

# Module Plus - Innovative Thinking for Teachers and School Leaders

Apply an entrepreneurial thinking framework to bring to life an idea that will add value to your school or classroom.

This is your opportunity to define and solve a problem that really matters.

By refining an idea for innovation, developing a solution and reflecting on your learning experience, you will enhance your ability to prepare students to think differently.

You will capture your learning experience in an online journal and prepare an innovation plan that documents your activities, decisions and actions while developing the innovation.

On successful completion, you'll earn credit for a postgraduate unit (six credit points) that will be applied as advanced standing when you enrol in QUT's [Graduate Certificate in Education](#) or [Master of Education](#).

## Evolve with QUTeX

Create, innovate and disrupt as you apply an entrepreneurial thinking framework to define a problem and generate an idea that adds value and can be applied to your teaching practices, school or even by your students as a learning activity.

## Core concepts

This Module Plus assessment requires:

- Critical reflection of your learning experiences and processes to inform your development as an educator using entrepreneurial thinking.
- Application of a problem and solution validation framework.
- Creation of innovative, disruptive and future-focused learning goals which support the application of a problem and solution validation process in your context.

## Who should participate?

This online module is for participants who have completed the 13-hour *Innovative thinking for teachers and school leaders* learning module. It is designed with a high degree of flexibility to meet your specific professional learning needs.

For Australian educators, this module aligns with the following Australian Professional Standards for Teachers (APST):

- 1.1 Physical, social and intellectual development and characteristics of students
- 1.2 Understand how students learn
- 2 Know the content and how to teach it
- 3.1 Establish challenging learning goals
- 3.2 Plan, structure and sequence learning programs
- 3.3 Use teaching strategies
- 3.4 Select and use resources
- 4.1 Support student participation
- 6 Engage in professional learning.

This online module is open for international enrolments.
