: HH01, HH22, SS60, IF30, IF43, IF70, IF81, IF82, IF86

Contact hours: 3 per week  Campus: CA

► HHB249 Social Movements in Australia

New social movements in Australia since the 1960s; international green, women's, peace, indigenous and Third World development movements; comparison with overseas and old social movements.

Courses: ED50, HH01, HH02, HH22, SS13, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF12, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB682

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 1

► HHB250 Australian Geographical Studies

The unit systematically describes and explains the geography of Australia by analysing the distinctive spatial patterns and processes that constitute the Australian landscape. Topics include: the state of the environment, land-use patterns, the rural crisis, settlement and cities, population and societal change, and political/geographic development.

Emphasis is on contemporary, issue-based themes.

Courses: ED50, HH01, HH02, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB683

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 1

► HHB253 Conspiracy and Dissent in Australian History

Case studies reflect conspiracies as well as protest movements in nineteenth and twentieth century Australia. This unit considers some including the nineteenth century land grab conspiracies, Aboriginal resistance, the Petrov affair, the 1975 Dismissal and the Petrov affair, the 1975 Dismissal and the Petrov affair, the 1975 Dismissal and the Petrov affair, the 1975 Dismissal and the Petrov affair

Courses: ED50, HH01, HH02, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB692

Contact hours: 3 per week  Campus: CA

Credit points: 12  Semester: 2

► HHB255 Indigenous Politics and Political Culture

This unit examines issues and influences underlying the world of indigenous politics: political representation; land rights; health; education; community development; criminal justice; culture and heritage. This unit has an Australian focus with New Zealand and North American comparisons.

Courses: ED50, HH01, HH02, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB703

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB256 Europe Since 1945

This unit uses historical and literary perspectives to highlight major themes in the development of European society and culture since 1945.

Courses: ED50, HH01, HH02, HH22, IF36, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB720

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB257 The Classical World

This unit considers the emergence and development of European society from earliest times to 500 AD. It examines the major political, social and economic trends in classical Greek and Roman society.

Courses: HH01, HH03, ED50, IF70, IF81, IF82, IF43, IF86

Contact hours: 3 per week  Campus: CA

► HHB258 Foundations of Modern Europe

This unit considers the formation of modern Europe from the late Middle Ages to the end of the eighteenth century, the emergence of secularism and the rise of the nation states.

Courses: HH01, HH03

Contact hours: 3 per week  Campus: CA

► HHB259 War and Revolution in Europe 1914-1945

This unit examines political, social, economic and intellectual developments in Europe from 1914-1945.

Courses: HH01, HH02, HH20, IF30, IF43, IF70, IF81, IF82, IF86, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB723

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB260 Nations and Nationalism in Modern Europe

This unit selectively examines political, social, economic and intellectual developments in modern Europe from the French Revolution to the era before the Great War of 1914-18.

Courses: HH01, HH02, HH20, IF30, IF43, IF70, IF81, IF82, IF86, SS60, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB743

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB261 Medieval Europe

The Middle Ages constitute a crucial period in the formation of a European identity. The breakdown of the Roman world saw the gradual emergence of a Christian civilization of striking originality. At the same time, it gave rise to political fragmentation, as well
UNIT SYNOPSIS

as to the national characteristics and antagonisms that are still part of the European scene today. This unit considers this period and its influences.

Courses: HH01, HH03, ED50, IF70, HH04, IF12, IX01, IX11, IX12 Credit points: 12 Semester: 2

► HHB262 Political Ideologies

This unit considers the political spectrum of the traditional Left-Right-Centre ideologies including Fascism, Conservatism, Liberalism, Socialism, Communism and Anarchism. Cross-spectrum ideologies such as Feminism, Imperialism, Racism and Environmentalism are discussed. The course concludes with reference to post-modernist politics and its implications for the traditional ideological spectrum.

Courses: HH01, HH02, IF36, ED50, IF30, IF70, IF43, IF81, IF82, IF86, SS60, HH04, IF12, IX01, IX11, IX12 Compatible with: HHB753 Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► HHB267 Feminism and Ethics

This unit discusses the impact of the feminist movement on ethical and political theory and poses some questions. What does it mean to say the differences between men and women are natural or socially cultivated? What are the normative implications of these differences? What counts as equality between the sexes? Do women think differently about ethical situations from men?

Courses: HH01, HH02, IF36, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12 Compatible with: HHB754 Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► HHB268 Vulnerable Identities

This unit considers vulnerability and the experiences of persons who are vulnerable because of age, infirmity, abandonment, care-fusing or suffering and other unethical practises. It looks at ways of relating with the vulnerable and allows students develop a richer appreciation of others as well as themselves.

Courses: HH01, HH02, IF22, IF36, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12 Compatible with: HHB755 Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 1

► HHB269 Ethics, Technology and the Environment

This unit examines how decisions about new technologies and the environment are based not solely on factual evidence but also on ethical judgements. It considers the ethical aspects of various issues: genetic engineering; free-riding problems with ‘caring for’ the environment; human obligations toward non-human animals; whether wilderness areas have value independent of their value to humans; and the problem of a new ‘environmental ethic’.

Courses: HH01, HH02, IF22, IF36, IF43, IF81, IF82, IF83, IF84, IF86, IF30, SS60, HH04, IF12, IX01, IX11, IX12 Compatible with: HHB757 Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► HHB270 Gene Technology and Ethics

Gene technology is poised to revolutionise science, technology, the practice of medicine, and the global economy. Social and public policies must keep up with the science and with public sentiments. Ethical inquiry must identify acceptable rules of public conduct. Processes are called for to balance the vastly divergent perspectives and interests. The introductory unit mirrors the interdisciplinary nature of gene technology and is open to students from all faculties. The unit discusses the nature of ethics and gene technology. It presents select topics of relevance to medical genetics, the environment and the biotechnology industry. Finally, it discusses Federal and State Government policy and strategy.

Courses: All Compatible with: HHB831 Contact hours: 3 per week Campus: GP Credit points: 12 Semester: 1

► HHB271 Ethical Theory

In this unit, students are exposed to some of the most common approaches to ethical theorising, including consequentialism, utilitarianism, egoism and virtue theory. These theo- ries are introduced via both historical and contemporary proponents. Students are made aware of how these broad categories relate to a range of standard theories about political theorising, such as contractarian liberalism or the utilitarianism implicit in much welfare state theorising or economic theorising about justice. Furthermore, students are familiarised with some of the standard positions regarding the question of objectivity in ethics, versus moral or cultural relativism about ethical questions.

Courses: HH01, HH03, IF70, IF81, IF82, IF30, IF43 Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► HHB272 Composing Identities: The Artistry of Living

This unit provides an opportunity to examine the practices of accounting for and constituting who we are - our identities. It examines the inseparability between composing our identities and living our lives within a liberal identity, and considers the significance of this fusion for our own well-being as well as that of others. The artistry of living is a practical endeavour that is often practiced through writing, especially autobiographical or ‘self-life-writing’. The unit, therefore, considers the relationship between autobiography and identity and the different forms of living that emerge from these practices.

Courses: HH01, HH03, IF70, IF81, IF82, IF30, IF43, IF86 Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► HHB273 Reshaping Life and Death

The unit covers the following areas: new technologies of birthing including the medicalisation of birth, pre-natal screening, and artificial reproductive technologies; the human genome project, emerging possibilities, health and social implications; the technologies of life support, the definition of death; and regional human rights system in the Americas and the global human rights system giving particular attention to the social, political, gender and cultural dimensions of the development of international and regional human rights norms. It critically reviews the effectiveness of the international and regional human rights system and the protection, promotion and realisation of civil, political, economic, social, cultural and development rights. Academic deliberations are located in a number of concrete human rights issues and situations.

Courses: HH01, HH04, IF12, IF43, IF86, IX01, IX11, IX12 Compatible with: HS8003 Contact hours: 3 per week Campus: CA

► HHB274 Human Rights: International and Regional Activism

This unit encourages students to consider the transformative nature of human rights activism at the international and regional level. It examines the international human rights system giving particular attention to the social, political, gender and cultural dimensions of the development of international and regional human rights norms. It critically reviews the effectiveness of the international and regional human rights system and the protection, promotion and realisation of civil, political, economic, social, cultural and development rights. Academic deliberations are located in a number of concrete human rights issues and situations.

Courses: HH01, HH04, IF12, IF43, IF86, IX01, IX11, IX12 Compatible with: HS8003 Contact hours: 3 per week Campus: CA

QUT HANDBOOK 2006 · PAGE 651
This unit encourages students to consider the transformative potential of Indigenous activism within the Australian contextual. It examines the relationship between the international human rights system and the domestic human rights regime. The unit gives particular attention to the social construction of rights and examines Australian human rights from political economy, gender, power, cultural and indigenous perspectives.

It critically reviews the effectiveness of the domestic human rights system in the protection, promotion and realization of civil, political, economic, social, cultural and development rights.

Courses: HH01
Incompatible with: HSB005
Contact hours: 3 per week

HBB276 Indigenous Knowledge: Research, Ethics and Protocols
This unit provides students with a critical examination of the major ethical and moral issues arising from the designing and conducting of research on/in Australian Indigenous peoples/communities or issues. The unit examines the calls by Indigenous researchers for the decolonising of research methods - a process which critically examines the historical and philosophical bases of Western research and the frustrations of Indigenous researchers with various Western paradigms, academic traditions and methodologies.

Courses: HH04
Credit points: 12
Semester: 2

HBB300 Current Developments in Human Services
This unit identifies major forces influencing the direction and nature of the welfare state. It explores the impact of change in welfare state for the contemporary human service industry. The unit identifies emerging trends in human service organisation and delivery, and explores the implications for human service practitioners, service providers, and consumers.

Courses: HH02, HS07
Incompatible with: HSB300
Contact hours: 2 week block
Credit points: 12
Semester: 2

HBB301 Advanced Professional Practice
Only enrolled Bachelor of Social Science (Human Services) students can undertake this unit. Students prepare for employment by developing and refining their assessment and intervention skills while undertaking a 400 hour vocationally based practice experience supervised by an experienced practitioner. Demonstrated sound and ethical practice abilities are expected of students during an intensive exposure to a range of practice methods, issues and dilemmas. Students and their agency supervisor devise a learning plan, which assesses work performance in six core competencies and a flexible assessment item. Students attend university workshops and complete university requirements including a job application and reflective assignment.

Courses: HS07, HH02
Prerequisites: HSB201, HSB218, HSB228, HSB211, HSB229
UNIT SYNOPSIS

Courses: HH01, HU22, IF30, IF43, IF70, IF81, IF82, IF86, HH03, HH04, IF12, IX01, IX11, IX12

Incompatible with: HUB933

Credit points: 12  Semester: 1

► HHB316 Social Science Project

Courses: HH04  Campus: CA
Credit points: 24  Semester: 2

► HHB319 Child Protection Intervention Skills

This unit will focus on the development of skills for assessment and intervention to safeguard the welfare and rights of children and young people in families where personal and environmental challenges compromise the child or young person's safety. Particular attention will be paid to skills and processes necessary for maintaining a child-focused approach when working with families who have multiple and complex needs.

Courses: HH02, HH01, IF30, IF43, IF81, IF82, IF86, IX11, IX12

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 1

► HHB320 Independent Project 1

This unit is designed to develop research and writing skills, and is available within the BA degree, enabling students to engage in a small-scale research project.

Courses: HH01, HU20, HU22, SS60, HH03, HH04

Incompatible with: HUB954  Campus: CA
Credit points: 12  Semester: 1, 2

► HHB321 Independent Project 2

This unit is designed to develop research and writing skills, and is available within the BA degree, enabling students to engage in a small-scale research project.

Courses: HH01, HU20, HU22, HH03, SS60, HH04

Incompatible with: HUB955  Campus: CA
Credit points: 12  Semester: 1, 2

► HHB323 Fieldwork Studies

This unit is generic for students undertaking 12 credit points of study in overseas supervised fieldwork mode. This unit provides a general framework for fieldwork study that can be adapted to a variety of contexts, particularly for fieldwork studies in Asia and Pacific regions.

Courses: HH01, HU22, HH04, IF43, IF30, Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB324 Regional Field Studies (Geography)

This unit is for students undertaking 12 credit points of study in fieldwork in the geography program. This unit provides both a general framework of fieldwork in geography and a specific fieldwork experience. The unit will provide opportunities for students to put into practice fieldwork skills introduced in first and second year units in the geography program.

Courses: HH01, HU22, IF43, IF70, IF81, IF82, IF83, IF84, IF86, IF30 HH04, IX01, IX11, IX12

Contact hours: 3 per week  Campus: CA
Credit points: 12

► HHB328 Researching Applied Ethics

This unit examines the different methods that characterise contemporary research in Applied Ethics. The historical emergence of

Applied Ethics, the key assumptions that underpin the various methodologies, and the current critical debates on method are key topics considered in this unit.

Courses: HH01, HU20, HU22, HU21, NS40, NS48, IF12

Incompatible with: HUB758

Contact hours: 3 per week  Campus: CA
Credit points: 12  Semester: 2

► HHB329 Advanced Project

Research or field projects as approved by the Faculty.

Courses: HH01, HH03, HH04  Campus: CA
Credit points: 12  Semester: 2

► HHB330 Internship Program

This unit provides an opportunity for students to be placed in an appropriate off-campus situation in work related to their studies.

Courses: HH01, HH04

Incompatible with: HUB952

Credit points: 24  Semester: 1

► HHB335 Bodies, Cyborgs and Cyberspace

This unit critically examines modern and postmodern concepts of the body, with a particular focus on the contemporary understanding of the body as 'cyborg', and the bodily-based transformative effects of technoscience. To achieve this, the unit takes a trans-disciplinary approach, mixing sociology with cultural studies, philosophy, science, medicine, information technology, and the performing/visual arts.

Courses: HH22, HS14

Contact hours: 12 per component  Campus: CA
Credit points: 12

► HHB403 Literature Review

This is part of a supervised program in the Honours student's chosen area of specialisation. An assessed critical paper on literature relevant to the Honours dissertation topic is prepared.

Courses: HH21, HH23, HU21, SS13

Prerequisites: HU20, HU22, SS60, SS07 or equivalent

Incompatible with: HUB901  Campus: CA
Credit points: 12  Semester: 1, 2

► HHB404 Honours Thesis 1

This unit includes the supervised design and initial development of an honours dissertation leading to completion of a dissertation, including synopses and projected chapters, and a statement of objectives, methods and sources.

Courses: HH21, HH23

Prerequisites: HH01, HU20, HU22, SS60, SS13 or equivalent

Incompatible with: HUB902  Campus: CA
Credit points: 12  Semester: 1, 2

► HHB405 Honours Thesis 2

This unit includes supervised research and writing of the honours dissertation, normally between 12,000 and 15,000 words.

Courses: HH21, HH23, HU21, SS13

Prerequisites: HH01, HU20, HU22, SS60, SS07 or equivalent, HUB901, HUB902

Incompatible with: HUB903

Credit points: 24  Semester: 1, 2

► HHB406 Honours Thesis 3

Courses: HH21

Credit points: 12  Semester: 1, 2

► HHN001-5 Research Project

Courses: HH40

Credit points: 12  Semester: 1, 2

► HHN002 Graduate Seminar

Campus: CA
Credit points: 12  Semester: 1, 2

► HHN016 Research Methods for Professional and Organisational Development

This unit focuses on research methods for enhancing professional practice and the design and development of social service organisations. In module one you will learn about methods suitable for individual and collaborative reflection on practice. Issues of problem identification and question development are considered as well as processes and procedures for gathering and analysing data about professional practice. In module two you will study the research method of participatory action research: an effective tool for organisational and program evaluation and development.

Courses: HH31, HH31, HH32, HH21, HH22, HH23

Contact hours: 3 per week  Campus: CA
Credit points: 12

► HHN410 Logic of Social Inquiry

This unit assists students to address crucial questions of research design and methodology in the formulation and conduct of both qualitative and quantitative research projects.

Courses: HH22, HH23, HH31, HH32, HH40, HH50

Incompatible with: PYB454  Campus: CA
Credit points: 12  Semester: 1
**UNIT SYNOPSIS**

**HHP004 Child and Family Services - Graduate Studies**

In this unit students conduct a comparative analysis of national and international policies, practices and processes in services for children and families and identify the impact of socio-cultural, political and economic processes on the design and delivery of child and family services. Students identify and critically evaluate the application of selected and family services. Students identify and of socio-cultural, political and economic

---

**Incompatible with:** HSP424

**Contact hours:** 3 per week  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 2

**HHP006 Disability Services - Graduate Studies**

This unit offers the opportunity to extendively analyse, evaluate and respond to developments in the disability area. An ability to reflect on and make considered responses to current Australian developments is enhanced as students engage in in-depth analysis and collaborative critique of national and international provisions made to address issues concerning people with disabilities. Exploring areas of interests will promote skills of critical analysis and the ability to apply current research and debate within the disability area.

---

**Courses:** HHS1, HSH1, HHS2, HS16, HS30, HS13  
**Incompatible with:** HSP426

**Contact hours:** 3 per week

**HHP007 Youth Services - Graduate Studies**

This unit equips students with the ability to evaluate and respond to developments in services to young people through comparative analysis of changes and continuities in policies and practices. Students will discern key human service concepts and identify how these operate in selected service contexts in both national and international settings. Issues associated with evidence building for policy and service developments are addressed. Students identify their own knowledge needs and explore concerns arising in contexts they know about in order to enhance skill development and transfer, in particular the informed application of research.

---

**Courses:** HHS2, HHS1, HHS0, HS13, HS16, HS15  
**Incompatible with:** HSP427

**Contact hours:** 3 per week  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 2

**HHP011 Critical Issues in the Human Services**

This unit identifies critical contemporary issues impacting upon the human services industry in particular. The contemporary environment in which human services exist is creating sets of tensions which have the potential to both seriously challenge and radically reorder and reconstruct service delivery and professional practice. The unit is designed to explore and develop comprehend the issues, and their implications for the specific domains of service delivery of the proposed research projects and/or areas of interest of participants.

---

**Courses:** HHS2, HHS1, HS15, HS16  
**Incompatible with:** HSP411

**Contact hours:** 3 per week  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 1

**HHP012 Leadership in the Human Services**

This unit explores conceptions of and skills in leadership to enable participants to provide effective leadership in human service contexts. It reflects an increasing awareness that leadership is of central importance in the development and management of governments and community organisations, and in energising and enabling community groups to identify and meet their needs. Underlying this unit is the notion that leadership, as currently conceptualised, is not simply the task of those in positions of responsibility but all involved in the development and delivery of services.

---

**Courses:** HHS30, HHS1, HHS15, HS16  
**Incompatible with:** HSP412

**Contact hours:** 3 per week  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 1

**HHP013 Managing Human Service Organisations**

This unit creates an awareness of the issues and challenges faced by the human service manager and improve knowledge of the functions and techniques of management. As well as developing an understanding of the application of these management techniques to human services, the unit recognises the influence between the quality of management and the quality of service provided to service users. It builds competency in becoming effective human service managers.

---

**Courses:** HHS30, HHS1, HHS15, HS16  
**Incompatible with:** HSP421

**Contact hours:** 3 per week  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 2

**HHP015 Contracting and Policy in the Human Services**

Service delivery systems in the community services industries are in the process of being restructured. The primary dynamic carrying the process is the imperatives of understanding performance and accountability between purchasers (governments) and providers (non-state agencies). Contracts are an important part of these changes. To date, there is little experience in the industry of the management of a contract regime or its implications for service delivery outcomes. This unit is designed to convey key skills in managing contracts from both the purchaser and provider side of the equation.

---

**Courses:** HHS30, HHS1, HHS15, HS16  
**Incompatible with:** HSP423

**Contact hours:** 3 per week  
**Campus:** CA  
**Credit points:** 12

**HHP020-1 Human Services Practice Related Research**

Students explore an issue from their practice or the field using research and scholarship.

---

**Courses:** HHS32, HS16  
**Campus:** CA  
**Credit points:** 24  
**Semester:** 1, 2

**HHP020-2 Human Services Practice Related Research**

Students explore an issue from their practice or the field using research and scholarship.

---

**Courses:** HHS32, HS16  
**Campus:** CA  
**Credit points:** 24  
**Semester:** 1, 2

**HHR510 Conference Presentation 1: Networking and Presentation**

This unit develops students’ skills in summarising, reporting and communicating doctoral-level research. The unit accompanies the development and completion of the first professional practice project, and is designed in order that students can learn how to disseminate the results of that project. The unit also focuses on a variety of other issues in the communication and dissemination of professional practice, including mentoring and networking, and leadership roles in the professions.

---

**Courses:** HHR50  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 1, 2

**HHR520 Conference Presentation 2: Professional Networks**

This unit develops the skills learned in HHR510; however, while that unit focused on academic forums for the presentation of research and the development of research networks, this unit concentrates on the translation of doctoral-level research for work-based settings. This unit develops students’ skills in summarising, reporting and communicating doctoral level research.

---

**Courses:** HHR50  
**Prerequisites:** HHR510  
**Campus:** CA  
**Credit points:** 12  
**Semester:** 1, 2

**HHR530 Conference Presentation 3: Academic Networks**

This unit focuses on the presentation of high level, complex work, to an expert audience. The unit develops the emphases in HHR510 and HHR520 on networking and on the
Courses: HHR50
Prerequisites: HHR520
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR551-1 Professional Practice

Project 1 1/4
The professional practice project allows students to work with supervisors on the first professional project for the Doctor of Social Science. The professional project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.
Courses: HHR50
Credit points: 12
Semester: 1, 2
► HHR551-2 Professional Practice

Project 1 2/4
The professional practice project allows students to work with supervisors on the first professional project for the Doctor of Social Science. The professional project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Credit points: 12
Semester: 1, 2
► HHR551-3 Professional Practice

Project 1 3/4
The professional practice project allows students to work with supervisors on the first professional project for the Doctor of Social Science. The professional project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Credit points: 12
Semester: 1, 2
► HHR551-4 Professional Practice

Project 1 4/4
The professional practice project allows students to work with supervisors on the first professional project for the Doctor of Social Science. The professional project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Credit points: 12
Semester: 1, 2
► HHR561-1 Professional Practice

Project 2 1/4
The professional practice project provides for students to work with supervisors on the second professional project for the Doctor of Social Science. The project deals with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Prerequisites: Part 1 of Course (HHR501, HHR510, HHR551, 3 electives)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR561-2 Professional Practice

Project 2 2/4
The professional practice project provides for students to work with supervisors on the second professional project for the Doctor of Social Science. The project deals with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Prerequisites: Part 1 of Course (HHR501, HHR510, HHR551, 3 electives)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR561-3 Professional Practice

Project 2 3/4
The professional practice project provides for students to work with supervisors on the second professional project for the Doctor of Social Science. The project deals with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Prerequisites: Part 1 of Course (HHR501, HHR510, HHR551, 3 electives)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR561-4 Professional Practice

Project 2 4/4
The professional practice project provides for students to work with supervisors on the second professional project for the Doctor of Social Science. The project deals with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 48 credit points.

Courses: HHR50
Prerequisites: Part 1 of Course (HHR501, HHR510, HHR551, 3 electives)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-1 Professional Practice

Project 3 1/8
The project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-2 Professional Practice

Project 3 2/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-3 Professional Practice

Project 3 3/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-4 Professional Practice

Project 3 4/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-5 Professional Practice

Project 3 5/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-6 Professional Practice

Project 3 6/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-7 Professional Practice

Project 3 7/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50
Prerequisites: Part 2 of course (HHR561-4, HHR520)
Campus: CA
Credit points: 12
Semester: 1, 2
► HHR571-8 Professional Practice

Project 3 8/8
This project provides for students to work with supervisors on the third professional project for the Doctor of Social Science. The project will deal with project planning, project implementation and project evaluation. The project will be designed to fit the scale, scope and focus of 96 credit points.

Courses: HHR50

Campus: CA
Credit points: 12
Semester: 1, 2
UNIT SYNOPSES

HLN405 Qualitative Research
This unit addresses a range of qualitative methodologies and methods which represent alternative approaches to the application of the quantitative paradigm in health science research. The dominance of the natural sciences in nursing/health research has come into question in recent times and thus the unit introduces students to the origins of such challenges, to the knowledge bases of the alternative approaches to investigating the microsocial world of health/illness and to the relevant research methods. The unit comprises a series of lectures, seminar presentations and relevant readings.
Courses: HLLL8, HLLL50, HLLL52, HLLL55, NSS85, NS64, PU65, PU69
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1, 2

HLN700 Thesis
The thesis provides an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the program. Coursework conducted in the area of specialisation may be applied in a practical manner reflecting the student's specific interest in health science. The work represents an independent and original piece of research completed under the guidance of a supervisor. The thesis may be a report on research that makes a contribution to knowledge or a study in which the student critically analyses existing knowledge and produces observations and conclusions of value to the field concerned.
Courses: HLLL8, HLLL5
Prerequisites: HLLL703 Campus: KG, Ext Credit points: 24 Semester: 1, 2, 3

HLN705 Introduction to Quantitative Research Methods
The content of this unit emphasises the practical aspects of quantitative research methods design, with the aim of exposing students to important concepts in the design of research studies and in the assessment of the research of others. There is a strong emphasis on applying concepts through critical reading of the literature and the development of a comprehensive research proposal as the main practical exercise.
Courses: HLLL8, HLLL58, HLLL89, HLLL90, PU60, PU67, PU85
Incompatible with: PUB316 or equivalent
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

HLN705 Advanced Quantitative Research Methods
The content of this unit builds on the basic statistics background assumed of students. A unifying theme is the concept of sources of variation in collected data, how proper design of study and measurement instruments minimises some sources of variation (error), how analytical techniques account for other sources, and finally the issue of introduced error that cannot be accounted for, but must be addressed in discussion of results. Analytical strategies for modelling health data are compared, and practical experience focuses on the analysis and interpretation of various data sets.
Courses: HLLL8, HLLL68, HLLL89, HLLL90, PU40, PU43, PU60, PU85
Prerequisites: HLLL705 or PUN105
Contact hours: 4 per week Campus: KG Credit points: 12 Semester: 1

HLN708 Project
This 48 credit point project extends the range of applied investigative options for the Master of Health Science students to undertake. The project is designed to be a workplace-based unit that enables students to undertake a concentrated applied project in a specific area of interest in the workplace and to combine work and study requirements. It enables students to concentrate on a specific area of interest and to apply intellectual rigour to that area to complete a project of work at an advanced level.
Courses: HLLL8
Campus: KG, Ext Credit points: 48 Semester: 1, 2

HLN705-1 Thesis
Students undertake original research with the guidance of a supervisor. This thesis provides an opportunity for coursework conducted in the area of specialisation to be applied in a practical manner reflecting the student's specific interest in health science. HLLL750-1 and HLLL750-2 are the part-time version of HLLL700.
Courses: HLLL8
Credit points: 24 Semester: 1, 2, 3

HLN750-2 Thesis
Students undertake original research with the guidance of a supervisor. This thesis provides an opportunity for coursework conducted in the area of specialisation to be applied in a practical manner reflecting the student's specific interest in health science. HLLL750-1 and HLLL750-2 are the part-time version of HLLL700.
Courses: HLLL8
Credit points: 24 Semester: 1, 2, 3

HLP101 Advanced Discipline Readings
This unit is a compulsory component of the Faculty of Health Honours programs. It provides the opportunity for students to identify and review the literature relevant to their selected research topic. A one day seminar in enhanced information retrieval skills is included in the unit.
Courses: HLLL50, HLLL52, HLLL55
Corequisites: HLP103 (nursing students must complete both)
Corequisites: HLP101
Credit points: 12 Semester: 1, 2

HLP103 Dissertations
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor. A written report in the form of a dissertation proposal must be submitted by the end of Week 6 in the semester in which enrolment in the dissertation commences.
Courses: HLLL50, HLLL52, HLLL55
Campus: KG

HLP103-1 Dissertation
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor. A written report in the form of a dissertation proposal must be submitted by the end of Week 6 in the semester in which enrolment in the dissertation commences.
Courses: HLLL50, HLLL52, HLLL55
Campus: KG
Credit points: 12 Semester: 1, 2

HLP103-2 Dissertation
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor. A written report in the form of a dissertation proposal must be submitted by the end of Week 6 in the semester in which enrolment in the dissertation commences.
Courses: HLLL50, HLLL52, HLLL55
Campus: KG
Credit points: 12 Semester: 1, 2

**HLR70-3 Dissertation**  
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

**Courses:** HLR50, HLR52, HLR55  
**Credit points:** 12  
**Semester:** 1, 2

**HLR70-4 Research Project**  
The Doctor of Health Science prepares graduates to be leaders in their professions. The degree incorporates a large research component which may be a single large research project or a portfolio of approved related smaller projects. The research is designed to be strongly grounded in the students’ professional practice in order to enhance and extend critical thinking, synthesis, application of theoretical frameworks and the development of new knowledge at an advanced level in a relevant field. The research can be interdisciplinary, but should apply concepts and principles acquired and developed through the coursework component of the degree.

**Courses:** HLR90  
**Credit points:** 24  
**Semester:** 1, 2, 3  
**Campus:** KG

**HLR70-5 Research Project**  
The Doctor of Health Science prepares graduates to be leaders in their professions. The degree incorporates a large research component which may be a single large research project or a portfolio of approved related smaller projects. The research is designed to be strongly grounded in the students’ professional practice in order to enhance and extend critical thinking, synthesis, application of theoretical frameworks and the development of new knowledge at an advanced level in a relevant field. The research can be interdisciplinary, but should apply concepts and principles acquired and developed through the coursework component of the degree.

**HMB171 Fitness Health and Wellness**  
The dimensions and interrelationships of health, physical activity and wellness are studied. Basic principles of conditioning and exercise prescription necessary to demonstrate the impact of physical activity on lifestyle diseases, health behavior and well-being are examined. Principles and theory of behaviour change are employed.

**Courses:** ED43, ED50, ED51, ED52, HL 40, HL42, HL44, HM42, IF62, IF73  
**Contact hours:** 3–4 per week

**HMB172 Nutrition and Physical Activity**  
This unit is an introduction to principles of nutrition in relation to the physical activity setting, and the role of nutrition and physical activity in weight management. This unit also covers important elements of child growth and development (anthropology) in relation to nutrition and health. The unit is designed to underpin studies in exercise physiology and sports nutrition.

**Courses:** HM42, IX40, IF62, HL43, HM45, IF62, HL40  
**Contact hours:** 3 per week

**HMB231 Physical Education Curriculum Studies 1**  
This unit provides students with a range of understandings and competencies for interpreting and managing the physical education environment for teaching and learning. It assists students to develop competencies needed for lesson planning and teaching at all school levels.

**Courses:** ED90, ED95, IX04
### UNIT SYNOPSIS

**Contact hours:** 3  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

<table>
<thead>
<tr>
<th>HMB271 Foundations of Motor Control, Learning and Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>This unit introduces students to the behavioural and neural bases of movement control through an examination of the central nervous and neuromuscular systems, hierarchical control, human information processing and dynamical systems. It covers elements of sensory mechanisms related to movement. Foundations of motor learning and adaptation are introduced, linking underlying mechanisms of learning with principles that may be applied in teaching, coaching and rehabilitation.</td>

**HMB273 Exercise Physiology 1**  
This unit describes the immediate physiological responses to exercise, and the adaptations that occur with long-term exercise training. Exercise places a demand on the human body to provide sufficient energy to perform. The metabolic, hormonal, cardiovascular and pulmonary systems must adapt to meet the challenge of homeostasis. The active skeletal muscle must increase extraction and utilisation of oxygen and other fuels, the cardiovascular system must respond to improved gas and fuel transport, and lung function must change to facilitate increased respiratory exchange.

</table>

**HMB274 Functional Anatomy**  
This unit includes the following: surface anatomy of the trunk and upper and lower limb; morphological and mechanical properties of bone, muscle-tendon units with implications for physical activity; joint structure and function; analyses of movement tasks including walking and running; clinical electromyography and electromyography in functional anatomy of movement tasks.

**HMB276 Research in Human Movement**  
This unit includes principles of research: purposes, philosophy, applications. It addresses quantitative research including basic statistics, descriptive, ANOVA, correlation, regression and non-parametrics, and basic research design hypothesis testing. Qualitative research includes methodology, data collection, and theory building. Research presentation includes: writing a research report and developing conclusions. This unit also considers application of research, examples in human movement, related literature, computer data analysis, and information retrieval.

**HMB277 Biomechanics**  
This unit considers the relationship between nutrition and exercise and physical activity. Areas covered include dietary and energy requirements in exercise and sport and substrate utilisation at the cellular level during exercise. The influence that nutrition has on performance via changes in body composition, fuel utilisation, blood biochemistry and ergogenic aids will also be covered. Nutritional supplements and water and electrolyte balance in exercise and sport are also part of this unit.

**HMB278 Biological Aspects of Physical Education**  
This unit provides an opportunity for critical inquiry and analysis of human movement from a multidisciplinary perspective. The integration of the human movement principles of sub-disciplines (functional anatomy, biomechanics, motor control, sociology of sport and physical activity and development) are evaluated and applied to coaching of sport and teaching in physical education.

**HMB282 Resistance Training**  
This unit aims to equip students with the basic knowledge, skills and competencies required for exercise prescription in resistance training for muscular fitness. Students build on prior knowledge of biomechanics, anatomy, physiology and motor control to develop understanding of the mechanical and physiological determinants of muscular fitness. The unit incorporates a blend of theoretical background, practical knowledge and skills in the main areas of muscular hypertrophy, strength, power and endurance. This understanding is then used to critically analyse resistance training programs.

**HMB292 Health Education Curriculum Studies 1**  
This is the initial unit in a series of three health education curriculum units. Students are introduced to current health education curriculum documents with a specific focus on the Queensland Education System. The unit also provides students with a range of competencies for interpreting and managing the health education classroom as a complex social environment for teaching and learning.

**HMB300 Primary Curriculum and Pedagogies: Health and Physical Education**  
This unit provides students with knowledge of how to integrate health and physical education within the other key learning areas. Students learn the connection between physical activity and health and its role in meeting the developmental needs of children. Additionally, they participate in a range of learning experiences appropriate to the developmental needs of children and acquire the skills necessary to safely deliver student learning in an open environment. Topics include principles of the health and physical education years 1-10 syllabus; motor skill development and ability related expectations for teaching HPE; planning for quality instruction and linking physical activity with health; planning and teaching HPE; classroom management and safety issues.

**HMB305 Personal Health**  
Lifestyle is largely determined by an individual functioning in a socio-environmental context that places some limitations on health and resultant health. This unit is designed to assist individuals to develop a positive self-concept, a sound knowledge of lifestyle issues and their implications, and decision-making skills necessary to make wise choices. The focus of this unit is the development of such qualities for personal maintenance and improvement. Movements in this direction are achieved by analysing the processes involved in developing individuals capable of taking control of their lifestyles and resultant health. Much of this analysis will be self-focused.

**HMB307 Health and Physical Education Curriculum (Primary)**  
This unit provides teachers for the years 1-10 Health and Physical Key Learning Area, with appropriate learning experiences based on current philosophy and knowledge focused to assist children in meeting developmental needs. Health and Physical Education (HPE) can add significantly to this development by providing physical, emotional, social and intellectual support. It is necessary for Primary teachers to understand the syllabus and the implications it contains to enable
them to develop modern units and lesson plans.

Courses: ED26, ED51, ED56, IF82, IF84
Contact hours: 4 per week
Campus: KG
Credit points: 12

► HMB313 Socio-Cultural Foundations of Physical Activity

This unit lays a foundation in the disciplines of the socio-cultural areas which underpin the study of human movement. It serves as an introduction to the historical, sociological, philosophical, anthropological and cultural foundations of sports, games and leisure activities.

Courses: ED90, ED51, HL42, HL43, HM42, HM45, IF46, IF62, IX04
Contact hours: 4 per week
Campus: KG
Credit points: 12

► Semester: 1

► HMB314 Performance Skills 1

This unit involves the application of movement principles to the analysis and development of techniques in all major swimming, water rescue methods, and problem areas in skill development. Emphasis is placed on the application of relevant movement knowledge and skills to suit game situations and on learning appropriate strategies for teaching and coaching selected games.

Courses: ED90, ED91, ED51, ED52, IX04
Contact hours: 6 per week
Campus: KG
Credit points: 12

► Semester: 1

► HMB315 Performance Skills 2

In this unit various game forms are analysed in order to identify fundamental game skills and problem areas in skill development. Emphasis is placed on the application of relevant movement knowledge and skills to suit game situations and on learning appropriate strategies for teaching and coaching selected games.

Courses: ED90, ED91, ED51, ED52, IX04
Contact hours: 6 per week
Campus: KG
Credit points: 12

► Semester: 1, 2

► HMB331 Physical Education Curriculum Studies 2

This unit extends the principles of professional practice established in the first curriculum studies unit and further encourages students to develop a critically reflective approach to teaching. Students learn how to extend professional practice with a range of understandings and competencies for interpreting and managing the health and physical education classroom as a complex environment for teaching and learning and develop competencies needed for planning and teaching a range of health and physical education units of work. Current health and physical education curriculum documents are explored.

Courses: ED90, ED95, IX04
Prerequisites: HMB231
Campus: KG
Credit points: 12

► Semester: 2

► HMB332 Health Related Fitness

This unit provides a forum for a review of selected classic and recent literature representing the growing body of evidence and the arguments supporting the relationships between physical activity and chronic disease and the relationships between physical activity, fitness, optimal health and wellness. Special attention is given to the question of ‘How much is enough?’ to achieve health and wellness enhancement. This knowledge is applied to an individual or a small group within the school, community and personal lifestyle contexts.

Courses: ED90, ED51, HL40, HM42, IF62, IX04
Prerequisites: HMB171 or PUB327
Contact hours: 3-4 per week
Campus: KG
Credit points: 12

► Semester: 1

► HMB333 Child and Adolescent Health

This unit focuses on the wide range of factors that impact on the health of individuals in the two crucial stages of life: childhood and adolescence. An analysis is made of knowledge, beliefs and skills required for promoting health-enhancing behaviours during these ages and experience is provided on some of the skills needed to assess and maintain the health status of children and adolescents.

Courses: ED90, ED91, ED52, IX04
Contact hours: 3 per week
Campus: KG
Credit points: 12

► Semester: 2

► HMB337 Organisation and Management in Physical Education and Sport

This course provides a multidisciplinary perspective, drawing on research from psychology, neuroscience, biomechanics, robotics, neural networks and medicine. The unit is organised around the theme of sensorimotor integration as related to posture and balance, locomotion and arm movements such as reaching, grasping and pointing.

Courses: ED90, IX04
Prerequisites: HMB314, HMB315
Contact hours: 3 per week
Campus: KG
Credit points: 12

► Semester: 2

► HMB341 Sporting and Outdoor Education Administration

This course provides a multidisciplinary perspective, drawing on research from psychology, neuroscience, biomechanics, robotics, neural networks and medicine. The unit is organised around the theme of sensorimotor integration as related to posture and balance, locomotion and arm movements such as reaching, grasping and pointing.

Courses: ED90, IX04
Prerequisites: HMB314, HMB315
Contact hours: 3 per week
Campus: KG
Credit points: 12

► Semester: 2

► HMB342 The Development of Teaching Skills in Primary Physical Education

This unit focuses on the wide range of factors that impact on the health of individuals in the two crucial stages of life: childhood and adolescence. An analysis is made of knowledge, beliefs and skills required for promoting health-enhancing behaviours during these ages and experience is provided on some of the skills needed to assess and maintain the health status of children and adolescents.

Courses: ED90, ED51, ED52, IX04
Contact hours: 3 per week
Campus: KG
Credit points: 12

► Semester: 2

► HMB343 Motor Control and Learning 2

This unit extends the principles of professional practice established in the first curriculum studies unit and further encourages students to develop a critically reflective approach to teaching. Students learn how to extend professional practice with a range of understandings and competencies for interpreting and managing the health and physical education classroom as a complex environment for teaching and learning and develop competencies needed for planning and teaching a range of health and physical education units of work. Current health and physical education curriculum documents are explored.

Courses: ED90, ED95, IX04
Prerequisites: HMB231
Campus: KG
Credit points: 12

► Semester: 2
UNIT SYNOPSES

Credit points: 12  Semester: 2
► HMB376 Motor Development in Children
This unit includes the theoretical perspective of normal and abnormal motor development, incorporating maturational, descriptive and behavioural aspects and the underlying sensory, perceptual, neurological and cognitive changes which influence motor development in children. A theoretical understanding of developmental differences and development delay in children with intellectual, sensory or physical disability. Experience is obtained in developmental and adapted physical activity programs.
Courses: ED90, ED51, ED52, HM42, IF62, IX04
Prerequisites: HMB271
Contact hours: 4 per week  Campus: KG  Credit points: 12  Semester: 1
► HMB377 Children in Sport
This unit includes the following: physical development of the young athlete; physical measurement; benefits of participation in sport and physical activity; psycho-social issues; positive and negative effects of participation including competitive stress; injuries to the growing skeleton; overtraining, overuse injuries; strength training in childhood and adolescence; promotion of safety in sport; accreditation of teachers and coaches; policy guidelines for junior sport; Aussie sport programs.
Courses: ED90, HM42, IF62, IX04
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1
► HMB379 Disorders of Human Movement
This unit introduces a selection of disorders and disease states that limit or alter the capacity for movement and physical activity. Each is described in terms of relevant epidemiology and pathophysiology, emphasizing the relationship between each disorder and movement or activity, together with factors affecting this relationship. The unit provides students with a basic knowledge of a selection of movement-related disorders, as a foundation for subsequent applications, whether in research, working with special populations, in rehabilitation, or in other clinical settings. The unit also enhances the ability of students to independently study disorders not covered in the unit.
Courses: ED90, ED51, HL40, HL42, HL43, HM42, HM45, IF62, IX04
Prerequisites: HMB271, HMB272, HMB273, HMB274
Contact hours: 4 per week  Campus: KG  Credit points: 12  Semester: 1
► HMB381 Exercise Physiology 2
This unit examines the integrated regulation of the organ system examined in Exercise Physiology 1. Within this integrated perspective, content research areas will be highlighted, including but not limited to (1) exercise performance and environmental stress, (2) special aids to exercise training and performance, and (3) limitations to exercise in healthy normal individuals, elite athletes and selected patient populations.
Courses: ED90, HM42, IF62
Prerequisites: HMB273
Contact hours: 3-4 per week  Campus: KG  Credit points: 12  Semester: 1
► HMB382 Principles of Exercise Prescription
In this unit, students examine the physiological principles and methods used in training and conditioning programs at all levels of physical activity. The integration of fitness assessment and exercise prescription is a major component of the unit, introducing the student to these requirements in the context of aerobic conditioning, resistance training, weight loss and flexibility. There is a strong emphasis on putting theory into practice, including the development and utilisation of appropriate practical skills in both fitness assessment and exercise prescription.
Courses: HM42, IF62, IX04, HL40, HL42, HL43, HM45
Contact hours: 4 per week  Campus: KG  Credit points: 12  Semester: 1
► HMB383 Workplace Health
This unit considers the historical and current position of workplace health as one emerging focus of occupational health and safety. Issues, laws, policies, programs and union, employer and employee perspective are analysed in conjunction with the role of workplace health. The planning, development, promotion, implementation, administration and evaluation of programs from a wellness counsellor's perspective are analysed.
Courses: ED95, HM42, IF62, IX04
Prerequisites: HMB171 or HMB332
Contact hours: 4 per week  Campus: KG  Credit points: 12  Semester: 1
► HMB384 Injury Prevention and Rehabilitation
This unit considers the following: epidemiology and nature of common injuries that occur at home, school, work and during sport activities; current philosophies of preventative measures and strategies for the treatment and rehabilitation of injuries; the role of health training, exercise and fitness in injury prevention, treatment and rehabilitation regimes; the pathology of injuries and repair processes highlighted by examining specific examples.
Courses: ED90, HM42, IF62, IX04
Prerequisites: HMB379
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2
► HMB396 Health Education Curriculum Studies 2
This is the second in a suite of three health education curriculum units. It is designed to extend students with a range of understandings and competencies for interpreting and managing the health education classroom as a complex social environment for teaching and learning. It helps students to develop those competencies needed for planning and teaching health education units of work. It has an important role in preparing students for the professional practice component of the course, leading to the development of confidence and competence in class management skills, and facilitating the use of post-lesson and post-practicum reflection and evaluation.
Courses: ED90, ED95, IX03
Prerequisites: HMB292
Credit points: 12  Semester: 2
► HMB400 Health and Physical Education Curriculum Studies Primary
This unit includes the theoretical perspectives, effective planning and implementation of school work programs and units of work consistent with the Senior Physical Education Syllabus. It will also develop students' skills and confidence in effective teaching practices specifically related to teaching physical education and will assist them to become independent and reflective learners.
Courses: ED90, ED95, IX04
Prerequisites: HMB331
Contact hours: 3  Campus: KG  Credit points: 12  Semester: 1
► HMB441 Sociology of Sport
This unit includes the sociology of sport; historical and contemporary perspectives; sport in Australia; Australia's sporting heritage; corruption of sport; control of sport; media and sport; inequality in sport; social issues in sport.
Courses: ED26, HM42, IF62
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2
► HMB470 Practicum 1
In the first of the Human Movement dedicated practicum units, students undertake in-depth experience at two different workplaces (40 hours each) while maintaining ongoing involvement in the School's clinics (20 hours). The student is provided with an extended opportunity to apply classroom learned knowledge and skills under the supervision of human movement practitioners. Workplace involvement is preceded by a vocational skill seminar and workshop program while an interactive analysis program is instigated post practicum.
Courses: HL40, HL42, HL43, HM42  Campus: KG  Credit points: 12  Semester: 1, 2
► HMB471 Project 1
Students in the Bachelor of Applied Science are required to undertake a project in Year 4. Students work in small groups on original topics. Work includes a literature review and the presentation of experimental hypotheses, research methodology, and analysis procedures. Groups present their research plan in a seminar at the end of semester 1.
Courses: HL42, HL43, HM42, HM45  Campus: KG  Credit points: 12  Semester: 1
► HMB472 Project 2
The project proposal developed in HMB471 is implemented followed by the analysis of results and publication of a report. Groups present their findings in a seminar at the end of semester 2.
Courses: HL42, HL43, HM42, HM45  Prerequisites: HMB471  Campus: KG  Credit points: 12  Semester: 1, 2
► HMB475 Practicum 2
This unit includes a comprehensive vocational experience undertaken as a supervised full-time internship. Students are supervised in the performance of operational tasks including clinical, management and administration and further develop independent professional skills and knowledge. The internship is followed by a comprehensive reflective analysis of the experience.
Courses: HL42, HM42
This unit examines contemporary theories of learning or coaching programs that promote understanding of the relationship between the sciences and performance in physical activity and sport; design teaching and learning or coaching programs that promote understanding of the relationship between the sciences and performance in physical activity and sport.

Courses: ED13, HL88
Credit points: 12
Semester: 1

HMP390 Rugby Coaching - Principles and Skills
This unit extends the principles of professional practice established in HMP231 and HMP331 and extends the principles of professional practice in a sport or activity setting. The project provides students with an opportunity to conduct a study, or to trial a novel coaching technique, administrative procedure, assessment method or other innovative practice in a sports setting. The project builds on prior knowledge and skills acquired in other units. It will be chosen and approved after discussion with an academic supervisor, and with the agreement of any other than the student's principal area. Students will prepare a report on the project and its outcomes.

Courses: HM34
Credit points: 12
Semester: 2

HMP385 Sport Practicum (Rugby)
This unit students will undertake a practicum placement in an approved sports setting. The tasks undertaken as well as the practicum site will be determined by agreement between the student, the academic supervisor, and the practicum site supervisor. Placements are chosen so as to extend and broaden the professional experience students may already have had in sport; thus placements may be in a sport or activity other than the student's principal area. Students will communicate regularly with supervisors, maintain a diary and prepare reports on and evaluations of the activities undertaken during the placement.

Courses: HM34
Credit points: 12
Semester: 1
UNIT SYNOPSIS

Courses: ED48
Credit points: 12
Semester: 2
► IBB101 Business in Australia
This unit will introduce international students and students new to Australia to the business environment of Australia. Students will examine historical, socio-cultural, geographical, economic, political and other factors and contemporary issues that impinge upon doing business in Australia. Learning activities include case studies, field studies and industry analysis. Generic skills addressed include teamwork, report writing and presentation skills.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF51
Incompatible with: MIB101
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2
► IBB202 Fundamentals of International Finance
In this unit students analyse the way international operations and performance of business can be put at risk by changing financial and regulatory conditions across borders and determine how best to manage the exposure to this risk. This unit examines the following: the evolution of the international financial system; the foreign exchange market; the types of foreign exchange rate exposures; managing exchange; translation and consolidation risks; assessing foreign direct investment targets; comparing the performance of foreign affiliates; operations exposure to regulatory risk of tax; investment and competition policy changes; country risk assessment and managing country risk exposure.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB119 or BSB116; and BSB113 or BSB122
Incompatible with: MIB202, EFB312
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2, 3
► IBB205 Cross-Cultural Communication and Negotiation
The course develops students’ abilities to identify and resolve problems in cross-cultural communication or negotiation situations where cultural differences have created misunderstandings or undesirable or unexpected outcomes. It first explores the concept of ‘national culture’ by considering the work of major theorists of cultural value dimensions - from Hall to Schwartz. Students are encouraged to analyse communication/negotiation process issues in terms of these value dimensions and to practice managing the process of communication/negotiation to improve their outcomes.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB119; BSB116 for students who commenced prior to 2002
Incompatible with: MIB205
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2
► IBB208 European Business Development
This unit focuses on the major factors involved in the development of European business practices, organisational structures and government/business relations. Topics covered will include: demographic change; agriculture; trade and colonisation; transport and communications; financial institutions and capital accumulation; intellectual and religious movements; economic theories; the role of government; war and revolution; industrialisation; big business; the Great Depression; social change. Various countries will be used as case studies to illustrate the topics.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB119 or BSB116
Incompatible with: MIB200
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1
► IBB210 Export Management
This unit presents students with information critical for the successful planning, organisation, implementation and control of export operations. The unit is highly applied and covers practical aspects of the production, dispatch and distribution of products for international markets. Specifically the unit addresses legal, documentary, physical and financial challenges to the delivery of goods and services, and to the assured receipt of payment in return for that delivery. The processes of planning, market analysis, information gathering, cooperative arrangements with government and other firms are all considered. Contemporary developments in technological applications and business practices are illustrated.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Incompatible with: MIB210
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2
► IBB213 International Marketing
The aim of this unit is to provide students with a thorough understanding of the multiplicity of issues that impact on the development of international marketing strategies and plans and their operational implementation. The unit is highly applied and provides students with the following opportunities: to analyse global international firms, their marketing strategies and various international marketing issues in a variety of geographic and industry contexts; to evaluate methodologies and new practices for handling problems and issues typical of global and international markets and competition; to develop an operationally sound international marketing plan.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: BSB119 & BSB116; or BSB113 or BSB122
Incompatible with: MIB210
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2
► IBB231 Business Study Tour to China
This unit is designed to build strong links between theoretical learning and the practical application of students’ business studies; they undertake a practical investigation of the issues pertaining to doing business in The People’s Republic of China. Students stay at Suzhou University to receive lectures from Suzhou University staff on issues of culture and business practices in China, experience the local culture, and undertake a range of industry visits as well as receiving presentations by Chinese and foreign executives. Students are required to participate in activities both before and after the trip to develop and present research projects relevant to their own program of study.
Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48
Prerequisites: BSB119 or BSB116
Incompatible with: MIB233
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1
► IBB232 Business Study Tour to India
This unit is designed to build strong links between theoretical learning and the practical application of students’ business studies; they undertake a practical investigation of the issues pertaining to doing business in India. Students stay at the Management Development Institute (MDI) Delhi, receive lectures from MDI staff on issues of culture and business practices in India, experience the local culture, and undertake a range of industry visits as well as receiving presentations by Indian and foreign executives. Students are required to participate in activities both before and after the trip to develop and present research projects relevant to their own program of study.
IBB300 International Business Strategy

This unit aims to develop student competencies in the analysis of issues and problems encountered by international firms in the formulation and implementation of business strategies. The unit emphasises the connection between core competencies, strategy and corporate performance and uses case studies to analyse the strategic behaviour of global companies. Issues examined include: the forms of international involvement and entry mode strategies; organisational structures, control and cultural diversity; multinational versus global competitive strategies; the formulation and implementation of strategies of international cooperation and strategic alliances; small and medium enterprise (SME) strategies to compete in global markets.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: IBB213 or IBB211 or IBB210 or 96 cp of approved study
Incompatible with: BSB300, MGB330
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2

IBB301 Institutional Development and Business Dynamics

This unit explores the relationship between organisational capabilities and business environments in the global economy. It uses information-related theories to analyse the performances of institutional frameworks, including hierarchies, inter-firm structures, and co-operatives. The unit examines organisational forms used in the past to identify variables that influence structural designs today.

Courses: BS56, IF05, IF09, IF28, IF30, IF47, IF48, IF61
Prerequisites: IBB213 or IBB211 or IBB210 or 96 cp of approved study
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2

IBB303 International Logistics

This unit examines international logistics through the concepts of international distribution channels and international supply chain management. Strategy in managing international logistical constraints is emphasised with practical studies of contemporary international supply chain management in international industries. Traditional costs and financial aspects of supply chain management are considered. Contemporary issues and financial aspects of supply chain management are incorporated including: the impact of e-business on international logistics; the evolution of new technologies for 'smart' packaging, warehousing and international stock control; the combination of international services with goods products; recent technological developments in international transportation and product quality control.

Courses: BS56, IF05, IF09, IF28, IF30, IF47, IF48, IF61
Prerequisites: IBB210 or 96 cp of approved study
Incompatible with: MIB303

IBB304 Global Industry Analysis

The aim of this unit is to analyse the nature and structure of industries in national and international contexts to provide a suitable framework that can be used by students in the study of specific industries. Topics examined include: inter-industry dependencies; international location advantages; regional and international linkages; demand analysis; international transactions in information, goods, services and other products; analysing strategies to control markets through price and product positioning, applying these principles to specific Australian industries conducting international business.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61
Prerequisites: BSB113 and (IBB123 or IBB210 or IBB211) or 96 cp of approved study
Incompatible with: MIB212
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1

IBB306 Risk Management in International Business

This unit aims to develop student competencies in analysing risk management issues in national and international contexts and build a strong appreciation of managing the organisational uncertainty in the current global environment. It introduces conceptual and practical application of risk management techniques used in private and public organisations by combining lectures with practical ‘hands-on’ workshops. The unit examines: conceptual bases of risk management; international, national and sub-national regulatory frameworks; corporate risk management in international firms; business continuity planning; security risk management; emergency response planning; managing crises in organisations; participatory ‘desktop’ simulations of crisis decision making.

Courses: BS56, IF05, IF09, IF28, IF30, IF47, IF48, IF61
Prerequisites: IBB202 or IBB210 or 96 cp of approved study
Credit points: 12 Semester: 1

IBB308 Contemporary Business in Europe

Building on the historical understandings established in the prerequisite unit, this unit analyses contemporary issues relevant to business in Europe. Areas of study include: the growth of regional cooperation in Europe; business and regional cooperation; European Union policies and impacts; challenges of doing business in the emerging markets of Central and Eastern Europe. Case studies of contemporary business activities in Europe involving entry to European markets will be used in the analysis.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: IBB208 or MIB208 or 96 cp of approved study
Credit points: 12 Semester: 1

IBB317 Contemporary Business in Asia

This unit provides an introduction to the process of internationalisation of business firms. It examines the globalisation debates, traces the evolution of international business theory, and provides a critique of the seminal theories. It provides an introduction to the process of research in international business. Aligned with the aims of the unit, students will develop and lead seminars and undertake a review of literature on theoretical and practical issues of globalisation and internationalisation.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF61
Prerequisites: BSB113 and BSB122 and (IBB213 or IBB211 or IBB210); or 96 cp of approved study
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2

IBB319 Special Topic - International Business

This is an open-ended unit where the opportunity will be available for staff and visiting scholars to offer a specialised program of study.

Courses: BS56, IF05, IF09, IF28, IF30, IF47, IF48, IF61
Prerequisites: IBB210 or IBB211 or IBB213
Incompatible with: MIB312
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2, 3

IBB321 Contemporary Business in East Asia

This unit gives students an understanding of the practical challenges of doing business in East Asia. It explains current cultural, social, institutional and regulatory factors that impact upon enterprises in Asia. The unit analyses business strategy, production and procurement, and distribution and marketing in select Asian markets. It addresses contemporary trends: market access; corporate governance; consumer demographics and tastes; the structure and competitiveness of local and foreign firms; integration of new business technologies; the rapid economic and legal reform taking place in East Asia.

Courses: BS56, IF05, IF09, IF28, IF30, IF41, IF47, IF48, IF60, IF61, IF62
Prerequisites: IBB217 or MIB200 or 96 cp of approved study
Incompatible with: MIB317
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2

IBB322 Independent Study Project - International Business

This unit enables students to pursue a specific interest beyond the content offered in existing units. In this unit students will undertake a guided course of study in an aspect of international business approved by the Subject Area Coordinator and developed in consultation with an appointed supervisor. The unit may comprise, as established by a learning contract, guided readings, literature critiques, a research paper on a specific topic or a project requiring application of theoretical to practice. The agreed format of assessment may include a literature review, a research paper, a plan of action, an oral or written examination or a combination of a selection of these items of assessment.

Courses: BS56, IF05, IF09, IF28, IF30, IF47, IF48, IF61
Contact hours: 2 per week Campus: GP
UNIT SYNOPSES

Credit points: 12  Semester: 3
► IBN400 Industry Analysis
  This unit provides students with a detailed understanding of the particular industry or industries on which their organisation operates. A sound understanding of the nature of an industry requires the development of appropriate conceptual, analytical and operational skills. This unit provides the framework within which these dimensions are developed and applied to industries selected by the students for their major assignment.
  Courses: BS33, BS63, BS64, BS65, BS66, BS93
  Prerequisites: postgraduate enrolment only
  Incompatible with: BSN400
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12

► IBN403 Business in Asia
  The aim of this unit is to enable an intensive study of business and markets in Asia. The development of the major industries is examined, together with major intra-regional patterns of trade, commerce and finance. Significant economic, political and social factors determining developments are focused on, as well as regulatory restraints governing market access. Students are required to undertake a project that requires the application of knowledge of the region to a business issue.
  Courses: BS30, BS33, BS39, BS63, BS64, BS65, BS66, BS92, BS93, GS40, GS41, GS85, GS86, IF64
  Incompatible with: MIN403
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12
  Semester: 1, 2

► IBN404 Business in Europe
  This unit enables a more intensive study of business and markets in Europe. The development of the major industries will be examined, together with intra-regional patterns of trade, commerce and finance. A particular focus will be the development of a single European market and its international implications. Significant economic, political and social factors determining developments will be focussed upon, as well as regulatory restraints governing market access. The student will be required to undertake a project which requires the application of knowledge of the region to a business issue.
  Courses: BS30, BS33, BS39, BS63, BS64, BS65, BS66, BS92, BS93, GS40, GS41, GS85, GS86, IF64
  Incompatible with: MIN404
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12
  Semester: 1

► IBN406 Comparative Regulatory Systems
  Provides the student with a detailed understanding of the regulatory systems within which businesses operate, on a comparative and international basis. The major focus is upon Europe, Asia and North America. The development of regulatory systems and their impact upon actual or potential markets will be examined, especially in relation to significant differences that inhibit or enhance international business.
  Courses: BS39, BS92, BS93, IF64
  Incompatible with: MIN406
  Contact hours: 3 per week

► IBN408 Global Business Operations
  This core unit examines the forces of globalisation, the diversity of international environments and their impact on business functions at the operational level. It examines the processes and challenges of internationalising the business operation as firms strive to compete successfully in the global marketplace. Areas of study include the growth of international business and globalisation, international business motives and forms, the nature and challenges of the diversity of environments, and managing and controlling business operations. An international business simulation game is used to facilitate the understanding of business as a system of integrated operations and environments.
  Courses: BS33, BS39, BS63, BS64, BS65, BS66, BS93
  Incompatible with: BSN408
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12
  Semester: 1, 2

► IBN409 Negotiating Across Borders
  This unit develops students’ skills in negotiating intra- and inter-culturally. It provides students with a tool-box of negotiation skills and then explores the relationship between cultural value dimensions and negotiating behaviours. Students practise their negotiating skills with members of their own culture, cross-cultural dyads and in multi-cultural teams to build confidence and capability in negotiating and influencing.
  Courses: BS33, BS39, BS63, BS64, BS65, BS66, BS93
  Incompatible with: GSN482
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12
  Semester: 1, 2

► IBN410 International Logistics Management
  This unit introduces international logistics functions and develops a strategic approach to international business transactions and integration focusing on supply chain management. The unit introduces traditional and contemporary logistics concepts and describes international logistics operations including global transport systems, inventory management, materials handling and information management. Global supply chain management cases and strategies are integrated throughout the unit.
  Courses: BS33, BS39, BS63, BS64, BS65, BS66, BS93
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12
  Semester: 1, 2

► IBN411 International Business Field Study
  The unit involves a four-week visit to another country, preceded by five seminars and a guided course of study in an aspect of international business motives and forms, planning issues cover the strategic planning involved in the internship. The internship generally will take place in the later stages of the program after two semesters of class-based studies. The placement will be with an organisation in Australia or overseas. It is desirable that the placement is in a country other than the student’s country of origin. The internship may be paid or unpaid.
  Courses: BS33, BS66
  Campus: GP
  Credit points: 12

► IBN412 International Business Internship
  Acceptance in IBN412 is dependent on the student securing a placement with an Australian or multinational organisation. The student undertakes the placement in a host organisation for a period of approximately sixteen weeks performing the role of an international business professional. The internship generally will take place in the later stages of the program after two semesters of class-based studies. The placement will be with an organisation in Australia or overseas. It is desirable that the placement is in a country other than the student’s country of origin. The internship may be paid or unpaid.
  Courses: BS33, BS66
  Campus: GP
  Credit points: 12

► IBN421 Marketing Internationally
  In this unit students are exposed to the theoretical and practical aspects of marketing internationally. Through an applied approach, theoretical issues such as segmentation of international markets, life cycle, channel, pricing and distribution are examined in the context of international marketing entry choice, and market development and extension are addressed. Planning issues cover the strategic marketing processes involved, including international market research, and their application to regions and countries primarily in the Asia/Pacific region or Europe. Students are trained in the practical application of these theoretical and planning aspects through the development of an extensive international marketing plan.
  Courses: BS33, BS39, BS63, BS64, BS65, BS66, BS93
  Incompatible with: MIN421
  Contact hours: 3 per week
  Campus: GP
  Credit points: 12
  Semester: 1, 2

► IBN422 Independent Study - International Business
  This unit enables students to pursue a specific interest beyond the content offered in existing units. In this unit students undertake a guided course of study in an aspect of international business approved prior to enrolment by the Subject Area Coordinator and developed in consultation with an appointed supervisor. The unit may comprise, as established by a learning contract, guided readings, literature critiques, a research paper on a specific topic or a project requiring application of theory to practice. The agreed format of assessment may include a literature review, a research paper, a plan of action, an oral or written examination or a combination of a selection of these items of assessment.
  Courses: BS33, BS63, BS64, BS65, BS66, BS93
  Prerequisites: 96cp of approved studies and consent of the Subject Area Coordinator
  Credit points: 12
  Semester: 1, 3

► IBN426 Special Topic - International Business
  This is an ‘open-ended’ unit where the opportunity will be available for staff and visiting scholars to offer a specialised program of study.
  Courses: BS30, BS33, BS63, BS64, BS65, BS66, BS92, BS93, IF64
  Credit points: 24
Incompatible with: MIN426  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12

► IBN431 International Business
Study Tour to China
The unit is designed round a two week study tour to China intended to build strong links between theoretical learning and practical application of students' business studies. Students receive lectures from local academics on issues of culture and business practices in that country, experience the host culture, and undertake a range of industry visits. They also receive presentations by local and expatriate executives. Students are required to participate in activities both before and after the trip and to develop and present research projects relevant to their own program of study.  
Courses: BS33, BS63, BS64, BS65, BS66, BS93
Contact hours: 5 designated seminars (3 hrs each). Full time participation in lectures, briefings and industry site visits during study tour.  
Campus: GP  
Credit points: 12  
Semester: 1

► IBN432 International Business
Study Tour to India
The unit is designed to build strong links between theoretical learning and practical application of students' business studies; they undertake a practical investigation of the issues pertaining to doing business in a foreign country. Students receive lectures from local academics on issues of culture and business practices in that country, experience the host culture, and undertake a range of industry visits. They also receive presentations by local and expatriate executives. Students are required to participate in activities both before and after the trip and to develop and present research projects relevant to their own program of study.  
Courses: BS33, BS63, BS64, BS65, BS66, BS93
Contact hours: 5 designated seminars (3 hrs each). Full time participation in lectures, briefings and industry site visits during study tour.  
Campus: GP  
Credit points: 12  
Semester: 1

► IBN435 Business in Australia
This unit introduces students to the business environment in Australia. Students examine the geographical, historical, socio-cultural, political, regulatory, demographic, economic, legal, locational and other factors that have influenced, or still impinge upon, doing business in Australia in the current international environment. Learning activities include factory visits and industry analysis.  
Courses: BS33, BS39, BS63, BS64, BS65, BS66, BS93, GS40, GS41, GS85
Incompatible with: MIN435
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1, 2

► IBN442 Risk & Contingency Planning in International Settings
This unit extends student understanding of risk management issues in contemporary global business and trade environments to include examination of organisational and systems vulnerability, as well as contingency planning. The unit examines the development of risk and contingency planning strategies in various national and international contexts. It also critically evaluates concepts and operational frameworks used by risk professionals in areas such as corporate governance, risk regulation and critical infrastructure protection; and, crisis decision making.  
Courses: BS33, BS39, BS64, BS65, BS66, BS93
Prerequisites: IBN408 or 48 cp of approved study  
Contact hours: 3  
Campus: GP  
Credit points: 12  
Semester: 2

► IFN001 Advanced Information Retrieval Skills
Provides postgraduate research students with the skills to implement a thorough literature search in their research area and to contribute to life-long learning skills by improving students’ information literacy. The seven modules which form this unit include: the literature review, developing a search strategy; using the QUT and other libraries, database services, the Internet and its uses; developing a current awareness strategy; personal file management; evaluating information. 
Courses: CN75, SC60, SC80, IV49, LW50  
Contact hours: 12  
Campus: GP, KG  
Credit points: 4  
Semester: 1, 2

► IFN100 Full-Time Masters Research
This unit provides full-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not fewer than 50,000 words and shall constitute a substantial contribution to knowledge and understanding in the area of the research.  
Courses: JS52, LW52  
Campus: GP, KG  
Credit points: 48  
Semester: 1, 2

► IFN101 Full-Time Masters Research (Extension)
This unit provides full-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not fewer than 50,000 words and shall constitute a substantial contribution to knowledge and understanding in the area of the research.  
Courses: JS52, LW52  
Campus: GP, KG  
Credit points: 48  
Semester: 1, 2

► IFN200 Part-Time Masters Research
This unit provides part-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not fewer than 50,000 words and shall constitute a substantial contribution to knowledge and understanding in the area of the research.  
Courses: JS52, LW52  
Campus: GP, KG  
Credit points: 48  
Semester: 1, 2

► IFN201 Part-Time Masters Research (Extension)
This unit provides part-time postgraduate research students with study in a relevant area leading to the development of a thesis. The thesis shall be not fewer than 50,000 words and shall constitute a substantial contribution to knowledge and understanding in the area of the research.  
Courses: LW52, JS52  
Campus: GP, KG  
Credit points: 48  
Semester: 1, 2

► IFN203 Part-Time Masters Research  
Credit points: 12  
Semester: 1, 2

► IFN300 Masters Research  
Credit points: 36  
Semester: 1, 2

► IFN301 Masters Research  
Credit points: 24  
Semester: 1, 2

► IFN302 Masters Research  
Credit points: 12  
Semester: 1, 2

► IFN303 Masters Research  
Credit points: 8  
Semester: 1, 2

► IFN304 Masters Research  
Credit points: 6  
Semester: 1, 2

► IFR100 Full-Time Masters Research  
Credit points: 48  
Semester: 1, 2

► IFR101 Full-Time Masters Research (Extension)  
Credit points: 48  
Semester: 1, 2

► IFR200 Part-Time Doctoral Research  
Credit points: 24  
Semester: 1, 2

► IFR201 Part-Time Doctoral Research (Extension)  
Credit points: 24  
Semester: 1, 2

► IFR300 Doctoral Research  
Credit points: 36  
Semester: 1, 2

► IFR301 Doctoral Research  
Credit points: 24  
Semester: 1, 2

► IFR302 Doctoral Research  
Credit points: 12  
Semester: 1, 2

► IFR303 Doctoral Research  
Credit points: 8  
Semester: 1, 2

► ITB001 Problem Solving and Programming  
This unit aims to give you a positive introduction to the analytical skills required in computer programming. It assumes you have little or no previous programming experience. The unit emphasises generic programming concepts and related problem-solving strategies. The skills you learn in the unit will be applicable to a wide variety of commonly-used, industrially-significant programming and scripting languages.  
Courses: IT21, IT22, IF29, IF38, IF48, IF58, IF59, IF90, IX09
Incompatible with: ITB111
Contact hours: 4  
Campus: GP, CA  
Credit points: 12  
Semester: 1, 2

► ITB002 IT Professional Studies  
This unit aims to develop your professional skills and capabilities by providing theoretical and practical opportunities in the following areas: how IT teams operate, effective oral and written communication, team meeting processes and procedures, ethical and social responsibilities of the IT professional, information literacy and traits for life long learning. Demonstrable competency in these areas will be an expectation in subsequent units and will be developed further in them.  
Courses: IT21, IT22, IF29, IF38, IF48, IF58, IF90, IX09
Incompatible with: ITB116
Contact hours: 3  
Campus: GP, CA  
Credit points: 12  
Semester: 1, 2

► ITB003 Object Oriented Programming  
Object Oriented Programming aims to develop your software design and development
skills gained in ITB001, taking you from ‘pro-
cedural' programming and problem solving
into an object oriented approach. This unit is
required by all IT majors, and is designed to
be complimentary to ITB008: Modelling,
Analysis and Design. You will use industry
standard design approaches coupled with an
industrial strength CO programming lan-
guage to design and implement a real-life
software application. Along the way, you will
gain a solid foundation in the principals of
OOP, including encapsulation, polymorphism
and inheritance, allowing you to solve real-
world problems using the object-oriented
design paradigm.
Courses: IT21, IT22, IF29, IF38, IF48, IF58,
IF90, IX09
Prerequisites: ITB001
Incompatible with: ITB112
Contact hours: 4  Campus: GP, CA
Credit points: 12  Semester: 1, 2

► ITB004 Database Systems
The aims of this unit is to introduce you to the
structure and role of databases in modern
businesses.
Courses: IT21, IT22, IF29, IF38, IF48, IF58,
IF90, IX09
Incompatible with: ITB115
Contact hours: 3  Campus: GP, CA
Credit points: 12  Semester: 1, 2

► ITB005 Systems Architecture
The aims of this unit are twofold. First is to
introduce you to the challenging field of sys-
tems architecture and provide you with practi-
cal skills in using a range of modern com-
puter operating systems through the presen-
tation of case studies involving current tech-
nology and their relationship and intercon-
nection within a contemporary computer
systems architecture; and secondly, to pro-
vide you with sufficient knowledge to enable
you at the completion of this unit, to make
informed choices about areas of specialisa-
tion within your degree and be well prepared
to undertake specialist units of your choice.
Courses: IT21, IT22, IF29, IF38, IF48, IX09
Incompatible with: ITB113
Contact hours: 3  Campus: GP, CA
Credit points: 12  Semester: 1, 2

► ITB006 Networks
The aim of the unit is to provide an introd-
cutory study of computer networks within the IT
profession.
Courses: IT21, IT22, IF29, IF38, IF58, IF90
Incompatible with: ITB114
Contact hours: 3  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB007 Web Development
The aims of the unit are to give you a thor-
ough understanding of what the web is, how
it works and what is to offer. Additionally,
the unit aims to give you a general under-
standing and basic skills in developing dy-
namic web applications, including an appre-
ciation of the variety of implementation tech-
nologies available. Through an understand-
ing of how web technologies have evolved to
date, you will appreciate the necessity for lifelang learning and become an insightful
predictor of future developments in this area.
You will learn to critically analyse technologi-
cal alternatives in order to adapt to and inno-
vate with technologies that presently do not
exist. You will appreciate the business or
organizational context within which web
applications exist and b

Courses: IT21, IT22, IF38, IF48
Prerequisites: ITB001, ITB002, ITB004
Incompatible with: ITB227
Contact hours: 3  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB008 Modelling, Analysis and
Design
The aim of this unit is to introduce students
to the range of application systems found
within organisations, the basic concepts of
object orientation, the theory and practice of
object modelling, analysis and design, the
principles of software engineering and the
team processes required to work in a modell-
ing, analysis and design team.
Courses: IT21, IT22, IF29, IF38, IF48, IF58,
IF90, IX09
Prerequisites: ITB002
Incompatible with: ITB118
Contact hours: 3  Campus: GP, CA
Credit points: 12  Semester: 1, 2, 3

► ITB009 Core Project Initiation
This unit extends your development of the
professional technical and teamwork skills
required by IT professionals in practice. It
enables you to understand the process of
project initiation and to build on this base in
the following ITB101 Project 2 (or your Co-
op appointment for the following year).
Courses: IT21, IT22, IF29, IF38, IF48, IF58,
IF59, IF90, IX09
Incompatible with: ITB613, ITB240
Contact hours: 3  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB10 Core Project Implemen-
tation
This capstone unit extends development of
the professional, technical and teamwork
skills required by IT professionals in practice.
It enables you to understand the process of
project implementation and to build on this
base in your professional career.
Courses: IT21, IT22, IF29, IF38, IF48, IF58,
IF59, IF90, IX09
Prerequisites: ITB009
Contact hours: 3  Campus: GP
Credit points: 12  Semester: 2, 3

► ITB218 Applications Program-
ming
This unit introduces Application Program-
ning development in a Microsoft Windows
Rapid Application Development (RAD) envi-
ronment. The emphasis of the unit is on the
development of Windows desktop applica-
tions, although other types of applications
that can be developed in the environment
will be introduced. The primary aims of the
unit are to provide an understanding of the
Microsoft .NET framework and the develop-
ment of .NET applications; the Visual Basic
.NET programming language; The "user-
model" and developing software from an
end-user perspective.
Courses: IT21, IT22, IF38, IF48
Prerequisites: ITB003 and ITB004
Incompatible with: ITB219
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1, 3

► ITB222 Systems Analysis and
Design
The aims of the unit are to help you develop
an understanding and knowledge of the
analysis and design of information systems
using modern O0 techniques and to docu-
ment such design so that it can be imple-
mented by a team of programmers.
Courses: IT21, IT22, IF38, IF48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB232 Database Management
This unit seeks to develop an understanding
of the fundamental knowledge required to
monitor a database management system
(DBMS). It does so through providing a de-
tailed introduction to the functions of a data-
base management system.
Courses: IT21, IT22, IF38, IF48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB231 Project
This unit seeks to give you the opportunity to
apply, under appropriate guidance, the
knowledge and skills gained in your course
to date and to execute a substantial Informa-
tion Systems development project.
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB231 Projects
This unit seeks to help you develop your
knowledge, understand a formal specifi-
cation tool (ORM) for modelling information
systems unambiguously and to apply this
formal technique to conceptualise informa-
tion systems found in many real world appli-
cation domains.
Courses: IT21, IT22, IF38, IF48
Prerequisites: ITB004, ITB115
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► ITB299 Database Design
The aim of this unit is to help you develop your
knowledge, understand a formal specifi-
cation tool (ORM) for modelling information
systems unambiguously and to apply this
formal technique to conceptualise informa-
tion systems found in many real world appli-
cation domains.
Courses: IT21, IT22, IF38, IF48, IF90
Prerequisites: ITB004, ITB115
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► ITB299 Database Design
This unit seeks to develop an understanding
of the fundamental knowledge required to
monitor a database management system
(DBMS). It does so through providing a de-
tailed introduction to the functions of a data-
base management system.
Courses: IT21, IT22, IF38, IF48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► ITB299 Database Design
This unit seeks to develop an understanding
of the fundamental knowledge required to
monitor a database management system
(DBMS). It does so through providing a de-
tailed introduction to the functions of a data-
base management system.
Courses: IT21, IT22, IF38, IF48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► ITB232 Database Management
This unit seeks to develop an understanding
of the fundamental knowledge required to
monitor a database management system
(DBMS). It does so through providing a de-
tailed introduction to the functions of a data-
base management system.
Courses: IT21, IT22, IF38, IF48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► ITB232 Database Management
This unit seeks to develop an understanding
of the fundamental knowledge required to
monitor a database management system
(DBMS). It does so through providing a de-
tailed introduction to the functions of a data-
base management system.
Courses: IT21, IT22, IF38, IF48
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

Q U T H A N D B O O K  2 0 0 6  •  P A G E  6 6 6
UNIT SYNOPSIS

Prerequisites: ITB004  
Incompatible with: ITN232  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB233 Enterprise Systems Applications  
The aim of this unit is to introduce you to one of the more complex and comprehensive applications available to organisations (Enterprise Systems). This unit introduces the student to the business perspective of each module (Fi, Co, PP, MM, SD and HR) and investigates the support provided by these systems and the integration between modules by following some of the major processes in a business. The unit enables students to experience both the business analyst view and the user's view of the system across a number of business processes which includes elements of the configuration activities.

Courses: IT21, IT22  
Prerequisites: ITB002/ITB116  
Business: BSB119  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1

► ITB237 Advanced Databases  
The aim of this unit is to advance your knowledge of the SQL: 2003 language, its use as a language embedded in a commonly used programming language, and its implementation in at least two DBMSs.

Courses: IT21, IT22  
Prerequisites: ITB003 and ITB004  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB239 Enterprise Data Mining  
This unit will provide a comprehensive theoretical coverage of various topics in data and web mining. In addition there will be a significant practical component on tools to solve real-world problems. Specifically, we will consider techniques from machine learning, data mining, text mining, and information retrieval to extract useful knowledge from data which are used for business intelligence, document databases, site management, personalisation, and user profiling. This unit will first cover a detailed overview of the mining process and techniques, and then concentrate on applications of these techniques to web, e-commerce, document databases and data from advanced applications.

Courses: IT21, IT22  
Prerequisites: IT: ITB004  
Business: BSB212  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB241 Information Technology Management  
Preparing you to be an IT professional through an understanding of the resources and strategies available for efficient and effective management of IT.

Courses: IT21, IT22  
Prerequisites: ITB002  
Incompatible with: KWB010  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1

► ITB245 R/3 System Administration  
This unit seeks to develop an understanding of the technical architecture of SAP R/3. SAP R/3 is an exemplary integrated Enterprise System which is built upon a relational database system. This unit aims to develop theoretical understanding of database management, security, systems performance, background processing and spoofing. The unit aims to develop practical skills in managing each of these elements within the SAP BASIS environment. It does so through discussing some of the theory and showing how the theory is applied in practice.

Courses: IT21, IT22  
Prerequisites: ITB004  
Incompatible with: ITN245  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB254 Interactivity Design  
The aim of this unit is to provide you with an understanding of the theory, practices and challenges associated with the development of creative interactive design and human computer interaction.

Courses: IT21, IT22  
Prerequisites: ITB002  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1

► ITB255 Special Topic (Itm)  
This unit is designed to allow for the significant development of, or emphasis in, information technology management not dealt with in other course units. Selected topics and study areas are offered as required and when the expertise is available.

Courses: IT21  
► ITB257 Multimedia Systems  
This unit will explore the concepts underpinning Interactive Digital Technologies and lead to an understanding of the role played by these technologies in the overall knowledge of a computer professional. Whatever direction you choose in your future employment, all sections of the market place will utilise some aspects of multimedia technology. Knowledge in this expanding area will ensure you have the skills appropriate to any field.

Courses: IT21, IT22  
Prerequisites: ITB007 or permission of Unit Coordinator  
Incompatible with: ITN257  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1

► ITB259 Advanced Multimedia Systems  
This advanced level unit will give you high level design and development skills in some of the current and emerging areas of Multimedia. Web delivered applications, standalone systems and installations will be included. It will endeavour to give you an in-depth understanding of Interactive Multimedia Systems. You will be given the theoretical basis and practical skills to motivate you in the design and creation of a state-of-the-art system in this discipline. In the process it will encourage a professional team approach, appropriate to the industry environment.

Courses: IT21, IT22  
Prerequisites: ITB257  
Incompatible with: ITN259  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB260 E-Commerce Site Development  
This unit will enable you to specify, design, implement and maintain effective e-commerce applications. You will obtain a broad understanding of the potential of e-commerce and how it can be employed to benefit an organisation. You will get direct experience of creating an e-commerce storefront following a business to business (B to B) or business to consumer (B to C) model. You will also have an understanding of the computer systems that underpin e-commerce including payment systems and secure transactions.

Courses: IT21, IT22  
Prerequisites: ITB007  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB264 Information Systems Consulting  
The aim of the unit is to give you consulting skills, an appreciation of the management of consulting practices and an understanding of the consulting sector generally.

Courses: IT21, IT22  
Prerequisites: ITB222  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB266 Information Management  
To understand management of information resources in organisational contexts you will be introduced to concepts which include the effective management of information assets and the utilisation of external information resources and how they influence organisational performance.

Courses: IT21, IT22  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1

► ITB267 Business Analytics  
This unit introduces you to three key areas. These are: development methods for data-driven Decision Support Systems, the principles of data warehousing leading to efficient reporting tools, and business analytics. These methods introduce the use of tools to solve real-world problems.

Courses: IT21, IT22  
Prerequisites: ITB004 or equivalent  
Incompatible with: ITB242  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 1

► ITB268 Special Topic 1B (Advanced Databases)  
This unit is designed to allow for the significant development of, or emphasis in, aspects of information systems not dealt with in other course units. Selected topics and study areas are offered as required and when the expertise is available.

Courses: IT21  
Prerequisites: ITB115  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB272 Information Technology Project Management  
The aim of this unit is to provide you with experience of IT project management issues in preparation for managing IT projects.

Courses: IT21, IT22, IX09  
Contact hours: 3 per week  
Campus: GP  
Credit points: 12  
Semester: 2

► ITB292 Enterprise Architecture  
The aim of this unit is to equip you with a broad awareness of various systems and models providing a complete solution to the information needs of an organisation, and to provide linkages with other units that you will be doing in your degree. This unit will introduce comprehensive frameworks that show
UNIT SYNOPSES

the diversity of infrastructure and information system requirements and introduce the issues involved in aligning business and IT strategy. These frameworks link technology architectures, application architectures, data and information architectures and business architectures showing the inter-connectedness of systems.

Courses: IT21, IT22
Prerequisites: ITB298
Contact hours: 3
Campus: GP
Credit points: 12

► ITB293 Java for Electronic Commerce Applications

In this subject we introduce and explore the J2EE suite of e-commerce related application programming tools. Specifically, we take a look at: JDBD/ODBC database connectivity, servlets, Java Server Pages, java beans, and Enterprise Java Beans. To do this we make use of the Java programming language, and consider several design issues (including the MVC design pattern) related to the development and deployment of J2EE based applications. We also introduce concepts associated with distributed information systems and issues related to their deployment and access, and distributed system issues in general.

Courses: IT21, IT22
Prerequisites: ITB004 and ITB003
Contact hours: 3
Campus: GP
Credit points: 12

► ITB294 Information Quality

To introduce the concept and application of information quality within information systems and as a factor in management of business processes.

Courses: IT21, IT22
Prerequisites: ITB004 and ITB003
Contact hours: 3
Campus: GP
Credit points: 12
Semester: 1

► ITB295 XML: Data and Document Processing

The aim of this unit is to introduce you to various XML related technologies. By understanding how these technologies could be utilised, you will be in a better position to comprehend future XML standards and related technologies.

Courses: IT21, IT22
Prerequisites: ITB004 and ITB003
Contact hours: 3
Campus: GP
Credit points: 12
Semester: 1

► ITB296 Information Systems Theory and Applications

The aims of this unit are to help you develop your knowledge of Information Systems Theory and of the issues involved in planning, implementing, and controlling the use of information systems to meet business needs in organisations.

Courses: IT21, IT22
Prerequisites: ITB002
Contact hours: 3
Campus: GP
Credit points: 12

► ITB297 Web Site Design

This unit will introduce you to the key issues, technologies and development approaches involved in the creation of web-based systems, with consideration of content management systems (CMS) providing an appropriate scenario. Emphasis will be placed on encouraging a professional approach appropriate to the industry environment in the areas of critical analysis, design and construction. These aims will be realised through: the development of knowledge and hands-on skills; the encouragement of critical thinking; and, by working in a collabora-tive environment, giving an appreciation of shared responsibilities and the approaches necessary to develop a productive team environment.

Courses: IT21, IT22
Prerequisites: ITB007 and ITB004
Contact hours: 3
Campus: GP
Credit points: 12

► ITB298 Business Process Engineering

The aim of this unit is to introduce you to modern methods and tools of business process management. These skills will be applied to the most complex, comprehensive and relevant IT applications. This unit also seeks to develop logical thinking and the capability to understand and deal with complex systems, within a business manage-ment framework. The content will focus strongly on business process modelling, as a fundamental technique to manage the complexity associated with process management tasks within various contexts.

Courses: IT21, IT22
Prerequisites: ITB222 and ITB228
Contact hours: 3
Campus: GP
Credit points: 12
Semester: 1

► ITB299 Workflow Management

This unit will provide you with an introduction to fundamental concepts in workflow management and their application. More specifically, you will be taught about (i) the formal specification of distributed and concurrent systems, (ii) a set of platform independent workflow patterns, and (iii) a language that aims to embody these patterns.

Courses: IT21, IT22
Prerequisites: ITB004 and ITB008
Contact hours: 3
Campus: GP
Credit points: 12
Semester: 1

► ITB322 Information Resources

This unit will help you to understand the structure of the information environment, how it reflects upon the information resources you discover, and to develop the ability to find appropriate information for future problem solving. You will develop your skills in identifying, accessing, evaluating and retrieving information resources to meet specific information needs. The unit will also help you develop skills in teamwork and oral and written communication.

Courses: IT21, IT22
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► ITB330 Information Issues and Policy

This unit introduces you to the role of professional and ethical practices in information professions. The unit focuses on trends in the Information Society where emerging relevant technologies allow considerable power to individuals in acquiring, processing, storing, disseminating, and using information. These changes also underscore the need for greater understanding of where and how information professionals are expected to formulate and exercise appropriate standards of conduct. Throughout, in achieving these aims, learning content is linked to the professional Codes of the Australian Computing Society, the Australian Library & Information Society, and similar professional bodies.

Courses: IT21, IT22
Contact hours: 3 per week
Campus: GP
Credit points: 12

► ITB341 Strategic Information and Knowledge Management

This unit seeks to cover this wide range of issues by applying principles and theory to the structure of information and knowledge found in actual planning documents and case studies. By the end of the unit, students should be able to step back from operational information and knowledge practices, analyse them and suggest strategies to optimise or review them.

Courses: IT21, IT22
Prerequisites: ITB266
Contact hours: 3 per week
Campus: GP
Credit points: 12

► ITB649 Object Modelling for Games Design

Object modelling techniques are fundamental to any real time 3D animation system, whether it be used for gaming, simulation, film or virtual reality. Traditionally, animation has included such techniques as keyframe and kinematics. With the increase in CPU power and the incorporation of a GPU (graphics processing unit) the ability to animate objects in real time is allowing more sophisticated interaction and the exhibition of the merger of games/simulation and film.

Courses: IT21, IF30
Prerequisites: ITB648 and ITB611
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITB710 Fundamentals of Computer Science

The aims of this unit are: to introduce you to the ideas of abstraction and algorithms for representing and manipulating information; to enable you to verify that information technology solutions are complete and correct; and to know the abstract models for computation itself.

Courses: IT21, IT22
Prerequisites: ITB001
Incompatible with: MAB209
Contact hours: 3
Campus: GP
Credit points: 12
Semester: 2

► ITB711 Programming Abstraction

The purpose of this unit is to ensure that you have a sound knowledge of modern programming techniques and their use in providing medium-scale software solutions. On completion of the unit you will be able to decompose a problem and produce an abstract, modular solution to a programming task. In addition, you will acquire necessary skills to be able to use the tools available to you in a common development environment.

Courses: IT21, IT22, IF29, IF58, IF59, IF90, IX25
Prerequisites: ITB003
Contact hours: 3
Campus: GP
Credit points: 12
Semester: 1, 2, 3

► ITB712 Software Engineering Studies

This unit is the starting point for the specialist knowledge required in the Software Architecture major. Up to this stage units have primarily focused on learning programming and design skills. This unit introduces you to the
practice of following a formal process to guide the development of software. Using a process as a guide, you will look at each of the major activities involved in developing a software system. You will also learn how to manage and control the software development process for a large project when a number of team members are involved in the development. This unit provides the foundation you will need for many later units, and develops the professional practice of working on large software systems.

Courses: IT21, IT22, IF29, IF58, IF59, IF90, IX25
Prerequisites: ITB003 and ITB008
Incompatible with: ITB612
Contact hours: 3  Credit points: 12  Semester: 2

► ITB713 Advanced Java Programming
In this unit you will develop skills to allow you to discover, learn and communicate new knowledge in an efficient manner. The unit will improve your understanding of some specific areas of intermediate and advanced programming technologies and tools and enhance your graduate capabilities in the areas of discovery and learning in the context of programming technology.

Courses: IT21, IT22
Prerequisites: ITB711
Contact hours: 3  Credit points: 12  Semester: 1

► ITB715 Web Services
Web services are enabling new kinds of IT applications and services to be built. They are becoming prevalent in a wide variety of software systems from large enterprise systems through to embedded systems. Thus it is important for students to understand the technical and business aspects of web services, and to be able to evaluate them. This unit introduces students to web services and hence prepares them for an important new technology integral to future IT systems.

Courses: IT21, IT22
Prerequisites: ITB003, ITB008
Incompatible with: ITN680
Contact hours: 3  Credit points: 12  Semester: 2

► ITB716 Advanced Web Applications Development
This unit will provide you with an understanding of the issues, structure and technologies used for developing web based systems. The unit will provide you with the theoretical and practical skills needed to develop enterprise critical applications designed with a tier architecture using state of the art technologies. A comparative technology approach is taken, including an analysis of how web technologies have evolved to date, in order to identify common themes and to better enable you to comprehend and critically evaluate future web technology offerings.

Courses: IT21, IT22
Prerequisites: ITB448 or ITB611 or ITN661 or ITT711 or equivalent
Incompatible with: ITB642
Contact hours: 3  Credit points: 12  Semester: 1

► ITB717 Enterprise Software Architecture
This unit introduces you to the field of enterprise and component-based architecture. It provides a grounding in the knowledge and skills required by a software architect to address the future needs of business IT systems. These include a solid understanding of the IT challenges currently facing medium to large size organisations, the theory and technologies currently used to address them and an appreciation of the business needs that motivate their use.

Courses: IT21, IT22
Prerequisites: ITB003, ITB008
Contact hours: 3  Credit points: 12  Semester: 2

► ITB720 Internet Protocols and Services
The aim of this unit is to give you an understanding of the underlying protocols involved in common network services. This unit will also provide you with the skills to program applications that interact with these protocols.

Courses: IT21, IT22, IF29, IF58, IF59, IX25
Prerequisites: ITB006
Incompatible with: ITN529, ITB529, ITN667, ITB629, ITB624
Contact hours: 3  Credit points: 12  Semester: 1, 2

► ITB721 Unix Network Administration
The aim of this unit is to provide students with a working knowledge of the technical aspects and theory of network administration and management. The unit uses the Unix environment as the learning platform for attaining technical skills and for the development of problem solving skills necessary to be a successful networking professional.

Courses: IT21, IT22
Prerequisites: ITB006
Incompatible with: ITB525, ITB535, ITB625, ITN555, ITN665
Contact hours: 3  Credit points: 12  Semester: 1

► ITB722 Network Planning and Deployment
The unit draws together subject matter from a number of different networking-related areas. The aim of the unit is to assemble a number of different networking-related issues and provide you with the skills to program applications that interact with these protocols.

Courses: IT21, IT22
Prerequisites: ITB720
Incompatible with: ITB628, ITB551
Contact hours: 3  Credit points: 12  Semester: 2

► ITB723 Wireless and Mobile Devices
This unit provides you with the skills to be able to design and understand the issues involved with different types of wireless communications systems. It develops your knowledge of Wide Area Networks (WANs), Local Area Networks (LANs) and Personal Area Networks (PANs) as well as skills in programming for mobile handsets. You will also develop knowledge of the different types of wireless communications technologies available and when each is most applicable in a particular situation.

Courses: IT21, IT22
Prerequisites: ITB720
Contact hours: 3  Credit points: 12  Semester: 1

► ITB730 Information Security Fundamentals
On completing this unit, you should understand the major issues in information security and the implications of interactions between entities, and be aware of international information security management standards. You should have a broad view of the different kinds of protection offered by IT security technology and practice, and understand how they apply within your IT specialisation, i.e. where and how security and compliance issues are likely to arise. You will be able to articulate security issues and with the help of a security specialist, formulate solutions. This unit is important for you as a member of the global community, as a computing professional, and as a foundation for further specialist study in information security topics.

Courses: IT21, IT22, IX25
Prerequisites: ITB006
Incompatible with: ITB161, ITN161, ITB623, ITB523, ITB543, ITN523, ITN511, ITN582, ITN663, ITZ523
Contact hours: 3  Credit points: 12  Semester: 1, 2, 3

► ITB731 Security Technologies
This unit aims to provide you with the knowledge to investigate and determine the security requirements for computer systems and networks and to understand the underlying issues and problems. In addition, this unit aims to enable you to investigate, evaluate and select the most appropriate security technologies for specific situations.

Courses: IT21, IT22
Prerequisites: ITB730
Incompatible with: ITN670
Contact hours: 3  Credit points: 12  Semester: 2

► ITB732 Cryptology and Protocols
This unit aims to help you: (a) understand the fundamental algorithms and protocols of cryptography, with emphasis on the major applications of cryptology; and (b) develop your analytical thought processes, enabling you to apply mathematical and cryptographic techniques to solve real world problems in a hands-on manner.

Courses: IT21, IT22
Prerequisites: Maths B/MAB105 or equivalent
Incompatible with: ITB646, ITB548, ITB566, ITN566, ITN512, ITN581
Contact hours: 3  Credit points: 12  Semester: 1

► ITB733 Network Security
The aim is to equip you, as a security specialist, with the theory, hands-on experience and problem solving skills required in order to critically evaluate, deploy, and manage the network security services essential for modern computer networks.

Courses: IT21, IT22
Prerequisites: ITB721 and assumed knowledge
Incompatible with: ITB645
Contact hours: 3  Credit points: 12  Semester: 2

► ITB740 Agent Based Software Engineering
This unit focuses on the topics and techniques that are most promising for building and analysing smart information systems, such as Web information gathering agents.
and autonomous agents for business process management. It also focuses on general representations of knowledge and discovered knowledge for real problem solving. You will be able to demonstrate knowledge of the principles and techniques of advanced computer techniques. You will also be able to use and develop agent-based techniques to design some types of real agent-based systems, and understand and write simple agent-based programs. Your generic problem solving skills will be enhanced as well as developing communication skills to become an independent professional.

**Courses:** IT21, IT22  
**Prerequisites:** ITB007  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

► **ITB741 Information Retrieval**  
This is an advanced specialisation unit in the area of Intelligent Systems. It is intended to put together, in context, many of the foundation units of the Intelligent Systems major. The unit aims to fuse together and present a coherent picture of modern information retrieval problems, solutions, and open questions. It aims to equip students with the ability to design and implement information retrieval systems that are designed to operate in range of environments, from PC based single user systems to web based search engines operating over distributed collections. The unit is also intended to teach the specific design and programming skills that will enable you to solve IR problems using database and web technology.  

**Courses:** ITB741  
**Prerequisites:** ITB295  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB742 Computational Intelligence**  
This is a unit in the area of intelligent systems that introduces the five main methods from the field of computational intelligence from the perspective of autonomous systems. The methods are: knowledge bases systems, Fuzzy control, Neural Networks, Reinforcement Learning and Evolutionary Computation. Autonomous systems have the ability to use information from their environment, acquired by their own sensors, for carrying out the actions required to fulfill their mission. The unit is also intended to teach the specific design and programming skills that will enable you to solve problems using computational intelligence methods in a real time embedded systems.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB002 and ITB710  
**Incompatible with:** ITB650  
**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

► **ITB743 Artificial Intelligence**  
This unit is intended to provide you with an understanding of the basic techniques of artificial intelligence, and some insight on the theoretical foundations of advanced techniques that you may encounter later in your course or professional career.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB003  
**Incompatible with:** ITB640  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB744 Computer Architecture**  
After successfully completing the unit you will have an appreciation of why programming in assembly language is sometimes required and how to write programs at the machine level. By providing you with knowledge of how data is represented and manipulated at the machine level, you will gain a more detailed understanding of how the programmer should view the underlying processor architecture and how to write programs for systems that must interact in real time with their physical environment without human supervision. Various styles of programming are covered, through emphasis on the event driven approach where a number of computational threads process data.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB005 or ITB113  
**Incompatible with:** ITB616, ITB420, ITN413  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB745 Operating Systems**  
This unit provides a solid introduction to the concepts that underlie operating systems. Fundamental concepts that are applicable to a variety of systems (e.g. UNIX/Linux and Windows) are discussed.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB003 and ITB005  
**Incompatible with:** ITB427, ITB617  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB746 Modelling and Animation Techniques**  
This unit will provide you with the knowledge and skills to use an industry standard graphics API to implement graphics applications and to develop a basic real-time animation system using an industry standard language.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB711  
**Incompatible with:** ITB648, ITB649  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB747 Real Time Rendering Techniques**  
This subject will provide you with knowledge and skills in basic to advanced techniques in real-time rendering using shading languages. You will be able to implement a high-quality real-time rendering system in an industry standard tool.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB746  
**Incompatible with:** ITB648, ITB649  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  

► **ITB748 Configurable Computing**  
This is an unit in the embedded systems major that introduces you to the principles and methods of configurable computing. You will learn about the architecture of configurable computing devices (FPGAs) and the functional definition of their digital logic components. You will learn how to specify a computing system at the logic level using a hardware description language (HDL) and how to use the design flow tools to synthesise complex computational circuits on an FPGA.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB744  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB749 Scientific Programming**  
The aim of this unit is to introduce you to the computational programming techniques required in the development of software for games and simulation. You will cover the theoretical aspects and the techniques required to implement these.  

**Courses:** IT21, IT22  
**Prerequisites:** ITB003  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

► **ITB750 Computer Game Studies**  
This unit is designed to give you a clear understanding of the socio-cultural issues that affect the computer game industry. Through critical review of games and games industry literature, playing games and actively participating in classroom discussion you will develop your capacity to join in the discourse about the design, impact and future direction of computer games in our society.  

**Courses:** IT21, IT22, IF29, IF38, IF46, IF56, IF59, IF90, IX09  
**Prerequisites:** ITB002 or equivalent  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB791 Project**  
**Courses:** IT21, IT22  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3  

► **ITB823 Web Sites for Electronic Commerce**  
This unit aims to provide you with an understanding of the entire process for building a successful electronic commerce website. It addresses both the business and technical aspects of site development so that you will gain an appreciation of the issues involved.  

**Prerequisites:** BS2B12  
**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

► **ITB841-1 Project**  
The aim of project work is to expose you to the practical realities of software development and project management. In this regard, both the completed work and the documentation should be of a high professional standard. This unit is intended to ensure that you obtain experience in all facets of the development of a research/practical IT project.  

**Courses:** IF59, IF90, IX25  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3  

► **ITB844-2 Project**  
**Courses:** IF59, IF90, IX25  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3  

► **ITB847 Computational Intelligence for Control and Embedded Systems**  
This is a specialisation unit in the area of infomatechonics that introduces the five main methods from the field of computational intelligence and relates them to applications on real time control and embedded systems. The methods are: Knowledge based systems, Fuzzy control, Neural Networks, Reinforcement Learning and Evolutionary Computation. The unit is also intended to teach the specific design and programming skills that will enable you to solve problems using computational intelligence methods in real time embedded systems. It is assumed you already have knowledge of programming.  

**Courses:** ME40
### UNIT SYNOPSIS

**Prerequisites:** EEB411

**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**ITB849 Introduction to Technical Computing**

The unit aims to introduce you to the techniques and concepts required in order to produce solutions to scientific problems using computers. The unit provides you with a disciplined and structured approach to algorithm design and implementation in a high-level matrix-oriented programming language.

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**Incompatible with:** ITD001 Problem Solving and Programming

This unit aims to give you a positive introduction to the analytical skills required in computer programming. It assumes you have little or no previous programming experience. The unit emphasises generic programming concepts and related problem-solving strategies. The skills you learn in the unit will be applicable to a wide variety of commonly-used, industrially-significant programming and scripting languages.

**Courses:** IT10  
**Incompatible with:** ITD111

**Contact hours:** 4  
**Campus:** KG  
**Credit points:** 12

**ITD002 IT Professional Studies**

This unit aims to develop your professional skills and capabilities by providing theoretical and practical opportunities in the following areas: how IT teams operate, effective oral and written communication, team meeting processes and procedures, ethical and social responsibilities of the IT professional, information literacy and traits for life-long learning. Demonstrable competency in these areas will be an expectation in subsequent units and will be developed further in them.

**Courses:** IT10  
**Incompatible with:** ITD116

**Contact hours:** 4  
**Campus:** KG  
**Credit points:** 12

**ITD003 Object Oriented Programming**

Object Oriented Programming aims to develop your software design and development skills gained in ITD001, taking you from procedural programming and problem solving into an Object Oriented approach. This unit is required by all IT majors, and is designed to be complementary to ITB008 Modelling, Analysis and Design. You will use industry standard design approaches coupled with an industrial strength programming language to design and implement a real-life software application. Along the way, you will gain a solid foundation in the principals of OOP, including encapsulation, polymorphism and inheritance, allowing you to solve real-world problems using the Object-Oriented design paradigm.

**Courses:** IT10  
**Incompatible with:** ITD112

**Contact hours:** 4  
**Campus:** KG  
**Credit points:** 12

**ITD004 Database Systems**

The aim of this unit is to introduce you to the structure and role of databases in modern businesses.

**Courses:** IT10  
**Incompatible with:** ITD115

**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12

**ITD005 Systems Architecture**

The aims of this unit are twofold. First is to introduce you to the challenging field of system architectures and provide you with practical skills in using a range of modern computer operating systems through the presentation of case studies involving current technology and their relationship and interconnection within a contemporary computer systems architecture; and secondly, to provide you with sufficient knowledge to enable you at the completion of this unit, to make informed choices about areas of specialisation within your degree and be well prepared to undertake specialist units of your choice.

**Courses:** IT10  
**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12

**ITD006 Networks**

The aim of the unit is to provide an introductory study of computer networks within the IT professional arena. The unit provides students with a basis for the ongoing development of their programming knowledge and is a prerequisite for the unit Software Development 2.

**Courses:** IT10, IF06, QC03  
**Incompatible with:** ITD410

**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12

**ITD111 Software Development 1**

All information technology students need a fundamental knowledge of programming and an understanding of the processes and issues involved in the software development life cycle. Although not all information technology graduates will become programmers, all information technology professionals will be required to work with programmers at some time in their careers. Therefore students need to understand the constraints that arise in the process of software development. This unit provides students with a foundation for understanding and selecting the appropriate software development process and methodology. The unit also introduces the student to the concept of computer systems, communications and network security. The unit also serves as an entry point to further specialised studies in the fields of data communications and information systems security and software engineering.

**Courses:** IT10, IF06, QC03  
**Incompatible with:** ITD510

**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12

**ITD115 Introduction to Databases**

In this unit students learn the following: basic database concepts and terminology; the creation and modification of a relational database schema using SQL; the retrieval and modification of the contents of a relational database using SQL; and the development of a database system in Access (a database management program). Students will also develop an understanding of the theory of the design of a new database; the basics of designing user-interfaces, 3-level architecture, integrity constraints, security and privacy issues, and transaction processing.

**Courses:** IT10, IF06, QC03  
**Incompatible with:** ITD225

**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12

**ITD116 IT Professional Studies 1**

This unit introduces students to the professional skills required by industry of IT graduates. Using a contextualised IT project as a vehicle, students acquire skills in basic project management leading to the innovative design and construction of a Web site. Skill development in this unit focuses on ethical and professional practices, teamwork, analytical and technical skills, information literacy and oral, written and visual communication. In addition, the unit assists students to understand themselves as team members and as self directed learners by providing effective strategies in each of these domains.

**Courses:** IT10, IF06, QC03  
**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12

**ITN007 Web Development**

The aims of the unit are to give you a thorough understanding of what the Web is, how
UNIT SYNOPSIS

it works and what is has to offer. Additionally, it will give you a general understanding and basic skills in developing dynamic web applications, including an appreciation of the variety of implementation technologies available. Through an understanding of how web technologies have evolved to date, you will appreciate the necessity for lifelong learning and become an insightful predictor of future developments in this area. You will learn to critically analyse technological alternatives to adapt to and innovate with technologies that presently do not exist. You will appreciate the business or organisational context within which web applications exist.

Courses: IT38, IT45, IT35, IT40, IT48
Incompatible with: ITN227
Contact hours: 3  
Credit points: 12  
Semester: 1, 2

► ITN100 Introduction to Research
This unit is aimed at those seeking to undertake a major research project. Except in unusual circumstances, you should have a project in mind and have organised a supervisor.

Courses: IT28, IT29, IT35, IT40, IT48, IT60, IT70
Campus: GP
Credit points: 12  
Semester: 1, 2

► ITN135 Dissertation 2 (DC)
Designed to enable a part-time student to undertake research work in a particular area of information technology. Topic is decided by agreement between the student and a supervising staff member.

Courses: IT30
Prerequisites: ITN100, ITN110
Contact hours: 1 per week
Credit points: 24

► ITN142 Major Project (IS) Full-Time
The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

Courses: IT40, IT35, IT48
Prerequisites: ITN100
Campus: GP
Credit points: 48  
Semester: 1, 2, 3

► ITN151-1 Honours Dissertation
Research is about contributing to scientific knowledge. You will be expected to make such a contribution in your honours dissertation, although the size of that contribution will probably be relatively small as this is likely to be your first research project. The principle aim, however, is to provide you with basic research skills that you will be able to apply again in the future in other contexts, be they in a higher research degree, or applied to real-world problems in a industry setting.

Courses: IT28, IT29
Campus: GP
Credit points: 12  
Semester: 1, 2, 3

► ITN151-2 Major Project (IS) Part Time
The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

Courses: IT35, IT40, IT48
Prerequisites: ITN100
Credit points: 24  
Semester: 1, 2, 3

► ITN160 Research Plan (MIT By Research)
This unit is a research project. Normally, the unit will be followed by a master's thesis (96 credit points). The unit itself complements ITN100, and gives students the opportunity to pilot one phase of the proposed research program. This unit allows students to acquire necessary skills in a problem domain, review the applications of other researchers, and to implement a component of the proposed research. The unit also exercises students in preparing a well-written research report.

Courses: IT60
Prerequisites: ITN100
Contact hours: 3 per week
Credit points: 12  
Semester: 1

► ITN162 Project (IS)
The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

Courses: IT35, IT40, IT48
Campus: GP
Credit points: 24  
Semester: 1, 2, 3

► ITN172-1 Project (IS) Part Time
Courses: IT35, IT40, IT48
Campus: GP
Credit points: 12  
Semester: 1, 2, 3

► ITN200 Database Systems
This unit presents databases in their key role of enabling enterprise initiatives of all kinds.

Courses: IT38, IT45
Incompatible with: ITN212
Contact hours: 3 per week
Credit points: 12  
Semester: 1, 2, 3

► ITN201 Enterprise Architecture
The aim of this unit is to equip you with a broad awareness of various systems and models providing a complete solution to the information needs of an organisation, and to provide linkages with other units that you will be doing in your degree. This unit will introduce comprehensive frameworks that show the diversity of infrastructure and information system requirements and introduce the issues involved in aligning business and IT strategy. These frameworks link technology architectures, application architectures, data and information architectures and business architectures showing the interconnectedness of systems.

Courses: IT38, IT45
Contact hours: 3 per week
Credit points: 12  
Semester: 1, 2, 3
Prerequisites: reading and investigation. The aim of the course is to give you an appreciation of the critical issues facing information technology managers. The unit will provide opportunity to explore these issues in depth, gain viewpoints from other course participants and discuss the ramifications and resolutions to these issues.

Courses: IT48, IT40, IT35, IT45, IT38
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 3

ITN220 Major Issues in Information Systems
The aim of the course is to help you develop a deeper understanding and knowledge of the development and design of information systems using modern OO techniques and to document such design so that it can be implemented by a team of programmers.

Courses: IT38, IT45, IT35, IT40, IT48
Incompatible with: ITN211
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

ITN222 Business Systems Analysis and Design
The aims of this unit are to help you develop a deeper understanding and knowledge of the development and design of information systems using modern OO techniques and to document such design so that it can be implemented by a team of programmers.

Courses: IT38, IT45, IT35, IT40, IT48
Incompatible with: ITN211
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1, 2

ITN223 Software Development with Oracle
This unit aims to develop a sound understanding of database creation, installation, administration, management, security, back up/recovery and application development.

Courses: IT48, IT40, IT35, IT45, IT38
Prerequisites: ITN200 or equivalent, ITN229 or equivalent
Incompatible with: ITB223
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1

ITN227 Web Applications
This unit will introduce you to the key issues, technologies and development approaches involved in the creation of software delivered via the World Wide Web. Emphasis will be placed on encouraging a professional approach appropriate to the industry environment. These aims will be realised through the development of knowledge and hands-on skill, the encouragement of critical thinking and, by working in a group situation, giving an appreciation of shared responsibilities and the development of a team environment.

Courses: IT48, IT40, IT35, IT45, IT38
Prerequisites: ITN200 or equivalent, ITN229 or equivalent
Incompatible with: ITB223
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1

ITN228 Enterprise Systems
This subject presents and discusses important theoretical and practical aspects related to enterprise systems. Specifically, the subject looks at the Enterprise Systems Lifecycle (e.g. systems selection, implementation and post-implementation reviews) and socio-cultural facets surrounding Enterprise Systems (e.g. critical success factors, cultural influences, change management, benefits realisation). Well researched case studies will be used to better illustrate the relevance of the above mentioned topics. Furthermore, Extended Enterprise Solutions (ESS) such as Customer Relationship Management (CRM), Supply Chain Management (SCM) and Enterprise Portals will also be introduced and discussed.

Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 2

ITN229 Database Design
The aim of this unit is to help you develop your knowledge, understand a formal specification tool (ORM) for modelling information systems unambiguously and to apply this formal technique to conceptualise information systems found in many real world applications.

Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3  Campus: GP  Credit points: 12  Semester: 1, 2

ITN232 Database Management
The unit introduces the theoretical foundations of databases, system implementation techniques, and gives an overview of emerging database technologies and applications.

Courses: IT38, IT45, IT35, IT40, IT48
Incompatible with: ITB232
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 2

ITN233 Enterprise Systems Applications
The aim of this unit is to introduce one of the more complex and comprehensive enterprise systems applications. This unit introduces the business environment and applies modules such as (FI, CO, PP, MM and S&D) and investigates the support provided by these systems and the integration between modules by following some of the major processes in a business. The unit enables students to experience both the business analyst view and the user's view of the system across a number of business processes which is includes elements of the configuration activities.

Courses: IT48, IT40, IT35, IT40, IT48
Prerequisites: ITN228
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1

ITN235 Distributed Object Information Systems
The aim of this subject are to introduce distributed computing issues, introduce a platform for distributed process/service interactions and consider models of process/service interaction.

Courses: IT40, IT35
Prerequisites: ITN700 or equivalent
Corequisites: ITN295
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1

ITN237 Advanced Databases
The aim of this unit is to advance your knowledge of the SQL:2003 language, its use as a language embedded in a commonly used programming language, and its implementation in at least two DBMSs.

Courses: IT45, IT40, IT48, IT38, IT45
Contact hours: 3  Campus: GP  Credit points: 12  Semester: 2

ITN239 Enterprise Data Mining
This unit will provide a comprehensive theoretical coverage of various topics in data and web mining. In addition there will be a significant practical component using hands-on tools to solve real-world problems. Specifically, we will consider techniques from machine learning, data mining, text mining, and information retrieval to extract useful knowledge from data which are used for business intelligence, document databases, site management, personalisation, and user profiling.

This unit will first cover a detailed overview of the mining process and techniques, and then concentrate on applications of these techniques to web, e-commerce, document databases and data from advanced applications.

Courses: IT35, IT40, IT48, IT38, IT45, IT76
Contact hours: 3  Campus: GP  Credit points: 12  Semester: 2

ITN241 Information Technology Management
Preparing you to be an IT professional through an understanding of the resources and strategies available for efficient and effective management of IT.

Courses: IT40, IT45, IT48, IT38, IT35
Prerequisites: IT45, IT38: ITN201
Incompatible with: ITN251
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1

ITN245 R/3 Systems Administration
This unit seeks to develop an understanding of the technical architecture of SAP R/3. SAP R/3 is an exemplar integrated enterprise system which is built upon a relational database system. This unit aims to develop theoretical understanding of database management, security, systems performance, background processing and spoofing. The unit aims to develop practical skills in managing each of these elements within the SAP BASIS environment. It does so through discussing some of the theory and showing how the theory is applied in practice.

Courses: IT48, IT40, IT35, IT45, IT38
Prerequisites: ITN228
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 2

ITN246 Minor Project 1 (IS)
The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

Courses: IT48, IT40, IT35, IT45, IT38
Campus: GP  Credit points: 12  Semester: 1, 2, 3

ITN248 Minor Project 2 (IS)
The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.
UNIT SYNOPSIS

Courses: IT48, IT45, IT35, IT40, IT38
Credit points: 12
Semester: 1, 2

► ITN253 Case Studies in Enterprise Systems
This unit seeks to develop business process analysts capable of working as consultants. It seeks to develop the generic skills expected in graduates and in particular to develop better interpersonal skills, better written and oral communication skills, skills in conflict resolution, negotiation, project planning and project management. You will learn to identify, analyse and consider interdependencies. You will increase your awareness for the challenges of teamwork. The projects also allow you to apply the theoretical knowledge gained in the pre-requisite unit to real practical problems. Overall, you will get insights into the skills, tools and services of consultants.
Prerequisites: ITN252
Corequisites: ITN228
Incompatible with: ITN282
Contact hours: 3 per week
Semester: 1
Campus: GP
Credit points: 12

► ITN254 Interactivity Design
The aim of the unit is to provide you with an understanding of the theory, practices and challenges associated with the development of creative interactive design and human computer interaction. They will be practically utilised and showcased by completing the assessment items.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: completion of a professional studies unit similar to ITB002
Corequisites: ITN257 is recommended
Contact hours: 3 per week
Semester: 1
Campus: GP
Credit points: 12

► ITN255 Knowledge Management
This unit seeks initially to convince you of the strategic importance of managing knowledge well in today's environment of predominantly service based industry. We seek to develop a preliminary understanding of knowledge dynamics within organisations, how one can analyse knowledge intensive activities and what steps can be taken to use knowledge more effectively to create a competitive advantage. We examine practical knowledge management issues such as transfer of best practice and knowledge strategies of large IS firms. We also examine the knowledge management strategies and approaches employed by large IS consulting firms and draw on QUT research into software and hardware support organisations. You will gain important strategic management skills and perspe
Courses: IT38, IT45, IT35, IT40, IT48
Prerequisites: ITN241 or ITN266
Contact hours: 3 per week
Semester: 1
Campus: GP
Credit points: 12

► ITN257 Multimedia Systems
After studying this unit you will be able to: design and develop different kinds of interactive multimedia applications; understand the bank of knowledge in cultural developments surrounding the emergence of multimedia technologies. Likewise possess foundational skills in analysis, design and processes that contribute to the production of a creative work, using contemporary hardware and software technologies; understand and develop the creative potential of temporal media forms and their placement and use within new media works; and understand principles and conventions associated with the interpretation and production of meaning through interactive visual representation
Courses: IT38, IT45, IT30, IT40, IT48
Corequisites: ITN254
Contact hours: 3 per week
Semester: 1
Campus: GP
Credit points: 12

► ITN259 Advanced Multimedia Systems
This advanced level unit will give you high-level design and development skills in some of the current and emerging areas of Multimedia. Web delivered applications; stand-alone systems and installations will also be included. It will endeavour to give you an in-depth understanding of interactive Multimeda Systems. You will be given the theoretical basis and practical skills to motivate you in the design and creation of a state-of-the-art system in this discipline.
Courses: IT48, IT40, IT35
Prerequisites: ITN257
Incompatible with: ITB259
Contact hours: 3 per week
Semester: 2
Campus: GP
Credit points: 12

► ITN260 E-Commerce Site Development
This unit will enable you to specify, design, implement and maintain advanced e-commerce applications. You will obtain an in-depth understanding of the potential of e-commerce and how it can be employed to benefit an organisation. You will get direct experience of creating an e-commerce storefront following a business to business (B to B) or business to consumer (B to C) model. You will also develop an understanding of the hardware and software technologies used in the core areas of e-commerce including payment systems, secure transactions and emerging technologies.
Courses: IT38, IT45, IT35, IT40, IT48
Corequisites: ITN385
Prerequisites: TSB
Incompatible with: ITB260
Contact hours: 3 per week
Semester: 2
Campus: GP
Credit points: 12

► ITN264 Information Systems Consulting
This unit examines the strategic and operational issues of an IS consulting firm. It looks at the lifecycle of an IS consulting engagement and the issues involved at each stage of that lifecycle. The marketplace for IS consulting firms is appraised to give students a realistic understanding of their positioning and the role of consultants within the different market sectors. Context is provided by examining specific IS consulting practices such as large scale software implementation, systems integration and development and IS Strategic Planning.
Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week
Semester: 2
Campus: GP
Credit points: 12

► ITN265 Management of Information Programs
The application of effective management techniques has become increasingly important in call centre, help desk centres, libraries, IT consultancy firms and other types of information agencies. This unit introduces students to the ways in which generic management principles strategic planning, strategic marketing, principles of leadership, motivation and effective organisational communication amongst other aspects are applied to achieve best practice in contemporary information agencies. Theoretical perspectives and the adoption of a case studies approach are combined to consider practical issues in different types of information agencies.
Courses: IT25
Incompatible with: ITB265
Contact hours: 3 per week
Semester: 1
Campus: GP
Credit points: 12

► ITN266 Information Management
The aim of this unit is to provide you with an awareness of the activities in which IM professionals are engaged within various organisational contexts. Through the use of case studies, this unit will introduce the strategic and analytic elements that comprise information management activities such as the alignment of enterprise information and business planning, enterprise information policy, evaluation of information resources and systems and applications of the information inventory.
Courses: IT25, IT40, IT35, IT45, IT38, IT70, IT48
Corequisites: IT45, IT38: ITN201
Incompatible with: ITB266
Contact hours: 3 per week
Semester: 2
Campus: GP
Credit points: 12

► ITN267 Business Analytics
This unit introduces you to three key areas. These are: development methods for data-driven Decision Support Systems, the principles of data warehousing leading to efficient reporting tools, and business analytics. These fundamental skills will help you understand real world problems. These methods include data driven decision support systems and using hands on tools to solve real world problems.
Courses: IT35, IT40, IT48, IT38, IT45
Corequisites: ITN200
Incompatible with: ITN242
Contact hours: 3 per week
Semester: 1
Campus: GP
Credit points: 12

► ITN269 Special Topic 2B
This unit is designed to allow for the significant development of, or emphasis in, information systems not dealt with in other course units. Selected topics and study areas are offered as required and when the expertise is available.
Courses: IT40, IT35, IT48
Contact hours: 3 per week
Semester: 2
Campus: GP
Credit points: 12

► ITN272 Information Technology Project Management
The aim of this unit is to provide experience in IT project management issues. It prepares you for the management of IT projects.
Courses: IT35, IT40, IT38, IT45, IT48
Corequisites: ITN241
Contact hours: 3 per week
Semester: 2
Campus: GP
Credit points: 12

► ITN273 Information Retrieval
To develop the skills required for advanced database searching and understand the structure and use of information resources in a variety of potential contexts. To develop the knowledge and skills required in information brokerage, information specialist, or reference work, in the library and information science contexts. The unit also aims to de-
develop your basic skills in the reference interview process.

Courses: IT770
Contact hours: 36 per semester
Campus: GP
Credit points: 12
Semester: 1

► ITN274 Management Issues for Info Professionals
The overall aim is to enable you to identify key management issues and encourage familiarity with understanding common management problems within both libraries and other information agencies (call centres, help desk centres, IT consultancy firms and other information agencies). Using an integrated approach you will find that the subject draws from the field of organisational behaviour, case studies, as well as other literature specifically relating to practices in these types of information agencies. You will be encouraged to view organisations not as fixed but as constantly evolving entities as they attempt to meet the needs of their dynamic and changing environments.

Courses: IT70
Contact hours: 36 per semester
Campus: GP
Credit points: 12
Semester: 1

► ITN275 Information Organisation
To develop an understanding of the principles and practices of information organisation as applied to description and classification of knowledge contained in a range of information resources utilised in different contexts.

Courses: IT70
Prerequisites: ITN200
Campus: GP
Credit points: 12
Semester: 2

► ITN276 Information Services
This unit seeks to develop your understanding of the key issues involved in developing and managing a contemporary and innovative information service. In particular you will be given the opportunity to become familiar with the methods and tools used in the selection and acquisition of information resources and the creation of information programmes to meet the specific needs of a community or client group. You will also be developing a working knowledge of the skills and techniques essential for critically evaluating the resources and programmes created. The unit further seeks to develop your oral and written communication skills, critical thinking, teamwork skills and project management abilities.

Courses: IT70, IT73, IT74, IT75, IT76
Prerequisites: ITN273
Campus: GP
Credit points: 12
Semester: 2

► ITN278 Web Content Reliability
To develop knowledge of the principles of web content management. To develop an appreciation of the skills required for dynamic forms of web architecture, and to begin to explore the development of these skills.

Courses: IT70, IT73, IT74, IT75, IT76
Campus: GP
Credit points: 12
Semester: 1

► ITN279 Information Literacy Education
This unit seeks to develop your understanding of information literacy, learning theory and information seeking behaviour and how these concepts can be applied according to the needs of a specific community or client group. In particular you will be given the opportunity to become familiar with the techniques used in designing and delivering instructional events that meet the information needs of a specific community or client group. You will also learn about the techniques essential for evaluating educational events, programmes and resources, and assessing learning outcomes. The unit further seeks to develop your oral and written skills, teamwork skills and critical reflective practice.

Courses: IT70, IT73, IT74, IT75, IT76
Campus: GP
Credit points: 12
Semester: 1

► ITN280 Professional Practice
This unit seeks to develop your understanding of the key issues of contemporary professional practice in information agencies. This is achieved through group discussion of current topics in seminars and through practical experience during fieldwork placements. You will have the opportunity to further develop your skills in oral and written communication, teamwork and reflective practice.

Courses: IT70
Prerequisites: ITN275, ITN276
Campus: GP
Credit points: 12
Semester: 1.2

► ITN293 Java for E-Commerce Applications
In this subject we introduce and explore the J2EE suite of ITN294 related application programming tools. Specifically, we take a look at: JDBC/ODBC database connectivity, servlets, Java Server Pages, java beans, and Enterprise Java Beans. To do this we make use of the Java programming language, and consider several design issues (including the MVC design pattern) related to the development and deployment of J2EE based applications. We also introduce concepts associated with distributed information systems and issues related to their deployment and access, and distributed system issues in general.

Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITN294 Information Quality
To introduce the concept and application of information quality within information systems and as a factor in management of business processes.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN200
Incompatible with: ITN275
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITN295 XML: Data and Document Processing
The aim of this unit is to introduce you to various XML related technologies. By understanding how these technologies could be utilised, you will be in a better position to comprehend future XML standards and related technologies.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN200 and ITN600
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITN296 Information Systems Theory and Applications
The aims of this unit are to help you develop your knowledge of information systems theory and of the issues involved in planning, implementing, and controlling the use of information systems to meet business needs in organisations.

Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITN297 Web Site Design
This unit will introduce you to the key issues, technologies and development approaches involved in the creation of web-based systems, with consideration of content management systems (CMS) providing an appropriate scenario. Emphasis will be placed on encouraging a professional approach appropriate to the industry environment in the areas of critical analysis, design and construction. These aims will be realised through: the development of knowledge and hands-on skills; the encouragement of critical thinking; and, by working in a collaborative environment, giving an appreciation of shared responsibilities and the approaches necessary to develop a productive team environment.

Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITN298 Process Engineering
The aim of this unit is to introduce you to modern methods and tools of business process management. These skills will be applied to the most complex, comprehensive and relevant IT applications. This unit also seeks to develop logical thinking and the capability to understand and deal with complex systems, within a business management framework. The unit’s content will focus strongly on business process modelling, as a fundamental technique to manage the complexity associated with process management tasks within various contexts.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN222 and ITN228
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► ITN299 Workflow Management
This unit will provide you with an introduction to fundamental concepts in workflow management and their application. More specifically, you will be taught about (i) the formal specification of distributed and concurrent systems, (ii) a set of platform independent workflow patterns, and (iii) a language that aims to embody these patterns.

Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► ITN315 Information Management Project
The aims of this unit are to help you acquire necessary skills in a problem domain and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also helps you learn how to prepare a well written project report.

Courses: IT70
Campus: GP
Credit points: 12
Semester: 1, 2, 3

► ITN316 Digital Library Systems
To introduce the concept and application of digital libraries and the factors affecting their successful implementation.

Courses: IT70, IT73, IT74, IT75, IT76
Prerequisites: ITN275
Campus: GP
Credit points: 12
Semester: 2

Q U T H A N D B O O K 2 0 0 6  •  P A G E 6 7 5
UNIT SYNOPSIS

**ITN318 Information Organisation 2**
To develop an understanding of the principles and practices of information organisation as applied to description and classification of knowledge contained in a range of information resources utilised in different contexts.

- **Courses:** IT70
- **Prerequisites:** ITN275
- **Campus:** GP
- **Credit points:** 12
- **Semester:** 1

**ITN319 Records Systems**
To understand the concepts of recordkeeping, and how they are applied to electronic recordkeeping systems.

- **Courses:** IT73
- **Prerequisites:** ITN266
- **Campus:** GP
- **Credit points:** 12
- **Semester:** 1

**ITN320 Law Library Management**
Law librarianship offers information professionals challenging opportunities for career specialisation. Law libraries, whether in a commercial law firm, in a government department or in a court, play a key role in the knowledge transfer process within legal practice. Effective law library management requires a mature understanding of the acquisition, collection, organisation and provision of access to legal information and knowledge resources, in both print and electronic media. In addition, law library managers need to develop skills in the areas of strategic management, financial management, human resources management and marketing in the legal environment. The knowledge and skills acquired through this unit provide a firm foundation for a career in managing and delivering legal information services.

- **Courses:** IT70, IT73
- **Corequisites:** ITN321 suggested
- **Contact hours:** 5 days intensive
- **Campus:** GP
- **Credit points:** 12

**ITN321 Law Librarianship - Legal Research**
There is a plethora of legal research resources which must be mastered if legal professionals are to provide cost-effective advice to the community at large and paying clients in particular. The knowledge of where to find specific pieces of information and how to identify, retrieve relevant and authoritative material is of critical importance to developing a well informed society on their legal rights and obligations. Law librarians need to develop a high level of knowledge and understanding of the needs and expectations of their clients, particularly in a fast changing information environment. They will also need to develop skills in information literacy in order to support lawyers and their communities in lifelong learning. The knowledge and skills acquired through this unit provides a firm foundation for employment in law libraries and for undertaking research within law-related organisations and agencies.

- **Courses:** IT70, IT73
- **Corequisites:** ITN320 suggested
- **Contact hours:** 5 days intensive
- **Campus:** GP
- **Credit points:** 12
- **Semester:** 3

**ITN322 Information Resources**
Managing information; database structure, basic searching; online industry; searching and the searching process; search strategies; online sources, Dialog etc. CD-ROMS; the Internet historical background and searching tools; management aspects of using external search services; and legal information sources; research and development information sources; demographic data; government resources; marketing information sources; patents, standards; census data, company annual reports; people as sources of information; ethics of information gathering.

- **Courses:** IT38, IT45
- **Incompatible with:** ITB322
- **Contact hours:** 3 per week
- **Campus:** GP
- **Credit points:** 12
- **Semester:** 2

**ITN330 Information Issues and Values**
The overall aim is to introduce you to the importance of effective information policies within both organisations and broader societal contexts. Accordingly, the subject will introduce you to ‘best practice’ in policy design, implementation, and evaluation as they relate to demands both within organisational and these broader social contexts.

- **Courses:** IT38
- **Incompatible with:** ITB330
- **Contact hours:** 3 per week
- **Campus:** GP
- **Credit points:** 12

**ITN341 Strategic Information and Knowledge Management**
The relationship between the public and private sectors in information provision, and an examination of the information industry and corporate and government policies relating to it.

- **Courses:** IT35, IT40, IT48, IT38, IT45
- **Prerequisites:** ITN330
- **Campus:** GP
- **Credit points:** 12

**ITN600 Programming Principles**
Information technology students need a fundamental knowledge of programming and an understanding of the processes and issues involved in the development of software. Graduates will most likely be required to work with programmers at some time in their career. Therefore they need to understand the challenges and constraints that arise in the software development process. This unit provides students with a basis for the further acquisition of programming knowledge and skills and is a prerequisite for subsequent units in software engineering, data communications and information systems.

- **Courses:** IT38, IT45
- **Incompatible with:** ITN410
- **Contact hours:** 3 per week
- **Campus:** GP
- **Credit points:** 12

**ITN601 Systems and Networks**
Computer systems and communications networks are fundamental to the activities of modern organisations. All students completing a course in information technology will be expected by employers to have a firm understanding of the terminology and concepts of computer systems, communications networks and software. This unit introduces students to computer systems, communications networks, technologies and systems software. The unit also serves as an entry point to further specialised studies in the fields of data communications and software engineering.

- **Courses:** IT38, IT45

**ITN602 Project (SEDC)**
This unit allows students to further develop their software development skills and put into practice the knowledge acquired in more theoretical units.

- **Courses:** IT38, IT45, IT35, IT40
- **Contact hours:** 3 per week
- **Campus:** GP
- **Credit points:** 12
- **Semester:** 1

**ITN675 Minor Project 2 (SEDC)**
Students graduating from a course in information technology are expected by employers to be able to complete, on time, a medium size programming project. This project unit allows students to further develop their software development skills and put into practice the knowledge acquired in more theoretical units.

- **Courses:** IT38, IT45, IT35, IT40
- **Contact hours:** 3 per week
- **Campus:** GP
- **Credit points:** 12
- **Semester:** 1

**ITN678 Project (SEDC) – Full-Time**
Students graduating from a course in information technology are expected by employers to be able to complete, on time, a medium size programming project. This project unit allows students to further develop their software development skills and put into practice the knowledge acquired in more theoretical units.

- **Courses:** IT35, IT40
- **Prerequisites:** ITN100, 84 credit points in relevant postgraduate units
- **Incompatible with:** ITN144, ITN145
- **Campus:** GP
- **Credit points:** 48
- **Semester:** 1

**ITN685 Major Project (SEDC) – Part-Time**
Students graduating from a course in information technology are expected by employers to be able to complete, on time, a medium size programming project. This project unit allows students to further develop their software development skills and put into practice the knowledge acquired in more theoretical units.

- **Courses:** IT35, IT40
- **Prerequisites:** ITN100 & 84 credit points in relevant PG units
- **Credit points:** 48
- **Semester:** 1

**ITN700 Programming Principles**
Information technology students need a fundamental knowledge of programming and an understanding of the processes and issues involved in the development of software. Graduates will most likely be required to work with programmers at some time in their career. Therefore they need to understand the challenges and constraints that arise in the software development process. This unit provides students with a basis for the further acquisition of programming...
 knowledge and skills and is a prerequisite for subsequent units in software engineering, data communications and information technology.

Courses: IT38, IT45
Incompatible with: ITN600
Contact hours: 3 Campus: GP
Credit points: 12 Semester: 1, 2, 3
► ITN701 Networks and Systems
The main aim of this unit is to provide a broad introduction to networks. The teaching staff will make surface level approaches to explain concepts from diversified areas within computer networking. The unit also aims at giving extensive hands-on practical sessions throughout the semester.

Courses: IT38, IT45
Incompatible with: ITN601
Contact hours: 3 Campus: GP
Credit points: 12 Semester: 1, 2, 3
► ITN710 Fundamentals of Computer Science
The aims of this unit are: to introduce you to the ideas of abstraction and algorithms for representing and manipulating information; to enable you to verify that information technology solutions are complete and correct; and to know the abstract models for computation itself.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: For IT38/45: ITN700
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2
► ITN711 Programming Abstraction
The purpose of this unit is to ensure that you have a sound knowledge of modern programming techniques and their use in providing medium-scale software solutions. On completion of the unit you will be able to decompose a problem and produce an abstract, modular solution to a programming task. In addition, you will acquire the necessary skills for you to be able to use the tools available to you in common development environments, such as Microsoft Visual Studio.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: For IT38/45: ITN700
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 3
► ITN712 Software Engineering Principles
This unit is the starting point for the specialist knowledge required in the software architecture major. Up to this stage units have primarily focussed on learning programming and design skills. This unit introduces you to the practice of following a formal process to guide the development of software. Using a process as a guide, you will look at each of the major activities involved in developing a software system. You will also learn how to manage and control the software development process for a large project when a number of team members are involved in the development. This unit provides the foundation you will need for many later units, and develops the professional practice of working on large software systems.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: For IT38/45: ITN700
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2
► ITN713 Advanced Java Programming
In this unit you will develop skills to allow you to discover, learn and communicate new knowledge in an efficient manner. The unit will improve your understanding of some specific areas of intermediate and advanced programming technologies and tools and enhance your graduate capabilities in the areas of discovery and learning in the context of programming technology.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN700
Incompatible with: ITB647, ITN458, ITB458
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► ITN715 Web Services
Web services are enabling new kinds of IT applications and services to be built. They are becoming prevalent in a wide variety of software systems from large enterprise systems through to embedded systems. Thus it is important for students to understand the technical and business aspects of web services, and to be able to evaluate them. This unit teaches students about web services to an advanced level and hence prepares them for an important new technology integral to future IT systems. The unit also discusses current research issues associated with web services.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN700 or equivalent knowledge
Incompatible with: ITN680
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2
► ITN716 Advanced Web Applications Development
This unit will provide you with an understanding of the issues, structure and technologies used for developing web based systems. The unit will provide you with the theoretical and practical skills needed to develop enterprise critical applications designed with an n-tier architecture using state of the art technologies. A comparative technology approach is taken and an analysis of how web technologies have evolved to date, in order to identify common themes and to better enable you to comprehend and critically evaluate future web technology offerings.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN711
Incompatible with: ITB642, ITB471, ITN471, ITN176
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► ITN717 Enterprise Software Architecture
This unit aims to introduce you to the field of enterprise architecture. It attempts to give you a grounding in the basic knowledge and skills required by an enterprise architect. This includes a solid understanding of the IT challenges currently facing medium to large size organisations, the theory and technologies currently used to address them and an appreciation of the business imperative for which they are required.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN711
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2
► ITN720 Internet Protocols and Services
The aim of this unit is to give you an understanding of the underlying protocols involved in common network services. This unit will also provide you with the skills to program applications that interact with these protocols.

Courses: IT35/40/48, IT38/45
Prerequisites: For IT38/45: ITN701
Incompatible with: ITN529, ITN667, ITB629, ITB529
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1, 2
► ITN721 Computer Network Administration
The aim of this unit is to provide students with a working knowledge of the technical aspects and theory of network administration and management. The unit uses the Unix environment as the learning platform for attaining technical skills and for the development of problem solving skills necessary to be a successful networking professional.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: For IT38/45: ITN701
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► ITN722 Network Planning and Deployment
This unit draws together subject matter from a number of different networking-related areas. The aim of the unit is to assemble the previously acquired knowledge and techniques and apply it in a cohesive fashion to the task of network planning.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN720
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2
► ITN723 Wireless and Mobile Networks
This unit provides you with the skills to be able to design and understand the issues involved with different types of wireless communications systems. It develops your knowledge of Wide Area Networks (WANs), Local Area Networks (LANs) and Personal Area Networks (PANs) as well as skills in programming for mobile handsets. You will also develop knowledge of the different types of wireless communications technologies available and when each is most applicable in a particular situation.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN720
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 1
► ITN730 Information Security Fundamentals
You should understand the major issues in information security and the implications of interactions between entities, and be aware of international information security management standards. You should have a broad view of the different kinds of protection offered by IT security technology and practice, and understand how they apply within your IT specialisation, i.e. where and how security and compliance issues are likely to arise. You will be able to articulate security issues and with the help of a security specialist, formulate solutions.

Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: For IT38/45: ITN700, ITN701 & ITN200
Incompatible with: ITN161
Contact hours: 3 per week Campus: GP

QUT HANDBOOK 2006 • PAGE 677
UNIT SYNOPSES

Credit points: 12  Semester: 1, 2, 3
► ITN731 Security Technologies
This unit aims to provide you with the knowledge to investigate and determine the security requirements for computer systems and networks and to understand the underlying issues and problems. In addition, this unit aims to enable you to investigate, evaluate and select the most appropriate security technologies for specific situations.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN730
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN732 Cryptology and Protocols
This unit aims to help you: understand the fundamental algorithms and protocols of cryptology, with emphasis on the major applications of cryptology; and develop your analytical thought processes, enabling you to apply mathematical and cryptological techniques to solve real world problems in a hands-on manner.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: Maths B, MAB105 or equivalent
Incompatible with: ITB646
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ITN733 Network Security
The aim is to equip you, as a security specialist, with the theory, hands-on experience and problem solving skills required in order to critically evaluate, deploy, and manage the network security services essential for modern computer networks.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN721
Incompatible with: ITB645
Contact hours: 3 per hour  Campus: GP
Credit points: 12  Semester: 2
► ITN740 Agent Based Software Engineering
The unit focuses on the topics and techniques that are most promising for building and analysing smart information systems, such as Web information gathering agents and autonomous agents for business processes management. The unit also focuses on general representations of knowledge and discovered knowledge for real problem solving. Through this study, you will be able to demonstrate knowledge of the principles and techniques of advanced agent technologies. You will also be able to use and develop agent-based techniques to design some types of real agent-based systems, and understand and write simple agent-based programs. This study will enhance your generic problem solving skills on complex systems and help you to develop communication skills and confidence.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN607
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ITN741 Information Retrieval Technology
This unit is an advanced specialisation unit in the area of Intelligent Systems and aims to fuse together and present a coherent picture of modern information retrieval problems, solutions, and open questions. It aims to equip students with the ability to design and implement information retrieval systems that are designed to operate in range of environments, from PC based single user systems to web based search engines operating over distributed collections. The unit is also intended to teach the specific design and programming skills that will enable you to solve IR problems using database and web technology.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN295
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN742 Computational Intelligence
This is a unit in the area of Intelligent Systems that introduces the five main methods from the field of computational intelligence from the perspective of autonomous systems. The methods are: knowledge bases systems, Fuzzy control, Neural Networks, Reinforcement Learning and Evolutionary Computation. Autonomous systems have the ability to use information from their environment, acquired by their own sensors, for carrying out the actions required to fulfil their mission. The unit is also intended to teach the specific design and programming skills that will enable you to solve problems using computational intelligence methods in a real time embedded systems.
Courses: IT35, IT40, IT48, IT38, IT45
Incompatible with: ITB650
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1
► ITN743 Artificial Intelligence
This unit is intended to provide you with an understanding of the basic techniques of artificial intelligence, and some insight on the theoretical foundations of advanced techniques that you may encounter later in your course or professional career.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN003
Incompatible with: ITB640
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN744 Computer Architecture
After successfully completing the unit you will be able to write assembly subroutines that can be called from the C language, understand how assembly language instructions are carried out by a processor, how computers interpret programming languages and how the CPU communicates with these devices. Additionally, you will gain an understanding of programming for devices that must interact in real time with their physical environment without human supervision.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN005
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN745 Operating Systems
This unit provides a solid introduction to the concepts that underlie operating systems. Fundamental concepts that are applicable to a variety of systems (e.g. UNIX/Linux and Windows) are discussed.
Courses: IT35, IT40, IT48, IT38, IT45
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN746 Modelling and Animation Techniques
This unit will provide you with the knowledge and skills to use an industry standard graphics API to implement graphics applications and to develop a basic real-time animation system using an industry standard language.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN711
Incompatible with: ITB649
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN747 Real Time Rendering Techniques
This unit will provide you with knowledge and skills in basic to advanced techniques in real-time rendering using shading languages. You will be able to implement a high-quality real-time rendering system in an industry standard API.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN746
Incompatible with: ITB648
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN748 Configurable Computing
This is a unit in the embedded systems major that introduces you to the principles and methodologies of configurable computing. You will learn about the architecture of configurable computing devices (FPGAs) and the functional definition of their digital logic components. You will learn how to specify a computing system at the logical level using a hardware description language (HDL) and how to use the design flow tools to synthesise complex computational circuits on an FPGA.
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: ITN747
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2
► ITN749 Scientific Programming
Courses: IT35, IT40, IT48, IT38, IT45
Prerequisites: For IT38/IT45: ITN700
Contact hours: 3  Campus: GP
Credit points: 12  Semester: 1
► ITN750 Computer Game Studies
This unit is designed to give you a clear understanding of the socio-cultural issues that affect the computer game industry. Through critical review of games and games industry literature, playing games and actively participating in classroom discussion you will develop your capacity to join in the discourse about the design, impact and future direction of computer games in our society.
Courses: IT38, 45, IT35, IT40, IT48
Contact hours: 3  Campus: GP
Credit points: 12  Semester: 2
► ITN761 SEDC Special Topic 1
Courses: IT35, IT40, IT48, IT38, IT45
Campus: GP
Credit points: 12  Semester: 1
► ITN765 SEDC Special Topic 5
Courses: IT35, IT40, IT48, IT38, IT45
Campus: GP
Credit points: 12  Semester: 2
► ITN770 Internationalisation of Software
Software is now a global market, and developers need to be able to produce applications that can be used in many different cultures and nations. There is a significant body of enabling technology that allows efficient and cost effective development of applications that can be used in diverse contexts. Understanding the principles and the technologies involved in internationalisa-
Incompatible with: ITN700

Courses: ITN771

Prerequisites: ITN770

Contact hours: 3

Campus: GP

Credit points: 12

Semester: 2

► ITN772 Advanced Network Management

Computer networks are an essential component of modern civilization. Students undertaking this unit will have previously learned the fundamental theory and practical aspects of network administration and management. This unit builds upon that foundation and extends the knowledge and skills to enterprise wide networks which are significantly more complex than small networks. Security of enterprise wide networks is an important issue in this unit, along with network management systems.

Courses: IT35, IT40, IT48

Prerequisites: ITN771

Contact hours: 3

Campus: GP

Credit points: 12

Semester: 2

► ITN773 Trusted Systems

Information systems must be protected against misuse in order to protect essential information assets. Users should be able to rely upon the trustworthiness of the hardware, software and communication networks comprising these information systems. Such trustworthiness in turn should be derived from sound security design, and evaluation mechanisms assessing the effectiveness of security design and implementation. This unit enables students to identify the essential features of such trusted security design and evaluation.

Courses: ITN730 and ITN745

Incompatible with: ITN681

Contact hours: 3

Campus: GP

Credit points: 12

Semester: 1

► ITN774 Computer Forensics

This unit focuses on the principles, that should direct the collection, analysis and presentation of the digital evidence available to an investigator, and the techniques that are used in order to ensure that those principles are met. IT professionals, especially those with a responsibility for computer security, are increasingly required to gather, analyse and present evidence of computer crime. To undertake this unit, students should have already achieved a sound foundation in computer software, computer communications, and computer security thus enabling them to relate to the principles and practice of computer forensics, which build on that foundation.

► JSB131 Framing Social Justice

The Justice Studies degree is about producing competent justice professionals. In order to achieve this, the degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. This unit introduces students to the structural parameters of social justice.

Courses: JS31, LW41, LW42

Incompatible with: JSB101, JSB011

Contact hours: 3 per week

Campus: KG, Ext

Credit points: 12

Semester: 1

► JSB132 Professional Skills

The effectiveness of justice professionals is measured by their ability to communicate and investigate, and it is these two skills which form the basis for much of the day to day work performed by justice studies students and justice professionals. This unit introduces basic skills in research and written and oral communication in order to lay a successful foundation for academic and professional achievement.

Courses: JS31, LW42

Incompatible with: JSB012, JSB014

Contact hours: 3 per week

Campus: KG, Ext

Credit points: 12

Semester: 1

► JSB133 Law and Government

The justice professions have as their common factor an involvement in the process of law, and particularly the administration of law and law enforcement. The increasing role of governments in law-making is a significant feature of modern times. This unit introduces students to the concepts of law and government. It examines the role of government in making and administering the law and encourages students to start thinking critically and analytically about legal, political and justice issues. Law and government provides those who intend to work in the justice system with a foundation framework of key legal and political information and knowledge. Students use this knowledge throughout their studies and in their future professional careers.

Courses: JS31

Incompatible with: JSB103, JSB013

Contact hours: 3 per week

Campus: KG, Ext

Credit points: 12

Semester: 1
UNIT SYNOPSIS

► JSB134 Social Ethics and the Justice System
It is essential for those working in the justice system to be able to competently and confidently work at the borders between ethics and the law. Ethical ability will enable practitioners to critically assess the moral status of current laws, to interpret acceptable standards of behaviour in situations not covered by the laws, and to develop shared understandings of moral responsibility in justice organisations and the wider community.

Courses: JS31, LW42
Incompatible with: JSB102
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► JSB135 Unlocking Criminal Justice
The Justice Studies degree is about producing competent justice professionals. In order to achieve this, the degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. This unit, in particular, focuses on the theoretical and practical relationship between social justice and criminal justice by examining not only the concepts of human rights, equality, social justice and citizenship, but asking students to apply this knowledge to a series of practical situations. This application happens throughout the lectures and tutorials as well as within the assessment.

Courses: JS31, LW42
Incompatible with: JSB202, JSB015
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► JSB136 Forensic Psychology and the Law
Forensic psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. Psychologists are now involved significantly in policing, judicial procedures and correctional processes. The term ‘forensic’ literally means ‘of or used in law courts’ (Austalian Oxford Paperback Dictionary). The term ‘forensic psychology’, however, is now used more generally to include the contribution of psychology and psychologists across the three criminal justice domains of the police, the courts, and corrections. By its very nature forensic psychology draws from a wide multi-disciplinary base for the application of its specialised knowledge.

Courses: JS31, LW42
Incompatible with: PYB215
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► JSB137 Politics of Law
In the Politics of Law students develop their knowledge and understanding of legal and criminal justice processes. This knowledge is important because it will inform study in other units in the course and equip students with the necessary understandings to enter employment in the justice system. The unit also provides students with knowledge necessary to act responsibly as an informed citizen in Australian society. In addition to an understanding of criminal justice related issues, this unit helps students to build on their understanding of the relationship between law and society, as well as develop problem-solving skills appropriate to a legal and justice context.

Courses: JS31
Incompatible with: JSB216, JSB017
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► JSB138 Crimes of Violence
To work as justice professionals in areas related to the criminal justice system or human rights, Justice students need an understanding of fundamental principles of criminal law and of social justice issues related to criminal law. Of particular importance for these students is an understanding of issues pertaining to violent crimes as such crimes will play a focal role in their work.

Courses: JS31, LW42
Incompatible with: JSB201, JSB022
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► JSB231 Understanding Criminology
This unit deals with formal criminological theories of crime and crime control. Particular attention is drawn to various concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Criminological theories are viewed as integral to a range of government practices aimed at ensuring the regulation and control of particular ‘problem populations’. The unit develops an analytical framework in order to critically assess the epistemological claims and justifications found in all formal articulations of criminological theory.

Courses: JS31, LW42
Incompatible with: JSB107, JSB018
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► JSB232 Youth Justice
This unit is concerned with the way in which a ‘youth crime problem’ is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the administration and management of youth crime through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdictions. Contemporary articulations of youth crime control are examined in relation to Queensland’s system of youth justice, particularly as it relates to young indigenous people, young women and those from various social classes and ethnic groups.

Courses: JS31, LW42
Incompatible with: JSB041
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► JSB233 Crime and Community Corrections
Prisons are the visible tip of the iceberg of punishment and correction in our society: Community Corrections is the beneath-the-surface bulk. The ratio of persons in prison to persons on Community Corrections Or-
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

JSB253 Watchdogs: Warriors, Wimps and Witch-Hunts
Recently growth of government activity and regulation means that strong powers have been granted to non-elected officials and the agencies they are employed by, often to perform an oversight role on public administration. Justice professionals need to know the range of agencies with such watchdog roles, and their powers and responsibilities. A good understanding of the theoretical and political framework within which the investigative and other powers of oversight agencies are exercised and utilised is important for those who may carry out, evaluate or critique the powers of such watchdogs.

Courses: JS31, LW42
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12

JSB254 Public Ethics and Responsibility
Until recently, technological advancements and increased economic rationalism had forced public and private organisations into a managerial mode of governance that focussed on outcomes at the expense of process. The managerial mode created major gaps in public accountability and responsibility, leading to increased risk of corruption, fraud and scandal. To address these problems, current government policy has begun to focus more and more on governance and accountability and their associated processes. This unit provides the theoretical and conceptual basis for examining and analysing the ethical issues involved in contemporary public and private organisations, and offers a critical analysis of current attempts to address these issues.

Courses: JS31, LW42
Contact hours: 3
Campus: KG
Credit points: 12 Semester: 2

JSB331 Prisons as Industry
The modern Western prison has a two hundred year history. That history follows no Darwinian pattern of evolutionary logic. Instead, it fits and starts, it lurches forward and leaps backwards, seemingly often at the individual whim of powerful bureaucrats rather than in response to any dominant public discourse of the time. What does the future hold? more prisons, fewer prisons or none? The technological push, increasing privatisation and expanding captive labour forces all have implications for the future of the prison. To what extent will political and economic imperatives, rather than social discourse, dictate the future of our prisons? This unit sets out to examine the future of punitive incarceration.

Courses: JS31, LW42
Incompatible with: JSB318, JSB074
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

JSB332 Crime Control and Governance
This unit deals with the way in which crime control is administered in western neo-liberal states, with specific reference to Australia. Based on a critical criminological perspective, the unit considers contemporary 'cultures of crime control' as part and parcel of a governmental approach to the attempted management of 'problem populations' in the neo-liberal state.

Courses: JS31, LW42
Incompatible with: JSB304, JSB021
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

JSB333 Responding to Crime
Current directions in research on the 'crime problem', based in developmental and cognitive psychology, outline a complex web of intervention in the lives of 'at risk' populations. This shift from a reactive crime control model to a pro-active crime prevention model has been embraced by governments at both state and federal level in Australia and elsewhere. Students intent upon working in the criminalological field need to fully understand both the strengths and weaknesses of this new way of understanding crime. Most important however, will be the implications of such a major shift in the control of 'criminal populations', which is well beyond the scope of the traditional crime justice system.

Courses: JS31, LW42
Incompatible with: JSB044
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

JSB341 Investigations, Evidence and Police Powers
Students undertaking to undertake employment within the justice system need to be introduced to a core component of that system, namely, the criminal law particularly police powers and evidence. This unit provides a comprehensive knowledge base of some of the principles, rules and concepts of police powers and selected evidentiary components. This, together with an understanding and application of these principles, concepts and rules to selected situations will ensure a better analysis and appreciation of the workings of the criminal justice system as a whole.

Courses: JS31, LW42
Incompatible with: JSB031, JSB051
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

JSB342 Organised Crime
The apparent growth of organised crime, both nationally and internationally, in recent years has resulted in a developing concern about the part of law enforcement agencies in suppression. Although not confined to the association with illicit drugs, the so-called drug trade is a major enterprise behind the proliferation of organised crime. Another consequence of organised crime is the development of corruption through the diverse levels of society. Students therefore will gain an understanding of the historical development, social perceptions and consequences and the perceived extent of organised crime.

Courses: JS31, LW42
Incompatible with: JSB310, JSB053
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

JSB343 Future Policing Strategies
The role of policing has changed considerably since its inception. The last decade or so has been particularly transient. The environment in which policing operates is impacting on the role of policing. In these circumstances, a new way of understanding crime has been called for that is based on a positive and constructive approach to the community and problem solving in collaboration with the community, not wholly resting with the police agencies. In addition, the advancements in technology and other societal changes have impacted on the role of policing within contemporary society. On this basis, students undertaking this unit will be exposed to some of the issues that require further debate and analysis as we move into the 21st century.

Courses: JS31, LW42
Incompatible with: JSB054
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

JSB351Administrative Justice
It is essential that justice professionals know and understand the roles of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. Those working in the community sector need to know how to question administrative decisions and actions and be able to challenge the power of government when it concerns principles of administrative justice. The unit is organised around theoretical perspectives of democracy, specifically participation and accountability; it examines mechanisms of State accountability, their philosophy and practice.

Courses: JS31, LW42, EDS5
Incompatible with: JSB083
It is essential that justice professionals know and understand the rules of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. The unit is organised around theoretical perspectives of democracy, specifically participation and accountability, and examines mechanisms of State accountability, the philosophy and practice so as to provide a strong working knowledge of the administrative justice system and its legal, social and political environment.

Courses: JS31, LW42
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 1

► JSB352 Indigenous Justice

Debates over the protection and enforcement of human rights norms within the Australian social, legal and political landscape are increasingly prevalent. Knowledge and understanding of Australia’s international, regional and domestic human rights obligations and activities are vital for all justice professionals. This unit promotes an understanding of the theoretical and practical frameworks of human rights norms and their influence in global justice, eg our contribution to international treaties such as the greenhouse gas protocol.

Courses: ED50, JS31, LW42
Incompatible with: JSB314, JSB084
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 2

► JSB411 Theories of Justice

Arguments concerning perceived problems of justice and injustice usually reveal conflicting ideas about what justice actually means both theoretically, and in practice. Students who are to graduate with honours in a Bachelor of Justice require a sophisticated level of understanding of theories of justice in a social and criminal context if they are to effectively apply in practice the content knowledge they have acquired in the course of their study.

Courses: JS40
Incompatible with: JSN001, LWN040
Contact hours: 3 per week  Campus: Ext
Credit points: 12  Semester: 1, 2

► JSB412 Literature Review

Employment as a researcher in government departments and justice agencies and the successful undertaking of higher degree study require an ability to independently design and execute complex research projects. An integral part of good research is the establishment of parameters within which their research should proceed. Knowledge of the literature in and around the chosen topic is vital to establishing the basis of a good research project.

Courses: JS40
Contact hours: 3 per week  Campus: KG
Credit points: 12

► JSB413 Colloquium

To engender support for on-going projects and to enlist the co-operation and/or collaboration of peers and superiors it is necessary for researchers to be able to make effective oral and multi-media presentations about their work. Students embarking upon an honours year of specialised research require support, a collegial atmosphere for their work, regular contact with peers and supervisors, and the opportunity to discuss their research, construct its parameters and to acquire skills of critique and analysis. This unit will offer honours students the opportunity to acquire these skills in a supportive and collegial atmosphere.

Courses: JS40
Contact hours: 3 per fortnight  Campus: KG
Credit points: 12

► JSB414-1 Thesis 1

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 2, 3 and 4 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. Together with the unit, Literature Review, this unit prepares the preparation for the honours dissertation.

Incompatible with: JSN001  Contact hours: 3 per week  Campus: Ext
Credit points: 12  Semester: 1, 2

► JSB414-2 Thesis 2

A research thesis is the major component of the Honours course. It provides students with an opportunity to conceive, design and execute a major research project with specialist supervision. This unit in conjunction with thesis 2, 3 and 4 is a major part of the Honours program and begins the process of thesis conceptualisation and formulation. Together with the unit, Literature Review, this unit prepares the preparation for the honours dissertation.

Incompatible with: JSN001, LWN040  Contact hours: 3 per week  Campus: Ext
Credit points: 12  Semester: 1, 2

► JSB415 Advanced Research Management

Employment as a researcher in government departments and justice agencies and the successful undertaking of higher degree study requires an ability to independently design and execute complex research projects. The Honours year is often the first time that students have been required to research independently. An integral part of good research is the establishment of parameters within which their research should proceed. Knowledge of the literature in and around the chosen topic is vital to establishing the basis of a good research project. This unit will provide students with an opportunity to become thoroughly familiar with the bibliography of specialised literature relevant to their nominated field of research and to conduct a comprehensive research.

Courses: JS40
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► JSB591 Independent Study

In the course of their studies justice studies students may discover an area that is of particular interest to them, or which has specific relevance to their intended professional orientation. This unit gives students the opportunity to extend aspects of their coursework or professional interests in more depth as well as to continue the process of refining and developing research skills. Courses: JS31, LW42
Incompatible with: JSB312, JSB092
Campus: KG, Ext
Credit points: 12  Semester: 1, 2

► JSB932 Alternative Justice Processes

Conflict is inevitable in society. A major aim of any justice system must be to manage and resolve conflict through efficient, effective and equitable processes. This unit will equip students with the knowledge, understanding and skill needed to work effectively as a professional in the justice system. Students develop an understanding of concepts and skills necessary to engage with a number of models of conflict resolution from the formal adjudication of the legal system, to the less structured forum of mediation, to the process of negotiation. The unit also helps students to develop the professional and interpersonal skills necessary for them to manage conflict effectively in a variety of contexts relevant to the justice system.

Courses: JS31, LW42
Incompatible with: JSB032
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1

► JSB933 Crime Research Methods

It is essential that students undertaking research projects both professionally and academically, have a solid knowledge and understanding of research design and analysis. This subject builds upon research skills acquired in first and second year study and is thus intended to provide advanced knowledge and critical methodology for use in the fields of criminal justice, justice administration and criminology.

Courses: JS31, LW42
Incompatible with: JSB043
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1

► JSB934 Professional Placement

In order to operate effectively in the workplace students will need to be able to connect and apply the knowledge and theory they have gained from the other units in the course to the practice of the profession in which they gain employment.

Courses: JS31, LW42
Campus: KG, Ext
Credit points: 12  Semester: 1, 2

► JSB935 Contractual Justice

We are surrounded, in our day to day adult lives, with legally binding promises. These can range from relatively simple promises like purchasing a train ticket to far more complex million dollar deals. It is through the law of contract that we can understand these promises and the ways in which they become legally binding. It is important that legal and justice studies students understand the nature of contractual promises as they will be particularly involved with them in their working lives, and will need to be aware of what characterises contractual promises, how they are interpreted, how they affect us once validated, how they can be invalidated or discharged, and what sorts of remedies arise from them.
UNIT SYNOPSES

Courses: JS31, ED50, LW42
Incompatible with: JS0002, JSB086
Contact hours: 3 per week
Campus: Ext
Credit points: 12
Semester: 1
► JSB936 Compensation and Reparation
The appropriateness of compensation as a remedy is a very important topic and it is important that we understand the boundaries of compensation, as well as the reasons that we may have to pay compensation and the many types of conduct that provoke compensation claims. This unit provides the foundation for an understanding of this crucial area of law and legal obligations.

Courses: JS31, LW42, ED50
Incompatible with: JS0003, JSB087
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 2
► JSB937 Forensic Scientific Evidence
This unit is designed for students of science and law, who seek knowledge of uses of science in law. The unit emphasises the fundamental link between science, social justice and the legal system while outlining the various rules of evidence in Australian courts. Professionals involved in science, law enforcement and justice administration need a clear understanding of the fundamental rules and legal principles relating to the investigation of, and admissibility of evidence. The rationale is to provide knowledge that equips students to work in this area.

Courses: JS31, LW42, SC01
Incompatible with: JSB444
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 2
► JSN001 Theories of Justice
This unit is concerned with and/or clarifying the assumptions that underpin arguments about what is just or unjust within various spheres of contemporary Australian society. The unit provides a framework for evaluating the relative fitness of various theories of justice in terms of their theoretical implications and practical applications. The unit focuses on the interface between justice, postmodernism and the law.

Courses: JS51
Incompatible with: JSB411, LWN040
Campus: Ext
Credit points: 12
Semester: 1
► JSN006 Independent Study
This unit is designed to enable students to pursue particular aspects of their coursework or of professional interest in more depth. It is an opportunity for students to refine and develop research skills. Students are required to complete a piece of research under the guidance of an academic supervisor.

Courses: JS51
Campus: KG, Ext
Credit points: 12
Semester: 1
► JSN007 Independent Study
Independent Study offers students the opportunity to extend further aspects of their coursework or professional interest in more depth, as well as to continue the process of refining and developing research skills.

Courses: JS51
Campus: KG, Ext
Credit points: 12
Semesters: 1, 2
► JSN014 Law, Justice and New Genetic Technologies
Our ability to test, screen and manipulate the human genome is made possible by recent technological breakthroughs in science. The science of genetics is not new, but its public profile has never been higher. Current initiatives in genetic knowledge have been described as an international voyage of scientific discovery. The legal community faces a perpetual challenge in keeping apace of the revolution in genetics. This unit looks at some legal implications of this revolution and charts the major responses of our legal system to modern genetics and biotechnology.

Courses: JS51
Incompatible with: JSB933 or equivalent
Campus: KG, Ext
Credit points: 12
Semester: 1
► JSN016 Intelligence, Justice and Accountability
The unit focuses on intelligence and security activities relative to the rights of individuals, their ‘need to know’ and their ‘right to know’. It examines relationships and responsibilities of intelligence and security professionals and organisations in Australian society; specifically: the nature, roles of intelligence, counterintelligence and security; laws and other instruments that protect individuals and their activities against unlawful intelligence and security actions and operations; human rights issues and perspectives of public, and private morality; the media’s right to disclose intelligence and security matters.

Courses: JS51
Campus: Ext
Credit points: 12
Semester: 1
► JSN017 Intelligence and Decision Making
Intelligence professionals offer support to government, the private sector and the community, where they offer an advantage through the provision of accurate and timely advice. Intelligence is, however, largely wasted if it is not communicated effectively to the appropriate decision maker. This unit is concerned with the delivery of intelligence to decision makers. It recognises the need for intelligence managers to be attuned to the context and environment in which they are operating. The unit examines client needs against proven principles. It acknowledges the importance of focusing reporting and examines the specific needs of client groups. Finally, it looks at the processes to develop appropriate intelligence products.

Courses: JS51
Campus: Ext
Credit points: 12
Semester: 2
► JSN018 Advanced Crime Research Methods
It is essential that students undertaking research projects have a comprehensive knowledge and understanding of research design and analysis. This subject is intended to extend students’ understanding of the research process fundamental to effective criminal justice research with a particular focus on the structure and organisation of theses. Emphasis will be placed upon the whole research process, through an understanding of the logic of social science research design and methodology. This unit offers students a comprehensive account of the variety of research design models, data collection techniques and data analysis strategies. It will extend students understanding of both quantitative and qualitative research.

Courses: JS51
Incompatible with: JSB933 or equivalent
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1
► JSN019 Contemporary Issues in Sentencing Law
Sentencing law has become a specialised area of research and practice over the past two decades in the United Kingdom and the United States, and increasingly so in Australia. In practice, this is particularly so for baristers and specialist criminal law practitio-
ners. Increasingly, law schools have under-
graduate and/or graduate units in this area. Almost all Australian jurisdictions have now introduced specialised sentencing legisla-
tion, introducing discrete principles and thereby ensuring that a separate discipline area of sentencing law has emerged, complete with its own discourse. It is therefore appropriate that sentencing law should feature as a postgraduate unit in its own right.

Courses: JS51, LW51
Campus: GP
Credit points: 12
Semester: 1
► JSN023 Justice, Law and Democracy
In this unit, students explore analyses of the major issues of social philosophy including justifications of liberty, harm to others, private property rights, distributive justice, environmental harms, help to others and criminal and offensive behaviour. Students also discuss links between law, justice and social institutions and how we might adjudicate between competing interests in society. Lawyers and other justice professionals, public administrators, and para-professionals working in the fields of law, justice or politics will find this unit useful in developing a theoreti-
cal foundation for understanding social institutions and how they interact with law and morality. Students develop critical research and writing skills.

Courses: JS51
Incompatible with: JSN005, LWN042
Campus: KG, Ext
Credit points: 12
Semester: 2
► JSN131 Juvenile Justice
This unit critically examines the nature, extent and social construction of a ‘youth crime problem’ in western countries (especially Australia) and to establish how and why the youth justice system takes the governmental form it does. It is concerned with the way in which a ‘youth crime problem’ is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the ad-
iministration and management of youth justice through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdic-
tions.

Courses: JS51
Incompatible with: JSJP131, JSB232
Campus: KG, Ext
Credit points: 12
Semester: 1
► JSN132 Foundations in Crimi-
Criminological theories of crime and crime control are socially and historically dynamic and integral to legal and social policy. They are also central to the ways in which prisons, policing and crime prevention more generally is organised in society. This unit deals with formal criminological theories of crime and crime control. However, rather than simply outlining the major theoretical perspectives, this unit draws to the central concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to understanding the nature of crime and crime control. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime.

Courses: JS51
Incompatible with: JSP132, JSP231
Campus: KG, Ext
Credit points: 12

► JSN133 Crime Prevention
This unit discusses in detail the complex relationship which exists between the crime problem, the creation of criminality and traditional responses to crime. Second, it discusses prevention strategies that are broader than the traditional criminal justice response and explores the appropriateness or otherwise of blanket responses to crime. Finally, the unit considers the issue of how the interests of victims of crime may be adequately addressed both within and outside the criminal justice system. Building on the theoretical knowledge gained in Foundations in Criminology and Crime Control and Governance, this unit critically discusses current directions in research on the 'crime problem'.

Courses: JS51
Incompatible with: JSP133, JSP33
Campus: KG, Ext
Credit points: 12

► JSN141 Organised Crime and Corruption
Organised crime activities have burgeoned exponentially throughout the world in the last ten to twenty years. Drug importation and trafficking, fraud (including fraud against the revenue, identity fraud, credit card fraud and maritime fraud), money laundering and people smuggling are all examples of criminal activities that are diverting billions of dollars from legitimate businesses and into the hands of criminal syndicates. The aim of this unit is to provide students with knowledge and understanding of organised crime activities. Students gain an understanding of the theoretical nature of organised crime and its functional structure and operations and be able to critically analyse the nature and impact of organised crime on society.

Courses: JS51
Incompatible with: JSP141, JSP053, JSP342
Campus: KG, Ext
Credit points: 12
Semester: 1

► JSN142 Forensic Investigation Methods and Strategies
Organised crime and corruption are not new phenomena but their magnitude and sophistication have increased dramatically in the last decade. The aspects of these activities which distinguish them from more traditional crimes mean that reliance on traditional law enforcement techniques and powers will usually be an inadequate response. Lawyers, investigators and intelligence and financial analysts wishing to work in this expanding field need an understanding of these new powers and an appreciation of the different strategies and conceptualisations needed to combat organized crime and corruption. This unit develops such an understanding by analysing the statutory powers and examining creative and innovative strategic methods of applying these tools.

Courses: JS51
Credit points: 12
Semester: 1

► JSN143 Proceeds of Crime and Money Laundering
Unlike some other crimes, the primary motive for organised crime and official corruption is profit. Criminal syndicates generate huge profits that they launder through various means and re-invest in further crime and/or legitimate businesses. By taking away the proceeds of crime both the motivation and the means to commit further crime may be decreased. The aim of this unit is to provide students with an understanding and critical appreciation of the policy and legislation, both internationally and in Australia, that regulates the confiscation of the proceeds of crime, the prosecution of money laundering offences, and the reporting of suspect and significant financial transactions and international funds transaction reports.

Courses: JS51
Credit points: 12
Semester: 2

► JSN144 Evidence in Organised Crime Investigations
In recognition of the limitations of traditional law enforcement methods in dealing with organised crime and corruption, the Commonwealth and some State governments have granted more extensive powers to their police services and created inquisitorial commissions equipped with special coercive powers. The aim of this unit is firstly, to assist investigators and other professionals to appreciate the impact of rules of evidence in this specific context. The aim of this unit is also to understand how these new powers can be more effectively exercised, and thirdly, to inform those representing persons who are the subject of such exercise on how best they can protect the rights of their clients.

Courses: JS51, LW60, LW51
Credit points: 12
Semester: 2

► JSN151 Policy, Governance and Justice
This unit enables students to become familiar with policy-making practices and wider issues of governance. The unit aims to introduce the theory and practice of public policy with an emphasis on policy issues relevant to criminal and social justice. It analyses processes in policy development such as policy formation, writing, implementation and evaluation. Students gain tools for participating in policy development processes in both the public and community sectors.

Courses: JS51
Incompatible with: JSP251, JSP252
Credit points: 12

► JSN152 Administrative Justice
It is essential that justice professionals know and understand the rules of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. The unit is organised around theoretical perspectives of democracy, specifically participation and accountability, and examines mechanisms of State accountability, its philosophy and practice so as to provide a strong working knowledge of the administrative justice system and its legal, social and political environment.

Courses: JS51
Incompatible with: JSP351, JSP152
Credit points: 12

► JSN153 Watchdogs: Warriors, Wimps and Witch-hunts
Recent growth of government activity and regulation means that strong powers have been granted to non-elected officials and the agencies they are employed by, often to perform an oversight role on public administration. The aim of this unit is to provide students with a critical, analytical and practical understanding of the range and role of watchdog agencies, and their protective and investigative powers and responsibilities.

Courses: JS51
Incompatible with: JSP253, JSP153
Credit points: 12

► JSN154 Human Rights and Global Justice
The aim of this unit is to provide students with the necessary theoretical and practical knowledge and understanding of human rights standards and their impact on the Australian social, legal, justice and political landscape so as to enable students to enhance their contribution as a justice professional. Students gain a critical perspective on these matters that will allow them to understand and apply the constraints and guidance provided by international human rights norms.

Courses: JS51
Incompatible with: JSP084, JSP084, JSP154, JSP353
Credit points: 12
Semester: 2

► JSN161 Fundamentals of Intelligence
Intelligence analysts are increasingly taking a leading role in investigations with analysts setting the direction for criminal investigation teams. Intelligence professionals also offer support to government, the private sector and the community where they offer an advantage through the provision of accurate and timely advice.

Courses: JS51
Incompatible with: JSP161, JSP061
Credit points: 12
Semester: 1

► JSN161 Fundamentals of Intelligence
Intelligence analysts are increasingly taking a leading role in investigations with analysts setting the direction for criminal investigation teams. Intelligence professionals also offer support to government, the private sector and the community where they offer an advantage through the provision of accurate and timely advice. Intelligence requires proficiency in thinking strategies and skills, effective interpersonal skills, teamwork and application of intelligence process methodologies.
in a variety of contexts. This unit examines the essentials of the intelligence system, the intelligence process and creative problem solving skills in an intelligence environment.

Courses: JS51
Credit points: 12
Semester: 1

► JSN162 Managing Intelligence
The unit is concerned with the management of intelligence organisations, personnel and operations. It recognises the need for managers to be attuned to the context and environment in which they are operating. The unit examines organisational structures against proven principles. It acknowledges the importance of people, and examines the specific needs of personnel systems in an intelligence environment. Finally, it looks at the processes to plan and conduct efficient operations. The subject concentrates on applying established principles and procedures to the unique needs of intelligence organisations.

Courses: JS51
Incompatible with: JSP162 JSP067
Credit points: 12
Semester: 1

► JSN163 Intelligence Research Issues & Methodology
At the core of the function of intelligence to government and organisation decision making continues to grow, the management of knowledge increasingly becomes the key factor in deciding who wins and who loses in international relations, business and war. This unit has three aims: first, to develop a higher level understanding of the theoretical basis of intelligence research; second, to assist students to develop an understanding of the role of research in intelligence in government and organisation decision making; and third, to develop a practical knowledge of the application of research methodologies.

Courses: JS51
Incompatible with: JSP163
Credit points: 12
Semester: 2

► JSN164 Intelligence and National Security
This unit critically examines the notions and concepts of national security. It explores functions, roles and responsibilities for national security in the Australian context. The basic tenet informing teaching in the unit is that the first line of defence is a support function that ensures the safety, security and quality of life within a nation. The concepts of national security and intelligence, the essentials of an intelligence system, and multidisciplinary factors are applied to issues related to environment, economy and society. The principal focus is on issues that constitute actual and potential threats to national security in Australia in this century. The unit also focuses on the examination of the means available and obstacles to support threat management.

Courses: JS51
Incompatible with: JSP164
Credit points: 12
Semester: 2

► JSP131 Juvenile Justice
This unit critically examines the nature, extent and social construction of a ‘youth crime problem’ in western countries (especially Australia) and to establish how and why the youth justice system takes the governmental form it does. It is concerned with the way in which a ‘youth crime problem’ is constructed and the implications of this for particular cohorts of young people in contemporary Australia. It is also concerned with the administration and management of youth crime through formal systems designed to prevent and reduce unlawful acts. Particular attention is drawn to the historical development of youth justice in Australia and to the changing nature of youth crime control across jurisdictions.

Courses: JSP25, JS26
Incompatible with: JSN131, JSP041, JSPB041, JSPB032
Credit points: 12
Semester: 1

► JSP132 Foundations in Criminology
Criminological theories of crime and crime control are socially and historically dynamic and integral to legal and social policy. They are also central to the ways in which prisons, policing and crime prevention are generally organised in society. This unit deals with formal criminological theories of crime and crime control. However, rather than simply outlining the theories, particular attention is drawn to the central concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime.

Courses: JSP25, JS26
Incompatible with: JSN132, JSPB331
Credit points: 12
Semester: 1

► JSP141 Organised Crime and Corruption
Organised crime activities have burgeoned globally throughout the world in the last ten to twenty years. Drug importation and trafficking, fraud (including fraud against the revenue, identity fraud, credit card fraud and maritime fraud), money laundering and people smuggling are all examples of criminal activities that are diverting billions of dollars from legitimate businesses and into the hands of criminal syndicates. The aim of this unit is to provide students with knowledge and understanding of organised crime activities that are broader than the traditional criminal justice system. This unit critically examines the notions and propositions contained in criminological theories of crime and crime control. However, rather than simply outlining the theories, particular attention is drawn to the central concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime.

Incompatible with: JSN141, JSP053, JSPB03, JSPB041
Credit points: 12
Semester: 1

► JSP142 Forensic Investigation Methods and Strategies
Organised crime and corruption are not new phenomena but their magnitude and sophistication have increased dramatically in the last decade. The aspects of these activities which distinguish them from more traditional crimes mean that reliance on traditional law enforcement techniques and powers will usually be an inadequate response. Lawyers, investigators and intelligence and financial analysts wishing to work in this expanding field need an understanding of these new powers and an appreciation of the different strategies and conceptualisations needed to combat organised crime and corruption. This unit develops such an understanding by examining the statutory powers and examining creative and innovative strategies in the application of these tools.

Courses: JSP25, JS27
Incompatible with: JSN142
Credit points: 12
Semester: 1

► JSP143 Proceeds of Crime and Money Laundering
This unit deals with the way in which crime control is being administered in late modernity with specific reference to Australia. Attention is drawn to the changing roles played by various state sponsored agencies and organisations in the management, prevention and reduction of crime, as well as the various governmental rationalities that underpin the workings of the criminal justice system. Building on Foundations in Criminology, this unit has a contemporary focus. Students gain an understanding of the theoretical nature of organised crime and its functional structure and operations and be able to critically analyse the nature and impact of organised crime on society.

Courses: JSP25, JS27
Incompatible with: JSN143, JSPB332
Credit points: 12
Semester: 1

► JSP144 Organised Crime and Corruption
Organised crime is a support function that is integral to legal and social policy. They are also central to the ways in which prisons, policing and crime prevention more generally are organised in society. This unit deals with formal criminological theories of crime and crime control. However, rather than simply outlining the theories, particular attention is drawn to the central concepts, assumptions and propositions contained in criminological theories and the contribution which criminological knowledge has made to advancing our understanding of crime and crime control. Knowledge derived from this unit is applicable to a critical understanding of all professional and popular theories of crime.
Unlike some other crimes, the primary motive for organised crime and official corruption is profit. Organised crime syndicates generate huge profits that they launder through various means and re-invest in further crime and/or legitimate businesses. By taking away the proceeds of crime both the motivation and the means to commit further crime may be decreased. The prosecution of money laundering offences augments this crime prevention strategy.

Courses: JS25, JS27

Semester: 2
► JSP151 Policy, Governance and Justice
This unit will enable students to become familiar with policy-making practices and wider issues of governance. The unit aims to introduce the theory and practice of public policy with an emphasis on policy issues relevant to criminal and social justice. It analyses processes in policy development such as policy formation, writing, implementation and evaluation. Students gain an understanding of policy development processes in both the public and community sectors.

Courses: JS25, JS28
Incompatible with: JSN151, JSP081, JSP083, JSB351
Campus: KG, Ext
Credit points: 12
► JSP152 Administrative Justice
It is essential that justice professionals know and understand the rules of administrative law as well as the underlying philosophy of administrative justice so that those working in the public sector understand the rules that guide their decision making as well as the avenues of appeal from any decision they make. Those working in the community sector need to know how to question administrative decisions and actions and be able to challenge the power of government when it contravenes principles of administrative justice. This unit is organised around theoretical perspectives of democracy, specifically participation and accountability, and examines mechanisms of State accountability, their philosophy and practice.

Courses: JS25, JS29
Incompatible with: JSP083, JSB083, JSB351
Contact hours: 3
Campus: CA
Credit points: 12
► JSP153 Watchdogs: Warriors, Wimps and Witch-hunts
Recent growth of government activity and landscape means that strong powers have been granted to non-elected officials and the agencies they are employed by, often to perform an oversight role on public administration. Justice professionals need to know the range of roles they may take on with such watchdog roles, and their powers and responsibilities. A good understanding of the theoretical and political framework within which the investigative and other powers of oversight agencies are exercised and utilised is important for those who may carry out, evaluate or critique the powers of such watchdogs.

Courses: JS25, JS28
Incompatible with: JSN153, JSP253
Campus: KG, Ext
Credit points: 12
► JSP154 Human Rights and Global Justice
The aim of this unit is to provide students with the necessary theoretical and practical knowledge and understanding of human rights standards and their impact on the Australian social, legal, justice and political environment. The unit recognises the need for management of intelligence within such a context and that students have the ethical and practical responsibilities for their role as professionals.

► JSZ101 Global Crime Trends
Crime is influenced by a variety of social, cultural, political and economic determinants, including global modernisation. In order to counter the localised manifestations of crime, it is helpful to gain an appreciation of crime beyond local society. In this context an understanding of global crime trends is important. Therefore, this unit provides police officers with an understanding of global crime trends. As police officers are continu-
ally confronted with complex problems an enhanced knowledge of global crime trends will provide a sound basis to identify and understand crime. Specifically, comprehension of such crime trends will provide a basis to identify crime patterns and isolate ‘indicators’ to potential crime problems.

Courses: JS91 (Singapore Police Program Only)

Contact hours: Intensive Credit points: 12

► JSZ102 Offender Profiling

‘Offender Profiling’ is being increasingly recognised by Police Services around the world as a valuable addition in their arsenal of investigative processes in the detection and prosecution of criminal behaviour. This unit provides an understanding of criminal profiling for police officers. In particular, general duties police officers on the ‘street’ and in the ‘community’ as the ‘eyes’ and ‘ears’ of a Police Service. Hence, general duties police officers are strategically placed to pick up and pass on important and often critical information to specialists officers (detectives) and sections (task forces, etc.) that become involved in the ongoing investigation of serious and complex crimes.

Courses: JS91 (Singapore Police Program Only)

Contact hours: Intensive Credit points: 12

► JSZ203 Asian Economic Crime

Transnational organised corporate and white-collar crime activities have burgeoned exponentially throughout the world. International drug trafficking, counterfeiting goods, the new growth industry of credit card fraud and other crimes of migrants and the world are each year earning crime syndicates billions, and the list goes on. The aim of this unit is to provide knowledge and understanding for police officers about the exponential growth of economic crime within the Asia-Pacific region. By being aware of the economic nature of the structure and operations of transnational, organised, corporate and white-collar crime activities police officers will be better equipped to combat these types of criminal behaviours.

Courses: JS91 (Singapore Police Program Only)

Contact hours: Intensive Credit points: 12 Semester: 1

► JSZ204 Justice Research Methods

The aim of this unit is to provide knowledge and understanding for police officers about the different research methodologies available to them for getting the necessary information from and about their local community in order to be better informed about how best to carry out the mission of policing.

Courses: JS91 (Singapore Police Program Only)

Contact hours: Intensive Credit points: 12

► JSZ305 Investigative thinking

The aim of this unit is to provide knowledge and understanding for street police about the qualitatively different ‘investigative thinking styles’ (ITS) that detectives use when conducting ongoing investigations and how they might best use such learning to know what to be aware of when responding to incidents.

Courses: JS91 (Singapore Police Program Only)

Contact hours: Intensive Credit points: 12

► JSZ306 Police Research Project

The unit, Justice Research Methodologies, was designed to equip general duties police with the necessary knowledge base to research ‘local solutions for local conditions’ in combating crime. This unit further develops this theme of ‘local solutions for local conditions’ by providing police students with the opportunity to build on and practice their research skills by undertaking a time-limited and highly focused research project in a systematically structured manner.

Courses: JS91 (Singapore Police Program Only)

Contact hours: Intensive Credit points: 12 Semester: 1

► JSZ201 Transnational Organised Crime and Terrorism

Credit points: 12 Semester: 2

► JSZ202 Criminal and Terrorism Profiling

Credit points: 12 Semester: 2

► JSZ203 Investigative Thinking & Knowledge Management

Credit points: 12 Semester: 3

► JSZ204 Justice Research Methodologies

Credit points: 12 Semester: 3

► KCB101 Communication in the New Economy

This unit introduces the student to foundational ideas in the study of communication, drawing on examples of communication practice from contemporary society, and the historical development of both the media of mass communication and ways of theorising its development. The idea of the ‘new’ economy is the organising motif of the unit. The unit both introduces and problematises the discipline of communication as it confronts, engages and interpretes the new economy.

Courses: IF09, IF10, IF27, KK33

Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 1, 2

► KCB102 Media and Society: From Printing Press to Internet

Innovations in media and communication technologies have been deeply implicated in the evolution of human society from ancient times to the present. This unit explores the enabling capacities of media and communications, as well as other aspects of media power from a variety of perspectives, in the development of the modern nation state, consumer culture and the global information economy.

Courses: IF09, IF10, KK33

Incompatible with: KCB140

Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 1

► KCB103 Strategic Speech Communication

This unit is based in rhetorical and group communication theories, as a base for developing professionals who are articulate in rhetorical styles’ (ITS) that detectives use when conducting ongoing investigations and how they might best use such learning to know what to be aware of when responding to incidents. This unit engages and interpenetrates the new economy.

Courses: IF09, IF10, KC32, KK33

Incompatible with: KCB295

Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 2

► KCB201 Virtual Cultures

This unit provides both a critical and conceptual introduction to the issues arising from the emergence of online communications, or ‘virtual communities’, and a practical introduction to the skills and competencies required for the development and maintenance of successful virtual communities. It considers issues arising from the development of online communications from the perspectives of corporate cultures, public or civic action, and questions of community, identity and social inequality in Internet culture, conflict management, and ethical and privacy issues on the Web.

Courses: IF09, IF10, KC32, KK33

Incompatible with: KCB295

Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 1

► KCB202 New Media Technologies

This unit examines the relationship between new technologies and media production in their social and cultural context. It evaluates the impact of digitisation and convergence on work, leisure, film, TV, print media and other areas of cultural production, and considers the contribution of media theory to

Credit points: 12 Semester: 1

► KCB104 Media and Communications Industries

This unit provides an introduction to media and communications industries, with particular reference to the Australian media and communications industries and associated issues. The unit will examine aspects of broader communication problems and issues, popular music, film, the Internet and games industries, from social, industrial and cultural perspectives. You will be involved in discussion of current issues and media features.

Courses: IF09, IF10, KK33

Incompatible with: KCB150

Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 2

► KCB105 Media and Communication Research Methods

The research process (define problem, collect relevant information, analyse information, formulate conclusions/outcomes) underlies many decisions that confront media and communication professionals. This subject introduces foundational research skills and contextualises them with a number of media and communication problems. The unit involves qualitative and quantitative research methods including observation, focus groups, case studies, survey research and experiments studied in the context of media and communication problems and issues. Students carry out research using one of these methods, analyse the results and present their conclusions and recommendations.

Courses: IF09, IF10, KK33

Incompatible with: KCB334

Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 2

► KCB204 Media Management

This unit provides an introduction to media and communications industries, with particular reference to the Australian media and communications industries and associated issues. The unit will examine aspects of broader communication problems and issues, popular music, film, the Internet and games industries, from social, industrial and cultural perspectives. You will be involved in discussion of current issues and media features.

This unit examines the relationship between new technologies and media production in their social and cultural context. It evaluates the impact of digitisation and convergence on work, leisure, film, TV, print media and other areas of cultural production, and considers the contribution of media theory to

Credit points: 12 Semester: 1

► KCB206 New Media Technologies

This unit examines the relationship between new technologies and media production in their social and cultural context. It evaluates the impact of digitisation and convergence on work, leisure, film, TV, print media and other areas of cultural production, and considers the contribution of media theory to
insights about the social, cultural, economic and political impacts of new media technolo-
gies.

Courses: IF07, IF09, IF10, IF27, KC32, KK33
Credit points: 12
Semester: 2
KCB203 Consumer Cultures

A knowledge of and ability to research consumer cultures is essential to those working in the Creative Industries; it is crucial to un-
derstand the ways in which consumption actively shapes not only media and produc-
tion industries, but also the value and mean-
ings of products themselves. This unit builds on your first-year experiences of concepts and methods of media studies and introduces you to the analysis of the role of consumer culture. The knowledge that you will gain in this unit will inform your professional, academic, and creative prac-
tices in your final year.

Courses: IF09, IF10, KC32, KP25, KK33, KK34
Credit points: 12
Semester: 2
KCB301 Media Audiences

A knowledge of and ability to research audi-
ences is essential to a detailed and compre-
hen sive understanding of the media. The ability to undertake quantitative and qualita-
tive research into various audience group-
ings, the use of associated analytical tools and the ability to critically analyse academic and industry based audience research are important skills for students undertaking research in Media Communication and those seeking employment in media industries.

Courses: IF09, IF10, IF27, KC32, KK33, KK34
Credit points: 12
Semester: 1
KCB302 Political Communication

This unit provides an overview of the theory and practice of political communication and the role of discursive strategies in the social construction of meaning, with particular refer-
cence to media and communications indus-
tries. The unit will examine political cam-
paigns in Australia and internationally as students will critically examine theories in media and political science, as well as notions of crisis management, rhetorical models, persuasion theory and the use of images as a power resource to succeed in a political campaign.

The unit will also look at how survey re-
search helps the planning and development of political campaigns, and students will be involved in developing a political campaign strategy.

Courses: IF09, IF10, IF27, KC32, KK33
Credit points: 12
Semester: 1
KCB303 Applied Media Communication

In this unit, students explore ways in which their knowledge of media industries, audi-
ences and texts finds application in employ-
ment contexts. Students also develop and consolidate an applied understanding of databases in the process of maintaining and developing an online directory of media and related organisations serving the greater Brisbane area. Questions of professional practice in online and workplace environ-
ments are also discussed, with particular reference to matters of freedom of expres-
sion, accuracy and fairness, access and equi-
dity, cultural difference, privacy, security and intellectual property.

Courses: KC32, KK33
Credit points: 12
Semester: 2
KCB304 Managing Communication Resources

An understanding of controlled media (ie media in which the communicator, rather than a gatekeeper, controls the final con-
tent), in both print and electronic forms, is critical for professional communicators. Con-
trolled media resources remain the most common tools developed during communica-
tion campaigns. This unit develops students’ ability to devise effective resources for cli-
ents. Students develop and apply their critical knowl-
edge of media and communication to the task of deepening their understanding of these networks. Through updating and de-
veloping the Brisbane Media Map an online resource that profiles media and communi-
cation industries in Brisbane students also refine project planning and management skills, information analysis and design skills, website promotion, database management, and team leadership skills.

Courses: IF03, IF04
Credit points: 3 per week
Semester: 2
KCP018 Creative Industries

The development of the creative industries has been identified as a central element of the contemporary knowledge-based econ-
omy, that is, informational, global and net-
worked. In this unit, students undertake an overview of the creative industries as a ma-
jor element of the global knowledge econ-
omy. Students critically analyse issues such as the rise of a knowledge-based economy, technological convergence, networks and clusters, services industries, creative cities, globalisation, creativity and consumption, intellectual property issues, social entrepre-
neurship and social capital. Such issues are central to those involved in the creative indus-
tries as professional practitioners.

Courses: IF01, IF02, IF03, IF04
Contact hours: 3 per week
Semester: 2
KCP295 Virtual Cultures

New media communications technologies such as the Internet have opened opportuni-
ties for extended participation and develop-
ment of cultural expressions through new forms of interaction and collaboration, community-building and the development of shared interests at a global scale being made possi-
ble. This unit affords students an opportunity to critically appraise arguments for and against the rise of virtual communities, in the context of this unit’s practical tutorials, lecture/discussions, stu-
ents’ participation and online communica-
tion.

Courses: KI36, KI36, KI43
Contact hours: 3 per week
Semester: 2
KCP336 New Media Technologies

This unit considers the social, cultural, eco-
nomic and political implications of develop-
ment of new media technologies, such as the Internet and World Wide Web, broad-
band cable and satellite technologies. This unit considers the following: the historical development of technologies; different un-
derstandings of digital culture; the impact of new media forms upon cultural practices and modes of social interaction; the impact of new media in traditional media industries (print, broadcast) and areas such as enter-
tainment and education; legal, regulatory and policy issues arising from the develop-
ment of new media technologies.

Courses: IF01, IF02, IF03, IF04, KI35, KI36, KI43
Contact hours: 3 per week
Semester: 2
KCP348 Applied Media Communication

Networks of industry and professional assoc-
ation are extremely important in media and communication industries. In this unit, stu-
dents will learn about the key characteristics of these networks. Through updating and de-
veloping the Brisbane Media Map an online resource that profiles media and communi-
cation industries in Brisbane students also refine project planning and management skills, information analysis and design skills, website promotion, database management, and team leadership skills.

Courses: IF03, IF04
Credit points: 3 per week
Semester: 2
KCP353 Creative Industries Research Seminar

This unit provides practical and theoretical research skills for professional practice in the creative industries. It combines an overview of research methodologies and traditions relevant to the creative industries with the development of generic skills in research strategies, use of information technology for research, skills in data collection and analy-
sis, and application of research outcomes in community, professional, industry and gov-
ernmental contexts. It enhances the de-
velopment of graduates with strong vocational and research skills in their chosen areas of professional practice.

Courses: IF04
Contact hours: 3 per week
Semester: 2
KCP354 Creative Industries in Asia

The Asian region has been one of the most dynamic regions in the world over the last three decades. Economic growth and indus-
trialisation, greater openness to the global economy, and the rise of mass media and consumer society, have led to dramatic changes in the media and cultural industries throughout the region. Forces associated with the rise of creative industries, such as globalisation, the knowledge-based econ-
omy, and media and communications net-
works are significantly shifting public policy, and raising new challenges, tensions and contradictions in politics, economics and culture.

Courses: IF04
Contact hours: 3 per week
Semester: 2
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
►  KCP355 Creative Industries  
Project  
The development of the creative industries has been identified as a central element of the contemporary creative economy that is informational, global and networked. This unit provides an opportunity for students to extend their analysis and reflection upon the development of creative industries, in the form of a scholarly and well-researched essay. Sustained reflection upon creative industries development is central to those involved in the creative industries as professional practitioners, as well as those considering Doctoral study in the creative industries area.  
Courses: IF04  
Contact hours: 3 per week  
Campus: KG  
Credit points: 24  
►  KCP360 Advertising Creative:  
Introduction  
This unit provides an introduction to the creative side of advertising, involving the development of creative strategies, creative concepts, and the crafting of persuasive ideas. The unit is the foundation for further work in creative advertising, and provides students with a thorough grounding in creative advertising history, industry practices, strategies and concept development.  
Courses: IF94, IF95, IF96, IX95, IX96  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
►  KCP361 Advertising Creative:  
Electronic and Print Media  
This unit develops core skills in the creative production of advertising for key electronic and print media: TV, radio, cinema, interactive, paper, print, magazine, and outdoors. It examines the following: how creative advertisers use these media principles for creating effective advertisements; the media influence in the creative process; how to present concepts for each medium; the roles, steps and components of creative advertising production. Through this process, students expand their understanding of and skills in developing advertisements for the key electronic and print media.  
Courses: IX95, IX96  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
►  KCP400 Media and Communication in Public Life  
This unit examines the role of intellectuals in public debates about media and communication issues. Students are introduced to the concept and role of the public intellectual and through a series of case studies, examine their impact on contemporary media and communication debates. Theory and practice is integrated in the unit through assessment which allows students to present their work to both scholarly and general audiences.  
Courses: KK51, KK52, KK53  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
►  KCP401 Creative Industries:  
Theory and Policy  
In this unit, you will undertake an overview of the creative industries as a major element of the global knowledge economy. You will critically analyse key creative industries concepts such as: the knowledge-based economy; networks and clusters; economic aspects of culture and creativity; creative cities; organisation of creative work; creativity and management; social entrepreneurship.  
Courses: IF01, IF04  
Incompatible with: KCP018  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 1, 2  
►  KCP402 New Media Technologies  
This unit considers the social, cultural, economic and political implications of development of new media technologies, such as the Internet and World Wide Web, broadband cable and satellite technologies. This unit considers the following: the historical development of technologies; different understandings of digital culture; the impact of new media forms upon cultural practices and modes of social interaction; the impact of new media in traditional media industries (print, broadcast) and areas such as entertainment and education; the legal, regulatory and policy issues arising from the development of new media technologies.  
Courses: IF04  
Incompatible with: KCP336  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 2  
►  KCP403 Creative Industries:  
Applied Research  
This unit provides analytical and practical research skills for professional practice in the creative industries. It combines an overview of research methodologies and traditions relevant to the creative industries with the development of generic skills in research strategies, use of information technology for research, skills in data collection and analysis, and application of research outcomes in community, professional, industry and governmental contexts. It enhances the development of graduates with strong vocational and research skills in their chosen areas of professional practice.  
Courses: IF04  
Incompatible with: KCP353  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
►  KCP404 Advertising Creative:  
Introduction  
This unit provides an introduction to the creative side of advertising, involving the development of creative strategies, creative concepts, and the crafting of persuasive ideas. The unit is the foundation for further work in creative advertising, and provides students with a thorough grounding in creative advertising history, industry practices, strategies and concept development.  
Courses: IF94, IF95, IF96, IX95, IX96  
Incompatible with: KCP360  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 1, 2  
►  KCP405 Advertising Creative:  
Electronic and Print Media  
This unit develops core skills in the creative production of advertising for key electronic and print media: TV, radio, cinema, interactive, paper, print, magazine, and outdoors. It examines the following: how creative advertisers use these media principles for creating effective advertisements; the media influence in the creative process; how to present concepts for each medium; the roles, steps and components of creative advertising production. Through this process, students expand their understanding of and skills in developing advertisements for the key electronic and print media.  
Courses: IF94, IF95, IX95, IX96  
Incompatible with: KCP361  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 2  
►  KCP406 Advertising Creative:  
Copywriting and Art Direction  
Copywriting and art direction are fundamental to creative advertising practice. Both tasks exist at the front end of advertising: copywriters and art directors help to bring advertising campaigns to life through creative concept development, writing, and liaising with both clients and artists. This unit builds on the introductory creative advertising units. It examines contemporary advertising theory and practice and develops practical skills in writing and art directing. Case studies examine a wide range of advertising campaigns, including campaigns to sell products, corporate reputations, and not-for-profit organisations.  
Courses: IF94, IF95, IF96, IX95, IX96  
Incompatible with: KCP353, KCP360  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
►  KCP410 Major Project in Arts and Creative Industries Management  
The development of the arts and creative industries has been identified as a central element of the contemporary creative economy, which is informational, global and networked. This unit provides an opportunity for you to extend your analysis and reflection upon the development of creative industries, in the form of an academic essay or an industry report.  
Courses: IF04  
Incompatible with: KCP355  
Contact hours: 3 per week  
Campus: KG  
Credit points: 24  
Semester: 1, 2  
►  KKN600  
KCP411 Advertising Creative:  
Major Project  
This unit gives students the opportunity to take a creative director role in the production of a pitch for a transnational brand. The major project includes the development of three fundamental outcomes: a creative strategy for a major advertising campaign, an advertising campaign, and a rationale. Students are required to publish, exhibit or perform a formal presentation to relevant industry parties.  
Courses: IX96  
Prerequisites:  
KCP404/KCP360, KCP405/KCP361, KCP406/KCP362  
Incompatible with: KKN600  
Contact hours: 3 per week  
Campus: KG  
Credit points: 24  
Semester: 1, 2  
►  KDB101 Performance 1  
This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.  
Courses: KK34  
Incompatible with: KDX111  
Contact hours: 8 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
►  KDB102 Performance 2
This studio-based unit consists of a creative process through rehearsal directors and teaching staff leading to a studio and public performance.

Courses: KK34
Prerequisites: KDB101/KDX111
Incompatible with: KDX112
Contact hours: 8 per week Campus: KG Credit points: 12 Semester: 2
► KDB103 Dance Technique Studies 1
This unit involves practical dance classes as on-going action research.
Courses: IX06, IX16, KK33, KK34
Incompatible with: KDB180
Contact hours: IX05/IX16 9 per week; KD32/KK33 12 per week; KD25, KK34 13.5 per week Campus: KG Credit points: 12 Semester: 1
► KDB104 Dance Technique Studies 2
This unit involves practical dance classes as on-going action research.
Courses: IX16, KK33, KK34
Prerequisites: KDB103/KDB180; Students undertaking a Second Teaching Area in Dance have no prerequisite
Incompatible with: KDB181
Contact hours: IX05, IX16, KD32, KK33: 9 per week; KD25, KK34: 13.5 per week Campus: KG Credit points: 12 Semester: 2
► KDB105 Architecture of the Body
This unit focuses on experiential awareness of the body, including an introduction to a working knowledge of anatomy, kinesiology and the movement potential of the body, both in theory and practice. For students in K125 and KF25, a component of the course explores the creative potential of movement through compositional tasks.
Courses: IX07, IX16, KK33, KK34
Incompatible with: KDX104
Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 1
► KDB106 Dance Analysis
This unit includes a study of the analysis of dance through a concentration on the dance as text and a study of various international historical contemporary works.
Courses: IX06, IX07, IX08, IX16, KK33, KK34
Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 2
► KDB107 Choreographic Studies 1
This unit introduces crafting skills and choreographic devices used in process of making dance work. It includes the presentation of short solo or group work.
Courses: IX06, IX08, IX16, KK33, KK34
Incompatible with: KDX143
Contact hours: IX05/X16, KD32/KK33: 4; KD25/KK34: 2 Campus: KG Credit points: 12 Semester: 2
► KDB108 World Dance
This unit includes exposure to a range of culturally specific dance styles through practical workshops and a theory component providing contextual background to the styles taught.
Courses: IX05, IX16, KD25, KD32, KK33, KK34
Incompatible with: KDB172
Contact hours: 2.5 per week Campus: KG Credit points: 12 Semester: 1
► KDB109 Funk, Tap and all that Jazz
American and Western European popular and music theatre dances from the late 1900s to the present form the content base of this unit, drawing on three of the following styles: funk, tap, jazz and/or hip-hop. Dance technique and style pertinent to each dance form is taught in the practical classes, while in the theory component of the unit this content is interrogated through historical and cultural perspectives
Courses: IX05, IX16, KD25, KK34 Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 2
► KDB110 Deconstructing Dance in History
This unit includes a study of various international historical and contemporary contexts of dance as art. It focuses on romanticism, classicism, modernism and post-modernism.
Courses: IX16, KK33
Incompatible with: KDB125
Contact hours: 3 per week Campus: KG Credit points: 12 Semester: 1
► KDB119 Professional Practice and Business Administration for Dance Teachers
This unit considers the implications of Dance Industry Code of Ethics (1987) for teaching and learning in dance. This unit also includes practical and useful materials for the effective and efficient operations of a business in dance teaching by relating current small business management practices to the specific organisational needs and requirements for dance teaching businesses.
Courses: KD05, KD06, KD16, KD17 Campus: Ext Credit points: 12 Semester: 2
► KDB120 Dance Teaching Methodologies
This unit provides students with the opportunity to investigate and explore dance teaching issues relevant to their own teaching context. The unit material includes strategies and models for planning and implementing dance lessons and curriculum, catering for the diverse learning needs of students and managing the classroom as a complex social environment.
Courses: KD05, KD06, KD16, KD17 Campus: Ext Credit points: 12 Semester: 1, 2
► KDB121 Theatre Production and Stage Design
This unit provides students with the opportunity to investigate and explore dance teaching issues relevant to their own teaching context. The unit material includes strategies and models for planning and implementing dance lessons and curriculum, catering for the diverse learning needs of students and managing the classroom as a complex social environment.
Courses: KD05, KD06, KD16, KD17 Campus: Ext Credit points: 12 Semester: 1, 2
► KDB122 Stagecraft and Costume for Dance
This unit provides opportunities to investigate the principles of design as they relate to the visual environment of a dance performance / production. It considers principles and theoretical issues relevant to design for stage and video, stimulating and innovative examples of visual designs for dance performance and practical information for production planning and budgeting.
Courses: KD06, KD17 Campus: Ext Credit points: 12 Semester: 2
► KDB195 Dance Teaching Studies 1
This unit examines basic theoretical understandings and practical skills to support and enhance students' ability to plan for, manage and promote effective and safe learning in dance classes.
Courses: KD05, KD06, KD16, KD17 Prerequisites: KDB198 and KDB191 Contact hours: 1 week full time residency Campus: KG Credit points: 12 Semester: 3
► KDB196 Dance Teaching Studies 2
The theory of choreography and the basic skills of crafting choreography form the basis of study in this unit. This unit also provides students with the opportunity to investigate and utilise current research relating to teaching for performance. Issues such as psychology of performance and pacing of dance training are addressed.
Courses: KD06, KD17 Prerequisites: KDB198 and KDB191 Contact hours: 1 week full time residency Campus: KG Credit points: 12 Semester: 3
► KDB197 Dance Analysis and Dance Histories
This unit examines aesthetic theory and analysis models that assist students to respond to and reflect upon dance. Students apply this understanding to the research and analysis of dances in context.
Courses: KD05, KD06, KD16, KD17 Campus: Ext Credit points: 12 Semester: 1
► KDB198 Safe Dance Practice
This unit provides students with the knowledge and understanding of the information regarding safe dance practices. Practical activities focus on the implications of current research in safe dance practice to safe teaching and learning. The content of this unit reflects a holistic approach to training in dance by considering a diverse range of issues such as basic anatomy and physiology, the use of imagery in dance training, injury prevention and management strategies, nutrition and lifestyle management.
Courses: KD05, KD06, KD16, KD17 Campus: Ext Credit points: 12 Semester: 1, 2
► KDB201 Dance Curriculum Studies 1
This is the first of a series of three curriculum units, this unit provides introductory practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilise your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences.
Courses: IX05, IX06, IX07, IX08, IX16 Incompatible with: KDB421 Contact hours: 4 per week Campus: KG Credit points: 12 Semester: 1
UNIT SYNOPTES

KDB202 Dance Curriculum Studies 2
This is the second of a series of three curricular units, this unit builds on practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilise your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences with particular emphasis on Years 10-12.
Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KDB201
Incompatible with: KDB429
Contact hours: 4 per week
Campus: KG
Credit points: 12
Semester: 2
KDB203 Dance Curriculum Studies 3
Developing from the work undertaken in Dance Curriculum Studies 1 and 2, this unit provides you with the opportunity to continue investigating and exploring dance curriculum planning and work program design. This unit also relates current theoretical issues in assessment to the unique challenges that dance assessment provides. You will explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment at all levels.
Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KDB202 (Undergraduate students only)
Corequisites: KTB202 (Grad Dip Ed students only)
Contact hours: 4 per week
Campus: KG
Credit points: 12
Semester: 1, 2
KDB204 Australian Dance
This unit includes a study of the ritual, artistic and social functions of dance in contemporary Australian society.
Courses: IX05, IX07, IX16, KD25, KD32, KK33, KK34
Incompatible with: KDB114
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 2
KDB205 Dance in Education
This unit includes a practical introduction to philosophies and practices in dance education. The areas of choreography, performance and appreciation are explored as students develop basic teaching and reflective practice skills. This unit is appropriate for students planning to teach dance in the primary, secondary, community or studio context.
Courses: IX05, IX06, IX07, IX08, IX16, KK34
Prerequisites: ED91; KKB202
Incompatible with: KDB117
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1
KDB207-1 Choreographic Studies 2
This unit includes practice and performance of choreographic work employing choreographic skills in creation of movement material, form and style. Clarity of intention is major focus. This is a year long unit. Students must enrol in KDB207-2.
Courses: IX05, IX16, KD25, KD32, KK33, KK34
Prerequisites: KDB107/KDX143
Incompatible with: KDX144-1
Contact hours: 2 per week
Campus: KG
Credit points: 6
Semester: 1
KDB207-2 Choreographic Studies 2
This unit includes practice and performance of choreographic work employing choreographic skills in creation of movement material, form and style. Clarity of intention is major focus.
Courses: IX05, IX16, KD25, KD32, KK33, KK34
Prerequisites: KDB207-1/KDX144-1
Incompatible with: KDX144-2
Contact hours: 2 per week
Campus: KG
Credit points: 6
Semester: 2
KDB208 Integrated Professional Skills
This is an integrated program building specific practical and psychological skills and strategies for career development and enhancement.
Courses: IX05, IX16, KD25, KD32, KK33
Incompatible with: KDB221
Contact hours: 2.5 per week
Campus: KG
Credit points: 12
Semester: 2
KDB211 Performance 3
This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.
Courses: KD25, KK34
Prerequisites: KDB102/KDX112
Incompatible with: KDX141
Contact hours: 8 per week
Campus: KG
Credit points: 12
Semester: 1
KDB212 Performance 4
This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.
Courses: KD25, KK34
Prerequisites: KDB201/KDX141
Incompatible with: KDX142
Contact hours: 8 per week
Campus: KG
Credit points: 12
Semester: 2
KDB213 Dance Technique Studies 3
This unit involves practical dance classes as on-going action research.
Courses: IX05, IX07, IX08, IX16, KD25, KD32, KK33, KK34
Prerequisites: KDB104/KDB181
Incompatible with: KDB182
Contact hours: IX05/IX16, KD32/KK33: 7.5 per week; KD25/KK34: 13.5 per week
Campus: KG
Credit points: 12
Semester: 1
KDB214 Dance Technique Studies 4
This unit involves practical dance classes as on-going action research.
Courses: IX05, IX07, IX16, KD25, KD32, KK33, KK34
Prerequisites: KDB213/KDB182
Incompatible with: KDB183
Contact hours: IX05/IX16, KD32/KK33: 6 per week; KD25/KK34: 13.5 per week
Campus: KG
Credit points: 12
Semester: 2
KDB301 Dance Project 1A
This unit is designed for students to investigate their practice as a dance performer and/or creator via an interdisciplinary and collaborative project. The projects may be self-devised or alternatively students may contribute to other creative projects involving new work. In addition to the project proposals and their realisation, the unit comprises a reflective practice written assignment and the maintenance and development of technical dance skills.
Courses: KD25, KK34
Incompatible with: KDB193
Contact hours: 6 per week
Campus: KG
Credit points: 12
Semester: 1
KDB302 Dance Project 1B
This unit is designed for students to investigate their practice via a performative and creative project. Interdisciplinary and collaborative projects are encouraged. Projects may be self-devised or alternatively students may contribute to a creative/choreographic project involving new work. In addition to the project and its realisation, the unit comprises written reflective practice and the maintenance and development of technical dance skills.
Courses: KD25, KK34
Prerequisites: KDB301/KDB193 or KDB320
Incompatible with: KDB199
Contact hours: 5 per week
Campus: KG
Credit points: 12
Semester: 2
KDB303 Dance and Technology 1
This unit includes modes of choreographic communication: discussion of aesthetic questions that have emerged out of the last major choreographic movements and collaborative practices encouraged with specific focus on digital technologies.
Courses: KD25, KK33, KK34
Incompatible with: KDB158
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1
KDB304 Dance and Technology 2
This unit includes a major choreographic project for public performance. It explores aesthetic and artistic values in collaborative processes of making new work with technology.
Courses: KD25, KK33, KK34
Prerequisites: KDB303/KDB158
Incompatible with: KDB159
Contact hours: 1 per week
Campus: KG
Credit points: 12
Semester: 2
KDN002 Professional Practice Project
This unit aims to provide a context for students to apply and extend their developed teaching practices. As they devise, implement and evaluate a project relevant to their teaching context, students actively engage their skills and understandings as teacher artists. Students are also supported to enhance their skills as reflective practitioners as they critically analyse and evaluate their professional practice.
Courses: KD42
Campus: Ext
Credit points: 24
KDP104 Safe Dance Practice
This unit provides students with the knowledge and understanding of the information regarding safe dance practices. Practical activities focus on the implications of current research in safe dance practice to dance teaching and learning. The content of this unit reflects a holistic approach to training in dance by considering a diverse range of issues such as basic anatomy and physiology, the use of imagery in dance training.
injury prevention and management strategies, nutrition and lifestyle management.

**Courses:** KDP35, KDP36, KDP42

**Campus:** Ext  
**Credit points:** 12

► **KDP105 Dance Analysis and Dance Histories**

This unit examines aesthetic theory and analysis models that assist students to respond to and reflect upon dance. Students apply this understanding to the research and analysis of dance in context.

**Courses:** KDP35, KDP36, KDP42  
**Campus:** Ext  
**Credit points:** 12

► **KDP180 Dance Teaching Studies 1**

This unit examines theoretical understandings and practical skills to support and enhance students’ ability to plan for, manage and promote effective and safe learning in dance classes.

**Courses:** KDP35, KDP36, KDP42

**Contact hours:** 1-week full-time residency

**Campus:** KG  
**Credit points:** 12

► **KDP181 Dance Teaching Studies 2**

The theories of choreography and the skills of crafting choreography form the basis of study in this unit. This unit also provides students with the opportunity to investigate current research relating to the teaching for performance. Issues such as psychology of performance and pacing of dance training are addressed.

**Courses:** KDP35, KDP36, KDP42

**Contact hours:** 1-week full-time residency

**Campus:** KG  
**Credit points:** 12

► **KDP189 Dance Assessment and Reporting Procedures**

This unit relates current theoretical issues in assessment to the unique challenges of dance assessment. Students explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment.

**Courses:** KDP35, KDP36, KDP42

**Contact points:** 12

► **KDP401 Safe Dance Practice**

This unit provides students with the knowledge and understanding of the information regarding safe dance practices. Practical activities focus on the implications of current research in safe dance practice to dance teaching and learning. The content of this unit reflects a holistic approach to training in dance by considering a diverse range of issues such as basic anatomy and physiology, the use of imagery in dance training, injury prevention and management strategies, nutrition and lifestyle management.

**Courses:** KDP35, KDP36, KDP42

**Incompatible with:** KDP104

**Credit points:** 12  
**Semester:** 1, 2

► **KDP402 Professional Practice and Business Administration for Dance Teachers**

This unit considers the implications of Dance Industry Code of Ethics (1987) for teaching and learning in dance. This unit also includes practical and useful materials for the effective and efficient operations of a business in the dance teaching by relating current small business management practices to the specific organisational needs and requirements for dance teaching businesses.

**Courses:** KDP35, KDP36, KDP42

**Incompatible with:** KDP190

**Credit points:** 12  
**Semester:** 1, 2

► **KDP403 Dance Teaching Methodologies**

This unit provides students with the opportunity to investigate and explore dance teaching issues relevant to their own teaching context. The unit materials include strategies and models for planning and implementing dance lessons and curriculum, catering for the diverse learning needs of students and managing the classroom as a complex social environment.

**Courses:** KDP35, KDP36, KDP42

**Incompatible with:** KDP191

**Credit points:** 12  
**Semester:** 1, 2

► **KDP404 Dance Analysis and Dance Histories**

This unit examines aesthetic theory and analysis models that assist students to respond to and reflect upon dance. Students apply this understanding to the research and analysis of dance in context.

**Courses:** KDP35, KDP36, KDP42

**Incompatible with:** KDP105

**Credit points:** 12  
**Semester:** 1

► **KDP405 Dance Assessment and Reporting**

This unit relates current theoretical issues in dance assessment to the unique challenges of dance assessment. Students explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment.

**Courses:** KDP35, KDP36, KDP42

**Incompatible with:** KDP189

**Credit points:** 12  
**Semester:** 2

► **KDP406 Stagecraft and Costume for Dance**

This unit provides opportunities to investigate the principles of design as they relate to the visual environment of a dance performance. It considers principles and theoretical issues relevant to design for stage and video, stimulating and innovative examples of visual designs for dance performance and practical information for production/planning and budgeting.

**Courses:** KDP35, KDP42

**Incompatible with:** KDP192

**Credit points:** 12  
**Semester:** 2

► **KDP407 Dance Teaching Studies 1**

This unit examines theoretical understandings and practical skills to support and enhance students’ ability to plan for, manage and promote effective and safe learning in dance classes.

**Courses:** KDP35, KDP36, KDP42

**Incompatible with:** KDP180

**Credit points:** 12  
**Semester:** 3

► **KDP408 Dance Teaching Studies 2**

The theories of choreography and the skills of crafting choreography form the basis of study in this unit. This unit also provides students with the opportunity to investigate current research relating to the teaching for performance. Issues such as psychology of performance and pacing of dance training are addressed.

**Courses:** KDP35, KDP42

Prerequisites: KDP401 and KDP403

**Incompatible with:** KDP181

**Credit points:** 12  
**Semester:** 3

► **KDP410 Professional Practice Project**

This unit aims to provide a context for students to apply and extend their developed teaching practices. As they devise, implement and evaluate a project relevant to their teaching context, students actively engage their skills and understandings as teacher artists. Students are also supported to enhance their skills as reflective practitioners as they critically analyse and evaluate their professional practice.

**Courses:** KDP42

**Prerequisites:** KKP602/ KK6061

**Incompatible with:** KDN002  
**Campus:** KG  
**Credit points:** 24  
**Semester:** 1, 2

► **KFB101 Design Studio 1**

The sequence of six Design Studio units is fundamental to the course and focuses on the integration of design principles with the practical skills and understandings of pattern technology, garment design and construction. Alongside the acquisition of design skills, it is essential for successful fashion designers of the future to understand the context of their practice situated within a history and an industry that is international in scope.

**Courses:** KKD34

**Incompatible with:** KFB401

**Contact hours:** 12 per week

**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KFB102 Design Studio 2**

This unit aims to build on skills acquired in KFB101.

**Courses:** KKD34

**Incompatible with:** KFB401

**Credit points:** 12  
**Semester:** 2

► **KFB103 Introduction to Fashion Design**

This unit provides an introduction to some of the complexities of the fashion system and is intended to provide a base for students wishing to pursue the subject of fashion as a major, sub major or minor.

**Courses:** KKD34

**Contact hours:** 3 per week

**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KFB104-1 Textiles for Fashion**

Detailed knowledge of the materials, skills and processes available to the garment and textile industries is essential in the first year of study for the fashion designer. This is a year long unit. Students are to enrol in KFB104-2 in the second semester.

**Courses:** KKD34

**Incompatible with:** KFB407-1

**Contact hours:** 2 per week

**Campus:** KG  
**Credit points:** 6  
**Semester:** 1

► **KFB104-2 Textiles for Fashion**

This unit continues from KFB104-1. Detailed knowledge of the materials, skills and processes available to the garment and textile industries is essential in the first year of study for the fashion designer. This is a year long unit. Students must have completed KFB104-1.

**Courses:** KKD34

**Prerequisites:** KFB104-1/KFB407-1

**Incompatible with:** KFB407-2
UNIT SYNOPSIS

Prerequisites
analysis and business planning.
port and enhance creative practice through
knowledge, skills and attitudes that will sup-
in real work industry environments. This unit
by the acquisition of business and entrepre-
struction. These skills need to be scaffolded
by the acquisition of business and entrepre-
neural acumen if potential is to be realised
in real work industry environments. This unit
seeks to develop the theoretical and applied
knowledge, skills and attitudes that will sup-
port and enhance creative practice through
an introduction to market research, risk
alysis and business planning.

Courses: KFB201 Design Studio 3
Incompatible with: KFB408
Contact hours: 3 per week
Credit points: 12
Semester: 2
► KBFB0105 Fashion and Modernity
In this unit students will analyse fashion
trends and learn the influence of various
factors that affect changes in fashion, includ-
ing major designers.

Courses: KK34
Incompatible with: KFB408
Contact hours: 3 per week
Credit points: 12
Semester: 2
► KBFB201 Design Studio 3
The sequence of six design studio units is
fundamental to the course and focuses on
the integration of design principles with the
practical skills and understandings of pattern
engineering and garment design and con-
struction. These skills need to be scaffolded
the acquisition of business and entrepre-
neural acumen if potential is to be realised
in real work industry environments. This unit
seeks to develop the theoretical and applied
knowledge, skills and attitudes that will sup-
port and enhance creative practice through
an introduction to market research, risk
alysis and business planning.

Courses: KFB201
Incompatible with: KFB404
Contact hours: 12 per week
Credit points: 24
Semester: 1
► KBFB202 Design Studio 4
This unit aims to further develop a combina-
tion of initiative, creativity and self-reliance,
alongside the key skills of collaboration and
working in teams within the context of an
industry linked design project.

Courses: KFB25, KK34
Prerequisites: KFB102/KFB402
Incompatible with: KFB403, KFB200
Contact hours: 12 per week
Credit points: 12
Semester: 2
► KBFB203 Fashion, Art and the
Body
In this unit students expand their knowledge
and experience through exposure to the
work of specialists in the field while extend-
ng their knowledge of the national and inter-
national fashion world.

Courses: KFB25, KK34
Incompatible with: KFB410-1
Contact hours: 3 per week
Credit points: 12
Semester: 1
► KBFB204 Textile Design
This unit builds on the knowledge of the
materials and skills acquired in KFB104-1
and KFB104-2 and is planned for the design
student who wishes further studies in the
field of textile development and/or embel-
ilishment.

Courses: KFB25, KK34
Prerequisites: KFB104-1/KFB407-1,
KFB104-2/KFB407-2
Incompatible with: KFB411
Contact hours: 4 per week
Credit points: 12
Semester: 2
► KBFB205 Fashion and Style
Journalism
This unit aims to develop a critical under-
standing of fashion and style journalism in a
changing media environment, exploring both
historical and global trends. It also offers an
opportunity to produce and to critique appro-
priate editorial content. Where possible, the
unit involves contact with leading fashion
journalists and magazines such as Vogue
Australia. On completing the unit students
will know who does fashion journalism, what
it is, where to find it, why it takes the forms it
does, and how to do it.

Courses: KFB25, KK34
Incompatible with: KJB339
Contact hours: 3 per week
Credit points: 12
Semester: 2
► KBFB301 Design Studio 5
This sequence of six design studio units is
fundamental to the course and focuses on
the integration of design principles with the
practical skills and understandings of pattern
engineering and garment design and con-
struction. Design Studio in the final year
allows students the opportunity to further
immerse themselves in the development of
their own product or range. Design Studio 5
acts as a stage one of the final project and
forms the research and development phase of
the project. During this unit, students for-
mulate their final project for prototyping and
completion in Design Studio 6.

Courses: KFB25, KK34
Prerequisites: KBFB0105, KBFB040
Incompatible with: KBFB406
Contact hours: 20 per week
Credit points: 24
Semester: 2
► KBFB302 Design Studio 6
This unit is the capstone Design Studio unit
and aims to provide students with the oppor-
tunity to synthesise prior learning, within
university and the workplace, through the
production of a final year project. Within this
unit students develop confidence and the
ability to work with minimal supervision in
preparation for graduation.

Courses: KFB25, KK34
Prerequisites: KBFB0101/KFB405
Incompatible with: KBFB405
Contact hours: 20 per week
Credit points: 24
Semester: 2
► KBFB303 Applied Planning
This unit aims to provide students with an
opportunity to identify relevant issues relat-
ing to their planned career and to position
themselves effectively for entry to industry,
community-based projects or postgraduate
study.

Courses: KFB25, KK34
Prerequisites: KBFB020/KFB404
Corequisites: KBFB301
Incompatible with: KBFB412
Contact hours: 2 per week
Credit points: 12
Semester: 1
► KBFB304 Professional Studies
This unit prepares students for the transition
into the real world, by equipping them with
an understanding of law as a regulator of
business. In order to flourish as an entrepre-
neural creative practitioner, it is essential
that students understand the legal implica-
tions of their decisions and actions and those
of others with whom they work or trade. This
unit forms part of the final year of study so
that students can apply the knowledge ac-
quired within their workplace learning ex-
periences and incorporate the learning from
this unit into their planning and preparation
for graduation.

Courses: KFB25, KK34
Incompatible with: KBFB506
Contact hours: 4 per week over ten weeks
Credit points: 12
Semester: 2
► KBIB056 Professional Practice
This unit prepares the student for industry
via immersion within a project-based envi-
ronment and construction of a professional
graduate portfolio. This authentic learning is
supported by discussion of employment
opportunities within the communication de-
gineer, informed by industry profession-
als.

Courses: KI32, KI25, IF90
Prerequisites: KBIB005
Contact hours: 4 per week
Credit points: 12
Semester: 1
► KBIB101 Foundations of Com-
munication Design 1
Communication Design deals with the syn-
thesis of image and text in the creation and
presentation of meaning. This unit will intro-
duce students to the principles, conventions
and practices of visual communication.

Courses: IF90, KK33
Incompatible with: KKB007, KKB018, KIB001
Contact hours: 4 per week
Credit points: 12
Semester: 2
► KBIB102 Foundations of Com-
munication Design 2
This unit further develops interface design
skills for communications technologies in-
cluding design priorities, visual systems
and practices of visual communication.

Courses: IF90, KK33, KK34
Prerequisites: KIB101/KIB001
Incompatible with: KIB002
Contact hours: 3 per week
Credit points: 12
Semester: 2
► KBIB103 Media Technology 1
This unit provides an introduction to theories
and skills underpinning the application of
multimedia technology with the Creative
Industries, providing a foundation of concep-
tual and practical skills related to contempo-
rary modes of electronic hypermedia produc-
tion, communication and publishing.

Courses: IF90, KK33, KK34
Incompatible with: KKB007, KKB018, KIB001
Contact hours: 4 per week
Credit points: 12
Semester: 1
► KBIB104 Media Technology 2
This unit explores multimedia development
and design concepts and practices and in-
vestigates the user and user interaction prin-
ciples.

Courses: IF90, KK33, KK34
Prerequisites: KIB103/KIB007
Incompatible with: KIB008
Contact hours: 6 per week
Credit points: 12
Semester: 2
► KBIB105 Animation and Motion
Graphics
This unit addresses technical and theoretical
issues arising from the development of 3-D
animated characters. The unit introduces
students to the principles of character anima-
tion within virtual spaces, visual systems
such as character rigging, modelling, textur-
ing and lighting, cinematography, acting,
staging and performance.

Courses: KK34
Contact hours: 3 per week
Credit points: 12
Semester: 2
QUT HANDBOOK 2006  •  PAGE 693
UNIT SYNOPSISES

► KIB106 Character Development, Conceptual Design and Animation Layout
This is a unit which emphasizes production in the process of considering type and generic attributes within a technological context, you will be guided through the key concepts involved in the development of working drawings and final artworks.
Courses: KK34
Incompatible with: KIB307
Contact hours: 5 per week Campus: KG
Credit points: 12 Semester: 1
► KIB107 Introduction to Programming for 3D
This is a unit which focuses on production technique. It is based in animation production as a base for developing professionals who can program by creating new tools and processes for the 3D graphics environment.
Courses: KK34
Incompatible with: KIB301
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2
► KIB108 Animation Practices
The unit is an introductory examination of the development of animation. It addresses social, cultural, economic and technological themes that have shaped notable practitioners and established animation as a significant medium for the expression of popular culture, artistic experiment and philosophical, social and political comment.
Courses: KK34
Incompatible with: KIB825
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
► KIB210 Design Studio 1: Interaction Design
Design Studio 1: Interaction Design introduces you to the field of interaction design and the development of new, engaging systems of digital media.
Courses: IF90, KI12, KK33
Prerequisites: KIB102/KIB802 and KIB104/KIB808
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 1
► KIB211 Design Studio 2: Web Development
Design Studio 2: Web Development introduces you to the design of large and small scale interactive new media that rely on distributed systems such as the Internet.
Courses: IF90, KI12, KK33
Prerequisites: KIB210
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 2
► KIB212 Animation Studio 1: Preproduction
Animation Studio 1: Preproduction is a studio unit where student come to grips with the ‘basics’ of computer graphics production. The unit covers the basic elements of studio practices, networking, teamwork and collaboration as well as introducing character design, layout, conceptual development and the generation of ideas.
Courses: KIB212
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 1
► KIB213 Animation Studio 2: CG Toolkit
Animation Studio 2: CG Toolkit offers an in-depth look at the tools of animated production from within a studio setting. Continuing
from Animation Studio 1: Preproduction, this unit looks at the tools and the processes involved in creating high level successful 3D computer animations for game development, film or television production, web or emergent media.
Courses: KIB212
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 2
► KIB310 Design Studio 3: Virtual Environments
Design Studio 3: Virtual Environments introduces you to the design of virtual environments that can only be experienced through the existence of new media.
Courses: IF90, KI12, KI22, KK33
Prerequisites: KIB211
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 1
► KIB311 Design Studio 4: Tangible Media
Design Studio 4: Tangible Media explores the design of augmented devices: stand-alone devices whose function is enhanced or defined through the embedding of computational media within them.
Courses: IF90, KI12, KI22, KK34
Prerequisites: KIB310
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 2
► KIB312 Animation Studio 3: Advanced Concepts in Computer Animation
Animation Studio 3 consolidates your work in animated production, with particular emphasis on polished performances, communication through content and storytelling.
Courses: KI12, KI22, KK34
Prerequisites: KIB212 and KIB213
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 1
► KIB313 Animation Studio 4: Advanced Concepts in Computer Animation
Animation Studio 4 consolidates the work completed in the previous animation studios. Concentrating on output, portfolio preparation, post production and transitioning between university and industry, or into higher degrees, the studio offers the opportunity to produce and direct a final portfolio piece or to begin academic research in the field of computer animation.
Courses: KI12, KI22, KK34
Prerequisites: KIB312 or equivalent
Contact hours: 7 per week Campus: KG
Credit points: 24 Semester: 2
► KIN809 Interaction Design
This unit provides an introduction to the field of interaction design including human computer interface design concepts, and principles and methodologies involved in the design and development of interactive media.
Courses: KI36, KI43
Prerequisites: KIN818, KIN808
Contact hours: 3 per week Campus: KG
Credit points: 12
► KIN810 Information Architecture
This unit provides an introduction to Web application design and computer network communication. It emphasizes computer programming and object oriented analysis and design.
Courses: KI36, KI43
Prerequisites: KIB812
Contact hours: 4 per week Campus: KG
Credit points: 12
► KIP401 Foundations of Communication Design
To be a successful practitioner in the creative industries students will be required to have knowledge and skills that enable visual communication of concepts and the production of various visual formats for a range of settings. By investigating past and current shifts in the representation of both the still and moving image, this unit provides a foundation for further studies in the field of Communication Design and the broader Creative Industries.
Courses: KI35, KI36, KI43
Contact hours: 3 per week Campus: KG
Credit points: 12
► KIN812 Interdisciplinarity for the Creative Industries
This unit serves as an introduction to project management and how it relates to software development and new media production making use of various concepts and techniques to achieve a successful project outcome defining project brief, scope and boundaries.
Courses: KI36, KI43
Contact hours: 3 per week Campus: KG
Credit points: 12
► KIN851-1 Design Project (1/2)
Students enrolled in the Master of Creative Industries (Communication Design) are required to undertake a new media design project. The creative new media project should demonstrate an ability to apply academic and creative knowledge innovatively. The project relies on students synthesising the communication design core knowledge with their existing experiences to produce innovative solutions to new media related problems.
Courses: KI43
Prerequisites: KIB812
Contact hours: 4 per week Campus: KG
Credit points: 12
► KIN851-2 Design Project (2/2)
Students enrolled in the Master of Creative Industries (Communication Design) are required to undertake a new media design project. The creative new media project should demonstrate an ability to apply academic and creative knowledge innovatively. The project relies on students synthesising the communication design core knowledge with their existing experiences to produce innovative solutions to new media related problems.
Courses: KI43
Prerequisites: KIB812
Contact hours: 4 per week Campus: KG
Credit points: 12
Communication Design deals with the synthesis of image and text in the creation and presentation of meaning. This unit will introduce students to the principles, conventions and practices of visual communication.

Courses: KI35, KI43
Contact hours: 4 per week
Semester: 1
Campus: KG
Credit points: 12

► KIP402 Foundations of Communication Design 2
This unit further develops interface design skills for communications technologies including design priorities, virtual systems, refinement of concepts, project analysis and problem solving through presentation modeling.

Courses: KI35, KI43
Contact hours: 3 per week
Semester: 2
Campus: KG
Credit points: 12

► KIP403 Media Technology 1
This unit provides an introduction to theories and skills underpinning the application of multimedia technology with the Creative Industries providing a foundation of conceptual and practical skills related to contemporary modes of electronic hypermedia production, communication and publishing.

Courses: KI35, KI43
Contact hours: 2 per week
Campus: KG
Credit points: 12
Semester: 1

► KIP404 Media Technology 2
This unit explores multimedia development and design concepts and practices and investigates the user and user interaction principles.

Courses: KI35, KI43
Contact hours: 6 per week
Semester: 2
Campus: KG
Credit points: 12

► KIP410 Masters Design Studio 1: Interaction Design
Masters Design Studio 1; Interaction Design introduces you to the field of interaction design and the development of new, engaging systems of digital media, in particular web based interaction. Studio projects focus on the design of large and small scale interactive new media that rely on distributed systems such as the Internet.

Courses: KI43
Contact hours: 5 per week
Semester: 2
Campus: KG
Credit points: 24

► KIP411 Masters Design Studio 2: Advanced Interaction Design
Masters Design Studio 2; Advanced Interaction Design explores interaction through the use of Virtual Environment and Tangible Media. Virtual Environments are spaces that can only be experienced through the existence of new media. Tangible Media is the design of augmented devices: stand alone devices whose function is enhanced or defined through the embedding of computational media within them.

Courses: KI43
Prerequisites: KIP410
Contact hours: 5 per week
Semester: 2
Campus: KG
Credit points: 24

► KJB101 Journalism Information Systems
This unit acquaints students with the uses journalists make of computers in their work: for word-processing, personal information management, time management, and gathering information for stories and journalism assignments by searching online and CD-ROM databases, by analysing public records with spreadsheets and by using email to interview sources found on Internet bulletin boards and in newsgroups, usergroups, and listservers.

Courses: IF05, IF07, IF27, KJ32
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB120 Newswriting
In this unit students learn to think like journalists, to evaluate events for their potential news value, to record interviews and perform other reporting tasks and to write news stories. It includes the evolution and theories of reporting.

Courses: IF05, IF07, IF27, KJ32
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB121 Journalistic Inquiry
This unit develops the basic skills learnt in Newswriting; generating story ideas; researching; conducting interviews; finding news values and news angles and applying them in a practical context. Students also learn about how practical newswriting skills fit into an online environment. Students are introduced to the rigours of deadlines and have opportunities to write stories related to different news rounds throughout the Semester.

Courses: IF05, IF07, IF27, KJ32
Prerequisites: KJB120
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB224 Feature Writing
Students conduct interviews and other research that they use to write Internet, newspaper and/or magazine articles that profile personalities or stories or that treat processes, events and places to exploit their human-interest value.

Courses: IF05, IF07, IF27, IF93, KJ32, KK33, KW25
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB232 Radio and Television Journalism 1
The practical and theoretical aspects of radio and television media are studied and applied through production of broadcast news programs. Students learn broadcast style and usage and the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

Courses: IF05, IF07, KJ32
Prerequisites: KJB120
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB239 Journalism Ethics and Issues
QUT Journalism supports the development of socially responsible, ethical journalists. KJB239 is a core journalism unit. It begins with an overview of western and eastern moral philosophical traditions and moves on to examine current journalistic practice in the context of Australian and international media operations, regulatory bodies and the stance of professional journalism organisations. Students generate ethical dilemmas and work through them individually, making difficult decisions about issues such as invasion of privacy, protection of sources and conflict of interest. The impact of developing information and communication technologies is also addressed.

Courses: IF05, IF07, KJ32
Semester: 2
Campus: KG
Credit points: 12

► KJB303 News Production
This advanced unit examines the activities of media industries and media firms. It addresses practical issues such as managing deadlines, planning and decision-making in the newsroom, and leadership and motivation. Work is done in online journalism, newspaper production, radio and television.

Courses: IF05, IF07, KJ32
Prerequisites: KJB322, KJB338
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB322 Desktop Publishing and Editing
This unit introduces the basic copy editing and design principles for newspapers. These skills are incorporated with the latest electronic publishing technology with specific reference to newspapers. Students use agency copy from worldwide sources, and local reports in news and feature page design exercises. Exercises are provided in desktop publishing.

Courses: IF05, IF07, KJ32, KW32, KW37
Prerequisites: KJB224; waived for Postgraduate Students
Contact hours: 3 per week
Semester: 1
Campus: KG
Credit points: 12

► KJB337 Public Affairs Reporting
This is an advanced reporting unit stressing the watchdog role of the news media using investigative techniques, including computer-assisted reporting, Internet and other online searching. Students write news feature stories for possible publication, and engage in case study/role play exercises for under-standing public events/processes and their relationships to news media. The unit is taught in three hour blocks over the first nine weeks of semester.

Courses: IF05, IF07, KJ32
Prerequisites: KJB224 and KJB120
Contact hours: 3 per week
Semester: 2
Campus: KG
Credit points: 12

► KJB338 Radio and Television Journalism 2
This unit includes the philosophy and formulation of radio and television news and current affairs, anchor techniques, and radio and television news production using computers.

Courses: IF05, IF07, KJ32
UNIT SYNOPSIS

Prerequisites: KJB232
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► KJP105 Theories of Journalism

This unit introduces students to a summary of the body of literature pertaining to the theories of journalism; identification of individual research interests; attention to the empirical traditions; summary of issues at an advanced level from journalists perspectives through close reading of core texts.

Courses: KJ35, KJ36, KK51, KK53
Contact hours: 3 per week
Campus: KG  Credit points: 12  Semester: 1

► KJP400 Theories of Journalism

This unit includes the following: a summary of the body of literature pertaining to the theories of journalism; identification of individual research interests; attention to the empirical traditions; summary of issues at an advanced level from journalists perspectives through close reading of core texts.

Courses: KJ35, KJ36, KJ42, KK51, KK52, KK53, KK54, KK55
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1

► KJP401 Newswriting

In this unit students learn to think like journalists, to evaluate events for their potential news value, to record interviews and perform other reporting tasks and to write news stories; the evolution and theories of reporting.

Courses: KJ35, KJ36, KJ42
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KJP402 Journalistic Inquiry

This unit develops the basic skills learnt in Newswriting: generating story ideas; researching; conducting interviews; finding news values and news angles and applying them in a practical context. Students also learn about how practical newswriting skills fit into an online environment. Students are introduced to the rituals of deadlines and will have opportunities to write stories related to different news rounds throughout the semester.

Courses: KJ36, KJ42
Prerequisites: KJP401/KJP120
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KJP403 Feature Writing

In this unit students conduct interviews and other research that they use to write Internet, newspaper and magazine articles that profile other research that they use to write Internet, newspaper and magazine articles that profile

Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KJP404 Radio and Television Journalism

In this unit the practical and theoretical aspects of radio and television media are studied and applied through production of broadcast news programs. Students learn styles and use, and the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

Courses: KJ35, KJ36, KJ42

Prerequisites: KJP401/KJP120
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2

► KJP410 Graduate Project 1

This unit is offered to Master’s students to provide an opportunity for them to immerse themselves in specific professional issues in a major project related to journalism. Through a series of introductory seminars in theories and methodology, group or individual project opportunities and one-to-one supervision of staff, students develop the knowledge, skills, experience and contacts to devise and research a major journalism project.

Courses: KJ42
Incompatible with: KJP301
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KJP411 Graduate Project 2

This unit is offered to Master’s students to provide them with an opportunity to immerse themselves in specific professional issues in a major project related to journalism. Under the supervision of a staff member, students develop the knowledge, skills, experience and contacts to devise and research a major journalism project.

Courses: KJ42
Incompatible with: KJP302
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KKB004 Indigenous Creative Industries

Every culture contains, within its approach to arts practice, the business of creativity. Learning and teaching in the Indigenous Creative Enterprise Unit, Gahrr, develops a sphere of shared knowledge designed to inspire sustainable arts praxis and production.

Incompatible with: KKB704
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1

► KKB007 Introduction to Multi-media Technology

Contemporary modes of electronic media production, publishing and communication within the Creative Industries require graduates to combine practical skills related to the use of technologies and processes with a conceptual understanding of these technologies and processes as relevant to the Creative Industries. These understandings and capabilities are developed in this unit. The unit requires students to have prior experience with the following: Windows and/or Macintosh operating systems; Word processing applications eg Microsoft Word or Word Perfect; electronic mail (email); and the World Wide Web.

Incompatible with: KKB818
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2, 3

► KKB008 Narrative in the Creative Industries

Successful communications in the creative industries rely upon narratives in various forms and genres, including visual, aural, written, spoken and kinetic. This unit develops students’ understanding of narrative and facilitates their ability to use narrative techniques in their own areas of practice. Students are introduced to interdisciplinary examples of narrative forms and conventions and have the opportunity to develop practical outcomes from their academic study of storytelling.

Contact hours: 3 per week  Campus: KG  Credit points: 12

► KKB009 Writing for Creative Industries

This unit provides an overview of the main forms and genres of academic writing, such as description, narration and exposition. It assists student to write clearly and correctly and enable them to become comfortable with and confident in using various Creative Industries and academic writing genres.

Incompatible with: KKB518
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KKB010 Cultures and Creativity

This unit has been designed to provide students with the cultural and creative literacy skills necessary to explore and participate in the creative industries. It enables students to use writing, design, production and performance skills to explore the relationships between creativity and cultures, including indigenous, multicultural and international perspectives. Topics included are: consumer culture and identity; cultures, creativity and the body; representations of space and time in different cultures; and processes of creative production and reception.

Incompatible with: KKB418
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KKB018 Creative Industries

This unit provides an overview of the creative industries as a major element of the global knowledge economy. It critically analyses such issues as the rise of a knowledge-based economy, technological convergence, globalisation, the rise of the creative class, intellectual property, and the relationship between creative and artistic practice and the commercial marketplace. The unit provides students with a basic understanding of the environment and the skills necessary to explore and participate in the creative industries. It enables students to use writing, design, production and performance skills to identify, explore, and address creative opportunities, and to propose new and innovative ideas that use and extend the creative industries environment. The unit also provides students with the foundational language and skills to critique and present creative industries ideas.

Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 1, 2

► KKB175 Creative Industries Legal Issues

Introduces journalism, media studies, creative industries and law. The course aims to provide a foundational approach to general aspects of law as well as particular media related topics for students in these fields.

Courses: IF10, KC32, KJ32, KJ35, KK33, KP32
Incompatible with: KKB275
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2

► KKB201 Primary Curriculum and Pedagogies: Music, Visual Arts & Media

Through both practical and theoretical contexts, students are introduced to curriculum

Q U T H A N D B O O K  2 0 0 6  •  P A G E  6 9 6
planning and teaching in primary Visual Arts, Music and Media using The Arts Years 1 to 10 Syllabus (Queensland Studies Authority, 2002).

Courses: ED91
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1, 2

► KKB202 Primary Curriculum and Pedagogies: Dance and Drama

Through both practical and theoretical contexts, students are introduced to curriculum planning and teaching in primary Dance and Drama using The Arts years 1 to 10 Syllabus (Queensland Studies Authority, 2002).

Courses: ED91
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1, 2

► KKB203 The Arts: Curriculum and Pedagogies

Through both practical and theoretical contexts, you will be introduced to The Arts Years 1 to 10 Syllabus and will experience curriculum planning and teaching in selected strands of the syllabus.

Courses: ED96
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1, 2

► KKB280 Supervised Group Project

Students undertake a project with the approval of the Head of Discipline in Film and Television, Journalism, Media Communication or in special cases only, in Creative Writing and Cultural Studies. In Media and Communication, this unit is available only if appropriate staff and resources are available.

Courses: IX08, IX16
Incompatible with: KKB390

► KKB320 Workplace Learning

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context.

Incompatible with: KKB320, KKB340-1, KKB340-2, KSB301, KSB302
Campus: KG
Credit points: 24
Semester: 1, 2, 3

► KKB340-1 Workplace Learning

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context.

Incompatible with: KKB320, KKB340-1, KKB340-2, KSB301, KSB302
Campus: KG
Credit points: 24
Semester: 1, 2, 3

► KKB340-2 Workplace Learning

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context.

Incompatible with: KKB320, KKB340-1, KKB340-2, KSB301, KSB302
Campus: KG
Credit points: 24
Semester: 1, 2, 3

► KKB357 Independent Study

This unit is designed for those students who wish to investigate an area of study not centrally covered by the course and who wish to have the opportunity to construct and execute their own project. The project may be either theoretical in the field of scholarship or comprise practical discipline work. Collaborative projects involving other students are encouraged.

Courses: KM32, IX07
Incompatible with: KKB057

► KKB914 Visual and Performing Arts Curriculum 1

The practical, intellectual, conceptual and aesthetic functions of the arts make them interesting, relevant and comprehensible. In this unit students are able to apply appropriate, transferable skills to a workplace or professional context.

Incompatible with: KKB330, KKB340-1, KKB340-2, KSB301, KSB302
Campus: KG
Credit points: 12
Semester: 1, 2

► KKB914 Visual and Performing Arts Curriculum 2

This unit is designed for those students who wish to investigate an area of study not centrally covered by the course and who wish to have the opportunity to construct and execute their own project. The project may be either theoretical in the field of scholarship or comprise practical discipline work. Collaborative projects involving other students are encouraged.

Courses: KD007
Credit points: 12
Semester: 1, 2

► KKD007 Introduction to Multimedia Technology

Contemporary modes of electronic media production, publishing and communication within the Creative Industries require graduates to combine practical skills related to the use of technologies and processes with a conceptual understanding of these technologies and processes as relevant to the Creative Industries. These understandings and capabilities are developed in this unit. The unit requires students to have prior experience with the following: Windows and/or Macintosh operating systems; Word processing applications eg Microsoft Word or Word Perfect; electronic mail (email); and the World Wide Web.

Courses: IOF6
Incompatible with: KKD018
Contact hours: 4 per week
Campus: KG
Credit points: 12

► KKD018 Cultures and Creativity

This unit has been designed to provide students with the cultural and creative literacy skills necessary to explore and participate in the creative industries. It enables students to use writing, design, production and performance skills to explore the relationships between creativity and cultures, including indigenous, multicultural and international perspectives. Topics included are: consumer culture and identity; cultures, creativity and the body; representations of space and time in different cultures; and processes of creative production and reception.

Courses: IOF6
Incompatible with: KKD018
Contact hours: 4 per week
Campus: KG
Credit points: 12

► KKD020 Creative Industries

This unit provides an overview of the creative industries as a major element of the global knowledge economy. It critically analyses issues such as the rise of a knowledge-based economy, technological convergence, globalisation, intellectual property, and the relationship between creative and artistic practice and the commercial marketplace.

Courses: IOF6
Incompatible with: KKB018
Contact hours: 4 per week
Campus: KG
Credit points: 12

► KKN320 Workplace Learning

It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context.

Incompatible with: KKN330, KKN340-1, KKN340-2
Campus: KG
Credit points: 12  
Semester: 1, 2, 3  
► KKN330 Workplace Learning  
It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context.  
Incompatible with: KKN320, KKN340-1, KKN340-2  
Campus: KG  
Credit points: 24  
Semester: 1, 2, 3  
► KKN340-1 Workplace Learning  
It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context. This is a year long unit.  
Incompatible with: KKN320, KKN330  
Campus: KG  
Credit points: 12  
Semester: 1, 2, 3  
► KKN340-2 Workplace Learning  
It is important that Creative Industries professionals gain real work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge but also with understandings and experience in order that they may function and flourish when they enter the workplace. This elective unit is offered during the final year of an undergraduate degree course at which time students are able to apply appropriate, transferable skills to a workplace or professional context. This is a year long unit.  
Prerequisites: KKN340-1  
Incompatible with: KKN320, KKN330  
Campus: KG  
Credit points: 12  
Semester: 1, 2, 3  
► KKP400-1 Honours Project  
The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives students the opportunity to pursue in-depth project or dissertation-based work unavailable and inappropriate at undergraduate level. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. This unit has 5 components and all must be completed to obtain final credit points.  
Courses: KK52, KK53, KK54, KK55  
Incompatible with: KKN004-2  
Contact hours: 5 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
► KKP400-2 Honours Project  
The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives students the opportunity to pursue in-depth project or dissertation-based work unavailable and inappropriate at undergraduate level. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. This unit has 5 components and all must be completed to obtain final credit points.  
Courses: KK52, KK53, KK54, KK55  
Incompatible with: KKN004-1  
Contact hours: 5 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
► KKP400-3 Honours Project  
The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives students the opportunity to pursue in-depth project or dissertation-based work unavailable and inappropriate at undergraduate level. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. This unit has 5 components and all must be completed to obtain final credit points.  
Courses: KK52, KK53, KK54, KK55  
Incompatible with: KKN004-3  
Contact hours: 5 per week  
Campus: KG  
Credit points: 12  
Semester: 1, 2  
► KKP400-4 Honours Project  
The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives students the opportunity to pursue in-depth project or dissertation-based work unavailable and inappropriate at undergraduate level. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. This unit has 5 components and all must be completed to obtain final credit points.  
Courses: KK52, KK53, KK54, KK55  
Incompatible with: KKN004-4  
Contact hours: 5 per week  
Campus: KG  
Credit points: 12  
Semester: 1, 2  
► KKP400-5 Honours Project  
The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives students the opportunity to pursue in-depth project or dissertation-based work unavailable and inappropriate at undergraduate level. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. This unit has 5 components and all must be completed to obtain final credit points.  
Courses: KK52, KK53, KK54, KK55  
Incompatible with: KKN004-5  
Contact hours: 5 per week  
Campus: KG  
Credit points: 12  
Semester: 1, 2  
► KKP401 Honours Graduate Seminar  
This is a seminar program of formal presentations of arts research projects by Honours students. Students also attend weekly presentations in the CIRAC seminar series.  
Courses: KK52, KK53, KK54, KK55  
Incompatible with: KKN002  
Credit points: 12  
Semester: 2  
► KKP402 Business Development in Creative Industries  
This unit introduces issues involved in selecting and refining a concept/idea/new product in the creative industries. Topics include: business opportunity recognition; screening for potential viability and sustainable competitive advantages; identifying and analysing strategic options; creating a marketing strategy and outlining the production and operations, human resources, and financial plans for a selected creative industries venture. Students build the components of a business model for their selected creative concept and write a formal business plan for that concept/product. Students examine and critique the business models of a variety of existing businesses in the creative industries during the semester.  
Courses: IP01, IP04  
Incompatible with: GSN225  
Contact hours: 3 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
► KKP601 Approaches to Enquiry in the Creative Industries  
There are many forms of enquiry suited to the diverse range of disciplines which make up the Creative Industries. These forms of enquiry typically fall within qualitative research traditions, creative practice as research and applied commercial research. This unit plays a key role in your research degree by introducing you to the most appropriate form of enquiry for your study and providing you with the strategies, methods and protocols for designing, implementing and evaluating that study.  
Courses: KK48, KK49, KK51, KK52, KK53, KK54, KK55  
Incompatible with: KKN020  
Contact hours: 4 per week  
Campus: KG  
Credit points: 12  
Semester: 1  
► KKP602 The Reflective Practitioner  
This unit strengthens the capacities of candidates to work as reflective practitioners within the collaborative, action oriented and theoretically embedded settings that constitute the creative industries. As candidates do this they are theorising on action, raising questions about their own role in identifying the sources and patterns evident in their ideas and actions and transforming the contexts of practice so that professional autonomy may be enhanced. KD42 Master of Creative Industries external students will be required to attend a 2 to 3 day residency in Brisbane.  
Courses: KD42, KK48, KK49  
Incompatible with: KKN061  
Contact hours: 3 per week  
Campus: KG  
Credit points: 24  
Semester: 1  
► KKP603 Project Development in the Creative Industries  
After examining a range of procurement options available across the creative industries the unit focuses on strategic alliances, cross cultural projects, performance measures and the management of IP. These topics are addressed within a framework for project development that is shaped by ethical theory.  
Courses: KK48, KK49  
Incompatible with: KKN065
This unit addresses specific issues in each student’s professional practice. As a practice-led enquiry, students will work closely with their supervisor to investigate specific issues related to their aesthetic and intellectual concerns.

Courses: KK42
Incompatible with: KKN011+KKN012
Campus: KG
Credit points: 24 Semester: 1, 2

► KKP607 Advanced Professional Practice 1

This unit addresses specific issues in each student’s professional practice. As a practice-led enquiry, students will work closely with their supervisor to investigate specific issues related to their aesthetic and intellectual concerns.

Courses: KK42
Incompatible with: KKN011+KKN012
Campus: KG
Credit points: 24 Semester: 1, 2

► KKP604 Creative Industries Conference 1

Two units (also KKP605) are dedicated to the reporting of research outcomes to a collegial group of peers, industry partners and fellow research students and peers. In writing and presenting reports to a publishable standard, candidates report on aspects of their professional projects by drawing on the theoretical frameworks developed in the coursework together with their lived experience of project planning and implementation.

Courses: KK48, KK49
Incompatible with: KKN071
Contact hours: 2 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP605 The Reflective Practitioner 2

This unit provides for a thorough analysis of the reflective practitioner process as it applied to students and their colleagues during DCI Professional Project 1. Patterns of engagement and response in the workplace are analysed during a process of re-theorising and conceptual review. Conceptual reference points for analysing practice are extended by investigating theoretical frameworks from other fields that may assist in building a more complete understanding of an individuals creative work practices.

Courses: KK49
Prerequisites: KKP602/KKN061, KKP610-4/KKN060-4
Incompatible with: KKN062
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP606 Creative Industries Conference 2

Two units (also KKP604) are dedicated to the reporting of research outcomes to a collegial group of peers, industry partners and fellow research students and peers. In writing and presenting reports to a publishable standard, candidates report on aspects of their professional projects by drawing on the theoretical frameworks developed in the coursework together with their lived experience of project planning and implementation.

Courses: KK49
Incompatible with: KKN072
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP607 Advanced Professional Practice 1

This unit addresses specific issues in each student’s professional practice. As a practice-led enquiry, students will work closely with their supervisor to investigate specific issues related to their aesthetic and intellectual concerns.

Courses: KK42
Incompatible with: KKN011+KKN012
Campus: KG
Credit points: 24 Semester: 1, 2

► KKP608 Advanced Professional Practice 2

This unit addresses specific issues in each student’s professional practice. As a practice-led enquiry, students will work closely with their supervisor to investigate specific issues related to their aesthetic and intellectual concerns.

Courses: KK42
Incompatible with: KKN013 Campus: KG
Credit points: 24 Semester: 1, 2

► KKP601-1 DCI Professional Project 1 (1/4)

This unit involves independent supervised study at the doctoral level. The study is part of the candidate's professional project for doctoral examination and is undertaken in consultation with two project mentors. Candidates need to work to their professional project brief in undertaking this unit.

Courses: KK49
Prerequisites: KKP602/KKN061, KKP610-4/KKN300-4
Incompatible with: KKN500-1
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP612 DCI Professional Project 1 (2/4)

See KKP612-1 for details.

Courses: KK49, KK44
Incompatible with: KKN300-2
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP613 DCI Professional Project 1 (3/4)

See KKP613-1 for details.

Courses: KK48, KK49
Incompatible with: KKN300-3
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP614 DCI Professional Project 1 (4/4)

See KKP614-1 for details.

Courses: KK48, KK49
Incompatible with: KKN300-4
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP611 DCI Professional Project 2 (1/4)

This unit involves independent supervised study at the doctoral level. The study is part of the candidate’s professional project for doctoral examination and is undertaken in consultation with two project mentors. Candidates need to work to their professional project brief in undertaking this unit.

Courses: KK49
Prerequisites: KKP602/KKN061, KKP610-4/KKN300-4
Incompatible with: KKN500-1
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP612-2 DCI Professional Project 3 (2/4)

See KKP612-1 for details.

Courses: KK49
Incompatible with: KKN500-2
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP613-2 DCI Professional Project 3 (3/4)

See KKP613-1 for details.

Courses: KK42
Incompatible with: KKN500-3
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP614-4 DCI Professional Project 3 (4/4)

See KKP614-1 for details.

Courses: KK49
Incompatible with: KKN500-4
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP613-1 MFA Project

As a culminating exercise students are required to undertake a single artistic project of substance which demonstrates their ability to apply skills in the control of their art form. This project will be located in the studio and rehearsal room, and result in a major presentation of artistic practice, either as a performance or exhibition, and aligned with discipline expectations of a semester of full-time candidature.

Courses: KK42
Incompatible with: KKN010-1
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP613-2 MFA Project

See KKP613-1 for details.

Courses: KK42
Incompatible with: KKN010-2
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP613-3 MFA Project

See KKP613-1 for details.

Courses: KK42
Incompatible with: KKN010-3
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP613-4 MFA Project

See KKP613-1 for details.

Courses: KK42
Incompatible with: KKN010-4
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2, 3

► KKP614-1 Research Project

Students enrolled in KKK1 Master of Arts (Research) undertake a research project as the major component of their studies. This project may take the form of either a research thesis or a creative project accompanied by a written component. The creative
UNIT SYNOPSES

QUT HANDBOOK 2006  PAGE 700

project could include an exhibition of visual art, a performance (dance, drama, music), choreography, script or score, a book-length work of fiction or non-fiction, a film or multimedia script or production. Units may be either taken one per semester or several per semester, depending on the enrolment pattern recommended by the School in the Course Summary Sheet. This is an eight part unit.

Courses: KK51
Incompatible with: KKN007-1
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-2 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-2
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-3 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-3
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-4 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-4
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-5 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-5
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-6 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-6
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-7 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-7
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP614-8 Research Project
See KKP614-1 for details.
Courses: KK51
Incompatible with: KKN007-8
Contact hours: 1 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP615 Graduate Seminar
Graduate seminar is a unit that fosters a culture of discussion and debate among creative industries research students. Students participate in a seminar series and present the findings of their own research. Students will meet with distinguished guests, staff and fellow students in a spirit of sharing, analysis and interdisciplinary curiosity.
Courses: KK51
Prerequisites: KKP801/KKN200
Incompatible with: KKN200
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KKP616 Independent Study
Independent work of an artistic or scholarly nature which is of limited scope compared with the research project. The student de-
vises an outline of study and/or action in consultation with a staff supervisor. Artistic outcomes would normally be expected to be of the standard of public showing. Written presentation requires a minimum of 6000 - 10000 words, or equivalent if other media/reportage is used.
Incompatible with: KKN006 Campus: KG
Credit points: 12 Semester: 1
► KMB002 Music and Spirituality
Living in the materialistic world in the 21st Century has reignited the desire for spirituality to reach beyond the commercial and ephemeral. This unit examines the interaction of music with ritual, meditation, celebration, joy, protest and healing. It explores this relationship drawing from a range of cultures and times including Indigenous Australian, Western European and Eastern cultures.
Courses: IX06, IX16, KM35
Incompatible with: KMB667
Credit points: 3 per week
Campus: CB, KG
Credit points: 12 Semester: 1
► KMB003 Sex Drugs Rock ‘n’ roll
In this unit, students gain an insight into the interaction between music and society by analysing the artistic, economic, and political landscape of the diverse, innovative music of the 21st century including rock and pop music, world music, dance music, indigenous music and new age music.
Courses: KI25, KM35, KM36
Incompatible with: KMB640
Credit points: 3 per week
Campus: CB, KG
Credit points: 12 Semester: 1, 2
► KMB004 World Music
The student gains an awareness and better understanding of world music, its particular significance within Australia and its impact upon contemporary music through a series of lectures, demonstrations and tutorials.
Courses: KI25, KM35
Incompatible with: KMB631
Credit points: 3 per week
Campus: KG
Credit points: 12 Semester: 1
► KMB005-1 Group Music
In this unit, students experience the cooperative interaction of music-making as a particip-
ant or a leader. This is a year long unit. Final credit points are awarded at the completion of KMB005-2.
Courses: KM32, IX07
Incompatible with: KMB616-1
Contact hours: 3 per week Campus: KG
Credit points: 6 Semester: 1
► KMB005-2 Group Music
In this unit, students experience the cooperation interaction of music-making as a partici-
ant or a leader. This is a year long unit. Final credit points are awarded at the completion of KMB005-2 to be awarded final credit points.
Courses: KM32, IX07
Incompatible with: KMB616-2
Credit points: 3 per week Campus: KG
Credit points: 6 Semester: 2
► KMB007 Introductory Ensemble
In this unit, students work to a QUT choral ensemble. The cooperative interaction of performance and other music-making activities is an essential ingredient in the training of the mature musician and one which will enhance both the individual and the group. The benefits reach into daily life and assist the student to better work in groups.
Prerequisites: KMB104/KMB649
Contact hours: 4 per week Campus: KG
Credit points: 12 Semester: 2
► KMB101 Music (Pri-
mary/Instrumental) Curriculum Studies 1
A foundation study in primary or instrumental music specialisation focusing upon the funda-
mentals of teaching, lesson planning and developing a philosophy appropriate to music education practice.
Courses: IX07, KM35, KM36, KM42
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
► KMB102 Music (Pri-
mary/Instrumental) Curriculum Studies 2
Further study in classroom/instrumental music and sound curriculum focusing upon more advanced teaching methods, unit plan-
ning and the development of an approach to philosophy in action appropriate to music education practice in the senior primary and instrumental music and sound context.
Courses: IX07, KM36, KM42
Prerequisites: KMB101
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2
► KMB103 Music (Pri-
mary/Instrumental) Curriculum Studies 3
An advanced study in primary or instrumen-
tal music and sound curriculum, focusing upon innovative teaching methods, music coaching and planning, whole school commu-
ity cultural management and the develop-
ment of an approach to inclusive philos-
ophy which enables a holistic and integrated approach to music and sound education that responds synergistically to individual school communities and facilitates meaningful and engaging music and sound environments.
Courses: IX07
Prerequisites: KMB102
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KMB104 Introductory Musician-
ship
Students study improvisation and music production, undertake an extensive listening program and develop sound creative and conceptual skills. The unit stimulates both beginners and experienced musicians, adopting a fresh approach to the field.
Courses: KI25, KK34
Incompatible with: KMB649
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
► KMB105 Music and Sound Technology
This is an introduction to the broad range of options available to the musician in the age of technology. Through the universal elec-
tronic language of MIDI, students explore sequencers as a tool for composition as well as the basics of sound.
Courses: IX07, IX16, KK34, KM32, KM35, KM36, KM42
Incompatible with: KMB619
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2
► KMB106 Music and Sound for Multimedia
UNIT SYNOPSES

This unit deals with studio recording techniques, computer-assisted composition, the role of music in non-linear structures, the effect of sound in digital media productions, sound effects and Foley techniques, musical acoustics, and digital sound theory.

Courses: IX07, KK34, KM32
Prerequisites: KMB108/KMB621 or KMB105/KMB619
Incompatible with: KMB626
Credit points: 12 Semester: 2

KMB107 Sound and Image
This unit focuses on the rich and varied relationship between sound and image in a number of traditional and non-traditional media, including film, music video, theatre, installation, mixed media performance and many more.
Courses: IX05, IX06, IX08, IX16, KK34, KM35, KM36, KM42
Incompatible with: KMB626
Credit points: 12 Semester: 2

KMB108 Sound Recording and Acoustics
This is an introduction to the fundamentals of the physical world of sound, basic signal flow, sound recording and acoustics.
Courses: IX07, KK34, KM32, KM35, KM36, KM42
Incompatible with: KMB621
Credit points: 12 Semester: 1, 2

KMB110 Music Production 1
These sequential units beginning with the development of a secure and reliable technique in production skills. The unit includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to an ensemble.
Courses: IX07, KK34, KM32
Incompatible with: KMB657
Credit points: 12 Semester: 1

KMB111 Music Production 2
This unit continues the development of a secure and reliable technique in production skills. It includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to an ensemble.
Courses: IX07, KK34, KM32
Incompatible with: KMB657
Credit points: 12 Semester: 2

KMB113 Multi-Instrumental Music
In this unit, students engage in the study of theoretical and practical elements necessary for the instrumental music teacher and professional doublers. Additionally, a lecture/class discussion is utilised to reflect on a range of topics relevant to the study.
Courses: IX07, KM32
Prerequisites: KMB110/KMB657 or KMB120/KMB651
Incompatible with: KMB622
Credit points: 12 Semester: 2

KMB120 Music Performance 1
This series of sequential units begins with the development of a secure and reliable technique on a principal instrument or voice. Content includes individual lessons and master classes, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.
Courses: IX07, KM32
Incompatible with: KMB651
Credit points: 12 Semester: 1

KMB121 Music Performance 2
This unit continues the development of a secure and reliable technique on a principal instrument or voice. It includes individual lessons and master classes, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.
Courses: IX07, KM32
Incompatible with: KMB652
Credit points: 5 per week Campus: KG

KMB130 Core Musicianship 1
In this unit, students develop a range of generic musical skills that are relevant to a broad range of musical contexts and environments. The unit focuses on the building blocks of a broad and inclusive musicianship and includes development of aural, analytical and compositional skills through lectures, tutorials and focused musical tasks and improvisation.
Courses: IX05, IX06, IX07, IX08, IX16, KM32
Prerequisites: Pre/Corequisite: KMB105
Incompatible with: KMB632
Credit points: 12 Semester: 1

KMB131 Core Musicianship 2
Continuing on from KMB632, students further develop a range of generic musical skills that are relevant to a broad range of musical contexts and environments. The unit focuses on musical language and context and includes the further development of aural, analytical and compositional skills through lectures, tutorials and focused musical tasks and improvisation.
Courses: IX05, IX06, IX07, IX08, IX16, KM32
Prerequisites: KMB130/KMB632
Incompatible with: KMB633
Credit points: 4.5 per week Campus: KG

KMB201 Music (Secondary)
Curriculum Studies 1
This is a foundation study unit in secondary music and sound curriculum focusing upon the fundamentals of teaching, lesson planning and developing a philosophy appropriate to music and sound education practice.
Courses: IX05, IX06, IX07, IX08, IX16
Credit points: 12 Semester: 1

KMB202 Music (Secondary)
Curriculum Studies 2
Further study in classroom music and sound curriculum focusing upon more advanced teaching methods, unit planning and the development of an approach to philosophy in action appropriate to music and sound education practice in the senior secondary context.
Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KMB201
Credit points: 3 per week Campus: KG

QUT HANDBOOK 2006 • PAGE 701
UNIT SYNOPTES

Credit points: 12  Semester: 1  
► KMB208 Contemporary Art Musicianship  
This unit focuses on art music of the last 100 years and up to the present day. It integrates aural training, analysis, composition and context (music history) into a coherent package.  
Courses: IX07, KM32  
Prerequisites: KMB131/KMB633 or equivalent  
Incompatible with: KMB634  
Contact hours: 5 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB209 Conducting  
This unit introduces students to a wide range of music in styles and assists them to achieve artistic objectives in music performance through conducting workshop activities including practical conducting, stylistic practices, repertoire, and rehearsal and performance techniques.  
Courses: IX06, IX07, IX16, KM35, KM36, KM42  
Prerequisites: KMB131/KMB633 or equivalent  
Incompatible with: KMB623  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 1  
► KMB210 Music Production 3  
This unit continues the development of a secure and reliable technique in production skills. Content includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to an ensemble.  
Courses: IX07, KI25, KK34, KM32  
Prerequisites: KMB111/KMB658  
Contact hours: 5 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB211 Music Production 4  
This unit continues the development of a secure and reliable technique in production skills. Content includes small group learning work, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to an ensemble.  
Courses: IX07, KI25, KK34, KM32  
Prerequisites: KMB210/KMB659  
Contact hours: 5 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB212 Arranging  
This unit explores arranging techniques for vocal combinations and genres.  
Courses: IX06, IX07, IX16, KM35, KM36, KM42  
Prerequisites: KMB204/KMB630 or equivalent  
Incompatible with: KMB617  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB213 Multi-Instrumental Music B  
In this unit, students engage in the study of an instrument supplementary to their principal instrument, necessary for the instrumental music teacher and professional doublers. Additionally, students undertake peer tutoring to small groups. A lecture/class discussion is utilised to reflect on a range of topics relevant to the study.  
Courses: IX07  
Prerequisites: KMB113/KMB622  
Incompatible with: KMB628  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB220 Music Performance 3  
This unit continues the development of a secure and reliable technique on a principal instrument or voice. It includes individual lessons and master classes, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.  
Courses: IX07, KM32  
Prerequisites: KMB121/KMB652 or equivalent  
Contact hours: 5 per week  Campus: KG  
Credit points: 12  Semester: 1  
► KMB221 Music Performance 4  
This unit includes individual lessons and master classes, attendance and participation in weekly performance seminars and group rehearsals of a wide range of music appropriate to the ensemble of choice.  
Courses: IX07, KM32  
Prerequisites: KMB131/KMB633 and KMB220/KMB653  
Contact hours: 5 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB301 The Music Industry  
This unit facilitates a smooth and confident transition from undergraduate experiences to life in the arts workforce. It includes exploration of current issues in the arts, and development of professional skills including public speaking, meeting procedures and career management.  
Courses: KMB310, KM32, KM36  
Incompatible with: KMB6056  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMB310-1 Music Production 5  
This unit acknowledges that there is a broad range of activities and outcomes for musicians in the contemporary world of music and it is essential for musicians to position themselves wisely and appropriately within the field. This final year unit is intended to provide an array of music performance options to assist students in their future career in the music industry. This is a year long unit. Students must complete KMB320-1 in semester 1.  
Courses: KM32  
Prerequisites: KMB320-1/KMB655-1  
Contact hours: 4.5 per week  Campus: KG  
Credit points: 24  Semester: 2  
► KMB320-2 Music Performance 5  
This unit acknowledges that there is a broad range of activities and outcomes for music performers in the contemporary world of music and it is essential for musicians to position themselves wisely and appropriately within the field. This final year unit is intended to provide an array of music performance options to assist students in their future career in the music industry. This is a year long unit. Students must complete KMB320-1 in semester 1.  
Courses: KM32  
Prerequisites: KMB320-1/KMB655-1  
Contact hours: 4.5 per week  Campus: KG  
Credit points: 24  Semester: 2  
► KMP400 Digital Recording  
Students follow an integrated course of theory and practice in sound recording. They create a portfolio of recordings using either their own equipment or the music technology laboratories at QUT, which are equipped with industry standard digital recording software and hardware.  
Courses: KM36, KM42  
Incompatible with: KMN606  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMP402 Music and Sound for Digital Media  
This unit deals with studio recording techniques, computer-assisted composition, the role of music in non-linear structures, the effect and affect of sound in digital media productions, sound effects and Foley techniques, musical acoustics, and digital sound theory.  
Courses: KM35, KM36, KM42  
Prerequisites: KMB105/KMB619 or KMB211/KMB621  
Incompatible with: KMN626  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMP403 Multi-Instrumental Studies 1  
This unit widens the base of students’ practical skills and enhances career opportunities through the study of second instruments. Students work through an intensive program in groups, on a variety of instruments, to obtain fundamental skills on those instruments, which will develop and enhance their multi-instrument skills for teaching.  
Courses: KM35, KM36, KM42  
Incompatible with: KNM622  
Contact hours: 3 per week  Campus: KG  
Credit points: 12  Semester: 2  
► KMP404 Multi-Instrumental Studies 2  
This unit is designed to deepen students’ practical skills through the study of second instruments and to have them engage with multi-instrumental pedagogical methods. Students work through an intensive program in groups on a variety of instruments to obtain fundamental skills on those instruments, which will develop and enhance their multi-instrumental skills for group instruction.
UNIT SYNOPSES

Courses: KM35, KM36, KM42
Prerequisites: KMP403/KMN622
Incompatible with: KMN628
Contact hours: 2 per week  Campus: KG
Credit points: 12  Semester: 2
► KMP405 Materials of Music
This unit provides an introduction to the concepts of texture in music. The study of textual design has been enriched by recent developments in music technology, enabling music to be heard as pure timbre in the sound media. This unit includes the techniques of orchestration and other arranging techniques.
Courses: KM35, KM36, KM42
Incompatible with: KMN630
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1
► KMP410 Music Project 1
This is the first in a sequence of self-directed project units. Students undertake a music project of relevance to the creative industries. This will incorporate discovery, practice and reflection so that the unit is suitable for students with different levels of experience in the field. Students are required to attend a weekly evening seminar and present as required.
Courses: KM42
Incompatible with: KMN601
Contact hours: 2 per week  Campus: KG
Credit points: 24  Semester: 1, 2
► KMP411 Music Project 2
This unit follows from KMP410 and enables students to further develop their project. Students are required to attend a weekly evening seminar and present as required.
Courses: KM42
Prerequisites: KMP410/KMN601 or with KMP410 as a corequisite
Incompatible with: KMN602
Contact hours: 2 per week  Campus: KG
Credit points: 24  Semester: 1, 2
► KMP412 Music Project 3
This unit follows from KMP411 and enables students to further develop their project. Students are required to attend a weekly evening seminar and present as required.
Courses: KM42
Prerequisites: KMP411/KMN602 or with KMP411 as a corequisite
Incompatible with: KMN603
Contact hours: 2 per week  Campus: KG
Credit points: 24  Semester: 1, 2
► KMP413 Music Project 4
This unit follows from KMP412 and enables students to further develop their project. Students are required to attend a weekly evening seminar and present as required.
Courses: KM42
Prerequisites: KMP412/KMN603 or with KMP412 as a corequisite
Incompatible with: KMN604
Contact hours: 2 per week  Campus: KG
Credit points: 24  Semester: 1, 2
► KMP414 Music Project 5
This unit follows from KMP413. The student completes their project. Students attend a weekly evening seminar and present as required.
Courses: KM42
Prerequisites: KMP413/KMN604 or with KMP413 as a corequisite
Incompatible with: KMN605
Contact hours: 2 per week  Campus: KG
Credit points: 24  Semester: 1, 2
► KMP415 Independent Project
It is important for those students who wish to investigate a topic or discovery not centrally covered in the compulsory units, to have the opportunity to construct and execute a project in an area of their own choice. This unit allows such a study. The project may be in the field of scholarship and research or creative work within music or in interdisciplinary work.
Courses: KM36, KM42
Prerequisites: Available to KM36, KM42 only
Incompatible with: KMN609
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2
► KPB101 Foundations of Film and Television Production
This unit introduces the principles and technologies of video production for both cinema and television. This includes the roles and responsibilities of producers, production management, design and practice. Lecture delivery by experts in the major production areas of producing, directing, editing and sound informs this practice. Students work in groups to produce videos which form a major part of their assessment.
Courses: IF05, IF07, IF27, KK32, KK33, KK34, Creative Industries submajor unit
Incompatible with: KPB155
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2
► KPB102 Film History
The unit explores how narrative film has developed from the turn of the 20th century to the first decade of the 21st century. Historical and technological changes in motion-picture production are examined in relation to the development of film as an art form, and to the refinement of expressive elements in films. Attention is paid to the creative use of motion picture production technology, and to the continued popularity of motion pictures. This unit provides an important background for anyone interested in a general history of the moving image, as well as to those students involved in film production and criticism.
Courses: KK33
Incompatible with: KPB359
Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 1
► KPB103 Film Genres
Includes a contextual study of American film genres and directors from the turn of the 20th Century until the present day. The subject examines Hollywood genre films and directors, as well as independent American films. Some of the American film genres examined include the following: 1930’s musicals and their relationship to the Great Depression and Roosevelt’s New Deal; post-war reconstruction and the reaffirmation of the American family in 1940’s films; the anti-communist hysteria and American conservatism in 1950’s science fiction movies; the relation of 1960’s film genres to various cultural and political movements of the period; and the treatment of a range of social and cultural issues in American film genres from the 1970s to the first decade of the 21st century.
Courses: KK33
Incompatible with: KPB147, KPB305
Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 2
► KPB104 Film and Television Production Resource Management
This unit considers the role of the producer and executive producer in the packaging and financing of film and television production including: corporate, training, documentary, and grant films; features, televisions and mini-series; matching television network programming needs and achieving balance in above-the-line, below-the-line and marketing costs. It considers the following: sources of finance including PFTC, networks, corporate sponsors, IP and ownership, corporate clients, investors, pre-sales, government grants, Film Finance Corporation; methods of obtaining finance, union support, completion guarantees, legal and accounting requirements; social and ethical issues.
Courses: IF27, KK33
Incompatible with: KPB314
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► KPB105 Narrative Production
This unit builds on and advances basic understandings, skills and concepts delivered in KPB101. An introduction to the skills of sound and lighting complements the earlier core skills of camera, editing, directing and production management. Assessment consists of production of non-fiction short videos.
Courses: IF27, KK34
Prerequisites: KPB101/KPB155
Incompatible with: KPB185-KPB260
Contact hours: 3 per week  Campus: KG
Credit points: 12
► KPB106 Australian Television
This unit explores the historical and global contexts that have determined the nature of Australian television. It also examines the television industry in terms of the differing imperatives shaping public and private television. The unit in addition canvasses the interaction between television and its audiences. This is followed by a critique of a number of important television texts and then a study of the probable and possible futures for television in Australia.
Courses: IF27, KK33
Incompatible with: KPB209-KPB370
Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 1
► KPB107 Television Genres
Students with an interest in television should be able to look critically and constructively at the types of programs (genres) made and broadcast, and to investigate the different types of stories that can be told through these different genres.
Courses: IF27, KK33
Incompatible with: KPB372-2
Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 2
► KPB108 Media Text Analysis
Acquaints students with a range of approaches, both traditional and contemporary, to the analysis of media texts. Equips students with practical methods of understanding the creation and structuring of social meaning through media. The strategies applied in texts will be drawn from the following areas: Utilitarianism, New
Criticism and the traditional legacy; Semiotics and Structuralism/Post-Structuralism; Marxism and Contextual/ Historical Approaches; Feminism, Psychoanalysis, and Multiculturalism. The media texts chosen will include newspaper articles, cartoons, photographs, advertisements, films and television programs.

**Incompatible with:** KPB130
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KPB201 Experimental Production**  
Through exploration of the historical and theoretical underpinnings of experimental motion picture art, students in this unit have the opportunity to develop their creative potential through experimentation. Building on prior knowledge acquired in the production units KPB101 and KPB105, students are encouraged to become willfully nonconformist in approach, drawing on a wide range of traditions from within the genre of Experimental or avant-garde film-making.

**Courses:** KK34, KP25  
**Prerequisites:** KPB101/KPB155, KPB105/KPB185, KWB102/KWB111  
**Incompatible with:** KPB190  
**Contact hours:** 6 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KPB202 Film and Television Business Skills: Entrepreneurship and Investment**  
The business of television is all about spotting proposals at the concept stage with the potential to be made into successful programs, and about their creative management. This involves a number of personal skills, revolving around leadership, communication and the development of key creative personnel on one side, with presentation of ideas and team skills on the other. This unit builds from students’ knowledge of management of the process and resources of production to the overarching skills of managing the creative process and maintaining a balance between risk taking and commercial prudence.

**Courses:** KK33, KP32  
**Prerequisites:** KPB104/KPB314  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KPB203 Australian Film**  
This unit includes the following: study of New Wave Australian films within their cultural and institutional contexts; issues facing the film industry today; the filmic construction and circulation of cultural discourses such as national identity, nationalism, gender, ethnicity and class; the Australian landscape in film; experimental and avant-garde films; indigenous films; new technological and global challenges.

**Courses:** KK34, KP25  
**Incompatible with:** KPB343  
**Contact hours:** 4 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KPB204 Multi-Camera Television Studio Production**  
This unit introduces students to the principles and technology of Television production, utilising both single and multi-camera techniques. In this unit students develop their practical and production skills and understandings to create content for the broad area of Television Studio Production, using our digital widescreen facilities. It introduces multi-camera television production techniques, building on skills already developed in prerequisite units.

**Courses:** KK34, KP25  
**Prerequisites:** KPB101/KPB155, KPB105/KPB185, KPB201/KPB190  
**Incompatible with:** KPB265  
**Contact hours:** 6 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KPB205 Documentary Theory and Practice**  
The documentary filmmaking tradition has involved many crucial aesthetic, technical and ethical concerns throughout history. This unit introduces this significant tradition of documentary production. For KP25/KK34 (Film & Television) students, the unit is a preparation for the documentary practical production unit, through learning to assimilate the principles outlined in the unit into their own documentary screenplays. For non-KP25/KK34 (Film & Television) students, the unit provides an opportunity to address the theoretical underpinnings of the documentary form, and the processes of documentary production.

**Courses:** KK34, KP25, KP36  
**Incompatible with:** KPB358  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KPB206 International Cinema**  
This unit examines a range of national cinemas from a global perspective. Key theoretical approaches to national/international cinemas are covered, along with significant historical, textual, representational and ideological issues. The critical challenges posed by productions from these different cultures and national/international cinemas are covered, along with significant historical, textual, representational and ideological issues. The unit involves the development of a documentary project, including the skills and function of script editing. The unit will explore the role of creativity in the development of ideas.

**Courses:** KK33, KP32  
**Incompatible with:** KPB105/KPB185, KPB204/KPB265, KWB102/KWB111  
**Credit points:** 12  
**Semester:** 1

► **KPB304 Television Practice**  
This unit is the culmination of BCI (TV) students’ learning over the preceding five semesters and an opportunity to put into practice the skills and knowledge acquired over that period. The unit involves the development and managing the production of television programs, either in a workplace environment or in a simulated production environment with all facets of a real workplace.

**Courses:** KK33, KP32  
**Incompatible with:** KPB302  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KPB306 Film Drama Production**  
This unit includes film or video production that uses actors as mediators in the construction of fictional events. It explores the historical and theoretical underpinnings of fictional motion picture art. It provides training in management, direction, camera, sound and editing at a professional level. Practice is in a specialist role on short drama productions.

**Courses:** KK34, KP25  
**Prerequisites:** KPB101/KPB155, KPB105/KPB185, KPB201/KPB190, KPB204/KPB265, KPB308/KPB268  
**Incompatible with:** KPB270  
**Contact hours:** 6 per week  
**Campus:** KG  
**Credit points:** 24  
**Semester:** 2

► **KPB308 Film and Television Drama Practice**  
This unit introduces students to directing methodologies in film and television drama. Students are exposed to different approaches to directing actors. The unit examines a number of case studies of seminal directors who encompass a variety of performance strategies and aesthetic techniques. In addition, the unit familiarises students with a wide range of stylistic approaches to directing for film and television. Students are expected to assimilate the principles outlined in the unit into their own creative work and are formatively assessed on dramatic screenplays they write in the unit.

**Courses:** KK34, KP25  
**Prerequisites:** KPB101/KPB155, KPB105/KPB185, KPB201/KPB190, KPB204/KPB265, KWB102/KWB111  
**Incompatible with:** KPB268  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KPP400 Film and Television Production Theory**  
This postgraduate unit equips students with the skills to strategically develop, market and plan their own film and television productions in the international marketplace. It addresses at an advanced level production strategies which are only marginally addressed at the undergraduate level. It also informs students about film laboratory procedures that have been modified by the introduction of digital technology. In addition, students are acquainted with methodologies and theoretical
underpinning for formulating their own aesthetic and developing a personal style.

Courses: KK51, KK52, KK53, KK55, KP35, KP36

Incompatible with: KPP104

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► KPP401 Foundations of Film and Television Production

This unit introduces the principles and technologies of video production for both cinema and television. This includes the roles and responsibilities of production teams, production management, design and practice. Lecture delivery by experts in the major production areas of producing, directing, cinematography, editing and sound informs this practice. Students work in groups to produce videos that form a major part of their assessment.

Courses: KP35, KP36

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2

► KPP402 Narrative Production

This unit builds on and advances basic understandings, skills and principles delivered in KPP401 Foundations of Film and Television Production. An introduction to the skills of sound and lighting complements the earlier core skills of camera, editing, directing and production management. It consists of production of non-fiction short videos.

Courses: KK34

Corequisites: KSB103

Incompatible with: KSB202

Contact hours: 14 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB101 Acting 1

This unit focuses on the actor’s instrument, using a series of exercises that deal specifically with whatever impedes the actor’s personal truths, and unblocks instrumental blocks to emotional expression. Work incorporates stage and camera requirements.

Courses: KK34

Corequisites: KSB103

Incompatible with: KSB202

Contact hours: 14 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB102 Acting 2

This unit continues instrument work and the introduction of craft techniques, dealing with contemporary naturalistic texts for stage, film and television.

Courses: KK34

Corequisites: KSB101/KSB202

Incompatible with: KSB203

Contact hours: 9 per week  Campus: KG
Credit points: 12  Semester: 2

► KSB103 Voice and Movement 1

This unit is an introduction to an organic approach to body and voice and their integration as the basis for all forms of dramatic expression. All voice and body work complements and supports the emotional freeing demanded in acting classes. Combat, connected speech, and singing are introduced.

Courses: KK34

Corequisites: KSB101

Incompatible with: KSB204

Contact hours: 6 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB104 Voice and Movement 2

This unit continues instrument work and the introduction of craft techniques, dealing with contemporary naturalistic texts for stage, film and television.

Courses: KK34

Prerequisites: KSB103/KSB204

Incompatible with: KSB205

Contact hours: 6 per week  Campus: KG
Credit points: 12  Semester: 2

► KSB105 Theatrecraft

This unit involves development of practical skills in workshop construction and production areas of stage scenery, props and costumes.

Courses: KK34

Corequisites: KSB113

Incompatible with: KSB274

Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB111 Stage Management 1

This unit introduces the coordination of a live theatre production including theatre layout and terminology, role of the stage manager, duties and responsibilities from pre-rehearsal to close of season, communication procedures and rehearsal room procedures.

Courses: KK34

Corequisites: KSB105, KSB113

Incompatible with: KSB292

Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB113 Technical Production 1

This unit develops basic skills in theatrical lighting and sound operation and their integration into the overall production process.

Courses: KK34

Corequisites: KSB111

Incompatible with: KSB289

Contact hours: 6 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB114 Event Technology Prac
tice

This unit provides technical production students with the opportunity to apply lecture content to authentic learning sites through participation in creative industries events and productions.

Courses: KK34

Prerequisites: KSB111/KSB292, KSB113/KSB289

Incompatible with: KSB018

Contact hours: 15 per week  Campus: KG
Credit points: 12  Semester: 2

► KSB211 Stage Management 2

This unit introduces the management issues in areas of stage mechanics, flying, props and wardrobe and preparation of students to undertake performance crew roles in these departments. It provides an introduction into stage management for Dance, Opera and Musicals.

Courses: KK34, KS26

Prerequisites: KSB111/KSB292, KSB113/KSB289

Corequisites: KSB213

Incompatible with: KSB293

Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB212 Stage Management 3

This unit broadens the skills base for stage managers into production and event management.

Courses: KK34, KS26

Prerequisites: KSB211/KSB293

Incompatible with: KSB294

Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 2

► KSB213 Technical Production 2

This unit continues the creative use of lighting and sound in performances. It provides an introduction to lighting and sound design.

Courses: KK34, KS26

Prerequisites: KSB111/KSB292, KSB113/KSB289, KSB114/KSB208

Corequisites: KSB211

Incompatible with: KSB290

Contact hours: 6 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB214 Technical Production 3

This unit broadens the skills base in areas of lighting and sound into drama, contemporary dance, ballet, opera, musicals, concerts and television productions.

Courses: KK34, KS26

Prerequisites: KSB113/KSB289, KSB213/KSB290

Incompatible with: KSB291

Contact hours: 6 per week  Campus: KG
Credit points: 12  Semester: 2

► KSB215 Visual Theatre Design

This unit considers the following: the role of visual expression in theatrical events; elements of space; approaches to researching design elements; bearing of text and resources on events; western and eastern influences, complete design process.

Courses: KSB2, KSB24

Corequisites: KSB105/KSB274

Incompatible with: KSB213

Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB221 Acting 3

This unit continues the development of a personal working process through rehearsal and performance of increasingly complex texts.

Courses: KK34, KS25

Prerequisites: KSB102/KSB203

Incompatible with: KSB247

Contact hours: 20 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB222 Acting 4

This is an advanced acting unit that deals primarily with role, character creation and advanced craft application. It is also designed to move the student actor into areas of professional text preparation, rehearsal management, and audition techniques. This advanced work includes development of the skills required in acting for film and television.

Courses: KK34, KS25

Prerequisites: KSB221/KSB247

Incompatible with: KSB248

Contact hours: 20 per week  Campus: KG
Credit points: 12  Semester: 2

► KSB223 Voice and Movement 3

This unit explores the area of heightened language. The focus is on the technical devices of Shakespearean text. Work developed is performed both on the stage and for camera.

Courses: KK34, KS25

Corequisites: KSB104/KSB205

Incompatible with: KSB223

Contact hours: 6 per week  Campus: KG
Credit points: 12  Semester: 1

► KSB224 Voice and Movement 4
UNIT SYNOPSES

This unit develops a vocal and physical technique that supports and serves the professional performer. Advanced classes in physical theatre develop physical expressiveness, clarity and strength. Advanced studio work continues development in film and television techniques.

Courses: KK34, KS25
Prerequisites: KSB23/KSB23
Incompatible with: KSB234
Contact hours: 6 per week
Credit points: 12
Semester: 2

KSB225 Music Theatre Skills
This unit provides students with an introduction to practical skills development in acting, dance and singing for music theatre.

Courses: KD25, KK34, KS25
Incompatible with: KSB011
Contact hours: 3 per week
Credit points: 12
Semester: 1

KSB226 Music Theatre Project
This unit follows on from Music Theatre Skills KSB225. Students experience the rehearsal, process and performance of a music theatre work in order to apply the multidisciplinary skills developed in the first unit in this series.

Courses: KD25, KK34, KS25
Prerequisites: KSB225/KSB011
Incompatible with: KSB012
Campus: KG
Credit points: 12
Semester: 2

KSB227 Technical Theatre
This unit introduces the student to the basics in lighting, sound and stage management practice for theatre, developing knowledge of the skills and processes required to stage a small production with minimal support staff.

Courses: IX06, IX07, IX16
Incompatible with: KSB278
Contact hours: 4 per week
Credit points: 12
Semester: 2

KSB301 Theatre Project 1
In this unit students participate in a season of semi-profiled performance projects, working as an ensemble performing roles for film and stage.

Courses: KK34, KS25, KS26
Prerequisites: KSB225/KSB248; or KSB214/KSB281 and KSB12/KSB294.
Incompatible with: KSB255
Campus: KG
Credit points: 48
Semester: 1

KSB302 Theatre Project 2
A season of high-profiled performance projects, providing students with the opportunity to demonstrate their skills to potential employers in the industry, through film and stage work.

Courses: KK34, KS25, KS26
Prerequisites: KSB301/KSB255
Incompatible with: KSB256
Campus: KG
Credit points: 48
Semester: 2

KTB061 Creative Industries Management
This unit introduces management techniques within the Australian creative industries environment including company structures, cultural politics, strategic management and leadership in the arts, legal, ethical, economical and social requirements of arts, boards, and entrepreneurial activity.

Campus: KG
Credit points: 12
Semester: 1

KTB062 Creative Industries Events and Festivals
This unit combines practical and theoretical investigation into how strategy and mission work in arts agencies in arts, events and festivals in Australia.

Campus: KG
Credit points: 12
Semester: 1, 2

KTB101 20th Century Performance
This unit introduces students to the major theatre movements of the 20th Century. Students investigate key theatre practitioners and their innovations.

Courses: IX07, IX16, KK33
Incompatible with: KTB251
Contact hours: 3 per week
Credit points: 12
Semester: 1

KTB102 Process Drama
This unit introduces the process nature of drama and theatre through workshops involving: role play, participant enrolment, leader-in-role and intervention; identification with role; motivation; devising and consequent decision-making; dramatic tension and resolution; structuring for the theme and for the dramatic moment; distanceing; reflection, re-enactment and remaking.

Courses: IX05, IX07, IX16, KK33
Incompatible with: KTB214
Contact hours: 3 per week
Credit points: 12
Semester: 1

KTB103 Performing Skills 1: Body and Voice and Role
This unit introduces the work of Stanislavski and a number of his key interpreters including Cohen, Benedetti, Hagen, Adler and Moore. Acting styles including an examination of alternative theories of performance are explored.

Courses: IX07, IX16, KK33 (Drama), ED91, ED92, ED82
Incompatible with: KTB257+KSB259
Contact hours: 4 per week
Credit points: 12
Semester: 1

KTB104 Performance Innovation
The aim of this unit is to give you an appreciation and understanding of performance innovation in both historical and contemporary contexts.

Courses: IX16, KK33
Incompatible with: KTB271
Contact hours: 3 per week
Credit points: 12
Semester: 2

KTB105 Production 1: Story Making
This unit introduces a clearly defined rehearsed ethic through extended performance project. It includes text analysis, formal discussion, role creation and intensive rehearsal, and live performance of a scripted drama before an audience.

Courses: IX16, KK33
Prerequisites: KTB103/KTB257
Incompatible with: KTB273
Contact hours: 5 per week
Credit points: 12
Semester: 2

KTB110 Performing Skills 2: Style and Form
This unit is designed to be of benefit to anyone seeking to extend their understanding of Shakespeare and the interpretative and acting skills required to perform Shakespearean text. It will be of particular use to those interested in acting, directing, teaching or playwriting.

Courses: IX07, IX16, KK33
Contact hours: 4 per week
Credit points: 12
Semester: 2

KTB201 Drama Curriculum Studies 1
This unit provides an introduction to key syllabus documents and to key skills and strategies of drama teaching.

Courses: IX05, IX06, IX07, IX08, IX16
Incompatible with: KTB414
Contact hours: 4 per week
Credit points: 12
Semester: 1

KTB202 Drama Curriculum Studies 2
In this unit, students develop planning and teaching skills for aesthetic learning and assessment and develop as a critically reflective practitioner and teacher artist.

Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KTB201
Incompatible with: KTB415
Contact hours: 4 per week
Credit points: 12
Semester: 2

KTB203 Drama Curriculum Studies 3
This unit is the final drama curriculum unit for you as a graduating drama teacher. In this third curriculum unit you will expand on the knowledge and understandings gained from Drama Curriculum Studies I and 2. It provides you with the opportunity to articulate a wide range of teaching skills that are essential for interpreting and managing in a variety of arts contexts in school and industry.

Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KTB202
Contact hours: 4 per week
Credit points: 12
Semester: 1, 2

KTB204 Understanding Performance
In this unit, students investigate paradigms of performance, performance as trans-disciplinary practice, live and mediated performance, the body in performance, festival and events, performance identity, critical reviewing and audiences.

Courses: IX05, IX06, IX16, KK33, KT32
Incompatible with: KTB275
Contact hours: 3 per week
Credit points: 12
Semester: 1

KTB205 Production 2: The Collaborative Artist
This unit provides for the development of a performance piece through group devising with professional guidance.

Courses: IX06, IX16
Prerequisites: KTB105/KTB273
Incompatible with: KTB308
Contact hours: 4 per week
Credit points: 12
Semester: 1

KTB206 The Creative Body
In this unit students experience a range of physical skills within the context of non-text based performance taught by professional theatre practitioners.

Courses: IX06, IX16, KK33, KT32
Incompatible with: KTB277
Contact hours: 4 per week
Credit points: 12
Semester: 1

KTB207 Staging Australia
This unit introduces key concepts and practices pertaining to Australian theatre and...
drama of the twentieth century, including indigenous performance, post-colonialism, Bush Drama, tradition, and contemporary forms. Theatre practices are explored in relation to broader social and political concerns.

**Courses:** IX05, IX06, IX07, IX08, IX16, KK33, KT32

**Incompatible with:** KT8253

**Contact hours:** 2 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KT8209 Applied Performance**

This unit is a combination of a practical and theoretical investigation into the process of improvisation and the way drama can be used as a tool for critical enquiry and social change. It provides a basis for further work in writing for performance and advanced improvisational skills.

**Courses:** IX05, IX06, IX07, IX08, IX16  
**Prerequisites:** KT102/KT214

**Incompatible with:** KT8280

**Contact hours:** 2 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KT301 Performing Self**

This unit provides the student with the requisite skills for success within the creative industries in a knowledge economy by considering the nature of undergraduate study as a performing arts graduate. In particular the unit focuses on what it means to be an initiator and leader within the sector.

**Courses:** KK33, KT32  
**Incompatible with:** KT8056

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12

► **KT303 Performing Skills 3: Interpreting and Adapting**

This unit provides third year Performance Studies students with the opportunity to advance their acting skills and their understanding of contemporary acting/performance theory, with particular application to adaptation, interpretation and the creation of innovative performance forms.

**Courses:** KK33, KT32  
**Prerequisites:** KT105/KT8273

**Incompatible with:** KT8310

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KT305 Production 3: The Entrepreneurial Artist**

This final year elective unit provides Performance Studies students with an opportunity to collectively manage and perform a public season of an original production or series of smaller performances. Students themselves take on the various roles of dramaturgy, rehearsal, research, scripting, stage management, design, publicity, documentation, acting and so on, usually under a professional director.

**Courses:** KK33, KT32  
**Prerequisites:** 192cp of prior study

**Incompatible with:** KT8309

**Contact hours:** 5 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KT8306 Directing for Events and Festivals**

This unit analyses the director’s role in production management including play selection, resource auditing, pre-production analyses, time, budget and resource planning, design, technical effects, promotion and publicity and an introduction to blocking techniques.

**Prerequisites:** KT8104/KT8271

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KTP401 Contemporary Performance**

In this unit, students investigate: the nature of the performance event; performance in everyday life; theatricality and performance; trans-disciplinary performance theory and practice; the body in performance; site and performance practice; live and mediated performance; spectator and audience.

**Courses:** KT35, KT36, KT42  
**Incompatible with:** KTN002

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KTP402 Teaching Drama From 1-10**

In this unit, students explore the conceptual and practical knowledge and understanding of the contribution drama can make in a holistic primary education. It explores aesthetic learning and drama as a way of knowing; experience; workshop to develop artistic and facilitation skills for drama teaching; an introduction to The Arts Years 1-10 Syllabus.

**Courses:** KT35, KT36, KT42  
**Incompatible with:** KTN004

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KTP403 Performing Narratives**

In this unit you will examine reviewing practices of storytelling and constructing narratives: the oral, the novelistic, the dramatic, the filmic; post-linearity and multiform narrative; narrative in digital environments; narrative in a replay culture.

**Courses:** KT35, KT36, KT42  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KTP404 Applying Information Technology in the Drama Classroom**

This unit provides an opportunity for students to design and implement a classroom based project that applies the learnings in the course and requires fieldwork in their workplace.

**Courses:** KT42  
**Incompatible with:** KTN006

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KTP410 Drama Project**

This unit provides an opportunity for students to design and implement a classroom based project that applies the learnings in the course and requires fieldwork in their workplace.

**Courses:** KT42  
**Incompatible with:** KTN006

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 24  
**Semester:** 1, 2

► **KVB100 Research and Creativity in the Visual Arts**

Creativity and research are two essential and independent notions underpinning the conditions of current cultural and visual arts practice, their production and their reception. Students in the Visual Arts and the Creative Industries will benefit from a detailed introductory exploration, both practically and theoretically, of these two important areas. This unit uses the strategies of the artist and the contexts of visual arts to begin to unravel and make less mysterious creativity and the processes of research.

**Courses:** IX16, KK33  
**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KVB102 Modernism**

**Incompatible with:** KG

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1
This unit provides an overview of the key concepts and movements that comprise twentieth-century modernism. Beginning with cubism, the unit provides an understanding of terms, such as avant-garde, modernism and modernity. It explains how modernism focuses upon the issue of representation and how this approach led to inter-disciplinary work, which engaged with film, photography, design, architecture and installation as well as the traditional visual arts.

**Courses:** IX07, IX08, IX16, KK33, KK34

**Incompatible with:** KV8701

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**KV8103 Australian Art**

This unit focuses on Australian art over the course of the twentieth century, including the contemporary period. It gives students an understanding of the national, cultural and social frameworks within which this art has been produced and introduces a number of artists, artistic movements and issues within Australian art. It also considers the nature of indigenous art and its contribution to the complexity of Australian cultural identity. All of these issues are presented in order to help students understand the important role of Australian art as an expression of our cultural values throughout the twentieth century.

**Courses:** IX05, IX06, IX07, IX16, KK33, KK34

**Incompatible with:** KV8702

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

**KV8104 Photomedia and Artistic Practice**

This unit aims to provide students with an understanding of the aesthetic aspects of various photomedia concepts and processes and the artistic use of genres. It also aims to give students proficiency in alternative and experimental uses of photographic processes, establishing an understanding of investigative and creative research. By including a range of photographic processes as part of the photographic artist's repertoire, this unit aims to give students a broad range of choices and approaches to creating images. The unit encourages students to engage with photography as a medium for visual and artistic expression in order to extend their own photographic practice.

**Courses:** IX16, KK33

**Incompatible with:** KV8509

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1, 2

**KV8105 Foundations of Drawing for Animation 1**

This is a studio based unit that introduces students to media, processes, strategies and techniques of drawing and associated imagery for use in animated media. The development of critical/reflexive frameworks of traditional and contemporary practice underpin studio development.

**Courses:** KK34

**Incompatible with:** KV8755

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**KV8106 Foundations of Drawing for Animation 2**

This unit develops individual knowledge, concepts and skills to enable students to articulate and present capabilities of motion through drawing for contemporary animation practices.

**Courses:** KK34

**Prerequisites:** KV8105/KV8755

**Incompatible with:** KV8756

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

**KV8107-1 Drawing for Fashion**

This unit concentrates on developing core skills and knowledge of drawing to provide an important foundation for existing and evolving modes for constructing and presenting fashion proposals. This is a year long unit. Students must complete KV8107-2 in semester Two to successfully complete the unit and be awarded 12 credit points.

**Courses:** KK34

**Incompatible with:** KV8757-1

**Contact hours:** 2 per week  
**Campus:** KG  
**Credit points:** 6  
**Semester:** 1

**KV8107-2 Drawing for Fashion**

This unit concentrates on developing core skills and knowledge of drawing to provide an important foundation for existing and evolving modes for constructing and presenting fashion proposals. This is a year long unit. Students must complete KV8107-1 in semester One to successfully complete the unit and be awarded 12 credit points.

**Courses:** KK34

**Prerequisites:** KV8107-1/KV8757-1

**Incompatible with:** KV8757-2

**Contact hours:** 2 per week  
**Campus:** KG  
**Credit points:** 6  
**Semester:** 2

**KV8108 Contemporary Asian Visual Culture**

This unit considers the development of an understanding and awareness of non-Western art forms. It considers the influences of historical visual arts, backgrounds, philosophical beliefs and trade on the symbolism, forms, techniques and uses of various artefacts.

**Courses:** IX08, IX16, KK33, KK34, KV32

**Incompatible with:** KV8444

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

**KV8110 2D Media and Processes**

This introductory unit is a studio course enabling you to explore, construct, analyse and present visual data through the 2D graphic modes of drawing, painting and printmaking.

**Courses:** IX16, KK32

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**KV8111 3D Media and Processes**

This first year unit introduces you to current contemporary art forms. The unit develops individual knowledge, concepts and skills to enable students to articulate and present capabilities of motion through drawing for contemporary animation practices.

**Courses:** KK34

**Prerequisites:** KV8105/KV8755

**Incompatible with:** KV8756

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

**KV8121 Studio Art Practice 2**

This unit addresses a number of contemporary contexts and methods for studio art practice that provide catalysts for students’ individual research. In consultation with studio staff, students formulate and apply an individual framework to develop their studio based practice. Lectures support studio work by introducing professional practitioners, current art issues and practices and providing examples of contemporary art in its multiple contexts. Studio workshops assist students in the development of technical skills.

**Courses:** KK34

**Prerequisites:** KV8120/KV8740

**Incompatible with:** KV8741

**Contact hours:** 6 per week  
**Campus:** KG  
**Credit points:** 24  
**Semester:** 2

**KV8200 Exhibition and Display in the Visual Arts**

This unit addresses the development of the Museum in Western cultures and how that tradition manifests in current arts practices, as they are in contemporary exhibitions, the display of collections, installation and sitespecificity, audience interaction, curatorial activities such as didactic panels and virtual galleries. This unit will assist you in display and/or exhibitions, which engage the artwork of others in effective and appropriate ways.

**Courses:** IX08, IX16, KK33, KK34, KV25, KV32

**Incompatible with:** Either KV8120/KV8740 or KV8111

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**KV8202 Visual Imaging - Process and Theory**

Students of Visual Arts and of the Creative Industries more broadly, will benefit from an examination of the concepts and practices that inform contemporary modes of visual imaging, both in object-based outcomes, as well as multimedia and screen based media. This unit addresses the major theories and processes that have accompanied the development of new imaging technologies in the 20th Century.

**Courses:** IX08, IX16, KK33, KV32

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**KV8203 Earth, Object and Installation**

This unit builds on the introductory unit 3D Media and Process enabling you to pursue a range of three dimensional studies at a more advanced level. Through exercises, projects and lectures, this unit will continue to explore the principles that underlie 3D structure of three-dimensional design utilising traditional and non-traditional materials.

**Courses:** IX08, IX16

**Prerequisites:** KV8111

**Contact hours:** 3 per week  
**Campus:** KG
UNIT SYNOPSIS

Credit points: 12  Semester: 2
► KVB211 Post 1945 Art
This unit introduces the historical, philosophical, economic, political, social, cultural, and political issues relevant to the production of art since 1945 and into the post-modern era. Major topics that are examined include the neo-avant-garde and art’s engagement with consumerism. This unit is intended as a foundation skill-base for all students in Creative Industries applicable to all disciplines and cultural industries including art criticism, arts practice, architecture, landscape architecture, fashion and music.

Courses: IX16, KK33, KK34, KV32
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► KVB220 Studio Art Practice 3
In consultation with studio staff, students formulate a program of work for the semester which allows students to investigate their own personal artistic direction, formulate and develop self-generated enquiry and acquire working methods, resources, skills and knowledge necessary to realise concepts.

Courses: IX08, KK34, KV25
Prerequisites: KVB120/KVB740 and KVB121/KVB741
Incompatible with: KVB742
Contact hours: 6 per week  Campus: KG
Credit points: 24  Semester: 1
► KVB221 Studio Art Practice 4
The conditions of current cultural practice, their production, reception and contribution to society are extremely diverse, increasingly complex and multi-layered. In this unit sustained critical involvement and an increasing commitment to artistic conceptual pursuits is underpinned by contemporary theoretical reference which includes investigation into a broad range of artists’ practices. Students are required to articulate a personal position in these issues.

Courses: KK34, KV25
Prerequisites: KVB220/KVB742
Incompatible with: KVB743
Contact hours: 6 per week  Campus: KG
Credit points: 24  Semester: 2
► KVB301 Visual Arts Curriculum Studies 1
The aim of this unit is to enable you to begin to design and sequence Visual Arts activities that address learning experiences for successful planning, teaching and classroom management. The skills and knowledge of this unit will assist you in creating appropriate learning outcomes and assessments as well as address syllabus requirements. The content and processes of this unit are based on your previous required studies and experiences in Visual Arts theory and practice.

Courses: IX05, IX06, IX07, IX08, IX16
Incompatible with: KVB412
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1
► KVB302 Visual Arts Curriculum Studies 2
The aim of this unit is to have you establish capabilities in the design, sequencing and delivery of visual arts studies that address the learner as well as the requirements of syllabus documents. This unit will address issues of both unit and whole program structures as well as classroom management and teaching in the visual arts.

Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KVB301
Incompatible with: KVB413
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► KVB303 Visual Arts Curriculum Studies 3
This unit aims to prepare you for the complexity of secondary visual arts teaching. With a particular emphasis on professional preparedness, this unit aims to support your development as a competent, confident, skilled curriculum developer and reflective practitioner.

Courses: IX05, IX06, IX07, IX08, IX16
Prerequisites: KVB302
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1, 2
► KVB304 Contemporary Art Issues
This unit is intended as a foundation skill-base for students in Creative Industries applicable to all disciplines and cultural industries including art criticism, arts practice, architecture and fashion. The unit introduces the economic, political, social, cultural, artistic and formal issues related to the production of art since 1990 in the contemporary era.

Courses: KK32, KK34, KV25, KV32
Incompatible with: KVB712
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1
► KVB306 Video Art and Culture
Existing Visual Arts units examine a broad range of subjects addressing artistic media such as painting, sculpture and installation. The Video Art and Culture unit supplements these by instituting a specialised study of artistic and cultural practice that focuses on new mass media technology. The unit therefore enhances, extends and updates knowledge of recent art strategies in contemporary society.

Courses: KK33, KK34, KV25, KV32
Incompatible with: KVB703
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► KVB307 Theories of Spatial Culture
This unit provides the necessary critical evaluation of issues and practices that relate to considerations of space in modern and contemporary art, new media and culture in general. It provides a historical overview of key art practices that have focused their critical attention to the issue of space and the built environment. In order to function as an informed practitioner in the environment of public space a student must acquire such knowledge because it will form the critical-analytical background to current debates and theories in the field of spatial culture and public art.

Courses: KK33, KK34, KV25, KV32
Incompatible with: KVB704
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► KVB320 Studio Project 1
In consultation with studio staff students at this level are expected to undertake individual projects that lead to the development of a professional organised and articulated body of work. Substantial research is expected in support of these projects.

Courses: KK34, KV25
Prerequisites: KVB221/KVB743
Incompatible with: KVB744
Contact hours: 6 per week  Campus: KG
Credit points: 24  Semester: 1
► KVB321 Studio Project 2
In consultation with studio staff students at this level are expected to undertake individual projects that lead to the development of a professionally organised and articulated body of work. Substantial research is expected in support of these projects.

Courses: KK34, KV25
Prerequisites: KVB320/KVB744
Incompatible with: KVB745
Contact hours: 6 per week  Campus: KG
Credit points: 24  Semester: 2
► KVB511 Printmaking
This unit covers a diverse range of print methods, which are viewed, analysed and/or undertaken in the studio. Relief processes, which use raised and incised surfaces, (ie lino, wood, collagraph), intaglio processes, such as etching and drypoint and paleographic processes such as monoprinting, will be investigated. This unit introduces innovative and contemporary print processes are introduced to help students to develop their own approach in their folio of works.

Courses: IX08, ED26, ED50, ED51, ED91
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1
► KVP400 Contemporary Aesthetic Debates
This unit introduces modern aesthetic debates that inform contemporary art practice. The unit addresses philosophical discourse on art from Kant to postmodern theories.

Courses: KK51, KK52, KK33, KK35
Incompatible with: KVB004
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1
► KVP401 Graphic Design
New modes of reproduction, display platforms and transmission devices are reshaping the way text, image and message can be communicated. As creative advertisers, it is important for students to develop new ways of approaching graphic design processes in order to confidently utilise traditional and contemporary media, and to produce innovative cross-media outcomes. It is also important that students are flexible and responsive to the needs of clients, with the ability to articulate and graphically present multiple options for production.

Courses: IP94, IX95, IX96
Incompatible with: KVP100
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2
► KWB001 Introduction to Literary Theory and Cultural Studies
"The textualisation" of the world has been an important development in twentieth century theory in the West," (Fuery: 57). What are texts? What do they mean? This unit addresses these issues by providing students with an introduction to conceptual frameworks derived from some of the major critical discourses that have interacted on our world.

Incompatible with: KWB716
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 1
► KWB002 OzArt
This unit provides students with opportunities to read, explore, discuss and evaluate a number of Australian texts written and pub...
lished over the last twenty-five years. Upon completing this unit, students are able to understand and critically interrogate texts pertinent to contemporary Australian society and culture.

**Incompatible with:** KWB710

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KWB003 Modern Times (Literature and Culture in the 20th Century)**

This unit is designed to introduce students to Shakespearean studies and the ongoing cultural importance of Shakespearean material.

**Incompatible with:** KWB729

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KWB005 Wonderlands: Literature and Culture in the 19th Century**

This unit is designed to introduce students to Shakespearean studies and the ongoing cultural importance of Shakespearean material.

**Incompatible with:** KWB724

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

► **KWB006 Popular Fictions, Popular Culture**

This unit is designed to introduce students to Shakespearean studies and the ongoing cultural importance of Shakespearean material.

**Incompatible with:** KWB725

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KWB007 Indigenous Writing**

This unit is designed to introduce students to Shakespearean studies and the ongoing cultural importance of Shakespearean material.

**Incompatible with:** KWB701

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

► **KWB010 Introduction to Creative Writing**

This course develops creative, critical and analytical skills in reading and writing a variety of creative textual forms. Students acquire an understanding of various forms of creative language forms, especially narrative and poetry. Students therefore are introduced to key language theory and creative writing practice.

**Courses:** IF05, IF07, IF93, KK33, KK34, KW35

► **KWB020 Media Writing**

This unit introduces students to the formats, terminology and protocols used in the preparation of proposal documents and short scripts. It will explore fundamental concepts including narrative structures, metaphors, point of view, plotting, character and voice. Students will examine a range of professional and development documents and be asked to apply their knowledge of typical script problems and solutions to their own work.

**Courses:** IF27, IF93, KK33, KK34

► **KWB030 Persuasive Writing**

This unit teaches the use of persuasive writing in the workplace. The unit analyses a variety of writing genres to reveal how they persuade their audiences. The analysis is founded on critical discourse and semiotic theory. Students apply these learned techniques and theories to produce a portfolio of persuasive writing. It covers a range of genres such as public health campaigns, proposals, speechwriting and political persuasion.

**Courses:** IF93, KK33, KK34, KW25, KW32

► **KWB040 Creative Writing: The Short Story**

This unit covers the writing of the short story in detail.

**Courses:** IF93, KK33, KK34

► **KWB050 Film and Television Scriptwriting**

This unit focuses on the production of a sustained script for film or television.

**Courses:** IF93, KK33, KK34, KP25, KP32, KW32, KW35, KW36

► **KWB060 Corporate Writing and Editing**

This unit deals with both the fundamentals of language (grammar, punctuation, style) and the dominant corporate writing genres (manuals, report, speeches, brochures).

**Courses:** IF27, IF93, KK33, KK34, KW25, KW32

► **KWB070 Introduction to Creative Non-Fiction**

This unit covers the acquisition of practical and analytical skills in creative nonfiction writing in particular review writing on books, film, music, visual arts, fashion and food, as well as travel, scientific, essay, humourous and sports writing. The unit provides examples, techniques and practical exercises in nonfiction creative writing and editing, and the opportunity to develop individual work in the supportive context of in-class and small workshop groups. Potential publishing areas will be explored.

**Courses:** IF93, KK33, KK34, KW25, KW32, KW35

► **KWB080 Creative Writing: The Novel**

This novel represents one of the most pervasive, complex and culturally important literary forms. This unit enables students to produce a sustained and coherent piece of work that will operate as a key section of an original novel, and to develop the analytical and practical skills needed to work within this unique form.

**Courses:** KK33, KK34

► **KWB090 Creative Writing: The Life Writing**

This unit covers the diversity of creative non-fiction life writing, but with an emphasis on contemporary biography and autobiography. While providing theoretical and critical context, the main focus of classes is to teach students to do practical biographical and autobiographical research and writing of their own.

**Courses:** IF93, KK33, KK34, KW25, KW32, KW35, KW36

► **KWB100 Creative Writing Project 1**

This unit provides the opportunity for students to write a sustained piece of creative...
work, within the genre of their choice, including short fiction, poetry, creative non-fiction and hypertext, under supervision. Such work will be written to a standard commensurate with being suitable to submit for publication to print or electronic journals. The student’s final submission is written after familiarisation with industry demands, niches and marketing possibilities.

Courses: IF93, KK33, KK34, KW25, KW32.
Prerequisites: KW104/KW350, KW204/KW380
Incompatible with: KW395
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

KWB206 Youth and Children’s Writing
This unit includes children’s and adolescent novels within the cultural context of nineteenth and twentieth century Australia, England and America. It focuses on textual analysis of major generic types and considers issues such as race, gender, class and regionalism in fiction for young Australians.
Courses: IF93, KK33, KK34, KW25, KW32, KW35
Incompatible with: KW7112
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

KWB301 Editing and Creative Writing
This is a key advanced unit in the BFA in Creative Writing degree, as the practice of creative writing requires a level of self-reflexivity about the creative work created. The facilitated small group/seminar mode of teaching provides concentrated feedback and developmental opportunities for students to develop advanced editing skills.
Courses: KK34, KW25
Prerequisites: 192cp of prior study
Contact hours: 6 per week Campus: KG
Credit points: 24 Semester: 1

KWB303 Writing and Publishing Industry
This unit provides an introduction to the function and structure of the writing and publishing industry.
Courses: IF93, KK33, KK34, KW25, KW32, KW35, KW36, KW37
Incompatible with: KW399
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

KWB305 Creative Writing Project 2
As the capstone unit in the BFA Creative Writing, this unit gives the student the vital opportunity to concentrate on developing, writing and editing a sustained major piece of creative work, within the genre of their choice, including short fiction, poetry and non-fiction, under supervision.
Courses: KK34, KW25
Incompatible with: KW396
Contact hours: 6 per week Campus: KG
Credit points: 36 Semester: 2

KWP400 Creative Writing: Novel and Genre
This unit examines the major theories underlying and informs the practice of writing sustained creative texts, including narrative prose, creative nonfiction and genre writing. Such theory and knowledge enhances critical awareness and writing strategies relevant to the production and future publication of a novel-length text.
Courses: KK51, KK52, KK53, KK55, KW35, KW36
Incompatible with: KWP103
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

KWP401 Media Writing
This unit introduces students to the formats, terminology and protocols used in the preparation of proposal documents and short scripts. It will explore fundamental concepts including narrative structures, metaphors, point of view, plotting, character and voice. Students will examine a range of professional scripts and development concepts and be asked to apply their knowledge of typical script problems and solutions to their own work.
Courses: KP35, KP36, KW35
Incompatible with: KWP111
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2

KWP402 Persuasive Writing
This unit teaches the use of persuasive writing in the workplace. The unit analyses a variety of writing genres to reveal how they persuade their audiences. The analysis is founded on critical discourse and semiotic theory. Students apply these learned techniques and theories to produce a portfolio of persuasive writing. It covers a range of genres such as public health campaigns, proposals, speechwriting and political persuasion.
Courses: KW35
Incompatible with: KWP315
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

KWP403 Creative Writing: The Short Story
The unit covers the writing of the short story in detail.
Courses: KW35, KW36
Incompatible with: KWP350
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1, 2

KWP404 Editing and Developing the Manuscript
This unit examines processes of editing and manuscript development from the viewpoint of both editor and writer. Students participate in the managed development of a manuscript or a range of manuscripts. Classes are taken in intimate seminar mode.
Courses: KW36, KW37
Incompatible with: KWP104
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

KWP405 Corporate Writing and Editing
This unit deals with both the fundamentals of language (grammar, punctuation, style) and the dominant corporate writing genres (manuals, report, speeches, brochures).
Courses: KW35, KW36, KW37
Incompatible with: KWP314
Contact hours: 3.5 per week Campus: KG
Credit points: 12 Semester: 2

KWP406 Creative Writing: The Novel
This unit focuses on the development of a novel proposal, based on a solid understanding of the skills, industry expectations and writing skills that undertaking such a task requires.
Courses: KW35, KW36
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

LPP111 Lawyers’ Skills
The Law Admissions Consultative Committee considers that ‘an entry level lawyer should be able to demonstrate oral communication skills, advocacy skills, negotiation and dispute resolution skills, and letter writing and legal drafting skills’. These skills are introduced in this unit. The intention is that students then seek to develop those skills during the rest of the course and in the workplace.
Courses: LP41
Prerequisites: LLB
Contact hours: 4 days per semester Campus: GP
Credit points: 12 Semester: 2, 3

LPP112 Work Skills
The Law Admissions Consultative Committee considers that ‘an entry level lawyer should be able to conduct workload, work habits and work practices in a way that ensures clients’ matters are dealt with in a timely and cost-effective manner’. This unit provides students with the basis of those skills and the basics of practical legal problem-solving skills. The intention is that students then seek to develop those skills during the rest of the course and in the workplace.
Courses: LP41
Prerequisites: LLB
Contact hours: 4 days per semester Campus: GP
Credit points: 12 Semester: 1, 2

LPP113 Civil Litigation
The Law Admissions Consultative Committee considers that ‘an entry level lawyer should be able to conduct civil litigation in first instance matters in courts of general jurisdiction, in a timely and cost-effective manner’. This unit provides students with the basis of that ability in the context of civil litigation in a state court.
Courses: LP41
Prerequisites: LLB
Contact hours: 6 per week plus online Campus: GP, Ext
Credit points: 12 Semester: 1, 2

LPP114 Commercial
The Law Admissions Consultative Committee considers that ‘an entry level lawyer should be able to conduct commercial transactions such as the sale and purchase of a small business, set up standard business structures, provide basic advice on finance and securities, and appreciate the type of advice needed to assess the revenue implications of standard commercial transactions’. This unit provides students with experience in specific commercial transactions of the types described above.
Courses: LP41
Prerequisites: LLB
Contact hours: 6 per week plus online Campus: GP, Ext
Credit points: 12 Semester: 1, 2
UNIT SYNOPSES

► LPP115 Property
The Law Admissions Consultative Committee considers that 'an entry level lawyer should be able to convey, lease and mortgage real property, and provide general advice on land use.' This unit equips students to do that in selected contexts.
Courses: LP41
Prerequisites: LLB
Contact hours: 6 per week plus online
Campus: GP, Ext
Credit points: 12 Semester: 1, 2

► LPP116 Electives
The Law Admissions Consultative Committee considers that entry level lawyers should have experience in two areas of practice, administrative law practice, criminal law or family practice AND one of either wills and estates, planning and environment, employment and industrial relations, or consumer law practice. This unit provides students with experience in their choice of one area from each list.
Courses: LP41
Prerequisites: LLB
Contact hours: 6 per week plus online
Campus: GP, Ext
Credit points: 12 Semester: 1, 2

► LPP117 Interaction
This unit is designed for law graduates who are completing the Graduate Diploma in Legal Practice for the purpose of becoming admitted as a legal practitioner and who are not working in law offices while they are doing the course. The unit seeks to further develop students’ communication, advocacy, interviewing and work management skills where they do not have the opportunity to develop those skills in a real life law office.
Courses: LP41
Prerequisites: LLB
Contact hours: 6 per week, online plus 2 days
Campus: GP, Ext
Credit points: 12 Semester: 1, 2

► LPP118 Placement
The Law Admissions Consultative Committee considers that every entry level lawyer should have experience in a law office before being admitted. This unit provides four weeks experience in a law office to satisfy legal practitioner admission requirements.
Courses: LP41
Prerequisites: LLB
Contact hours: 40 per week
Campus: Ext
Credit points: 12 Semester: 1, 2, 3

► LSB111 Understanding Disease
Concepts
This unit includes the following: introduction to structure and function of the body; review of body systems; mechanisms of disease. It covers systems and topics: integumentary, skeletal, muscular, nervous, endocrine, blood, heart and circulation, lymphatic, immune, respiratory, digestive (including nutrition and metabolism), urinary, reproductive, concepts of growth and development, genetics. It presents examples of diseases: heart disease, cancers (lung, breast, skin, prostrate), obesity, osteoporosis, hypertension, depression and schizophrenia, asthma and chronic obstructive lung diseases.
Courses: IF47, NS40, PU40
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 1

► LSB118 Life Science
A study of life processes in all five groups of living organisms (bacteria, protists, fungi, plants and animals). Traditional topics in biology are integrated with recent research advances in molecular and cellular biology to provide a comprehensive foundation for later units in the medical, biotechnological and ecological sciences. The unit begins by constructing cells from the four quantitatively important groups of biological molecules (proteins, lipids, carbohydrates and nucleic acids). Molecular and evolutionary aspects of genetics are then introduced, with the great diversity of reproductive strategies found among organisms being emphasised. Finally, bioenergetics (photosynthesis and respiration) and its relevance to environmental issues is outlined.
Courses: ED50, IF46, LS37, LS50, PU43, SC01, SC40, SC45
Contact hours: 4 per week
Campus: GP, CA
Credit points: 12 Semester: 1, 2

► LSB119 Life Science for Optometrists
This unit provides an introduction to the study of life processes in all five groups of living organisms (bacteria, protists, fungi, plants and animals). The unit begins by constructing cells from the four quantitatively important groups of biological molecules (proteins, lipids, carbohydrates and nucleic acids). Cell function is then described, using neurons (including eye rod and cone cells) and muscles as examples. Molecular and evolutionary aspects of genetics are then introduced, with the great diversity of reproductive strategies found among organisms being emphasised. Finally, bioenergetics (photosynthesis and respiration), and its contemporary relevance to environmental and sociopolitical issues are outlined.
Courses: OP42
Incompatible with: LSB118
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 1

► LSB123 Anatomy
This unit uses the general physiological principles such as homeostasis and how all systems in the body contribute to it. Topics include cells, transport processes, cardiovascular system, cardiac electrical activity, cardiac output, regulation of blood pressure, respiratory system, endocrine system, pulmonary ventilation and its function.
Courses: HL40, HM44, HM45, IF62, IX04
Incompatible with: LSB250, LSB451
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 1, 2

► LSB235 Advanced Anatomy
This unit provides an introduction to the cellular level to essential physiological and metabolic requirements fundamental to life processes. It concentrates on basic cell biology concepts building from the simple levels of cell components and organelles to more complex concepts of organisation and expression of the genome, the cytoskeleton and extracellular matrix structures, information transduction, cell-cell interactions and cell specialisation.
Courses: ED50, LS37, LS50, SC01, SC40, SC45
Prerequisites: LSB118, LSB119
Corequisites: Students must be enrolled in or have completed LSB118
Contact hours: 4 per week
Campus: GP, CA
Credit points: 12 Semester: 2

QUT HANDBOOK 2006 • PAGE 712
UNIT SYNOPSES

► LSB245 Anatomy 2 and Introductory Pathology

This unit of human anatomy is part of the extension of LSB145 and includes a study of the cardiovascular system, lymphatic system, respiratory system, digestive system, urinary system, nervous system, endocrine system, reproductive system, eye and ear. It also includes a study of the application of scientific methods to the study of the general principles of disease processes and the major diseases of organ systems.

Courses: PH38
Prerequisites: LSB145
Corequisites: PCB276 (MIT), PCB287 (RT)
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2

► LSB250 Human Physiology

This continues and expands on the topics introduced in LSB238 and Cell and Molecular Biology 1. This unit integrates gene structure and the architecture and organisation of eukaryote chromosomes with the basic cellular processes associated with gene expression, mutation, DNA repair, replication and recombination from a molecular genetic perspective. The molecular mechanisms that underlie cell communication, cell cycle control, cell proliferation and cell death, and the integration of these processes in functional tissues are also explored.

Courses: LS37, LS50, SC01, SC40
Prerequisites: LSB238
Corequisites: LSB308 (SC01), LSB325 (LS37)
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► LSB345 Regional & Imaging Anatomy 1

This unit focuses on the regional anatomy of the head, neck, upper limb, lower limb and the anatomy of the structures of the above regions which are visualised by medical imaging modalities.

Courses: PH38, PH90
Prerequisites: LSB145, LSB245
Corequisites: LSB308 (SC01), LSB325
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► LSB358 Physiology 1

This is an introductory core unit in microbiology dealing with aspects of microbial diversity, ecology, classification and taxonomy, structure and function, nutrition and metabolism, growth and reproduction, genetics, control and host-microbe interactions.

Courses: LS37, LS50, SC01, SC40, SC45
Prerequisites: LSB118, PCB242
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► LSB338 Cell and Molecular Biology 2

This unit is to provide a thorough examination of the functional organisation of the human body. The subject provides a useful frame of reference for students enrolled in courses such as biology, biochemistry, microbiology, molecular biology, nutrition and human movements. The subject is offered in conjunction with LSB450 which runs in second semester and as a prelude to the third level subjects Advanced Physiology [LSB556] and Clinical Physiology [LSB658].

Courses: SC01, SC40, SC45, PU40, PU43, HM42, ED50
Prerequisites: LSB131 or LSB142 or LSB255 or LSB258 or NPB270
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 1

► LSB365 Pathology

Pathology introduces students to the study of the disease processes underlying the major diseases of human organ systems. General disease processes of the major specific diseases of the organ systems are introduced, and then become the focus in systematic pathology. An understanding of general and systemic pathology is fundamental to the application of basic biomedical knowledge to clinically relevant states and the major diseases. This unit provides students with the foundation knowledge needed for subsequent clinical semesters. On completion of this unit, students should know, understand and be able to apply facts, concepts and
terms related to disease processes and the major diseases occurring in the organ systems.

Courses: LSB37
Prerequisites: LSB250, LSB255
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 1
► LSB367 Pathology
This unit is an external unit designed to run online to meet the requirements of the students in the course who are located throughout Queensland. Pathology has a central role in most health related courses. A sound understanding of pathology is essential for the informed assessment and management of emergency patients. The unit has two main sections. The first section deals with general pathology principles (e.g. homeostasis, adaptation and defence, principles of diagnosis, environment and pathology, neoplasia, circulatory disorders). The second section involves application of the general principles of pathology to major diseases and dysfunctions of each of the organ systems of the body.

Courses: PU40
Incompatible with: LSB321, LSB361, LSB475
Campus: GP
Credit points: 12 Semester: 1
► LSB332 Bioscience 3
Topics covered in this third Bioscience unit include: the physiology, pathophysiology and diseases (including infectious diseases) of the nervous, reproductive, gastrointestinal and renal system; diabetes; diseases of joints; obesity and its effects on the body; physiological demands of exercise.

Courses: NS40, NS48
Prerequisites: LSB180
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 1
► LSB397 Plant Physiology
This unit provides a comprehensive overview of how plants grow and respond to the environment, based on mechanisms involving cellular and molecular events. Topics more or less follow the life history of the plant, and include: seed germination and the mobilisation of seed reserves; water and mineraluptake; photosynthesis; responses to stresses (including water deficit, excess light, abiotic stresses and pathogens); synthesis of unique chemicals; development of flowers and fruits. This is a foundation unit for continuation into plant biotechnology and ecology areas.

Courses: ED50, LS50, SC01
Prerequisites: NRB270
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1
► LSB408 Metabolism
This unit addresses the following: the basic biochemical pathways of metabolism for the major nutrient groups in mammals (including carbohydrates, lipids, amino acids and nucleotides); electron transport and oxidative phosphorylation; photosynthesis; metabolic control mechanisms in relation to nutrient status in normal and pathologic situations; and the integration of metabolism for specialised tissue functions.

Courses: PU40, PU43, SC01
Prerequisites: LSB308
Incompatible with: LSB275, LSB325
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2
► LSB409 Readings in Biotechnology
Knowledge of the practical aspects of developing a product is an important research and development skill. This unit focuses on the practical problems involved in the development of a biotechnological product. Topics include: plant biotechnology and the development of organisms for the production of phytochemicals and pharmaceuticals; process development and bioprocess engineering; process control; regulatory and intellectual property issues; environmental and ethical issues of biotechnology; and the commercialisation of biotechnology.

Courses: LSB414, LSB424, LSB458
Prerequisites: LSB250, LSB328
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2
► LSB425 Quantitative Medical Science
This unit integrates physics, chemistry, biochemistry, maths and statistics for applications to chemical analysis, as preparation to clinical biochemistry.

Courses: LSB37, SC40
Prerequisites: LSB325, LSB338, MAB141
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2
► LSB428 Microbiology 2
This unit provides an extension of the core unit in microbiology dealing with further aspects of microbial diversity, ecology, classification and taxonomy with emphasis on human pathogens, action of and resistance to antimicrobial chemicals, microbial mechanisms of pathogenicity, microbial molecular biology and gene expression, microbial genomics, industrial microbiology/biocatalysts, food borne pathogens and spoilers, examples of the industrial importance of microbes, and safe manipulation of pathogenic microbes.

Courses: SC01
Prerequisites: LSB328
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2
► LSB435 Diagnostic Microbiology 1
This unit builds on foundation topics in Microbiology 1 and starts preparing the student for a career in a routine diagnostic microbiology laboratory. The overall theme is the diagnosis of human infectious diseases with bacteriology and parasitology the two key focus areas. This unit emphasises a strong commitment to professional practice by developing high level generic and specific skills. Specific lecture and lab class discussion points include (where relevant): life cycles; pathogen acquisition; infectious disease diagnosis pathways; classification systems; clinical presentations; diagnostic protocols and patient management. Students are encouraged to think critically and to discuss issues in an interactive and supportive learning environment.

Courses: LS37
Prerequisites: LSB300
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2
► LSB438 Immunology 1
The mechanisms of the immune process including the nature of antigens, antibodies, antigen-antibody reactions, antibody formation, control of the humoral and cell mediated immune responses, and immunisation of humans against infections are addressed in this unit.

Courses: LSB37, SC01
Prerequisites: LSB250, LSB328
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2
► LSB445 Regional and Imaging Anatomy 2
This unit focuses on the regional anatomy of the back, thorax, abdomen and pelvic regions and the anatomy of the structures of the above regions which are visualised by medical imaging modalities.

Courses: PH38, PH90
Prerequisites: LSB145, LSB245
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2
► LSB449 Human Cell Biology
Human Cell Biology is a continuation and expansion of the topics introduced in LSB338 Cell and Molecular Biology 2. Human Cell Biology integrates the fundamental molecular events and interactions presented in earlier units, developing and extending the context of cells in their environment and how they interact and integrate within the organism to provide all of the biological functions required by the organism to survive. Students develop an appreciation of the relationship between structure and function at the cellular level and gain an understanding of the defects that underlie common disease states including osteoporosis, diabetes, arthritis and cardiovascular disease.

Courses: LS50, SC01, SC40
Prerequisites: LSB338
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2
► LSB451 Human Physiology
This unit involves a course of lectures and practicals, similar to LSB250.

Courses: PU40
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 1
► LSB458 Physiology 2
The aim of this unit is to provide a thorough examination of the functional organisation of the human body. The subject provides a useful frame of reference for students enrolled in courses such as biology, biochemistry, microbiology, molecular biology, nutrition and human movements. The subject is offered in conjunction with LSB358 which runs in first semester and as a prelude to the third year subjects LSB558 and LSB658.

Courses: ED50, HM42, PU40, PU43, SC01, SC40, SC45
Prerequisites: LSB131 or LSB142 or LSB255 or LSB258 or NRB270
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2
► LSB465 Histopathology 1
Histopathology and cytology are essential components of pathological diagnosis and major clinical disciplines in Medical Laboratory Science. The unit aims to impart a working knowledge of basic techniques used in clinical histopathology and research histology laboratories and the techniques involved in the current practice of diagnostic cytology.

Courses: LS37
UNIT SYNOPSIS

Prerequisites: LSB255, LSB365, PCB242

Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 2

► LSB467 Pathophysiology

This unit is an online unit designed to run online to meet the requirements of students located throughout Queensland. Students are guided into the study of pathophysiology of the major body systems, leading to an understanding of the rationale for diagnostic investigations and treatments of these disorders. The unit is based on case histories and utilises a 'problem based model' approach. Topics covered include the physiological basis of pathogenesis, clinical features and treatment of major disorders of body systems, focusing on the cardiovascular, respiratory, blood, renal, nervous, gastro-intestinal, and endocrine systems. A variety of assessments are used during the Semester to reinforce the understanding of the topics.

Courses: PU40
Incompatible with: LSB658  Campus: GP  Credit points: 12  Semester: 2

► LSB468 Molecular Biology

This unit introduces techniques for the isolation, purification and genetic engineering of nucleic acids. It includes procedures for gene detection and analysis, gene isolation, cloning and amplification, and gene library construction and screening.

Courses: LS50, SC01
Prerequisites: LSB238
Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 1, 2

► LSB475 Disease Processes 4

This unit includes the principles of the study of disease dealing with the causes and nature of circulation disorders, degenerative processes, metabolic and nutritional disorders, disturbances of development and growth, inflammation, infections and infestations, regeneration and repair, and neoplasia. The unit includes the applications of general pathology to the study of diseases of the major systems, leading to an understanding of disease processes relevant to the smaller general systems and cell basis of pathophysiology.

Courses: PU43
Incompatible with: LSB321, LSB361, LSB367
Contact hours: 4 per week  Campus: GP, KG  Credit points: 12  Semester: 2

► LSB480 Professional Practice

Introduces students to the pathology laboratory workplace. The student undertakes a four week work experience program in a city or country pathology laboratory during the summer vacation between semesters 4 and 5 of the full-time course and between semesters 8 and 12 of the part-time course.

Courses: LS37
Prerequisites: LSB365
Corequisites: LSB425, LSB435, LSB438, LSB465
Campus: GP  Semester: 2

► LSB492 Microbiology

This is an introductory core unit of microbiology for students of optometry and podiatry with an introduction to micro-organisms, control of microbial populations and clinical conditions relevant to optometry and podiatry.

Courses: OP42
Contact hours: 4 per week  Campus: GP  Credit points: 12  Semester: 2

► LSB497 Plant Molecular Biology

This is an intermediate level unit that complements and extends knowledge and skills obtained in the core biotechnology units to provide a basis for those intending to undertake more advanced plant biotechnology units. This unit integrates the fundamentals of plant molecular biology, plant biochemistry and plant cell culture to teach the molecular basis of plant development. Topics covered will include: basic plant molecular biology; the genetic basis of control of plant development; cell signalling in plants; model systems for studying gene function; plant genome maps; manipulation of plants in vitro; plant responses to biotic and abiotic stress.

Courses: LS50, SC01
Prerequisites: LSB398
Corequisites: LSB468
Contact hours: 4 per week  Campus: GP  Credit points: 12  Semester: 2

► LSB508 Advanced Metabolism

Detailed information is provided in this unit on the catabolic and anabolic pathways for the major molecules in mammalian systems. Important aspects of non-mammalian metabolism are described. Advanced concepts in bioenergetics and thermodynamics are described in the context of cellular metabolism. Integration and regulation including production of mixed conjugates of biological significance such as amino-sugars and lipopolysaccharides, and hormonal regulation of metabolism is included.

Courses: SC01
Prerequisites: LSB408
Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB509 Medical Biotechnology 1

Students undertaking Medical Biotechnology should have a thorough understanding of diagnostics and therapeutics in the commercial environment of biotechnology. LSB509 Medical Biotechnology aims to increase students' understanding of molecular and cellular-based diagnostics and their use in genetic or biochemical mapping and identification of target genes, disease risks and traits, infectious diseases, identity tests and other forms of investigatory analyses.

Courses: LS50, SC01
Prerequisites: LSB468
Contact hours: 4 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB525 Clinical Biochemistry 1

This course of study (along with LSB625 Clinical Biochemistry 2) provides the graduating scientists with sufficient biochemical knowledge and laboratory experience to work effectively in both the smaller general-purpose laboratory performing a limited number of biochemical tests and the larger specialised laboratory performing in-depth studies of all aspects of clinical biochemistry.

Courses: LS37
Prerequisites: LSB425
Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB527 Biomedical Research Technologies

This unit complements the study of nucleic acid based research and diagnostic technologies studied in LSB598, by providing an understanding of the methodology and application of those protein based technologies that are important in biomedical research and diagnostic investigations.

Courses: SC01
Prerequisites: LSB308
Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB528 Environmental Microbiology

This unit is designed to provide students with an understanding of how the microbial world interacts with the environment. Topics covered include: microbial ecosystems; symbiotic relationships (plants and microbes, animals and microbes); an introduction to biogeochemical cycles including microbial transformations (carbon cycles, methanogenesis, nitrogen cycle, sulphur cycles); plant and soil microbiology; water microbiology; bioaerosols; bioremediation of polluted environments.

Courses: SC01
Prerequisites: LSB328
Contact hours: 4 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB535 Microbial Immunology

This unit builds on LSB509 Medical Biotechnology in Immunology 1 to introduce students to the life cycles of a variety of pathogens, particularly viruses, and the mechanisms employed by a host to avoid infection.

Courses: LS37, SC01
Prerequisites: LSB468
Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB537 Genetic Engineering

Genetic Engineering aims to impart an understanding of the manipulative skills involved in experiments aimed at recombining DNA molecules and an understanding of the analytical skills required in characterising target DNA molecules using the global online genetic databases. Genetic Engineering and its prerequisite LSB468 together encompass the theoretical background and manual skills required by graduates to perform basic nucleic acid manipulations and to undertake investigative analysis using online and local facilities in clinical and research laboratories.

Courses: LS50, LS70, LS80, SC01
Prerequisites: LSB468
Contact hours: 5 per week  Campus: GP  Credit points: 12  Semester: 1

► LSB547 Bacterial Pathogenesis and Disease Diagnosis

This advanced level unit provides a comprehensive examination of those bacterial pathogens that are associated with human disease from both a cellular and a molecular perspective, an essential starting point for a better understanding of infectious disease pathogenesis. The key role of the clinical bacteriologist and clinical laboratory professionals is also presented and critically discussed with respect to bacterial pathogen laboratory diagnosis (ie specimen management, pathogen isolation and identification) and antimicrobial therapies. Students are encouraged to think critically and to discuss issues in an interactive and supportive teaching and learning environment.

Courses: SC01
Prerequisites: LSB328
Contact hours: 6 per week  Campus: GP
This unit introduces the discipline of haematology and the routine procedures performed in the haematology section of a pathology department, and introduces the concepts of anaemia and its investigation. This unit provides a detailed understanding of the common erythrocyte disorders. Diagnostic procedures, aetiology, pathophysiology, clinical manifestations and treatment of each disorder are included.

**Courses:** LSB325, LSB335, LSB465
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### LSB558 Advanced Physiology

This unit is divided into two areas: a lecture course on recent advances in physiological knowledge and a practical component that introduces experimental design. Using an emphasis on current research developments, selected physiological areas including the cardiovascular and neurological systems are considered in depth to extend prior knowledge of physiology. The practical course introduces aspects essential for the correct design of scientific experiments.

**Courses:** SC01
**Prerequisites:** LSB358, LSB458
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### LSB565 Histopathology 2

Histopathology is an essential component of pathology and one of the major clinical disciplines in the Medical Laboratory Science. Students are introduced to advanced techniques and methods of handling histopathological specimens. Students acquire sufficient scientific and technical expertise to enable them to carry out and understand a range of practical procedures used routinely in clinical histopathology and histology research laboratories.

**Courses:** LS37
**Prerequisites:** LSB255, LSB365, LSB465
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### LSB566 Electron Microscopy

This unit provides the following: a theoretical and practical background to the operation and use of scanning and transmission electron microscopes in biological science; basic principles of specimen preparation with emphasis on methods complementary to biology, microbiology and molecular biology; analytical capabilities of electron beam instruments; other advanced imaging instrumentation.

**Courses:** SC01
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2

### LSB577 Plant Biotechnology 1

The potential of plant biotechnology can be recognised as a result of the significant advances being made in technologies enabling the genetic manipulation of plants. Familiarity with the strategies, techniques and breadth of applications is essential as a basis for anyone planning a career in plant biotechnology. This unit, students are presented with an integrated picture of the current technology and applications used for the genetic manipulation of plants (including advanced cell and tissue culture and transformation technologies). The unit is designed with a significant emphasis on achieving technical expertise and to provide a basis for the more advanced applications presented in Plant Biotechnology II.

**Courses:** LS50, LS70, SC01
**Prerequisites:** LSB468
**Corequisites:** LSB537
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 1

### LSB578 Virology

Lectures and practical classes are designed to introduce students to the basic concepts of virology. A range of viruses and virus diseases are examined and topics include viral morphology and composition, taxonomy and classification, replication, purification, diagnosis and assay, transmission and control.

**Courses:** SC01
**Prerequisites:** LSB328, LSB468
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### LSB605 Protein Engineering and Biotechnology

The ultimate goal of most biotechnology processes is the production of a viable organism or functional protein. This unit deals with the factors that determine success in achieving these goals. It builds on information delivered in Molecular Biology, Genetic Engineering and Genomics, defining the special considerations that apply to different expression systems and the unique difficulties of scale-up procedures for commercial development.

**Courses:** LS50, SC01
**Prerequisites:** LSB468
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2

### LSB607 Protein Purification

This is an advanced biochemistry unit to prepare students for research careers. A series of critical thinking workshops and closely supervised group practical projects create a problem-based learning environment which is used to refine and evaluate generic capabilities of critical thinking, project management, information literacy and communication.

**Courses:** LS70, SC01
**Prerequisites:** LSB308
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### LSB608 Protein Science

This unit includes lectures, tutorials and practicals dealing with properties and analysis of proteins. Students gain knowledge and experience of the forces that determine protein structure, and an understanding of the techniques for analysing and altering protein properties. Discussions include methods of sequence analysis, algorithms for structure prediction, design and construction of synthetic proteins, and evolution and significance of structural motifs.

**Courses:** SC01
**Prerequisites:** LSB308
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### LSB609 Medical Biotechnology

In this unit students gain a thorough understanding of diagnostics and therapeutics in the commercial environment of medical biotechnology. LSB609 aims to increase the student's understanding of cell-based strategies, approaches and applications used as therapeutic interventions in medicine. The unit focuses on current, state-of-the-art and emerging technologies and applications within biotechnology as directed to novel therapeutic discovery, design, development and delivery of clinical therapeutics including tissue transplantation and regeneration, cellular therapies, genetic therapies, immunotherapies, clinical, ethical and regulatory affairs.

**Courses:** LS50, SC01
**Prerequisites:** LSB449
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### LSB619 Genomics and Bioinformatics

The completion of the Human Genome project along with similar projects on other eukaryote organisms, marks the beginning of a major revolution in fundamental biology that will, ultimately, reach into all corners of human life. Students undertaking any careers associated with the biotechnology, whether it be scientific investigation or related to the business or legal aspects of biotechnology require an understanding of eukaryote genome structure and function, and approaches to analysis of genome structure.

**Courses:** LS50, LS70, LS80, SC01
**Prerequisites:** LSB537
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### LSB625 Clinical Biochemistry 2

This course of study (along with LSB525) provides the graduating students with sufficient biochemical knowledge and laboratory experience to work effectively in both the smaller general-purpose laboratory performing a limited number of biochemical tests and the larger specialised laboratory performing in-depth studies of all aspects of clinical biochemistry.

**Courses:** LS37
**Prerequisites:** LSB525
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### LSB628 Food Microbiology

This unit covers the most significant areas of food microbiology at an advanced level. Topics include: microbial ecology of foods; microbial spoilage and food preservation; foodborne microorganisms of public health significance; food fermentations; laboratory and food processing operations and certification; predictive microbiology; agriterrorism; and isolation, quantification and identification of microbes from foods. A professional work attitude in a microbiology laboratory, practical, applied laboratory skills and an awareness of the hazards of working with pathogenic cultures are emphasised.

**Courses:** SC01
**Prerequisites:** LSB328
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2

### LSB633 Diagnostic Microbiology 2

This advanced level unit completes the preparation of the student for a career in a routine diagnostic microbiology laboratory by building upon foundation topics covered in LSB435. The overall theme is human infectious disease diagnosis with bacteriology.
mycology and parasitology the three key focus areas. This unit continues a strong commitment to professional practice by developing high level generic and specific skills. Specific discussion points include (where relevant): life cycles, pathogen acquisition, infectious disease diagnosis pathways, classification systems, clinical presentations, diagnostic protocols and patient management. Students are encouraged to think critically and to discuss issues in an interactive and supportive learning environment.

Courses: LS37
Prerequisites: LSB435, LSB535
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2

► LSB647 Clinical Mycology and Parasitology
This is a third year unit in microbiology considering aspects of fungal taxonomy, classification of clinical mycoses, collection of material for fungal isolation and identification of superficial, subcutaneous, systemic and opportunistic mycoses. Parasitology includes a systematic study of identification, life history, incidence, modes of infection, epidemiology and control of parasitic infections in humans.

Courses: SC01
Prerequisites: LSB328
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► LSB648 Molecular Microbiology
This advanced level unit engages closely with the most recent advances in microbial genomics, bioinformatics, molecular biology, evolutionary history, genetic analysis and pathogenic processes. It is designed for students who are interested in research in these areas or who wish to be involved in the introduction of new technologies into the practice of analytical microbiology.

Courses: SC01
Prerequisites: LSB328, LSB468
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► LSB655 Haematology 2
The aim of the unit is to provide students with a detailed understanding of the common leucocyte and haemostatic disorders. This unit provides a detailed insight into the common leucocyte and coagulation disorders investigated by the haematology laboratory and reinforces knowledge acquired in the previous haematology units. The focus shifts from red cells in LSB555 to white cells here. Diagnostic procedures, aetiology, pathophysiology, clinical manifestations and treatment of each disorder are included in the discussion of the disorders. This unit, along with a previous unit LSB555, prepares students for work in a haematology laboratory as a diagnostic scientist.

Courses: LS37
Prerequisites: LSB555
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2

► LSB657 Perspectives in Life Science
Positive and negative aspects of humanity’s use of resources are critically analysed in this unit. Topics include: humanity’s food supply; humanity’s profligate consumption of energy; global climate change; losses of soils and ecosystems and species; and contemporary aspects of biotechnology such as the GM food debate; ethical aspects of medical and corporate biotechnology.

Courses: LSB409 Readings in Life Science
Prerequisites: LSB118
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► LSB658 Clinical Physiology
In this unit students explore the physiological basis, pathogenesis, clinical features and treatment rationale of the major disorders of the cardiovascular, respiratory, haematological, renal, gastrointestinal, nervous and endocrine systems. One of the objectives of the unit is to help students critically think and apply this to the discussion of pathophysiological cases.

Courses: SC01
Prerequisites: LSB338, LSB458
Incompatible with: LSB467
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2

► LSB665 Immunohaematology
This course designed to provide students with an understanding of the antigens, immune mechanisms and clinical factors involved in blood transfusion and tissue transplantation.

Courses: LS37
Prerequisites: LSB438, LSB535, LSB555
Contact hours: 5 per week Campus: GP
Credit points: 12 Semester: 2

► LSB677 Plant Biotechnology 2
This unit expands on topics introduced in earlier units and addresses the more advanced and more specialised areas of plant molecular biology and biotechnology. The unit is designed to give students an insight into the scope and future potential of plant biotechnology and include topics such as: advanced applications of transgenic plants; functional genomics and gene discovery; specific genes and gene families; molecular markers and mapping; gene silencing.

Courses: LS50, LS70, SC01
Prerequisites: LSB537
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► LSB684 Forensic DNA Profiling
The unit covers the evolution of DNA typing from restriction fragment length polymorphism (RFLP) DNA “fingerprinting” to short tandem repeat (STR) analysis using multiplex PCR-based systems for human identification, the principles of single nucleotide polymorphism (SNP) technology, mitochondrial DNA analysis and future trends for forensic DNA analysis.

Courses: SC01
Prerequisites: LSB468, SCB384
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► LSB709-2 Biotechnology Research Project
Knowledge of the practical aspects of developing a project for research and development is a fundamental aspect of real-world biotechnology. This unit involves a small team research project based on the R and D proposal developed in LSB409 Readings in Biotechnology. The unit guides student teams through the research process from the experimentation to the writing of an assessment of the project under the guidance of academic and industry mentors.

Courses: LS50
Campus: GP
Credit points: 12 Semester: 1, 2, 3

► LSB709-1 Biotechnology Research Project
Knowledge of the practical aspects of developing a project for research and development is a fundamental aspect of real-world biotechnology. This unit involves a small team research project based on the R and D proposal developed in LSB409 Readings in Biotechnology. The unit guides student teams through the research process from the experimentation to the writing of an assessment of the project under the guidance of academic and industry mentors.

Courses: LSB50
Campus: GP
Credit points: 12 Semester: 1, 2, 3

► LSB850-1 Research Strategies
Preparation for a career in research must include additional training and experience in cross-disciplinary and extra-disciplinary skills and strategies that build upon and enhance the student’s undergraduate foundation. Key aims of this unit are to foster the intellectual skills necessary to appreciate the scientific, commercial, social and ethical implications of research, to assist in evaluating useful and pragmatic options in a research career, and to help the student communicate research ideas and outcomes effectively and articulately. Seminars and workshops conducted by staff internal and external to the School of Life Sciences specifically address these aims.

Courses: SC60
Campus: GP
Credit points: 6 Semester: 1, 2

► LSB850-2 Research Strategies
Preparation for a career in research must include additional training and experience in cross-disciplinary and extra-disciplinary skills and strategies that build upon and enhance the student’s undergraduate foundation. Key aims of this unit are to foster the intellectual skills necessary to appreciate the scientific, commercial, social and ethical implications of research, to assist in evaluating useful and pragmatic options in a research career, and to help the student communicate research ideas and outcomes effectively and articulately. Seminars and workshops conducted by staff internal and external to the School of Life Sciences specifically address these aims.

Courses: SC60
Campus: GP
Credit points: 6 Semester: 1, 2

► LSB851-2 Readings in Life Science
This unit involves the preparation of a literature review of direct and associated relevance to the Honours research project under the guidance of the supervisor(s). It includes the presentation of a paper critique demon-
strating a considerable knowledge, understanding and appreciation of the literature as well as a critical appraisal of future research requirements.

Courses: SC60
Corequisites: LSB850-1, LSB850-2
Campus: GP
Credit points: 12
Semester: 1, 2

► LSB851-1 Readings in Life Science 1
This unit includes the preparation of a literature review of direct and associated relevance to the Honours research project under the guidance of the supervisor(s). This unit includes the presentation of a grant proposal demonstrating a considerable knowledge, understanding and appreciation of the literature as well as a critical appraisal of future research requirements.

Courses: SC60
Corequisites: LSB850-1, LSB850-2
Campus: GP
Credit points: 12
Semester: 1, 2

► LSB852-1 Project
This unit includes the preparation of a paper reporting the methods and results of investigations in the Honours research projects. The paper also includes an introduction, analysis and discussion of the project in a style and length deemed to be appropriate by the Unit Coordinator. Students should relate this project work to published work already undertaken in the field.

Courses: SC60
Corequisites: LSB850-1, LSB850-2
Campus: GP
Credit points: 30
Semester: 1, 2

► LSB852-2 Project
This unit includes the preparation of a paper reporting the methods and results of investigations in the Honours research projects. The paper also includes an introduction, analysis and discussion of the project in a style and length deemed to be appropriate by the Unit Coordinator. Students should relate this project work to published work already undertaken in the field.

Courses: SC60
Corequisites: LSB850-1, LSB850-2
Campus: GP
Credit points: 30
Semester: 1, 2

► LSN009 Readings in Life Science 4
This unit includes a review of literature related to a potential research topic determined in consultation with the supervisor. The area can be associated with the research project topic and can be broadly or narrowly focused but should not include any significant material covered in LSN013. The review should cover the background to the area as well as recent advances and identify deficiencies and possible future research directions. The review should be a critical analysis of the area. Reviews should normally be approximately 5,000-10,000 words.

Courses: SC80
Contact hours: 1 per week
Campus: GP
Credit points: 12
Semester: 1

► LSN011 Research Seminars in Life Science 1
This unit includes a formal seminar to include an oral presentation (25 minutes) and question period (5-10 minutes). The presentation provides a comprehensive and informative critique of a specific topic and outlines the planned research program, where applicable. Prescriptive guidelines and submission deadlines must be followed in this regard. The chosen topic will be in an area selected by the student in consultation with their supervisor(s) and the postgraduate coursework coordinator. This unit complements LSN013 Readings in Life Science 3.

Courses: IF49, SC80
Campus: GP
Credit points: 6
Semester: 1, 2

► LSN013 Readings in Life Science 3
This unit includes a comprehensive and critical review of the background and current literature directly related to a potential research topic. The review should identify major and minor deficiencies in the research literature and identify possible directions for future research. The review should be between 5,000 - 10,000 words and at least one draft should be presented to the supervisor prior to final submission.

Courses: IF49, SC80
Corequisites: LSN023
Campus: GP
Credit points: 24
Semester: 1, 2

► LSN023 Research Seminars in Life Science 2
This unit includes a formal seminar to include an oral presentation (45-50 minutes) and question period (5-10 minutes) presenting a critical and in-depth analysis of the results of the postgraduate research program as well as assessed future research directions in the area. Prescriptive guidelines and submission deadlines must be followed in this regard.

Courses: IF49, SC80
Campus: GP
Credit points: 12
Semester: 1, 2

► LSN101 Molecular Biosciences
This unit explores the relationships between cellular components and provides a high level of understanding of cell and molecular biology suitable for students wishing to undertake further postgraduate studies. You will study: both informational and structural macromolecules present within the cell and relate their structure to function; cell metabolism; cell division, including DNA replication, transcriptional regulation in prokaryotes and gene regulation in eukaryotes; inheritance; and introduction to bioinformatics.

Courses: LS66
Corequisites: LSN102, LSB468
Contact hours: 5 hours
Campus: GP
Credit points: 12
Semester: 2

► LSN102 Cellular Biosciences
The unit examines the responses available to cells and tissues in normal growth and development and following exposure to injury or stress mechanisms. The role and control of these responses in a range of disease processes is considered. The unit is designed to present, at the level of cell and tissue systems, the effects of physical, chemical, biochemical and metabolic processes. Successful completion of this unit provides a fundamental understanding of cellular structure and function, and prepares students for further postgraduate studies in cell and molecular biology. Additionally, students gain an appreciation of contemporary methods for studying the structure and function of cells and tissues.

Courses: LS66, LS76, LS86, LS96
Corequisites: LSB468, LSN101
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

► LSN103 Postgraduate Learning and Research Skills
This unit assists you in developing a range of generic and specific skills and attributes to be a successful postgraduate student. On completion of the unit, you will: (i) know how to manage information tools and resources effectively in order to advance your university study and become an independent and competent learner (ii) build and increase your knowledge and competence in using basic software applications and general knowledge of information communication technologies. The basic techniques for examining the cellular structure of the human body already acquired at work and in undergraduate study are extended to provide a more detailed knowledge of the structure and organization of the normal human body at the levels of cells, tissues, organs and organ systems.

Courses: LS66, LS76, LS86, LS96
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

► LSN160 Epidemiology for Life Scientists
This unit aims to enable students to acquire knowledge and develop critical thinking in epidemiological research. Topics covered include: general principles of epidemiology; rates and ratios; standardisation: types of studies; ethical issues in study design and conduct; statistics as related to epidemiological criteria for causal relationship; principles of screening tests; epidemiology of infectious diseases. Information is presented in informal interlinked lectures and tutorials. Epidemiological exercises are discussed. Students develop skills in using statistical capabilities in Excel.

Courses: LS70, LS80
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► LSN220 Surgical Anatomy
This unit promotes advanced understanding of the anatomical terminology used by pathologists. The basic techniques for examining the cellular structure of the human body already acquired at work and in undergraduate study are extended to provide a more detailed knowledge of the structure and organization of the normal human body at the levels of cells, tissues, organs and organ systems.

Courses: LS69
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 3

► LSN221-1 Pathology
Pathology encompasses the study of disease processes underlying the major diseases of human organ systems. General disease processes of the major specific diseases of the organ systems are introduced, and then become the focus in systematic pathology. An understanding of general and systematic pathology is fundamental to the application of basic biomedical knowledge to clinically relevant states and the major diseases. On completion of this unit, students should know, understand and be able to apply facts, concepts and terms related to disease processes and the major diseases occurring in the organ systems.

Courses: LS90
Corequisites: LSN220
Contact hours: 5 per week
Campus: GP
Difficulty: 1
UNIT SYNOPSES

Credit points: 12  Semester: 1

 ►  LSN221-2 Pathology

Pathology encompasses the study of disease processes underlying the major disorders of human organ systems. General disease processes of the major specific diseases of the organ systems are introduced, and then become the focus in systematic pathology. An understanding of general and systematic pathology is fundamental to the application of basic biomedical knowledge to clinically relevant states and the major diseases. On completion of this unit, students should know, understand and be able to apply facts, concepts and terms related to disease processes and the major diseases occurring in the organ systems.

Courses:  LS90
Corequisites:  LSN220
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2

 ►  LSN222-1 Surgical Grossing

This unit advances knowledge and skills in surgical grossing to levels encompassing simple and non-complex specimens; provides an introduction to the handling of complex specimens. It provides an introduction to molecular biology techniques and practice in biomedical photography. The assessment in this unit promotes critical thinking, oral and written communications, teamwork, leadership and self reliance, and awareness of medico-legal and ethical issues associated with surgical grossing.

Courses:  LS90
Corequisites:  LSN220, LSN221-1, LSN221-2
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 3

 ►  LSN223-2 Surgical Grossing

This unit advances knowledge and skills in surgical grossing to levels encompassing simple and non-complex specimens; provides an introduction to the handling of complex specimens. It provides an introduction to molecular biology techniques and practice in biomedical photography. The assessment in this unit promotes critical thinking, oral and written communications, teamwork, leadership and self reliance, and awareness of medico-legal and ethical issues associated with surgical grossing.

Courses:  LS90
Corequisites:  LSN220, LSN221-1, LSN221-2
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

 ►  LSN223-3 Surgical Grossing

This unit advances knowledge and skills in surgical grossing to levels encompassing simple and non-complex specimens; provides an introduction to the handling of complex specimens. It provides an introduction to molecular biology techniques and practice in biomedical photography. The assessment in this unit promotes critical thinking, oral and written communications, teamwork, leadership and self reliance, and awareness of medico-legal and ethical issues associated with surgical grossing.

Courses:  LS90
Corequisites:  LSN220, LSN221-1, LSN221-2
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2

 ►  LSN224-4 Surgical Grossing

This unit advances knowledge and skills in surgical grossing to levels encompassing simple and non-complex specimens; provides an introduction to the handling of complex specimens. It provides an introduction to molecular biology techniques and practice in biomedical photography. The assessment in this unit promotes critical thinking, oral and written communications, teamwork, leadership and self reliance, and awareness of medico-legal and ethical issues associated with surgical grossing.

Courses:  LS90
Corequisites:  LSN220, LSN221-1, LSN221-2
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

 ►  LSN259 Cardiac Anatomy, Embryology and Pathology

This unit is designed to provide students with a thorough understanding of the embryology, anatomy and pathology of the human heart. Topics include: embryological development of the human heart, fetal and neonatal circulation and physiology; mal-development of the human heart; detailed anatomy of the adult human heart; physiology of the adult human heart; basic cardiac pharmacology.

Courses:  PH75, PH85
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

 ►  LSN710 Project

This unit includes a research project conducted in an area selected by the student in consultation with their supervisor(s) and the postgraduate coursework coordinator. The first part of the project involves compilation and writing of a critical Literature Review on the research topic focusing on clarification of knowledge gaps together with an outline of the planned research to follow. The second and major part of the project is the supervised research itself. A Research Project Report will be written in a style to evaluate and defend the research. Prescriptive guidelines and submission deadlines must be followed for both the Literature Review document and the Research Project Report.

Courses:  LS80  Campus: GP
Credit points: 48  Semester: 1

 ►  LSN711 Project 1

In this unit a critical Literature Review is written on a topic selected by the student in consultation with their supervisor(s) and the postgraduate coursework coordinator. This review focuses on clarification of knowledge gaps and, where applicable, provide an outline of the planned research to follow in LSN712 Project 2. Prescriptive guidelines and submission deadlines must be followed for the compilation and writing of the Literature Review document.

Courses:  LS80  Campus: GP
Credit points: 24  Semester: 1

 ►  LSN712 Project 2

In this unit a research project is conducted in an area selected by the student in consultation with their supervisor(s) and the postgraduate coursework coordinator. This unit is normally a research project in LSN711 Project 1. A Research Project Report will be written in a style to evaluate and critically discuss the data. Prescriptive guidelines and submission deadlines must be followed for the compilation and writing of the Research Project Report.

Courses:  LS80  Campus: GP
Credit points: 24  Semester: 1

 ►  LSP127 Business Aspects of Biotechnology

Support for a successful biotechnology industry in Australia requires an entrepreneurial framework to be developed which assists the efforts of both researchers and innovators. This unit integrates those essential entrepreneurial techniques of launching a biotechnology business. The unit focuses on the research and development of industrial products and commercialising innovations developed in this industry. On completion of this unit the student will be able to identify and analyse entrepreneurial opportunities and evaluate these opportunities within biotechnology together with the ability to identify and comprehend the steps involved in setting up a new biotechnology enterprise.

Courses:  LS70, LS80
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

 ►  LWB136 Contracts A

This unit includes the following: formation of contracts; equitable estoppel; privity of contract; formalities; express and implied terms; an examination of promises which are legally binding; how contractual promises may be characterised and the significance of that characterisation.

Courses:  LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with:  LWB102, LWB132
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

 ►  LWB137 Contracts B

This unit includes the following: discharge of contracts (performance, breach, agreement, frustration); remedies; vitiating factors (misrepresentation, mistake, undue influence, duress, unconscionable contracts, illegality); an examination of and how contractual promises may be discharged or invalidated.

Courses:  LW33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Pre-requisites:  LWB136
Incompatible with:  LWB102, LWB132
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2, 3

 ►  LWB138 Fundamentals of Torts

The law of torts is of primary importance in understanding how the Australian legal system operates to compensate the physical and/or financial harm one person suffers as a result of another's wrongdoing. Today the most significant area of the law of torts is that of negligence which is also the most commonly litigated tort action. However, a knowledge and understanding of the tort of negligence can only occur in the context of the development of the earlier torts such as trespass to the person, land and personal property. In this unit the principles and rules governing the tort of negligence and trespass actions are also examined.

Courses:  LW33, LW42, LW65, LW70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with:  LWB103, LWB133
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

 ►  LWB139 Select Issues in Torts

The law of torts is of primary importance in understanding how the Australian legal system operates to compensate the physical and/or financial harm one person suffers as
UNIT SYNOPSES

LWB141 Legal Institutions and Method
This unit introduces students to the building blocks of law: fundamental principles; legal terminology; legal institutions; legal methodology; sources of the law; ways to interpret the law including an introduction to policy and international considerations. The material is presented as an integrated whole so that students obtain a broad perspective and an ability to 'navigate the law' without artificially dividing any particular aspect. The unit also emphasises the joint responsibility of the teacher and the student for learning and to foster the development of skills in communication, comprehension and analysis.

Courses: LWB33, LWB42, LWB65, LWB70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB103, LWB133
Contact hours: 3 per week
Credit points: 12
Semester: 2, 3

LWB142 Law, Society and Justice
This unit examines the basic tenets of our democratic liberal legal system, particularly the central concept, the rule of law. The unit begins with a historical development of rights and the rule of law. It looks at how law and values intertwine and how society at a particular time shapes notions of legal personality, the recognition of 'family' and human rights in law. It finally addresses the limitations of democratic liberalism and the rule of law by examining the reality of equality before the law in relation to such topics as gender and cultural neutrality, equal access to justice, and lawyers and the adversarial system.

Courses: LWB33, LWB42, LWB65, LWB70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB101, LWB135
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

LWB143 Legal Research and Writing
This is a 'learn by doing' unit in which students are introduced to the use of all common legal research tools, in both print and electronic form, as they research a legal problem from a totally unfamiliar area of law. It also introduces students to legal writing and citation style, with an emphasis on the use of plain English.

Courses: LWB33, LWB42, LWB65, LWB70, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Prerequisites: LWB141
Corequisites: LWB141
Incompatible with: LWB104, LWB134

LWB144 Laws and Global Perspectives
This unit is designed to give students an understanding of the global context in which Australia operates and the important impact of this context on Australian law and legal practice. The unit introduces and explains the fundamental structures and principles of Comparative Law, Public International Law and Private International Law; and examines their relevance to contemporary legal practice in Australia.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB101, LWB131
Contact hours: 3 per week
Credit points: 12
Semester: 2

LWB231 Introduction to Public Law
This unit introduces the basic institutions of government: the executive, the Parliament and the judiciary. The fundamental principles of the rule of law by examining the reality of equality before the law in relation to such topics as gender and cultural neutrality, equal access to justice, and lawyers and the adversarial system.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB203, LWB311
Contact hours: 3 per week
Credit points: 12
Semester: 1, 3

LWB235 Australian Federal Constitutional Law
This unit includes the following: the constitutional arrangements effected by the Commonwealth Constitution; the structure and institutions of the constitution; the division of power between Commonwealth and states; the relations between the different levels of government; emphasis to Commonwealth legislative, executive and judicial powers.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB203, LWB311
Contact hours: 3 per week
Credit points: 12
Semester: 1, 3

LWB236 Real Property A
Property, rights of ownership and title are institutions at the basis of contemporary Australian society. A sound knowledge of the principles of property and real property law is essential for any lawyer. This unit, together with Real Property B, examines general principles concerning the nature of property and real property law. Topics covered include: the concept of property; land ownership; fee simple title; ownership; possession and title; ownership rights; law and equity; land transactions; the Torrens system.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Prerequisites: LWB231
Corequisites: LWB231
Incompatible with: LWB203
Contact hours: 3 per week
Credit points: 12
Semester: 2, 3

LWB237 Real Property B
This unit continues the examination of the general principles of real property law commenced in Real Property A. Topics include: co-ownership of land, leases, mortgages, easements, freehold covenants, and community titles schemes.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Prerequisites: LWB236
Incompatible with: LWB201, LWB233
Contact hours: 3 per week
Credit points: 12
Semester: 2

LWB238 Fundamentals of Criminal Law
An understanding of the principles of Criminal Law is of fundamental importance as it impinges upon almost every aspect of domestic, commercial, corporate and public activity in Queensland. The aim of this unit is to provide an overview of the aims and sources of Criminal Law in Queensland and to develop an understanding of the onus of proof in criminal matters. Additionally the unit explores the concept of fault elements, the criminal justice system and a selection of major offences while also developing advocacy skills.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB202, LWB232
Contact hours: 3 per week
Credit points: 12
Semester: 1

LWB239 Criminal Responsibility
The aim of this unit is to build upon the principles and skills explored in LWB238 by developing an understanding of the way criminal responsibility is imposed through the complicity provisions of the Criminal Code and the common law and how the major defences and excuses operate. The unit also examines the major sentencing principles applied in Queensland.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Prerequisites: LWB238
Incompatible with: LWB202, LWB232
Contact hours: 3 per week
Credit points: 12
Semester: 2

LWB240 Principles of Equity
The principles of Equity were originally developed to ameliorate the harshness of the common law and have since become a fundamental component of our legal system. A knowledge and understanding of the major principles of equity are necessary to an understanding of how the Australian legal system operates; it is therefore located early in the LLB degree. The aim of this unit is to provide a coherent knowledge and understanding of equitable principles within the context of the Australian legal system as well as developing skills relevant to ongoing learning and professional practice.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB301, LWB234
Contact hours: 3 per week
Credit points: 12
Semester: 1, 3

LWB241 Trusts
Trusts are a fundamental institution of ownership of property in equity; they are used for various purposes including estate planning, commercial and charitable purposes. A knowledge and understanding of the trust in its various forms and the equitable principles of property transfer are fundamental in understanding the impact of the principles of equity in the area of property ownership and rights. The aim of this unit is to provide a
UNIT SYNOPSIS

coherent knowledge and understanding of the law relating to trusts within the context of the Australian legal system and to develop skills relevant to ongoing learning and professional practice.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Incompatible with: LWB301, LWB234

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 2, 3

► LWB302 Family Law

This unit considers the manner in which the law treats the special social relationships that exist among members of a family and transforms them into legal rights and duties. The following aspects are addressed: the family as a legal phenomenon; methods of dispute resolution in family law; annulment of marriages; dissolution of marriages; consequences of separation and divorce, such as maintenance, child support, adjustment of interests in property and parental responsibilities.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1

► LWB308 Australian Employment Law

The employment relationship is one which affects us all, and in the light of recent legislative changes to industrial and employment law, will continue to have a profound effect on both our own lives and the lives of those with whom we come into professional contact. The study of Australian industrial law draws on students’ knowledge of contract, tort and constitutional law and introduces the legislative and common law bases by which international relations are conducted in this country.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1

► LWB309 Succession

This unit includes the following: examination of the law with respect to wills and probate; a study of the formalities required to execute a valid will; the intestacy provisions where a deceased’s will; a detailed examination of the provisions of the Succession Act 1981 (Qld).

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 2 per week

Campus: GP

Credit points: 12

Semester: 1

► LWB313 Discrimination & Equal Opportunity Law

This unit includes the following: an examination of the law and policy with respect to discrimination and equal opportunity in Australia; relevant international treaties and Australian legislation such as the Queensland Anti-Discrimination Act; the Anti-Discrimination Commission and procedures.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 2

► LWB331 Administrative Law

This unit examines the law relating to judicial review of administrative action public authori-
ties, systems of merits appeal, and the law of standing in public interest litigation.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB231

Corequisites: LWB231

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 2, 3

► LWB332 Commercial and Personal Property Law

This unit includes the following: fundamental concepts of personal property law (including possession and ownership); transfers of and dealings in personal property; protection of personal property interests; agency; bailment; sale of goods; introduction to trade practices law.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB233 or LWB236 only

Incompatible with: LWB303

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1, 3

► LWB333 Theories of Law

Legal practice requires an understanding and appreciation of its philosophical and theoretical foundations, as these guide the policies and principles to which the law has developed through legislative and judicial action. Understanding the major theoretical and philosophical approaches assists with the resolution of novel and difficult legal problems. This unit imparts the knowledge and research skills required to develop an in-depth understanding of the academic approaches to contemporary issues in law.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB233 or LWB236 only

Incompatible with: LWB303

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1

► LWB334 Corporate Law

This unit includes the following: the basic legal principles relating to registered companies; the principle of the veil of incorporation; corporate action; the operation of the corporation; and the corporate powers of the board. This subject also considers the role of the company registrar, the role of the director, and the impact of incorporation on the shares of a company.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Incompatible with: LWB401

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1

► LWB346 Law of Commercial Entities

This unit examines the legal principles relating to the operation of the Australian legal system to impose income tax. This includes concepts of residence of individual tax payers for taxation purposes and source of income. Students consider the distinction between income and capital as this relates to the imposition of income tax and the concept of deductions as a means of reducing taxable income. Taxation of capital gains particularly as this relates to a taxpayer’s main residence, deceased estates and general transfers of assets is discussed in detail. The other major topic is a critical analysis of the need for the general anti-tax avoidance provisions and how they apply.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1, 3

► LWB356 Advocacy

Advocacy is the art of persuasion in Court and before Tribunals. This unit concentrates on developing the fundamental skills of a good advocate, namely analysis, preparation and performance. Students are required to participate in oral advocacy exercises and mock trials. Regular attendance is necessary for successful completion of this unit.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB432

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 2

► LWB359 Advanced Taxation Law

This unit examines the taxation of business entities. The taxation of business entities are analysed together with the implications for the taxation of individuals involved with business entities. These individuals include partners, beneficiaries, trustees and company shareholders. This unit builds on the principles developed in Introduction to Taxation law in relation to taxation of individuals in that the concepts of income, deductions, residence and so on are discussed in the context of business entities. Tax planning issues involving entities are critically analysed and reflected on together with the effect of the general anti-avoidance provisions in the taxation legislation.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB364

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 2

► LWB364 Introduction to Taxation Law

This unit examines the principles relating to the operation of the Australian income tax system, with a focus on the concept of income tax. This includes concepts of residence of individual taxpayers for taxation purposes and source of income. Students consider the distinction between income and capital as this relates to the imposition of income tax and the concept of deductions as a means of reducing taxable income. Taxation of capital gains particularly as this relates to a taxpayer’s main residence, deceased estates and general transfers of assets is discussed in detail. The other major topic is a critical analysis of the need for the general anti-tax avoidance provisions and how they apply.

Courses: LWB33, LW42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Campus: GP

Credit points: 12

Semester: 1, 3

► LWB366 Law of Commercial Entities

This unit examines the legal principles pertaining to a number of different structures found in commercial life. It includes a brief consideration of corporations, more detailed examination of partnerships, unit trusts, joint ventures and incorporated associations. Consideration is given to the definition of these structures, relationship with third parties, relationship of members inter se. This
LWB406 Fundamentals of Public International Law

This unit considers the legal rules that govern the activities of nations and the regulation of the activities of nations by international organisations, such as the UN. It also includes: the creation of international law and its sources; treaties; customary law; general principles of law; the concept of international legal personality; statehood; self-determination; recognition; the effects of international law; sovereignty; international responsibility. It also includes the law of armed conflict.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Contact hours: 2 per week
Campus: GP
Credit points: 12
Semester: 1

LWB410 Competition Law

This unit includes an overview of the anti-competitive practices that are proscribed by Part IV and Part XIB of the Trade Practices Act 1974 (Cth). It also deals with the remedies available for contraventions of Part IV and the possibility of obtaining authorisation from the Australian Competition and Consumer Commission. The access provisions of Part III A and Part XIC are also considered.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Contact hours: 2 per week
Campus: GP, Ext
Credit points: 12
Semester: 1

LWB412 Research and Writing Project

This unit allows a supervised piece of research on a legal topic, and the writing of a paper of approximately 6500 words on that topic. This project offers an ideal opportunity for students to apply more abstract topics of academic or career-related interest, and to produce an item of writing which might assist in scholarship, postgraduate and career-related applications. A student wishing to undertake this unit should discuss the matter as early as possible in the semester immediately before that in which he or she proposes to undertake it, preferably with the proposed supervisor of the student's own choosing. Further instructions are available from the unit coordinator.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Campus: GP
Credit points: 12

LWB413 Queensland Parliamentarian Internship Program

This unit provides an opportunity for students to learn about the workings of the Queensland Parliament and to undertake a piece of research of interest and use to a member or senior officer of Parliament. Places are limited and preference will be given to students with a good academic record. This unit may be undertaken in semester 2, and intending students should contact the Unit Coordinator in May of each year. Places are generally available only to students in their final year of study who have achieved a grade point average of at least 5.2 or have demonstrated other evidence of capacity for research and report writing.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Campus: GP
Credit points: 12
Semester: 2

LWB417 Moots

The aim of this unit is to give students a broadly understood and development of oral and written arguments and persuasive speaking, and an ability to apply these skills in a courtroom context. Additionally, students will become competent in electronic courtroom software.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Campus: GP
Credit points: 12
Semester: 1

LWB418 Competition Moots 1

If students have completed the core units in first and second year, enjoy working under pressure and have participated in at least one moot as counsel, they may apply when applications are called for. Places are very limited, but if students are successful, they can take their skills to the national and international arena, and experience mooting at the highest level. International and national moots require significant preparation and attention to detail, with a very high level of commitment, research, writing and discipline knowledge. Because of the timetabling of international moots throughout the year, students may be required to work on the competition moot from November to February. The number of moots offered will vary from year to year.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Campus: GP
Credit points: 12
Semester: 2

LWB419 Competition Moots 2

This unit allows a student to build on the skills they have learnt in LWB418 Competition Mooting 1, to give them a higher level of understanding of oral and written argument and persuade. Speaking, and an ability to apply these skills in an international competitive context.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Prerequisites: LWB418
Campus: GP
Credit points: 12
Semester: 2

LWB420 Internship

The aim of this unit, ideally to be undertaken in the later years of the LLB course, is to provide an opportunity for students to work in a functioning workplace environment with a broad public law focus and to enable students to engage in practical tasks, that require demonstration of legal analysis critical reflection and appropriate communication skills.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Campus: GP
Credit points: 12
Semester: 1

LWB431 Civil Procedure

This core unit focuses on developing basic litigation skills. The following issues are examined: the adversarial system and alternative methods of dispute resolution, obligations to the client, the structures and processes of litigation conducted in the Supreme, District and Magistrates Courts, jurisdiction, originating process, notice of intention to defend, parties, service, ending proceedings early, pleading, disclosure, subpoenas, trial, appeals, costs and enforcement.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB404
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

LWB432 Evidence

The law of Evidence concerns those rules and principles which govern the presentation and proof of facts and information in court proceedings, both civil and criminal. The unit covers both State and Federal jurisdictions.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB402
Contact hours: 3 per week
Campus: GP, Ext
Credit points: 12
Semester: 1, 2

LWB433 Professional Responsibility

This unit includes the following: the ethical principles upon which the practice of all professions is based; the principles which underpin the discipline of law and the workings of the legal profession; the history, nature, organisation and operation of the legal profession; codes of conduct, trust accounts and professional legal ethics.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

LWB434 Advanced Research and Legal Reasoning

This unit develops advanced skills of legal research, analysis, problem-solving, critical thinking, and writing for diverse purposes, and topical developments in substantive areas of law.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Incompatible with: LWB333
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

LWB451 Alternative Dispute Resolution

Heralded as the new Equity, alternative dispute resolution processes, particularly mediation, are being utilised by all courts and most administrative tribunals to reduce the complexity, time and cost of adversarial dispute resolution. Knowledge of these processes and skills is therefore desirable, if not essential, for all legal practitioners. This unit builds on negotiation skills modules developed in first and second year core units and introduces the theory and practical skills of mediation.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

LWB456 Legal Clinic (Organised Program)

In this unit students are provided with the opportunity to see law in action through being involved in the delivery of legal services to members of the community under the umbrella of Legal Aid Queensland, the Prisoners Legal Service Inc or the Aboriginal and Torres Strait Islander Corporation (QEA) for Legal Services. Students work in their placement is supplemented with a weekly
UNIT SYNOPSIS

Seminar program that deals with such topics as legal interviewing, family and criminal law practice, professionalism and legal writing. This unit examines the regulation and non-regulation of freedom of speech exercised by the media. In this regard various limitations imposed by the common law, statute and self-regulation will be examined, such as defamation, restrictions on reporting courts and politics, contempt, privacy and confidentiality.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB138, LWB139 or equivalent

Contact hours: 3 per week

Credit points: 12

Semester: 2

LWB480 Media Law

This unit examines the regulation and non-regulation of freedom of speech exercised by the media. In this regard various limitations imposed by the common law, statute and self-regulation will be examined, such as defamation, restrictions on reporting courts and politics, contempt, privacy and confidentiality.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Credit points: 12

Semester: 2

LWB482 Internet Law

This unit addresses the idea that it is vital for any participant in the digital age to gain a thorough knowledge of the structure, governance and regulation of the Internet, digital intellectual property, and risk management strategies for stakeholders.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 2 per week

Credit points: 12

Semester: 1

LWB483 Medical-Legal Issues

This unit considers the regulation of health care as well as the relationship between the individual and the health care provider, in terms of consent to treatment; negligence; the impact of the criminal law; abortion; removal from life support systems; mental illness; medical records and evidence; ownership and confidentiality of records; the duty to treat; complaints against hospitals and health care workers.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB138 or equivalent

Contact hours: 5 per week

Credit points: 12

Semester: 2

LWB485 Environmental Law

This unit provides an introduction to environmental law in Queensland: the sources, nature and development of environmental law in Queensland; the concepts of environmental law (for example property, administrative control, law and policy, planning, management); access to the environment; planning to prevent environment degradation and pollution; protecting the environment; managing the environment; conservation; ecologically sustainable development; enforcement of environmental law; the role of the Commonwealth.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 2 per week

Credit points: 12

Semester: 1

LWB486 Intellectual Property Law

There have been significant developments in the field of intellectual property law in recent years and the area is undoubtedly one perceived by the practising profession as growing in importance. This unit will provide a foundation to those areas of intellectual property law that legal practitioners may encounter in their everyday practice. In so doing, it will provide an examination of each of the intellectual property regimes. The course will also consider some of the broader more general policy matters as they relate to the field of intellectual property law.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 4

Credit points: 12

Semester: 2

LWB489 Native Title Law and Practice

Trusts are a fundamental institution of ownership of property in equity and they are used for various purposes including estate planning, commercial, and charitable purposes. A thorough understanding of the trust in its various forms and the equitable principles of property transfer are fundamental in understanding the impact of the principles of equity in the area of property ownership and rights. The aim of this unit is to provide you with an understanding of current Australian law and procedure relevant to native title issues, and a critical appreciation of the cultural, social, historical and broader legal context in which these issues arise.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3

Credit points: 12

Semester: 1

LWB491 Indigenous Legal Issues

This unit will cover a series of key areas in which government policy-making has particularly impacted on Indigenous people. Major issues such as native title, customary law, and the criminal justice system are dealt with in other units to be covered. Historical overview of Australian Indigenous peoples and the law; Legal and cultural identity; Protection of cultural rights; Self-government, self-determination and citizenship; Recommendations of the Royal Commission into Aboriginal Deaths in Custody; Recommendations from the Bringing Them Home Report; equity, equality, racial discrimination and vilification; Reconciliation.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3

Credit points: 12

Semester: 1

LWB495 E-Litigation

The ability to effectively manage electronic information is becoming a core skill in the conduct of civil litigation. This unit will explore a range of issues that arise in this context, including privacy and security issues, electronic filing, electronic appeal books, and a contrast of the traditional model for litigation practice with the use of technology-based litigation. Topics to be covered are: The impact of technology on the conduct of legal practice in Australia and other jurisdictions; The regulation of electronic evidence and the parameters for electronic discovery. As the courts are now taking an active role in encouraging parties to use information technology in civil litigation the unit will consider the relevant rules of court and Practice Directions, both in Australia and in other jurisdictions.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Prerequisites: LWB431

Contact hours: 3

Credit points: 12

Semester: 1

LWB496 Human Rights Law

The law of human rights is being incrementally developed by the courts and may, in the next few years, by further promoted by statute law if other jurisdictions enact Acts like the ACT Human Rights Act 2004. There will be an increasing demand for lawyers who have detailed knowledge of this law.

This unit will explore the notion of what human rights are (except for anti-discrimination rights which are covered in other units), and will then explore the current protection given to human rights by the common law, by statutes of statutory interpretation, by express constitutional provisions, by constitutional implications and by reliance on international Conventions. We will then critically consider the different models for rights protection adopted in other nations.

Courses: LWB33, LWB42, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Contact hours: 3 per week

Credit points: 12

Semester: 2

LWB497 Advanced Research Project

The aim of the unit is to provide students with the opportunity to develop and apply the skills of research and writing, analysis and reasoning, by undertaking a specific, supervised project of research under the supervision of a senior academic, on a topic agreed between the student and supervisor which is suitable for achieving the objectives of the unit.

Courses: LWB33, IF07, IF10, IF37, IF38, IF39, IF41, IF43, IF93

Credit points: 12

Semester: 1, 2

LWN025 Research Project 1A

In this unit, students undertake a supervised research project of about 10,000 words over one semester approved by the Teaching, Learning and Curriculum Committee. Students should refer to the relevant course rules for the maximum credit point limit of Research Project units allowed to be undertaken as part of their course and how to apply to undertake this unit.

Courses: LWN51, LWN60

Credit points: 12

Semester: 1, 2

LWN026 Research Project 2A

In this unit, students undertake a supervised research project of about 20,000 words over one semester approved by a working party of the Law Faculty Teaching, Learning and Curriculum Committee. Students should refer to the relevant course rules for the maximum credit point limit of research project units allowed to be undertaken as part of their course and how to apply to undertake this unit.

Courses: LWN51, LWN60

Credit points: 24

Semester: 1, 2

LWN030 Dispute Resolution/Mediation

The ADR movement has developed at a rapid pace in Australia and internationally with mediation being incorporated into the practices of most courts and tribunals as well as at the private level. This unit examines the theory and skills of mediation. The aim of this unit is to provide a coherent knowledge and understanding of mediation theory as well as developing mediation skills relevant to ongoing learning and professional practice.

Courses: LWN50, LWN61, LWN60
This unit includes a detailed study of town planning law with special emphasis on relevant Queensland legislation in particular the Integrated Planning Act 1997 and Regulations, and Legislation relevant to major/significant development projects. Particular emphasis is placed on the integrated development assessment system, both transparency and under full IDAS. Topics include: ecological sustainability; development; application stage; information and referral stage; notification stage; decision stage; ministerial IDAS powers; appeal process; integration with the Environmental Protection Act 1994, the Building Act 1975, the Transport Infrastructure Act 1994, the Vegetation Management Act 1999, the Water Act 2000.

Courses: LW50, LW51, LW60
Contact hours: 2 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► LWN048 Advanced Legal Research

The unit deals with the concepts, techniques, aims and methods of legal research and other research relevant to an interdisciplinary perspective. It includes extensive training in finding source material and the use of advanced technology in locating and organising source materials. The unit also deals at length with the presentation and defence of research including the respective roles of researcher and supervisor, structuring research material in support of a thesis, the diagnosis and remedy of structural problems. It deals with the conventions of presentation, assessment of research in terms of the differing criteria for refereeing and judging worth and quality and ethics of research.

Courses: LW50, LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12 Semester: 1, 2

► LWN049 International Environmental Law

International environmental law is a dynamic area of international law with implications for the management of natural resources both in Australia and at the global level. This unit introduces students to the fundamental principles structuring international environmental law, discusses the principal institutions, cases and treaties in this field and explores the impact of international environmental obligations on natural resource management in Australia. The unit highlights the particular challenges facing international environmental lawyers seeking the protection and enhancement of the global environment, as well as international environmental issues of contemporary concern.

Courses: LW50, LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12 Semester: 1

► LWN050 Restrictive Trade Practices Law

All countries that rely on markets and competition to allocate resources and satisfy the needs of consumers have a set of rules designed to deal with problems of market failure caused by one or more firms possessing market power. Such firms are able to undermine the competitive process by engaging in anti-competitive behaviour. This unit considers this Law.

Courses: LW50, LW51, LW60
Contact hours: 2 per week
Campus: GP, Ext
Credit points: 12 Semester: 1

► LWN051 Consumer Protection and Product Liability

This unit is divided into two main parts. The first part considers the statutory and common law actions that are available to protect consumers from misleading or deceptive conduct and unfair marketing practices. Emphasis is given to the role played by the Trade Practices Act in relation to conveying and land transactions, financial services and advertising. Unconscionable conduct is also considered. The second part of the unit is concerned with statutory and common law actions available when loss or damage is suffered as a result of defective products. Remedies and defences are considered throughout the course.

Courses: LW50, LW51, LW60
Contact hours: 2 per week
Campus: GP, Ext
Credit points: 12 Semester: 2

► LWN053 Research Project 1B

See LWN025

Courses: LW51, LW60
Prerequisites: LWN025 Campus: GP
Credit points: 12 Semester: 2

► LWN056 Research Project 1C

See LWN025.

Courses: LW51, LW60
Prerequisites: LWN025, LWN053 Campus: GP
Credit points: 12 Semester: 2

► LWN057 Research Project 1D

See LWN025.

Courses: LW51, LW60
Prerequisites: LWN025, LWN053, LWN056 Campus: GP
Credit points: 12 Semester: 2

► LWN058-1 Research Project 2B

See LWN026-1

Courses: LW51, LW60
Prerequisites: LWN026-1 Campus: GP
Credit points: 12 Semester: 2

► LWN058-2 Research Project 2B

See LWN026-2.

Courses: LW51, LW60
Prerequisites: LWN026-2 Campus: GP
Credit points: 12 Semester: 2

► LWN061 Natural Resources Law

This unit includes the following: the principles and concepts of natural resources law in Queensland dealing with the ownership and control of natural resources, providing access to these resources, controlling the operational side of the development of these resources, and recognising commercial structures for achieving these operational objectives; an assessment of a number of developed and evolving mechanisms for achieving these objectives such as policy objectives, management plans, incentives and inducements, market instruments and property rights. Examples include land, water and fisheries.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP Credit points: 12 Semester: 1

LWN062 Federal Environmental Law

This unit includes the following: the history of Commonwealth involvement in environmental management; the Inter-Governmental Agreement of 1992: relevant paragraphs of ss 51 of the Constitution; judicial interpretation of the paragraphs; impact of ss 90, 92 and 109 of the Constitution; federal legislation dealing with offshore development, marine environment protection, environmental impact assessment, national estate, wildlife conservation, Great Barrier Reef, hazardous waste and industrial chemicals, world heritage, ozone protection, ecologically sustainable development, climate changes, and biological diversity.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP Credit points: 12 Semester: 1

► LWN075 International Commercial Transactions

This unit on international trade law addresses the legal problems that arise in the formation and operation of commercial transactions of an international nature. Its scope is largely confined to the sphere of private law. Topics covered include: the international trade law and environment; harmonisation and unification of law; international contracts (characteristics, comparative law, negotiating and drafting, choice of law); international sale of goods (trade terms, standard conditions, uniform law); carriage of goods by sea; payment in a documentary sale, and other financing mechanisms; marketing arrangements (agency, distributorship, subsidiary, joint venture).

Courses: LW50, LW51, LW60
Contact hours: 2 per week
Campus: GP Credit points: 12 Semester: 1, 2

► LWN087 Contemporary Issues in Torts

Contemporary issues in the law of torts extend beyond the tort of negligence to include areas such as the economic torts, the tortious liability of public officials, the torts of trespass and nuisance, and the emerging tort of privacy. In addition there have been significant developments in related areas such as vicarious liability and the apportioning of liability amongst multiple tortfeasors. It is, therefore, appropriate that these contemporary issues in the law of torts be the subject of an LLM unit that allows for a more sophisticated level of conceptual analysis.

*UNIT SYNOPSISES*

**LWN111 Public Law and Government Commercial Activity**  
This unit examines the reach of public law and the field of commercial activities in which government agencies are involved. Areas covered include corporatisation, outsourcing and privatisation.

**Courses:** LWS1, LW60  
**Contact hours:** 2 per week  
**Campus:** GP, Ext  
**Credit points:** 12  
**Semester:** 2

**LWN115 Human Rights In Australian Law**  
Human rights impact upon the legal rights of all Australians. A knowledge of the human rights currently recognised and the extent to which they can be enforced in Australia is of benefit to all professionals. This knowledge can be used to advocate for people in a variety of legal, social and cultural contexts.

**Courses:** LWS1, LW60  
**Contact hours:** 26hrs in total  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

**LWN117 Legal Regulation of the Internet**  
This unit examines legal issues relating to the Internet. The unit will consider the application of existing legal principles to "cyber-space" as well as newly developed Internet law or Cyberlaw principles. Knowledge of Internet Law is of increasing importance in many areas of legal practice, industry and to society more generally. This is a new area of activity and it is important to educate lawyers and other professionals on the unique issues that have arisen and will emerge in this area, in particular the difficulty in regulating the distributed international network of computers known as the "Internet".

**Courses:** LWS1, LW60  
**Contact hours:** 2 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**LWN119 Employment Law**  
Employment law is a foundation unit that allows students to survey at an advanced level the sources, components and relationships of employment law in Australia. Successful completion of this unit provides students with the necessary background to continue on to undertake further advanced courses in more specialised areas of labour law, including public sector employment law and the law of public sector employment.

**Courses:** LWS1, LW60  
**Contact hours:** 26 hrs in total  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 3

**LWN122 Commercial Leases**  
This unit considers the principles governing standard clauses of a modern Australian commercial lease in the light of recent case law and Queensland statutory provisions affecting such interests. Topics include: negotiation of leases, covenants for repair, user, assignment, quiet possession, options to renew and purchase, the phenomenon of default, remedies of lessor and lessee including those under the Trade Practices Act 1974, and retail shop leases in Queensland generally.

**Courses:** LWS1, LW60  
**Contact hours:** 26 hrs in total

**LWN127 Advanced Insurance Law 1**  
This unit covers the nature and definition of insurance, utmost good faith, formation of contract, proposals, etc; scope of Insurance Contracts Act 1984 (Cwlth), non-disclosure and misrepresentation, brokers and agents; Insurance (Agents and Brokers) Act 1984 (Cwlth), or Financial Services Reform Act 2001 (Cwlth) if appropriate, third parties' rights and obligations; Section 54 Insurance Contracts Act.

**Courses:** LWS1, LW60  
**Contact hours:** 2 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

**LWN129 Contemporary Issues in Sentencing Law**  
Sentencing law has become a specialised area of research and practice over the past two decades in the United Kingdom and the United States, and increasingly in Australia. In practice, this is particularly so for barristers and specialist criminal law practitioners. Increasingly, law schools have undergraduate and postgraduate units in this area. Almost all Australian jurisdictions have now introduced specialised sentencing legislation, introducing discrete principles and thereby ensuring that a separate discipline of sentencing law has emerged, complete with its own discourse. It is therefore appropriate that sentencing law should feature as a postgraduate unit in its own right.

**Courses:** LWS1, LW60, JS51  
**Contact hours:** 26 hrs in total  
**Campus:** GP  
**Credit points:** 12

**LWN131 Queensland State Law and Practice**  
The main topics to be addressed in this unit include: the contract of employment; the common law of public sector employment; appointment; discipline and appeal rights of public sector employees; termination of employment; anti-discrimination law; administrative law; case studies of local government; statutory authorities; State and Federal public sector employment law.

**Courses:** LWS1, LW60  
**Contact hours:** 26 hrs in total  
**Campus:** GP  
**Credit points:** 12

**LWN135 Law, Justice and New Genetic Technologies**  
Our ability to test, screen and manipulate the human genome is made possible by recent technological breakthroughs in science. The science of genetics is not new, but its public profile has never been higher. Current initiatives in genetic knowledge have been described as an international voyage of scientific discovery. The scientific findings are prompting major rethinking of concepts of law and justice. The legal community faces a perpetual challenge in keeping pace with the
revolution in genetics. This unit looks at some legal implications of this revolution and charts the major responses of our legal system to modern genetics and biotechnology.

Contact hours: 26 hrs in total
Campus: GP
Credit points: 12

LWN145 Corporate and Investment Regulation

This unit develops a forward thinking approach to corporate and investment regulation and promotes practical and analytical appraisal of the issues arising in relation to the regulation of companies and investment.

Courses: LW51, LW60
Contact hours: 2 per week
Campus: GP
Credit points: 12
Semester: 2

LWN146 International and Comparative Intellectual Property Law

The unit provides you with an introduction to international intellectual property and policy issues and their connection with the European Union (EU) efforts to create an internal market with a level playing field for the protection of intellectual property. The unit also considers diverging perspectives on topics ranging from the protection of traditional knowledge and folklore to high technology.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12
Semester: 2

LWN147 Patent Law and Commercialisation

This unit considers patent law in the context of information technology and biotechnology products. It overviews the fundamental elements of patent law and as well as introduces students to legal issues involved in the commercialisation of information technology and biotechnology.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12
Semester: 2

LWN148 Evidence in Organised Crime Investigations

In recognition of the limitations of traditional law enforcement methods in dealing with organised crime and corruption, the Commonwealth and some State governments have granted more extensive powers to their police services and created inquisitorial commissions equipped with special coercive powers. The aim of this unit is, firstly, to assist investigators and other professionals to appreciate the impact of rules of evidence in this specific context. Secondly, to understand how these new powers can be more effectively exercised. Thirdly, to inform those representing persons who are the subject of such exercise on how they can best protect the rights of their clients.

Courses: LW60, LW51
Contact hours: 26 hrs in total
Campus: KG, Ext
Credit points: 12
Semester: 2

LWN150 Death, Decisions and the Law

As people near the end of their lives, their medical treatment and other care raises complex medical, legal and ethical decisions. Choices about whether particular treatment should be provided or refused may have to be made, and this is complicated by the fact that many people may not have the competence at this stage in their life to be able to make these decisions. Although a competent adult may refuse treatment, another choice demanded by some is the right to end their own life and to be assisted by others to do this. This unit examines the legal aspects of these choices.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12

LWN154 Trade Mark Law

A general knowledge of trade mark law is integral to an understanding of, and to practical practice in, the area of intellectual property law. This unit provides an understanding of the legal protection provided to trade marks under legislation and the common law. It introduces students to the principles of law required for obtaining, maintaining, managing and exploiting a registered trade mark under the Trade Marks Act 1995 (Cth). It will also consider the principles of law underlying infringement proceedings and enforcement of registered trade marks.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12
Semester: 2

LWN156 Justice, Law and Democracy

The idea of a shared public morality often seems improbable in a society such as ours which is built on pluralistic values. This unit challenges the cultural relativist framework espoused by pluralists and some post-modernists and provides a theoretical framework for developing a common social ethic. This unit extends and develops the framework introduced in Theories of Justice for making clear and coherent distinctions between the relative usefulness of competing claims for legitimacy by major theories of justice. However, it can also be taken as a stand-alone theory unit.

Semester: 2

LWN160 Professional Liability & Property Transactions

The primary aim of this unit is to examine the development and application of the principles relating to the liability of nominated professionals engaged in property transactions, it affords an opportunity to a student to critically analyse issues arising from complex factual matrices which present themselves in this area of law and to contribute meaningfully to a consideration of these issues in a structured way. The second aim of this unit is to give students an understanding as to how this area of law may develop further based upon the application of new concepts such as proportionate liability or economic loss and apportionment legislation under the Trade Practices Act 1974 and Civil Liability Acts in Australian jurisdictions.

Courses: LW51, LW60
Contact hours: 26hrs in total
Campus: GP
Credit points: 12

LWN161 Law and Policy of the World Trade Organisation

With the rapid acceleration in the pace of globalisation and a substantial broadening of the WTO’s regulatory field since 1994, the World Trade Organisation (WTO) is the multilateral economic institution that is responsible for regulating a broad range of trans-border economic activities. WTO law and policy impacts on enterprises that engage in trans-border economic activities by regulating foreign market access/trade barriers, unfair international trade practices, international trade in services, intellectual property and trade related investment measures and international trade dispute resolution.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12
Semester: 1

LWN162 The Common Law System

This unit aims to provide students from overseas jurisdictions and non law graduates with a general understanding of the common law system and the Australian legal system. Topics covered included brief history of English law as the foundation of the common law legal system, the Australian constitutional and legal system, the doctrine of separation of powers, the rule of law, the theory of precedent, features of the common law system and the civil system, statutory interpretation, equity, contract and tort and forms of business organisation in common law systems.

Courses: LW51, LW60
Contact hours: 26 hrs in total
Campus: GP
Credit points: 12
Semester: 2

LWP100 ADR Skills

Credit points: 12
Semester: 1

LWP101 Discrimination and Equal Opportunity Law

Credit points: 12
Semester: 1

LWP105 Principles of Administrative Law

Credit points: 12
Semester: 1

LWP107 Legal Institutions and Method

Credit points: 12

LWP108 Organisational Behaviour

Credit points: 12

LWR001 Thesis

Credit points: 36
Semester: 1, 2

LWR003-1 Thesis

A dissertation is undertaken by students enrolled in LWS50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

Courses: LW50
Campus: GP, KG
Credit points: 24
Semester: 1, 2

LWR003-2 Thesis

A dissertation is undertaken by students enrolled in LWS50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

Courses: LW50
Campus: GP, KG
Credit points: 24
Semester: 1, 2

LWR003-3 Thesis

A dissertation is undertaken by students enrolled in LWS50 Doctor of Juridical Science. The dissertation should make a notable con-
A dissertation is undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50
**Credit points:** 24
**Semester:** 1, 2

- **LWR003-4 Thesis**

A dissertation is undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50
**Credit points:** 24
**Semester:** 1, 2

- **LWR003-5 Thesis**

A dissertation is undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50
**Credit points:** 24
**Semester:** 1, 2

- **LWR003-6 Thesis**

A dissertation is undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50
**Credit points:** 24
**Semester:** 1, 2

- **LWR003-7 Thesis**

A dissertation is undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50
**Credit points:** 24
**Semester:** 1, 2

- **LWR003-8 Thesis**

A dissertation is undertaken by students enrolled in LW50 Doctor of Juridical Science. The dissertation should make a notable contribution to professional knowledge and practice which may be in the form of new knowledge or significant original adaptation, application and interpretation of existing knowledge and practice.

**Courses:** LW50
**Credit points:** 24
**Semester:** 1, 2

- **LWR101 Thesis**

Credit points: 12
**Semester:** 1, 2

- **LWR103 Part-time Thesis Extension**

Credit points: 24
**Semester:** 1, 2

- **LWS001 Medicine and the Law**

The impact of some important fields of law upon the medical profession and upon hospital staff, patients and visitors. Introduction to legal concepts and the legal system. The Federal and State systems; general principles of the law of tort; principles of negligence; liability of hospitals; issues of consent; legal aspects of medical practice; medico-legal investigations; abortion law; euthanasia and transplantation issues.

**Courses:** PU00
**Contact hours:** 3 per week
**Credit points:** 12
**Semester:** 2

- **MAB100 Mathematical Sciences 1A**

This unit includes the following: functions (polynomial, trigonometric and exponential functions; properties and graphs); differentiation and integration (derivatives and integrals for common functions and rules for differentiation and integration of composite functions); integration techniques such as substitution, parts and partial fractions; modelling and solution of problems; vectors and matrices (vectors interpreted as geometric relationships in space, matrices as representations of linear systems); aspects of vector algebra and unique, non-unique and non-existent solutions to systems of simultaneous equations; complex numbers (Argand diagrams, complex arithmetic, solution of equations).

**Courses:** BS56, ED50, ED90, IF21, IF29, IF39, IF58, IF60, IF61, IF71, IF73, IF79, IF84, IF86, IT21, IX02, IX04, IX09, IX14, MA54, MA65, MA75, MA85, PS47, PS48, SC01, SC20, SC51

- **MAB105 Mathematical Sciences 1B**

This unit includes the following: limits and continuity; introduction to sequences and infinite series; divergence test; comparison test and ratio test; product, quotient and chain rules for derivatives; special techniques (parametric, implicit and logarithmic differentiation); inverses and their derivatives; applications of differentiation to curve sketching; Rolles theorem; mean value theorem; hyperbolic and trigonometric functions including inverses; L’Hopitals rule; functions of more than one variable; partial derivatives, differentials and applications; taylor series; existence and sums; fundamental theorems of integral calculus; solids of revolution; applications.

**Courses:** BS56, ED50, ED90, IF21, IF39, IF58, IF60, IF61, IF71, IF73, IF79, IF84, IF86, IX02, IX04, IX09, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

- **MAB111 Statistical Data Analysis 1**

This unit includes the following: collection and representation of data; explaining data with models; the normal (Gaussian) distribution; sampling distributions; properties of sample mean and sample variance; hypothesis testing re population mean; mean and tests of hypotheses about proportions; binomial distributions; means and variances; tests of independence; analysis of variance (ANOVA); aspects of vector analysis; regression and correlation; asymptotic confidence intervals; estimation and tests of hypotheses about proportions and probabilities.

**Courses:** BS56, ED50, ED90, IF21, IF29, IF39, IF58, IF60, IF61, IF71, IF73, IF79, IF84, IF86, IX02, IX04, IX09, IX14, IX15, LS50, MA54, MA65, MA75, MA85, SC01, SC20, SC51

- **MAB112 Mathematical Sciences 1C**

This unit includes the following: linear systems and matrices; vector algebra; coordinate systems; introduction to abstract algebraic systems; complex numbers; first and second order differential equations.

**Courses:** BS56, ED50, ED90, IF21, IF29, IF39, IF58, IF60, IF61, IF84, IX02, IX04, IX09, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

- **MAB131 Engineering Mathematics 1A**

This unit includes the following: sine and cosine functions; logarithmic functions; exponential functions; revision of complex numbers; determinants; vector algebra in 2 and 3 dimensions; derivatives and their applications; differentiation; chain rule; higher derivatives; integrals and their applications.

**Courses:** CE44, CE45, CE46, EE41, EE42, EE46, EE47, EE48, IF28, IF29, IF59, IF61, IX25, ME40, ME41, ME42, ME43, ME48, SC01

- **MAB132 Engineering Mathematics 1B**

This unit includes the following: vector calculus; differentiation of vectors; velocity and acceleration; relative velocity; vector algebra;
equivalent systems of forces; functions of several variables; partial derivatives; hyperbolic functions; inverse functions; inverse trigonometric and hyperbolic functions; partial derivatives; numerical methods; differential equations; multiple integrals; areas and volumes; Laplace transforms; Fourier series.

Courses: CE44, CE45, CE46, EE41, EE42, EE43, EE47, EE48, IF28, IF29, IF59, IF61, IX25, ME36, ME40, ME41, ME42, ME43, ME48, SC01

Prerequisites: MAB131
Incompatible with: MAB182
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1, 2

MAB132 Engineering Mathematics 2
This unit includes the following: polynomial approximations; divided differences and Newton's formula for polynomial approximation; interpolation by cubic splines; convergence of infinite power series; the use of Fourier series and harmonic analysis; quadrature methods; Laplace transform methods for differential equations; numerical solution of differential equations; and direct and indirect methods of solution of large systems of linear equations; determination of eigenvalues and eigenvectors of large scale linear systems (power method, inverse iteration and acceleration of convergence techniques).

Courses: ME41, ME42, ME43, ME48
Prerequisites: MAB132
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

MAB134 Electrical Engineering Mathematics 3
This unit includes the following: mathematics (Laplace transform; Fourier series and transforms; vector operators grad; div and curl expressed in spherical polar and Cartesian coordinates; line, surface and volume integrals of electric fields; divergence theorem and Stokes' theorem; field equations); introduction to probability and distribution theory; modelling (conditional probability; discrete and continuous random variables; Bernoulli, binomial and Poisson processes; introduction to queues and teletraffic; estimating probabilities; electromagnetic theory (flux density; electromagnetic induction; magnetic circuits; force and field strength; magnetic hysteresis; magnetic fields around conductors; electric fields; Coulomb's Law; voltage; energy stored in an electric field).

Courses: EE41, EE42, EE47, EE48, IF28, IF29, IF59, IF61, ME40, SC01
Prerequisites: MAB132
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

MAB135 Electrical Engineering Mathematics 4
Statistics and data analysis (presenting data; use of a statistical package; normal variation and relationships between variables; confidence intervals; hypothesis testing; regression; design of experiments; introduction to reliability); mathematics (the summation, partial and differential equations of Maxwell; solution in terms of Hertz vectors; the three dimensional wave equation; separation of variables leading to plane and spherical wave solution; Poynting's theorem and vectors; simple and regions in the complex plane; functions of a complex variable; analytic functions; Cauchy-Riemann equations; Laplace equation, conjugate harmonic functions; complex mapping; impedance and admittance loci; basis for Smith Chart; electromagnetic problems).

Courses: EE41, EE42, EE47, EE48, IF28, IF59, ME40
Prerequisites: MAB134
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

MAB136 Engineering Statistics
This unit includes: presentation (data: use of a statistical package; modelling data; relationships between variables; estimation; confidence intervals; hypothesis testing; fitting and investigating relationships; regression; design and analysis of experiments; reliability; further methods and applications of design and analysis of experiments).

Courses: ME41, ME42, ME45, ME48
Prerequisites: MAB132
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 2

MAB137 Surveying Mathematics 1
This unit includes: statistics (presentation of data; use of a statistical package; modelling data; relationships between variables; estimation; confidence intervals; hypothesis testing; fitting and investigating relationships; regression; multivariate calculus (functions of several variables; definitions and uses, differentiation, multivariable chain rule, application to engineering problems: rotation, translation and scaling of the plane with application to cadastral surveying and mapping).

Courses: PS47, PS48
Prerequisites: MAB100
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

MAB138 Engineering Statistics and Numerical Methods
This unit includes: presentation of data; use of a statistical package; modelling data; relationships between variables; estimation; confidence intervals; hypothesis testing; fitting and investigating relationships; regression; design of experiments; introduction to reliability; introduction to quality and SPC. It also includes numerical methods; function approximation; polynomial interpolation; cubic splines; power series; numerical solution of ordinary differential equations; linear systems.

Courses: CE44, CE45, CE46
Prerequisites: MAB132
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

MAB139 Computer Engineering Mathematics 3
This unit includes: Simpson's rule; Newton-Raphson method; eigenvalues and eigenvectors; quadratic forms; complex matrices; complex numbers; functions of complex variables; Cauchy-Reimann equations; conformal mappings; complex Fourier series; Fourier transforms; Laplace transforms; Heaviside step function; Dirac delta function; convolution theorem; probability axioms; system reliability; conditional probability; Markov chains; discrete and continuous distributions; Poisson processes; queuing and teletraffic models; Bivariate models; introduction to transformations of random variables and links with signals.

Courses: EE41, EE42
Prerequisites: MAB132
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1, 2

MAB140 Quantitative Methods for Optometry and Health Science
This unit includes: linear, quadratic, power law and exponential processes; techniques of differentiation; integration and summation and their applications to health science modelling; matrices; data situations and types of variables; summary statistics and data features; introduction to a statistical package; modelling data; random variables and distributions; some special distributions; sampling and sample statistics; estimation; confidence intervals; hypothesis testing; tests for means and proportions; p-values; tests for variances; test of independence in contingency table; goodness-of-fit tests; fitting and investigating relationships; regression; residual analysis and diagnostics; multiple regression and curve-fitting; design of experiments; introduction to non-parametric tests.

Courses: OP42
Incompatible with: MAB141
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

MAB141 Mathematics and Statistics for Medical Science
This unit includes: mathematics (types of functions; differentiation and integration; determination of an interpolant for discrete experimental data; Lagrange polynomial interpolation formula and cubic spline interpolation; applications; least squares applied to linear and non-linear functions; use of quadrature formula and interpolation; numerical interpolation; statistics (data collection and presentation; probability; binomial and Poisson distributions; hypothesis testing; confidence intervals; design of experiments; regression; control charts).

Courses: IX25, SC40, SC44
Prerequisites: Senior Maths B or MAB105
Incompatible with: MAB140
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

MAB180 Engineering Mathematics 1
This unit includes: sine and cosine functions; logarithmic functions; exponential functions; complex numbers; determinants; vector algebra in 2 and 3 dimensions; derivatives and their applications (differentiation, chain rule, higher derivatives); integrals and their applications.

Courses: CE44, CE45, CE46, EE41, EE42, EE46, EE47, EE48, IF28, IF29, IF59, IF61, IX25, ME40, ME41, ME42, ME43, ME48, SC01
Prerequisites: At least SA in Senior Mathematics B (four semesters) or equivalent or MAB105
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1, 2

MAB182 Engineering Mathematics 2B
Vector calculus: differentiation of vectors, velocity and acceleration. Functions of several variables; domain, range and graphs, partial derivatives. Hyperbolic functions: inverse functions, inverse trigonometric and hyperbolic functions, Taylor expansions.

UNIT SYNOPSES
Differential equations; solving certain first and second order ODE’s, Laplace transform methods, Fourier series. Multiple integrals: areas and volumes.

**Courses:** EN40, IF28, IF59, IX25

**Prerequisites:** MAB180

**Incompatible with:** MAB112, MAB132

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 2, 3

---

**UNIT SYNOPSES**

**MAB211 Statistical Modelling 1**

This unit includes: probability; independence; system reliability; using conditional probability in modelling; introductory Markov chains; random variables; special distributional models; Bernoulli process; Poisson process; exponential; introductory queuing processes; simulating processes: expected values and moments; distribution function; Q-Q plots; goodness-of-fit tests; measures of dependence; introductory bivariate and correlation properties; conditioning arguments; non-parametric tests; assumptions and results in linear regression model.

**Courses:** BS56, ED50, ED90, IF21, IF39, IF58, IF60, IF71, IF84, IT26, IT21, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC10, SC51

**Prerequisites:** Senior Maths B

**Corequisites:** MAB111, MAB112

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 2

---

**MAB220 Computational Mathematics 1**

This unit includes: sources of error; computer arithmetic; MAPLE programming; solution of nonlinear equations in one variable; solution of systems of linear equations; interpolation; finite differences; numerical differentiation and integration; solution of first order differential equations.

**Courses:** ED50, ED90, IF21, IF39, IF58, IF60, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

**Prerequisites:** MAB105 or SA in Senior Maths B

**Corequisites:** MAB100 or MAB131 or MAB180

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1, 2

---

**MAB281 Mathematics for Computer Graphics**

This unit introduces students to the mathematical concepts involved in computer graphics, computer games and virtual reality. It is heavily reliant on analytic, Euclidean and projective geometries, elementary trigonometry and elementary calculus in both two and three dimensions. The unit will develop the mathematical concepts and where practicable show how these concepts are then applied in the field of computer graphics.

**Courses:** IT22

**Prerequisites:** ITB003 and Senior Mathematics B or MAB105

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1

---

**MAB311 Advanced Calculus**

This unit includes the following: polar coordinates; parametric equations; conic sections; quadric surfaces; vector-valued functions; Functions; partial functions of several variables; graphs; partial derivatives; total derivatives; extrema; Lagrange multipliers; Taylor series for multivariable functions; double and triple integrals; Green’s theorems; line and surface integrals; divergence theorem; Stoke’s theorem; applications.

**Courses:** ED50, ED90, IF21, IF39, IF50, IF58, IF60, IF67, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

**Prerequisites:** MAB111 and MAB112 or MAB132

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1

---

**MAB312 Linear Algebra**

This unit includes: matrix algebra; linear systems and an introduction to Maple; vector spaces; inner product spaces; eigenvalues and eigenvectors.

**Courses:** ED50, ED90, IF21, IF39, IF58, IF60, IF67, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA85, SC01, SC20, SC51

**Prerequisites:** MAB111, MAB112

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1

---

**MAB313 Mathematics of Finance**

This unit includes: interest rates; solution of problems in compound interest; applications of annuities; valuation of securities; quantitative techniques in business and finance.

**Courses:** ED50, ED90, IF21, IF39, IF58, IF60, IF67, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

**Prerequisites:** MAB100 or SA in Senior Mathematics C

**Corequisites:** MAB111

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1

---

**MAB314 Statistical Modelling 2**

This unit includes: methods and models of stochastic and statistical processes with applications in engineering; information technology; finance; physical and life sciences; Markov chains; random walks; branching processes; queuing and other birth and death processes; teletraffic; long-term process behaviour; stochastic vs deterministic; process simulation; use of generating functions; bivariate and conditional distributions; transformations; beta, gamma, normal distributions; probability transform and applications in simulations; order statistics, minimum, maximum, and range.

**Courses:** ED50, ED90, EE44, EE45, EE48, IF21, IF28, IF39, IF50, IF58, IF60, IF67, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, ME40, SC01, SC20, SC51

**Prerequisites:** MAB101, MAB111, MAB112, MAB210

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1

---

**MAB315 Operations Research 2**

This unit includes: general nature of operations research; formulating, solving and analysing linear programming models; transportation, trans-shipment and assignment models; shortest-route problems; project scheduling techniques (CPM and PERT); replacement and maintenance.

**Courses:** ED50, IF39, IF50, IF58, IF60, IF71, IF84, IF86, IT21, IX02, IX14, MA54, MA65, MA75, MA85, ME40, SC01, SC20, SC51

**Prerequisites:** MAB111, MAB210

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 1

---

**MAB413 Differential Equations**

This unit includes: introduction to mathematical modelling; linear differential equations; Euler-Cauchy equation; series methods; Laplace transform; transforms of derivatives and integrals; systems of differential equations; basic theory on linear systems; solution of linear systems with constant coefficients; matrix methods; special methods.

**Courses:** IF21, IF39, IF50, IF58, IF60, IF67, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, ME40, SC01, SC20, SC51

**Prerequisites:** MAB134 or MAB311 or MAB312

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 2

---

**MAB414 Applied Statistics 2**

This unit includes: parametric estimation, such as maximum likelihood; estimating relationships via linear regression and linear models; analysis of the method of least squares; basic inference and model choice; introduction to time-dependent data and models; forecasting models and application; introduction to sampling methods in a practical context; models for categorical data; introduction to the design experiments; ANOVA.

**Courses:** ED50, EE44, EE45, EE48, IF21, IF28, IF39, IF50, IF58, IF60, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, ME40, SC01, SC20, SC51

**Prerequisites:** MAB101, MAB111, MAB210

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 2

---

**MAB420 Computational Mathematics 2**

This unit includes: direct methods for solving systems of linear equations; solution methods for special matrix systems; vector and matrix norms; iterative solution methods for large sparse matrix systems; approximating eigenvalues and eigenvectors of a matrix.

**Courses:** IF21, IF39, IF50, IF58, IF60, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

**Prerequisites:** MAB220, MAB312

**Corequisites:** MAB480 or ITB003 or ITB849

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 2

---

**MAB421 Mathematical Modelling**

This unit includes models developed with the ‘real world’ description. These models are based on problems from the areas of cancer research, population growth and engineering. Emphasis is on mathematical modelling and not on the development of new mathematical content.

**Courses:** ED50, IF21, IF39, IF50, IF58, IF60, IF67, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51

**Prerequisites:** MAB111, MAB112

**Contact hours:** 4 per week **Campus:** GP

**Credit points:** 12 **Semester:** 2

---

**MAB480 Introduction to Scientific Computation**

This unit teaches students how to implement a mathematical algorithm in a modern scientific computing environment (eg Matlab). A case-study approach is used with an emphasis on writing efficient code. Also an overview of other software packages used in mathematics will be given along with an introduction to parallel computing.

**Courses:** IF39, IF58, IF60, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
UNIT SYNOPSIS

Prerequisites: MAB112 or MAB131
Incompatible with: MAB530, ITB849

MAB481 Visualisation and Data Analysis
This unit covers: history and evolution of data visualisation, definition of data visualisation, impact of data visualisation; fundamentals of computer graphics and modern day visualisation environments; visualisation of 2-D and 3-D data; general visualisation techniques including filtering; colour map transformations; contouring; height fields; interpolation; Delauney triangulation; iso-surfaces; volume visualisation; probing; animation; streamlines and texture mapping; visualisation of multi-dimensional data; other data types such as finite element, vector, molecular and scatter data.

Courses: IF58, IF60, IT21, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB101, MAB111, MAB480 or ITB003
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB521 Applied Mathematics 3
This unit includes: special functions (gamma, delta, Bessel and error functions, Fourier series, Legendre polynomials); vector analysis and applications (vector algebra, vector calculus, fields, grad, div, curl, line and surface integrals, divergence theorem, Stokes' theorem, applications); functions of a complex variable (analytic functions, contour integrals, Laurent series, residues).

Courses: IF21, IF39, IF44, IF50, IF58, IF60, IF71, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB311 or MAB601
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB522 Computational Mathematics
This unit includes the following topics: approximation of data and functions; advanced integration and interpolation methods (Gaussian quadrature, multiple integrals); numerical determination of eigenvalues and eigenvectors (power method, similarly transformed method, inverse method); solution of systems of non-linear equations (Newton's method, Broyden method, steepest descent); optimisation (line searches, introduction to multi-variable optimisation); advanced solution methods for systems of ordinary differential equations and boundary value problems (Runge-Kutta, predictor-corrector, shooting and finite difference methods).

Courses: IF21, IF39, IF44, IF50, IF58, IF60, IF71, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB311, MAB420
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB523 Introduction to Quality Management
This unit includes an introduction to quality management principles and the quality improvement journey concept. Topics include quality assurance and the AS9000 series, TQM, quality costs, statistical process control, flow charts, cause and effect diagram, and team decision techniques.

Courses: ED50, ED90, IF21, IF39, IF44, IF50, IF58, IF60, IF71, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB101, MAB465
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB524 Statistical Inference
This unit includes: statistical estimation; linear models (ordinary least squares, generalised least squares, heteroscedasticity, autocorrelation, asymptotic theory (convergence in probability and distribution, weak law of large numbers, central limit theorems)); maximum likelihood estimation; generalised linear models; quasi-likelihood estimation. Other topics which may be included are: multicollinearity; model selection; Bayesian estimation and Markov Chain Monte Carlo methods; nonlinear models. The computer package S-Plus is used.

Courses: IF21, IF39, IF44, IF50, IF58, IF60, IF71, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51, SC60
Prerequisites: MAB314, MAB414
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 2

MAB525 Operations Research 3A
This unit addresses inventory theory: algorithms for linear programming; integer and mixed integer programming; travelling salesperson; vehicle routing problems; deterministic and stochastic dynamic programming.

Courses: IF39, IF50, IF60, IF71, IF84, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB315
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB526 Statistical Science 3
This unit includes the following: fundamentals of time series analysis; time series models; nonstationary processes; seasonal ARIMA models; vector auto regression; long range dependence and fractional ARIMA models; co-integration of nonstationary processes.

Courses: IF21, IF39, IF44, IF49, IF50, IF58, IF60, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51, SC60
Prerequisites: MAB314, MAB414
Incompatible with: MAB526
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB580 Scientific Computation
This unit includes: supercomputing development tools such as compiler options for parallel processing, available resources; profiling scientific algorithms to determine areas where speed-up can be obtained; optimisation of scientific models and algorithms for parallel computer architectures; a major case study from science that has elements in design, application and solution strategy in a supercomputing environment.

Courses: IF58, IF71, IX02, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB380, MAB481
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 1

MAB613 Partial Differential Equations
This unit includes the following: derivation of certain partial differential equations; solution of partial differential equations by separation of variables, Laplace and Fourier transforms; Sturm-Liouville systems; special functions; Green's functions.

Courses: IF21, IF39, IF44, IF50, IF58, IF60, IF71, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51, SC60
Prerequisites: MAB311, MAB413
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 2

MAB621 Discrete Mathematics
This unit includes the following: groups, rings and fields (additive groups, multiplicative groups; polynomial rings and finite fields); modular arithmetic (property and rules, congruences; countability and uncountability); proof by mathematical induction, proof by contradiction; isomorphisms and homomorphisms between groups and rings in terms of relations (one-to-one and onto functions, logic, set operations, Boolean algebras); number theory issues (gcd, lcm and theorems involving these; fundamental theorem of arithmetic; arithmetic functions, primitive roots; Fermat's theorems, Euler's theorem; Pythagorean triples and extensions).

Courses: ED50, IF21, IF39, IF44, IF50, IF58, IF60, IF71, IF86, IT21, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB112
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 2

MAB623 Financial Mathematics
This unit includes the following: quantitative techniques in business, economics and finance; theory and structure of interest rates; general accumulation and discounting functions; force of interest; discounting; varying interest; general annuities; varying annuities; continuous varying annuities; mathematical analysis of financial transactions in stocks and capital markets; yield rates; horizon analysis; duration; convexity; effects of taxation; life annuities and life assurances; the life table; basic life table functions; life annuities and life assurances; policy values; paid up policy values; changes to policies; use of life table to study stationary and stable populations; population projections; multiple decrement tables; superannuation.

Courses: IF39, IF50, IF58, IF60, IF71, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB311, MAB313
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 2

MAB624 Applied Statistics 3
This unit includes the following: design of experiments for factorial investigations (two and three-level factors, Taguchi's approach, fractions and blocking, response surfaces); general linear model; regression graphs; multi-stratum designs and analysis; repeated measures designs and analysis; linear logistic and log-linear models; use of statistical software.

Courses: IF21, IF39, IF44, IF50, IF58, IF60, IF71, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB414
Contact hours: 4 per week: Campus: GP: Credit points: 12: Semester: 2

MAB625 Operations Research 3B
This unit includes: phases of an operations research study; decision analysis; queueing theory; simulation; implementation in opera-
tions research; non-linear programming; heuristic techniques.

Courses: IF39, IF50, IF58, IF60, IF66, MA45, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB315
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

MAB640 Industry Project
For this unit, the student usually works in industry for a short period full-time, followed by part-time. The student is assisted to develop a suitable plan to manage the project using a Gantt chart or other flow or layout techniques. Students are expected to record progress and subsequently develop an accurate report on project outcomes.

Courses: IF58, IF60, MA54, SC01, SC20, SC51
Prerequisites: MAB523
Campus: GP
Credit points: 24  Semester: 2

MAB672 Advanced Mathematical Modelling
Models are developed beginning with the description of 'real world' problems. Emphasis is on the mathematical modelling and not on the development of new mathematical techniques. The unit includes: mathematical modelling; model formulation; dimensional analysis and re-scaling; curves of pursuit; bungy jumping; modelling with systems of ordinary differential equations; phase plane methods for analysing systems of ODEs; bacterial growth in a chemostat; predator-prey models with harvesting; limit cycles; oscillations and excitable media; modelling with partial differential equations; motion of a continuum; continuity; traffic flow; aggregation; slime mould amoebae; momentum; ideal gas dynamics; quasi-linear PDEs.

Courses: IF21, IF39, IF44, IF50, IF58, IF60, IF71, IF86, IX02, IX14, MA54, MA65, MA75, MA85, SC01, SC20, SC51, SC60
Prerequisites: MAB3312, MAB422 (Recommended: MAB413)
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

MAB681 Advanced Visualisation and Data Analysis
This unit includes: advanced visualisation; virtual reality and data analysis; contemporary issues in data visualisation; introduction to advanced tools; completion of a project in advanced visualisation which demonstrates analysis, background research, investigation, development of project proposal, and presentation of the project outcomes.

Courses: IF58, IT21, MA54, MA65, MA75, MA85, SC01, SC20, SC51
Prerequisites: MAB481
Incompatible with: MAN681
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

MAB730 Surveying Mathematics 2
This unit includes: systems of linear equations; Gaussian elimination; matrix inversion, properties of inverses; partial pivoting; error propagation; determinants; properties of diagonal matrices; singular matrix; limit of a matrix; polynomial recursion methods; eigenvalues and eigenvectors; quadratic forms; canonical forms; Hurwitz criterion; stability; least squares methods; two-dimensional interpolation methods; fixed-point iteration, Newton's method and Quasi-Newton methods.

Courses: PS47, PS48
Prerequisites: MAB100
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

MAN200 Mathematical Foundations
This unit is intended to cater for students who may have studied mathematics for some years and who are enrolled in postgraduate coursework in mathematical science. The unit is tailored to suit individual needs. Content is organised into modules and may also include material delivered in a workshop for industry participants.

Courses: MA65, MA75, MA85
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1, 2

MAN201 Mathematics
This unit caters for students who need more than one mathematics unit to provide the necessary background for studying more advanced units in postgraduate coursework in mathematical science. Students may use material from one first level undergraduate material with extension material or combine content from more than one first level unit.

Courses: MA65, MA75, MA85
Corequisites: MAN200
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1, 2

MAN526 Time Series Analysis
The following core content will be covered: fundamentals of time series analysis; time series models; nonstationary processes; seasonal ARIMA models; vector autoregression; long-range dependence and fractional ARIMA models; co-integration of nonstationary processes. The computer package S-Plus will be used to implement and simulate the models and techniques developed throughout the unit.

Courses: IF49, MA65, MA75, MA85, SC80
Prerequisites: MAB314, MAB414
Incompatible with: MAB526
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

MAN624 Applied Statistics
This unit includes the following: fractional factorial designs, blocking, aliasing; development of basic statistical software; regression techniques, diagnostics, transformations, model choice and plots; modelling binary data and proportions using linear logistic models; modelling count data using loglinear models; modelling survival data and hazard modelling using loglinear models; data analysis and inference techniques based on simulation techniques, such as the bootstrap; non-linear regression techniques such as regression trees.

Courses: IF49, MA65, MA75, MA85, SC80
Prerequisites: MAB414
Incompatible with: MAB624
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

MAN681 Advanced Visualisation and Data Analysis
This unit includes advanced visualisation and data analysis tools and techniques. It includes project work involving selection, planning and research and a presentation and project report which indicates the use of search strategies and bibliographic systems.

Courses: IF49, MA65, MA75, MA85, SC80
Prerequisites: MAB481
Incompatible with: MAB681
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

MAN700 Project
This project is based on a problem from the student's workplace or interests.

Courses: MA65, MA75, MA85
Campus: GP
Credit points: 24  Semester: 1, 2, 3

MAN717 Minor Project
This project may be related to that undertaken in MAN700 or in MAN787 or in a separate area. It must be self-contained and is assessed separately.

Courses: MA65, MA75, MA85, SC60
Campus: GP
Credit points: 12  Semester: 1, 2, 3

MAN761 Analysis
This unit includes: convergence in R; uniform convergence; Lebesgue integral; convergence theorems; Lp-spaces; metric spaces; completeness and compactness; contraction mappings; normed and Banach spaces; dual spaces; linear operators; Hilbert spaces; Hilbert-adjoint operator; linear operator equations; spectrum of a linear operator.

Courses: MA65, MA75, MA85, SC60, SC71, SC80, IF49
Prerequisites: MAB311
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

MAN764 Applied Mathematical Modelling
This unit enables students to develop and practice mathematical modelling skills by considering topical problems from current research activities and beyond the discipline of mathematics. Some of the problems considered include the dispersion of a pollutant in a river, waves of pursuit and evasion, Turing mechanisms and the generation of spatial patterns in biological or biochemical systems. A notable emphasis of this unit is the collaborative development of mathematical models for novel problems.

Courses: IF49, MA65, MA75, MA85, SC60, SC71, SC80
Prerequisites: MAB613, MAB672
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

MAN765 Bayesian Data Analysis
This unit includes: basics of Bayesian statistics; frequentist and Bayesian inference for basic statistical models; parameter models and hierarchical Bayesian models; resampling and simulation; Markov chain Monte Carlo and related simulation methods; directed acyclic graphical models as probability models; use of BUGS software; model and simulation diagnostics; generalised linear models and mixed models; missing data models; spatial data models.

Courses: IF49, MA65, MA75, MA85, SC60, SC71, SC80
Prerequisites: MAB524
Incompatible with: MAB765
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

MAN766 Applied Time Series Analysis
This unit includes: spectral analysis of ARMA models; frequency estimation; fast algorithm for spectral analysis and frequency estimation; applications to speech and audio samples; non-linear spectral methods; non-linear time series models; chaos; tests for non-linearity; forecasting methods for non-linear models; non-parametric models; applications to business and financial time series.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB524, MAB526

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

**MAN768 Advanced Techniques in Operations Research**

This unit includes: the following: nature of operations research; inventory systems modelling, including lot-size problems, recent developments in inventory theory, material requirement planning, just-in-time production, production planning and scheduling, including static and dynamic methods, aggregate planning, LP/LDR/SDR techniques, heuristics; operations scheduling, including sequencing and balancing techniques, job shop scheduling, assembly line balancing; networks, including project management, network scheduling, resources allocation, NP-completeness.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB525

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**MAN769 Mathematics of Finance**

This unit includes: the stock market; basic option theory; the Black-Scholes analysis; Brownian motion; Ito's lemma and stochastic calculus; the Black-Scholes market model and option valuation formula; bond valuation and interest rate models; mathematical aspects of the capital asset pricing model.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB413

**Incompatible with:** MAB769

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

**MAN771 Computational Mathematics 4**

This unit includes: a discussion of the conservation equations that describe fluid motion; explicit and implicit finite difference solution methods for the one-dimensional generalised diffusion equation; introduction to the finite volume method with application to the one-dimensional diffusion equation; treating advection/convection, Monotonicity arguments, stability, TVD schemes, up-stream averaging, and a brief discussion of flux limiting; extensions of the finite volume method to higher dimensions on both structured and unstructured grids.

**Courses:** MA65, MA75, MA85, SC60, SC71, SC80, IF49

**Prerequisites:** MAB522, MAB613

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

**MAN774 Perturbation Methods**

This unit includes: regular and singular perturbation expansions; asymptotic expansions, strained coordinates; boundary layer analysis and matched asymptotic expansions; selected examples from industrial applications and mathematics applied in medicine and biology.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB413, MAB521

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**MAN775 Statistical Modelling of Financial Processes**

This unit includes the following: Wiener processes; martingales; Markov processes; stochastic integrals and stochastic calculus; equivalent martingale measure; stochastic differential equations (SDE); the martingale-SDE approach to option pricing; replicating portfolio; statistical estimation of stochastic volatility via ARCH/GARCH-type models; quasi-likelihood estimation of long-range dependence and non-Gaussianity in financial processes.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB524, MAB526

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**MAN778 Applications of Discrete Mathematics**

This unit includes graph theory: introduction; graph isomorphisms, Euler trails and circuits; planar graphs; Hamiltonian paths and cycles; graph colouring with applications to electrical networks, coding theory, operations research, computer programming and cryptology. It also includes abstract algebra where advanced concepts of groups, rings and fields are introduced. Applications include the solvability by radicals of polynomial equations and ruler and compass constructions eg squaring the circle, elliptic curve cryptography.

**Courses:** IF49, MA65, MA75, MA85, SC60, SC71, SC80

**Prerequisites:** MAB621

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

**MAN787-1 Project**

This project is research-based and involves writing a thesis and giving an oral presentation.

**Courses:** MA75, MA85, SC60  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3

**MAN787-2 Project**

This project is research-based and involves writing a thesis and giving an oral presentation.

**Courses:** MA75, MA85, SC60  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3

**MAN787-3 Project**

This project is research-based and involves writing a thesis and giving an oral presentation.

**Courses:** MA75, MA85, SC60  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3

**MDB001 Integrated Foundations Studies 2: Scientific and Quantitative Literacy**

It is recognised that mathematics and science play crucial roles in the functioning of modern society through their contribution to our understanding of our physical, social and personal worlds, and their usefulness in solving problems a wide range of problems.

As students engage with the content of the unit, for example, number, time, astronomy, navigation, measurement, geometry, probability, they will recognise that each is a discipline with a language and methods of thinking that have evolved in historical and social contexts. Knowledge of both areas is important for people to be critically reflective thinkers and active participants in society, and for their life long learning.

**Courses:** ED91, ED43, ED47

**Incompatible with:** MDB386, MDB387

**Contact hours:** 3 per week  
**Campus:** KG, CB  
**Credit points:** 12  
**Semester:** 1

**MDB002 Primary Curriculum & Pedagogies: Mathematics 1**

Mathematics is an essential key learning area of the primary school curriculum. Mathematics is closely linked to numeracy, but it extends beyond the day-to-day demands of society. Mathematics underpins and assists in the growth of technology, economics and finance, communication, and the new biotechnology. All students complete two units of Mathematics Education. Mathematics Education I focuses on the teaching of number, operations, and measurement. The content considers the role of technology in these three strands.

**Courses:** ED91, ED47

**Incompatible with:** MDB373

**Contact hours:** 3 per week  
**Campus:** KG, CB  
**Credit points:** 12  
**Semester:** 2

**MDB003 Primary Curriculum & Pedagogies: Mathematics 2**

This unit investigates new ideas in the teaching and learning of the above topic areas. Students study the development of conceptual understanding in the primary school. Mathematics Education II focuses on the teaching of number, operations, and measurement. The content considers the big mathematical ideas and principles behind these topics.

**Courses:** ED91, ED47

**Incompatible with:** MDB002

**Contact hours:** 3 per week  
**Campus:** KG, CB  
**Credit points:** 12  
**Semester:** 2

**MDB004 Primary Curriculum & Pedagogies: Information and Communication Technologies**

Information and Communication Technolo-  
gies (ICT) play a significant role in contemporary society and therefore technological literacy is increasingly being seen as an essential part of education. This form of literacy involves the ability to create, use, manage and understand ICT in a range of contexts. In addition, new networked technologies have brought about the potential for expanding learning opportunities. These necessitate the re-examination of effective learning and teaching principles, the role of the learner, the role of the teacher, creating worthwhile partnerships and the use of ICT within the learning situation.

**Courses:** ED91

**Incompatible with:** MDB383

**Contact hours:** 3 per week  
**Campus:** KG, CB, Ext  
**Credit points:** 12  
**Semester:** 1, 2

**MDB005 Primary Curriculum & Pedagogies: Design and Technology Education**

This unit is designed for students to explore content, pedagogical content knowledge and...
Computing is now an integral part of second-
ary education and information and commu-
nications technologies (ICTs) are used in all
levels of the primary school with a focus on
developing scientific skills and abilities to
retrieve new scientific knowledge.
Courses: ED90, ED95, IX02, IX04, ED55
Prerequisites: MDB009 or MDB031
Credit points: 12
Semester: 2

MDB015 Computing Curriculum Studies 1

This unit addresses the following: the logical
and physical models of information systems;
characteristics; use of structured query lan-
guage to query existing curriculum data-
bases and construct new ones; the socio-
logical implications of the utilisation of public
and private databases.
Courses: ED90, IX09, ED55
Prerequisites: MDB015
Credit points: 12
Semester: 2

MDB017 Computing Curriculum Studies 3

This unit builds on the previous two units and
prepares students to teach the subjects
within the senior secondary computing cur-
riculum in Queensland secondary schools.
Courses: ED90, IX09, ED55
Prerequisites: MDB016

Credit points: 12
Semester: 1

MDB019 Earth Science Curriculum Studies 2

This unit encourages students to develop as
a learner-centred teacher who can plan to
meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically reflective orien-
tation to their teaching experiences.
Courses: ED90, ED95, IX02, ED55
Prerequisites: MDB018 or MDB031
Credit points: 12
Semester: 2

MDB021 Mathematics Curriculum Studies 1

Teachers of middle and secondary school
mathematics need a range of understand-
ings and skills to be effective practitioners in
the complex social and technological envi-
ronment of the classroom. This unit intro-
duces students to the teaching and learning
of mathematics at the secondary school
level. It begins development of students' know-
ledge and understanding of the secondary
domains of mathematics and their cur-
rriculum development skills. The unit is an
important component of preparation for Field
Studies 1.
Courses: ED90, ED95, ED55, ED92, ED82,
IX02, IX04, IX09
Contact hours: 3 per week
Credit points: 12
Semester: 1

MDB022 Mathematics Curriculum Studies 2

This unit develops students' understanding of
the school mathematics curriculum and extends
their knowledge and understanding of inclusive learner-focused approaches to
mathematics curriculum development.
Courses: ED90, ED95, IX02, IX04, IX09,
ED55
Prerequisites: MDB021
Credit points: 12
Semester: 2

MDB023 Mathematics Curriculum Studies 3

This unit extends students' knowledge and understanding of mathematics curriculum
with an emphasis on catering for the range
of students engaged in secondary education;
inclusive practices; and diagnosis of mathe-
atical learning difficulties.
Courses: ED90, ED95, IX02, IX04, IX09,
ED55
Prerequisites: MDB022
Credit points: 12
Semester: 1

MDB025 Physics Curriculum Studies 2

This unit provides an opportunity for students
to develop as a learner-centred teacher who
can plan to meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically
reflective orientation to their teaching experi-
ences.
Courses: ED90, ED95, IX02, ED55
Prerequisites: MDB024 or MDB031
Credit points: 12
Semester: 2

MDB028 Science Curriculum Studies 2

This unit encourages students to develop as
a learner-centred teacher who can plan to
meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically reflective orien-
tation to their teaching experiences.
Courses: ED90, ED95, IX02, IX09, ED55
Prerequisites: MDB027 or MDB031
Credit points: 12
Semester: 2

MDB030 Understanding and Education Gifted Learners

This elective addresses the education of
gifted students by exploring the appropriate
curriculum interventions necessary to meet
their specific needs. Some 10-15% of stu-
dents are identified as gifted and these re-
quire specialist educational interventions to
ensure that the curriculum offers the ap-
propriate challenge to develop their potential
and to avoid boredom, frustration or under-
achievement. In order to establish appropri-
ate curriculum and pedagogical approaches
an understanding of the nature of giftedness
is also necessary.
Courses: ED90, ED91, ED92, ED82, IX01-09
Contact hours: 3 per week
Credit points: 12
Semester: 2

MDB031 Science Education Curriculum Studies 1

This unit is to provide you with opportunities
to examine praxis in science classrooms in
order to help you develop principles for the
establishment and management of effective
science learning environments.
Courses: ED90, ED95, ED55, IX02
Credit points: 12
Semester: 1

MDB032 Science Education Curriculum Studies 3

This unit is to provide opportunities for you
to develop an understanding of the theoretical
underpinnings of a selection of strategies and
resources used in the teaching of sci-
cence.
Courses: ED90, ED95, ED55, IX02
Credit points: 12
Semester: 1, 2

MDB034 Mathematics Curriculum and Pedagogies

This unit provides content knowledge and
pedagogical strategies to promote the
development of students' mathematical
(but not cognitive and social) of students' future pupils.
Courses: ED96, IX12, IX14, ED56, IF82,
Credit points: 12
Semester: 1

MDB035 Physics Curriculum and Pedagogies

This unit provides an opportunity for students
to develop as a learner-centred teacher who
plans to meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically
reflective orientation to their teaching experi-
ences.
Courses: ED90, ED95, IX02, ED55
Prerequisites: MDB024 or MDB031
Credit points: 12
Semester: 2

MDB036 Science Curriculum and Pedagogies

This unit provides an opportunity for students
to develop as a learner-centred teacher who
plans to meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically
reflective orientation to their teaching experi-
ences.
Courses: ED90, ED95, IX02, ED55
Prerequisites: MDB024 or MDB031
Credit points: 12
Semester: 2

MDB038 Science Curriculum and Pedagogies

This unit provides an opportunity for students
to develop as a learner-centred teacher who
plans to meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically
reflective orientation to their teaching experi-
ences.
Courses: ED90, ED95, IX02, ED55
Prerequisites: MDB024 or MDB031
Credit points: 12
Semester: 2

MDB040 Science Curriculum and Pedagogies

This unit provides an opportunity for students
to develop as a learner-centred teacher who
plans to meet the needs of individual students in a
varied, stimulating and safe environment.
Students develop a critically
reflective orientation to their teaching experi-
ences.
Courses: ED90, ED95, IX02, ED55
Prerequisites: MDB024 or MDB031
Credit points: 12
Semester: 2
This unit examines the natural history of mathematics, the thinking skills, movement and programs designed to foster thinking; analysis of children's thinking in solving mathematical problems; analysis of students' `everyday cognition' together with their thinking in mathematical situations.

Courses: ED90, ED91, ED92, ED82, ED43, ED45
Contact hours: 3 per week
Credit points: 12
Semester: 1

► MDB3390 Natural and Processed Materials
This unit continues the development of students' content knowledge in science by examining a range of scientific concepts that contribute to an understanding of science in a technological context. The focus is on the exploitation of natural and processed materials and a consideration of the environment and social costs and benefits associated with the use of those materials.

Courses: ED47, ED91, ED92, ED82
Contact hours: 12 per week
Credit points: 12
Semester: 1

► MDB391 Earth and Space
This unit examines scientific concepts in important areas of space, time and motion, the origin and history of earth and its environments, and light and optics. Scientific principles and techniques for observing space and earth phenomena are investigated.

Courses: ED47, ED90, ED91, ED92, ED82, ED26, ED55
Contact hours: 3 per week
Credit points: 12
Semester: 1

► MDB320 Programming Languages for Teachers
This unit examines further software development, techniques of program development, top-down design and modularity and object-oriented programming using appropriate languages.

Courses: ED90
Contact hours: 3 per week
Credit points: 12
Semester: 1

► MDB321 Information System Modelling In Educational Contexts
This unit examines the modelling of information systems, relational systems, fact-oriented approaches and conceptual schema design.

Courses: ED90
Prerequisites: MDB320
Contact hours: 3 per week
Credit points: 12
Semester: 2

► MDB322 Computer Systems for Teachers
This unit includes the following: examination of single and multi-user operating systems; interaction with computer systems and management of stored information; definition and implementation of algorithms in suitable language; selection of computer representation for real world concepts and application in computer programs; hierarchy of levels of abstraction; adoption of abstracted views of real world information processing or problem-solving situations; capabilities and limitations of conventional, sequential processing machine architectures.

Courses: ED90
Contact hours: 3 per week
Credit points: 12
Semester: 1

► MDB323 Programming Languages for Teachers
This unit examines further software development, techniques of program development, top-down design and modularity and object-oriented programming using appropriate languages.

Courses: ED90
Prerequisites: MDB345
Contact hours: 3 per week
Credit points: 12
Semester: 2

► MDB345 Software Development for Educational Contexts
Algorithmic thinking and its implementation form a major component within the Information Processing and Technology syllabus now implemented in secondary schools. Prospective teachers of these courses require a sound foundation in the design and development of software along with the use of modern abstract procedural, data and object handling representations. Software design and development are closely bound to particular problems contexts. This unit is based on the design of educational software because this area is relevant to the students concerned and because there is a clear demand for such software. Students employ a range of powerful programming techniques and structures in the development of educational computer software.

Courses: ED90
Prerequisites: MDB322
Contact hours: 3 per week
Credit points: 12
Semester: 2

► MDB349 Numeracy and Mathematical Reasoning for the 21st Century
This unit includes the following: the concept of thinking and intelligence; the nature of mathematical thinking during the first half of this century; modern ideas on the nature of mathematical thinking; the thinking skills movement and programs designed to foster thinking; analysis of children's thinking in solving mathematical problems; analysis of
science activities and events. An emphasis is placed on catering for the individual and providing experiences that fully extend each child, including the exceptional child.

**Courses:** ED47  
**Contact hours:** 3 per week  
**Credit points:** 12  
**Semester:** 2

**MDB440 Computers and Education**  
This unit provides an overview of microcomputer hardware and software with an emphasis on the usefulness of various components in schools. It considers the use of educationally valuable application software and critically examines a variety of uses of computers in education including the impact of computers on society and education in particular.

**Courses:** ED26, ED53, ED93, ED83  
**Credit points:** 12  
**Semester:** 1, 2

**MDB453 Middle School Mathematics Education**  
This unit assists students to develop a deeper understanding of mathematical content applicable to the middle school and the ways that the content may be integrated into other key learning areas.

**Courses:** ED26, ED54, ED55, ED91, ED82, ED92  
**Credit points:** 12  
**Semester:** 2, 3

**MDB454 Science, Technology and Society**  
This unit investigates the interactions and effects that exist between modern science, technology and society both from a social and historical viewpoint. Advances such as the advent of the Internet, genetic modification and nanotechnology are discussed within a context of globalisation, global communications and social change. The unit also includes a study of the nature of science and technology and the nature of scientific knowledge. A major feature of the unit involves groups of students developing and delivering a ‘hypothetical’ on a contemporary science and technology issue affecting society.

**Courses:** ED51, ED47, ED90, ED91, ED82, ED92  
**Credit points:** KG  
**Semester:** 2

**MDB638 Trends in Learning of the Sciences**  
This unit enables professionals involved in mathematics, science, design technology, and information communication technology to critically reflect on curricular practices in the light of major trends in the context of education.

**Courses:** ED09, ED61, ED13  
**Credit points:** 12  
**Semester:** 1

**MDB639 Pedagogies in Learning of the Sciences**  
This unit enables professionals involved in mathematics, science and design technology to reflect on their pedagogical practices in the light of major changes in the curriculum affecting their practice.

**Courses:** ED09, ED61, ED13  
**Credit points:** 12  
**Semester:** 2

**MDN640 Managing Innovations in Teaching of the Sciences**  
This unit provides educators with knowledge and skills in managing innovations for the teaching of mathematics, science and technology education.

**Courses:** ED09, ED61, ED13  
**Credit points:** 12  
**Semester:** 2

**MDN641 Understanding Mathematics and Science in Educational Contexts**  
This unit provides opportunities to educators to analyse critically the mathematical and/or scientific content that their prospective clients or students have to engage with in a variety of contexts and learning environments.

**Courses:** ED09, ED61, ED13  
**Credit points:** 12  
**Semester:** 1

**MDN642 Digital Pedagogies**  
This unit includes a critical investigation of digital pedagogies and the changes they are making to the role of the teacher, and the interactions between students, teachers and subject content. The unit assists students in designing and moderating worthwhile learning experiences in online environments or physical environments that make use of digital technologies.

**Courses:** ED09, ED61, ED13  
**Credit points:** 12  
**Semester:** 2

**MDN643 Advanced Learning Networks**  
This unit includes a comprehensive examination of relevant theory, research, policy, and/or practice in the mediation of learning and communication through technology. Students are encouraged to critique the rhetoric and reality of ICT integration in learning networks.

**Courses:** ED09, ED61, ED13  
**Credit points:** 12  
**Semester:** 2

**MDP452 Middle Years: Mathematical Understandings**  
This unit will provide the content knowledge and pedagogical strategies to promote mathematical development (both cognitive and social) in the middle phase of learning. The unit will provide a theoretical framework and the opportunity to participate in collaborative problem tasks. There will be a focus on students developing a broader range of thinking and reasoning processes as they work with the mathematical content. Students will be encouraged to critically evaluate ideas, reflect on their learning and freely express personal viewpoints.

**Courses:** ED26, ED38  
**Credit points:** 12  
**Semester:** 1, 2

**MDP453 Middle Years: Transdisciplinary Science and Technology**  
This unit aims to develop the skills and understandings required to integrate science and technology KLA across the curriculum and create meaningful learning experiences that cater for the diverse needs of middle years students.

**Courses:** ED26, ED38  
**Credit points:** 12  
**Semester:** 2

**MDP455 Business Education Curriculum Studies 2 (ICT)**  
This unit is the second in a suite of three complementary units which can be undertaken in ICT Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior ICT Syllabus to understand mandatory aspects of the syllabus and will prepare students for their professional role as a teacher of secondary ICT education subjects.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 2

**Prerequisites:** CLP402  
**Campus:** KG  
**Corequisites:** MDP456

**MDP456 Mathematics Education Curriculum Studies 1**  
This unit provides an introduction to the teaching and learning of mathematics and to begin the development of your understanding of learning environments conducive to the effective learning of mathematics.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 1, 2

**MDP457 Mathematics Education Curriculum Studies 2**  
This unit is to further develop your understanding of the school mathematics curriculum and to extend your knowledge and understanding of inclusive learner-focused approaches to mathematics curriculum development.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 2

**Prerequisites:** MDP456  
**Campus:** KG

**MDP458 Mathematics Education Curriculum Studies 3**  
This unit extends your knowledge and understanding of mathematics curriculum with an emphasis on catering for the range of students engaged in secondary education, inclusive practices and diagnosis of mathematical learning difficulties.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 1, 2

**MDP459 Science Education Curriculum Studies 1**  
This unit is to provide you with opportunities to examine educational theory in order to understand the basis for teaching and learning in science and thus establishing and managing effective learning environments.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 1, 2

**MDP460 Science Education Curriculum Studies 2**  
This unit is to provide an opportunity for you to develop as a learner-centred teacher in the context of senior schooling, who can plan to meet the needs of individual students in a varied, stimulating and safe environment.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 2

**Prerequisites:** MDP459  
**Campus:** KG

**MDP461 Science Education Curriculum Studies 3**  
This unit is to provide opportunities for you to understand the theoretical underpinnings of an extensive range of strategies and resources used in the teaching of science.

**Courses:** ED38  
**Credit points:** 12  
**Semester:** 1, 2

**Corequisites:** MDP460  
**Campus:** KG
this the skills to retrieve information and experience in self directed learning, independent analysis and investigation. This unit allows students to pursue, in greater depth, a particular area of mechanical, medical or information engineering through self-directed learning, thereby developing their independent learning capabilities and expanding their knowledge of a chosen area of study.

Courses: ME80
Credit points: 12
Semester: 1, 2, 3

MEN04 Mechanical Engineering Specialised Unit 2
Professional engineers in the workplace are often required to undertake independent enquiry in very specific areas of mechanical engineering science. To do this they require the skills to retrieve information and experience in self directed learning, independent analysis and investigation. This unit allows students to pursue, in greater depth, a particular area of mechanical, medical or information engineering through self-directed learning, thereby developing their independent learning capabilities and expanding their knowledge of a chosen area of study.

Courses: ME80
Credit points: 12
Semester: 1, 2

MEN05 Mechanical Engineering Specialised Unit 3
Professional engineers in the workplace are often required to undertake independent enquiry in very specific areas of mechanical engineering science. To do this they require the skills to retrieve information and experience in self directed learning, independent analysis and investigation. This unit allows students to pursue, in greater depth, a particular area of mechanical, medical or information engineering through self-directed learning, thereby developing their independent learning capabilities and expanding your knowledge of a chosen area of study.

Courses: ME80
Credit points: 12
Semester: 2

MEN101 Research Methodology
Basic research methodology is an essential component for any student expected to undertake research. This unit provides the basic knowledge of research, qualitative and quantitative research methodologies and a range of techniques to enable students to become independent users of existing knowledge as well as research findings.

Courses: CE75, EE77, ME80
Credit points: 12
Semester: 1, 2

MEN102 Advanced Mechanical Engineering Studies
Students undertaking Masters level study of mechanical engineering require advanced research skills relating to the evaluation, organisation and presentation of information, data analysis, experimental design and instrumentation. This unit provides some of the advanced skills fundamental to mechanical engineering research that are required to undertake the research project and specialised units in the ME80 course.

Courses: ME80
Credit points: 12
Semester: 1, 2

MEN103 Mechanical Engineering Specialised Unit 1
Professional engineers in the workplace are often required to undertake independent enquiry in very specific areas of mechanical engineering science. To do this they require the skills to retrieve information and experience in self directed learning, independent analysis and investigation. This unit allows students to pursue, in greater depth, a particular area of mechanical, medical or information engineering through self-directed learning, thereby developing their independent learning capabilities and expanding their knowledge of a chosen area of study.

Courses: ME80
Credit points: 12
Semester: 1, 2

MEN104 Mechanical Engineering Specialised Unit 2
Professional engineers in the workplace are often required to undertake independent enquiry in very specific areas of mechanical engineering science. To do this they require the skills to retrieve information and experience in self directed learning, independent analysis and investigation. This unit allows students to pursue, in greater depth, a particular area of mechanical, medical or information engineering through self-directed learning, thereby developing their independent learning capabilities and expanding their knowledge of a chosen area of study.

Courses: ME80
Credit points: 12
Semester: 1, 2

MEN105 Mechanical Engineering Specialised Unit 3
Professional engineers in the workplace are often required to undertake independent enquiry in very specific areas of mechanical engineering science. To do this they require the skills to retrieve information and experience in self directed learning, independent analysis and investigation. This unit allows students to pursue, in greater depth, a particular area of mechanical, medical or information engineering through self-directed learning, thereby developing their independent learning capabilities and expanding your knowledge of a chosen area of study.

Courses: ME80
Credit points: 12
Semester: 2

MEN170 Systems Modelling and Simulation
This unit introduces the following: the concept of a model and model building; techniques for the solution of the models; examples of analytical models such as inventory models, Markov chains, queuing models; simulation as a decision making tool; modelling for simulation and practical exercises in simulation using computer simulation software in the areas of manufacturing systems and maintenance.

Courses: ME75, ME76, CE75, EE77, ME80
Contact hours: 32 hours over a two week block
Campus: GP
Credit points: 12

MEN171 Advanced Manufacturing Technologies
This unit includes the following: an overview of manufacturing systems engineering and applications of advanced computer aided drafting and design; implementation of CAD/CAM systems using three-dimensional modelling techniques; classification systems for part family formation for production and tooling; benefits of computer aided process planning; introduction and installation of flexible manufacturing cells and systems including robotics, automated guided vehicles, online computer aided inspection, automation integration, support technologies and planning for CIM.

Courses: ME75, ME76, ME80
Contact hours: 32 over a two week block
Campus: GP
Credit points: 12

MEN172 Cost Analysis and Asset Management
This unit provides students with the following skills: analyse cost and understand different costing methods and their implications; evaluate engineering decisions under different cost allocation methods; appreciate the role of variance analysis as a management tool; estimate capital, vehicle, fleet, and personnel costs; buy decisions and budgeting; life-cycle costing and economic asset management and life cycle costing.

Courses: ME75, ME76, CE75, EE77, ME80
Contact hours: 32 hours over a 2 week block
Campus: GP
Credit points: 12

MEN175 Energy and Environmental Management
This unit considers energy resources and usage in the context of global energy issues. Greenhouse, climate change and ozone layer depletion are covered because they are effecting energy are covered because they are effecting Engineering Practice. Specific topics include the following: properties and testing methods of solid, liquid and gaseous fuels; combustion calculations; flue gas analysis; energy tariffs and audits; major applications of energy management, for example buildings, process plant, automobile, air cabins, vehicle fleets; economic evaluation of energy projects; introduction and management of energy saving programs. Environmental aspects will be considered for each topic. Assessment includes an energy audit of a commercial/industrial site.

Courses: ME75, ME76, ME80
Contact hours: 32 hours over a two week block
Campus: GP
Credit points: 12

MEN177 Total Quality Management
This unit provides students with an understanding of the underlying philosophy and practice of TQM including learning some basic tools for quality control. Topics covered include the following: quality as a competitive strategy; the evaluation of quality management; elements of quality management; continual improvements; customer measurements; managing change; total employee participation; benchmarking, statistical process control; theory of constraints, Taguchi methods.

Courses: ME75, ME76, ME 80
Contact hours: 32 hours over a two week block
Campus: GP
Credit points: 12

MEN190-1 Project
In this unit a substantial piece of work relevant to the course is carried out by each student on an individual basis. A report is examined and marked by an academic supervisor in consultation with an industrial supervisor.

Courses: ME75, ME76, ME80
Campus: GP
UNIT SYNOPSIS

Credit points: 12  Semester: 1, 2, 3
► MEN190-2 Project
In this unit a substantial piece of work relevant to the course is carried out by each student on an individual basis. A report is examined and marked by an academic supervisor in consultation with an industrial supervisor.
Courses: ME75, ME76, ME80  Campus: GP
Credit points: 12  Semester: 1, 2, 3
► MEN241 Reliability and Maintenance Management
This unit addresses the following: overview of maintenance responsibilities and tasks; organisation for maintenance; creating a maintenance plan with reliability; availability; maintainability; repair pools; spare parts inventory management; cost downtime; downtime reduction; planning shutdowns/turnarounds; performance measures; documentation and document control; configuration management; computer based maintenance management systems; total productive maintenance (TPM); condition monitoring; strategic asset management.
Courses: ME75, ME76  Contact hours: 32 hours over a two week block
Campus: GP  Credit points: 12
► MEN272 Enterprise Resource Planning
The aim of this unit is to provide students with an understanding of the underlying philosophy and practice of resources planning. Topics covered include the following: functions and inter-relationships between the major components - demand analysis, production and operations planning and control, resource planning and control - manufacturing requirements planning (MRP II); supply chain management; total enterprise approach to business management. These principles are extended to the processing and service industries such as mining, oil, chemical and food processing, and to enterprises such as hospitals and airports.
Courses: ME75, ME76, ME80  Contact hours: 32 over a two week block
Campus: GP  Credit points: 12
► MEN273 Engineering Knowledge Management
This unit provides students with the skills in knowledge identification, knowledge development, knowledge preservation, knowledge representation and knowledge distribution in the corporate sector and the techniques associated with the design and development of knowledge management systems for engineering organisations. The unit also provides students with an understanding of the design, development and organisation of knowledge with an emphasis on the building blocks of knowledge management.
Courses: ME75, ME76, ME80  Contact hours: 32 over a two week block
Campus: GP  Credit points: 12
► MEN280 Engineering Project Management
The aim of this unit is to provide students with an understanding of the underlying philosophy and practice of project management. Topics covered include the following: the definition of project management; organisational structures; project planning; feasibility analysis; project organisation; contracts; project control; risk analysis; project termination.
Courses: BS93, ME75, ME76, CE75, EE77, ME80  Contact hours: 32 hours over a two week block
Campus: GP  Credit points: 12
► MEZ102 Advanced Mechanical Engineering Studies
Credit points: 12
► MEZ103 Mechanical Engineering Specialised Unit 1
Credit points: 12
► MEZ104 Mechanical Engineering Specialised Unit 2
Credit points: 12
► MEZ105 Mechanical Engineering Specialised Unit 3
Credit points: 12
► MEZ177 Total Quality Management
Credit points: 12
► MEZ190-1 Project
Credit points: 12
► MEZ273 Engineering Knowledge Management
Credit points: 12
► MEZ280 Engineering Project Management
Credit points: 12
► MGB201 The Legal Context of Employment Relations
The unit provides an overview of the complex legal, social and political arrangements underpinning organisational life in Australia. The employment relationship and its legal context is central to organisational operations. The unit addresses the identification and analysis of the rights and responsibilities of people at the workplace, and the institutions governing the conduct of the different parties involved in the employment relationship. Current issues are examined from the perspective of the interactions between individual workers, unions, employers, employer groups, tribunals, government and international bodies to enable students to understand the broader context of the legal obligations of the parties.
Courses: BS56  Prerequisites: MGB222 or MGB207  Contact hours: 3 per week
Campus: GP  Credit points: 12  Semester: 1
► MGB202 Equity and Diversity Management
The historical, legal and social perspectives on current issues surrounding equity and equality in diversity management particularly equal employment opportunity (including affirmative action and anti-discrimination initiatives) are investigated. In identifying strategic management approaches to diversity including implementing the EEO and AA processes identified by legislation, the unit questions and evaluates current management practices and research methods through investigating, analysing, and critiquing current EEO and AA approaches and plans.
Courses: BS56  Prerequisites: BS114  Contact hours: 3 per week
Campus: GP  Credit points: 12
► MGB203 Government-Management Interface
This unit provides students with an essential understanding of the public and dynamic relationship between government and management. The unit focuses upon the political context of management, government policies towards business, their processes of development and operational impacts, and the politics of governance and management of the public/private sector interface. The unit also examines the capacity of various business sectors to influence the political system of Australia in an international context.
Courses: BS56, IF28, IF30, IF47, IF48, IF61  Prerequisites: BS114 or 96 cp of approved study
Contact hours: 3 per week
Campus: GP  Credit points: 12  Semester: 2
► MGB207 Human Resource Issues and Strategy
This unit identifies a range of contemporary human resource management issues facing Australian organisations. These are explored and analysed through examining a range of alternative human resource programs, policies, and strategies. This course provides the student with an understanding of the range of human resource functions and provides a foundation for the development of professional practice in HRM in later units. This unit provides students with the knowledge and skills to address contemporary human resource issues in order to contribute to organisational efficiency and effectiveness.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF60, IF62, PU40  Prerequisites: BS115
Incompatible with: CTB207  Contact hours: 3 per week
Campus: GP  Credit points: 12  Semester: 1, 2
► MGB209 Occupational Health and Safety Management
This unit provides an overview of issues related to occupational health and safety. This unit acquaints students with the scope of the occupational health and safety problem in Australia as well as the legislative environment. It also introduces them to analytical skills needed to manage these problems. The unit takes a strategic and multi-disciplinary approach to the management of occupational health and safety.
Courses: BS56  Prerequisites: BS114  Contact hours: 3 per week
Campus: GP  Credit points: 12  Semester: 1
► MGB210 Production and Service Management
This unit extends general management approaches to the production operations subsystems of service and manufacturing organisations. The unit focuses on the development of productive resources in order to maximise the added value of services and products. Issues of quality and efficiency are considered analytically in terms of broader strategies and constraints. It considers the opportunities that new technology brings to operational strategies in both manufacturing and service. Project management principles are considered in relation to resource deployment and continuous improvement.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62  Prerequisites: MGB220 or AMB201

QUT HANDBOOK 2006 · PAGE 737
Incompatible with: CTB234
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► MGB211 Organisational Behaviour
The unit examines theory and research related to individual and collective human behaviour in organisations. A multi-level approach that focuses on individuals, groups, the organisation as an entity, and the relationships among these elements is adopted. In addition, the unit addresses major themes in the field and provide students with an opportunity to use the body of knowledge to diagnose, interpret and understand issues within these themes. This unit helps students to understand the role that people, as individuals and in groups, play in organisations and to apply this knowledge in creating more effective and efficient work places.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB220 or AMB201
Corequisites: MGB220

Incompatible with: CTB211
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2

► MGB216 Managing Technological Innovation in Global Business
This unit explores the links between research, technical processes, product innovation and management structure, policy and practice. It examines the impact of changing technology, such as information technology, on organisations. This unit examines the internal organisation of enterprises with particular respect to the management of human, material and financial resources, technological innovations, and social change. Other issues covered in this unit include the nature of product and process innovation, technology transfer, intellectual property and licensing, government policy, and the role of research and development.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB222
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► MGB218 Venture Skills
Entrepreneurial management is becoming a critical skill for rapidly growing small and medium sized enterprises (SMEs) and for small businesses (SBUs) in large corporations. This unit examines and compares the venture growth processes for entrepreneurial managers. This unit focuses on the start up issues for the entrepreneurial venture. It considers the rapid growth issues in the identification, analysis and learning processes for SMEs.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62, LS50
Prerequisites: 96 Credit points of approved study
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► MGB220 Management Research Methods
This unit is designed to provide students with a comprehensive introduction to research and introduce them to basic qualitative and quantitative analysis techniques. The lecture and tutorial program proceeds through the general research process, establishing a research question, determining a theoretical framework, collecting the data, conducting data analysis, drawing conclusions, and reporting research outcomes. An emphasis is placed on both qualitative and quantitative research methodologies.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: BS5115
Incompatible with: AMB201, COB334, COB303, EGB1105
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► MGB221 Performance and Reward
This unit examines the key human resource management functions of job analysis, performance management and compensation management from a strategic perspective with a view to optimising individual and organisational performance. A substantial level of analytical and professional competence is expected in this unit, which is a key to the integration of HR processes and organisational requirements.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB207
Incompatible with: MGB328
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► MGB222 Managing Organisations
This unit develops an understanding of the organisation in both its internal and external environment and the demands of managing the organisation's resources and performance. It raises contemporary issues in management and their implications for competitive advantage, focusing on various organisational systems including HR, technology, structure and design. This unit provides a foundation of knowledge for the management and HRM majors. In this unit there is a focus on strategy, leadership and internationalisation.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: BS5115
Incompatible with: CTB232
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► MGB223 Creating New Enterprises
This unit deals with the development of a business plan for the potential launch of student business ideas. The unit is designed for those individuals interested in creating a new venture or working in industries as employees of venture owners or those that serve this sector. Students build a comprehensive plan of their business concept.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62, IT272
Incompatible with: CTB233
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► MGB224 Australian Industrial Relations
This unit traces the evolution of current institutions and practices in Australian industrial relations and examines them within the broader context of social and industrial relationships. Issues are viewed from many perspectives, seeing them as a product of a range of political, social, economic, legal and industrial experiences. The unit aims to provide an insight into the complexities of Australian industrial relations.
Courses: BS56
Prerequisites: BS5115 or CTB115 or 96 cp of approved study
Incompatible with: MGB204, MGB329, MGB332

Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

► MGB304 Human Resource Information Management
This unit focuses on human resource information management. Students are coached to understand the storage, retrieval, and utilisation of data in HR operations. A substantial level of analytical and professional competence is expected in this subject, which is a key to the utilisation of HR information to aid decision-making. In addition, students are introduced to the basic operation of a computerised human resource information system (HRIS) to appreciate the role of technology in HR information management.
Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB221
Incompatible with: MGB221
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

► MGB306 Independent Study
This unit enables students to demonstrate an ability to direct their own learning, a key competence for professionals who must keep themselves up-to-date in their area of expertise. Either individually or in small groups, students undertake one or several learning activities with the approval of a supervisor. Appropriate activities include literature review, research (mini-thesis), project, practicum (work placement), or an alternative deemed acceptable by the supervisor.
Courses: BS56
Prerequisites: 96 Credit points of approved study
Contact hours: Flexible Mode  Campus: GP
Credit points: 12  Semester: 1, 2, 3

► MGB307 International Human Resource Management
This unit offers students an international business management perspective, and develops a strategic appreciation of the role of human resources management in an international context. Specific human resource processes are detailed, including the following: expatriate selection; cross-cultural training; management and remuneration; global management and the competencies required to manage a culturally diverse workforce; the relationship between international human resource management and international business relations; and contemporary research in international human resource management. The Asia-Pacific region is a focus for discussions throughout this unit.
Courses: BS56
Prerequisites: BS5115 or CTB115 or 96 cp of approved study
Contact hours: Flexible Mode  Campus: GP
Credit points: 12  Semester: 2

► MGB309 Strategic Management
This unit introduces students to the fundamental elements of strategy, which can be used in the decision-making process, are placed in a framework that is developed within the particular context of Australia’s economic development position. The emphasis is upon process and content

Q U T H A N D B O O K  2 0 0 6  •  P A G E  7 3 8
issues that affect the strategic performance and positioning of the organisation. This involves creating an understanding of the universal building blocks of competitive advantage, and involves creating an understanding of the environment of recruitment and selection, with a particular emphasis on legal issues. Recruitment strategies are evaluated and considered from the perspective of the organisation and the individual. Personnel selection techniques are examined in relation to technical issues of reliability, validity, fairness, and applicability. Practical skills in designing personnel selection techniques are developed, including the opportunity to develop skills in the interview process.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MBG222
Incompatible with: MB314, CTB309
Contact hours: 3 per week
Campus: GP and CA
Credit points: 12
Semester: 1, 2

► MBG312 Negotiation Skills
This subject concentrates on the theory and practice of negotiation as applied to the basic concepts of integrative and distributive bargaining domestically and internationally. The process and phases of negotiation are practiced by students, culminating in their ability to negotiate an extensive and complicated collective bargaining agreement.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB211
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► MBG314 Organisational Consulting and Change
Managing change is a fundamental skill required by prospective managers and professionals. This unit provides opportunities for students to develop a theory in practice orientation to consulting to individuals, groups, and organisations. Hence content theory and process theory is addressed. The focus of this unit is on human process issues and change. The unit examines a range of human process interventions designed to improve organisational effectiveness. Attention is also given to change strategies that are socially and culturally inclusive. Graduates of this unit should be able to be productive members of organisational change teams.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB211
Contact hours: 3 per week
Campus: GP, CA
Credit points: 12
Semester: 1, 2

► MBG315 Personal and Professional Development
This unit develops personal, interpersonal and professional competencies (in both cognitive and affective domains) necessary for a human resource or management professional. It develops personal awareness and understanding, interpersonal competencies, and professional skills. This unit also examines influence processes, negotiation and conflict resolution and stress management. It emphasises the design of processes to achieve outcomes and skills of reflective practice. The focus is on developing skills to enhance individual competence and leadership skills to enhance effectiveness.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Contact hours: 3 per week
Campus: GP, CA
Credit points: 12
Semester: 1, 2

► MBG320 Recruitment and Selection
This unit draws on conceptual foundations established in MBG211. It examines the environment of recruitment and selection, with a particular emphasis on legal issues. Recruitment strategies are evaluated and considered from the perspective of the organisation and the individual. Personnel selection techniques are examined in relation to technical issues of reliability, validity, fairness, and applicability. Practical skills in designing personnel selection techniques are developed, including the opportunity to develop skills in the interview process.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB221
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► MBG325 Advanced Practice in Training and Development
This unit focuses on designing, implementing and evaluating systems for individual and organisational learning as part of a strategic approach to human resource development. The unit relies heavily on empirical and theoretical works to inform practice. Throughout the semester students examine in depth the key cognitive and motivational theories relating to training. They also examine advanced training methodologies and career development, focus on transfer of training and investigate how to evaluate the effectiveness of training programs using research designs. The unit also highlights the important characteristics of a competent trainer.

Courses: BS56
Prerequisites: MBG331
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► MBG331 Training and Development
This unit introduces students to the theory and competencies required of a beginning or an occasional trainer. This includes adult learning theory applicable to training in a vocational setting, research and competency development. Topics include the following: national training framework; instructional models and theories of adult learning; training needs analysis; training objectives; training evaluation; training models; training aids/audiovisuals; and training administration. This unit has a strong focus on mastery of theoretical foundations as well as on learning by doing.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB207
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 2

► MBG334 Managing in a Changing Environment
This unit provides students with conceptual and analytic tools required for managing changing environments. The emphasis is on developing an understanding of the management competencies required for managing flexibility, innovation and change. The unit moves beyond a focus on ‘dot.com’ companies to examine how a range of organisations both small and large are engaging issues associated with an increasing emphasis on technology.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61
Prerequisites: BSB212 or MBG222
Incompatible with: BSB312, CTB334
Contact hours: 3 per week
Campus: GP, CA
Credit points: 12
Semester: 1, 2

► MBG335 Project Management
This unit develops knowledge in the areas relating to effective management of projects (as distinct processes). This knowledge is gained by focusing on the central issues of project selection, modelling, planning, control and evaluation. Case study projects are used throughout the unit and are mainly from the services industry sector. The unit seeks to develop the technical skills (tools and techniques) as well as the people (behavioural) skills needed for effective management of projects.

Courses: BS56, IF28, IF30, IF41, IF47, IF48, IF61, IF62
Prerequisites: MGB222
Incompatible with: CTB335
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1

► MBG337 Special Topic
This unit allows students to undertake special study on a topic area relevant to particular needs. It permits an in-depth examination of an issue of importance. The content varies depending upon the issue examined, and the academic member(s) involved (including short-term visiting academics).

Courses: BS56
Contact hours: Flexible Mode
Campus: GP
Credit points: 12

► MBG338 Human Resource Management Workplace Learning
This unit entails a structured program of workplace learning in which students are exposed to a variety of organisational issues. For the duration of their experience, students work on a specific HPM project of relevance to the host organisation. Building upon knowledge acquired in the HRX major, students’ exposure to HRM in an actual organisational setting enhances understanding of links between theory and practice and develops skills and abilities through a professional learning experience.

Courses: BS56
Campus: GP
Credit points: 12
Semester: 2

► MGN402 Government-Business Relations
In this unit students develop an understanding of the relationships between business and government in an historical, contemporary and comparative context. The course will focus on the following: the interaction between politics and the economy, particularly in Australia; the historical development of the relationships between the private and public sectors; and the impact that policies and actions each have on the operations of the other.

Courses: BS93
Contact hours: Flexible Mode
Campus: GP
Credit points: 12
Semester: 1

► MGN404 Managing and Organising Global Firms

QUT HANDBOOK 2006 • PAGE 739
This unit aims to provide a detailed examination of the typical impacts of the international environment upon the organisation, its management, structure, operations and human resource capacities. In addition, the unit discusses management issues to be faced by organisations entering into export markets.

Courses: BS39, BS93
Incompatible with: GSN401
Contact hours: 3 per week
Campus: GP
Credit points: 12

► MGN409 Introduction to Management

This unit examines the following: the functions and roles of managers; concepts and principles and their practical applications; the key management functions; areas of planning, organising, staffing, directing and controlling; production/operations management and the management of quality; entrepreneurship and business planning; and important problems, opportunities and trends facing managers in Australia as analysed from the viewpoint of relevant academic disciplines.

Courses: BS39, BS93
Incompatible with: GSN401
Contact hours: 3 per week
Campus: GP
Credit points: 12 Semester: 1, 2

► MGN410 Labour-Management Relations

This unit looks at the following: employee relations; employee and union action; the role of governments and industrial tribunals; alternative methods and pressures to change traditional Australian systems; the Australian system of labour management relations; systems of regulation in the employment area; negotiating skills; and the mechanisms required for mobilising change in this area.

Courses: BS39, BS93
Contact hours: Flexible Mode Campus: GP
Credit points: 12 Semester: 2

► MGN412 People in Organisations

This subject aims to provide a broad understanding of organisational behaviour as a base for future study and practice of management. It moves from a micro-perception of individual behaviour through the interface between the individual and the organisation to the overall characteristics of organisations which shape the behaviour of their members. The aim is to provide an understanding of why employees feel and act the way they do in organisations and considers methods for enhancing positive employee attitudes and behaviours and organisational effectiveness.

The emphasis is on understanding basic assumptions and models, major theoretical perspectives, methods of measurement and practical applications.

Courses: BS39, BS93
Incompatible with: GSN409; GSN419
Contact hours: 3 per week
Campus: GP
Credit points: 12 Semester: 1

► MGN421 Strategic HRM

HRM is concerned with the relationship between people management strategies and organisational goals and objectives. This capstone unit provides HRM students with the opportunity to apply their learning to this relationship in a systematic way. It requires them to produce high quality HRM advice that provides direction for practicing line managers consistent with organisational goals and objectives. The learning strategies in the unit challenge students to identify contemporary issues of organisation and management and to interpret these using the paradigms of HRM.

Courses: BS39, BS93
Contact hours: Flexible Mode Campus: GP
Credit points: 12 Semester: 2

► MGN422 Contemporary Issues and Practices in Employment Relations

This unit provides human resource practitioners with the skills and knowledge to cope with changing employee relations conditions and work practices in Australia. The focus of the unit is on issues relating to changes in industrial relations and how these impact on HR practice. The pressures to move to an EB system, negotiation of EB agreements and related work practice issues such as the impact of these changes on health and safety, work and family responsibilities, workforce diversity and the increasing use of technology are addressed.

Courses: BS39, BS93
Contact hours: Flexible Mode Campus: GP
Credit points: 12 Semester: 2

► MGN423 Contemporary Strategic Analysis

This unit focuses upon developing managers’ understanding of the strategy concept and placing the fundamental elements of strategy in a framework for use in the decision making process. Taking the perspective that many managers make decisions that can have strategic implications, the emphasis is upon studying those issues that can affect the strategic positioning of the organisation. This involves creating an understanding of the relationship between strategies, blocks of competitive advantage at the business, corporate and international levels. By understanding the nature and determinants of competitive and comparative advantages, students will be well positioned to take a more strategic perspective in their organisational activities.

Courses: BS39, BS93
Incompatible with: GSN407; MGN504
Contact hours: 3 per week
Campus: GP
Credit points: 12 Semester: 1, 2

► MGN424 International Dimensions of HRM

This unit provides students with an overview of the complex array of issues that face organisations when managing their human resources in an international context. Taking an organisational level focus to understanding how best to manage people internationally, the unit strategically overviews the need to integrate organisational policy and national cultural and legislative constraints in maximising performance of international managers and organisations. The unit presents the view that HRM should be strategically integrated into the development of international operations from start. It addresses the role of HRM in engendering global consciousness and global transformation.

Courses: BS39, BS93
Prerequisites: MGN427
Contact hours: Flexible Mode Campus: GP
Credit points: 12 Semester: 1

► MGN425 The Context of Public Management

The aim of this unit is to acquaint students with the context within which public bureaucracies function, particularly the special characteristics of public accountability which distinguish these bureaucracies from private sector organisations. The primary focus is on the Australian scene, although students draw comparisons from their own experience outside Queensland. Topics include the following: the role of interest groups, parties and external government actors in the formulation of public policy; accountability requirements through parliamentary and other agencies; alternative mechanisms for service delivery; and inter-governmental relations, including the role of local governments in the federal system.

Courses: BS39, BS93
Contact hours: Flexible Mode
Campus: GP
Credit points: 12

► MGN426 International Trends in Public Management

This unit examines major international trends and issues in public management, especially the impact of the new public management, focused upon corporatisation and privatisation, rationalisation and devolution of decision making. It discusses the evolution of institutional structures of administration and policy making under the pressure of global economic and political forces. The effect of international trends is examined with reference to the changing nature of public management within particular national contexts.

Courses: BS39, BS93
Contact hours: Flexible Mode Campus: GP
Credit points: 12 Semester: 2

► MGN427 Human Resource Management

This unit is designed to introduce students to the importance of human resource management for the effectiveness of organisations operating in complex and/or global environments and the quality of work life. The subject examines human resource management from multiple consistency, functional and strategic perspectives. It utilises an open systems model to introduce some of the key processes of personnel management, which are treated at a theoretical and skill level. The subject fosters knowledge, analytical and operational competencies.

Courses: BS39, BS93, GS41, GS85, GS86
Contact hours: 3 per week
Campus: GP
Credit points: 12 Semester: 1, 2

► MGN428 Creating New Businesses

This unit is designed for the in depth analysis of starting small businesses and for the development of a comprehensive business plan. This unit emphasises hands on leadership for business owners in innovative firms, such as high tech industries. In this new environment, extensive human resource skills are required to start up and operate small businesses.

Courses: BS93
Contact hours: 3 per week
Campus: GP
Credit points: 12 Semester: 2

► MGN429 Staffing Policies and Strategies

This unit examines and critiques staffing policies and processes from both strategic and technical perspectives with a focus on improving organisational staffing to enhancing organisational effectiveness and capabili-
### UNIT SYNOPSIS

This unit provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

**Courses:** BS93

This unit considers the origins, nature and effect of social change on individuals, organisations and communities. Theories and models of change are used to explore planned and unplanned changes currently occurring, particularly as these relate to possible futures. Emphasis is on the strategies and skills required to initiate and participate in effective change management.

**Courses:** BS39, BS93  
**Contact hours:** Flexible Mode  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

This unit provides a basic methodological framework for the systematic development of those skills with two related objectives: to examine a range of models of public policy processes with a view to determining their validity and utility; and to develop a capacity for policy analysis, utilising a variety of conceptual frameworks. Topics include policy design, formation and implementation, and theories of policy.

**Courses:** BS39, BS93  
**Contact hours:** Flexible Mode  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

This unit aims to develop the student's capability to apply mechanical engineering and management principles in solving a real world industry problem. Students are required to practice theoretical, analytical and experimental techniques taught in previous years of the course and also demonstrate practical skills in synthesis/design and manufacture as well as project management. Topics include problem definition and solution, literature review, and industry research.

**Courses:** ME40  
**Credit points:** 36  
**Semester:** 1, 2

- **MGN505 Consulting and Change Management**  
  - This unit considers the origins, nature and effect of social change on individuals, organisations and communities. Theories and models of change are used to explore planned and unplanned changes currently occurring, particularly as these relate to possible futures. Emphasis is on the strategies and skills required to initiate and participate in effective change management.
  - **Courses:** BS39, BS93

  - **Credit points:** 12  
  - **Semester:** 1

This unit provides an understanding of programme management and evaluation in the public sector with an emphasis on skills development, theory and methodology of evaluation research, qualitative and quantitative tools and the application of these to a public sector program.

**Courses:** BS39, BS93  
**Contact hours:** Flexible Mode  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

Managing High-Performance Organisations

Managing High-Performance Organisations is designed to provide a bridge between HRD discipline specific and strategic/ general management perspectives. The unit is therefore a centrepiece of the postgraduate HRM program. The unit serves the vitally important role of locating HRM in to its broader organisational and general management context. It also aims to develop advanced level business knowledge and skill and develop conceptual frameworks for integration and high level impact of HRM with business success and performance.

**Courses:** BS93, BS39  
**Prerequisites:** MGN409  
**Contact hours:** 3  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2

This unit further develops students' capacity to analyse, evaluate and solve business problems and encourages them to develop the facility for independent thought and critical analysis. Students are required to examine a human resources function in an organisation, and report observations. They are also required to relate these observations to relevant theory and recent research and develop an integrated view of human resources, including its functions, processes, stakeholders, and environment. Finally, the unit focuses on any conceptual or theoretical research or practical material relevant to the cases.

**Courses:** BS63, BS92  
**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2, 3

This unit considers the origins, nature and effect of social change on individuals, organisations and communities. UNIT SYNOPSES

► **MMB112 Dynamics**

This unit concerns the motion of machines and structures that have to operate with high speeds and accelerations and the application of principles of mechanics, in particular dynamics. The principles are basic to the analysis and design of moving structures, ranging from ground and air vehicles to robotic devices and automatic control systems. Contents includes the following: fundamental equations of kinematics; Newton’s law of motion; coordinate systems in plane motion; fundamental equations of particle kinetics; energy, power, impulse and momentum; kinematic analysis of rigid bodies in plane motion, relative motion and motion relative to rotating axes; kinetics of rigid bodies.

**Courses:** MEB41, MEB42, MEB48

**Prerequisites:** MAB180 or MAB131, CEB109

**Contact hours:** 6 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **MMB211 Mechanics 1**

All engineering designs must possess an appropriate/adequate degree of stability before they can be considered safe and reliable in service. Mechanics 1 provides a synthesis of knowledge from the general principles of mechanics and demonstrates how this can be used to ensure design integrity and design assessment. The unit introduces students to the theory of elasticity and plastic parameters such as stress and strain; analysis and design of pressurised thin walled cylinders and spheres; deflection of beams; direct and shear stresses during beam bending; buckling of columns; combined loading of structures and machine members; yield criteria for safe elastic loading.

**Courses:** MEB36, MEB41, MEB42, MEB48

**Prerequisites:** MAB132, CEB109

**Contact hours:** 5 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **MMB212 Mechanics 2**

Topics covered include the following: kinematic and dynamic analysis of planar linkages and mechanisms; link synthesis and its application to the design of mechanisms; determination of static and dynamic forces and torques due to inertia and other effects in mechanisms; kinematic analysis of gears and gear systems; further analysis of stress and strain; torsion of prismatic sections and thin-walled sections; axisymmetric problems; energy methods; thin plates.

**Courses:** MEB41, MEB42

**Prerequisites:** MMB211 or MMB313, MMB112

**Contact hours:** 6 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **MMB232 Materials Technology**

Topics covered in this unit include: industrial shaping of metals; solidification theory and phase transformations; revision of iron-carbon phase diagrams; steels and heat treatments; casting - alloys, defects; and microscopic examination of materials; fundamentals of ferrous metallurgy; non-ferrous metallurgy; welding and joining technologies; non-destructive testing; engineering with ceramics; processing and properties of polymers; composite materials; optical materials; fracture mechanics, fracture, fatigue and creep.

**Courses:** MEB36, MEB41

**Prerequisites:** MMB313

**Contact hours:** 6 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **MMB251 Aerodynamic Principles**

This unit includes the following: introductory concepts of fluid mechanics and thermodynamics; conservation of mass, energy and momentum; compressible and incompressible flow; dimensional analysis; experimental aerodynamics and aerodynamic coefficients; Reynolds number and Mach number effects; estimation aerodynamic forces and moments; fundamentals of aircraft performance; estimating range and endurance; take off and landing calculations; flight envelopes.

**Courses:** EEB48

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **MMB252 Thermofluids**

Topics covered in this unit include the following: heat transfer by convection, conduction and radiation; properties of working fluids including mass and heat transfer equations; heat engines, compressors, condensers and heat exchangers; primary and secondary steam cycles; basic thermodynamic and refrigeration cycle; multi stage compression; cycle design and characteristics; chemical engineering applications; simple exergy analysis; energy conservation and the second law of thermodynamics.

**Courses:** MEB36, MEB40, MEB41, MEB48, MEB42

**Prerequisites:** MAB132, CEB109

**Contact hours:** 6 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **MMB281 Fundamentals of Mechanical Design**

This introductory design unit covers introduction to mechanical design, design procedure, system and functional approach to design, universal design and design for manufacturability, concept development, engineering creativity, load analysis and development of computational scheme, general strength considerations, introduction to fatigue, shaft design, deflection and load sharing, analysis of forces in gear trains. Students also learn Computer-aided Design and Drafting software starting from simple shapes and advancing to 3D modelling.

**Courses:** MEB41, MEB42, MEB48

**Prerequisites:** BNB007 or MMB191

**Corequisites:** MMB211

**Contact hours:** 5 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **MMB292 Biomaterials**

Topics covered in this unit include: an understanding of the relationships between the properties, failure mechanisms, processing and microstructures of various materials used for medical applications and their interaction with human tissues; an understanding of the fundamentals of the use of materials in biomedical environments; an understanding of the fundamentals of materials properties and processing; consideration of metallic, ceramic, polymeric implant materials; composites as biomaterials; structural property relationships of biomaterials; tissue response to implants; soft tissue replacements; hard tissue replacements.

**Courses:** MEB48

**Prerequisites:** MMB131

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **MMB300 Project 2T**

The aim of this unit is to provide students with the capability to understand mechanical engineering principles and apply them to the formulation and solution of specific engineering problems in design and development tasks. The unit involves the application of mechanical engineering principles and the communication of ideas orally and in the presentation of a formal report.

**Courses:** MEB36  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2

► **MMB302 Project 2T**

The aim of this unit is to provide students with the capability to understand mechanical engineering principles and apply them to the formulation and solve specific engineering problems in design and development tasks. The task may involve investigation in applied research projects or industrial based projects. Students acquire the ability to communicate solutions orally and in a formal report form.

**Courses:** MEB36  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2

► **MMB311 Mechanics 3**

This unit covers two separate Mechanical Engineering disciplines: the study of vibration in machines and structures and the study of automatic plant control. Students gain an understanding of transient behaviour of mechanical systems. In many instances it is the transient loads in machines or departures from the design operating condition in process plants that causes mechanical failure or unacceptable departure from product specifications. In the vibration module, the unit covers single degree of freedom systems, damped vibration, multi-degree of freedom systems with steady and transient vibrations.

**Courses:** MEB41

**Prerequisites:** MAB133, MMB112

**Contact hours:** 6 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1

► **MMB312 Mechanical Measurement**

This unit deals with measurement techniques and instrumentation systems required in mechanical engineering applications. It covers the basic knowledge of static and dynamic mechanical measurement techniques with an emphasis on the measurement of position/velocity/acceleration, stress/strain, force/torque/power, vibration/noise and pressure/flow/temperature. It also covers hands-on experience in measurement techniques and instrumentation.

**Courses:** MEB36

**Prerequisites:** MAB105, EEB112, EEB220

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2

► **MMB313 Mechanical Engineering Studies**

The objectives of this unit are to provide students with revision in basic knowledge in mathematics and mechanics of solids to enable smooth articulation into the advanced standing programs and provide sufficient background in the application of knowledge in the use in the latter part of the course and project work. The subject matter covered includes second order ordinary differential equations; eigenvalue extraction; moments of inertia; Fourier series; basic statics; analysis of beams; torsion; two-dimensional stress
analyzing; thin-walled pressure vessels; yield criteria.

Courses: MEB41
Credit points: 12  Contact hours: 6 per week  Semester: 2  Campus: GP

MMB351 Thermodynamics

Topics covered in this unit include: review of basics: steam cycles and plant; nozzles, impulse and reaction turbines; gas turbines - basic and refined cycles; mixtures and Dalton’s Law; refrigeration cycles and plant; chemistry of combustion and water treatment; conduction, convection and radiation; condensation and boiling; forced and free convection; analysis of heat exchangers.

Courses: ME41, ME42
Credit points: 12  Contact hours: 6 per week  Semester: 2  Campus: GP

MMB352 Fluid Mechanics

This unit provides students with an understanding of unsteady flow in closed conduits, performance of rotodynamic machinery used in fluid systems (including pumps, water turbines and hydraulic transmissions), incompressible flow around solid bodies (including potential flow and boundary layer flow), design and interpretation of hydraulic and pneumatic circuits (including graphical symbols, fluid logic, components of fluid systems) and basic compressible flow (including normal shock waves).

Courses: ME41, ME42
Credit points: 12  Contact hours: 6 per week  Semester: 2  Campus: GP

MMB353 Tribology

This unit builds upon the design units in the courses. Topics covered include: introduction to tribology and fundamentals of dry contact mechanics; specification and measurement of surface topography; review of the fundamentals of friction and the modes of wear; regimes of lubrication (hydrodynamic, hydrostatic, boundary and elastohydrodynamic); properties of lubricants; including additives. Bearing design (fluid film journal and thrust pad bearings); lubrication of gears, rolling element bearings, human and prosthetic joints; lubricant degradation and reclamation; rapidly biodegradable products; advanced condition monitoring techniques.

Courses: ME40, ME41, ME42, ME43, ME44
Credit points: 12  Contact hours: 4 per week  Semester: 2  Campus: GP

MMB371 Manufacturing Processes

This unit provides an understanding of the basic principles of manufacturing and application aspects of the various conventional and non-traditional manufacturing processes commonly used in modern manufacturing. The unit is split into two modules: Module 1: Introduction to Manufacturing and Module 2: Casting, Forming and Joining Processes. These modules cover basic mechanisms and the related basic theories, application, and economics essential to mechanical and manufacturing engineering.

Courses: MEB41, MEB42

Credit points: 12  Contact hours: 5 per week  Semester: 2  Campus: GP

MMB374 Design for Manufacturing

Topics covered in this unit include the following: introduction to design for manufacturing in the context of concurrent engineering; principles of solid modelling, its importance in a concurrent engineering environment; the idea of rapid prototyping and tooling; introduction to the use of CAD/CAM software for rapid product development; basic understanding of creating manufacturing specification.

Courses: ME40
Credit points: 12  Contact hours: 5 per week  Semester: 2  Campus: GP

MMB375 Industrial Engineering

This unit develops skills and understanding in the concepts and techniques of engineer facilities planning and location, productivity and its measurement and improvement, and job design with due consideration to ergonomics. Topics include introduction to industrial engineering, engineering process, facilities planning and design, material handling, and productivity and performance methods.

Courses: ME41
Credit points: 12  Contact hours: 6 per week  Semester: 2  Campus: GP

MMB376 Professional Practice (Engineering Management)

The unit introduces students to the basic concepts and theory in engineering management. Students develop an understanding of real life problems and applications of engineering management. Students also develop people skills, management skills, and oral and written communication skills.

Courses: ME41
Credit points: 12  Contact hours: 5 per week  Semester: 2  Campus: GP

MMB378 Design of Mechanical Components and Machines

This design unit covers the design of mechanical components and machines: materials selection in design; fasteners and power screws; riveted, welded and bonded joints; shafts and associated parts; gearing (spur, helical, bevel, worm, cyclo-, and harmonic); clutches, couplings and brakes; cams, springs, frames and housings; design for manufacturability; selection of lubricants and methods of lubrication; machine components; selection of lubricants and methods of lubrication; and manufacturing planning and control. This unit is designed to develop an understanding of machine condition monitoring and maintenance in the design and management of bio-engineering devices. A knowledge of manufacturing processes, fundamentals of engineering design, engineering drawing and manufacturing materials is assumed. Contents include; design for manufacture, materials selection, computer-aided design and solid modelling, rapid prototyping techniques, user interfaces, and case studies of selected medical devices.

Courses: ME48

Credit points: 12  Contact hours: 4 per week  Semester: 2  Campus: GP

MMB400 Industry Project

Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision and within industry. The BE(Mech) course (like any engineering course) requires that students are capable of using their initiative
to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in mechanical engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

Courses: ME41, ME42
Contact hours: 40
Credit points: 48 Semester: 1, 2

► MMB401-1 Project
Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision. The BE(Mech) course (like any engineering course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in medical engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

Courses: MMB401-1 Project
Campus: GP Credit points: 24 Semester: 1, 2, 3

► MMB401-2 Project
Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision. The BE(Mech) course (like any engineering course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in manufacturing engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

Courses: ME41, ME42
Campus: GP Credit points: 24 Semester: 1, 2, 3

► MMB402-1 Engineering Management Project
Students undertake a project applying mechanical engineering and management principles to solve a real world industry problem.

Courses: MMB402-1 Project
Campus: GP Credit points: 24 Semester: 1, 2

► MMB409-1 Project
Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision. The BE(Medical) course (like any BE course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in medical engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

Courses: ME48
Campus: GP Credit points: 24 Semester: 1, 2, 3

► MMB409-2 Project
Professional engineers are required to manage projects and this unit provides a vehicle for students to undertake a structured, individual project program under supervision. The BE(Medical) course (like any BE course) requires that students are capable of using their initiative to manage a major project to satisfactory completion. The project is to be a substantial piece of work relevant to the course and carried out by each student on an individual basis. It is to investigate and analyse a real technological or managerial problem in medical engineering and apply solutions that take into consideration both technological and economic factors. Students are required to present seminars and a final thesis.

Courses: ME48
Campus: GP Credit points: 24 Semester: 1, 2

► MMB410 Advanced Automatic Control
Continuous automatic control of mechanical systems is fundamental to the automation of manufacturing and process plant. This subject exposes the student to the practical issues of design of automatic control systems using the ‘classical control’ theory taught in Mechanics 3.

Courses: ME41, ME42
Prerequisites: MAB133, MMB311
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 2

► MMB412 Finite Element Analysis
Design engineers must be exposed to modern techniques of analysis for design evaluation and optimisation. The finite element method provides a means of achieving this goal. Topics covered in this unit include the following: introduction to the finite element method; introduction to simple models of material and structural behaviours; the Galerkin finite element approximation technique for model differential equations; finite element and their characteristics; interpolation and shape functions and their relevance in FEA. All students are introduced to a commercial software package and carry out analysis of engineering problems using the software.

Courses: ME41, ME42
Prerequisites: MAB133
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 2

► MMB431 Industrial Noise and Vibrations
The unit is concerned with the study of methods of noise and vibration measurement and control in industry. Students are required to be capable of modelling and predicting noise and vibration in an industrial environment. Topics covered include the following: instrumentation and measurement of noise and vibration; behaviour and analysis of sound in finite rooms; methods of sound insulation; sound transmission through partition and noise reduction through partition; vibration generation and transmission; measuring vibration and analysis; instrumentation; vibration condition monitoring; balancing of rotating machines.

Courses: ME41, ME42
Prerequisites: MMB311
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 2

► MMB430 Advanced Materials
Topics covered include: materials selection for weight critical applications; aluminium and its alloys, principles of age hardening, titanium alloys, issues in processing aluminium; light alloys - magnesium, titanium alloy groups and uses; fibre composite materials - Young’s modulus, strength and fracture, fibre composites, design with composites; introduction to thin film deposition - physical and chemical vapour deposition, sol-gel deposition, thin film analysis and microstructure; ceramic structures and processing - classification of structures, structure-property relationships, defects in ceramics, ceramic processing; special topics in the field.

Courses: ME41, ME42
Prerequisites: MMB232
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 2

► MMB450 Air Conditioning
This unit involves the design of various processes used in air conditioning such as heat exchangers and cooling towers. It introduces students to the pumping of slurries, according to relevant codes.

Courses: ME41, ME42
Prerequisites: MMB252
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 2

► MMB451 Energy Management
Topics covered in this unit include: the systematic process by which energy use is monitored and analysed; individual treatment of electricity, fuels and their properties, compressed air, buildings, cycle requirements, pinch technology, energy recovery equipment; financial analysis of proposals. Environmental aspects will be considered for each topic.

Courses: ME41, ME42
Prerequisites: MMB252
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 2

► MMB461 Process Systems Design
This unit involves the design of various process plant equipment such as piping systems (including control of fluid flow via pumps and valving, support systems and pipe stressing), pressure vessels such as heat exchangers and cooling towers. It introduces students to the pumping of slurries, according to relevant codes.

Courses: ME41, ME42
Prerequisites: MMB351, MMB352
Contact hours: 4 per week
Campus: GP Credit points: 12 Semester: 1

► MMB470 Engineering Asset Management and Maintenance
Engineers are often involved in the management of substantial amounts of plant, machinery and similar assets. In today’s capital intensive industries, maintenance is a major cost element, and the efficiency of operations is heavily influenced by equipment reliability and maintenance effectiveness. The engineer needs to know how to
organise maintenance and how to create and implement effective asset management and maintenance plans. This unit includes the following: engineering asset management policy statement; overhaul and replacement of engineering assets; organisation for maintenance; maintenance planning and control; failure mode and effect analysis; reliability, maintainability and availability analysis; risk assessment; spare parts inventory management.

Courses: ME41, ME42, ME48
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

► MMB471 Computer Integrated Manufacturing

Topics covered in this unit include: introduction of the concepts of strategic planning for computer integrated manufacturing; concepts of advanced manufacturing technologies and the various components of computer integrated manufacturing system; the importance of concurrent engineering in the context of CIM; introduction to the principles of modelling and simulation techniques as a design and evaluation tool for manufacturing systems.

Courses: ME41, ME42
Prerequisites: MMB371
Contact hours: 4 per week  Campus: GP
Credit points: 12

► MMB472 Design for Manufacturing 2

Topics covered in this unit include: basic concepts in the analysis of a mechanical engineering design, relating the design requirements to a range of manufacturing processes; an understanding of the complete manufacturing specifications for mechanical designs based on functional requirements, manufacturing processes, interchangeability and standardisation; introduction to the basic principles in the design of jigs and fixtures in manufacturing.

Courses: same as MMB471
Prerequisites: MMB371
Contact hours: 4 per week  Campus: GP
Credit points: 12

► MMB476 Operations Management

This unit develops students' ability in applying quantitative techniques in solving different types of industrial operations problems. Topics include: product mix, assignment and transportation models; location and layout decisions, job design analysis; project planning; quality control and the use of simulation in operations management.

Courses: ME41, ME42
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► MMB478 Mechatronics Systems Design

This unit provides students with an understanding of design and interpretation of hydraulic and pneumatic circuits (including graphical symbols, fluid logic and components of fluid systems) and a basic understanding of PLC programming for control of manufacturing systems with the emphasis on hands-on practice of developing a control system for a given process. Topics include: mechatronics systems design; power supply; introduction to fluid power and graphical symbols; hydraulic and pneumatic systems; simple circuits; fluid logic; logic symbols and circuits; hydraulic components, fluids, system design, circuits; pressure compensated flow control.

Courses: ME40
Prerequisites: MMB371, MMB252
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

► MMB492 Health Legislation and the Medical Environment

This unit provides an introduction to the types of legislative control in the health and medical industries. It highlights the minimum requirements in relation to the role of medical engineers and their contribution to successful and ethical relationships with medical, health legislative and regulatory affairs professionals. Content includes: national and international legislative controlling bodies and codes (EC, TGA, FDA); structure and sources of legal system (State and Federal); Good Manufacturing Practice (GMP); ISO9000 Quality Systems; Total Quality Management; ethics committees and clearance; industry case studies.

Courses: ME48
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► MMB494 Rehabilitation Equipment Design and Evaluation

Bioengineers require an understanding of the criteria associated with the needs and design of specific items of equipment for rehabilitation and the functionally impaired. This unit introduces students to many different areas of rehabilitation and the design of equipment to assist people with disabilities. There are formal lectures and tutorials, some of which will be presented by practitioners from the different areas of rehabilitation.

Courses: ME48
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► MMB496 Modelling and Simulation for Medical Engineers

Computational modelling and simulation are widely used in engineering in general, and in specific areas of medical engineering. Modelling can be described as the process of determining analytical representations of physical elements for the purpose of investigating kinematic, kinetic and structural properties and performance. Content includes: introduction to MATLAB programming techniques; process of model creation; methods of analysis of determine and indeterminate systems; simulation techniques and examples of advanced applications.

Courses: ME48
Prerequisites: MMB391
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► NRB100 Environmental Science

General features of the aquatic, atmospheric, and terrestrial systems are described. This will incorporate the main chemical, physical and biological processes that influence their development. The evolution of these systems, and their interaction, are considered. The human involvement is examined, and its type, extent, and impact. To give some degree of relevance to the global concepts presented, a range of examples are given for the Australian environment and its resources, and human interaction with them.

Courses: ED50, SC01
Contact hours: 4 per week  Campus: GP and CA
Credit points: 12  Semester: 1

► NRB230 Planet Earth

This unit focuses on geological principles, formation and classification of minerals, rocks and soil, the origin of the Earth and the solar system, stratigraphy, geological time, dating and geological history, fossils, structural geology and plate tectonics, and economic and applied geology.

Courses: ED50, SC01
Contact hours: 4 per week  Campus: GP and CA
Credit points: 12  Semester: 1, 2

► NRB240 History of Life on Earth

This unit provides an introduction to the history and development of life on Earth with an emphasis on fundamental biological and ecological principles as they have operated through geological time.

Courses: SC01
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

► NRB270 Animal and Plant Structure and Function

This unit emphasises the integration of major biochemical and physiological processes within functioning organisms. Aspects of energy flow (photosynthesis and respiration) are considered. The structure of major organs and organ systems is described and related to their function. The regulation and coordination of organism function via biological feedback mechanisms, nervous and/or hormonal systems are outlined.

Courses: ED50, SC01
Prerequisites: LSB118
Contact hours: 4 per week  Campus: GP and CA
Credit points: 12  Semester: 2

► NRB301 Earth Surface Systems

This unit includes the investigation of earth surface processes, landforms and land-forming agents, soil formation and soil dynamics. This includes the history of earth surface features and the formation of Australian landscapes. The nature and scale of landforms and soil landscapes is emphasised along with the soil- and land-forming processes that operate through time within earth surface systems. Analytical field and laboratory techniques concerning land- and soil-forming processes and the scientific investigation and management of natural resources are a central component. Field trips and assignments focus on applying geomorphological and pedological principles to problem-solving in the environment.

Courses: SC01
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

► NRB311 Population Ecology

This unit provides a broad theoretical background in the major concepts of plant and animal ecology. Topics include ecology of individuals, dynamics of single populations, demography, interactions within and between populations, determinants of population size, behavioural ecology, and basic approaches to estimating population parameters.

Courses: SC01
Prerequisites: LSB118 or NRB100
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 1

QUT HANDBOOK 2006 • PAGE 745
NRB331 Sedimentary Geology
This unit includes types of sediments and their classifications and occurrence, textures, grain size and analysis, and sedimentary depositional environments. The analysis of maps and sedimentary successions is approached using sediment type, stratigraphy. Applications considered cover environmental studies, coastal and land management, and mineral, petroleum and other resource assessment.

Courses: SC01
Prerequisites: NRB230

Corequisites: NRB333
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

NRB333 Mineralogy
This unit includes crystallography, symmetry, Miller indices, axial ratios, crystal forms, classes, systems, lattices, unit cell, crystal chemistry, crystal growth and defects, atomic structure, periodic table, ions and packing, Pauling's rules, bonding and mineral properties, substitution, solid solution, polymorphism, pseudomorphism. It also includes the classification of minerals; systematic treatment of the physical, chemical and structural properties of minerals; techniques of mineral analysis; theory and identification of minerals in transmitted light; optical properties and identification of minerals in thin section, and grain mounts.

Courses: SC01
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

NRB370 Invertebrate Biology
The major focus of this unit is the examination of the diversity of invertebrate functional systems, behaviour and life histories. These are viewed in an evolutionary context. A brief overview of the diversity, phylogeny, and classification of invertebrates is provided. Emphasis is placed on understanding the features of the Arthropods, the dominant phylum within the invertebrates.

Courses: SC01, ED50
Prerequisites: NRB270
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

NRB371 Plant Biology
Ever wondered what the first plant to crawl out of the sea looked like? This unit takes students on a journey to see how they looked and lived. We'll use students' imaginations, some great images and learning experiences to show students how plants evolved into some of the most enormous organisms on the planet. Ever wanted to visit a forest essentially unchanged for 80 million years? We'll go on a virtual tour - we'll take students there. We'll talk about the distribution and abundance of the most successful of the seeders of terrestrial environments - the plants. We'll also discuss some of the unique adaptations of Australian plants to their environment. The time machine awaits - first stop - the first plants to colonise the land.

Courses: ED50, SC01
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

NRB410 Genetics and Evolution
This unit provides a basic understanding of the mechanisms of inheritance using Mendelian Genetics as a foundation. These principles are extended to develop a clear understanding of the mechanisms and processes that drive evolution in natural populations. Topics include the physical basis of heredity, Mendelian and non-Mendelian inheritance patterns, genotype/environment interactions, quantitative traits, evolutionary theory, adaptation and natural selection, sexual selection and the evolution of life histories.

Courses: SC01
Prerequisites: LSB118
Incompatible with: NRB310
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB412 Experimental Design
This unit emphasises practical considerations of field and laboratory-based experimentation in ecology and environmental science, and provides experience in problem assessment, definition, formulation of testable hypotheses and experimental design. The unit includes undertaking typical field exercises in ecology, and analysing, interpreting and reporting experimental work.

Courses: SC01
Prerequisites: MAB101, NRB311
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB434 Structural Geology
This unit covers the deformation of geological materials. It includes description and analysis of joints, faults, folds, boudinage, cleavage, foliations, and lineations. Also examined are principles of deformation: normal and shear stress, brittle fracture, strain and rigid motion, brittle and plastic deformation, measurement of strain, and Mohr diagrams. Practical work includes a series of assignments of increasing complexity, culminating with a course project that includes geological map interpretation and cross section construction. Field work consists of four trips designed for the construction of geological maps and analysis of deformed rocks. This includes a week-long trip covering parts of the Yilgarn Craton.

Courses: SC01
Prerequisites: NRB230, NRB331
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB436 Introduction to Igneous and Metamorphic Petrology
This unit includes an introduction to the description, classification and origin of igneous and metamorphic rocks and practical development of lithologic and petrographic abilities to identify mineral assemblages, classify rocks, and interpret textures. Field and theoretical constraints on the petrogenesis of rocks are discussed in lecture. Field study is an essential component of the unit.

Courses: SC01
Prerequisites: NRB333
Incompatible with: NRB432
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB437 Stratigraphy and Depositional Environments
This unit focuses on advanced facies analysis of additional depositional environments and stratigraphic analysis including stratigraphic biostratigraphy andchronostratigraphy. An introduction to sequence stratigraphy and subsurface geology utilising a variety of different data sets is also covered. Applications include both exploration in coal and hydrocarbon industries and hydrogeology and environmental geology areas.

Courses: SC01
Prerequisites: NRB331
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB440 Environmental Chemistry
This unit includes the following: design and quality control of physicochemical monitoring programs; fundamentals of data analysis; methodologies of monitoring (variables, instruments, sampling strategies including location and frequency of observation, analytical protocols); introduction to biogeochemical cycles; the relationships between molecular structures and environmental properties; hazardous substances in the environment; chemistry of natural water bodies, including solutes and equilibria; chemistry of water pollutants; indicators of water quality; the atmosphere - structure and energy balance; air pollutants.

Courses: SC01
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB470 Vertebrate Biology
The core modules for this unit cover evolution and physiological capabilities (with particular emphasis on the brain). Other modules provide opportunities to enhance students' knowledge of particular aspects of vertebrate biology of interest to them, or to learn how to identify Australian vertebrates.

Courses: ED50, SC01
Prerequisites: NRB270
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

NRB500 Environmental Systems and Modelling
Develops a view of the environment as a nested hierarchy of systems in which human-environment interactions are placed in perspective. Provides a standardised approach to the study of environmental systems, focussing on mass and energy flows between them, showing how principles of conservation of mass and energy can be applied to environmental systems to improve understanding of environmental processes. A generic approach to mathematical modelling aids the study of simple environmental processes using the systems approach. Students construct their own models of environmental systems. This approach is presented as a foundation for informed environmental management.

Courses: SC01
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

NRB501 Spatial Analysis of Environmental Systems
This unit provides an introduction to the concepts, theory and practice of GIS and Remote Sensing (RS) essential for understanding and the application of spatial data capture, interpretation, management and analysis methods in environmental and natural resource applications. Key elements of GIS examined include: mapping theory, map projections and coordinate systems, map and spatial data, data acquisition, data presentation, and environmental applications. Key elements of RS covered are RS principles, RS platforms and systems, air-photo interpretation, spatial properties of environmental phenomena,
and mapping from RS. Practical work uses GIS and image analysis software to solve spatial analysis problems and interpret RS images. NRB410 environmental and natural resources manage
Courses: ED50, SC01
Credit points: 12 Semester: 1

► NRB510 Population Genetics
This unit is an extension of NRB410 Genetics and Evolution. Topics include the genetic structure of populations and processes of evolutionary change; natural selection, in-breeding and adaptation, species and speciation theory; ecological genetics; the genetics of behaviour.
Courses: SC01
Prerequisites: NRB410
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► NRB511 Population Management
This unit develops the theoretical treatment of populations as a unit of study and integrates the content of previous ecology units into approaches for the management of biological populations. The unit focuses on those population/resource interactions that are relevant to conservation, harvesting and pest control.
Courses: SC01
Prerequisites: NRB311, NRB411
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► NRB534 Geophysics
This unit considers the remote measurements of rock properties and relates them to geological problems and tectonic regimes. The physics of various measurements of these rock properties, the acquisition of data, and the interpretation of these data are all addressed. A significant part of the semester covers seismic reflection data. Also covered are seismic refraction, gravity, magnetics, seismology, electromagnetic, radiometrics, ground penetrating radar, and heat flow.
Courses: SC01
Prerequisites: NRB230, NRB434
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► NRB535 Geology of Fossil Fuels
This unit focuses on the following: coal properties, classification, genesis, and analysis; coal hand specimen studies and microscopy; hydrocarbon generation from coal and oil shale; coalfield geology and subsurface mapping techniques; basin analysis; coal production and economics; origin and characteristics of petroleum fluids, including generation, accumulation and migration through time and space; study of structural and stratigraphic traps, and reservoir rock characteristics; application of drilling, logging, and geophysical and correlation techniques, including seismic stratigraphy; economics of petroleum production.
Courses: SC01
Prerequisites: NRB331, NRB437
Corequisites: NRB536
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► NRB536 Petrology and Geochemistry
Through lecture, discussion and problem solving exercises, this unit introduces the application of geochemistry, phase equilibria, and thermodynamics to demonstrate the origin and evolution of igneous and metamorphic rocks. Problem-solving exercises synthesise field, petrographic and geochemical data to develop quantitative petro-genetic models and enhance critical thinking and written communication skills. Field study is an important component of this unit.
Courses: SC01
Prerequisites: NRB436
Incompatible with: NRB530
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► NRB571 Marine Biology
This unit gives a general overview of marine ecosystems and their importance to human kind. The unit aims to stimulate thought, and to generate ideas, by reviewing the range of approaches taken to manage, and conserve, marine resources. Emphasis is given to Australian coastal marine systems; their importance, care, and abuse. The unit involves a compulsory 3 day field trip to a local coastal ecosystem.
Courses: ED50, SC01
Incompatible with: NRB672
Contact hours: 4 per week Campus: CA
Credit points: 12 Semester: 1

► NRB572 Terrestrial Ecosystems
This unit examines the key physical and biological processes that influence the range of terrestrial ecosystems. It examines the geological, climatic and historical processes that have shaped the evolution and ecology of Australia’s terrestrial ecosystems and the ecological properties of natural and human modified systems. Content includes the significant phases in the evolution of the Australian flora and fauna, and components and adaptations of the modern Australian flora and fauna, theories pertinent to explanations of biogeographical distributions, soil formation, structure and biology, physical processes in terrestrial systems, structure and characteristics of terrestrial ecosystems, and terrestrial ecosystem case studies.
Courses: ED50, SC01
Prerequisites: NRB311 or NRB371
Incompatible with: NRB570
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► NRB600 Sustainable Environmental Management
Sustainable environmental management requires a multidisciplinary approach to decision-making. This approach must be founded on scientific knowledge about the environment, but to be effective, the science must also be integrated with social, economic, political and technological policies. This unit explores contemporary environmental management issues: the science behind them, linkages between them, their cultural settings and sustainable solutions.
Courses: ED50, SC01
Incompatible with: HUB685
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► NRB601 Field Mapping and Monitoring Natural Resources
A field-based unit covering the theory and practice of methods to determine, measure and map important natural resource parameters and characteristics. These methods are essential for the study of terrestrial natural resource phenomena. Content includes interpretation and measurement through aerial photography and other remote sensing techniques, using GPS, GIS, remote sensing and related techniques in field survey procedure, assessment and monitoring techniques and planning, environmental impact assessment, reporting and data presentation. The field practicals emphasise mapping and monitoring skills in the geological or land resources context.
Courses: SC01
Incompatible with: NRB533
Contact hours: 4 per week equivalent Campus: GP
Credit points: 12 Semester: 1

► NRB610 Ecological Applications
This unit integrates the content of other ecology units into applied approaches to the management of populations and systems. The unit employs concepts from population ecology, population management and conservation biology and builds methodologies and concepts necessary for an applied approach to conservation and pest management. A field trip provides the vehicle for developing these themes. Content includes data collection, collation and preparation of biological resource material relevant to a case study, diagnostic features and identification of species of relevance, factors involved in the design of a large-scale field study, field techniques necessary for understanding species/habitat interactions, and the analysis and interpretation of large field data sets.
Courses: SC01
Prerequisites: NRB510 or NRB511
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► NRB611 Conservation Biology
Conservation biology is the application of ecological theory and principles to the problem of the maintenance of viable populations of rare, threatened or endangered species, and terrestrial ecosystem systems. The unit integrates ecological and genetic material covered in earlier units to provide an understanding of factors that enable the maintenance or enhancement of populations. The unit examines biodiversity and its determinants, the process of extinction and viability analysis and the diagnosis and treatment of population declines, habitat fragmentation, metapopulation processes and the design of natural reserves, and conservation genetics.
Courses: SC01
Prerequisites: NRB311, NRB410
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 2

► NRB633 Hydrogeology
This unit focuses on the origin, occurrence and movement of groundwater; aquifer properties; chemistry and quality of groundwater; exploration methods for groundwater; drilling methods and equipment and well testing equipment; well hydraulics and testing; and flow calculations; assessment of groundwater problems - both supply and quality; and computer modelling approach to groundwater assessment. Students obtain practical experience with pump tests, chemical analysis of waters and are given an introduction to computer modelling. There is interaction with government and private sector hydrogeologists, and field site visits.
Courses: SC01
**UNIT SYNOPSIS**

- **NRB320, PCB140 or PCB142, NRB301 or NRB440**
- **Contact hours:** 4 per week  
  **Campus:** GP  
  **Credit points:** 12  
  **Semester:** 2

- **NRB635 Plate Tectonics and Advanced Structural Geology**
  This unit considers geological observations in the context of a unifying theory. It examines lithospheric plates, plate geometries, Earth morphology, relative and absolute plate movements, stresses, stresses of plate interactions, and plate boundaries, and orogenesis. It also examines the development of the most important geologic theory of the 20th century.
  - **Courses:** SC01  
  - **Credit points:** 12  
  - **Semester:** 2

- **NRB636 Stratigraphy and Basin Analysis**
  This unit focuses on advanced stratigraphic and basin analysis primarily utilizing subsurface data. Sequence stratigraphic models for the dominant depositional systems are explored with emphasis on how they change over temporal shifts in tectonic, eustatic, and climatic parameters. Emphasis is placed on lithostratigraphic, biostratigraphic, geophysical, and geochemical data sets are introduced as fundamental aspects of basin analysis.
  - **Courses:** SC01  
  - **Prerequisites:** NRB331, NRB437, NRB534  
  - **Incompatible with:** NRB531, NRB535  
  - **Contact hours:** 4 per week  
    **Campus:** GP  
    **Credit points:** 12  
    **Semester:** 2

- **NRB672 Marine and Freshwater Ecosystems**
  This unit examines the structure and function of marine and freshwater ecosystems. Aquatic ecosystems cover the majority of the planet and their management is important in terms of maintaining water quality for human utilisation, harvesting resources, and for species conservation. The unit emphasises the chemical and physical properties that are common to all aquatic systems, but also identifies those properties that are unique to particular systems. The unit covers aquatic ecosystems, their different forms and extent; the chemical and physical properties of aquatic environments; circulation and transport processes; the structure and characteristics of the different aquatic environments; and human impact and management in marine and freshwater systems.
  - **Courses:** ED50, SC01  
  - **Prerequisites:** NRB311  
  - **Incompatible with:** NRB571  
  - **Contact hours:** 4 per week  
    **Campus:** GP  
    **Credit points:** 12  
    **Semester:** 2

- **NRB720-1 Project**
  This unit is a substantial project in the appropriate area of science undertaken in conjunction with a supervisor and through interaction with lecturing and technical staff of the School of Natural Resource Sciences. The unit provides the opportunity for students to identify and solve scientific problems logically and creatively. Students are required to relate the project research to published work in the field of study. Each project is assessed on the basis of an extensive written report and a formal seminar or scientific poster.
  - **Credit points achieved at completion of NRB720-1, NRB720-2, NRB720-3, NRB720-4 and NRB720-5:**
    - **Courses:** SC00  
    - **Campus:** GP  
    - **Credit points:** 12  
    - **Semester:** 1, 2
  - **Type:** NRB720-2 Project
  - **Courses:** SC00  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB720-3 Project
  - **Courses:** SC00  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB720-4 Project
  - **Courses:** SC00  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB720-5 Project
  - **Courses:** SC00

- **NRB730-1 Research Methods and Strategies**
  This is a two semester unit with its main focus to develop the research planning, abilities and skills of the student. The major assessable components of the literature review, seminars, informal presentations and discussions on matters relevant to the research topic, and advanced skilled workshops and exercises. (24 Credit points achieved at completion of NRB730-1 and NRB730-2.)
  - **Courses:** SC00  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB730-2 Research Methods and Strategies
  - **Courses:** SC00

- **NRB735 Advanced Studies in Resource Sciences**
  This unit provides an in-depth examination of a topic or synthesis of a subject through lectures, tutorials, discussions, independent study, practicals and/or field excursion. This unit has general structure, which can be developed to the specific requirements of each section of the school. An important aim is to develop a critical and analytical thought at an advanced level. The unit may be conducted in the first part of semester 1, or could be conducted over two semesters.
  - **Courses:** SC00  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB735

- **NRN100 Readings in Natural Resource Sciences 1**
  This unit includes a review of literature in an area of direct relevance to the research project. The review should be designed in conjunction with the supervisor and include an appreciation of the literature, a critical appraisal of research to date, and the relevance of the research project within the framework of current understanding. Reviews should normally be approximately 5000 words.
  - **Courses:** IF49, SC71, SC80  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB100

- **NRN101 Readings in Natural Resource Sciences 2**
  This is a companion unit to NRN100 that allows students to (a) prepare a review of a second area relevant to the research project or (b) consider a wider subject area in greater depth. If option (b) is chosen, a single review can qualify as total assessment for both NRN100 and NRN101. In this case, the review should be approximately 10,000 words and be a critical analysis of a substantial research area.
  - **Courses:** IF49, SC71, SC80  
  - **Prerequisites:** NRN100  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB102

- **NRN103 Final Seminar**
  This unit includes a public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the progress of the research project. The presentation should be designed in conjunction with the supervisor and include project objectives, progress to date, preliminary data and problems for discussion. The seminar should normally be presented within 12 months (full-time) or 24 months (part-time) of commencement of the postgraduate program.
  - **Courses:** IF49, SC80  
  - **Prerequisites:** NRN102  
  - **Corequisites:** NRN102  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB104

- **NRN104 Advanced Topics in Natural Resource Sciences 1**
  Students develop an advanced understanding of a topic in the natural resource sciences that is highly relevant to the general area of their proposed research project. The structure and content is variable and can be tailored to the specific requirement of each project, including the background of the student. A formal outline of the unit including objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops, laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.
  - **Courses:** IF49, SC71, SC80  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB105

- **NRN105 Advanced Topics in Natural Resource Sciences 2**
  Material presented in this unit must be distinct from that covered in NRB104. Students develop an advanced understanding of a topic in the natural resource sciences relevant to the area of their proposed research project. A formal outline of the unit outlining objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops, laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.
  - **Courses:** IF49, SC71, SC80  
  - **Campus:** GP  
  - **Credit points:** 12  
  - **Semester:** 1, 2
  - **Type:** NRB106

developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops and laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.

**Courses:** NSB111, NSB122, NSB222
**Campus:** KG
**Credit points:** 12
**Semester:** 1, 2

> **NSB113 Diversity and Health: Introduction to Indigenous and Multicultural Perspectives**

This unit provides students with foundational understandings in culture and its implications for health care. It includes four modules: culture, self and diversity; understanding and valuing Aboriginal and Torres Strait Islander cultures; Aboriginal and Torres Strait Islander health and wellness; and migrant health issues.

**Courses:** NS40, NS45
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12
**Semester:** 2

> **NSB117 Nursing and the Health Care System**

The evolution of nursing as a discipline, contemporary roles of the nurse, the professional context of nursing practice, and caring and nursing practice are addressed in this unit. Content also includes health and wellness, the health–illness continuum, models of health and illness, and the structure and function of the Australian health care system including characteristics of Australia’s health care system.

**Courses:** NS40, NS45
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12
**Semester:** 2

> **NSB118 Health Assessment and Nursing Practice**

This unit provides an introduction to critical thinking, problem solving and decision making in nursing practice; and the nursing process and nursing practice. It considers the role, purpose and scope of nursing assessment for individuals, groups and communities; principles and methods of data collection including symptom/problem exploration; frameworks for data collection; introduction to principles and methods of data analysis; and documentation and presentation of client data.

**Courses:** NS40, NS45, HL40, HL46
**Campus:** KG
**Credit points:** 12
**Semester:** 2

> **NSB122 Clinical Practice 1**

This is the first in five clinical practice units that provide the opportunity to experience the practice of nursing in real world settings and to develop the knowledge, attitudes and skills required for safe, competent practice as a beginning level registered nurse. The main areas of content in this unit are: promoting a safe environment for client care, managing more complex patient care needs, and developing a professional approach to practice. Concepts addressed include: sterile techniques, barrier/reverse barrier nursing, principles of wound management, intravenous and parenteral medications, intravenous infusions and solutions; problem solving and decision making principles applied to the care of individuals with medical-surgical and mental health dysfunctions.

**Courses:** NS40, NS45, HL40, HL46
**Prerequisites:** NSB122
**Campus:** KG
**Credit points:** 12
**Semester:** 1, 2

> **NSB222 Clinical Practice 3**

This is the third in the five clinical practice units that provide the opportunity to experience the practice of nursing in real world settings. There are three main areas of content in this unit: promoting a safe environment for client care, managing complex patient care needs, and developing a professional approach to practice. Particular concepts addressed include complex wound management, clinical nursing therapeutics related to the administration of blood and blood products, management of colorectal and urinary diversionary procedures, urinary catheterisation, ostomy management; prioritisation of patient care and time management.

**Courses:** NS40, NS45, HL40, HL46
**Prerequisites:** NSB212
**Campus:** KG
**Credit points:** 12
**Semester:** 1, 2

> **NSB223 Mental Health Nursing**

Nurses need to be able to identify and care for people suffering from mental health problems. Topics addressed in this unit include the mental health continuum and major theoretical approaches to mental illness; understanding and nursing people across the lifespan who suffer from anxiety disorders, personality disorders, bipolar disorder, depression, schizophrenia, substance use and abuse, cognitive impairment disorders, eating disorders; the nurse’s role with respect to treatment modalities and assessing mental status; and the experiences of persons living with a mental illness and families caring for someone with a mental illness.

**Courses:** NS40, NS45, HL40, HL46
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12
**Semester:** 1, 2

> **NSB244 Research Approaches in Nursing**

This unit provides an introduction and overview of research in nursing. It covers the purpose of research, the relationship between research and nursing practice, the notion of nursing research in the process of research, ethical issues related to research and strategies for critiquing research reports. Particular emphasis will be placed on selected methodologies that are used to research nursing practice, and quantitative and qualitative data collection and data analysis.

**Courses:** NS40, NS45
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12
**Semester:** 1, 2

> **NSB225 Promoting Health Across the Lifespan**

Concepts addressed in this unit include the exploration of health and wellbeing for individuals throughout the lifespan, families and communities; nursing models of health promotion; factors that influence health beliefs and behaviours, and the capacity to maintain health; principles of health teaching; working with individuals and groups to promote health; the role of the nurse in promoting health with people of all ages (children, adolescents, adults and the elderly), families across the life cycle and groups; promoting health and well being for dying clients and their families.

**Courses:** NS40, NS45, HL40, HL46
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12
**Semester:** 1

> **NSB312 Family and Community Nursing**

Community and family nursing practice interfaces with care provided to individuals in hospital care. Families are an integral component of care in all contexts and so nurses need to focus care with individuals, the family and the community. The unit focuses on family assessment and intervention. Community assessment and intervention is also studied in the context of a Primary Health Care philosophy and health promotion framework that addresses the five action areas of the Ottawa Charter to provide an opportunity for students to develop knowledge and skills in the broadest context of health care.

**Courses:** NS40
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12

> **NSB321 Professional Nursing Development**

Highlights the explicit link between clinical practice and theoretical knowledge. Post-registration and final semester pre-registration students will be assisted to further develop skills in reflective practice and peer consultation as strategies to support a more critical approach to clinical practice. A variety of topics will be addressed through a combination of self-directed learning activities and small group discussion sessions.

**Courses:** NS40, NS45, HL40, HL46
**Prerequisites:** NSB501
**Contact hours:** 3 per week
**Campus:** KG, Ex
**Credit points:** 12
**Semester:** 2

> **NSB322 Clinical Practice 4**

This is the fourth in the five clinical practice units that provide the opportunity to experience the practice of nursing in real world settings and to develop the knowledge, attitudes and skills required for safe, competent practice as a beginning level registered nurse. This unit facilitates the development and application of knowledge and skills necessary for the provision of nursing care in a mental health setting at an advanced level. Emphasis is placed on students’ communication skills, critical thinking and decision-making skills, technical skills and professional development skills, and the assumption of increased responsibility for patient care.

**Courses:** NS40, NS45, HL40, HL46
**Prerequisites:** NSB222
**Campus:** KG
**Credit points:** 12
**Semester:** 1, 2, 3

> **NSB324 Medical-Surgical Nursing 1**

The unit explores nursing assessment, care planning and care evaluation necessary for...
UNIT SYNOPSIS

the provision of sound, safe nursing care for people in hospital and home-based settings with health problems related to neurological, sensory, musculoskeletal dysfunctions, and infectious and immune related disorders. Issues addressed will include peri-operative nursing; acute and chronic pain management; the unconscious patient, post-stroke rehabilitation and degenerative neurological conditions such as multiple sclerosis, sensory impairment and orthopaedic problems. Principles of nursing people with infectious and immune related disorders will also be covered.

Courses: NS40, NS45, HL40, HL46
Prerequisites: NSB118
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1, 2

► NSB33 Clinical Practice 5
This final clinical unit is designed to enable consolidation of knowledge and skills necessary for the provision of safe, effective patient care in preparation for a successful transition to beginning level practice as a registered nurse. The unit includes eight weeks off-campus placement. Emphasis is placed on student's proficiency in clinical practice, particularly their communication skills, critical thinking and decision making/problem solving skills, technical skills, reflective skills, care management skills and awareness of professional attributes and values.

Courses: NS40, NS45, HL40, HL46
Prerequisites: NSB322
Campus: KG
Credit points: 24  
Semester: 1, 2

► NSB412 Clinical Elective Exchange/Study Abroad
This unit aims to enhance final year students' ability to practice competently in a range of clinical situations. Students are provided with the opportunity to consolidate and extend their knowledge and skills by undertaking a series of self-directed, problem-based learning packages. The areas covered in the unit are advanced life support, respiratory therapies, health promotion, pain management, epidural anaesthesia and advanced wound care management. A variety of teaching learning strategies will be used which include case scenarios, small group unilabs, computer-based and other related activities.

Prerequisites: Clinical Practice, 1, 2 and 3
Credit points: 12  
Semester: 1, 2

► NSB421 Independent Study
This unit provides students the opportunity to independently explore a body of literature and/or research relevant to an area of interest in nursing. The unit enables students to extend their knowledge and understanding of a topic, with a specifically addressed elsewhere in the course. The emphasis, in this unit, is on the development of independent research, study and analytical skills. These skills are demonstrated first, in an assimilation of a range of materials into a clearly formulated written argument and second, in an oral presentation and discussion of the study material.

Courses: NS40
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 2

► NSB423 Medical-Surgical Nursing 2
The content of this unit will cover nursing assessment, care planning and care evaluation necessary to provide sound, safe nursing care for people in a variety of settings with acute and/or long term health concerns and issues related to the gastro-intestinal, endocrine, genito-urinary and integumentary dysfunctions. Issues addressed will include diabetes mellitus, renal failure, inflammatory bowel disorders, burns and wound management.

Courses: NS40, NS45, HL40, HL46
Prerequisites: NSB324, NSB118
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1, 2

► NSB424 Nursing Therapeutics
Nurses have a central role in assisting individuals, families and/or groups of people to make informed decisions about their care, supporting them through stressful and traumatic experiences and facilitating them to effectively manage health problems in order to optimise recovery, rehabilitation and/or habilitation. This unit focuses on the development of knowledge, skills and personal attributes that are fundamental to establishing and maintaining therapeutic relationships, educating clients about health care matters and counselling patients and families to promote health and well being.

Courses: NS40, NS45, HL46
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1, 2

► NSB500 Medical-Surgical Nursing 3
The content of this unit will address nursing assessment, care planning and care evaluation necessary to provide sound, safe nursing care for people in a variety of settings with complex acute and/or long term health concerns and issues related to cardiovascular, respiratory and oncological dysfunctions. Particular emphasis will be placed on life threatening illnesses and the provision of high dependency and palliative nursing care. Contemporary research and 'best practice' guidelines will underpin the content of this unit.

Courses: NS40, NS45 HL40, HL46
Prerequisites: NSB324, NSB412
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1, 2

► NSB501 Politics, Technology and Nursing
This unit provides an opportunity for students to develop and extend their knowledge about issues that directly inform the role of the health care practitioner. The framework of the unit is the political nature of nursing and the unit content addresses key processes and factors that are impacting on and re-shaping nursing practice and health care provision. The unit focuses on the changing nature of health care and nursing organisational and educational structures and rapid changes in technology. These political and technological changes require nurses practitioners to continually re-evaluate the contexts of their practice.

Courses: NS40, NS45, HL40, HL46
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1, 2

► NSB600 Introduction to Nursing Children and Childbearing Families
This unit provides an overview of the theoretical concepts and clinical application principles for practice in the areas in providing nursing and midwifery care for children and childbearing families. The emphasis is upon the childbearing process and the developmental stages of childhood and family dynamics. This is viewed as a normal process of growth and development, which will be affected by social, economic, legal and cultural factors.

Courses: NS40, HL40
Contact hours: 3 per week  
Campus: Ext
Credit points: 12  
Semester: 2

► NSB602 Pain Management and Nursing Practice
Making decisions about patient’s pain and its management is a key component of nursing practice across a wide variety of patient groups and clinical settings. This unit examines the concept of pain and explores aspects of the nurse’s role in relation to pain relief. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of, and reflection upon selected concepts.

Courses: NS40, HL40
Prerequisites: NSB500
Contact hours: 3 per week  
Campus: Ext
Credit points: 12  
Semester: 2

► NSB603 Introduction to Cardiothoracic Nursing
Cardiovascular disorders are commonly encountered by nurses practicing a variety of clinical settings. This unit provides an overview of cardiothoracic nursing and encompasses theoretical concepts specific to this specialty as well as related clinical skills. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of, and reflection upon selected concepts.

Courses: NS40, HL40
Prerequisites: NSB500
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 2

► NSB605 Nursing in a Technological World
Technology is of extraordinary importance to nursing and is significant to understanding and practising within contemporary health care contexts. Nurses are responsible for an increasing use of technological oriented healthcare systems dominated by administrative and bureaucratic structures. This unit is designed to establish insight into the link between technology, clinical practice and nursing knowledge, highlight the learning opportunities available in the challenging workplace, and model a process of ongoing professional development. The unit seeks to relate nursing practice to knowledge development associated with technology, the experience of nurses, and the development of a professional and informed understanding of technology.

Courses: NS40, HL40
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 2

► NSN002 Key Issues in Child and Youth Health Nursing
This unit addresses contemporary issues in child and youth health, to provide the basis for further study in this field. A Primary Health Care framework will be used to consider issues that impact on the health of children and young people. In addition key

QUT HANDBOOK 2006 • PAGE 750
policy frameworks will provide direction for study in the unit. The unit will consider the impact of social determinants on child, youth and family health and examine current strategies to address such impacts. Students will have the opportunity to examine local programs and strategies aimed at improving health outcomes.

Courses: NSN35, NSN64, NSN85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 1

► NSN003 Principles of Paediatric, Child and Youth Health Nursing

Students in this unit are introduced to issues facing nursing when providing care for children and families in the acute and community service environment. The unit presents an overview of the contemporary health problems faced by the Australian child and family and explores nursing interventions that enhance adaptation and health.

Courses: NSN35, NSN64, NSN85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 1

► NSN004 Acute Paediatric Nursing

This unit is designed to provide registered nurses with advanced knowledge and skills to enable them to provide safe and competent care to children experiencing acute paediatric illness. This unit will focus on acute health problems in children, employing clinical assessment, problem solving and critical thinking skills. Following completion of this unit the registered nurse will be able to demonstrate knowledge and skills in the nursing management of acute and chronic health problems of children in a paediatric context.

Courses: NSN35, NSN64, NSN85
Prerequisites: NSN003
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 2

► NSN005 Community Child and Youth Health Nursing

This unit is designed to provide a sound basis for nursing practice in the area of community child and youth health. Students will examine contemporary issues relating to their professional role in caring for children, youth and families within the community context. The unit adopts a primary health care approach to examine the nurses' role in primary and secondary prevention, in supporting families in the community and in health education and community development.

Courses: NSN35, NSN64, NSN85
Prerequisites: NSN003
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 2

► NSN006 Specialisation in Paediatric, Child and Youth Health Nursing

This unit will provide students with clinical knowledge and understanding in a selected area of paediatric or child and youth health sub-speciality. The unit is based on a learning contract that will include both theoretical and clinical learning activities and assessment.

Courses: NSN35, NSN64, NSN85
Prerequisites: NSN003, NSN002
Students in NS38 are not required to meet these prerequisites.
Campus: KG, Ext
Credit points: 12  Semester: 2

► NSN311 Clinical Studies in Midwifery A

This unit provides the opportunity for students to develop the clinical knowledge and skills in the areas of antenatal, postnatal assessment and care as well as an introduction to the assessment and care for the birthing woman. The focus in this unit is midwifery practice in the area of uncomplicated pregnancy and birth. Clinical activities and focused assessment will enable the student to incorporate theoretical, conceptual and practical knowledge, attitudes and skills required to care for the childbearing woman, her infant and family.

Courses: NSN68, NSN85
Corequisites: NSN321
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 1

► NSN321 Foundations of Midwifery Practice

This unit provides a foundation in the theoretical concepts and clinically applied principles for practice as a midwife. Emphasis is placed on the childbearing process as a normal and non-pathological process, during which the midwife, in collaboration with the woman, family, and other health professionals, provides midwifery care.

Courses: NSN68, NSN85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 1

► NSN322 Complex Issues for Childbearing Families

This unit provides students with an opportunity to develop further and expand on the theoretical knowledge and skills gained in Foundation of Midwifery Practice and Clinical Studies in Midwifery A. The unit requires application of the principles and practices acquired in the prerequisite unit. While childbearing is assumed to be a normal non-pathological process, and inherently safe, it is acknowledged that specialised practitioners must be able to recognise and act on changing events. These changes reflect complications/deviations from the normal.

Courses: NSN68, NSN85
Prerequisites: NSN321, NSN311
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 2

► NSN323 Clinical Studies in Midwifery B

This unit provides the opportunity for students to consolidate the professional knowledge and skills which they have acquired in other units. Students will be facilitated to incorporate theoretical, conceptual and practical knowledge, attitudes and skills required to care for the childbearing women, her infant and family.

Courses: NSN68, NSN85
Prerequisites: NSN321, NSN311
Corequisites: NSN322
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 2

► NSN324 Critical Issues in Neonatal Care

An understanding of the physical, emotional and psychological factors which can impact on the health and wellbeing of infants and their families is essential to the provision of effective and supportive care. This unit explores issues in neonatal care including the complexity of physiological adaptation required at the time of birth, and common vulnerabilities in the neonate which may cause short and long term health problems. An introduction to ethical issues relevant to contemporary neonatal care provides a background to providing effective care for infants and families.

Courses: NSN68, NSN85
Campus: KG, Ext
Credit points: 12  Semester: 2

► NSN421 Assessment and Diagnosis in Extended Practice

This unit is based on the scientific basis, processes and procedures for advanced concepts in clinical decision making. It covers the skills and principles of health assessment with specific focus on pattern recognition and diagnostics; ordering and interpreting laboratory tests; ordering and interpreting investigations. The unit also explores the activities and processes for making and accepting referrals with other health professionals.

Courses: NSN68
Campus: KG
Credit points: 12  Semester: 1

► NSN422 Pharmacology and Therapeutics in Extended Nursing Practice

This unit relates to the planning and management of therapeutic interventions in health care with a major focus on pharmacology and therapeutics. The content includes the study of pharmacology and pharmacokinetics related to treatment in a wide range of diseases. This will provide the basis for expansion into in-depth knowledge of pharmacology in a specialty field in the unit titled: NSN426 Advanced Pharmacology and Therapeutics in Specialty Nursing Practice.

Courses: NSN68
Campus: KG
Credit points: 12  Semester: 1

► NSN423 Nurse Practitioner Role Development

This unit equips students with the skills and knowledge necessary for the development of the nurse practitioner role and scope of practice. Scope of practice refers to, and includes the extent of clinical practice activities available to the nurse practitioner in their specialty field of practice. Content includes requirements and attributes in clinical leadership, influence and advocacy at all levels of health care. Models of practice will be explored, scope of practice designed and clinical protocols and treatment formulary developed.

Courses: NSN68
Campus: KG
Credit points: 12  Semester: 1

► NSN424 Evidence Based Practice

On successful completion of this unit students will be able to critically appraise systematic reviews of evidence and design projects for the implementation of evidence into practice. Content includes: Evidence-based terminology, principles and processes; in-
corporating evidence into practice; compar-
ing and contrasting current practice with the most current evidence; modifying policies and procedures to be consistent with the evidence; use of audit results to identify areas of practice that are consistent with the evidence and those needing revision; formu-
la
ing strategies for promoting the uptake of evidence-based practice.

Courses: NS36, NS39, NS64, NS85
Credit points: 12
Semester: 2

► NSN506 Clinical Project
This unit offers students the opportunity to implement a project of clinical relevance and value to lead to the resolution of practice issues facing nursing. It advances and ex-
tends the student's learning from their clini-
cal specialty and the supporting units.

Courses: NS36, NS39, NS64, NS85
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 2

► NSN507 Contemporary Practice Issues
This unit allows students to explore current issues and develop their understanding through application of relevant theoretical frameworks to nursing practice in selected specialty areas. Students undertaking this unit will examine social, political and eco-

onomic factors that shape and have shaped nursing practice, analyse factors influencing the organisation of nursing practice, and critically apply a theoretical framework to current issues relevant to nursing practice.

Courses: NS36, NS85
Campus: KG, Ext
Credit points: 12
Semester: 1

UNIT SYNOPSES

This unit offers students the opportunity to develop and expand their theoretical knowledge and skills in the area of women's health, and utilises the primary health care framework in considering the major objec-
tives for helping women achieve optimal health as documented in women's health policy. This unit aims to make primary health care professionals aware of the broader social context in which service, delivery and care take place.

Courses: NS36, NS64, NS85, HL88, PU88
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1

► NSN523 Clinical Studies
This unit aims to continue the development and consolidation of knowledge and skills in a selected clinical specialty. This unit will enable stu-
dents to develop their skills in clinical judge-
ment, and decision making in a specialty area of practice, as well as expanding their skills in establishing and maintaining effective relationships with clients and other health professionals. Students will be en-
couraged to demonstrate a reflective, self-
evaluative approach to practice, and devise strategies that would enable the practitioner to facilitate change with respect to their spe-
cialty area of practice.

Courses: NS64, NS85
Campus: KG, Ext
Credit points: 12
Semester: 2

► NSN526 Mental Health Clinical Studies
This unit aims to develop an understanding of the core elements of mental health nurs-
ing practice in acute inpatient, rehabilitation or community settings with particular em-
phasis on primary prevention and early inter-
vention approaches. The theoretical, concept-
ual and practical knowledge required to provide effective consumer focused nursing care for people receiving mental health care within a variety of practice contexts is ex-
plored.

Courses: NS64, NS85
Campus: KG
Credit points: 12
Semester: 2

► NSN626 Dementia and Aged Care Services
This unit aims to support aged care practitio-
ers to respond to the challenges of caring for older people with Alzheimer's disease and their families in a community health context. The central focus of this package is a CD-ROM which employs an interactive case study approach to introduce learners to a family situation where an older relative with
Alzheimer’s disease is being cared for at home.

Courses: NS34, NS39, NS64, NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► NSN701 Advanced Health Assessment
This unit aims to develop an advanced understanding of health assessment in nursing practice. This will be achieved by exploring the theoretical, conceptual and practical knowledge required to effectively assess the individual, family and their environment to provide nursing care within the context of specialist practice.

Courses: NS30, NS31, NS33, NS36, NS64, NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► NSN724 Advanced Nursing Practice
This unit is designed to present a foundation of theoretical and practice concepts required for registered nurses to provide effective, consumer-focused nursing care within a variety of clinical contexts in a range of practice settings. The unit provides a framework from which students can develop an understanding of the impact of selected health problems on individuals, families, and communities. This will include practice concepts (philosophies, evidence based practice, competencies and continuity of care); physiological, pathophysiological and psychosocial underpinnings of advanced specialty or generalist practice; planning of appropriate strategies/interventions for client care; and development of selected technical skills.

Courses: NS30, NS31, NS64, NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► NSN725 Specialisation in Medical/Surgical and Cancer Nursing
This clinically based unit will provide the opportunity for students to further develop and consolidate prior learning in a clinical setting of their choice. This unit will enable students to discuss issues and trends occurring in nursing practice in a selected medical/surgical or cancer care environment, and critically analyse the advanced concepts that underpin specialist nursing practice. Students will focus on clinical judgement and reflective skills through the application of theoretical concepts to common health problems experienced by clients in a selected medical/surgical or cancer care environment. They will also initiate plans of care to address common needs/problems experienced by clients in this specialist field.

Courses: NS33, NS64, NS85
Prerequisites: NSN701
Credit points: 12 Semester: 2

► NSN726 Advanced Clinical Practice
This unit aims to develop students’ understanding of the theory, process and practice of advanced nursing in a designated practice context, to enable them to effectively prevent and manage common health problems experienced by individuals and families in a range of locations within their field. Content which relates to a broad range of clinical nursing practice will be addressed. This will include: physiological, pathophysiological and psychosocial underpinnings of advanced nursing practice across a broad range of body systems and health problems; planning of appropriate strategies/interventions for client care; and development of related technical skills.

Courses: NS31, NS33, NS34, NS64, NS85
Incompatible with: NSN722
Credit points: 12 Semester: 2

► NSN801 Health Assessment in Aged Care
This unit provides aged care practitioners with learning opportunities to develop and expand their understanding of the health care assessment of older adults. Participants will be offered learning opportunities aimed at developing a strong theoretical foundation on which to assess the health care needs of older people. Theoretical knowledge of biophysical and psychosocial aspects of ageing will be applied to the assessment of client situations in order to develop a competent approach to aged care health assessment. The course has been specifically designed to complement health assessment tools which meet workplace needs in a variety of practice contexts - community and residential aged care.

Courses: NS39, NS64, NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► NSN821 Key Issues in Emergency and Intensive Care Nursing
This course has been specifically designed to support older people in society. Identifying specific incidents and exemplars this unit also highlights the significance of flexible health/aged care policy and community based programs and services.

Courses: NS39, NS64, NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► NSN822 Practice Issues in Ageing
This unit addresses the issues that concern the organisation and delivery of services including those directly related to clients’ quality of life, their experience and their families’ experiences of services. Study guide modules include the following: systems for care for older people; transition to residential replacement therapies, endocrine, liver and neurological disorders, sepsis and multi-organ failure.

Courses: NS30, NS64, NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 2

► NSN825-1 Thesis (Part 1)
The thesis provides students with an opportunity to formally extend and synthesise knowledge gained in earlier semesters of the course. The study represents an independent piece of research completed under the guidance of a supervisor. The thesis may be a study on research which makes a contribution to the body of knowledge in the student's discipline area or a study in which the student critically analyses and evaluates existing knowledge and produces observations and conclusions of relevance to the field concerned. Part-time students complete NSN825-1 and NSN825-2. Full-time students complete NSN850. The final thesis is approximately 15,000 to 20,000 words.

Courses: NS85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 24 Semester: 1, 2

► NSN825-2 Thesis (Part 2)
The unit synthesizes knowledge gained in earlier semesters of the course. The study represents an independent piece of research conducted under the guidance of a supervisor. The thesis may be a study on research which makes a contribution to the body of knowledge in the student's discipline area or professional area, or a study in which the student critically analyzes and evaluates existing knowledge and produces observations and conclusions of relevance to the field concerned. Part-time students complete NSN825-1 and NSN825-2. Full-time students complete NSN850. The final thesis is approximately 15,000 to 20,000 words.

**Courses:** NSN850
**Semester:** 1, 2
**Contact hours:** 3 per week
**Credit points:** 12

- **NSN901 Mental Health Assessment**
  This unit aims to facilitate students' understanding of abnormal behaviour and to provide students with the skills and concepts necessary to assess mental health across the life span. Students will learn to collect data guided by the principles of effective communication, relationship-building, therapeutic interviewing, comprehensive history-taking, and general health screening. A biopsychosocial perspective will be used to conceptualize case formulation and the examination of differential diagnoses according to DSM-IV criteria. Major components of mental health assessment are interviewing techniques, mental status, examinations, psychosocial developmental history, family history, and sociocultural influences.

**Courses:** NSN4, NSN5
**Campus:** KG
**Credit points:** 12
**Semester:** 1

- **NSN921 Mental Disorders: Theories and Issues**
  This unit complements Mental Health Assessment by providing students with the opportunity to apply assessment skills in an acute mental health nursing practice environment. The unit consists of two components - one theoretical and one clinical. The theoretical component concentrates on two major clinical treatment modalities in the management of mental illness, namely psychopharmacology and therapeutic intervention strategies based on process theory. The traditional medical model will be utilized as a means of explaining abnormal or major mal-adaptive behaviour patterns. The clinical component will take place at an acute inpatient facility which has a primary focus on mental health.

**Courses:** NSN4, NSN5
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12

- **NSN922 Models for Mental Health Clinical Practice**
  This is a continuation of OPB350. The unit is intended to be practical. The focus will be on integrating new knowledge into existing abilities and providing participants with an opportunity to increase their knowledge of the theoretical bases of a variety of counselling approaches.

**Courses:** NSN4
**Contact hours:** 3 per week
**Campus:** KG
**Credit points:** 12

- **OPB250 Optometry 2**
  This subject covers the fundamental areas of ophthalmic optics and optometry within the context of health care in Australia. It provides a basic understanding of the concepts of ophthalmic optics together with professional development, ethical responsibilities and the role of optometry.

**Courses:** OP42
**Prerequisites:** MAB140
**Corequisites:** PCB240
**Contact hours:** 5 per week
**Campus:** KG
**Credit points:** 12

- **OPB350 Optometry 3**
  Ophthalmic optics is continued with the study of neutralisation, spectacle lens design and prescribing parameters of lenses and frames. The theory and practice of keratometry, optometers, ophthalmoscopy and retinoscopy are also studied.

**Courses:** OP42
**Prerequisites:** PCB240, OPB250
**Corequisites:** PCB340, OPB351
**Contact hours:** 6 per week
**Campus:** KG
**Credit points:** 12

- **OPB351 Visual Science 3**
  This includes a study of the basic visual sciences that underpins the practice of optometry. It covers the optics of the eye, including its basic design, dimensions and retinal quality as well as the psychophysical principles of vision.

**Courses:** OP42
**Prerequisites:** LSB250, PCB240
**Corequisites:** PCB340, OPB350, OPB352.
**Contact hours:** 5 per week
**Campus:** KG
**Credit points:** 12

- **OPB352 Ocular Anatomy and Physiology 3**
  This unit provides information on the ocular anatomy and physiology that underpins the functional measurements made in optometry and their interpretation. It includes the structure and function of the anterior eye and orbit.

**Courses:** OP42
**Prerequisites:** LSB250, LSB275
**Corequisites:** OPB351
**Contact hours:** 5 per week
**Campus:** KG
**Credit points:** 12

- **OPB450 Optometry 4**
  This is a continuation of studies in OPB350, and introduces the theory and practice of clinical techniques used in the examination of the patient and assessing visual functions. The subject is also the initial introduction to the care of patients in the Optometry Clinic.

**Courses:** OP42
**Prerequisites:** OPB350, OPB351, OPB352
**Corequisites:** OPB451, OPB452
**Contact hours:** 5 per week
**Campus:** KG
**Credit points:** 12

- **OPB451 Visual Science 4**
  This continues study commenced in OPB351, and provides students with an understanding of spatial, temporal, colour and binocular vision, and their influence on visual performance.

**Courses:** OP42
**Prerequisites:** OPB351, OPB352, OPB350
**Corequisites:** OPB450, OPB452
**Contact hours:** 5 per week
**Campus:** KG
**Credit points:** 12

- **OPB452 Ocular Anatomy and Physiology 4**
  This is a continuation of OPB352. The unit covers the posterior eye, orbit, neural pathways, eye movements, neurophysiology of vision and an introduction to electrophysiological techniques.

**Courses:** OP42
**Prerequisites:** OPB352, OPB351, OPB350
**Corequisites:** OPB451, OPB450
**Contact hours:** 5 per week
**Campus:** KG
**Credit points:** 12

- **OPB550 Diseases of the Eye 5**
  This unit provides students with a knowledge and understanding of relevant general diseases and those that affect the eye. It includes general disease principles and processes, referral procedures, genetics, congenital, dystrophic and degenerative eye
disease, and the ocular manifestation of general disease.

Courses: OP42

Prerequisites: OPB450, OPB451, OPB452, LS492
Corequisites: OPB551, OPB552, OPB553
Contact hours: 4 per week
Credit points: 12
Semester: 1
► OPB551 Optometry 5
This unit gains an understanding of the theory and practice of essential clinical techniques required to examine patients’ eyes and assess visual function. The subject contains the development and management of refractive errors and binocular vision accommodation anomalies.

Contact hours: 6 per week
Credit points: 12
Semester: 2
► OPB652 Pharmacology
This subject covers both general and ocular pharmacology. It includes pharmacokinetic and pharmodynamic principles, the mechanisms of action and therapeutic applications of drugs used in the treatment of general and ocular disease, and drugs used to assist in the diagnosis of ocular conditions.

Courses: OP42

Prerequisites: OPB550, OPB551, OPB552, OPB553
Corequisites: OPB650, OPB651, OPB653
Contact hours: 5 per week
Credit points: 12
Semester: 2
► OPB653 Clinical Practice 6
The subject is a continuation of OPB553, and enables students to apply eye examination techniques in a clinical setting. There is an emphasis on advanced communication skills, patient management and clinical decision-making.

Courses: OP42

Prerequisites: OPB550, OPB551, OPB552, OPB553
Corequisites: OPB650, OPB651, OPB652
Contact hours: 6 per week
Credit points: 12
Semester: 2
► OPB750 Topics in Optometry 7
Students are required to choose a research topic, conduct a literature search on this topic, develop experimental hypothesis, plan and undertake a research project. Students give oral presentations of their own research project. Presentations on advanced clinical care and decision making skills include lecture and tutorial presentations and case summaries.

Courses: OP42

Prerequisites: OPB650, OPB651, OPB652, OPB653
Corequisites: OPB751, OPB752, OPB753
Contact hours: 8 per week
Credit points: 12
Semester: 1
► OPB751 Advanced Optometry 8
This unit includes optometry’s role in health care; professional and ethical behaviour; relevant state and federal Acts; professional and ethical behaviour; pharmacology. It includes pharmacokinetic and pharmodynamic principles, the mechanisms of action and therapeutic applications of drugs used in the treatment of general and ocular disease, and drugs used to assist in the diagnosis of ocular conditions.

Courses: OP42

Prerequisites: OPB650, OPB651, OPB652, OPB653
Corequisites: OPB750, OPB751, OPB752, OPB753
Contact hours: 4 per week
Credit points: 12
Semester: 2
► OPB852 Clinical Practice 8
This unit enables students to consolidate skills developed in OPB752, to increase their knowledge base and achieve surety with decision making involving the management of patients’ eye and vision problems.

Courses: OP42

Prerequisites: OPB750, OPB751, OPB752, OPB753
Corequisites: OPB850, OPB851, OPB852
Contact hours: 8 per week
Credit points: 12
Semester: 2
► OPB853 Specialist Clinical Practice 8
This unit continues to consolidate skills developed in OPB753 in the specialised clinical areas of contact lenses, low vision management and paediatric optometry.

Courses: OP42

Prerequisites: OPB750, OPB751, OPB752, OPB753
Corequisites: OPB850, OPB851, OPB852
Contact hours: 8 per week
Credit points: 12
Semester: 2
► OPP001 Ocular Therapeutics 1
The aim of this unit is to provide optometrists with a sound knowledge of bio-medical sciences so they can establish and manage certain eye diseases. This unit covers: general pathology and immunology with reference to ocular lesions, microbiology with reference to organisms involved in ophthalmic diseases, pharmacology and pharmodynamics including interaction of drugs with the body, disorders of the anterior eye, glaucoma, iritis and uveitis, management of cataract, post-surgical management, legal requirements for therapeutic drug use, workshop skills related to the management of disease.
Courses: OP43  
Credit points: 24  
Semester: 2  
► OPP002 Ocular Therapeutics 2  
This unit enables optometrists to develop an understanding of the properties of ocular therapeutic drugs and their applications in clinical practice, and to develop experience with the clinical management of certain eye diseases. The following topics are covered: Examination and diagnosis of anterior eye conditions (including acute red eye), glaucoma, iritis and uveitis, and cataract; development of management strategies including establishing appropriate treatment plans and evaluating the need for referral for specialist treatment; management of post-surgical conditions.
Courses: OP43  
Credit points: 24  
Semester: 1  
► PCB807 Patient Care in Professional Practice  
This is an introductory subject emphasising the appropriate response to the health care needs of patients and the ethical, legal and clinical accountability of the medical radiation technologist for patient care. It includes resuscitation techniques, client-professional communication and interpersonal behaviour and skills.
Courses: PH38  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 1  
► PCB101 Physical Science  
This unit introduces students to some of the basic concepts in the Physical Sciences by integrating core topics into a number of occupational scenarios. Topics include the following: matter; atomic and molecular structure; chemical reactions and equations; acids, bases, pH; oxidation and reduction; carbon chemistry; organic compounds; chemistry of biological processes; polymers, biomaterials; gases and gas laws; mechanics and motion; forces; momentum and collisions; mechanical energy; conservation laws; thermometry; thermal energy, energy transfer.
Courses: ED90, IF29, IF39, IF61, IX02, IX14, SC01, SC20  
Contact hours: 4 per week  
Campus: GP and CA  
Credit points: 12  
Semester: 1, 2  
► PCB107 Physics and Quantitative Techniques  
This unit includes the following: data and error analysis, geometrical optics (reflection, refraction, dispersion, image formation, optical instruments, photometry); circuit theory and electronics (DC circuits, AC circuits, semiconductors, rectifiers and transistors, digital electronics); waves and acoustics (properties of waves, interference and diffraction of waves, sound waves, measurements of sound).  
Courses: IF29, IF39, IF61, PH38, SC01  
Contact hours: 4.5 per week  
Campus: GP  
Credit points: 12  
Semester: 1  
► PCB136 Engineering Physics 1C  
This introductory unit covers: dynamics (motion in 1D, vectors, Newton’s Laws, motion in 2D (including circular motion), uniform circular motion); work, energy and power (potential energy and conservation of energy, linear momentum and collisions); waves (oscillatory motion, wave motion, sound waves, superposition and standing waves); geometrical optics (reflection, refraction, dispersion, Huygens’ principle, image formation by mirrors and lenses, optical instruments); physical optics (interference of light, diffraction); thermal physics (temperature, thermometry, thermal expansion, heat and thermal energy, heat capacity and specific heat, latent heat, heat transfer).
Courses: CE44, EE41, EE42, EE46, EE48, IF21, IF28, ME40, ME41, ME42, ME48  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 1, 2  
► PCB140 Introductory Chemistry  
This unit includes the following: matter and its classification; atomic and molecular composition of matter; structure of atoms and molecules and use of the Periodic Table to predict the behaviour of matter; chemical bonds and the nature of molecules; chemical composition, chemical reactions, chemical equations and chemical calculations; representative elements of the main group elements, and specifically of carbon; solution chemistry, acids bases, pH and chemical calculations using solutions; equilibrium chemical reactions; oxidation reduction and electrochemistry; gaseous state of matter and gas laws.
Courses: HH40, IF29, IF39, IF61, IX02, SC01  
Contact hours: 5 per week  
Campus: GP and CA  
Credit points: 12  
Semester: 1, 2  
► PCB141 Chemistry for Clinical Health Professionals  
This unit includes three sections: General chemistry includes the periodic table, chemical bonding, chemical reactions and stoichiometry. Physical chemistry includes chemical equilibrium, acids and bases, rates of reactions, energy and reactions, redox reactions and electrochemistry. Organic chemistry includes: introductory organic chemistry, organic functional group chemistry, stereochemistry of organic compounds, heterocyclic chemistry, biologically important organic compounds.
Courses: HL43, OP42  
Contact hours: 8 per week  
Campus: GP  
Credit points: 12  
Semester: 1  
► PCB142 Chemistry 1  
This unit includes inorganic and general chemistry: nature of matter, chemical reactions and chemical equations, reactions in solution, acids bases and redox reactions, atomic and molecular structure, periodic table and periodicity, atomic electron configuration, chemical bonds and theories of chemical bonding. It also includes physical chemistry: states of matter, gases, chemical equilibrium, equilibria in electrolyte solutions, acids and bases, buffer solutions, colligative properties, colloids, introductory electrochemistry.
Courses: ED90, HL42, HM45, IF29, IF39, IF61, IF68, IX02, LS37, LS50, PU40, SC01, SC20, SC40, SC45  
Incompatible with: PCB140  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 1, 2  
► PCB150 Physics 1H  
This unit includes basic physical measurements, mechanics, heat, waves, acoustics and optics, and the instrumentation used to measure physical parameters.
Courses: ED90, IX02, LS37, SC01, SC40  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 1, 2  
► PCB172 Physics for Surveyors  
This unit includes the following: measurements and uncertainty, kinematics (vector and scalar quantities, equations of motion); dynamics (friction, centripetal force, the hoist, impulse and momentum, periodic motion, work and energy); gravity, circular motion, centripetal force, gravity. Kepler’s Laws, orbits; fluid statics (pressure, barometry); fluid dynamics (fluid flow in pipes and channels, equation of continuity, Bernoulli’s principle, viscous flow and Poiseuille’s equation); optical instruments (refraction, reflection, total internal reflection, spherical mirrors, thin lenses, transits, theodolites, corner cubes, cameras); electric and magnetic fields; electrical circuits (electronic components).
Courses: PS47, PS48  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
► PCB178 Principles of Medical Radiations  
This unit provides an overview of the physical principles of the various medical imaging modalities and techniques. It includes an overview of techniques used in the diagnosis and treatment of cancer.
Courses: PH38  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 1  
► PCB200 Chemical Technology 1  
This unit includes the following: the role of chemical technologist in industry; fundamentals of chemical technology; mass balances, energy balances, environmental chemistry, corrosion, industrial pollution obligations and monitoring; generic issues eg quality assurance, industrial health and safety.
Courses: SC01, SC51  
Corequisites: PCB142  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 2  
► PCB240 Optics 1  
This unit includes a study of selected topics in optics particularly related to aspects of optometry. Topics include geometrical optics in lenses and lenses, including spherical and cylindrical, spherical and toric lenses, colour and colour measurement, photometry, lens aberrations and optical instruments.
Courses: OP42  
Prerequisites: PCB101 or SA or better in Senior Physics  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 2  
► PCB242 Chemistry 2  
This unit includes the following: introductory organic chemistry; organic functional group chemistry; stereochemistry of organic compounds; biologically important organic compounds; heterocyclic chemistry; biologically important inorganic compounds; calorie counting - the underlying principle; speed control of chemical and biochemical processes.
Courses: ED90, HL42, HM45, IF29, IF39, IF61, IF68, IX02, LS37, LS50, PU40, PU43, SC01, SC20, SC40, SC45, SC51  
Prerequisites: PCB140 (for students without Senior Chemistry), PCB142 (for students with Senior Chemistry)  
Corequisites: PCB142  
Contact hours: 6 per week  
Campus: GP and CA
## PCB250 Physics 1

This unit introduces concepts of fields and potentials. General techniques such as any introductory physics of differential equations and their solution are also covered. Specific topic areas to be covered include the following: calculus based kinematics and dynamics in one and two dimensions; accelerated frames of reference; 2nd order systems and the forced-damped-harmonic oscillator; gravitational and electromagnetic fields; Newton’s law of gravity; Coulomb’s law; potentials; static fields (point and distributed sources); Gauss’s law; capacitors; Bi-Savart law and Ampere’s law; electromagnetic induction and Faraday’s law; Lenz’s law.

**Courses:** ED90, IF29, IF39, IF66, IX02, IX14, SC01, SC20  
**Prerequisites:** (PCB101 or PCB107) AND (MAB131 or MAB180) OR (MAB100 or MAB111)  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### PCB260 Physics 1A

This unit includes physical optics including interference, interferometry, Fraunhofer diffraction, Fourier methods, lasers and holograms. It also covers atomic physics including introductory quantum physics, spectra and the Bohr theory. An introduction to Special Relativity including time dilation and length contraction, Lorentz transformations, Minkowski diagrams and relativistic mass, momentum and energy is also included.

**Courses:** IF29, IF39, IF61, IX14, SC01, SC20  
**Prerequisites:** (PCB101 or PCB107) AND (MAB131 or MAB180) OR (MAB100 or MAB111)  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2

### PCB272 Radiation Physics

This unit includes the following: atomic structure, radioactivity, interaction of X-rays with matter; Radiation dosimetry; thermal physics; temperature, heat, thermal expansion; electric and magnetic fields, motion of charged particles; X-rays - properties and nature; X-ray tube construction and design; diagnostic and therapy tubes; high voltage generation, transformers, rectifiers, linear accelerators; ratings of X-ray tube, tube failure.

**Courses:** PH38  
**Prerequisites:** PCB107  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2

### PCB276 General Radiography 1

This unit includes a program of lectures relating to radiography of the skeletal system, from preparation of the room and patient through to assessment of the final image.

**Courses:** PH38  
**Prerequisites:** LSB145, PCB178  
**Corequisites:** LSB245, PCB277  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2

### PCB277 Radiographic Practice

This unit is a program of practical sessions relating to radiography of the skeletal system allowing the development of skills in patient positioning and image production. A study of the processes involved in the production of a visible image in radiography is included.

**Courses:** PH38  
**Prerequisites:** PCB276  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2

### PCB286 Treatment Planning 1

This unit is an introduction to the techniques of radiotherapy treatment planning including patient data acquisition and radiation dosimetry.

**Courses:** PH38  
**Prerequisites:** PCB178  
**Contact hours:** 6 per week  
**Credit points:** 12  
**Semester:** 2

### PCB287 Megavoltage Therapy 1

This unit introduces the basic techniques of radiotherapy treatment delivery including beam direction and beam defining devices. Practical work is completed in hospital departments.

**Courses:** PH38  
**Prerequisites:** PCB286, PCB178  
**Corequisites:** LSB245  
**Contact hours:** 6 per week  
**Credit points:** 12  
**Semester:** 2

### PCB314 Concepts in Analytical Chemistry

This unit includes the following: classical analytical chemistry including titrimetric analysis (neutralimetry, precipitometry, complexometry and redoximetry); gravimetric analysis; sample preparation; specialist reagents for analytical chemistry usage; EDTA, redox indicators etc; instrumental analytical chemistry; UV-visible spectrophotometry; electroanalytical methods including voltammetry, potentiometry and electrogravimetry; complementary practical program and data handling.

**Courses:** IF93, IF71, IF66, SC01  
**Prerequisites:** PCB142  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### PCB334 Inorganic Chemistry

This unit includes the following: coordination chemistry; structure and bonding of metal complexes including crystal field and valence bond theories; spectroscopic terms and electronic transitions; solution chemistry and complex equilibria; Pourbaix diagrams; HSAB theory; reaction mechanisms of coordination compounds; chemistry of selected non-metals, lanthanides, actinides and precious metals, their extraction from ores and refining.

**Courses:** IF29, IF39, IF61, SC01, SC51  
**Prerequisites:** PCB142  
**Corequisites:** PCB242  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### PCB340 Optics 3

This unit includes the application of geometrical optics to selected aspects of optometry including lens form and thickness, contact lenses, spectacle lens design and spherical surfaces; the wave nature of light with emphasis on interference, interferometry, diffraction and polarisation; the special topics of optical processing, lasers and the evaluation of optical systems.

**Courses:** OP42  
**Prerequisites:** OPB250, PCB240  
**Corequisites:** OPB350  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### PCB354 Structure and Mechanism in Organic Chemistry

This unit includes the following: organic chemistry; combination of cyclic compounds; chirality; absolute configuration; racemic and meso compounds. Importance of structure and stereochemistry in natural products such as terpenes, steroids and sugars; carbohydrate chemistry (monosaccharides, disaccharides, polysaccharides). Applications in selected research areas of drugs, polymers and enzymes; reaction mechanisms (acid/base theory, polarity, induction effects); addition reactions, nucleophilic substitution and addition, electrophilic additions; application to organic synthesis is also included.

**Courses:** ED90, IF29, IF39, IF61, IX02, SC01, SC51  
**Prerequisites:** PCB242  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### PCB361 AC Theory and Electronics

Emphasis in this unit is on the application of theory to practical tasks. Laboratory work consists of introductory exercises followed by a series of topics to be investigated within the available laboratory times. Specific topics covered include the following: steady state and transient AC passive-circuit analysis; power in AC circuits; applications of semiconductor devices; amplifiers and feedback theory; operational amplifiers (ideal and non-ideal properties); oscillators; introductory digital electronics (gates, flip-flops and counters); active-circuit analysis; active and passive filters.

**Courses:** ED90, IF29, IF39, IF61, SC01, SC20  
**Prerequisites:** MAB111, PCB250  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

### PCB362 Physics 2

This unit integrates and enhances the knowledge gained in earlier units with applications to more interesting and complex systems. Topics include the following: classical mechanics, rotating systems, Lagrange’s equations and Hamiltonian operators, precession, radiation physics, nuclear disintegration, equilibrium, interaction of radiation with matter, nuclear detectors, electromagnetism, electric fields, Gauss’ law, dielectrics.

**Courses:** IF29, IF39, IF61, SC01, SC20  
**Prerequisites:** PCB250 & MAB132 or MAB112  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 1

### PCB375-1 Radiographic Equipment

This unit includes a discussion of design considerations of specialist radiographic imaging equipment for fluoroscopy, mammography, tomography and mobile radiography. (12 Credit points achieved at completion of PCB375-1 and PCB375-2.)

**Courses:** PH38  
**Prerequisites:** PCB272  
**Contact hours:** 2 per week  
**Credit points:** 6  
**Semester:** 1

### PCB375-2 Radiographic Equipment

This unit is an introduction to computer hardware, binary numbers and the digital...
Courses: PH38
Prerequisites: PCB375-1
Contact hours: 2 per week  Campus: GP
Credit points: 6  Semester: 2

- PCB377 General Radiography 2
This unit is an extension of topics introduced in PCB276 and includes more techniques of skeletal radiography, ward and operating theatre radiography, and examinations using contrast media. A program of practical sessions in skeletal imaging is included.

Courses: PH38
Prerequisites: PCB276, PCB277
Corequisites: PCB379
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

- PCB389 Clinical Radiotherapy 1
This unit offers clinical experiences in radiotherapy related to topics introduced in PCB276 and PCB377. Experience is obtained in approved clinical departments.

Courses: PH38
Prerequisites: PCB277
Corequisites: PCB377
Contact hours: 160 over 4 weeks  Campus: GP
Credit points: 6  Semester: 1

- PCB389 Clinical Radiotherapy 2
This unit includes the principles and applications of megavoltage therapy including techniques for specific sites. Practical exercises are performed in clinical departments.

Courses: PH38
Prerequisites: LSB245, PCB287
Contact hours: 200 over 5 weeks  Campus: GP
Credit points: 6  Semester: 1

- PCB396 Radiotherapy Planning and Physics
This unit is an extension of the study of treatment planning introduced in PCB286 and the planning of complex techniques of photon therapy and electron therapy.

Courses: PH38
Prerequisites: LSB245, PCB272, PCB286
Corequisites: PCB397
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

- PCB397-2 Megavoltage Therapy 2
This unit includes the principles and applications of megavoltage therapy including techniques for specific sites. Practical exercises are performed in clinical departments.

Courses: PH38
Prerequisites: LSB345, PCB287, PCB397-1
Corequisites: LSB345
Contact hours: 5 per week  Campus: GP
Credit points: 6  Semester: 2

- PCB397-1 Megavoltage Therapy 2
This unit includes the principles and applications of megavoltage therapy including techniques for specific sites. Practical exercises are performed in clinical departments.

Courses: PH38
Prerequisites: LSB345, PCB287
Contact hours: 5 per week  Campus: GP
Credit points: 6  Semester: 1

- PCB405 Principles of Physical Chemistry
This unit offers a program in physical chemistry based upon interactive learning and problem solving. Topics in modern physical chemistry including principles of energetics, kinetics, phase and colloid chemistry and macromolecules form the basis of this unit. The theoretical framework is strongly supported by an experimental program with an emphasis on accuracy, precision and error estimation.

Courses: ED90, IF29, IF39, IF61, IX02, SC01, SC20, SC51
Prerequisites: PCB397-1
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2

- PCB414 Industrial and Environmental Analytical Chemistry
This unit is an introduction to quality assurance in an analytical chemistry laboratory; international QA standards; analytical methods and method accreditation; sample traceability; calibration, validation and standards; sampling; instrumental techniques (including UV-visible spectrophotometry, fluorimetry, infrared spectroscopy (FT-IR), atomic absorption spectrometry, atomic fluorescence spectrometry, chromatography (GC and HPLC)).

Courses: ED90, IF29, IF39, IX02, IX14, SC01, SC51
Prerequisites: PCB142
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 1

- PCB444 Spectroscopy
This unit includes the following: theory of spectroscopy; width and intensity of spectral lines; instrumentation; rotational spectroscopy; vibrational spectroscopy; vibrational-rotational spectroscopy; electronic spectroscopy; electron excited states; symmetry and spectroscopy; application of infrared spectroscopy to organic compounds (fundamental absorption bands, structural influences); functional group analysis; nuclear magnetic resonance (theoretical concepts); classification of nucleic acid, protein and nucleoprotein structures; electronic absorption spectra; application of infrared spectroscopy to organic compounds (fundamental absorption bands, structural influences); functional group analysis; nuclear magnetic resonance (theoretical concepts); classification of nucleic acid, protein and nucleoprotein structures; electronic absorption spectra; thermal properties of solids, acoustic waves in solids and crystals. The third part covers the Debye theory, statistical physics, microscopic and quantum theories of entropy, Maxwell relations, Boltzmann and Fermi-Dirac distributions, and Fermi energy and Fermi surface.

Courses: IF29, IF39, IX14, SC01, SC20
Prerequisites: PCB250 and (MAB134 or MAB211)
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2

- PCB469 Astrophysics 1
This unit is an introduction to stellar astrophysics. The unit covers astronomy in ancient Egypt, Babylon, Arabia, Renaissance Europe; gravity as described by Kepler and Newton; measuring distances in the universe; apparent and absolute magnitude; telescope resolution; spectroscopy; stellar classification and the HR-diagram; star formation; nucleosynthesis in stars of varying mass; the sun; planetary nebulae and white dwarfs; supernovae; neutron stars and black holes; practical exercises; field trips.

Courses: EE48, SC01
Prerequisites: PCB107 or PCB136 or PCB150
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2

- PCB476 Special Procedures
This unit includes specialised techniques of radiography including the skull, macroradiography, obstetrics, gynaecology, CNS, paediatrics and geriatrics.

Courses: PH38
Prerequisites: PCB377, PCB379
Corequisites: PCB479
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

- PCB477 Complementary Imaging Techniques
This unit introduces the physical principles, equipment and applications of medical ultrasound and nuclear medicine imaging. It includes basic ultrasound scanning techniques and resultant imaging appearances for ab-
UNIT SYNOPSIS

PCB563 Global Energy Balance and Climate Change
This unit offers science and engineering students an opportunity to gain awareness about the expanding field of alternative energy technologies and to understand relationships between use of energy and its impact on local and global environment.
Courses: SC01
Prerequisites: MAB112 or MAB132
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB567 Advanced Radiographic Technique 1
This unit includes a study of the principles and techniques used in advanced radiographic techniques including angiography, arthrography, sonography and sialography. It also includes a study of the appearances of pathology on medical images with particular emphasis on the radiographic image.
Courses: PH38
Prerequisites: LSB321, PCB476, PCB479
Corequisites: PCB580-1  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB580-1 Clinical Radiography 3
This unit offers clinical experience in special radiographic procedures as introduced in PCB476, PCB567 and general radiography.
Courses: PH38
Prerequisites: PCB476, PCB580-1  
Contact hours: 200 over 5 weeks  
Campus: GP  
Credit points: 6  
Semester: 2

PCB584 Forensic Examination of Physical Evidence
This unit presents an overview of the crime scene: its investigation and management; detection and collection of physical evidence; blood splash evidence; fire investigation; bomb scene; forensic osteology; expert evidence; forensic photography; fingerprinting; forensic applications of optical and electron microscopy. Substantial laboratory and workshop sessions completes the theory.
Courses: IF29, IF39, IX02, IX14, SC01
Prerequisites: PCB462 and (MAB134 or MAB311)  
Contact hours: 4 per week  
Campus: GP  
Credit points: 2  
Semester: 1

PCB587 Specialised Radiotheray Technique 1
This course of lectures and practical exercises focuses on the specialised techniques of orthovoltage and superficial therapy. It includes the study of radioactivity including methods of radiation detection, radioactive equilibrium and production of radioisotopes, the principles and application of brachytherapy.
Courses: PH38
Prerequisites: PCB397, PCB489
Contact hours: 6 per week  
Campus: GP

PCB479 Clinical Radiotherapy 2
This unit includes clinical experience in approved departments in radiographic examinations discussed in PCB377 and PCB476.
Courses: PH38
Prerequisites: PCB379  
Corequisites: PCB476  
Contact hours: 200 over 5 weeks  
Campus: GP  
Credit points: 6  
Semester: 2

PCB495 Computer Assisted Treatment Planning 1
This unit includes a study of planning hardware and software to include two-dimensional planning and the development of concepts to an advanced level of understanding of computer-assisted optimisation of isodose distributions.
Courses: PH38
Prerequisites: LSB345, PCB396  
Corequisites: PCB397-2  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 2

PCB496 Radiotherapy Equipment
In this unit students will gain an understanding of the physics underlying the operation of a modern linear accelerator, the interaction of radiation with tissue, dose measurement and related quality assurance procedures.
Courses: PH38
Prerequisites: PCB272  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 2

PCB505 Advanced Physical Chemistry
This unit offers a program in advanced physical chemistry based upon interactive learning and problem solving. Topics in modern advanced physical chemistry including electrochemistry, catalysis, surfaces, quantum mechanics and statistical mechanics are offered. The theoretical framework is strongly supported by an experimental program with an emphasis on accuracy, precision and error estimation.
Courses: IF39, IF61, IX02, IX14, SC01
Prerequisites: PCB305  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB514 Instrumental Analysis
This unit provides a theoretical and practical framework for analysis with advanced instrumental techniques and includes the following: atomic spectroscopy; mass spectrometry; HPLC; auto-analysers and flow analysis; advanced methods of data analysis: multivariate analysis, pattern recognition, classification and prediction. A complementary practical program is included.
Courses: IF39, IX02, IX14, SC01, SC51
Prerequisites: PCB414  
Corequisites: PCB242  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB524 Unit Operations
This unit includes the following: energy balances; principles of particle mechanics and the unit operations used to process solids; principles of fluid mechanics and the unit operations used to process fluids; principles of heat transfer and the unit operations involving heat transfer; rationale for the design and operation of the many individual processes (or 'unit operations'), which together make up a large part of any large scale process.
Courses: SC01, SC51  
Contact hours: 5 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB554 Synthesis and Reactivity in Organic Chemistry
The principles and practice of synthesis planning; synthetically-useful reactions followed interconversions of the common functional groups; carbon-carbon bond formation using organometallic reagents and enolates; selectivity and protection; aromaticity and heterocyclic chemistry.
Courses: IF39, IF61, IX02, IX14, SC01
Prerequisites: PCB354, PCB444  
Contact hours: 4 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB561 Quantum and Condensed Matter Physics
Courses: IF29, IF39, IX02, IX14, SC01, SC20
Prerequisites: PCB462 and (MAB134 or MAB311)  
Contact hours: 4 per week  
Campus: GP  
Credit points: 2  
Semester: 1

PCB562 Physical Methods of Analysis
The theory and practice of important analysis techniques relevant to the materials sciences is covered with examples drawn from industrial processes. Specific topics to be covered include the following: structure of crystals, types of lattice, unit cells, Miller indices, crystal diffraction, reciprocal space, X-ray diffraction, texture and stress analysis, X-ray fluorescence, electron microscopy.
Courses: IF29, IF39, IF61, IX14, SC01, SC20
Prerequisites: MAB112 or MAB132, PCB462  
Contact hours: 4.5 per week  
Campus: GP  
Credit points: 12  
Semester: 1

PCB580-2 Clinical Radiography 3
This unit offers clinical experience in advanced radiographic techniques as introduced in PCB476, PCB567 and general radiography.
Courses: PH38
Prerequisites: PCB580-1  
Contact hours: 200 over 5 weeks  
Campus: GP  
Credit points: 6  
Semester: 2
PCB590-1 Clinical Radiotherapy
This unit offers clinical experience in radiotherapy treatment and planning including specialised radiotherapy techniques as discussed in PCB587 and PCB595.

Courses: PH38
Prerequisites: PCB590-1
Contact hours: 200 over 5 weeks
Campus: GP
Credit points: 6 Semester: 2

PCB593 Digital Image Processing
This unit provides students with a basic understanding of the computer techniques used in image processing and reconstruction. Specific areas of study include the following: the structure of a digital image; image display techniques; grey scale palettes and look-up tables; Fourier transform theory; convolution theory; image processing hardware; image processing techniques, eg analysis, enhancement and restoration; spatial filtering; Fourier space filtering; methods of image reconstruction; 3D volume and surface rendering; applications of image processing in medicine, astronomy and remote sensing, etc.

Courses: PH38, SC01
Prerequisites: PCB250 or PCB375 or PCB496
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 1

PCB604 Project
A research project carried out in association with a staff member, chosen from a variety of chemical problems reflecting the teaching, research and consultancy interests of the staff. The project may vary and be adapted to the interests of each student. Students work independently on sophisticated laboratory experiments or project work with a minimum of staff direction.

Courses: IF39, IF71, IF86, IX02, IX14, SC01, SC51
Contact hours: 5 per week
Campus: GP
Credit points: 12 Semester: 1, 2

PCB605 Biomedical Instrumentation
See PCB460.

Courses: ME48
Prerequisites: PCB361
Contact hours: 5 per week
Campus: GP
Credit points: 12 Semester: 2

PCB614 Advanced Analysis
This unit includes the theoretical and practical framework of advanced analytical techniques, emphasising the analysis of materials and more difficult samples than those covered in previous units. Techniques include hyphenated mass spectrometry, analytical electron microscopy, thermal analysis and vibrational spectroscopy.

Courses: IF39, SC01
Prerequisites: PCB514
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

PCB624 Chemistry in Industry and Technology
This unit includes industrial processes and technologies involved in the manufacture of materials of industrial and societal importance. Topics include mass transfer operations, metals and alloys, ceramics, inorganic polymers, biopolymers, natural fibres, high technology polymers and industrial membranes. The unit includes field trips to various industrial sites and a group problem-solving exercise.

Courses: IF39, IF86, SC01, SC51
Prerequisites: PCB524
Contact hours: 5 per week
Campus: GP
Credit points: 12 Semester: 2

PCB634 Organometallic and Coordination Chemistry
Major topics covered are as follows: organometallic chemistry, including metal-carbon bonding, main group and transition metal organometallics and applications of organometallic compounds in synthetic chemistry; bioinorganic chemistry; physical methods of structure determination, such as single crystal X-ray diffraction; chemical applications of group theory.

Courses: IF29, IF39, IX14, SC01
Prerequisites: PCB434
Contact hours: 5 per week
Campus: GP
Credit points: 12 Semester: 2

PCB644 Frontiers in Chemistry
This unit addresses a selection of topics in advanced chemistry from a range of evolving areas of relevance in modern chemistry and chemical technology such as nanotechnology, drug design, free-radical chemistry and trace metal speciation in environmental and biological systems. It includes the important issue of the societal and ethical implications of the professions.

Courses: IF29, IF39, SC01, SC51
Prerequisites: PCB434, PCB505, PCB554
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

PCB661 Experimental Physics
The content of experiments and projects will vary and be adapted to the interests of each student. Students work independently on sophisticated laboratory experiments or project work with a minimum of staff direction.

Courses: IF29, IF39, IX14, SC01
Prerequisites: PCB361, PCB460
Campus: GP
Credit points: 12 Semester: 1, 2

PCB664 Lasers and Photonics
Laser and photonic technologies are rapidly maturing areas responsible for creating new industries and employment opportunities for scientists and engineers in the areas of information technology, manufacturing, sensing and health. In particular, the vast global communications industry has dramatically increased information transport rates through the development of new laser sources and photonic devices. At the heart of all advances in photonics is a greater understanding of light-matter interactions and the processes used to fabricate devices.

This unit is offered to science and engineering students who seek to understand the physical principles underpinning lasers and photonic devices and their use in a range of optical technologies.

Courses: SC01, SC60
Prerequisites: PCB260 or EEB340 and MAB134 or MAB311
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

PCB665 Physics 3
This unit consists of three parts. Part A extends the content of previous units in electromagnetism and the application of Maxwell's equations, electromagnetic waves, polarisation, dielectric permittivity, transmissivity line theory, waves, waveguides, optic fibre theory, antennae. Part B includes a detailed study of magnetic resonance and its applications. Part C presents the extension of studies in statistical mechanics, including microscopic approach to entropy, partition function, paramagnetism, perfect and real classical and quantum gases, phase equilibria, Bose-Einstein condensate, Brownian motion.

Courses: IF29, IF39, SC01
Prerequisites: PCB382, PCB462
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

PCB669 Astrophysics 2
This unit provides a theoretical background for the general theory of relativity and relativistic cosmology. This includes special theory of relativity, four-vectors and tensors, tensor calculus, covariant differentiation, least action principle and main postulates in special and general relativity, concepts of the interval and space-time metric, gravitational redshift, geodesic equation, energy tensor, Einstein equations for gravitational field, gravitational collapse, Schwarzschild metric, event-horizon for black holes, gravitational waves, cosmological principle, standard cosmological models, Robertson-Walker metric, dark energy, evolution of the universe, Big Bang, cosmological horizons, cosmic background radiation, and cosmological redshift.

Courses: SC01, SC60
Prerequisites: PCB362 and MAB134 or MAB521
Contact hours: 4 per week
Campus: GP
Credit points: 12 Semester: 2

PCB672-1 Project
This is a supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic.

**Courses:** PH38  
**Credit points:** 6  
**Semester:** 1  
**PCB672-2 Project**  
This is a supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic.

**Courses:** PH38  
**Prerequisites:** PCB672-1  
**Credit points:** 6  
**Semester:** 2  
**PCB675 Radiation Safety and Biology**  
This unit includes a study of the biological effects of ionising radiation and the philosophy and protocol in radiation protection. A study of the principles and techniques used in the quality assurance of medical imaging/radiotherapy apparatus and ancillary equipment and image formation evaluation is included.

**Courses:** PH38  
**Prerequisites:** PCB672-1  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1  
**PCB681 Computed Tomography Imaging**  
This unit covers both the technological and clinical aspects of X-ray computed tomography (CT). Clinical applications described include those for specific anatomical areas as well as advanced and interventional applications. The strengths and weaknesses of CT in relation to other imaging modalities are discussed.

**Courses:** PH38  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 1  
**PCB682 Magnetic Resonance Imaging**  
This unit includes the physical principles and clinical techniques used in magnetic resonance.

**Courses:** PH38  
**Contact hours:** 3 per week  
**Credit points:** 12  
**Semester:** 2  
**PCB684 Forensic Analysis and Toxicology**  
This unit provides a theoretical and practical framework for forensic analysis and toxicology. It includes topics such as nature and abuse of drugs; introduction to pharmacology and toxicology; illicit drugs and poisons; the application of GC, HPLC, MS and hyphenated techniques as well as IR; examination of trace evidence. Substantial laboratory and workshop sessions complement the theory.

**Courses:** SC01  
**Prerequisites:** PCB242, PCB514  
**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 2  
**PCB687 Specialised Radiotherapy Technique 2**  
This unit includes a study of specialised radiotherapy techniques including techniques applicable to the child patient and patients with communicable disease, total body photon and electron therapy. It also covers the principles, strengths and stage of development of techniques that are integral or complementary to the modern radiotherapy treatment of cancer.

**Courses:** PH38  
**Prerequisites:** PCB595  
**Contact hours:** 6 per week  
**Credit points:** 12  
**Semester:** 2  
**PCB695 Advanced Treatment Planning Topics**  
This unit is a study of the principles and techniques of medical imaging used in the detection of cancer including MRI, PET and SPECT. This study also covers future directions of three dimensional treatment planning, and IMRT.

**Courses:** PH38  
**Prerequisites:** PCB595  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 2  
**PCB700-1 Research Project**  
Students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project is assessed on the basis of an extensive written report and an oral presentation.

**Courses:** SC60  
**Credit points:** 12  
**Semester:** 1, 2  
**PCB700-2 Research Project**  
See PCB700-1 for details.

**Courses:** SC60  
**Credit points:** 12  
**Semester:** 1, 2  
**PCB700-3 Research Project**  
See PCB700-1 for details.

**Courses:** SC60  
**Contact hours:** 12  
**Credit points:** 12  
**Semester:** 1, 2  
**PCB700-4 Research Project**  
See PCB700-1 for details.

**Courses:** SC60  
**Contact hours:** 12  
**Credit points:** 12  
**Semester:** 1, 2  
**PCB700-5 Research Project**  
See PCB700-1 for details.

**Courses:** SC60  
**Contact hours:** 12  
**Credit points:** 12  
**Semester:** 1, 2  
**PCB706 Quantum Mechanics**  
Review of operators and their role in quantum mechanics, different representations, Dirac notations and linear vector space, matrix approach to quantum mechanics, eigenvalues and eigenvectors, unitary transformations, R- and P-representations, tensor product of states, six postulates of quantum mechanics, concept of measurements, quantum entanglement, density matrix, general theory of angular momentum, quantum oscillator, two-level systems, non-relativistic theory of spin, spinors, hybrid orbitals and chemical bonding, theory of scattering, Born approximation, partial wave analysis, perturbation theory.

**Courses:** SC01  
**Prerequisites:** PCB561  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 1  
**PCB708 Advanced Topics in Physics**  
No more than three topics are included. The content is determined by current research advances, availability of appropriate staff, visiting academics, etc and may vary from year to year.

**Courses:** SC60  
**Contact hours:** 4 per week  
**Credit points:** 12  
**Semester:** 1, 2  
**PCB742 Elective Unit**
PCN159 Ultrasonic Examination
1 The unit addresses the normal and abnormal anatomy and functions related to ultrasonology and obstetrics, the ultrasonic techniques used and the appearance of related images. It includes a study of the technique used in the ultrasonic examination of the abdomen including the normal anatomy and the ultrasound image of normal abdominal anatomy and its alteration by pathological processes.

Courses: PH71, PH80
Corequisites: PCN162, PCN197-1, PCN197-2
Contact hours: 3 per week
Credit points: 12
Semester: 1

PCN162 Principles of Medical Ultrasound
This unit is designed to provide students with a thorough understanding of the physical processes involved in producing an ultrasound image, the features of ultrasound equipment and the role and responsibilities of the sonographer in producing a diagnostic examination. Topics include general scanning principles and considerations, care of equipment, ultrasound equipment features, image production and processing, artefacts, image recording methods, quality control, biological hazards and safety issues, principles of Doppler ultrasound, care of the patient and communication issues.

Courses: PH60, PH71, PH75, PH80, PH85
Contact hours: 3 per week
Credit points: 12
Semester: 1

PCN184 Breast Imaging
This unit includes the following: medical imaging of the breast; principles of mammographic and sonographic imaging; breast anatomy and physiology; pathological conditions affecting the breast and its appearance; advanced mammographic techniques; mammographic and sonographic quality assurance.

Courses: PH60
Prerequisites: PCN162, PCN187
Corequisites: PCN397
Contact hours: 3 per week
Credit points: 12
Semester: 2

PCN187 Specialist Studies
This unit allows students to explore specialist techniques and applications through self-directed study and research.

Courses: PH60, PH71
Credit points: 12
Semester: 1

PCN197-1 Clinical Attachment 1
This is a supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers.

Courses: PH71, PH80
Corequisites: PCN159, PCN162
Campus: GP
Credit points: 6
Semester: 1

PCN197-2 Clinical Attachment 1
This is a supervised practical program carried out in an approved medical imaging department. Students are required to undertake specified clinical practice as applicable to their area of specialisation and meet minimum requirements of clinical hours and case scope and numbers.

Courses: PH71, PH80
Prerequisites: PCN197-1
Corequisites: PCN159, PCN162
Campus: GP
Credit points: 6
Semester: 2

PCN211 Physics of Medical Imaging
This unit addresses the physical principles involved in the production of radiographic, ultrasonic and magnetic resonance images, and quality control protocols.

Courses: PH71, PH80
Contact hours: 4 per week
Credit points: 12
Semester: 1

PCN212 Radiotherapy
This unit provides an overview of the application of physics to radiotherapy including theoretical and practical aspects of the major topics in radiotherapy physics.

Courses: PH71, PH80
Contact hours: 4 per week
Credit points: 12
Semester: 2

PCN214 Health and Occupational Physics
This unit introduces the philosophy, protocols and practices of safety in the medical and industrial fields and the minimisation of hazards associated with radiation, acoustic, electrical and mechanical techniques.

Courses: PH71, PH80
Contact hours: 4 per week
Credit points: 12
Semester: 2

PCN218 Research Methodology and Professional Studies
In the rapidly changing technological environment of medical physics and medical ultrasound it is essential that students develop basic research skills, data interpretation skills and written communication skills. Topics include the research process, data collection and analysis techniques, and writing and evaluating research reports. Students also require knowledge of the professional, basic management, legal and ethical issues involved in their particular specialty area. Topics include the role and purpose of professional bodies, professional communication, legal and ethical issues, and basic professional management techniques and issues.

Courses: PH71, PH75, PH80, PH85
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

PCN221 Best Practices in Lighting
Electrical energy usage and subsequent energy analysis techniques, advantages and disadvantages of choosing low energy lamps and luminaires, compromising low energy sources and quality lighting, sensors and sensing techniques for lighting control, energy conservation through dimming and lamp switching, daylighting techniques, potential for energy savings through daylighting, daylighting design and calculations.

Courses: PH62, PH72, PH82
Credit points: 12
Semester: 1, 2

PCN222 Advanced Lighting Design
This unit includes the latest developments in lamp technologies and sources (including LEDs and lasers), lighting in the mesopic range, a review of factors influencing lighting design; discomfort and disability glare; illuminance and glare scale, methods for the
UNIT SYNOPSES

assessment of tasks and environments; in-depth studies of colour, form, pattern and space, issues relating to the perception and comprehension of the environment; the practical effects of daylight, introduction to the integration of daylight and electric lighting. This is a very hands-on unit with a large component of computer design work, group design and the use of a variety of software tools.

Courses: PH62, PH72, PH82
Prerequisites: PCN122, PCN123
Campus: GP
Credit points: 12 Semester: 2

► PCN223 Lighting Applications

This unit builds on the material covered in PCN122 and looks in more depth at some of the applications covered in that unit, namely street lighting and public access lighting, as well as other areas not covered in that unit, including general floodlighting requirements and equipment, light distributions, calculation methods, area floodlighting, building floodlighting, pedestrian lighting, tunnel lighting, vehicle lighting, traffic signals, airport lighting, navigation lighting, display lighting, and advertising.

Courses: PH62, PH72, PH82
Prerequisites: PCN123
Campus: GP
Credit points: 12 Semester: 2

► PCN224 Applied Lighting

There is no set material for this unit. Students undertake an approved project over a semester on any topic relevant to their interest in lighting. The project may be predominately a reading course, reviewing, comparing or analysing material on a specific topic, or it may be a practically oriented project involving manufacture, measurement or analysis of a particular lighting product or installation. The project may be conducted at QUT or within the person's place of employment.

Courses: PH72, PH82
Campus: GP
Credit points: 12 Semester: 1, 2

► PCN259 Cardiac Ultrasound 1

The field of medical ultrasound is scientifically based and the environment that is rapidly changing and undergoing considerable technological advancement. A thorough understanding of the techniques used in the evaluation of the fetal, paediatric and adult heart is essential for professionals working in this field. Topics include patient preparation and communication requirements, basic electrocardiograph (ECG) patterns, the routine adult echocardiographic examination (including the 2-dimensional, M-mode, special Doppler and colour flow Doppler examinations and standard calculations), basic hemodynamics and an introduction to Doppler physics and principles.

Courses: PH75, PH85
Prerequisites: LSB259
Corequisites: PCN497-1, PCN497-2
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2

► PCN297-2 Clinical Attachment 2

This unit includes a period of additional supervised clinical practice designed to expand and refine skills acquired in PCN197.

Courses: PH71, PH80
Prerequisites: PCN159, PCN197-1, PCN197-2, PCN297-1, PCN356
Campus: GP
Credit points: 6 Semester: 2

► PCN297-1 Clinical Attachment 2

This unit includes a period of additional supervised clinical practice designed to expand and refine skills acquired in PCN197.

Courses: PH71, PH80
Prerequisites: PCN159, PCN197-1, PCN197-2, PCN356
Campus: GP
Credit points: 6 Semester: 1

► PCN355 Vascular Ultrasound

This unit includes the principles and equipment requirements of ultrasound applications in the cardiovascular system. It also includes the clinical techniques and diagnostic criteria of such applications, in particular those of the peripheral arterial and venous systems and the heart.

Courses: PH71, PH80
Prerequisites: PCN159, PCN162
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► PCN356 Ultrasonic Examinations 2

This unit includes the ultrasound techniques used to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology. It also includes ultrasound techniques in advanced obstetrics and gynaecology and in the abdomen.

Courses: PH71, PH80
Prerequisites: PCN159, PCN162
Corequisites: PCN197-1, PCN197-2
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2

► PCN357 Advanced Ultrasound

Topics

This unit builds on content of PCN159 and PCN356 by providing more advanced applications of ultrasound in obstetrics. This unit also provides a study of the applications of ultrasound techniques in paediatrics and an overview of echocardiography.

Courses: PH71, PH80
Prerequisites: PCN159, PCN162, PCN356
Corequisites: PCN297-1, PCN297-2
Contact hours: 4 per week Campus: GP
Credit points: 12 Semester: 1

► PCN359 Cardiac Ultrasound 2

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of PCN259 by introducing concepts and techniques of the complex hemodynamic examinations and discussing the application of the techniques described to common pathological clinical situations. Topics include Doppler calculations, assessment of systolic function, echocardiographic assessment of pathological conditions of the heart and great vessels, and systemic causes of heart disease.

Courses: PH75, PH85
Prerequisites: PCN259, PCN497-1, PCN497-2
Corequisites: PCN597-1, PCN597-2
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2

► PCN497-2 Clinical Attachment 4

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course. In this unit, basic echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff.

Courses: PH75, PH85
Prerequisites: LSB345
Corequisites: PCN259, PCN359, PCN497-1, PCN497-2
Contact hours: 3 per week Campus: GP
Credit points: 12 Semester: 2

► PCN497-1 Clinical Attachment 4

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of
the course as it allows the student to be involved in extensive clinical experience that is complementary to other units in the course. In this unit, basic echocardiographic skills are developed through employment and training in a QUT approved clinical department. The student gains clinical skills and knowledge and abilities gained in the unit PCN497. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff.

Courses: PH75, PH85
Corequisites: PCN597-1
Contact hours: 9 per week
Campus: GP
Credit points: 24
Semester: 1, 2

► PCN540-1 Project (Part-time)
The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under QUT supervision. Time spent on projects is one semester for full-time and two semesters for part-time students.

Courses: PH80
Contact hours: 9 per week
Campus: GP
Credit points: 24
Semester: 1, 2, 3

► PCN540-2 Project (Part-time)
The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under QUT supervision. Time spent on projects is one semester for full-time and two semesters for part-time students.

Courses: PH80
Contact hours: 9 per week
Campus: GP
Credit points: 24
Semester: 1, 2, 3

► PCN597-1 Clinical Attachment 5
Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to other units in the course. This unit builds on skills, knowledge and abilities gained in unit PCN497. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff.

Courses: PH75, PH85
Corequisites: PCN597-1
Contact hours: 3 per week
Campus: GP
Credit points: 6
Semester: 1, 2

► PCN597-2 Clinical Attachment 5
Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to other units in the course. This unit builds on skills, knowledge and abilities gained in unit PCN497. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff.

Courses: PH75, PH85
Corequisites: PCN597-1
Contact hours: 3 per week
Campus: GP
Credit points: 6
Semester: 1, 2

► PCN640-1 Project
The project may take the form of research development, a design, a feasibility study, or the collation of dispersed, scattered information. The project can be undertaken externally under QUT supervision. The project will normally be undertaken part-time over 2 semesters.

Courses: PH85
Corequisites: PH75, PCN640-1
Contact hours: 9 per week
Campus: GP
Credit points: 24
Semester: 1, 2

► PCN701 Topics in Advanced Chemistry 1
This unit includes a series of lectures and/or a reading program and/or selected laboratory exercises designed to provide the student with the appropriate theoretical and practical background, at an advanced level, necessary for the completion of a research program.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCN705-1 Research Methodology
This unit is a guided program of literature surveys to provide the background information for the research project. This unit enables students to develop verbal and oral communication skills required for the successful conduct of a chemical research project. During the course students will be required to attend and participate in seminars. Students must present two seminars on their own research.

Courses: SC80
Credit points: 6
Semester: 1, 2

► PCN705-2 Research Methodology
This unit is a guided program of literature surveys to provide the background information for the research project. This unit enables students to develop verbal and oral communication skills required for the successful conduct of a chemical research project. During the course students will be required to attend and participate in seminars. Students must present two seminars on their own research.

Courses: SC80
Credit points: 6
Semester: 1, 2

► PCN710 Chemical Instrumentation
This unit presents chemical instrumentation and electronics required for advanced level operation of scientific instrumentation.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCN715 Advanced Topics in Physics 1
This unit provides a focused theoretical foundation for each student’s research program or other advanced topics in physics that develops a high level of theoretical understanding of the physical principles involved.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCN716 Advanced Topics in Physics 2
See PCN715.

Courses: SC60, SC80
Credit points: 12
Semester: 1, 2

► PCN720 Chemometrics
This unit includes the following: the concepts of chemical data acquisition and interpretation; computational methods and existing software packages for statistical analysis in chemistry; statistical methods in quality and process control; sampling procedures; multivariate analysis and optimisation techniques.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCN730 Advanced Physical Methods in Chemistry
This unit includes the theoretical and practical principles of selected physical methods in chemistry.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCN740 Laboratory Techniques for Preparative Chemistry
This unit includes the experimental techniques for the preparation and isolation of pure substances.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCN801 Topics in Advanced Chemistry 2
See PCN701.

Courses: SC80
Credit points: 12
Semester: 1, 2

► PCZ121 Vision Colour and Photometry
This unit includes the following: measurement of luminous flux; luminous intensity; illumination; luminance; reflectance; transmittance; diffuse surfaces; inverse square law; cosine law; Munsell and CIE Colour System; chromaticity coordinates Yxy, L*A*B*, Luv, correlated colour temperature, colour rendering indices; the integrating sphere; gonio photometry; distribution photometry; graphical representation of photometric data; measuring instruments; accuracy; repeatability; the physiology of the eye and light detection; contrast sensitivity; colour vision; adaptation; brightness and lightness; image detection and recognition including edge detection; lightness determina-
tion; the association of the characteristics of patterns.
Courses: PH63, PH73, PH83
Credit points: 12  Semester: 2  3
▸ PCZ212 Lighting Design
This unit includes the following: definition of the visual field; the extension of threshold studies to practical task situations; the evaluation of visual tasks; the development of measures of discomfort and disability glare; illuminance and glare scales; methods for the assessment of tasks and environments; experimental techniques of evaluation. It also includes the perception of colour, fixing, glare, form and space, and issues relating to the perception and comprehension of the environment; aesthetics, perception and emotion; the practical methods available for predicting illuminances from daylight and uniform arrays of luminaires; the prediction of discomfort; light and electric light.
Courses: PH63, PH73, PH83
Credit points: 12  Semester: 1
▸ PCZ213 Sustainability and Human Factors
This unit will not cover all areas of specialised lighting, but rather will concentrate on the more important and general public lighting situations. Topics covered include emergency lighting requirements, road lighting, pedestrian lighting and sports lighting, and particular reference to standards for specialised lighting situations, equipment, required light distributions and calculation and design techniques. There is a need to fully understand the issues involved in designing for these applications and to be able to build a design that satisfies the requirements with quality and efficient lighting solutions.
Courses: PH63, PH73, PH83
Credit points: 12  Semester: 1
▸ PCZ214 Lamps and Luminaires
This unit includes the development of light sources, the practical requirements of light sources including tubular fluorescent lamps, various high and low pressure discharge lamps. Practical lamps are discussed in terms of luminous efficacy, spectral output, colour rendering, life, supply requirements, control gear, cost, etc. The unit also addresses the design, manufacture, testing and the provision of data on luminaires methods of light control; the properties of optical systems; reflectors; reflectors and diffusers; luminance control techniques; manufacture of luminaires and auxiliaries; codes and provision of photometric data for indoor and outdoor luminaires; the calculation of utilisation factors; luminaire luminances; computerised testing.
Courses: PH63, PH73, PH83
Corequisites: PCZ2121
Campus: City University of Hong Kong
Credit points: 12  Semester: 2  3
▸ PCZ221 Best Practices in Lighting
Electrical energy usage and subsequent energy analysis techniques, advantages and disadvantages of choosing low energy lamps and luminaries, compromising low energy sources and quality lighting, sensors and sensing techniques for lighting control, energy conservation through dimming and lamp switching, daylighting techniques, potential for energy savings through daylighting, daylighting design and calculations.
Courses: PH73, PH83
Campus: City University of Hong Kong
Credit points: 12  Semester: 2  3
▸ PCZ222 Advanced Lighting Design
This unit includes the latest developments in lamp technologies and sources (including LEDs and lasers), lighting in the mesopic range, a review of factors influencing lighting design; discomfort and disability glare; illuminance and glare scale, methods for the assessment of tasks and environments; in-depth studies of colour, form, pattern and space, issues relating to the perception and comprehension of the environment; the practical effects of daylight, introduction to the integration of daylight and electric lighting. This is a very hands-on unit with a large component of computer design work, group discussions and site visits and evaluations.
Courses: PH63, PH73, PH83
Corequisites: PCZ212, PCZ213
Campus: City University of Hong Kong
Credit points: 12  Semester: 2
▸ PCZ2223 Lighting Applications
This unit builds on the material covered in PCZ122 and looks in more depth at some of the applications covered in that unit, namely street lighting and public access lighting, as well as other areas not covered in that unit, including general floodlighting requirements and equipment, light distributions, calculation methods, area floodlighting, building floodlighting, pedestrian lighting, tunnel lighting, vehicle lighting, traffic signal, airport lighting, navigation lighting, display lighting, and advertising.
Courses: PH63, PH73, PH83
Corequisites: PCZ2123
Campus: City University of Hong Kong
Credit points: 12  Semester: 2
▸ PCZ2224 Applied Lighting
There is no set material for this unit. Students undertake an approved project over a semester on any topic relevant to their interest in lighting. The project may be predominantly a reading course, reviewing, comparing or analysing material on a specific topic, or it may be a practically oriented project involving manufacture, measurement or analysis of a particular lighting product or installation. The project may be taken within the person's place of employment.
Courses: PH73, PH83
Campus: City University of Hong Kong
Credit points: 12  Semester: 2  3
▸ PSB416 Research and Criticism
This unit fosters an understanding of worldviews influencing the culture of landscape architecture. Module 1 includes the what, why and how of landscape research. Module 2 includes contemporary belief systems in landscape research and module 3 covers methods for answering researchable questions.
Courses: BN31
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1
▸ PSB431 Planning/Landscape Design
This unit includes the following theory: reinforcement of the design process; character components, types and delineation; place-use relational spaces. The practical projects require application of knowledge and skills reacting to places and their uses, supported by relevant graphic and oral communication techniques. The projects are linked at an urban scale. These proposals are communicated through drawings and illustrated reports. The studio requires an increased emphasis on group work at the investigative stage.
Courses: BN31
Prerequisites: PSB421, PSB413
Contact hours: 4 per week  Campus: GP  Credit points: 12  Semester: 1
▸ PSB434 Planning Processes (URP Only)
This unit addresses planning as a creative and value-based activity. It considers the problem-solving process that links places, activities and underlying values; planning method as a progressive and cyclic process, incorporating the logic of conscious planning, identification of problems and issues, the role and derivation of objectives, analysis of factors and activity and the prediction of activity, systems, resource and issue analysis, synthesis in planning, decision-making, implementation, and evaluation; the emerging fields within community and land use planning. The examples cover outputs dealing with spatial scale (regional, metropolitan, urban and local) and conceptual scale (strategic visions, program plans, projects, policies).
Courses: BN3
Prerequisites: PSB414, PSB423
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1
▸ PSB434 Landscape Construction A (L'Scape only)
The unit comprises three primary components: grading (manipulation of land surfaces); materials and construction elements (development of understanding of technologies and use of common construction materials relevant to landscape construction); introduction to structures (principles of structural mechanics). In all of these components attention is paid to the development of appropriate technical drawing and documentation techniques for the preparation of construction documentation.
Courses: BN3
Contact hours: 3 per week  Campus: GP  Credit points: 12  Semester: 1
▸ PSB435 Social and Cultural Relations
This unit includes the following: introduction to some of the underlying social relationships and their structures in contemporary Western urbanisation; application of sociological theories by way of analysis of an urban environment with respect to its socio-cultural functions; theory of human functioning in urban environment (privacy, personal space, environmental meaning and cognition); analysis of major concepts in urban life including concepts and ideas of capitalism, the relation between production and current restructuring of production, social relationship.
PSB441 Planning/Landscape Design 4
This unit includes the following: reinforcement of site planning and techniques; development and communication of vision statements, aims and objectives; designing for sustainable futures; using design science principles to ensure comfort and fit; the principles of designing for climate, affects of topography, vegetation, structures, and surface materials are considered as part of the design solution/s. The project is based on one location and involves a specific community group. The project has three stages: analysis of the site, development of the design structure and concept, and design. The project involves an extension, major change, or new build; the settings and its physical potential; constraints and discipline orientated proposals for the community/location improvement.

Courses: BN31
Prerequisites: PSB431
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

PSB442 Plant Studies (L’scape Only)
This unit has two sections. Plant Ecology includes resources for studying plants (essential and potential flora, both locally and otherwise), classification and nomenclature, evolution of the plant kingdom, plant systematics, plant structure, plant anatomy, plant physiology, form and function, requirements for plant growth, plants and habitats, plants, ecosystems, disturbance, weeds, pattern and diversity. Horticulture includes design characteristics and criteria; use of plants as structural and design elements within the landscape; principles of planting design; scale, design for change, growth, replacement and maintenance; planting design in typical locations such as streets, parks, urban forecourts, interiors, gardens, and foreshores.

Courses: BN31
Prerequisites: PSB422
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

PSB443 Population and Urban Studies
This unit has two sections. Population studies include demographic concepts and analytical methods, demographic trends in Australian cities, and its planning implications, internal migration patterns in Australia, international migration and planning for multicultural cities. The urban studies section includes urban concepts and theoretical cultural cities. The urban studies section includes urban concepts and theoretical studies and the links between land uses and transport; main modes of transport and their requirements and impacts; methods of predicting future transport patterns; traditional and innovative techniques of transportation planning and management; relevant land use planning approaches; the effects of transport decision, policies and implementation on the physical, social and environmental environments; introduction to the basic human settlements in terms of other "hard" infrastructure, including planning for community services, water supply, sew- age, electricity, electronic communications and infrastructure financing; introduction to basic human services planning.

Courses: BN31
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

PSB451 Planning/Landscape Design 5
This unit requires individual work supported by informal workshops. The content is organised within a community and based upon an area, which has a complex array of uses, constraints and opportunities. Following an overview of the given area and a statement of broad directions for improving the quality of the physical and social environments, each student proposes an individual study topic. The topic is then researched and a study area analysis undertaken to develop a brief for development of subsequent proposals. Each student carries through the brief by developing conceptual and detailed proposals for the study topic.

Courses: BN31
Prerequisites: PSB441
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

PSB452 Professional Skills 2
This unit includes the following: the sources and importance of systems of values; appreciation of the diversity of values in modern Australian society; exploration of relevant codes of professional conduct; explorations of values based and ethical implications relevant to topical issues of the day, such as land development, conservation, government policies, changing technology, or cultural diversity; identification of sources of conflict in communities and groups; principles of conflict management; conflict management processes and techniques related to relevant aspects of professional activity, including community consultation, working with groups, professional teams and the like; approaches to effective and principled negotiation.

Courses: BN31
Prerequisites: PSB414
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

PSB453 Elective 1
Elective units may be offered by the School or other Faculties within the University. All electives are to be approved by the Course Coordinators.

Courses: BN31
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

PSB461 Planning/Landscape Design 6
This unit requires individual work supported by informal workshops. The content is organised within a community and based upon an area, which has a complex array of uses, constraints and opportunities. Following an overview of the given area and a statement of broad directions for improving the quality of the physical and social environments, each student proposes an individual study topic. The topic is then researched and a study area analysis undertaken to develop a brief for development of subsequent proposals. Each student carries through the brief by developing conceptual and detailed proposals for the study topic.

Courses: BN31
Prerequisites: PSB451
Contact hours: 4 per week  Campus: GP
Credit points: 12  Semester: 2

PSB462 Conservation and Management
This composite unit contains two segments: heritage studies (conservation) and land use policies and evaluation (management). The conservation segment deals with the theory and practice behind the conservation of the built and natural environment, includes an introduction to the Australia ICOMOS' Burra Charter and conservation principles and accepted procedures, methods of researching and recording, assessment of cultural and natural significance, and locally applicable protective heritage legislation. The management segment deals with the roles of different levels of government in Australia in forming land use policy.

Courses: BN31
Prerequisites: PSB432
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

PSB463 Elective 2
Elective units may be offered by the School or other Faculties within the University. All electives are to be approved by the course coordinators.

Courses: BN31
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 2

PSB610 Government and Law
This unit includes the study of Australian political institutions and how they affect land development.

Courses: PS47, PS48, BN31
Contact hours: 3 per week  Campus: GP
Credit points: 12  Semester: 1

PSB611 Introduction to Urban and Regional Economics
This unit includes the following: microeconomics (global and national macroeconomic forces as they affect firms); a free market and its imperfections; market failure and the concepts of private and public interest, equity and the role of government; land as an economic concept; economic uses of urban land use; valuation theory and concepts of land value, tenure, ownership, resumption, compensation, land use controls.
and zoning; economics of important town planning issues such as housing, infrastructure, and urban finance; economic growth and stability; optimal size and the problem of externalities; methodologies such as regional accounting and cost benefit analysis.

**Courses:** PS47, PS48, BN31

**Prerequisites:** PSB613

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

**► PSB612 Spatial and Land Information Management**

The spatial information science application areas of this unit include: application areas; resource management; urban and rural planning; cadastral administration; facilities management. System planning includes a system planning overview, functional requirements analysis, system evaluation and benchmarking. System implementation includes database creation, implementation issues, implementation strategies. Other aspects include standards, legal issues, and knowledge-based techniques.

**Courses:** PS47, PS48

**Prerequisites:** PSB631

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

**► PSB614 Land Development Principles and Policies**

This unit addresses principles and policies concerned with sustainability of land development from an economic, ecological and social perspective.

**Courses:** PS47, PS48, BN31

**Contact hours:** 3 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

**► PSB615 Urban and Rural Design Principles**

This unit includes the following: the history of land development, especially urban land development, in Australia and in Queensland; the effects of technology and social attitudes on urban land development; the physical, economic and social determinants of land use; land development as an economic activity; economic and social benefits of land development; non-linear controls; geometric layout of rural and urban roads for urban subdivisions; site analysis and assessment including traffic planning; storm water and sewerage systems; provision and location of services; controls affecting subdivisions (negotiations, applications, appeals and preparations for Court).

**Courses:** PS47, PS48

**Prerequisites:** PSB613

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

**► PSB616 Urban and Rural Design Practice**

This unit includes further work on conventional and innovative subdivision design, integration of road and lot design with engineering works, especially drainage; subdivision design and procedures for canal estates, industrial estates, group title, building units and other strata titles; costing and cash flow analysis for subdivision projects; feasibility studies, designing to a budget; preparation of a complete application for a local and state authority.

**Courses:** PS47, PS48

**Prerequisites:** PSB614

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

**► PSB620 Cadastral Surveying and Mapping**

This unit includes land title systems, reinstatement; explanation of the options of land title systems, with particular reference to Customary Land Tenure, Private Deeds registration, Public Deeds Registration, and Registration of Title. It includes an analysis of reinstatement of property boundaries as applicable to Queensland; the undertaking of a field survey to reinstate the boundaries of a section in the Brisbane Metropolitan area; preparation of cadastral and detail survey plans for survey actions; the legal aspects of re-instatement of boundaries; case law associated with re-instatement; statutory requirements that relate to the zoning and development of land.

**Courses:** PS47, PS48

**Contact hours:** 5 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

**► PSB621 Advanced Cadastral Surveying**

This unit includes the following: property rights as a method of resource control; creating and maintaining knowledge of property rights, including identification of legal identification; land tenure; land boundaries; land subdivision, land registration, changing rights through statutory changes, attitudes and responses of the public; evidence of property rights; evolution from customary land tenure to and registration systems; factors leading to breakdown of systems; effects of technological change on land use; evolving property rights and obligations; information technology and land use controls; procedures of the various departments including but not confined to, the Department of Lands, Resources Industries.

**Courses:** PS47, PS48

**Prerequisites:** PSB620

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

**► PSB630 Cartography and Digital Mapping**

This unit includes digital data acquisition; types of digitisers and scanners; raster/vector conversions; digitising techniques; scanning problems; output devices; plotters, plotterbars, image setters; 3-D representation and precision plotting; conditions for orthogonality, conformality, equivalence and equaldistance; selection of suitable projection; construction of map projections.

**Courses:** PS47, PS48

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

**► PSB631 Geographic Information Systems 1**

This unit investigates the basic concepts of geographic information systems. Topics to be covered include components of GIS, spatial databases, data acquisition, reference frameworks, use of photographs and images, spatial analysis and graphic output design issues.

**Courses:** PS47, PS48, PS78, PS79

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1, 2  

**► PSB632 Photogrammetry**

This unit includes the following: basic elements of the photogrammetric mapping process; planning and execution of the project control for photogrammetry; mathematical procedures for photogrammetry, geometry and use of a stereo model; space resection of a single photograph; aeronotriangulation with independent method; block triangulation by bundle method GPS controlled photography; principles of plotting with a stereoplotter; rectification of Photographs; acquisition of plan and height points; accuracy assessment; digital mapping and its relationship to Geographic Information Systems and remote sensing.

**Courses:** PS47, PS48

**Prerequisites:** PSB631, PSB642

**Contact hours:** 4 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

**► PSB641 Engineering Surveying**

This unit includes: horizontal and vertical alignment for route surveys; areas, volumes and earthworks; surveying measurements and their assessment; propagation of variances; pre-analysis of survey tasks; least squares adjustment methods for various functional and stochastic models.

**Courses:** PS47, PS48

**Prerequisites:** PSB640

**Contact hours:** 5 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 2  

**► PSB642 Control Surveying and Analysis**

This unit includes the following: reconnaissance for geodetic surveys (formulate mathematical models for the solution of linear and non-linear positioning in one, two and three dimensions); geodetic observations techniques and reduction of observations; the three classical methods of geodetic surveying (triangulation, trilateration and traversing); precise levelling including in situ benchmarking; properties of the meridian ellipse; radii of curvature, meridian arc; spheroid as a geodetic reference surface, latitude, longitude, geoid separation and ellipsoidal height; mutual conversion of geodetic and Cartesian coordinates.

**Courses:** PS47, PS48

**Prerequisites:** PSB641, MAB730

**Contact hours:** 5 per week  
**Campus:** GP  
**Credit points:** 12  
**Semester:** 1  

**► PSB643 Geodesy**

This unit contains the following theory: concept and classification of geodesy, the basic concepts of Earth’s gravity field, level surfaces and plumb lines, heights, geoid, mean sea level, spherical harmonics etc., fundamentals of satellite geodesy, reference coordinate systems. It considers GPS positioning models and algorithms, software, GPS field observing, various GPS applications in geomatics; mapping terms and definitions; the mapping problem; principles for deriving projections; the use of skew graticules; the UTM system.
Students study a special topic in Surveying Technology. This unit includes the following: GPS operation and navigation messages; GPS observable and error budget; differencing techniques; GPS positioning models and algorithms; software; GPS field operating; static, kinematic, RTK and various GPS applications in geomatics. It also includes a practical on the GPS network.

Courses: PS47, PS48
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

PSB644 Advanced Geodesy
This unit includes the following: GPS operation and navigation messages; GPS observable and error budget; differencing techniques; GPS positioning models and algorithms; software; GPS field operating; static, kinematic, RTK and various GPS applications in geomatics. It also includes a practical on the GPS network.

Courses: PS47, PS48
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

PSB645 Surveying and Mapping Practice
This unit includes the following: field surveys for DTMAs as-constructed surveys; associated specifications and standards; mining surveying for surface and below surface mining activities; hydrographic surveying for exploration and port management.

Courses: PS47, PS48
Prerequisites: PSB642
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

PSB650 Project 1
Students study an existing approved unit from within the School, Faculty or University. Students study the chosen unit under the above elective code or students study a special topic of interest such as a series of lectures delivered by a specialist in that field, in which case a unit outline is prepared and issued before the commencement of the unit. Students study under the above elective code. In the case of an approved stream of study, students may be allowed to enrol in the actual code of the unit being taken.

Courses: PS47, PS48
Prerequisites: PSB650
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

PSB651 Project 2
Students study an existing approved unit from within the School, Faculty or University. Students study the chosen unit under the above elective code or students study a special topic of interest such as a series of lectures delivered by a specialist in that field, in which case a unit outline is prepared and issued before the commencement of the unit. Students study under the above elective code. In the case of an approved stream of study, students may be allowed to enrol in the actual code of the unit being taken.

Courses: PS47, PS48
Prerequisites: PSB651
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

PSB652 Topics in Land Administration
Students study Topics in Land Administration delivered by a specialist in that field. A unit outline is prepared and issued before the commencement of the unit.

Courses: PS47, PS48
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 2

PSB653 Topics in Surveying Engineering
Students study a special topic in Surveying Engineering delivered by a specialist in that field.

Courses: PS47, PS48
Contact hours: 4 per week
Campus: GP

Credit points: 12
Semester: 2

PSB654 Topics in Spatial Information Science
Students study Spatial Information Science through the presentation of lectures delivered by a specialist in that field.

Courses: PS47, PS48, PS78, PS79
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1, 2

PSB655 Remote Sensing
This unit includes the following: history and principals of remote sensing; types of imagery, image interpretation; satellite systems; supervised and unsupervised image classification; interpretation, analysis and presentation of data; applications in the earth sciences.

Courses: PS47, PS48, PS78
Contact hours: 4 per week
Campus: GP
Credit points: 12
Semester: 1

PSN211 Research Project 1
This unit covers understanding and demonstration of relevant research skills and their effective application in a project of genuine substance and significance. Each student undertakes a research project in one of the elected specialisations: landscape; design, planning, theory, practice, or management. Each student is assigned to a supervisor approved by the Course Coordinator. Supervisors provide guidance on the selection of a topic, investigation and research, and preparation of the proposals and submission. Research Project 1 incorporates advanced information retrieval skills. The output is a proposal for the specified research project that outlines the relevant base theory and clearly communicates the potential extent of the research project.

Courses: BN73, DB69, DB73, PS71
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

PSN212 Research Project 2
This unit ensures the understanding and demonstration of relevant research skills and their effective application in a project of genuine substance and significance. Each student undertakes a research project in one of the elected specialisations: landscape; design, landscape planning, landscape theory, landscape practice or landscape management. Each student is assigned to a supervisor approved by the Course Coordinator. In general, the supervisor provides guidance on the selection of a topic, investigation and research, and preparation of the proposals and submission. Research Project 2 requires the completion, communication and presentation of the research project to a professional standard.

Courses: DB73, PS71, DB73
Prerequisites: PSN211
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2, 3

PSN213 Specialisation
This unit ensures personalised study that will support the student’s selected specialisation and contribute directly to the better understanding of the research project topic. Students undertake study to develop specialised knowledge and skills related to the specific specialisation and to support the direction of the proposed research project topic. Study is taken from specific programs offered by the School, or from advanced units within the University or, where appropriate, through another university or through specialist studies offered by staff in their areas of expertise and approved by the Head of School on the recommendation of the student’s supervisor.

Courses: PS71
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

PSN214 Elective
This unit allows development of depth in understanding of issues related to the elected specialisation. The School may offer specific programs in areas of specialisation or students elect unit/s from within the University or, where appropriate, from other universities and approved by the Head of School on the recommendation of the student’s supervisor.

Courses: PS69, PS70, PS71
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2

PSP263 Landscape Ecology
This unit includes the following: structural relationships of spatial elements within land use areas; landscape from continental to landscape scales as interpreted using maps, air photography and remotely sensed images; dynamic process, both natural and human. Fundamental principles of plant anatomy and physiology, plant identification, plant growth and development, sexual and vegetative propagation; dynamics of individual organisms, populations, communities, functional groups, ecosystems and biomes.

Courses: PSN66, PSN71
Credit points: 12
Semester: 1

PSP264 Spatial Design Theory
This unit includes the following: theories, values, rationales, and philosophies of place; design processes and dimensions; image-ability and livability factors; the role of context (natural, social, aesthetic) in site and urban development; exploration of open space and place theory at regional to local scales; theories of user/place relationships and the study of human functioning in environments; concepts of culturally and physically inclusive landscapes and landscapes as interpreted using maps, air photography and remotely sensed images; dynamic process, both natural and human. Fundamental principles of plant anatomy and physiology, plant identification, plant growth and development, sexual and vegetative propagation; dynamics of individual organisms, populations, communities, functional groups, ecosystems and biomes.

Courses: PSN66, PSN71
Credit points: 12
Semester: 1

PSP265 Site Planning
This unit includes the following theory: introduction to the processes of site planning and detailed site design; role and objectives of survey and analysis phases; types of information required and the methods of processing the resultant data; data analysis, its scope and documentation. It also includes the use of data analysis to generate and evaluate possible problem solutions in conceptual form as a basis for strategic and master planning and the value of these processes as a long term mechanism for adaptation of master planning to meet changing needs. It involves the application of site planning principles and theory for different scales and types of projects.

Courses: PS66, PS71
Campus: GP
Credit points: 12
Semester: 2

PSP269 Advanced Construction and Practice 1
This unit includes the following: theory and techniques involved in a large range of landscape construction; the types of documentation used for the implementation of landscape works; computer aided drafting systems; principles of contract law, forms and requirements of contracts; principles of marketing, client analysis and promotion.

Courses: PS66, PS71  
Semester: 1  
Credit points: 12

► PSP270 Elective  
The profession of landscape architecture is increasingly characterised by the breadth of activities in which its practitioners engage. Therefore, there is a need to provide mechanisms within the course for some specialisation in particular directions in addition to ensuring the acquisition of core competencies required for professional accreditation. This unit is intended to provide that flexibility. A number of cross disciplinary specialisations are offered such as social and environment planning, contemporary art issues, and virtual environments.

Courses: PS66, PS71, PS77  
Semester: 1  
Credit points: 12

► PSP271 Advanced Landscape Design 1  
This unit addresses contemporary theories of urban design as they affect the range of urban landscapes from residential to inner city; emerging theories and concepts of regional and local economic development as they relate to sustainable landscapes in terms of living and working environments. It includes application of theoretical frameworks to the studio project that will explore design or re-design of selected aspects of the urban environment, residential environments and broader urban issues of the contemporary urban context. Expectations of an advanced level of professional presentation will attach to the project output.

Courses: PS66, PS71  
Semester: 1  
Credit points: 12

► PSP272 Advanced Construction and Practice 2  
This unit includes the theory and techniques involved in the wide range of landscape construction including the types of documentation used for the implementation of landscape works; computer aided drafting systems; the principles of contract law, forms and requirements of contracts; the principles of marketing, client analysis and promotion.

Courses: PS66, PS71  
Credit points: 12

► PSP273 Landscape Planning  
This unit includes the theoretical framework of landscape planning: relevant theories, methods, and techniques for application in the landscape planning process. It also includes computer modelling: types of GIS, potentials and problems, and current issues and advanced landscape ecology: structure of landscapes, impacts of human settlement. Studies include medium to large scale projects involving a range of biophysical, cultural, and visual issues with a relatively high degree of complexity. The focus is on assessment and evaluation of related landscape attributes and issues with emphasis on deriving landscape management options in the form of environmental plans, policies, guidelines, and implementation strategies.

Courses: PS66, PS71  
Credit points: 12

► PSP274 Advanced Landscape Design 2  
This unit considers cultural values and provides the theoretical background to understanding of how these values influence place making through interpretations of place and the cultural landscape. The studio project focus of this unit provides the opportunity to develop a grading landscape design project of the highest standard. The project will explore broad scale landscape design and strategic planning and planning guidelines as well as detailed design at a fine scale.

Courses: PS66, PS71  
Credit points: 24

► PSP311 Professional Practice Management  
This unit includes business communication including letters, report writing, correspondence and administration for surveying projects; oral communication involving interviews, meetings, workshops and seminar presentations; office management, business operations and finance; small business and the law including trade practice contracts, taxation, employment and workplace and safety legislation; professional ethics; professional bodies, the Surveyors Act and Regulations, disciplinary procedures, relationships, clients and marketing; survey integration and aspects of change in the practice of surveying.

Courses: PS68, PS73, PS74  
Contact hours: 42

► PSP314 Boundary Definition Surveys 1  
This unit includes the following: land registration requirements; cadastral history, field procedures and records; Reinstatement theory and practice related to urban and rural boundaries; field survey work involving the redefinition of urban and rural boundaries; office reinstatement exercises of increasing complexity to develop the necessary skills in assessing various types of survey problems; office completion of project work including plan preparation using appropriate computer technology.

Courses: PS68  
Contact hours: 42

► PSP316 Survey Computing and Processing  
Students should understand and use the DOS operating system; computer programming; word processing; project management software; spreadsheets; programmable calculators for field use; surveying and drafting packages; and management and technical applications.

Courses: PS68, PS73, PS74  
Contact hours: 42

► PSP317 Property Development Surveys  
This unit offers an examination of the legislation involved with property development surveys and includes the following: detailed consideration of urban and rural subdivision design and requirements; procedures involved with rezoning and subdivision applications. Detailed consideration of building units and group titles developments; considerations of multiple use development.

Courses: PS68  
Contact hours: 42

► PSP323 Project Site Surveys  
This unit includes the following: detailed surveying (methods, equipment, data requirements and data transfer); preparation of specifications and estimates of costs; detail survey field project work; processing of field data, report and plan presentation; types of construction and building control surveys and preparation of plans and specifications; inspection of building construction sites; receipt of instructions, documentation and communication with contractors; field procedures including high precision survey and error adjustment techniques involved with construction and building control surveys and construction site set out calculations.

Courses: PS72, PS73, PS74  
Contact hours: 42 total

► PSP326 GIS and GPS  
This unit includes project work involving the total assessment, planning, costing and preparation of specifications for a comprehensive mapping task. It includes consideration of GIS theory and practical application of the methods to conventional surveying and consideration of LIS/GIS Technology and its practical application in conventional surveying practice.

Courses: PS68, PS73, PS74  
Contact hours: 42

► PSP330 Professional Practice Management 2  
Students apply principles involved in the running of a Surveying Practice such as project management, self-management and quality assurance. The unit contains the following: planning and organisation; business practices; human resource management; subordinate training; project management principles; self-management principles; quality assurance principles; project implementation.

Courses: PS68  
Contact hours: 42

► PSP451 Production and Use of the Built Environment  
This unit investigates the roles and combined effects of the initiators of the built environment, in the public, private and community sectors. The aim of the unit is to provide a synthesised understanding of how the city is created by the priorities and approaches of a variety of professionals, political decision-makers and informal participants. The property, finance and construction industries, the legal and administrative frameworks, the roles and cultures of key professions (including property management, valuing, business, engineering, surveying, planning, architecture, landscape architecture). Urban design techniques such as charrettes and action planning workshops are included.

Courses: BN73, PS69, DB73, DB69  
Contact hours: 3 per week

► PSP452 Urban Design Studio A  

Q U T H A N D B O O K  2 0 0 6  •  P A G E  7 6 9
This unit includes the analysis of urban issues in a particular area, and the formulation of appropriate urban design proposals. Issues may include: obsolescence, sense of place, conservation, infill, and the dynamism of local/regional/national/global contexts. Methods of urban design guidance, development briefing and control, through regulations and permits, are investigated. In the skills in urban analysis related to the urban design process and effective communication of the results are developed. Where applicable, the unit incorporates field work, work in other units of the course, and joint/complementary projects with other courses in the Faculty.

Courses: BN73, PS69, DB73, DB69
Contact hours: 6 per week
Campus: GP
Credit points: 24
Semester: 2
► PSP453 Urban Systems and the Physical Environment

The unit includes the relationship between the urban system and the physical environment; urban services including water, sewerage, drainage, power, telecommunications, transport; controlling authorities, service delivery bodies, planning requirements and their controls relevant to urban design; community services relevant to health, safety and welfare; urban design issues relating to pollution, congestion and mobility.

Courses: BN73, PS69, DB73, DB69
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1
► PSP510 Specialisation

The student undertakes a supervised program of study in an approved selected field. The student may choose from a limited list of approved fields, depending on staff expertise and availability. Students may apply for approval for a specific specialisation utilising units offered elsewhere in QUT or at another tertiary institution which must, for approval, also lead to an Advanced Specialisation if they are enrolled in PS70. Students normally choose a specialisation that relates to their intended research project. Areas of specialisation are regional and local development, urban housing and community development, urban design, environmental and resource planning, and social topic.

Courses: DB73, PS70, PS72
Contact hours: 3 per week
Campus: GP
Credit points: 12
Semester: 1, 2, 3
► PUB104 Introduction to Health Services Management

This is an important unit for students entering or planning to enter the health industry as it is designed to give a broad overview of systems of health care in Australia and their methods of operation. This unit introduces the role of health service managers as managers of the health care team, the basic principles of health service management in health care facilities and beyond, and the functions of health service managers.

Courses: HL46, IF47, PU40, PU43, NS45
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1
► PUB105 Introduction to Family Studies

This unit explores the diversity of Australian families to provide an understanding of the social structures that impact on families and the ways in which families influence the health, development and well-being of family members across the life course.

Courses: ED50, ED90
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1
► PUB107 Sustainable Environments for Health

The practice of environmental health has always been concerned with the study of the human environment interface and in particular, the quest for developing sustainable environments for health. This unit outlines what environmental health is and describes the major issues impacting on a sustainable future. Topics include the following: the National Environmental Health Strategy; ecology and ecosystems; sustainable development; air pollution; food safety; water and sanitation; waste and contaminated land; indigenous health; built environment; risk assessment; and global environmental health issues.

Courses: ED50, ED90, HL46, IF47, IF87, PU40
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1
► PUB108 Information Management for Health

This unit gives an introductory overall view of the field of health information and its management. As well as being of general interest to health professionals, the unit provides a context for the study of contemporary health information and data management practice. The use of information as a strategic, organisational and management resource is highlighted, and a broad appreciation of information and data management procedures and philosophy are provided. Demands on health information managers occasioned by advances in information technology are highlighted.

Courses: PU40
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1
► PUB112 Workplace Health and Safety

Introduces students to the basic concepts and theoretical framework of occupational health and safety such that they can identify health and safety problems in the workplace; be aware of strategies for dealing with such problems; and become familiar with the legislation, government agencies and health personnel associated with the working environment. Topics covered will include the physical, chemical and biological environment, and ergonomics. The students will also develop knowledge and skills associated with the actual measurement of the physical and chemical working environment and evaluation of the data collected.

Courses: PU60
Contact hours: 4 per week
Campus: Ext
Credit points: 12
Semester: 1
► PUB113 Design and Technology

Technology and design are an integral part of the practice of home economics, facilitating effective responses to changes in the contexts of food, locales and living environments. Personal understanding of and experience with design, creativity, research and innovation are needed to participate productively and creatively within local and global communities.

Courses: ED50, ED90
Contact hours: 4 per week
Campus: KG
Credit points: 12
Semester: 1
► PUB118 Foundations of Paramedic Practice

This unit is an introduction to ambulance practice and the role of paramedics within the health care spectrum. It prepares students for the first clinical practice unit. Topics include the following: the history, evolution, culture and development of ambulance services on a national and international level; the structure, function, policies and procedures of the Queensland Ambulance Service; the role of the ambulance service in a multidisciplinary and integrated approach to health care; the relationship between field care and in-hospital definitive care; and basic ambulance care including initial assessment, planning and implementing basic procedures, and equipment. The unit includes a structured observer program.

Courses: PU46
Campus: KG
Credit points: 12
Semester: 1
► PUB201 Food and Nutrition

This unit includes the following: an introduction to the history of food and nutrition in Australia and overseas; the food system; the food supply; nutrients and nutrition problems; nutrition as a public health issue; and international nutrition issues.

Courses: ED50, ED90, HL42, HL46, PU40, PU43
Contact hours: 4 per week
Campus: KG
Credit points: 12
Semester: 1
► PUB203 Primary Health Care

This unit introduces students to the principles, strategies and practice of primary health care with special reference to community, family and workplace settings. The importance of health promotion, prevention, empowerment and intersectoral collaboration in primary health care is examined.

Courses: NA80, PU40
Contact hours: 3 per week
Campus: Ext
Credit points: 12
Semester: 2
► PUB209 Health, Culture and Society

This unit is concerned with the social and cultural dimensions of health and illness and how they relate to health status and patterns of behaviour. The unit introduces students to
thinking about health from sociological and anthropological perspectives, drawing on relevant concepts and theory to examine selected public health issues. Identifying and addressing social and cultural factors that shape people’s health experiences of health, illness and health systems are integral parts of public health practice in terms of reducing health inequalities, delivering appropriate services, and ultimately improving population health outcomes.

Courses: ED50, ED90, HL46, IF47, PU40
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 2

► PUB220 Medical Terminology
This unit equips the language of medicine and analyses medical terms into Latin and Greek word roots, prefixes, suffixes and combining forms. Medical terms which relate to specific body systems are defined, spelled and pronounced accurately. Common abbreviations and symbols used in medicine are identified. Abstracts from patient records are explained and interpreted in non-technical language.

Courses: IF85, PU40
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1

► PUB251 Contemporary Public Health
This unit provides an introduction to the following: the philosophy and approach of public health; the traditional public health process; the multidisciplinary nature of public health; and health policy and its impact on public health. Recent reformulations of traditional public health approaches including health promotion, intersectoral action for health and healthy public policy are examined. The role of public health in Australia and overseas, its main discipline components and some of the constraints faced by public health is also addressed. This unit considers groups with special needs and contemporary issues.

Courses: ED50, ED90, HL42, HL43, HL46, IF47, IF85, NA80, NS45, PU40, PU43
Contact hours: 4 per week  
Campus: KG
Credit points: 12  
Semester: 1, 2

► PUB270 Paramedic Clinical Practice 1
This unit is the first in a series of supervised clinical practice units. Topics include the following: assessing, diagnosing, planning, implementing and evaluating patient care in the out of hospital phase; effective scene management including logistics, safe access and egress, and patient extrication techniques; written and oral communication including patient interviews, radio procedures, writing ambulance report forms and patient handover at hospital. The placement is six weeks and provides a transition from observer to operational ambulance crew member under the supervision of a qualified paramedic mentor.

Courses: PU46
Prerequisites: LSB282, PUB280, PYB111
Credit points: 12  
Semester: 3

► PUB280 Foundations of Paramedic Practice 2
This unit follows on from PUB180 and further develops core clinical skills and expertise in the use of ambulance equipment. Topics covered include the following: monitoring basic patient care and modifying as required; handing over a patient requiring basic ambulance care; the use of ambulance equipment including ambulance vehicles and patient care equipment; health and safety legislation, policies and procedures; and the attributes of a paramedic e.g. compassion, accountability, respect, ethical practice, responsibility and sensitivity. The unit includes a structured observer program for students.

Courses: PU46
Prerequisites: PUB180  
Campus: KG
Credit points: 12  
Semester: 2

► PUB321 Textile Studies
In this unit scientific understandings, social issues, production techniques and the aesthetic and scientific properties that are explored. These are applied to individual textile projects.

Courses: ED50, ED90
Contact hours: 5 per week  
Campus: KG
Credit points: 12  
Semester: 2

► PUB326 Epidemiology
Epidemiology is the core scientific method of public health. It is the study of the distribution of health and disease in the population and includes research into causes of disease and the effectiveness of public health programs. Epidemiological methods are used to generate the evidence base for clinicians, health promotion specialists, health educators, occupational and environmental health officers and health service managers.

Courses: PU40, PU43, HL42, HL43, HL46, IF47, IF85, IF87, NS45
Prerequisites: PUB251
Incompatible with: PUB314
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1

► PUB329 Foundations of Health Studies and Health Behaviour
This unit examines the foundations of the health education discipline, its theoretical framework, and the concepts of health models, health education and health promotion. Theories of change are analysed in their application to health education and health promotion practice for a range of professionals, including teachers.

Courses: ED50, ED90, HL46, PU40
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1

► PUB336 Women’s Health
This unit explores the data and current health issues related to women’s health and critically evaluates health related policies, systems and practices in terms of their impact on women’s health, internationally and in Australia. The social, economic, cultural and political influences on women’s health, and the specific needs of sub-populations of women are examined.

Courses: ED50, PU40
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 2

► PUB339 Podiatricle Medicine 1
This unit provides an introduction to the clinical, theoretical and professional aspects of podiatry practice. Students entering the unit begin the transition to the unique and challenging role of clinician, as well as continuing academic learning. Students are required to apply previous background knowledge, i.e. advanced anatomy, biochemistry, etc., in the clinical setting. Students are also involved in the care of patients attending the university clinic. The unit is particularly designed to encourage the development of essential graduate skills such as a self-directed approach to learning, the ability to work as part of a team and the ability to engage in peer review.

Courses: PU43, HL43
Prerequisites: LSB235, LSB475
Incompatible with: PUB324
Contact hours: 16 (including clinic work)
Campus: KG
Credit points: 12  
Semester: 1

► PUB341 Nutrition Education
This unit explores the history and philosophy of nutrition education as well as its theoretical basis. Students develop skills in the development, implementation and evaluation of nutrition education programs for particular target groups. They are introduced to a range of nutrition education programs currently underway as well as policy underpinning these programs. There is an opportunity to develop a real world example.

Courses: ED50, PU40, PU43
Prerequisites: PUB201
Contact hours: 3 per week  
Campus: KG
Credit points: 12  
Semester: 1

► PUB343 Home Economics Curriculum Studies I
This unit explores the nature of home economics, its contribution to the broader goals of schooling and the unique features that characterise home economics teaching and learning. It links discipline studies, curriculum studies and field experiences.

Courses: ED90
Contact hours: 4 per week  
Campus: KG
Credit points: 12  
Semester: 1

► PUB355 Hospitality Studies
This unit explores the use of relevant management principles, safe and hygienic work practices, effective communication skills, the mastery of techniques in food production and presentation associated with vocational education and industry.

Courses: ED50, ED90
Contact hours: 4 per week  
Campus: KG
Credit points: 12  
Semester: 2

► PUB356 Clinical Classification
This unit introduces the development of skills in one of the major specialities of health information management. This speciality is the clinical classification of diseases and procedures using the International Classification of Diseases, 10th Revision, Australian Modification (ICD-10-AM). Clinical classification responds to internal and external demands for medical information, for example, in-house research and education, ABS, hospital morbidity data collections, and casework information systems.

Courses: IF85, PU40
Prerequisites: PUB220, LSB142, LSB361 or LSB475
Contact hours: 4 per week  
Campus: KG
Credit points: 12  
Semester: 2

► PUB356 Clinical Classification
This unit introduces the development of skills in one of the major specialities of health information management: clinical classification of diseases and procedures using the International Classification of Diseases, 10th Revision, Australian Modification (ICD-10-AM). Clinical classification responds to internal and external demands for medical information, for example, in-house research and
education, ABS, hospital morbidity data collections, and casemix information systems.

Courses: PUB45, PU40

Prerequisites: PUB220, LSB142, LSB361/LSB475

Contact hours: 4 per week Campus: KG
Credit points: 12 Semester: 2

► PUB361 Textiles 2

An understanding of textile consumer issues is developed by studying theoretical and scientific explorations, production practices and creative processes in relation to critiquing and designing textile articles.

Courses: ED50, ED90

Prerequisites: PUB321

Contact hours: 5 per week Campus: KG
Credit points: 12 Semester: 1

► PUB380 Casemix Management

Casemix is used to describe and analyse the activity and outputs of health care services and provides an important source of information for decision making by a range of health care professionals. This unit aims to provide the following: an overview of the history and development of casemix classification systems; structure of DRGs; casemix applications in quality improvement, utilisation review, costing, planning and management; casemix and funding health care services; casemix classification systems for acute inpatients; data quality issues; casemix grouping software; and current casemix initiatives and applications.

Courses: IF47, IF85, NS45, PU40

Contact hours: 4 per week Campus: KG
Credit points: 12 Semester: 1

► PUB390 Paramedic Management of Medical and Surgical Emergencies A

This unit covers some of the most common medical and surgical emergencies seen in ambulance practice. Topics include the epidemiology, prevention, integrated and definitive care, pathophysiology, assessment, clinical management and rehabilitation of patients suffering cardiovascular, respiratory and neurological disease. Theory is presented on campus and experience is gained in a hospital environment under the supervision of clinical educators.

Courses: PUB46

Prerequisites: LSB282, PUB280

Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1

► PUB416 Research Methods

An understanding of research methods is essential in the training of all public health professionals. This unit explores quantitative methods in a variety of health research projects, examining conceptualisation of research questions and hypotheses, core elements of experimental and quasi-experimental designs, and various approaches to the collection, management and analysis of quantitative data. The unit has a practical focus for students who are considering conducting research as well as those interested in an interpretation and evaluation of published research results.

Courses: PUB46, PUB5314 or PUB436

Prerequisites: PUB314 or PUB326

Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 2

► PUB439 Podiatric Medicine

This unit aims to increase proficiency in the examination and treatment of patients who have common foot problems with particular emphasis on aged care and diabetes. Topics covered include: clinical biomechanics, the elderly and the ageing foot, the management and of the diabetic foot, wound healing and wound care products, footwear construction, assessment and prescription, foot orthoses. 

Courses: PUB439, PUB437

Prerequisites: PUB339

Incompatible with: PUB337

Contact hours: 15 (includes clinic work) Campus: KG
Credit points: 12 Semester: 2

► PUB450 Paramedic Management of Trauma Emergencies

This unit covers some of the most common traumatic emergencies that a paramedic attends in ambulance practice. Topics covered include the epidemiology of trauma, the controversies of trauma management, neuroltrauma, spinal cord injury, chest and abdominal trauma, pelvic and limb trauma, trauma in the elderly, wound ballistics, and shock and fluid resuscitation. Theory is supplemented by simulation and scenario based activities under the supervision of clinical educators.

Courses: PUB45

Prerequisites: LSB382, PUB280

Campus: KG
Credit points: 12 Semester: 2

► PUB461 Qualitative Inquiry in Public Health

Qualitative methods are essential to generate knowledge of people’s lived experiences, the meanings they ascribe to, and to the social dimension of health. The nature
UNIT SYNOPSIS

This unit aims to prepare students for participation in contract and project management in the health sector. The unit provides advanced undergraduate students with an opportunity to develop an understanding of health project contract management using both theoretical and practical examination of current state and national contracts and projects.

Courses: PUB517, PUB637, PUB638, PUB639
Credit points: 12 Semester: 1

Incompatible with: LSB415 Contact hours: 4 per week Campus: KG
Credit points: 12 Semester: 2

PUB539 Radiographic Image Interpretation
This unit is designed to give the student of podiatric medicine an understanding and ability to recognise normal and abnormal foot radiographs. It also enables the student to utilise radiology as an important diagnostic tool in foot pathology.

Courses: PUB537, PUB538
Incompatible with: PCB313 or PUB637 Credit points: 12 Semester: 1

PUB538 Physical Medicine
This unit introduces a wide range of diagnostic and physical treatment modalities used in modern podiatric practice. Students gain understanding in uses, applications, contraindications and limitations of each modality studied in direct connection with ongoing clinical studies and theoretical components of podiatric medicine.

Courses: PUB537, PUB538
Incompatible with: PUB637 Credit points: 12 Semester: 2

PUB539 Podiatric Medicine 3
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
This unit develops professional understanding of the general and specific effects of medical and surgical conditions on the human foot. It also expands the concept of total case management in terms of the interdisciplinary approach, including physical, mechanical and surgical techniques. Completion of this unit should enable students to consolidate the podiatrist's role in the health care team across the spectrum of practice.

**Courses:** HL43, PU43

**Prerequisites:** PUB437, PUB438, PUB439

**Corequisites:** PUB537

**Incompatible with:** PUB524

**Contact hours:** 5 per week  
**Credit points:** 12  
**Semester:** 1

**UNIT SYNOPSES**

**PUB541 Medical Nutrition Therapy**

This unit incorporates the best of a multidisciplinary, 'whole client' view of health care. The goals of MNT in preventative care are to keep people healthy in their communities, to reduce the incidence and severity of preventable diseases, to improve health and quality of life, and to reduce medical costs particularly in drug therapy, surgery, hospitalisation and extended care. A sound understanding of the process of nutrition assessment enables students to undertake the assessment, planning, implementation and evaluation of dietary intervention in the more complex disease states.

**Courses:** HL42, PU43

**Prerequisites:** LSB408, LSB458, PUB405

**Contact hours:** 5 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**PUB557 Health Needs of Indigenous Australians and Other Populations**

The unit examines the health needs of a range of population groups, particularly the health needs of indigenous Australians. Health is viewed in its social and economic context. The unit allows a recognition and focus on particular health concerns that might not be considered significant in an examination of the health needs of broad segments of health. It forces a consideration of how strategies to improve health, including important questions of access and equity. The unit provides an overview of health patterns of indigenous Australians and other specific populations.

**Courses:** ED90, PU40

**Prerequisites:** PUB251

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**PUB558 Medical Documentation and Abstraction for Classification**

It is essential for health information managers to thoroughly understand the clinician's response to various disease processes, how this information is documented in patient records and how this relates to the process of clinical classification. This unit integrates knowledge of anatomy, physiology, disease processes and medical procedures with an understanding of the process clinician's task to diagnose and treat common and speciality conditions. Students enhance their knowledge of clinical classification by the practical use of ICD-10-AM.

**Courses:** PU40

**Prerequisites:** PUB356

**Incompatible with:** PUB456

**Contact hours:** 12  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**PUB561 Quantitative Analysis for Health**

The ability to analyse and interpret quantitative data is an important skill for all graduates in public health. This unit builds upon PUB326 Epidemiology and complements analytical methods learned in PUB461 Qualitative Enquiry in Public Health. Through critical review of the literature, and worked out examples from a range of topic areas, students become familiar with the process of summarising and describing data, defining and testing hypotheses, univariate methods and tests of bivariate associations, the concept of adjustment and the interpretation and presentation of analytical results.

**Courses:** PU40, PU43

**Prerequisites:** PUB416 (except NUD students)

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**PUB565 International Health**

International health will broaden student's understanding of global health systems and programs, providing an advanced level analysis that explores systems and methods that have been effective in addressing health problems in developing and developed countries. Students examine the historic context of the international health movement from the early 1900s to recent changes in global health systems, explore the diversity of services between and within countries, and consider issues of globalisation, economic reform, health equity and ethics. This unit is particularly relevant to students who are interested in international health development work.

**Courses:** PU40

**Prerequisites:** 192 Credit points, PUB251, PUB326

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 1

**PUB606 Dietetic Management**

This unit includes the following: history of dietetics and the role of management in dietetics; planning and organisation; leadership; peer review systems; total quality management; clinical costing; program evaluation and measuring effectiveness; information systems applied to dietetic management; managing change; case mix funding; management tools; marketing; planning community based programs; team building; and managing role conflict.

**Courses:** HL42, PU43

**Prerequisites:** PUB506, PUB722

**Contact hours:** 3 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

**PUB607 Promoting Oral Health**

This unit aims to present oral health promotion as an emerging public oral health field of professional practice. The unit provides knowledge of both the theoretical and practical application of health promotion strategies in a range of contexts. It links oral health status with a number of socioeconomic variables, and provides an understanding of the role of health promotion strategies that are appropriate to special groups. It also provides a sensitivity to, and an understanding of, cultural and gender related issues in relation to oral health promotion.

**Courses:** NA80

**Prerequisites:** PUB203

**Corequisites:** PUB203

**Contact hours:** 2 per week  
**Campus:** KG, Ext  
**Credit points:** 12  
**Semester:** 2

**PUB609 Health Resource Allocation**

This unit aims to prepare students for participation in health sector decision making as underpinned by a range of health specific evaluation activities. The unit provides students with a grounding in the methodologies of health evaluation and resource allocation.

**Courses:** HL38, HL46, HL68, HL88, IF47, NS45, PU38, PU40

**Contact hours:** 3 per week  
**Campus:** KG, Ext  
**Credit points:** 12  
**Semester:** 2

**PUB611 Risk Management**

This unit provides students with the knowledge and skills for the assessment and quantification of risk in the workplace. It considers the various models available to investigate and analyse accidents and propose strategies to prevent similar incidents in the future. Various hazard identification techniques such as HAZOP, Fault Tree Analysis and FMEA are discussed. The unit provides students with the ability to position occupational health and safety within an organisation’s strategic decision making process.

**Courses:** IF67, PU40

**Contact hours:** 3 per week  
**Campus:** KG, Ext  
**Credit points:** 12  
**Semester:** 2

**PUB628 Advanced Food Studies**

This unit provides students with an opportunity to acquire practical skills in the planning, preparation and delivery of nutrient altered foods suitable for a wide range of therapeutic diets. Students evaluate the outcome of incorporating nutrient modified food products into dietary regimens. Food standards, relevant developments and issues are also considered.

**Courses:** HL42, PU43

**Prerequisites:** PUB474, PUB541

**Corequisites:** PUB641

**Contact hours:** 6 per week  
**Campus:** KG  
**Credit points:** 12  
**Semester:** 2

**PUB632 Independent Study**

Independent study allows students to study a topic which is not otherwise available as a formal unit. Students have the opportunity to pursue their studies relatively independently and to develop and practise skills in problem identification, evaluation and critical thinking. The study may be for example a literature review or a placement in a particular setting. The process and outcomes are negotiated in a contract with a supervisor.

**Courses:** PU40, PU43

**Campus:** KG, Ext  
**Credit points:** 12  
**Semester:** 2

**PUB633 Health Informatics**

An understanding of computer applications in health is important to making an effective contribution to the planning and evaluation of health care information systems. This unit integrates health care trends with the capacity for information management and information systems to support these directions in health care. This unit aims to bridge the communication gap which often appears between the health care professional and computer specialists. It is also designed to prepare students for involvement in the many aspects of information systems they...
may encounter in the health care field. These aspects include the planning, specification, development, implementation, control and management of such systems.

Courses: PU40
Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2

► PUB635 Podiatric Surgery
This unit addresses the implementation of podiatric surgical techniques based on strong theoretical knowledge. On completion, students should understand the principles and techniques of lower limb surgery. Students are taught minor surgical techniques and review some of the more common major surgical procedures including the foot and ankle.

Courses: HL43, PU43  Prerequisites: PUB438, PUB522, PUB539, PUB639
Corequisites: PUB523, PUB624
Contact hours: 3  (including surgical work)  Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2

► PUB638 Orthopaedics and Sports Medicine
This unit provides students with a detailed knowledge of orthopaedic and musculoskeletal conditions affecting the lower limb. The unit also discusses the assessment and management of the sports patient.

Courses: HL43, PU43  Prerequisites: PUB537 (PU43 and HL43 only), PUB538 (PU43 only)
Corequisites: PUB635 (PU43 only), PUB639 (PU43 and HL43)
Incompatible with: PUB726, PUB827  Campus: KG  Credit points: 12  Semester: 2

► PUB639 Podiatric Medicine 4
This unit extends the student by way of a greater role in independent case investigation and clinical case presentation. Complex case histories and treatment interventions are pursued. The theory and treatment of paediatric disorders is studied and students are introduced to specialist clinics in the podiatry facility and treatment of higher order cases. Students implement a wide range of treatments and should be able to consolidate skills acquired. Diagnostic skills are also developed with the wider range of patients being treated and the specialised study of disciplines such as dermatology and radiology further integrating academic and clinical studies.

Courses: HL43, PU43  Prerequisites: PUB539
Incompatible with: PUB624  Contact hours: 12  Campus: KG  Credit points: 12  Semester: 2

► PUB641 Medical Nutrition Therapy 2
This unit builds on the extensive knowledge base of the theory and application of dietary treatment to disease and the principles of nutritional assessment development in Medical Nutrition Therapy 1.

Courses: HL42, PU43  Prerequisites: PUB541
Corequisites: PUB628  Contact hours: 1 per week  Campus: KG  Credit points: 12  Semester: 2

► PUB643 Home Economics Curriculum 2
This unit is the second in a suite of three curriculum units studied concurrently with Teaching and Learning Studies 3 and Field Studies 2. The unit provides students with opportunities to develop knowledge and skills pertinent to the professional educator, including the ability to critique current paradigms. Learning experiences are organised to build deeper understanding of outcomes based syllabuses. This knowledge is applied to the design and management of learning environments and practices that engage learners. The importance of self regulatory practice is emphasised.

Courses: EDO0  Incompatible with: PUB332  Contact hours: 3  Campus: KG  Credit points: 12  Semester: 2

► PUB644 Health Promoting Schools
This subject is designed to extend students’ understanding of health promotion in a school setting. The learning objectives for this course are designed to reinforce the links between education and health, in relation to the planning, implementation and evaluation of a school based health promotion intervention. It also addresses some of the management issues that underlie such an approach to the promotion of health and well being in the school community. Case studies or activities offer a range of opportunity for reflection and implementation.

Courses: HL38, HL68, HL88, PU39, PU60, PU85  Campus: Ext  Credit points: 12  Semester: 2

► PUB669 Management of Health Information Services
This unit is the final one in the suite of health information management related units. As a result, it has a strong focus on professional issues and current trends in HIM practice. It examines the roles and functions of the health information manager in the management of health care services in the current health environment. Class activities concentrate on the principles and processes of management as applied to health information services. A problem based learning approach is adopted to give students experience in “real world” activities.

Courses: PU40  Prerequisites: PUB108, PUB338, PUB490, PUB555
Incompatible with: PUB669  Contact hours: 3 per week  Campus: KG  Credit points: 12  Semester: 2

► PUB723 Clinical Dietetic Practice
Students are required to develop skills in the management of nutritional care of clients in the clinical setting, to a standard that allows entry to the Dietetics profession. This unit incorporates the basic strategies of the dietetic care process, such as assessment, planning, implementation and evaluation of nutritional care, for clients who have a variety of disease states. Students also need to demonstrate basic skills in research in relation to clinical outcome.

Courses: HL42, PU43  Prerequisites: PUB875  Incompatible with: PUB722  Contact hours: 24  Campus: KG  Credit points: 12  Semester: 1

► PUB738 Advanced Clinical Studies 1
The aim of this unit is to develop high-level clinical skills and professionalism in a range of clinical settings. Increased understanding of the various clinical and non-clinical roles that podiatrists play in the community will be emphasised through external placements.

Courses: HL43, PU43  Prerequisites: PUB538, PUB635, PUB638, PUB639  Incompatible with: PUB728  Contact hours: 9 per week  Campus: KG  Credit points: 12  Semester: 1

► PUB739 Podiatric Medicine 5
The aim of this unit is to provide students with the diagnostic and treatment skills necessary to manage patients with more complex conditions, introduce contemporary issues in podiatry including national and international issues, and to encourage you to critically evaluate the medical literature to inform your clinical decisions. (Not offered until 2005).

Courses: HL43, PU43  Prerequisites: PUB537, PUB538, PUB635, PUB638, PUB639  Corequisites: PUB738  Campus: KG  Credit points: 12  Semester: 1

► PUB743 Home Economics Curriculum Studies 3
This unit extends the student in the diagnostic and treatment skills necessary to manage patients with more complex conditions; introduce contemporary issues in podiatry including national and international issues; and to encourage students to evaluate critically the medical literature to inform their clinical decisions.

Courses: HL43, PU43  Prerequisites: PUB537, PUB538, PUB635, PUB638, PUB639  Corequisites: PUB738  Campus: KG  Credit points: 12  Semester: 1

► PUB821-2 Practice in Community Nutrition
This unit involves a four week practical placement off-campus where students work on various projects and gain experience in the nutrition and health care groups in a variety of community, workplace and school settings.

Courses: HL42, PU43  Campus: KG  Credit points: 6  Semester: 1

► PUB821-1 Practice in Community Nutrition
This unit involves a four week practical placement off-campus where students work on various projects and gain experience in the nutrition and health care groups in a variety of community, workplace and school settings.

Courses: HL42, PU43  Campus: KG  Credit points: 6  Semester: 1

► PUB821-2 Practice in Community Nutrition
This unit involves a four week practical placement off-campus where students work on various projects and gain experience in the nutrition and health care groups in a variety of community, workplace and school settings.

Courses: HL42, PU43  Campus: KG  Credit points: 6  Semester: 1
the nutrition and health care of groups in a variety of community, workplace and school settings.

Courses: HL42, PU43
Prerequisites: PUB821-1
Credit points: 6  Semester: 2

► PUB822-2 Practice in Food Service Management
This unit includes a four week practical component consisting of up to four separate placements in hospitals, nursing homes, correctional centres or other locations to gain experience in food service management.

Courses: PU43, HL42
Prerequisites: PUB822-1
Credit points: 6  Semester: 2

► PUB822-1 Practice in Food Service Management
This unit includes a four week practical component consisting of up to four separate placements in hospitals, nursing homes, correctional centres or other locations to gain experience in food service management.

Courses: HL42, PU43
Campus: KG
Credit points: 6  Semester: 2

► PUB826 Project and Professional Management
This unit addresses two key concepts: it explains how a professional practice may be set up and how a small practice can operate as a business enterprise. Methods of budgeting, finance and control are included; it develops an interest in podiatry research using scientific methods of investigation and presentation. Students are encouraged to publish these projects as original material in related professional journals.

Courses: HL43, PU43
Contact hours: 3 per week  Campus: KG
Credit points: 12  Semester: 2

► PUB838 Advanced Clinical Studies 2
The aim of this unit is to develop high level clinical skills and professionalism in a range of clinical settings. Increased understanding of the various clinical and non-clinical roles that podiatrists play in the community are emphasised through external placements. Students complete clinical rotations not attempted in PUB738 Advanced Clinical Studies 1.

Courses: HL43, PU43
Prerequisites: PUB738, PUB739
Credit points: 12  Semester: 2

► PUB839 Podiatric Medicine 6
The aim of this unit is to ensure students are able to demonstrate adequate knowledge and skills expected for entry into the podiatry profession.

Courses: HL43, PU43
Prerequisites: PUB739
Credit points: 12  Semester: 2

► PUB875 Professional Practice
This unit is undertaken by students in the public health, and nutrition and dietetics streams of the BSc. It provides students with the opportunity of working in one or a number of placements in a professional capacity in an area of interest to the student. It provides an opportunity for students to apply the knowledge and skills acquired through their course to a practical problem or workplace situation.

Courses: HL42, HL46, IF47, IF85, PU40, PU43
Contact hours: 4 per week  Campus: KG
Credit points: 12  Semester: 2

► PUB8001 Contemporary Risk Management
This unit provides an introduction to the risk management process as outlined in AS/NZS 3600 risk management. The unit concentrates on the context of risk management and introduces the student to the concepts that will be explored further in the units PUB008, PUB009 and EFN418. The structure of the organisation, its environment and the potential loss exposures are examined in some detail.

Courses: HL38, HL68, HL88, IF87, PU32, PU60, PU65, PU85
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1

► PUB8008 Risk Assessment
This unit provides the skills necessary to identify and assess risks. Qualitative, semi-quantitative and quantitative methods of risk analysis are investigated in the context of the major perils likely to be considered by an organisation. Various risk analysis techniques including HAZOP, FMEA, hazard indices, fault trees, event trees, reliability analysis, statistical analysis, and probability are discussed.

Courses: HL38, HL68, HL89, IF88, PU60, PU65, PU85
Prerequisites: PUB001
Corequisites: PUB001
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1, 2

► PUB8010 Implementing Risk Management
A robust system is necessary to ensure the ongoing commitment to the risk management process and to ensure positive outcomes. The risk management process needs to be integrated and strategic in its approach. It requires commitment from senior management and an organisational strategy designed to maximise business value. This unit investigates the role of risk management in an organisation, organisational experiences in implementing risk management programs, and ways of ensuring the success of a risk management program.

Courses: HL38, HL88, HL89, IF88, PU60, PUB85
Prerequisites: PUB8008
Incompatible with: PUB8009
Credit points: 12

► PUB8011 Managing Organisational Behaviour in Ambulance Services
This unit aims to provide you with the opportunity to understand and appreciate the behaviour of people at work with particular reference to the context of an ambulance service. You will analyse behaviour at the individual, group, and organisational levels. You will gain an understanding of the behavioural dynamics that influence the effectiveness of different management strategies, organisational structures and organisational cultures under different environmental and technological conditions.

Campus: Ext  Credit points: 12

► PUB8012 Human Resource Management in Ambulance Services
Credit points: 12  Semester: 2

► PUB8013 Ambulance Operational Management
Credit points: 12  Semester: 1

► PUB8014 Finance for Ambulance Managers
Campus: Ext  Credit points: 12

► PUB8013 Advanced Epidemiology
This unit's aim is the mastery of key principles and concepts of research design. There has been an increasing demand for evidence based health research, and an increasing trend towards research that considers complex biological, environmental and societal inter-relationships. Recent developments in epidemiology have contributed novel research designs and statistical methods to complement these needs. Throughout this unit, students are exposed to these more sophisticated designs and analytical methods. Such knowledge is mandatory for critical evaluation of the current research literature, for design of efficient research studies and to inform appropriate interpretation of research results at a 'best practice' level.

Courses: HL38, HL68, HL88, HL90, PU60, PU85
Prerequisites: HLN705 or PUB316 or equivalent
Contact hours: 3  Campus: KG
Credit points: 12  Semester: 2

► PUB8015 Health Statistics
Beyond a common core of statistical concepts, each discipline area emphasises its own set of descriptive and inferential statistical methods and even terminology. The content of this unit emphasises both core and health specific statistical methods in the health sciences. Students are provided with substantial practical experience in the application and interpretation of common statistical methods to health data, and are also made aware of data management principles in preparation for analysis. There is a strong emphasis on applying concepts through critical reading and discussion of the literature and worked examples from a range of topics.

Courses: HL38, HL68, HL88, HL90, PU30, PU60, PU85
Contact hours: 3 per week  Campus: KG, Ext
Credit points: 12  Semester: 1

► PUB8016 Population Health
This unit addresses some of the significant issues of population health including the complex relationship between health and social, economic, political and lifestyle factors and social disadvantage and health. It examines contemporary concepts of health and illness also draws on international examples. Potential health issues facing Australia and the world, such as the aging of the population, the impact of genetic technology on health and the health of specific sub-populations are also examined.

Courses: HL38, HL68, HL88
Incompatible with: Completion of PU4043 or PUB251 or PUB314 or PU010 or NSN822
Contact hours: 3  Campus: Ext
UNIT SYNOPSES

Credit points: 12  Semester: 1
PUN215 Organisational Behaviour (Queensland Health)
Courses: PU33  Campus: Ext
Credit points: 12  Semester: 2
PUN216 Human Resource Management (Queensland Health)
Courses: PU33  Campus: Ext
Credit points: 12  Semester: 3
PUN217 Financial Management (Queensland Health)
Courses: PU33  Campus: Ext
Credit points: 12  Semester: 1
PUN220 Introduction to Advanced Clinical Practice
Credit points: 12  Semester: 1, 2
PUN221 Cardiovascular Emergencies
Corequisites: PUN220, PUN222, PUN226
Campus: Ext
Credit points: 12  Semester: 1, 2
PUN222 Medical and Surgical Emergencies 1
Corequisites: PUN220, PUN221, PUN226
Campus: Ext
Credit points: 12  Semester: 1, 2
PUN223 Clinical and Integrated Practicum 1
Corequisites: PUN220, PUN221, PUN222
Campus: Ext
Credit points: 12  Semester: 1, 2
PUN224 Medical and Surgical Emergencies 2
Prerequisites: PUN220, PUN221, PUN222
Corequisites: PUN223
Campus: Ext
Credit points: 12
PUN226 Obstetric & Paediatric Emergencies
Prerequisites: PUN220, PUN221, PUN222, PUN223
Corequisites: PUN223, PUN227
Campus: Ext
Credit points: 12
PUN301 Health, Safety and Environmental Law and Management
This unit introduces students to the history of occupational health and safety and the impact on occupational health and safety practice of the law, and industrial relations. The theory and practice of occupational health and safety management is discussed.
Courses: HL38, HL68, HL88, PU60, PU65, PU85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 1
PUN363 Environmental Health Law
The purpose of this unit is to integrate the student's understanding of environmental health and previous science units to enable them to apply their knowledge in professional practice. In particular, this unit details the legislative and management tools for the control of public health issues in different settings. The prosecution process and gathering of evidence is discussed along with a detailed discussion on the environmental health practitioner's role under the Health Act 1937 and other legislation. Topics covered in this unit include legal processes for government and the law, prosecution processes, environmental law, health law, local government law, and intra-inter-government law (eg. IPA).
Courses: PU32, PU67, HL88
Corequisites: PUN620
Campus: KG
Credit points: 12  Semester: 1
PUN364 Food Safety
The aim of this unit is to develop the food safety knowledge of future health professionals (such as environmental health practitioners, public health practitioners, nutritionists and dietitians) to enable them to identify and implement processes to ensure a safe food supply and prevent food borne illness in the community. A variety of food safety topics are covered including food science principles, food safety principles, food borne illness, outbreak investigation and management, food safety law, auditing, premises design, HACCP, food safety programs, and food handler training/health promotion.
Courses: PU69
Corequisites: KG
Campus: KG
Credit points: 12  Semester: 1
PUN465 Environmental Protection
This unit aims to give students a detailed understanding of the causes, controls measures and management strategies for environmental pollution and an understanding of environmental impacts on human health. A variety of topics on environmental management are covered including environmental management principles, environmental policy and legislation, integrated planning, waste management, contaminated land, air pollution, water pollution, and noise pollution.
Courses: PU32, PU67, HL88
Prerequisites: PUN620
Campus: KG
Credit points: 12  Semester: 2
PUN466 Communicable diseases
This unit aims to provide a comprehensive overview of communicable diseases and to discuss current surveillance, control and prevention methods/strategies implemented by public health agencies. Topics in this unit include the following: communicable disease principles; physiology and epidemiology; outbreak investigation and management; immunisation; vector control; disease surveillance; and infection control.
Courses: PU67, HL88
Corequisites: KG
Campus: KG
Credit points: 12  Semester: 2
PUN467 Public Health Risk Assessment
The aim of this unit is to provide future public health professionals with the skills and knowledge necessary to effectively assess and manage risks associated with a variety of public health hazards. Topics covered in this unit include the following: the Australian standard risk management framework; environmental health risk assessment framework (issues identification, hazard identification, dose-response assessment, exposure assessment, risk characterisation); risk management strategies and approaches; fundamentals of environmental toxicology and its application in health risk assessment; health impact assessment; effective risk communication and community consultation approaches for public health risks; and case studies.
Courses: PU32, PU67, HL88  Campus: KG
Credit points: 12  Semester: 2
PUN500 Systems Safety for Health, Safety and Environment
In this unit, students learn about the nature of materials with regards to material failure, fire and explosions. Students are introduced to the concept of the hierarchy of controls and learn about the various safety systems used to control physical, chemical and biological hazards. Students are also introduced to specific legislative requirements that regulate the use of such substances, the configuration of appropriate safety systems, and the storage, handling and transport of hazardous materials. Students develop skills in accident investigation.
Courses: PU65, PU60, PU85, HL38, HL68, HL88
Contact hours: 3  Campus: KG, Ext
Credit points: 12  Semester: 2
PUN608 Health Economics
This unit is designed to introduce students with little or no previous economics background to some microeconomics theory and its application to economic issues in the health sector. The unit starts with more theoretical topics such as demand and supply analysis, the production of health and market structures, and then moves onto more applied topics such as health insurance and economic evaluations. The aim of the unit is to encourage students to understand variables that influence resource allocation within the health sector and to consider subsequent implications.
Courses: HL38, HL68, HL88, HL90, PU38, PU60, PU85
Prerequisites: PU85, PU60: PUN692; HL38, HL68, HL88, HL90; Nil; PU38: PU610
Incompatible with: PUB433
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12  Semester: 2
PUN610 Health Services Management
This unit offers theoretical and practical understanding of strategies and management issues associated with managing resources and managing people. The course is structured so that readings, activities and assessment items allow students to take a critical and analytical approach to an organisational issue within the context of current organisational, political, technological, and socio economic developments. The unit is designed to facilitate analytic skills and understanding of a range of management decision making principles and processes applicable to health management roles.
Courses: HL38, HL68, HL88, HL90, PU38, PU60, PU85
UNIT SYNOPSES

PUN615 Advanced Health Service Management
This unit is designed to assist students to consolidate prior learning through the development and application of a framework for business planning, particularly related to the introduction of new practices in health care, consolidated by the use of researching, writing and presentation skills. This unit is designed to assist health service managers to understand their roles in leading the organisation, and to develop their skills in strategic and tactical management.

Courses: HL38, HL88, HL90, PU60, PU85
Prerequisites: PUN610
Contact hours: 3 per week
Credit points: 12
Semester: 2

PUN617 Environmental Health Management
This unit aims to integrate the aspects of environmental health theory and practice covered in other units within the environmental health graduate program by focusing on current management and policy issues, strategies, tools and approaches. Topics covered include the following: environmental health policy development; environmental health management in local government; environmental health management in state government; new technologies; GIS; electronic toolbox; management tools; economic evaluation; environmental health indicators; emergency management; indigenous environmental health policy; dangerous goods management; project management; and environmental health practice issues.

Courses: HL38, HL88, HL90, PU32, PU60, PU85
Campus: KG
Credit points: 12
Semester: 2

PUN620 Concepts of Environmental Health
The aim of this unit is to produce students who have an in-depth understanding of the large range of contemporary environmental health hazards (including historical, current and predicted hazards) and the strategies to assess and manage these hazards in a sustainable manner. Topics covered include an overview of environmental health, ecosystems and ecology, sustainable development, food safety, water and sanitation, air pollution, waste and contaminated land, indigenous environmental health, built environment, communicable diseases, environmental health management, health promotion, and global environmental health issues.

Courses: HL38, HL88, PU32, PU60, PU85
Contact hours: 3 per week
Campus: KG
Credit points: 12
Semester: 1

PUN634 International Health and Medical Planning
This unit explores health care reform trends across a wide array of countries as a transnational phenomenon that cannot be understood solely in the context of the nation state. It uses the comparative method to provide students with an understanding of the impact of globalisation on health management and planning. The impact of this context on the future of the health sector and health service management is examined.

Courses: HL38, HL88, PU60, PU85
Corequisites: PUN692
Incompatible with: PUB511, PUB512

PUN635 Evidence Based Health Policy
The globalisation of the health sector, the changing global burden of disease, demographic profiles and transmigration have implications for understanding and developing health policy that improves population health nationally and internationally. Health practitioners and those involved health management policy need a broad understanding of the interplay of these factors, in relation to the policy development and evaluation cycle. Students learn to critically appraise the role of evidence in policy formulation, the role of political and other influences in policy making and the interplay between healthy public policy and health services policy.

Courses: HL38, HL68, HL88, PU60, PU67, PU85
Campus: KG, Ext
Credit points: 12
Semester: 1

PUN692 Health Care Delivery Systems
This unit adopts the broad objectives of effectiveness, efficiency and equity with which to analyse health care delivery systems. The unit consists of three separate modules which examine health care delivery systems from different perspectives. Module 1 is an introductory module which overviews the structural and functional components of health care delivery and defines the concepts of effectiveness, efficiency and equity. The Australian health care system is compared with those operating in both developed and developing countries. Module 2 introduces economic concepts and tools of analysis which primarily consider efficiency aspects of health care delivery. Module 3 analyses the management aspects of health care delivery within the context of change.

Courses: HL38, HL68, HL88, PU30, PU38, PU60, PU85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1

PUN702 Social and Behavioural Determinants of Health
This unit provides students with a conceptual basis to understand the interrelationship between various social and cultural determinants of population health and health behaviour and provides an overview on global trends in public health and health promotion.

Courses: PU10, PU50, PU85
Contact hours: 3 per week
Campus: KG, Ext

PUN743 Foundations and Practice of Epidemiology
This unit introduces the basic principles and methods of epidemiology as it is concerned with the identification, control and prevention of ill health in the community. It addresses specific aspects relating to the collection and interpretation of epidemiological data and issues of major public health importance both within Australia and overseas. It provides students with essential skills for logical, scientific assessment of the health and medical literature.

Courses: PU30, PU60, PU85
Prerequisites: PUN743
Contact hours: 3 per week

PUP034 Intervention Design and Theories of Change
This unit examines theories of change as they impact on health promotion and health education practice and the development and implementation of public health interventions. The unit addresses the strengths and weaknesses of change theory into practice and explores the nature of individual, group and organisational change strategies in public health and health promotion.

Courses: HL38, HL68, HL88, PU39, PU60, PU85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1

PUP035 Evidence Based Health Policy
This unit systematically explores the fundamental concepts and principles of epidemiology at a deeper level than the introductory subject Introduction to Epidemiology and the elective subject Applied Study Design. It aims to develop further insights into epidemiological reasoning and a logical approach to public health problems using the tools of epidemiology. The material covered will include casual inference, principles of study design, strategies for data analysis, meta-analysis analysis and a discussion of epidemiological philosophy.

Courses: PU30, PU60, PU85
Prerequisites: PUN743
Contact hours: 3 per week
Campus: KG

PUP036 Principles of Epidemiology and Disease Control
Courses: PU60, PU85
Prerequisites: PUN743
Campus: KG

PUP038 Intervention Design and Theories of Change
This unit examines theories of change as they impact on health promotion and health education practice and the development and implementation of public health interventions. The unit addresses the strengths and weaknesses of change theory into practice and explores the nature of individual, group and organisational change strategies in public health and health promotion.

Courses: HL38, HL68, HL88, PU39, PU60, PU85
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1

PUP039 Advanced Studies and Practice in Health Promotion
This advanced unit identifies the repertoire of practice skills that health promotion students need to address health problems. It integrates needs identification, systematic planning and evaluation models into practice. Internal students put this knowledge into practice through participation in a group based health promotion program. The process of developing and implementing a health promotion program develops an understanding of issues such as ethics, writing goals and objectives, resources and time management. External students conduct a needs assessment and use the data to write a health promotion program proposal.

Courses: HL38, HL68, HL88, HL90, PU39, PU60, PU85
Prerequisites: PUP035 or PUP036
Corequisites: PUP035 or PUP036
Incompatible with: PUP023, PUN613
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 2

PUP043 Health Program Evaluation
The aim of the unit is to provide students with skills and knowledge of health program evaluation, its place in public health and health sector contexts, the influences of evidence and contexts, both organisational and political in program evaluation and the application of program evaluation techniques. This unit complements health studies and deepens students' understanding of
program evaluation in practice. Course: KG, Ext
Credit points: 12 Semester: 2
PUP038 New Developments in Health Promotion
This unit provides students with a critical understanding of the foundations of health promotion internationally, and its influence and evidence in improving public health outcomes through new concepts and practice perspectives. This unit complements public health and other studies and provides a foundation for health professionals of the fundamental underpinnings of the discipline nationally and internationally.
Courses: PU60, PU85
Credit points: 12 Semester: 1
PUP116 Ergonomics
This unit explores the relationship between the worker, the work environment and the work space. Occupational ill health and injury arise from a lack of fit between the capabilities of workers and the design of the working environment, the work processes and the physical and mental demands of the task. Insight into ergonomics can assist practitioners to enhance the workers safety and comfort, improve work efficiency and performance, and optimise work performance. Topics include basic anatomy and physiology of body systems, occupational biomechanics and psychology.
Courses: HL38, HL68, HL88, PU60, PU65, PU85
Prerequisites: PUN301
Contact hours: 3 per week
Credit points: 12 Semester: 2
PUP250 Occupational and Environmental Monitoring
Occupational and environmental monitoring is described as the recognition, evaluation and control of hazards in the workplace. Workplaces contain numerous substances that are hazardous to health of the workforce, other occupants and the public. Occupational and environmental monitoring spans a number of disciplines including toxicology, engineering and statistics. Students need to develop strong investigatory and analytical abilities and professional judgment. Students also develop skills in evaluating the extent of workplace hazards. A preventative approach to dealing with occupational health problems is emphasised based on an understanding of the control hierarchy and the use of exposure standards.
Courses: HL38, HL68, HL88, HL90, PU60, PU65, PU85
Prerequisites: PUP415
Corequisites: PUP415
Contact hours: 3 per week
Credit points: 12 Semester: 2
PUP415 Occupational and Environmental Health
This unit explores chemical hazards in the working environment, epidemiological principles and practice, and identification of specialist risk groups in the workplace. Topics include the following: the pathological bases of disease in humans; chronic occupational diseases; occupational skin conditions; respiratory diseases; biological hazards in the work environment (bacteria, parasites, viruses, rickettsia and fungi); chemical and physical hazards and their physiological responses; physiological monitoring principles and practice; special risk groups; and epidemiological principles and practice.
Courses: HL38, HL68, HL88, HL90, PU32, PU60, PU65, PU85
Prerequisites: PUN301
Contact hours: 3 Campus: KG, Ext
Credit points: 12 Semester: 2
PYB000 Scholarship and Skills (Psychology)
This is a compulsory first year unit. It focuses on the development of a number of generic competencies which are important outcomes of all QUT undergraduate courses. The unit provides a skill basis, developed within various discipline contexts, upon which subsequent units in the course will build. The unit is an essential first stage in the development of key skills and understandings at the tertiary level.
Courses: PY45
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
PYB007 Interpersonal Processes and Skills
Psychology is generally a people-based profession with many positions involving not only understanding and testing people but communicating with them. More broadly however in most areas of modern work, and indeed within personal relationships, people need developed interpersonal skills and the ability to conceptualise interactive processes. The microskills for communication are also the foundation for helping relationships and counselling.
Courses: PY45, IF12, SC01, SC40, SC45
Incompatible with: PYB086
Contact hours: 3 per week Campus: GP, KG and CA
Credit points: 12 Semester: 1, 2
PYB012 Psychology
The book Psychology which defines Psychology as a discipline is basic to an understanding of human behaviour and interaction. Psychological theories, concepts and methods of investigation provide ways of evaluating personal and professional practice. Information can then be used to meet the needs of individuals, groups and communities. All professional people need to have frameworks for understanding their own behaviour and that of others. This unit provides students with essential knowledge as a basis for their personal and professional effectiveness. It is the foundation for understanding further study in psychology and its many applications.
Incompatible with: PYB073, PYB100, PYB101
Contact hours: 3 per week Campus: KG, KA
Credit points: 12 Semester: 1, 2
PYB054 Psychology & Gender
This unit asks ‘What is gender?’ It includes theories of gender: male and female; masculinity and femininity; roles versus power; counselling issues; old and new paragons; history of psychology of gender; sexuality; mothers and fathers; psychology constructs the female; psychology in patriarchal discourse; family therapy theory and feminist critiques; psychological constructs and the media; film and media; psychology of gender and power.
Incompatible with: PY45
Prerequisites: PYB100 or PYB101 or PYB102
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
PYB067 Human Sexuality
This unit explores historical approaches to studying and engaging human sexuality with an awareness of the social nature of definitions of ‘normal’ or ‘acceptable’ sexual behaviours. Students critically examine definitions of ‘healthy’ or ‘morally acceptable’ or ‘normal’ sexuality. Different models of sexuality are considered with an emphasis on contemporary critiques of the traditional paradigms of sexuality in the West.
Incompatible with: PYB102, PYB100, PYB101
Contact hours: 2 per week Campus: KG
Credit points: 12 Semester: 1
PYB100 Foundation Psychology
This unit provides an understanding of the behavioural sciences which underlie much of the interaction of health professionals. Psychological and social factors that moderate responses to health, disease, trauma and scientific and medical treatment, and the principles that underlie empathetic and effective intervention are the focus of study in this unit. A sound understanding of psychological and social concepts and principles is essential for the professional practice of contemporary, holistic nursing care for individuals and groups, and an important element in the development of effective relationships with clients, colleagues and other members of a multidisciplinary health care team.
Incompatible with: PYB012, PYB100, PYB101
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
PYB101 Introduction to Behavioural Science & Health Care
This unit explores historical approaches to studying and engaging human sexuality with an awareness of the social nature of definitions of ‘normal’ or ‘acceptable’ sexual behaviours. Students critically examine definitions of ‘healthy’ or ‘morally acceptable’ or ‘normal’ sexuality. Different models of sexuality are considered with an emphasis on contemporary critiques of the traditional paradigms of sexuality in the West.
Incompatible with: PYB102, PYB100, PYB101
Contact hours: 2 per week Campus: KG
Credit points: 12 Semester: 1
PYB100 Foundation Psychology
This unit provides an understanding of the behavioural sciences which underlie much of the interaction of health professionals. Psychological and social factors that moderate responses to health, disease, trauma and scientific and medical treatment, and the principles that underlie empathetic and effective intervention are the focus of study in this unit. A sound understanding of psychological and social concepts and principles is essential for the professional practice of contemporary, holistic nursing care for individuals and groups, and an important element in the development of effective relationships with clients, colleagues and other members of a multidisciplinary health care team.
Incompatible with: PYB012, PYB100, PYB101
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
PYB101 Introduction to Psychology
This unit explores historical approaches to studying and engaging human sexuality with an awareness of the social nature of definitions of ‘normal’ or ‘acceptable’ sexual behaviours. Students critically examine definitions of ‘healthy’ or ‘morally acceptable’ or ‘normal’ sexuality. Different models of sexuality are considered with an emphasis on contemporary critiques of the traditional paradigms of sexuality in the West.
Incompatible with: PYB102, PYB100, PYB101
Contact hours: 2 per week Campus: KG
Credit points: 12 Semester: 1
PYB100 Foundation Psychology
This unit provides an understanding of the behavioural sciences which underlie much of the interaction of health professionals. Psychological and social factors that moderate responses to health, disease, trauma and scientific and medical treatment, and the principles that underlie empathetic and effective intervention are the focus of study in this unit. A sound understanding of psychological and social concepts and principles is essential for the professional practice of contemporary, holistic nursing care for individuals and groups, and an important element in the development of effective relationships with clients, colleagues and other members of a multidisciplinary health care team.
Incompatible with: PYB012, PYB100, PYB101
Contact hours: 3 per week Campus: KG
Credit points: 12 Semester: 1
UNIT SYNOPTIC

Courses: PY45, IF12
Incompatible with: PYB012, PYB073, PYB100
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1

► PYB102 Introduction to Psychology 1B
Introduction to Psychology 1B extends the introduction provided in Introduction to Psychology 1A to psychology as the scientific study of human behaviour. This unit introduces students to the basic biological and psychological processes underlying perception, memory, learning, problem solving, consciousness, and language. In addition, research participation experience is provided to the students.

Courses: PY45, IF12
Prerequisites: PYB010 or PYB100
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB110 Psychological Research Methods
This unit includes the following: an overview of the purposes and strategies of research; elementary research design; operationalising variables; descriptive statistics; distributions; measures of central tendency and spread; standard scores and percentiles; understanding relationships between variables through correlation and regression; an introduction to hypothesis-testing procedures using t-tests.

Courses: PY45, IF12
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2, 3

► PYB111 Paramedic Communication Skills
Paramedics require advanced skills in communication to face challenging situations. This unit provides the core knowledge and skills necessary for developing effective communication skills which enable a paramedic to establish an accurate and efficient clinical history, to provide support to patients at times of accurate stress and to understand their choices and situations. Topics covered include basic communication skills; models and processes in communication; communication with special needs patients (eg with acute mental illness; developmental disabilities or sensory deficits; non-English speaking background; angry, distressed or intoxicated patients; children and the elderly); building cooperative relations with patients and colleagues.

Courses: PU46
Prerequisites: PUB180 Campus: KG
Credit points: 12 Semester: 2

► PYB158 Introduction to Substance Abuse in Australia
This unit introduces students to alcohol and drug use in the Australian context. The unit examines the terminology and definitions common to the alcohol and other drug field as well as providing an overview of models of drug use. This unit compares and contrasts current trends and patterns of substance use in Australia and critically examines the legitimacy of this focus. Australian substance use/abuse patterns are positioned within a global context.

Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB159 Alcohol & Other Drug Studies
This unit aims to give students an understanding of the extent of substance abuse in our community; who uses what, where and when; the models that have been advanced for understanding substance abuse; the intervention and therapeutic models utilised within the field; the effects of substance abuse, psychologically, socially and psychologically.

Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1

► PYB201 Perception
This unit presents an overview of perceptual and sensory processes in humans and other animals. While most emphasis is placed on visual and auditory perception, the unit also explores the skin senses, the chemical senses, and the orienting senses. In each case, the topics covered include: the nature of the relevant physical stimuli, the physiology of the sensory modality, the phenomenology of the sensory modality, sensory dysfunction, and examples of applied research in the domain. The unit begins with a primer of psychophysics.

Courses: PY45, PY07, IF12
Prerequisites: PYB100 or PYB101 or PYB102
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB203 Developmental Psychology
This unit provides an introduction to life span developmental psychology. It unit covers major theories of life span development and includes biological, social and cognitive aspects of development from birth through to old age. It emphasises the interdependency of all aspects of development and the importance of the physical, family, socio-cultural and historical contexts within which development occurs. The unit aims to develop the student's understanding of general patterns of human development and of the ways in which the development of particular individuals and groups may vary from these general patterns.

Courses: PY45, PY07, IF12
Prerequisites: PYB100 or PYB101 or PYB102
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB205 Social Psychology
People are social beings. Their thoughts, feelings and actions are influenced by the real, imagined or implied presence of others. To obtain greater insight into people's behaviour, it is essential to investigate scientifically the relationship between the individual and the group. The effects of the individual within the group and the group upon the individual are studied.

Courses: PY45, PY07, IF12
Prerequisites: PYB100 or PYB101 or PYB102
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB206 Personality
This unit consists of an overview of some of the major theories of personality to provide the students with an understanding of contemporary approaches to normal personality function. Emphasis is placed on the methods of studying and conducting research in personality. By studying normal personality processes, this unit provides a foundation for advanced studies in psychopathology.

Courses: PY45, PY07, IF12
Prerequisites: PYB100 or PYB101 or PYB102
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1

► PYB208 Counselling Theory and Practice 1
This unit develops the student's knowledge of the counselling process and skills and provides practice in changing the ways in which people express, conceptualise and respond to their concerns. It builds upon the communication skills and concepts introduced in PYB007 and introduces a range of counselling approaches. This unit gives skills in solution oriented approaches but also covers a range of models and skills for workers in crisis situations. It provides a basis for further studies in counselling in clinical settings requiring psychotherapeutic intervention, and other modes of delivery such as couple, family or group work.

Courses: PY45, IF12
Prerequisites: PYB007 or equivalent
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB210 Research Design and Data Analysis
This unit takes an hypothesis testing approach to data analysis. This means that statistical analysis is treated as one step in a larger process which also includes formulating theoretically sound predictions, designing a suitable experiment to test the predictions, selecting the appropriate statistics to test the predictions, calculating and interpreting the required statistics, and reporting the outcomes of the experiment. This unit gives the student with the knowledge and skills required to do these tasks with respect to any of the two types of prediction, differences between means and relationships between sets of variables.

Courses: PY45, PY07, IF12
Prerequisites: PYB110
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1

► PYB215 Forensic Psychology and the Law
Forensic Psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. Psychologists are now involved significantly in policing, judicial procedures and correctional processes. By its very nature the study of psychology and law draws from a wide multi-disciplinary base for the application of specialised knowledge. As a student of this discipline area, you will need a broad introductory appreciation of (and a critical perspective on) what the study of psychology and the law involves and what it has to offer across the three criminal justice domains of the police, the courts, and corrections.

Courses: PY45, PY07, IF12
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2

► PYB250 Environmental Psychology
How to apply theoretical concepts as tools in environment-behaviour research and analyse environmental settings using theoretical concepts. The following topics will be considered: The role of social and cultural vari-
ables in human-environment interactions; theory of place; behaviour settings; privacy, personal space, territoriality; environmental meaning and cognition; risk perception; environmental stress; environmental evaluations and appraisals. Specific environments such as the home, communities and cities, natural and therapeutic environments are also examined.

Courses: PY07
Prerequisites: PYB102 and PYB205
Incompatible with: ARB291, PSB052
Contact hours: 3 per week

► PYB257 Group Work

This unit provides an opportunity for experimental group learning, either intensively or in regular program times. It examines types of groups and varieties of group experiences: the importance and uniqueness of group medium; understanding behaviour in the group context; theories and models of group development; leader and member behaviour; planning, implementing and evaluating group methods; establishing groups and planned group approaches; the group as a therapeutic community; evaluating group work; ethical issues. Although this unit is not offered in 2006.

Courses: PY45, PY07, IF12
Credit points: 12

Semester: 2

Contact hours: 3 per week

Campus: CA

► PYB285 Introduction to Theory and Research in Hypnosis

Not offered in 2006. This unit serves as an introduction to experimental hypnosis for those students who may wish to pursue postgraduate study in clinical and experimental hypnosis. It covers socio-cognitive theories of hypnosis, several different types of hypnotic tests, and some of the hindrances to its possible therapeutic applications. The unit introduces students to the research in hypnosis and offers opportunities for discussion of the psychoanalytic, behaviourist and phenomenological models and perspectives. The unit investigates research into: dissociation; hypnotisability; regression; responsiveness; consciousness; altered states; hypnagogic dreams and hallucinations; ideomotor signals; psychometric and amnesic assessment of hypnotisability.

Courses: PY45, PY07
Contact hours: 3 per week

Campus: CA

► PYB260 Psychopharmacology of Addictive Behaviour

This unit develops the student’s understanding of addictive pharmacology, with particular emphasis on the psychopharmacology of addictive behaviours. To establish a framework for learning, classes will initially include a review of neurobiology, introduction to pharmacokinetics, and discussion of research methods used to investigate psychopharmacological effects of drugs on behaviour. Subsequent classes address the history and origin of the most commonly used addictive substances, attitudes to addictive substances, patterns of distribution and excretion, neuropharmacology, and the effects of acute and chronic administration. Substances covered include those that are most widely associated with problems of dependence and addiction.

Courses: PY45, PY07
Prerequisites: PYB159
Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 1

► PYB302 Industrial and Organisational Psychology

Participation in the workplace is an integral component in the lives of most people. It is important therefore to understand the behaviour of people, individually and collectively, within the workplace. Industrial and organisational psychologists are concerned with advancing the knowledge of the relationship between people and work, and using this knowledge to promote the effective organisation of human resources.

Courses: PY45, PY07, IF12
Prerequisites: PYB205
Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 1

► PYB303 Cognitive Psychology

This unit explores both the cognitive mechanisms involved in processing information and the behavioural models of learning. The information processing component covers topics including sensory storage, attention, pattern recognition, working memory, long-term memory, and applied psychology. The learning component deals with the phenomenology of behavioural learning paradigms including classical and operant conditioning. In both cases, the unit emphasises the need for critical analysis of the material and the experimental evidence supporting them.

Courses: PY45, PY07, IF12
Incompatible with: PYB057
Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 1

► PYB304 Physiological Psychology

This unit aims to provide a broad introduction to the area of neuropsychology and discusses both the clinical and cognitive approaches in the field. Three broad areas are covered: neuroanatomy, neuropsychology, and the cognitive and resulting deficits. Students learn about major neuroanatomical structures and their interconnections, with an emphasis on how this information is applied in the clinical setting. They also study a number of neuropsychological disorders in terms of their diagnosis, assessment and treatment, as well as the psychosocial effects such deficits have on the patients.

Courses: PY45, PY07, IF12
Prerequisites: PYB101 & PYB102
Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 1

► PYB306 Psychopathology

The unit provides an introduction to problems in psychological functioning and reviews research and theory relating to the major classes of mental disorder identified in DSM-IV, the diagnostic and classification manual most frequently employed in Australia and the United States. An integrated approach to the understanding of psychopathology is emphasised, highlighting the reciprocal influences of biological, psychological and social factors on behaviour.

Courses: PY45, PY07, IF12
Prerequisites: PYB205
Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 2

► PYB307 Health Psychology

This unit examines the psychological dimension of physical illness, health and care. There is a strong focus on health psychology in an Australian context with particular emphasis on cross-cultural and indigenous health-related issues. The unit examines definitions of health and health psychology; the role of health psychology; the determinants of health behaviours (e.g., cognitive, attitudinal, motivational, personality, social, developmental); medical settings and patient behaviour; patient and practitioner communication; stress, illness, and coping; chronic and terminal illness in childhood and adulthood.

Courses: PY45, PY07, IF12
Prerequisites: PYB100 or PYB101 or PYB102 and 48 credit points of second year (psychology or non-psychology) units

Campus: CA

Credit points: 12

Semester: 2

► PYB311 Psychological Assessment

Psychological assessment is a way of evaluating and understanding individuals. This unit is designed to introduce the student to the principles of psychological assessment. The different types of psychological assessments and issues involved in the assessment of normal and clinical populations are examined. Topics include ethical, psychometric, procedural and interpretative issues in the assessment of children, adolescents and adults. Although the major emphasis is on assessment theory, the mainstream tests that are available to qualified psychologists are also discussed.

Courses: PY45, PY07, IF12
Contact hours: 3 per week

Credit points: 12

Semester: 2

► PYB350 Advanced Statistical Analysis

The unit provides students considering further study in psychology with a thorough grounding in analysis of variance techniques, an introduction to multiple regression, and the data analysis tools used in a broad range of research designs in the social sciences. This unit extends the introduction to analysis of variance and regression provided in PYB210, considering multiple regression and more complex experimental designs involving two or more independent variables. The unit is both theoretical (including the use of conceptual formulae to analyse simple data sets by hand) and practical (analysing data sets using the SPSS statistical package), giving students a firm understanding of the theories underlying each analysis.

Courses: PY45, PY07, IF12
Prerequisites: PYB210
Contact hours: 3 per week

Campus: CA

Credit points: 12

Semester: 2

► PYB353 Occupational and Vocational Psychology

Psychological research underpins the focus of this unit. In the first half of the semester, students’ understanding of selection systems is expanded and deepened. Topics covered include principles of selection, job analysis, testing and questionnaires; medical settings and patient behaviour; patient and practitioner communication; stress, illness, and coping; chronic and terminal illness in childhood and adulthood. In later weeks, issues relating to career planning and choice are examined. Relevant theories are outlined before the focus moves to tools available for career guidance. Again there is a focus on the intersection of theory and practice.

Courses: PY45, PY07, IF12
Contact hours: 3 per week

Campus: CA

Credit points: 12

► PYB356 Counselling Theory and Practice 2

This unit focuses on the common facilitative factors within a counselling process paying
attention to the person of the therapist and the counselling relationship. In order to re-
spond appropriately and therapeutically to the needs of their clients, counsellors must
have a clear understanding of the social and interactive processes which occur. Consider-
eration of verbal, non-verbal, social, emo-
tional, gender, psychological and social dimen-
sions enables counsellors to develop
effective, functional and client-focused rela-
tionships and to control biases, needs and
possible exploitative practices.

Courses: PY45, PY07
Prerequisites: PYB208
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 1

► PYB358 Advanced Developmental
Psychology
In this unit, the focus is on child develop-
ment, with an emphasis on the infant and the
child up to adolescence. Students review
images of children and the unfolding of their
cognitive abilities within the cadre of theories
cognitive development. Among the areas
studied are the nature and development of
memory, the development of numerical
thinking, and children’s ability to understand
connection of language in the bilingual child.

Courses: PY45, PY07, IF12
Prerequisites: PYB203
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► PYB359 Introduction to Family
Therapy
Family therapy, based on a systemic or rela-
tionship understanding of human problems,
has been one of the most significant influ-
ences in the fields of counselling and psy-
chology in recent times. With the increasing
emphasis on the family as a focus for social
policy, support services, research, and inter-
venering, it is important for counsellors and
psychologists to have some familiarity with
the basic concepts and skills of this broad
approach. This unit focuses on providing
basic skills and concepts from one particular
approach which will be called ‘Constructive
Therapy’, combining aspects of solution-
focused therapy, possibility therapy, narra-
tive therapy and reflecting team practice.

Courses: PY45, PY07, IF12
Prerequisites: PYB208
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► PYB360 Interventions for Addic-
tive Behaviours
Addictive behaviours, in the form of alcohol-
dependence, substance abuse and gam-
bling, are recognised as major problems
nationally and internationally. This unit fo-
cuses predominantly on psychological as-
pects of addictive behaviours. To establish a
framework for learning, classes initially re-
view issues relating to psychological models
of addiction and methods of studying addic-
tive behaviours. Issues pertaining to the
symptomatology, etiology and assessment of
addictive behaviours, as well as the theoreti-
cal underpinnings of a range of therapeutic
interventions are also discussed. This unit
encourages critical thinking and analysis with
the aim of enhancing students’ understand-
ing of the complex issues relating to man-
agement of addictive behaviours.

Courses: PY45, PY07
Prerequisites: PYB158 or PYB159 or
PYB260
Incompatible with: PYN460
Contact hours: 1 week intensive
Campus: CA Credit points: 12 Semester: 2

► PYB371 Introduction to Road
Safety
This unit introduces the key principles and
practices in road safety. Special emphasis is
given to the broad context of road use/trans-
port in society and the economic and social
implications of road crashes. It introduces
the basics of information retrieval,
road crash analysis and interpretation, and
the strategic development of road safety
countermeasures.

Courses: PY45, PY07
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 1

► PYB372 Traffic Psychology and
Behaviour
This unit reviews the wide range of factors
that influence the behaviour of road users,
particularly those that contribute to the inci-
dence of road crashes or exacerbate their
severity. It covers all types of road users,
including motor vehicle drivers and passen-
gers, motorcycle riders, cyclists and pedes-
trians. The student examines a range of
theoretical models which have been used to
explain the behaviour of road users.

Courses: PY45, PY07
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 1

► PYB374 Applying Traffic Psy-
chology
This unit reviews the various strategies and
programs designed to modify road user be-
avour. Effective and ineffective approaches
are compared, in order to identify the key
characteristics of successful programs.
While this is a stand-alone unit, it extends
many of the theoretical and practical issues
covered in PYB372 -Understanding Road
User Behaviour.

Courses: PY45, PY07
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 2

► PYB400-1 Thesis (Part 1)
This unit covers four parts (each of 12 credit
points) which must be completed satisfacto-
riely, leading to the submission of a research
thesis. Students select a research topic and
design and conduct a related research pro-
gram using appropriate quantita-
tive/qualitative methods of analysis. This
research is reported in a written thesis in
APA fifth edition format. Assessment of the
thesis is in accordance with University as-
essment procedures.

Courses: PY09
Credit points: 12 Semester: 1

► PYB400-3 Thesis (Part 3)
This unit covers four parts (each of 12 credit
points) which must be completed satisfacto-
riely, leading to the submission of a research
thesis. Students select a research topic and
design and conduct a related research pro-
gram using appropriate quantita-
tive/qualitative methods of analysis. This
research is reported in a written thesis in
APA fifth edition format. Assessment of the
thesis is in accordance with University as-
essment procedures.

Courses: PY09
Credit points: 12 Semester: 1

► PYB400-4 Thesis (Part 4)
This unit covers four parts (each of 12 credit
points) which must be completed satisfacto-
riely, leading to the submission of a research
thesis. Students select a research topic and
design and conduct a related research pro-
gram using appropriate quantita-
tive/qualitative methods of analysis. This
research is reported in a written thesis in
APA fifth edition format. Assessment of the
thesis is in accordance with University as-
essment procedures.

Courses: PY09
Credit points: 12 Semester: 1

► PYB401 Advanced Research
Methods
This unit provides the student with a firm
understanding of a range of multivariate
procedures as well as the skills to apply
each analysis appropriately. In addition this
unit aims to prepare students as critical con-
sumers of psychological research.

Courses: PY09, PY20
Prerequisites: PYB350 or equivalent
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 1

► PYB402 Counselling Psychol-
ogy
This unit introduces the field of counselling
psychology, one of the specialised profes-
sional colleges within the Australian Psychol-
ogical Society. The thematic focus is on the
critical analysis, comparison, and evaluation
of selected counselling orientations (for ex-
ample, solution-focused therapy, narrative
therapy, cognitive-behavioural therapy, psy-
chodynamic therapy, etc). Comparison of these
approaches involves a consideration of
major contemporary issues relating to the
integration of theory, research and ethical
practice.

Courses: PY09, PY20
Prerequisites: PYB208 or equivalent
Contact hours: 3 per week Campus: CA Credit points: 12 Semester: 1

► PYB403 Cognitive Neuropsy-
chology
This unit aims to provide a broad introduction
to the area of neuropsychology and dis-
cusses both the clinical and cognitive ap-
proaches in the field. Three broad areas are
covered: neuroanatomy; neuropsychology; the
cognitive analysis of resulting deficits. The
student extends their knowledge of major
neuroanatomical structures and their inter-
connections, with an emphasis on how this
information is applied in the clinical setting.
UNIT SYNOPSIS

number of neuropsychological disorders are also examined in terms of their diagnosis, assessment and treatment, as well as the psycho-social effects such deficits have on the patients.

Courses: PY09, PY20
Prerequisites: PYB303 and PYB304 and PYB311
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYB404 Issues in Social Developmental Psychology
This unit evaluates the contributions of social and developmental psychology to the understanding of human behaviour. The unit examines topics in social development, as they relate to families and individuals across the lifespan.

Courses: PY09, PY20
Prerequisites: 3 years of psychology and PYB203 or equivalent
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYB405 Advanced Organisational Psychology
Students explore the role of organisational psychologists as both internal and external consultants who are skilled psychological researchers. Special attention is given to the interaction between organisation systems, community needs, and human beings in differing cultural, political and economic environments.

Courses: PY09, PY20
Prerequisites: PYB302
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYB407 Research and Professional Development Seminar
This unit develops and extends students' understanding of research and practice issues in psychology. It covers current debates and controversies within psychology. Students are encouraged to formulate critical responses to these topics. Attention is also given to the issues of ethics in psychological research and practice. A case-based approach to the study of ethics is used, with reference to the APS Code of Ethics as well as Codes from similar international organisations. Where possible guest speakers, including researchers and practising psychologists, will be invited to participate in seminars to develop and expand students' understanding of broader issues in psycho-social research and practice.

Courses: PY09, PY20
Prerequisites: PYB401
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2
► PYB408 Advanced Social Cognition
This unit provides an advanced coverage of social psychological theories that seek to explain how people think about themselves, others, and the social world in general. Students learn about the different ways in which people think about social information and how the social context is perceived, the ways in which information processing and decision-making can be biased by motivational and perceptual orientations, how individual and group decisions are reached, and the role of self-justification in decisions. In doing so, students build on the knowledge acquired in their undergraduate studies in social psychology.

Courses: PY09, PY20
Prerequisites: PYB305
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYB450-1 Research Thesis (Part 1)
This research project, listed as three separate 12 credit point units, is to be completed as a group empirical research project.

Courses: PY20
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1, 2
► PYB450-2 Research Thesis (Part 2)
This research project, listed as three separate 12 credit point units, is to be completed as a group empirical research project.

Courses: PY20
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1, 2
► PYB450-3 Research Thesis (Part 3)
This research project, listed as three separate 12 credit point units, is to be completed as a group empirical research project.

Courses: PY20
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1, 2
► PYN000 Counselling Studies 1
This unit provides the student with an initial overview of the field of counselling, before focusing on the theory and practice of one contemporary perspective called 'Constructive' or 'Time-Efficient' Therapy. It is an approach based largely in social constructionist principles and promotes a view of counseling as a unique conversational process which attempts to validate the client's experience, while pursuing possibilities for desired change. It also suggests a time-effective perspective, emphasising the possibility of working briefly and effectively with clients. Selected ideas and practices from several related approaches including solution focused therapy, possibility therapy and narrative therapy will be integrated.

Courses: PY12
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYN001 Professional Studies 1
This is an introduction to the professional study of counselling and the 'common factors' present in most counselling approaches. These factors, which include the working relationship, the focus on client resources, and the instillation of hope, contribute greatly to the counselling outcome. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes that occur in counselling. Verbal, nonverbal, social, emotional, gender, psychological and cultural dimensions are all present in the counselling process. Consideration of these dimensions enables counsellors to develop effective, functional and client-focused relationships.

Courses: PY12
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYN002 Professional Studies 2
This is an introduction to the professional study of counselling and the 'common factors' present in most counselling approaches. These factors, which include the working relationship, the focus on client resources, and the instillation of hope, contribute greatly to the counselling outcome. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes that occur in counselling. Verbal, nonverbal, social, emotional, gender, psychological and cultural dimensions are all present in the counselling process. Consideration of these dimensions enables counsellors to develop effective, functional and client-focused relationships.

Courses: PY12
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYN003 Group Studies
This unit provides the development of skills and approaches in organising and facilitating group work, in the context of personal support and therapeutic groups. It addresses the following: establishing group norms; facilitating stages of group development; responding to member behaviour and developing facilitator interventions; planning, implement focused therapy, and group work practices; dealing with defensiveness and hidden agendas; applying solution-focused and reflecting team processes to groups; examining the motion of the therapeutic milieu.

Courses: PY12
Prerequisites: PYN001
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2
► PYN004 Counselling Studies 3
This unit is designed to provide both an expository and skills-based approach to specific approaches. The unit is taught in two complementary strands. One strand is largely experiential which focuses on students' exploration of their own family of origin and family dynamics. The second strand extends the process into specific theoretical perspectives and skill development. The approaches build on some of the major orientations and skills areas covered in previous units: constructive therapies (ie solution-focused therapy and narrative therapy), psychodynamic approaches, and reflecting team work.

Courses: PY12
Prerequisites: PYN002
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 1
► PYN005 Research Methods and Issues; Evidence Based Practice
This unit is designed to provide a practical understanding of evidence-based practice, in addition to the theory and skills to completely design a study in the area of clinical psychology. The unit covers the philosophical underpinnings of research, relevant computer literacy skills, and the application of relevant methodologies over a range of applied research questions. Completion of the unit should increase the student's effective undertaking research related to clients, groups, or organisations.

Courses: PY18
Contact hours: 3 per week Campus: CA
Credit points: 12 Semester: 2
► PYN006 Professional Studies 2
This unit provides an experiential introduction to the process of professional supervision. Supervision processes, roles, responsibilities, content, approaches and theories are reviewed. Each student will have the experience of being supervised using one of five major counseling supervision approaches: solution-oriented, narrative, process-experiential, analytic and group development. Professional issues commonly addressed in supervision such as
power, gender, culture, consent, duty of care etc are reviewed.

**Courses: PY12**

- **Prerequisites:** PYN001  
  Credit points: 12  
  Semester: 1

  ► **PYN007 Professional Studies 3**  
  Clinical supervision involves the development of a working alliance between a counsellor and another skilled professional in order to examine and reflect on the counsellor's work. The role of the supervisor ranges from an educative, advisory one through to a supportive, collaborative and consultative approach depending on the counsellor's level of professional development and competence. Supervision can occur individually or in groups and can take place 'in vivo' (during actual counselling) or delayed (using self-reporting or taped material).

  **Courses: PY12**

  - **Prerequisites:** PYN006  
    Credit points: 12  
    Semester: 1

  ► **PYN008-1 Project (Part 1)**  
  Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Opportunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving project requirements.

  **Courses: PY12**

  - **Prerequisites:** PYN014  
    Contact hours: 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 1, 2

  ► **PYN008-2 Project (Part 2)**  
  Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Opportunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving project requirements.

  **Courses: PY12**

  - **Prerequisites:** PYN014  
    Contact hours: 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 1, 2

  ► **PYN008-3 Project (Part 3)**  
  Students undertake an individual project of theoretical and/or empirical research in a selected area of counselling. The project is supervised by a member of the teaching staff and progressive work is presented to other students. The completed project is to be presented in the form of a dissertation of not more than 15,000 words. Opportunity may be provided to work in the Family Therapy and Counselling Clinic as a way of achieving project requirements.

  **Courses: PY12**

  - **Prerequisites:** PYN014  
    Contact hours: 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 1, 2, 3

  ► **PYN013 Advanced Counselling Studies**  
  This elective unit is designed to allow students to build on these skills by pursuing counselling studies in two or more specialised areas. Students select studies in two modules. Areas from which selections can be made might include: experiential therapy, family therapy, narrative therapy, relationship counselling, depression, loss and grief and group work. Students may also complete one or both modules through approved forms of independent study (eg completion of approved workshops, courses or special areas of alternative study).

  **Courses: PY12**

  - **Prerequisites:** PYN02  
    Contact hours: 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 2

  ► **PYN026 Clinical Psychological Interventions 1**  
  This unit provides the fundamental theoretical and applied perspectives of clinical psychologists. It includes three major approaches to counselling: psychodynamic solution focused/narrative and cognitive behavioural therapies. A wide range of therapeutic procedures suitable for clients who present typically for counselling is discussed, as well as encouraging students to constructively critique and utilise the ever-increasing literature in counselling psychology. The unit focuses on individual clients who have experienced major traumatic or developmental concerns.

  **Courses: PY18, PY50**

  - **Contact hours:** 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 1

  ► **PYN027 Clinical Psychological Assessment**  
  This unit is designed to build on undergraduate training in psychometric assessment by reinforcing the understanding of theoretical perspectives in testing, increasing the range of tests with which the student is familiar, and developing competency in test administration, interpretation and report writing in the counselling context.

  **Courses: PY18, PY50**

  - **Contact hours:** 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 1

  ► **PYN028 Clinical Psychopathology**  
  This unit provides the student with a foundation and critical awareness of the development and phenomenology of psychological disorders. The unit undertakes a systematic study of the mechanisms and etiology of psychological disorders in individuals across the lifespan.

  **Courses: PY18, PY50**

  - **Contact hours:** 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 1

  ► **PYN029 Clinical Psychological Interventions 2**  
  This unit focuses upon systemic and narrative approaches to relationship counselling and family therapy. Contempory approaches to counselling have increasingly emphasised the importance of a relational understanding of human problems and change processes. The general area of family therapy has been most notable in contributing important concepts and skills that can be applied to most forms of relationship counselling. It is important to have some understanding of these concepts and skills in order to be able to respond to the diverse needs of contemporary practice.

  **Courses: PY18, PY50**

  - **Contact hours:** 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 2

  ► **PYN030 Professional Practice in Clinical Psychology**  
  Clinical psychology practice involves a unique process which requires an understanding of the counselling process and the role of the supervisor. This unit presents an overview of ethical, legal and professional issues encountered in practice, and also emphasises the role of supervision in addressing these.

  **Courses: PY18, PY50**

  - **Contact hours:** 3 per week  
    Campus: CA  
    Credit points: 12  
    Semester: 2

  ► **PYN031-1 Research Thesis (Part 1)**  
  In completing the thesis, students are expected to demonstrate competency in critical and analytic thought, and research-related skills in a context that may make a contribution to the professional literature of Clinical Psychology. PYN031 is divided into four 12 credit point sections - PYN031/1, PYN031/2, PYN031/3, PYN031/4. PYN031 (Part 1) requires students to hand in an extensive literature review on a chosen topic and an outline of the research question and the standing of special roles, power relationships, boundaries and ethical principles in order to safeguard client rights. This unit also presents an overview of ethical, legal and professional issues encountered in practice, and also emphasises the role of supervision in addressing these.

  **Courses: PY18, PY17**

  - **Contact hours:** 12  
    Campus: CA  
    Semester: 1, 2

  ► **PYN031-2 Research Thesis (Part 2)**  
  In completing the thesis, students are expected to demonstrate competency in critical and analytic thought, and research-related skills in a context that may make a contribution to the literature of Clinical Psychology. The unit is divided into four 12 credit point sections - PYN031/1, PYN031/2, PYN031/3, PYN031/4. In PYN031 (Part 2) students prepare and complete the design and method section and complete an ethics application.

  **Courses: PY18, PY17**

  - **Contact hours:** 12  
    Campus: CA  
    Semester: 1, 2

  ► **PYN031-3 Research Thesis (Part 3)**  
  In completing the thesis, students are expected to demonstrate competency in critical and analytic thought, and research-related skills in a context that may make a contribution to the literature of Clinical Psychology. The unit is divided into four 12 credit point sections - PYN031/1, PYN031/2, PYN031/3, PYN031/4. In PYN031 (Part 3) students complete the data collection and analysis.

  **Courses: PY18, PY17**

  - **Prerequisites:** PYN031 (Part 2)  
    Credit points: 12  
    Semester: 2  
    Campus: CA

  ► **PYN031-4 Research Thesis (Part 4)**  
  In completing the thesis, students are expected to demonstrate competency in critical and analytic thought, and research-related...
UNIT SYNOPSIS

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

Courses: I20
Campus: KG
Credit points: 12
Semester: 1, 2, 3
PYN610-2 Research Thesis

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

Courses: I20
Campus: KG
Credit points: 12
Semester: 1, 2, 3
PYN610-3 Research Thesis

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

Courses: I20
Campus: KG
Credit points: 12
Semester: 1, 2, 3
PYN610-4 Research Thesis

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

Courses: I20
Campus: KG
Credit points: 12
Semester: 1, 2, 3
PYP101 Assessment Across the Lifespan

Psychology
In order to provide effective approaches to the developmental challenges facing individuals and families at all points along the life course, educational and developmental psychologists need skills for describing, explaining, assessing, intervening and collaborating in the promotion of optimum developmental outcomes. These skills are developed in this unit.

Courses: I20
Contact hours: 3 per week
Campus: CA
Credit points: 12
Semester: 2
PYN610-1 Research Thesis
UNIT SYNOPSIS

► PYP104 Advanced Assessment in Mental Health
Courses: PY25, PY35
Campus: CA, Ext
Credit points: 12 Semester: 2

► PYP105 Mental Health Services Delivery: Developing Partnerships in Recovery
Courses: PY25, PY36
Campus: CA, Ext
Credit points: 12 Semester: 1

► PYP107 Mental Health Promotion, Prevention and Early Intervention
Courses: PY25, PY36
Campus: CA, Ext
Credit points: 12 Semester: 2

► PYP108 Individual Project: Mental Health Applications
Courses: PY25, PY36
Campus: CA, Ext
Credit points: 12 Semester: 2

► PYP401 Introduction to Road Safety
This unit introduces the key principles and practices in road safety. Special emphasis is given to the broad context of road use/transport in society and the economic and social implications of road crashes. It introduces the basics of information retrieval, road crash analysis and interpretation, and the strategic development of road safety countermeasures.
Courses: PY40, PY41
Contact hours: 3 per week
Campus: CA
Credit points: 12 Semester: 1

► PYP402 Traffic Psychology and Behaviour
This unit reviews the wide range of factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. It considers all types of road users, including motor vehicle drivers and passengers, motorcycle riders, cyclists and pedestrians. A range of theoretical models are examined which have been used to explain the behaviour of road users.
Courses: PY40, PY41
Contact hours: 3 per week
Campus: CA
Credit points: 12 Semester: 1

► PYP403 Applying Traffic Psychology
This unit reviews the various strategies and programs designed to modify road user behaviour. Effective and ineffective approaches are compared, in order to identify the key characteristics of successful programs. While this is a stand-alone unit, it builds on many of the theoretical and practical issues covered in PYP402 - Traffic Psychology and Behaviour.
Courses: PY40, PY41
Contact hours: 3 per week
Campus: CA
Credit points: 12 Semester: 1

► PYP404 Road Safety Evaluation Models
This unit introduces the models and methods used to evaluate behaviour change interventions. In particular, it addresses the systematic application of social and behavioural research methodologies to improve the planning, implementation and monitoring of behavioural road safety programs and counter measures.
Courses: PY40, PY41
Contact hours: Block Mode
Campus: CA
Credit points: 12 Semester: 3

► PYP406 Road Safety Theory to Practice
This unit is undertaken in the latter half of both the Graduate Certificate and Graduate Diploma courses and draws together the various themes developed during the program. It is designed to provide students with an opportunity to study and respond to an existing or emerging road safety problem. The student is required to draw on the knowledge and skills they have developed to investigate and recommend solutions to the problem. As far as possible, the unit is designed to reflect the way road safety problems are approached and managed by road safety agencies.
Courses: PY40, PY41
Prerequisites: PYP401
Campus: CA
Credit points: 12 Semester: 2

► PYP407 Independent Study
This unit enables students to undertake an independent study based in their places of work. Individual supervision and objective feedback on the experience is an important component of the learning experience.
Courses: PY40, PY41
Prerequisites: PYP401
Campus: CA, Ext
Credit points: 12 Semester: 1, 2

► PYP501 Introduction to Road Safety
This unit provides an introduction to the key principles and practices in road safety. It lays a foundation for the road safety program: both in terms of subject matter and the skills it promotes. As an introductory unit, special emphasis is given to the broad context of road use/transport in society and the economic and social implications of road crashes. It introduces the basics of information retrieval, road crash analysis and interpretation, and the strategic development of road safety countermeasures.
Courses: PY40, PY41
Campus: Ext
Credit points: 12 Semester: 1, 2

► PYP502 Traffic Psychology and Behaviour
This unit provides a detailed review of the wide range of factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. The review considers all types of road users, including motor vehicle drivers and passengers; motor cycle riders, cyclists and pedestrians. Special emphasis is given to high-risk groups (eg young and older road safety, alcohol-impaired road users, unprotected road users). A range of theoretical models is examined which have been either developed or used to explain the behaviour of road users. An overview is also provided of the different techniques that can be used to study the behaviour of road users.
Courses: PY40, PY41
Campus: Ext
Credit points: 12 Semester: 1, 2, 3

► PYP504 Applying Traffic Psychology
This unit provides a detailed review of the various strategies and programs that have been used in an attempt to modify road user behaviour. An overview is provided of the different criteria and methods commonly used to assess the effectiveness of road user behaviour programs. This facilitates a comparison of effective and ineffective approaches, designed to identify the key characteristics of successful programs. This comparison includes an analysis of relevant theoretical models that have been used to guide the development or implementation of road user safety programs. While all types of road users are considered, special attention is given to high-risk groups, particularly young drivers.
Courses: PY40, PY41
Campus: Ext
Credit points: 12 Semester: 1, 2, 3

► PYP506 Road Safety: Theory to Practice
This unit is undertaken in the latter half of both the Graduate Certificate and Graduate Diploma courses and draws together the various themes developed during the program. It is designed to provide students with an opportunity to study and respond to an existing or emerging road safety problem. Students are required to draw on the knowledge and skills developed to investigate and recommend solutions to the problem. As far as possible, the unit is designed to reflect the way road safety problems are approached and managed by road safety agencies.
Courses: PY40, PY41
Prerequisites: PYP401 or PYP501
Campus: Ext
Credit points: 12 Semester: 1, 2

► QCD110 Communication for Business
This unit focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.
Students: BS40, IF06, QC03
Contact hours: 4 per week
Campus: KG
Credit points: 12

► QCD111 Communication 1
This unit focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.
Courses: QC03, BS65, BS93, PB98, GS43, GS45, GS48, IF96
Contact hours: 4 per week
Campus: KG
Credit points: 12

► QCD120 Communication for Information Technology
This unit focuses on the macro-skills of listening, reading, writing and speaking; establishes techniques for extending vocabulary; uses spoken and written texts of an academic nature to summarise, analyse, make inferences and recognise key concepts; incorporates strategies for effective group participation in a cross-cultural context; helps students learn techniques for writing successfully in genres appropriate to their field of study.

QUT HANDBOOK 2006 • PAGE 786
UNIT SYNOPSES

Courses: IT10
Contact hours: 4 per week
Campus: KG Credit points: 12
► QCD210 Communication for Business 2
This unit further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient essay writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed in support of business subjects. Communication for Business 2 language learning tasks are parallel with content material from these units.
Courses: BS40, IF06, QC03
Prerequisites: QCD110 or IELTS 6.5 or approved equivalent.
Contact hours: 4 per week
Campus: KG Credit points: 12
► QCD211 Communication 2
This unit further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient academic writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed.
Courses: QC03, BS65, BS93, GS43, GS55, GS65, IP6 Credit points: 12
Contact hours: 4 per week
Campus: KG Credit points: 12
► QCD220 Communication for Information Technology 2
This unit further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient essay writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed in support of technology subjects. Communication for Information Technology 2 language learning tasks are parallel with content material from these units.
Courses: IT10
Prerequisites: QCD120 or IELTS 6.5 or approved equivalent.
Contact hours: 4 per week
Campus: KG Credit points: 12
► QCE001-1 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-2 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-3 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-4 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-5 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-6 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-7 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-8 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE001-9 General English
While specific content varies according to level, broadly the unit consists of English language structures and systems; grammar; vocabulary; integrated language skills development; cultural studies, computer based learning; independent learning skills.
Courses: QC20, QC21
Contact hours: 25
Campus: KG Credit points: 20
► QCE002 English for Tertiary Preparation Studies
This ETP course helps international students to improve their academic language skills in order to be successful in their chosen program. The course is designed to prepare students for independent study and to familiarise them with an Australian academic setting in terms of study techniques and student/lecturer relations and expectations.
Courses: QC22
Contact hours: 25 hours
Campus: KG Credit points: 8
► QCE007 Cambridge First Certificate in English
This unit focuses on speaking, listening, reading and writing skills and use of English. It also pays particular attention to First Certificate English examination strategies and skills.
Courses: QC25
Contact hours: 25 per week
Campus: KG Credit points: 48
► QCF111 Tertiary Preparation Studies
1
This unit introduces students to the study and learning skills required in an Australian university while gaining an understanding of the Australian culture and society. It includes the following topics: Australia’s indigenous people; a brief review of Australian history; the family and multiculturalism; using the computer to gather information and communicate in an academic environment; assignment presentation, study skills and examination techniques.
Courses: QC02, QC04
Contact hours: 5 per week
Campus: KG Credit points: 12
► QCF112 Communication 1
This unit is designed to help students communicate successfully in a variety of situa-
tions. This includes the fundamentals of oral and written communication set within the context of a number of academic situations. This will include effective listening skills, knowledge of how to conduct a seminar, the gathering of information from a variety of sources and its organisation for specific purposes, the various writing genres and the correct use of conventions in the English language.

Courses: QCO2, QCO4
Contact hours: 6 per week
Campus: KG  
Credit points: 12

► QCFF15 Foundation English
This unit is designed to continue the development of reading, writing, speaking and listening skills in English to prepare students for further studies in Foundation Communications. A variety of everyday English literature and real-life situations will be incorporated, with the emphasis being on active participation by students, as individuals and as group members. Such activities will provide students with the skills to explore and use the English language in different contexts. Basic computing skills for word processing and the use of QUT computing services will also be developed.

Courses: QCO2, QCO4
Contact hours: 5 per week
Campus: KG  
Credit points: 12

► QCFF120 Accounting 1
This unit introduces the essential concepts of debit and credit; processing of financial transactions via journals and ledgers through to trial balance for a sole-trading enterprise (including GST); end of accounting period adjustments and final reports (specifically preparation of Income Statement and Balance Sheet) and accounting controls over cash.

Courses: QCO2, QCO4
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF121 Economics 1
This unit introduces students to major economic issues; the basics of economic literacy necessary for future tertiary studies; a working knowledge of the global economy; an understanding of economic problems with particular reference to Australia; the main economic systems; the purpose of a five-sector model and the functions and characteristics of each sector.

Courses: QCO2, QCO4
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF122 Organisations And Management
This unit is designed to develop understanding of the significant role that organisations play in many facets of our lives, how organisations function and what is involved in working in organisations. The emphasis is on skills that are needed at all levels and in all areas of an organisation. You will develop a range of skills that are required by the individual to function effectively in teams and in an organisation.

Courses: QCO1, QCO2, QCO4
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF153 Physical Sciences 1
This unit introduces students to scientific study and research processes and the basic principles underlying physics and chemistry; heat and temperature; geometric properties of light; reflection and refraction; diffraction and interference; introduction to electricity and magnetism; the atom; chemical periodicity; chemical names and formulas; chemical bonding; chemical quantities; chemical reactions; stoichiometry; thermochrometry; the behaviour of gases; water and aqueous systems; properties of solutions.

Courses: QCO2, QCO4
Contact hours: 5 per week
Campus: KG  
Credit points: 12

► QCFF156 Mathematics A1
This unit focuses on basic rules of arithmetic; ratio, percentages and proportion; introduction to statistics; averages and interpretation of graphs; dispersion and graphical display; probability; arrangements and combinations; basic measurement, area and volume; spending money; borrowing money and investment.

Courses: QCO2, QCO4
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF200 Introduction to Creativity
In this unit students will be introduced to theories of creativity and will investigate the nature of creative culture and practice. The unit will provide students with opportunities to analyse creative applications, ideas and concepts in a range of industries.

Courses: QCO1, QCO2, QCO4
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF201 Applied Psychology
This unit is an introduction to the field of psychology. Some of the key fundamental theories in psychology, applied research and findings and application techniques are used to provide insight into how human behaviour is observed, managed and changed. Emphasis is on skills that are needed by psychologists to function effectively. An intercultural and cross cultural perspective is pursued throughout the unit, thus enabling students to discover the behavioural similarities and differences that occur around the world.

Courses: QCO1, QCO2, QCO4
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF211 Tertiary Preparation Studies 2
This unit further develops the skills initiated in Tertiary Preparation Studies 1: Australian government law; foreign policy and trade; preparation and presentation of both oral and written material.

Courses: QCO1, QCO2, QCO4
Prerequisites: QCFF11 or equivalent studies
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF211 Communication 2
Further explores vocabulary and grammar and generic structure to develop skills of speaking and writing in context of Field, Tenor and Mode. Effective speaking skills are developed according to academic presentation requirements. Skills for coherent and well-structured writing are also extended to enable efficient academic writing and the refinement of exam techniques. Language and structure appropriate to commercial, technical and academic communication are developed.

Courses: QCO3, BS65, BS93, BS98, GS43, GS45, GS48, IF66
Contact hours: 4 per week
Campus: KG  
Credit points: 12

► QCFF212 Communication 2
This unit promotes clear and concise writing in particular genres (essays, assignments and reports) pertinent to undergraduate study; mastery of basic primary and secondary research skills related to assignment tasks; effective oral communication in seminar presentations and tutorial discussion; effective listening in lecture situations and answering exam questions with an awareness of academic and professional management.

Courses: QCO1, QCO2, QCO4
Prerequisites: QCFF112 or equivalent studies
Contact hours: 5 per week
Campus: KG  
Credit points: 12

► QCFF220 Accounting 2
This unit examines various accounting sub-systems such as: 10-column worksheets; control accounts and subsidiary ledgers; inventory and fixed asset systems; accounting for credit transactions; budgeting; and financial analysis techniques useful for management.

Courses: QCO1, QCO2, QCO4
Prerequisites: QCFF120 or equivalent studies
Contact hours: 5 per week
Campus: KG  
Credit points: 12

► QCFF221 Economics 2
This unit introduces students to the study of macroeconomics. Topics include the five-sector model, the trade cycle, inflation and unemployment, government policy, and the external sector.

Courses: QCO1, QCO2, QCO4
Prerequisites: QCFF121 or equivalent studies
Contact hours: 5 per week
Campus: KG  
Credit points: 12

► QCFF230 Information Processing
This unit introduces students to a range of problem-solving techniques and shows how these can be used to solve various problems using an object-oriented programming language; the foundation of relational databases in terms of storing, altering and retrieving information, using SQL for its implementation; a basis for the specification and implementation of information systems using relational algebra.

Courses: QCO1, QCO2, QCO4
Contact hours: 5 per week
Campus: KG  
Credit points: 12

► QCFF240 Legal Studies
This unit introduces students to the Australian legal system through an examination of the meaning of law, the role of the courts and parliament, the importance of judicial precedent and alternative methods of dis-
UNIT SYNOPSES

pulate settlement; the fundamental elements of the law of torts including negligence, defamation, nuisance, assault and battery and trespass to land; the law of contract including the formation of a contract, the factors that may affect the validity of a contract and the circumstances leading to the discharge of a contract; and an exploration of the theoretical basis of criminal law and an investigation of its operation in practice
Courses: QC01, QC02, QC04
Contact hours: 4 per week
Campus: KG
Credit points: 12

► QCQ252 Life Science
This unit examines the themes of life, macromolecules, metabolism, cell structure, cell processes, biological diversity, plant and animal physiology. The unit emphasises practical skills both in the laboratory and in the field.
Courses: QC01, QC02, QC04
Prerequisites: QCQ153 or equivalent studies
Contact hours: 5 per week
Campus: KG
Credit points: 12

► QCQ254 Physics
This unit introduces students to mechanics, sound, light, electricity; magnetism; electronics and lasers. Relevance to real world activities is stressed by discussing the various applications of concepts learned.
Courses: QC01, QC02, QC04
Prerequisites: Physical Sciences 1
Contact hours: 5
Campus: KG
Credit points: 12

► QCQ256 Chemistry
This unit prepares students for tertiary study in the applied sciences and provides a solid foundation in basic chemistry and experimental techniques; elements, atoms and ions, modern atomic theory; chemical bonding; inorganic compounds; chemical reactions and energy; water and solutions; gases; acids and bases; oxidation-reduction reactions and electrolytrochemistry; reaction rates and chemical equilibrium and introductory organochemistry.
Courses: QC01, QC02, QC04
Prerequisites: Physical Sciences 1
Contact hours: 5
Campus: KG
Credit points: 12

► QCQ256 Mathematics A2
This unit focuses on basic algebra; introduction to trigonometry; normal distribution; hypothesis testing; contingency tables; regression analysis; binomial distribution; inferential statistics; earning money; interest; annuities and t-Distribution.
Courses: QC01, QC02, QC04
Prerequisites: QCQ156 or equivalent studies
Contact hours: 5 per week
Campus: KG
Credit points: 12

► QCQ257 Mathematics B2
This unit focuses on rate of change; the derivative; stationary points; curve sketching; optimisation; integration; probability distribution; the binomial distribution; normal distribution; hypothesis testing; dispersion, graphical display.
Courses: QC01, QC02, QC04
Prerequisites: QCQ157 or equivalent studies
Contact hours: 5 per week
Campus: KG
Credit points: 12

► QCQ260 Professional Studies
In this unit, students investigate the nature of problem solving within creative structures and frameworks. Students work in a team environment using critical thinking and problem-solving frameworks to inform the development of a product or outcome. The unit provides students with individual and group problem-solving models, lateral thinking strategies and group work skills.
Courses: QC01, QC02, QC04
Contact hours: 4 per week
Campus: KG
Credit points: 12

► QCQ230 Computing
Designed to give international students the computing ability to function in tertiary study. It is a year when students undertake an industry placement applying the theory and practical skills they have learnt into real world situations. The Faculty assists students to obtain suitable employment for a 10-12 month industry placement. The cooperative education employers, in consultation with the Faculty, develop detailed position descriptions for each placement. Students continue to be enrolled in their degree programs during the cooperative education placement. The student is assessed on the basis of a report, together with reports from the student's workplace.
Courses: SC01, MA54, SC40
Campus: GP
Semester: 1, 2

► SCB100-1 Cooperative Education
The cooperative education program is a joint venture between employers and the Faculty to better prepare students for employment upon graduation. It is a year when students undertake an industry placement applying the theory and practical skills they have learnt into real world situations. The Faculty assists students to obtain suitable employment for a 10-12 month industry placement. The cooperative education employers, in consultation with the Faculty, develop detailed position descriptions for each placement. Students continue to be enrolled in their degree programs during the cooperative education placement. The student is assessed on the basis of a report, together with reports from the student's workplace.
Courses: SC01, MA54, SC40
Campus: GP
Semester: 1, 2

► SCB100-2 Cooperative Education
The cooperative education program is a joint venture between employers and the Faculty to better prepare students for employment upon graduation. It is a year when students undertake an industry placement applying the theory and practical skills they have learnt into real world situations. The Faculty assists students to obtain suitable employment for a 10-12 month industry placement. The cooperative education employers, in consultation with the Faculty, develop detailed position descriptions for each placement. Students continue to be enrolled in their degree programs during the cooperative education placement. The student is assessed on the basis of a report, together with reports from the student's workplace.
Courses: SC01, MA54, SC40
Campus: GP
Semester: 1, 2

► SCQ208 Introduction to Pharmacy Practice
This introductory unit will provide an overview of the activities of a community pharmacy, including the processing of prescriptions, complementary medicine products and other front of shop merchandise. Topics cover foundation practical knowledge and skills (needed for professional placements in later units) together with retailing skills such as merchandising, stock control and computerised point of sale systems.
Courses: SC45
Prerequisites: PYB007
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 2

► SCB222 Exploration of the Universe
This unit provides an introduction to optical observational astronomy; instrumentation; celestial sphere and astronomical coordinates; observations of constellations, stars, planets, clusters and other interesting celestial objects. The theory includes: optics of telescopes; properties of light; determination of physical properties of stars; nebulae; stellar spectra; classification; historical models of the solar system; Kepler's law; gravitation; physical geology of the planets and formation of the solar system; phenomena of astronomical origin; brief introduction to stars and galaxies. This course includes practical exercises and field trips.
Courses: ED50, IF71, SC01
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 2

► SCB301 Science for Dean's Scholars
Relating content of this unit is offered through a series of approximately six modules, of which students are required to complete three. The range of modules, together with the selection required, ensures that students have a broad foundation for advanced study. The modules offered include Life Sciences, Chemistry, Physics, Mathematics, Statistics and Environmental Science.
Courses: SC01 + SC60 (Dean's Scholars Accelerated Honours Program)
Contact hours: 20 per week (for five weeks)
Campus: GP
Credit points: 24
Semester: 3

► SCB303 Tutorial Program for Dean's Scholars
The content of this unit is designed in a consultative process involving the student, the academic mentor, and the Dean. The unit aims to allow the study of topics and concepts in science that will support the student's progress in initial studies in advanced level units.
Courses: SC01 + SC60 (Dean's Scholars Accelerated Honours Program)
Prerequisites: SCB301
Credit points: 12
Semester: 1

► SCB308 Pharmacy Practice 1
A principle role of pharmacists is to dispense and provide advice on the use of large range over the counter (OTC) medications. This unit will provide knowledge on the therapeuti c use and regulatory requirements of OTC medications and reinforce the communication skills that are necessary to effectively counsel patients on their proper use and the possible incidence and presentation of adverse effects. An introduction to nutrition and diet will also be provided by the Health Faculty. Experiential placements will also commence during this unit. Additionally, this unit will facilitate the mastery in the proper use of a wide range of basic pharmaceutical calculations which are imperative for the correct determination and validation of prescribed doses of drugs.
Courses: SC45
Prerequisites: SCB208

QUT HANDBOOK 2006 • PAGE 789
SCB338 Pharmaceutical Chemistry and Pharmacology

This unit is designed to extend the knowledge of the physicochemical properties of drugs and how they relate to pharmacokinetic factors which determine the behaviour of drugs following administration. This unit will develop an understanding of how the chemical properties of drugs relate to absorption, distribution metabolism and excretion. This knowledge is essential in understanding the dosing regimen for drugs and their pharmacokinetic parameters in individual patients. Additionally, generic formulations and product substitution will be explored on the basis of the TGA bioequivalence requirements for the products and provide the students to counsel patients on the suitability of generic brands of pharmaceutical formulations.

Courses: SC45
Prerequisites: SCB338
Contact hours: 5 per week
Credit points: 12
Semester: 2

SCB438 Medicinal Chemistry and Pharmacology

A detailed knowledge of medicinal chemistry and pharmacology is essential for the understanding of actions of drugs with endogenous molecular targets. This unit continues to develop the basic principles developed in SCB338 and examines the concept of structure activity relationships (SARs) which demonstrates the linkage between the chemical structure of drugs and their biological activity and selectivity. The medicinal chemistry of a number of major drug classes are examined in detail, including adrenergic, cholinergic, serotonergic and antihypertensive drugs. This unit also provides an extension of this knowledge in pharmacology and focuses on the drug classes that act on the cardiovascular, respiratory, eye, renal, gastrointestinal systems.

Courses: SC45
Prerequisites: SCB338
Contact hours: 5 per week
Credit points: 12
Semester: 2

SCB501-1 Research Project for Dean’s Scholars

This unit integrates a basic understanding and application of learning theory as it applies to exceptional populations. It focuses on approaches to teaching particular exceptional groups and provides an opportunity for development of specialist skills and resources in one of the following areas: (a) students with learning difficulties; (b) gifted students; (c) students with low incidence disabilities, for example hearing impaired, visually impaired or physically handicapped; (d) behaviourally or emotionally disturbed students.

Courses: ED26, ED54, ED55, ED90, ED91, ED92, ED92, ED82.
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

SCB401 Research Methods for Dean’s Scholars

This unit includes a literature review, experimental design, research proposal formulation and writing, and presentation of a research proposal.

Courses: SC01 + SC06 (Dean’s Scholars Accelerated Honours Program)
Prerequisites: SCB301
Campus: GP
Credit points: 12
Semester: 1, 2

SCB408 Pharmacy Practice 2

This unit extends the students knowledge of pharmacy practice in the areas of dispensing and counselling of both OTC and scheduled drugs used in the treatment of cardiovascular, respiratory, renal and GI Tract complaints. Students will be introduced to concepts such as non-compliance of patients, problem identification and effective strategies to overcome these obstacles to health management through patient communication. Practical experience will be gained by the students via experimental placements in a community pharmacy environment. Additionally, this unit will extend the students mastery of the proper use of a wide range of advanced pharmaceutical calculations.

Courses: SC45
Prerequisites: SCB308
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 2

SCB428 Pharmacokinetics

This unit is designed to extend the knowledge of physiochemical properties of drugs and how they relate to pharmacokinetic factors which determine the behaviour of drugs following administration. This unit will develop an understanding of how the chemical properties of drugs relate to absorption, distribution metabolism and excretion. This knowledge is essential in understanding the dosing regimen for drugs and their pharmacokinetic parameters in individual patients. Additionally, generic formulations and product substitution will be explored on the basis of the TGA bioequivalence requirements for the products and provide the students to counsel patients on the suitability of generic brands of pharmaceutical formulations.

Courses: SC45
Prerequisites: SCB338
Contact hours: 5 per week
Campus: GP
Credit points: 12
Semester: 2

SCB438 Medicinal Chemistry and Pharmacology

A detailed knowledge of medicinal chemistry and pharmacology is essential for the understanding of actions of drugs with endogenous molecular targets. This unit continues to develop the basic principles developed in SCB338 and examines the concept of structure activity relationships (SARs) which demonstrates the linkage between the chemical structure of drugs and their biological activity and selectivity. The medicinal chemistry of a number of major drug classes are examined in detail, including adrenergic, cholinergic, serotonergic and antihypertensive drugs. This unit also provides an extension of this knowledge in pharmacology and focuses on the drug classes that act on the cardiovascular, respiratory, eye, renal, gastrointestinal systems.

Courses: SC45
Prerequisites: SCB338
Contact hours: 5 per week
Credit points: 12
Semester: 2

SCB501-1 Research Project for Dean’s Scholars

This unit integrates a basic understanding and application of learning theory as it applies to exceptional populations. It focuses on approaches to teaching particular exceptional groups and provides an opportunity for development of specialist skills and resources in one of the following areas: (a) students with learning difficulties; (b) gifted students; (c) students with low incidence disabilities, for example hearing impaired, visually impaired or physically handicapped; (d) behaviourally or emotionally disturbed students.

Courses: ED26, ED54, ED55, ED90, ED91, ED92, ED82.
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

SCB006 Educational Counseling

This unit includes the following: the nature of counseling/helping in educational contexts; the educator as counselor; characteristics of effective helpers; practical development of communications skills; building an empathic relationship; structuring the counseling process; application of some counseling theories to the educational contexts; practical sessions using educationally based role plays to demonstrate effective use of the skills learned. The unit includes a compulsory study school for external students. It is incompatible with studies in Counselling or equivalent at Diploma of Teaching level.

Courses: ED13, ED26, ED54, ED55, ED61, ED47, ED90, ED91, ED82, ED92, IX01/06/09
Contact hours: 3 per week
Credit points: 12
Semester: 1, 2

SPB007 Human Sexuality and Learning

This unit addresses key topics in sexual behaviour and learning: heterosexual and homosexual sexuality; the life span; contraception; abortion; STDs; child sexual abuse; sexual assault; pornography. It considers the implications for school, community, and healthcare workers and educators, with emphasis on the former.

Courses: ED90, ED91, ED92, ED82, IX01-IX09, ED26, ED55
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12
Semester: 1, 2
UNIT SYNOPSES

► SPB008 The Middle Years of Schooling
This unit provides an understanding of the developmental needs and interests of young adolescents and reform initiatives being implemented by schools to address these issues. The unit analyses the work of agencies and major reports in the middle years of schooling and examines aspects of research focussing on reform in curriculum, pedagogy and the way schools are organised. The unit is one of four units forming a pathway into the middle years of schooling for primary and secondary teaching.
Courses: ED90, ED91, ED92, ED82, ED55
Contact hours: 3 per week
Campus: KG, CB
Credit points: 12 Semester: 2

► SPB010 Education, Law and the Beginning Teacher
This unit includes the following: legal literacy; sources of education law; students and rights; students, law and schools; parents, law and education; teachers' rights and obligations; teachers and school-based accidents/educational malpractice.
Courses: ED26, ED54, ED55, ED90, ED91, ED92, ED82
Contact hours: 3 per week
Campus: KG
Credit points: 12 Semester: 1, 2

► SPB012 Classroom and Behaviour Management
This unit integrates concepts of behaviour development, management and discipline within a defensible pattern of classroom management and appropriate curricula processes.
Courses: ED38, ED26, ED47, ED54, ED55, ED91, ED90, ED91, ED92, ED82
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1, 2

► SPB018 Teaching Strategies
This unit includes: evaluation of the students' teaching strategies; the literature on teaching strategies; critical evaluation of strategies available in the field.
Courses: ED26, ED54, ED55, ED47, ED90, ED91, ED92, ED82
Contact hours: 3 per week
Campus: KG
Credit points: 12 Semester: 1, 2

► SPB020 Classroom Assessment Practices
This unit includes: examination of the nature and purpose of assessment; traditional and contemporary developments in the assessment of students in a range of settings; test construction and validation; record keeping and reporting; with emphasis on practical applications by practising teachers.
Courses: ED26, ED38, ED54, ED55, ED90, ED91, ED92, ED82
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1, 2

► SPB022 The Middle Years Curriculum
This unit enables students to gain an appreciation of the middle school movement and how this has the potential to impact on the needs and interests of young adolescents. The focus is on a more integrated approach to curriculum, teaching strategies appropriate to middle schools and authentic assessment.
Courses: ED26, ED55, ED90, ED91, ED92, ED82
Contact hours: 3 per week
Campus: KG, CB
Credit points: 12 Semester: 2

► SPB025 The Individual in Adult and Workplace Education
This unit involves tailoring instruction to the needs and strengths of individuals and acquiring confidence in planning, organising and implementing learning experiences. The focus ranges from setting up initial meetings to creating responsive positive learning environments and evaluating outcomes in terms of individual learners.
Courses: ED54
Campus: Ext
Credit points: 12 Semester: 2

► SPB030 Programming in Adult and Workplace Education
This unit addresses important aspects of responsive programming for adult and workplace education. It covers the planning implementation, evaluation and reflection components of program development, design and delivery.
Courses: ED54
Prerequisites: SPB029
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPB034 Organisation and Administration of Adult and Workplace Education
Adult and workplace educators are responsible for the effective planning, organisation and management of a broad spectrum of training modules, courses and programs. This unit assists the adult and workplace educator to explore, analyse and apply strategic planning and HRM processes within diverse organisational contexts. Emphasis is placed on an understanding of the concepts and theories associated with enhancing learning at work, and human resource management, in order to guide effective practice.
Courses: ED54
Prerequisites: SPB026, CLB304
Contact hours: 3 per week
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPB035 Primary Curriculum and Pedagogies: Integrated Primary and Middle Years Curriculum Project
This unit focuses on pedagogies, planning and assessment within the curriculum organisers of the New Basics, and the curriculum guidelines in the key learning areas. It aims to increase students' knowledge and understanding of how curriculum organisers and outcomes can be used to plan intellectually challenging curricula for young children.
Courses: ED91
Campus: KG
Credit points: 12 Semester: 1

► SPB036 Primary Curriculum and Pedagogies: Assessment and Reporting
Monitoring individual development and designing appropriate intervention programs/units to meet individual needs is the work of all teachers. Thus, the unit provides opportunities for the educator to devise ways to monitor student development and to engage with current international, national and state developments that require systemic evaluation of all key learning areas.
Courses: ED91
Campus: KG
Credit points: 12 Semester: 1

► SPB037 Comparative Curriculum Study
Students in this unit will consider varying conceptions to curriculum as a framework from which they can understand their own and others' education systems. In particular they will be able to examine curriculum and contexts in Malaysia and Australia.
Courses: ED47
Campus: KG
Credit points: 12 Semester: 2

► SPB100 Introduction to Adult Learning and Development
This unit explores seminal learning theories and the emerging differentiation of these theories to explain adult learning experiences in diverse and challenging organisational and community contexts.
Courses: ED26, ED84
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPB101 Getting to Know Great Thinkers in Adult Education
This unit introduces students to the broad field that constitutes adult education and the diversity of provision that is available to adults. In order to be effective in adult education roles, it is necessary to have a clear understanding of the nature and foundations of education, specifically as it relates to adult education.
Courses: ED26, ED84
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPB102 Professional Communication in Adult Learning Contexts
This unit introduces students to principles and concepts of professional communication, discourse and information literacy. It builds on students' existing skills and understandings of these areas and enhances these skills through a range of practical individual and/or small group tasks.
Courses: ED84
Corequisites: EDB101
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPB103 Program Design, Assessment, Reporting and Evaluation
After completing this unit, students should be able to design appropriate learning experiences and assessment to maximise the learning of adults, taking into consideration the multitude of demands on the learners and other stakeholders. Students should also be able to design appropriate evaluation processes.
Courses: ED84
Campus: KG, Ext
Credit points: 12 Semester: 2

► SPB104 Practitioner Research and Inquiry
After completing this unit, students will be able to conduct basic quantitative and qualitative research methods, justify the selection of appropriate methodologies and relate these methodologies to needs analysis.
Courses: ED84
Campus: KG
Credit points: 12 Semester: 2

► SPB105 Politics of Diversity and Identity
In this unit students have an opportunity to learn about social and educational policy drivers nationally and internationally and their impact on diverse learners. Gender implications are also considered.
Courses: ED84
Campus: KG
Credit points: 12 Semester: 1
UNIT SYNOPSISES

► SPB106 Managing Learning Organisations
In this unit, students examine an educational entity and define its strategic orientation and describe how this orientation affects its planning, structure and leadership as well as its control mechanisms.

Courses: ED84
Prerequisites: SPB103, SPB104
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPB107 Knowledge Management and Learning Partnerships
Using systems theory as a base model, students examine how the legitimate and shadow systems of an organisation or community manages knowledge and identifies the creative processes needed to assist the organisation or community in far-from-certainty external environments.

Courses: ED84
Prerequisites: SPB105, SPB106
Campus: KG, Ext
Credit points: 12 Semester: 2

► SPB108 Career Development and Professional Futures
Career planning for all workers, including adult learning professionals, is now a lifelong task rather than a matter of a good initial choice. This capstone unit prepares graduates to track where the next opportunities may arise, for themselves and for the clients with whom they work, and to prepare for these opportunities through continual learning.

Courses: ED84
Prerequisites: EDB103
Corequisites: EDB104
Campus: KG, Ext
Credit points: 12 Semester: 2

► SPN610 Advanced Educational Counselling
This unit provides students with an overview of major theories of counselling and to assist them in the development of a framework using one of these approaches that they may use as a basis for their counselling.

Courses: ED09, ED13, ED11, ED61
Prerequisites: SPB006
Campus: KG
Credit points: 12 Semester: 2

► SPN611 Educational Counselling Professional Practice
This unit looks at: professional practices of educational counselors working in the P-12 context; intervention, prevention, affective, and developmental programs; adolescent issues and career counselling; consultation models, theories and practices; self-management skills, time management, program evaluation, accountability and decision-making discussed.

Courses: ED09, ED13, ED11, ED61
Campus: KG
Credit points: 12 Semester: 2

► SPN612 Psychoeducational Assessment
In this unit students gain a broad understanding of the various types of assessment techniques and strategies used in the educational context to develop understandings and capacities that advance learners from basic competence in professional practice to confident and ethical leadership in learning innovation in school guidance and counselling.

Courses: ED13, ED11, ED28, ED09
Campus: KG
Credit points: 12 Semester: 1

► SPN613 Learners with Special Needs: Programming for Inclusive Education
Teachers learn to understand the development and learning performance of students with special needs from a functional perspective. Particular attention is paid to understanding the nature of learning, to diagnosing cognitive and affective coping and problem solving strategies and to harnessing students’ desire to learn.

Courses: ED09, ED13, ED11
Campus: Ext
Credit points: 12 Semester: 1

► SPN614 Teaching Students with Learning Difficulties/Disabilities
Teachers should view students as individuals who require different kinds of support and not as educational failures. Competing models for explaining the aetiology and characteristics of learning literacy difficulties are evaluated and their educational implications explored. Students who experience difficulties must be given support especially in key areas such as literacy development. Governments are encouraged to offer support on the grounds of equity for individuals as well as the long term economic benefits to the community.

Courses: ED09, ED13, ED11
Campus: KG, Ext
Credit points: 12 Semester: 2

► SPN615 Managing Learners with Disabilities and Challenging Behaviours in the Classroom
This unit provides theoretical and practical knowledge for regular and special educators working in the area of behaviour management in schools. Preventative behaviour management practices are addressed for the school and classroom and more specialised skills and strategies that may be utilised with challenging behaviour are examined.

Courses: ED09, ED13, ED61
Campus: KG, Ext
Credit points: 12 Semester: 2

► SPN616 Innovations in Programs and Planning for Behaviour Management
This unit develops the ability to take the initiative to embrace innovation and to manage change productively as leaders in education and learning by implementing programs for learners and fellow professionals.

Courses: ED09, ED13, ED61, ED11
Prerequisites: SPN617
Campus: Ext
Credit points: 12 Semester: 2

► SPN617 Foundations of Behaviour and Classroom Management
This unit develops critical knowledge and skills so teachers can show leadership in constructing innovative and comprehensive ways to develop appropriate conduct and manage problematic behaviour in their professional environment.

Courses: ED09, ED11, ED13, ED61
Contact hours: 3 per week
Campus: Ext
Credit points: 12 Semester: 1

► SPN618 Innovative Career Development Program
This unit encourages learners to engage in lifelong learning and within the context of career development practice, lead innovations in the delivery of career development programs to a wide range of audience throughout the community.

Courses: ED09, ED13, ED11, ED61
Campus: Ext
Credit points: 12 Semester: 1

► SPN619 Constructing Career Theory
This unit provides students with an overall view of extant theories of career development. Major theories which have a significant impact on empirical and practical work are covered. Less well developed emerging theories are also covered. Students are encouraged to understand the relevance of theory to their own practice.

Courses: ED09, ED13, ED61
Campus: Ext
Credit points: 12 Semester: 2

► SPN620 Career Counselling
This unit encourages learners to critically evaluate the perspectives to formulate a personal position with respect to their career counselling practice. Students have the opportunity to gain experience in the application of traditional and emerging career counselling processes, and to contribute to innovation in supporting the role of career counselling in a new career guidance context of career self-management.

Courses: ED09, ED13, ED61
Prerequisites: SPB006 OR SPN610
Campus: KG
Credit points: 12 Semester: 2

► SPN622 Preventive Legal Risk Management in Learning contexts
This unit provides students with a level of legal literacy sufficient to implement and practice sound preventive legal risk management strategies.

Courses: ED09, ED61, ED13, ED11
Campus: Ext
Credit points: 12

► SPN624 Adult and Professional Learning
The focus of this unit is on how theories can be used to interpret and explain concepts such as knowledge construction skills, acquisition, transferability/adaptability of knowledge and skills, effects of prior knowledge, higher order problem finding and solving skills, the development of the self, and individual beliefs and values.

Courses: ED09, ED13, ED11, ED61
Contact hours: 3 per week
Campus: Ext
Credit points: 12 Semester: 1

► SPN625 Changing Agendas in Leadership
The overall aim of this unit is to enhance the leadership understanding and capabilities for both current leaders and those aspiring to such positions in organisations today and in the future. This aim is set in a broader understanding of notions of shared and multiple leadership concepts.

Courses: ED09, ED13, ED11, ED61
Campus: KG, Ext
Credit points: 12 Semester: 1

► SPN626 Leading and Managing People
This unit enhances the understandings and capabilities of leaders and aspiring leaders to manage their organisation's human resources in rapidly changing and challenging contexts.

Courses: ED09, ED13, ED11, ED61
Incompatible with: PRN630, PRN631, PRN632

Q U T H A N D B O O K  2 0 0 6  •  P A G E  7 9 2
UNIT SYNOPTES

Campus: KG, Ext
Credit points: 12  Semester: 2
► SPN627 Policy Development and Analysis
This unit develops students' critical understanding about the policy process - policy development, implementation, effectiveness and evaluation.
Courses: ED09, ED13, ED11, ED61
Campus: Ext
Credit points: 12  Semester: 2
► SPN628 Leadership For Change
The overall aims are for students to better understand change in organisations and to be able to apply these understandings in their own organisational contexts.
Courses: ED09, ED13, ED11, ED61
Campus: Ext
Credit points: 12  Semester: 1
► SPN629 Current Issues In Leadership
The aim of this unit is to enhance the understandings of leaders and aspiring leaders regarding some of the current and emerging leadership and organisational agendas.
Courses: ED09, ED13, ED11, ED61
Campus: Ext
Credit points: 12  Semester: 1
► SPN633 Critical Frameworks For Analysing The Middle Years of Schooling
This unit provides teachers with an opportunity to develop innovative approaches to their work by enabling them to analyse their context through a range of critical frameworks, design appropriate and effective learning programs that address that context and develop approaches to leadership that enable their ideas to extend beyond their own context.
Courses: ED09, ED61, ED13
Contact hours: 3 per week  Campus: Ext
Credit points: 12  Semester: 1
► SPN634 Rethinking Programs and Pedagogies: The Middle Years Of Schooling
The aim of this unit is to provide teachers with an opportunity to develop innovative curriculum and pedagogy that are relevant to middle school contexts. It enables them to build understanding of a research approach and blend this with their own personal experiences.
Courses: ED09, ED61, ED13
Campus: Ext
Credit points: 12  Semester: 1
► SPN635 Assessment and Reporting in the Middle Years of Schooling
This unit aims to develop educators and create new understandings about assessment and reporting in a manner that enables them to design innovative approaches for their own contexts. It aims to develop confidence in educators so that they can engage in this work, and also develop leadership capacities with regard to assessment and reporting to that they can lead whole school initiatives in the area.
Courses: ED09, ED61, ED13
Campus: Ext
Credit points: 12  Semester: 2
► SPN637 Managing Knowledge in Learning Organisations
The aim of this unit is to give students a basic model so that they can analyse the knowledge assets of an organisation and understand the processes used by organisations to manage knowledge assets.
Courses: ED09, ED61, ED13
Campus: Ext
Credit points: 12  Semester: 1
► SPN638 Educational Law
Educational institutions are being increasingly confronted by areas of law to such an extent that their policies and practices are now being driven by legal imperatives. Consequently, educators require a level of legal literacy sufficient to manage the many legal problems that arise in educational settings.
Courses: ED09, ED61, ED13
Prerequisites: SPN622
Credit points: 12  Semester: 1
► SPN640 Developmental and Educational Assessment
This unit provides students with an opportunity for foundation study of principles and methods for assessing individual development and personal characteristics. Underlying this unit is the assumption that the purpose of assessment is to collect information that will be used to design interventions.
Courses: IX20, KG
Credit points: 12  Semester: 1
► SPN641 Interventions in Educational and Developmental Psychology
This unit aims to equip students with a range of applied strategies for evidence-based prevention and intervention within educational and developmental contexts. Practical skills need to be founded on a deep conceptual understanding of the links between assessment and intervention.
Courses: IX20
Prerequisites: SPN640
Credit points: 12  Semester: 2
► SPN642 Learning Difficulties: Assessment and Intervention
This unit aims to equip students with a sound knowledge of learning processes, and methods for assessing individuals with learning difficulties. It also introduces students to a variety of appropriate interventions for individuals with learning difficulties and associated impairments.
Courses: IX20
Credit points: 12  Semester: 1
► SPN643 Developmental Processes and Disability
This unit aims to equip students with a sound framework on which to base their professional practice. Working effectively with individuals with a range of disabilities, their families, schools and communities requires knowledge about the ways in which development may be compromised by disability, and the ways in which contextual influences contribute to developmental outcomes.
Courses: IX20
Credit points: 12  Semester: 1
► SPP502 Programming For Students With Learning Difficulties/disabilities
This unit provides a review of the research on the impact of learning difficulties/disabilities on learning and in particular on learning literacy. The learning and literacy demands of the curriculum are reviewed and appropriate methods for programming for students with special learning needs are addressed. Key issues considered are consultation and collaboration between regular and support teachers.
Courses: ED08
Credit points: 12  Semester: 1
► UDB101 Stewardship of Land

QUT HANDBOOK 2006 · PAGE 793
This interdisciplinary unit will introduce students to the characteristics of land and land tenure with a focus on land use and property rights. The particular issues of native title, land contamination, heritage and alternative utility will be covered. Thereafter the property development process will be described in general terms and emphasis placed on the impact of environmental and social factors on the financial evaluation. The final component will cover the management of land, both urban and regional. Case studies will demonstrate the part that each discipline plays in the stewardship of land and its development.

**Courses:** UDB102 Applied Law

Introduces the fundamental principles and practices of Australian governance as they affect the built environment professions. The relevance of government policies, laws and regulations and aspects of Tort, Contract and Land and Environmental laws applicable to the Development and Construction processes are examined in context.

**Courses:** UDB104 Urban Development Economics

This unit will introduce microeconomic and macroeconomics concepts applied to urban and regional development. The unit will initially focus on demand, supply and determination of prices, and other important microeconomic concepts, at the level of an individual development. Here, the value of microeconomics in explaining aspects of development is demonstrated using local and national examples. In doing so, this unit will also help to deepen the appreciation of the key steps in development and the role of the main actors. Since anyone development process does not occur in a vacuum, the unit will then broaden to consider the impact of changes in the national and local economy on land use and development, including business cycle, monetary and fiscal policy.

**Courses:** UDB110 Residential Construction and Engineering

You learn to read plans and build a house by studying construction theory and legislation, visiting building sites, and sketching construction details. Focus on the four traditional methods of construction, brick veneer, cavity brick, block and timber, evolution of building, Building Code of Australia and Australian Standards; methods of construction; foundation and footings; claddings; windows; doors; joinery; staircases; roof coverings; balanced cut and fill; services; retaining walls; acoustic and fire safety requirements; specifications for residential construction; protection to the public during construction; temporary support and demolition of structures; energy efficiency design; building defects and failures.

**Courses:** UDB111 Engineering Construction Materials

Structural and non-structural materials used in the construction process are examined focusing on the basic properties, construction applications, behaviour, strength, durability, suitability, and limitations. Material manufacture; acoustic and thermal properties; fire tests and fire hazard properties, issues such as cleaning, maintenance, corrosion protection, deterioration and ageing; Sustainable development; Material recycling, Storage on site, Installation processes; identification and causes of building defects and recommendations for potential remedies.

**Courses:** EN40, UDB40

Contact hours: 4 per week

**Credit points:** 12

**Semester:** 2

► UDB112 Professional Studies 1

Assignment-based project orientated group work where you design and document a new dwelling preparing a full design of a single level brick-veneer type dwelling to a standard appropriate for building approval including architectural and structural design; construction materials; building services; statutory obligations and the building approval process; measuring and cost planning; contract administration; construction planning and site layout.

**Courses:** UDB40

Contact hours: 4 per week

**Credit points:** 12

**Semester:** 2

► UDB113 Measurement 1

This unit introduces the scope of the role of the quantity surveyor working independently and for contractors. It examines the tendering process and the bill of quantities; the Australian standard method of measurement (rules, taking-off methodology, mensuration and formulae); measurement of various work sections (finishes, roofing, partitions, woodwork, metalwork, painting, doors, windows, glazing, hardware, suspended ceilings and masonry).

**Courses:** UDB40

Contact hours: 4 per week

**Credit points:** 12

**Semester:** 2

► UDB140 Property Valuation 1

This unit will be structured to assist student learning across three component areas: the market, the profession and the methods of valuation. This will be achieved through coverage of topics including the character of the property market and market value; legal interests in property and property types; the valuation process; data collection; factors influencing value; report writing.

**Courses:** UDB40

Contact hours: 4 per week

**Credit points:** 12

**Semester:** 1

► UDB141 Building Studies

You learn to read plans and build a house by studying construction theory and legislation, visiting building sites, and sketching construction details. Focus on the four traditional methods of construction; brick veneer, cavity brick, block and timber, evolution of building, Building Code of Australia and Australian Standards; methods of construction; foundation and footings; claddings; windows; doors; joinery; staircases; roof coverings; balanced cut and fill; services; retaining walls; acoustic and fire safety requirements; specifications for residential construction; protection to the public during construction; temporary support and demolition of structures; energy efficiency design; building defects and failures.

**Courses:** UDB40

Contact hours: 4 per week

**Credit points:** 12

**Semester:** 2

► UDB161 Introduction to Planning and Design

This unit introduces students to basic principles of planning and urban design. Students learn about urban design principles such as legibility, permeability, robustness and imageability of places. Students also investigate the planning issues facing cities and consider the complex problem-solving skills required to respond to these.

**Courses:** UDB40

Contact hours: 3 per week

**Credit points:** 12

**Semester:** 2

► UDB162 History of Built Environment

This unit uses examples from the global development of human settlement to demonstrate the importance of interactions between the environment, society, and technology in shaping the built environment. Students will gain an appreciation of the important role played by history in forming the context for contemporary society, policy making and design.

**Courses:** UDB40

Contact hours: 3 per week

**Credit points:** 12

**Semester:** 1

► UDB163 Land Use Planning

The purpose of this unit is to examine the planning and management of public and private land. Unit topics include: different performance and prescriptive zoning methods; an overview of levels of planning agencies responsible for land use planning in Queensland; and the land development process and regulations that govern land use planning.

**Courses:** UDB40

Contact hours: 3 per week

**Credit points:** 12

**Semester:** 2

► UDB164 Population and Urban Studies

This unit introduces the students to the demographic, economic, social and physical aspects of our cities to help understand the nature of cities we live in. The topics covered include: demographic and economic changes in cities, theoretical models of cities, issues such as social diversity, gentrification, masterplanned communities, and public spaces in cities.

**Courses:** UDB40

Contact hours: 3 per week

**Credit points:** 12

**Semester:** 2

► UDB181 Geospatial Positioning and GPS

This unit will introduce students to skills and knowledge of spatial referencing, site measurement; use of maps and air photos. It will include introduction to map projections; concepts and theory of Global Positioning Systems; introduction to global and local coordinate systems; mission planning and data collection. The unit will highlight the importance of geospatial positioning applications in society.

**Courses:** UDB40

Contact hours: 3 per week

**Credit points:** 12

**Semester:** 1
UNIT SYNOPSES

UDB182 Surveying
This unit provides a foundation in field instrumentation and survey computations; a framework for acquisition of a high level of knowledge and practical competence in plane survey computations; use of optical and electronic theodolites; EDM and total electronic station systems; and a focus on collection/presentation of pre-design contour and detail spatial information.

Courses: UD40
Contact hours: 5 per week  Campus: GP
Credit points: 12  Semester: 2
