PREFACE

History

The Queensland University of Technology was created in January 1989 by redesignation of the Queensland Institute of Technology. QIT had its origins in the Central Technical College, established in 1914 on what is now the University’s Gardens Point campus. On its formation in 1965, QIT absorbed the professional courses offered by the Central Technical College and in its first year enrolled some 2000 part-time students.

In May 1990, QUT amalgamated with the Brisbane College of Advanced Education, a large multi-campus institution specialising in the arts, business, education and the social sciences. BCAE was formed by an amalgamation that took place in January 1982, its precursors being the Kelvin Grove, Mount Gravatt and North Brisbane Colleges of Advanced Education and the Brisbane Kindergarten Teachers’ College. These institutions were established, under other designations, in 1914, 1969, 1961 and 1907 respectively. The Mount Gravatt campus of BCAE was transferred to Griffith University in January 1990 prior to BCAE commencing amalgamation negotiations with QUT.

The institution resulting from the amalgamation of BCAE with QUT has retained the title Queensland University of Technology. It is a major university in the Australian context with a broad academic profile and an increasing involvement in research and postgraduate education. QUT has an enrolment approaching 25,000 students and expectations of sustained growth. It has campuses at Carseldine, Kedron Park, Kelvin Grove and Gardens Point, all in metropolitan Brisbane, and is in the process of developing a new campus on the Sunshine Coast, north of Brisbane.

Mission

Within its mission statement QUT has identified three main goals:

- **Teaching** – to ensure that its graduates acquire knowledge, professional competence, a sense of community responsibility, and a capacity to continue their professional and personal development throughout their lives.

- **Research** – to advance and apply knowledge germane to the professions and to the communities with which it interacts, and relevant to the enhancement of economic, cultural and social conditions.

- **Service** – to contribute to the development of Australia’s international responsibility and competitiveness; to enhance QUT’s relationship with the professions; and to increase community awareness of issues through professional service and social commentary.

Council

The Council is the University’s governing body, with responsibility for advertising the University in accordance with the Queensland University of Technology Act, 1988-1990. The Council consists of 22 members, of whom seven are nominees of the Minister for Education, one is a nominee of the Director-General of Education, two are nominees of the Council, two are elected non-academic staff members, three are elected academic
staff members, two are elected student members and two are elected Convocation members. The Chancellor and Vice-Chancellor are members ex officio. The Chancellor is Chairperson of the Council and the Registrar is Secretary.

**Convocation**

Convocation represents the interests of QUT graduates through its representation on Council and its influence on University decision making, particularly in regard to teaching and applied research. Convocation is chaired by a Warden and is served by a Standing Committee. The full Convocation meets annually and its functions are performed through the year by the Standing Committee.

**Information**

In addition to the Handbook, the University produces a range of publications to which the public has access. These include the Research and Consultancy Report, the Annual Report and the Admission Procedures booklet. These and other publications or information about the University may be obtained on request from the Registrar. All correspondence should be addressed to:

PRINCIPAL DATES

The schedule of dates which appears below is the University’s official calendar. Not all courses comply with the official calendar in every respect. Detailed information on individual course calendars is available from faculty offices and Student Administration.

Summer School
06 – 10 January
13 – 17 January
20 – 24 January
28 – 31 January
03 – 07 February

First Semester
10 – 14 February
17 – 21 February
24 – 28 February
02 – 06 March
09 – 13 March
16 – 20 March
23 – 27 March
30 March – 03 April
06 – 10 April
13 – 16 April
21 – 24 April
27 April – 01 May
05 – 08 May
11 – 15 May
18 – 22 May
25 – 29 May
01 June – 17 July

Second Semester
20 – 24 July
27 – 31 July
03 – 07 August
10 – 14 August
17 – 21 August
24 – 28 August
31 August – 04 September
07 – 11 September
14 – 18 September
21 – 25 September
28 September – 02 October
05 – 09 October
12 – 16 October
19 – 23 October
26 – 30 October
02 – 30 November

- Week 1
- Week 2
- Week 3
- Week 4
- Week 5
- Orientation
- Week 1
- Week 2
- Week 3
- Week 4
- Week 5
- Week 6
- Week 7
- Week 8
- Week 9
- Vacation
- Week 10
- Week 11
- Week 12
- Week 13
- Week 14
- Exam preparation, exams, assessment, fieldwork, vacation
- Exam preparation, exams, assessment, fieldwork, vacation
COUNCIL AND COMMITTEES

Council

Composition, membership, powers and responsibilities of QUT Council are governed by the QUT Act. Procedures for elections, meetings and dealing with business in Council, are specified in the QUT Statute 2 - Council.

Council is empowered to establish committees and to delegate power to committees or officers of the University. While Council is ultimately responsible for the management and operation of QUT, it has delegated authority to the chief executive officer, the Vice-Chancellor, and to various senior administrators of QUT for much of the day-to-day management of the University. Council has also established a number of advisory committees, some of which have been authorised to make decisions in respect of prescribed policy and procedural matters.

Council Membership

Chancellor (Chairperson)
V.B. Pullar, BEng(Hons) Qld, FIEAust.

Vice-Chancellor
Professor R.D. Gibson, BSc Hull, MSc PhD N'cle(UK), DSc CNAA, FAIM

Nominees of the Minister for Education
P.D. Beattie, BA LLB Qld
K.H. Dredge, BE Syd., BEcon Qld
E.F. Finger, BEng Qld, MEngSc NSW
M.M.L. Forde, LLB Qld, DipMedTech Ottawa
K.A. Hart, BEdSt Qld, DipT Kelvin Grove, LSDA Trin.
L.N. Ledlie, BEcon Qld
Dr C. Hirst, MBBS BEdSt Qld
J.J.W. Siganto, BEng Qld, FIEAust.

Nominee of the Director-General of Education
L.J. Dwyer, BA BEd MEdSt Qld, MA Lond., FACE

Nominees of Council
A.R. Baxter, BSc DipEd Qld
D. Martindale, GDIndRel Brisbane

Elected non-academic staff members
M. McPherson, BA ANU, DipLib NSW
L.A. Heron, BA Qld, GDLibSc QIT
Elected academic staff members
Associate Professor D. Blackmur, BEcon(Hons) MLitStud PhD Qld, MACE
T.G. Lewis, BSc BEd Qld, MSc Aston, MSc Griff.
Dr S.V. McLean, DipT BKTC, BEdSt Qld, MEd PhD Arizona

Elected student members
S.M. Bellino
R.H. Doo, DipT Brisbane

Elected Convocation members
M.A. Muldoon, GDEdAdmin Mt Gravatt
P.J. McGahan, BAppSc (Ind.Chem.) GDBusAdmin QIT

Secretary
B.S. Waters, BCom Qld, AAUQ(Prov)

Deputy Vice-Chancellor (attends by invitation)
Professor T.C. Dixon, BEd (Hons) MA Qld, MLitt NE, PhD Rensselaer, FAIM

Tenure
Council serves a three-year term.

Academic Committee
Membership
Pro-Vice-Chancellor (Academic) ex officio as chairperson
Vice-Chancellor ex officio
Deputy Vice-Chancellor ex officio
Pro-Vice-Chancellor (Research and Advancement) ex officio
Registrar ex officio
Head of Division of Information Services ex officio
Deans of faculty (8) ex officio
Director of Academic Staff Development Unit ex officio
One academic staff member from each faculty, appointed or elected in the manner prescribed by the relevant faculty academic board.
Two members of the academic staff of the University nominated by the Academic Staff Association.
Chancellor or Council member nominated by the Chancellor.
Two Council members appointed by Council.
Two postgraduate students of the University elected by the postgraduate students of the University.
One undergraduate student from each faculty (8) appointed or elected in the manner determined by the Student Guild Council.
A nominee of the Registrar is secretary.
Tenure and frequency of meeting
*Ex officio* members remain members for as long as they hold the position relevant to their membership.

Council members nominated by Council or the Chancellor hold office for the term of the Council that nominates them (three years).
Elected and other nominated staff members serve a two-year term.
Student Guild members and postgraduate students serve a one-year term.

Academic Committee normally meets every six weeks.

### Academic Appeals Committee

**Membership**
- Pro-Vice-Chancellor (Academic) *ex officio* as chairperson
- Director of Counselling and Health *ex officio*
- Two Council members nominated by Council.
- Two members of academic staff from different faculties appointed by Academic Committee.
- One member of the Student Guild appointed or elected in the manner determined by the Student Guild Council.
- A nominee of the Registrar is secretary.

**Tenure and frequency of meeting**
*Ex officio* members remain members for as long as they hold the position relevant to their membership.

Council members nominated by Council hold office for the term of the Council which nominates them (three years).
Staff members appointed by Academic Committee serve a two-year term.
The Student Guild member serves a one-year term.
Academic Appeals Committee meets as required.

### Academic Processes and Rules Committee

**Membership**
- Chairperson of Academic Committee *ex officio* as chairperson
- Director of Student Administration *ex officio*
- One academic staff member from each faculty (8), appointed or elected in the manner prescribed by the relevant faculty academic board.
- One member of the Student Guild appointed or elected in the manner determined by the Student Guild Council.
- A nominee of the Registrar is secretary.

**Tenure and frequency of meeting**
*Ex officio* members remain members for as long as they hold the position relevant to their membership.

Nominated academic staff members serve a two-year term.
The Student Guild member serves a one-year term.
Academic Processes and Rules Committee meets as required.
Computing Planning Committee

Membership
One member of Planning and Resources Committee nominated by Planning and Resources Committee as chairperson.
Head of Division of Information Services ex officio
Computing Services Director ex officio
Dean of faculty nominated by the Vice-Chancellor’s Advisory Committee.
One staff member from each faculty and division nominated by the dean of faculty or head of division.
A nominee of the Registrar is secretary.

Tenure and frequency of meeting
Ex officio members remain members for as long as they hold the position relevant to their membership.
The dean of faculty nominated by the Vice-Chancellor’s Advisory Committee serves a two-year term.
The member of Planning and Resources Committee nominated by Planning and Resources Committee holds office for their term of office on the Planning and Resources Committee.
Nominees of deans of faculty/heads of division serve a two-year term.
The Committee normally meets every six weeks.

Convocation Standing Committee

Membership
Warden of Convocation ex officio as chairperson
Two members of QUT Council elected to Council by and from Convocation ex officio.
Five members elected by and from Convocation.
A member of QUT Foundation Alumni who is also a member of Convocation, nominated by the QUT Foundation Alumni Council.
A nominee of QUT Development Office (non-voting).
A nominee of the Registrar is secretary.

Tenure and frequency of meeting
Ex officio members remain members for as long as they hold the position relevant to their membership.
The five elected positions are held for one term, elections being held at the annual general meeting of Convocation. Members may be re-elected.
The nominated member serves a two-year term.
The Convocation Standing Committee normally meets every six weeks.

Planning and Resources Committee

Membership
Chancellor or Council member nominated by Chancellor as chairperson
Vice-Chancellor ex officio
Deputy Vice-Chancellor ex officio
Pro-Vice-Chancellor (Academic) ex officio
Pro-Vice-Chancellor (Research and Advancement) ex officio
Registrar ex officio
Planning and Budget Director *ex officio*
Finance and Facilities Director *ex officio*
Head of Division of Information Services *ex officio*
Five Council members appointed by Council
One dean of faculty appointed by the Vice-Chancellor’s Advisory Committee.
One member of Academic Committee appointed by Academic Committee.
One enrolled student appointed or elected in the manner determined by the Student
Guild Council.
A nominee of the Registrar is secretary.

**Tenure and frequency of meeting**
The Chancellor or nominee remains in the Chair for the term of office of the
Chancellor (up to five years).
*Ex officio* members remain members for as long as they hold the position relevant to
their membership.
Council members appointed by Council hold office for the term of the Council which
appoints them.
Members appointed by the Vice-Chancellor’s Advisory Committee and Academic
Committee serve a two-year term.
The Student Guild member serves a one-year term.
Planning and Resources Committee normally meets every six weeks.

**Research Management Committee**

**Membership**
Pro-Vice-Chancellor (Research and Advancement) *ex officio* as chairperson
Deputy Vice-Chancellor *ex officio*
Postgraduate Studies Officer *ex officio*
Research Manager *ex officio*
One academic staff member with research experience from each faculty, nominated
by the faculty academic board.
Head of Division of Information Services or nominee
A nominee of the Registrar is secretary.

**Tenure and frequency of meeting**
*Ex officio* members remain members for as long as they hold the position relevant to
their membership.
Nominated members serve a two-year term.
Research Management Committee normally meets every six weeks.

**Staff Committee**

**Membership**
Four Council members nominated by Council
Registrar *ex officio*
Personnel Director *ex officio*
Equity Coordinator *ex officio*
Vice-Chancellor or nominee
Director of Academic Staff Development or nominee
Dean of faculty nominated by Vice-Chancellor’s Advisory Committee
One member elected by and from the academic staff of the University
One member elected by and from the non-academic staff of the University
A nominee of the Registrar is secretary.
Staff Committee elects one of the four Council nominees as chairperson of the
Committee.

Tenure and frequency of meeting
Ex officio members remain members for as long as they hold the position relevant to
their membership.
Council members nominated by Council hold office for the term of the Council which
nominates them.
Elected staff and other nominated members serve a two-year term.
Staff Committee normally meets every six weeks.
STAFF

Senior Officers of the Administration

Chanceller

Vice-Chancellor: Professor R.D. Gibson, MSc Hull, PhD N’cle(UK), DSc CNAA, FIMA, FAIM

Deputy Vice-Chancellor: Professor T.C. Dixon, BEd(Hons) MA Qld, LittM NE, PhD Rensselaer, FAIM

Pro-Vice-Chancellor (Research and Advancement): Professor M.E. Poole, BA BEd Qld, MA(Hons) NE, PhD LaT.

Pro-Vice-Chancellor (Academic): Professor J.C. Reid, BSc Adel., MA Hawaii, MA PhD Stan.

Associate Pro-Vice-Chancellor (Academic): Professor R.B. Gardiner, MA BSc(Hons) PhD Edin., CPhys, InstP, FAIP

Director, Academic Staff Development: Associate Professor P.C. Candy, BA BCom Melb., DipEd Adel., DipContEd NE, MEd Manc., EdD Br.Col.

The Australian Key Centre in Land Information Studies (AKCLIS) was established in 1985 and has as its aim:

- to establish and maintain a world recognised Centre of Excellence dealing with geographic information (in its broadest sense) which is of academic and commercial significance to Australia.

AKCLIS is unique in that its founding members are Queensland University of Technology, the Queensland Government’s Department of Lands and the University of Queensland – a model for cooperative research.

AKCLIS has a mission to support and foster research, formal education and training in the land information industry; support industry in developing new markets for Australia and abroad; transfer and diffuse technology throughout the industry; and seek funding for research and training programs.

Research projects selected by AKCLIS for funding in 1991 ranged from a systemic analysis of the capabilities of optical character recognition in an existing land titles system, environmental monitoring using geographical information systems in a mining application, to higher order relationship studies between use of topological data within the state’s digital cadastral data base. Several key areas of emergent technology provide a focus of the Centre’s research interest:

- geographic information systems
- global positioning systems
- remote sensing.

During the 1990-91 financial year, AKCLIS delivered, participated in, or coordinated training programs totalling more than ten work years for local interstate and international trainees. Well over half of the training conducted by AKCLIS is undertaken for overseas governments or in overseas locations. Extensive consultancies in training have been undertaken in South-east Asia and the South-west Pacific as nations strive to provide opportunities for their future.

In an innovative advance in teaching remote sensing, AKCLIS researchers developed a computer aided learning package for use in senior high schools, undergraduate training in universities and continuing professional education. The program has won recognition and awards from the Australian Institute of Cartographers and the Australian Society for Educational Technology and is being marketed internationally.

AKCLIS also plays a role overseas and was recognised as a Centre of Excellence in Land Information Studies by the prestigious Institute for Land Information based in Washington DC. The Centre provides training for the five-year Natural Resources Management and Development Program in the Philippines which is funded by AIDAB.

In addition, training in remote sensing has been conducted in the Pacific and the Centre has a postgraduate exchange program with the University of Wuhan, the leading university for surveying in China.
More than 60 learned papers were presented in 1990 by AKCLIS researchers at conferences, seminars and workshops both in Australia and overseas.

Director: S. Johnston, BBus (Man) QIT, MSc Bath

Centre for Biological Population Management

The Centre for Biological Population Management was established to provide a focus for research and education in population management. Initial activity was strongly directed to vertebrate pest management and this area remains the major strength of the Centre, but this focus has been expanded to include aquaculture and plant tissue culture.

The goal of the Centre is to provide practical solutions to problems in population management by:

- developing cost-effective and environmentally sound management strategies for important species
- developing new economic resources through the application of biotechnology to bioculture
- offering international standard training and education in population biology, population management, aquaculture and plant tissue culture.

The academic and research staff of the Centre are drawn from diverse areas of the biological sciences thus ensuring a wide skills base and a multidisciplinary approach to complex research problems.

The Centre has established a significant national research profile in its three general research areas of vertebrate pest management, aquaculture and plant tissue culture. Strong research links with federal and state research authorities and private sector research organisations ensure that the Centre remains at the forefront of national research in these areas.

An international research profile has been developed through collaborative projects with universities in the USA, Mexico, Singapore and Germany and strong links with international research organisations as diverse as the Denver Wildlife Research Centre, South China Institute of Botany, International Rice Research Institute and international agencies such as FAO and USAID. These international links provide opportunities for staff exchange and collaborative research. The Centre is actively involved in research projects in Africa, South America, USA and Europe.

Activities within the Centre include:

Management Strategies Program:
- integrated pest management strategies
- conservation management strategies
- management of captive populations
- water quality and wastewater management technology.
Biotechnology Application Program:
- technologies for the production of economically important species and species products
- use of novel species in aquaculture
- use of genetic and physiological techniques for improving production in the aquaculture industry
- new plant varieties of economic importance
- new plant propagation techniques.

Education and Training Program:
- honours, master and doctoral programs
- integration of research with undergraduate programs
- overseas students
- bursaries and fellowships
- continuing education programs.

Director: Associate Professor M.F. Capra, MSc Syd, PhD Otago

Centre for Eye Research

The Centre for Eye Research was established in the School of Optometry in 1986 to coordinate the wide range of research activities in the visual and ophthalmic sciences. The Centre has a vigorous program of research investigating human vision and how the problems people have with vision may be resolved or alleviated.

In 1988 the Centre was given University Centre status and provided with support funding to pursue its mission of developing the research and postgraduate activities of the School of Optometry. In 1989, the Centre’s first PhD students were enrolled.

The research activities of the Centre encompass the clinical, theoretical and applied aspects of the visual sciences. There is an emphasis on the functional and performance aspects of vision of the aged and partially sighted. The Centre also undertakes research for the ophthalmic and pharmaceutical industry towards the development of improved ophthalmic appliances and materials. In addition to investigating the causes of human vision problems, the Centre also undertakes research work for government, industry and business to resolve visual problems in the workplace, in transport and in industry.

The Centre for Eye Research serves as a focus for collaboration with groups internal and external to QUT. This collaboration with industry and with other research units is well established, and the Centre has attracted significant research grants from industry and government funding agencies.

The facilities and resources of the Centre are unique within Queensland and provide a resource for the development of the visual and ophthalmic sciences and industries in the State.

Director (Acting): Associate Professor P.G. Swann BSc(Hons) Aston, MAppSc, FBCO, FAAO
Centre for Medical and Health Physics

The Centre for Medical and Health Physics was established in 1988 to provide a formalised focus and vehicle through which to foster the application of physics and supporting disciplines to clinical and occupational health areas in the community.

The Centre has the following functions:

- to undertake research and development in existing and anticipated problems relating to diagnosis and treatment of persons in the clinical and occupational areas
- to conduct programs aimed at educating the health industry in new technologies
- to disseminate knowledge through postgraduate studies at both master and doctoral levels in areas where the Centre is optimally placed to do so
- to facilitate the integrated and coordinated transfer of appropriate technology to the countries of South-east Asia and the Pacific Basin by admitting overseas students to postgraduate studies within the Centre; arranging exchange between staff associated with the Centre and overseas scientists; encouraging the secondment of staff associated with the Centre to overseas countries to undertake sponsored applied research and consultancy; and offering specialist courses
- to develop new products in medical and health-related fields
- to improve the performance of existing medical instrumentation by participating in quality assurance and instrumentation development projects
- to encourage the active involvement of its members, industry (in its broadest sense) and the medical profession to achieve the above.

Recent progress has been considerable, particularly considering that nearly all funding for operation has to be generated by members acquiring research grants and consultancies.

A wide range of research and consultancy projects has been undertaken and a number of PhD students have begun their studies.

Members of the Centre have developed strong links with other educational, scientific and professional networks. The Centre supports conference attendance to enhance these links and professional development and visibility.

Education

The Centre’s staff provide support for undergraduate and postgraduate studies in the following programs:

- Bachelor of Applied Science – Physics major
- Bachelor of Applied Science – Medical Radiation Technology, with majors in Medical Imaging Technology and Radiotherapy Technology
- Graduate Diploma in Applied Science, with majors in Medical Physics and Medical Ultrasound
- Master of Applied Science, with majors in Medical Physics and Medical Ultrasound
- PhD programs.
Continuing Education
The Centre offers a short course in Radiation Health Physics twice a year in which
particular emphasis is given to sources and techniques most likely to be met in the gauging
and processing of materials in bulk such as the mineral and coal processing industries.
Where appropriate, the course has been accepted by the Statutory Authority as
appropriate for training of Radiation Safety Officers.

Other courses run by the Centre when demand is deemed appropriate are:
- Principles and Practices of Noise Management
- Management of Noise in Shops, Offices, Factories and their Environments
- Environmental Physics for Industrial Application.

Research and Consultancy
The Centre’s current areas of research and development are in:
- Medical physics (imaging science)
- Medical physics (body composition)
- Health physics (occupational and environmental radiations).

The Centre’s major areas of consultancy are:
- Measurement of radioactivity
- Shielding design for radiological practices
- Measurement of light transmittance/reflectance
- Measurement of noise levels.

The Centre will host seminars in various areas of Medical Physics and Health Physics in
the near future.

The Centre encourages and welcomes the active participation of all QUT staff, and
professionals from outside the University.

Director: Associate Professor B.W. Thomas, DipEd MSc PhD WAust., FAIP,
MACPSEM, FAIM

Centre for Molecular Biotechnology
The Centre for Molecular Biotechnology was established in 1988 and currently has a
staff and postgraduate complement exceeding 50. The Centre is located on the Gardens
Point campus in a modern, well-equipped laboratory complex with associated facilities.
The focus of the Centre is research and postgraduate education in the area of recombinant
DNA technology. Research is concentrated into a few programs with emphasis on
strategic grant-funded and contract research. Postgraduate education includes Master,
PhD and programs and components of the Honours and Graduate Diploma in
Biotechnology courses. The Centre actively encourages interaction with other groups
and has established collaborative projects and links with other institutions and
Queensland companies.

The current principal research programs include:
- The development of rapid diagnostic technology for human genetic diseases
- Molecular plant virology and pathology
- Chlamydia diagnosis and control
Centre for Mathematics and Science Education

The Centre for Mathematics and Science Education (CMSE) seeks to promote a numerate and scientifically literate society by coordinating research in the teaching and learning of mathematics and science. It further seeks to apply this research through graduate teaching, consultancy, curriculum development and the production of educational resources. CMSE is affiliated with the Faculty of Education, with staff drawn primarily from the School of Mathematics, Science and Technology Education but with members from other schools and faculties. An administrative office, clinical facility and computer laboratory are located at Carseldine campus while a research facility is maintained on Kelvin Grove campus.

Research
The research program of staff associated with the Centre may be classified broadly into four categories:
- curriculum and instruction in mathematics and science
- cognitive science
- social context of teaching and learning, and
- information technology in mathematics and science education.

In each area, the emphasis of the project is on both empirical findings and more general theoretical models.

Consultancy
For CMSE, consultancy is a major priority in its aim to promote success and excellence in mathematics and science for students of all ages and backgrounds. Staff are actively involved in a range of consultancy services to meet the needs of schools, industry and the general community. These services include: diagnostic, remedial and enrichment activities with students; inservice seminars and short courses for industry and educators; cooperative projects with business and Education Departments; and writing and editing for publishers.

Teaching
Staff have taught in undergraduate, graduate, and continuing education courses in mathematics education, science education and the disciplines of mathematics and science. Staff are active in higher-degree courses and in supervising theses. Within the Master of Education, it is possible to specialise in mathematics, science or technology education. A PhD program is available.

Staff are involved in projects to write bridging and preparatory courses for tertiary mathematics and science. Staff are very active in writing teacher-education materials in mathematics and science education and in authoring classroom texts.

Director: Associate Professor T. Cooper, BSc(Hons) DipEd PhD Adel.
Centre for Product and Process Development

The Centre for Product and Process Development is a joint venture of the Faculty of Built Environment and Engineering and the Faculty of Business.

It provides a forum for interdisciplinary design and development in the fields of mechanical engineering, electrical engineering, electronics, industrial design, manufacturing and marketing.

The purpose of the Centre is to provide a source of research, consultancy and continuing education in the design and development of technical products and processes. The activities emphasise interaction between QUT and external partners in industry, institutions and government.

Efforts are concentrated on product innovation, product design, and raising the level of design quality for products and manufacturing processes thereby increasing the competitiveness of Australian business and products in world markets.

The Centre provides a key link for organisations in accessing divergent areas of expertise assisting both internal and external participants to gain maximum benefit from research conducted for commercial benefit.

Director: R. W. Nicol, BE(Hons) MEngSt Qld, MIE Aust

Information Security Research Centre

The Information Security Research Centre (ISRC) was formed in July 1988 as a joint venture between industry and the University's Faculty of Information Technology.

The focus of the ISRC activities is the control, management and security of computer systems and networks. The role of the Centre is to undertake research, development, consultancy and education activities in this designated area.

The Centre has six research groups and research is concentrated in the following areas:

- cryptology
- risk analysis and assessment
- security in electronic data interchange and open systems interconnection
- database security
- access control and secure operating systems
- computer viruses.

Since its commencement the Centre has carried out applied research and consultancy for a wide range of organisations concerned with information security, both government and commercial. In addition the ISRC has developed its educational role by offering research master and PhD programs as well as teaching specialist subjects for postgraduate coursework students.

Director: Professor W. Caelli, BSc(Hons) N'cle(NSW), PhD ANU, FACS, MIEEE, MACM
Key Centre in Strategic Management

The Key Centre in Strategic Management was established by Federal grant in June 1989 with the mission of developing teaching, research and consultancy in the field of management education. The Centre is located within the Faculty of Business and coordinates participation from QUT's faculties of Built Environment and Engineering and Science, and from experts at the University of Newcastle and Bond University. The Centre also has links with the Queensland TAFE sector, with the brief of helping to develop management education at that level, and with the Queensland Quality Centre for its Quality Management focus.

Within the broad field of strategic management particular attention is given to the areas of Quality Management and Human Resource Management and their interface. The Centre’s work is led by two Professors. The Chair in Quality Management is the first of its type within Australia and is funded by the Queensland Government.

Key Centre activities include:

Teaching:
- management certificates in general management; human resource management; financial management; public sector management
- workshops on the implementation of quality management
- Women in Management course
- PhD programs especially in quality management
- course development for electives and TAFE.

Research:
- The Centre has developed its own research of case studies in quality management and it funds research assistance for the Key centre participants at Newcastle University, Bond University and for QUT Tourism research

Consultancy:
- The largest management consultancy project in 1990 was a contract to produce a Managerial Review of the transition from a CAE to a University for the DEET Reserve fund. Consultancies in General Management and Quality Management have also been undertaken for government departments and private companies.

The Centre disseminates information through a seminar series, through conferences, a working paper series, an edited book series and a business journal, *QBIZ*.

Director: Professor G. P. Palmer, BSc Birm., MSc Lond., PhD City, UK
Physical Infrastructure Centre

The Physical Infrastructure Centre was established by QUT in 1990 as a national focus for civil engineering research. It aims to become self-funding via consultation, continuing education and research services to industry, government and the University.

Management of the Centre is via a Steering Committee consisting of representatives of the Department of Transport (Queensland Railways and Transport Technology divisions), the Administrative Services Department, School of Civil Engineering staff and private industry.

The Centre works closely with industry and government to identify and carry out key projects which will strengthen, upgrade and refurbish the State’s physical infrastructure. By developing improved design, analysis, management, maintenance and rehabilitation techniques, the Physical Infrastructure Centre is enriching some of the State’s most valuable assets. These include roads, railways, bridges, water and wastewater treatment plants, urban drainage and solid waste treatment systems, building structures and associated earthworks, pavements and materials.

As society becomes more sophisticated so the stress applied to these systems increases dramatically. The Physical Infrastructure Centre’s work is helping to reduce the cost to the community of maintaining these assets and improve the understanding of the interaction of elements within each of the major systems.

Some of the Centre’s major projects include:

- involvement in the rehabilitation of the Story Bridge
- researching cracked mechanisms and control for low cost roads on expansive soil clays
- developing individual household package plants for wastewater treatment
- improving traffic flows by examining the traffic interaction between roundabouts, signalised and unsignalised intersections
- devising a new portal frame building system using recently developed hollow flange beams sections.

Since 1988, staff involved in the Centre have delivered 12 invited/keynote addresses at international and national conferences, and produced five monographs, 90 refereed journal and conference proceedings and 40 other publications. It has also two commercial computer software programs.

The Centre presently has eight principal researchers, three external associate researchers, 12 internal associate researchers, four PhD students and 15 MEng students and eight MEngSc students.

Director: Associate Professor G.H. Brameld, BE(Hons) MEngSc BCom PhD Qld, MIEAust, MIABSE

Terotechnology Centre

Terotechnology is officially defined as ‘a combination of management, financial, engineering and other practices applied to physical assets in pursuit of economic life cycle costing’. It is a combination of management and technology and can be applied by both users and manufacturers in industry. It is concerned with the specification and design for reliability and maintainability of plant, machinery and equipment; with their installation,
commissioning, maintenance, modification and replacements; and with feedback of information on design, performance and costs.

Terotechnology is therefore multi-disciplinary, requiring no new disciplines, and is essentially a new way of examining and grouping some familiar activities and amalgamating well-tried methods to improve the management of physical assets.

Application of terotechnology brings an awareness that the on-going costs of ownership (such as maintenance) may be higher than the initial capital cost; and the realisation that lower first cost does not necessarily mean lowest whole-life cost.

Adoption of the terotechnology concept has proved to be beneficial in achieving product quality and reliability economically.

The Terotechnology Centre is sponsored by the University and a group of prominent industrial organisations.

Implementation of the concepts of terotechnology requires an excellent communications network. The Terotechnology Centre, working in liaison with industry, provides the link for the dissemination of current technology within industry, whilst also pursuing research into the exploitation of new technology and processes. The benefits to industry are:

- ready access to the information resource of a major academic cell in Australia working in an area not usually well covered in academia and yet of vital interest to industry
- availability of a steady stream of graduates with a prime interest in, and respect for, modern methods of plant maintenance and operation
- ready access to results from a significant number of relevant student undergraduate investigations. (Each project represents between 90 and 180 hours work)
- an enlarged program of continuing education in this field
- ready access to more test equipment and expertise for reference, testing and consultation
- enhanced prospect of major government subsidised research and development investigations in joint QUT-industry projects
- reports on conferences, seminars, professional experience programs in which staff have participated both nationally and internationally
- Implementation of project work at QUT as suggested by the industrial partner.

*Director:* Professor D. J. Sherwin, MSc Birm., PhD Lough., CEng MIMechE, MICA, MIPlantE
ACADEMIC AND STUDENT SERVICES

Aboriginal and Torres Strait Islander Unit

The Aboriginal and Torres Strait Islander Education Program was established in 1984 to meet the needs of students, and to respond to a growing demand by both staff and students for the provision of Aboriginal and Torres Strait Islander perspectives across all courses. At the beginning of 1991 the Aboriginal and Torres Strait Islander Unit (ATSIU) was formed. A major aim of the Unit is to develop and improve the participation and successful outcomes for Aboriginal and Torres Strait Islander students.

The Unit's central office is on the Kelvin Grove campus with offices on the Gardens Point and Canseldine campuses. In addition to teaching and research services the Unit provides academic and welfare support to all Aboriginal and Torres Strait Islander students at QUT.

In 1991 the Unit responded to increased demand for entrance to a diversity of courses across the faculties and campuses; and Aboriginal and Torres Strait Islander students gained entry into a wide range of courses including the Bachelor of Social Science, Bachelor of Business, Bachelor of Education, Bachelor of Arts, (Drama, Music and Visual Arts), Bachelor of Laws, Bachelor of Nursing, Bachelor of Teaching, and Bachelor of Applied Science.

The Unit also fulfils a research, advisory and consultancy function for tertiary researchers, government departments, and community and Aboriginal and Torres Strait Islander organisations in order to promote Aboriginal Studies and Torres Strait Islander Studies as academic disciplines.

The Unit provides staff development opportunities in the field of cross-cultural communication and conducts courses, conferences and seminars relevant to the development of Aboriginal Studies and Torres Strait Islander Studies.

Staff in the Unit assist in teaching mainstream courses throughout the University.

Coordinator: W.E. Brady, BA (Hons) Syd.

Chaplaincy Services

The University caters for the emotional and spiritual needs of students and staff through the provision of Chaplaincy Services. The Ecumenical Chaplaincy is a joint venture of the University and the major Christian denominations. There are presently two full-time chaplains and one part-time chaplain working across the campuses of QUT, operating on a schedule of weekly visits to each campus.

Chaplaincy Centres and Chapel

The Chaplaincy Centres are ecumenical, and although the chaplains represent the major Christian denominations, they are available to people of other religions as well. If necessary, they are able to put people in touch with appropriate contacts from different denominations or religions.

The Chaplaincy Centres are a focus for Christians from a diversity of traditions and theological emphases. The purpose is to encourage community spirit and to be a lively influence within each campus. The chaplains aim to relate Christian faith to both personal
commitment and to the corporate structures of church and society. Activities include counselling, social gatherings, discussion groups, eucharist, prayer and meditation groups. Chaplaincy can also serve as a bridge across the divisions that may surface in any human institution.

At the Gardens Point campus there is a Muslim mosque, in a room adjacent to the main chaplaincy rooms.

A chaplain is available at the Chaplaincy Centres on the following days:

**GARDENS POINT**, Old Government House near the entrance to the Library, Monday to Friday. Telephone (07) 864 2700 or (07) 864 2086.

**KELVIN GROVE**, room C420, Community Building, Monday, Tuesday, Thursday. Telephone (07) 864 3135.

**KEDRON PARK** Friday. Telephone (07) 864 4290.

**CARSELDINE**, level 4 of the Community Building on Wednesday and Friday. Telephone (07) 864 4529.

**AFTER HOURS**: John Woodley. Telephone (074) 98 8670.

## Computing Services

Computing Services exists to provide high quality information technology services to the University community. It is a department within the Division of Information Services.

Services offered by Computing Services include:

- the provision and maintenance of a wide range of computing facilities
- the provision and maintenance of the University-wide data communications network with links to world-wide data networks
- the maintenance and support of computing software
- the provision of user information and help
- the provision of training courses to University staff and postgraduate students
- the provision of corporate and departmental information systems to assist in the management of the University
- the provision and management of personal computing laboratories for teaching and student use
- the provision of specialised computing services for research work
- the provision of a repair service for personal computing equipment owned by various departments and sections of the University
- the provision of a contract programming service to departments of the University
- the provision of a data entry service.

## Major Computer Systems

The major computers in the University network are:

- A Digital Vax cluster which is used for teaching, research, and administration. The processors are a Vax 6430 with 128 megabytes of memory and a Vax 8550 with 96 megabytes of memory. The cluster has a total of 14.7 gigabytes of disk storage, four high density cartridge drives, two tape drives, two line printers, a high
capacity laser printer, an optical mark reader, and a diverse range of graphics equipment. The operating system is VMS Version 5.

- A Hewlett-Packard HP 3000 which is primarily for administration. It has 96 megabytes of memory, 5.6 gigabytes of disk space, and one tape drive. The operating system is MPE/XL.

- A Convex C 210 mini-supercomputer providing superior research computing facilities. It has an integrated vector processor, 128 megabytes of memory, 4 gigabytes of disk storage, and a tape drive. The operating system is Unix.

- A Hewlett-Packard HP 9000 which is used for teaching and research. It has 16 megabytes of memory, 1.2 gigabytes of disk space, and a tape drive. The operating system is Unix.

- A Data General MV 15000 and an AWA Sequel which provide library automation including on-line public access catalogues. These will shortly be replaced with a new library system.

The Communication Network

The computing facilities of the University are connected by a data communications network, which links buildings and campuses. The inter-campus links are used for both data and voice traffic. More than 2000 workstations and terminals are located on the four Brisbane campuses and the Sunshine Coast facility at Nambour.

Devices in a growing number of areas are connected to the Ethernet network, either directly or via terminal servers. Others are connected via an MDX or Micom port selector. These communication systems are linked so that any device may be connected to any of the systems on the network. The network may also be accessed via a significant number of dial-up lines. A number of local area networks are in the process of being integrated into the University network.

Computing Services supports all services available through the Australian Academic and Research Network (AARNet), which is connected to major networks throughout the world. Services include national and international e-mail, network news, connection to remote host computers, and file transfer.

Software

An extremely wide range of software is available for research, teaching, office automation, and personal productivity purposes. This includes languages, editors and other utilities, software development platforms, electronic mail, word processing, text processing and other office automation systems, and a broad range of teaching and research application packages.

Common languages include Ada, Basic, C, Cobol-74, Fortran, Lisp, Macro-32, Modula II, Occam, OPS-5, Pascal, Prolog, RPG, and Simula. Software development platforms include Oracle, Powerhouse, and Rdb.

The mail systems are integrated, but users have a choice of mail interface, including PC Mail, Vax Mail, and HP Desk.

Important application packages include SPSS-X, SAS, Genstat, Nastran, GDS, GKS, Lindo, GNC, Tex, Latex, Aspen, Spice, Camel, and Sig.
Campus Computer Centres and Laboratories

The major systems are housed in machine rooms associated with campus computer centres at Gardens Point and at Kedron Park. Other campuses also have Computer Centres which act as a focus for computing activities there.

Computing Services also manages approximately 21 computer laboratories located on the various campuses. The laboratories are equipped with microcomputers, specialised workstations, graphical display terminals, and VDUs. Most of these are connected to the University network or a local area network. Much common microcomputer software is available on these systems, including WordPerfect, MS-windows, Lotus 123, dBase IV, and DrawPerfect.

Hours

Mainframe computers are available 24 hours a day, seven days a week, except for times needed for stand-alone file backup and preventive maintenance. These times are chosen to cause minimum disruption to normal use, and vary from system to system. If any system is scheduled to be unavailable, information will be posted in on-line news and log-on messages on that system.

Operator coverage is provided at Kedron Park from 8:15 am to 4:30 pm Monday to Saturday, and at Gardens Point from 8:00 am to 11:30 pm Monday to Friday and 8:30 am to 5:00 pm Saturday and Sunday during semesters and many weekends between semesters.

Most computing laboratories are open 24 hours a day, seven days a week. They either allow open access or access via a lock whose combination is issued to authorised students.

Full information on system scheduling, backup times, opening hours, and operator coverage is provided by the Computing Services Help Desk on 864 4275.

Management Information Systems

QUT is a large modern organisation which makes extensive use of automated information systems in its management. The Management Information Systems section is responsible for the planning, analysis, design, development, coordination, and support of these systems. Important systems include the personnel/payroll system, the student information system, the finance system, and the equipment system. Management Information Systems also undertakes the production of specific information systems for schools and departments on a contract basis.

User Assistance

The department provides a broad range of services to assist users in making the most of computing facilities. These include:

- A help desk giving direct assistance to University staff on all aspects of computer use. You may seek help by personal visit to the Help Desks at Gardens Point or Kedron Park, or via the Help Desk telephone lines on extension 4275.
- Training courses provided to staff and postgraduate students in the use of facilities, operating systems and important application programs.
- A wide range of documents which assist users in various aspects of computer use, including how to get started in using various computer systems, introductions to operating system commands, system utility programs, languages, and important application programs.
- A consultancy service to staff on a broad range of information technology issues. Specialist advice is available in areas including supercomputing, use of Computer Aided Design/Computer Aided Manufacture, statistical analysis, and typesetting.
- A data conversion service, converting files between various formats and media.
- A data entry service, particularly appropriate for users with large quantities of data (such as survey data for statistical analysis).
- A contract programming service specialising in services such as technical programming, data analysis, and the development of departmental information systems.
- Services providing the evaluation, purchase and installation of hardware, software and consumable items.

Field Service and Repair
Computing Services undertakes to maintain and repair items from a list of recommended computing equipment. This list of recommended equipment is available from Computing Services to aid sections of the University in making their purchases, and covers a wide range of items.

Charging
Unless explicitly stated, no actual transfer of funds occurs when Computing Services undertakes computer processing work solely for the education of QUT staff or students or for QUT administration. Accounts are generated, however, for record and control. Facilities are sometimes made available for external use for specifically agreed projects and at commercial rates listed in the schedule of charges.

Rules
Rules have been designed to encourage the best use of the University’s computing resources by all authorised users. Summaries of the rules are posted in laboratories and a full list is available from the department. All users are expected to respect these rules.

Counselling and Health Services
The Department of Counselling and Health is an autonomous professional department of the University, which takes an active role in promoting the personal, career and educational development of students and staff and providing for their health and well-being.

Counselling and Careers Services
The Counselling Section assists with normal development needs. Personal and social matters, educational difficulties, welfare and financial issues, and decision making on future career and personal planning are some of the areas handled by counsellors.

The Careers Section organises the Campus Interview Program for final year students, and helps students prepare for these interviews. It also conducts a survey of graduate destinations in the year following graduation.

The Counselling and Careers Service offers programs designed to aid the development of personal maturity and effective patterns of living, studying and working. These include
workshops on interpersonal communication, assertiveness, job-hunting skills and career planning; stress management groups; and reading efficiency and tertiary learning skills programs.

Complementing these is a range of general welfare and guidance services, including financial aid, course and career information, and an accommodation self-help service. Contact with many other agencies in the community offering services to students is also provided.

Services are provided by professionally qualified staff. Facilities vary across campuses but generally include consultation rooms, and a library of course and welfare information. Services are free of charge and available to students (both full and part-time) and staff at all campuses, as well as to others intending to enrol at QUT in the future. All consultations are strictly confidential. Counsellors are available during normal University hours; however, out-of-hours appointments can be arranged.

Health Services
QUT Health Services are available to all students and staff. Provided are:

Comprehensive general practice patient-care: Lifestyle advice, including information on exercise, stress, drugs and sexually transmitted diseases; minor surgery including removal of warts, moles and sunspots; pathology services including blood tests.

‘Well-woman’ care: smear tests, breast examination and contraceptive advice.

Campus accident and emergency care: First aid treatment of injury and acute illness occurring on campus.

On-going nursing care: General advice on health maintenance; continuing care of injuries, and minor operations; surveillance of medical conditions such as hypertension, asthma, diabetes; vaccinations and international travel advice; health education information and pamphlets.

Health Services are available on each campus and all consultations are strictly confidential.

A Medicare card or Medibank book (for international students) is necessary for medical consultation.

Students with Disabilities/Health Problems

Students with disabilities or health problems who may require special assistance or support during their studies are encouraged to make early contact with the Department of Counselling and Health (telephone (07) 864 2383) or the relevant course coordinator. They are also requested to indicate such special needs at enrolment. Those with temporary disabilities arising from accidents and illness that may occur during the year should also make known their needs if special support services are required.

The University seeks to provide appropriate support services for students with disabilities. These may include:

- accessible parking for those with mobility problems
- effective learning/study skills workshops
- scheduling classes in accessible rooms
- lending special audiovisual equipment
- assistance to access library resources
- lecture material in different formats such as tapes, braille, large print, computer disks
- a note-taker to assist in lectures
- an interpreter for deaf students
- alternative academic assessment procedures.

Early contact should be made with a counsellor or the course coordinator to discuss special needs. Assistance with physical and study facilities and informing appropriate staff of special needs can be expedited with early notice. An information booklet – A Guide to Students with Disabilities – is available on request from the counsellor.

Institute of Applied Linguistics

The Institute of Applied Linguistics was established in 1987. Its major functions are:

- to develop non-award English language courses
- to undertake consultancies and research in applied linguistics and TESOL
- to conduct non-award courses in the field of applied linguistics and TESOL
- to offer award programs in applied linguistics and TESOL
- to meet the English language needs of overseas trained professionals through ESL, ESP (English for Specific Purposes) and EAP (English for Academic Purposes) programs.

The Institute is primarily a conduit for overseas students to the University’s undergraduate and graduate programs. Many students who complete the ELICOS (English Language Intensive Courses for Overseas Students) programs pursue formal award courses offered by the University; some go to other tertiary institutions in Australia. The University provides on-going English language support to overseas students who need assistance.

In addition to ELICOS, the Institute conducts English language programs for overseas-trained migrants who wish to update their skills or who wish to enter their professions in Australia. The Department of Immigration, Local Government and Ethnic Affairs (DILGEA) sponsors the Migrant Professional Program.
Staff at the Institute have particular expertise in the area of language proficiency testing. One member of staff has an international reputation in language testing, having worked on the development of the Australian Second Language Proficiency Ratings (ASLPR) and the International English Language Testing Service (IELTS). IAL staff have been involved in language education programs in Afghanistan, Austria, China, Ethiopia, Papua New Guinea, South-east Asia, the Middle East and several other countries.

Staff at the Institute have been successful in securing international consultancies in applied linguistics and TESOL. The Director has designed and developed UNESCO projects in Afghanistan, Mongolia and China. The project in China will greatly influence the training of ESL teachers in four provinces of remote South-west China and more importantly, the project may eventually affect the teaching of English to as many as seven million secondary school students. IAL staff have also had consultancies in Australia, Britain, Indonesia, the Maldives, Thailand and the United States of America.

Research interests within the Institute include:
- language testing
- language learning styles
- language teaching methodology and materials
- syllabus design and evaluation
- English for Specific Purposes.

Director: E.V. Burke, CertT Asopa, MA Lanc., Dip TOEFL Trinity Coll.(Lond.), PhD MSU

International Students

An international student is any student who is not a citizen or permanent resident of Australia or New Zealand.

Attendance

To meet student visa requirements, a student must be enrolled full-time, i.e. 75% or more of a full-time credit load. Special approval must be obtained through the Office of International Students for a student to study on a part-time basis.

Application and Enrolment

All international students, except those studying Year 12 in Australia, should apply on an 'F' form. Year 12 students should apply through QTAC.

Following acceptance of an offer and payment of one semester's fees and health cover charges, a student will be issued with an Acceptance Advice form to apply for a visa to travel to Australia. Enrolment will be completed during Orientation.

Requests for change of course and other variations to enrolment should be directed initially to the Office of International Students on the appropriate forms.

Fees

Information on international student tuition fees is available from the Office of International Students. Tuition fees include student guild payments, all international
student support services including airport greeting, accommodation advice and English language support. International students are exempt from HECS.

Tuition fees must be paid by the due date in order for re-enrolment to be confirmed for the following semester. Failure to re-enrol will result in the cancellation of the student’s visa. The Overseas Student Health Cover (OSHC) charge must be paid every 12 months before re-enrolment can be confirmed.

Students returning to full-time study after a period of absence are required to pay the tuition fees appropriate at the time of return.

Tuition fees are partially refunded for withdrawal from the course up to the end of Week 6 of the semester. After that time, no refund is available.

Fees for students on approved part-time study are levied pro rata, according to the proportion of full-time credit points being studied.

In some limited cases, applicants on temporary resident visas may be allowed to enrol part-time as visiting students. Fees are levied on a pro rata basis as for other part-time international students.

**International Student Services**

International Student Services provides special assistance to overseas and migrant students. Reception, orientation, accommodation and ESL training are some of the services provided. International Student Services also provides information and advice to the spouses and families of international students and to staff members.

These services are available on each campus at the International Student Services office or through Counselling Services.

**University Library**

Students and staff of the Queensland University of Technology have access to a wide range of information, audiovisual and communication services including professional advice in these areas. Holdings of books, periodicals and other media have been developed in conjunction with teaching and research in the University and primarily reflect these activities. Materials are arranged on open access shelving. Access is provided via online catalogues available within the buildings, via campus networks, and on a dial-in basis for persons with modems.

**Locations**

Libraries are located on all campuses. There is a separate Law Library at Gardens Point.
Hours

Hours differ from campus to campus and sometimes from different service points within locations. Full opening hours details are advertised at each location and through a variety of publications.

Membership

All staff, full-time and part-time students are automatically members of the Library and may borrow materials on any campus. Identification card(s) are required whenever and wherever a user borrows.

The QUT Library has extensive reciprocal borrowing arrangements with Griffith University. As well, staff and students may also be eligible to register for reciprocal privileges from a number of other tertiary institutions.

Services

A variety of services is available on most of the campuses.

Information Services: Staff are on duty at the Information Desks to answer queries and assist users in finding and using collections and resources. If the materials required by users are not held on their home campus, they may request an intercampus loan. Similarly, users with special research needs may be eligible for an interlibrary loan if the items are not held anywhere within the QUT. Special reciprocal loans may be requested if the items are held by Griffith University. Online searches of a large number of databases are also available.

Academic Liaison: Consultation with academic staff on the development of resources and services is promoted through a liaison service. A reference librarian works closely with each School in order to ensure that collections and programs will reflect their priorities.

User Education: Professional staff teach students efficient information-seeking skills through a variety of formal and informal programs. Teaching staff interested in these programs should contact their reference librarian and students should enquire at the Information Desk or ask their lecturers.

Other facilities: Facilities for study include study carrels, seminar rooms, lecture theatres and supporting audiovisual and computing and photocopying facilities. Translation services, displays and appropriate consultancy are also available. Guides to collections and services may be found on all campuses near the main entrance. Students and staff of the Queensland University of Technology have access to a wide range of information, audiovisual and communication services including professional advice in these areas. Holdings of books, periodicals and other media, including equipment, have been developed in conjunction with teaching and research in the University and primarily reflect these activities. Materials are arranged on open access shelving. Access is provided via on-line catalogues available within the buildings, via campus networks, and on a dial-in basis for persons with modems.
PRIZES AND AWARDS

Faculty of Arts
Dorothy Birt Memorial Prize
Awarded to the most outstanding student enrolled in the Master of Arts (Visual Arts) in the history of textiles.

Faculty of Built Environment and Engineering
The majority of prizes awarded to students in the Faculty of Built Environment and Engineering are determined on the basis of excellence in subjects nominated by the prize donor, and in most instances students do not apply for the awards.

* An asterisk indicates those few prizes which require students to apply in order to be considered.

Amatek Rocla Prize
Awarded to the Bachelor of Engineering (Civil) third year student who achieves the best academic results from the final examination and class assignment in ‘Construction Management and Economics’ and ‘Construction Practice’.

Applied Micro Systems Australia Pty Ltd Prize
Awarded to the best first year student of the Bachelor of Applied Science (Surveying) course.

Applied Micro Systems Australia Pty Ltd Prize for Engineering and Detail Surveying
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in engineering and detail surveying.

Association of Public Authority Surveyors Prize
Awarded to the Bachelor of Applied Science (Surveying) Stage I student who achieves the best academic result in the subject ‘Land Surveying 1’.

Australian Asphalt Pavement Association (Queensland) Prizes
Awarded:
☐ to the student in the Bachelor of Engineering (Civil) course who shows the most promise in the subject ‘Highway Engineering’; and
☐ to the student in the Bachelor of Engineering (Civil) course who shows the most promise in the subject ‘Transport Engineering 1’.

Australian Construction Services Prize
Awarded to the student with the best overall performance in the subjects ‘Electrical Machines’ and ‘Electrical Energy Utilisation’ whilst enrolled in the Bachelor of Engineering (Electrical and Computer Engineering) course.

Australian Design Council Student Award
Awarded to the student developing the most outstanding product design during their industrial design studies at the Queensland University of Technology.

Australian Federation of Construction Contractors – Civil Engineering Award*
Donated by the Australian Federation of Construction Contractors and awarded to a final year student from the Bachelor of Engineering (Civil) course who has achieved a sound academic record and who is seen as likely to make a significant contribution to the

* Applications required.
construction industry. The candidates for this award will be interviewed by the AFCC who will make the final selection.

**Australian Federation of Construction Contractors – Construction Industry Award**
Awarded to a student from one of the courses: Bachelor of Engineering (Electrical and Computer Engineering), Bachelor of Engineering (Mechanical), Bachelor of Applied Science (Construction Management) or Bachelor of Applied Science (Quantity Surveying), who has achieved a sound academic record and who is seen as likely to make a significant contribution to the construction industry. One candidate will be nominated from each course and interviewed by the AFCC who will make the final selection.

**Australian Institute of Building, Queensland Chapter Prize**
Awarded to the student with the best academic achievement in the third or successive years of the Bachelor of Applied Science in Construction Management.

**Australian Institute of Cartographers (Queensland Division) Prizes**
Awarded:
- to the best final year student in the Associate Diploma in Cartography for their performance over the whole course; and
- to the best student of the Bachelor of Applied Science (Surveying), Cartography strand for their performance during the year.

**Australian Institute of Engineering Associates (Brisbane Branch) Award**
Awarded to the outstanding graduate of an Associate Diploma in Engineering.

**Australian Institute of Project Management, Queensland Chapter Prizes**
Awarded:
- to the Graduate Diploma in Project Management student with the highest grade point average for the course; and
- to the Master of Built Environment (Project Management) student with the best dissertation.

**Australian Institute of Queensland Surveyors, Queensland Chapter/David McNeill Memorial Award**
Awarded to the final year student of the degree in Quantity Surveying who, in the opinion of the adjudicator, shows the highest standard of proficiency in quantity surveying expertise.

**Australian Institute of Refrigeration, Air Conditioning and Heating (Queensland Division) Prize**
Awarded to the student associated with the industry, who obtains the best performance in subjects in the School of Mechanical and Manufacturing Engineering dealing with refrigeration, air conditioning or heating.

**Australian Road Federation Road Study Award**
Awarded to a student enrolled in the Bachelor of Engineering (Civil) course who prepares the best assignment in the subject ‘Transport Engineering I’.

**Paddy Behan Memorial Prize – Design in Landscape Architecture**
Donated by the Local Government Association of Queensland and awarded to the student in the Graduate Diploma in Landscape Architecture who shows the most outstanding ability in the final year elective ‘Design Study’.

**Paddy Behan Memorial Prize – Planning Study**
Donated by the Local Government Association of Queensland and awarded to the student with the best performance in either the subject ‘Research Methods and Individual Project’
in the Graduate Diploma in Urban and Regional Planning course, or the ‘Thesis’ in the Urban and Regional Planning strand of the Master of Applied Science.

**Board of Architects of Queensland Prizes**
Awarded:

- □ to the student who shows the greatest proficiency during the first three years of the architecture course; and

- □ to the student who has shown the greatest proficiency on graduation from the Bachelor of Architecture course.

**Andrew Brock Memorial Prize**
Donated by the staff of Utah in memory of Andrew Brock, and awarded to the student with the best performance in the second year of the Bachelor of Built Environment course.

**Robert S. Brodribb Memorial Prize**
Donated from monies held in trust by the University on behalf of the Local Government Engineers Association and Mrs R. S. Brodribb, and awarded to the student exhibiting the most outstanding performance in those subjects related to, or qualifying persons for, the issue of a Certificate of Competency as a Local Government Engineer.

**CMPS Prize**
Donated by Crooks Michell Peacock Stewart (Qld) and awarded to the student, who on completion of the second year, has the potential to become a useful member of the engineering profession. The prize will be determined with 60% based on grade point average and 40% based on a personal interview to assess: interpersonal skills, participation in campus activities, plans for future in the profession.

**Cottrell Cameron & Steen Surveys Pty Ltd Prize**
Awarded to the student in the Bachelor of Applied Science (Surveying) course who obtains the best result in the subject ‘Photogrammetry 2’.

**Course Administrator’s Prize for Leadership**
Donated by the staff of the School of Surveying and awarded to the graduate of the Graduate Diploma in Surveying Practice course who has exhibited leadership skills in the operation of the student functional committees.

**Peter W. Dawson & Associates Pty Ltd Prize for Practice Law**
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in ‘Practice Law’.

**Dean’s Award for Excellence**
Awarded to the top graduand in each undergraduate course in the Faculty of Built Environment and Engineering.

**Design Institute of Australia Award**
Awarded to the outstanding student in Product Design in the final year of the Graduate Diploma in Industrial Design.

**DSTO Microwave Radar Undergraduate Prize**
Awarded to the final year undergraduate student in Electrical or Electronic Engineering who submits the final year project of exceptional merit in an area of technology relevant to microwave radar.

**Electric Energy Prizes**
Donated jointly by QEC and SEQEB and awarded:

*Applications required.*
to the Bachelor of Engineering (Electrical and Computer Engineering) student specialising in Power and Control in the later years of the course, with the best performance in designated subjects relevant to electric energy; and

to the graduate of the Associate Diploma in Engineering course with the best performance in designated subjects relevant to electric energy.

Engineering and Surveying Alumni Award
An award will be made to a final year degree student from each engineering school for excellence in the presentation of a seminar. The seminar may be based on final year project work or on an industry-related project approved by the school. Award winners will be selected at school level to represent their respective disciplines. A judging panel will select an overall winner at an evening presentation of the seminars which will be attended by members of industry, the public, staff and students from the Faculty.

Golder Associates Geotechnical Engineering Studies Award*
Donated by Golder Associates and awarded to a student of the Bachelor of Engineering (Civil) course. The award is made to a student who obtains the highest aggregate marks for the subjects ‘Geology for Engineers’, ‘Soil Mechanics 1’ and ‘Soil Mechanics 2’ and in addition, is interested in working in geotechnical engineering and is seen to have personal skills and attributes required for advancement within that field.

John Grayson Pike Memorial Prize for Cadastral Surveying
Donated by the Association of Consulting Surveyors (Queensland) and Pike Mirls McKnouly Pty Ltd and awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in cadastral surveying.

James Hardie Design Award
Awarded to the student in the third, fourth or fifth year of the architecture courses whose nominated design project shows the most imaginative use of building materials to enhance the design.

James Hardie Prize for Building
Awarded to the student in the third year of the degree course in Construction Management with the best results over five semesters in the subject ‘Construction’.

Hardie Iplex Pipeline Awards*
Donated by Hardie Iplex Pipelines and awarded to a student enrolled in the penultimate year in each of the degree and associate diploma courses in Civil Engineering. The awards are made on the basis of academic performance in subjects related to water engineering or engineering practice, together with consideration of the student’s interests and involvement in engineering practice and activities both within the University and the community.

Heilbronn and Partners Pty Ltd Prize
Awarded to the student with the highest average result in the subjects ‘Land Development Practice 1’ and ‘Land Development Practice 2’.

Heilbronn and Partners Pty Ltd Prize for Survey Project Management
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in ‘Survey Project Management’.

* Applications required.
Honeywell Limited Prize
Awarded for outstanding academic performance by a Bachelor of Engineering or Associate Diploma in Engineering student in the field of instrumentation and automatic control.

F. R. Daniel Huston & Associates Prize for Building Control Surveys
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in 'Building Control Surveys'.

IBM Prize for Excellence
Awarded annually to a student in the Bachelor of Engineering/Bachelor of Applied Science (Electronics and Computing) double degree for excellence in the course.

Institute for Drafting and Design Australia Prize
Awarded to a graduate of an Associate Diploma in Engineering course who obtains the best aggregate result over any four engineering drawing subjects.

Institute of Radio and Electronics Engineers, Australia Prizes
Awarded:
- to the student who performs best in subjects relating to electronics and communications in the final year of the Bachelor of Engineering (Electrical and Computer Engineering) course; and
- to the student who performs best in subjects relating to electronics and communications in the final year of the Associate Diploma in Electrical Engineering course.

Institution of Electrical Engineers, United Kingdom Prize
Awarded to the honours student submitting the best project in the final year of either the Bachelor of Engineering (Electrical and Computer Engineering) or Bachelor of Engineering/Bachelor of Applied Science (Electronics and Computing).

Institution of Engineers, Australia Prize – Electrical Engineering
Awarded to the graduand with the highest grade point average who is also a student member of the Institution of Engineers, Australia.

Institution of Engineers, Australia – J. H. Curtis Award
Donated by the Institution of Engineers, Australia (Queensland Division), and awarded annually to the Bachelor of Engineering student who submits the best final year project.

Institution of Surveyors, Australia (Queensland Division) Centenary Prize
Donated by the Institution of Surveyors, Australia (Queensland Division), and awarded to a student completing second year studies at the Queensland Centre for Surveying and Mapping Studies, who demonstrates a good academic record and a sincere interest in the surveying profession.

Institution of Surveyors, Australia (Queensland Division) Prize for Professional Practice
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has demonstrated a high level of professionalism and a commitment to working for the furtherance of the profession.

Institution of Surveyors, Australia (Queensland Division) – S. E. Reilly Prize
Donated by the Institution of Surveyors, Australia (Queensland Division), and awarded to the student completing the final year of an undergraduate degree course who is judged most proficient in practical work as well as academic work, taking into account
community spirit as displayed by willingness to take part in activities outside the scope of the formal degree course.

**Jasco Pty Ltd Prize**
Awarded to the part-time Associate Diploma in Engineering student who gains the best aggregate mark for 'Engineering Drawing 1' and 'Engineering Drawing 2', and who successfully completes all subjects in semesters 1 and 2 and enrolls in all subjects for semester 3.

**John Kindler Memorial Prize***
Awarded in memory of Mr John Kindler, former Chief Engineer in the Coordinator General’s Department, to a graduate of the Bachelor of Engineering course, for outstanding performance throughout the course. Selection is based not only on academic achievement, but requires an involvement in sport, campus and general community activities, concern for and relation with peers, and a mature approach to their potential as a graduate.

**Keilar Fox & McGhie Pty Ltd Prize for Mapping**
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in ‘Mapping’.

**Don King-Scott Memorial Prize**
Donated by the Queensland Division of the Australian Water and Wastewater Association, and awarded to the graduating student who gains the highest aggregate mark in the three subjects ‘Water Quality Engineering’, ‘Public Health Engineering Practice’ and ‘Advanced Treatment Processes’ in the Graduate Diploma in Municipal Engineering course, or the Master of Engineering Science (Civil) course.

**Karl Langer Memorial Award**
Donated by the Australian Institute of Landscape Architects and awarded to the student in the Graduate Diploma in Landscape Architecture course who, in the opinion of the adjudicators, shows marked potential for the practice of landscape Architecture.

**Leica Instruments Pty Ltd Prizes**
Awarded:

- to the student in the Associate Diploma in Cartography course who obtains the highest average mark in the subjects ‘Introductory Cartography’ and ‘Survey Drafting’; and

- to the top student in the subject ‘Data Presentation I’ in the Bachelor of Applied Science (Surveying) course.

**Local Government Engineering Prize**
Donated by the Queensland Foundation for Local Government Engineering, and awarded to the graduating Bachelor of Engineering (Civil) student who obtains the best overall performance in the subjects: Civil Engineering Design 2, Transport Engineering 1, Public Health Engineering 2, Construction Planning and Economics, and, where appropriate, Design Project and/or electives.

**Louvre Windows Australia Pty Ltd Prize**
Awarded to the student who obtains the highest pass in the subject Financial Management for Engineers in the final year of the Bachelor of Engineering (Mechanical) course.

**Neville Lund Memorial Prize**
Awarded to the student in the final year of the Bachelor of Built Environment (Landscape Architecture/Urban and Regional Planning major) for the best project in integrated environmental design.

*Applications required.*
Peter McAnally Memorial Prize
Donated by the staff of the School of Civil Engineering in memory of their esteemed colleague and lecturer in Geotechnical Engineering, and awarded to the best student in the elective subjects ‘Geotechnical Engineering 2’ and ‘Geotechnical Engineering 3’.

MIM Holdings Limited Prize
Awarded to a student in the final year of the Bachelor of Engineering course who undertakes a project of mutual benefit to the University and MIM Holdings Limited and which is of a high academic standard.

Minister for Housing and Local Government Town Planning Prize
Awarded to the final year student whose thesis is considered to contribute most towards the advancement of town planning in the area of local government.

MTIA – F. L. Hudson Memorial Foundation Achievement Award
Awarded to the part-time student in the Associate Diploma in Mechanical Engineering course who successfully completes all subjects in the first three years of the course and who has the highest aggregate score over those three years.

National Trust Historic Building Prize
Awarded to two final year students one from the School of Architecture, Interior and Industrial Design and one from the School of Planning and Landscape Architecture for a thesis study of an historic building or precinct.

Office Operations Prize
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of proficiency and demonstrated significant potential in ‘Office Operations’.

QEC Awards for Instrumentation and Control
Awarded:
- to an Associate Diploma in Electrical Engineering student for high academic performance in the field of instrumentation and automatic control; and
- to a student from the Bachelor of Engineering (Electrical and Computer Engineering) or Bachelor of Engineering/Bachelor of Applied Science (Electronics and Computing) course for high academic performance in the field of instrumentation and automatic control.

Queensland Cement Limited Prize
Awarded to the fourth year student in the Bachelor of Applied Science (Construction Management) course with the best academic performance in building technology subjects over the four years of the course.

Queensland Department of Transport Prizes
These prizes are awarded to officers of the Queensland Department of Transport in attendance at the University, with the best performances in the following courses: Bachelor of Engineering (part-time), Associate Diploma in Engineering (cadet draftsperson), and Bachelor of Engineering (full-time Queensland Department of Transport scholarship holder).

RACQ Prize in Highway Engineering
Awarded to the final year graduating full-time or part-time student in the Bachelor of Engineering (Civil) course who attains the highest average marks in Highway, Traffic and Transportation subjects, including any related final year project.
Rider Hunt Research Prize – Quantity Surveying
Awarded to the student in the Bachelor of Applied Science (Quantity Surveying) who has submitted the research paper on a topic related to the Quantity Surveying profession judged to have the highest standard in both content and presentation.

Royal Australian Institute of Architects – QIA Medallion
Awarded to the most outstanding student in the sixth year of the Bachelor of Architecture course. The student must have shown consistent progress throughout the course.

Royal Australian Planning Institute Prizes
Awarded:
- to the final year student with the best performance in course work in the Graduate Diploma in Urban and Regional Planning course;
- for the best performance by a student in the Planning and Landscape Architecture strand of the Bachelor of Built Environment course;
- for the best performance by a first year full-time student in the Graduate Diploma in Urban and Regional Planning course; and
- for the best performance by a first year part-time student in the Graduate Diploma in Urban and Regional Planning course.

A. G. Scott Memorial Prize
Donated by Mr and Mrs Scott from monies held in trust, and awarded annually in memory of Mr A. G. Scott a graduate of the Bachelor of Engineering (Mechanical) course, to the student in the Bachelor of Engineering course who demonstrates the greatest gain in innovative ability and competence in mechanical engineering design, or attains the best overall performance in design work.

Michael P. Schloman Memorial Prize
Awarded to a full-time or part-time student undertaking the Bachelor of Built Environment who at the first attempt shows the greatest overall proficiency in the first year units of this course or its equivalent, based on weighted grade average.

Society for Growing Australian Plants Prize
Donated by the Society for Growing Australian Plants and awarded to a student in the Graduate Diploma in Landscape Architecture course for the best design using Australian native plants.

Survey and Development Services Prize for Innovations and Systems Development
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has demonstrated a capacity to look to the future and who has the potential to provide leadership in innovative technology.

Surveying Staff Land Studies Prize
Donated by staff within the QUT School of Surveying and awarded to the student in the Bachelor of Applied Science (Surveying) course who completes second year with the highest average result in the subjects: ‘Land Studies A’, ‘Land Studies B’, ‘Land Administration 1’, ‘Land Administration 3’ and ‘Land Administration 4’.

Surveyor-General’s Prize for the Dux of the Course
Awarded to the graduate achieving the highest aggregate marks in the Graduate Diploma in Surveying Practice course.

Surveys for Government Prize
Awarded to the graduate of the Graduate Diploma in Surveying Practice course who has achieved a high level of understanding of the operations of government departments.
Telecom Engineering Prize
Awarded to a third year full-time student in either the Bachelor of Engineering (Electrical and Computer Engineering) course or the Bachelor of Engineering/Bachelor of Applied Science (Electronics and Computing) course completing 'Information Theory and Noise' at the first attempt, who achieves the highest semester grade point average for the semester in which 'Information Theory and Noise' is completed.

Urban Design Advisory Council Surveying Prize
Donated from a fund established by the Urban Design Advisory Council and awarded to the student enrolled in the Bachelor of Applied Science (Surveying) course who produces the best urban design in the final year of the course.

Urban Design Advisory Council Town Planning Prize
Donated from a fund established by the Urban Design Advisory Council and awarded to the student enrolled in the Graduate Diploma in Urban and Regional Planning course, who submits the best option project in the final year of the course.

VIPAC Engineers and Scientists Ltd Award
Awarded to the student with the highest aggregate result for all subjects in the third year of the full-time program in the Bachelor of Engineering (Mechanical) course.

Yamaha/Accord Computer Engineering Microelectronics Design Prize
Donated by Accord Computer Engineering Pty Ltd and awarded to a student who best demonstrates excellence in the use of micro-electronic products. The prize is oriented towards the use of Yamaha semiconductors in the areas of industrial electronics, automatic control, computer systems and telecommunications engineering.

Carl Zeiss Pty Ltd Prize
Awarded to the student in the Associate Diploma in Cartography course who obtains the best average result in the subjects: Photogrammetry 1, Photogrammetry 2 and Photogrammetry 3.

Faculty of Business
Accountancy Placements Pty Limited Prize

Canberra - Packard Prize
Awarded to the graduand undertaking major studies in Physics who has obtained the best academic record in the final year of the multidisciplinary Bachelor of Applied Science course.

Castlemaine Perkins Scholarship in Applied Chemistry
Three scholarships are offered annually for a period of one academic year. Eligible students are those who have satisfactorily completed the third semester of the full-time program of the Bachelor of Applied Science (Applied Chemistry) course. The scholarships take the form of a stipend and a book allowance, together with periods of vacation employment. Further details of the scholarships can be obtained from the Department of Chemistry. Applications must be submitted on or before 31 August each year.

CRA Exploration Mapping Prize
Donated by CRA Exploration Pty Ltd and awarded to the best project student in the Bachelor of Applied Science (Applied Geology) course for demonstrated ability in geological mapping.

George Edward Curphey Prize in Mathematics
Awarded to the student enrolled in the Bachelor of Applied Science (Mathematics) course who, in the opinion of the Head of the School of Mathematics, is the most academically outstanding graduate of the year.

George Edward Curphey Prize in Theoretical Mechanics
Awarded to the student enrolled in the Bachelor of Applied Science (Mathematics) course who obtains the best performance of the year in ‘Classical Theoretical Mechanics’,
providing that the Head of School judges the student to be of sufficiently outstanding merit.

**James Vincent Duhig Prize**
Donated by the Australian Institute of Medical Laboratory Scientists, and awarded to the student who gains the highest pass, with distinction, in the unit 'Histopathology 6' in the Bachelor of Applied Science (Medical Laboratory Science) course.

**Dupont/AIR Award**
The Dupont Prize, presented in association with the Australian Institute of Radiography and awarded to the student achieving the best academic record in the first year of the Bachelor of Applied Science (Medical Imaging Technology) course.

**Hugo Flecker Memorial Prizes**
Donated by the Royal Australasian College of Radiologists, Queensland Branch, and awarded to students in the third year of the Bachelor of Applied Science (Medical Imaging Technology) and the Bachelor of Applied Science (Radiotherapy Technology) courses respectively, who obtain the best performance in the clinical practice subjects for that year.

**GEC Automation/AIR Prize**
The GEC Automation Prize, presented in association with the Australian Institute of Radiography and awarded to the student obtaining the highest marks in the first year subject 'Treatment Planning 1' of the Bachelor of Applied Science (Radiotherapy Technology) course.

**Geological Society of Australia Medal**
Awarded to the graduand who obtains the best results in the Bachelor of Applied Science (Applied Geology) course.

**Colin Graham Memorial Prize**
Awarded from monies held in trust to the graduand from the Bachelor of Applied Science (Applied Chemistry) course who, in the opinion of the Head of the Department of Chemistry, has the best academic record over the length of the course.

**Noel Middleton Gutteridge Memorial Prize**
Donated by Mrs N.M. Gutteridge, and awarded to the student who obtains, with distinction, the highest pass over the ninth to twelfth semesters of the part-time course leading to the Bachelor of Applied Science (Medical Laboratory Science) degree.

**Haines Medical/AIR Award**
The Haines Medical Prize, presented in association with the Australian Institute of Radiography and awarded to the student achieving the best academic record in the first year of the Bachelor of Applied Science (Radiotherapy Technology) course.

**Hanimex/AIR Prize**
The Hanimex Prize, presented in association with the Australian Institute of Radiography and awarded to the student achieving the best academic record in the third year of the Bachelor of Applied Science (Medical Imaging Technology) course.

**Incitec Ltd Prize**
Awarded annually to a full-time or part-time student of the Bachelor of Applied Science course in Applied Chemistry or the multidisciplinary Bachelor of Applied Science course with major studies in Chemistry who, in the opinion of the Head of Department, shows at the first attempt the greatest overall proficiency in Year 3, semesters 1 and 2 (or the part-time equivalent) of the above courses. If no student is considered suitable in a given year, no prize will be awarded.
Michael & Elizabeth Innis Prize  
Awarded to the student who gains the highest pass with distinction in the units ‘Haematology 5’ and ‘Haematology 6’ in the Bachelor of Applied Science (Medical Laboratory Science) course.

Kodak Prize  
Awarded to the student in the Bachelor of Applied Science (Medical Imaging Technology) course, who obtains the best academic record (as determined from awarded grades) for the course completed in that year.

Julius Kruttschnitt Education Fund  
This fund has been established by the Southern Queensland Branch of the Australasian Institute of Mining and Metallurgy to provide assistance to students of geology, mining, petroleum or metallurgy from any university or college of advanced education in Queensland. Grants are made to students who find themselves with monetary problems while pursuing their studies. Successful applicants must belong to the Australasian Institute of Mining and Metallurgy. The value and duration of the award are dependent on each applicant’s circumstances. Applications may be made at any time during the year and should be addressed to the Honorary Secretary, Julius Kruttschnitt Education Fund, GPO Box 1433, Brisbane, Qld 4001.

I.M. & M.J. Mackerras Prize  
Donated by the Australian Institute of Medical Laboratory Scientists, and awarded to the student who gains the highest pass with distinction in the subject area of ‘Medical Parasitology’ within the subject ‘Microbiology 6’.

Mallinckrodt/AIR Award  
The Mallinckrodt Prize, presented in association with the Australian Institute of Radiography and awarded to the student achieving the best academic record in the second year of the Bachelor of Applied Science (Radiotherapy Technology) course.

Meadow Lea Foods – J.L. Forsyth Prize  
Donated by Meadow Lea Foods and awarded to the student who has shown the greatest proficiency in the subjects of the fifth and sixth years of the part-time course for the Bachelor of Applied Science (Applied Chemistry).

Medical Applications/AIR Prize  
The Medical Applications Prize, presented in association with the Australian Institute of Radiography and awarded to the student achieving the best academic record in the third year of the Bachelor of Applied Science (Radiotherapy Technology) course.

MIM Holdings Limited Prize  
Awarded to the student who obtains the highest mark in the subject ‘Field Excursions 6’ in the Bachelor of Applied Science (Applied Geology) course.

Mining and Metallurgical Bursaries Fund Prizes  
Donated by the Australasian Institute of Mining and Metallurgy and awarded to the students of the Bachelor of Applied Science (Applied Geology) course who show the most outstanding potential in completing the course.

Nursery Industry Association Prize  
To be awarded to the second year student with the highest aggregate marks in the subjects ‘Plant Physiology 1’ and ‘Plant Tissue Culture 1’.

PESA (Qld) Geology Award  
Awarded to the student who obtains the highest results for the third year geology subjects relating to the petroleum industry.
Physics Staff Prize
Awarded to the student completing the second year of the multidisciplinary Bachelor of Applied Science course, and undertaking major studies in Physics, who obtains the best academic record for that year.

Plant Tissue Culture Prize
To be awarded to the student with the highest aggregate marks in the subjects ‘Plant Tissue Culture 2’ and ‘Plant Physiology 2’.

Population Management Prize
To be awarded to the student with the highest aggregate marks in the subjects ‘Population Management’ and ‘Case Studies in Population Management’.

Prospectors Supplies Pty Ltd Prize
Awarded to the first year student of the Bachelor of Applied Science (Geology) course who obtains the highest aggregate marks for the year.

Royal Australian Chemical Institute Queensland Branch Prize
Awarded to the student showing, at the first attempt, the greatest proficiency in the second year of the full-time course (or its part-time equivalent) leading either to the Bachelor of Applied Science (Applied Chemistry) or to the multidisciplinary Bachelor of Applied Science with major studies in Chemistry.

Royal College of Pathologists of Australia (Queensland Committee) Prize
Awarded to the student who obtains the highest pass in the subjects ‘Microbiology 5’ and ‘Clinical Bacteriology 6’ in the Bachelor of Applied Science (Medical Laboratory Science) course.

J.R. Saal Prize
Donated by the Australian Institute of Medical Laboratory Scientists and awarded to the full-time student graduating in minimum time, who obtains, with distinction, the highest aggregate marks over all of the clinical subjects of the Bachelor of Applied Science (Medical Laboratory Science) course.

Science Alumni Prize
Donated by the Science Alumni of QUT and awarded to the field of mainstream physics with particular reference to radiation safety.

Seaworld Prize
Awarded to the student with the best overall performance in ‘Projects 1 and 2’, in the final year of the Bachelor of Applied Science (Biology) course.

Schering/AIR Award
The Schering prize, presented in association with the Australian Institute of Radiography and awarded to the student achieving the best academic record in the second year of the Bachelor of Applied Science (Medical Imaging Technology) course.

Charles O. Schloman Memorial Prize
Donated by Astra Panels Pty Ltd, and awarded to the student undertaking the Bachelor of Applied Science (Applied Chemistry) course or the chemistry major of the multidisciplinary Bachelor of Applied Science who, in the opinion of the Head of Department, shows at the first attempt the greatest overall proficiency in the second year Organic Chemistry units of the full-time course (or its part-time equivalent). If no student is considered suitable for the award in a given year, no prize will be awarded.

Charles O. Schloman Memorial Prize (Physical Chemistry)
Awarded annually to a full-time or part-time student of the Bachelor of Applied Science (Applied Chemistry) course or the multidisciplinary Bachelor of Applied Science – Chemistry major course who, in the opinion of the Head of Department, shows at the
first attempt, the greatest proficiency in the second year Physical Chemistry subjects of the full-time course (or its part-time equivalent). If no student is considered suitable for the award in a given year, no prize will be awarded.

**Surface Coatings Association (Qld Section) Prize**  
Awarded to a final year student enrolled in a course within the Department of Chemistry who has obtained the best results in Materials Science studies in the final year of Applied Chemistry, covering ‘Materials Science 1 and 2’.

**Toshiba/AIR Ultrasound Prize**  
The Toshiba Ultrasound Prize, presented in association with the Australian Institute of Radiography and awarded to the student who achieves the best academic record in the first year of the Master of Applied Science – Medical Ultrasound major.

**Byron Watkins Prize**  
Awarded annually in honour of Byron Watkins, the foundation Chief Instructor of the Chemistry Department of the former Central Technical College. The award is sponsored by the Industrial and Applied Chemistry Past Students’ Association.  
It is made to the graduating student in the Chemistry major of the Associate Diploma in Applied Science course, who shows the highest level of achievement during the course.

**Winthrop/AIR Travelling Fellowship**  
The Winthrop Travelling Fellowship, presented in association with the Australian Institute of Radiography and awarded to the graduand of the Bachelor of Applied Science (Medical Imaging Technology) or (Radiotherapy Technology) course who achieves the best academic record over the three-year course.
STUDENT GUILD

The QUT Student Guild plays a major role in the life of the University by providing students with services, facilities, activities and representation that enhance campus life. All students are members of the Guild, and as such, have access to all Guild services. The Guild can only continue to be effective through the support and involvement of its members.

Guild Council

The Guild is governed by Guild Council which consists of the Executive (President, General Secretary, Women's Services Director, Education Director, Welfare Services Director, Recreation Director and four Campus Directors), faculty representatives and specialist representatives (for postgraduate students, part-time and external students, Aboriginal and Torres Strait Islander students and overseas students).

All members of Guild Council are elected at the annual general elections and all students are eligible to stand for positions in the elections. Students can also nominate and vote for campus coordinators, who organise activities, events and services on the respective campuses.

Facilities and Services

The Guild operates Student Information Centres on each campus. Students can access a variety of services, facilities and equipment through these centres and staff are able to assist with enquiries about all aspects of the Guild and campus life.

The following is a list of the services provided by the Guild. Further details can be obtained by contacting the relevant campus Student Information Centre.

Education and Welfare Services

ACADEMIC APPEALS ASSISTANCE
A member of staff is available to assist students wishing to appeal against an academic grade or academic ruling (eg exclusion) of the University. The service is free to members. For more information telephone (07) 864 4010.

AUSTUDY ADVICE
Specialist advice is available on how to apply for Austudy or appeal a decision on Austudy eligibility. The service is free to members. For more information telephone (07) 864 4009.

LEGAL SERVICE
The Guild retains Caxton Legal Service to provide advice and assistance to students. Appointments can be made through the relevant campus Student Information Centre. The services is free to members.

STUDENTPLAN ACCIDENT INSURANCE
All full-time and part-time students of the University are covered by StudentPlan Accident Insurance, a comprehensive policy that provides medical, hospital and other benefits to students in the event of most types of accidents, whether at home, work or during recreation activities. Enrolled students are covered 24 hours a day, anywhere in
the world. Further information is available from your campus Student Information Centre.

ACCOMMODATION SERVICE
The Guild is able to assist students to find suitable accommodation including hostels, flats, private board, and share houses. Accommodation noticeboards are maintained on each campus. Contact the relevant campus Student Information Centre. The service is free to members.

CHILD CARE CENTRE
The Guild operates a Child Care Centre at Gardens Point that caters for 25 children per day Monday to Friday. Fees are reasonable and government subsidies and fee relief are available. For enquiries telephone (07) 864 1690. The Guild will also be sponsoring a new child care centre to be built at Carseldine during 1992.

SECONDHAND BOOKSHOPS
A wide range of secondhand books is offered for sale through Guild offices and Student Information Centres on all campuses. Students may leave unwanted texts with the service for disposal. A small handling fee is charged.

COURSE EVALUATION HANDBOOK
The Guild conducts surveys of students each year to determine their opinion on matters relating to their courses, lecturers and general standard of education received. A handbook containing results of surveys and other general education information is published each year.

NATIONAL UNION OF STUDENTS
The Guild is a member of the National Union of Students (NUS) and participates in a range of State and national forums on education issues. All students are eligible to nominate and vote for NUS delegates.

Sport, Recreation and Activities

QUT SPORTS CENTRE
The QUT Sports Centre is located at Gardens Point and is open seven days a week. It contains a 25-metre indoor heated swimming pool, three squash courts, a sundeck and kiosk. Activities include rebound volleyball, table tennis, aqua-aerobics, training sessions, learn-to-swim classes and general fitness and relaxation swimming. For enquiries telephone (07) 864 1688.

GYMNASIUMS/FITNESS CENTRES
The Guild operates gymnasiums at Kelvin Grove (telephone (07) 864 3710) and Gardens Point (telephone (07) 864 1685) offering fitness assessments, weights, aerobics, squash courts (Kelvin Grove), and sports medicine clinics. Other recreation activities are also available.

PHYSIOTHERAPY CENTRES
The Guild contracts with a physiotherapy clinic to provide a physiotherapy service at Kelvin Grove (telephone (07) 864 3711) and Gardens Point (telephone (07) 864 1687). Fees are very reasonable.

WEIGHT TRAINING ROOMS
Kedron Park and Carseldine have weight training rooms available for use by students. Contact Student Information Centres for further information.

GAMES ROOMS
All campuses have games rooms containing facilities ranging from pinball machines and darts equipment to table tennis and pool tables.
CLUBS AND SOCIETIES
The Guild provides financial and organisational assistance to clubs and societies which meet the Guild’s requirements for affiliation. Clubs and societies may be educational, cultural, social, political, religious, sporting or recreational.

SPORTING COMPETITIONS
The Guild organises intercampus and interfaculty sporting competitions throughout the year. Students also have the opportunity to participate in intercollegiate sporting competitions at a state and national level.

SOCIAL AND CULTURAL ACTIVITIES
A variety of social and cultural events and activities are organised throughout the year. These include balls, cabarets, bands, barbecues, films and theatre events and may be run on each campus or as cross-campus activities. Watch noticeboards for more information throughout the year.

RECREATION COURSES
A range of recreation courses is offered by the Guild. These include ski trips, exercise courses, martial arts, massage, health and relaxation, golf, self-defence, abseiling, scuba diving, parachuting and special trips such as to the Birdsville Races. Information brochures appear throughout the year.

RECREATION EQUIPMENT
A limited equipment pool is available for use by students.

For more information about sport, recreation and activities contact: Recreation Office (Gardens Point) telephone (07) 864 1679; Recreation Officer (Kelvin Grove) telephone (07) 864 3708; Recreation Officer (Kedron Park and Carseldine) telephone (07) 864 4017.

Media and Publications

STUDENT NEWSPAPER
The Guild regularly publishes a free community newspaper called ‘UTOPIA’ to which students can contribute. It provides general information and also acts as a forum for a wide range of topics of student interest. Editors of the paper are elected each year and all students are eligible to stand for election. For more information contact ‘UTOPIA’, telephone (07) 864 1684.

PUBLICATIONS
The Guild produces a range of publications throughout the year including a diary, wallplanner, newsletters, clubs and societies handbook, the Annual Report and various brochures on services and activities.

Women’s Services

RESOURCE AREA
A Women’s Resource Room is located at Gardens Point and provides space for quiet study, a library of information and publications, a computer to assist with assignment work and coffee and tea-making facilities. Library information is also available on the other three campuses. The Guild employs a part-time Women’s Services Officer at Gardens Point and a full-time Women’s Services Officer who covers Kelvin Grove, Kedron Park and Carseldine. The Women’s Services Officers are available to assist with information, complaints and problems, and work to educate the campus community about women’s issues.
WORKSHOPS AND SEMINARS
The women's area conducts workshops and seminars on a range of topics that may either be specifically relevant to women or of general interest. Topics include health, stress management, women and politics, women and media, relaxation, women and sport, meeting procedures, assertiveness training, women and careers, and self-defence.

SPECIAL EVENTS AND ENTERTAINMENT
A number of special women's events occur each year, eg International Women's Day and Blue Stocking Week. These will often include a range of entertainment such as films, bands, theatre, dances and art exhibitions.

CAMPAIGNS AND INFORMATION
The Women's area runs campaigns throughout the year to highlight issues relating to women. These include sexual harassment, discrimination, child care, women in sport and women's health.

For more information about the Women's area and services telephone (07) 864 1682 (Gardens Point) and (07) 864 3709 (Kelvin Grove, Kedron Park and Carseldine).

Campus Student Information Centre
Staff in the Student Information Centres offer a variety of services, to assist students with their studies, and to help with general enquiries and problems.

A range of equipment for use by students is available in most Centres, including photocopiers, fordigraph machines, thermal copiers, and typewriters.

Other services provided through these Centres include identity photos (Gardens Point), stationery and stamp sales, Queensland Teachers Credit Union Agencies (Kelvin Grove, Kedron Park, Carseldine), photodeveloping (Kelvin Grove, Kedron Park, Carseldine), laminating services and sales of cassette tapes, computer disks, T-shirts and sweatshirts.

For more information contact Student Information Offices: Gardens Point telephone (07) 8644714; Kelvin Grove telephone (07) 864 3704; Kedron Park telephone (07) 864 4016 and Carseldine telephone (07) 864 4714.

Other Services
CAMPUS SHOP
The Campus Shop at Gardens Point sells a large range of calculators, shoes, sportswear, chemist lines, cigarettes and other goods and has photo developing and dry cleaning services. Telephone (07) 864 1681.

GRADUATION GOWN HIRE AND SALE
The Guild hires out gowns, hoods and caps for graduation ceremonies or photographs. Hire fees are very reasonable. Academic wear is also available for sale. Telephone (07) 864 1666.

STUDENT LOUNGES
Student lounge facilities, where students can relax or socialise, are provided by the Guild at Kelvin Grove, Kedron Park and Carseldine. Cafe bar machines are available in or near the lounges.

For further information about the Guild, its services and facilities contact any Student Information Centre or the Guild Secretariats at Gardens Point and Kedron Park. (General enquiries telephone (07) 864 1666).

The QUT Student Guild is owned by and operated for students.
Queensland University of Technology houses a significant collection of more than 800 International and Australian paintings, sculptures, decorative arts and works on paper, including prints, drawings and watercolours. These holdings represent the fourth largest public art collection in Queensland.

The Collection encompasses works of art from the mid-nineteenth century to the present day. Its greatest strengths lie in the group of works by Queensland-based artists and extensive holdings of Australian art of the 1970s.

Other holdings of importance include: the George Daughtrey Bequest, comprising Australian paintings, sculptures and prints; a collection of eighteenth and nineteenth century Japanese woodcuts; the Erminio Aili Collection of naïve art; and a group of forty-five ceramics by eminent Australian potter Carl McConnell.

The University maintains a strong commitment to contemporary art through the acquisition of significant works by Australian artists. Within this principal collecting area, during 1992 priority will be given to:

- the acquisition of works by important contemporary Queensland based artists
- the further development of areas of strength in the Collection, namely Australian contemporary ceramics and prints
- the acquisition of prints, drawings and watercolours by important contemporary Australian artists, which relate to key works in the collection of Australian art of the 1970s
- the acquisition of works by Gwyn Hanssen Pigott and William Robinson as a special-emphasis program.

Housed at the Gardens Point, Kelvin Grove, Kedron Park and Carseldine campuses, the Collection is a major educational and recreational resource, relating to both the intellectual enrichment and cultural development of the University and the wider community.

Policies, objectives and funding relating to the Collection are determined by the University’s Art Collection Committee. The Collection is administered by the University Curator, Stephen Rainbird and Assistant Curator, Tracy Muche.

STUDENT RULES, POLICIES AND PROCEDURES

The following rules are based on the rules which existed prior to 1991 at the Queensland University of Technology and the Brisbane College of Advanced Education. They have been drawn up with the aim of providing the least disadvantage to continuing students. If a student considers that he or she has been disadvantaged by a change in the rules, the student should make the case in writing to the Registrar.

In these rules, reference to the Registrar includes reference to any officer of the University authorised by the Registrar to carry into effect any or all of the powers, duties and responsibilities included in these rules.

For information on the University’s admission rules and procedures please refer to the publication Admission Procedures 1993 which is available from QUT’s Admissions Section.

1. Enrolment

1.1 Deferment of enrolment
Commencing students may be granted deferment of enrolment if the request is made by the end of the second week of the first semester of enrolment in the course. The period of deferment is until the first semester of the following academic year. Unless otherwise specified, deferment is automatic in undergraduate courses. Deferment is not normally granted for postgraduate courses.

1.2 Failure to enrol following admission
Where a commencing student fails to enrol for the semester by the date specified in the University’s letter of offer, the enrolment lapses and the offer of admission is withdrawn.

1.3 Enrolment (commencing students)

FORM: Enrolment Form for Commencing Students
SOURCE: Enrolments Office, Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: Enrolments Office, Kelvin Grove campus; Campus Administration Offices

A commencing student is enrolled on completion of all of the following:

☐ application for admission
☐ acceptance of the offer of a quota place in terms of the conditions prescribed
☐ submission of a completed enrolment form and its acceptance by the University
☐ payment of prescribed fees (unless the Registrar has granted an extension of time for such payment and has accepted the enrolment subject to payment at a later prescribed date)
☐ submission of a completed HECS payment options form
☐ completion of any other required procedures.
1.4 Re-enrolment (continuing students)

FORM: Enrolment Form for Continuing Students
SOURCE: Enrolments Office, Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: Enrolments Office, Kelvin Grove campus; Campus Administration Offices

A continuing student is required to lodge an enrolment form each calendar year. A continuing student is enrolled on completion of the following:

- submission of a completed enrolment form and its acceptance by the University
- payment of prescribed fees (unless the Registrar has granted an extension of time for such payment and has accepted the enrolment subject to payment at a later prescribed date)
- completion of any other required procedures, provided that the student is not subject to exclusion, termination of enrolment or has been refused the right to re-enrol under Rule 2.

Students are required to re-enrol by the closing date for lodgement of enrolment forms for continuing students. An enrolment form lodged after the closing date may be accepted at the discretion of the Registrar on payment of a late fee.

1.5 Personal information

A student is obliged to provide personal information for statistical purposes as required by the Commonwealth Government.

1.6 Mailing address

FORM: Change to Enrolment Form or Change of Personal Details Form
SOURCE: Enrolments Office, Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: Enrolments Office, Kelvin Grove campus; Campus Administration Offices

A student is required to provide a reliable mailing address for correspondence with the University and must promptly notify the University of any change of address. Failure to receive a notice because of change of address is not sufficient excuse for missing a deadline or an obligation.

1.7 Confirmation of enrolment

Each semester, and following any change of enrolment details, the University provides students with a statement of their current enrolment program. It is the student’s responsibility to inform the University of any discrepancy in the statement in accordance with the instructions given.

Failure to correct an inaccurate record may have serious financial, administrative and academic consequences.

1.8 Nomination of enrolment program

1.8.1 Maximum and minimum semester loads

Except with the approval of the Dean of Faculty, a full-time student shall not enrol for a program which exceeds the standard credit points for a full-time semester in the course, or the number of credit points allocated to the semester of the course from which the majority of subjects has been selected, whichever is the greater.
Except with the approval of the Dean of Faculty, a part-time student shall enrol in a program with credit points totalling at least 35 per cent of the standard credit points for the full-time course.

1.8.2 Prerequisites and co-requisites

A prerequisite subject is one which must be passed before the student proceeds to a further subject which has the prerequisite so specified. A co-requisite is one which, if not previously passed, must be studied concurrently with another subject with which it is a co-requisite.

A Head of School may permit a student to undertake a subject without the student having passed the specified prerequisites if the Head of School is satisfied that the student has the appropriate background knowledge necessary for the subject. Where a prerequisite or co-requisite is designated as a repeat-requisite (indicated by the postscript [R]), the prerequisite or co-requisite may be satisfied by the student having attempted the subject without having achieved a passing grade. For the purpose of this provision, a student is deemed to have attempted the subject if the student completed all assessment requirements while enrolled in the subject. This provision allows for a student to proceed to a subject while repeating its prerequisite.

1.8.3 Right to amend enrolment programs

A Course Coordinator may amend a student's enrolment program for any of the following reasons:

- credit points exceeding the maximum allowed
- credit points less than the minimum allowed
- timetable incompatibility
- non-compliance with course rules.

1.9 Change to enrolment program

**FORM:** Change to Enrolment Form

**SOURCE:** Enrolments Office, Kelvin Grove campus; Campus Administration Offices

**SUBMIT TO:** Enrolments Office, Kelvin Grove campus; Campus Administration Offices

Students are responsible for advising the Registrar of any changes to their enrolment program. Students may only receive a result for subjects in which they have been officially enrolled.

1.9.1 Addition and substitution of subjects

Students may add subjects to their existing enrolment program up to the end of the second week of semester.

Requests received after the second week of the semester are approved only in exceptional circumstances as determined by the Registrar or relevant Course Coordinator and are subject to the payment of a late fee.

1.9.2 Cancellation of subjects

Students may cancel their enrolment in subjects except where the cancellation results in an enrolment program which has fewer credit points than the minimum allowable, or which represents a departure from a program prescribed for a student on probation. The consequences of cancellation depend on the date on which cancellation is requested.
For subjects undertaken in the first or second semesters:

(i) Cancellation in the first two weeks of the semester: The subjects are deleted from the student’s record.

(ii) Cancellation from the third week of the semester to 31 March in the case of first semester, or 31 August in the case of second semester: A status of ‘Withdrawn’ is recorded against the subjects concerned. A ‘Withdrawn’ subject is not included in the calculation of the student’s GPA.

(iii) Cancellation after 31 March or 31 August and before the end of the semester: A result of ‘Withdrawn – Failure’ is awarded unless the examiner awards a passing grade on the basis of the assessment undertaken by the student prior to cancellation.

The Registrar, on advice from the Faculty, may waive the fail result arising from late cancellation if satisfied that the cancellation was necessitated by medical, compassionate or other exceptional circumstances.

In the case of multi-semester subjects, provisions (i) and (ii) above apply only to the initial semester of the subject. For cancellation at any time in the second or subsequent semester of a multi-semester subject a result of ‘Withdrawn – Failure’ is awarded.

For subjects undertaken in the Summer School period:

(i) Cancellation in the first two weeks of the Summer School: The subjects are deleted from the student’s record.

(ii) Cancellation after the second week of the Summer School: A result of ‘Withdrawn – Failure’ is awarded unless the cancellation was necessitated by medical, compassionate or exceptional circumstances.

1.10 Change of course or major

Offers of admission to commencing students will specify the particular course and, where applicable, major for which the offer is made. Students are required to enrol and complete at least the first semester accordingly.

1.10.1 Transfer to another course or major offered by the same Faculty

FORM: Intra-Faculty Changes Form (Form I)
SOURCE: Faculty Administration Office
SUBMIT TO: Faculty Administration Office

Students who wish to transfer to another course offered by the same Faculty or to transfer to another major within the same course, may apply to do so using the Intra-Faculty Changes Form (Form I). Applications will be determined by Faculties and will be subject to the following prescriptions:

(i) if the application is made after completion of the first semester but before completion of the first year the student must have met the minimum entry level which applied for the proposed new course or major in the most recent admission period;

(ii) if the application is made after completion of the first year the student’s eligibility will be assessed according to criteria established by Deans of Faculties and published before the close of applications each year.

1.10.2 Transfer to a course offered by a different Faculty

Students who wish to transfer to a course offered by a different Faculty should apply as follows:

☐ in the case of an undergraduate course, to QTAC, using Form B
in the case of a postgraduate course, to the QUT Admissions Office, using Form P.

1.11 Change of attendance mode

FORM: Intra-Faculty Changes Form
SOURCE: Faculty Administration Office
SUBMIT TO: Faculty Administration Office

1.11.1 Definitions of attendance modes

- Full-time students are students who are enrolled for the semester in 75 per cent or more of the standard credit points for a full-time semester of the course.
- Part-time students are students who are enrolled for the semester in less than 75 per cent of the standard credit points for a full-time semester of the course.
- External students are students undertaking all subjects in a semester by external study.

1.11.2 Procedure

Offers of admission to commencing students will specify the attendance mode for which the offer is made. Students are required to enrol and complete at least the first semester accordingly.

Students who wish to change to another attendance mode may apply to do so using the Intra-Faculty Changes Form (Form 1). Applications will be determined by Faculties.

1.12 Transfer to another campus

Where a course is offered on more than one campus, students will be allocated to one of the campuses and will be required to attend that campus for at least the first semester.

Students who wish to change to another campus may apply to do so using the Intra-Faculty Changes Form (Form 1). Applications will be determined by Faculties.

1.13 Exceptions

In special circumstances Deans of Faculties may approve exceptions to policies set out above in 1.10 – 1.12, as under:

- the requirement that commencing students enrol and complete at least the first semester of their course as specified in their offer of admission; that is, no change to course, major, attendance mode or campus before the end of the first semester of the course;
- the requirement in 1.10.1(i) that students who wish to transfer to another course or major within the same Faculty must have met the minimum entry level which applied for the proposed new course or major in the most recent admission round.

1.14 Concurrent enrolment

Concurrent enrolment in two or more QUT courses is permitted except where the total study load in a semester exceeds 48 credit points, in which case the approval of the Course Coordinator of each course is required.

1.15 Alternative studies

FORM: Application to Undertake Alternative Studies
SOURCE: Enrolments Office, Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: Enrolments Office, Kelvin Grove campus; Campus Administration Offices
Alternative studies refers to the completion of a subject or subjects at QUT or another tertiary institution:

(i) in place of core subjects listed in the course structure, or

(ii) in satisfaction of elective or other requirements where the subject is not listed in a schedule of subjects for such purposes AND where the subject is offered by a Faculty other than the one responsible for the course which the student is undertaking.

An application for alternative studies requires the Course Coordinator to approve that the nominated alternative is a valid substitute in terms of the course rules. Where the alternative subject is offered by another QUT Faculty, the approval of the Dean of Faculty offering the subject is required.

Where alternative studies involve subjects taken at QUT, the subjects and results will appear on the student’s academic record in the normal way. Where the alternative studies are undertaken at another institution, it is the student’s responsibility to provide an official statement of results from the other institution. In this case credit for the alternative studies will be given in the form of exemption.

1.16 Leave of absence

FORM: Cancellation/Leave of Absence Form
SOURCE: Enrolments Office, Kelvin Grove campus;
         Campus Administration Offices
SUBMIT TO: Enrolments Office, Kelvin Grove campus;
           Campus Administration Offices

Students who find that their circumstances necessitate a period of absence from their course may request leave of absence.

For students in undergraduate courses, except where specified in the course rules, approval of leave of absence for periods up to one year is automatic. For periods in excess of one year or for students in postgraduate courses, leave of absence is subject to approval by the relevant Dean of Faculty.

In cases where leave of absence is granted after 31 March for first semester or 31 August for second semester, ‘Withdrawn – Failure’ results will be awarded except where the Registrar, on advice from the Faculty, is satisfied that the period of leave was necessitated by medical, compassionate or other exceptional circumstances.

At the end of the nominated period, students are sent a form with which to re-enrol. If they do not re-enrol, their leave of absence is terminated and their enrolment status is altered to ‘cancelled’.

1.17 Cancellation of enrolment

FORM: Cancellation/Leave of Absence Form
SOURCE: Enrolments Office, Kelvin Grove campus;
        Campus Administration Offices
SUBMIT TO: Enrolments Office, Kelvin Grove campus;
           Campus Administration Offices

Students may cancel their enrolment in a course at any time but should take into account the provisions of Rule 1.9.
1.18 Re-enrolment following a period of non-attendance

FORM: Readmission Form (Form R)
SOURCE: QUT Admissions Office, Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: QUT Admissions Office, Kelvin Grove campus; Campus Administration Offices

Students who wish to re-enter a course after a period of absence and who are not returning from leave of absence may apply to do so as follows:

☐ if re-entering the first year of an undergraduate course, apply through QTAC
☐ if re-entering the second or later years of an undergraduate course, apply to the University using Form R
☐ if re-entering any year of a postgraduate course, apply to the University using Form R.

If the student has been excluded from the course, the provisions of Rule 1.19 apply.

A student who is permitted to re-enrol following a period of absence will be required to satisfy the course requirements which apply at the time of resumption. Depending on the length of the absence and on changes to course content and structure during the intervening period, the student will not necessarily retain credit for all subjects completed prior to the absence. The Course Coordinator may require a student to repeat subjects which have been passed previously or to undertake additional subjects in order to satisfy the current course requirements.

1.19 Re-admission after exclusion

FORM: Readmission Form (Form R)
SOURCE: QUT Admissions Office, Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: QUT Admissions Office, Kelvin Grove campus; Campus Administration Offices

Students who have been excluded from a course as a result of unsatisfactory academic performance may seek re-admission to the course after a period of time. Applications for re-admission will not be considered until at least two semesters have elapsed since exclusion. Applications require the approval of the relevant Faculty Academic Board.

Application is made directly to the University on Form R and must be lodged not later than two months prior to the commencement of the semester in which the student wishes to resume. The student must submit a written statement in support of the application, which should address such factors as changed circumstances, academic and/or vocational performance since exclusion, maturity and motivation.

1.20 Time limits for completion of courses

Students are expected to progress with minimum interruption towards completion of their course.

Time limits have been established for each type of course and are measured in calendar years from the first day of the first semester in which the student was enrolled. The time limits, inclusive of periods of exclusion, leave of absence or other periods of interruption, are as follows:

- Associate diploma courses: 7 years
- Diploma courses: 10 years
- 3 and 4 year degree courses: 10 years
- Combined degree courses: 11 years
Graduate diploma courses and the in-service Bachelor of Education 4 years
Master degree courses by course work 6 years
PhD and master degree by research and thesis as per course rules

Students who exceed these limits may be asked to show cause why they should not be excluded from further enrolment in the course.

Students excluded because of failure to complete a course within time limits have the right of appeal. (See Rule 8, Student appeals.)

2. Sanctions on students who fail to meet obligations

The Registrar acting on the recommendation of an officer authorised by the Vice-Chancellor may impose sanctions on a student who has failed to meet one or more of the following obligations:
- payment of prescribed fees
- payment of late fees
- payment of fines
- return of Resource Centre/Library materials/Faculty equipment or materials
- conforming with instructions or essential procedures.

One or more of the following sanctions may be applied:
(i) withholding of results
(ii) withholding of transcript of academic record
(iii) withholding of award certificate
(iv) loss of right to re-enrol

In lieu of (i) (ii) and (iii) above a statement that the student has completed course requirements may be provided for purposes of seeking employment. The student will be informed in writing of the application of sanctions. (Refer to Section 6, Review of grades and academic rulings for provisions for appeal against the imposition of sanctions.) The sanctions will be lifted once the student has discharged the obligation which led to their application.

3. Non-award studies

3.1 Definition
Non-award students are those who have approval to undertake certain subjects from an award course without enrolling in the course itself.

Non-award students receive normal instruction, assessment and examination results in such subjects but are not admitted to undertake a complete award course.

3.2 Categories
There are two categories of non-award students:
cross-institution students who undertake QUT subjects for credit towards an award course at an Australian Commonwealth-funded institution

visiting students who undertake subjects from award courses for purposes of professional or personal development, or in order to meet course entry requirements.

3.3 Application procedure

Non-award students are required to make application for each semester in which they wish to study. Applicants are responsible for obtaining information on subject availability, suitability of their background and timetables.

An application for enrolment as a non-award student may be rejected if the applicant does not have an educational background appropriate to the subject/s applied for, or if there are insufficient places remaining in the class. An application for enrolment as a non-award student requires the approval of the relevant Dean of Faculty.

3.3.1 Cross-institution student

FORM: Cross-institution Admission Form (Form X)
SOURCE: QUT Admissions Office Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: QUT Admissions Office Kelvin Grove campus; Campus Administration Offices

An application for admission as a cross-institution student must be accompanied by documentary evidence from a recognised institution of higher education that the proposed subject/s are accepted for credit in a course offered by the institution.

3.3.2 Visiting student

FORM: Visiting Student Application Form (Form V)
SOURCE: QUT Admissions Office Kelvin Grove campus; Campus Administration Offices
SUBMIT TO: QUT Admissions Office Kelvin Grove campus; Campus Administration Offices

An application for admission as a visiting student must be lodged no later than the first day of the semester in which the study is to be undertaken. The application must be accompanied by the appropriate tuition fee.

3.4 Fees for non-award studies

Cross-institution students are required as a condition of their enrolment to make payments under the Higher Education Contribution Scheme, and to pay fees for membership of the QUT Student Guild.

Visiting students are required to pay tuition and other fees as advised by the University.

3.5 Rules relating to non-award studies

Non-award students are subject to the University’s student rules generally, with the exception of those relating to academic progress (Section 7).

A visiting student is not permitted to accumulate credits for subjects totalling more than 20 per cent of the credit points of an award course except in special cases approved by the Registrar.

Where a student is excluded from a course, the student is not permitted to enrol as a non-award student in any subject of that course except at the discretion of the Dean of Faculty responsible for the course.
4. Transfer of credit

FORM: Application for Credit
SOURCE: Credit Office, Kelvin Grove campus;
        Campus Administration Offices
SUBMIT TO: Credit Office, Kelvin Grove campus;
           Campus Administration Offices

4.1 Policy
Recognition in the form of credit will be given for study, demonstrable expertise and relevant experience, to an extent that is consistent with the maintenance of established academic standards. It is considered to be in the interests of students to facilitate their movement between institutions and between courses of various types and levels. The University has negotiated formal arrangements with a number of institutions concerning the transfer of students and the granting of agreed credit (refer Table 1); where no such arrangement exists, applications will be considered on their individual merits and in the spirit of this policy. The Course Coordinator, in consultation with the lecturer responsible for the subject where appropriate, is responsible for approving applications for credit which are not covered by a formal arrangement.

In making a determination on an application for credit, consideration will be given to the following:

4.1.1 Total credit available
The total credit available is dependent upon the length of course. For courses of up to and including one year of equivalent full-time study, credit may be given for a maximum of one-half of the credit points required for course completion. For courses exceeding one year of equivalent full-time study credit may be granted up to a limit which ensures that the student completes the equivalent of one year of full-time study.

In practice, credit will be approved for all suitable subjects until:
(i) all suitable subjects have been accounted for; or
(ii) credit has been awarded up to the total credit available limit.

Situation (i) will apply when the student has completed too little work to reach the total credit available limit, or when sufficient work has been completed but in a different field of study or at a significantly different level.

When situation (ii) occurs the student will be offered the option of accepting this quantity of credit and enrolling in the course or, alternatively, completing the course of the previous institution by means of an agreed upon program of study at QUT as a non-award student. Considerations will include how much credit the student would forfeit by accepting the amount offered, and whether or not a suitable program of study can be devised. The student’s previous institution must agree in advance to the program proposed. It is the student’s responsibility to secure the agreement of the previous institution.

4.1.2 Recency of previous studies
In determining whether credit can be granted the University must be confident of the currency of the applicant’s knowledge. Studies undertaken ten or more years previous to the date of application will not be accepted for credit purposes unless a special case is made or assessment is given to establish the currency of the applicant’s knowledge. Further, in fields where practice and technology is changing rapidly, credit may not be granted where knowledge has become dated.
4.2 Forms of credit
Three alternatives are available:

4.2.1 Specified exemption
Specified exemption will be approved when prior studies, expertise or experience satisfy the objectives and requirements of the subject for which credit is sought.

4.2.2 Unspecified exemption
Where course rules permit, exemption may be given from an unspecified subject on the basis of prior completion of studies judged to be equally acceptable within the structure of the course.

4.2.3 Block exemption
Where course rules permit, block exemption of a fixed number of credit points may be given on the basis of prior completion of studies judged to be equally acceptable within the structure of the course.

Credit may be granted on a provisional basis, in which case the confirmation of the granting of credit is dependent on the student's performance in some specified part of the course.

4.3 Application procedure

4.3.1 Timing of applications
Applicants for admission to a University course who also wish to apply for credit should do so when applying for admission. While all applications will be considered promptly, processing may not be completed before the close of enrolments unless adequate time is allowed. Students already enrolled in a University course may submit an application for credit at any time but should do so well before the commencement of any semester in which the award of credit might affect their subject enrolment.

4.3.2 Documentation
Applicants are responsible for providing an official transcript of results and copies of the outline or syllabus of subjects completed. Before doing so, applicants are encouraged to contact the appropriate Course Coordinator to determine which of their former subjects are likely to be relevant. Undocumented applications will not be considered.

4.3.3 Other requirements
Applicants for credit may be required to attend an interview or to undergo an appropriate form of assessment.

4.3.4 Notification
Decisions on applications for credit will be conveyed in writing by the Registrar.

4.4 Review of credit application decisions
Applicants for credit who are dissatisfied with the outcome of an application may have the decision reviewed and can expect to be provided with a clear indication of the reasons for the University’s ruling. The review procedure is set out in Section 6. Review of grades and academic rulings.
5. Assessment

Assessment policy
5.1 Assessment policy
Students will be assessed in accordance with the published assessment policy and practices of the Faculty offering the subject.

5.2 Notification of assessment requirements
In the first two weeks of a subject, students will be advised in writing of assessment requirements for the subject. This statement will provide details of all assessment items, including due dates, and the procedures to be used in determining the final grade.

No subsequent changes to assessment requirements will be made except by mutual agreement between the lecturer responsible for the subject and the students taking the subject, and then only if approved by the relevant Head of School.

Assessment rules
5.3 Availability for examinations
Students must be available throughout periods designated for centrally organised examinations. Examinations may be held between 8.00am and 9.00pm on weekdays, and 8.00am and 6.00pm on Saturdays.

5.4 Timetables
Timetables for centrally organised examinations will be released to students no later than two weeks prior to their commencement.

5.5 Student identification
Students must bring into the examination room and keep displayed their Student Identification Card.

5.6 Students to comply with directions
5.6.1 A student shall comply with all directions given by the Examination Supervisor and all Instructions to Candidates set out on the examination materials or displayed in the examination room.

5.6.2 A student's behaviour must not disturb, distract or adversely affect any other student.

5.7 Entering and leaving an examination room
5.7.1 Students who are given permission to enter or leave an examination room shall comply with all conditions on which the permission is given.

5.7.2 Students are not permitted to leave the examination room:
(i) until half the prescribed working time has elapsed
(ii) during the last 15 minutes of working time

unless there are exceptional circumstances such as illness.

5.7.3 Students who arrive late and before half the working time of the examination has elapsed will normally be permitted to take the examination. However, no additional working time will be allowed unless exceptional circumstances warrant.
5.8 Unauthorised material not to be brought into the examination room
Students may bring into an examination room only those materials approved for the subject under examination and indicated as such on the examination paper. All other materials are expressly prohibited unless:

(i) brought into the room with the permission of the Examination Supervisor
(ii) deposited by the student directly upon entering the examination room at a place stipulated by the Examination Supervisor.

It is inconsequential for this rule that the unauthorised material is not related to the subject under examination.

5.9 Student not to remove papers
A student shall not remove from the examination room any worked scripts or other paper provided for use during the course of the examination (other than the question paper supplied where this is authorised by the Examination Supervisor) or other material which is the property of the University.

5.10 Student not to communicate with others
During an examination a student shall not communicate by word or otherwise with any other person except the Examination Supervisor or examiner.

5.11 Cheating
Students are expected to exhibit honesty and ethical behaviour in undertaking assessment requirements of subjects. Cheating is defined as any fraudulent response whatsoever by students to any item of assessment including any action which may otherwise defeat the purposes of the assessment.

A student shall not cheat or attempt to cheat in any assessment item.

5.12 Plagiarism
A student shall not plagiarise in any item of assessment.

Plagiarism is the act of taking and using another’s work as one’s own. Where plagiarism occurs in items of assessment contributing to the result in a subject, it shall be regarded as, and treated in the same manner as, cheating in an examination. For the purpose of these rules any of the following acts constitute plagiarism unless the work is appropriately acknowledged:

- copying the work of another student
- directly copying any part of another’s work
- summarising the work of another
- using or developing an idea or thesis derived from another person’s work
- using experimental results obtained by another.

Penalties for breach of assessment rules

5.13 Penalties
4.13.1 If a student breaches Rules 5.6, 5.7, 5.8, 5.9, 5.10, 5.11, or 5.12, the student may be dealt with under the Student Discipline By-law.

5.13.2 A student who breaches any of the rules stated in 5.13.1 above shall be liable, in addition to any other penalty, to incur the following penalties:
(i) the award of a Low Fail result in the subject concerned
(ii) the award of Low Fail results in all subjects in which the student would have received final results in the same academic semester
(iii) exclusion from the University for a period
(iv) expulsion from the University.

5.13.3 Students accused of a breach of the rules will be given the opportunity to show cause why a penalty should not be applied.

5.13.4 A student excluded because of cheating may appeal to the Academic Appeals Committee. An appeal must state the grounds and reasons for the appeal and must reach the Secretary of the Academic Appeals Committee within 14 days of the date of the letter advising the student of the penalty.

**Deferred examinations and special consideration of factors affecting student's performance in assessment**

5.14 Deferred examinations

Students who through medical or other exceptional circumstances beyond their control are unable to attend an examination at the prescribed time, or complete an examination, may apply to sit for a deferred examination.

Applications for deferred examinations, including the documentation detailed in Rule 5.16, should normally be submitted prior to or within three days of the examination date, depending on the circumstances.

Normally, deferred examinations are not granted to candidates who misread examination timetables.

A deferred examination is regarded as a significant concession to a student and, as such, will only be granted when a properly documented and timely case is made by the applicant. Students should not expect to be granted an unlimited number of deferred examinations.

Students will receive written notification of the outcome of their application including, where appropriate, the date, time, location and format of the deferred examination.

5.15 Special consideration of factors affecting assessment performance

Students who consider that their performance in an assessment item was adversely affected by illness, or other exceptional circumstances beyond their control, may apply for special consideration.

Applications for special consideration, including the documentation detailed in Rule 5.16, should normally be submitted prior to or within three days of the examination or the submission of the assessment item.

5.16 Documentation required for deferred examination or special consideration

5.16.1 Students applying for a deferred examination or special consideration on medical grounds must submit a medical certificate from a registered medical or dental practitioner stating:
the date on which the practitioner examined the student
the nature, severity and duration of the complaint
the practitioner’s opinion of the effect of the complaint on the student’s ability to sit for, or perform satisfactorily in the assessment item.

A statement that a student was ‘not fit for duty’ or was suffering from a ‘medical condition’ will not be accepted.

5.16.2 Students applying for a deferred examination or special consideration on other than medical grounds must submit with the application a statutory declaration stating the disability or exceptional circumstances which:

- prevented or will prevent the student from sitting for the examination in the case of an application for a deferred examination
- affected the student’s performance in the assessment item in the case of an application for special consideration.

Students should also supply any corroborative evidence in support of the application.

**Grading scale**

5.17 Final results

Pass Grades

- 7 High Distinction
- 6 Distinction
- 5 Credit
- 4 Pass
- 3 Low Pass (see footnote)
  or, where approved for use, S – Satisfactory

Fail Grades

- 2 Fail
- 1 Low Fail
- K Withdrawn – Failure
  or, where approved for use, U – Unsatisfactory

(Note: A grade of 3 counts as a passing grade for the purpose of completing award requirements and fulfilling prerequisite requirements, except where it is stated in course rules that a higher grade is required. The limit on the number of grades of 3 which may be credited towards an award is specified in Rule 4.22.)

Other Results

- E – Exempt
- W – Withdrawn

Final grades awarded after the completion of supplementary assessment will be distinguished on a student’s Certificate of Results and on a Statement of Academic Record.

5.18 Unfinalised Results

The following will be recorded when a result is not finalised at the time of release of results:

- A – Result Unfinalised – The result will be issued when available
- Supplementary Assessment – Student is to undertake supplementary assessment.
- Deferred Examination – Student is to undertake a deferred examination.
- T – Assessment Continues – Studies extending over more than one semester.
5.19 Grade Point Average
The Grade Point Average (GPA) is a simple numerical index which summarises the student's academic performance in a course in a single semester and over the duration of the student's enrolment in the course.

The GPA is reported on the Certificate of Results and on the Statement of Academic Record. Two values of the GPA are given: the GPA for the semester and the GPA in the course.

\[ \text{GPA} = \frac{\sum (\text{credit points of subject} \times \text{numeric value of grade})}{\sum (\text{credit points of subject})} \]

Notes:
- Only subjects which are awarded a numeric grade and the result 'Withdrawn - Failure' (which is converted to a 1) are included in the calculation of a GPA
- Unfinalised results are not included in the calculation
- Only QUT subjects are included (not subjects taken at an external institution)
- Only subjects taken after the introduction of the seven-point grading scale are included in the calculation.

Release of results
5.20 Release of results
Following certification by Deans of Faculties, results will be released at the direction of the Registrar.

5.21 Notification of results
A Certificate of Results will be mailed to each student at the end of each semester and after the completion of any Summer School studies.

Passing grades and unfinalised results are published in the press.

Noticeboard lists, containing all results, are placed on University campus noticeboards.

5.21.1 Request for non-publication of results
FORM: Application for Non-publication of Results
SOURCE: Examination Office, Gardens Point campus
SUBMIT TO: Examination Office, Gardens Point campus

Students may request to have their results withheld from public release. Application must be made no later than 30 May for first semester, 30 October for second semester and 31 December for Summer School studies. The request to withhold results from public release will remain in force until specifically revoked by the student.

Graduation
5.22 Eligibility for graduation
Students are eligible to graduate upon completion of course requirements.

A passing grade must be achieved in all subjects set out in the course structure, except that in certain specified subjects a grade of 4 or better must be obtained to satisfy the course requirements. In addition, Faculty Academic Boards have set a limit on the number of grades of 3 which may be credited towards awards. These limits are specified in Table 2.
6. Review of grades and academic rulings

6.1 Review of grades
Any student having reason to believe that an error has been made or an injustice done with regard to a final grade in a subject may apply for a review of the grade.

During the course of a semester students should discuss their progress in all coursework exercises (including examinations which form part of progressive assessment) with their lecturers, and can expect to be provided with a clear indication of the extent to which they have or have not achieved the objectives set for each assessment item.

Where, after such discussion, the student believes that an error persists or that the result is not a fair reflection of the student’s work, the student may submit an application for review at the end of the semester following notification of the final grade.

6.2 Academic rulings
Students who have received advice of a ruling in regard to an academic matter (for example, amount of credit awarded, cancellation of subjects, amendment of enrolment program), and who wish to be provided with further information on the basis and implications of the ruling, should in the first instance contact their campus Administration Office or arrange for the student to have other discussions as deemed appropriate in the circumstances.

If, having received further advice, the student believes that an error has been made or that a ruling is unjust, the student is entitled to submit an application for review.

6.3 Application procedure
Applications must be submitted within 14 days of the release of the results or mailing of written advice of a ruling.

Applications for a review of a grade attract a fee prescribed by Council which is reimbursed if a higher grade is awarded following the review.

Applications must be accompanied by appropriate information and documentation if available, and must state the specific grounds on which the application for review is based.

6.4 Notification of outcome
Advice of the outcome of reviews will be conveyed to the student in writing.

6.5 Status of students awaiting the outcome of a review
The University will make determinations on reviews as soon as practicable, but will not necessarily resolve any particular case before the close of enrolments for the next semester.

In this event the student remains bound, pending resolution of the case, by the ruling or by the consequences of the grade which are the subject of the review or appeal, except in special circumstances as may be determined by the Registrar.
7. Unsatisfactory academic performance and exclusion

Students are expected to maintain a satisfactory level of performance in their studies at QUT. Performance is reviewed at the end of each semester. Students whose performance is unsatisfactory are placed on probationary enrolment. If performance continues at an unsatisfactory level the student may be excluded. In addition, a single failure in a subject designated as critical to students’ progress in the course may result in exclusion.

This policy applies to studies undertaken while enrolled in an award course. Non-award students are required to apply for enrolment each year, and their applications may be accepted or rejected by the Registrar on the recommendation of the relevant Head of School.

7.1 Probationary enrolment

A student is placed on probationary enrolment if:

(i) the student fails a subject which has been failed previously; or
(ii) the student has a Grade Point Average of less than 3.0 in the course in which he or she is enrolled.

For the purpose of this rule a subject is uniquely identified by the subject code. Where a subject code has been changed on administrative grounds, the subject will be deemed to be the same subject for the purpose of this rule.

The Registrar notifies students that they have been placed on probationary enrolment and advises them that they should discuss their progress with their Course Coordinator.

7.2 Terms of probationary enrolment

Students on probationary enrolment are required to enrol as the Course Coordinator directs.

Students placed on probationary enrolment at the end of first semester remain on probationary enrolment for the duration of the following semester. Students placed on probationary enrolment at the end of second semester remain on probationary enrolment for the duration of the following academic year.

If a student cancels his or her enrolment while on probationary enrolment, any subsequent enrolment in that course is a probationary enrolment for the purposes of defining eligibility for exclusion. The periods of probationary enrolment before and after the period of cancelled enrolment are counted as one period of probationary enrolment.

7.3 Exclusion

The Faculty Academic Board may exclude a student under the following circumstances:

(i) at the end of an academic year, the Academic Board may exclude a student who has had, or is eligible for, a second or subsequent period of probation during the year;
(ii) at the end of a semester, the Academic Board may exclude a student who has failed to achieve a satisfactory level of performance in a designated subject.

Designated subjects are indicated in Table 3 and include professional experience subjects, practice teaching subjects, subjects requiring the development of particular skills and subjects requiring certain personal qualities. A satisfactory level of performance in a designated subject is a grade of 4 (Pass) or higher, or S – Satisfactory, where appropriate.

A student who is eligible under (i) or (ii) above but who is not excluded by the Academic Board is placed on probation.
Exclusion normally applies to the course in which the student was enrolled. An Academic Board may exclude a student from all courses or a specified group of courses offered by the Faculty if the student is eligible for exclusion under (i) or (ii) above and either has had at least two periods of probationary enrolment or has been excluded previously from another QUT course.

Academic Committee, on the recommendation of the Academic Board, may exclude a student from all QUT courses if the Academic Board is recommending exclusion from all the Faculty’s courses and the student has been excluded previously from a course in another Faculty.

An excluded student may not enrol as a non-award student in any subjects in the course or courses from which he or she has been excluded except at the discretion of the Dean of the Faculty responsible for the course.

Students who are excluded are notified by registered mail. Excluded students have the right of appeal to the Academic Appeals Committee.

7.4 Duration of exclusion and readmission after exclusion

If a student does not appeal against an exclusion decision or if the student’s appeal is not successful, the exclusion remains in force for an indefinite period of time and may only be revoked by the decision of the Faculty Academic Board to approve an application for readmission.

An application for readmission will not be considered until at least two semesters have elapsed since exclusion.

The student’s application for readmission must be accompanied by a statement which addresses such factors as changed circumstances, academic and/or vocational performance since exclusion, maturity and motivation.

Students re-enrolled after a period of exclusion will be placed on probationary enrolment for the remainder of the academic year.

At the end of the academic year, the Academic Board of the relevant Faculty will review the academic performance of each student re-enrolled to the course during that year. If the student’s Grade Point Average since re-enrolment is less than 3.5, the student may be excluded as per Rule 7.3.

If the student is permitted to proceed with the course, in subsequent years the student is subject to the probationary rules. In administering the probationary rules, subjects failed prior to the period of exclusion and the Grade Point Average prior to the period of exclusion will be taken into account.

8. Student appeals

A student who has been excluded on the grounds of unsatisfactory academic performance or failure to complete an award within time limits, or who has had a penalty applied because of breach of assessment rules has right of appeal.

8.1 General procedure to lodge an appeal

Appeals are made in writing to the Secretary of the Academic Appeals Committee. Correspondence must include the grounds and reasons for the appeal and must reach the Secretary of the Academic Appeals Committee within 14 days of the date of the letter which advised the student of the exclusion.
8.2 Appeals against exclusion for unsatisfactory academic performance
An appeal against exclusion for unsatisfactory academic performance is referred to the relevant Faculty Academic Board. The Academic Board recommends to the Academic Appeals Committee whether the appeal should be upheld or dismissed. The Committee considers:

- whether the penalty imposed and procedures followed were correct according to policy and rules
- the severity or otherwise of the penalty imposed
- mitigating circumstances advanced by or on behalf of the student in the appeal.

When an appeal against exclusion is upheld, the student is placed on probationary enrolment for the remainder of the academic year.

8.3 Appeals against exclusion for failure to complete a course within time limits
An appeal against exclusion for failing to complete a course within time limits is referred to the relevant Academic Board. The Academic Board recommends to the Academic Appeals Committee whether the appeal should be upheld or dismissed. The Committee considers:

- whether the penalty imposed and the procedures followed were correct according to the relevant policies and rules
- the severity or otherwise of the penalty imposed
- mitigating circumstances advanced by or on behalf of the student in the appeal.

When the Academic Board recommends that an appeal be upheld, the Board includes in its report a specified period in which the student will complete the course requirements and any subjects or special examinations that the student will be required to undertake.

When the Academic Appeals Committee decides that an appeal be upheld, the appeal is referred back to the Academic Board to determine conditions under which the student may complete the course.

8.4 Appeals against the penalty applied for breach of assessment rules
An appeal against exclusion for cheating is referred to the Academic Appeals Committee which determines whether the appeal should be upheld or dismissed. The Committee considers:

- whether the original penalty was correct under the relevant rules
- whether procedures were properly carried out
- the severity or otherwise of the penalty imposed.

8.5 Status of students awaiting the outcome of an appeal
The University will make determinations on academic appeals as soon as practicable, but will not necessarily resolve any particular case before the close of enrolments for the next semester.

In this event the student remains bound, pending resolution of the case, by the ruling or by the consequences of the grade which are the subject of the appeal, except in special circumstances as may be determined by the Registrar.
9. Higher Education Contribution Scheme

Under the Commonwealth Government legislation, all students must comply with certain conditions with respect to the Higher Education Contribution Scheme (HECS) as a condition of their enrolment.

9.1 HECS Payment Options Form

All students are required to lodge the HECS Payment Options Form at the time of their initial enrolment in a course. A new HECS Payment Options Form must be lodged when a student changes course or when a student wishes to change HECS payment option. Students concurrently enrolled in more than one course are required to lodge a new HECS Payment Options Form for each course.

Unless a student is exempted from HECS under the terms of the Commonwealth legislation, the student must select either the up-front payment option or the deferred payment option as the method for making their HECS payment.

Students who fail to lodge a valid HECS Payment Options Form by the first day of the semester of enrolment in their course will have their enrolment cancelled on the grounds that they have not fulfilled the conditions of enrolment.

9.2 Up-front payment option

Students who select the up-front payment option are sent an invoice for the HECS amount to be paid. The calculation is based on the recorded enrolment of the student for the semester on the invoiced date.

A student who fails to pay in full the invoiced amount by the due date will be charged a late fee for the acceptance of the up-front payment or must complete a HECS Payment Options Form selecting the deferred payment option and provide a tax file number or a Tax File Number Application/Enquiry Form.

Students who fail to take the action specified above will have their enrolment cancelled on the grounds that they have not fulfilled the conditions of enrolment.

9.3 Deferred payment option

Students who select the deferred payment option must provide a tax file number or a Tax File Number Application/Enquiry Form.

Students who fail to supply a tax file number or a Tax File Number Application/Enquiry Form will have their enrolment cancelled on the grounds that they have not fulfilled the conditions of enrolment.

9.4 Changing HECS payment option

Students may change their HECS payment option by lodging a new HECS Payment Options Form by the first day of the semester. The new payment option applies to all future semesters until a further change of payment option is notified.

9.5 The HECS Notice

Following the census date for a semester, students are provided with the HECS Notice setting out their HECS liability for the semester which was determined by their subject enrolment on the census date.

Students have 14 days from the date of the HECS Notice to advise Student Administration of any error in the notice.
In the case of students selecting the up-front payment option, if a student’s enrolment program has changed since the initial invoice, the student may be required to pay an additional amount or a refund may be provided.

Students who fail to pay in full any additional amount will have their enrolment cancelled on the grounds that they have not fulfilled the conditions of enrolment.

10. Student Guild fee rules

10.1 Subject to Rule 10.2, all enrolled students, excepting such persons or classes of persons as QUT Council declares by resolution to be ineligible for membership, shall be members of the Guild.

10.2 Conscientious objection
An enrolled student who:
\[\square\] declares in writing to the Registrar that he or she has a conscientious objection to being a member of the Guild and notifies the Guild accordingly; and
\[\square\] pays to QUT an amount equivalent to the Guild fees which would be payable if the student were a member of the Guild; and
\[\square\] pays to QUT an amount equivalent to 5 per cent of the Guild fees as a fee for use of university facilities in processing the declaration of conscientious objection is exempt from membership of the Guild.

10.3 Fees to be paid
Guild fees payable for membership of the Guild shall be the amount approved by QUT Council. Guild fees for both semesters shall be paid in full prior to or at the time of submitting an enrolment form.

10.4 Consequences of non-payment or part-payment
If Guild fees payable by a student have not been paid at the time of lodging an enrolment form, or the student has not notified the Registrar of a conscientious objection as per Rule 10.2, the Registrar may refuse to accept the student’s enrolment.

A student who has not paid all Guild fees due and who satisfies the Registrar that he or she is unable to make payment at the time of submitting an enrolment form may be granted an extension of time in which to pay the fees. In this case the enrolment is accepted subject to an agreement that all Guild fees will be paid by the extended date indicated by the Registrar.

A student who has not paid the full amount of Guild fees due may have his or her enrolment cancelled or may have sanctions imposed as specified in Rule 1.19.

10.5 Refund of fees
A student who cancels enrolment on or before 31 March for first semester or 31 August for second semester shall be entitled to a refund of the Guild fees for that semester. The refund will be made by the University on behalf of the QUT Guild. The student is required to surrender any current QUT Student Card.
11. Miscellaneous student charges

11.1 Guild fees
Full-time students $125
Part-time students $55
External students $20

11.2 Administrative charges
Late lodgement of application for admission $20
Late lodgement of enrolment form $30
Late addition or change to an enrolment program $20
Review of grade (refundable) $6 per subject
Statement of Academic Record $5
Reissue of ID Card $5
Late collection of ID card $10
Reissue of Award Certificate $40
Reissue of receipt for fees paid $5
Late fee for up-front HECS payment $50
Reissue of Notice of HECS liability $5

11.3 Deposit system for use of laboratory facilities
A student enrolled in any subject included in the ‘Schedule of Subjects relating to Laboratory Deposits’ which the Registrar may vary from time to time, shall deposit $50 for the use of laboratory facilities.

The student shall be required to pay only one deposit irrespective of the number of such subjects included in an enrolment.

At the end of the year the deposit shall be refunded to the student less the cost of any breakages which have not been made good.
TABLE 1: Credit transfer policies

1.1 Policy statement: general principles concerning transfer of credit and combined awards – Technical and Further Education; Training, Employment, Queensland (TAFE.TEQ)/QUT

There is a history of favourable credit transfer arrangements between various TAFE.TEQ and QUT courses. Further, there is a general willingness on the part of TAFE.TEQ and QUT to review courses to identify areas in which advanced standing, transfer of credit, efficient progression from TAFE.TEQ to QUT courses and the development of combined awards might be appropriate. TAFE.TEQ and QUT seek to eliminate unnecessary barriers to student progression, recognise problem areas and seek appropriate solutions and processes so that increased numbers of better educated graduates can be made available to industry.

The following principles form the substance of the agreement between QUT and TAFE.TEQ in this area.

Principles

Note: These principles apply specifically to credit transfer arrangements and combined awards between TAFE.TEQ associate diploma and diploma courses and QUT degree level courses in related fields.

(i) Course development/review: When developing and/or reviewing subjects with common or closely linked vocational outcomes, TAFE.TEQ and QUT will work in consultation with a view to establishing automatic equivalence. Subjects developed in this way will give TAFE students full QUT exemptions.

(ii) Block exemptions: The awarding of block credits is given a high priority. This allows for appropriate substitution in degree courses without disadvantaging the student’s foundation in core discipline subjects. While a normal exemption would comprise 96 credit points (Associate Diploma), in certain circumstances additional credit may be awarded.

(iii) Individual subject exemptions: Where there is a close equivalence between TAFE.TEQ and QUT subjects and/or they have been prepared jointly, then the student will be given credit for individual subjects that fall outside those already credited in any block exemption.

(iv) Maximum recognition of previously completed learning: A student should be given maximum recognition for prior learning. Credit should be given for all appropriate learning experiences.

(v) The adoption of flexible constructs for credit exemptions: Flexible constructs should be adopted to ensure that the combined credit exemptions of subject blocks, individual subjects and recognition of prior learning are not reduced by a pre-determined ceiling. The only limiting factor in such arrangements is standard QUT policy regarding transfer of credit.

(vi) Joint use of resources: Where appropriate and mutually beneficial, maximum utilisation of joint resources (human and physical) will be made in the development and delivery of courses.

(vii) Combined awards: Where joint arrangements could provide more effectively for the flexibility and specialisations sought by industry, the development of combined awards will be encouraged.
New articulation and credit transfer arrangements: Individuals or groups seeking to initiate any development that may lead to articulation and/or transfer of credit between TAFE.TEQ and QUT are to do so through the appropriate Associate Director (TAFE.TEQ) and Dean of Faculty (QUT).

1.2 Articulation of awards
The University considers that it is in the interest of students to facilitate their movement between courses of various types and levels. In developing new courses or revising existing courses, faculties are asked to pay particular attention to achieving close articulation between courses both within the University and between institutions/sectors (eg QUT and TAFE).

Specific articulation and credit transfer arrangements between levels of completed awards in related fields will normally be as follows:

- **associate diploma awards**
  Upon entry to this award, students will normally gain credit on the basis of the following:
  (i) certificate – 24 credit points (0.5 semester),* or
  (ii) advanced certificate – 48 credit points (1.0 semester)

- **diploma awards**
  Upon entry to this award, students will normally gain credit on the basis of the following:
  (i) associate diploma – 144 credit points (3.0 semesters)

- **bachelor degree awards**
  Upon entry to this award, students will normally gain credit on the basis of the following:
  (i) associate diploma – 96 credit points (2.0 semesters), or
  (ii) diploma – 192 credit points (4.0 semesters)

- **graduate diploma awards**
  Upon entry to this award, students will normally gain credit on the basis of the following:
  (i) graduate certificate – 48 credit points (1.0 semester)

- **two-year master degree awards**
  Upon entry to this award, students will normally gain credit on the basis of the following:
  (i) four-year bachelor degree at honours standard – 96 credit points (2.0 semesters), or
  (ii) honours – 96 credit points (2.0 semesters), or
  (iii) graduate diploma – 96 credit points (2.0 semesters)

- **professional doctorate awards**
  Upon entry to this award, students will normally gain credit on the basis of the following:
  (i) master degree – 96 credit points (2.0 semesters)

*All semester values refer to full-time or equivalent. QUT operates on standard length semesters of 48 credit points.*
Specific articulation and credit transfer arrangements between levels of awards in related fields on the basis of incomplete studies will normally be as follows:

☐ master degree awards

Students admitted to a doctoral research award or a professional doctorate award but who either do not qualify to progress to the award or do not wish to proceed may on application be transferred to a master degree award.

☐ graduate diploma awards

In specifically designed master/graduate diploma awards, students may be granted a graduate diploma on the basis of the following:

(i) master degree by coursework – satisfactory completion of at least 96 credit points (2.0 semesters)

if they either do not qualify or do not wish to proceed to the higher level award.
### 1.3 Faculty arrangements for credit transfer

<table>

Notes

1. QUT subjects with ‘A’ in the name are core subjects for full-time students and are approved electives for part-time students. This means that part-time students with these exemptions have to complete fewer electives at QUT.

2. Engineering Materials and Mechanical Plant are regarded as approved electives for all Associate Diploma students and reduces the number of electives that students have to complete at QUT.

3. Engineering Drawing 2 is regarded as an approved elective in the part-time Associate Diploma and reduces the number of electives that students have to complete at QUT.

4. Students in the Associate Diploma:
   (i) cannot receive exemptions for more than three electives;
   (ii) cannot be exempted from more than half the course (16 subjects full-time, 12 subjects part-time).

POLICY STATEMENTS

Assessment Provisions for Students with Disabilities

Students with permanent or temporary disabilities have the right to alternative arrangements, consistent with a commitment to academic excellence and equality of opportunity, to enable them to fulfil their course requirements.

Some alternatives

Disabilities may prevent or inhibit students from completing certain subject requirements, such as performing particular skills, writing assignments, test papers or examinations, or executing physical or laboratory tasks.

Suggested variations in assessment techniques for students with disabilities are listed below. Issues of validity, reliability and equity, together with ease of marking, should be taken into account when adopting such alternatives.

<table>
<thead>
<tr>
<th>Variations</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mode</td>
<td></td>
</tr>
<tr>
<td>Questioning modality</td>
<td>Brailled or audiotaped questions, viva voce testing, signing interpreter etc.</td>
</tr>
<tr>
<td>Response modality</td>
<td>Oral rather than written answers-recorded on tape, viva voce, signing etc.</td>
</tr>
<tr>
<td>Context</td>
<td></td>
</tr>
<tr>
<td>Time</td>
<td>Extended period to answer examination, respite breaks during an examination, extra time to complete assignments, deferment without penalty etc.</td>
</tr>
<tr>
<td>Equipment</td>
<td>Tape recorder, brailler, print magnifier, electric typewriter, special desk for wheelchair, adapted laboratory equipment etc.</td>
</tr>
<tr>
<td>Separate examination room</td>
<td>Special equipment</td>
</tr>
<tr>
<td>Personal assistance</td>
<td>Amanuensis, reader, interpreter, aide</td>
</tr>
</tbody>
</table>

Such alternative approaches to assessment need to be carefully considered before implementation to ensure undue over- or under-compensation does not occur. A separate brochure, *Assessment Procedures for Students with Disabilities*, explaining the advantages and disadvantages of such alternatives is available from campus counsellors.

Responsibilities

Students should make their needs known to relevant lecturers early in the semester.

To support their request for special consideration students may be required to present a certificate from a medical or other specialist practitioner (e.g. psychologist) which substantiates the nature of the special need. Appropriate documentation can be sighted and supported by a Counsellor who provides referral to the relevant course coordinator, faculty or school.
Alternative forms of assessment are usually negotiated between student and lecturer, but advice can be sought from the course coordinator or counselling service as needed.

Lecturers or course coordinators should notify the Student Administration section of any special examination requirements, including the level of expertise allowable in any assistant (amanuensis, interpreter, aide) who may be required, so that the student is neither advantaged nor disadvantaged in comparison with other students. Students are to be given adequate lead time prior to an assessment item to gain working familiarity with such assistants. Lecturers should also notify the library of particular equipment needs.

For centrally organised assessment items responsibility for the conduct and administration of alternative assessment provisions for students with disabilities rests with Student Administration. Unless negotiated otherwise by lecturer and student, responsibility for employing an amanuensis or interpreter as well as providing special equipment, settings and supervision will rest with the Examination Officer. Costs of employing supervisors, personal assistants and providing examination materials (e.g. blank audio cassettes; brailled examination papers) are to be borne by the Student Administration section. A record of requests and adaptions made will be retained for review purposes.

For other assessment, current responsibility primarily rests with faculties and schools. The scope and funding of support services for such assessment is currently under review.

Confidentiality of Student Records

The University is required to have on record a variety of factual information about students both for internal use in connection with its academic program and for the compilation of statistical reports to meet the requirements of such external bodies as the Department of Employment, Education and Training.

The Registrar is the official custodian of such records and is responsible to the Vice-Chancellor for their proper maintenance and control.

Information required by outside bodies is normally of a statistical nature and does not identify individual students – eg admission and enrolment statistics, TE Score distributions, age distributions, patterns of origin by school or residential district, full-time/part-time ratios, attrition rates etc. However, information held on individual students may include details of a personal nature which students may quite reasonably expect the University to maintain as confidential except for legitimate internal purposes – eg age, address, telephone number, title, medical information, references etc. The University has no need for and will not maintain records relating to the religious or political affiliations and activities of students except insofar as such information may be voluntarily included in correspondence from the student or in references supplied by persons at the student’s request.

The University accepts that general principles of confidentiality and privacy should apply to the use or availability of its records on individual students. These imply that the University will not normally make available externally particular information on a student without specific authorisation by that student, unless it is legally required to do so. Exceptions to this policy will be restricted to situations in which the release of information is judged to be in the clear interest of the student – eg provision of a telephone number or address to a hospital when a relative has been involved in an accident.

Information from a student’s personal files will be available internally to faculties and individual staff members on the basis of a demonstrated need in connection with the
academic program. Its release from the Student Administration Office must be authorised by the Registrar acting within the spirit and intent of this policy, on the understanding that staff members using the information will also adhere to its intent.

In addition to being provided at regular intervals with information on academic performance, students shall be entitled to have access to their personal files which will contain forms, correspondence, results statements and any other items relating to each student. Access will be available only at Student Administration Offices and the student will be under supervision while perusing the file. The file may not be removed from the office. No student may have access to another student's personal file, or to information from such a file or computer record.

Each semester the University publishes students' results in the press and on University noticeboards. Students who would prefer that their results are not published in the press or displayed by name on University noticeboards have the right to request that their academic records remain confidential. The request to withhold results from public release will remain in force until specifically revoked by the student.

It is the responsibility of the Registrar to provide a student with copies of his or her official University transcript on request for use at the student's discretion—e.g., in connection with job applications or applications for admission to another educational institution, or to forward such transcripts when authorised in writing by the student to do so. Should the Registrar of another institution to which a student is seeking admission formally request a copy of the student's academic record, its transmission will be assumed to be authorised by the student. Official University transcripts may only be provided to other individuals, employers or agencies outside the University upon the written authorisation or request of the student, addressed to the Registrar.

Staff members who are asked to provide references for students should refer to the fact that official transcripts are available only through Student Administration Offices, but inasmuch as they have been asked by the students to comment on general academic performance and other attributes they are clearly free to do so.

University Medals*

1. Academic Committee may award medals known as Queensland University of Technology Medals to graduates of certain courses as defined in 2 below, who have achieved an exceptionally high level of performance in their studies. For the award of a medal, a student should have reached a distinguished academic standard based on Grade Point Average in all subjects and in the thesis where such is required. The standard should be at a higher level than would normally be expected from an excellent candidate. The medal should be testimony that the recipient not only shows exceptional academic promise at the time of the award, but also exhibits a distinguished record of achievement throughout the whole of the degree.

2. Eligibility to be considered for the award of a University Medal will be limited to:
   (i) graduates of honours degrees where the student's performance in the related bachelor degree is also taken into account;
   (ii) graduates of degrees with honours; or
   (iii) graduates of bachelor degrees of at least three years' normal duration where no honours award is available.

* Applicable to students who complete courses at the end of semester I, 1991 and subsequently.
In completing one of the above awards, graduates must have been enrolled at QUT for at least two years of full-time study or equivalent.

3. Power to recommend graduates for the award of University Medals resides with Faculty Academic Boards; in making such a recommendation Faculty Academic Boards are required also to submit:

   (i) the academic records of the students recommended;
   
   (ii) the academic records of the other students considered;
   
   (iii) a statement supporting the recommendation.

4. Academic Committee may make determinations from time to time concerning the number of medals which may be awarded in an academic year or the ratio of medals to the number of eligible graduates.

Course Structures

Doctor of Philosophy (IF49)

Introduction
The main purpose of graduate study is to encourage independence and originality of thought in the quest for knowledge. The Doctor of Philosophy degree is awarded in recognition of a student's erudition in a broad field of learning and for notable accomplishment in that field through an original and substantial contribution to knowledge. The candidate's research must reveal high critical ability and powers of imagination and synthesis, and may be in the form of new knowledge, or of significant and original adaptation, application and interpretation of existing knowledge.

1. General Conditions
1.1. The Council of the Queensland University of Technology was established in 1989 under the Queensland University of Technology Act.
1.2. This document sets out the Regulations governing the award of the degree of PhD.
1.3. The Council’s power to approve arrangements for the registration and examination of candidates for the degree of PhD is exercised through a Research Management Committee, which shall be a subcommittee of Academic Committee. In exercising this power, the Research Management Committee shall be advised by faculty academic boards, deans of faculty and heads of school, as appropriate.
1.4. In order to qualify for the award of the degree of PhD, a candidate must submit to the Research Management Committee:
- a certificate of satisfactory completion of the candidate’s approved course of study signed by the Principal Supervisor
- a declaration signed by the candidate that he/she has not been a candidate for another tertiary award without permission of the Research Management Committee
- a certificate recommending acceptance of the thesis in fulfilment of the conditions for the award of the PhD degree signed by each member of the faculty panel that recommended examination of the thesis and the Examination Committee which accepted it
- an application for conferral of the degree, and
- four copies of the thesis in the required format.

2. Registration
2.1. A candidate may register either as a full-time or as a part-time student (see also Section 4). To be registered as a full-time student, a candidate must be able to commit to the course not less than three-quarters of a normal working week, averaged over each year of candidacy. Such a student may not devote more than 300 hours annually to teaching activities, including preparation and marking.
2.1.2. A candidate who is unable to devote to the course the proportion of time specified in Section 2.1.1 may register as a part-time student.

2.1.3. A candidate's program of research or other approved investigation may be based at a place of employment or a sponsoring institution (see Section 7). Normally, support of the sponsoring establishment for the candidate's application is required for registration.

2.1.4. A sponsoring establishment is required to certify annually by 31 December that all registered PhD candidates sponsored by that organisation are actively engaged in their course of study, and are maintaining frequent contact with their local supervisor.

2.2. To gain registration in a course of study leading to the award of a Doctor of Philosophy, a candidate normally shall hold a relevant first class or second class division A honours degree or an appropriate master degree (by coursework or by thesis) of the QUT or of another recognised institution.

2.3 Before accepting an application for registration, the Research Management Committee must satisfy itself that the candidate has sufficient command of English to complete satisfactorily the proposed course of study, to pass an oral examination in English as described in Section 9.2, and to prepare a thesis in English.

2.4 Without the specific permission of the Research Management Committee, students may not be registered as candidates for a PhD degree if they are registered candidates for another tertiary award.

2.5 The Research Management Committee may cancel a candidate's registration if:

- after consulting a candidate's supervisors and having taken account of all relevant circumstances, the Committee is of the opinion that the candidate either has effectively discontinued his/her studies or has no reasonable expectation of completing the course of study within the maximum time allowed (see Section 4), or
- the candidate's grade point average in coursework undertaken is below 5.00 on a 7 point scale.

2.6 A student whose registration has lapsed or has been cancelled, and who wishes subsequently to re-enter the course of study to pursue an investigation which is substantially the same as his/her previous investigation, may be re-admitted under such conditions as the Research Management Committee shall prescribe.

3. Course of Study

3.1. A candidate for the degree of Doctor of Philosophy is required to complete successfully a course of study which results in a substantial contribution to knowledge. This contribution may be in the form of new knowledge, or of significant and original adaptation, application and interpretation of existing knowledge.

3.2. The course of study normally will include:

- a program of assessed coursework
- participation in university scholarly activities such as research seminars, teaching and publication
- regular face-to-face interaction with supervisors, and
- a program of supervised research and investigation.
The course of study must be such as to enable the candidate to acquire competence in relevant methods of research and scholarship related to the subject of the proposed investigation, and to display sustained independent effort.

3.3 Coursework at doctoral level demands a capacity for critical analysis and a specialisation of research interests not normally appropriate for an undergraduate program. Such coursework may be conducted in a number of ways:

- as advanced lecture courses
- as seminars in which faculty and students present critical studies of selected problems within the subject field
- as independent study or reading courses, or
- as research projects conducted under faculty supervision.

In all cases, coursework will be based upon a formal syllabus setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed reading material and the method of assessment of progress through and at the end of the course.

3.4 Coursework will occupy not more than half of the total period of registration (see Section 4).

3.5 An application for registration should set out systematically and fully the candidate's intended course of study. The description should include the area of study within which the candidate's course lies, the coursework to be undertaken, the nature of participation in scholarly activities of the centre, school or faculty in which the study is being undertaken, the objectives of the proposed program of research and investigation, its relationship to previous work in the same field, the research methods to be followed, and the proposed title of the thesis to be written.

3.6 A candidate is normally expected to pursue the approved program of research and investigation throughout the period of registration. Where circumstances make modification or extension of the program desirable, approval for the proposed change must be sought in writing from the Research Management Committee. Permission to maintain the candidate's registration may be given by the Committee in such circumstances, provided that the course of study remains in the same field.

3.7 Where a candidate's approved program of research and investigation forms part of a group project, the application must indicate clearly the individual contribution expected to be made by the candidate, and the extent to which the work is to be carried out in collaboration with others (see also Section 8.4).

3.8 Where an approved program of research and investigation is carried out jointly in QUT and in an industrial, commercial, professional or research establishment, the nature of the work to be carried out in each need not be prescribed in detail initially, but a clear indication must be provided of the way in which the work that the candidate is likely to undertake in the collaborating establishment relates to work to be undertaken at QUT or elsewhere.

3.9 In appropriate cases, the Research Management Committee may approve a course of study leading to the presentation of a thesis accompanied by material in other than written form, or exceptionally, in lieu of a research program, a program of scholarly postgraduate work concerned with significant aspects of industrial, commercial or professional activity. Such approval must be sought from the Research Management Committee at the time of application for registration or when approval to modify the course of study is sought. At the same time, arrangements for the examination of such candidates should
be proposed for approval by the Research Management Committee, including details of the form which the candidate’s presentation is expected to take.

4. Period of Time for Completion of Course of Study
4.1. A full-time candidate who does not hold a master degree appropriate to the course of study will normally be required to complete a period of registration of at least 30 months before submitting the thesis for examination. The corresponding period in the case of a part-time candidate shall be 42 months. In special cases the Research Management Committee may approve a shorter period.

4.2. A holder of a master degree appropriate to the course of study may submit the thesis for examination after not less than 24 months of registration if a full-time student, or 36 months if a part-time student. In special cases the Research Management Committee may approve a shorter period.

4.3. Without the permission of the Research Management Committee, no full-time candidate for the degree of PhD shall submit a thesis for examination more than 48 months from the date on which registration in the program was granted. The corresponding period in the case of a part-time candidate shall be 60 months.

4.4. Where a candidate wishes to change from full-time to part-time registration, or vice versa, application must be made in writing to the Research Management Committee. All such applications must specify the revised date of expected completion.

4.5. Where application is made for permission to extend the period within which the candidate may submit a thesis for examination, details of the candidate’s progress shall be presented to the Research Management Committee, together with the reasons for the delay in completing the course and the expected date of completion. Where the Committee agrees to an extension, it may set a limit to the maximum period of registration in the PhD program.

5. Transfer of Registration
5.1. Where a candidate has undertaken part of a proposed course of study as a registered student in another institution, this period of registration may, on application in writing to the Research Management Committee at the time of application for registration, be counted towards the candidate’s period of registration in the QUT course. The application must include details of the work already undertaken, the reasons for the transfer and the expected date of completion.

5.2. A candidate registered for a master degree at QUT or elsewhere may apply for transfer to the PhD degree.

5.3. Application for transfer of registration from a master degree must be made on the prescribed form and normally may be made after at least 12 months registration in the master degree. The candidate shall prepare for the Research Management Committee a detailed progress report, and the Committee shall seek the advice of the candidate’s supervisors. Where coursework has been undertaken as part of the master degree, a transfer normally may be approved only if the candidate has attained a grade point average of at least 5.00 on a 7 point scale.

5.4. Applications for transfer normally should be submitted at least 24 months in advance of the probable date of submission of the PhD thesis.

5.5. The registration period for the PhD shall include such prior registration approved by the Research Management Committee.
5.6 The periods of minimum and maximum time for presentation of the thesis shall be extended by eight months for candidates who were admitted to a master degree from a pass degree.

5.7 A candidate registered for the degree of PhD who is unable to complete the approved course of study may apply for transfer to an appropriate master degree.

6. Supervision
6.1. Normally two supervisors shall be appointed for each PhD candidate.

6.2. One supervisor shall be the Principal Supervisor, with responsibility for supervising the candidate on a frequent basis. The Principal Supervisor shall be a member of QUT staff. A Principal Supervisor normally shall have undertaken the successful supervision of research degree candidates. Where a Principal Supervisor is proposed who has not undertaken such supervision, an Associate Supervisor (see Section 6.3) should have had such experience.

6.3. An Associate Supervisor may be appointed either from QUT or from elsewhere. Where appropriate, more than one Associate Supervisor may be appointed. The Research Management Committee may approve the appointment as Associate Supervisor of a person without experience sufficient to satisfy appointment as a Principal Supervisor. Where collaboration has been arranged between QUT and another organisation, the latter is expected to recommend to the Committee a member of its staff as an Associate Supervisor.

6.4 The Research Management Committee must be satisfied regarding the qualifications and experience of all proposed supervisors.

6.5 The Principal Supervisor is required to report every six months to the Research Management Committee on progress made by the candidate. Each progress report is to be sighted by the candidate and submitted through the head of school.

7. Place and Conditions of Work
7.1 The research program must normally be carried out under supervision in a suitable environment in Australia.

7.2 The Research Management Committee must be satisfied that arrangements as set out in these regulations regarding coursework, participation in scholarly activities, supervision, facilities and training in research methods may be made for the candidate, and that accommodation, equipment and access to library and computing facilities meet the needs of the approved course of study.

8. Thesis
8.1. The thesis must be presented in accordance with the requirements of the Council, including any accompanying declarations (see Section 1).

8.2. Except with the specific permission of the Research Management Committee, the thesis must be presented in the English language. Such permission must be sought at the time of application for registration, and will not be granted solely on the grounds that the candidate’s ability to satisfy the Examination Committee will be affected adversely by the requirement to present the thesis in English.

8.3. The thesis must include a statement of the objectives of the investigation, and must acknowledge published or other sources of information, together with any substantial financial assistance received.
8.4. Where a candidate’s research program forms part of a collaborative group project, the thesis must indicate clearly the candidate’s individual contribution and the extent to which co-workers contributed to the candidate’s program.

8.5. Subject to QUT’s intellectual property policy, the copyright of the thesis is vested in the candidate.

8.6. Where a candidate or the sponsoring establishment wishes the thesis to remain confidential for a period of time after completion of the work, application for approval must be made to the Research Management Committee when the thesis is submitted. The period normally shall not exceed two years from the date on which the Examination Committee recommends acceptance of the thesis, during which time the thesis will be held on restricted access in the QUT Library.

9. Examinations

9.1. Any fees payable in relation to the examination of a candidate shall be determined by the Council.

9.2. In order to determine whether the thesis is acceptable for examination by the Examination Committee, and subject to the provisions of Section 9.3, the candidate shall be examined orally by the faculty to which he/she is attached. The examination will be based on:

- the work described in the thesis, and
- the field of study in which the investigation lies.

The faculty shall advertise or otherwise arrange for the oral examination which should be attended by all available members of the Examination Committee. The examination shall be conducted by a panel of three nominated by the faculty and chaired by the Principal Supervisor. Sufficient copies of the thesis, bound in temporary cover, must be presented to the Chairperson of the faculty examining panel so as to provide a copy for each member of the panel and each attending member of the Examination Committee. The faculty examining panel shall use the prescribed form when advising the faculty and the Research Management Committee that the thesis meets with their approval.

9.3. Where for good and sufficient reasons the Research Management Committee is satisfied that a candidate would be seriously disadvantaged if required to undergo an oral examination, an alternative form of examination may be approved. Such approval shall not be given solely on the grounds that the candidate’s knowledge of the English language is inadequate (see Section 2.3).

9.4. The thesis shall normally be examined by an Examination Committee comprising at least two external examiners and not more than one internal examiner. The internal examiner normally shall chair the Committee. If there is no internal examiner, then the Research Management Committee shall appoint a chairperson.

9.5. Subject to agreement between supervisors and not later than six months before the proposed date for the submission of the thesis, the Principal Supervisor is required to recommend to the Research Management Committee the composition of a proposed Examination Committee, together with the title of the candidate’s thesis.

9.6. Four copies of the thesis in the required format must be presented to the Research Management Committee together with certification that the approved course of study has been completed and the thesis accepted by the faculty to which the candidate is attached (see Section 9.2). Receipt of the thesis by the Research Management Committee shall constitute the submission of the candidate’s thesis for examination.
9.7. The candidate's Principal Supervisor shall forward arrangements for examination of the thesis through the faculty to the Research Management Committee for approval.

9.8. In exceptional circumstances, the Research Management Committee may act directly to make suitable arrangements for the examination of a candidate, including the selection of examiners.

9.9. Normally, examiners must agree to read and report upon the thesis within two months of its receipt.

9.10. The external examiners must be independent of both the University and the sponsoring establishment, if any.

9.11. External examiners should normally have substantial research experience in the area under investigation. At least one external examiner must also have had experience of examining research degree candidates at the doctoral level.

9.12. The internal examiner, if any, may be an Associate Supervisor.

9.13. The internal examiner must have experience of research in the general field under investigation and, where practicable, should have specialist knowledge of the area in which the investigation was conducted.

9.14. The Research Management Committee shall provide the examiners with a copy of the thesis and of the Council's PhD Regulations, and with any other relevant information.

9.15. When the examiners are in agreement with respect to the thesis, the Chairperson shall transmit the result of the examination on the prescribed form to the Chairperson of the Research Management Committee. The examiners' report shall recommend:

(i) that the degree be awarded, with or without minor modifications to the thesis, or
(ii) that the candidate be re-examined, or
(iii) that the degree not be awarded.

When the recommendation is that the degree be awarded, the Chairperson must return an Examiners' Report together with a certificate signed by each examiner recommending acceptance of the thesis in fulfillment of the conditions for the award of the PhD degree. A copy of the thesis, together with the certification by the faculty examiners and the Examination Committee will then be lodged in the QUT Library. A copy will be sent at the same time to the sponsoring establishment, if any.

9.16. If the examiners cannot reach agreement, they shall submit separate reports and recommendations to the Research Management Committee. The Committee may then:

(i) not award the degree, or
(ii) accept a majority recommendation with or without the advice of a further external examiner.

9.17. A candidate who fails to satisfy the Research Management Committee at the first attempt may, on the recommendation of the examiners and with the approval of the Research Management Committee, be re-examined not more than once. Application must be made to the Research Management Committee for approval of the re-examination arrangements.

9.18. Re-examination shall take place within 12 months from the date on which the candidate is advised in writing of such re-examination. The Research Management Committee may, on application by the candidate and supported by the Principal Supervisor, approve an extension of this period.

9.19. The examiners must give the candidate guidance on the deficiencies identified by the first examination.
9.20 The Research Management Committee may require that an additional external examiner be appointed for the re-examination.

9.21 Regulations applicable to examinations generally shall apply to the re-examination.

9.22 The examiners may recommend that a candidate who has been examined for the degree of PhD be awarded the degree of Master, provided that the candidate meets or can meet the requirements of a Master’s program.

### Master of Applied Science (Research)

This research program is available in:

- the Faculty of Built Environment and Engineering (BN71)
- the Faculty of Health (HL84)
- the Faculty of Information Technology (IT84).

For the corresponding program in the Faculty of Science, refer to the description of Master of Applied Science (SC80) in the Faculty of Science entry.

**Introduction**

The objectives of the course are:

- to provide postgraduate educational opportunities in specialised fields of applied science by means of a program which involves either an original contribution to knowledge or an original application of existing knowledge
- to provide further education in research methods
- to enable graduates employed in industry to undertake further education by research and thesis
- to enable industrial organisations and other external agencies to sponsor a student research program under the control and supervision of the faculty
- to further relationships between the University and industry or other external agencies engaged in applied science, to their mutual advantage.

**1. General Conditions**

1.1 The Council of the Queensland University of Technology was established in 1989 under the Queensland University of Technology Act 1988.

1.2 The Council's power to approve recommendations from faculty academic boards regarding the registration, supervision and examination of research degree candidates and to develop policy and procedure relating to research degrees is exercised through a Research Management Committee which shall be a subcommittee of Academic Committee.

1.3 Research Management Committee has delegated responsibility for day-to-day administration of research master degree courses to faculty academic boards. Academic boards shall report biannually to the Research Management Committee on progress made by research master degree candidates.

1.4 Unless the context otherwise indicates or requires, the words 'academic board' and 'faculty' shall refer to the faculty in which the candidate registers.

1.5 In order to qualify for the award of the degree of Master of Applied Science, a candidate must:
☐ have completed the approved course of study under the supervision prescribed by the academic board
☐ have submitted and the academic board have accepted a thesis prepared under the supervision of the supervisor
☐ have completed any other work prescribed by the academic board, and
☐ submit to the academic board a declaration signed by the candidate that he/she has not been a candidate for another tertiary award without permission of the academic board.

2. Registration
2.1 Applications shall be accepted subject to the availability of facilities and supervision.
2.2 Applications may be lodged with the Registrar at any time.
2.3 The minimum academic qualifications for admission to a program leading to a Master of Applied Science (Research), shall be:
   ☐ possession of a bachelor degree in health science, applied science or other approved degree from the Queensland University of Technology, or
   ☐ possession of an equivalent qualification, or
   ☐ submission of such other evidence of qualifications as will satisfy the academic board that the applicant possesses the capacity to pursue the course of study.
2.4 Additional requirements for admission to a particular program may be laid down by the academic board.
2.5 In considering an applicant for registration the academic board shall, in addition to assessing the applicant’s suitability, assess the proposed program and its relevance to the aims and objectives of the University.
2.6 A candidate may register either as a full-time or as a part-time student. To be registered as a full-time student, a candidate must be able to commit to the course not less than three-quarters of a normal working week, averaged over each year of candidacy. Such a student may not devote more than 300 hours annually to teaching activities, including preparation and marking.
2.7 A candidate may be internal or external. An external candidate is one whose program of research and investigation is based at a place of employment or sponsoring institution. Normally, support of the sponsoring institution for the candidate’s application is required for registration.
2.8 A candidate shall be registered initially as:
   ☐ a graduate student (provisional), or
   ☐ a graduate student.

A graduate student (provisional) becomes a graduate student when registration is confirmed. Applicants not holding an appropriate honours degree or its equivalent shall normally be given provisional registration.
2.9 A candidate shall receive confirmed registration as a graduate student when he/she:
   ☐ has satisfied the requirements for admission and achieved by work and study a standard recognised by the academic board, or
   ☐ has been accepted for provisional registration in the faculty and has achieved, by subsequent work and study, a standard recognised by the academic board
has satisfied the academic board that he/she is a fit person to undertake the program
has satisfied the academic board that he/she can devote sufficient time to the research and study.

2.10 The academic board may cancel a candidate’s registration if:
- after consulting a candidate’s supervisors and having taken account of all relevant circumstances, the academic board is of the opinion that the candidate either has effectively discontinued his/her studies or has no reasonable expectation of completing the course of study within the maximum time allowed (see Section 4).

2.11 A candidate whose registration has lapsed or has been cancelled and who wishes subsequently to re-enter the course to undertake a research program which is the same or essentially the same as the previous program may be re-admitted under such conditions as the academic board may prescribe.

3. Course of Study
3.1 A candidate for the degree of Master of Applied Science shall undertake a program of research and investigation on a topic approved by the academic board. All projects should be sponsored either by outside agencies such as industry, government authorities, or professional organisations, or by the University itself.

3.2 The program must be such as to enable the candidate to develop and demonstrate a level of scientific competence significantly higher than that expected of a first degree graduate. The required competence normally would include mastery of relevant techniques, investigatory skills, critical thinking, and a high level of knowledge in the specialist area.

3.3 A candidate may be required by the academic board to undertake an appropriate course of study concurrently with the research program.

The course of study normally will include:
- a program of assessed coursework
- participation in University scholarly activities such as research seminars, teaching and publication
- regular face-to-face interaction with supervisors, and
- a program of supervised research and investigation.

3.4 Coursework at masters level demands a capacity for critical analysis and a specialisation of research interests not normally appropriate for an undergraduate program. Such coursework may be conducted in a number of ways:
- as advanced lecture courses
- as seminars in which faculty and students present critical studies of selected problems within the subject field
- as independent study or reading courses, or
- as research projects conducted under faculty supervision.

In all cases, coursework will be based upon a formal syllabus setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed reading material and the method of assessment of progress through and at the end of the course.

3.5 Coursework will occupy not more than half of the total period of registration.
3.6 An application for registration should set out systematically and fully the candidate’s intended course of study. The description should include the area of study within which the candidate’s course lies, the coursework to be undertaken, the proposed title of the thesis to be written, the aim of the proposed program of research and investigation, its background, the significance and possible application of the research program, and the research plan.

4. **Period of Time for Completion of Course of Study**

4.1 A full-time graduate student (provisional) shall not be eligible for confirmation of registration as a graduate student until a period of at least 12 months has elapsed from initial registration. The corresponding period in the case of a part-time student shall be at least 24 months.

4.2 A registered graduate student shall present the thesis for examination after a period of at least one year for a full-time student or two years for a part-time student has elapsed from the time of confirmed registration, except in the case of special permission granted under 4.4. In special cases the academic board may approve a shorter period.

4.3 A registered graduate student shall present the thesis for examination no later than two years if a full-time student or four years if a part-time student from the date of confirmed registration.

4.4 A registered graduate student who holds an honours degree appropriate to the course of study may submit the thesis for examination after not less than one year of registration if a full-time student, or two years if a part-time student. In special cases the academic board may approve a shorter period.

4.5 Where application is made for permission to extend the period within which the candidate may submit a thesis for examination, details of the candidate’s progress shall be presented to the academic board together with the reasons for the delay in completing the course and the expected date of completion. Where the academic board agrees to an extension, it may set a limit to the maximum period of registration in the program.

5. **Supervision**

5.1 For each candidate the academic board shall appoint one or more supervisors with appropriate experience provided that, where more than one supervisor is appointed, one shall be nominated as the Principal Supervisor and others as Associate Supervisors.

5.2 In the case of an internal student, the Principal Supervisor normally shall be from the academic staff of the school where the student carries out the work.

5.3 In the case of an external student, the Principal Supervisor normally shall be from the academic staff of the school supporting the work and at least one Associate Supervisor shall be from the sponsoring organisation.

5.4 At the end of each six-month period a student shall submit a report on the work undertaken to the Principal Supervisor and the Principal Supervisor shall submit a report to the academic board on the student’s work. This report shall be seen by the candidate before submission to the academic board.

6. **Place and Conditions of Work**

6.1 The research program must normally be carried out under supervision in a suitable environment in Australia.

6.2 The academic board shall not admit a candidate to undertake a program of research based at the University unless it has received a statement from the head of school and/or director of centre in which the study is proposed that, in his/her opinion, the applicant is...
a fit person to undertake a research program leading to the master degree, that the program is supported, and that the school/department is willing to undertake the responsibility of supervising the applicant's work.

6.3 The academic board shall not admit a candidate to undertake a research program based at a sponsoring establishment unless it has received:

- a statement from the employer or director of the sponsoring institution that the applicant will be provided with facilities to undertake the research project and that he/she is willing to accept responsibility for supervising the applicant's work, and

- a statement from the head of school or director of centre in which the study is proposed that, in his/her opinion, the applicant is a fit person to undertake a research program leading to the master degree, that the program is supported, and that after examination of the proposed external facilities and supervision, the school/department is willing to accept the responsibility of supervising the work.

7. Thesis

7.1 In the form of presentation, availability and copyright, the thesis shall comply with the provisions of the document Requirements for Presenting Theses.

7.2 Not later than six months after confirmed registration the candidate shall submit the title of the thesis for approval by the academic board. After approval has been granted, no change shall be made except with the permission of the academic board.

7.3 The candidate shall give two months' notice of intention to submit the thesis. Such notice shall be accompanied by the appropriate fee, if any.

7.4 The thesis shall comply with the following requirements:

- a significant portion of the work described must have been carried out subsequent to initial registration for the degree

- it must describe a program of work carried out by the candidate, and must involve either an original contribution to knowledge or an original application of existing knowledge

- it must reach a satisfactory standard of literary presentation

- it shall be the candidate's own account of the work. Where work is carried out conjointly with other persons, the academic board shall be advised of the extent of the candidate's contribution to the joint work

- the thesis shall not contain as its main content any work or material which the student has previously submitted for another degree or similar award

- supporting documents, such as published papers, may be submitted with the thesis if they have a bearing on the subject of the thesis, and

- the thesis shall contain an abstract of not more than 300 words.

7.5 Except with the specific permission of the academic board the thesis must be presented in the English language. Such permission must be sought at the time of application for registration, and will not be granted solely on the grounds that the candidate's ability to satisfy the examiners will be affected adversely by the requirement to present the thesis in English.

7.6 Subject to QUT's Intellectual Property policy, the copyright of the thesis is vested in the candidate.

7.7 Where a candidate or the sponsoring establishment wishes the thesis to remain confidential for a period of time after completion of the work, application for approval
must be made to Research Management Committee when the thesis is submitted. The period normally shall not exceed two years from the date on which the examiners recommend acceptance of the thesis, during which time the thesis will be held on restricted access in the QUT Library.

8. Examination of Thesis
8.1 The academic board shall appoint at least two examiners of whom at least one shall be from outside the University.
8.2 Normally, examiners must agree to read and report upon the thesis within two months of its receipt.
8.3 A candidate may be required to make an oral defence of the thesis.
8.4 On receipt of satisfactory reports from the examiners, and when the provisions of 7.1 have been fulfilled, the academic board shall recommend to Academic Committee that the candidate be awarded the degree.
8.5 If the examiners' reports are conflicting, the academic board may, after appropriate consultation with the Principal Supervisor:
  - seek advice from a further external examiner, or
  - not award the degree.
8.6 If, on the basis of the examiners' reports, the academic board does not recommend that the degree be awarded then it shall:
  - permit the student to resubmit the thesis within one year for re-examination, or
  - cancel the student's registration.

■ Graduate Diploma in Quality (IF69)

The course is administered by the Academic Boards of the Faculties of Built Environment and Engineering, Business and Science via a three-person Executive Committee.

Location: Gardens Point campus
Course Duration: 2 years part-time
Total Credit Points: 96
Standard Credit Points/Full-Time Semester: 48
Course Coordinator: Mr Ian Ogle

Entry Requirements
To be eligible for enrolment in the Graduate Diploma in Quality, an applicant shall have completed a course at degree level or possess an equivalent qualification in Science, Engineering, Management, Commerce, Education or another field deemed to be appropriate.

Where an equivalent course of study or examination cannot be readily established, an applicant may, in accordance with University practice, be recommended for special entry. This type of entry may depend collectively on such factors as the applicant's qualifications, background experience, current employment position etc.

**Honours Degrees**

1. **General**

1.1 These regulations apply to honours degrees consisting of an additional year of full-time study (or equivalent) following completion of an undergraduate pass degree. The policy does not apply to pass degrees which may be awarded with honours.

1.2 Faculties are required to make a submission to Academic Committee for an honours program in the form of a new course proposal. Such a proposal should seek approval for a single honours program covering the full range of majors offered within an undergraduate award, whether or not all majors are to be offered at honours level.

1.3 Faculties are expected to produce statements of procedures to be read with, or which may incorporate, this policy statement.

1.4 Each honours program will be assigned a separate quota.

2. **Admission to an honours degree**

2.1 Students who wish to undertake an honours program should normally apply for admission to it at the end of the final year of their pass degree, or within 18 months of completing that degree.

2.2 In order to be considered eligible for admission, students should have attained a grade point average of at least 5 or an average grade of credit over the entire basic course, including grades of at least credit in all subjects directly relevant to, or specified as prerequisite for, the proposed honours program.

2.3 However, students who have demonstrated outstanding performance in only the final year of a degree, or whose application is based on other factors including work experience or involvement in research, may be admitted at the discretion of the dean.
3. Duration
3.1 Except in special circumstances as approved by the dean, the requirements for an honours degree must be completed within two successive years following first enrolment.

4. Program requirements
4.1 Honours programs must comprise one year of full-time study or equivalent with at least 25 per cent but not more than 50 per cent of the credit points associated with the course to be allocated to a project or dissertation.
4.2 Faculties are responsible for providing candidates with program outlines which specify the distribution of credit point load between project/dissertation and coursework, the procedure for project or dissertation approval and a concise statement of faculty requirements, supervision arrangements, and procedures for examining project reports and dissertations.

5. Unsatisfactory progress
5.1 Failure to make satisfactory progress with either the coursework component of an honours program or with the project/dissertation, or both, may lead to exclusion from the program.
5.2 Unsatisfactory progress consists of:
- receiving a grade of less than 4 (or ‘Satisfactory’, where applicable) in one subject of the coursework component;
- failure to make sufficient progress with the project or dissertation component, in the opinion of the dean.
5.3 A student who is excluded from or otherwise fails to complete an honours program will not normally be readmitted to that program.

6. Assessment
6.1 The minimum grade which may be credited towards an honours degree is 4 (or ‘Satisfactory’, where applicable).
6.2 A minimum of three copies of a dissertation should be presented to the supervisor for examination. Dissertations should be temporarily bound in order to facilitate the making of any revisions and editorial changes required by examiners before final printing and binding.
6.3 Project reports and dissertations will be examined by an examining committee, appointed by the dean, and consisting of at least two examiners, one of whom may be external to the University. The supervisor of the candidate’s work may be a member of the committee but may not chair the committee or act as the primary examiner.

7. Determination of level of honours awards
7.1 The faculty academic board, on advice from the school, will determine the level of honours to be awarded.
7.2 Honours degrees will be awarded at the following levels after account is taken of the candidate’s performance in all subjects and appropriate weight applied to the project or dissertation:

<table>
<thead>
<tr>
<th>Honours 1</th>
<th>First Class Honours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Honours 2A</td>
<td>Second Class Honours, Division A</td>
</tr>
<tr>
<td>Honours 2B</td>
<td>Second Class Honours, Division B</td>
</tr>
<tr>
<td>Honours 3</td>
<td>Third Class Honours</td>
</tr>
</tbody>
</table>
7.3 The level of honours award is to be determined by guidelines, as follows:
Honours 1 Grade point average of 6.50-7.00, or equivalent
Honours 2A Grade point average of 5.50-6.49, or equivalent
Honours 2B Grade point average of 4.50-5.49, or equivalent
Honours 3 Grade point average of 4.00-4.49, or equivalent.

7.4 A candidate who does not reach the standard required for Honours 3 remains with a pass degree.

Bachelor of Engineering (Electronics)/Bachelor of Applied Science (Computing) (IF22)

Location: Gardens Point campus

Course Duration: 5 years full-time

Total Credit Points: 467

Standard Credit Points/Full-Time Semester: 46.7 (average)

Course Coordinators: Dr Dayal Abeyasekere, Mr Mike Roggenkamp

Professional Recognition
This course is accredited by the Australian Computer Society as meeting the training and experience requirements for admission to the grade of Member of the Society. It is accredited by the Institution of Engineers, Australia, and the Institution of Radio and Electronics Engineers, Australia as meeting the training requirements for admission to Graduate membership of these Institutions.

Vacation Practice Requirements in the Electronic Systems Engineering Component
All students shall have engaged in a total of at least 15 weeks in employment approved by the Coordinator of the Electronic Systems Engineering component of the course, in order to satisfy vacation practice requirements. Students shall submit to the relevant Course Coordinator, a description of their work experience, on the appropriate industrial experience record form duly signed by the student and the employer, in order to gain approval for their employment periods.

**Note:** Any advanced subject not previously completed in either the Electrical and Computer Engineering or Computing Science degree courses may be studied as an elective.

---

**Bachelor of Business (Accountancy)/Bachelor of Laws (IF31)**

**Location:** Gardens Point campus

**Course Duration:** 5 years full-time

**Total Credit Points:** 562

**Standard Credit Points/Full-Time Semester:** 56.2 (average)

**Course Coordinators:**
- Business – Professor Lew Edwards
- Law – Ms Gillian Nisbet

*Subject extends over two semesters.*
Professional recognition
The combined Accountancy/Law degree satisfies the academic requirements of the Institute of Chartered Accountants in Australia, the Australian Society of Accountants and the Public Accountants Registration Board of Queensland. The course also satisfies the requirements of the Solicitors' Board and the Barristers' Board of Queensland.

LWB415  Legal Research & Writing 2*  4  1

Note: In second semester of the final year of their course, all BBus (Accy)/LLB students must complete a special course of six hours of classes in Insolvency Law conducted by the Faculty of Law.

Electives
The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to the approval of the Dean of Faculty.

Bachelor of Business (Computing)/Bachelor of Laws (IF32)
Location: Gardens Point campus
Course Duration: 5 years full-time
Total Credit Points: 561
Standard Credit Points/Full-Time Semester: 56.1 (average)
Course Coordinators:
Information Technology – Mr Bob Smyth
Laws – Mr John Pike
Professional Recognition
This course is accredited by the Australian Computer Society as meeting the knowledge requirements associated with the grade of ‘Member’ of the Society, and it meets the academic requirements for admission to practice as a barrister or solicitor.

* Subject extends over two semesters.

Electives
The offering of elective subjects in any semester will depend on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to the approval of the Dean of Faculty.

Bachelor of Engineering (Manufacturing Systems)/Bachelor of Business (Marketing) (IF53)*

Location: Gardens Point campus

Course Duration: 5 years full-time

Total Credit Points: 562

Standard Credit Points/Full-Time Semester: 56.2

Course Coordinator: Mr Andre de Jong

Professional Recognition
Membership, The Institution of Engineers, Australia
Diploma, Australian Institute of Export

Special Course Requirement
All students shall have engaged in a total of at least 15 weeks in employment approved by the Course Coordinator to satisfy the industrial experience requirements.

To gain approval for the employment, the student must submit a description of employment to the Course Coordinator on the appropriate industrial experience record form completed by both the student and employer.

Bachelor of Applied Science (Surveying)/Bachelor of Business (Information Management) (IF51)

Location: Gardens Point campus

Course Duration: 4.5 years full-time

Total Credit Points: 447

Standard Credit Points/Full-Time Semester: 49.67 (average)

Course Coordinators: Mr Jim Glasscock, Mr Michael Middleton

Professional Recognition

This course has been accredited by the Australian Computer Society as meeting the knowledge requirements associated with the grade of ‘Member’ of the Society and it meets the requirements of the Queensland Surveyors’ Board for registration as a surveyor, but not for licensing.

New Opportunities in Tertiary Education (NOTE) Program (BN10)

Location: Gardens Point campus

Course Duration: 1 year part-time

Standard Credit Points/Full-Time Semester: 48

Coordinators: Mrs Wendy Mathieson, Ms Debra Messer

A one-year, part-time post-secondary studies program for women. The program provides bridging tuition to enable women who have the abilities - but who do not meet subject entry requirements - to undertake study in engineering, science or technology courses at QUT.

Students are guided into a study program which takes account of their background and the course to which entry is sought. Subjects are selected from the following list designed specifically for the NOTE program. Students also undertake two or three subjects from the first year of the course to which entry is sought.

FACULTY OF ARTS

Course Structures

■ Master of Arts (Drama) (AA22), Master of Arts (Visual Arts (AA72)

Location: Kelvin Grove campus

Course Duration: 2 years full-time, 3 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Brad Haseman (Drama), Ms Elizabeth Ruinard (Visual Arts)

Entry Requirements
To be eligible for admission, an applicant must hold the following:
(i) an approved honours degree; or
(ii) an approved postgraduate diploma;
(iii) an approved bachelor’s degree at an acceptable standard; or
(iv) other qualifications deemed acceptable which may include substantial relevant experience.

Semesters 1 and 2

Semester 1
AAN003 Aesthetic Codes in Contemporary Society | 12 | 3 |

Semester 2
AAN001 Arts Research Methods I | 12 | 3 |

Research Project
The Research Project may be undertaken as a 48, 96 or 144 credit point project subject with the approval of the Course Coordinator.

Electives
Details of elective subjects being offered are available from the Course Coordinator. Students normally undertake 48 credit points in electives. Depending on the nature of the Research Project electives may be varied to 96 credit points or no elective studies.

Graduate Diploma of Social Science (Counselling) (SS10)

Location: Carseldine campus

Course Duration: 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Glen Guy

Entry Requirements

To be eligible for admission, an applicant must hold the following:

(i) an approved degree or diploma in the field of human service;
(ii) relevant work experience; and
(iii) personal suitability.

Special Course Requirements

The course is currently offered on a part-time basis, which involves attendance at two 3-hour evening sessions per week plus additional practicum requirements. Students should note that the practicums are not scheduled on a regular weekly contact basis but that a minimum of 24 hours work in each practicum is required during the semester in which the practicum is scheduled.

Course Structures

Master of Built Environment (BN73)

Location: Gardens Point campus

Entry Requirements
Applicants for admission to the masters program:

(i) shall hold a suitable degree or postgraduate qualification leading to eligibility for corporate membership of an accepted professional institute; or

(ii) shall hold qualifications approved by the Masters Degree Standing Committee on the recommendation of the Course Coordinator as equivalent to the requirements set out in paragraph (i) above; and

(iii) shall normally have at least three years of appropriate work experience.

The basic qualification and work experience will not be the sole requirement for admission. The Masters Degree Standing Committee may also take into account an applicant’s performance as an undergraduate and a demonstrated commitment to the professional area.

PROJECT MANAGEMENT MAJOR

Course Duration: 1.5 years full-time, 3 years part-time

Total Credit Points: 144

Standard Credit Points/Full-Time Semester: 48

Coordinator for Project Management Major: Mr Andrew Leicester

The first two semesters full-time or four semesters part-time are identical to the Graduate Diploma in Project Management (CN64). Persons admitted to the Master of Built Environment who are graduates of the Graduate Diploma in Project Management will complete the final two semesters of the course in order to be awarded the masters degree.

The Graduate Diploma in Project Management has majors in Building Project Management and Property Development. These areas are available as specialisations within the masters program.

**URBAN DESIGN MAJOR (AND GRADUATE DIPLOMA IN URBAN DESIGN [PL69])**

**Course Duration:** 1 year full-time, 2 years part-time

**Total Credit Points:** 96 (for both Graduate Diploma and Masters)

**Standard Credit Points/Full-Time Semester:** 48

**Coordinator for Urban Design Major:** Dr Catherin Bull

* Subject extends over two semesters.
Entry Requirements
NORMAL ENTRY
1. To the Graduate Diploma:
A bachelor degree with a grade point average of 5 or better and demonstrated potential in a relevant professional activity, or a relevant graduate diploma with a grade point average of 5 or better, or a qualifying program with a grade point average of 5 or better.

2. To the Masters:
A grade point average of 5 or better in the Graduate Diploma in Urban Design at the completion of one semester full-time or two semesters part-time.

Relevant professional activity normally means the areas of Architecture, Planning and Landscape Architecture.

PROVISIONAL ENTRY
Applicants with other than normal entry requirements may be registered provisionally in the course if they submit other evidence of academic and professional attainment and candidature is approved by the Masters Degree Standing Committee on the recommendation of the Course Coordinator.

A person provisionally enrolled is required to satisfactorily undertake a qualifying program which may include course subjects, and/or such other work as is determined before admission is confirmed. Provisional registration in the course will apply for a maximum period of 12 months for both full-time and part-time students.

Graduate Diploma - Masters Level Articulation
Applicants are considered initially for acceptance in the Graduate Diploma in Urban Design. At the completion of one semester for full-time students and at the completion of two semesters for those studying part-time, students will be considered for enrolment in the Masters in Urban Design. A grade point average of 5 or better in the course is normally required for progression to the Masters level.

Focus in Graduate Diploma and Masters
The Graduate Diploma focuses on skills and knowledge development through set coursework and elective coursework.

The Masters includes skills and knowledge development through set coursework in common with the Graduate Diploma, but also requires individual research and the writing of a dissertation.

Full-Time Course Structure
(All subjects are for both Graduate Diploma and Masters students except as noted.)

### CITY AND REGIONAL PLANNING MAJOR

**Course Duration:** 1 year full-time, 2 years part-time

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Coordinator for City and Regional Planning Major:** Associate Professor Phil Heywood

**Entry Requirements**

Applicants for admission should:

1. hold a Graduate Diploma in Urban and Regional Planning from QUT; or

* Masters students only.

+ Graduate Diploma students only.
(ii) hold a professional planning degree or diploma from a recognised university, college of advanced education, or approved equivalent tertiary institution; and

(iii) have attained a level of achievement in previous studies which attests to the applicant’s ability to undertake successfully a masters program in the field of City and Regional Planning.

LANDSCAPE ARCHITECTURE MAJOR

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Coordinator for Landscape Architecture Major: Dr Catherin Bull

Entry Requirements

Applicants for admission shall:

(i) hold the Graduate Diploma in Landscape Architecture from QUT with a grade point average of 5 or better or an equivalent qualification, and

(ii) have demonstrated potential through relevant professional activities to participate actively in a Masters program.
In addition, as part of the documentation for application, each applicant is required to submit:

(i) a written statement identifying the specialised area of study to be pursued (as a means of defining potential areas of concentrations and of giving a preliminary indication of the Dissertation topic) and the contribution the applicant intends to make to the course and the profession by undertaking the particular focus of study; and

(ii) a folio in A4 or A3 format demonstrating the applicant’s professional experience and expertise.

Note: Regarding Elective - students elect subjects outside their Major in areas such as environmental law, marketing, management, business, politics, economics, health, and safety in order to extend their knowledge and skills into related areas.
Master of Engineering Science (Civil Engineering) (CE74)

Location: Gardens Point campus

Course Duration: 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Brian Rigden

Entry Requirements

Entrants to the masters degree program must either:

(i) have obtained a Bachelor of Engineering degree with honours in Civil Engineering, or
(ii) have obtained a Graduate Diploma in Municipal Engineering with a grade point average of at least 5.

Where entrants do not have honours ranking in their Bachelor of Engineering (Civil) degree and/or have not undertaken subjects equivalent to the available QUT undergraduate subjects in their chosen area of study, the Head of School may require that additional undergraduate subjects be undertaken.

Entrants may transfer from the Graduate Diploma in Municipal Engineering with a grade point average of at least 5 after completion of at least 50 per cent of the coursework for the Graduate Diploma.

Course Structure

The course consists of 20 credit points (5 semester hours) of core subjects plus 40 credit points (10 semester hours) of electives plus a project equivalent to 8 semester hours. The project comprises 35 percent of the content of the course. The subject CEP999 is a multi-semester subject with a combined value of 36 credit points, or over two semesters at 18 credit points per semester.

Graduates who have completed the prescribed subjects for a major theme will have their award certificates endorsed - “Majoring in ...”.

### Master of Engineering Science (Computer Engineering) (EE75)

**Location:** Gardens Point campus

**Course Duration:** 1 year full-time, 2 years part-time

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Mr Paul Wilson

**Entry Requirements**

(i) A Bachelor's degree in Engineering with at least second class honours, or

(ii) Students in possession of a Bachelor's degree in Engineering may transfer from the Graduate Diploma in Computer Engineering with a grade point average of at least 5 (credit level) at the end of the first part-time year.

(iii) Graduates from the Graduate Diploma in Automatic Control or Computer Controlled Systems or Computer Engineering with a grade point average of 5 or greater and with a Bachelor's degree in Engineering can complete the Master of Engineering Science by completing the research project and thesis.

**Methods of Assessment**

The course is assessed 50 per cent by coursework and 50 per cent by thesis.

The coursework consists of the four compulsory subjects of the Graduate Diploma in Computer Engineering. Assessment of these subjects usually includes a written formal examination and may include formal assignments in problem solving and design, formal

---

**Master of Engineering (BN72)**

**Location:** Gardens Point campus

**Introduction**

The objectives of the program are:

- to provide for postgraduate educational opportunities in design, investigation, development, research or any combination thereof, directly related to professional engineering practice
- to provide for increased relationships between the University and industry or other external agencies involved in engineering to their mutual advantage, and
- to provide formal recognition of work of an advanced and/or original nature.

**1. General Conditions**

1.1 The Council of the Queensland University of Technology was established in 1989 under the Queensland University of Technology Act 1988.

1.2 The Council's power to approve recommendations from faculty academic boards regarding the registration, supervision and examination of research degree candidates and to develop policy and procedures relating to research degrees is exercised through a Research Management Committee which is a subcommittee of Academic Committee.

1.3 Research Management Committee has delegated responsibility for day-to-day administration of research master degree courses to faculty academic boards. Academic boards shall report biannually to Research Management Committee on progress made by research master degree candidates.

1.4 This program is administered by the Academic Board of the Faculty of Built Environment and Engineering through its Master's Degree Standing Committee. The program is offered in Civil, Electrical and Electronic Systems and Mechanical and Manufacturing Engineering.

1.5 In order to qualify for the award of the degree of Master of Engineering a candidate must:

* Subject extends over two semesters.
☐ have completed the approved program involving advanced and/or original work under the supervision prescribed by the Built Environment and Engineering Academic Board

☐ have submitted and the Faculty of Built Environment and Engineering Academic Board accepted a thesis, together with reports, and/or documents where applicable, prepared under the supervision of the supervisor

☐ have completed such other work as may be prescribed by the Faculty Academic Board, and

☐ submit to the Faculty Academic Board a declaration signed by the candidate that he/she has not been a candidate for another tertiary award without permission of the Academic Board.

2. Registration

2.1 Applications shall be accepted subject to the availability of facilities and supervision.

2.2 Applications may be lodged with the Registrar at any time.

2.3 There is a six month maximum period between acceptance by the Master’s Degree Standing Committee and enrolment by the student in the Master of Engineering before the offer of admission to the program lapses.

2.4 Normal admission will require the candidate to have at least an Honours 2A degree in a bachelor degree in Engineering from the Queensland University of Technology or a qualification judged equivalent by the Faculty Academic Board.

Entry to the program may be allowed by candidates without an Honours 2A degree if the following requirements are met:

(i) three years’ professional experience in the general field in which the proposed work lies; or

(ii) satisfactory completion of an appropriate master’s qualifying program including formal coursework and/or reading program in related fields stipulated by the Faculty of Built Environment and Engineering Academic Board;* or

(iii) the submission of technical publications or other appropriate evidence which satisfies the Academic Board that advanced knowledge has been acquired in a division of engineering in which the applicant has worked as a professional engineer in a position of responsibility. This knowledge should be relevant to the field of study proposed.

2.5 A candidate shall be registered initially as:

☐ a graduate student (provisional) if he/she is to undertake an appropriate qualifying program

☐ a graduate student if he/she is considered by the Academic Board to meet the requirements for entry.

2.6 In considering an applicant for registration, the Academic Board shall, in addition to assessing the applicant’s suitability, be satisfied that:

☐ the proposed program is relevant to the aims and objectives of the University

☐ the proposed program has relevance to the needs of industry, and

☐ the applicant can devote sufficient time to his/her planned program.

* Pending satisfactory completion of the qualifying program provisional status will be applied to the candidate.
2.7 The program is offered on a full-time and/or a part-time basis. Part-time students normally are employed in some professional engineering capacity during the day and carry out their projects on a part-time basis at QUT or in their place of employment or in a sponsoring organisation.

2.8 Full-time students may be on a scholarship from industry or QUT, and may carry out their projects at QUT or in a sponsoring organisation. Normally full-time students would be expected to work on their projects at QUT for not less than three-quarters of a normal working week, averaged over each year of candidacy. Such a student may not devote more than 300 hours annually to teaching activities, including preparation and marking.

2.9 The Academic Board may cancel a candidate’s registration if after consulting a candidate’s supervisors and having taken account of all relevant circumstances, the Academic Board is of the opinion that the candidate either has effectively discontinued his/her studies or has no reasonable expectation of completing the course of study within the maximum time allowed (see Section 4).

2.10 A candidate whose registration has lapsed or has been cancelled, and who wishes subsequently to re-enter the course of study to pursue a research program which is substantially the same as the previous investigation, may be re-admitted under such conditions as the Academic Board shall prescribe.

3. Course of Study

3.1 A candidate for the degree of Master of Engineering will undertake necessary project work in design, investigation and research and/or development work on a topic approved by the Academic Board.

3.2 All projects should be sponsored by outside agencies such as industry, government authorities and professional organisations, or by QUT itself. This provision is to ensure that programs are relevant to the aims of the University and the community. It is important that the projects be primarily directed towards industry need.

3.3 Where advised*, a candidate may be required to complete satisfactorily formal coursework in subjects relevant to the field of study up to a total class contact of 48 credit points.

3.4 The supervisor shall require students to participate in graduate seminars and may require them to attend specialist lectures. Students will be encouraged to attend conferences, where these are related to the field of the project.

3.5 The course of study normally includes:

- participation in University scholarly activities such as research seminars, teaching and publication
- regular face-to-face interactions with supervisors, and
- a program of supervised research and investigation.

The course of study may also include a program of assessed coursework.

3.6 Coursework at masters level demands a capacity for critical analysis and a specialisation of research interests not normally appropriate for an undergraduate program. Such coursework may be conducted in a number of ways:

- as advanced lecture courses
- as seminars in which faculty and students present critical studies of selected problems within the subject field

* As a qualifying program.
as independent study or reading courses, or
as research projects conducted under faculty supervision.

In all cases, coursework will be based upon a formal syllabus setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed reading material and the method of assessment of progress through and at the end of the course.

3.7 The following documents should be lodged with the application:
- details of academic qualifications and supporting evidence, including copies of results for each year of courses
- a brief account of industrial experience
- a list of publications
- a summary of the work to be undertaken in the proposed program, where this work will be undertaken, the amount of time which will be devoted to it, the resources required
- sponsorship details
- statement of approval by Head of School, and
- any other relevant material.

4. Period of Time for Completion of Course Study
4.1 The duration of study for students with four years of relevant study at tertiary level will normally be one year of full-time study or the part-time equivalent.

In order to encourage completion of research degrees within a reasonable timeframe, QUT has set limits on the length of time for which it will fund a faculty for full-time research master degree candidates, as two years.

Time limits are measured in calendar years from the first day of the first semester in which the student enrolled. Periods of exclusion or absence with or without approval are included.

Students who exceed these limits may be asked to show cause why they should not be excluded from further enrolment in the course.

Students are notified of exclusion by registered mail. They have right of appeal to the Academic Appeals Committee.

5. Supervision
5.1 The Academic Board shall appoint one or more supervisors in respect of each candidate, provided that, where more than one supervisor is appointed, one shall be nominated as the Principal Supervisor and others as Associate Supervisors.

5.2 The Principal Supervisor shall normally be from the academic staff of the QUT school in which the student is enrolled.

5.3 Candidates shall present six-monthly progress reports to their Principal Supervisor, who will submit these to the Academic Board with comments.

6. Place and Conditions of Work
6.1 The research program must normally be carried out under supervision in Australia.

6.2 The Academic Board shall not admit a candidate unless it has received:
- a supporting statement from the head of the QUT school supervising the program that in his/her opinion, the applicant is a suitable person to undertake a research
program leading to the master degree, that he/she supports the program, and that
the school is willing to undertake the responsibility of supervising the work of the
applicant, and

- a supporting statement from the employer, stating that he/she is aware of the course
  rules and is prepared to sponsor and support the applicant. The employer should
  also state the extent of facilities available for the project, the extent to which
  supervision could be given for this work and the extent to which time will be made
  available to the applicant for the project.

7. Thesis

7.1 In the form of presentation, the thesis shall comply with all the requirements of the
document Requirements for Presenting Theses.

7.2 No later than six months after confirmed registration, students shall submit the title
of their thesis for approval by the Academic Board, and after approval has been granted,
no change will be made except with the permission of the Academic Board.

7.3 The candidate shall give two months’ written notice of intention to submit his/her
thesis.

7.4 The thesis shall comply with the following requirements:

- a significant proportion of the work described (as determined by the Academic
  Board) must have been completed subsequent to initial registration for the master
  degree
- there must be an advanced and/or original contribution to the knowledge of the
  subject
- it must reach a satisfactory standard of literary presentation
- it shall be the student’s own account of the work. Where work is carried out
  conjointly with other persons, the Academic Board shall be advised as to the extent
  of the student’s contribution to the joint work
- the thesis shall not contain as its main content any work or material which the
  student has previously submitted for another degree or similar award, and
- the thesis may consist primarily of reports, plans and/or documents or may be
  supported by these if they have a bearing on the subject of the thesis.

7.5 Except with the specific permission of the Academic Board the thesis must be
presented in the English language. Such permission must be sought at the time of
application for registration, and will not be granted solely on the grounds that the
candidate’s ability to satisfy the examiners will be affected adversely by the requirement
to present the thesis in English.

7.6 Subject to QUT’s Intellectual Property policy, the copyright of the thesis is vested in
the candidate.

7.7 Where a candidate or the sponsoring establishment wishes the thesis to remain
confidential for a period of time after completion of the work, application for approval
must be made to the Research Management Committee when the thesis is submitted. The
period normally shall not exceed two years from the date on which the examiners
recommend acceptance of the thesis during which time the thesis will be held on restricted
access in the QUT Library.
8. Examination of Thesis
8.1 The Academic Board shall appoint three examiners, of whom at least two shall be from outside of the University. No supervisor of the candidate shall be appointed as one of the examiners.

8.2 Normally, examiners must agree to read and report upon the thesis within two months of its receipt.

8.3 On receipt of the reports from the examiners, the Academic Board shall:
(i) recommend that the thesis be accepted without modification, or
(ii) recommend to Academic Committee that the student be awarded a Master of Engineering degree, after any minor amendments requested by the examiners have been made; or
(iii) permit the student to resubmit the revised thesis for re-examination within one year, or
(iv) cancel the student’s registration.

8.4 If the examiners’ reports are conflicting, the Academic Board may, after appropriate consultation with the Principal Supervisor, resubmit the thesis to the examiners with copies of the examiners’ reports. After due consideration of further reports from the examiners, a majority decision will be accepted by the Board.

Graduate Diploma in Computer Engineering (EE65)

Location: Gardens Point campus

Course Duration: 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Paul Wilson

Entry Requirements
To be eligible for admission an applicant must hold a Bachelor’s degree in Engineering or Computer Science.

Applicants possessing a degree in other areas of technology such as Mathematics, Physics or Chemistry may be required to undertake prerequisite subjects at undergraduate level.

Years 2 - Elective Subjects*

Year 2, Semester 1

Select two subjects from the following three:

EEP122 Graphics & Computer Vision 12 3
EEP123 Process Control & Robotics 12 3
EEP124 Data Communications 12 3

Year 2, Semester 2

Select two subjects from the following three:

EEP120 Networks & Distributed Computing 12 3
EEP121 Parallel & Super Computing 12 3
EEP125 Advanced Engineering Software Tools 12 3

Graduate Diploma in Industrial Design (AR61)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Associate Professor Vesna Popovic

Entry Requirements

To be eligible for admission, an applicant must:

(i) hold an approved degree or diploma from a recognised tertiary institution, or
(ii) have attained professional recognition by an equivalent course of study or examination.

Professional Recognition

The Graduate Diploma in Industrial Design has been accredited by the Design Institute of Australia (DIA). Graduates are eligible for Associate membership upon graduation.

Graduate Diploma in Interior Design (AR62)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Peter Hedley

Entry Requirements
To be eligible for admission, an applicant must:
(i) hold an approved degree or diploma from a recognised tertiary institution; and
(ii) have attained professional recognition by an equivalent course of study or examination.

Professional Recognition
The Graduate Diploma in Interior Design is fully accredited by the Design Institute of Australia.

### Graduate Diploma in Landscape Architecture (PL66)

**Location:** Gardens Point campus

**Course Duration:** 2 years full-time, 4 years part-time

**Total Credit Points:** 192

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Mr George Williams

**Entrance Requirements**

To be eligible for normal admission, an applicant must:

(i) hold an approved degree or diploma from a recognized tertiary institution; or  
(ii) have attained professional recognition by a course of study or examination.

Special entry provisions also apply. All applicants are required to have appropriate skills and knowledge in basic design/perception, free-hand drawing and technical drawing prior to enrolment.

Graduates of the Bachelor of Built Environment (Landscape Architecture Major) are granted exemption from Year 1 (full-time) or Years 1 and 2 (part-time). Students from other backgrounds will be granted exemptions as appropriate to their experience.

**Professional Recognition**

The Graduate Diploma in Landscape Architecture is accredited by the Australian Institute of Landscape Architects.

Graduate Diploma in Municipal Engineering (CE63)

Location: Gardens Point campus

Course Duration: 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Brian Rigden

* Field trip may be conducted in Year 3, Semester 2 or Year 4, Semester 2.
Entry Requirements

NORMAL ENTRY
To be eligible for admission an applicant must hold an acceptable qualification in engineering from a recognised tertiary institution.

QUALIFYING ENTRY
Applicants who do not meet the requirements for normal entry but who hold a tertiary qualification in a technological field or other equivalent qualifications or hold professional engineering recognition may be required to complete such prerequisite engineering subjects as may be determined by the Head of the School of Civil Engineering prior to enrolment in the course.

Course Structure
The course consists of 48 credit points (13 semester hours) of core material and 48 credit points (10 semester hours) of elective material.

Graduates who have completed the prescribed subjects for a major theme will have their award certificates endorsed - “Majoring in ...”.

Graduate Diploma in Project Management (CN64)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Andrew Leicester

Entry Requirements
To be eligible for admission an applicant must:
(i) hold an approved degree or diploma from a recognised tertiary institution; or
(ii) have attained professional recognition by an equivalent course of study or examination, and
(iii) have a minimum of three years of relevant experience after graduation.
Where an equivalent course of study or examination cannot be readily established, an applicant, at the discretion of the Dean of Faculty, may be permitted to undertake a qualifying examination, the satisfactory completion of which will entitle the applicant to the status of a graduate or diplomate for the purpose of admission.

■ **Graduate Diploma in Surveying Practice (SV68)**

**Location:** Gardens Point campus

**Course Duration:** 1 year full-time (34 weeks)

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Mr Ian McGhie

**Professional Recognition**
Successful completion of the course leads to the award of Graduate Diploma in Surveying Practice, and licensing by the Surveyors Board of Queensland.

* Subject extends over two semesters.
Entry Requirements

NORMAL ENTRY
To be eligible for admission an applicant must hold the following:

(i) the degree of Bachelor of Applied Science (Surveying) from the Queensland University of Technology; or

(ii) the degree of Bachelor of Surveying from the University of Queensland; or

(iii) from another tertiary institution a degree acceptable to the Surveyors Board of Queensland and considered by the Head of the School of Surveying to be at least equivalent to the degree of Bachelor of Applied Science (Surveying) of this University.

QUALIFYING ENTRY
Applicants who do not meet the requirements for normal entry but who hold a tertiary qualification in a technological field or other equivalent qualification may be required to complete such prerequisite surveying and other subjects as may be determined by the Head of School prior to enrolment in the course.

Graduate Diploma in Urban and Regional Planning (PL67)

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr Brian Hudson

Entry Requirements
To be eligible for admission, an applicant must:

(i) hold an approved degree or diploma from a recognised tertiary institution; or

(ii) have attained professional recognition by an equivalent course of study or examination.
Graduates of the Bachelor of Built Environment course, Urban and Regional Planning Major, shall be granted exemption from Year 1 (full-time) or Years 1 and 2 (part-time). Students from other backgrounds will be granted exemptions as appropriate to their experience.

Professional Recognition
The Graduate Diploma in Urban and Regional Planning is fully accredited by the Royal Australian Planning Institute.

- Bachelor of Built Environment (Architectural Studies), Bachelor of Built Environment (Industrial Design), Bachelor of Built Environment (Interior Design), Bachelor of Built Environment (Landscape Architecture), Bachelor of Built Environment (Urban and Regional Planning) (BN30)

**Location:** Gardens Point campus

**Course Duration:** 3 years full-time

**Total Credit Points:** 288
Standard Credit Points/Full-Time Semester: 48

Course Coordinators:
Planning and Landscape Architecture – Professor Phil Heywood
Interior and Industrial Designer – Professor Bill Lim

Majors Coordinators:
Architectural Studies – Professor Bill Lim
Industrial Design – Associate Professor Vesna Popovic
Interior Design – Mr Peter Hedley
Landscape Architecture – Ms Delwynn Poulton
Urban and Regional Planning – Ms Janelle Brown

Professional Recognition
ARCHITECTURAL STUDIES MAJOR
The Bachelor of Built Environment (Architectural Studies) must be completed before students are eligible to apply for entry to the fourth year of the part-time Bachelor of Architecture course.

Upon completion of the remaining three years of the part-time course, during which time students have been employed in an approved professional practice, the academic requirements for membership of professional bodies are met.

INDUSTRIAL DESIGN MAJOR
Successful completion of the Bachelor of Built Environment (Industrial Design) satisfies the entry requirement for the Graduate Diploma in Industrial Design - graduates of which are eligible for Associate Membership of the Design Institute of Australia.

INTERIOR DESIGN MAJOR
Successful completion of the Bachelor of Built Environment (Interior Design) satisfies the requirements for entry into the Graduate Diploma in Interior Design, which is accredited by the Design Institute of Australia.

LANDSCAPE ARCHITECTURE MAJOR
Successful performance in the Bachelor of Built Environment (Landscape Architecture) enables students to gain entry to the Graduate Diploma course. The Graduate Diploma in Landscape Architecture is the only course in Landscape Architecture in Queensland, and one of the courses in Landscape Architecture accredited by the Australian Institute of Landscape Architects.

URBAN AND REGIONAL PLANNING MAJOR
Successful completion of the Bachelor of Built Environment (Urban and Regional Planning) enables students to gain entry to the Graduate Diploma in Urban and Regional Planning, which is fully accredited by the Royal Australian Planning Institute.

**Bachelor of Applied Science (Construction Management) (CN31)**

Location: Gardens Point campus

Course Duration: 6 years part-time, 2 years full-time plus 2 years part-time

Total Credit Points: 289

Standard Credit Points/Full-Time Semester: 48.17

Course Coordinator: Mr Gary Thomas

Special Course Requirements

A student registered in the part-time study program must be employed full-time by an approved building organisation or other approved body, for three of the final four years of the course.

A student registered in the full-time study program must be similarly employed during the final two years part-time segment of the course.

Part-time study generally involves 11 to 12 hours per week and comprises a half-day release from employment with the remaining time spread over two or three nights between 5pm and 9.30pm.

For the first year of the part-time course a whole day release from employment is required.

Subjects are offered only once each year. This means that full-time students are required to attend part of their program in the evening.

---

**Bachelor of Applied Science (Property Economics) (CN32)**

**Location:** Gardens Point campus

**Course Duration:** 3 years full-time, 6 years part-time

**Total Credit Points:** 288

**Standard Credit Points/Full-Time Semester:** 49.83

**Course Coordinator:** Mr Terry Boyd

**Professional Recognition**

Completion of the undergraduate course together with the related experience requirements make a graduate eligible for membership of the Australian Institute of Valuers and Land Economists, registration by the Valuers Registration Board of Queensland and licencing as a real estate agent.

**Special Course Requirement**

A student registered in the part-time study program must be employed full-time in an approved organisation for three of the final four years of the course.

Part-time study generally involves 11 hours per week and comprises a half-day release from employment with the remaining time spread over two or three nights between 5pm and 9.30pm.
Subjects are offered only once each year. This means that full-time students are required to attend part of their program in the evening.

**Bachelor of Applied Science (Quantity Surveying) (CN33)**

**Location:** Gardens Point campus

**Course Duration:** 6 years part-time, 2 years full-time plus 2 years part-time

**Total Credit Points:** 281

**Standard Credit Points/Full-Time Semester:** 46.83

**Course Coordinator:** Mr Don Campbell-Stewart

**Professional Recognition**

Completion of the Bachelor of Applied Science (Quantity Surveying) together with the related experience requirements, enables a graduate to be eligible for membership of the Australian Institute of Quantity Surveying.

**Special Course Requirements**

A student registered in the part-time study program must be employed in a Building or Quantity Surveying Office under the direction of a qualified Quantity Surveyor for three of the final four years of the course.

A student registered in the full-time study program must be similarly employed during the final two years part-time segment of the course.

Part-time study generally involves 11-12 hours per week; comprising a half-day release from employment and the remaining time spread over two or three nights between 5pm and 9.30pm.

For the first year of the part-time course a whole day release from employment is required.

Subjects are offered only once each year. This means that full-time students are required to attend part of their program in the evening.

Bachelor of Architecture (AR41)

Location: Gardens Point campus

Course Duration: 6 years part-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Professor Bill Lim

Professional Recognition
On completion of the course and one year’s postgraduate practical experience graduates are eligible for associate membership of the Royal Australian Institute of Architects and are eligible to sit for the registration examination conducted by the Board of Architects of Queensland.

* Subject extends over two semesters.
Special Course Requirements

(i) Except as provided in (ii) below, a student must be engaged in approved employment for 11 months per year for four of the six years of the course, including one of the two final years. Approved employment is defined as working under the direction of an architect or, for a period not exceeding six months, gaining experience in a related field approved by the Head of School. Students should work under the same employer for at least six months.

(ii) A student who is admitted with advanced standing and who is granted exemption from all subjects in the first three years of the course may be granted exemption from the subject ARB791 Approved Employment 1.

ARB794 Approved Employment 4

Special notes relating to Honours and With Distinction in courses in the Faculty of Built Environment and Engineering

Field Trips
Field trips or field projects in the Engineering courses have a compulsory attendance requirement.

Honours and With Distinction
Honours may be awarded in the four-year Bachelor of Engineering courses. First class honours, second class honours division A and second class honours division B may be awarded. Candidates for a degree with honours must fulfil the requirements for a pass degree and achieve a standard of proficiency in all course subjects as may from time to time be determined by the Faculty Academic Board and approved by Academic Committee.

* Subject extends over two semesters.
'With Distinction' may be awarded in the Bachelor of Applied Science courses, Bachelor of Built Environment, and in the Graduate Diploma and Associate Diploma courses. The award 'With Distinction' depends on proficiency shown in normal assessment for each course offered. There are no additional requirements.

Honours and With Distinction Based on Grade Point Average
The Faculty of Built Environment and Engineering Academic Board has resolved that honours and with distinction for students graduating in 1992 and thereafter will be based on grades achieved by students throughout the whole of their course as determined by the grade point average (GPA) calculation.

For the four-year Bachelor of Engineering courses, students obtaining a GPA of 6.0 or greater will normally qualify for the award of first class honours. Students obtaining a GPA of 5.5 to 5.99 will normally qualify for the award of second class honours division A. Students obtaining a GPA of 5.0 to 5.49 will normally qualify for the award of second class honours division B.

For double degree engineering courses, the student's GPA will be based on the engineering subjects which they study together with sufficient subjects from the other degree course to make up approximately the same number and type (where possible) of subjects so that the aggregate of subjects, as determined by the Dean, is equivalent to the appropriate engineering degree. Students obtaining a GPA (for the group of subjects as set out in the previous sentence) of 6.0 or greater will normally qualify for the award of first class honours. Students obtaining a GPA of 5.5 to 5.99 will normally qualify for the award of second class honours division A. Students obtaining a GPA of 5.0 to 5.49 will normally qualify for the award of second class honours division B.

For the award of 'With Distinction', students must obtain a GPA of 5.5 or greater.

Students who commenced their program prior to 1990 may appeal against the award of 'Honours' or 'With Distinction' based on GPA if they feel they have been disadvantaged by the new system.

II Special notes relating to Bachelor of Engineering courses

Industrial Experience
A student shall have engaged in at least five weeks' approved employment in conjunction with each of the first, second and third years of the full-time course or first, third and fifth years of the part-time course. In addition, students in the Bachelor of Engineering (Aerospace Avionics) degree, are required to obtain two weeks specialist experience during the first year of their course.

As a minimum requirement any employment is suitable for credit towards Industrial Experience 1. Employment in any engineering firm may be credited towards Industrial Experience 2 whilst the requirement for Industrial Experience 3 is that employment must be obtained in the specialty engineering area being studied i.e. civil, electrical or mechanical engineering.

The student must submit an industrial experience record form which has been completed by both the student and the employer. These forms are available from the Faculty office. In addition civil engineering students must submit written report(s) covering the experience claimed for Industrial Experience 2 and Industrial Experience 3. A booklet outlining the requirements is available from the Civil Engineering office in 'L' Block, Gardens Point campus.
Bachelor of Applied Science (Surveying) (SV34)

Location: Gardens Point campus

Course Duration: 3 years full-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Brian Hannigan

Professional Recognition

Eligibility for registration by the Surveyors Board of Queensland. Recognised as satisfying the academic requirements for admission as a member of both the Institution of Surveyors (Australia) and the Australian Institute of Cartographers.

Special Course Requirements

For successful completion of the course a student must have completed at least 18 weeks of approved employment. For the employment to be recognised, the student must submit details of the work experience on an industrial experience record form or diaries provided for the purpose and certified by the employer. Should employment exceed the minimum required, it is strongly recommended that the details also be recorded in the diaries and certified by the employer as a record of experience which may be used when seeking registration or licensing by the Board of Surveyors.

Electives
Refer to full-time course structure.

**Bachelor of Engineering (Mechanical) (ME45)+**

Location: Gardens Point campus

Course Duration: 4 years full-time, 6 years part-time

Total Credit Points: 384

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr D. Hargreaves

Professional Recognition
Membership of the Institution of Engineers, Australia.

Refer to full-time course structure.

Associate Diploma in Cartography (SV24)

Course Discontinued: No further intakes

Location: Gardens Point campus

Course Duration: 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Basil Pathe

Professional Recognition
Associate Membership of the Australian Institute of Cartographers.

Associate Diploma in Civil Engineering (CE21)

Note: There are two majors to the course, a General Major and a Water and Wastewater Process Operation Major. The General Major is offered both full-time and part-time. The Water and Wastewater Process Operation Major is offered in the part-time mode, subject to quotas.

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time.

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Robin Black

Professional Recognition
Membership of the Australian Institute of Engineering Associates and of the Institute for Drafting and Design, Australia.

Two Subjects from List B 14 6
Two Elective Subjects 14 6

Generally a full-time student will gain 24 credit points by successfully completing six practical experience subjects designated by the suffix A after the subject name, and a part-time student will gain 24 credit points for successfully completing 120 weeks industrial employment. However, a combination of practical experience subjects and industrial employment totalling 24 credit points will be accepted. Forms for obtaining credit for industrial employment are available from the Faculty office. Details of acceptable industrial employment can be obtained from the Course Coordinator.

Part-Time Course Structure
Part-time students shall have engaged in at least 120 weeks of approved employment, i.e. 15 weeks for each of the eight Industrial Employment subjects, before being eligible for the Associate Diploma award. For the employment to be recognised, students must submit an industrial experience record form, provided for the purpose, which has been completed by both the student and the employer. These forms may be collected from the Vacation Employment Officer in the Faculty Office.

The first four semesters are common to the General and Water and Wastewater Process Operation Majors.

Up to 21 credit points of subjects from other modes or strands of this course or from other QUT courses may be approved by the Head of School as alternatives to the listed
electives. The number of elective subjects available is dependent upon a sufficient number of students being enrolled.

Degree level subjects may be selected as electives with the approval of the Head of School.

WATER AND WASTEWATER PROCESS OPERATION MAJOR  
(Semesters 1 to 4 are common to the General Major.)

Students must complete the first set of four subjects or the second set of two subjects.

### Year 3, Semester 1
- CET565 Road & Drainage Engineering  7 3
- CET585 Civil Engineering Drafting  7 3
- CET775 Public Health Engineering  7 3
- BNT500 Industrial Employment 5  3 15 weeks
  OR
- CET598 Project 2  21 9

### Year 3, Semester 2
- BNT600 Industrial Employment 6  3 15 weeks
- CET776 Equipment Operation & Maintenance  7 3
- CHA145 Introductory Chemistry  8 3
- CHA644 Process Measurement & Monitoring 1  7 3

### Year 4, Semester 1
- BNT700 Industrial Employment 7  3 15 weeks
- CET606 Construction Management  7 3
- CET777 Process Operation & Control 1  7 3
- CHA744 Process Measurement & Monitoring 2  7 3

### Year 4, Semester 2
- BNT800 Industrial Employment 8  3 15 weeks
- CET876 Plant Operation & Maintenance  7 3
- CET877 Process Operation & Control 2  7 3
- CHA844 Trade Waste Control  7 3

---

**Associate Diploma in Electrical Engineering (EE22)**

**Location:** Gardens Point campus

**Course Duration:** 1 year full-time plus 2 years part-time, 4 years part-time

**Total Credit Points:** 192

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Mr John Edwards

**Professional Recognition**

Membership of the Australian Institute of Engineering Associates and of the Institute for Drafting and Design, Australia.

**Note:** Students are required to select two of the following four modules as their majors:
- Computer Systems
- Industrial Systems
- Power or Telecommunications.

Exemption from the practical experience subjects, designated by the suffix A after the subject name in the full-time course, may be granted on the basis of appropriate industrial experience. Written application must be made to the Registrar on an application for exemption form.

Students enrolled in the one year full-time/two years part-time Associate Diploma in Electrical Engineering shall have engaged in at least 60 weeks of approved employment, i.e. 15 weeks for each of the four Industrial Employment subjects, before being eligible for the Associate Diploma award. An industrial experience record form, as for part-time students, must be submitted.

**Part-Time Course Structure**

Normally, part-time students shall have engaged in at least 120 weeks of approved employment, i.e. 15 weeks for each of the eight Industrial Employment subjects, before being eligible for the Associate Diploma award. For the employment to be recognised, students must submit an industrial experience record form, provided for the purpose, which has been completed by both the student and the employer. However, a combination of practical experience subjects and industrial experience totalling 24 credit points will be accepted.

Note:
1. Majors 1 and 2 refer to subjects taken from two of the four modules, viz., Computer Systems, Industrial Systems, Power or Telecommunications; (a), (b), (c) and (d) refer to subjects within each module.

2. For the elective, a subject may be chosen from any other module which runs in the same semester. Degree level subjects may be selected as electives with the approval of the Head of School.

3. A registered student who has completed the following trade courses in Queensland may apply to be exempted from the following subjects. Prior approval is not necessary to gain exemption if these courses are studied concurrently with a QUT course. A student enrolled in an apprenticeship training course who wishes to defer a subject, in anticipation of an exemption, must make written application to the Registrar.

- EET111 Electrical Engineering 1 – Fitter (Instrumentation); Electrical Fitter and/or Mechanic; Radio and/or Television Mechanic; Telecommunications Certificate
- EET350 Electrical Engineering 3 – Electrical Fitter and Mechanic

■ Associate Diploma in Mechanical Engineering (ME23)

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Richard Hall
Professional Recognition
Membership of the Australian Institute of Engineering Associates and of the Institute for Drafting and Design, Australia (Queensland Division).

Note:
1. From time to time a series of special electives may be made available to meet industrial demand provided both student numbers and staff resources can justify their inclusion in the course.

2. Degree level subjects (*) may be selected as electives with the approval of the Head of School.

3. Generally, a full-time student will gain 24 credit points by successfully completing six practical experience subjects designated by the suffix A after the subject name and a part-time student will gain 24 credit points for successfully completing 120 weeks of industrial employment. However, a combination of practical experience subjects and industrial employment totalling 24 credit points will be accepted.

4. A registered student who has completed the following trade courses in Queensland may apply to be exempted from the following subjects. Prior approval is not necessary to gain exemption if these courses are studied concurrently with a QUT course. A student enrolled in an apprenticeship training course who wishes to defer a subject, in anticipation of an exemption, must make written application to the Registrar.

Course Structures

- **Master of Business (Accountancy), Master of Business (Communication), Master of Business (Management) (BS80)**

**Location:** Gardens Point campus

**Course Duration:** 2 years full-time, 4 years part-time

**Total Credit Points:** 192

**Standard Credit Points/Full-Time Semester:** 48

**Entry Requirements**

Applicants for admission to candidature for a degree of master:

(i) (a) shall hold a Bachelor of Business at QUT and shall have achieved a level of attainment in an appropriate discipline or disciplines considered by the Academic Board of the Faculty of Business to be acceptable for the purpose of proceeding to a degree of master; or

(ii) (b) shall hold, from another tertiary institution or from QUT, qualifications approved by the Graduate Studies and Research Committee, on the recommendation of the Head of School responsible for the specialisation which the applicant seeks to study, as equivalent to the requirements set out in (i) (a) above*; and

(iii) shall normally have had at least two years of appropriate work experience.

**PROVISIONAL ENTRY**

In exceptional cases, applicants may be registered provisionally in the course if they submit other evidence of academic and professional attainments, and candidature is recommended by the appropriate Head of School and approved by the Graduate Studies and Research Committee.

A provisional registrant may be required to undertake a qualifying program and/or such other work as the Graduate Studies and Research Committee may determine before admission to candidature is confirmed. Provisional registration in the course may apply for a maximum period of 12 months.

**Note:** Subject to the approval of the external institution concerned and the relevant QUT Faculty of Business Course Coordinator, students may choose to undertake some electives from the various masters degrees offered in the Business area at The University of Queensland or Griffith University.

*In the case of the Master of Business (Communication) only, an applicant who does not hold an undergraduate degree may be accepted on the basis of considerable professional experience, subject to the approval of the Graduate Studies and Research Committee.*
Master of Business (Accountancy)

Course Coordinator: Mr John Polichronis

Course Requirements

Students are required to complete satisfactorily 14 subjects and a dissertation. The dissertation BSN100 is equivalent to two subjects.

In selecting subjects, students may choose from three areas of specialisation - Public Accounting, Managerial Accounting and Finance, and Commercial Law (see List 1, 2 and 3 respectively). The 14 subjects must include:

(i) AYN102 Accounting Research;
(ii) a minimum of six Group A subjects from Lists 1, 2 and 3; (Refer to Schedule of Postgraduate Subjects below)
(iii) within the 14 subjects, a major sequence of five subjects from one of Lists 1, 2 or 3;
(iv) Electives - the remaining subjects required for the degree may be chosen from Lists 1, 2 and 3 with a maximum of two general electives which may be drawn from any postgraduate subjects offered within the University or elsewhere, subject to the approval of the Course Coordinator.

Students must complete AYN102 Accounting Research as a prerequisite to enrolment in BSN100 Dissertation. The dissertation should reflect the application of theoretical analysis or problem solving in Public Accounting, Managerial Accounting/Finance, or Commercial Law. Details concerning the dissertation requirements may be obtained from the Faculty of Business Postgraduate Student Office. Students are advised to seek a topic and to approach a supervisor early in their program. Each student is required to present a seminar on the proposed dissertation topic in the semester prior to enrolment in BSN100. Details are available from the Course Coordinator.

Program

Approximate formal hours in all subjects of coursework will be three hours per week (12 credit points). The dissertation will be regarded as the equivalent of six formal course hours per week (24 credit points). A Professional Year Higher Degree Program may be incorporated within this major. Students follow a structured course of study involving six specified subjects as outlined in the Graduate Diploma of Advanced Accounting program.

Students should consult the Faculty of Business Postgraduate Student Office for details on subjects being offered in the current year. All programs of study must be approved by the Course Coordinator.

A number of postgraduate subjects are equivalent in content to Professional Year (PY) subjects offered in the program. Professional Year subjects can be taken only by students enrolled for the Professional Year with the Institute of Chartered Accountants in Australia. Students not undertaking the PY may enrol in the equivalent postgraduate subjects, but should note that abnormal timetables apply. Credit cannot be gained for both a PY subject and its equivalent subjects.

For further information regarding postgraduate courses students are advised to request a copy of the 1992 Guide to Postgraduate Studies in Accountancy.

---

**Master of Business (Communication)**

**Course Coordinator:** Associate Professor Philip Neilsen

**Course Requirements**

The Master of Business (Communication) requires completion of one year of full-time or two years of part-time study. The degree involves four coursework subjects and a thesis of approximately 30,000 words.

There are at present two majors offered - Media Studies or Communication Management. Each major comprises three subjects plus Advanced Communication Seminar, as outlined below.

**Entry Requirements**

There are two main ways to gain entry to the Masters program:

(i) If applicants have an appropriate Honours degree they may go direct into the Masters program (1 year full-time or 2 years part-time).
(ii) If applicants do not have an appropriate Honours degree, they can first enrol in preliminary subjects which are equivalent to the Honours program (two years full-time or four years part-time).

Note: In both the Honours and Masters program, for each 12 credit points subjects, students will be required to produce a minimum of 5000 words, or its equivalent, in assignments. Similarly, the Honours dissertation will be 10,000 words minimum length.

**Master of Business (Management)**

**Course Coordinator:** Mr Barry Smith

Note: Course details and subjects may be modified in order to articulate with the Management Honours course to be introduced in 1992.

**Course Requirements**

Students must complete 15 subjects to a total of 192 credit points, comprised of five core coursework subjects, four project subjects, four major subjects and two elective or special topic subjects.

BSN136 Project & Seminar A 12 3

Year 4, Semester 2
BSN137 Project & Seminar B 24

Note:
(i) Students are required to write an original project on an area of interest in the management field. During the first year of the full-time program, or second year of the part-time program, the student should finalise the choice of area. The Management Graduate Studies Board will nominate a supervisor for the research. The culmination of the project, BSN137 Project & Seminars B, is the equivalent of two three-hour-per-week subjects and is undertaken in the final semester of the course.

(ii) In special circumstances and only with the prior agreement of the Course Coordinator and the Management Graduate Studies Board, one of the major subjects may be substituted by an Honours or Masters level subject offered elsewhere in QUT or at another tertiary institution.

(iii) Students may take two electives or an elective and a special topic. The electives may be chosen from subjects offered in other postgraduate programs at QUT or at another tertiary institution.

The special topic elective may be offered by the School of Management from time to time to take advantage of special expertise which may be available for a short period from a visiting lecturer, or to trial a new subject before modifying the normal program.

■ Master of Business (Industrial Relations), Master of Business (Marketing Science) (BS82)

Location: Kedron Park campus

Course Duration: 2 years full-time, 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Entry Requirements
To be eligible for admission, an applicant must:
(i) hold an approved degree complete with a high level of achievement; and
(ii) have had substantial work experience involving analytical and research skills.
Marketing science: degree studies preferably in the statistics and economics disciplines.

Special Course Requirements
The course requires completion of 192 credit points, comprising coursework (48 credit points) and a thesis (144 credit points) of approximately 60,000 words.

Subject to the approval of the Course Coordinator and the other institutions concerned, students may be permitted to take some subjects chosen from that institution’s master-level programs.

☐ Master of Business Administration (BS81)

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

* This subject may be substituted - no decision made at time of print.
The Master of Business Administration is a postgraduate degree in business administration, designed for non-business graduates.

The Master of Business Administration program includes two majors - Management and Accounting.

**Entry Requirements**

A candidate for entry into the Master of Business Administration (MBA) program should normally possess:

(i) an undergraduate degree qualification from a recognised Australian or overseas institution;
(ii) at least two years of appropriate full-time work experience; and
(iii) an appropriate standard of tertiary-level achievement in quantitative methods/statistics. A candidate who has not successfully completed at least one such approved degree-level subject will be required to complete MNN307 Statistical Methods as an elective in the MBA.

**MBA Director:** Dr Alan Williams

**Coordinators:**
- Management Major – Mr Greg Southey
- Accounting Major – Mr John Sweeting

**Incompatible Subjects**

*Note:* AYN101 Accounting Principles is incompatible with AYN112 Financial Accounting 1.

**Electives**

**MANAGEMENT MAJOR**

Electives may be undertaken across a number of areas, provided that prerequisite requirements are met. Alternatively, a student may use the electives to pursue more specialised study in an area of particular interest. Please consult the Postgraduate Student Office, Faculty of Business for a list of electives available in 1992.

MBA candidates will be permitted to undertake electives from a limited number of advanced undergraduate subjects offered within the Faculty of Business. A small number of Master of Business subjects may also be available as MBA electives.

**Electives**

**ACCOUNTING MAJOR**

Students who seek professional accounting membership must undertake six specified elective subjects, as listed below.

- ALB122  Law of Business Associations
- ALB132  Taxation Law
- AYN113  Financial Accounting 2
- AYN114  Financial Accounting 3
Exemptions/Substitutions

(i) Holders of postgraduate awards are eligible to apply for MBA exemptions. Such exemptions will not be awarded as a whole; rather, they are granted on a subject by subject basis, on the basis of successful previous study. MBA students who have completed a Graduate Diploma in Business Administration are eligible to apply for up to eight exemptions.

(ii) An MBA applicant who possesses a Bachelor of Business or other approved undergraduate degree may apply for up to four exemptions and four substitutions provided that the results obtained in the similar undergraduate subjects are at least at the level of credit (or 5 on a 1-7 scale) in each case.

(iii) All exemptions will be dealt with in terms of QUT policy, as set out in the Student Policies and Procedures section in this Handbook.

(iv) An MBA student who has been accorded exemptions are not be permitted to graduate with a GDBA unless he/she actually completes six GDBA/MBA subjects offered by this University.

Relationship between MBA and GDBA

Following the successful completion of eight MBA subjects (including at least five subjects from the core and strand core areas), students may elect either to discontinue enrolment and to graduate with a GDBA, or to pursue eight further subjects in order to complete the MBA. Students who choose to graduate with a GDBA will not retain a place in the MBA; they will need to compete again for admission if they wish to complete the MBA at a later date.

Graduate Diploma in Business Administration

Location: Gardens Point campus

There is no annual intake to the GDBA and no provision for enrolment in this course. However, students who have gained a place in the MBA program may, following the successful completion of eight MBA subjects (including at least six of the 12 compulsory subjects), elect to discontinue their enrolment and to graduate with a GDBA. Students who choose to graduate with a GDBA will not retain a place in the MBA; they will need to compete again for admission to the MBA if they wish to complete the MBA at a later date. It is recommended that potential applicants consider the Graduate Diploma of Business (Administration) (BS73) at the Kedron Park campus.

Graduate Diploma in Advanced Accounting (BS70)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Associate Professor Peter Best
Entry Requirements
A degree or a diploma from a recognised tertiary institution, with an appropriate major in Accounting, provided that in the case of a diploma, additional work may be required. Students may be required to take one or more undergraduate subjects in order to make good any deficiency in their qualifications to enter the postgraduate course.

Course Requirements
The student must complete eight subjects (96 credit points total). A minimum of six subjects must be selected from Lists 1, 2 and 3. Up to two postgraduate subjects may be selected from List 4. Refer to Schedule of Postgraduate Subjects within the section entitled Master of Business (Accountancy) for lists.

Professional Year Higher Degree Program
The Professional Year Higher Degree Program (PYHDP) allows people employed with a chartered accountant in public practice to complete their Professional Year (PY) studies at QUT within the Graduate Diploma in Advanced Accounting.

The PYHDP does not run independently of the PY program as offered by the Institute of Chartered Accountants. QUT presents this program in accordance with the Institute PY syllabus, program and timetable. Students must enrol with the Institute as well as with QUT. Not only will they complete the same workshops and module examinations as other PY candidates, they will also be required to complete and to pass internal assessment as set by QUT.

Students enrolled in the PYHDP must complete the following course of study:

AYN117  Financial Reporting
AYN300  Accounting 1 (PY)
FNN300  Accounting 2 (PY)
ALN101  Tax Planning
ALN301  Taxation 1 (PY)
         Elective 1
         Elective 2

Plus one of:
ALN300  Insolvency & Reconstruction (PY)
ALN302  Taxation 2 (PY)
AYN301  Auditing (PY)
FNN301  Management Accounting (PY)

■ Graduate Diploma in Business (Administration) (BS73)

Location: Kedron Park campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Jennifer Radbourne
Entry Requirements
To be eligible for admission, an applicant must hold an approved degree or equivalent. Mature age applicants with extensive experience at an appropriate level will be considered in exceptional circumstances.

Students may select elective subjects from:

1. Undergraduate and postgraduate courses in industrial relations, law, organisational studies, computing, office administration, marketing and business offered at the Kedron Park campus or
(ii) subjects in the arts, fundraising, advertising, journalism and public relations offered at the Kelvin Grove and Gardens Point campuses of QUT.

Part-Time Course Structure
For details of the part-time course structure, consult the Course Coordinator.

Note:
(i) Students are required to take at least 50 per cent of subjects at graduate diploma level ('P' - level subjects as in COP114, HRP107, MKP103).
(ii) Students are required to substitute for equivalent studies undertaken in another award.
(iii) Elective choice should be made in consultation with Course Coordinator.
(iv) Entry to the Arts Administration major requires a selection interview.
(v) The offering of any major or subject within the course is subject to minimum enrolments being met in that major or subject.

Graduate Diploma in Communication Practice (BS72)
Location: Gardens Point campus
Course Duration: 1 year full-time, 2 years part-time
Total Credit Points: 96
Standard Credit Points/Full-Time Semester: 48
Course Coordinator: Associate Professor Philip Neilsen

Entry Requirements
A degree or diploma from a recognised tertiary institution, with the proviso that diploma graduates may be required to undertake additional work at the discretion of the Course Coordinator.

SPECIAL ENTRY
A limited number of places will be available to practitioners in the relevant professions who, while possessing no formal degree, can demonstrate and document significant experiential grasp of their professions. These candidates will be senior members of their profession.

Bachelor of Business (Communication) graduates, if they enrol in the Graduate Diploma course, must select a major different from their undergraduate major. These students also undertake COP106 Communication Theory 1 instead of COB138 Written Communication: Theory and Practice and MJP101 Communication Theory 2 instead of COB113 Theoretical Perspectives on Communication.

An applicant who does not meet the requirements for normal entry may present documentary evidence of qualifications, experience and other relevant information for special consideration.

Course Requirements
To complete the Graduate Diploma course, students must complete two communication theory subjects, four major subjects and two electives.
The course structures below set out a recommended sequence of subjects for each major. Other subjects may be selected for a major in place of the subjects listed, provided that prerequisites are met and the selection is approved by the relevant coordinator. Electives should be chosen in consultation with the relevant coordinator.

**Bachelor of Business (Honours) (Accountancy) (BS60)**

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Professor Scott Holmes
Entry Requirements
To be eligible for admission, an applicant must hold the following:

A QUT Bachelor of Business (Accountancy) degree or equivalent and usually should have attained a grade point average (GPA) of least 5 over that degree, including grades of at least credit in all subjects directly relevant to the proposed Honours program. Application for admission should normally be made at the end of the final year of the pass degree, or within 18 months of completing that degree.

Applicants who do not satisfy the above conditions but who have demonstrated outstanding performance in only the final year of a degree, for whose application is based on other factors including work experience or involvement in research, may be admitted at the discretion of the Course Coordinator.

### Special requirements for the Bachelor of Business degree course in the Faculty of Business

- Except in exceptional circumstances, and with the approval of the Dean of Faculty, a full-time student may enrol only in subjects selected from those contained in the normal course program for Semesters 1 and 2 in the first year of study. Similarly, a part-time student may select subjects only from those listed for Years 1 and 2 in the first two years of study.

- Except with the approval of the Dean, a student must enrol for more than one subject in any semester.

### Bachelor of Business (BS50)

**Course Duration:** 3 years full-time, 6 years part-time

**Total Credit Points:** 288

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Ms Lynn Gallagher
Associate Coordinators:
Accountancy, Banking and Finance and Accounting Legal Studies – Ms Chris Ryan
Human Resource Management, Management and Industrial Relations – Mr Paul Sutcliffe
Economics, International Business and Public Administration – Dr Mike Quayle
Organisational Communication and Organisational Studies – Ms Ros Petelin
Marketing, Advertising and Public Relations – Mr Terry Euler
Journalism and Film and TV – Associate Professor Len Granato

Course Requirements
Students commencing the Bachelor of Business from 1992 onwards must complete the following requirements:

(i) 24 subjects totalling 288 credit points;
(ii) these subjects will comprise four faculty core subjects, four subjects as required by a student’s Board of Studies and eight specific subjects comprising a Primary Major and one of the following:
   (a) Extended Major and four electives or a minor
   (b) Secondary Major
   (c) two minors
   (d) one Minor and four electives
   (e) eight electives.

Electives may be chosen from any degree course at QUT or at any other recognised University subject to the approval of the student’s Course Coordinator. Synopses of the specialist elective subjects offered by the Faculty of Business can be found commencing on page 721.

DEFINITIONS
Different types of Major

(i) **Primary Major** – a group of eight specified subjects in a particular discipline area. These subjects are specified in the course outline.
   Primary means the discipline in which the student wishes to graduate.
   Every graduate in the Bachelor of Business will have a primary major.

(ii) **Secondary Major** – a coherent group of eight specified subjects in a discipline area different to the primary major.

(iii) **Minor** – a coherent group of four specified subjects in a discipline area.

(iv) **Extended Major** – an additional group of four specified subjects in the same discipline area as the primary major.

☐ **Accountancy Major (ACA)**

ACCOUNTANCY PRIMARY MAJOR
Location: School of Accountancy Gardens Point and Kedron Park campuses, Sunshine Coast Centre (1st year only)

Course Duration: 3 years full-time, 6 years part-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Chris Ryan
Professional Recognition

Students completing the Bachelor of Business (Accountancy) degree satisfy the academic requirements for membership of various professional associations and statutory bodies provided the extended major indicated below is completed.

The degree is recognised for membership purposes by the following associations and boards: Australian Society of Certified Practising Accountants (ASCPA); Institute of Chartered Accountants in Australia (ICA); Companies Auditors Board (CAB); Tax Agents Registration Board (TARB); Australian Computer Society (ACS). The degree is also recognised for undergraduate membership by the Institute of Chartered Secretaries and Administrators (ICS&A) and also the Institute of Corporate Managers, Secretaries and Administrators (ICMS&A) provided students complete Company Secretarial Practice and Finances 3 as electives.

To satisfy the academic requirements for Associate level membership of the ASCPA, graduates must have completed the Accountancy major.

To satisfy the academic requirements for CPA level membership of the ASCPA and membership of the ICA, graduates must complete the Professional Accounting Extended Major.

ACCOUNTANCY EXTENDED MAJOR

## Banking and Finance Major (BKF)

BANKING AND FINANCE PRIMARY MAJOR  
**Location:** School of Finance, Gardens Point campus  

**Course Duration:** 3 years full-time, 6 years part-time  

**Total Credit Points:** 288  

**Standard Credit Points/Full-Time Semester:** 48  

**Course Coordinator:** Ms Chris Ryan  

**Professional Recognition**

Students completing the Bachelor of Business (Banking and Finance) degree satisfy the academic requirements for membership of various professional associations. The degree is recognised for membership purposes by the Australian Institute of Bankers. If the subjects Law of Business Associations, Auditing, Taxation Law and Accounting Theory and Applications are completed as electives, students will satisfy the academic requirements for CPA level membership of ASCPA and membership of the ICA. If the subjects Law of Business Associations, Company Secretarial Practice and Finance 3 are
included as electives, students will satisfy the academic requirements for membership of the Institute of Chartered Secretaries and Administrators (ICSA) and the Institute of Corporate Managers, Secretaries and Administrators (ICMSA).

☐ Public Relations Major (PUR)

Location: School of Marketing, Advertising and Public Relations, Gardens Point campus

Course Duration: 3 years full-time, 6 years part-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Coordinator: Mr Terry Euler

Professional Recognition

Students of the Public Relations degree may, as a result of their choice of area of major study or elective study, meet the requirements of membership of a number of professional bodies. These could include the Public Relations Institute of Australia, the Society of Business Communicators as well as associated and international bodies.

Details of such memberships can be obtained through the School of Marketing, Advertising and Public Relations.

Course Structures

- Master of Education (Research) (ED12)

Location: Carseldine and Kelvin Grove campuses

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr Sue Johnston

Entry Requirements
A person may enrol as a candidate for the degree of Master of Education by research if that person holds:

(i) an honours degree; or
(ii) a grade point average of 5 or better in a graduate diploma with demonstrated potential for further study and/or evidence of professional standing; or
(iii) a grade point average of 5 or better in a coursework master degree program with demonstrated potential for further study and/or evidence of professional standing.

Applicants may be required to provide satisfactory formal evidence of proficiency in the English language.

PROVISIONAL ENROLMENT
In special circumstances and with the specific approval of the Dean, a person may be admitted to the Master of Education (Research) on a provisional basis. The conditions which must be satisfied to remove the provisional status must be detailed in writing by the Course Coordinator, endorsed by the Dean and placed on record by the Registrar.

(i) A candidate so admitted shall be required to complete any designated qualifying subjects at credit level or better.
(ii) A candidate who completes course subjects at a satisfactory level during the period of provisional enrolment will be permitted to count these subjects towards the degree.
(iii) Unless the Dean accepts that exceptional circumstances justify extension of provisional status, it must be cleared within one calendar year from enrolment in the course. Such clearance will require approval by the Dean of a positive recommendation by the Course Coordinator. The maximum period of extension of provisional candidature shall be one year.
(iv) A provisional candidate who fails to achieve a credit level in any qualifying subject(s) or a pass level in any coursework subjects or fails to make satisfactory progress in research studies shall have their candidature terminated or be required to show cause to the Dean through the Course Coordinator as to why their candidature should not be terminated.
(v) A candidate whose provisional candidature is terminated may, after a lapse of two years, be permitted to apply for re-enrolment as a provisional candidate.
PROCEDURE FOR ENROLMENT

(i) Before submitting an application for enrolment, a potential candidate shall consult the Coordinator of the Master of Education (Research) concerning eligibility and special interests.

(ii) A person seeking admission to the Master of Education (Research) shall apply on the appropriate forms through Student Administration. The completed application forms should be accompanied by any specified documentation. These will include a proposal for a course of study and research to be pursued for the purpose of obtaining the degree and other requirements as specified in particular strands. A person relying on qualifications from another institution of higher education shall furnish with the application evidence of such qualifications. After acknowledgement and recording of basic information by Student Administration, an application will be forwarded for consideration by the Course Coordinator who may require the applicant to attend an interview.

(iii) The Course Coordinator will forward recommendations on applications to the Dean for approval before forwarding official advice to all applicants on the outcome of their applications through Student Administration.

Course of Study

LENGTH
Candidates for the degree of Master of Education (Research) will normally be required to complete their course in one year of full-time study. If candidates have enrolled for the course by part-time study, then they will normally complete the course in a minimum of two years of study. Full-time students will be normally permitted to spend no more than two years to complete the course and part-time students will be allowed to spend a maximum of four years.

CREDIT POINTS
A candidate for the Master of Education (Research) award will obtain a total of 96 credit points from research studies.

Special Course Requirements
As a student proceeds through the four stages of the course he/she will be required to submit a progress report to the Coordinator at the conclusion of each semester.

There is provision in the course structure for students to present their proposal and their research in progress to a research seminar. Such seminars will be held at regular intervals with the frequency depending on the number of research students. It is envisaged that all students enrolled in this course would be expected to attend such seminars to present their own work and to discuss and evaluate the work of their peers. Academic staff, who are supervising research students, would also be expected to attend seminars on a regular basis.

Course Structure

STAGE 1: PREPARATION
Preparation of a brief preliminary outline for the research in consultation with the supervisory team; acquisition of knowledge of a range of appropriate research methods; commencement of a comprehensive literature search.
STAGE 2: PROPOSAL
Adoption of an appropriate research design for the proposed research; preparation of a comprehensive proposal for the research including a draft review of the literature; presentation and justification of the proposal to a seminar or seminars of other students in the strand and appropriate academic staff; trial research procedures.

STAGE 3: IMPLEMENTATION
Implementation of the research for the thesis; completion of the literature review; provision of a progress report.

STAGE 4: SUBMISSION
Completion and presentation of a thesis or alternative to the supervisory team for approval; production of the thesis in a suitable form for examination.

TRANSFER OF CREDIT
(i) On the recommendation of the Course Coordinator, the Dean may grant credit for studies passed at an approved institution of higher education, provided that:
   (a) the studies are of equivalent standard and value to those offered at the University;
   (b) the studies are appropriate to the candidate’s work at the University;
   (c) the studies have not counted towards a previous qualification;
   (d) the studies are not included in those that have been designated as qualifying studies for the course.

(ii) There shall be no maximum credit granted for subjects previously completed at this institution prior to enrolment in the Master of Education (Research) award.

(iii) The maximum credit granted for studies passed elsewhere shall be the equivalent to one semester of full-time study.

(iv) Credit may be granted for subjects passed elsewhere after enrolment in the Master of Education (Research) award, provided that the candidate has previously obtained the permission of the Dean to enrol in these subjects.

(v) Where credit is granted the Dean may reduce proportionately the candidate’s period of enrolment.

(iv) A candidate who is re-enrolling following withdrawal or termination of candidature may be granted credit for previously successful studies by the Dean upon the recommendation of the Course Coordinator.

Supervision
Supervision in the Master of Education (Research) award consists of the supervision of a thesis. The thesis must be submitted to conform with format, style and other guidelines as set out in the publication Guide to Thesis Presentation which is available from Student Administration.

Thesis Project
(i) The nature of the thesis research project must permit the candidate to demonstrate the acquisition of relevant research skills and their effective application to an investigation of genuine substance and significance.

(ii) Early planning must allow for the submission of an approved initial subject enrolment form to the Registrar by the published due date.

(iii) By no later than the end of the first semester a plan for the full program must be prepared and signed by the candidate and the Course Coordinator (who shall retain copies) and be lodged with the Registrar for endorsement by the Dean.
(iv) The thesis must comprise a comprehensive, lucid and concise exposition on the context, objectives and conduct of the investigation and on its outcomes and their interpretation.

Supervision
(i) For each candidate undertaking a thesis project a Thesis Supervisor must be appointed. An appropriate Supervisor or supervisory team should be identified early in the program when the thesis topic is chosen. An appointment will be made by the Dean on the advice of the Course Coordinator.

(ii) Candidates should meet regularly with their Supervisor to discuss progress, submit drafts or progress reports or present seminars where appropriate at least each semester and seek guidance as necessary.

(iii) Supervisors should be readily available to candidates, should provide scholarly support and constructive criticism and should assist as appropriate with access to facilities, and any relevant external agencies.

(iv) The Dean will not normally approve the appointment of any staff member as Thesis Supervisor to more than four candidates concurrently.

(v) In special circumstances and with the specific approval of the Dean, an external Supervisor may be appointed.

Progression and Unsatisfactory Progress
PROGRESSION
In each semester of the candidature the academic progress of each candidate shall be reviewed by the Course Coordinator. Satisfactory progress for provisional candidates will consist of passing of qualifying requirements or course subjects at the appropriate levels. For students enrolled in research studies, satisfactory progress will be judged by the submission of a report to the Course Coordinator. Progress reports will be submitted at designated intervals, normally at least twice each year.

UNSATISFACTORY PROGRESS
(i) With respect to coursework studies, candidates who have failed two or more subjects or who have otherwise progressed unsatisfactorily, may have their candidature terminated by the Dean.

(ii) With respect to the thesis project, progress which is considered clearly unsatisfactory by both the Supervisor and the Course Coordinator may lead to a recommendation by them to the Dean that the candidate be excluded from the course.

(iii) Before the Dean decides to terminate candidature, the candidate shall be given the opportunity to show cause why this action should not be taken.

Examination of the Thesis
SUBMISSION OF THESIS
(i) A candidate should submit a minimum of three copies of a thesis to the Course Coordinator for examination. These should be temporarily bound in order to facilitate the making of any revisions and editorial changes required by examiners (if the thesis is otherwise acceptable to them) before final printing and binding.

(ii) The thesis should be accompanied by a signed declaration that:
(a) the candidate has complied with the ethics of experimentation as set out in the publication *Guide to Thesis Presentation*;
(b) the thesis is the candidate's own work and that all other sources are correctly acknowledged;

(c) the thesis has not been submitted to another institution.

EXAMINATION OF THESIS

(i) Each thesis will be examined by at least two examiners appointed by the Dean on the recommendation of the Course Coordinator in consultation with the candidate. Such appointments should be finalised from two to four weeks prior to the anticipated submission date of the thesis. At least one of the examiners appointed will be external to the University.

(ii) An oral defence of a thesis may be made a component of the overall thesis examination procedure upon the recommendation of the Advisory Committee. Should this be the case, the Course Coordinator will normally act as Chairperson of the group of examiners for the oral examination. At such an examination, the attendance of observers other than the Heads of the relevant Department or School (if they so wish) is subject to the express approval of the Dean.

(iii) Examiners must receive copies of the thesis in reasonable time to permit its thorough consideration and appraisal before the date by which assessments are required or before any oral examination. Whether or not there is an oral examination, each examiner is required to submit a written assessment of the thesis within eight weeks of its receipt.

(iv) These assessments will be presented on official forms available from the Registrar and will deal with the general standard and quality of the work and not with specific detail. They will be submitted to the Course Coordinator by the specified date and, if there is to be an oral examination, before this examination. These assessments are individual and confidential and should not be made available to other examiners. Each should make one of the following recommendations:

(a) Pass – implying that the thesis will be fully satisfactory except possibly for minor editorial changes;

(b) Resubmit – implying that the thesis will be fully acceptable when certain necessary corrections or modifications are made by the candidate and resubmitted to the examiners;

(c) Fail – implying that the thesis is not of an acceptable standard.

(v) In the case of (a) and (b) above, an examiner should provide, along with the official assessment form, a separate document indicating where corrections or modifications are required and, as appropriate, providing any constructive criticism and comment helpful to the candidate. An examiner will refer to any notably original contributions which the candidate has made and may comment on the scope for further research or postgraduate study. Such additional documents should be retained temporarily by the Course Coordinator.

(vi) The Course Coordinator will forward the set of examiner’s assessment forms (together with the additional signed judgments of each examiner respecting any oral examination held) to the Dean, attaching a formal recommendation based on these. The Dean will indicate acceptance or otherwise of the recommendation.

(vii) If a recommendation of type (a) is accepted, the Dean will ask the Course Coordinator to make the examiners’ requirements available to the candidate and will sign an official record indicating satisfaction of all thesis requirements when advised by the Course Coordinator that all required changes have been completed satisfactorily.
(viii) If a recommendation of type (b) is accepted, the Dean will ask the Course Coordinator to ensure that the candidate is requested to submit the thesis with any necessary corrections or modifications and that the revised thesis is forwarded to the examiner for assessment.

(ix) If the Dean accepts a recommendation of type (c) the normal implication is that the candidate will be excluded from the course. However, in exceptional circumstances the Dean may grant the candidate an opportunity to submit a substantially new thesis after a period of not less than six months.

---

### Master of Education (ED13)

**Location:** Kelvin Grove and Carseldine campuses

**Course Duration:** 1 year full-time, 2 years part-time

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Dr Keith Lucas

**Entry Requirements**

Candidates will be admitted to the course who:

- hold an appropriate four-year bachelor degree or equivalent at a standard acceptable to the Dean of the Faculty; or
- hold other qualifications acceptable to the Dean which may include substantial work experience or involvement in relevant research activities; and
- have had at least one year’s practical experience in some branch of education acceptable to the Dean; and
- have a command of English.

Students who do not meet the entry requirements may be admitted on a provisional basis and be required to undertake preliminary coursework and reading as determined by the Specialisation Coordinator. After satisfactory completion of the preliminary studies students will be admitted to full candidature.

**Provisional Enrolment**

In special circumstances and with the specific approval of the Dean, a person may be admitted to the Master of Education course on a provisional basis to complete qualifying subjects. The conditions which must be satisfied to meet the qualifying requirement must be detailed in writing by the Specialisation Coordinator and endorsed by the Higher Degrees Advisory Committee for the Dean’s approval.

(i) A candidate so admitted shall be required to complete any designated qualifying subjects at credit level (grade of 5) or better.

(ii) A candidate who completes course subjects at a satisfactory level during the period of provisional enrolment may be permitted to count these subjects towards the degree.
(iii) Unless the Higher Degrees Advisory Committee accepts that exceptional circumstances justify extension of provisional status, it must be cleared within one calendar year from enrolment in the course. Such clearance will require submission of a positive recommendation by the relevant Specialisation Coordinator for approval by the Higher Degrees Advisory Committee. The maximum period of extension of provisional candidature shall be one year.

(iv) A provisional candidate who fails to achieve a credit level in any qualifying subject(s) or a pass level in any coursework subjects or fails to make satisfactory progress shall have their candidature terminated or be required to show cause to the Higher Degrees Advisory Committee through the Specialisation Coordinator as to why their candidature should not be terminated.

(v) A candidate whose provisional candidature is terminated may, after a period of two years, be permitted to apply for re-enrolment as a provisional candidate.

Procedure for Enrolment

(i) Before submitting an application for enrolment, a potential candidate shall consult the Coordinator of the relevant Specialisation of the Master of Education course concerning eligibility and special interests.

(ii) A person seeking admission to the Master of Education course shall apply on the appropriate forms through Student Administration. The completed application forms should be accompanied by any specified documentation. These will include a proposal for a course of study and research to be pursued for the purpose of obtaining the degree and other requirements as specified in particular specialisations. A person relying on qualifications from another institution of higher education shall furnish with their application evidence of such qualifications. After acknowledgement and recording of basic information by Student Administration, an application will be forwarded for consideration by the Specialisation Coordinator who may require the applicant to attend an interview.

(iii) Specialisation Coordinators will forward recommendations on applications to the Dean for approval before forwarding official advice to all applicants on the outcome of their applications through Student Administration.

Course of Study

LENGTH
Candidates for the degree of Master of Education will normally be required to complete their course in a minimum of one year of full-time study. If candidates have enrolled for the course by part-time study, then they will normally complete the course in a minimum of two years of study. Full-time students normally will be permitted to spend no more than two years to complete the course and part-time students will be allowed to spend a maximum of four years.

CREDIT POINTS

(i) A candidate for a Master of Education will obtain a total of 96 credit points from studies in coursework subjects and/or from research studies. The course will consist of core subjects and studies in a series of specialisations, e.g., Mathematics, Science, Early Childhood, Leadership, and Social and Environmental Education. Core studies will occupy 24 or 36 credit points and each specialisation will consist of studies totalling 60-72 credit points or their equivalent. Candidates will enrol to study in one of the designated specialisations. They will not normally be permitted to transfer from one specialisation to another.
Studies in the specialisations of the course will consist of coursework subjects and research investigations. Research studies will constitute between 25% and not more than 50% of the work to be completed in the course.

#### List of Specialisation Subjects

**EARLY CHILDHOOD EDUCATION**

- EAN601 Early Childhood Curriculum: Design Issues
- EAN602 Early Childhood Services & Policies
- EAN603 Research Seminar in Early Childhood Issues
- EAN604 Young Children, Families & Community

**LANGUAGE AND LITERACY EDUCATION**

- LAN601 Foundations of English/Language Arts Education
- LAN602 Literacy & Schooling

**LEADERSHIP**

- CPN601 Emerging Leadership Approaches in Education
- CPN602 Leaders as Agents of Change in Education

**MATHEMATICS/SCIENCE/COMPUTING EDUCATION**

- MDN601 Curriculum Studies in Mathematics, Science & Computer Education
- MDN602 Focus on the Mathematics, Science & Computer Education Classroom
- MDN603 Curriculum Specialisation in Mathematics, Science & Computer Education
- MDN604 Diagnosis & Assessment in Mathematics
- MDN605 Resources & Technology in Mathematics & Science Education
- MDN606 Policy Study in Mathematics & Science Education
- MDN607 Issues in Science Education
- MDN608 Computer Supported Learning Environments
- MDN609 Emerging Educational Technologies
- MDN610 The Computer as Instructional Medium

**SOCIAL AND ENVIRONMENTAL EDUCATION**

- SBN601 Social & Environmental Education 1
- SBN602 Social & Environmental Education 2
INDIVIDUAL SUPERVISED SUBJECTS
EDN602 Advanced Seminars
EDN603 Independent Study
EDN604 Dissertation (24 cps)
EDN605 Dissertation (36 cps)
EDN606 Dissertation (48 cps)

TRANSFER OF CREDIT
(i) On the recommendation of the Specialisation Coordinator, the Higher Degrees Advisory Committee may grant credit for studies passed at an approved institution of higher education, provided that:
(a) the studies are of equivalent standard and value to those offered at the University;
(b) the studies are appropriate to the candidate’s work at the University;
(c) the studies have not counted towards a previous qualification;
(d) the studies are not included in those that have been designated as qualifying studies for the course.
(ii) There shall be no maximum to credit granted for subjects previously completed at this institution prior to enrolment in the Master of Education course.
(iii) The maximum credit granted for studies passed elsewhere shall be the equivalent to half the full-time study program.
(iv) Credit may be granted for subjects passed elsewhere after enrolment in the Master of Education course, provided that the candidate has previously obtained the permission of the Higher Degrees Advisory Committee to enrol in these subjects.
(v) Students may be exempted from core subjects based on the successful completion of previous equivalent studies provided that the candidate has previously obtained the permission of the Higher Degrees Advisory Committee.
(vi) Where credit is granted, the Higher Degrees Advisory Committee may reduce proportionately the candidate’s period of enrolment.
(vii) A candidate who is re-enrolling following withdrawal or termination of candidature may be granted credit by the Higher Degrees Advisory Committee for previously completed studies upon the recommendation of the Specialisation Coordinator.

Supervision
Supervision in the Master of Education course consists of two components:
(i) the supervision of individualised coursework subjects; and
(ii) the supervision of a thesis/dissertation/research project.

SUPERVISION OF INDIVIDUALISED SUBJECTS
Certain coursework subjects in particular specialisations involve individual candidates working with supervising lecturers on a one-to-one basis. Here, candidates have the opportunity to explore and negotiate with their lecturers to engage in integrated professional experiences that are closely linked to the candidates’ current professional needs. This interaction consists of a dialogue between candidate and lecturer to design an appropriate course of study for the particular subjects. Subsequently, they submit this plan of study to the Specialisation Coordinator for approval.

SUPERVISION OF A THESIS
Any course component representing 25% or more of the course and involving substantial research/project work will be considered as a thesis. This work must be submitted to conform with format, style and other guidelines as set out in the publication Guide to Thesis Presentation which is available from the Postgraduate Studies Officer.
(i) Thesis/project
(a) The nature of the thesis/research project must permit the candidate to
demonstrate the acquisition of relevant research skills and their effective
application in an investigation of genuine substance and significance.
(b) Early planning must allow for the submission of an approved initial subject
enrolment form to Student Administration by the published due date.
(c) By no later than the end of the first semester a plan for the full program must
be prepared and signed by the candidate and the Specialisation Coordinator
(who shall retain copies) and be lodged along with the appropriate Ethical
Clearance forms with the Higher Degrees Advisory Committee for
endorsement.
(d) The thesis must comprise a comprehensive, lucid and concise exposition on the
context, objectives and conduct of the investigation and on its outcomes and
their interpretation.

(ii) Supervision
(a) For each candidate undertaking a thesis project a Thesis Supervisor must be
appointed. An appropriate Supervisor or supervisory team should be identified
early in the program when the thesis topic is chosen. Where appropriate in
selected specialist areas, an Associate Supervisor, external to the Faculty or the
University, may be appointed. An appointment will be made by the Higher
Degrees Advisory Committee on the advice of the relevant Specialisation
Coordinator.
(b) Candidates should meet regularly with their Supervisor to discuss progress,
submit drafts or progress reports or present seminars where appropriate at least
each semester and seek guidance as necessary.
(c) Supervisors should be readily available to consult with candidates, should
provide scholarly support and constructive criticism and should assist as
appropriate with access to facilities, and any relevant external agencies.
(d) The Higher Degrees Advisory Committee will not normally approve the
appointment of any staff member as Thesis Supervisor to more than four
candidates concurrently.
(e) In special circumstances and with the specific approval of the Higher Degrees
Advisory Committee, an external Supervisor may be appointed.

Progression and Unsatisfactory Progress
PROGRESSION
In each year of candidature the academic progress of each candidate shall be reviewed
by the relevant Specialisation Coordinator. Satisfactory progress for provisional
candidates will consist of passing of qualifying requirements or course subjects at
appropriate exit levels. For candidates enrolled in the coursework degree, it will mean
the successful completion of the relevant coursework subjects.

Progress reports will be submitted at designated intervals, normally at least twice each
year, to the Higher Degrees Advisory Committee.

UNSATISFACTORY PROGRESS
(i) With respect to coursework studies, candidates who have failed two or more
subjects or who have otherwise progressed unsatisfactorily, may have their
candidature terminated on the recommendation of the Higher Degrees Advisory
Committee.
(ii) With respect to the thesis project, progress which is considered clearly unsatisfactory by both the Supervisor and the Specialisation Coordinator may lead to a recommendation by them to the Higher Degrees Advisory Committee that the candidate be excluded from the course.

(iii) Before the Higher Degrees Advisory Committee recommends to terminate candidature, the candidate shall be given the opportunity to show cause why this action should not be taken.

**Examination of the Thesis**

**SUBMISSION OF THESIS**

(i) A candidate should submit a minimum of three copies of a thesis to the relevant Specialisation Coordinator for examination. These should be temporarily bound in order to facilitate the making of any revisions and editorial changes required by examiners (if the thesis is otherwise acceptable to them) before final printing and binding.

(ii) The thesis should be accompanied by a signed declaration which states that:

(a) the candidate has complied with the ethics of experimentation as set out in the publication Guide to Thesis Presentation;

(b) the thesis is the candidate’s own work and that all other sources are correctly acknowledged;

(c) the thesis has not been submitted to another institution.

**EXAMINATION OF THESIS**

(i) Each thesis will be examined by at least two examiners appointed by the Higher Degrees Advisory Committee on the recommendation of the relevant Specialisation Coordinator in consultation with the candidate. Such appointments should be finalised from two to four weeks prior to the anticipated submission date of the thesis. At least one of the examiners appointed will be external to the University.

(ii) An oral defence of a specific thesis may be made a component of the overall thesis examination procedure upon the recommendation of the Higher Degrees Advisory Committee. Should this be the case, the relevant Specialisation Coordinator will normally act as Chairperson of the group of examiners for the oral examination. At such an examination, the attendance of observers, other than the Dean and relevant Head of School, is subject to the express approval of the Higher Degrees Advisory Committee.

(iii) Examiners must receive copies of the thesis in reasonable time to permit its thorough consideration and appraisal before the date by which assessments are required or before any oral examination. Whether or not there is an oral examination, each examiner is required to submit a written assessment of the thesis within eight weeks of its receipt.

(iv) These assessments will be presented on official forms available from the Registrar and will deal with the general standard and quality of the work and not with specific detail. They will be submitted to the relevant Specialisation Coordinator by the specified date and, if there is to be an oral examination, before such oral examination. These assessments are individual and confidential and should not be made available to other examiners. Each should make one of the following recommendations:

(a) Pass – implying that the thesis will be fully satisfactory except possibly for minor editorial changes;
(b) Resubmit – implying that the thesis will be fully acceptable when certain necessary corrections or modifications are made by the candidate and resubmitted to the examiners;

(c) Fail – implying that the thesis is not of an acceptable standard.

(v) In the case of (a) and (b) above, an examiner should provide, along with the official assessment form, a separate document indicating where corrections or modifications are required and, as appropriate, providing any constructive criticism and comment helpful to the candidate. An examiner will refer to any notably original contributions which the candidate has made and may comment on the scope for further research or postgraduate study. Such additional documents should be retained temporarily by the relevant Specialisation Coordinator.

(vi) The relevant Specialisation Coordinator will forward the set of examiner’s assessment forms (together with the additional signed judgments of each examiner respecting any oral examination) to the Higher Degrees Advisory Committee, attaching a formal recommendation based on the examiners’ reports. The Faculty Academic Board may accept or reject the recommendation.

(vii) If a recommendation of type (a) is accepted, the Higher Degrees Advisory Committee will ask the relevant Specialisation Coordinator to make the examiners’ requirements available to the candidate and will sign an official record indicating satisfaction of all thesis requirements when advised by the relevant Specialisation Coordinator that all changes have been completed satisfactorily.

(viii) If a recommendation of type (b) is accepted, the Higher Degrees Advisory Committee will ask the relevant Specialisation Coordinator to ensure that the candidate is requested to resubmit the thesis with any necessary corrections or modifications and that the revised thesis is forwarded to the examiners for assessment.

(ix) If the Faculty Academic Board accepts a recommendation of type (c) the normal implication is that the candidate will be excluded from the course. However, in exceptional circumstances, the Higher Degrees Advisory Committee may grant the candidate an opportunity to submit a substantially new thesis after a period of not less than six months.

(x) Normally all examiners will be expected to rate the thesis as meeting a satisfactory standard in order for a pass to be awarded. However, if there is substantial disagreement between examiners concerning the acceptability of a thesis, the Faculty Academic Board may confer and seek further advice from the Higher Degree Advisory Committee before making a ruling.

Admission to Degree
Prior to admission to the award, a candidate must have two of the completed documents bound. Of these, one copy of the completed document must be submitted for inclusion in the University Library collection as follows:

☐ thesis or dissertation associated with a coursework specialisation where this constitutes at least 25% of the credit point total for the course.

A candidate who:

(i) fulfils the requirements of these rules; and

(ii) whose work is of a standard that satisfies the Faculty Academic Board (after considering the results in all subjects and/or the reports of all examiners); and

(iii) has otherwise complied with the provisions of all statutes and other applicable rules; may be admitted to the degree of Master of Education.
Graduate Diploma in Education (Computer Education) (ED21)

Location: Kelvin Grove campus

Course Duration: 2 years part-time internal or external

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Glenice Watson

Entry Requirements
To be eligible for admission, an applicant must:
(i) hold an approved Diploma of Teaching or equivalent; and
(ii) have had at least one year’s teaching experience.

External students will need to have access to a computer system which supports the languages Pascal (preferably Turbo Pascal), Logo and PROLOG, (preferably Turbo PROLOG), and which includes a disk drive and printer. Although some software resources are available for borrowing, external students will normally be expected to provide their own software.

It is highly desirable that external students have access to an IBM PC or compatible (e.g. Sperry PC) with at least 640K of memory for at least some parts of the course.

Graduate Diploma in Education (Curriculum) (ED22)

Location: Kelvin Grove and/or Carseldine campus

Course Duration: 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr Roy Ballantyne

Entry Requirements
To be eligible for entry an applicant must:
(i) hold an approved diploma or degree (or equivalent); and
(ii) have had at least one year’s teaching experience; and
(iii) have successfully completed some studies in the specialisation area of their choice.

Course Structure
Students elect to specialise in the areas of Art Education, Arts in Early Childhood, Environmental Education, Human Relationships Education, Mathematics Education, Music Education and Science Education.

Students must take both core subjects and six specialisation subjects from the elected area to satisfy requirements for the award of a Graduate Diploma in Education (Curriculum).

The subjects in the program are organised as set out below.

Graduate Diploma in Education (Early Childhood) (ED20)

Location: Kelvin Grove campus

Course Duration: 2 years external

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Ann Farrell

Entry Requirements
To be eligible for admission, an applicant must hold the following:
(i) an approved Diploma of Teaching or equivalent; and
(ii) at least one year's teaching experience; and
(iii) current teacher registration.

Special Course Requirements
Students should note that there is a compulsory period of two weeks' practice teaching (or more, according to Individual Teaching Experience Profiles) with children in the early childhood age range, to be undertaken at the completion of the first four subjects of the course. Students employed as teachers need to complete these practice periods during school holidays in a specially organised setting. A further compulsory period of two weeks with children in the early childhood age range is held toward the end of the course to provide opportunities for program design and evaluation. Some students may need to undertake this practicum during school holidays.

Graduate Diploma in Education (Early Childhood Teaching) (ED30)

Location: Kelvin Grove campus

Course Duration: 1 year full-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Donna Berthelsen

Entry Requirements
To be eligible for admission, an applicant must hold the following:
(i) an approved degree or equivalent (no prerequisite studies required); and
(ii) personal suitability.

Special Course Requirements
There is provision for 60 days of practice teaching and field studies within early childhood educational settings.

Graduate Diploma in Education (Primary Teaching) (ED31)

Location: Carseldine campus

Course Duration: 1 year full-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Tania Aspland
Entry Requirements
To be eligible for admission, an applicant must hold an approved degree or equivalent (no prerequisite studies are required). Interviews will be conducted when deemed necessary.

Special Course Requirements
Students are required to demonstrate competencies in swimming and first aid by the conclusion of the year and prior to Teacher Registration. Students may be given opportunities to specialise in a LOTE subject if certain requirements are met.

Graduate Diploma in Education (Resource Teaching) (ED24)

Location: Kelvin Grove campus

Course Duration: 1 year full-time, 2 years part-time or external

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Don Burnes

Note: Fieldwork Subjects for Part-time Students
Students studying on a part-time basis should replace the subject LEP504 Resource Teaching Fieldwork 1 (8 credit points) with LEP509 Resource Teaching Fieldwork 1A (4 credit points) and LEP510 Resource Teaching Fieldwork 1B (4 credit points), and also replace LEP506 Resource Teaching Fieldwork 2 (8 credit points) with LEP511 Resource Teaching Fieldwork 2A (4 credit points) and LEP512 Resource Teaching Fieldwork 2B (4 credit points) in the appropriate semesters.

Entry Requirements
To be eligible for admission, an applicant must:
(i) hold an appropriate degree or Diploma of Teaching (or equivalent); and
(ii) have had suitable teaching experience; and
(iii) be recommended by their employing authority as having general personal suitability to fulfil the resource/support teacher role.

### Graduate Diploma in Education (Secondary Teaching) (ED32)

**Location:** Kelvin Grove campus

**Course Duration:** 1 year full-time

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Dr Ian Macpherson

**Entry Requirements**

There are two sets of entry requirements:

(i) possession of a recognised degree, or in some cases diploma; and

(ii) eligibility to study Curriculum and Teaching Subjects, as follows:

- **Curriculum major:** successful studies amounting to 33 per cent of the undergraduate degree;
- **Curriculum minor:** successful studies amounting to 16 per cent of the undergraduate degree.

Some subject areas have further requirements:

- **Science:** a breadth of Science studies is sought;
- **Art:** a range of studio skills is preferred.

Interviews and auditions are held in certain subject areas such as Drama and Music.

* Subject available for part-time (evening) students.

+ Subject available for part-time (external) students.

### Curriculum and Teaching Studies

Group A subjects are prerequisites for the Group B subjects in the same block. Together, A and B subjects form the Curriculum major. Students take:

- one Group A subject and two Group B subjects in the same block, or
- one Group B subject in the same block and one Group C subject, or
- one Group B subject in the same block and one Group B subject for which they are qualified from a different block.

Science is an exception to this (see note in Science block).

#### Group A subjects

- **SBP420** Business Education CTS A
- **LAP420** Communication CTS A
- **MDP420** Computer Education CTS A
- **PNP420** Home Economics CTS A
- **LAP430** Languages other than English (LOTE) CTS A
- **MDP430** Mathematics CTS A
- **HMP420** Physical Education CTS A
- **MDP440** Science CTS A* (Full-time)

#### Group B subjects

- **SBP421** Accounting/
- **SBP422** Business Management CTS B
- **SBP423** Economics CTS B
- **SBP424** Legal Studies CTS B
- **SBP425** Office Automation CTS B
- **LAP421** English CTS B
- **LAP422** Film & Television CTS B
- **MDP421** Computer Education CTS B
- **PNP421** Home Economics CTS B
- **LAP431** Chinese CTS B
- **LAP432** French CTS B
- **LAP433** German CTS B
- **LAP434** Indonesian CTS B
- **LAP435** Italian CTS B
- **LAP436** Japanese CTS B
- **MDP431** Mathematics CTS B
- **HMP421** Physical Education CTS B
- **MDP441** Science CTS B
- **MDP442** Agriculture CTS B
- **MDP443** Biology CTS B
- **MDP444** Chemistry CTS B
- **MDP445** Earth Science CTS B
- **MDP446** Marine Studies CTS B
- **MDP447** Physics CTS B

---

*For Science students, the Curriculum and Teaching Studies structure requires compulsory enrolment in Science A, Science B and usually one other of the Group C Science subjects. If this pattern is followed, a Group C subject is not possible.*

---

340
Group C subjects
For students who take a Group C subject, this is the Curriculum minor.

Prerequisite undergraduate studies are required for the following:

AAP425 Drama CTS C
AAP426 Music CTS C
AAP427 Visual Arts CTS C
HMP423 Outdoor Education CTS C
LAP423 Junior English* CTS C
LAP424 Teaching English as a Second Language CTS C
LAP437 LOTE in the Primary School CTS C
LEP420 Human Relations Education CTS C
MDP432 Junior Mathematics* CTS C
MDP448 Junior Science* CTS C
SBP433 Junior Social Science* CTS C

NO prerequisite studies are required for the following:

CPP420 Aboriginal Education CTS C
LEP421 Adult Learners CTS C
LEP422 Exceptionality CTS C

Graduate Diploma in Education (Teacher-Librarianship) (ED25)

Location: Kelvin Grove campus

Course Duration: 1 year full-time, 1.5 years full-time/part-time

Total Credit Points: 96

* These subjects are incompatible with the Group A subject in the same field.
Standard Credit Points/Full-time Semester: 48

Course Coordinator: Mr Geoff Chapman

Entry Requirements:
To be eligible for admission, an applicant must:

(i) hold an appropriate degree, diploma or equivalent qualification, including an approved teaching qualification; and

(ii) have had proven satisfactory teaching experience, normally at least three years in the last ten; and

(iii) have personal suitability.

Professional Recognition
The course is recognised by the Australian Library and Information Association as a specialist professional qualification.

Special Course Requirements
The course is divided into two parts, Part A and Part B, each of which corresponds to one semester of full-time study. Part A is offered full-time, or part-time during the day, in both semesters each year, while Part B is offered by evening and external studies. Part B is normally completed part-time, but may be completed full-time in one semester.

Applicants normally fall into two categories: those seeking sponsorship by employing authorities (State and Catholic Education); and independent (private) applicants. Teachers who fall into the first category are notified by circular memorandum to schools and/or by a notice in the Education Office Gazette (April and September).

**Note:** Students may select Elective subjects from the Graduate Diploma in Library Science and from other University courses as approved by the Course Coordinator.

### Bachelor of Education (In-service) (ED26)

**Location:** Carseldine and Kelvin Grove campuses

**Course Duration:** 1 year full-time, 2 years part-time or external

**Total Credit Points:** 96 (144 for the Extended Program)

**Course Coordinator:** Mr Peter Kendal

**Special Course Requirements**

Studies towards the in-service strand of the Bachelor of Education (In-service) degree are available through three linking programs each pitched at a different level. These are:

- **Reorientation to Teaching Program:** a course designed to give specific categories of former teachers an opportunity to learn of recent developments in education;

- **Extended Bachelor of Education Program:** a course of subjects (normally a minimum of four) designed to replace the Diploma of Teaching (Upgrading); and

- **Bachelor of Education:** a course designed for three-year-trained (or equivalent) teachers wishing to pursue degree studies in education.

**Reorientation to Teaching Program**

Former teachers who have had fewer than three years’ preservice teacher education and less than three years’ teaching experience in the last eight years, are required to complete a reorientation-to-teaching program.

This program is available from the University of Southern Queensland, Post Office Darling Heights, Toowoomba, Q 4350.

On successful completion of the program, participants are eligible for entry into the ‘Extended’ Bachelor of Education course.
Extended Bachelor of Education (In-service) Program

Course Structure
Students who have less than three years of training are required to undertake additional studies prior to the eight subjects required for the Bachelor of Education (In-service) award. The additional studies are as follows:

For Primary & Early Childhood Teachers

<table>
<thead>
<tr>
<th>Part 1: Compulsory Subjects</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAB490</td>
<td>Recent Developments in Language/Reading</td>
</tr>
<tr>
<td>MDB490</td>
<td>Topics in Teaching Mathematics</td>
</tr>
<tr>
<td>PLUS</td>
<td></td>
</tr>
</tbody>
</table>

Part 2: Two of the following subjects determined by the Course Coordinator after reviewing the student's academic background:

- CPB491 Sociology of Education 12
- CPB492 Philosophy of Education 12
- LEB490 Human Development & Learning 12

For TAFE and Secondary Teachers

Part 1: Compulsory Subjects

- CPB493 Secondary Education Today 12
- CUB490 Introduction to Curriculum Construction 12
- PLUS |

Part 2: Two of the following subjects determined by the Course Coordinator after reviewing the student's academic background:

- CPB491 Sociology of Education 12
- CPB492 Philosophy of Education 12
- LEB490 Human Development & Learning 12

Any student who has completed four or more subjects of an Upgrading course will be eligible for transfer to the final eight subjects of the Bachelor of Education (In-service) course irrespective of the nature of the subjects completed, i.e. they need not be those specified in Part 1 and Part 2 above.

Bachelor of Education (In-service)

Course Structure
Students are required to complete successfully 96 credit points as follows:

<table>
<thead>
<tr>
<th>Speciality</th>
<th>Credit Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Studies in Education (List A)</td>
<td>CPB420 Contemporary Issues in Education plus 12 credit points from List A</td>

EDB441  Educational Research & Practice (Subject to approval)  12  3

Note: In addition to the above subjects students may also be given approval to enrol in selected subjects from Graduate Diplomas offered by the University.

▶ Bachelor of Education (Secondary) (ED50)

Location: Kelvin Grove campus (some subject areas are located at Carseldine and Gardens Point campuses)

Course Duration: 4 years full-time

Total Credit Points: 384
**Standard Credit Points/Full-Time Semester: 48**

**Course Coordinator: Dr Bob Hardingham**

Students are required to specialise in two teaching areas appropriate to Years 8-12 in Queensland. They must complete at least 72 credit points in one area and 96 credit points in the other. The remaining 24 credit points may be added to the 72, added to the 96, or used for personal development in a third area. Hence the combinations available include the following:

(a) Teaching area 1
   Teaching area 2
   72 credit points
   120 credit points

(b) Teaching area 1
   Teaching area 2
   96 credit points
   96 credit points

(c) Teaching area 1
   Teaching area 2
   Liberal Studies
   72 credit points
   96 credit points
   24 credit points

Initial entry into the course is into one of the course streams as shown in Table 2.

Note:

(i) Where the same subject area is listed in both Groups A and B (e.g. English), it may only be selected once.

(ii) There may be limited places in some disciplines as a second teaching area.

(iii) Students selecting Science Studies or Physical Education are encouraged to complete at least 96 credit points in these areas.

(iv) Students in second or third year of the course will continue with subject combinations outlined in 1991.

AAB424  Ceramic/Sculpture Studies  8  4  
AAB425  Photography/Printmaking Studies  8  4  
AAB442  History of Australian Art  12  3  

Major (96 credit points)  
AAB052  Signs & Meanings  12  3  
AAB421  Foundation Art Studies  12  4  
AAB422  Painting/Drawing/Fibre Studies  12  6  
AAB423  Computer Graphics/Intermedia Studies  8  4  
AAB424  Ceramic/Sculpture Studies  8  4  
AAB425  Photography/Printmaking Studies  8  4  
AAB442  History of Australian Art  12  3  
AAB426  Advanced Discipline Studies 1 - 2D Studies  12  3  
AAB427  Advanced Discipline Studies 2 - 2D Studies  12  3  
AAB428  Advanced Discipline Studies 1 - 3D Studies  12  3  
AAB429  Advanced Discipline Studies 2 - 3D Studies  12  3  
AAB430  Advanced Discipline Studies 1 - Imaging in Technology  12  3  
AAB431  Advanced Discipline Studies 2 - Imaging in Technology  12  3  
AAB432  Advanced Discipline Studies 1 - Intermedia Studies  12  3  
AAB433  Advanced Discipline Studies 2 - Intermedia Studies  12  3  

Extended Major (120 credit points)  
As for the major program plus 24 credit points from either further subjects from the 
Advanced Discipline Studies or Art subjects in other suitable courses.

BIOLOGY  
Minor (72 credit points)  
LSB122  Biology 1  12  5  
LSB222  Biology 2  12  5  
LSB242  Human Anatomy & Physiology  12  5  
LSB312  Marine Studies  12  5
Plus two (24 credit points) elective Biology subjects selected in consultation with the BEd Science Strand Coordinator. In some cases students may need to select the subject Cell Biology as a prerequisite for certain second level subjects.

**Major (96 credit points)**
As for the minor program plus two (24 credit points) electives in Biology subjects selected in consultation with the BEd Science Strand Coordinator.

**Extended Major (120 credit points)**
As for the major program plus two (24 credit points) electives in Biology subjects selected in consultation with the BEd Science Strand Coordinator.

**CHEMISTRY**

**Minor (72 credit points)**
- CHB182 Chemistry 1 12 5
- CHB282 Chemistry 2 12 5

Plus two of the following electives:
- CHB313 Analytical Chemistry 3 12 5
- CHB333 Inorganic Chemistry 3 12 5
- CHB352 Organic Chemistry 3 12 5
- CHB372 Chemistry 3 12 5

Plus any two second or third level Chemistry or Chemistry related subjects (e.g. Biochemistry, Geochemistry) selected in consultation with the BEd Science Strand Coordinator. Students must ensure that they have studied the necessary prerequisites for Chemistry related subjects.

**Major (96 credit points)**
As for the minor program plus two (24 credit points) electives in Chemistry or Chemistry related subjects selected in consultation with the BEd Science Strand Coordinator.

**Extended Major (120 credit points)**
As for the major program plus two (24 credit points) electives in Chemistry subjects or Chemistry related subjects selected in consultation with the BEd Science Strand Coordinator.

**COMMUNICATION TECHNOLOGY**

**Minor (72 credit points)**
- COP100 Business Communication 12 3
- COB118 Communication Technology in Organisations 12 3
- COB119 Text Formatting & Transcription 12 3
- COB121 Records Management 12 3
- COB122 Office Procedures 12 3
- COB123 Issues in Communication Technology 12 3

**Major (96 credit points)**
As for the minor program plus the following:
- COB126 Supervision & Administration 12 3
- COB128 Supervised Project 12 2

**COMPUTING**

**Minor (72 credit points)**
- CSB860 Computer Systems & Architecture 12 3
- CSB862 Computational & Mathematical Foundations 12 3
- CSB864 Programming Principles 12 3
- CSB866 Artificial Intelligence 12 3
- ISB863 Database Theory & Techniques 12 3
- ISB865 Information System Modelling 12 3
- MDB375 Computer Applications 12 3
### Major (96 credit points)
As for the minor program plus the following:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSB087 Programming Languages</td>
<td>12 3</td>
</tr>
<tr>
<td>MDB377 Project Planning &amp; Implementation</td>

Students without a Sound Achievement in Senior Biology, Chemistry or Physics need to take the respective co-requisite Introductory Biology, Chemistry or Physics. It is highly recommended that students undertaking any of these introductory subjects consider them as part of their C Strand electives. Subjects must be selected in consultation with the BEd Science Strand Coordinator.

Major (96 credit points)

As for minor program plus an additional two (24 credit points) electives listed for the minor. It is highly recommended that students undertaking any of the introductory subjects consider them as part of their C Strand electives. Subjects must be selected in consultation with the BEd Science Strand Coordinator.

Extended Major (120 credit points)

As for the Major program plus two (24 credit points) electives from any science subjects selected in consultation with the BEd Science Strand Coordinator.

Major (96 credit points)

As for the minor program plus two additional electives.

Extended Major (120 credit points)

As for the major program plus two additional electives.
Bachelor of Teaching (Early Childhood/Primary)

Location: Kelvin Grove and Carseldine campuses

Course Duration: 3 years full-time

Total Credit Points: 288

Standard Credit Points/Full-time Semester: 48

Course Coordinator: Associate Professor Susan Wright

The Bachelor of Teaching (Early Childhood/Primary) course is a three-year preservice education degree with specialisations in Early Childhood (ED40) and Primary Teaching (ED41). An external Upgrading program (ED42) is also offered in the Early Childhood specialisation.

Bachelor of Teaching (Early Childhood) (ED40)

External Child Care Upgrading Program (ED42)

Location: Kelvin Grove campus

Course Duration: 2.5 years external

Total Credit Points: 144

Special Requirements

Applicants for the external upgrading program (equivalent to 18 months of full-time study) are required to have had experience in an early childhood care and education service of at least the equivalent of one year of full-time employment; and successful completion of the Associate Diploma in Child Care (BCAE) or Associate Diploma of Education (TAFE) or a relevant qualification in child care, education, health or social work equivalent to at least two years' full-time study at tertiary level.

### Bachelor of Teaching (Primary) (ED41)

**Location:** Carseldine campus

**Primary Specialisation Manager:** Ms Jan Millwater

#### Special Course Requirements

Within primary specialisations it is possible to undertake the basic generalist studies which enable graduates to be employed in the primary school system or to undertake a modification of these to major in the areas of Early Childhood Education, Music Education and Physical Education. Selected students begin these studies in their second year, having applied midway through Semester 2 of Year 1.

Course Structures

Master of Nursing (NS85)

Location: Gardens Point campus

Course Duration: 1.5 years full-time, 3 years part-time

Total Credit Points: 144

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Karen Stolz

Entry Requirements

NORMAL ENTRY
Applicants shall hold a Bachelor of Applied Science (or equivalent) in the appropriate discipline for which they are seeking admission and shall normally have had at least one year of appropriate work experience in the discipline for which they are seeking admission.

Applicants may be required to attend an interview with the Head of School and/or Course Coordinator to establish suitability for entrance into the course.

Applicants must hold a qualification in nursing acceptable for registration by the Nurses Registration Board of Queensland.

SPECIAL ENTRY
Applicants who do not hold the specific tertiary qualification required of normal entrants may be admitted upon successful completion of a qualifying program prescribed by the Head of School.

Special Course Requirements

Students are required to negotiate with appropriate health organisations for additional clinical practice placement outside the formal contact hours in order to meet the course requirements.

Students must select one area of clinical specialisation and one area of advanced nursing practice and complete the three subjects in each area of study.

Clinical specialisation areas offered in 1992: Medical/Surgical Nursing, Primary Health Care Nursing, Psychiatric/Mental Health Nursing, Midwifery, Child and Adolescent Nursing and Gerontological Nursing.

Master of Public Health (PU85)

QUT, Griffith University and The University of Queensland offer a joint Master of Public Health (MPH) degree, bringing together interdisciplinary knowledge and skills in public health across the three universities. Students enrol in and graduate from the university in which they undertake their specialist electives and which supervises their dissertation.

Location: Gardens Point campus

Course Duration: 1.5 years full-time, 3 years part-time

Total Credit Points: 144

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Paul Hindson

Entry Requirements
The entry requirements for the MPH are identical for the three collaborating institutions, and are as follows:

(1) A person may first enrol as a candidate for the degree only if that person:

   (i) holds a bachelor degree from the university or a similar qualification from an approved institution in the health, behavioural, social or biological sciences:
      (a) with first or second class honours;
      (b) which required study for at least four years; or
      (c) which required study for at least three years, if:

      (A) a postgraduate diploma from the university or an approved institution is also held; or

      (B) a postgraduate diploma from the university or an approved institution is also held;
(B) the research publications and written reports of that person satisfy the Faculty Academic Board that the applicant should be accepted as a candidate; and

(ii) has, since obtaining the qualifications required, had training or experience in a relevant field for a period of at least:

(a) three years, where the applicant seeks entry through paragraph (i) (c) (B); or

(b) two years, otherwise.

(2) The Dean may allow a person to be admitted as a candidate, if of the opinion:

(i) that a person has obtained a basic professional qualification in the health, behavioural, social or biological sciences in that person's home country;

(ii) that person has subsequently had at least four years of relevant professional experience, which may include a post-basic diploma or other relevant training; and

(iii) the qualifications and experience referred to above warrant admission.

(3) Notwithstanding subrules (1) and (2), a person may not be admitted without first satisfying the Dean, if necessary by passing an examination, that the person has both the level of scientific understanding and the level of proficiency in the English language to undertake the course successfully.

(4) For the purposes of subrule (1) an approved institution is one which, in the opinion of the Faculty Academic Board, maintains standards comparable to those of the university.

Application for Admission

Students enrol at the university in which they expect to undertake their specialist elective subjects and in which their dissertation will be supervised. Because this choice must be made before enrolment, a person seeking entry to the degree of Master of Public Health must, prior to application for admission, consult the Directorate of the MPH program (located at the Medical School in Herston).

Course of Study

(1) A candidate must:

(i) pursue the course (full-time) for not less than three nor more than six semesters; and

(ii) obtain 144 credit points (48 per semester F/T, 24 P/T) comprising:

(a) credit for all subjects listed in Part A of the Schedule (core subjects)

(b) 36 credit points from subjects listed in Part B of the Schedule (electives); and

(c) credit for PUN607 Dissertation (48 credit points)

(2) The Dean of Health may grant credit for a core subject if the Director considers the candidate has, while enrolled in this course, passed a subject or subjects at least its equivalent in content and standard at any of the three collaborating institutions.

Credit for a Subject

To obtain credit for a subject a candidate must:

(i) attend lectures, seminars, tutorials, practicals and other classes;

(ii) undertake laboratory and fieldwork;

(iii) complete assignments, project reports and theses;

(iv) pass examinations; and
(v) fulfil any other requirement in the manner and to the extent prescribed by the Director concerned.

Dissertation
(1) A candidate may not submit a dissertation for PUN607 without approval of the topic by the Director of the program after consultation with the supervisors.
(2) The dissertation must be examined by two examiners appointed by the Director.
(3) A candidate may, with the approval of the Director, submit further original work, whether published or not, for the consideration of the examiners.
(4) The Director shall determine whether credit will be awarded for the dissertation after considering the reports of the examiners.

Power of the Faculty Board to Terminate Enrolment
The Faculty Academic Board may, at any time, terminate a candidate's enrolment if it is of the opinion that the candidate has supplied incomplete or inaccurate information with respect to application for enrolment.

Grant of Degree
The degree of the Master of Public Health may be conferred on a candidate who has fulfilled the requirements of these rules and complied with the provisions of all Statutes and other applicable rules.

Course structure
Full-time students in the program undertake a coursework component in their first two semesters (or four semesters part-time - two subjects per semester), followed by a dissertation component of one semester (or two semesters part-time). The coursework component comprises five core subjects and three advanced elective subjects.

PART A
Core Subjects
PUN602 Health Planning, Management & Evaluation (QUT)
PUN603 Environmental & Occupational Health (GU)
PUN604 Principles of Epidemiology (UQ)
PUN605 Statistical Methods & Computing (UQ)
PUN606 Social & Behavioural Sciences in Public Health (GU)

PART B
Advanced elective subjects offered by QUT

</tr>
</tbody>
</table>

(Additional elective subjects are offered by other collaborating universities.)

PART C
Dissertation – the dissertation is equivalent to an honours dissertation in type and scope and is expected to be between 10000 and 20000 words in length.
Graduate Diploma in Advanced Nursing Practice (NS62)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Ms Karen Stolz

Entry Requirements

NORMAL ENTRY
Applicants for admission to the course shall hold a nursing qualification acceptable for registration by the Nurses Registration Board of Queensland; shall hold a degree or diploma in nursing; and shall normally have at least one year of appropriate post-registration clinical experience.

SPECIAL ENTRY
An applicant who does not meet the requirements for normal entry may present documentary evidence of qualifications, experience and other relevant information for special consideration by the Head of School. Such an applicant may be required to undertake appropriate bridging subjects to be determined at the discretion of the Head of School. The subjects would normally be selected from areas of study in the Bachelor of Nursing course.

Special Course Requirements
Students are required to negotiate with appropriate health organisations for additional clinical practice placement outside the formal contact hours in order to meet the course requirements.

Each student must select one area of specialisation and complete the three subjects in that area of study. Three areas of specialisation will be offered in 1992: Medical/Surgical Nursing, Primary Health Care Nursing and Psychiatric/Mental Health Nursing.

Students are required to undertake elective studies. All options may not be available in 1992.

* Sufficient enrolments are required for any particular subject to be held.
Graduate Diploma in Health Science (Health Education) (PU68)

Location: Kelvin Grove campus

Course Duration: 2 years part-time internal and external

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr Mary-Lou O'Connor

Entry Requirements
To be eligible for admission, an applicant must hold the following:

(i) an approved degree/diploma, or General Nursing Certificate and two post-basic nursing certificates or equivalent; and

(ii) at least one year's experience in the field of teaching or community health.

Special Course Requirements
There are three sections in the course — Core Studies, Professional Studies and Elective Studies. All Core Studies are compulsory; however, with the approval of the Course Coordinator PUP027 Independent Study (12 credit points) may be substituted for one of the Core Studies subjects. Subjects in Professional Studies are elective, and may be taken from one of the two strands, ie. School Health or Community Health. The scheduling of elective subjects is subject to staff availability and student demand.

PUP019 Issues in Health Advancement 12 3
PUP027 Independent Study 12 -
SSP543 Health Psychology 12 3
Graduate Diploma in Nutrition and Dietetics (PU62)

Location: Gardens Point campus

Course Duration: 1.5 years full-time

Total Credit Points: 144

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mrs Sandra Capra

Professional Recognition
Graduates are eligible for membership of the Dietitians Association of Australia. This is the only recognised course for dietitians in Queensland.

Entry Requirements

NORMAL ENTRY
To be eligible for registration in the course the applicant must have completed an acceptable degree which includes systematic physiology and metabolic biochemistry, both of which have been studied successfully at second level.

SPECIAL ENTRY
Applicants not completely satisfying the subject requirements may obtain registration upon completion of bridging courses prescribed by the Head of School.

Graduate Standing
Where an equivalent course of study or examination cannot be readily established, an applicant, at the discretion of the Dean of Faculty, may be permitted to undertake a qualifying examination, satisfactory completion of which will entitle such person to the status of graduate or diplomate for the purpose of admission.

Note
Applicants should contact the Head, School of Public Health, by letter when lodging the application for admission.

Special Course Requirements
Before entering the third semester of study, students shall have completed all subjects of the first and second semesters.

Field trips as detailed in Subject Synopses have an attendance requirement and shall be assessed.

Graduate Diploma in Occupational Health and Safety (PU65)

Location: Gardens Point campus

Course Duration: 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Terry Farr

Entry Requirements

NORMAL ENTRY
The normal entry requirement for the course is a bachelors degree or equivalent in an appropriate discipline from a recognised tertiary institution. There is no assumption of prior knowledge in occupational health and safety.

SPECIAL ENTRY
Special entry will be considered for a person without a degree, in view of experience and responsibility in occupational health and safety. As the course is academically demanding and high standards of performance are expected, such candidates will require either an extensive background in the discipline or other suitable tertiary qualifications and appropriate experience to be offered a place.

In some instances, preliminary bridging studies in the physical sciences may be required.

Additional Requirements
All applications for entry will be judged on their individual merit, but considered against a background of the course quota and the benefit of having a diverse class cohort.

Bachelor of Applied Science (Environmental Health) (PU42)

Location: Gardens Point campus

Course Duration: 3 years full-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Bruce Fleming

Professional Recognition

Graduates are eligible for membership of the Australian Institute of Environmental Health and the Environmental Institute of Australia. This course is the only one available in Queensland from which graduates will be approved by the Director-General of Health to work as an environmental health officer or health surveyor within the State.

Special Course Requirements

A registered student may enrol only in a full-time program. Arrangements to complete the course through a ‘sandwich’ program can be discussed with the course coordinator. This method of attendance is relevant to students living outside the Brisbane region and those who are employed as trainee Environmental Health Officers. Trainee Environmental Health Officers are permitted a maximum of six years to complete the course.

Field trips as detailed in the Subject Synopses have an attendance requirement and will be assessed.

For students commencing the course prior to 1991

■ Bachelor of Applied Science (Optometry) (OP42)

Location: Gardens Point campus

Course Duration: 4 years full-time

Total Credit Points: 384

Standard Credit Points/Full-time Semester: 48

Course Coordinator: Associate Professor Peter Swann

Professional Recognition
In each state and territory of Australia, the practice of optometry is regulated by Boards of Optometrical Registration which are statutory bodies set up under Acts of States’ Parliaments. Under these Acts, the practice of optometry is restricted to persons whose names appear on the Register. On completion of the degree course at QUT, the graduate will have satisfied the requirements of the Optometrists’ Board of Queensland, and may apply for registration to practise as an optometrist in Queensland and all States and Territories of Australia.

Special Course Requirements
The degree may be awarded with Honours, First Class Honours, Second Class Honours Division A and Second Class Honours Division B. Candidates for the degree with Honours must fulfil the requirements for the pass degree and achieve such standard of proficiency in all the subjects of the course as may from time to time be determined by the Academic Board and approved by the Academic Committee.

Some items of ophthalmic equipment are required by students for clinical use from the beginning of the third year of the course. Academic staff provide advice regarding the purchase of these instruments.

Bachelor of Applied Science (Podiatry) (PU45)

Location: Gardens Point campus

Course Duration: 3 years full-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Alan Crawford

Professional Recognition

Graduates are eligible for State Registration throughout Australia. This qualification is also acceptable for registration in the United Kingdom, New Zealand and the EEC countries.

Graduates also become Members of the Australian Podiatry Association and are eligible to apply for membership of the Australian Sports Medicine Federation.

Special Course Requirement

Students are required to undertake 180 hours of clinical practice between semesters in the second and third years of the course.

PUB634  Health Services Evaluation  12  3

Health Administration and Health Information Management Electives
Electives may be chosen from any degree courses, subject to prerequisite requirements, availability of the subject in the timetable and approval of the Head of School.
Subject to sufficient student numbers, the following are offered as Health Administration electives:
PUB533  International Health Care Systems (First Semester)
PUB431  Health Care Economics 2 (Second Semester)
PUB528  Health Administration Project (First and Second Semesters)

Bachelor of Nursing (Postregistration) (NS48)
Location: Kelvin Grove campus
Course Duration: 1.5 years full-time, 3 years part-time
Total Credit Points: 144
Standard Credit Points/Full-Time Semester: 48
Course Coordinator: Ms Joan Penridge

Professional Recognition
This course is recognised by the Royal College of Nursing, Australia as satisfying the academic requirements for admission as a professional member.

Advanced Standing
Advanced standing of one year will be granted to graduates of the following courses conducted at QUT:
□ Diploma of Applied Science – Nursing; and
□ Post-registration Diploma of Applied Science courses, since (and including) 1982.
Advanced standing of six months will be granted to graduates of Diploma level nursing courses other than those conducted at QUT.

Electives
Students may select elective subjects (other than the identified nursing elective) either within or outside the School of Nursing. It will be necessary to seek approval from the appropriate School to enrol in elective subjects.

### Bachelor of Nursing (Preregistration) (NS40)

**Location:** Kelvin Grove campus

**Course Duration:** 3 years full-time, 5 years part-time

**Total Credit Points:** 288

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Ms Joan Penridge

**Professional Recognition**

Graduates are eligible for registration within Australia, and have been successful in obtaining registration in Britain, New Zealand and North America.

This course is recognised by the Royal College of Nursing, Australia as satisfying the academic requirements for admission as a professional member.

**Special Course Requirements**

The Clinical Practice B subjects, ie. NSB115, NSB215, NSB315, NSB415, NSB515 and NSB615, each consist of a two-week period of continuous practice following the relevant semester.

NSB402 Nursing & Mental Health 2 8 3
NSB414 Clinical Practice 4A 8 3
NSB415 Clinical Practice 4B 8 3

### Year 3
Year 3 is undertaken in the full-time mode. The area either Biophysical or Mental Health not covered in Year 2 must be completed in Year 3.
Courses

- Master of Applied Science (Computing) (CS36) ........................................ 401
- Master of Information Technology (IS250) ........................................ 403
- Graduate Diploma in Business (Information Systems) (IS18) ................. 404
- Graduate Diploma in Commercial Computing (IS04) ............................... 405
- Graduate Diploma in Computing Science (CS19) ..................................... 406
- Graduate Diploma in Library Science (IS65) ........................................ 408
- Bachelor of Applied Science (Computing) (Honours) (CS55) .................... 409
- Bachelor of Business (Computing) (Honours) (IS61) ............................... 410
- Common First Year: Bachelor of Business (Computing), Bachelor of Applied Science (Computing) (IT32) .................................................. 411
- Bachelor of Applied Science (Computing) (CS28) .................................... 412
- Bachelor of Applied Science (Computing) (IS28) .................................... 414
- Bachelor of Business (Computing) (IS10) ............................................ 416
- Bachelor of Business (Information Management) (IS43) ......................... 418
- Associate Diploma in Business (Computing) (IS08) ................................. 421
FACULTY OF
INFORMATION TECHNOLOGY

Information for all Information Technology students

Graduation rules
This information is relevant to all Faculty of Information Technology courses.

Students who commenced study towards a QUT award from Semester I, 1990 (inclusive) are covered by QUT Student Rules, Procedures and Policies. To qualify for graduation, students admitted to courses offered by the Faculty of Information Technology on Gardens Point campus prior to 1990 should:

(i) obtain a grade of at least 3 in all subjects specified for the award; and
(ii) obtain a Graduation Index of at least 3.9. (Graduation Index is calculated as for grade point average but counting only the best results for a repeated subject and ignoring all subjects for which the best result is a 2 or a 1. A student may repeat any subject in order to upgrade the result and hence increase the Graduation Index.)

Rules and regulations
Students undertaking courses in the Faculty of Information Technology should acquaint themselves with Faculty policy on assessment, deferred examinations, and plagiarism in programming assignments. In many cases, Faculty policy is more explicit than University policy.

Faculty policy regarding use of University computer facilities
Access to computer accounts, E-mail, and bulletin board facilities via QUT equipment is provided solely to assist students in education and research. Use of such facilities by students for matters unrelated to their course of study or approved research represents misuse. Any misuse may result in fines, suspension of use of computer accounts, and/or strict disciplinary action.

Cooperative Education Program (Elective Subject ITB900 - Industrial Training Experience)
AIMS
The purpose of the Cooperative Education Program is to provide students with experience of a real world environment prior to the study of the more advanced aspects of the course in which they are enrolled. This experience:

(i) enables the student to place the concepts learned in the first two years in context; and
(ii) provides an experience that will enhance the benefits obtained from early study.
The Cooperative Education period necessarily involves reorientation and on-the-job training but students are expected to apply study skills to the acquisition of the necessary knowledge and, in general, employers are not expected to provide formal training.

SELECTION CRITERIA
To qualify for the Cooperative Education Program, students must have enrolled in the fourth semester (or equivalent) of their undergraduate degree, and either passed all subjects or attained an overall grade point average of 4.5 in the first three semesters (or equivalent). The option to review a student’s grade point average at the end of the fourth semester is available to employers.

FEATURES
The Cooperative Education Program is offered under the guise of the subject ITB900 Industrial Training Experience and has the following features:

- The Faculty assists students to obtain suitable employment for the one-year period and also discusses the nature of the work to be undertaken with the employer. As employers choose their placements from interviews, the Faculty also arranges for students to attend sessions on interview techniques conducted by the Counselling Centre.

- An academic member of staff normally visits the student once per semester and discusses progress with the student and a representative of the employer.

- During the 12-month training period the student writes two reports on the experience, submits them to the employer for endorsement and comment, and then hands them to the Student Officer for assessment. The reports should highlight different aspects of the period, and include comments and recommendations.

- A pass in this module, as well as 18 credit points, will be granted on the basis of:
  1. satisfactory completion of an approved period of Cooperative Education; and
  2. submission of satisfactory reports on the year’s experience. The reports must be submitted not later than the due dates specified in the study guides.

- A salary is paid to the student by the employer during this training period.

- The Faculty carefully monitors all Cooperative Education placements and keeps a list of employers prepared to offer training. The Faculty makes its best endeavour to find suitable training places for all students who meet the selection criteria and elect to undertake this option.

- Part-time students may apply for credit towards ITB900 on the basis of their employment. Credit will be granted on the basis of a two-year period of full-time employment in an approved environment and compliance with a number of administrative requirements:
  1. a statement from the Course Coordinator that the arrangements have been discussed with the employer and that the proposed period of employment will provide appropriate work experience;
  2. satisfactory reports, written by the student, endorsed by the employer and submitted no later than the due dates.

- It is intended that full-time students on the scheme will devote their prime efforts to the Industrial Training Experience and will not, therefore, be permitted to register for more than one other subject per semester during that year.

SPECIAL NOTES
For students enrolled in the Bachelor of Business (Information Management) (IS43) ITB900 Industrial Training Experience replaces the project subject (ISB305) normally
done in Year 3, Semester 2. It is recommended that these students also do ISB350 – Minor Studies, worth three credit points. This can take the form of a small project related to the Cooperative Education placement specific to Information Management. It can be arranged with the Faculty Student Officer, completed during the placement, and credited in Year 3, Semester 1. Successful completion of ITB900 – Industrial Training Experience and ISB350 – Minor Studies replaces ISB305 – Project and one nine credit point elective. Students who choose not to do ISB350 will be required to do an elective to reach the minimum credit points for graduation.

Course Structures

Master of Applied Science (Computing) (CS36)

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr Gerard Finn

Entry Requirements

Applicants are required to have completed a degree level course which contains a major component in computing or, alternatively, a degree course and a graduate diploma level course in computing. The minimum level of performance expected within prerequisite studies is a grade point average (GPA) of 4.50 (or its equivalent) on a 7 point scale. Selection may be determined on an individual basis and is subject to the approval of the Head, School of Computing Science.

Special Course Requirements

Students may be eligible for exemptions on the basis of equivalent subjects completed in earlier studies. Those students who have completed a suitable honours degree or who have completed a masters qualifying program may be exempted up to 96 credit points, i.e., half of the total credit points of the course, typically those subjects in Years 1 and 2. The granting of any exemption is subject to the approval of the Head, School of Computing Science.

The course structure comprises core, project and elective components. The student intake is heterogeneous and some students may need to undertake advanced undergraduate subjects as prerequisites for core subjects. A maximum of 48 credit points from these undergraduate prerequisites may be credited towards completion of the course.

The core component comprises six subjects (72 credit points) and for students with all necessary prerequisite qualifications these subjects are undertaken in the first four semesters of the part-time course. The six mandatory subjects are:

<table>
<thead>
<tr>
<th>Core Subjects</th>
<th>Credit</th>
<th>Contact</th>
<th>Points</th>
<th>Hrs/Wk</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSN100</td>
<td></td>
<td>Theory of Computing I</td>
<td>12</td>
<td>3</td>
</tr>
<tr>
<td>CSN110</td>
<td></td>
<td>Compiler Construction</td>
<td>12</td>
<td>3</td>
</tr>
<tr>
<td>CSN210</td>
<td></td>
<td>Distributed Systems</td>
<td>12</td>
<td>3</td>
</tr>
<tr>
<td>CSN220</td>
<td></td>
<td>Artificial Intelligence</td>
<td>12</td>
<td>3</td>
</tr>
</tbody>
</table>
The project component comprises four to six semester subjects (48 - 72 credit points) depending upon student choice. At least one major (two-semester) project must be included in this component.

**Project Subjects**

<table>
<thead>
<tr>
<th>Subject Code</th>
<th>Subject Name</th>
<th>Credit Points</th>
<th>Contact Hrs/Wk</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSN301</td>
<td>Minor Project</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>CSN302</td>
<td>Minor Project</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>CSN303</td>
<td>Minor Project</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>CSN304</td>
<td>Minor Project</td>
<td>12</td>

<tr>
<td>CSN400</td>
<td>Major Project - Part 1 (mandatory)</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>CSN450</td>
<td>Major Project - Part 2 (mandatory)</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

The number of advanced electives taken by an individual student depends upon the number of prerequisite subjects undertaken and the number of projects selected. A minimum of two electives (24 credit points) must be selected and a maximum of six (72 credit points) may be selected from this range. The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to the approval of the relevant Head of School.

**Advanced Electives**

<table>

</tbody>
</table>

**Full-Time Course Structure**

Full-time study programs should be discussed with the Course Coordinator. All such programs must be approved by the Head, School of Computing Science. Not all subjects are offered during the day. Full-time students may be required to attend a number of evening classes.

A possible sequence for the part-time program is outlined below.

**Part-Time Course Structure**

- Master of Information Technology (IS50)

Location: Gardens Point campus

Course Duration: 2 years full-time, or 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Bob Smyth

Entry Requirements
Applicants are required to have completed a degree level course which contains a major component in computing, or alternatively, a degree course in any discipline area followed by a graduate diploma level course in computing or library science. The minimum level of performance expected within prerequisite studies is a grade point average (GPA) of 5.00 (or its equivalent) on a 7 point grading scale. Graduates of library science courses will have completed ISP101 Data Design and Processing (or its equivalent) prior to registration in the course. Selection may be determined on an individual basis and is subject to the approval of the Head, School of Information Systems.

Special Course Requirements
Students may be eligible for exemptions on the basis of equivalent subjects completed in earlier studies. Those students who have completed a suitable honours degree or who have completed a masters qualifying program may be exempted up to 96 credit points. The granting of any exemption is subject to the approval of the Head, School of Information Systems.

The course structure comprises core, project and elective components. The student intake is heterogeneous and some students may need to undertake advanced undergraduate subjects which are prerequisites for core subjects. A maximum of 48 credit points from these undergraduate prerequisites may be credited towards completion of the course.

Graduate Diploma in Business (Information Systems) (IS18)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48
Course Coordinator: Dr Marion Orlowski

Professional Recognition
This course is accredited by the Australian Computer Society.

1992 Enrolments - Continuing Students Only
There will be no intake into this course from 1992. Any continuing students must arrange a study program to complete their award with the Course Coordinator prior to enrolment.

Graduate Diploma in Commercial Computing (IS04)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time
Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr David Edmond

Entry Requirements
An applicant seeking admission into the Graduate Diploma in Commercial Computing is required to:

(i) hold a degree or a three-year diploma in a discipline other than computing from a recognised university or college of advanced education; applicants with undergraduate degrees or diplomas which include significant studies in computing are not eligible for admission to this course;

(ii) have completed, at a degree level, an introductory subject in computing (the equivalent of at least three hours per week for one semester). Applicants whose degrees have not included an introductory computing subject must complete this subject as a visiting student before entering the course.

Professional Recognition
This course is accredited by the Australian Computer Society as meeting the knowledge requirements associated with the grade of 'Member' of the Society.

### Electives

The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to the approval of the relevant Head of School.

Electives to the value of at least 48 credit points are to be chosen from the following, or from the offerings of the School of Computing Science or Faculty of Business.

### Graduate Diploma in Computing Science (CS19)

**Location:** Gardens Point campus

**Course Duration:** 1 year full-time, 2 years part-time

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Dr John Hynd

**Entry Requirements**

An applicant seeking admission into the Graduate Diploma in Computing Science is required to:
(i) hold a degree or a three-year diploma in a discipline other than computing from a recognised university or college of advanced education; applicants with undergraduate degrees which include significant studies in computing are not eligible for admission into the course;

(ii) have completed, at a degree level, an introductory level subject in Pascal programming (the equivalent of at least three hours per week for one semester. Applicants whose degrees have not included this subject must complete this subject as a visiting student before entering the course.

In addition, an introductory tertiary level subject in Mathematics is desirable.

Professional Recognition

This course is accredited by the Australian Computer Society as meeting the knowledge requirements associated with the grade of ‘Member’ of the Society.

Electives

The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to the approval of the relevant Head of School.

Electives may be selected from the following list:
Graduate Diploma in Library Science (IS65)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr John Goodell

Entry Requirements

To be eligible for admission to the Graduate Diploma in Library Science, applicants are required to have a degree or a three-year diploma in a field other than library science and to have successfully completed an introductory computing subject at tertiary level. Applicants whose degrees have not included this introductory computing subject must complete this subject as a visiting student before entering the course.

Professional Recognition

Graduates are eligible to become ‘Associates’ (ie professional members) of the Australian Library and Information Association.

Electives

The offering of elective subjects depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of general electives is subject to the approval of the Head, School of Information Systems. Electives may be chosen from the following, or any other appropriate subject may be taken with the approval of the relevant Head of School.

**Bachelor of Applied Science (Computing) (Honours) (CS55)**

**Location:** Gardens Point campus

**Course Duration:** 1 year full-time

**Total Credit Points:** 96

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Dr Gerard Finn

**Entry Requirements**

To be eligible for admission, students should have completed QUT’s Bachelor of Applied Science—Computing or equivalent and should have attained a grade point average (GPA) of at least 5.0, including grades of at least credit in all subjects directly relevant to the...
proposed honours program. Application for admission should normally be made at the end of the final year of the pass degree, or within 18 months of completing that degree. Applicants who do not satisfy the above conditions but who have demonstrated outstanding performance in only the final year of a degree, or whose application is based on other factors, including work experience or involvement in research, may be admitted at the discretion of the Dean.

**Full-Time Course Structure**

| Semester 1 | | | |
|---|---|---|
| CSN201 | Research Methodology | 12 |
| CSN210 | Distributed Systems | 12 |
| ITN502 | Computer Security | 12 |
| Elective | | 12 |

| Semester 2 | | | |
|---|---|---|
| CSN100 | Theory of Computing 1 | 12 |
| CSN110 | Compiler Construction | 12 |
| CSN202 | Honours Project | 12 |
| Elective | | 12 |

**Electives**
The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all elective subjects is subject to approval by the relevant Head of School.

One advanced elective chosen from the following:

Electives

The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to approval by the relevant Head of School.

Electives may be chosen from the following:

- ISN130 Object Oriented Systems
- ISN160 Knowledge-based Systems
- ISN170 Special Studies
- ITN550 Computer Security Risk Modelling

or from:

- any Faculty of Information Technology masters subject
- any QUT Faculty of Business postgraduate subject
- any QUT Faculty of Business undergraduate subject from the fifth or sixth semester of a normal full-time course.

Common First Year: Bachelor of Business (Computing), Bachelor of Applied Science (Computing) (IT32)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Robert Andrews

### Bachelor of Applied Science (Computing) (CS28)

**Location:** Gardens Point campus

**Course Duration:** 3 years full-time, 6 years part-time

**Total Credit Points:** 288 (includes 96 credit points from Common First Year)

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Mr Mike Roggenkamp

**Professional Recognition**

This course is accredited by the Australian Computer Society as meeting the knowledge requirements associated with the grade of 'Member' of the Society.
Entry into this course is dependent upon admission to and progression through the Common First Year (IT32). See IT32 Structure for Year 1, Semesters 1 and 2.

### Year 2, Semester 1
- CSB200 Foundations of Computing 1  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB201 Computer Systems 2  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ISB202 Database & Procedural Languages  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB501 Data Communications  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB600 Practice 3 (CS28)  
  Credit Points: 12  
  Contact Hrs/Wk: 4

### Year 2, Semester 2
- CSB210 Foundations of Computing 2  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB212 Languages & Language Processing  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB213 Scientific Applications  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ISB201 Information Systems Analysis & Design 1  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB650 Practice 4 (CS28)  
  Credit Points: 12  
  Contact Hrs/Wk: 4

### Year 3, Semester 1
- CSB301 Operating Systems  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB302 Software Engineering  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB602 Practice 5 (CS28)  
  Credit Points: 12  
  Contact Hrs/Wk: 4
- Electives [minimum of 18 credit points]

### Year 3, Semester 2
- CSB311 Advanced Computer Architectures  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB960 Project Work  
  Credit Points: 12  
  Contact Hrs/Wk: 4
- Electives [minimum of 27 credit points]

### Part-Time Course Structure
Entry into this course is dependent upon admission to and progression through the Common First Year (IT32). See IT32 Structure for Semesters 1 to 4.

### Year 3, Semester 1
- CSB201 Computer Systems 2  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ISB201 Information Systems Analysis & Design 1  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB605 Practice 3A (CS28)  
  Credit Points: 6  
  Contact Hrs/Wk: 2

### Year 3, Semester 2
- CSB200 Foundations of Computing 1  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB501 Data Communication  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB610 Practice 3B (CS28)  
  Credit Points: 6  
  Contact Hrs/Wk: 2

### Year 4, Semester 1
- CSB212 Languages & Language Processing  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB213 Scientific Applications  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB655 Practice 4A (CS28)  
  Credit Points: 6  
  Contact Hrs/Wk: 2

### Year 4, Semester 2
- CSB210 Foundations of Computing 2  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ISB202 Database & Procedural Languages  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- ITB660 Practice 4 (CS28)  
  Credit Points: 6  
  Contact Hrs/Wk: 2

### Year 5, Semester 1
- CSB302 Software Engineering  
  Credit Points: 9  
  Contact Hrs/Wk: 3
- CSB612 Practice 5A (CS28)  
  Credit Points: 6  
  Contact Hrs/Wk: 2
- Elective  
  Credit Points: 9
The offering of elective subjects in any semester depends on sufficient minimum enrolment in the subject and the availability of staff. The choice of all electives is subject to approval by the relevant Head of School. A minimum of 45 credit points of electives must be chosen from the list below or from other offerings subject to approval by the Course Coordinator.

**FIRST SEMESTER ELECTIVES**

- CSB320  Special Studies  9  3
- CSB321  Graphics  9  3
- CSB324  Artificial Intelligence  9  3
- CSB326  Systems Programming  9  3
- CSB970  Project Work*  12  4
- HRB404  Principles of Management  9  2
- ISB210  Information Systems Analysis & Design 2  9  3
- ISB302  Database Management  9  3
- ISB303  Office Information Systems  9  3
- ITB099  English for Academic Purposes+  9  3
- MKB139  Marketing  12  2

**SECOND SEMESTER ELECTIVES**

- CSB319  Special Studies  9  3
- CSB321  Graphics  9  3
- CSB325  Expert Systems  9  3
- CSB326  Systems Programming  9  3
- HRB404  Principles of Management  9  2
- ISB210  Information Systems Analysis & Design 2  9  3
- ISB302  Database Management  9  3
- ISB303  Office Information Systems  9  3
- ITB503  Data Security  9  3
- MKB139  Marketing  12  2

**SPECIAL ELECTIVE**

ITB900  Industrial Training Experience.

For details see the ‘Information for all Information Technology Students’ at the front of this Faculty’s section (page 399).

**Bachelor of Applied Science (Computing) (IS28)**

**Location:** Gardens Point campus

**Course Duration:** 3 years full-time, 6 years part-time

**Total Credit Points:** 288

* First half of an optional year-long project, subject to approval of the Course Coordinator.
+ Subject to approval by the Dean, Faculty of Information Technology.
Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Hamish Bentley

Professional Recognition
This course is accredited by the Australian Computer Society.

1992 Enrolments - Continuing Students Only
There will be no intake into this course from 1992. Continuing students must complete all subjects as listed in the full-time course structure (or equivalent). A study program must be arranged with the Course Coordinator prior to 1992 enrolment to enable completion of the course.

Full-Time Course Structure
(For Continuing Students only)

- Elective+ 6 2

Year 6, Semester 2
- ISB300 Project Work* 12 -
- Elective+ 6 2

Electives
Electives must total a minimum of 36 credit points, of these 18 credit points must be business electives, which may be chosen from any subject in degree courses offered by the Faculty of Business. The remaining 18 credit points may be selected from any faculty (including Information Technology and Business). All elective choices are subject to prerequisite and approval by the relevant Head of School.

Completion of ITB900 Industrial Training Experience, between the second and third years of coursework, replaces the 18 credit points of business electives. For more details about the Cooperative Education Program see the ‘Information for all Information Technology Students’ at the front of this Faculty’s section (page 399).

The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. Recommended electives are:

### Part-Time Course Structure (for Continuing Students only)

Continuing Students must complete all subjects as listed in the full-time course structure (or equivalent). A study program must be arranged with the Course Coordinator prior to 1992 enrolment.

**Electives**

The offering of elective subjects in any semester depends on sufficient minimum enrolments in the subject and the availability of staff. The choice of all electives is subject to the approval of the relevant Head of School. Recommended electives will be advised by the Course Coordinator.

FACULTY OF LAW

Course Structures

Master of Laws by Coursework (LW51)

Location: Gardens Point campus

Course Duration: 1 year full-time, 3 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Entry Requirements
Applicants for admission shall have satisfied one of the following conditions:

(i) completed the requirements for the degree of Bachelor of Laws of the Queensland University of Technology;

(ii) completed the requirements for the award of a degree in law of another tertiary institution which, in the opinion of the Dean, maintains standards comparable with those required for the award of the degree of Bachelor of Laws of the Queensland University of Technology;

(iii) hold a professional qualification in law and at least three years of professional legal experience subsequent to first admission to practice and also satisfies the Dean that they have the requisite ability to complete the LLM by Coursework degree.

Course Structure
The course structure comprises 96 credit points of coursework subjects for a Pass degree together with a dissertation for an Honours degree.

The subjects from which 96 credit points shall be chosen are, subject to availability:

**LWN100 Honours Dissertation**

A coursework student who has obtained 96 credit points and who has a grade point average of 6 or better shall be eligible to enrol for an Honours Dissertation.

The Honours Dissertation shall be not less than 20,000 and not more than 30,000 words in length, and shall be prepared in accordance with the paper 'Presentation of Legal Theses' by E.M. Campbell, copies of which are held in the Law Library. It shall include a title page, table of contents and bibliography.

Applications to undertake an Honours Dissertation must be made on the prescribed form available from the Faculty office, detailing topic, proposed supervisor, etc. The obligation for finding a supervisor lies with the student. A list of research interests of Faculty staff

* Subject extends over two semesters.
+ Subject to availability of staff.
is released in October of each year. Applications close in mid-January. Students are advised of the success or otherwise of their applications no later than Week 4 of Semester 1. If the topic and supervisor are approved, the student shall pursue his/her research for the dissertation under the direction of the supervisor.

The student shall submit four clear typed copies of his/her dissertation to the Dean of the Faculty of Law. The dissertation must be submitted no later than two weeks into the end-of-semester examinations. On submission of the dissertation, the student shall furnish a signed statement that the dissertation is his/her work alone, except where due acknowledgment is made in the text, and does not include material which has been previously submitted or accepted for a degree or diploma. The dissertation shall be referred to two examiners. Each examiner shall report as to whether, in his/her opinion, the dissertation is of sufficient merit and is one that is likely to be accepted for publication by a learned journal. Each examiner shall also recommend that the dissertation:

(i) be accepted; or
(ii) not be accepted; or
(iii) be accepted subject to amendments to be made to the satisfaction of the supervisor, and, in any event, shall recommend that the dissertation be awarded a grade of fail or one of the pass grades. Following acceptance of the dissertation, two copies shall be bound in an approved form at the student’s expense and one copy handed to the Law Librarian for deposit in the QUT Faculty of Law Library and the other copy submitted for inclusion in the QUT University Library. Any corrections resulting from the examiners’ assessment shall be made prior to binding, and by retyping if they would otherwise be obtrusive.

Master of Laws by Research and Thesis (LW52)*

Location: Gardens Point campus

Course Duration: Minimum of 1 year full-time, 2 years part-time

Total Credit Points: 96

1. Rules for the Master of Laws Degree by Research and Thesis
1.1 The following rules apply to the degree of Master of Laws to be obtained by research and thesis awarded by the Queensland University of Technology, and are made with the authority of the Academic Committee of the Queensland University of Technology.

2. Master of Laws Degree by Research and Thesis
2.1 The Master of Laws (LLM) degree by research and thesis may be awarded as:
2.1.1 Master of Laws, or
2.1.2 Master of Laws with First Class Honours, or
2.1.3 Master of Laws with Second Class Honours.

3. Candidature
3.1 Any of the following persons shall be eligible to apply for admission as a student for the degree:
3.1.1 Normal Entry: A person who has completed the requirements for the degree of Bachelor of Laws of the Queensland University of Technology at a standard of at least Second Class Honours Division A, or its equivalent from another institution which, in

* Offered subject to final approval.
the opinion of the Dean of the Faculty of Law, maintains standards comparable with those required for the award of the degree of Bachelor of Laws of the Queensland University of Technology; or

3.1.2 **Other Entry:** A person who has completed the requirements for the degree of Bachelor of Laws of the Queensland University of Technology at a standard of Second Class Honours Division B or a lesser standard, or its equivalent from another institution which, in the opinion of the Dean, maintains standards comparable with those required for the award of the degree of Bachelor of Laws of the Queensland University of Technology; or

3.1.3 **Other Entry:** A person admitted or entitled to be admitted to practice in the State of Queensland.

3.2 Candidates falling within sub-clauses 3.1.2 and 3.1.3 to be eligible for admission must satisfy the following:

3.2.1 Three years' professional experience in the field in which the proposed research work is to be undertaken; or

3.2.2 Satisfactory completion of an appropriate master's qualifying program stipulated by the Director of Research and Postgraduate Studies on the recommendation of the Postgraduate Studies Committee. Pending satisfactory completion of a qualifying program, provisional status may be granted to the candidate; or

3.2.3 The submission of professional publications or other appropriate evidence which satisfies the Director of Research and Postgraduate Studies on the recommendation of the Faculty's Postgraduate Studies Committee that advanced knowledge and research ability has been acquired in the field of law in which the proposed research work is to be undertaken; and

3.2.4 The Dean of the Faculty of Law is satisfied of the ability of the candidate to complete the required research and thesis towards the degree.

4. **Admission and Enrolment**

4.1 A person applying for admission shall do so through the Registrar to the Dean.

4.2 Admission of a person as a candidate for the degree shall be at the discretion of the Dean on the recommendation of the Faculty's Postgraduate Studies Committee.

4.3 A person applying for admission as a candidate for the degree shall apply in accordance with the requirements of the Registrar and shall pay all prescribed fees.

4.4 A person admitted as a candidate may enrol as either an internal full-time student or an internal part-time student.

5. **Progress Reports**

5.1 A candidate shall prepare annually a statement of the work done towards the degree and submit it to the appointed supervisor.

5.2 The supervisor shall prepare an annual report on the work done by the candidate and the report shall be given to the candidate for comment, and the candidate shall sign the report in acknowledgment of this and return it to the supervisor.

5.3 Both reports together with any accompanying comments by the candidate shall then be forwarded through the Faculty’s Postgraduate Studies Committee and the Dean to the University’s Research Management Committee.

5.4 Where, in the opinion of the Research Management Committee, a candidate has not made satisfactory progress towards completing the requirements for the degree, the
Research Management Committee on the advice of the Dean shall call upon the candidate to show cause why the enrolment of the candidate should not be terminated for lack of satisfactory progress.

5.5 Upon failure of the candidate to show cause the candidate’s enrolment will be terminated.

6. Thesis Requirements

6.1 The thesis submitted for the degree shall be not less than 50,000 words and not more than 60,000 words in length and shall constitute a substantial contribution to knowledge and understanding in the area of the law and subject of the research. It shall include a title page, table of contents and bibliography, and shall otherwise comply with the University’s requirements for presenting theses.

6.2 The candidate shall submit a detailed proposal for a topic for the thesis to the Dean not later than the end of February or August, as the case may be, in the year in which the candidate is enrolled.

6.3 The Faculty’s Postgraduate Studies Committee may, upon the recommendation of the Dean, vary the title of the thesis topic.

6.4 A candidate enrolled for the degree shall at least once per semester during the period of candidature, consult with the supervisor and, where appropriate, any co-supervisor, appointed by the Law Academic Board on the advice of the Dean.

6.5 A candidate shall submit four copies of the thesis in the form prescribed by the University for the submission of theses to the Dean not later than the end of November or May, as the case may be, in the year in which the candidate is required to complete the degree. On submission of the thesis, the candidate shall furnish a written statement to the effect that the thesis is that candidate’s work alone, except where due acknowledgment is made in the text, and does not include material which has been previously submitted or accepted for a degree or diploma.

6.6 The Postgraduate Studies Committee shall refer the thesis to two examiners, at least one of whom must be external to the University. Each examiner shall report, normally within two months of receipt of the thesis, whether in the examiner’s opinion, the thesis is of the standard required for the award of the degree. Each examiner shall also recommend that the thesis:

(i) be accepted;
(ii) not be accepted; or
(iii) be accepted subject to amendments to be made to the satisfaction of the supervisor; and
(iv) if accepted, whether the degree be awarded with First Class Honours, Second Class Honours or as a Pass degree.

6.7 The Faculty’s Postgraduate Studies Committee shall forward the examiners’ reports to the Law Academic Board together with its recommendation.

6.8 The Academic Board shall thereafter refer the examiners’ reports to the Research Management Committee with its recommendations.

6.9 Following final acceptance of the thesis, two copies shall be bound in the prescribed form at the candidate’s expense and one copy submitted to the Faculty of Law Library and the other copy submitted to the Queensland University of Technology Library and shall otherwise be treated in accordance with University policy. Any corrections resulting from the examiners’ assessment shall be made prior to binding, and by re-typing if they would otherwise be obtrusive.
7. Credit for Research Work Done Elsewhere
7.1 The Dean, on the advice of the Director of Research and Postgraduate Studies, may
grant credit toward the Master of Laws degree by Research and Thesis for work done at
another institution of similar standing. Such credit shall not be granted unless the
candidate provides to the Dean:
(i) evidence that the candidate has cancelled or terminated enrolment at the other
institution; and
(ii) a written undertaking that the candidate will not seek credit in any form or manner
for work done at the other institution or any other institutions except to complete
the degree at the Queensland University of Technology.

8. Time for Completion Requirements
8.1 Except in special circumstances and with the approval of the Director of Research
and Postgraduate Studies:
(i) a full-time candidate shall complete all the requirements for the degree not earlier
than the end of the second semester and not later than the end of the sixth semester
of candidature;
(ii) a part-time candidate shall complete all the requirements for the degree not earlier
than the end of the fourth semester and not later than the end of the tenth semester
of the candidature.

8.2 The Dean may, upon the application of the candidate and on the advice of the Director
of Research and Postgraduate Studies, extend any time limited by the Rules by such
further period as may be consistent with general University rules.

9. Award of Degree
9.1 A candidate who has fulfilled the requirements of these rules and who has otherwise
complied with the provisions of all statutes and other rules applicable may be admitted
to the degree of Master of Laws at the grade which the Academic Committee on the
recommendation of the Law Academic Board and Research Management Committee
recommends for the award.

**Master of Legal Practice (LP51)**

**Location:** Gardens Point campus

**Course Duration:** Minimum of one semester and maximum of three semesters,
following completion of the Graduate Diploma in Legal Practice

**Total Credit Points:** 144 (including 96 credit points for the Graduate Diploma in Legal
Practice)

**Standard Credit Points/Full-time Semester:** 48

**Entry Requirements**
To be eligible for admission to the Master of Legal Practice an applicant shall:
(i) hold or be entitled to be admitted to an approved Bachelor's degree (UG1) in Law;
(ii) have satisfactorily completed the requirements for the Graduate Diploma in Legal
Practice at a high level of achievement (GPA of at least 5.0); and
(iii) otherwise satisfy entry requirements equivalent to those of the LLM offered by the
Faculty of Law.
Course Structure
As noted under Entry Requirement (ii) students must satisfactorily complete the Graduate Diploma in Legal Practice at a high level of achievement. Thereafter, students granted a place in the course quota must complete a Research Dissertation.

It is expected that the Research Dissertation will relate to one of the core subject areas covered in the Graduate Diploma in Legal Practice and have an 'applied law' orientation. Set out below are examples of topics which indicate the type of Research Dissertation expected:

- Law and Practice difficulties in staged resort development.
- A comparative and effectiveness analysis of ‘judgment by default’ procedures and practices in the District, Supreme and Federal Courts.
- Jurisdictional issues and procedural difficulties in obtaining injunctive relief in the Supreme, Federal and Family Courts.

Research Dissertation (LPN300)
The Research Dissertation (dissertation) shall be approximately 20,000 words in length, and shall be prepared in accordance with the paper ‘Presentation of Legal Theses’ by E.M. Campbell, copies of which are held in the Law Library. It shall include a title page, table of contents and bibliography.

A student shall submit a topic for the dissertation to the Director of Legal Practice not later than the end of February in the year in which the student is enrolled for the Master of Legal Practice. At the same time, the student shall submit the name of a supervisor willing to supervise the dissertation. If the topic and the supervisor are considered by the Director of Legal Practice to be satisfactory, the Director shall recommend approval of the topic and the supervisor to the Postgraduate Studies Committee. On approval of the topic and the supervisor by the Postgraduate Studies Committee the student shall pursue his/her research for the dissertation under the direction of the supervisor.

The student shall submit four clear typed copies of his/her dissertation to the Director of Legal Practice not later than 18 months after the date on which the student enrolled for the Master of Legal Practice. On submission of the dissertation, the student shall furnish a statement signed by him/her that the dissertation is their work alone, except where due acknowledgment is made in the text, and does not include material which has been previously submitted or accepted for a degree or diploma. The Postgraduate Studies Committee shall refer the dissertation to two examiners recommended to it by the Director of Legal Practice. One of the examiners shall normally be a practitioner specialising or experienced in the area addressed in the dissertation and the other a Faculty member. Each examiner shall report as to whether their opinion, the dissertation is of sufficient merit and is one that is likely to be accepted for publication by a learned journal. Each examiner shall also recommend that the thesis:

(i) be accepted; or
(ii) not be accepted; or
(iii) be accepted subject to amendments to be made to the satisfaction of the supervisor.

Following acceptance of the dissertation, two copies shall be bound in an approved form at the student’s expense and one copy submitted to the Faculty of Law Library and the other copy submitted for inclusion in the QUT University Library. Any corrections resulting from the examiners’ assessment shall be made prior to binding, and by retyping if they would otherwise be obtrusive.
Graduate Diploma in Legal Practice (LP41)

Location: Gardens Point campus

Course Duration: The course is a full-time course beginning in February each year and lasting one academic year, i.e. at least 32 teaching weeks, divided into two semesters which do not normally coincide with the University's normal semesters. There is a two-week break between the semesters and a one-week break in second semester.

Total Credit Points: 96

Standard Credit Points/Full-time Semester: 48

Course Coordinator: Associate Professor John de Groot

Entry Requirements*

(i) Application is made by lodging a written application with the Director of Legal Practice; attending an interview with the Director or nominee; and complying with University requirements for applying for a place in a postgraduate course.

(ii) To be eligible for admission to the Legal Practice course, an applicant must hold, or be entitled to be admitted to, an approved Law degree; or, in the case of an applicant who enrolled for a Law degree at the University of Queensland prior to 1989, must have obtained 340 credit points towards such a degree.

(iii) An applicant who does not satisfy the above requirements may apply for special consideration.

(iv) If there are more eligible applicants than places in the quota, successful applicants will be determined as follows:

(a) for no less than the first 75% of quota places, by reference to the order in which applications are received, provided that the necessary interview with the Director takes place on or before the due date for lodgement of applications; and

(b) for the remaining quota places, as determined by the Dean having regard to (but not limited to) academic merit, aptitude for completing the course, intention to practise as a solicitor, and/or any relevant matters arising out of the applicant’s interview.

Content

Eight core subject areas are addressed and within these core subjects 24 topic areas are covered. The core subjects and topic areas and the approximate number of hours devoted to them are:

PROPERTY
Conveyancing Practice (153.00)
Lease Practice (109.00)
Securities (81.25)
Town Planning (12.50)

COMMERCIAL
Trade Practices (12.50)
Commercial Transactions (82.25)
Company Practice (60.00)
Insurance Law (7.00)

* Under review; subject to final approval.
LITIGATION
Civil Litigation (165.50)
Creditors' Remedies (37.25)
Criminal Law Practice (38.50)
Industrial Law (13.50)

FAMILY
Family Law Practice (125.25)
Legal Aid (6.00)

TRUSTS AND ESTATES
Administration of Estates (84.25)
Tax & Estate Planning (25.00)

SKILLS
Advocacy (38.00)
Negotiation & Dispute Resolution (7.00)
Legal Interviewing & Communication (23.50)
Legal Drafting (46.75)
Computer Literacy (16.00)

PROFESSIONAL PRACTICE
Legal Profession & Professional Conduct (17.75)

PRACTICE MANAGEMENT
Accounting & Office Management (44.75)
Specialised Services (3.50)

Attendance
(i) Subject to (ii) below, a student must, throughout the course, attend at the University, or wherever the course is being conducted at any given time, from 9am to 5pm, and at such other times as may be specified on each weekday which is not a public holiday in Queensland and which does not fall within a course recess, and must participate in all the appropriate course activities.

(ii) A student who is absent from the course for, in the aggregate, more than seven days will be refused a Certificate of Satisfactory Completion of the course unless he/she shows cause to the Dean of the Faculty of Law why such a Certificate should be granted. Such cause might be the circumstance that the student has completed in his/her own time to the satisfaction of the senior full-time instructor of the Legal Practice Course all work missed during the period/s of absence.

Assessment
Throughout the course there will be continuous assessment of the performance of each student. This will be based on attendance, conduct, application and, most of all, proficiency.

A student whose performance is deemed to be unsatisfactory as regards any area of practice or any part of such an area must repeat such part of the course as he/she is directed to repeat.

Other Requirements
The Dean of the Faculty of Law may require students to comply with such other regulations relating to the Legal Practice Course as may be notified from time to time.

Certificate of Satisfactory Completion, Graduate Diploma in Legal Practice
Subject to the rules set out above, each student who satisfactorily participates in and completes each part of the course and who complies with all the requirements relating to the course will receive a Certificate of Satisfactory Completion of the Legal Practice Course and will be awarded a Graduate Diploma in Legal Practice.
### Bar Practice Course

The Bar Practice Course is offered by the Bar Practice section of the Legal Practice unit located at the Gardens Point campus. The course was first offered in 1983 and is a joint venture between the Bar Association of Queensland and the Queensland University of Technology within the administrative structure of the Faculty of Law. It is subject to a Management Committee consisting of three members appointed by the Bar Association, three members appointed by the University and a Chief Executive Officer, designated Warden, who is a member of the academic staff of the Faculty of Law.

The objectives of the Bar Practice Course are:

(i) to develop and enhance the practice skills of candidates for admission to the Bar of the Supreme Court of Queensland;

(ii) to act as a focus for the continuing education of Barristers in the Supreme Court of Queensland; and

(iii) to concern itself with training and standards directed towards the achievement of the highest possible levels of competence and professional integrity in the members of the Bar of the Supreme Court of Queensland.

Lectures and practice presentations are substantially effected by members of the judiciary, the magistracy and the senior Bar, and are directed towards practice and applications. Knowledge of substantive law subjects is presumed.

The primary activity of the section is a 13-week course which includes an intensive advocacy weekend workshop, presented to students (readers) who have qualified in Law from universities or the Bar Board, and who wish to practise as Barristers.

Warden: J. Pastellas, BA LLB Qld, GDLegalPrac QIT, Solicitor of the Supreme Court of Queensland.

### Bachelor of Arts (GU)/Bachelor of Laws (LX32)*

**Location:** Gardens Point campus/Nathan campus

**Course Duration:** 5 years full-time

**Standard Credit Points/Full-Time Semester:** 50.25

**Course Coordinator:** Ms Iyla Davies

- **LWB312** Land Contracts+ 12 3
- **LWB313** Discrimination/Equal Opportunity Law 12 3
- **LWB405** Solicitors’ Trust Accounts 8 2
- **LWB406** Public International Law 12 3
- **LWB407** Conflict of Laws 12 3
- **LWB410** Trade Practices Law 12 3
- **LWB412** Research & Writing Project** 12 3
- Special Law Elective Subject*** 12 3

**RESEARCH AND WRITING PROJECT**
The Research and Writing Project is a one-semester subject offered to a student whenever the Dean of the Faculty is satisfied that sufficient academic staff with the requisite expertise is available within the Faculty to supervise and examine the Project, and that, to undertake the Project, the student has the appropriate academic record and background, and there are sufficient Law Library facilities available. Preference will be given to any student who, at the end of the seventh semester of the full-time course, or at the end of the tenth semester of the part-time course, as the case may be, has obtained, in the Law subjects in which he/she has passed, an average mark equal to or greater than that required for the award of the LLB with Honours.

* Subject extends over two semesters.
+ LWB312 Land Contracts shall not be studied before Land Law.
The Project is a paper, normally of 10,000-15,000 words. The paper must be submitted for examination not later than the last day of the teaching semester in which the Project is undertaken.

The Project is deemed to be a one-semester subject with three hours of formal classes a week.

*** SPECIAL LAW ELECTIVE SUBJECT

This one-semester Law subject is offered internally whenever, in the opinion of the Dean of the Faculty, sufficient academic staff with the requisite expertise in an appropriate subject other than one of those specified above are available in the Faculty, and a sufficient number of students is enrolled in the subject.

The Special Law Elective Subjects offered so far are:

<table>
<thead>
<tr>
<th>Subject Code</th>
<th>Subject Title</th>
<th>Credit Points</th>
<th>Contact Hrs/Wk</th>
</tr>
</thead>
<tbody>
<tr>
<td>LWB480</td>
<td>Media Law</td>
<td>12</td>
<td>3</td>
</tr>
<tr>
<td>LWB481</td>
<td>Mineral Law</td>
<td>12</td>
<td>3</td>
</tr>
<tr>
<td>LWB482</td>

<td>12</td>
<td>3</td>
</tr>
<tr>
<td>LWB483</td>
<td>Medico-legal Issues</td>
<td>12</td>
<td>3</td>
</tr>
</tbody>
</table>

The Law Elective Subjects will be offered as follows:

**First Semester**

**DAY CLASSES**
- Solicitors’ Trust Accounts
- Insolvency Law
- Industrial Law
- Jurisprudence
- Research & Writing Project

**EVENING CLASSES**
- Family Law
- Land Contracts
- Public International Law
- Trade Practices Law
- Conflict of Laws
- Special Law Elective Subject
- Research & Writing Project
- Local Government Law

**Second Semester**

**DAY CLASSES**
- Family Law
- Land Contracts
- Trade Practices Law
- Conflict of Laws
- Special Law Elective Subject
- Research & Writing Project

**EVENING CLASSES**
- Solicitors’ Trust Accounts
- Local Government Law
- Insolvency Law
- Industrial Law
- Jurisprudence
- Research & Writing Project

**Solicitors’ Board Requirements**

Students who wish to satisfy the academic requirements of the Solicitors’ Board must include the following subjects in their courses: LWB302 Family Law, LWB312 Land Contracts and LWB405 Solicitors’ Trust Accounts.

**Barristers’ Board Requirements**

Students who wish to satisfy the academic requirements of the Barristers’ Board must include the following subjects in their courses: LWB407 Conflict of Laws and LWB305 Jurisprudence.

Students also should refer to the Barristers’ Admission Rules (Rule 16) regarding the Law Elective Subjects which are acceptable. Local Government Law is not an acceptable subject under Rule 16.
Honours
The LLB degree may be awarded with Honours: First Class Honours; Second Class Honours, Division A; and Second Class Honours, Division B. Candidates for the degree with Honours must fulfil the requirements for the pass degree and achieve such standards of proficiency in all the subjects of the course as may from time to time be determined by the Academic Board and approved by the Academic Committee. The Faculty’s policy normally provides that a student with a weighted average of 75 per cent or more will qualify for the award of First Class Honours; a student with a weighted average of 70-74.99 per cent will qualify for the award of Second Class Honours, Division A; and a student with a weighted average of 65-69.99 per cent will qualify for the award of Second Class Honours, Division B.*

Part-Time Internal and External Course Structure

NOTE FOR EXTERNAL LLB COURSE
The non-Law subjects Introductory Accounting and Government may be taken by enrolling in equivalent subjects at a tertiary institution other than QUT. Equivalents of certain Law subjects may be undertaken at James Cook University. External students wishing to pursue this option must seek and be granted the approval of the Dean of the Faculty of Law.

**Law Elective Subjects**: Refer to full-time course structure.

**Special Full-Time Course Structure for Graduates**

A graduate of any degree course approved by the Dean of the Faculty of Law is eligible to complete the Bachelor of Laws course in three years (six semesters) of full-time study.

A graduate of any degree course approved by the Dean may be deemed to have passed in two non-Law subjects – Government and Introductory Accounting – and two Law elective subjects, and may be granted credit for such subjects.

**Law Elective Subjects:** Refer to full-time course structure.

---

**Bachelor of Arts (Justice Studies) (JS31)**

**Location:** Kelvin Grove campus

**Course Duration:** 3 years full-time, 6 years part-time

**Total Credit Points:** 288

* Subject extends over two semesters.
+ Subjects LWB104 Legal Research and Writing 1 and LWB415 Legal Research and Writing 2 may be studied as optional subjects - they are not required subjects of the LLB course for graduates.
Standard Credit Points/Full-time Semester: 48

Course Coordinator: Associate Professor Simon Petrie

Course Structure
The course structure comprises the following:
(i) eight Justice Studies core units (96 credit points);
(ii) Justice Studies Major (96 credit points);
(iii) Professional Minor (48 credit points) and four electives (48 credit points) or second Professional Minor (48 credit points) OR Secondary Major (96 credit points).

Details of all Year 2 and 3 subjects are not available at the time of the production of the Handbook. Enquiries may be directed to the Justice Studies office, Kelvin Grove campus telephone (07) 864 3145.

Course Structures

Master of Applied Science (SC80)

Location: Gardens Point campus

The objectives of this course are:

- to provide postgraduate educational opportunities in specialised fields of applied science by means of a program which involves either an original contribution to knowledge or an original application of existing knowledge
- to provide further education in research methods
- to enable graduates employed in industry to undertake further education by research and thesis
- to enable industrial organisations and other external agencies to sponsor a student research program under the control and supervision of the faculty, and thus to further relationships between the University and industry or other external agencies engaged in applied science, to their mutual advantage.

1. General Conditions

1.1 The Council of the Queensland University of Technology was established in 1989 under the Queensland University of Technology Act 1988.

1.2 The Council’s power to approve recommendations from faculty academic boards regarding the registration, supervision and examination of research degree candidates and to develop policy and procedure relating to research degrees is exercised through a Research Management Committee which shall be a subcommittee of Academic Committee.

1.3 Research Management Committee has delegated responsibility for day-to-day administration of research master degree courses to faculty academic boards. Academic boards shall report biannually to the Research Management Committee on progress made by research master degree candidates.

1.4 Unless the context otherwise indicates or requires, the words ‘academic board’ and ‘faculty’ shall refer to the faculty in which the candidate registers.

1.5 In order to qualify for the award of the degree of Master of Applied Science, a candidate must:

- have completed the approved course of study under the supervision prescribed by the Academic Board
- have submitted, and the Academic Board have accepted, a thesis prepared under the supervision of the supervisor
- have completed any other work prescribed by the Academic Board, and
- submit to the Academic Board a declaration signed by the candidate that he/she has not been a candidate for another tertiary award without permission of the Academic Board during the term of enrolment.
2. Registration

2.1 Applications shall be accepted subject to the availability of facilities and supervision.

2.2 Applications may be lodged with the Registrar at any time.

2.3 The minimum academic qualifications for admission to a program leading to a Master of Applied Science, shall be:

- possession of a bachelor degree in applied science from the Queensland University of Technology, or
- possession of an equivalent qualification, or
- submission of such other evidence of qualifications as will satisfy the Academic Board that the applicant possesses the capacity to pursue the course of study.

2.4 Additional requirements for admission to a particular program may be laid down by the Academic Board.

2.5 In considering an applicant for registration the Academic Board shall, in addition to assessing the applicant's suitability, assess the proposed program and its relevance to the aims and objectives of the University.

2.6 A candidate may register either as a full-time or as a part-time student.

2.6.1 To be registered as a full-time student, a candidate must be able to commit to the course not less than three-quarters of a normal working week, averaged over each year of candidacy. Such a student may not devote more than 300 hours annually to teaching activities, including preparation and marking.

2.6.2 A candidate who is unable to devote to the course the proportion of time specified in Section 2.6.1 may register as a part-time student.

2.7 A candidate may be internal or external. An external candidate is one whose program of research and investigation is based at a place of employment or sponsoring institution. Normally, support of the sponsoring institution for the candidate's application is required for registration.

2.8 A candidate shall be registered initially in Stage I of the course unless exemption has been obtained (see 3.7 below).

2.9 The Academic Board may cancel a candidate's registration if, after consulting a candidate's supervisors and having taken account of all relevant circumstances, the Academic Board is of the opinion that the candidate either has effectively discontinued his/her studies or has no reasonable expectation of completing the course of study within the maximum time allowed (see Section 4).

2.10 A candidate whose registration has lapsed or has been cancelled and who wishes subsequently to re-enter the course to undertake a research program which is the same or essentially the same as the previous program may be re-admitted under such conditions as the Academic Board may prescribe.

3. Course of Study

3.1 A candidate for the degree of Master of Applied Science shall undertake a program of research and investigation on a topic approved by the Academic Board. All projects should be sponsored either by outside agencies such as industry, government authorities, or professional organisations, or by the University itself.

3.2 The program must be such as to enable the candidate to develop and demonstrate a level of scientific competence significantly higher than that expected of a first degree graduate. The required competence normally would include mastery of relevant
techniques, investigatory skills, critical thinking, and a high level of knowledge in the specialist area.

3.3 The program consists of two parts, Stage 1 and Stage 2. Progression to Stage 2 is dependent on satisfactory completion of Stage 1 or special permission from the Academic Board. Stage 1 comprises a program of assessed coursework as defined in 3.4 and 3.5 as appropriate for each candidate. Stage 2 comprises a program of supervised research and investigation as indicated in 3.1 and 3.2.

3.4 Coursework at master level may be conducted in a number of ways such as:
- advanced lecture courses
- seminars in which faculty and students present critical studies of selected problems within the subject field
- independent study or reading courses, or
- research projects conducted under faculty supervision.

In all cases, coursework is based upon a formal syllabus setting out the educational outcomes expected from the course, a list of topics to be covered, the prescribed reading material and the method of assessment of progress through and at the end of the course.

3.5 A candidate shall be required to participate in and present seminars as considered appropriate by the Principal Supervisor. The candidate shall be notified of minimum attendance requirements at the time of acceptance of enrolment.

3.6 Stage 1 will normally occupy not more than half of the total period of registration and not more than 96 credit points.

3.7 Students entering the course with an honours degree or its equivalent or candidates with substantial relevant work experience normally gain exemption from most or all of Stage 1 at the discretion of the Academic Board on the recommendation of the Head of School.

3.8 An application for registration should set out systematically and fully the candidate’s intended course of study. The description should include the area of study within which the candidate’s course lies, the coursework to be undertaken, the proposed title of the thesis to be written, the aim of the proposed program of research and investigation, its background, the significance and possible application of the research program, and the research plan.

4. Period of Time for Completion of Course of Study

4.1 A full-time candidate who does not hold an honours degree appropriate to the course of study will normally be required to complete both Stage 1 and Stage 2, including submission of the thesis for examination as required in Stage 2, during a period of registration of 24 months. The corresponding period in the case of a part-time candidate shall be 48 months. In special cases the Academic Board may approve a shorter period.

4.2 On successful completion of Stage 1 (96 credit points):

(i) students with GPA <5 will normally graduate with a GradDipAppSc while
(ii) students with GPA >5 will be permitted to:
   (a) graduate as above, or
   (b) continue with Stage 2 (which is a further one year full-time or equivalent) involving a project leading to the award MAppSc.

4.3 A holder of an honours degree appropriate to the course of study may submit the thesis for examination after not less than 12 months of registration in Stage 2 if a full-time
student, or 24 months if a part-time student. Exemption from all or part of Stage 1 may be granted as indicated in 3.7 above. In special cases the Academic Board may approve a shorter period.

4.4 Where application is made for permission to extend the period within which the candidate may submit a thesis for examination, details of the candidate’s progress shall be presented to the Academic Board together with the reasons for the delay in completing the work and the expected date of completion. Where the Academic Board agrees to an extension, it may set a limit to the maximum period of registration in the program.

5. Transfer of Registration
5.1 Where a candidate has undertaken part of a proposed course of study as a registered student in another institution, this period of registration may, on application in writing to the Academic Board at the time of application for registration, be counted towards the candidate’s period of registration in the QUT course. The application must include details of the work already undertaken, the reasons for the transfer and the expected date of completion.

5.2 Applications for transfer normally should be submitted at least 12 months in advance of the probable date of submission of the thesis.

6. Supervision
6.1 For each candidate the Academic Board shall appoint one or more supervisors with appropriate experience provided that, where more than one supervisor is appointed, one shall be nominated as the Principal Supervisor and the others as Associate Supervisors.

6.2 In the case of an internal student, the Principal Supervisor normally shall be from the academic staff of the school where the student carries out the work.

6.3 In the case of an external student, the Principal Supervisor normally shall be from the academic staff of the school supporting the work and at least one Associate Supervisor shall be from the sponsoring organisation.

6.4 At the end of each six-month period a student shall submit a report on the work undertaken to the Principal Supervisor and the Principal Supervisor shall submit a report to the Academic Board on the student’s work. This report shall be seen by the candidate before submission to the Academic Board.

7. Place and Conditions of Work
7.1 The research program must normally be carried out under supervision in a suitable environment in Australia.

7.2 The Academic Board shall not admit a candidate to undertake a program of research based at the University unless it has received a statement from the Head of School and/or the Director of the Centre in which the study is proposed that, in his/her opinion, the applicant is a fit person to undertake a research program leading to the master degree, that the program is supported, and that the School/Centre is willing to undertake the responsibility of supervising the applicant’s work.

7.3 The Academic Board shall not admit a candidate to undertake a research program based at a sponsoring establishment unless it has received:

☐ a statement from the employer or director of the sponsoring institution that the applicant will be provided with facilities to undertake the research project and that he/she is willing to accept responsibility for supervising the applicant’s work, and
a statement from the Head of School or the Director of the Centre in which the
study is proposed that, in his/her opinion, the applicant is a fit person to undertake a
research program leading to the master degree, that the program is supported, and
that after examination of the proposed external facilities and supervision, the
school is willing to accept the responsibility of supervising the work.

8. Thesis
8.1 In the form of presentation, availability and copyright, the thesis shall comply with
the provisions of the document Requirements for Presenting Theses.
8.2 Not later than six months after commencement of Stage 2 the candidate shall submit
the title of the thesis for approval by the Academic Board. After approval has been
granted, no change shall be made except with the permission of the Academic Board.
8.3 The candidate shall give two months’ notice of intention to submit the thesis. Such
notice shall be accompanied by the appropriate fee, if any.
8.4 The thesis shall comply with the following requirements:
☐ a significant portion of the work described must have been carried out subsequent
to initial registration for the degree
☐ it must describe a program of work carried out by the candidate, and must involve
either an original contribution to knowledge or an original application of existing
knowledge
☐ it must reach a satisfactory standard of literary presentation
☐ it shall be the candidate’s own account of the work. Where work is carried out
jointly with other persons, the academic board shall be advised of the extent of the
candidate’s contribution to the joint work
☐ the thesis shall not contain as its main content any work or material which the
student has previously submitted for another degree or similar award
☐ supporting documents, such as published papers, may be submitted with the thesis
if they have a bearing on the subject of the thesis, and
☐ the thesis shall contain an abstract of not more than 300 words.
8.5 Except with the specific permission of the Academic Board the thesis must be
presented in the English language. Such permission must be sought at the time of
application for registration, and will not be granted solely on the grounds that the
candidate’s ability to satisfy the examiners will be affected adversely by the requirement
to present the thesis in English.
8.6 Subject to QUT’s Intellectual Property policy, the copyright of the thesis is vested in
the candidate.
8.7 Where a candidate or the sponsoring establishment wishes the thesis to remain
confidential for a period of time after completion of the work, application for approval
must be made to the Academic Board when the thesis is submitted. The period of
confidentiality normally shall not exceed two years from the date on which the examiners
recommend acceptance of the thesis, during which time the thesis will be held on
restricted access in the QUT Library.

9. Examination of Thesis
9.1 The Academic Board shall appoint at least two examiners, of whom at least one shall
be from outside the University. Normally examiners will be required to agree to read and
report upon the thesis within two months of its receipt.
9.2 A candidate may be required to make an oral defence of the thesis.

9.3 On receipt of satisfactory reports from the examiners, and when the provisions of 7.1 have been fulfilled, the Academic Board shall recommend to Academic Committee that the candidate be awarded the degree.

9.4 If the examiners' reports are conflicting, the Academic Board may, after appropriate consultation with the Principal Supervisor, seek advice from a further external examiner.

9.5 If, on the basis of the examiners' reports, the Academic Board does not recommend that the degree be awarded then it shall:
- permit the student to resubmit the thesis within one year for re-examination, or
- cancel the student's registration.

- Master of Applied Science (Medical Physics),
  Master of Applied Science (Medical Ultrasound) (PH80)

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time (plus Summer School)

Total Credit Points: Medical Physics (192) Medical Ultrasound (204)

Standard Credit Points/Full-Time Semester: 48

Course Coordinators:
Medical Physics Major – Dr Timothy van Doorn
Medical Ultrasound Major – Associate Professor Brian Thomas

Assistant Coordinator: Medical Ultrasound Major – Ms Margo Harkness

Entry Requirements

MEDICAL PHYSICS MAJOR
To be eligible to enrol for the Medical Physics Major, an applicant must have completed an acceptable tertiary course with a major in Physics.

Applicants with other qualifications (e.g., Engineering) may be enrolled subject to the approval of the Head, School of Physics. In some instances, a bridging program may be necessary.

MEDICAL ULTRASOUND MAJOR
To be eligible to enrol in the Medical Ultrasound Major, an applicant will normally be qualified as a diagnostic radiographer (or medical imaging technologist) at degree or diploma level and have had a minimum of two years’ experience as a practising radiographer.

Applicants with other qualifications (e.g., in paramedical or physical sciences), or with other appropriate experience, may be permitted to enrol subject to the approval of the Head of Department, School of Physics. In some instances, a bridging program may be necessary.

Course Requirements

MEDICAL PHYSICS MAJOR
To complete Stage 1, students must complete subjects selected from the list below, totalling 96 credit points. Subjects MSN158, PHN157, PHN257, PHN357, PHN352,
PHN354, PHN155, PHN156 are not available to students in the Medical Physics Major. PHN154 and PHN353 are not recommended to students in the Medical Physics Major.

MEDICAL ULTRASOUND MAJOR
To complete Stage 1, students must complete subjects selected from the list below, totalling 108 credit points. Subjects PHN157, PHN257 and PHN357 are compulsory for students in the Medical Ultrasound Major. Subject PHN402 is not available to students in the Medical Ultrasound Major.

On successful completion of Stage 1 of either major:

(i) students with GPA <5 will normally graduate with a GradDipAppSc (Medical Physics or Medical Ultrasound); (however, the Head of School may grant permission for such students to to continue to Stage 2); while

(ii) students with GPA >5 will be permitted to:
(a) graduate as above, or
(b) continue with Stage 2 (which is a further one-year full-time or equivalent) involving a project leading to the award MAppSc.

**Note:** A student may request an extension of time in which to submit the project report for assessment. A request for an extension of time up to a maximum of six months shall be made in writing through the Head of School to the Dean. Any request for a further extension, or any request for an extension to a date later than six months after the original due date, shall be made in writing to the Academic Board. The Academic Board may grant the extension under such conditions as it may consider appropriate, or may award the student a ‘Fail’ result in the project subject.

A student who has received a ‘Fail’ result in the project subject may re-enrol in the subject only in exceptional circumstances and with the express permission of the Academic Board.

The program in Medical Physics commences in February each year. The program in Medical Ultrasound commences in July each year. Applications for both programs are to be made prior to 8 November in the preceding year.

Medical Ultrasound students undertake Stage 1 second semester subjects in their first semester of enrolment, and Stage 1 first semester subjects in their second semester of enrolment.

### Master of Applied Science (Medical Laboratory Science) (LS85)

**Location:** Gardens Point campus

**Course Duration:** 3 years part-time

**Total Credit Points:** 144

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Dr David J. Allan

**Entry Requirements**

NORMAL ENTRY
Applicants shall hold a Bachelor of Applied Science (or equivalent) in the appropriate discipline for which they are seeking admission and shall normally have had at least one year of appropriate work experience in the discipline for which they are seeking admission.

Applicants may be required to attend an interview with the Head of School and/or Course Coordinator to establish suitability for entrance into the course.

* Subject extends over two semesters.
+ Subject extends over four semesters.
SPECIAL ENTRY
Applicants who do not hold the specific tertiary qualification required of normal entrants may be admitted upon successful completion of a qualifying program prescribed by the Head of School.

Special Course Requirement
There is a student intake into the Medical Laboratory Science Major every second year. It is expected that there will be an intake into the part-time course in 1993.

Students should consult the Course Coordinator regarding their programs.

Students must select two disciplinary specialisation electives in Year 3, Semesters 1 and 2.

The project (dissertation) is carried out in the laboratory. The employer’s written permission is required.

Graduate Diploma in Applied Science (SC71)

No enrolments are accepted directly into this course. For details see Course Rules for Master of Applied Science (SC80) (paragraph 4.2).

Graduate Diploma in Applied Science (Medical Physics), Graduate Diploma in Applied Science (Medical Ultrasound) (PH71)

No enrolments are accepted directly into this course. For details see Course Rules for Master of Applied Science (Medical Physics); Master of Applied Science (Medical Ultrasound) (PH80).

Graduate Diploma in Biotechnology (LS70)

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Dr Peter Timms

Entry Requirements

NORMAL ENTRY
To be eligible for entry to the Graduate Diploma in Biotechnology an applicant must have completed an appropriate degree or diploma in a relevant science area.

SPECIAL ENTRY
Applicants who do not hold the tertiary qualifications required for normal entry may be eligible for admission if they have completed a diploma or degree in another appropriate non-science area as determined by the Head of School, and are employed in the biotechnology area.

The full-time course is the part-time course (over two years) condensed into one year.

■ Policy on Credit Transfer, relating to Bachelor-level courses in the Faculty of Science

FROM INCOMPLETE BACHELOR-LEVEL SCIENCE COURSES
Students transferring to a bachelor’s degree course offered by the Faculty of Science at QUT from a comparable, partially completed course in a recognised institution may be granted credit towards the QUT award. In general, credit will be granted pro rata; for example, 96 credit points of credit normally will be granted for each year of full-time study (or its equivalent) completed successfully at the other institution. The maximum credit which may be granted is 192 credit points.

Each application for credit towards a Faculty of Science award will be considered individually, on its merits. Students who have completed successfully a year or more of full-time study (or its equivalent) at another institution nevertheless may be required to undertake specific first-level subjects at QUT. Also, to satisfy the relevant QUT degree rules, some students may have to gain credit totalling more than 288 credit points.

FROM COMPLETED ASSOCIATE DIPLOMA COURSES
Students entering a bachelor’s degree course offered by the Faculty of Science at QUT following successful completion of a relevant Associate Diploma course from a recognised institution may be granted credit towards the QUT award. The maximum credit which may be granted is 96 credit points.

Unless the Dean determines otherwise, the credit will be granted as provisional credit. To have the credit confirmed, the student undertakes in the QUT course a program of study of at least 48 credit points and attains a grade point average of not less than 4.0. If, at the conclusion of such a course of study, the student’s grade point average is less than 4.0, the Dean shall determine both the extent to which credit granted conditionally may be retained and the student’s subsequent program of study in the course.

■ Bachelor of Applied Science (Honours) (SC60)

One year honours programs in Biology, Chemistry, Geology, Mathematics and Medical Physics.

Location: Gardens Point campus

Course Duration: 1 year full-time, 2 years part-time

Total Credit Points: 96

Standard Credit Points/Full-Time Semester: 48
Course Coordinators:
Biology Major – Dr Alan Bailey
Chemistry Major – Dr John Bastley
Geology Major – Associate Professor David Gust
Mathematics Major – Associate Professor Helen MacGillivray
Medical Physics Major – Mr Ross Dunlop

Entry Requirements
To be eligible for admission, students should have completed the University’s Bachelor of Applied Science (SC30 or MA34) or equivalent and should have attained a grade point average (GPA) of at least 5.0 over that degree, including grades of at least credit in all subjects directly relevant to the proposed honours program. Application for admission should normally be made at the end of the final year of the pass degree, or within 18 months of completing that degree.

Applicants who do not satisfy the above conditions but who have demonstrated outstanding performance in only the final year of a degree, or whose application is based on other factors including work experience or involvement in research, may be admitted at the discretion of the Dean.

Please note that for the Mathematics major, other degrees with major studies in Mathematics (including Statistics) may provide suitable entry to the program.

Course Structure
The honours program is comprised of 96 credit points. The course structure may vary slightly from one student to another, depending on the program and particular subjects chosen.

Part-time candidates undertake annually approximately half of the full-time program. Classes are held at the same times as for full-time students and thus may involve some day release.

Students should consult the Coordinator concerning the availability of subjects and selection of subjects for their major.

Course Structure
The general course structure is:

Information Retrieval Skills 4 credit points
Advanced Topics 28 credit points (min)
Complementary Studies 16 credit points (max)
Project 48 credit points (max)

### Bachelor of Applied Science with Majors in Biology, Chemistry, Microbiology/Biochemistry, Geology, Mathematics, Physics (SC30)

**Location:** Gardens Point campus  
**Course Duration:** 3 years full-time, 6 years part-time  
**Total Credit Points:** 288  
**Standard Credit Points/Full-Time Semester:** 48

*Subject extends over two semesters.*
**Course Coordinator:** Dr Don Field

**Course Rules**

1. A student may enrol as either a full-time or a part-time student. A full-time student is one who is enrolled in 36 or more credit points per semester. A part-time student is one who is enrolled in less than 36 credit points in the semester.

2. All commencing students and certain continuing students are required to attend scheduled academic advising sessions to plan their progression through the course, and to obtain the approval of an academic adviser prior to effecting any change of enrolment.

3. Students are normally expected to complete the course in minimum time. A full-time student enrolls in an average of 48 credit points per semester for six semesters and a part-time student enrolls in an average of 24 credit points per semester for 12 semesters.

4. To fulfill the requirements for the award of the degree, a student must complete subjects totalling at least 288 credit points, comprising major and minor studies, and supporting subjects.

Major and minor studies are defined in terms of the discipline and the academic level at which subjects are offered:

(i) A major must be completed in one of the following discipline areas - biology, chemistry, microbiology/biochemistry, geology, mathematics, physics. Completion of a major consists of passing subjects totalling at least 120 credit points from the second and third schedules, including a minimum of 48 credit points at third level. The general requirements for each major are set out in Table 1.

(ii) A minor may be completed in any approved discipline within the University. Completion of a minor consists of passing subjects totalling at least 48 credit points from the second and third levels, and including at least 24 credit points at third level. Major and minor studies may be undertaken in the same or in closely related discipline areas.

5. A registered student who has successfully completed the equivalent of the first and second years of the standard full-time course, normally with a GPA of not less than 4.5 overall, may, at the discretion of the Cooperative Education Program Coordinator, undertake the Cooperative Education Program.

This involves 10-12 months of paid full-time employment in an approved industrial/commercial environment during which time the student is enrolled in the subject SCB100 Cooperative Education. On completion of the approved cooperative education placement the student resumes formal studies.

**Notes on the Rules**

(i) First, second and third level subjects are defined, respectively, to be those listed in the first, second and third schedules to the course rules. In general, it is expected that a second level subject will have one or more first level prerequisite subjects. Similarly, a third level subject is likely to have one or more second level prerequisite subjects. The subject schedules are shown in Table 2.

(ii) Instead of the major and minor requirement described in Rule 3, students may, in special circumstances and with the written approval of the Dean, undertake two majors or a major and two minors.

**Table 1 - General requirements for majors**

The subjects and specifications listed are the minimum requirements for completion of a major in each discipline.

Cooperative Education Program
A registered student who has completed the equivalent of the first and second years of the standard full-time course, normally with a GPA of not less than 4.5 overall, may, at the discretion of the Cooperative Education Program Coordinator, undertake the Cooperative Education option. This involves 10-12 months of paid full-time employment in an approved industrial/commercial environment during which time the student is enrolled in the subject SCB100 Cooperative Education. On completion of the approved cooperative education placement the student resumes formal studies.

**Note:** Third level Chemistry, Geology, Mathematics and Physics subjects will be restructured to 12 credit points subjects commencing 1993.
# Bachelor of Applied Science (Applied Chemistry) (CH32)

**Location:** Gardens Point campus

**Course Duration:** 3 years full-time, 6 years part-time

**Total Credit Points:** 288 (minimum)

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinator:** Mr Eric O'Reilly

Bachelor of Applied Science (Mathematics) (MA34)

Location: Gardens Point campus

Course Duration: 3 years full-time, 6 years part-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mr Clif Bothwell

Course Requirements

A student selects subjects from the list given below, having regard to specified prerequisites and co-requisites, and must complete:

(i) all subjects from List A;
(ii) at least 36 credit points from List B;
(iii) at least 144 credit points from Lists C and D with at least 48 credit points from List D;
(iv) a minimum of 288 credit points.

* Subject extends over two semesters.

+ It is not intended that all Chemistry Elective units will be offered. Those units offered in any one year will be determined by student demand.

**Cooperative Education Program**

A registered student who has completed the equivalent of the first and second years of the standard full-time course, normally with a GPA of not less than 4.5 overall, may, at the discretion of the Cooperative Education Program Coordinator, undertake the Cooperative Education option.

This involves 10-12 months of paid full-time employment in an approved industrial/commercial environment during which time the student is enrolled in the subject SCB100 Cooperative Education. On completion of the approved Cooperative Education placement the student resumes formal studies.
Bachelor of Applied Science (Medical Laboratory Science) (LS36)

Location: Gardens Point campus

Course Duration: 3 years full-time, 6 years part-time

Total Credit Points: 288

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Miss Pam Stallybrass

Professional Recognition
Graduates are immediately eligible for graduate membership of the Australian Institute of Medical Laboratory Scientists and will have completed the academic requirements for admission as associate members.

Special Course Requirement
Students in the part-time program should be aware that they are required to attend much of their program during the day.

From 1992, students in this course is required to undertake a 2-4 week work experience program in a practising pathology laboratory. This takes place at the end of the second year full-time and in a suitable vacation period during the part-time program. This is a requirement for the subject LSB480 Professional Practice.

### Associate Diploma in Applied Science (Biology), Associate Diploma in Applied Science (Chemistry) (SC10)

**Location:** Gardens Point campus

**Course Duration:** 2 years full-time, 4 years part-time

**Total Credit Points:** 192

**Standard Credit Points/Full-Time Semester:** 48

**Course Coordinators:**
- Biology Major – Dr Chris King
- Chemistry Major – Dr Graham Smith

### Full-Time Course Structure (Semester 1 common to both Majors)

OR
Any other approved Elective

* Students should discuss their choice of electives with the Course Coordinator.
+ Students in appropriate employment may claim exemption from this subject.
Notes: Students in the Biology Major may apply to have their current employment arranged and assessed in lieu of one or more electives. In such cases, the employer, in consultation with the Head of Department, nominates an honorary supervisor to collaborate with a departmental tutor. Under such an arrangement students are required to maintain a work log and complete such exercises and assignments as required.

Students in the Biology Major with relevant technical experience may seek total or partial exemption from one or more of the elective subjects of the course.

Students participate in excursions and field work where these form part of the curriculum. Occasionally field work may be scheduled at weekends or during University recess periods.

Students who commenced the course prior to 1988 should consult the Course Coordinator concerning requirements to complete the course.

**Associate Diploma in Clinical Techniques with Electives in Laboratory Techniques and Anaesthetic Techniques (LS15)**

Location: Gardens Point campus

Course Duration: 2 years full-time, 4 years part-time

Total Credit Points: 192

Standard Credit Points/Full-Time Semester: 48

Course Coordinator: Mrs Anne Pope

**Professional Recognition**

LABORATORY TECHNIQUES ELECTIVES

This program is recognised by both the Commonwealth and State Governments as a suitable employment qualification. Graduates from this program are recognised by the Australian Institute of Medical Laboratory Scientists and are eligible to become intermediate members of this professional body.

ANAESTHETIC TECHNIQUES ELECTIVES

This program is endorsed by the Faculty of Anaesthetists.

**Special Course Requirements**

Students may undertake the course on a full-time or part-time basis. Part-time students are required to attend lectures during normal working hours.

Students entering the course may undertake to specialise in either: Laboratory Techniques (Electives in Group A), or Anaesthetic Techniques (Electives in Group B). To be awarded the Associate Diploma in Clinical Techniques, a student must complete all the subjects in either the prescribed program.

Students undertaking the Anaesthetic Techniques Electives may be exempted from whole or part of a subject on providing evidence of training and experience acceptable to the Head of School.

ANAESTHETIC TECHNIQUES PROGRAM
Students wishing to study the second year of the full-time course in a part-time program should consult the course coordinator.

* This subject for Laboratory Techniques Program only.
Policy on Submission of Project Reports for Assessment

The Science Academic Board has approved the following rules with regard to the completion of project subjects in all undergraduate and postgraduate courses (including honours projects):

(i) A student enrolled in a project subject is required to submit the associated project report, dissertation or thesis for assessment by no later than the final day of the examination period for the semester in which the student’s enrolment in that subject will terminate.

(ii) In special circumstances and on the written recommendation of the student’s supervisor, the Dean may grant an extension of time to complete the work associated with the project. The final date for submission of the report after such an extension shall be the last day of the deferred examination period for the semester in which the student’s enrolment in that subject would terminate. In such cases, a ‘V’ result shall be given initially to the student in respect of this subject.

(iii) The Academic Board may grant a further extension of time to complete the work associated with a project, on condition that the student re-enrols in the project subject for the succeeding semester. Failure to re-enrol in the project subject by the last day of the deferred examination period for the semester in which, otherwise, the student’s enrolment in that subject would terminate will result in a grade of Fail (N) being awarded in that subject.

Subsequent to the assessment process, the relevant school or department shall have discretion as to whether a candidate needs to re-enrol to effect any amendments required, or whether such amendments are essentially editorial. However, a student who is required to undertake further investigative work relating to his/her project must continue to be enrolled in the relevant project subject.

Students seeking extensions are advised that late submission of a project report for assessment as indicated in (ii) above may prevent publication of the associated result in time for the student to be included on the graduation list for that semester. Thus, course completion and graduate status from the relevant course may be delayed. This could disadvantage students seeking employment or promotion on the basis of the qualification in question.
INDEX OF COURSES

University-wide and Interfaculty Courses
- Doctor of Philosophy (IF49) .................................................. 137
- Master of Applied Science (Research) .................................... 144

Subject Synopses
SUBJECT SYNOPSES

This section provides synopses of the subjects offered in the ‘Academic Programs’ section of this Handbook. Additional subjects to those listed may be available as a specialised electives. For the Faculty of Business these are listed separately commencing on page 721. Details of other subjects can be obtained from the appropriate faculty or school.

The synopses are presented in alpha-numeric order according to their codes.

Subject coding and numbering

The subject code is of the format XXX999. The first two characters indicate the faculty or school administering the subject. The third character indicates the level of the course in which the subject is normally taught.

Level Indicators

X = Certificate, Associate Diploma, Diploma
B = Degree
P = Graduate Diploma
N = Masters Degree
R = Doctoral
D = Diploma*
A = Associate Diploma

(all schools except Engineering)*
T = Associate Diploma in Engineering*
S = Special Subjects

* Codes to be phased out as existing QUT courses are reaccredited.
Prerequisite and co-requisite subjects
For definitions of the terms prerequisite and co-requisite subject(s) refer to Rule 1.8.2 of the Student Rules, Policies and Procedures in this Handbook.

[R] = Repeat-requisite; the prerequisite or co-requisite requirements may be satisfied by attempting the subject — a passing grade is not essential. A student is deemed to have attempted the subject if all assessment requirements have been attempted when registered for the subject. If failed, the repeat-requisite must be repeated at the first opportunity.

<tr>
<td>AAB001</td>
<td>RESEARCH PROJECT 1</td>
<td>Students undertake a substantial piece of supervised research after academic advisement. In some cases this might include practical work and associated seminars.</td>
<td>48</td>
<td></td>
</tr>
<tr>
<td>AAB020</td>
<td>RESEARCH PROJECT 2</td>
<td>Students undertake a substantial piece of supervised research after academic advisement. In some cases this might include practical work and associated seminars.</td>
<td>48</td>
<td></td>
</tr>
<tr>
<td>AAB021</td>
<td>ADVANCED RESEARCH METHODS</td>
<td>Familiarisation with a range of (mostly) quantitative methodological tools. Methodologies selected, to a certain extent, to meet the requirements of the students in question.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB023</td>
<td>ADVANCED READINGS IN AUSTRALIAN ART</td>
<td>Examination of contemporary matters to do with Australian art practice and the Australian art context. Articulation of the Australian situation with international trends.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB051</td>
<td>ARTS IN SOCIETY</td>
<td>Images of the artist in various cultures; aesthetic modes (music, dance, drama, visual arts); functions of the arts (ritual, celebration, revolt); the role and place of the arts in contemporary Australian society.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB052</td>
<td>SIGNS &amp; MEANINGS</td>
<td>Concepts of the sign advanced by Saussure and Peirce; how signs are organised into codes or rule-governed systems; how these systems depend on agreement amongst their users and how they rest upon a shared cultural background; how signs interact with the cultural and personal experience of the user (Barthes' notions of connotation, myth and symbol; Jacobson's metaphor/metonymy dichotomy); the function of ideology particularly in relation to the ideas advanced by Raymond Williams and Barthes.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB100</td>
<td>COMPOSITION 1</td>
<td>Introduction to the domain of composition, providing a sound grounding in contemporary approaches to dance making including: developing a personal movement language and an investigation of how dance presents/creates meaning.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB101</td>
<td>DANCE KINESIOLOGY &amp; ALIGNMENT</td>
<td>The anatomical structure and alignment techniques, their function and application to increase dance technique facility and lessen dance injuries.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB102</td>
<td>CONTEMPORARY TECHNIQUE 1</td>
<td>The basic contemporary dance vocabulary; study of Graham, Cunningham or Limon Technique with particular reference to development of strength, flexibility and placement of spine and limbs. Basic combinations of movements; analysis of dance sequences.</td>
<td>7.5 per week</td>
<td></td>
</tr>
<tr>
<td>AAB103</td>
<td>CLASSICAL TECHNIQUE 1</td>
<td>Review and consolidation of the fundamental technique and its application designed to reinforce and develop an appropriate range of technical skills within the four-tier practical level system.</td>
<td>6 per week</td>
<td></td>
</tr>
<tr>
<td>AAB104</td>
<td>MUSIC</td>
<td>Elements of music: concepts of beat, accent, rhythm and phrasing; study of nineteenth and twentieth century musical styles; notation, score reading, vocal and improvisation studies.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB105</td>
<td>DANCE ANALYSIS &amp; HISTORY 1</td>
<td>Introduction to the analysis of dance through a concentration on the dance as art; a study of various historical contexts of dance as art. Focus on ballet.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB106</td>
<td>DANCE ANALYSIS &amp; HISTORY 2</td>
<td>Introduction to the analysis of dance through a concentration on the dance as text; a study of various historical contexts of dance as art. Focus on modern/contemporary dance.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB107</td>
<td>CONTEMPORARY TECHNIQUE 2</td>
<td>Technical work including off-balance turns and rapid changes of weight, level and direction; exploration of rhythm. Continued emphasis on performance of sequence work.</td>
<td>4.5 per week</td>
<td></td>
</tr>
<tr>
<td>AAB108</td>
<td>CLASSICAL TECHNIQUE 2</td>
<td>Consolidation of technique; study of variety of selected approaches to classical ballet and development of appropriate range of technical skills within the four-tier practical level system.</td>
<td>3 per week</td>
<td></td>
</tr>
<tr>
<td>AAB109</td>
<td>PRACTICUM</td>
<td>Consolidation of the student's knowledge and skills in direct artistic experience in real contexts.</td>
<td>4.5 per week</td>
<td></td>
</tr>
<tr>
<td>AAB110</td>
<td>COMPOSITION &amp; PRODUCTION TECHNIQUES</td>
<td>The conceptual base of the medium and of the heuristic principles governing the making of dance; exploration of more formal dynamic, temporal and spatial structures, deemed historically appropriate as a means of structuring movement and conveying a choreographer's intention. Study and practice in elements of theatre production; lighting, sound and costume.</td>
<td>5 per week</td>
<td></td>
</tr>
<tr>
<td>AAB111</td>
<td>DANCE RESEARCH</td>
<td>Practical training in scholarly methods and professional skills.</td>
<td>2 per week</td>
<td></td>
</tr>
<tr>
<td>AAB112</td>
<td>HISTORY OF AUSTRALIAN THEATRE DANCE</td>
<td>A study of the development of dance as an art form in Australia in the twentieth century.</td>
<td>3 per week</td>
<td></td>
</tr>
</tbody>
</table>
AAB113 WRITINGS ON DANCE
Strategies for reading and writing exposition and argument with emphasis on clarity of expression and presentation of thought.
Prerequisites: AAB111 and AAB114
Credit Points: 12 Contact Hours: 2 per week

AAB114 DANCE IN AUSTRALIAN SOCIETY
The ritual, artistic and social functions of dance in contemporary Australian society.
Prerequisite: AAB031
Credit Points: 12 Contact Hours: 3 per week

AAB115 PROFESSIONAL DEVELOPMENT STUDIES
Preparation for the dance industry; preparation of curriculum vitae and funding applications; auditions; contracts; press relations and management.
Credit Points: 8 Contact Hours: 2 per week

AAB116 DANCE IN THE COMMUNITY
Introductory studies of dance in the community; exploring the role of dance in the community; procedures for establishing a dance project; basic program planning and teaching approaches for community dance.
Credit Points: 12 Contact Hours: 3 per week

AAB117 DANCE IN EDUCATION
Study of philosophy of the arts in education and of dance in particular; role and profile of an arts educator; investigation of domains involved in arts learning.
Credit Points: 16 Contact Hours: 3 per week

AAB118 DANCE INDEPENDENT STUDY
Students are required to design and carry through a major program on their own initiative after negotiation and consultation with lecturing staff.
Credit Points: 16

AAB119 JAZZ & FOLK DANCE
A study of jazz and folk dances - their historical and cultural contexts, incorporating practical experiences and analytical knowledge of dance fashions in a social context.
Credit Points: 12 Contact Hours: 3 per week

AAB151 CONTEMPORARY TECHNIQUE 1
The basic contemporary dance vocabulary (contraction, release); study of Graham Technique with particular reference to development of strength, flexibility and placement of spine and limbs.
Credit Points: 12

AAB152 CONTEMPORARY TECHNIQUE 2
Continuation of AAB102. Basic combinations of movements; analysis of dance sequences.
Prerequisite: AAB102
Credit Points: 12

AAB153 ADVANCED PERFORMANCE 1
Attainment of outstanding practical skills combining use of aesthetic quality and artistry.
Prerequisite: Grade of 6 or 7 in AAB102 and AAB103.
Credit Points: 20

AAB154 ADVANCED PERFORMANCE 2
Continuation of AAB153.
Prerequisite: AAB113
Credit Points: 36

AAB155 ADVANCED ANALYSIS 1: BALLET
The skills involved in the aesthetic appreciation and analysis of the masterworks of ballet.
Co-requisite: AAB111 and AAB114
Prerequisites: Grade of 5 or above in AAB105 and AAB112.
Credit Points: 12 Contact Hours: 3 per week

AAB156 ADVANCED ANALYSIS 2: MODERN DANCE
The aesthetic appreciation and analysis of the masterworks of modern dance.
Co-requisite: AAB113
Prerequisite: Grade of 5 or above in AAB105 and AAB112.
Credit Points: 12 Contact Hours: 3 per week

AAB157 ADVANCED ANALYSIS 3: COMPARATIVE STUDY
The skills involved in the aesthetic appreciation and analysis of the masterworks of ballet or modern dance used to engage in a comparison of various features of specific dances chosen for detailed study.
Prerequisite: Grade of 5 or above in AAB105, AAB155 or AAB156.
Credit Points: 12 Contact Hours: 1 per week

AAB158 ADVANCED COMPOSITION 1
Exploration of how dance creates meaning; the aesthetic questions that have emerged out of the last major choreographic movement; an exploration of possible future directions.
Co-requisite: AAB107
Credit Points: 8 Contact Hours: 5 per week

AAB159 ADVANCED COMPOSITION 2
Contact improvisation and its use as a basis for the development of partner work; the range of traditional and non-traditional forms available to the choreographer when working with groups of varying sizes.
Co-requisites: AAB155 and AAB158
Credit Points: 12 Contact Hours: 5 per week

AAB160 ADVANCED COMPOSITION 3
The links between technology and dance in the areas of light and sound - the principal elements of dance design; a major individual project that involves the application and integration of a range of technological devices/processes.
Co-requisites: AAB156 and AAB159
Credit Points: 12 Contact Hours: 5 per week

AAB161 DANCE IN THE COMMUNITY 1
Indepth studies in teaching dance; program planning and teaching approaches for specific dance groups.
Prerequisite: AAB116
Credit Points: 16 Contact Hours: 3 per week

AAB162 DANCE IN THE COMMUNITY 2
Students are required as a group to initiate, devise, develop and produce a dance within the community with the emphasis on management skills.
Prerequisite: AAB161
Credit Points: 16 Contact Hours: 3 per week

AAB163 DANCE IN THE COMMUNITY 3
Students are required to individually initiate, devise, develop and produce a dance project within the community with the emphasis on the creativity and production of the project.
Prerequisite: AAB162
Credit Points: 16 Contact Hours: 3 per week
AAB164 DANCE ELECTIVE
Students are required to select topics for further study in consultation with the Course Coordinator.
Credit Points: 8

AAB202 ACTING 1
Stanislavski: exercise work in realistic acting in order to eliminate bad habits and theatrical dishonesty. Realism: acting classes involving selected extracts from a modern realistic play, finding the playwright's truth, development of appropriate interpretive acting skills; Brecht: lectures and practice on distancing techniques.
Credit Points: 8 Contact Hours: 4 per week

AAB203 ACTING 2
Focus on Shakespeare; work on verse, small scenes and soliloquies.
Prerequisite: AAB202
Credit Points: 12 Contact Hours: 4 per week

AAB204 VOICE & MOVEMENT 1
Body awareness; sense of space; breathing; expression and articulation; text and context; research.
Credit Points: 8 Contact Hours: 4 per week

AAB205 VOICE & MOVEMENT 2
Awareness through movement; freeing the natural voice; development of holistic response to text; exploration of physical and emotional levels in characterisation; review of research relative to the study of voice and movement; alternative teaching styles; comparative analysis and personal synthesis.
Prerequisite: AAB204
Credit Points: 8 Contact Hours: 3 per week

AAB206 STAGECRAFT 1
Scenery construction; stage properties: budget and purchase procedures, hiring and borrowing, categorisation, storage and use; stage lighting: electricity, rigging and focusing of lanterns, maintenance and repairs, operating principles; stage costumes: hire of costumes, principles of pattern styling, use of sewing machine, fabric construction, the use of fabrics to create costumes.
Credit Points: 8 Contact Hours: 4 per week

AAB207 STAGECRAFT 2
Theatre sound: the need for sound effects, use of live and recorded effects, use of stage sound equipment. Stage management: the range of stage management tasks, the role the stage manager in coordinating and enhancing theatre production. Basic lighting design: use of colour and lighting angles, painting with light, computer controlled equipment, stage lighting organisation and documentation. Theatre administration: funding applications, front-of-house organisation, systems of ordering, purchasing, petty cash.
Credit Points: 8 Contact Hours: 4 per week

AAB208 ELEMENTS OF DRAMA
Minimal drama: fiction plus tension; the three dimensions of expression: light/dark, movement/stillness, sound/silence; the three elements of dramatic form: space, time, communication; symbols and meaning: distance from the action; from ideas to communication.
Credit Points: 12 Contact Hours: 4 per week

AAB209 INTRODUCTORY THEATRE STUDIES
An introduction to shaping the theatrical event as director, designer, playwright.
Credit Points: 8 Contact Hours: 4 per week

AAB211 DEVELOPMENT OF THEATRE 1
Origins of theatre: Greek drama/theatre; medieval theatres in Europe; theatre of the English Renaissance; theatre of the Italian Renaissance; royal theatre of France and England; England's popular theatre of the nineteenth century.
Credit Points: 8 Contact Hours: 3 per week

AAB212 DEVELOPMENT OF THEATRE 2
Realism: naturalism; symbolism/expressionism; epic theatre; absurd; current theatre; south-east Asian theatre; Australian theatre to World War II; Australian theatre; community theatre.
Prerequisite: AAB211
Credit Points: 8 Contact Hours: 3 per week

AAB213 DIRECTING
Functions of the director from casting to rehearsal to performance; organisation procedures and relationship to other production staff; the director’s role as intermediary between text, actor and audience; differing definitions of that role; personal style: seminars on contemporary directors.
Prerequisite: AAB209
Credit Points: 8 Contact Hours: 3 per week

AAB214 DRAMA PROCESS
Workshops involving individual, face-to-face and group roleplay; participant enrolment, leader-in-role and intervention; identification with role; negotiation, devising and consequent decision making; the operation and management of dramatic tension and resolution: structuring for the theme and for the dramatic moment; distancing devices; reflection, re-enactment and remaking.
Prerequisite: AAB208
Credit Points: 8 Contact Hours: 3 per week

AAB215 DESIGN
Establishing the scene; staging alternatives; lighting and scenery; costume design; scale models and drawings.
Prerequisite: AAB208
Credit Points: 8 Contact Hours: 3 per week

AAB216 PLAYWRITING
Dramatic structure: tension, climax and resolution; focus and audience distance; fitting an appropriate style to a dramatic theme; the relationship between action, theme and character; developing a scenario; imagery: the relationship between the visual and the linguistic; dramatic writing, dialogue and staging.
Prerequisite: AAB209
Credit Points: 8 Contact Hours: 3 per week

AAB217 ARTS RESEARCH & EVALUATION 1
Accessing and collation of pertinent resources, critical observation techniques; case study methods.
Credit Points: 12 Contact Hours: 3 per week

AAB218 ARTS RESEARCH & EVALUATION 2
Study of a major play in production (or other project involving performance) from one particular frame of reference.
Prerequisite: AAB217
Credit Points: 8 Contact Hours: 2 per week

AAB219 PROFESSIONAL STUDIES
Theatre and Australian society; funding and status of Australian theatre; different manifestations: professional, amateur, community; historical patterns; models of initiatives in theatre; designing for a com-
munity need; preparing a curriculum vitae; job applications, meeting procedures.
Credit Points: 12  Contact Hours: 3 per week

■ AAB220 THEATRE STUDIES OPTION
Specialised work in one of the theatre studies areas: directing, design, playwrighting or theatre in education, or a related area by negotiation.
Credit Points: 8  Contact Hours: 2 per week

■ AAB225 PRACTICUM 1
Students are provided with an opportunity to practise as artists within a specific community and to participate in an artistic/advocacy project in the community. Elective studies influence the emphasis of the practicum, which involves one of the three main communities identified: artistic, public, institutional.
Credit Points: 12

■ AAB226 PRACTICUM 2
See AAB225.
Prerequisite: AAB225
Credit Points: 12

■ AAB227 PRACTICUM 3
See AAB225.
Prerequisite: AAB226
Credit Points: 8

■ AAB241 VOICE 1
The psychological and physiological underpinning of the voice; structure of texts; development of voice and speech; development of an introductory training program.
Prerequisite: AAB205
Credit Points: 8  Contact Hours: 2 per week

■ AAB242 VOICE 2
The structure of blank verse; the development of English; importance of individual words and sounds in written and spoken texts; the use of performance space; development of voice and speech.
Prerequisite: AAB241
Credit Points: 8  Contact Hours: 2 per week

■ AAB243 VOICE 3
Development of advanced vocal techniques; development of audition materials.
Prerequisite: AAB242
Credit Points: 8  Contact Hours: 2 per week

■ AAB244 VOICE 4
Development of advanced vocal techniques; development of audition materials suitable for a variety of venues.
Prerequisite: AAB243
Credit Points: 8  Contact Hours: 2 per week

■ AAB245 MOVEMENT
Physical theatre genres: Asian forms including Kabuki, Noh, Koltakali; European forms including Greek, Commedia, Restoration. Movement arts: stage combat, T'ai Chi; acrobatics and tumbling.
Prerequisite: AAB205
Credit Points: 8  Contact Hours: 4 per week

■ AAB246 MUSIC & DANCE
Physical skills including: elongation of the spine; movement from the centre; alignment; articulation; opposition; lift and placement; basic combinations of locomotor movements; elements of dance; style, performance skills. Aural comprehension and notation of rhythm and pitch; vocal technique; principles of style.
Credit Points: 12  Contact Hours: 3 per week

■ AAB247 ACTING 3
Study of differing philosophies of theatre and their relation to performance; exercises, research and practical work on selected texts. Introduction to acting for the camera.
Prerequisite: AAB203
Credit Points: 12  Contact Hours: 4 per week

■ AAB248 ACTING 4
Research, rehearsal and performance.
Prerequisite: AAB247
Credit Points: 16  Contact Hours: 4 per week

■ AAB249 DANCE STYLES
A range of dance styles and their corresponding conceptual and historical bases; performance skills; performance abilities.
Prerequisite: AAB246
Credit Points: 8  Contact Hours: 2 per week

■ AAB250 THEATRE PRODUCTION
Specific major tasks of acting or management duties for two or more productions by the drama program, requiring a high level of personal responsibility.
Credit Points: 36

■ AAB261 THE ARTS ENVIRONMENT
Introduction to the context for performing arts management; economics of the arts; formation of national and state arts policy; interplay amongst arts organisations and related fields of endeavour like the media, the education system, business and recreation.
Credit Points: 12  Contact Hours: 3 per week

■ AAB262 ARTS FINANCE
Planning and monitoring the use of money in the arts, including the preparation of funding submissions in non-profit situations.
Credit Points: 12  Contact Hours: 2 per week

■ AAB263 ARTS MARKETING
General principles of marketing; the marketing plan; applications in performing arts situations; planning, targeting, costing and implementation up to point of sale contact in the front of house.
Credit Points: 12  Contact Hours: 3 per week

■ AAB264 PERFORMING ARTS PROMOTIONS
Publicity, public relations and advertising in the arts context. Practical skills for low-budget operations.
Credit Points: 8  Contact Hours: 2 per week

■ AAB265 ISSUES IN ARTS MANAGEMENT
Fundraising and sponsorship; law and the arts; issues and selected current issues, eg. multiculturalism, tourism.
Credit Points: 12  Contact Hours: 3 per week

■ AAB266 PRODUCTION PLANNING
Opportunity for students to apply the theory and practice learnt in other subjects to production situations; the planning and initial preparations for productions being undertaken in theatre production.
Credit Points: 8  Contact Hours: 2 per week

■ AAB281 TECHNICAL ASPECTS OF DESIGN
Analysis of text for design purposes — set, costumes and props; adapting to space; the influence of particular staging systems on design choices; scale drawings and models; lighting and the set.
Credit Points: 8  Contact Hours: 2 per week
AAB282 LIGHTING 1
Design theory; lighting control; communication in the production team.
Prerequisite: AAB207
Credit Points: 8 Contact Hours: 2 per week

AAB283 LIGHTING 2
Advanced theory; procedures and planning; current practice.
Prerequisite: AAB282
Credit Points: 8 Contact Hours: 3 per week

AAB284 STAGE MANAGEMENT 1
Coordination; pre-production planning; rehearsals; the bump in; technical rehearsal.
Prerequisite: AAB207
Credit Points: 12 Contact Hours: 2 per week

AAB285 STAGE MANAGEMENT 2
Wardrobe management and stage props management. Elementary design, working drawings/patterns, construction techniques and general maintenance.
Credit Points: 12 Contact Hours: 4 per week

AAB286 STAGE MANAGEMENT 3
Advanced practical stage management exercises including production management and tour management and planning.
Credit Points: 12 Contact Hours: 2 per week

AAB287 THE STAGE SET
Interpreting working drawings; costing and materials selection; safety procedures; construction.
Prerequisite: AAB207
Credit Points: 8 Contact Hours: 3 per week

AAB288 SOUND 1
Design theory; sound control; communication in the production team.
Prerequisite: AAB207
Credit Points: 12 Contact Hours: 3 per week

AAB302 CHILDREN'S PLAY TO PERFORMANCE
The function of children's dramatic play, role taking and fantasy in social development from ages 1 to 18.
Credit Points: 8 Contact Hours: 3 per week

AAB303 THEATRE IN EDUCATION
The defining characteristics of theatre-in-education and participatory theatre forms; skills in group leadership, negotiation of ideas and forms, planning and conducting drama events; dynamics of leadership including management of space, time, energy levels and group rhythms.
Credit Points: 8 Contact Hours: 3 per week

AAB304 FORMING KNOWLEDGE
The approaches to art taken by major aestheticians; the characteristics and significance of the aesthetic field; the way the arts contribute to the development of mind and knowledge; various modes of knowing, including propositional knowledge and tacit understanding.
Credit Points: 8 Contact Hours: 3 per week

AAB305 ADVANCED DRAMA PROCESS
The nature of experiential drama; pace and time; shape and externals; reflection and refraction; evaluation; devising process drama.
Credit Points: 8 Contact Hours: 3 per week

AAB321 ADVANCED DESIGN 1
Research project on the origins and development of design and theatre; practical design involvement in a drama production.
Prerequisite: AAB215
Credit Points: 12

AAB322 ADVANCED DESIGN 2
Analysis of the philosophy and practice of a specific designer; assignment to a major production as assistant designer.
Prerequisite: AAB321
Credit Points: 12

AAB323 ADVANCED DESIGN 3
Secondment as designer or associate designer to a professional, amateur or community theatre project (approximately 7 weeks).
Prerequisite: AAB322
Credit Points: 24

AAB324 ADVANCED DIRECTING 1
Research project on the origins and development of the role of the director; practical work assisting the director of a production.
Prerequisite: AAB213
Credit Points: 12

AAB325 ADVANCED DIRECTING 2
Analysis of the philosophy and practice of a major director; assignment to a major production as assistant director.
Prerequisite: AAB324
Credit Points: 12

AAB326 ADVANCED DIRECTING 3
Secondment as director or associate director to a professional, amateur or community theatre project (approximately 7 weeks).
Prerequisite: AAB324
Credit Points: 24

AAB327 ADVANCED PLAYWRITING 1
Secondment to a major production within or outside the University as dramaturg (researcher and interpretative consultant); Scriptwriting project.
Prerequisite: AAB216
Credit Points: 12

AAB328 ADVANCED PLAYWRITING 2
Study of a selected scriptwriting style. A major playwrighting project in any dramatic medium.
Prerequisite: AAB327
Credit Points: 12

AAB329 INDEPENDENT STUDY: DRAMA
Students are required to devise an outline of study and/or action after negotiation and consultation with lecturing staff and carry out the approved program with regular tutorial consultation.
Credit Points: 24

AAB410 ART CURRICULUM DESIGN & DEVELOPMENT
An overview of major art curriculum approaches as found in the literature and a variety of art syllabus support documents. Analysis of art curriculum planning models; design and development of art programs for schools; production of art resources to support curriculum.
Credit Points: 12 Contact Hours: 3 per week

AAB411 DRAMA ACROSS THE CURRICULUM
Processed models of curriculum applied to drama method; drama methods for the classroom; dramatic contexts and power in the classroom; content analysis and planning; implementation of lesson sequence based on dramatic action; preparation of curriculum materials. Compulsory study school for external students.
Credit Points: 12 Contact Hours: 3 per week
AAB421 FOUNDATION ART STUDIES
Participation in the process of solving broad ranging visual problems through developing ideas, recording information and forming solutions to visual problems. The subject seeks to develop genuine enquiry and the attainment of appropriate levels of competence of techniques, materials and resources to bring ideas to fruition.
Credit Points: 12 Contact Hours: 4 per week

AAB422 PAINTING/DRAWING/FIBRE STUDIES
Aesthetic and media competencies in painting/drawing/fibre studies.
Credit Points: 12 Contact Hours: 6 per week

AAB423 COMPUTER GRAPHICS/INTERMEDIA STUDIES
Aesthetic and media competencies in computer graphics and intermedia studies.
Credit Points: 8 Contact Hours: 4 per week

AAB424 CERAMIC/SCULPTURE STUDIES
Aesthetic and media competencies in ceramic and sculpture studies; an understanding of ceramic and sculpture art forms within historical and cultural contexts.
Credit Points: 8 Contact Hours: 4 per week

AAB425 PHOTOGRAPHY/PRINTMAKING STUDIES
Aesthetic and media competencies in photography and printmaking studies.
Credit Points: 8 Contact Hours: 4 per week

AAB426 ADVANCED DISCIPLINE STUDY 1 - 2D STUDIES
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 2 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 2 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB427 ADVANCED DISCIPLINE STUDY 2 - 2D STUDIES
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 2 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 2 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB428 ADVANCED DISCIPLINE STUDY 1 - 3D STUDIES
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 3 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 3 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB429 ADVANCED DISCIPLINE STUDY 2 - 3D STUDIES
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 3 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 3 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB430 ADVANCED DISCIPLINE STUDY 1 - IMAGING IN TECHNOLOGY
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 3 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 3 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB431 ADVANCED DISCIPLINE STUDY 2 - IMAGING IN TECHNOLOGY
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 3 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 3 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB432 ADVANCED DISCIPLINE STUDY 1 - INTERMEDIA STUDIES
Development of individual practice in the visual arts. Undertaking of projects within and outside the studio with a view to understanding the relationships between the historical, cultural, aesthetic and productive aspects of 3 dimensional visual art forms. Development of a personal philosophical basis for art practice; professional attitudes and innovative thinking; research into the knowledge and resources available to the 3 dimensional artist; development of the ability to evaluate aesthetic qualities in student's own work.
Credit Points: 12 Contact Hours: 3 per week

AAB433 ART CURRICULUM & TEACHING STUDIES 1
Builds on CUB301 to give a greater understanding of the nature of art as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8 Contact Hours: 3 per week

AAB434 ART CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this cur-
curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: AAB434
Co-requisites: CUB302, EDB302
Credit Points: 12 Contact Hours: 3 per week

AAB436 ART CURRICULUM &
TEACHING STUDIES 3

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.
Prerequisites: AAB434, AAB425, CUB302
Credit Points: 8 Contact Hours: 3 per week

AAB437 DRAMA CURRICULUM &
TEACHING STUDIES 1

Builds on CUB301 to give a greater understanding of the nature of drama as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8 Contact Hours: 3 per week

AAB438 DRAMA CURRICULUM &
TEACHING STUDIES 2

Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: AAB437
Co-requisites: CUB302, EDB302
Credit Points: 12 Contact Hours: 3 per week

AAB439 DRAMA CURRICULUM &
TEACHING STUDIES 3

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.
Prerequisites: MDB356, MDB357, CUB302
Credit Points: 8 Contact Hours: 3 per week

AAB440 VISUAL AWARENESS &
COMMUNICATION

Psychological reactions to being visually aware; classifying explanatory diagrams/pictures as educative symbols; aesthetic response; interpretation of personal vision; strategies for designing visual messages; analysis, visual exploration and interpretation of painting, sculpture, advertising; the environment and the action and reaction of the viewer.
Credit Points: 12 Contact Hours: 3 per week

AAB442 HISTORY OF AUSTRALIAN ART

Development of Australian art since its human settlement 40,000 years ago; the visual arts since European settlement, contemporary Western and Aboriginal art.
Credit Points: 12 Contact Hours: 3 per week

AAB443 PHOTOGRAPHY AS VISUAL ART

Exploration of the art potential of the camera and darkroom processing; the photograph as art; creation of art photography, manipulation of photographic images; the history and emergence of photography as an art form; the study of eminent photographers.
Credit Points: 12 Contact Hours: 3 per week

AAB444 VISUAL ARTS OF ASIA

As a reflection of the maker's culture, the visual arts of Asia provides one means of understanding these diverse cultures. Historical backgrounds, philosophical beliefs and trade have influenced the symbolism, forms, techniques and uses of these various artefacts. Development of an understanding and awareness of non-western art forms.
Credit Points: 12 Contact Hours: 3 per week

AAB445 CLAY MATERIALS

The development of ceramic knowledge, concepts and technical skills related to both practical and artistic considerations; an investigation of selected historical ceramic eras; understanding the relationship between ceramics and the maker's culture; development of personal imagery and design through a variety of construction, decoration and firing procedures.
Credit Points: 12 Contact Hours: 3 per week

AAB446 PAINTING STUDIES

Exploratory work in space, form, colour and mass; foundations and implications of contemporary directions in painting; criticism and analysis.
Credit Points: 12 Contact Hours: 3 per week

AAB447 DRAWING

Examination of established systems of drawing by historical reference and exploration of materials; methods by which shape and volume can be determined by drawing techniques; the line as a means of expression and communication; methods and techniques for creating solid form by the use of various media; perspective; rendering; perceptual organisation and expressive effects; use of drawing for teachers who require visual expression and delineation within their areas. Incompatible with Art major at Diploma of Teaching (Secondary Art) level.
Credit Points: 12 Contact Hours: 3 per week

AAB449 EDUCATIONAL DRAMA

Practical introduction to educational drama techniques available to all teachers: teacher-in-role, enrolment of students, dramatic exercises, analogies, simulations; fieldwork project; planning, teaching and evaluating a simple program. Incompatible with tertiary studies in drama or substantial experience in teaching drama.
Credit Points: 12 Contact Hours: 3 per week

AAB450 STUDIES IN GRAPHIC
PRINTMAKING

Exploration of the three areas of printmaking: relief, intaglio and planographic; practice and research relative to the aesthetic, technical and design values of printmaking.
Credit Points: 12 Contact Hours: 3 per week

AAB451 FIBRE CONSTRUCTION

Practical studies of fibre and fabric construction with a focus on historical and contemporary media, utilisation of fibre/textile materials and processes to develop contemporary 3 dimensional objects.
Credit Points: 12 Contact Hours: 3 per week
Investigation of the practical application of designs on fabric including indigo dyeing, shibori, batik; block printing; screen printing with particular emphasis on the interpretation of contemporary designs.

Credit Points: 12  Contact Hours: 3 per week

Operational procedures; exploration of software; processing characteristics and applications; image generation; capture and recording; animation; presentation and authoring systems; computers and society.

Credit Points: 12  Contact Hours: 3 per week

The role of drawing and the preparation of 3 dimensional design both as a point of reference, stimulus or source, and as working drawings, work with a variety of media; development of programs suitable for implementation in the school situation.

Prerequisite: Studies in art at Diploma of Teaching level or equivalent experience.

Credit Points: 12  Contact Hours: 3 per week

Development of a strong and reliable technique, interpretation and performance skills on the chief practical instrument or voice; performance seminar; participation in performance activities; recital.

Credit Points: 16  Contact Hours: 2 per week

Exploration of established and new repertoire on the chief practical instrument or voice. Continued development of technique, together with the acquisition of analytical and interpretive skills; participation in performance activities; performance seminar, recital. Instrumental or vocal ensemble.

Prerequisite: AAB500

Credit Points: 16  Contact Hours: 2 per week

Consolidation and extension of studies from AAB501; performance seminar, participation in performance activities; open recitals.

Prerequisite: AAB501

Credit Points: 16  Contact Hours: 2 per week

Group tuition on an orchestral instrument; basic performing technique. Directed ensemble activities including membership of instrumental or vocal ensemble, together with one other elective ensemble.

Credit Points: 12  Contact Hours: 6 per week

Group tuition on an orchestral instrument; development of performing technique. Directed ensemble activities including membership of instrumental or vocal ensemble, together with one other elective ensemble.

Credit Points: 12  Contact Hours: 6 per week

Group tuition on an orchestral instrument; further development of performing technique. Directed ensemble activities including membership of instrumental or vocal ensemble, together with one other elective ensemble.

Credit Points: 12  Contact Hours: 6 per week

Aural perception skills; development of vocal sight reading and performance skills; training the musical memory; solfege; dictation; aural analysis.

Credit Points: 12  Contact Hours: 3 per week

Continuation from work begun in AAB506; performance of music in parts; harmonic analysis; transcription of melodies by ear.

Prerequisite: AAB506

Credit Points: 8  Contact Hours: 2 per week

Keyboard techniques; sight reading in a variety of keyboard styles; basic improvisation skills, including harmonisation of melodies, transposition.

Credit Points: 8  Contact Hours: 2 per week

Overview of major twentieth-century popular music styles including blues, jazz and rock music. Writing techniques, including original composition and performance.

Credit Points: 8  Contact Hours: 4 per week

Theatre and concert music to 1950. Literature and history: an examination of the major composers and selected major compositions from the first half of this century. Writing techniques corresponding to the styles studied in the literature segments; individual and group-generated compositions.

Prerequisite: AAB506

Credit Points: 8  Contact Hours: 2 per week

Theatre and concert music from the present day. Electronic and computer music, aleatoric and minimalist techniques; the return to tonality.

Credit Points: 8  Contact Hours: 4 per week

Development of special skills and knowledge in one of the following: choral arranging and conducting, instrumental arranging and conducting, introduction to non-western music.

Credit Points: 8  Contact Hours: 2-4 per week

Development of special skills and knowledge in one of the following: choral arranging and conducting, instrumental arranging and conducting, introduction to non-western music, music in the theatre 1600-1900.

Credit Points: 8  Contact Hours: 2-4 per week

Development of special skills and knowledge in one of the following: choral arranging and conducting, instrumental arranging and conducting, popular music composition, introduction to principles and practices of teaching.

Credit Points: 8  Contact Hours: 2-4 per week

Development of special skills and knowledge in one of the following: choral arranging and conducting, instrumental arranging and conducting, popular music composition 2, music in the theatre 1600-1900, introduction to music research, independent study, studio music teaching.

Credit Points: 8  Contact Hours: 2-4 per week
- AABS16 SYSTEMS OF PART WRITING 1
  Writing of modal and tonal melodies; two-part techniques; functional harmony and voice leading techniques; diatonic harmony.
  Prerequisite: Literacy in notation, key, rhythm. Knowledge of basic chord structures and progressions.
  Credit Points: 12  Contact Hours: 2 per week

- AABS17 SYSTEMS OF PART WRITING 2
  Chromatic harmony; nineteenth and twentieth century writing techniques.
  Prerequisite: AABS16
  Credit Points: 12  Contact Hours: 2 per week

- AABS18 LITERATURE & ANALYSIS OF MUSIC 1
  Late Renaissance and Baroque music; development of research and analysis skills; special emphasis on fugue, binary and ritornello forms as found in keyboard, instrumental and vocal music of the period.
  Prerequisite: AABS17
  Credit Points: 8  Contact Hours: 4 per week

- AABS19 LITERATURE & ANALYSIS OF MUSIC 2
  Music in the classical era; development of research and analytical skills; the classical sonata principle as found in the symphony, sonata, concerto and opera genres of the period.
  Prerequisite: AABS18
  Credit Points: 8  Contact Hours: 4 per week

- AABS20 LITERATURE & ANALYSIS OF MUSIC 3
  Romantic and impressionist music; development of research and analytical skills; forms studied include the lied, symphony, orchestral music, instrumental and keyboard music, and music drama.
  Prerequisite: AABS19
  Credit Points: 8  Contact Hours: 4 per week

- AABS51 POPULAR MUSIC COMPOSITION 1
  Introduction to computer music, synthesiser, MIDI sequencing, music publishing and recording studio techniques.
  Prerequisite: Consent of the lecturer.
  Credit Points: 8  Contact Hours: 3 per week

- AABS52 POPULAR MUSIC COMPOSITION 2
  Principles and analysis of popular song structure, harmony and presentation. Aural analysis of popular repertoire and norms of the genre.
  Prerequisite: AABS51
  Credit Points: 8  Contact Hours: 3 per week

- AABS53 POPULAR MUSIC COMPOSITION 3
  Composition for film, television and the media using MIDI systems and computer/video time-code formats, including semiotic analysis of music for film.
  Prerequisite: AABS52
  Credit Points: 16  Contact Hours: 3 per week

- AABS54 POPULAR MUSIC COMPOSITION 4
  Continued use of MIDI systems in a personal composition project, focusing on multi-media presentational forms; time management and collaborative work; live performance project.
  Prerequisite: AABS53
  Credit Points: 12  Contact Hours: 3 per week

- AABS55 IMPROVISATION
  Aural analysis of harmonic progressions; acquisition of a repertoire of jazz/pop standards for improvisation purposes; improvisation on chief instrument and in the ensemble situation.
  Prerequisite: AABS506
  Credit Points: 12  Contact Hours: 3 per week

- AABS56 POPULAR MUSIC: SOCIOLOGY, Attitudes, APPLICATIONS
  Understanding popular culture; relationship between popular culture and art forms; roles of the media; critical study of popular music genres.
  Prerequisite: AABS505
  Credit Points: 8  Contact Hours: 2 per week

- AABS57 ENSEMBLE STUDIES P1
  Group tuition on an orchestral instrument; basic performing technique. Directed ensemble activities including membership of pop ensemble, together with one other elective ensemble. Keyboard musicianship as appropriate to the popular music genre.
  Credit Points: 16  Contact Hours: 7 per week

- AABS58 ENSEMBLE STUDIES P2
  Group tuition on an orchestral instrument; development of performing technique. Directed ensemble activities including membership of pop ensemble, together with one other elective ensemble. Aural musicianship as appropriate to the popular music genre.
  Credit Points: 16  Contact Hours: 7 per week

- AABS701 THE MAKING OF MODERNISM
  The birth of modern art from French Impressionism to the eve of the World War 2; the major movements and their theoretical underpinnings.
  Credit Points: 12  Contact Hours: 4 per week

- AABS702 FOUNDATION MEDIA STUDIES 1
  Familiarisation with resources available within and outside the University: exhibition spaces, working environments, institutions, the materials and tools of art-making facilities, printed and visual resources; individual and group projects introducing a variety of visual art problems.
  Credit Points: 24  Contact Hours: 18 per week

- AABS703 FOUNDATION MEDIA STUDIES 2
  Development of a visual dialogue through a series of projects within and outside the studio with a view to understanding relationships between the theoretical and practical aspects of art and developing a philosophical basis for professional attitudes and original thinking; research into the knowledge and resources available; development of the ability to evaluate aesthetic qualities in the student's own work.
  Prerequisite: AABS702
  Credit Points: 36  Contact Hours: 18 per week

- AABS704 ART SINCE 1945
  Major developments in the visual arts since 1945 with a particular examination of post-modernism; the role of the artist in contemporary society; the role of the media/art critic in shaping contemporary art practice.
  Prerequisite: AABS701
  Credit Points: 12  Contact Hours: 3 per week

- AABS705 PRACTICUM 1
  Four weeks work experience in visual arts related locations such as public and commercial galleries, conservation, State Library, Queensland Museum.
  Credit Points: 12
AAB706 PRACTICUM 2
Shared responsibility by graduating students for all aspects of their graduation exhibition.
Credit Points: 12

AAB707 ADVANCED MEDIA STUDIES 1
Students are expected to research their own personal directions, formulate and develop self-generated enquiry and demonstrate the acquisition of working methods, skills and knowledge required for the successful realisation of their concepts. Students present a program to the Course Coordinator which indicate specific studies in the 2 dimensional or 3 dimensional areas or a combination of these.
Prerequisite: AAB703
Credit Points: 24  Contact Hours: 18 per week

AAB708 ADVANCED MEDIA STUDIES 2
Students prepare and present a plan of studies based on their own specific interest; rigorous questioning of concept and artefact is required with the level of realisation and the ways in which media are used reflecting a high level of achievement. Further workshops in areas where the acquisition of skills is essential.
Prerequisite: AAB707
Credit Points: 24  Contact Hours: 12 per week

AAB709 ADVANCED MEDIA STUDIES 3
Students are expected to work independently demonstrating sound habits of research and sustained studio practice; skills developed in AAB703 and AAB707 should enable concepts to be expressed with confidence; intensive studio work to draw together the students' interest in the visual arts in general and their specific study in particular.
Prerequisite: AAB708
Credit Points: 24  Contact Hours: 12 per week

AAB710 ADVANCED MEDIA STUDIES 4
Independent work in preparation for an exhibition.
Prerequisite: AAB709
Credit Points: 24  Contact Hours: 12 per week

AAB711 AUSTRALIAN ART
Development of Australian art since its human settlement 40,000 years ago; the visual arts since European settlement, contemporary Western and Aboriginal art.
Credit Points: 12  Contact Hours: 3 per week

AAB712 CONTEMPORARY ART ISSUES
Current practices in the visual arts are addressed by analysing and interpreting original works on exhibition, in stockrooms and in studios. By means of lectures, discussions and analysis of artworks and readings, the individual's awareness of the conceptual, historical and philosophical contexts concerning artists and the artworks are heightened.
Credit Points: 12  Contact Hours: 3 per week

AAB713 RESEARCH METHODS SEMINAR
Training in the research and writing of a theoretical/historical dissertation. Compulsory elective for students intending to undertake Honours studies.
Credit Points: 24

AAB714 PROFESSIONAL STUDIES
Studio workshop management; business principles; legal principles; promotion and marketing.
Credit Points: 12  Contact Hours: 4 per week

AAB720 EXTENDED MEDIA STUDY 2
Extension of studio work in conjunction with AAB708.
Credit Points: 12  Contact Hours: 3 per week

AAB721 EXTENDED MEDIA STUDY 4
Extension of studio work in conjunction with AAB709.
Credit Points: 12  Contact Hours: 3 per week

AAB722 EXTENDED MEDIA STUDY 6
Extension of studio work in conjunction with AAB710.
Credit Points: 12  Contact Hours: 3 per week

AAB724 RENAISSANCE STUDIES
An investigation of aspects of western European art between 1300 and 1600. Topics include the historiography of the Renaissance, art and humanism, the development of perspective, iconography, patronage, portraiture, the status of the artist. These topics are considered through a study of painting, sculpture, architecture and appropriate literary sources.
Credit Points: 12  Contact Hours: 3 per week

AAB725 INTRODUCTION TO SOUTH-EAST ASIAN ART
Emphasises the influence of Buddhist and Hindu religions in the making of art in South-east Asia and by extension India, China and Japan. The influence of Islam in Indonesian art compared with that of the indigenous religions.
Credit Points: 12  Contact Hours: 3 per week

AAB901 ART EDUCATION
The nature of art within schools and society for the generation of principles for identifying, selecting and organising components into art programs which effectively develop responses within children at suitable stages of their development. Ranges of teaching strategies, art program models and resources related to the neophyte teachers' practical needs of structuring and sequencing learner experiences.
Credit Points: 8  Contact Hours: 3 per week

AAB902 VISUAL ARTS 1
These studies are structured to develop students' expressive and critical abilities through the exploration of visual problems within the parameters of available media. Based on the two broad clusters of 2 dimensional and 3 dimensional media, students resolve some predetermined visual problems through conventional and/or divergent responses. These responses are in terms of employing traditional and contemporary media.
Credit Points: 8  Contact Hours: 3 per week

AAB903 VISUAL ARTS 2
Greater familiarisation with selected media allows students to initiate, enhance and develop their own visual appreciation and responses. A key feature of this subject is the development of imagery suitable to the media selected. Detailed investigation of material processes, historical responses and contemporary approaches to visual stimuli and problems is undertaken.
Prerequisite: AAB902
Credit Points: 12  Contact Hours: 3 per week

AAB904 VISUAL ARTS 3
Develops the students' detailed understanding and technical competencies of their selected media through a combination of structured and student initiated programs. The fields of critical analysis and personal imagemaking are fostered and enhanced. Contemporary trends and issues in the selected media are a major feature of this subject.
Prerequisite: AAB903
Credit Points: 12  Contact Hours: 3 per week
AAB905 DRAMA EDUCATION
Through workshop and practical fieldwork students acquire a basic knowledge of the functions, scope and sequence of children's dramatic play. The growth of pro-social ability through role-taking in naturalistic social settings from ages 1-15 is observed and analysed. This background is contextualised through a practical exploration of a range of appropriate approaches to drama in the classroom.
Credit Points: 8 Contact Hours: 3 per week

AAB906 MUSIC EDUCATION 1
Awareness of the stages of music growth through a sequenced methodology including solfa and classroom choral studies with classroom instrument accompaniment. Modern approaches to teaching of recording in the classroom. Elements of rhythm, melody, form, harmony, style and expression form the basis of the approach.
Credit Points: 8 Contact Hours: 3 per week

AAB907 MUSIC EDUCATION 2
The study of the music curriculum at a more advanced level. Familiarity with the philosophy, objectives, content strategies and evaluation techniques of selected programs gives students a broad base on which they can design their own music programs. Creativity and practical skills develop through issues raised in studies of selected programs.
Prerequisite: AAB906
Credit Points: 8 Contact Hours: 3 per week

AAB909 PERFORMING ARTS 2
Having established a basic understanding of the elements common to all drama, students explore those specific to the dramatic-playing mode. Skills in planning and leading of those dramatic genres based around improvisatory approaches are acquired as students conduct a series of improvisation for their peers. Particular skills in the shaping of drama include those of leader-in-role, participant enrolment, negotiation, distancing devices and means of reflection.
Prerequisite: AAB908
Credit Points: 12 Contact Hours: 3 per week

AAB910 PERFORMING ARTS 3
The performance of a major choral work; analysis interpretation, style, techniques of conducting and rehearsing. Students select an historical topic for research and develop further techniques on composition or solo/ensemble performance.
Prerequisite: AAB909
Credit Points: 12 Contact Hours: 3 per week

AAB921 UNDERSTANDING ART
Practical and theoretical studies in the history and meaning of art and design, using drawing and design exercises as a personal means of coming to terms with the complexities of modern art.
Credit Points: 4 Contact Hours: 2 per week

AAB922 PAINTING & DRAWING
Pictorial exercises based on colour and form, involving extensive studio work, history or drawing, gallery visits and analytical criticism of drawings, experimental graphic processes.
Credit Points: 4 Contact Hours: 2 per week

AAB923 PRINTMAKING 1
Exploration of a wide range of printmaking devices: relief — preparation of a surface by addition (collage), and by subtraction (linoleum); intaglio — acetate, engraving, paper drypoint.
Credit Points: 4 Contact Hours: 2 per week

AAB924 SCULPTURE
Development of conceptual expression through 3 dimensional materials: clay, metal, leather and wood.
Credit Points: 4 Contact Hours: 2 per week

AAB925 THEATRE GAMES
Study of a wide variety of theatre and drama games for their intrinsic interest and to demonstrate the ways in which a leader may choose and run games with a group: game theory; game leadership style; group dynamics; game sequencing.
Credit Points: 8 Contact Hours: 2 per week

AAB926 COMMUNICATION THROUGH DRAMA
Voice and speech development; creative and developmental drama; interpretation of literature; group discussion techniques; oral skills of the classroom.
Credit Points: 8 Contact Hours: 2 per week

AAB927 CHILDREN'S THEATRE
Analysis of children's theatre, its techniques, aims and values; preparation and presentation of a production for children; organisation of a school's tour.
Credit Points: 8 Contact Hours: 2 per week

AAB929 DANCE CONDITIONING & FITNESS
Appreciating the body as a functional instrument and tool for expression through physical skills; understanding and using movement concepts in a variety of contexts; demonstrating spatial and rhythmic awareness; application of anatomical knowledge.
Credit Points: 4 Contact Hours: 2 per week

AAB931 NATIONAL & FOLK DANCE
Development of steps and styles of selected national and folk dances; understanding of cultural background of selected populations; investigation of costumes appropriate to selected population; demonstration of selected national and folk dances.
Credit Points: 8 Contact Hours: 2 per week

AAB932 PRACTICAL STUDIES B1 (EC)
Group tuition on a wind or brass instrument; basic performing techniques; ensemble experience (i.e., wind ensemble or stage band). Continues into second semester.
Credit Points: 4 Contact Hours: 3 per week

AAB933 PRACTICAL STUDIES B2 (EC)
Continuation from AAB932.
Credit Points: 4 Contact Hours: 3 per week

AAB935 GUITAR FOR BEGINNERS
Development of skill in playing basic guitar chords, strumming suitable rhythmic patterns and leading of group singing with guitar. Available only to beginners or those with little recent experience on guitar.
Credit Points: 4 Contact Hours: 1 per week

AAB936 PIANO FOR BEGINNERS
Introduction to the piano as a practical instrument for use in both recreational and classroom situations; sight reading; harmonisation. Available only to those with no previous experience on piano.
Credit Points: 4 Contact Hours: 1 per week

AAB937 CREATIVE MUSIC WORKSHOP
Musical improvisation and composition; exploration of sound; discrimination and organisation of sound; musical communication; integration with other artistic forms; media and technology; workshop performance; style and technique.
Credit Points: 4 Contact Hours: 2 per week
AAB938 EXPLORING MUSIC
Use of recorder, percussion instruments, voice, autoharp, movement and speech to develop a familiarity with music; building a vocabulary for understanding the language of music and movement.
Credit Points: 8  Contact Hours: 2 per week

AAN001 ARTS RESEARCH METHODS I
The role and processes of research in the arts; defining the research tradition; qualitative research; emerging arts research processes; reporting of research findings.
Credit Points: 12  Contact Hours: 3 per week

AAN003 AESTHETIC CODES IN CONTEMPORARY SOCIETY
An investigation of theories of art within the discipline of aesthetics. Five key questions are addressed, against a background of contemporary western society.
Credit Points: 12  Contact Hours: 3 per week

AAN004 GRADUATE SEMINAR
A seminar series for Honours and Masters students involving presentations by guests; in addition, staff discuss current research interests, and students report on issues arising in their own thesis work.
Credit Points: 12  Contact Hours: 3 per week

AAN200 DRAMATURGY
Students investigate the roles of dramaturgy in Western theatre. Major practical exercise as production dramaturgy on a current production.
Credit Points: 12  Contact Hours: 3 per week

AAN201 CONTEMPORARY AUSTRALIAN PLAYWRIGHTS
Students study a number of current Australian playwrights; seminar papers focus on each writer, with input from directors, actors and writers.
Credit Points: 12  Contact Hours: 3 per week

AAN202 TEXTUAL ANALYSIS
Students extend the analytical framework undertaken in AAN502 in the application to dramatic texts. This includes consideration of interaction of various codes within a dramatic text, historical and cultural factors, additional codes operating in a film version of a play text, and the semiotic codes operating in dramatic performance.
Credit Points: 12  Contact Hours: 3 per week

AAN700 CONTEMPORARY DEBATES ON THE NATURE OF ART
Contemporary trends in the visual arts, nationally or internationally. The effect of the information revolution, technology and changing modes of world government and their economic/marketing implications. The relationship between modernism and post-modernism. The development of new conventions and values. A broad sense of post-structuralist critical tools employed in visual analysis.
Credit Points: 12  Contact Hours: 3 per week

AAP420 THE ARTS CURRICULUM & TEACHING STUDIES A
A comprehensive philosophical and practical base enabling students to construct worthwhile learning experiences through, for and about the arts. There is specific reference to dance education, drama education, music education (primary and secondary) and visual arts education. The subject has two emphases. The first addresses the how and why looking at the inter-disciplinary capacity of these skills and understandings. The second addresses the what. Both are geared to the provision of productive and critical skills assisting students' orientation and integration into the teaching profession.
Prerequisite: Appropriate discipline studies in the undergraduate degree.
Co-requisite: EDP450
Credit Points: 24  Contact Hours: 6 per week

AAP421 DANCE CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: AAP420  Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

AAP422 DRAMA CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: AAP420  Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

AAP423 MUSIC CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: AAP420  Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

AAP424 VISUAL ARTS CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: AAP420  Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

AAP425 DRAMA CURRICULUM & TEACHING STUDIES C
This Curriculum B subject provides opportunities for students to critically examine and develop skills and understandings in significant areas of teaching and learning in drama. It provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

AAP426 MUSIC CURRICULUM & TEACHING STUDIES C
This Curriculum B subject provides opportunities for students to critically examine and develop skills and understandings in significant areas of teaching and learning in music. It provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week
AAP427 VISUAL ARTS CURRICULUM & TEACHING STUDIES
This Curriculum B subject provides opportunities for students to critically examine and develop skills and understandings in significant areas of teaching and learning in visual arts. It provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Co-requisite: EDP451
Credit Points: 12 Contact Hours: 3 per week

AAP501 ART CURRICULUM FOUNDATIONS
Overview and understanding of aims, content and agenda of historical and contemporary art education orientations; assumptions by movements in relation to art theories, child development, teachers' role and classroom practice; investigation of strengths and weaknesses, theory and practice and historical, social and intellectual influence on past and present art education philosophies.
Credit Points: 12 Contact Hours: 3 per week

AAP502 ART EDUCATION PROGRAM DESIGN & PRACTICE
Design and implementation of defensible art education programs at broad and specific school levels; examination of the learning outcomes of art activities; classroom practice and evaluation across all levels of schooling.
Prerequisite: AAP501
Credit Points: 12 Contact Hours: 3 per week

AAP503 CLAY MATERIALS 1
Develop ceramic knowledge, artistic concepts, and practical/technical skills; investigation of selected historical ceramic eras; understanding of the relationship between ceramics and the maker's culture; development of personal imagery and design.
Credit Points: 12 Contact Hours: 3 per week

AAP504 CLAY MATERIALS 2
Detailed specialisation in individually selected styles; emphasis on conceptual matters and imagery; expansion of ceramic knowledge and technical formats; investigation of contemporary trends, influences and issues in Australian ceramics.
Prerequisite: AAP503
Credit Points: 12 Contact Hours: 3 per week

AAP505 FIBRE ARTS 1
Investigation of both historical and contemporary textile media; development of technical and conceptual textile knowledge; utilisation of fibre/textile materials and processes to develop both 2 and 3 Dimensional textile artefacts/objects; the relationship between textile arts and selected cultures; particularly in relation to fashion design, individual development of design, construction and decoration techniques and textile imagery.
Credit Points: 12 Contact Hours: 3 per week

AAP506 FIBRE ARTS 2
Continuation of AAP505. Nature of fibres; fibre constructions; printing techniques suitable for fibre arts; embellishing fibre surfaces.
Credit Points: 12 Contact Hours: 3 per week

AAP507 PAINTING & DRAWING 1
Introducing and developing an active awareness of both historical and contemporary issues in painting and drawing through studio practice and tutorials; the knowledge and skills appropriate to the range of available media pursued in both studio classes and professional practice.
Credit Points: 12 Contact Hours: 3 per week

AAP508 PAINTING & DRAWING 2
Further development of traditional and experimental imagery through studio workshops, discussions and professional practice.
Credit Points: 12 Contact Hours: 3 per week

AAP509 PHOTOGRAPHIC MEDIA 1
Photographic processes; aesthetic aspects of photography; history of art and photography; personal approaches to photography.
Credit Points: 12 Contact Hours: 3 per week

AAP510 PHOTOGRAPHIC MEDIA 2
Continuation of AAP509. Photographic techniques; innovative approaches to photography; history of photography; personal approaches to photography.
Credit Points: 12 Contact Hours: 3 per week

AAP511 PRINTMAKING 1
Relief printmaking: raised and incised blocks in lino; wood and glued materials; intaglio printmaking - etching, engraving, dry point and aquatint; planographic printmaking; lithography, monoprints and transfer prints; stencil printmaking; silk screening with cut, draw and photographic stencils; presentation of prints.
Credit Points: 12 Contact Hours: 3 per week

AAP512 PRINTMAKING 2
Continuation of AAP511. Motivational sources; creation and external applications of techniques and media related to printmaking; exploration of related art areas.
Credit Points: 12 Contact Hours: 3 per week

AAP513 APPLIED STUDY IN ART EDUCATION
Supervised individual academic investigation of existing or innovative facets of art; art education or education displaying professional endeavours and/or reflection.
Credit Points: 12 Contact Hours: 3 per week

AAP514 CURRICULUM EVALUATION: ARTS EDUCATION
Awareness of historical perspective of curriculum evaluation; critically analyse dilemmas in contemporary modes of curriculum evaluation; evaluate an existing curriculum project.
Credit Points: 12 Contact Hours: 3 per week

AAP530 CURRICULUM ANALYSIS & MODIFICATION
Detailed study of six programs; teacher-devised programs; critical analysis; basic elements of curriculum design; design of programs in music for information and evaluation.
Credit Points: 12 Contact Hours: 3 per week

AAP531 ISSUES IN MUSIC EDUCATION
Developments in arts education in Queensland within P-10 framework; role of arts/music education; the process of learning that is critical in nature; contributions made by history, sociology, psychology and philosophy to arts education.
Credit Points: 12 Contact Hours: 3 per week

AAP532 STUDIES IN CURRICULUM
Study of movement, voice and classroom instruments and associated literature; writing and arranging music for classroom use; developing teaching strategies for
voice, movement and instrumental music, rehearsal and conducting techniques.
Credit Points: 12    Contact Hours: 3 per week

■ AAX533 BAROQUE & THE ROCOCO
Written and aural activities to improve musicianship; studies of Baroque and Rococo music literature, analysis, form, continuo; performance practice.
Credit Points: 12    Contact Hours: 3 per week

■ AAX534 CLASSICAL & ROMANTIC MUSIC
Interpret and perform work from Viennese/Romantic eras; understand musical forms and theory of these eras; compose short works.
Credit Points: 12    Contact Hours: 3 per week

■ AAX535 TWENTIETH CENTURY MUSIC
Use twentieth century rhythms through dictation, composition, improvisation and performance; explore overtone series; understand tone clusters; sound mass and aleatoric procedures; perform material from the twentieth century.
Credit Points: 12    Contact Hours: 3 per week

■ AAX101 COMPOSITION 1
Discussion and theoretical understanding of dance composition; practical exploration of skills essential for dance composition including: establishment of approach or theme, style of movement, patterning of movement, phrasing of steps, selection and structuring of completed dance segments.
Credit Points: 8    Contact Hours: 2 per week

■ AAX102 COMPOSITION 2
Discussion and investigation of dance forms; preparation and presentation of short solo and group sequences; practical experience in group dance through improvisation and set compositional studies; discussion and criticism of presented dance work; discussion of criteria for evaluation and assessment of dance works. Choreography of a work for public performance.
Prerequisite: AAX101
Credit Points: 8    Contact Hours: 2 per week

■ AAX103 MUSIC 1
Introduction to musical basics through aural and written theories.
Credit Points: 8    Contact Hours: 1.5 per week

■ AAX104 DANCE KINESIOLOGY & ALIGNMENT
Principles which govern human stability and motion; ways in which muscles work to produce dance movement; machines of the body; movement and dance injuries.
Credit Points: 12    Contact Hours: 3.5 per week

■ AAX105 DANCE STYLES 1
Study of folk dance, tap dance and jazz dance styles. Practical work includes: folk steps and dances from selected parts of the world; tap and jazz dance combinations and routines for performance.
Credit Points: 8    Contact Hours: 2 per week

■ AAX106 DANCE STYLES 2
Development of dancing and singing skills; composition of dance routines for choirs; dramatic aspects of music comedy; tap dance combinations and routines, study of character and jazz styles; practical work includes basic technique, step combinations, solo and group choreographic work.
Prerequisite: AAX105
Credit Points: 8    Contact Hours: 3 per week
ALB 100 ADMINISTRATIVE LAW
Principles of administrative law; discretionary powers of governments and their instrumentalities and the corresponding rights and obligations of business entities, viz dealing with the Australian Taxation Office or the Australian Securities Commission, freedom of information, administrative tribunals and remedies.
Prerequisite: ALB 110 or ALB 108
Credit Points: 12 Contact Hours: 3 per week

ALB 101 COMMERCIAL LAW
Commercial law: agency, bailment guarantees, cheques and other negotiable instruments, insurance and banking; aspects of partnerships and company law.
Prerequisite: ALB 107
Credit Points: 12 Contact Hours: 3 per week

ALB 103 FINANCIAL INSTITUTIONS LAW
The general processes of the legal system; legal structures of financial institutions, bank-customer relationship; Cheque Act, Credit Act, negligent advice.
Prerequisite: ALB 110
Credit Points: 12 Contact Hours: 3 per week

ALB 104 INDUSTRIAL LAW
The system of industrial law in Australia; the development and role of law in industrial relations; industrial relations legislation; common law; contract of employment and industrial torts.
Prerequisite: HRB 131
Credit Points: 12 Contact Hours: 3 per week

ALB 105 INTERNATIONAL BUSINESS LAW
Examination of the law governing the establishment and conduct of international business; business structures, international contracts, competing legal jurisdictions, international codes of conduct and an introduction to the taxation consequences of international business.
Prerequisite: ALB 110
Credit Points: 12 Contact Hours: 3 per week

ALB 107 LEGAL ENVIRONMENT OF BUSINESS
The major statutes of law affecting an individual's legal responsibilities that are acquired when a person attains the age of 18; current legislation affecting family relationships; the renting and/or buying of a house; relationships between employer and employee.
Credit Points: 12 Contact Hours: 3 per week

ALB 110 BUSINESS LAW
Australian legal and constitutional system; sources of law, including doctrines and methodology of the law; statutory interpretation; a study of the law of contract; introduction to the law of torts with emphasis on the tort of negligence; aspects of consumer protection.
Credit Points: 12 Contact Hours: 3 per week

ALB 111 COMMERCIAL & SECURITIES LAW
Specific types of contract: sales of goods, credit contracts, agency, bailment and insurance; aspects of the Trade Practices Act and negotiable instruments.
Prerequisite: ALB 110
Credit Points: 12 Contact Hours: 3 per week

ALB 120 COMPANY LAW & PRACTICE
The practical implementation of the accounting, auditing, meeting and managerial requirements of the Corporations Law; the outworking of the law relating to insolvent and financially troubled companies; company take-overs and share buy-backs and the protection of minority interests.
Prerequisite: ALB 122
Credit Points: 12 Contact Hours: 3 per week

ALB 121 INSOLVENCY LAW & PRACTICE
Nature and effects of insolvency and liquidation; a comparison of the tests of insolvency applicable to individuals, companies, partnerships and trusts respectively; rights of secured and unsecured creditors; duties and liabilities of liquidators, receivers, etc.; company shareholders' rights; distribution of property; liabilities of bankrupts, trustees and company officers.
Prerequisite: AYN 112, AYB 111, ALB 122
Credit Points: 12 Contact Hours: 3 per week

ALB 122 LAW OF BUSINESS ASSOCIATIONS
The law relating to the establishment, operation and dissolution of business associations; the forms of business associations; partnerships, joint ventures, trusts, companies and voluntary associations. A focus on companies, in particular, share capital prospectuses, directors' duties, incorporation and registration requirements.
Prerequisite: ALB 110
Credit Points: 12 Contact Hours: 3 per week

ALB 131 TAX PLANNING
General principles of tax practice; judicial, statutory and professional approaches to tax avoidance and evasion; structuring and restructuring business enterprises; tax planning for the employed person: current and retiring; implications of the Family Law Act.
Prerequisite: ALB 133
Credit Points: 12 Contact Hours: 3 per week

ALB 132 TAXATION LAW
Statutory framework; assessable income: general and specific; capital gains; trading stock; allowable deductions: general and specific; levy of income tax: all entities; fringe benefits tax.
Prerequisite: ALB 133
Credit Points: 12 Contact Hours: 3 per week

ALB 133 TAXATION OF BUSINESS ENTITIES
Partnerships, trusts, superannuation funds and companies; concessional treatment afforded specific classes of taxpayer; international taxation: introduction, administration and avoidance provisions; introduction to business taxes which are not applied to income.
Prerequisite: ALB 132
Credit Points: 12 Contact Hours: 3 per week

ALB 101 TAX PLANNING
Application of technical expertise in income tax and other revenue laws to specific tax planning situations including employment, retirement, investment, business and professional practice. Consideration is also given to the professional responsibilities of tax advisers.
Credit Points: 12 Contact Hours: 3 per week

ALB 102 ADVANCED TAXATION
A conceptual analysis of the Australian income tax system to give perspective and meaning to technical law. Some specific and complex practical problems raised by the Income Tax Assessment Act and related legislation are analysed in depth.
Credit Points: 12 Contact Hours: 3 per week
■ **ALN103 BUSINESS LAW & ETHICS**
Introduction to business law and to morality in the business context. Interpretation of statutes, law of torts, contract law, industrial law and the utility of business structures; morality in the business community; how morality works as an aspect of the business community, the origins of moral belief, and the motives which lead people to abide by what they believe to be morally right and to persuade others to do likewise. The functioning morality in society drawing on psychological, sociological and philosophical perspectives with special emphasis on business aspects of morality.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN104 COMMERCIAL LAW HONOURS**
Examination of the law, policy and practice of financial disclosure. The objectives are to give students the opportunity to obtain a detailed understanding of the rules governing the preparation and audit of financial information whether for annual accounts, experts' reports, or for use in prospectuses or take-overs. It examines the respective theories governing accountants, auditors' and directors' liabilities. Sources of law considered include the Corporations Law, the Australian Stock Exchange listing rules, accounting standards and the Common Law.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN105 INDIRECT TAXATION**
Examination of tax relevant to the conduct of a business other than taxes directly imposed on a taxpayer's income and capital gains. Specific taxes covered include sales tax, payroll tax, land tax, stamp duty, customs, excise duties and the training guarantee levy.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN106 INTERNATIONAL TAXATION**
Application of principles of Australian income tax law and practice to situations and transactions with an international element; measures to combat international tax avoidance.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN107 LIQUIDATIONS & RECEIVERSHIP**
Examination of the law and practice of corporate insolvency; comparisons between schemes of arrangement and reconstruction, receiverships and liquidation. Topics include: the rights of secured and unsecured creditors; rights of members and employees; duties and obligations of scheme administrators, receivers and liquidators; collection and distribution of assets; public examination; actions against company officers.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN109 SPECIAL TOPIC - COMMERCIAL LAW**
Examination of issues of great contemporary significance in the business law, company law and taxation areas. In particular, issues of management law, disclosure of information and the new conceptual framework for accounting and professional liability are likely to be the preferred topics in 1992.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN110 TAXATION POLICY HONOURS**
The Australian taxation system as it has evolved under the policy-making powers of the Australian Government. Generally accepted principles governing the formation of taxation policy are analysed and then reviewed in the light of the various tax reform initiatives adopted by the Government as a result of the recommendations of committees of enquiry into the taxation system over the past two decades.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN300 INSOLVENCY & RECONSTRUCTION (PY)**
Examination of the law and practice of corporate insolvency; comparisons between schemes of arrangement and reconstruction, receiverships and liquidation; the rights of secured and unsecured creditors; rights of members and employees; duties and obligations of scheme administrators, receivers and liquidators; collection and distribution of assets; public examination; actions against company officers.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN301 TAXATION 1 (PY)**
This subject prepares candidates enrolled in the Institute of Chartered Accountants Professional Year for the examination and workshops in the taxation module. Topics as prescribed by the Institute are covered in cursory fashion or in depth according to the particular knowledge level requirements specified.
Credit Points: 12  Contact Hours: 3 per week

■ **ALN302 TAXATION 2 (PY)**
A study program for candidates enrolled in the advanced taxation module in of the Institute of Chartered Accountants Professional Year. Topics prescribed by the Institute are covered in sufficient depth to meet the knowledge level requirements as specified in the module.
Credit Points: 12  Contact Hours: 3 per week

■ **ALP101 EMPLOYMENT LAW**
Understanding of institutions, doctrines and methodology of general and industrial law; analysis of employment relationships; common law contract of employment; workers' compensation; legal liability for industrial action; the structure of Federal and Queensland industrial relations laws.
Credit Points: 12  Contact Hours: 3 per week

■ **ALP102 INDUSTRIAL LAW**
An introduction to industrial law; detailed study of law relating to trade unions and employer organisations; current developments in industrial law.
Credit Points: 12  Contact Hours: 3 per week

■ **ALX100 AUSTRALIAN EMPLOYMENT LAW**
Australian legal systems; the Constitution and Federal powers; State legal institutions; the contract of employment; hiring practices and the law; law relating to dismissal and discipline; workers' compensation and occupational health and safety laws.
Credit Points: 12  Contact Hours: 3 per week

■ **ALX101 AUSTRALIAN INDUSTRIAL LAW**
Conciliation and arbitration laws; the Federal laws on dispute resolution, the Labor Court, special tribunals, State systems; functioning and regulation of industrial organisations and trade unions; laws relating to strikes and industrial disputes.
Credit Points: 12  Contact Hours: 3 per week

■ **ALX102 THE LEGAL PROCESS**
Law making process; judicial process; content of criminal, industrial and commercial law in the Australian Commonwealth and States; the Constitution and Federal laws; operation of courts.
Credit Points: 12  Contact Hours: 3 per week
ARB140 INTRODUCTORY DESIGN I
Mechanical drawing techniques; topics covered include: contour, texture and tone; depth perception, optical illusions and the principles of perspective; techniques of perspective drawing; organization of the visual field and the gestalt 'laws of pragnanz': pattern in two and three dimensions; visual interest and attention; visual dynamics; and principles of scale drawing.
Credit Points: 4  Contact Hours: 2 per week

ARB141 THE HUMAN ENVIRONMENT I
Basic understanding of the dimensions and movement of the human body, and of its perceptual systems, as an essential preliminary to the design of all artefacts for human use. Topics include: static and dynamic anthropometry; human sensory systems; introduction to ergonomics; applications of anthropometrics and ergonomics to design.
Credit Points: 4  Contact Hours: 2 per week

ARB151 INTRODUCTION TO TECHNOLOGY
Basic knowledge on applied technologies and how they relate to industrial products and systems. The lecture topics include: social and technological change in an historical context; the industrial society and the role of the designer; new technologies and social change; appropriate technologies and their implication design.
Credit Points: 2  Contact Hours: 1 per week

ARB161 LIGHT & COLOUR STUDIES
Colour vision, colour harmony and contrast, mixing and the application of colour, examination of a range of contemporary theories relating to the use of colour in design; and introduction to the study of the qualitative effects of lighting in form and colour in interiors. The physiological-psychological basis for colour relations and the range of techniques used to apply these theories in the design professions.
Co-requisite: ARB140
Credit Points: 8  Contact Hours: 2 per week

ARB191 THE HUMAN ENVIRONMENT I
The dimensions and movement of the human body as a perpetual system for human use; static and dynamic anthropometry; human sensory systems; introduction to ergonomics; applications of anthropometrics and ergonomics to design.
Credit Points: 4  Contact Hours: 2 per week

ARB193 DESIGN I
Design theory; design definition; perception; elements and principles of design; effects of colour, texture, contour, pattern; human dimensions; anthropometrics, elements of aesthetics. Graphics: descriptive geometry; architectural graphics and rendering; freehand drawing and sketching. Design projects: 2 dimensional and 3 dimensional objects; personal working and living space.
Credit Points: 10  Contact Hours: 5 per week

ARB194 DESIGN 2
See ARB193.
Credit Points: 10  Contact Hours: 5 per week

ARB195 TECHNOLOGY I
Credit Points: 2  Contact Hours: 1 per week

ARB196 TECHNOLOGY 2
See ARB193.
Credit Points: 2  Contact Hours: 1 per week

ARB197 HISTORY OF THE BUILT ENVIRONMENT I
The development of man's artificial environment and its relationship to ideas, technology, architecture and the fine arts from the earliest times to the present.
Credit Points: 2  Contact Hours: 1 per week

ARB198 HISTORY OF THE BUILT ENVIRONMENT 2
See ARB197.
Credit Points: 2  Contact Hours: 1 per week

ARB241 HISTORY OF THE BUILT ENVIRONMENT 2
A continuation of ARB197. History of the following from circa 1600 AD: ideas, art, and two of the following (one of which must be the student's major discipline) - town and country planning, landscape architecture, architecture, interior design, industrial design.
Credit Points: 10  Contact Hours: 5 per week

ARB251 ERGONOMICS FOR INDUSTRIAL DESIGNERS I
Psychomotor skills; human information processing; human-machine interfaces; displays, controls, and tools; human-machine system properties; feedback and controls; workplace design; noise; stress; vibration; legal aspect; safety and product liability. Practical exercises cover application of lecture topics to product design.
Credit Points: 2  Contact Hours: 2 per week

ARB261 INTRODUCTION TO INTERIOR TECHNOLOGY
Introduction to the elements of construction systems and construction materials; the development of skills in measuring, surveying and recording information on existing spaces in buildings. Lectures deal with basic structural systems and building envelope. Instruction is given in techniques of measuring and recording existing structures.
Co-requisite: PLB200
Credit Points: 8  Contact Hours: 3 per week

ARB288 DESIGN SCIENCE 2
Basic design for hot humid climates, principles governing air flow through and around buildings and space. Natural ventilation, introduction to air flow in cities. Testing of air flow through and around models. Basic design for hot arid climates and cold climates; macro and micro climatic conditions and their evaluation for design; manual and computerised climatic evaluation.
Credit Points: 2  Contact Hours: 1 per week

ARB289 DESIGN SCIENCE 1
The principles of science and their implications for the design of buildings and spaces; the application of these principles in the conceptual stages of design, laboratory tests and computer evaluations of design proposals. Quantity and quality of light; day lighting in buildings; manual and computerised projection of solar shadows. Testing of models on heliodon and artificial sky.
Credit Points: 2  Contact Hours: 1 per week
ARB290 INTRODUCTION TO COMPUTING 2
Computer as tool for drafting; line graphics; plotting, symbol libraries; dimensioning; computer drafting and office organisation; comparison of available software packages.
Credit Points: 2  Contact Hours: 1 per week

ARB291 THE HUMAN ENVIRONMENT 3
The social and cultural development of Australian urban environments, local built environments; study of human functioning in urban environments, privacy, personal space, territoriality, environmental meaning and cognition, cognitive maps and wayfinding, intercultural and intracultural differences. Application via examination and analysis of an urban environment with respect to its sociocultural function.
Credit Points: 4  Contact Hours: 2 per week

ARB292 THE HUMAN ENVIRONMENT 4
The interaction of formal organisations and institutions especially the organisation of work and government and the built environment; small group theory and the effective group; work and motivation. Management style and bureaucracy, its character and influence; organisation and rationalisation; interest groups in a pluralist society; mechanisms and processes of compromise; Australia's government as relating to public policy and the electoral system; modern society and the individual.
Credit Points: 4  Contact Hours: 2 per week

ARB293 DESIGN 3
Theory: scope of design; Reiman's State Transformation model, problem-solving methods; precedence diagrams; testing: general design heuristic; the art of design. Planning objectives and techniques, privacy and convenience, intelligibility, forms and order, history of planning techniques, the vertical dimension, safety, external constraints. Architectural projects: single-storey to low-rise buildings or semi-domestic nature. Graphics: use of media for presentation of architectural projects; use of colour, shade, shadow in architectural drawings; 3-dimensional presentation and modelling.
Credit Points: 10  Contact Hours: 5 per week

ARB294 DESIGN 4
See ARB293.
Credit Points: 8  Contact Hours: 4 per week

ARB295 BUILDING CONSTRUCTION 1
Building construction of domestic and semi-domestic buildings with upper floors, excavation, retaining walls, culverts, site and soil investigations, footings, frames and load bearing walls, construction of low-rise buildings, roofing of medium and large spans; environmental factors, building defects and remedies.
Credit Points: 4  Contact Hours: 2 per week

ARB296 BUILDING CONSTRUCTION 2
See ARB295.
Credit Points: 4  Contact Hours: 2 per week

ARB297 PRINCIPLES OF STRUCTURES 1
Basic principles of structures as applicable to elements of architecture, industrial design, interior design and landscape architecture. Terminology, forces and reactions; loading on structures, equilibrium and stability; co-planar and non-co-planar forces; resolution of forces; mechanics of structural components under load, compression, tension, bending, shear, deflection. Connections.
Credit Points: 2  Contact Hours: 1 per week

ARB298 PRINCIPLES OF STRUCTURES 2
Principles and application of building structures in timber and masonry. Loading in buildings; foundations and footings; timber structures as floors, walls and roofs, framing and cladding, fastening and connections; structural stability. Masonry construction: brickwork and blockwork, load bearing construction; continuity; stiffening; opening. Codes.
Credit Points: 4  Contact Hours: 2 per week

ARB299 INTRODUCTION TO COMPUTING 1
The computer as a tool; introduction to micro-computer hardware and software; architectural application overview, specialisation graphics hardware, files, computer access and operating systems; simple computer graphics production symbols, colour control, printer control, transformation and deformation.
Credit Points: 2  Contact Hours: 1 per week

ARB340 ARCHITECTURAL DESIGN 1
Theory: concepts of design process; systematic methodology in architectural design. Studio: developing skills in site surveys, adjacency analysis, brief formulation, application of architectural science; to inculcate concerns for safety, comfort, construction, concept form and order.
Prerequisite: PLB200
Credit Points: 18  Contact Hours: 8 per week

ARB341 BUILDING CONSTRUCTION 1
Introduction to common building materials, their properties and behaviour in use; the building as a system; elements of the small building and their function in the building system. Studio work will consist of exercises in construction drawing related to the lecture topics. Lectures and studio work will be complemented by site visits and workshop practice.
Credit Points: 16  Contact Hours: 6 per week

ARB342 DESIGN SCIENCE 1
Credit Points: 2  Contact Hours: 1 per week

ARB343 VISUAL COMMUNICATION FOR ARCHITECTS 1
Introduction to various techniques for presenting architectural works using manual skills and computer techniques.
Credit Points: 4  Contact Hours: 2 per week

ARB350 INDUSTRIAL DESIGN 1
Scope of problem solving theory; special characteristics of design problems; the task environment, design heuristics; creativity and innovation and general psychological theories of creativity. The studio exercises to which most of the time is devoted are aimed at a range of different product designs. The complexity and depth of the design project will increase systematically according to the semester level.
Prerequisite: PLB200
Credit Points: 18  Contact Hours: 8 per week

ARB351 ERGONOMICS FOR INDUSTRIAL DESIGNERS 2
Person-machine system models; human capabilities; hearing and signal detection theory; vision; and user
modelling. Practical exercises cover application of lecture topics to product design.

**Prerequisite:** ARB251

**Credit Points:** 4  **Contact Hours:** 2 per week

**ARB352 VISUAL COMMUNICATION FOR INDUSTRIAL DESIGNERS 1**
The development of visual communication techniques; introduction to rendering techniques and the use of different visual communication media.

**Credit Points:** 4  **Contact Hours:** 2 per week

**ARB353 MANUFACTURING TECHNOLOGY 1**
Metals, glass, wood, ceramics and plastics technologies; the relation between the properties of materials and the industrial processes available for their fabrication. Application of the study of materials and their fabrication to design problems will be the subject of studio exercises.

**Credit Points:** 12  **Contact Hours:** 6 per week

**ARB354 CAD FOR INDUSTRIAL DESIGNERS 1**
PC computer operation, DOS, file and disk management. Introduction to the use of graphics and CAD by industrial designers. Applications in design, presentation, graphics and engineering drawings, and introduction to 3D CAD.

**Credit Points:** 4  **Contact Hours:** 2 per week

**ARB356 INTERIOR DESIGN 1**
Introduction to a systematic design process related to interior design problems. Lectures cover problem-solving theory and studio exercises include a range of interior design problems.

**Prerequisite:** PLB200  **Co-requisite:** ARB361

**Credit Points:** 18  **Contact Hours:** 8 per week

**ARB357 INTERIOR TECHNOLOGY 1**
Upgrades the technical drawing skills developed in ARB261 and introduces students to the building codes and by-laws regulating the design and construction of buildings at the domestic level; discusses issues such as the evolution of building materials and the evaluation of material performance and suitability.

**Prerequisite:** ARB261  **Co-requisite:** ARB356

**Credit Points:** 6  **Contact Hours:** 6 per week

**ARB359 FURNITURE & FITTINGS 1**
Introduction to fabrics and textiles in interior design; wall to wall carpeting; curtains and blinds; upholstering; in each case materials, properties and techniques are discussed; the role of fabrics and textiles in interior design.

**Credit Points:** 4  **Contact Hours:** 2 per week

**ARB360 VISUAL COMMUNICATION FOR INTERIOR DESIGNERS 1**
Visual thinking and drawing and basic rendering skills, the production of rough mock-ups and scale model making.

**Prerequisite:** PLB200

**Credit Points:** 4  **Contact Hours:** 2 per week

**ARB362 LAW OF THE BUILT ENVIRONMENT**
Laws, regulations and their interpretation; a review of the Australian and Queensland Acts, local authority by-laws and regulations of statutory authorities as they affect the built environment; legal aspects of land and land transfer; introduction to professional liability, design registration, patents and copyrights.

**Credit Points:** 4  **Contact Hours:** 2 per week

**ARB363 ENVIRONMENTAL IMPACT STUDIES**
Ecological impacts of built environment developments such as roads, railways, power lines, buildings; impact of processes of developments upon natural resources, vegetation, soils, hydrology, air purity, etc.; secondary effects of development such as fire, feral animals, weeds, added nutrients, trampling, etc.; rehabilitation of disturbed ecosystems, maintaining urban habitats and wildlife.

**Credit Points:** 2  **Contact Hours:** 1 per week

**ARB364 DESIGN SCIENCE 4**
Principles governing control of noise and aural conditions in buildings; basic acoustic design and noise control in buildings. Electrical lighting of interiors, lamp characteristics, colour rendering, modelling, lighting quality, simplified lighting design methods, external lighting.

**Credit Points:** 2  **Contact Hours:** 1 per week

**ARB365 DESIGN SCIENCE 3**
Thermal performance of buildings; energy conservation and low energy design; calculation of heat flow and indoor temperatures under steady state and fluctuating conditions; quantitative monitoring of thermal performance of building elements. Computer-aided planning analysis and environmental control analysis; integration with design.

**Credit Points:** 4  **Contact Hours:** 8 per week

**ARB366 BUILDING SERVICES 1**
Hydraulics: water supply; gas; plumbing; drainage and sewage as applicable to domestic and low-rise buildings. Fire services; sprinklers; alarms; extinguishers; emergency systems.

**Credit Points:** 4  **Contact Hours:** 1.5 per week

**ARB367 BUILDING SERVICES 2**
Electricty: supply and transmission systems; substations; metering; reticulation. Vertical transportation; lifts; escalator hoists. Air-conditioning: refrigeration cycle, principles of air-conditioning, equipment components, domestic and commercial systems; approximate sizing of plant rooms and ductwork; cooling load estimate; choice of systems.

**Credit Points:** 3  **Contact Hours:** 1.5 per week

**ARB368 DESIGN 5**
Theory: the building as object, surface, volume, space, and sequence; expression of building; criteria of good design in terms of style, function, form, structure, services, context, environment, society, and other relevant issues; design ethics and values. Projects: low to medium rise with emphasis on industry and commerce; integration with architectural science; flow charting; building type analysis.

**Credit Points:** 8  **Contact Hours:** 4 per week

**ARB369 DESIGN 6**
See ARB393.

**Credit Points:** 8  **Contact Hours:** 4 per week

**ARB370 BUILDING CONSTRUCTION 3**
Site investigations, earth and rock retaining systems, foundations including piles, bored piers and rafts, underpinnings and shoring, medium-rise masonry construction, structural steel concrete and composite structures, service cores, precast concrete, prestressed concrete: systems for floors, roofs, external cladding, partitions, ceilings: waterproofing, corrosion protection, fireproofing: building failures.

**Credit Points:** 3  **Contact Hours:** 1.5 per week
ARB395 BUILDING CONSTRUCTION 4
See ARB395.
Credit Points: 3 Contact Hours: 1.5 per week

ARB397 PRINCIPLES OF STRUCTURES 3
The principles and their application to building structures in steel; structural properties of mild steel and high tensile steel; structural framing and connections; structural systems in steel: beams and columns, portal frames, space frames, trusses, tensile structures, approximate sizing.
Credit Points: 3 Contact Hours: 1.5 per week

ARB398 PRINCIPLES OF STRUCTURES 4
The principles and their application to building structures in reinforced concrete; structural behaviour of reinforced concrete; basic theory of reinforced concrete beams and columns; structural systems in reinforced concrete; post-and-beam, one and two-way slab, T and L-beam, waffle slab, flat slab, flat plate; columns; frames; framing, walling and roofing in reinforced concrete; approximate sizing.
Credit Points: 3 Contact Hours: 1.5 per week

ARB440 ARCHITECTURAL DESIGN 2
Theory: concepts of design process; systematic methodology in architectural design. Studio: developing skills in site surveys, adjacency analysis, brief formation, application of architectural science to inculcate concerns for safety, comfort, construction, content, form and order.
Prerequisite: ARB340
Credit Points: 20 Contact Hours: 6 per week

ARB441 BUILDING CONSTRUCTION 4
This subject will be conducted by the case study method, with lectures and studio work. Each case study will discuss the system characteristics of the problem, the human and environmental factors involved, and the technical systems required. Lectures and studio work will be complemented by field studies and workshop practice.
Prerequisite: ARB341
Credit Points: 10 Contact Hours: 5 per week

ARB442 DESIGN SCIENCE 2
Prerequisite: ARB342
Credit Points: 2 Contact Hours: 1 per week

ARB443 VISUAL COMMUNICATION FOR ARCHITECTS 2
Development of skills in various techniques for presenting architectural designs. Includes rendering and presentation techniques, audiovisual media, model making and portfolio organisation. The use of manual skills and computer techniques are studied.
Credit Points: 4 Contact Hours: 2 per week

ARB444 ENVIRONMENTAL STUDIES - ENVIRONMENTAL IMPACTS
The impacts of development; environmental impacts related to land uses, land and building development, production and use of consumer products, construction materials and processes; environmental criteria for future land and product development.
Credit Points: 2 Contact Hours: 1 per week

ARB450 INDUSTRIAL DESIGN 2
Design methodologies; design process; creativity and product innovation. The studio exercises which most of the time is devoted are aimed at different product ranges. The complexity and depth of the design project will increase systematically according to the semester level.
Prerequisite: ARB350
Credit Points: 20 Contact Hours: 6 per week

ARB452 VISUAL COMMUNICATION FOR INDUSTRIAL DESIGNERS 2
The structure of presentation layouts; product graphics, photography; introduction to three-dimensional presentation - model making techniques.
Prerequisite: ARB352
Credit Points: 4 Contact Hours: 2 per week

ARB453 MANUFACTURING TECHNOLOGY 2
Application of engineering mechanisms to products or systems; analysis of the performances of mechanical, electrical, hydraulic and pneumatic mechanisms in relation to particular functions; introduction to electronics. Application of engineering to design problems is the subject of studio exercises.
Prerequisite: ARB353
Credit Points: 10 Contact Hours: 5 per week

ARB454 CAD FOR INDUSTRIAL DESIGNERS 2
Development of skills in the use of CAD in the production of 2 dimensional engineering drawings and introduction to 3 dimensional CAD using AUTOCAD. Shading of design evaluation drawing using paintbrush.
Prerequisite: ARB354
Credit Points: 4 Contact Hours: 2 per week

ARB460 INTERIOR DESIGN 2
Development of the design process; further a systematic approach to design, encourages the application of available technologies and philosophies. Studio exercises concentrate on problems with specific parameters.
Prerequisite: ARB360 Co-requisite: ARB461
Credit Points: 20 Contact Hours: 6 per week

ARB461 INTERIOR TECHNOLOGY 2
Industrialised interior finishes and construction of joinery and fittings and their interaction with the building shell and services. The notions of interior maintenance, life span economics will be introduced.
Prerequisite: ARB460 Co-requisite: ARB461
Credit Points: 10 Contact Hours: 5 per week

ARB462 FURNITURE & FITTINGS 2
The manufacture, assembly and fabrication of furniture, fittings and components; expected performance of materials and furniture items, focuses on functional, maintenance, life span, economic properties.
Prerequisite: ARB362
Credit Points: 4 Contact Hours: 2 per week

ARB463 VISUAL COMMUNICATION FOR INTERIOR DESIGNERS 2
The achievement of a professional standard in techniques of graphic communication whilst allowing for the development of an individual style.
Prerequisite: ARB363
Credit Points: 4 Contact Hours: 2 per week
ARB464 ARCHITECTURAL INTERIOR SYSTEMS 1
Lighting and acoustic considerations, human sensory and behavioural needs. An outline of systems and guidelines for selection and professional judgement.
Prerequisite: ARB361
Credit Points: 4  Contact Hours: 2 per week

ARB491 HISTORY OF ARCHITECTURE & ART 3
Early Australian colonial architecture; Victorian Australia; gothic and classical revival in Australia; the Australian house; modern architecture in Australia; conservation and preservation; Australian landscape and its influence in architecture.
Credit Points: 4  Contact Hours: 1 per week

ARB493 DESIGN 7
Theory: Masters of the twentieth century in Europe and USA and their architectural styles, design philosophies and influence; architects in Australia and their influence in Australasian architecture. Projects: brief, design, construction, services and landscape; a series of architectural projects of medium to high-rise construction with emphasis on workability and compliance with codes, by-laws and regulations.
Credit Points: 20  Contact Hours: 4 per week

ARB495 PROFESSIONAL STUDIES 1
Specifications; estimates; cost planning and control; codes; standards; building legislation; computer applications.
Credit Points: 16  Contact Hours: 4 per week

ARB497 ADVANCED TECHNOLOGY
Mechanisation of construction; construction machinery; excavation; piling; deep basement construction; high-rise construction systems; steel, reinforced concrete and pre-stressed concrete; framing; walling and flooring. Special services: energy management and maintenance systems; automated building systems; integration of design, structures, services and construction; decision making and choice of construction methods and procedure. Prefabrication. Case studies.
Credit Points: 8  Contact Hours: 2 per week

ARB540 ARCHITECTURAL DESIGN 3
Theory: the building as object, surface, volume, space and sequence; expression of buildings; criteria of good design; design ethics and values. Studio: to develop ethics in design and to apply aesthetic theories in architectural projects, a series of architectural projects of low to medium use with emphasis on industry and commerce.
Prerequisite: ARB440
Credit Points: 20  Contact Hours: 6 per week

ARB541 BUILDING CONSTRUCTION 3
Studies will review the construction of non-domestic buildings of intermediate size. Each case study will discuss the system characteristics of the building type, the human and environmental factors which constrain the solution, and the associated building systems. Studio work will be complemented by field work.
Prerequisite: ARB441
Credit Points: 17  Contact Hours: 6 per week

ARB542 DESIGN SCIENCE 3
Thermal performance of buildings; energy conservation and low-energy design; calculation of heat flow and indoor temperatures under steady state and fluctuating conditions; control of noise and good hearing conditions in buildings; basic acoustic design of auditoria.
Prerequisite: ARB442
Credit Points: 3  Contact Hours: 1 per week

ARB545 BUILDING SERVICES 1
Supply, connection and reticulation of electricity, gas, water and telephone services and relevant outlets and appliances; sewerage, sullage and stormwater drainage as applicable to domestic buildings. Domestic waste disposal.
Credit Points: 4  Contact Hours: 2 per week

ARB550 INDUSTRIAL DESIGN 3
Product design in depth. The projects are cross-referenced with other subject areas which will provide an integration of knowledge and skills acquired in the previous semesters. During the design projects, different specialist expertise is included.
Prerequisite: ARB450
Credit Points: 20  Contact Hours: 6 per week

ARB552 VISUAL COMMUNICATION FOR INDUSTRIAL DESIGNERS 3
Organisation of visual communication media relevant to the presentation of a product; the use of graphic skills in visual analysis; advanced renderings and exploded technical renderings.
Prerequisite: ARB452
Credit Points: 4  Contact Hours: 2 per week

ARB553 MANUFACTURING TECHNOLOGY 3
Production techniques in relation to different materials, various methods for different finishing operations, various methods for forming, automatic and semi-automatic assembly and quality control methods. Field studies include visits to manufacturing industries. The application of production techniques will be developed through studio design projects.
Prerequisite: ARB453
Credit Points: 8  Contact Hours: 3 per week

ARB554 CAD FOR INDUSTRIAL DESIGNERS 3
Development of wire frame and shaded 3D evaluation presentation, introduction to animation; advanced 2D engineering drawing; evaluation of a product's features and characteristics; refinement through 3D studies, in wire frame and shaded versions.
Prerequisite: ARB454
Credit Points: 4  Contact Hours: 2 per week

ARB555 ECONOMICS OF INDUSTRIAL PRODUCTION
Commercial practice, costing production, marketing, strategic planning and capital budgeting.
Credit Points: 4  Contact Hours: 2 per week

ARB556 MARKETING
Marketing concept, market segmentation, marketing test, methodologies of forecasting, planning and organisation, costing of products, and the business issues of design.
Credit Points: 4  Contact Hours: 2 per week

ARB560 INTERIOR DESIGN 3
This subject gives the major time allocation to the studio and workshop. Students develop their knowledge of systematic interior design processes and at the same time apply knowledge gained in support and co-requisite subjects.
Prerequisite: ARB460  Co-requisite: ARB561
Credit Points: 20  Contact Hours: 6 per week
ARB561 INTERIOR TECHNOLOGY 3
Continuation of ARB461, with an emphasis on commercial construction systems and the impact of regulations. High-rise buildings are examined, the planning of tenancies, partitioning and furniture systems. Special considerations for shopping centres, theatres, medical clinics, taverns and restaurants are highlighted.
Prerequisite: ARB461 Co-requisite: ARB560
Credit Points: 16 Contact Hours: 6 per week

ARB562 FURNITURE & FITTINGS 3
General principles of ornamental design; decorative metalwork; stained glass; decorative ceramics; plasterwork; carved and inlaid woodwork; lacquer work; printed fabrics and papers; tapestry and embroidery.
Prerequisite: ARB462
Credit Points: 4 Contact Hours: 2 per week

ARB563 VISUAL COMMUNICATION FOR INTERIOR DESIGNERS 3
Visual and oral communication techniques employed in the production of design presentations to clients. The program consists of a series of studio exercises and mock-up presentations in a "forum" environment.
Prerequisite: ARB463
Credit Points: 4 Contact Hours: 2 per week

ARB564 ARCHITECTURAL INTERIOR SYSTEMS 2
An overview of the environmental systems used in buildings; air-conditioning and system performance, thermal and atmosphere control; the building as a comprehensive environmental system; and their impact on individual interior spaces.
Prerequisite: ARB464
Credit Points: 4 Contact Hours: 2 per week

ARB591 HISTORY OF ARCHITECTURE & ART 4
A global perspective of development of art and architecture of regional interest with particular emphasis on non-European traditions. Architectural development in regions such as the Far East, South East Asia, the Pacific, and South America. Planning of settlements, indigenous architecture, materials and techniques in building construction, social, cultural, economic, religious, and western influence. Modernisation, current architecture issues.
Credit Points: 4 Contact Hours: 1 per week

ARB593 DESIGN 8
Architectural criticism; main themes selected for design and the realisation, convenience, clarity, intelligibility, expression, technology, context form. Post-occupancy evaluation. Testing methodology: analysis and evaluation of building performance, user-oriented design. A series of architectural projects of medium to high-rise buildings involving general building briefs and programs, environmental impact issues, and post-occupancy analysis.
Credit Points: 20 Contact Hours: 5 per week

ARB595 PROFESSIONAL STUDIES 2
Building economics; practice management and accounting systems; legal aspects of practice, contracts; building procurement systems.
Credit Points: 16 Contact Hours: 4 per week

ARB597 ELECTIVE 1
Selected architectural topics including history, conservation, design theory, management, finance, economics, architectural science, computing, urban design, and courses where approved.
Credit Points: 8 Contact Hours: 2 per week

ARB640 ARCHITECTURAL DESIGN 4
Theory: the building as object, surface, volume, space and sequence; expression of buildings; criteria of good design; design ethics and values. Studio: to develop ethics in design and to apply aesthetic theories in architectural projects. A series of architectural projects of low to medium use with emphasis on industry and commerce.
Prerequisite: ARB540
Credit Points: 20 Contact Hours: 6 per week

ARB641 BUILDING CONSTRUCTION 4
Review the construction of non-domestic buildings of intermediate size. Each case study will discuss the system characteristics of the building type, the human and environmental factors which constrain the solution, and the associated building systems. Studio work will be complemented by field work.
Prerequisite: ARB541
Credit Points: 14 Contact Hours: 6 per week

ARB642 DESIGN SCIENCE 4
Thermal performance of buildings; artificial lighting of interiors, lamp characteristics, colour rendering, modelling, lighting quality, simplified lighting design methods, and external lighting.
Prerequisite: ARB542
Credit Points: 2 Contact Hours: 1 per week

ARB645 BUILDING SERVICES 2
Mechanical, electrical and hydraulic services. Hydraulics: water supply, plumbing, drainage; fire services; sprinklers, alarms, extinguishers, emergency systems; electricity: supply, substations, switchboards, metering, reticulation; vertical transportation: lifts, escalators, hoists.
Prerequisite: ARB545
Credit Points: 4 Contact Hours: 2 per week

ARB646 LAW OF THE BUILT ENVIRONMENT
The law as a constraint in the design and construction process. A review of the Australian and Queensland acts, local authority by-laws and regulations of statutory authorities as they affect the built environment. Legal aspects of land and land transfer. Introduction to professional liability, design registration, patents and copyright.
Credit Points: 4 Contact Hours: 2 per week

ARB650 INDUSTRIAL DESIGN 4
Design studio projects; there are usually two projects per semester and they are done in depth. The interdisciplinary expertise is included when appropriate. Most of the projects are industry based.
Prerequisite: ARB550
Credit Points: 20 Contact Hours: 6 per week

ARB652 VISUAL COMMUNICATION FOR INDUSTRIAL DESIGNERS 4
Structure of professional presentation, with selection of appropriate visual communication media; advanced renderings and their application to product design concepts; professional portfolio organisation.
Prerequisite: ARB552
Credit Points: 4 Contact Hours: 2 per week

ARB653 MANUFACTURING TECHNOLOGY 4
Organisation, planning the technologies required for CIM (Computer-integrated Manufacturing). The im-
• ARB660 INTERIOR DESIGN 4
Students select and develop one complex design problem from brief stage to developed design studio stage. Theory studies will be cross-referenced to studio projects and exercises.
Prerequisite: ARB650
Co-requisite: ARB661, ARB663
Credit Points: 20  Contact Hours: 6 per week

• ARB661 INTERIOR TECHNOLOGY 4
The technological assessment of interiors, structure, openings, environmental systems, artefacts and ambience of existing spaces. Tendering, consultants, leasing and tenancy-building interface will be examined.
Prerequisite: ARB651  Co-requisite: ARB660
Credit Points: 16  Contact Hours: 6 per week

• ARB662 FURNITURE & FITTINGS 4
The development of a methodical approach to the choice of loose furniture, furniture systems and interior products: introduces both quantitative and qualitative assessment approaches; and extends the understanding of design of furniture and its integration into interiors.
Prerequisite: ARB652
Credit Points: 4  Contact Hours: 2 per week

• ARB663 RESEARCH METHODS
An overview of research methodology. Lectures will examine the difference between various research methods and products.
Co-requisite: ARB660
Credit Points: 4  Contact Hours: 2 per week

• ARB663 DESIGN 9
Theory: contemporary architects’ theories and ideas, their influence in architectural design and practice. Projects: process of brief, functional and space programming; introduction to urban values, design principles and landscape-urbanism, civic and formal planning; urban quality. A comprehensive project of groups of complex buildings as a design vehicle to develop planning skills; brief formation; building programming; quality evaluation; planning and presentation.
Credit Points: 16  Contact Hours: 5 per week

• ARB665 PROFESSIONAL STUDIES 3
Alternative methods of building procurement with particular emphasis on management of all phases of the building project. The Architect Act 1962 and amendments; Board of Architects Queensland Practice Examination.
Credit Points: 8  Contact Hours: 2 per week

• ARB667 ELECTIVE 2
Studies on approved topics to sufficient depth to demonstrate the student’s ability to define and to logically analyse proposition, and to conduct research to prove its validity.
Credit Points: Semester 1: 4  Semester 2: 20
Contact Hours: Semester 1: 2 per week. Semester 2: 5 per week

• ARP501 INTRODUCTION TO FACILITIES MANAGEMENT
The concept of facilities programming and management. The notion of human behaviour over time and the monitoring of building performance as the major focus in the day-to-day management of facilities in a realistic working environment.
Credit Points: 8  Contact Hours: 2 per week

• ARP502 ENVIRONMENTAL COMMUNICATIONS
Exploration of contemporary ideas, theories, methods; and the practical application of research, analysis, evaluation and the ultimate synthesis of ideas related to interiors. The emphasis is on user-oriented design. These ideas are applied in the studio.
Credit Points: 16  Contact Hours: 6 per week

• ARP503 WORKPLACE DESIGN
The issues of environmental communications; the physiological, psychological and sociological aspects of workplace interiors.
Credit Points: 18  Contact Hours: 6 per week

• ARP504 PROFESSIONAL PRACTICE & MANAGEMENT FOR INTERIOR DESIGNERS 1
The role and responsibilities of the interior designer in professional practice; job administration, liability, design protection, designer and client relationships; communication management and organisation of project.
Credit Points: 11  Contact Hours: 3 per week

• ARP505 PROFESSIONAL PRACTICE & MANAGEMENT FOR INTERIOR DESIGNERS 2
Task scheduling; planning systems and control models; program evaluation and review techniques; critical path monitoring; organisational development; personnel recruitment and staffing structures; organisational models; union and labour relations.
Credit Points: 4  Contact Hours: 2 per week

• ARP600 BUILDING EVALUATION & BRIEF DEVELOPMENT
Formulation of the client’s brief, definition of the design problem and exploration of design methodologies. Evaluation of building types, suitability of spaces to functions.
Credit Points: 8  Contact Hours: 2 per week

• ARP601 FILM, TV & DESIGN FOR THEATRE
Introduction to the basic language, technology and procedures of film and video production, roles of production and design teams, script analysis, preproduction planning, storyboarding, set design and construction, model-making, make-up design, lighting and camera work. This will be given through a series of lectures, visits and projects.
Credit Points: 13  Contact Hours: 6 per week

• ARP604 CONSERVATION OF HISTORIC INTERIORS
The ethics and the role of the designer in the conservation of interiors. An introduction to building technologies as required by a practising designer working on conservation and restoration projects.
Credit Points: 18  Contact Hours: 6 per week
ARP613 ADVANCED ERGONOMICS 1
Man-machine systems and their relations with living and working environments; the importance of ergonomics (human factors) criteria and their application to industrial design. The course consists of design seminars relevant to case studies. All design factors of manufactured products are evaluated in depth. Typical case studies are concentrated on the ergonomic evaluation of consumer products.
Credit Points: 2 Contact Hours: 1 per week

ARP623 ADVANCED ERGONOMICS 2
Systematic ergonomic evaluation methods and their application to design problems. Lectures and seminars relevant to case studies concentrated on the ergonomic evaluation of the working and living environment, eg. key-punch operator work station, bus driver work station and ergonomic evaluation of an assembly line.
Prerequisite: ARP673
Credit Points: 4 Contact Hours: 2 per week

ARP642 CASE STUDIES
Case study evaluation by practising designers; study of different evaluation methods and techniques; the application of evaluation methods through individual case studies. All design factors of manufactured products are evaluated in depth.
Credit Points: 4 Contact Hours: 2 per week

ARP652 DESIGN MANAGEMENT & DECISION THEORY
Meaning of the design process, control and the design process, complexity of design problems, types of contracts, design and business, project team, design responsibility and design management, design documentation, concept of design evaluation and management action, application of design theory to design management.
Credit Points: 2 Contact Hours: 1 per week

ARP653 PROFESSIONAL PRACTICE
The role and responsibilities of the industrial designer in professional practice. Lectures cover: job administration, liability, design protection, designer and client relationships.
Credit Points: 2 Contact Hours: 1 per week

ARP671 HISTORY, THEORY & CRITICISM OF INDUSTRIAL DESIGN
The development of industrial design and its relationship to ideas, technology and arts, and the development of industrial design from eighteenth century to the present day. It also covers the study of Australian inventions and their impact on product design in Australia.
Credit Points: 2 Contact Hours: 1 per week

ARP672 INDUSTRIAL DESIGN 1
ARP673 INDUSTRIAL DESIGN 2
This course consists of studio work in which students design a wide range of products or systems. The emphasis will be on projects generated from local industry and community. The complexity and depth of the design project will increase systematically according to the semester level.
Prerequisite: ARP672 for ARP673
Credit Points: 16 Contact Hours: 6 per week

ARP674 INDUSTRIAL DESIGN RESEARCH 1
This course consists of the topic selected by a student and approved and supervised by the industrial design staff. Examples of topics are: microsurgical equipment design, bushfire safety equipment, mobile dental clinic in isolated regions and interactive display in psychological testing.
Prerequisite: ARP673
Credit Points: 20 Contact Hours: 8 per week

ARP675 INDUSTRIAL DESIGN RESEARCH 2
This course depends on the topic selected by a student in the previous semester. Students are responsible for the program as a part of their project work, which will be approved and supervised by industrial design staff.
Prerequisites: ARP672, ARP674
Credit Points: 20 Contact Hours: 8 per week

ARP676 ADVANCED CAD FOR INDUSTRIAL DESIGNERS 1
In the design process. 2 dimensional and 3 dimensional application of appropriate CAD programs. Development of a design project through the interactive use of CAD and related engineering programs as an aid to design analyses and finalisation.
Credit Points: 4 Contact Hours: 2 per week

ARP677 ADVANCED CAD FOR INDUSTRIAL DESIGNERS 2
In the design process. 2 dimensional and 3 dimensional application of appropriate CAD programs. Development of a design project through the interactive use of CAD and related engineering programs as an aid to design analyses and finalisation. The presentation, technical description, engineering analyses and finalisation to Computer Numerically Controlled (CNC) testing and prototype production of a small product.
Credit Points: 4 Contact Hours: 2 per week

AYB100 ACCOUNTING FOR MANAGERS
Accounting in the business world; fundamental accounting recording systems, preparation of financial statements for servicing and merchandising firms, examination of financial statements of partnership and limited companies; internal control of cash, inventories and non-current assets; analysis and interpretation of financial statements; introduction to managerial accounting, cost-volume-profit analysis, the nature of planning and control, and managerial decision making. (Note: incompatible with AYB104)
Credit Points: 12 Contact Hours: 5 per week

AYB101 COMPUTERISED ACCOUNTING SYSTEMS
Management information systems and accounting systems; database and files; data communication; systems development life cycle; analysis and design of accounting systems, including sales, accounts receivable, inventory, purchases, accounts payable, non-current assets, payroll and general ledger systems; accounting software (such as SYBIZ), database software (such as DBASE III PLUS) and spreadsheet software (such as Lotus 1-2-3); internal control in computer systems.
Prerequisite: FNB102
Credit Points: 12 Contact Hours: 4 per week

AYB102 ACCOUNTING DISCLOSURE & AUDITING
This subject aims to extend the student’s knowledge of financial accounting through the study of tax effect accounting; consolidations; acquisition of assets (no cross holdings) and company disclosure. It also introduces students to auditing through the study of an overview of auditing and audit reports; ethics, legal liability and audit objectives; overall audit plan and audit program involving; evidence and documentation, materiality and risk, internal controls and the
procedures for the audit of various applications; sales, purchases, etc. The effectiveness of accounting disclosure and auditing will then be examined.

Prerequisite: AYB111
Credit Points: 12 Contact Hours: 4 per week

- AYB103 GOVERNMENT ACCOUNTING
The structure of government economic and fiscal activities; elements of government accounting; the concept of public accountability; fiscal federalism and theory of budgeting fund accounting; public accounting of Commonwealth, State and local Government levels; zero-based budgets and program budgets; budget strategies and financial decision making; project review; statutory corporations; quangos and committees; management information systems in government accounting; internal audit in government and efficiency audits; accounting for government business enterprises.

Prerequisite: AYB110
Credit Points: 12 Contact Hours: 3 per week

- AYB104 PRINCIPLES OF ACCOUNTING
Accounting in the business world; fundamental accounting recording systems, preparation of financial statements for servicing and merchandising firms, examination of financial statements of partnership and limited companies; internal control of cash, inventories and non-current assets; analysis and interpretation of financial statements; introduction to managerial accounting, cost-volume-profit analysis, the nature of planning and control, and managerial decision making. (Note: Incompatible with AYB100)

Credit Points: 12 Contact Hours: 4 per week

- AYB110 ACCOUNTING
Elements of financial statements; characteristics of financial information; recording and classifying transactions; end of period adjustments; financial statements for service and merchandising firms; accounting for cash, receivables, inventory and non-current assets.

Credit Points: 12 Contact Hours: 4 per week

- AYB111 FINANCIAL ACCOUNTING
The procedures and principles relevant to both partnerships and companies for: formation, operations, reporting dissolution/liquidation, funds statements and analysis and interpretation of financial statements.

Prerequisite: AYB110
Credit Points: 12 Contact Hours: 4 per week

- AYB112 COMPANY ACCOUNTING
Accounting for company income tax (tax-effect accounting); acquisition of assets (including companies); consolidated financial statements; equity accounting and disclosure in company financial statements.

Prerequisite: AYB111
Credit Points: 12 Contact Hours: 4 per week

- AYB113 ACCOUNTING THEORY & APPLICATIONS
The evaluation of accounting theory; regulatory framework and theories of regulation; conceptual framework; theory of the firm developed into the contracting cost framework; profits: determination and disclosure, revenue and expense recognition; assets definition, recognition, measurement and classification; leases; foreign currency translations and transactions; intercorporate investments and joint ventures; politicalis of accounting.

Prerequisite: AYB112
Credit Points: 12 Contact Hours: 4 per week

- AYB210 AUDITING
The audit environment; legal liability of auditors; professional ethics; study and evaluation of audit planning and programming, evidence, internal control theory and review techniques; audit program applications; revenue, receivables, cash inventory; audit in EDP environment and evaluation of EDP controls; computer-assisted audit techniques; computer fraud, sampling techniques; the audit report.

Prerequisite: AYB112
Credit Points: 12 Contact Hours: 5 per week

- AYB211 AUDITING & PROFESSIONAL PRACTICE
Audit concepts and procedures; preparing a system-based audit plan; the nature and reasoning behind audit tests of balances; implementation of specified statistical sampling techniques.

Prerequisite: AYB210
Credit Points: 12 Contact Hours: 3 per week

- AYB212 COMPUTER SECURITY & AUDIT
Impact of EDP on auditing, computerised accounting systems, general EDP controls, EDP application controls, generalised audit software (GAS), computer-assisted audit techniques, special EDP environments, fraud and privacy.

Prerequisite: AYB210
Credit Points: 12 Contact Hours: 3 per week

- AYB213 ACCOUNTING 2
Tax effect accounting; reorganisation of capital; liquidations; accounting for leases; accounting ethics and social responsibility; financial mathematics; project evaluation; the capital market; lease financing.

Prerequisite: AYB111
Credit Points: 12 Contact Hours: 4 per week

- AYB217 INTRODUCTORY ACCOUNTING
The accounting equation and the double entry principle; recording business transactions; end of period adjustments; financial statements and closing entries; accounting for merchandising operations; specialised journals and subsidiary ledgers; cash controls; accounting for partnerships; accounting for companies; interpretation of financial statements; setting up an accounting system for a legal practice.

Credit Points: 12 Contact Hours: 3 per week

- AYN101 ACCOUNTING PRINCIPLES
Accounting concepts and principles; development of the profit and loss account and balance sheet; reporting aspects of the balance sheet; asset and liability recognition and management; cost/volume/profit analysis; manufacturing costs; budgeting; and special managerial decision making.

Credit Points: 12 Contact Hours: 3 per week

- AYN102 ACCOUNTING RESEARCH
The research methodology used in the field of accounting and related disciplines; the use of certain research techniques in order to assist students in their research dissertation and preparation of research papers. The subject aims to develop a capacity to build a theoretical model, to design an appropriate research methodology and to understand and utilise statistical analysis for accounting research purposes. This subject is a prerequisite for BSN100 Dissertation and should therefore normally be attempted immediately prior to enrolment in BSN100 Dissertation.

Credit Points: 12 Contact Hours: 3 per week
- **AYN103 ADVANCED COMPANY ACCOUNTING**
  
  An overview of consolidated financial statements; changes in degree of ownership; reverse subsidiaries and reciprocal share holdings; consolidation and the existence of preference shares; translation and consolidation of foreign currency financial statements; consolidated summary of sources and applications of funds; accounting for joint ventures, extractive industries, construction contracts, leases; foreign currency transactions; segment reporting.
  
  **Prerequisite:** AYN117
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week

- **AYN104 AUDIT SAMPLING**
  
  Statistical sampling methods proposed for and employed in the performance of audits. Discussion focuses on relevant statistical concepts rather than on unique computational issues. Topics include the audit sampling process, auditor decisions and risk error, attribute, variable and probability proportional-to-size sampling.
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week

- **AYN105 AUDITING HONOURS**
  
  The nature of auditing research and review of current research in such areas as: the role of auditing; independence; reporting; liability; fraud detection; audit process; risk; materiality; internal control; analytical review; computer auditing; and auditing standards.
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week

- **AYN106 AUDITING STANDARDS & PRACTICE**
  
  An examination of relevant auditing standards and their implications for practice. Case studies develop an analytical approach and the ability to exercise professional judgement in audit problems. Recent journal articles, legal cases and newspaper reports are used in conjunction with the cases.
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week

- **AYN109 COMPUTER AUDITING**
  
  The impact of EDP on controls and auditing; general EDP controls; EDP application controls, generalised audit software, static and concurrent computer-assisted audit techniques, special EDP environments and computer fraud.
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week

- **AYN110 EXTERNAL REPORTING ISSUES**
  
  Contemporary issues in external reporting; various practical accounting and reporting issues for: the extractive industries; long-term construction contracts; segments; foreign currency operations, translations and transactions; leasing; tax-effect accounting; goodwill and unidentifiable intangibles; intercorporate investments and joint ventures; liabilities and off-balance sheet financing; and funds/cash flow statements. Readings from the research and professional literature to enhance students’ understanding of professional problems.
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week

- **AYN112 FINANCIAL ACCOUNTING I**
  
  An introduction to accounting; recording business transactions; adjusting the accounts and preparing financial statements; completion of the accounting cycle; accounting systems and specialised journals; cash and cash journals; accounting for receivables and payables; accounting for merchandising operations and inventories; non-current assets; partnerships; companies; accounting for non-current liabilities; investments; statement of sources and applications of funds; analysis and interpretation of financial statements.
  
  **Credit Points:** 12  
  **Contact Hours:** 3 per week
Studies previously completed by students in areas of business or humanities may be acceptable as a Group A elective; applications to have such studies accepted as meeting the Group A elective requirements are considered on an individual basis.

Credit Points: 12  Contact Hours: 3 per week

BNT100 INDUSTRIAL EMPLOYMENT 1
BNT200 INDUSTRIAL EMPLOYMENT 2
BNT300 INDUSTRIAL EMPLOYMENT 3
BNT400 INDUSTRIAL EMPLOYMENT 4
BNT500 INDUSTRIAL EMPLOYMENT 5
BNT600 INDUSTRIAL EMPLOYMENT 6
BNT700 INDUSTRIAL EMPLOYMENT 7
BNT800 INDUSTRIAL EMPLOYMENT 8

Students should engage in at least 15 weeks' employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.

Credit Points: 3 each  Contact Hours: 15 weeks each

BSB400 RESEARCH METHODOLOGY
This subject is designed to equip students with a range of ideas and methods which allow them to analyse, evaluate and conduct research in various discipline areas related to management. The subject is essential preparation for the thesis. Areas covered include science and knowledge - paradigms; analysis and criticism; research design; data collection; data manipulation and interpretation; presentation.

Credit Points: 12  Contact Hours: 3 per week

BSB401 MANAGEMENT SEMINAR
Students develop in detail the research questions and approaches which they intend to examine or use in their thesis. Research proposals are presented and evaluated in a seminar program. The subject involves: preliminary selection of thesis topic; selection of supervisor and agreement to supervise thesis; specific literature review; seminar on specific literature review; methods, approach and research design; seminar on methods, approach and research design; finalisation and approval of thesis topic.

Credit Points: 12  Contact Hours: 3 per week

BNB103 GENERAL ELECTIVE

Studies previously completed by students in areas of business or humanities may be acceptable as a Group A elective; applications to have such studies accepted as meeting the Group A elective requirements are considered on an individual basis.

Credit Points: 4  Contact Hours: 2 per week

BSN116 THESIS/PROJECT

Students may complete a thesis or a project. A thesis is a scholarly work which provides an opportunity to combine an appropriate theory or perspective and appropriate research methodology to examine a significant research problem or issue. The dissertation topic proposal must be presented as a seminar to Faculty staff in the semester prior to enrolling in the dissertation.

Prerequisite: AYN102
Credit Points: 24

BSN130 CURRENT ISSUES IN AUSTRALIAN MANAGEMENT A
This subject runs concurrently with BSN131 to provide a review of the substantive disciplines within management and to highlight key issues in the current theory and practice of management. BSN130 covers an analysis of critical environmental changes. It focuses on changes in the economy including industrial relations and technological change outlining the key issues that are current in these areas.

Credit Points: 12  Contact Hours: 3 per week

BSN131 CURRENT ISSUES IN AUSTRALIAN MANAGEMENT B
This subject runs concurrently with BSN130 to provide a review of the substantive disciplines within management and to highlight key issues in the current theory and practice of management. BSN131 focuses on current issues within strategic management, with particular emphasis on financial management, strategy and planning and the management of human resources.

Credit Points: 12  Contact Hours: 3 per week

BSN132 RESEARCH DESIGN & DATA ANALYSIS
Research theory and research procedures in the social sciences with special reference to practical applications in management areas such as economics,
marketing and human resource management. Problems of logical inference, observation techniques, advanced data analysis techniques and the advantages and disadvantages of their use in different contexts.

Credit Points: 12  Contact Hours: 3 per week

- **BSN133 CASE STUDY PROGRAM**
  Case studies in management; Australian case studies (for example from the Melbourne University Data Base); analysis of interdisciplinary problems, exploration of research problems and techniques of team-management and problem solving.
  Credit Points: 12  Contact Hours: 4 per week

- **BSN134 INITIAL PROJECT IN MANAGEMENT**
  An investigation by individuals or small groups of students into a managerially significant issue or problem. Students are expected to choose an area of investigation that connects with their final project (BSN136 and BSN137).
  Credit Points: 12  Contact Hours: 3 per week

- **BSN135 APPLIED RESEARCH & DESIGN**
  Practical applications of research theory and analysis. Students are required to develop a research proposal of interest to them and related to each student's proposed research project (BSN136). The student conducts a preliminary or pilot study on a limited number of cases or areas of interest in the proposed research field and completes a research report justifying and ascertaining the chosen research methodology and demonstrating the research techniques to be used in the full study. Annotated comments on the report must also show awareness of different designs and statistical techniques that might have been used demonstrating a good grasp of elements covered in BSN132 and the earlier analyses of case study material in this course.
  Credit Points: 12  Contact Hours: 3 per week

- **BSN136 PROJECT & SEMINAR A**
  Students are required to write an original project on an area of interest in the management field. During the first year of a full-time program (second of part-time) the student should finalise the choice of area. The Management Graduate Studies Board then nominates a supervisor for the research. Once the area of interest is chosen, the student is expected to relate to that specialisation in other courses for example in the Case Study Program, in initial Project in Management and in Applied Research Design. The project itself must demonstrate the student's ability to combine analytic and theoretical ability with an understanding of practical features.
  Credit Points: 12  Contact Hours: 3 per week

- **BSN137 PROJECT & SEMINAR B**
  Students are required to write an original project on an area of interest in the management field. During the first year of a full-time program (second of part-time) the student should finalise the choice of area. The Management Graduate Studies Board then nominates a supervisor for the research. Once the area of interest is chosen, the student is expected to relate to that specialisation in other courses for example in the Case Study Program, in initial Project in Management and in Applied Research Design. The project itself must demonstrate the student's ability to combine analytic and theoretical ability with an understanding of practical features.
  Credit Points: 24  Contact Hours: 3 per week

- **BSP100 DISSERTATION**
  This subject is the culmination of the Honours degree in that students apply the theory and research material covered in earlier subjects to explore in some depth an applied or theoretical topic in their chosen discipline. The dissertation is based on information from secondary sources and consists of a written report of approximately 10,000 words in length.
  Credit Points: 24  Contact Hours: 3 per week

- **BSP101 ADVANCED COMMUNICATION SEMINAR**
  Designed to prepare students for writing their Honours thesis. There is a component of directed research, which may include further course work and other work as directed by the supervisor, a component of group work devoted to thesis writing. Students are expected to complete a literature review of their research area, a thesis proposal, and give a seminar presentation.
  Credit Points: 12  Contact Hours: 3 per week

- **BSP102 COMMUNICATION SEMINAR**
  This subject is designed to prepare students for writing their Honours dissertation. There is a component of directed research, which may include further course work and other work as directed by the supervisor. In addition, the subject includes a component of group work devoted to dissertation writing. Students are expected to complete a literature review of their research area, a dissertation proposal and give a seminar presentation.
  Credit Points: 12  Contact Hours: 3 per week

- **BSP103 COMMUNICATION RESEARCH METHODOLOGIES**
  Foundation for understanding the empirical historical and critical/analytical research studies students read in the Honours degree and for conducting research for masters and doctoral theses. Theory and research methods: developing research models and hypotheses and reviewing basic research principles. Empirical methods: measurement issues, operationalising concepts, validity and reliability, sampling, questionnaire design, codebook, univariate statistics, simple cross-tabulations, experimental designs, tests of significance and measures of association; statistical analysis: multi-variate techniques (including table elaboration); evaluation research, historical and comparative research, ethical issues in research, exercises in scale construction; using SPSS-X for analysis of survey and experimental results. Historical and critical/analytical methods: applications of theory, primary and secondary sources, accessing pertinent data.
  Credit Points: 12  Contact Hours: 3 per week

- **CEB102 CIVIL ENGINEERING I**
  An introduction to the profession of civil engineering, its scope and variety, and its many branches.
  Credit Points: 2  Contact Hours: 1 per week

- **CEB184 ENGINEERING MECHANICS I**
  Introduction to statics, concept of forces, moments and couples; resolution and resultant of forces acting on a particle or rigid body; equilibrium of particle or rigid body under the action of forces and/or moments; analytical and graphical methods for plane stress analysis; shear force and bending moment in beams; the properties of sections.
  Credit Points: 7  Contact Hours: 3 per week
CEB185 ENGINEERING MECHANICS 2
Fundamental principles of structural mechanics, stress, strain and elasticity; indeterminate structures and compatibility; simple beam theory including the flexure formula and the shear stress formula; torsion of circular sections; stresses in thin-walled pressure vessels; shear force and bending moment diagrams; hydrostatics.
Prerequisites: CEB184[R]  Credit Points: 7  Contact Hours: 3 per week

CEB192 INDUSTRIAL EXPERIENCE 1
Students should engage in at least five weeks employment, approved by the Head of School. For details see the School's Industrial Experience Handbook.
Contact Hours: 5 weeks

CEB201 STEEL STRUCTURES
Structural behaviour and limit state design of steel structures, first as structural elements such as beams, columns, beam-columns and ties, then their connections (bolted and welded) and simple assemblies. Practical details and economy will be discussed. Site visit and laboratory testing may be included.
Prerequisite: CEB185[R]  Co-requisites: CEB281[R], CEB282[R]  Credit Points: 7  Contact Hours: 3 per week

CEB202 CONCRETE STRUCTURES 1
Basic principles involved in the limit state design of reinforced concrete structures. The determination of size and reinforcement to resist shear and bending in beams. Anchorage and detailing of reinforcement. The evaluation of deflections in concrete structures and the analysis of long and short columns in uniaxial bending.
Prerequisite: CEB185[R]  Co-requisites: CEB281[R], CEB282[R]  Credit Points: 6  Contact Hours: 3 per week

CEB220 CIVIL SYSTEMS 1
Computer applications in civil engineering science; hardware and software integration within the data logging environment will be discussed.
Prerequisites: CSB191[R], MAB193[R], CEB185[R]  Co-requisites: CEB252, CEB260  Credit Points: 6  Contact Hours: 3 per week

CEB231 CONCRETE TECHNOLOGY
Credit Points: 7  Contact Hours: 3 per week

CEB240 SOIL MECHANICS 1
Systematic description and classification of soil for engineering purposes; moisture/density relationships; compaction; pore pressure, effective stress and suction; shear strength of cohesionless and cohesive soils; lateral earth pressure; earth retaining structures design.
Prerequisite: CEB185[R]  Credit Points: 6  Contact Hours: 3 per week

CEB241 SOIL MECHANICS 2
Bearing capacity of shallow foundations; permeability and seepage; surface loading on an elastic medium; pore pressure parameters; consolidation; settlement of shallow foundations; computer applications in seepage and consolidation.
Prerequisite: CEB240[R]  Credit Points: 7  Contact Hours: 3 per week

CEB253 STRUCTURAL ENGINEERING 1
The calculation of deflections for determinate beams, frames and trusses and the analysis of indeterminate structures by the method of superposition; and computer-based analytical procedures.
Prerequisite: CEB185[R]  Co-requisites: CEB243, CEB282[R]  Credit Points: 6  Contact Hours: 3 per week

CEB260 FLUID MECHANICS
Introduction to fluid mechanics and its relationship to civil engineering practice. Fluid properties; fluid statics, pressure, forces, buoyancy and stability; continuity, energy and momentum applied to steady one-dimensional flows; viscosity, turbulence, boundary layers and fluid dynamics forces; dimensional analysis. The subject includes lectures, tutorials and practical work.
Prerequisites: CEB185[R], MAB193  Credit Points: 7  Contact Hours: 3 per week

CEB281 STRENGTH OF MATERIALS
Extension of elastic theory from engineering mechanics into more complex states of stress and shape; composite beams; stress and strain transformations; combined loading; unsymmetrical bending; shear flow; shear centre; torsion; theories of failure; stress concentrations and fatigue.
Prerequisite: CEB185[R]  Credit Points: 6  Contact Hours: 2 per week

CEB282 STATICS
The structural behaviour of trusses, beams and frames. Qualitative evaluation of deflected shapes, shear force and bending moment diagrams. Load paths and structural idealisation of real structures.
Prerequisite: CEB185[R]  Co-requisite: CEB184[R]  Credit Points: 2  Contact Hours: 1 per week

CEB291 CIVIL ENGINEERING MATERIALS
Physical, chemical and engineering properties of common civil engineering materials. Ferrous and non-ferrous metals and alloys; timber, bitumen, cladding materials, polymers, corrosion of materials and protective measures. Selection of materials. Role of quality control in engineering subjects.
Prerequisites: MEB171, MEB133  Credit Points: 7  Contact Hours: 3 per week

CEB292 INDUSTRIAL EXPERIENCE 2
Students should engage in at least five weeks' employment, approved by the Head of School. For details see the School's Industrial Experience Handbook.
Contact Hours: 5 weeks

CEB304 CIVIL ENGINEERING DESIGN 1
Design project work involving the use of steel and reinforced concrete, geotechnical and highway designs; the influence of construction method to design will be emphasised; student will prepare design calculations and sketches with the help of design aids and computer software; the development
of problem solving skills will be emphasised throughout the projects.

**Prerequisites:** CEB201[R], CEB202[R], CEB240, CEB253, CEB220

**Co-requisites:** CEB354, CEB231, CEB312, CEB241

Credit Points: 8  Contact Hours: 4 per week

**CEB305 CONSTRUCTION PLANNING & ECONOMICS**

The use of manual and computer based methods for the planning and programming of projects. The fundamental principles of economic and financial analysis pertaining to both the planning and execution of engineering projects.

**Prerequisite:** CEB307[R]

Credit Points: 6  Contact Hours: 3 per week

**CEB306 CONCRETE STRUCTURES 2**

Basic principles involved in the serviceability limit state and ultimate limit state design of prestressed concrete structures. Stress blocks and equivalent loads due to prestress, losses, serviceability limit states of cracking and deflection, ultimate limit states of bending and shear, evaluation of deflections and design.

**Prerequisite:** CEB202[R]

Credit Points: 7  Contact Hours: 3 per week

**CEB307 CONSTRUCTION PRACTICE**

Basic procedures of civil engineering construction. This subject provides a foundation for further construction studies and also gives a practical perspective to later theoretical subjects.

**Prerequisites:** CEB231[R], CEB281[R]

Credit Points: 6  Contact Hours: 3 per week

**CEB312 HIGHWAY ENGINEERING**

Highway geometry including vehicle performance and human factors as they relate to road geometry, geometric design, geometric coordination and use of computer-aided design. Highway pavements including pavement materials and construction processes, pavement cross sections and drainage, pavement theory and pavement analysis methods.

**Prerequisites:** SVB306[R], MAB193, CEB291[R]

**Co-requisites:** MAB493, CEB240

Credit Points: 6  Contact Hours: 3 per week

**CEB313 TRAFFIC ENGINEERING**

Traffic theory including traffic behaviour, models, traffic management analysis including unsignalised and signalised intersections, street lighting, signs and markings, barriers and parking. Traffic studies and transport planning procedures.

**Prerequisite:** MAB493  **Co-requisite:** CEB312

Credit Points: 6  Contact Hours: 3 per week

**CEB354 STRUCTURAL ENGINEERING 2**

The analysis of indeterminate structures using moment distribution and matrix structural analysis techniques. Analysis of simple cable structures.

**Prerequisites:** CEB253[R], MAB493

Credit Points: 7  Contact Hours: 3 per week

**CEB355 STRUCTURAL ENGINEERING 3**

Structural analysis of determinate structures under moving loads using influence lines for beams and trusses. The application of plastic analysis techniques to the analysis of beam, frame and slab structures.

**Prerequisite:** CEB281[R]

**Co-requisites:** MAB893, CEB354

Credit Points: 6  Contact Hours: 3 per week

**CEB359 PRINCIPLES OF STRUCTURES 1**

Terminology, forces and reactions; loading on structures, equilibrium and stability; co-planar and non-co-planar forces; resolution of forces; mechanism of structural components under load: compression, tension, bending, shear, deflection. Connections.

**Credit Points:** 4  **Contact Hours:** 2 per week

**CEB360 HYDRAULIC ENGINEERING 1**

The applications of fluid mechanics to pipes and open channel flow, flow measurement and hydraulic machinery. Topics include: steady flow in pipes, networks, flow measurement, uniform flow in open channels, pump and turbines.

**Prerequisite:** CEB260[R]  **Co-requisite:** MAB493

Credit Points: 6  Contact Hours: 3 per week

**CEB361 HYDROLOGY**

An introduction to hydrology and urban drainage design; hydrologic cycle, rainfall and runoff; groundwater evapotranspiration, statistical concepts, urban drainage design; unit hydrograph methods; flood studies; data generation, storage estimation.

**Prerequisite:** CEB260[R]  **Co-requisite:** CEB360

Credit Points: 6  Contact Hours: 3 per week

**CEB364 ENGINEERING SCIENCE 2**

**Prerequisite:** MAB199[R]

Credit Points: 6  Contact Hours: 3 per week

**CEB370 PUBLIC HEALTH ENGINEERING 1**

An introduction to the principles of public health engineering. Causes and effects of water pollution, principles of unit processes and operations of water quality control. An introduction to air pollution, its causes and control.

**Prerequisite:** CHB346[R]

Credit Points: 6  Contact Hours: 3 per week

**CEB392 INDUSTRIAL EXPERIENCE 3**

Students should engage in at least five weeks' employment, approved by the Head of School. For details see the School's Industrial Experience Handbook.

**Contact Hours:** 5 weeks

**CEB393 ENGINEERING INVESTIGATION & REPORTING 1**

The appropriate techniques of investigation and reporting on civil engineering processes.

**Prerequisite:** CMB108[R]

Credit Points: 3  Contact Hours: 2 per week

**CEB401 DESIGN PROJECT**

Students will work in groups to produce initial studies and outline designs of typical civil engineering projects. Students are required to define problems, establish goals for the project, identify and collect necessary information, generate alternative solutions and optimise some of these solutions. Students are to develop an awareness of the possible impact of civil engineering projects on ecosystems. Students will prepare and present reports on aspects of selected projects, including feasibility studies, environmental and economic assessment. Compulsory site visits will be included.

**Prerequisites:** CEB361[R], CEB305[R], CEB313[R]

**Co-requisites:** CEB470, CEB440,

Credit Points: 5  Contact Hours: 3 per week
**CEB403 PROFESSIONAL PRACTICE**
Engineering organisations, project initiation, documentation, form of contract, contract administration, arbitration, safety and insurances, legal responsibilities, ethics. In addition students are given preparation in job applications and interview techniques. Practical inspections are supervised by lecturing staff and engineers associated with the project, and allow valuable consolidation of the theoretical aspects of other subjects.
Prerequisite: CSB191[R] Co-requisite: CEB305
Credit Points: 7 Contact Hours: 2 per week

**CEB404 FIELD TRIP**
This subject involves site visits to several civil and structural projects (generally under construction in south east Queensland). The practical inspections are supervised by lecturing staff and engineers associated with the project, and allow valuable consolidation of the theoretical aspects of other subjects.
Co-requisites: CEB201, CEB202, CEB312, CEB360
Credit Points: 3 Contact Hours: 1.5 per week

**CEB405 CIVIL ENGINEERING DESIGN 2**
Continuation of CEB304, with topics covering structural and civil engineering design, i.e. municipal civil/structural projects. Field visits are required. More general problem solving skills are to be developed so that graduates can successfully complete projects other than those covered during the course.
Prerequisites: CEB341, CEB304, CEB231[R]
Co-requisites: CEB460, CEB470
Credit Points: 6 Contact Hours: 3 per week

**CEB406 STRUCTURAL APPLICATIONS**
Analysis, design, supervision of construction and performance of structures. The subject will evolve around case studies. Topics include: structural systems, structure modelling, sketching, civil engineering structures, designing for construction, detailing and lessons from structural failures, timber structures and the role of testing, controlling vibrations in structures.
Prerequisites: CEB355, CEB291, CEB354[R]
Credit Points: 8 Contact Hours: 3 per week

**CEB422 CIVIL SYSTEMS 2**
Civil engineering systems: understanding and applying advanced civil engineering software, methods of error checking and model validation. Experimental instrumentation and data logging. Financial systems: financial statements for civil engineering enterprises, measurement of assets and liabilities, depreciation rates, interpretation of published financial statements.
Prerequisites: CEB220[R], CEB241[R], CEB460[R], CEB355[R]
Credit Points: 3 Contact Hours: 1 per week

**CEB430 BUILDING CONSTRUCTION**
Through lectures and tutorials this subject will provide a broad appreciation of building techniques and principles. The subject coverage will include details of building construction from footings to fitting out for low and high-rise structures including appropriate building regulations.
Prerequisite: CEB305[R]
Credit Points: 3 Contact Hours: 2 per week

**CEB459 PRINCIPLES OF STRUCTURES 2**
Loading on buildings, foundations and footings, timber, construction, floor, wall and roof framing and cladding, fastening and connections. Structural stability: Masonry construction: brickwork and blockwork, loadbearing construction, continuity, stiffening, codes.
Prerequisite: CEB353[R]
Credit Points: 4 Contact Hours: 2 per week

**CEB460 HYDRAULIC ENGINEERING 2**
Hydraulics with particular emphasis on unsteady flow, movable boundary hydraulics, hydraulic models and hydraulic design of structures. Topics include: steady flow compound open channels with variable roughness; unsteady flow in pipes; unsteady flow in open channel flow; design of hydraulic structures such as transitions, culverts, crests, chutes, etc. Mobile boundary hydraulics; and the theory and practice relating to fixed and mobile boundary, natural scale and distorted models.
Prerequisite: CEB360[R]
Co-requisite: CEB361[R]
Credit Points: 7 Contact Hours: 3 per week

**CEB470 PUBLIC HEALTH ENGINEERING 2**
Development of principles taught in CEB370 to enable functional design of treatment units to be undertaken. An introduction to wastewater and water reticulation. On completion of this subject the student should be able to proceed to simple design exercises in water supply and treatment processes.
Prerequisite: CEB370[R]
Credit Points: 5 Contact Hours: 3 per week

**CEB491 PROJECT (CIVIL)**
The student is required to undertake a relatively difficult task in an area of civil engineering practice requiring further research and development. Each project will include: a literature review; problem definition; organisation and execution of a program of investigation; critical analysis of investigation; presentation of a seminar on the work and presentation of a written report.
Prerequisites: Student must normally be in final year of course, however students in the penultimate year of their course may be given special permission to attempt CEB491.
Co-requisites: CEB393, CEB492
Credit Points: 9 Contact Hours: 3 per week

**CEB492 ENGINEERING INVESTIGATION & REPORTING 2**
Verbal and written presentation techniques of civil engineering investigation topics. Each student will be required to prepare a report and deliver a 1/2 hour lecture on a civil engineering investigation topic.
Prerequisite: CEB393[R]
Credit Points: 3 Contact Hours: 1 per week

**CEB501 CIVIL ENGINEERING PRACTICE 1**
Lectures, tutorials, practical work and field trips covering current topics in a specified area of civil engineering at an advanced undergraduate level. Subject is offered irregularly. When offered the subject material will be advertised by the Head of School.
Prerequisites: Students must be substantially in the final year of their course.
Credit Points: 6 Contact Hours: 3 per week

**CEB503 ADVANCED CONSTRUCTION METHODS**
Examination of existing practice and technology in the construction industry and insights into current and future developments in construction techniques and plant.
Prerequisites: CEB307[R], CEB305[R]
Credit Points: 5 Contact Hours: 3 per week

**CEB504 ENGINEERING SCIENCE 3**
Hydrology: rainfall, stream flow measurement; hydraulic design of drainage. Soil mechanics for sur-
CEB505 PROJECT MANAGEMENT & ADMINISTRATION

Using case studies and 'role playing' techniques, students will be required to develop solutions to a variety of project management problems and to submit reports and make presentations regarding these exercises.

Prerequisite: CEB305
Credit Points: 6
Contact Hours: 3 per week

CEB506 CIVIL ENGINEERING PRACTICE 2

Lectures, tutorials, practical work and field trips covering current topics in a specified area of civil engineering at an advanced undergraduate level. Subject is offered irregularly. When offered the subject must be advertised by the Head of School.

Prerequisites: Students must be substantially in the final year of their course.
Credit Points: 6
Contact Hours: 3 per week

CEB511 TRANSPORT ENGINEERING 2

A series of lectures and practical work focussing in depth on two aspects of transport engineering, rural road upgrading and small urban area transportation planning and road needs requirements. Work covered includes highway upgrading, deficiency analysis, traffic accident analysis, traffic flow simulation, staged development including overtaking lanes and rural intersection design; application of four step transportation planning models, surveys, zone selection, network development, trip generation, distribution, assignment, model calibration, future year modelling, evaluation and selection of road needs, sensitivity analysis.

Prerequisite: CEB512
Credit Points: 6
Contact Hours: 3 per week

CEB512 TRANSPORT ENGINEERING 1

Land use/transport interaction, trip generation, trip distribution, mode choice, transport operations analysis, transport economics, transport capacity, urban road planning principles, urban transit planning, railway, aviation and bulk commodity systems design. Advanced pavement design techniques.

Prerequisite: CEB313
Credit Points: 6
Contact Hours: 3 per week

CEB520 FINITE ELEMENT METHODS

Finite element, finite difference and similar numerical techniques. Theoretical and modelling considerations are covered in the context of case studies in structures, soil mechanics and hydraulics.

Prerequisite: CEB220
Credit Points: 6
Contact Hours: 3 per week

CEB531 MASONRY DESIGN

Prerequisite: CEB355, CEB306
Co-requisite: CEB291
Credit Points: 6
Contact Hours: 3 per week

CEB541 GEOTECHNICAL ENGINEERING 2

Prerequisite: CEB341
Credit Points: 6
Contact Hours: 3 per week

CEB542 GEOTECHNICAL ENGINEERING 3

Development of marginal lands: trafficability; embankments on soft soil; preloading; vertical drainage; vibroflotation; dynamic compaction and other methods of deep foundation improvement. Rock excavation and rock slope stabilisation. Soil improvement, including mechanical and chemical stabilisation, soil reinforcement and other techniques which may be economically feasible. Anchoring in soil and rock. Principles of earth and rockfill design and construction.

Prerequisite: CEB341
Credit Points: 6
Contact Hours: 3 per week

CEB551 ADVANCED STRUCTURAL DESIGN

This subject will widen and deepen the experience of undergraduates in the structural design area. Emphasis is placed on the design of more complex structures. Normally three projects will be studied which will involve some or all of: design in new materials, new analytical techniques, new codes of practice, novel structures.

Prerequisites: CEB354, CEB201, CEB306
Co-requisite: CEB405
Credit Points: 6
Contact Hours: 3 per week

CEB559 PRINCIPLES OF STRUCTURES 3

Structural properties of mild steel and high tensile steel. Structural framing and connections. Structural systems in steel: beams and columns, portal frames, space frames, trusses, tenseile structures.

Prerequisite: CEB453
Credit Points: 4
Contact Hours: 3 per week

CEB560 HYDRAULIC ENGINEERING 3

Lectures, tutorial, practical work and site visits examining selected topics in water engineering. Topics will be chosen from hydrology, mobile bed hydraulics, river hydraulics, hydraulic structures, urban drainage, physical and mathematical modelling.

Prerequisites: CEB361, CEB460
Credit Points: 6
Contact Hours: 3 per week

CEB561 COASTAL ENGINEERING

Coastal engineering: wave theory, recording and analysis, wave generation; coastal processes, tides, surges, etc. currents, sediment movement, foreshore protection; coastal inlets, canal systems; planning and design of coastal structures; hydraulic models for coastal studies. At least one major site visit will be required.

Prerequisite: CEB360
Co-requisite: CEB460
Credit Points: 6
Contact Hours: 3 per week

CEB570 PUBLIC HEALTH ENGINEERING 3

Basic solid waste management (of domestic, commercial and industrial wastes); the general principles of industrial liquid waste management, with examples of some important industries. Students completing this subject will have gained a basic understanding of solid and industrial liquid waste management.

Co-requisite: CEB470
Credit Points: 6
Contact Hours: 3 per week
CEB659 PRINCIPLES OF STRUCTURES
Prerequisite: CEB553 [R]
Credit Points: 4 Contact Hours: 2 per week

CEB701 CIVIL ENGINEERING
Introduction to the measurement of civil engineering works based on the study of SMM of Civil Engineering Quantities. Detailed study of construction methods, plant, specification and measurement of: earthworks, clearing, compaction and dredging; roadworks, survey, bulk excavation and filling, pavement construction, kerbing, culverts; and bridges, types of structures, foundations, prestressed concrete. It includes a brief introduction to computer applications such as earthwork calculations, etc.
Credit Points: 4 Contact Hours: 2 per week

CEB801 CIVIL ENGINEERING
Further study of SMM of Civil Engineering Quantities leading to measurement of: foundations, (pad footings, piles and piers); bridges, (further study, including abutments, superstructure, approach embankments, safety structures); wharves, (over water work, deck structures); specialised earthworks, (tunneling, dredging, open cuts, earthworks, earth dams).
Prerequisite: CEB701 [R]
Credit Points: 4 Contact Hours: 1.5 per week

CEP107 CONSTRUCTION MANAGEMENT & ECONOMICS
The management of operational features of engineering practice. Topics include engineering economics, contracts, plant and labour considerations of concern to the engineer and manager.
Credit Points: 8 Contact Hours: 2 per week

CEP109 MUNICIPAL LAW & REGULATIONS
The legislative framework for municipal engineering in Queensland. The various acts and regulations affecting the practising municipal engineer including the powers and responsibilities of the municipal engineer are covered.
Credit Points: 8 Contact Hours: 2 per week

CEP127 ROAD & TRAFFIC ENGINEERING
Urban traffic management, parking systems, surveys, intersection analysis with emphasis on the design and evaluation of the urban road network. The design of rural roads. Design of pavement structures. Pavement management.
Credit Points: 12 Contact Hours: 3 per week

CEP128 MUNICIPAL ENGINEERING PLANNING
The principles of town and regional planning for municipal engineers in Queensland. The objectives and methodology of planning, practical problem solving, legislation and other factors of concern to the municipal and development engineer.
Credit Points: 12 Contact Hours: 3 per week

CEP131 ENGINEERING MANAGEMENT & ADMINISTRATION
Management principles and functions. Strategic and tactical planning, forecasting, decision making, budgeting and controls in organisations, techniques of project control. Human resources, managing change and development. Formulation of policy within a local authority. Local authority internal organisation, management, powers, responsibilities and functions, accounting and budgetary cycles, sources of finance and expenditure patterns.
Credit Points: 8 Contact Hours: 2 per week

CEP172 WATER QUALITY ENGINEERING
Characteristics of liquid wastes. Their effect on receiving waters. Dispersion and decay of pollutants in the water environment. Water quality standards and objectives.
Credit Points: 8 Contact Hours: 2 per week

CEP174 PUBLIC HEALTH ENGINEERING PRACTICE
Water supply network analysis, water sources, reservoirs, pumps, water hammer, sewerage systems, pump stations, corrosion, water quality, water and wastewater treatment, laboratory demonstrations, field trip.
Credit Points: 12 Contact Hours: 3 per week

CEP200 PROCESS MODELLING
Role of models in engineering design and investigation. Principles of modelling techniques and their uses, limitations and relevant applications.
Credit Points: 8 Contact Hours: 2 per week

CEP215 ADVANCED TRAFFIC ENGINEERING
Traffic flow theory and traffic management. Development of analytical and computer analysis routines for urban intersection design, their background and applications.
Credit Points: 8 Contact Hours: 2 per week

CEP218 TRANSPORTATION ENGINEERING
Techniques for the appraisal of rural and urban area road systems, bus operations, airport design, construction and maintenance.
Credit Points: 12 Contact Hours: 3 per week

CEP276 ADVANCED TREATMENT PROCESSES
The design of water and wastewater treatment plants, including conventional and alternative processes. Current practice and development. Operation of treatment plants.
Prerequisite: CEP174 [R]
Credit Points: 8 Contact Hours: 2 per week

CEP277 WASTE MANAGEMENT
Characteristics and analysis of solid wastes. Collection, storage, transportation, handling, recycling and disposal. Sources and characteristics of industrial liquid wastes. Treatment design methodology. Pilot scale modelling and investigation. Case studies of selected classes of industrial wastes.
Co-requisite: CEP174
Credit Points: 12 Contact Hours: 3 per week

CEP270 ENVIRONMENTAL LAW & ASSESSMENT
Credit Points: 8 Contact Hours: 2 per week
The student is required to investigate in depth an applied topic within the range of civil engineering practice and to carry out design, computing, model or experimental design and construction, experimental work and testing.

Credit Points: 20
Contact Hours: 5 per week

CEP997 PROJECT A
The student is required to investigate in depth an approved topic within the range of civil engineering practice and to carry out design, computing, model or experimental design and construction, experimental work and testing. The results will be presented in a major formal report.

Credit Points: 36
Contact Hours: 4 per week

CET120 CIVIL SYSTEMS 1
Introduction to civil engineering applications of computers. Hardware and operating systems. Word processors, spread sheets and data bases as used in civil engineering offices. Introduction to high level languages.

Credit Points: 7
Contact Hours: 3 per week

CET135 ENGINEERING MECHANICS
Equilibrium of forces and moments, reactions, free body diagrams, truss analysis, shear force and bending moment diagrams.

Credit Points: 7
Contact Hours: 3 per week

CET180 CIVIL DRAFTING PRACTICE A
Short, practical exercises to cover the highest possible range of drafting experience commensurate with the first year students stage of development.

Co-requisite: MET120
Credit Points: 3
Contact Hours: 3 per week

CET190 CIVIL ENGINEERING MATERIALS

Credit Points: 7
Contact Hours: 3 per week

CET195 CIVIL ENGINEERING 1
Civil engineering: the profession, organisation and work options. Measurement in civil engineering, maintenance of standards, role of NML and NATA.

Technical writing, reports, letters, etc. Mathematical techniques applicable to relevant examples.

Credit Points: 7
Contact Hours: 3 per week

CET235 LABORATORY PRACTICE A
The type and role of laboratories in civil engineering. NATA registration and calibration requirements. Quality control and assurance, basic statistics. Basic measuring equipment and techniques; associated calculations. Presentation of data in reports. Laboratory work in materials and hydraulic engineering to demonstrate measuring techniques.

Co-requisites: CET365, CET435
Credit Points: 3
Contact Hours: 3 per week

CET255 STRUCTURAL MECHANICS
Stress, direct flexure, and shear in beams and shafts. Combined stress conditions. Deflections in beams and trusses.

Prerequisite: CET135[R]
Credit Points: 7
Contact Hours: 3 per week

CET286 CIVIL OFFICE PRACTICE
Preparation and layout of civil engineering drawings; design office procedures including methods of data manipulation, presentation and checking.

Prerequisite: MET120
Credit Points: 7
Contact Hours: 3 per week

CET287 CIVIL OFFICE PRACTICE A
Further experience in civil engineering design drafting/drawing, additional to that undertaken in CET286 Civil Office Practice.

Prerequisite: MET120
Co-requisite: CET286
Credit Points: 3
Contact Hours: 3 per week

CET306 FIELD PRACTICE 1A
Setting out, as-built surveys and drawings, photography and field sketching; field measurement and sampling in water, soils and materials; implications of field measurements on design and construction practice.

Prerequisites: SVT306[R], CET365[R]
Co-requisites: CET775
Credit Points: 3
Contact Hours: 3 per week

CET365 HYDRAULIC ENGINEERING
Properties of fluids, simple hydrostatics, fundamental characteristics and equations of fluid flow, pipe and open channel flow, hydraulic measurements. Laboratory work on basic fluid behaviour and instrumentation.

Prerequisite: CET135[R]
Credit Points: 7
Contact Hours: 3 per week

CET387 CIVIL ENGINEERING DRAFTING A
Further experience in municipal engineering design drafting/drawings, additional to that undertaken in CET385 Civil Engineering Drafting.

Prerequisite: CET286[R]
Co-requisite: CET585
Credit Points: 3
Contact Hours: 3 per week

CET405 FIELD PRACTICE 2A
This subject will involve field visits and laboratory workshops on many aspects of civil engineering construction.

Credit Points: 3
Contact Hours: 3 per week

CET420 CIVIL SYSTEMS 2
Further study of civil engineering office applications of computing. Data management, error recovery, net-
working, pre and post processing in a CAD environment. Software installation and data acquisition.

Prerequisite: CET120
Credit Points: 3  Contact Hours: 3 per week

- CET435 CONCRETE PRACTICE
Credit Points: 7  Contact Hours: 3 per week

- CET495 PROJECT A
 Undertake a substantial project in the student’s chosen field. Involves the investigation of the topic, performance of the tests, design calculations, drawings, etc. and submission of a comprehensive report.
Prerequisite: Subject must be in student’s final year
Credit Points: 3  Contact Hours: 3 per week

- CET565 ROAD & DRAINAGE ENGINEERING
Elements of road construction and maintenance, road pavement types, design and construction. Road drainage principles, design and construction of urban and rural culverts, urban stormwater drainage systems.
Prerequisite: CET815[R], CET645[R], CET365[R]
Credit Points: 7  Contact Hours: 3 per week

- CET585 CIVIL ENGINEERING DRAFTING
Preparation of municipal engineering drawings including roadworks and stormwater drainage. State and local authority standards. Projects involve varying amounts of design computations and at least one example will involve computer usage. Introduction to quantity take-off, bills of quantities, cost estimates and cross referencing between drawings, bills of quantities and specifications.
Prerequisite: CET286[R]  Co-requisite: CET565
Credit Points: 7  Contact Hours: 3 per week

- CET598 PROJECT 2
An individually designed program including designs, reports and investigations in the area of sanitary engineering.
Prerequisite: Student must have completed 72 credit points.
Credit Points: 21  Contact Hours: 9 per week

- CET606 CONSTRUCTION MANAGEMENT
Construction planning, organisational structure, construction reporting, contract management and administration, human relations, plant hire.
Credit Points: 7  Contact Hours: 3 per week

- CET645 SOIL MECHANICS
Identification and classification of soils; testing methods required. Compaction of soil, soil permeability, effective and total stress, shear strength and compressibility. Introduction to retaining walls, bearing capacity, CBR testing and insitu sampling and testing.
Prerequisite: CET135[R]
Credit Points: 7  Contact Hours: 3 per week

- CET703 CIVIL ENGINEERING PRACTICE I
Current topics in a specified area of civil engineering practice at a level appropriate to the course and as approved by the Head of School. The content of this subject may be changed from semester to semester depending on demand and available staff.
Prerequisite: Student must have completed 72 credit points.
Credit Points: 7  Contact Hours: 3 per week

- CET704 CIVIL CONSTRUCTION PRACTICE
Principles of temporary works design. Form work, false work and scaffolding, Shoring, de-watering, excavation and earthworks, plant; introduction to the Construction Safety Act and Regulations.
Credit Points: 7  Contact Hours: 3 per week

- CET707 MUNICIPAL ENGINEERING
Structures and function of local authorities, legislation, municipal road and street construction, design offices, traffic management, parking, town planning and subdivision, solid waste management, building practice, other municipal engineering aspects, field trip.
Prerequisite: CET815[R]
Co-requisite: CET565, CET775
Credit Points: 7  Contact Hours: 3 per week

- CET735 ADVANCED LABORATORY TESTING I
Testing work to give experiences with a range of equipment and testing procedures. Includes tests in a number of selected laboratory areas.
Credit Points: 7  Contact Hours: 3 per week

- CET756 BUILDING CONSTRUCTION PRACTICE
Prerequisite: CET190[R]
Credit Points: 7  Contact Hours: 3 per week

- CET775 PUBLIC HEALTH ENGINEERING
Water supply and sewerage systems, water sources, demand, water and wastewater treatment, water quality, treatment plants, swimming pools, laboratory analysis and field visits.
Prerequisite: CET365[R]
Credit Points: 7  Contact Hours: 3 per week

- CET776 EQUIPMENT OPERATION & MAINTENANCE
Principles and practice of the operation and maintenance of equipment in water and wastewater treatment plants. Overview of plant; motors, engines, pumps, compressors and generators; rotary and rectilinear scraping and raking mechanisms; chemical handling, mixing, dosing; safety and maintenance scheduling for specific equipment items.
Prerequisite: CET365[R], CHA140[R]
Credit Points: 7  Contact Hours: 3 per week

- CET777 PROCESS OPERATION & CONTROL I
Principles of unit processes of water and wastewater treatment, with particular reference to their operation. The methods of operational control of these processes.
Prerequisite: CET365[R], CET775[R], CHA140[R]
Credit Points: 7  Contact Hours: 3 per week

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites &amp; Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>CET797</td>
<td>PROJECT 1</td>
<td>Undertake a substantial project in the student's chosen field. Involves the investigation of the topic, performance of tests, design calculations, drawings, etc. and submission of comprehensive report. Prerequisites: Student must have completed 72 credit points. Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET802</td>
<td>CIVIL ENGINEERING PRACTICE 2</td>
<td>See CET703. Prerequisites: Students must have completed 72 credit points. Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET815</td>
<td>ROAD LOCATION &amp; DESIGN</td>
<td>Road location principles, road design and geometry including computer applications; subdivision and subdivision street design; introduction to traffic engineering; intersection design. Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET838</td>
<td>ADVANCED LABORATORY TESTING 2</td>
<td>Testing projects undertaken in specialist areas and presented as a series of major reports. Each report will be expected to include a discussion of the tests undertaken and the results obtained. Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET856</td>
<td>ADVANCED CONSTRUCTION TECHNIQUES</td>
<td>Builds on CET606. History of construction; planning and programming including critical path analysis and resource levelling; contracts; crane selection and safety; case studies; detailed and 'fast' estimating techniques. Prerequisite: CET606[R] Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET876</td>
<td>PLANT OPERATION &amp; MAINTENANCE</td>
<td>Operation and maintenance requirements of water quality treatment plants; scheduling, labour control, workshop organisation, safety, training and performance monitoring. Prerequisite: CET606[R] Co-requisite: CET776 Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET877</td>
<td>PROCESS OPERATION &amp; CONTROL 2</td>
<td>Extends CET777. Unit processes of water and wastewater treatment with particular reference to their operation. The methods of operational control of these processes. Prerequisite: CET777[R] Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CET888</td>
<td>STRUCTURAL DRAWING &amp; DESIGN</td>
<td>Minor structural design and layout will be undertaken. Preparation of advanced structural engineering drawings covering steel, reinforced and prestressed concrete and timber where geometric and physical restraints interact with the structural design process. Prerequisites: MET120, CET286 Co-requisites: CET787, CET585, CET655 Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CHA11I</td>
<td>LABORATORY TECHNIQUES</td>
<td>A course introducing safe and proficient procedures in the laboratory, and giving practice in the manipulation of common elementary laboratory apparatus, equipment and reagents. On completing the course the student should be able to handle, correctly and safely, all the basic pieces of laboratory equipment and be familiar with their main functions and limitations. Credit Points: 8 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CHA145</td>
<td>INTRODUCTORY CHEMISTRY</td>
<td>An integrated course of fundamental chemistry covering: the nature of chemistry, atomic molecular and nuclear structure, bonding and types of bonds; the structure and nature of matter, molecular formulae, atomic and molecular weights; the periodic classification; reduction/oxidation, chemical equilibria; liquids and solutions and simple phase equilibria; equilibria in electrolyte solutions; pH and its measurement. The chemistry and properties of some common laboratory chemicals. Practical applications are emphasised. Credit Points: 8 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CHA218</td>
<td>ANALYTICAL CHEMISTRY</td>
<td>A lecture and laboratory program covering fundamental theory and techniques of titrimetric and gravimetric analysis. Prerequisite: CHA111 Credit Points: 8 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CHA219</td>
<td>QUALITATIVE ANALYSIS</td>
<td>This course considers the behaviour of a range of common cations and anions towards common laboratory reagents. These reactions form the basis of procedures for the separation and identification of these cations and anions. Qualitative testing for elements in organic molecules together with test procedures for qualitative identification of functional groups in organic molecules are also covered. Prerequisite: CHA111 Credit Points: 6 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>CHA230</td>
<td>CHEMISTRY OF INORGANIC MATERIALS</td>
<td>An extension of the basic atomic and molecular theory introduced in CHA145 to include atomic orbitals, orbital shapes and quantum numbers; radioactive breakdown and applications; bonding, molecular orbitals; hybridisation, shapes of simple molecules relating to their properties; simple coordination chemistry. The occurrence, extraction/ manufacture, properties and uses of the elements and the important inorganic compounds derived from a selection of members of the chemical groups. Prerequisite: CHA145 Credit Points: 4 Contact Hours: 2 per week</td>
</tr>
<tr>
<td>CHA240</td>
<td>INSTRUMENTAL TECHNIQUES</td>
<td>An overview of the principles and practice of modern instrumental analysis, including the nature of electromagnetic radiation and its interaction with matter; use of visible, UV and IR spectroscopy; emission and absorption phenomena; chromatographic techniques and electroanalytical methods. Prerequisite: CHA111 Credit Points: 8 Contact Hours: 3 per week</td>
</tr>
</tbody>
</table>
| CHA250       | ORGANIC CHEMISTRY                               | An introduction to functional group chemistry including hydrocarbons, aromatic compounds, organic halides, alcohols, phenols and ethers and also an
introduction to the use of infrared spectroscopy to indicate the presence of particular functional groups.

**Prerequisite:** CHA145

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA270 PHYSICAL CHEMISTRY I**
The first part of an integrated syllabus of physical chemistry in the Associate Diploma. A study of the fundamental aspects of chemical energetics, solution chemistry and equilibria and practical applications thereof.

**Prerequisite:** CHA145

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA315 INSTRUMENTAL ANALYTICAL CHEMISTRY**
A course of lectures and practical work introducing the principles and practices of mass spectrometry, fluorescence spectroscopy and ICP together with further development of selected topics from CHA240.

**Prerequisite:** CHA218, CHA240

**Co-requisite:** CHA319

**Credit Points:** 8

**Contact Hours:** 4 per week

**CHA319 ANALYTICAL CHEMISTRY 2**
A course of lectures and practical work designed to develop further the basic titrimetric and gravimetric analysis principles introduced in CHA218. The practical program will feature the analysis of commercial materials with emphasis on sample dissolution techniques.

**Prerequisite:** CHA218

**Credit Points:** 6

**Contact Hours:** 3 per week

**CHA320 CHEMICAL PROCESS PRINCIPLES 1**
This course discusses chemical reactors (both homogeneous and heterogeneous), unit operations (transport and preparation of materials and separation of materials), and material and energy balances in chemical processes.

**Prerequisite:** CHA270

**Co-requisite:** CHA370

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA350 ORGANIC CHEMISTRY 2**
This subject continues the study of functional groups and includes carbonyl compounds, carboxylic acids and their derivatives, organic nitrogen compounds, including heterocycles, as well as selected polyfunctional compounds such as triglycerides, amino acids and proteins. Further uses of infrared spectroscopy are discussed.

**Prerequisite:** CHA250

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA368 INDUSTRIAL CHEMISTRY**
This subject aims to develop an appreciation of the basic aspects of product and quality control, an understanding of the underlying fundamental chemistry and an overall concept of the chemical technology involved in, for example, the petroleum and petrochemical industry, the polymer, plastic and adhesive industries, the paint industry, the textile industry, the sugar industry, water treatment plants, the glass and ceramics industry, and the cement industry. Field trips are an integral part of this subject.

**Prerequisites:** CHA230, CHA250, CHA320

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA370 PHYSICAL CHEMISTRY 2**
The second part of the integrated syllabus of physical chemistry of the Associate Diploma. Covers the areas of chemical kinetics, surface chemistry and elementary electrochemistry.

**Prerequisite:** CHA270

**Credit Points:** 6

**Contact Hours:** 2 per week

**CHA410 COMPUTERS IN CHEMISTRY**
This course outlines the use of computers in various aspects of the chemical industry, both in laboratory and plant. The different approaches to laboratory automation are discussed and a detailed study of computer control in a selected industry undertaken. Field trips also are included.

**Prerequisite:** CSA259

**Credit Points:** 8

**Contact Hours:** 2 per week

**CHA442 INTRODUCTION TO OCCUPATIONAL SAFETY**
Basic first aid relevant to laboratory, plant and field situations; principles and practice of safe handling of common laboratory chemicals; safety aspects of laboratory design.

**Credit Points:** 4

**Contact Hours:** 2 per week

**CHA520 CHEMICAL PROCESS PRINCIPLES 2**
A lecture and laboratory course which deals with measurement systems, the principles of process control and the applications of process control in the chemical industry.

**Prerequisite:** CHA320

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA550 ORGANIC CHEMISTRY 3**
This subject gives students an appreciation of the chemistry and uses of organic compounds encountered in industry, such as agricultural chemicals, fats and oils, waxes, detergents, dyes, drugs, elastomers, fibres, adhesives and cellulose derivatives.

**Prerequisite:** CHA350

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA580 FOOD CHEMISTRY 1**
The basic chemical components of food, fats and oils, proteins, carbohydrates, vitamins and minerals; factors affecting quality such as texture, flavour and colour. Measurements of food quality. A major assignment related to the dairy industry is incorporated.

**Prerequisites:** CHA240, CHA250, CHA218

**Co-requisite:** CHA350

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA610 INDUSTRIAL ANALYSIS**
A course involving the use of both qualitative (semimicro) and quantitative techniques in the analysis of commercially important materials, including ores, cement, fertiliser, fats, oils and sugar products.

**Prerequisites:** CHA318, CHA319

**Credit Points:** 8

**Contact Hours:** 3 per week

**CHA644 PROCESS MEASUREMENT & MONITORING 1**
A study of the physical and chemical measurements involved in: the analysis of raw and potable waters; and the determination of organic and microbiological pollution. Emphasis is placed on sampling and sample preservation laboratory techniques, interpretation of results and the significance of the measured parameters in the operation and control of water and wastewater treatment plants.

**Prerequisites:** CET365, CET775

**Co-requisite:** CHA140

**Credit Points:** 7

**Contact Hours:** 3 per week
CHB173 CHEMISTRY 1A
States of matter: gases, liquids, solids; kinetic theory of gases, real gases; thermodynamics: forms of energy, work and heat; thermochemistry, enthalpies of formation, combination, etc.; thermochemical calculations; entropy, force energy, spontaneity of reactions; equilibria: equilibrium constants, homogeneous and heterogeneous equilibria; ionic equilibria—acids and bases, pH, buffer solutions, acid-base titrations; kinetics: rates of chemical processes, dependence of rate on concentration, order of reaction, integrated rate equations; experimental methods; temperature dependence of rate constant; catalysis; conductance: introduction to electrochemistry, bonding theory and foundations of spectroscopy: quantum theory, classical mechanics; the dynamics of microscopic systems, Schroinger equation, translational, rotational and vibrational motions; atomic spectra and structure, quantum numbers and orbitals, electron spin.
Prerequisites: CHB001
Credit Points: 12
Contact Hours: 6 per week

CHB182 CHEMISTRY 1
Chemical stoichiometry; thermochemistry; atomic structure; chemical bonding; chemical reactions; carbon compounds; states of matter; chemical equilibrium; acids and bases; ions and ionic equilibria.
Prerequisite: Year 12 Chemistry—Sound achievement.
Credit Points: 12
Contact Hours: 5 per week

CHB183 CHEMISTRY 1B
Fundamental studies in two of the three sub-discipline areas of chemistry—organic chemistry and organic chemistry; the periodic table; acid, bases and salts; chemical reactions and stoichiometry; chemistry of hydrogen; chemistry of oxygen; principles of bonding in compounds of carbon; structural and electrical effects in compounds of carbon; chemical reactivity of organic molecules; radical reactions of organic hydrocarbons; mechanism and industrial significance, halocarbons and industrial solvents; addition reactions of alkenes, mechanism and industrial significance, polymers and plastics.
Prerequisites: Sound achievement in Senior Chemistry or Co-requisite CHB001
Credit Points: 12
Contact Hours: 5 per week

CHB242 CHEMISTRY 2
Inorganic Chemistry; classification and properties of the elements, shapes of molecules, bonding in solids and coordination chemistry; Organic chemistry: the reactions of alcohols, phenols and ethers, amino compounds, aldehydes, ketones, carbohydrates, the acyl group (carboxylic acids and derivatives), amino acids and proteins, chemical structure, biological activity, and colour in organic compounds: Physical chemistry: the gas laws for ideal and non-ideal systems, first law of thermodynamics and thermochemistry, galvanic cells including applications to the determination of pH and potentiometric titrations, and colloids. (Note: This subject is not compatible with CHB281; credit may not be retained for more than one of these subjects.)
Prerequisite: CHB142
Credit Points: 12
Contact Hours: 6 per week
CHB253 CHEMISTRY 2B
This subject builds on the fundamental concepts studied in Chemistry 1B and develops a knowledge of organic mechanism as a tool for understanding the nature of organic chemical change; the use of modern spectroscopic techniques as an aid to structure elucidation.
Prerequisite: CHB183
Credit Points: 12 Contact Hours: 5 per week

CHB259 ORGANIC CHEMISTRY
The chemistry of carbon; covalent bonding; families of organic compounds, their properties and reactions; bio-molecules and polymers, carbohydrates, lipids, proteins, enzymes.
Credit Points: 12 Contact Hours: 5 per week

CHB282 CHEMISTRY 2
Atomic structure; chemical bonding; thermodynamics; oxidation and reduction; electrochemistry; coordination chemistry; metals; metallurgy, transition elements; silicon, silicates, semiconductors; stereochemistry and optical activity; alcohols, phenols, ethers, amines; aldehydes and ketones, carboxylic acids and functional derivatives of carboxylic acids; infrared spectroscopy.
Prerequisite: CHB182
Credit Points: 12 Contact Hours: 5 per week

CHB283 CHEMISTRY 2A
Continuation of the fundamental studies already commenced in two of the three sub-discipline areas of chemistry. Thermodynamics; surface chemistry; equilibrium electrochemistry; liquids and solutions; the Phase Rule. Chemistry of non-metals; chemistry of metals; coordination chemistry; nuclear chemistry.
Prerequisites: MAB212, PHB122, CHB173 and CHB183
Credit Points: 12 Contact Hours: 5 per week

CHB292 APPLIED SCIENCE FOR DESIGNERS 2
Chemistry for environmental design; basic chemical properties of commonly occurring materials, natural and artificial; common chemical processes in buildings and artifacts.
Credit Points: 4 Contact Hours: 2 per week

CHB313 ANALYTICAL CHEMISTRY 3
Analytical techniques including volumetric glassware, basic laboratory equipment, laboratory balances (top-pan and analytical), sampling, sample dissolution principles; neutralimetry; redoximetry; precipitometry; compleximetry; gravimetry; treatment of results; instrumental methods.
Prerequisites: CHB283, CHB253 or CHB282
Credit Points: 12 Contact Hours: 5 per week

CHB333 INORGANIC CHEMISTRY 3
Coordination chemistry; bonding and structure of metal complexes including crystal field theory and valence bond theory; an introduction to group theory; spectroscopic terms; solution chemistry - the structure of water; aqueous solutions; inorganic properties of water; distribution diagrams; hydrolysis; E/H diagrams; bioinorganic chemistry - biological significance of ligands and metals; HSAB theory; complex equilibria; applications with examples of selected bio-inorganic systems - proteins, haem, etc.; chemistry of lanthanides and actinides; chemistry of selected non-metals; chemistry of precious metals.
Prerequisite: CHB283 or CHB282
Credit Points: 12 Contact Hours: 5 per week

CHB344 ENGINEERING CHEMISTRY M
Specialised chemistry subject designed for mechanical engineers includes such topics as fuels and their combustion; the chemistry of lubricants and lubrication; corrosion and its prevention and water treatment processes.
Prerequisite: CHB002 or equivalent
Credit Points: 4 Contact Hours: 2 per week

CHB346 ENGINEERING CHEMISTRY C
Specialised chemistry subject designed for civil engineers and includes such topics as PH control; the chemistry of materials; polymers and composites; corrosion and its prevention.
Prerequisite: CHB002 or equivalent
Credit Points: 4 Contact Hours: 2 per week

CHB352 ORGANIC CHEMISTRY 3
Fundamentals of organic reactions; major mechanistic classes, nucleophilic substitution, elimination, electrophilic addition, nucleophilic addition, electrophilic substitution; ultraviolet spectroscopy - electronic transitions, chromophores; bathochromic and hypsochromic shifts; sampling; infrared spectroscopy - classification of vibrations, effects of molecular association, conjugation, cumulation, a-halogenes, ring and steric strain. Sampling; nuclear magnetic resonance - basic principles, classification of nuclei, the shielding constant. 1H spectra, areas and integrals, chemical shifts and coupling. Sampling.
Prerequisites: CHB282
Credit Points: 12 Contact Hours: 5 per week

CHB353 ORGANIC CHEMISTRY 3A
The chemistry of carboxylic acids and their functional derivatives, carbanion chemistry including aldol and Claisen condensations; optical and geometrical isomers, stereochemical formulae, the sequence rules and nomenclature, the polarimeter and specific rotation; conformation of ethane, butane, small rings, cyclohexane and substituted cyclohexanes; ultraviolet spectroscopy; infrared spectroscopy; nuclear magnetic resonance.
Prerequisites: CHB183, CHB283
Credit Points: 12 Contact Hours: 5 per week

CHB372 CHEMISTRY 3
Equilibrium electrochemistry: models of the electrified interface, absolute electrode potential. Ionic absorption, electocapillary curves, surface excess, molecular adsorption; phase rule: derivation of phase rule, applications to one component, binary, condensed and ternary systems; thermodynamics: second and third laws; free energy and chemical equilibrium ideal systems; chemical kinetics: order and molecularity of reactions, temperature effects. Reaction rate theories; complex reactions; bonding theory: orbitals and energies of the hydrogen atom; many electron atoms, molecular orbitals; spectroscopy: interaction of radiation with matter. Principles, instrumental design and applications of rotational, vibrational and electronic spectroscopy.
Prerequisite: CHB282 or CHB283
Credit Points: 12 Contact Hours: 5 per week

CHB373 PHYSICAL CHEMISTRY 3A
Equilibrium electrochemistry; applied phase chemistry; applied thermodynamics - 2nd and 3rd laws; kinetics - complex reactions, mechanisms; spectroscopy - interaction of radiation with matter.
Prerequisite: CHB283 or CHB282
Credit Points: 12 Contact Hours: 5 per week
CHB382 CHEMISTRY 3
Biochemical relevance of pH; instrumental analytical techniques used in the pathology laboratory; the coordination chemistry of biological systems; dyes and stains; the thermodynamics and kinetics of biological systems. Prerequisites: CHB312, CHB242
Credit Points: 4 Contact Hours: 2 per week

CHB411 ENVIRONMENTAL ANALYTICAL CHEMISTRY 5
A course of lectures and practical work for students of biological sciences dealing with the principles and application of sampling, and electrometric/spectroscopic/flame separation methods to the analysis of materials from the biosphere. (Note: This subject is not compatible with a major in Chemistry or CHB310.) Prerequisites: CHB102, CHB201, CHB202
Credit Points: 8 Contact Hours: 4 per week

CHB423 CHEMICAL TECHNOLOGY 4
The chemical industry; process flowsheets; sources and interpretation of data; industrial stoichiometry; material and energy balance calculations for both principles of particle mechanics and their applications in solids handling, crushing and grinding; classification; and solid-liquid separation operations; solid-fluid contacting operations; principles of fluid mechanics and their applications in storage, transport, mixing and dispersing operations; liquid-liquid extraction operations. Prerequisites: PHB122, (CHB373 or CHB372)
Credit Points: 12 Contact Hours: 5 per week

CHB453 ORGANIC CHEMISTRY 4
A critical analysis of the chemistry of five- and six-membered heterocyclic systems with a single hetero atom; preparation, stability and applications to organo synthesis of the main group organometallic compounds; rearrangement reactions which involve 1,2-shifts to electron-deficient elements; principles and practice of thin-layer chromatography, gas-liquid chromatography and high-performance liquid chromatography in the separation and analysis of a variety of organic compounds. Prerequisites: CHB372 or CHB352
Credit Points: 12 Contact Hours: 5 per week

CHB473 PHYSICAL CHEMISTRY 4
Thermodynamics; surface chemistry; dynamic electrochemistry; chemical kinetics. Prerequisite: CHB373 or CHB372
Credit Points: 12 Contact Hours: 5 per week

CHB510 INSTRUMENTAL ANALYSIS 5
Scope of trace analysis, including method reliability, accuracy, precision, sensitivity and selectivity. Atomic absorption and atomic emission – theory and instrumentation. Determination of organic structure by mass spectrometry. (Note: This subject is not compatible with CHB641; credit may not be retained for both.) Prerequisites: CHB340, CHB440, CHB450
Credit Points: 8 Contact Hours: 4 per week

CHB513 INSTRUMENTAL ANALYSIS 5
Quality assurance, data analysis, trace analysis, methods reliability, accuracy, precision, sensitivity, selectivity, limit of detection, comparative studies; atomic spectroscopy, theory and instrumentation; mass spectrometry, introductory theory and instrumentation; liquid chromatography, ion chromatography, practices and principles. Prerequisites: CHB313, CHB372 and CHB453
Credit Points: 12 Contact Hours: 5 per week

CHB523 CHEMICAL TECHNOLOGY 5
Principles of heat transfer and their applications in heat exchange and evaporation operations; distillation; principles of mass transfer and their applications in gas absorption psychrometric, drying and membrane operations; sources of chemicals, petrochemical processes, hydrogen economy; chemical engineering process analysis and its applications to selected industrial processes; topics include: equilibrium thermodynamics and kinetics, ideal reactors, reactor design. Prerequisites: CHB473, CHB423
Credit Points: 12 Contact Hours: 5 per week

CHB527 CHEMICAL TECHNOLOGY 5
Chemical engineering process analysis and its applications to selected industrial processes. An introductory study of basic economic principles and their applications to the chemical process industries. An introduction to process plant design. Prerequisites: CHB327, CHB427, CHB470
Credit Points: 8 Contact Hours: 4 per week

CHB530 INORGANIC CHEMISTRY 5
A course of lectures and practical work dealing with organometallic chemistry; lanthanides and nuclear chemistry; inorganic rings and cages including the chemistry polyanions and metal clusters. Prerequisite: CHB430
Credit Points: 8 Contact Hours: 4 per week

CHB533 INORGANIC CHEMISTRY 5
Chemistry of selected metalloids; introduction to organometallic chemistry; inorganic reaction mechanisms; special interest metals; development of principles of group theory; symmetry operations and inorganic IR spectra; UV-visible spectra; bioinorganic chemistry of special molecules; lasers and inorganic chemistry. Prerequisite: CHB333
Credit Points: 12 Contact Hours: 5 per week

CHB550 ORGANIC CHEMISTRY 5
A course in advanced organic chemistry which emphasises the solution of synthetic problems in the laboratory and on the industrial scale. Topics may include choice of starting materials, major carbon-carbon bond forming procedures, selectivity and control, design of industrial organic processes, significance of reaction mechanism and structure activity relationships. (Note: This subject is not compatible with CHB551; credit may not be retained for both.) Prerequisites: CHB350, CHB450
Credit Points: 8 Contact Hours: 4 per week

CHB551 ORGANIC CHEMISTRY 5C
A course in advanced organic chemistry which emphasises the solution of synthetic problems. Topics may include choice of starting materials, major carbon-carbon bond forming procedures, selectivity and control, significance of reaction mechanism, and structure activity relationships. (Note: This subject is not compatible with CHB550; credit may not be retained for both.) Prerequisites: CHB451
Credit Points: 8 Contact Hours: 3 per week
• CHB570 PHYSICAL CHEMISTRY 5
Solid-liquid equilibria, ternary eutectics and industrial phase chemistry; equilibrium and dynamic electrochemistry and corrosion; kinetics of chain reactions. (Note: This subject is not compatible with CHB571; credit may not be retained for both.)
Prerequisites: CHB370, CHB470
Credit Points: 8 Contact Hours: 4 per week
• CHB571 PHYSICAL CHEMISTRY 5C
Solid-liquid equilibria, ternary eutectics and industrial phase chemistry; equilibrium and dynamic electrochemistry; kinetics of chain reactions. (Note: This subject is not compatible with CHB570; credit may not be retained for both.)
Prerequisites: CHB371, CHB471
Credit Points: 8 Contact Hours: 3 per week
• CHB573 PHYSICAL CHEMISTRY 5
Kinetics; colloid chemistry; phase equilibria; quantum mechanics; statistical mechanics.
Prerequisite: CHB473
Credit Points: 12 Contact Hours: 5 per week
• CHB590 MATERIALS SCIENCE
The nature of solids; crystallographic materials; metals; non-metallic materials and organic polymers.
Prerequisites: CHB370 or CHB371, CHB470 or CHB471
Credit Points: 8 Contact Hours: 3 per week
• CHB600 PROJECT
A laboratory-oriented investigation extending over one semester full-time or two semesters part-time under the supervision of a member of staff. The project will require a literature search, further study, continuing discussion with the project supervisor and a laboratory research program. The literature search, study and discussion component of CHB600 and CHB601 is aimed at developing student competence in the use of experimental techniques as a basis for problem solving. Completion of the project requires the submission of a written technical report.
Prerequisites: CHB372 or CHB510 or CHB527 and two of CHB530, CHB530 and CHB570 or, for SC30 — two of CHB530, CHB531 and CHB571
Credit Points: 12 Contact Hours: 10 per week
• CHB603 PROJECT
The material content of this subject is a variety of chemical problems reflecting teaching, research and consultancy interests of the staff.
Prerequisites: One of CHB573, CHB553 or CHB533 + CHB513 or CHB523
Credit Points: 12
• CHB610 ADVANCED ANALYSIS
Use of computers for on-line data acquisition and instrument control. Microprocessor controlled instrumentation and dedicated data systems. Advanced instrumental techniques, with emphasis on trace techniques and associated sample-handling requirements. Techniques included for discussion will be electroanalytical techniques, nondestructive techniques and thermal methods.
Prerequisite: CHB510
Credit Points: 4 Contact Hours: 2 per week
• CHB613 INSTRUMENTAL ANALYSIS 6
Instrumental analysis including the principles and practices of XRF, thermal analysis, electrometric methods including voltammetry, amperometry; data acquisition, methods of automated analysis, flow-based analysers, robotics, computer networks, laboratory information management systems, chemical databases, chemometrics, optimisation techniques, multiple regressions, advanced quality assurance, inter-laboratory comparisons; computer interfacing, microprocessor controlled instruments, A D, D A converters, I/O methods including polling, interrupt techniques, direct memory access.
Prerequisite: CHB513
Credit Points: 12 Contact Hours: 5 per week
• CHB618 LABORATORY AUTOMATION
Current approaches to the use of computer facilities in commercial laboratories will be emphasised in the lecture course. Discussion will centre on planning to achieve an integrated network. Instrument types to include analogue output, BCD and serial digital interfaces (RS232C, IEEE, etc.). Incorporation of microprocessor controlled instruments and those instruments with dedicated data systems. Report generation and data communication systems. Polling (programmed I/O) and interrupt techniques.
Prerequisite: CHB604
Credit Points: 8 Contact Hours: 3 per week
• CHB623 CHEMICAL TECHNOLOGY 6
Economic concepts, engineering costing, profitability evaluation, investment decision making, process economic appraisal using network analysis, optimisation using linear, non-linear, and dynamic programming. Introduction to steady-state process analysis, simulation and design, with the aid of ASPEN software system; modelling process flowsheets and chemical reactors; case study problem solving using ASPEN.
Prerequisite: CHB523
Credit Points: 12 Contact Hours: 5 per week
• CHB627 CHEMICAL TECHNOLOGY 6
Measurement and control in large-scale chemical processing. An introduction to process modelling including strategies of process operations, optimisation methods, linear programming and dynamic programming.
Prerequisites: CHB327, CHB427
Credit Points: 4 Contact Hours: 2 per week
• CHB628 ENERGY TECHNOLOGY
A study of energy conversion systems, and energy economics including choice of fuels, feedstock costs and net energy analysis.
Prerequisite: CHB527 Co-requisite: CHB627
Credit Points: 6 Contact Hours: 3 per week
• CHB631 ADVANCED INORGANIC CHEMISTRY
Selected metals: the solution and solid state chemistry of metals such as titanium, zirconium, hafnium, chromium, molybdenum and tungsten with emphasis on structures, bonding and reaction mechanisms; precious metals: the 'platinum group', silver and gold; high purity chemicals. Redox systems: hydrogen peroxide and related peroxo-compounds; dithionates and the oxosulfur system; sodium borohydride and other complex hydrides.
Prerequisite: CHB530
Credit Points: 8 Contact Hours: 3 per week
• CHB640 CHEMISTRY 6
Colloid chemistry and rheology; Fourier transform, laser and time resolved spectroscopy; interpretative ‘3C NMR spectroscopy; free radical and photo-
Colloid chemistry and rheology. The surface chemistry of metals, polymers and other solid materials. Surface analysis techniques including FTIR, XPS, SAM and ESCA. (Note: CHB671 is not compatible with CHB640; credit may not be retained for more than one of these subjects.)
Prerequisite: CHB671
Credit Points: 4 Contact Hours: 2 per week

CHB641 ADVANCED SPECTROSCOPY
Atomic absorption and emission spectroscopy. Electron spin resonance spectroscopy. Lasers and laser spectroscopy. Mass spectrometry, particularly GC-MS. Fourier transform spectroscopy, particularly ‘3C and multi-nuclear NMR. The role of dedicated computers in these techniques will be emphasised.
(Note: This subject is not compatible with CHB640; credit may not be retained for more than one of these subjects.)
Prerequisite: CHB640
Credit Points: 8 Contact Hours: 3 per week

CHB643 APPLIED SPECTROSCOPY
Nuclear magnetic resonance spectroscopy; vibrational spectroscopy; remote spectroscopy; UV/Vis and fluorescence spectroscopies.
Prerequisites: CHB373 or CHB372 + (CHB353 or CHB352)
Credit Points: 12 Contact Hours: 5 per week

CHB651 BIOLOGICAL CHEMISTRY
Prerequisite: CHB651
Credit Points: 8 Contact Hours: 3 per week

CHB653 APPLIED BIOLOGICAL CHEMISTRY
Overview of molecular cell biology and chemistry; basic physical biochemistry of proteins and cells; chemistry of amino acids, peptides and proteins; conformation, structure, reactivity of peptides, proteins and enzymes; protein engineering; enzyme reaction mechanisms; bioinorganic chemistry including structural, spectroscopic, and functional properties of metallo-proteins; catalytic role in metallo-biochemistry; bioenergetics, biosynthesis and biotransformation.
Prerequisite: CHB553
Credit Points: 12 Contact Hours: 5 per week

CHB660 INDUSTRIAL VISITS
Visits to selected industries, for example, petroleum, industrial chemicals, sugar.
Prerequisite: CHB501
Credit Points: 2 Contact Hours: 1 per week

CHB663 ENVIRONMENTAL CHEMISTRY
Toxicology; water quality and its assessment; modeling reactions in water bodies; air quality; criteria pollutants and health effects; indoor pollutants; monitoring; dispersion of pollutants; control techniques.
Prerequisite: CHB373 or CHB372
Credit Points: 12 Contact Hours: 5 per week

CHB671 SOLIDS & SURFACES
Colloid chemistry and rheology. The surface chemistry of metals, polymers and other solid materials. Surface analysis techniques including FTIR, XPS, SAM and ESCA. (Note: CHB671 is not compatible with CHB640; credit may not be retained for both.)
Prerequisite: CHB671
Credit Points: 4 Contact Hours: 2 per week

CHB690 ADVANCED MATERIALS SCIENCE
Advanced materials analysis; fibre reinforced composite materials; advanced alloys; inorganic polymers; applied polymer science.
Prerequisite: CHB590
Credit Points: 8 Contact Hours: 3 per week

CHB691 ENVIRONMENTAL CHEMISTRY
The nature and composition of natural and polluted waters; metal ions, gases, redox equilibria complexation and microbial transformation of chemicals in water; water pollution and trace-level substances in water. Environmental chemistry of soils; acid-base equilibria and ion-exchange; chemicals in soil. The nature and composition of the atmosphere; chemical and photochemical reactions in the atmosphere; the oxides of carbon, sulphur and nitrogen in the atmosphere; organic pollutants and photochemical smog; particulate matter. Water and atmospheric monitoring.
Prerequisites: CHB551, CHB571
Credit Points: 8 Contact Hours: 3 per week

CHB693 MATERIALS CHEMISTRY
Properties of materials; metals and alloys; metallic corrosion; crystalline materials; cements, ceramics and glasses; polymers.
Prerequisite: CHB473
Credit Points: 12 Contact Hours: 5 per week

CHB700 PROJECT
All students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project will be assessed on the basis of an extensive written report and an oral presentation.
Credit Points: 40

CHB780 ADVANCED TOPICS IN CHEMISTRY 1
CHB880 ADVANCED TOPICS IN CHEMISTRY 2
A selection of advanced topics in the areas of physical, organic and inorganic chemistry. The topics offered will reflect the expertise of the academic staff as well as the needs of the students. Both subjects will be assessed at the end of the year.
Credit Points: 12 Contact Hours: 6 per week

CHP120 BIOCHEMICAL ENGINEERING
The application of biological organisms, systems and processes to productive level activities; specific areas are in fermentation, bioprocessing and enzyme technology. Topics include: fermentation processes; microbial physiology and environmental factors in processing operations; fermentation kinetics and modelling; aeration and agitation; sterilisation; bioreactors; and scale-up. Other topics are selected from animal cell culture, protein biotechnology, downstream processing and bio-process economics.
Credit Points: 12 Contact Hours: 5 per week

CHP320 DOWNSTREAM PROCESSING
Introduction to the fundamental problems of separation operations important to the recovery of commercial products from biological processes. Topics include: cell recovery and disruption,
membrane technology, chromatographic techniques, electrochemical separation and new bio-separation techniques. Instruction includes case studies, and Aspen bio-process simulation.

Credit Points: 12 Contact Hours: 5 per week

- **CHP691 ENVIRONMENTAL CHEMISTRY**
  - The nature and composition of natural and polluted waters; metal ions, gases, redox equilibria complexation and microbial transformation of chemicals in water; water pollution and trace-level substances in water. Environmental chemistry of soils; acid-base equilibria and ion-exchange; chemicals in soil. The nature and composition of the atmosphere; chemical and photochemical reactions in the atmosphere; the oxides of carbon, sulphur and nitrogen in the atmosphere; organic pollutants and photochemical smog; particulate matter. Water and atmospheric monitoring.
  - Prerequisites: CHB55I, CHB571
  - Credit Points: 8 Contact Hours: 3 per week

- **CHS200 CHEMISTRY**
  - Introduction to general and organic chemistry; atoms, molecules, ions; chemical bonding; chemical reactions; energy; solution chemistry; acids, bases, and chemical equilibrium; gases; electrochemistry and nuclear chemistry; basic chemistry of organic compounds, aliphatic and aromatic.
  - Credit Points: 6 Contact Hours: 3 per week

- **CNBI03 BUILDING SERVICES 1 HVAC**
  - Minimum standards of ventilation, centrifugal and axial flow fan applications; ductwork, accessories, layout, construction and installation; requirements for human comfort in air-conditioning; the ASHRAE Comfort Chart; principles of refrigeration; air-conditioning systems, composition, cost, application, construction and installation; heating, fuel types, efficiency, capital and annual costs; effect of building ordinances.
  - Co-requisite: CNB253
  - Credit Points: 12 Contact Hours: 5 per week

- **CNBI04 BUILDING SERVICES 2 ELECTRICAL**
  - Electricity supply and distribution; high and low tension supply; measuring current, cut-outs, intake and distribution; internal distribution; large supply installation, sub-station; fuse and switch gear; wiring systems and circuits; conduit and cables; joint boxes. Multi-box switching; heading circuits; earth connections, protection of conduit, conductor and accessories against mechanical damage, weather damage, fire, electric shock; fibre optic cables in building supervisory systems; assessment of maximum demand and voltage drop; earth tests; tools and handling equipment, fastenings and supports; measurement, control and lighting equipment; accessibility and protection; domestic, industrial and commercial appliances; testing and fault locating.
  - Credit Points: 12 Contact Hours: 5 per week

- **CNBI03 MATERIAL SCIENCE 1**
  - Properties, manufacture, use and analysis of timber, steel, concrete and clay products, investigation of their strength, density, hardness, porosity, plasticity, elasticity and deterioration; investigation and protection against corrosion and fire.
  - Co-requisite: CNB15I
  - Credit Points: 4 Contact Hours: 2 per week

- **CNBI04 MATERIAL SCIENCE 2**
  - Physical and chemical properties of materials and their affect on construction and structural qualities; laboratory and field testing of bricks, mortar, brickwork, concrete, timber, steel; protection of material against corrosion and fire.
  - Credit Points: 4 Contact Hours: 2 per week

- **CNBI131 MEASUREMENT OF CONSTRUCTION I A**
  - Subject description as for CNB005.
  - Credit Points: 6 Contact Hours: 3 per week

- **CNBI143 STRUCTURES I**
  - Equilibrium of forces; shear forces and diagram; loading moments and diagram; loading on structures and loading code; stress analysis and force diagram; stress and strain, tension and compression members; bending theory, design of timber beams, columns and connections; design of steel beams and columns; introduction to indeterminate structures.
  - Credit Points: 4 Contact Hours: 2 per week

- **CNBI144 STRUCTURES 2**
  - See CNB143
  - Prerequisite: CNB143
  - Credit Points: 4 Contact Hours: 2 per week

- **CNBI151 CONSTRUCTION I**
  - Materials, methods and construction in single and two-storey domestic structures, site information and investigation, foundations, columns, upper floors, external and internal walls, finishes, etc. Environmental, structural and aesthetic requirements accounting for costs, dimensional requirements, statutory regulations, life and adaptability and manufacturing and erection requirements; draughting typical details and working drawings; environmental science, design situations in varying climatic zones and their effect on building construction.
  - Credit Points: 12 Contact Hours: 6 per week

- **CNBI154 CONSTRUCTION 2**
  - Continuation of CNB151; properties of materials, and behaviour in manufacturing and construction, affect on form and structure; workshop and studio working details of building components, coordination of building elements.
  - Prerequisite: CNB151
  - Credit Points: 14 Contact Hours: 7 per week

- **CNBI161 BUILDING STUDIES 1**
  - The uses of materials and construction in single and two-storey domestic structures - site information, substructure, columns, upper floors, external and internal walls, finishes, etc. Environmental, structural, aesthetic, cost, statutory, dimensional, manufacturing and erection requirements. Factors in creating comfort situations in various climatic zones and their effect on building construction. Draughting: preparation of typical details and working drawings. Physical and chemical properties of materials such as timber, steel, concrete and clay products and how they affect their construction and structural qualities.
  - Credit Points: 14 Contact Hours: 5.5 per week

- **CNBI162 BUILDING STUDIES 2**
  - The uses of materials and construction in single and two-storey domestic structures under the elements: staircase, roof, internal and external walls, windows, doors, finishes; fireplaces. Environmental, structural and aesthetic requirements, taking account of constraints such as costs, dimensional requirements, statutory regulations, life and adaptability and manufacturing and erection requirements. Draught-
ing: preparation of typical construction details and drawings. 

Prerequisites: BGB161 
Credit Points: 9  Contact Hours: 3.5 per week

**CNB164 BUILDING SERVICES 1A**
A study of macro services to the community including water supply, sewerage, power, gas, telephone and other public services. Requirements of headworks and reticulations. A study of sanitation, septic tanks, absorption and transpiration beds, stormwater and sewerage disposal and garbage and refuse disposal. Hydraulic engineering services associated with buildings. Water supply (including fire fighting and hot water), sewerage and sanitary plumbing with a study of relevant acts and laws, including sizing and testing of mains and gravity-fed services.

Credit Points: 6  Contact Hours: 2.5 per week

**CNB166 URBAN ECONOMICS**
Economic processes and spatial context of the city; differentiation of competing land use; location decisions in the urban market; economic forces behind urbanisation; intra-urban location; market failures, externalities and government involvement; transport in the urban environment; cost/accessibility; urban management. Economics of the Australian construction industry.

Credit Points: 4  Contact Hours: 2 per week

**CNB172 CONSTRUCTION 2**
The properties of materials and how they behave in the manufacturing and construction process and how these considerations relate to form and structure. It includes a studio and practical back-up to the lecture program. Students are required to prepare working details of building components, coordination of building elements for specific building use.

Credit Points: 8  Contact Hours: 4 per week

**CNB243 LAW 1 - BUILDING ACTS & REGULATIONS**
Passing and resolving Acts, regulations and by-laws; knowledgeable site representatives; study of building code of Australia, Queensland Home Building Code and Standard Building by-laws which control the design, construction and building works in Queensland; emphasis on building codes in the by-laws; a study of the Health Act, Factories and Shops Act, Liquor Act, Acts Interpretation Act, Fire Safety Act and Town Planning acts. 

Co-requisite: CNB254 
Credit Points: 5  Contact Hours: 2 per week

**CNB245 MEASUREMENT OF CONSTRUCTION 1B**
Methods of taking off and billing quantities in the trades of excavator, concreter, bricklayer, blocklayer and carpenter for simple building.

Prerequisites: CNB131, CNB154 
Co-requisite: CNB253 
Credit Points: 6  Contact Hours: 3 per week

**CNB246 MEASUREMENT OF CONSTRUCTION 2B**
Methods of taking off and billing quantities in more complex building in the trades excavator, concreter, bricklayer, blocklayer in simple basement, underpinning, pier and beam, RC frame and suspended slab; taking off and billing in the trades plasterer, built-up roof, demolition, mason, structural steel and precast concrete.

Prerequisites: CNB253, CNB245, 
Co-requisite: CNB254 
Credit Points: 8  Contact Hours: 4 per week

**CNB247 MATERIAL SCIENCE 3**
Introduction to atomic structure and bonding and its effects on a material's engineering property; elementary metallurgy of iron and steel; non-ferrous metals and alloys; joining of metals, fatigue, creep, brittle and ductile fracture, corrosion and protection; properties, manufacture, use and analysis of fibrous cement, wood products, ceramics, polymers, paints, sealants and mastic products; investigation into the material's strength, density, hardness, porosity, plasticity, elasticity, deterioration, optical, electrical, thermal and acoustic properties.

Prerequisites: CNB103, CNB104 
Credit Points: 4  Contact Hours: 2 per week

**CNB253 CONSTRUCTION 3**
Study of industrial and multi-storey residential buildings; management, planning, and coordination of construction, site layout, site establishment and material handling processes; drafting and detailed drawings, site visits and/or workshop.

Prerequisites: CNB154, CNB103, CNB104 
Credit Points: 10  Contact Hours: 5 per week

**CNB254 CONSTRUCTION 4**
An extension of CNB253, dealing with multi-storey residential commercial buildings.

Prerequisite: CNB253 
Credit Points: 12  Contact Hours: 6 per week

**CNB257 STRUCTURES 3**
Analysis of indeterminate structures; frame analysis, moment distribution; design of steel connections and structures; concrete columns and walls; composite beams; theory of prestressed concrete, brickwork and concrete masonry design; design of retaining walls, substructures and foundations; computers in structural design.

Prerequisites: CNB103, CNB104, CNBI43, CNBI44 
Credit Points: 4  Contact Hours: 2 per week

**CNB258 STRUCTURES 4**
Continuation of CNB257 
Credit Points: 4  Contact Hours: 2 per week

**CNB261 BUILDING STUDIES 3**
Study of the materials and construction of a range of structures from industrial single to multi-storey residential buildings: substructure, columns and upper floors, staircases, roof, external and internal walls, windows and doors, finishes, fire protection and fittings. Environmental, structural, aesthetic, cost, statutory, dimensional, manufacturing and erection requirements. Drafting: preparation of typical details and working drawings. Material science: a study of the non-structure materials such as building boards, ceramics, glass, plastics, paint from the manufacturing process through to the effects of ageing and problems of cleaning, repair and maintenance.

Prerequisite: CNB162 
Credit Points: 8  Contact Hours: 3 per week

**CNB262 BUILDING STUDIES 4**
An extension of CNB261, dealing with multi-storey commercial buildings. It also looks at design appraisal: effect of design on user comfort, safety, energy usage, orientation, materials, layout, services, aging and aesthetic composition.

Prerequisite: CNB261 
Credit Points: 8  Contact Hours: 3 per week

**CNB263 VALUATION 1**
Basic concepts and principles of real property value. Definitions of value. Process and methods used in
Credit Points: 8 Contact Hours: 3 per week

- **CNB268 VALUATION 2**
See CNB263.
Prerequisite: CNB263
Credit Points: 8 Contact Hours: 3 per week

- **CNB301 PM1 - ADVANCED CONSTRUCTION METHODS**
Construction and site management problems encountered by a project manager: case studies having unusual construction problems or techniques; including site planning and organisation for small, medium and large projects; material handling and site equipment selection.
Prerequisite: CNB254
Credit Points: 4 Contact Hours: 2 per week

- **CNB341 BUILDING & CIVIL ENGINEERING CONSTRUCTION**
Large project bulk excavation, earth and rock retaining systems, rock excavation and explosive handling; dewatering, pile driving, bored piers and special foundation construction; demolition of structures; roadworks, techniques, stabilised construction, surface sealing and associated bridge construction; falsework and temporary works.
Credit Points: 4 Contact Hours: 2 per week

- **CNB342 LAW 2 - PRINCIPLES & PROPERTY**
Legal principles and process, the legal system and process; sources and divisions of the law; rules of precedence; interpretation of statutes and regulations; legal practice and procedure; law of property, ownership and possession, estates and interests in land; easements, rights and restrictive covenants; party walls, boundary walls, fences and encroachments.
Credit Points: 3 Contact Hours: 1.5 per week

- **CNB343 ECONOMICS OF THE CONSTRUCTION INDUSTRY**
Branches of economics and applied economics; features of the macroeconomy; demand, supply, prices and stocks; market structures, competition, collusion, integration and concentration; real property markets, tenancy, markets and sub markets; construction and housing industries composition and characteristics; demand for dwellings, the deposit gap, public housing, rental markets; pricing mechanism, application to land, contract and speculative projects, etc.; cost analysis, cost components in housing, problems of rising costs and effects of time delays, etc.; finance industries, types and use of finance, use of gearing, risk considerations, cash flow; failure of developer and builder firms.
Credit Points: 4 Contact Hours: 2 per week

- **CNB345 HYGIENE & SANITATION**
Subject description as for CNB164.
Credit Points: 6 Contact Hours: 3 per week

- **CNB362 PROPERTY MARKETING**
Characteristics of the Australian property market, the nature of the marketing problems. The marketing plan: the mix, implementation of plan and sales forecast, pricing decisions, approach to selling; consideration of sales particulars and auction catalogues. Promotional decisions: determination of budget size; media decision and sales promotion; technological advances and market changes. Real estate brokerage and the application of marketing principles to residential, commercial, industrial, special and overseas properties. Negotiation skills development.
Credit Points: 7 Contact Hours: 3 per week

- **CNB363 VALUATION 3**
Principles and practice of cost approach, valuation of improvements, limitations of cost approach. Investment approach, basic capitalisation and cash flow techniques. Examination of assumptions. Practical applications of investment approach to suburban and CBD properties.
Prerequisite: CNB268
Credit Points: 8 Contact Hours: 3 per week

- **CNB364 VALUATION 4**
See CNB363.
Prerequisite: CNB363
Credit Points: 8 Contact Hours: 3 per week

- **CNB367 REAL ESTATE ACCOUNTING 1**
Credit Points: 4 Contact Hours: 2 per week

- **CNB368 REAL ESTATE ACCOUNTING 2**
Prerequisite: BGB367
Credit Points: 7 Contact Hours: 3 per week

- **CNB401 BUILDING ECONOMICS & COST PLANNING**
Concept of cost control building outputs and costs; comparison of cost planning and approximate estimating; Cost implication of design variables, perimeter/floor area ratio, size of building, circulation space, storey height; cost, effects of site conditions, prefabrication and standardisation; approximate estimating, types and uses; measurement of variations, adjustment of prime costs and provisional sums; cost analyses, indices and data; applications and use of cost analyses; cost data; progress payments and final accounts.
Prerequisites: CNB446, CNB340
Credit Points: 4 Contact Hours: 2 per week

---

**SUBJECT SYNOPSIS**

- **CNB268 VALUATION 2**
See CNB263.
Prerequisite: CNB263
Credit Points: 8 Contact Hours: 3 per week

- **CNB301 PM1 - ADVANCED CONSTRUCTION METHODS**
Construction and site management problems encountered by a project manager: case studies having unusual construction problems or techniques; including site planning and organisation for small, medium and large projects; material handling and site equipment selection.
Prerequisite: CNB254
Credit Points: 4 Contact Hours: 2 per week

- **CNB341 BUILDING & CIVIL ENGINEERING CONSTRUCTION**
Large project bulk excavation, earth and rock retaining systems, rock excavation and explosive handling; dewatering, pile driving, bored piers and special foundation construction; demolition of structures; roadworks, techniques, stabilised construction, surface sealing and associated bridge construction; falsework and temporary works.
Credit Points: 4 Contact Hours: 2 per week

- **CNB342 LAW 2 - PRINCIPLES & PROPERTY**
Legal principles and process, the legal system and process; sources and divisions of the law; rules of precedence; interpretation of statutes and regulations; legal practice and procedure; law of property, ownership and possession, estates and interests in land; easements, rights and restrictive covenants; party walls, boundary walls, fences and encroachments.
Credit Points: 3 Contact Hours: 1.5 per week

- **CNB343 ECONOMICS OF THE CONSTRUCTION INDUSTRY**
Branches of economics and applied economics; features of the macroeconomy; demand, supply, prices and stocks; market structures, competition, collusion, integration and concentration; real property markets, tenancy, markets and sub markets; construction and housing industries composition and characteristics; demand for dwellings, the deposit gap, public housing, rental markets; pricing mechanism, application to land, contract and speculative projects, etc.; cost analysis, cost components in housing, problems of rising costs and effects of time delays, etc.; finance industries, types and use of finance, use of gearing, risk considerations, cash flow; failure of developer and builder firms.
Credit Points: 4 Contact Hours: 2 per week

- **CNB345 HYGIENE & SANITATION**
Subject description as for CNB164.
Credit Points: 6 Contact Hours: 3 per week

- **CNB362 PROPERTY MARKETING**
Characteristics of the Australian property market, the nature of the marketing problems. The marketing plan: the mix, implementation of plan and sales forecast, pricing decisions, approach to selling; consideration of sales particulars and auction catalogues. Promotional decisions: determination of budget size; media decision and sales promotion; technological advances and market changes. Real estate brokerage and the application of marketing principles to residential, commercial, industrial, special and overseas properties. Negotiation skills development.
Credit Points: 7 Contact Hours: 3 per week

- **CNB363 VALUATION 3**
Principles and practice of cost approach, valuation of improvements, limitations of cost approach. Investment approach, basic capitalisation and cash flow techniques. Examination of assumptions. Practical applications of investment approach to suburban and CBD properties.
Prerequisite: CNB268
Credit Points: 8 Contact Hours: 3 per week

---

**541**
II CNB403 BUILDING MANAGEMENT 1
Management in principle, planning, leading, organis­
ing, controlling and applied communication; fund­
mamentals of management; roles of policy maker and executive; accountability; problem solving; organisa­
tion structures and relationships, formal and informal structures; management in practice, building industry participants, client to builder; systems in the building industry; contract, and head office management of small and large contracts; management, job description, contracts, plant, estimating, purchasing, planning and accounting section; types of tenders and contracts; controlling incoming work, securing contracts.
Co-requisite: CNB253
Credit Points: 4 Contact Hours: 2 per week

II CNB404 BUILDING MANAGEMENT 2
More advanced management principles and their application to site administration and management.
Credit Points: 4 Contact Hours: 2 per week

II CNB405 PROJECT EQUIPMENT & SAFETY
Construction Safety Act 1971-73 and regulations; fixed, mobile and portable equipment, hoarding, gantries, scaffolding and other miscellaneous gear; crane, hoist and other relevant code; responsibilities and certification of site operatives; safety problems in erection, demolition and excavation work; accident investigation, analysis and preventive techniques; frequency and severity rates and training, management responsibilities.
Co-requisite: CNB254
Credit Points: 4 Contact Hours: 2 per week

II CNB406 BUILDING FINANCIAL MANAGEMENT 2
Search and selection of construction projects; the discount rate cost of capital, return on investment; cash flows and contract mark-up; risk, uncertainty and inflation in capital investment decisions; analysis and interpretation of financial statements; sources of funds and classifications; bidding theory and strategy; prescribed payments taxation system.
Prerequisites: ACB284, CNB403
Credit Points: 4 Contact Hours: 2 per week

II CNB440 LAW 3 – BUILDING CONTRACTS
Building and engineering agreements, practices relating to the building industry; contract law, elements, formation and discharge of a contract; contents of a valid contract, misrepresentation, collateral contract implied terms; contract documents and their interpretation; remedies for breach of contract; major provisions in Australian Standard Forms of Building Contract.
Credit Points: 6 Contact Hours: 1 per week

II CNB442 VALUATION & DILAPIDATION
Nature of value; effect of supply and demand of land and buildings; investment value and occupational value; types of landed property, incidents of their tenure, outgoings and comparison with other forms of investment; rates of interest required from different types of property; calculating rental value and net income and capitalisation of net income; use of valuation tables; liability for dilapidations; legal and equitable waste; implied, express contract covenants and statutory obligations to repair between landlord and tenant; landlords’ remedies for breach of covenant to repair; liability for injuries to third parties.
Credit Points: 4 in Semester 1, 2 in Semester 2 Contact Hours: 2 per week in Semester 1, 1 per week in Semester 2

II CNB443 BUILDING SERVICES 3
Transportation of people and goods, passenger, goods and service lifts, planning disposition, control systems and construction; regulatory requirements, approximate traffic calculations; escalators and moving walks, use, widths and ratings, regulatory requirements and construction; planning of lift contracts and ancillary building work; cost of lifts; fire protection, sprinklers, detectors, alarms, extinguishers; telephone and sound systems; intrusion alarm systems; clock and time systems; acoustics.
Co-requisite: CNB253
Credit Points: 5 Contact Hours: 2.5 per week

II CNB444 MECHANICAL & ELECTRICAL ESTIMATING
Mechanical and electrical systems, parameters influencing their design and application; types estimates and tenders; preliminaries, trade awards and wage rates; take-off procedures, costing and estimating make-up calculations; system costs in relation to total building, floor area, operating and maintenance cost, builders allowance for each system.
Prerequisite: CNB513, CNB504
Credit Points: 4 Contact Hours: 2 per week

II CNB446 ESTIMATING 1
Building trades award and wages rates; hourly rate build up for equipment and trade services; calculation of preliminaries for a small suburban project.
Prerequisites: CB006, CNB245
Co-requisite: CNB254
Credit Points: 5 Contact Hours: 2.5 per week

II CNB451 COMPUTER SOFTWARE APPLICATIONS 1
Preparation of bills of quantities using computer software packages; hands-on experience in set-up of base accounts, trades, headings; measurement input; editing, correction and data manipulation; report generation in various bill of quantities formats; pricing using estimated and/or tendered rates; elemental analyses; use of computer in measurement of non-traditional contractual systems; specification and preambles development.
Credit Points: 4 Contact Hours: 2 per week

II CNB452 COMPUTER SOFTWARE APPLICATIONS 2
Preparation of cost plan/estimates using computer software packages, including set-up of base accounts, parameter specifications; elemental and detailed estimate measurement; editing, correction and data manipulation; report generation and formatting; development of labour constants, standard rates and items; pricing, tendering, spreadsheet application; contract administration, variation control, rise and fall of final accounts; and progress payments and cash flow forecasts.
Credit Points: 4 Contact Hours: 2 per week

II CNB461 MEASUREMENT OF CONSTRUCTION 5
Methods of taking off and billing quantities in complex basement and foundation work in the trades underpinning, excavator, concreter, piling systems, complex structural systems in suspended slabs and walls.
Prerequisite: CNB510
Credit Points: 3 Contact Hours: 1.5 per week
■ CNB462 MEASUREMENT OF CONSTRUCTION 6
Methods of taking off and billing quantities in the trades plumber and drainer.
Prerequisite: CNB345
Credit Points: 3 Contact Hours: 1.5 per week

■ CNB464 VALUATION 5 – RURAL
The physical and economic factors of rural land and its development, land utilisation and degradation, farm management and productivity, factors influencing rural valuations. Rural sales analysis, valuation procedures and inspections. Practical valuation assignments.
Prerequisite: CNB268
Credit Points: 8 Contact Hours: 3 per week

■ CNB465 PROPERTY INVESTMENT ANALYSIS 1
Investment principles and strategy, property investment financing and evaluation, property investment market, time value of money concepts, cash flow techniques over time, application of CF techniques to property, feasibility studies, market analysis, risk analysis applied to property; the structure of detailed risk and return viability studies; portfolio theory applied to property; computer applications.
Credit Points: 8 Contact Hours: 3 per week

■ CNB466 PROPERTY INVESTMENT ANALYSIS 2
See CNB465.
Credit Points: 8 Contact Hours: 3 per week

■ CNB470 VALUATION 6 – RURAL
See CNB464.
Prerequisite: CNB464
Credit Points: 8 Contact Hours: 3 per week

■ CNB471 LAW 7 – PROPERTY PRACTICE LAW
The legal concepts and statutory requirements relevant to the property professional. Legislation governing property valuation and real estate practice. The effect of relevant statutes on real property. Standard real property contracts.
Prerequisite: CNB342
Credit Points: 6 Contact Hours: 2.5 per week

■ CNB472 PROPERTY TAXATION ISSUES
The implications of taxation on the overall profitability of property investments and developments. The distinction between developer and investor, project funding, the interpretation of ordinary income and capital gains tax. Deductions for project expenditure, in particular interest, negative gearing, depreciation and building amortisation.
Prerequisite: CNB368
Credit Points: 3 Contact Hours: 1.5 per week

■ CNB502 SPECIFICATION
Compilation of specifications complementing architectural documents; definitions, objects and purpose of a specification; specification as a contract legal and working document; reference material and specification writing; use of Master specifications; outright and performance specifications and preparation of specified bills of quantities.
Prerequisite: CNB254
Credit Points: 3 Contact Hours: 1.5 per week

■ CNB524 MEASUREMENT OF CONSTRUCTION 7
Methods of taking off and billing quantities in the trades of mechanical and electrical engineer, external works and preliminaries.
Prerequisite: CNB013, CNB443
Credit Points: 4 Contact Hours: 2 per week

■ CNB526 POST CONTRACT SERVICES 1
Method of adjustment of provisional items, items and other entitlements; preparing valuation certificates for progress payments; cost control techniques used during the contract period; review of applicable contractual clauses; quantity surveying practice, adjustment to the contract sum for variations; feasibility studies; different types of contractual arrangement and selection of contractors.
Credit Points: 5 Contact Hours: 2.5 per week

■ CNB529 PM2 – QUANTITATIVE TECHNIQUES
Review of statistical methods; data recording and presentation technique; the weighted index; probability and expected value; frequency and probability distribution; the normal distribution, control charts; regression and multiple regression; work study technique; value analysis in building design and production; operation research: linear programming, graphical, simplex, transportation and assignment methods; dynamic programming; decision making under conditions of certainty and uncertainty; decision trees.
Prerequisite: CNB403, CNB404
Credit Points: 5 Contact Hours: 2.5 per week

■ CNB540 ESTIMATING 2
Build up of typical rates for demolition, dewatering, piling, underpinning, shoring/formwork to columns, beams, walls and slab systems; reinforcement tying and fixing; concrete placing rates; precast erection; scaffolding, gantries, hoists and cranes, etc.; calculations of preliminaries for country and city projects.
Prerequisite: CNB009, CNB101, CNB246, CNB446
Credit Points: 5 Contact Hours: 2.5 per week

■ CNB543 LAW 4 – TORTS & ARBITRATION
Law of tort, negligence, professional negligence, duty of care, liability, occupiers’ liability, nuisance, fraud and conversion; arbitration, nature of and comparison with actions of law; reference by consent; the arbitration agreement, parties subject matter, appointment of arbitrators or umpire; conduct of an arbitration; powers and duties of an arbitrator; rules of evidence; validity of publication and enforcement of an award; costs.
Prerequisite: CNB440
Credit Points: 3 Contact Hours: 1.5 per week

■ CNB547 PM3 – CONSTRUCTION PLANNING TECHNIQUES 1
Application of construction planning and control techniques; bar charts; critical path networks, arrow and precedence diagrams; updating, control and reporting techniques; line of balance.
Prerequisite: CNB254
Credit Points: 5 Contact Hours: 2.5 per week

■ CNB548 PM4 – CONSTRUCTION PLANNING TECHNIQUES 2
Resource management; basic and production planning techniques; planning and control for various
types of projects; misuse and abuse of planning and legal problems associated with CPM.
Prerequisite: CNB547
Credit Points: 8  Contact Hours: 4 per week

■ CNB550 PM5 - PROJECT COST CONTROL
Financial planning and cost control of the construction project; the development time relationships, cost consequences of design decision; preconstruction budget; construction management, materials control; performance analysis; trend evaluation; forecasting techniques, progress reports, cost reports; financial status reports; computer applications in expenditure; control and forecasting; equipment policy, equipment economics, maintenance management; contract administration, processing payments, negotiating extensions and prolongation claims, rise and fall, prescribed payments.
Credit Points: 6  Contact Hours: 3 per week

■ CNB552 OFFICE MANAGEMENT
Scale of fees and professional charges; code of ethics; letters of engagement; law involving the quantity surveyor and the client; professional indemnity; professional image and status; office management and procedures.
Credit Points: 2  Contact Hours: 1 per week

■ CNB561 PROPERTY MAINTENANCE
Prerequisite: CNB164
Credit Points: 8  Contact Hours: 3 per week

■ CNB563 VALUATION - ADVANCED I
Capital taxation as it affects property transactions. Valuations for development land tax, capital transfer tax and valuation of capital gains. Valuations for statutory rating purposes under relevant legislation. Valuations for compulsory acquisition. Assessment of compensation resulting from acquisition, resumption and damage. Evidence, the expert witness and professional liability.
Prerequisites: CNB363, CNB364
Credit Points: 8  Contact Hours: 3 per week

■ CNB564 VALUATION - ADVANCED II
Valuation of specialist-type properties including licensed premises, hotels, service stations, entertainment and public properties. The valuation of corporate assets for organisational and balance sheet purposes. The future role of the valuer.
Credit Points: 8  Contact Hours: 3 per week

■ CNB565 TIME MANAGEMENT
Prerequisite: BGB161
Credit Points: 8  Contact Hours: 3 per week

■ CNB567 REAL ESTATE PRACTICE 1
Management concepts applied to real estate, business plan; office administration, staff recruitment and training, trust accounts, functions of composite real estate practice, real estate software packages.
Credit Points: 4  Contact Hours: 2 per week

■ CNB568 REAL ESTATE PRACTICE 2
See BGB557.
Credit Points: 5  Contact Hours: 2.5 per week

■ CNB601 FORMWORK DESIGN & CONSTRUCTION
Formwork building, quality, safety, control; formwork planning, re-use, materials and hardware; cost hire or buy; erecting and stripping; scheduling, loads and pressures on slab, beams, column and wall forms; form design and design tables; formwork drawing and detailing; building and erecting formwork, architectural forms, precast concrete; special techniques and pre-stressing; property formwork systems, simple falsework design.
Prerequisite: CNB144  Co-requisite: CNB253
Credit Points: 4  Contact Hours: 2 per week

■ CNB606 PM8 - LAND DEVELOPMENT STUDIES
The structure, operation and control of the land development industry including the political-economic framework; land use plans and approval mechanisms of subdivisible land; financial aspect of development projects; trends and prospects in the housing development industry.
Credit Point: 4  Contact Hours: 3 per week

■ CNB623 PM6 - BUILDING DEVELOPMENT TECHNIQUES 1
Feasibility, market and location surveys; cost analysis; evaluation techniques; conventional and discounting; cash flows and sensitivity analysis; authorities, development restrictions, services; profitability, commercial assessment, land values, options; purchase, terms, legal documentation, consolidation, surveys; commissioning design team, building use, facilities, quality, staging; instruct consultants, analyse alternatives, value engineering, marketability, income and outgoings; cost and time control from sketch design to completion; tender procedures and negotiations, contract documentation; leasing, brochures, publicity, letting agents, targets; authorisation of construction payments, monthly reports, coordination meetings; financing projects and cash flow.
Credit Points: 4  Contact Hours: 2 per week

■ CNB624 PM7 - BUILDING DEVELOPMENT TECHNIQUES 2
See CNB623.
Credit Points: 4  Contact Hours: 2 per week

■ CNB626 LAND DEVELOPMENT STUDIES
Subject description as for CNB606.
Prerequisites: CNB663, LPB441, LPB444
Credit Points: 4  Contact Hours: 2 per week

■ CNB642 APPLIED COMPUTER TECHNIQUES
Evaluation of a range of commercial computer programs designed for the development and construction industry.
Prerequisite: CNB548
Credit Points: 6  Contact Hours: 3 per week
COMMERCIAL VALUATION OF COMMERCIAL LAW
An introduction to the law as it affects the construction industry; sale of goods, hire purchase; negotiable instruments; insurance law; partnership law and general principles of company law; bankruptcy and liquidation.
Credit Points: 3 Contact Hours: 1.5 per week

COST PLANNING & CONTROL 1
The significance of construction economics for the client, the professions, the industry and society; historical development, need for and main aims of cost control; comparing cost planning and approximate estimation; cost implications of design variable, shape, size, perimeter, storey height; cost implications of construction methods of site and market conditions, or prefabrication and industrialisation; types of approximate estimates; cost analyses, indices and data; cost in use, maintenance and running costs, the life of buildings and components, effect of taxation and insurance.
Prerequisites: CNB005, CNB010, CNB016, CNB446, CNB461, CNB462, CNB524, CNB540
Credit Points: 4 Contact Hours: 2 per week

COST PLANNING & CONTROL 2
Continuation of CNB647.
Credit Points: 6 Contact Hours: 3 per week

POST CONTRACT SERVICES 2
Continuation of CNB526.
Credit Points: 5 Contact Hours: 2.5 per week

BUILDING RESEARCH
History of building research; definition of research; Australian and international building research organisations; nature of the building industry and implications for research; financing research; future developments in building research; research management; research process; development and presentation of a bibliographic report.
Prerequisite: CNB341
Credit Points: 18 Contact Hours: 4.5 per week

ELECTIVE RESEARCH PROJECT 1
Develop an ability to disseminate and evaluate information and specialised knowledge and acquire an understanding of research methodology. Encompasses the definition, history, financing, future prospects and management of research. Students may either select a research subject, test its workability, develop working procedures, prepare an outline for the study, draft the preliminary section and, after a series of critiques, present a bibliographic report, or carry out a case study or project based upon an unusual or complex process within a relevant professional area, prepare a report and give an oral presentation.
Credit Points: 8 Contact Hours: 4 per week

ELECTIVE RESEARCH PROJECT 2
See CNB661
Credit Points: 8 Contact Hours: 4 per week

PROJECT DEVELOPMENT PROCESS 1
An overview of the project development process from inception to occupancy as a prelude to detailed study of discrete parts of the process. Subject description as for CNB623/4.
Credit Points: 5 Contact Hours: 2 per week

PROJECT DEVELOPMENT PROCESS 2
See CNB663
Credit Points: 5 Contact Hours: 2 per week

PROPERTY MANAGEMENT 1
The role and importance of property management. The legal and physical parameters governing the establishment, holding, use and income generation of property assets. Theoretical and practical knowledge of the operation of components of property management. The management of residential, retail, industrial and commercial buildings. Main statutory provisions relating to above tenancies. Tenancy agreements, management records and accounts. Insurance. Cash flow and credit control.
Credit Points: 8 Contact Hours: 3 per week

PROPERTY MANAGEMENT 2
See CNB665.
Credit Points: 8 Contact Hours: 3 per week

APPLIED COMPUTER TECHNIQUES
The subject is designed to give students hands-on experience and to demonstrate contemporary commercial software. On completion of the subject, students should be able to evaluate a range of commercial and non-commercial computer programs designed for the property development and construction industry. It covers accounting and cost control packages; feasibility studies, etc.; maintenance packages; and CPM, network analysis techniques.
Credit Points: 6 Contact Hours: 5 per week

LAW 6 - VALUATION OF LAND
Credit Points: 4 Contact Hours: 2 per week

DISSERTATION
The dissertation may be of a research or investigative nature on any approved area related to project management. Suitable topics will be discussed and arranged with course members each year. Each student will be assigned a supervisor and will be examined by means of a dissertation by that supervisor and another member of staff prior to review by the external examiner.
Credit Points: 48 Contact Hours: 2 per week

TIME MANAGEMENT 2
Development of an understanding and a high level of competence in the design of planning and control techniques for all stages of project management. The subject covers updating, control and reporting techniques using CP networks. Resource, time and cost analysis of CPM and PERT. Production planning and control using time of balance/flowline techniques. A critical examination of CPM and case studies on its misuse and abuse in contracts. Development of basic planning to produce detailed repetitive production planning of project components and elements, including cycle times and balancing. Planning for various project types and processes, including systematic analysis of methods, techniques and alternatives. Use
of multiple activity charts in planning and monitoring progress, and material handling time analyses in repetitive projects. Credit Points: 6 Contact Hours: 2 per week

- **CNP417 DESIGN MANAGEMENT**
The nature of design and a knowledge of all factors which influence the process of design. It includes planning, managing and controlling the design process from inception to detailed documentation; decision sequences in design; appreciation of the consequences of design decisions on the total project; the inter-relationships between architectural design and engineering and service design requirements; briefing techniques. Credit Points: 6 Contact Hours: 2 per week

- **CNP422 SPECIALIST VALUATIONS**
Theory of value, valuation types and approaches, practical approaches to the following valuation types: rating, compensation for compulsory purchase, investment, own-use, property assets, portfolios, public and specialist properties. Assessment of potential. Credit Points: 6 Contact Hours: 2 per week

- **CNP426 PROJECT DEVELOPMENT**
Site selection/acquisition; securing the land; authority negotiation and approvals; authority approvals; resource planning; acquisition/procurement; project coordination; construction management; commissioning and occupation; property management; project finalisation; post control evaluations; project management objectives of cost time and quality; process overview; project stages; management principles; feasibility/justification; preliminary brief; development objectives, motivation and needs; feasibility studies; project feasibility/justification; finance for projects; marketing. Credit Points: 6 Contact Hours: 2 per week

- **CNP429 COST MANAGEMENT & ECONOMICS**
Financial statements; investment decisions; economic evaluation; financing decisions; life cycle costing; control systems; management accounting and reporting; information systems; cost planning theories and techniques; the economy. Credit Points: 6 Contact Hours: 2 per week

- **CNP430 CURRENT ISSUES**
The subject is to be seen very much as an integrative study area. There are two main strands of integration: the integration, under the project management umbrella, of areas already studied; and the integration of recent and topical developments in the area of project management. Areas may include: quality management, buildability, value analysis, case studies, industrial relations, computer applications and selection, technology, information systems IT and AI, international project management, simulation exercises (Arousal, Bicep), recent developments in law, and englobal land development. It is expected that many of these topics will be covered by guest speakers from industry or presented in the form of seminars. Credit Points: 9 Contact Hours: 3 per week

- **CNP431 PROJECT MANAGEMENT**
Introduction to basic theory in the areas of communication, management and organisation as it applies to the project situation. Communication - process, skills, control, applications; management theory and organisation theory. Negotiation. Project team building. Motivation theory. Construction and project leadership. Change. Strategic management and planning. Personnel. Decision-making strategies. Stress management. Credit Points: 6 per semester Contact Hours: 2 per week

- **CNP433 PROJECT MANAGEMENT LAW**

- **CNP434 TIME MANAGEMENT 1**

- **CNP437 FIELD TRIP**
An experiential field trip of 5 days duration in an adventure-style environment. The emphasis will be on team building, working in a stressful environment, communication skills, personal discovery and extension, and building trust and relationships. The activities will be oriented to achieving greater awareness and competence in the above areas. Credit Points: 12 Contact Hours: 5 days

- **CNP438 REAL ESTATE INVESTMENT ANALYSIS**
Investment principles, characteristics, goals and strategies; investment alternatives, property investments and valuation techniques; current property investment market in Australia; basic risk and return measures and financing; time value of money concepts, PV, FV, PMT, and dual rates; cash flows models and partial interests; NPV's and IRR's and their applications; cash flow assumptions and rates of return; practical cash flow applications and spreadsheets; financial feasibility study models; tax issues related to property investment; property type selection. Credit Points: 12 Contact Hours: 2 per week

- **CNP439 PROPERTY MANAGEMENT**
The motivation, instrumentation and application of property management for commercial and industrial real estate, including lease construction, rental valuations, rent review, review types, budgeting, outgoings and physical management. Trends and prospects for the industry. Credit Points: 12 Contact Hours: 2 per week

- **CNP667 APPLIED COMPUTING**
The development and application of computer programs in the financial and physical management process of property development, management and investment. Credit Points: 6 Contact Hours: 2 per week

- **COB018 ORGANISATIONAL SKILLS 1**
Organisational paradigms; organisational culture and norms; worker socialisation; qualities and attributes of effective workers; self-management skills; interpersonal skills; effective interpersonal relationships. Prerequisites: SSB003, SSB007 Credit Points: 12 Contact Hours: 3 per week

Contact Hours: 2 per week
- **COBI02 ORGANISATIONAL SKILLS 2**
  Tasks and functions of managers; managerial paradigms; managerial styles; teamwork in human service organisations; meetings; managing differences and conflicts, innovation and change.
  Prerequisite: COBI018
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI010 COMMUNICATION MANAGEMENT**
  Communication issues in an organisational setting, planning a course of action; using research to monitor change; application of problem-solving skills.
  Prerequisite: COBI112
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI011 COMPUTER-MEDIATED COMMUNICATION**
  How new communication technologies affect the traditional information processing systems within the corporate culture; the impact of new technologies on traditional writing and document design; information access and distribution; organisational networks; electronic mail; computerised text analysis and style replicators; computer conferencing; the human-machine interface and interpersonal relationships.
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI012 CONSULTING FOR ORGANISATIONAL CHANGE**
  Models of planned change; the change agent; change project management; diagnostic interventions; collecting, analysing and feeding back data; designing interventions; interpersonal and group process interventions; organisational strategy interventions; technological interventions; transition processes; professional ethics; evaluating and institutionalising change.
  Prerequisite: COBI016
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI013 CRITICAL PERSPECTIVES ON ORGANISATIONS & ENVIRONMENT**
  The art of organisational analysis; history of science; organisations as machines/instruments of domination; linguistic analysis; systems theory; organisations as political systems; organisations as psychic prisons; sub-modalities and shifting metaphors; organisations as flux and transformation; lessons from modern physics; hypothetical; ethics and the environment.
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI015 ETHICS**
  Morality & ethics; ethical relativism; ethical egoism; utilitarianism; Kantian and deontological systems; epistemology of human rights; emotivism/prescriptivism; virtue-based ethical systems; ethics and justice; ethics and individual choice; ethics and organisational change; ethical problems as managerial dilemmas; moral challenge of business.
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI016 GROUP COMMUNICATION: THEORY & PRACTICE**
  Exploration and practice in interpersonal communication skills such as listening, assertion and negotiation. Business and media interviewing and small group communication in organisational settings provide the focus for the program. Group dynamics and systems theory as a theoretical base for analysing communication performance. Students practice problem-solving strategies by rehearsing vocational situations.
  Prerequisite: COBI134
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI018 INTER-ORGANISATIONAL RELATIONS**
  The ways organisations interact; classic views reflecting competitive relationships contrasted with emerging forms, including co-operatives and strategic alliances; cross-cultural aspects of organisational forms and relationships with particular reference to Pacific rim nations.
  Prerequisite: BSB102
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI110 ORGANISATION & SOCIETY**
  The context for studies in the broad area of organisation; a base for advanced studies in either organisational communication or organisational studies, drawing primarily upon sociology: functionalist, interpretative and critical perspectives.
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI111 ORGANISATIONAL CHANGE APPLICATIONS**
  Application of organisational theory and change skills through critical analyses of an organisation; case study organisation; on-site familiarisation and seminar; analysis of case study organisation; presentation of findings to client organisation; review: critique of an analysis: content and process.
  Prerequisites: COBI102, COBI103
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI112 ORGANISATIONAL COMMUNICATION**
  How people communicate with each other in modern organisational settings, from small businesses to multinational organisations in the public and private sector; a problem-solving, interdisciplinary approach to communication up, down and across the organisation, among divisions and work units, among different professional and vocational specialists, and within work teams.
  Prerequisite: BSB102
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI113 THEORETICAL PERSPECTIVES ON COMMUNICATION**
  The contemporary study of communication: the ways in which the theories may be applied to particular professional communication situations; an overview of the major theoretical and methodological approaches in the study of communication within a professional context.
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI114 TRENDS IN ORGANISATION DESIGN**
  Provides students with the ability to conceptualise and evaluate new perspectives in organisational design. Topics include: the future of work; classical perspective on design; open systems perspectives; sociotechnical systems perspectives; remote working; organisation learning; collaboration within and between organisations; experiments in work design; co-operatives; networks; the problem of power; distribution; open organisations.
  Prerequisite: COBI129
  Credit Points: 12  
  Contact Hours: 3 per week

- **COBI115 ORGANISATION & MANAGEMENT**
  An introduction to the theory, process and practice of management and organisations. Emphasis is placed on the importance of people in achieving organisational objectives and the need for participants in organisations to become more analytical and strategic...
in their approach to managing various organisations including those in both the public and private sector. Credit Points: 12 Contact Hours: 3 per week

[**COB116 SMALL BUSINESS ENTERPRISE**]
Small business in terms of its entrepreneurial and economic environment, and its growth and development. Credit Points: 12 Contact Hours: 3 per week

[**COB118 COMMUNICATION TECHNOLOGY IN ORGANISATIONS**]
The effects of communication technology on organisational structures and processes, and on people; the concepts and applications of technology which impact on information processing and communication in organisations. Credit Points: 12 Contact Hours: 3 per week

[**COB119 TEXT FORMATTING & TRANSCRIPTION**]
The use of technology for document preparation, formatting and transcription, analysis of underlying principles of skills acquisition; traditional and technological perspectives on; document design, document formatting, business correspondence, tabulation, financial statements, business forms, document formatting for specialised businesses and transcription. Credit Points: 12 Contact Hours: 3 per week

[**COB120 BUSINESS COMMUNICATION**]
Communication in business organisations; the way in which electronic production and transmission is complementing traditional methods of communication; the communication process; written, verbal and non-verbal communication in organisations; electronic communication, such as electronic mail, facsimile, telephone, video-conferencing and electronic calendaring; document preparation for traditional and electronic methods of communication, including word processing and desktop publishing; statistical presentation as communication tools. Credit Points: 12 Contact Hours: 3 per week

[**COB121 RECORDS MANAGEMENT**]
The paper-based and electronic records and information systems operating within and between organisations; analysis of the impact that changes in communication technology have had on these systems. Prerequisite: COB118 Credit Points: 12 Contact Hours: 3 per week

[**COB122 OFFICE PROCEDURES**]
Communication technology and its impact on functions and operational procedures in offices, and as a result enhances teaching competency in this area. Credit Points: 12 Contact Hours: 3 per week

[**COB123 ISSUES IN COMMUNICATION TECHNOLOGY**]
The process of adoption and implementation of new communication techniques within business organisations; the effect of such implementation on work structures and job design and the resulting social issues and implications. Prerequisite: COB118 Credit Points: 12 Contact Hours: 3 per week

[**COB126 SUPERVISION**]
The impact of technological change on the supervision and administrative practices as they relate to communication processes in organisations; the role and duties of supervisory and administrative personnel in information processing; the impact on these roles and duties brought about through changes in technology. Prerequisite: COB123 Credit Points: 12 Contact Hours: 3 per week

[**COB128 SUPERVISED PROJECT**]
An individual research project investigating an approved aspect of organisational design, change and strategy within a local business organisation. Prerequisite: Personal interview and approval by lecturer. Credit Points: 12 Contact Hours: 3 per week

[**COB129 ORGANISATIONAL PROCESSES**]
Organisations are examined from four perspectives: individual, group, organisational and community; emphasis on developing skills for making organisations effective, efficient and humane. Prerequisite: BSB102 Credit Points: 12 Contact Hours: 3 per week

[**COB130 WRITING FOR DESIGNERS 1**]
The writing process: style, accuracy and simplicity in writing; the editing process. Credit Points: 4 Contact Hours: 2 per week

[**COB131 WRITING FOR DESIGNERS 2**]
Writing for the design professional; review of organisation and mechanics; types, formats, styles and review of professional documents; problems of technical style, bibliographic conventions and use of graphics. Credit Points: 4 Contact Hours: 2 per week

[**COB132 THE HUMAN ENVIRONMENT 2**]
Human needs and the influence of selected interpersonal and physical variables on human behaviour; the characteristics and dynamics of group behaviour, communication process, types, and networks; concepts of power, leadership and conflict; observation of behaviour, research methods, interpretation and presentation of research; environmental stressors and their mediation by individual differences. Credit Points: 4 Contact Hours: 2 per week

[**COB133 ORAL PRESENTATION**]
Formal oral presentation techniques, including meetings, conferences, interviews and speeches (informative and persuasive). Evaluation and assessment is by verbal report and presentation. Credit Points: 3 Contact Hours: 1 per week

[**COB134 SPEECH COMMUNICATION: THEORY & PRACTICE**]
Based on the rhetorical perspective; oral, non-verbal and visual modes of communication in their application to business speaking. It aims to develop in the student the ability and confidence to communicate effectively and persuasively in business and professional situations, such as: face-to-face business interviews; presentations to small groups, i.e. clients, boards of directors, etc.; persuasive presentations to large groups such as the public, large company meetings, etc. Credit Points: 12 Contact Hours: 3 per week

[**COB135 PROFESSIONAL COMMUNICATION (INFORMATION TECHNOLOGY)**]
Communicating successfully in writing and orally in contemporary professional situations. An understanding of the concepts and skills required for
effective practices in formal reporting and persuasive writing, oral reporting and persuasive speaking, group decision making and meeting procedure, leadership and participation.
Credit Points: 9 Contact Hours: 3 per week

- COB136 PROFESSIONAL COMMUNICATION (SERVICE)
Communicating successfully in writing and orally in contemporary professional situations. An understanding of the concepts and skills required for effective practices in formal reporting and persuasive writing, oral reporting and persuasive speaking, group decision making and meeting procedures, leadership and participation.
Credit Points: 6 Contact Hours: 3 per week

- COB137 ENGLISH FOR TECHNOLOGISTS
The principles of and strategies for writing effective technical documents and communicating technical material.
Credit Points: 6 Contact Hours: 3 per week

- COB138 WRITTEN COMMUNICATION: THEORY & PRACTICE
The principles of expository and persuasive writing in academic and business contexts.
Credit Points: 12 Contact Hours: 3 per week

- COB139 WRITING FOR DESIGNERS 1
Enhancement of students’ skills in speaking and writing for a professional audience. Includes: analysing the characteristics of successful spoken and written communication; delivering informative presentations; and writing research papers.
Credit Points: 4 Contact Hours: 2 per week

- COB140 WRITING FOR DESIGNERS 2
Development of further skills in speaking and writing for a business audience. Includes: analysing the characteristics of a presentation to clients, presenting a polished client brief, writing proposals, reports, and business letters.
Credit Points: 4 Contact Hours: 2 per week

- COB141 COMMUNICATIONS
Development of skills in reading, writing and spoken communication with special reference to professional and administrative contexts: the library paper; presentation skills; presentation aids; business correspondence; objectives, format, composition; report writing and presentation, editing; and speech preparation.
Credit Points: 4 Contact Hours: 2 per week

- COB142 COMMUNICATION FOR ENGINEERS
Development of confidence in the dissemination of knowledge, skills and information to both technical and non-technical associates via written and oral communication resources; oral presentation techniques; effective written communication skills.
Prerequisite: COB160
Credit Points: 2 Contact Hours: 1 per week

- COB143 TECHNICAL WRITING
The prose, mechanical and graphic elements in reports, proposals, instructions and other technical literature are analysed and put into practice. The subject includes the preparation of routine correspondence and presents contemporary developments in organisational communications.
Credit Points: 2 Contact Hours: 1 per week

- COB144 LITERATURE & COMMUNICATION
Development of skills in written communication, and in dealing with a variety of communicative and textual forms. Students acquire an understanding of various forms of written communication, specifically literary forms such as fiction and poetry, and performative, such as drama. Literary theory as well as language and communication theory. Background for students wishing to take electives in the humanities area in later semesters.
Prerequisite: COB160
Credit Points: 12 Contact Hours: 3 per week

- COB157 CORPORATE WRITING & EDITING
The specific requirements of writing in the corporate environment; principles and procedures in writing management submissions, reports, and manuals, as well as letters, memos, and resumes; the content, style and presentation of professional documents for specific readers.
Prerequisite: COB138 or COB160
Credit Points: 12 Contact Hours: 3 per week

- COB158 ADVANCED SPEECH COMMUNICATION (THEORY & PRACTICE)
Based on the semiotic perspective using practical drama as the tool for learning. Communication theory: verbal structure, paralanguage, proxemics, kinesics, etc. through this medium. The development of expressive self-presentation skills in the business environment. The subject aims to develop communicators with an understanding of communicator style who are creative and risk-taking in their presentations; who, having an understanding of the multiple message levels of oral communication, will approach a presentation with a prepared control over visual, verbal, paralinguistic, and kinetic elements of performance.
Prerequisites: COB134, COB113
Credit Points: 12 Contact Hours: 3 per week

- COB159 RESEARCH CONCEPTS & TECHNIQUES
An overview of the main traditions of research; secondary research: various library information retrieval techniques; qualitative methods: focus groups, action research, content analysis and institutional analysis; quantitative techniques: survey methods and questionnaire relationships between consumers and researchers.
Credit Points: 12 Contact Hours: 3 per week

- COB160 PROFESSIONAL COMMUNICATION
Principles and strategies that enable students to cope with the complex rhetorical demands of writing and speaking within the organisational culture.
Credit Points: 12 Contact Hours: 3 per week

- CON101 COMMUNICATION STRATEGIES
Communication theory put into practice. Examples of policy and plans; how to produce the appropriate change through communication. The ethics of persuasion and the problems of cooperation explored in the process of policy formation and planning. Students take into account the social implications of producing change, the role of the change agent and the development of effective strategies for strategic thinking and application in the environments of marketing, advertising, editorial journalism, or-
organisational communication, public relations, public affairs and public information.
Credit Points: 12  Contact Hours: 3 per week

**CON102 ADVANCED ORGANISATIONAL COMMUNICATION**
How people relate to each other in modern organisational settings, from small businesses to multi-national organisations in the public and private sector; communication up, down and across the organisation, among divisions and work units, among different professional and vocational specialities and within work teams; a problem-solving, interdisciplinary approach with reference to, at least, social psychology, sociology, culture theory, systems thinking and network analysis.
Credit Points: 12  Contact Hours: 3 per week

**CON103 ADVANCED COMMUNICATION MANAGEMENT**
Allows students, after an exposure to the diverse field of communication, to review aspects of this field in depth. Current issues in the theory and practice of human communication. Student and lecturing staff use the various perspectives, theories and applications explored in the program to consider the management of communication programs and systems.
Credit Points: 12  Contact Hours: 3 per week

**COP100 BUSINESS COMMUNICATION**
The development of strategic communication skills for application within the contemporary business and professional organisation; listening and non-defensive communication; negotiation, interviewing and assertion; group communication processes and meeting procedures; oral reporting; proposal and report writing; the study of managerial communication involving organisational climate, behaviour and politics.
Credit Points: 12  Contact Hours: 3 per week

**COP101 ARTS ADMINISTRATION & SOCIETY**
The foundations of the arts and arts administration in Australia; the role of arts organisations; organisational structures and planning processes; facilities; policy-making; government; community arts; current research and practices.
Credit Points: 12  Contact Hours: 3 per week

**COP102 THE ARTS INDUSTRY**
The framework of the arts as an industry; contracts and artists' rights; personnel and industrial relations; marketing the arts; law and the arts; tickets and subscriptions; government funding and private sponsorship; communications and the use of the media; management case studies; operational procedures within arts organisations.
Prerequisite: COP101
Credit Points: 12  Contact Hours: 4 per week

**COP103 STRATEGIC ORGANISATIONAL THOUGHT & PRACTICE 1**
Philosophy and development of management; leadership; managerial roles and skills; decision making and problem solving; organisational design; organisational change; organisational analysis using metaphors; organisational dynamics; creativity and control; management of human resources; strategic thinking.
Credit Points: 12  Contact Hours: 3 per week

**COP104 STRATEGIC ORGANISATIONAL THOUGHT & PRACTICE 2**
Continuation of COP103.
Credit Points: 12  Contact Hours: 3 per week

**COP105 ISSUES IN OFFICE ADMINISTRATION**
Issues in office administration roles in the workplace; interpersonal relations; organisational culture and climate; development of practical skills within an appropriate learning framework to deal with these issues.
Credit Points: 12  Contact Hours: 3 per week

**COP106 COMMUNICATION THEORY**
An overview of classical rhetorical theory, contemporary rhetorical theory and systems theory; the ways in which these theories, methods and approaches may be applied to particular professional communication situations.
Credit Points: 12  Contact Hours: 3 per week

**COP108 COMMUNICATION TECHNOLOGIES & SOCIETY**
The history of technology; technological determinism; technological assessment; social impacts; new technologies: digital, microprocessors, fibre and satellites; convergence; new applications: ISDN, HDTV, electronic publishing, computer-supported cooperative work.
Credit Points: 12  Contact Hours: 3 per week

**COP109 PERSONAL & INTERPERSONAL SKILLS**
An overview of the social, organisational and service contexts in which human service organisations operate; development of an interpersonal style for effectiveness in such organisations; development of skills in career management, job getting, time management, stress management, communication, assertion, working with managers, collaborating in work groups, managing disagreement and conflict, and contributing to change.
Credit Points: 12  Contact Hours: 3 per week

**COP110 INNOVATION & CHANGE**
Clarification of need for change in human service organisations; exploration of models of change, approaches to change and the change agent role; development of effective strategies for contributing to and initiating change.
Credit Points: 12  Contact Hours: 3 per week

**COP111 INDEPENDENT STUDY 1**

**COP112 INDEPENDENT STUDY 2**
An indepth study of a topic that extends the body of knowledge of course participants, enhances their performance as a human service manager or benefits their organisation.
Credit Points: 12  Contact Hours: 3 per week

**COP113 ORAL COMMUNICATION SKILLS**
Formal oral communication techniques including meetings, conferences, interviews and speeches (informative and persuasive).
Credit Points: 2  Contact Hours: 1 per week

**COP114 REPORT PREPARATION**
Formal writing techniques, including reports, instructions, proposals, specifications, correspondence and essays. Report writing. Structure and content of reports. Summaries and subdivision of material. Precise use of tables, charts, and illustrations in written presentation. Clarity and the selection and management of relevant data.
Credit Points: 2  Contact Hours: 1 per week
Ill COPUS PROFESSIONAL COMMUNICATION
Credit Points: 5 Contact Hours: 2 per week

Ill COP116 SKILLS FOR OFFICE AUTOMATION
Development of keyboard skills using micro-computers; introduction to basic word processing and text editing techniques covering a range of type-written business communications; correspondence, reports, tabulations.
Credit Points: 12 Contact Hours: 3 per week

Ill COP118 MANAGEMENT PRACTICES 1
Exploration of managerial paradigms and their relevance for human service organisations; discussion of issues affecting the managerial task; development of a managerial style that is consistent with the tasks and philosophies of the human services.
Credit Points: 12 Contact Hours: 4 per week

Ill COP119 MANAGEMENT PRACTICES 2
Development of managerial skills including those relating to recruitment and selection, supporting and developing workers, assisting with problems of workers, developing collaborative work environments, managing meetings, making decisions, resolving conflict and stress.
Credit Points: 12 Contact Hours: 4 per week

Ill COP120 OFFICE AUTOMATION & ADMINISTRATION
Introduction to the concepts and practice of office automation with emphasis on advanced techniques of computerised text generation and editing using the word processor; office style integrated projects; implications for administrators of the introduction of computer-based technology into the office and implementation of appropriate procedures.
Prerequisite: COP116
Credit Points: 12 Contact Hours: 3 per week

Ill COP121 MEDIA MANAGEMENT
The use of the print and broadcasting media to improve organisational communications; instruction in basic newswriting and other media practices; the development of in-house and external media programs.
Prerequisite: COB138
Credit Points: 12 Contact Hours: 3 per week

Ill COX100 INTRODUCTION TO ORGANISATION
Examination of basic management and organisational skills and their application to the workplace.
Credit Points: 12 Contact Hours: 4 per week

Ill COX101 COMMUNICATION
Principles of effective communication; techniques of oral and written communication; reading and listening to gain information; interviewing; report writing; preparing documentation and manuals.
Credit Points: 12 Contact Hours: 3 per week

Ill COX102 WRITTEN ENGLISH
The appreciation and study of correct English writing style in the business profession; grammar, punctuation, spelling, usage and composition.
Credit Points: 12 Contact Hours: 4 per week

Ill COX103 WRITTEN & SPOKEN ENGLISH
The development of written and spoken language skills used in business communication; report writing; letter writing; speech writing; intra-office communication; presentational speaking, interviewing and meeting procedure.
Credit Points: 12 Contact Hours: 4 per week

Ill COX104 COMMUNICATION TECHNIQUES
Techniques of technical writing appropriate to applied science vocations; technical report writing, writing for non-technical audiences; application of communication principles in technical writing; application of communication principles to non-written communications; individual and group speaking; speech writing; oral delivery of technical papers; formal meeting procedures.
Credit Points: 4 Contact Hours: 2 per week

Ill COX107 SEMINAR
Preparation of technical papers and reports for both written and oral presentation; business correspondence; meeting procedures.
Credit Points: 4 Contact Hours: 1.5 per week

Ill CPB101 SCHOOLS & COMMUNITIES
The range of inter-relationships between schools and their communities; skills and techniques for analysing school-community relationships; case studies; student involvement in fieldwork and the development of appropriate practical skills.
Credit Points: 8 Contact Hours: 2 per week

Ill CPB102 SOCIALISATION THROUGH PLAY
The socialisation of a child in both the home and the school; socialisation through the medium of play.
Credit Points: 8 Contact Hours: 2 per week

Ill CPB200 EDUCATION IN THE AUSTRALIAN CONTEXT
The application of theoretical models and other paradigms to the development of a personal perception of Australian identity; the relationship between identity, society, culture and education; the investigation of specific key dimensions of Australian society and identity; dynamic and changing contemporary phenomena.
Credit Points: 8 Contact Hours: 3 per week

Ill CPB201 EDUCATION & SOCIETY
Three major focuses of the sociocultural study of education and schooling: historical, philosophical and social origins of education; educational transmission and reproduction; socialisation processes and educational outcomes.
Credit Points: 12 Contact Hours: 3 per week

Ill CPB202 EDUCATION & CHANGE
Examination of change as an adjunct of the character and values of society and the nature and needs of human beings. Existing and developing agendas for change are examined in several fields such as: multiculturalism; equity; employment; educational assessment; teaching and learning with a view to encouraging students to develop personally effective responses to the demands of change that are relevant to schools and pupils.
Prerequisite: CPB201
Credit Points: 8 Contact Hours: 3 per week

Ill CPB280 EDUCATIONAL LEADERSHIP
The foundations of leadership: systems theory, social systems; values; organisations; role theory; the
leaders and the program; developing a model of leadership; identifying and investigating leadership situations.

Credit Points: 8  Contact Hours: 3 per week

- **CPB281 ETHNICITY & RACISM IN EDUCATION**
  An historical and theoretical study of ethnicity, indigenous identity and assimilation movements, pluralism and social engineering; approaches for combating racism and the role of the Human Rights Commission; case studies; examination of a range of approaches to developing cultural sensitivity, curriculum change and a classroom climate which applies national agenda and concerns to teaching practice.
  
  Credit Points: 8  Contact Hours: 3 per week

- **CPB282 POLICY ISSUES IN EDUCATION**
  The development in students of the knowledge, skills and understandings which enable them to: originators of policy at community and school levels of concern; participants in policy formulation at all levels; and end-users of policy. A particular emphasis is placed upon the notion of professional empowerment and positive self-worth as a possible outcome of involvement in these processes.
  
  Credit Points: 8  Contact Hours: 3 per week

- **CPB301 EDUCATION IN CONTEXT**
  Education and change in a post-modern society; the implications for education of the complex and diverse nature of Australian society: the role of policy making in meeting the educational challenges of the 1990s.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB302 EDUCATION & SOCIETY**
  Social analysis and its application to educational and social issues; the development of schooling as an institution and the role of schools in social control and in perpetuating inequalities. Particular emphasis is given to the impact of ideologies in education.
  
  Prerequisite: CPB301  Credit Points: 12  Contact Hours: 3 per week

- **CPB303 PHILOSOPHICAL ANALYSIS OF SCHOOL PRACTICES**
  The subject analyses current school practices, including the organisation of schools, the nature of teacher work and debates about education from a philosophical perspective. It then centres on articulating a philosophy of teaching which emphasises a transformative approach to education.
  
  Prerequisites: 1st and 2nd Year Studies in Education  Credit Points: 12  Contact Hours: 3 per week

- **CPB304 CRITICAL PERSPECTIVES ON CLASSROOM KNOWLEDGE**
  The selection of classroom knowledge; the epistemological aspects; sociology of knowledge; historical perspectives on the curriculum, teachers and texts; curriculum debates; politics of school knowledge; academic freedom and dangerous knowledge.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB310 EDUCATION FOR A MULTICULTURAL SOCIETY**
  In this subject students are introduced to the concept of multiculturalism and are given specialist knowledge to prepare them to teach in schools in a multicultural society.
  
  Prerequisites: CPB301, PB302  Credit Points: 12  Contact Hours: 3 per week

- **CPB320 CONTEMPORARY ISSUES IN EDUCATION**
  Exploration of the cultural and social contexts and selected psychological factors relevant to the processes of education and schooling in an era of change; application of the principles of social justice to the evaluation of education policy and practice, and analysis of social and personal action relevant to educational change.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB421 PHILOSOPHICAL PERSPECTIVES ON SCHOOLING**
  Recent developments in philosophy of education, which attempt to account for the micro-institutional practices of schooling, those relating to school prospectuses, timetables, school architecture, classroom work.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB422 PHILOSOPHY IN THE CLASSROOM**
  Philosophical belief systems underlying approaches to learning, knowledge and curriculum, justice and fairness to both teachers and students in the classroom. Current developments as they relate to classroom practice.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB423 SOCIETY, SOCIAL POLICY & EDUCATION**
  Education as social policy: historic, economic and political context of educational policy making; education and social justice; policy, social change and education practice.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB424 SOCIETY OF THE SCHOOL**
  Using a sociological framework, this subject provides teachers and administrators with an opportunity to analyse schools and classrooms within a social context. From this analysis and the understanding gained, students are able to draw implications to assist them in carrying out their teaching and administration practices more effectively.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB425 AESTHETIC EDUCATION**
  An examination of aesthetics, both traditional and contemporary, and the relevance they have for understanding the role arts play in education; the democratisation of culture, encouraging more representative forms of cultural production; the evaluation of arts, particularly in the classroom; theory of creativity and the imagination; the deficiencies of an individualistic ethic in the arts.
  
  Credit Points: 12  Contact Hours: 3 per week

- **CPB440 THE COMMUNITY & SCHOOL ADMINISTRATION**
  This subject provides students with an opportunity to broaden their understanding of the community context in which schools operate. It examines examples of successful community-school linkages such as school advisory boards and develops students' capacities to manage and develop these linkages.
  
  Prerequisites: Minimum of one year's teaching experience  Credit Points: 12  Contact Hours: 3 per week

- **CPB441 HISTORY OF AUSTRALIAN EDUCATION**
  The growing involvement of the State in education during the nineteenth century; factors which led to the State accepting responsibility for elementary educa-
education; growth of educational bureaucracies; State involvement in secondary education; establishment of tertiary education in Australia; the influence of particular reports on Australian education.

Credit Points: 12  Contact Hours: 3 per week

- **CPB442 EDUCATION FOR A MULTICULTURAL SOCIETY**

Over the last decade, multiculturalism has replaced assimilation as an approach to migrants. This subject teaches readers given specialist knowledge and skills to prepare students for life in a multicultural society.

Credit Points: 12  Contact Hours: 3 per week

- **CPB443 COMPARATIVE & INTERNATIONAL EDUCATION**

Australia's identity in the international community has significant implications for education. This subject introduces students to major international issues in education through studies of global developments and by comparing Australian education with education in other cultures. The subject develops skills and knowledge appropriate for teachers of the 1990s and the next century.

Credit Points: 12  Contact Hours: 3 per week

- **CPB444 ISSUES IN ABORIGINAL EDUCATION**

Factors influencing the position of Aborigines and Islanders in Australian society; government policies; Aboriginal culture and education; current initiatives in Aboriginal education; participation of Aborigines in policies and programs.

Credit Points: 12  Contact Hours: 3 per week

- **CPB445 CAREER & LIFE PATTERNS OF WOMEN TEACHERS**

The relevance of theories of adult development and career development for understanding the personal and professional life patterns of women teachers is studied. Emphasis is placed upon acquiring personal coping strategies. This subject is also of relevance to male teachers seeking a deeper understanding of conflicts facing female teachers.

Credit Points: 12  Contact Hours: 3 per week

- **CPB446 WOMEN, EDUCATION & SOCIAL CHANGE IN AUSTRALIA**

Education and other social policy initiatives relating to women; current debates on the status of women and education's intervening role; ideology and the position of women; effects of economic and technological change; educational implications.

Credit Points: 12  Contact Hours: 3 per week

- **CPB449 SOCIOLOGY OF EDUCATION**

The nature and scope of sociology: sociology and education; the cultural context of educational institutions and teaching; subcultures in the school and their interaction; appropriateness of education to modern Australian society.

Credit Points: 12  Contact Hours: 3 per week

- **CPB492 PHILOSOPHY OF EDUCATION**

Meaning, purpose and function of philosophy; philosophy of education; the continuing education debate; the concept of knowledge; traditional and progressive education; confronting the future in a changing society; development of a personal philosophy of education.

Credit Points: 12  Contact Hours: 3 per week
This Curriculum C subject provides opportunities for students with an appropriate background to prepare to teach Aboriginal education. It develops skills and understandings in planning, assessment, teaching and learning strategies, and builds on the general principles of the Curriculum A and B groups of subjects.

Credit Points: 12 Contact Hours: 3 per week

CSBO13 DATA STRUCTURES
Prerequisites: CSB010, CSB011
Credit Points: 12 Contact Hours: 3 per week

CSBO15 SYSTEMS SOFTWARE
Systems structure, kernel architectures, user perspective, file system, buffer cache, control processes, system call interface, interrupt handling, process scheduling, memory management, shell programming, system management. Introduction to C.
Prerequisite: CSB011
Credit Points: 12 Contact Hours: 3 per week

CSBO17 SOFTWARE ENGINEERING
Specification methods; modular programming techniques; language support for modular programming; debugging techniques.
Prerequisites: CSB011, ISB019
Credit Points: 12 Contact Hours: 3 per week

CSBO18 INTRODUCTION TO COMPUTER NETWORKS
Distributed system architecture and open system interconnection; data communications hardware; data communications software; network management; local area networks; future trends in networking.
Prerequisite: ISB005 or ISB014
Credit Points: 12 Contact Hours: 3 per week

CSBO07 PROGRAMMING LANGUAGES
Further software development; techniques of program development; top-down design and modularity; computer programming using other appropriate languages. (Incompatible with CSB013 and CSB015.)
Prerequisite: ISB095
Credit Points: 12 Contact Hours: 3 per week

CSB100 INTRODUCTION TO COMPUTER SCIENCE
Establishes a basis for the major computing topics to be covered in later subjects; provides students with a disciplined and structured approach to algorithm design, and introduces a range of problem-solving methods and a variety of programming languages which can be used to process information in a computer.
Credit Points: 9 Contact Hours: 3 per week

CSB101 COMPUTER SYSTEMS 1
The physical organisation of a computer system: the control and flow of information within the system, the representation of data in a computer system, and the design of elementary digital electronic circuits. Topics covered include Boolean algebra; state concepts; data representation; processor organisation; memory organisation; input/output devices; machine language; and assembly language.
Credit Points: 9 Contact Hours: 3 per week

CSB110 PROGRAMMING PRINCIPLES
Extending material introduced in CSB100; structured program design techniques; advanced algorithms and methods of proving program correctness.
Prerequisite: CSB100
Credit Points: 9 Contact Hours: 3 per week
CSB155 INTRODUCTION TO COMPUTING
The computer as a processor of information: an overview of computers, computer organisation, systems software, programs and the range of programming languages; the design of algorithms using structured techniques and stepwise refinement; implementation and execution of such algorithms using PASCAL.
Credit Points: 12  Contact Hours: 3 per week

CSB181 INTRODUCTION TO COMPUTER SCIENCE
Provides a disciplined and structured approach to algorithm design and problem-solving methods; introduces a variety of programming languages which can be used to process information in a computer. On completion of the subject, students should be able to solve a variety of problems in different application areas.
Credit Points: 12  Contact Hours: 4 per week

CSB191 INTRODUCTION TO COMPUTING
Introduction to technical computer programming; teaching programming techniques for the writing of correct and efficient programs for limited, but typical engineering problems; using structured programming techniques to write, modify and enhance programs on selected computer systems using the PASCAL programming language.
Co-requisites: MAB193, CEB184
Credit Points: 4  Contact Hours: 2 per week

CSB200 FOUNDATIONS OF COMPUTING 1
The study of abstraction: data abstraction as a technique for dealing with complex data inter-relationships, and procedural abstraction as a way of expressing complex operations on such structures; focuses on the concept of the abstract data type (ADT) and introduces a number of important examples of ADTs and associated algorithms; also includes topics such as the analysis of algorithmic complexity and proofs of correctness.
Prerequisite: CSB110
Credit Points: 9  Contact Hours: 3 per week

CSB201 COMPUTER SYSTEMS 2
Organisation of simple computer systems and the way in which hardware provides the basic facilities for the machine; techniques involved in the programming of input-output operations and the interrupt structure which underlies operating system organisation in uniprocessor systems.
Prerequisite: CSB101
Credit Points: 9  Contact Hours: 3 per week

CSB210 FOUNDATIONS OF COMPUTING 2
Analysis of algorithms, the various styles of programming language and the abstractions which they support; languages with notable features designed for special computer classes of problems; recursion and iteration; algorithms; space and time requirements.
Prerequisite: CSB110
Credit Points: 9  Contact Hours: 3 per week

CSB212 LANGUAGES & LANGUAGE PROCESSING
Theory and practice of language processing: the design and recognition of small languages for command processors and other interactive programs; advanced data structures and algorithm design.
Prerequisite: CSB200
Credit Points: 9  Contact Hours: 3 per week

CSB213 SCIENTIFIC APPLICATIONS
Provides students with a thorough knowledge of C and teaches the solving of advanced scientific (e.g. mathematical and engineering) problems.
Prerequisite: CSB110
Credit Points: 9  Contact Hours: 3 per week

CSB263 COMPUTING
A basic understanding of computer programming: simple applications in the BASIC language. Topics include: computer utilisation; computer organisation; hardware; software; data organisation; information storage retrieval; computer systems; programming in BASIC; problem solving: analysis of numerical and non-numerical problems; brief introduction to FORTRAN; use of WordPerfect, VP Planner and dBase III Plus.
Credit Points: 12  Contact Hours: 3 per week

CSB283 SCIENTIFIC APPLICATIONS
Provides a thorough knowledge of FORTRAN, and teaches the solving of advanced scientific (e.g. mathematical and engineering) problems; FORTRAN programming to an advanced level including aspects of portability arising from differences in standards and compiler implementation; mathematical software.
Prerequisite: CSB155
Credit Points: 12  Contact Hours: 3 per week

CSB291 INTRODUCTION TO FORTRAN
Mainframe and industry standard micro-based systems; applying the programming techniques acquired in CSB191 to the FORTRAN programming language.
Prerequisite: CSB191
Credit Points: 4  Contact Hours: 2 per week

CSB292 FOUNDATIONS OF COMPUTING 2
Analysis of algorithms; the various programming languages styles; and the abstractions which they support; languages with notable features designed for special computer classes of problems; recursion and iteration; algorithms; and space and time requirements.
Prerequisite: CSB280
Credit Points: 12  Contact Hours: 4 per week

CSB294 COMPUTER PROGRAMMING
An introduction to algorithms, programs and computers; basic programming; program structure; programming and computing systems; debugging and verification of programs; data presentation; special programming topics.
Co-requisite: SVB121
Credit Points: 6  Contact Hours: 3 per week

CSB301 OPERATING SYSTEMS
Structure of operating systems and real-time software; process and resource management functions of such software and its realisation in terms of a hierarchy of abstract machines, each of which depends on the set of facilities provided by the abstract machine immediately below it in the hierarchy; considerable emphasis on practical work.
Prerequisites: CSB200, CSB201 or CSB282, CSB250
Credit Points: 9  Contact Hours: 3 per week

CSB302 SOFTWARE ENGINEERING
Techniques essential to the production of software systems which are reliable, within budget, fully documented, and well tailored to their uses; practical work to apply these techniques in the organisation, management and development of software projects with
emphasize on modern programming languages supporting software engineering (e.g., Ada, Modula-2).

Prerequisite: CSB200 or CSB290
Credit Points: 9
Contact Hours: 3 per week

CSB311 ADVANCED COMPUTER ARCHITECTURES

Organisation of contemporary computer systems and the variety of different structures which may be used for specific tasks; theory and case studies based on existing machines of practical or theoretical importance.

Prerequisite: CSB201 or CSB282
Credit Points: 9
Contact Hours: 3 per week

CSB319 SPECIAL STUDIES
CSB320 SPECIAL STUDIES

Covers aspects of current scientific interest and makes allowances for significant developments or emphasis in computer science not included in the remainder of the course program. Check School noticeboards for further details.

Prerequisite: Completion of at least half of the normal program of the Bachelor of Applied Science (Computing) or completion of at least half of the Graduate Diploma in Computing Science or 60 points in computing subjects in the Science major program.

Credit Points: 9
Contact Hours: 3 per week

CSB321 GRAPHICS

The nature of computer graphics hardware and software; thorough grounding in the design and implementation of computer graphics software so as to enable students to implement graphic systems in their particular application areas.

Prerequisite: CSB213 or CSP213 or CSB283
Credit Points: 9
Contact Hours: 3 per week

CSB324 ARTIFICIAL INTELLIGENCE

Artificial intelligence in the computing industry; aspects of artificial intelligence which have given rise to commercial products; background research efforts which promise to have major impact on the use of computers in the near future.

Prerequisite: CSB210 or CSP214 or CSB292
Credit Points: 9
Contact Hours: 3 per week

CSB325 EXPERT SYSTEMS

Expert systems in the AI context; knowledge representation techniques; inference methods; uncertainty; the expert system development process; case studies of existing expert systems; the human/expert system interface; limitations and social implications of expert systems; current international knowledge-based system programs and future perspectives.

Prerequisite/Co-requisite: CSB210 or CSP214 or CSB292
Credit Points: 9
Contact Hours: 3 per week

CSB326 SYSTEMS PROGRAMMING

UNIX operating system at the user and systems programming levels; a study of shell programming and of the UNIX/C programming environment; a detailed examination of UNIX process and device management, UNIX security and UNIX administration; some time is spent relating the parallelism and inter-process communication features of UNIX/C to similar features in the languages Modula-2 and Ada.

Prerequisite: CSB301 or CSP213
Credit Points: 9
Contact Hours: 3 per week

CSB350 MISCELLANEOUS STUDIES

Selected theoretical and/or practical work to complement and/or supplement other subjects being studied.

Credit Points: 3
Contact Hours: 1 per week

CSB490 SOFTWARE ENGINEERING

The structure and syntax of well-designed programs as well as programming techniques for use in electronics, communications and electrical engineering, using examples from C and UNIX.

Prerequisite: CSB181
Credit Points: 6
Contact Hours: 3 per week

CSB860 COMPUTER SYSTEMS & ARCHITECTURE

Single and multi-user operating systems; interaction with computer systems and management of stored information; definition and implementation of algorithms in suitable language; selection of computable representation for real world concepts and application in computer programs; hierarchy of levels of abstraction; adoption of abstracted views of real world information processing or problem-solving situations; capabilities and limitations of conventional, sequential processing machine architectures.

Credit Points: 10
Contact Hours: 3 per week

CSB862 COMPUTATIONAL & MATHEMATICAL FOUNDATIONS

Fundamental structures and operations; set theory; algorithms, model building, problem solving and computer implementation.

Credit Points: 12
Contact Hours: 3 per week

CSB864 PROGRAMMING PRINCIPLES

The development of computer software; data and procedural abstraction; modular programming, stepwise refinement and bottom-up techniques.

Prerequisite: CSB860
Credit Points: 12
Contact Hours: 3 per week

CSB866 ARTIFICIAL INTELLIGENCE

Artificial intelligence as a discipline; philosophical issues, knowledge representation, reasoning and heuristic methods used in AI; introduction to AI programming.

Prerequisites: CSB860, CSP862
Credit Points: 12
Contact Hours: 3 per week

CSB875 HUMAN-COMPUTER INFORMATION

The limits that exist to the understanding of human cognition with particular reference to the construction of computer models; the utility and limitations of the tool metaphor to describe human-computer interaction; pre-understanding and background required for effective tool use; model building by the user; identification of forms of linguistic communication; tool construction and use.

Prerequisites: CSB860, CSP862 and CSP863
Credit Points: 10
Contact Hours: 3 per week

CSB960 PROJECT WORK

Students, either individually or in small groups, undertake a substantial project relevant to the needs of industry and designed to provide insight into industrial requirements. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project. Before work commences on the project, student(s) and supervisor must agree on the topic of the project and the scope of the work to be attempted.

Prerequisites: Completion of at least two-thirds of the Bachelor of Applied Science (Computing).
Credit Points: 12
Contact Hours: 4 per week

CSB970 PROJECT WORK

The first half of an optional year-long project taken in conjunction with CSB960 on the approval of the
course coordinator. Before work commences on the project, student(s) and supervisor must agree on the topic of the project and the scope of the work to be attempted.

Prerequisites: Completion of at least two-thirds of the Bachelor of Applied Science (Computing).
Credit Points: 12 Contact Hours: 4 per week

- CSB980 PROJECT (IF22)
Students in IF22 only, either individually or in small groups, undertake a substantial project relevant to the needs of industry and designed to provide insight into industrial requirements. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project. Before work commences on the project, student(s) and supervisor must agree on the topic of the project and the scope of the work to be attempted.
Co-requisites: This subject must be done in the final year of the course.
Credit Points: 30

- CSN100 THEORY OF COMPUTING 1
Formal properties of programs: the view of programs as predicate transformers is developed as a method of constructing provably correct algorithms; methods of software development based on formal specifications.
Prerequisite: CSB210 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

- CSN110 COMPILER CONSTRUCTION
The organisation and structure of language translators and compilers. Some emphasis is placed on those parts of these software tools which are amenable to formal analysis. The material extends undergraduate studies in algorithm design and in the semantics of formal languages. Special attention is paid to techniques which are applicable in the implementation of special purpose languages such as database query languages and production systems.
Prerequisite: CSN210 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

- CSN201 RESEARCH METHODOLOGY
Theoretical and practical aspects of research methodology and the design of research projects. Students will attend lectures/seminars of approximately 1 hour every two weeks (on average). They will also engage in literature search and generally other design aspects of their research project.
Credit Points: 12

- CSN202 HONOURS PROJECT
This is a continuation and completion of the research project initiated for CSN201.
Prerequisite: CSN201
Credit Points: 12

- CSN210 DISTRIBUTED SYSTEMS
Provides a thorough understanding of the rationale for distributed computer systems, their domain of application and the principles of distributed control underlying their construction. A number of representative systems will be examined throughout the subject.
Prerequisites: CSB301, CSB311
Credit Points: 12 Contact Hours: 3 per week

- CSN220 ARTIFICIAL INTELLIGENCE
Artificial intelligence in the computing industry; aspects of artificial intelligence which have given rise to commercial products; background research efforts which promise to have major impact on the use of computers in the near future.
Prerequisite: CSB324 or equivalent
Credit Points: 12 Contact Hours: 3 per week

- CSN300 THEORY OF COMPUTING 2
Formal language theory: investigation of various types of simple automata and pushdown automata and their relation to context free languages; discussion of some aspects of computational complexity.
Prerequisite: CSB210 or equivalent
Credit Points: 12 Contact Hours: 3 per week

- CSN301 MINOR PROJECT
- CSN302 MINOR PROJECT
- CSN303 MINOR PROJECT
- CSN304 MINOR PROJECT
Students may undertake a number of minor projects so that they can pursue specialised areas of interest, or broaden their knowledge in areas of relevance to their employment. Topics are to be decided by agreement between the student and a Faculty staff member acting as supervisor.
Credit Points: 12

- CSN310 PARALLEL PROCESSING
The modelling of parallel systems and the design methodologies used in their construction; examination of a range of applicable software systems and methodologies; the analysis and design of parallel systems is based on the theory of communicating sequential processes.
Prerequisite: CSN210
Credit Points: 12 Contact Hours: 3 per week

- CSN320 FORMAL SECURE SYSTEMS
The formal mechanisms required in the design of secure systems; study of formal models of secure systems, e.g. Bell-LaPadula model; the relationship between formal methods of computer science and the design of formally verifiable computer systems.
Prerequisite: ITN502
Credit Points: 12 Contact Hours: 3 per week

- CSN330 NATURAL LANGUAGE PROCESSING
An important specialisation within the field of artificial intelligence and its applications.
Prerequisite: An introductory subject in natural language processing.
Credit Points: 12 Contact Hours: 3 per week

- CSN340 COMPILER LABORATORY
In-depth treatment of topics of contemporary translator construction in a practical setting; code generation methods for advanced computer architecture.
Prerequisite: CSN110
Credit Points: 12 Contact Hours: 3 per week

- CSN350 ADVANCED GRAPHICS 1
Advanced level extension of the material in the undergraduate curriculum; the use of facilities provided by existing graphics systems.
Prerequisite: CSB321
Credit Points: 12 Contact Hours: 3 per week

- CSN360 ADVANCED GRAPHICS 2
Specialised areas of computer graphics. Topics will be agreed between staff and students.
Prerequisite: CSN350
Credit Points: 12 Contact Hours: 3 per week
The subject discusses the purpose, scope, and history of neurocomputing. It explores various models of artificial neurons and a number of learning rules for supervised and unsupervised learning. Pattern classifiers, associative and auto associative neural network arrays are treated.

Prerequisite: CSP112
Credit Points: 12
Contact Hours: 3 per week

This subject forms the second half of the major project component of the Master of Applied Science (Computing) course, and is a continuation of the same topic commenced in CSN400.

Prerequisite: CSN400
Credit Points: 12
Contact Hours: 3 per week

Study and use of efficient data structures; languages illustrating the variety of features found in computer programming languages; structured program design techniques; advanced algorithms and methods of providing program correctness.

Prerequisite: Completion of a qualifying PASCAL programming subject prior to entry to the course.
Credit Points: 12
Contact Hours: 3 per week

Computer organisation; the nature and role of system software and the nature of microcomputers and computer graphics; computer systems architecture; micro-operations, instruction formats; microprocessor types; machine language; system software including operating systems features, assemblers, compilers, loaders.

Prerequisite: CSP112
Credit Points: 12
Contact Hours: 3 per week

Theory and practice of language processing: the design and recognition of small languages for command processors and other interactive programs; advanced data structures and algorithm design.

Prerequisite: CSP112
Credit Points: 12
Contact Hours: 3 per week

Provides a thorough knowledge of FORTRAN and C, and teaches the solving of advanced scientific (eg, mathematical and engineering) problems.

Co-requisite: CSP112
Credit Points: 12
Contact Hours: 3 per week

Continues the material introduced in the prerequisite subjects; the analysis of algorithms; the various styles of programming languages and the abstractions which they support.

Prerequisite: CSP112
Credit Points: 12
Contact Hours: 3 per week

Overview of artificial intelligence research, its current and future impact on society; computer capabilities and the human mind; methods and techniques used in AI programming; overview of logic programming in PROLOG and PASCAL.

Prerequisites: MDP501 and CSP837
Credit Points: 12
Contact Hours: 3 per week

Use of computer-generated graphics in education; examination and use of a selection of graphics packages running on microcomputers; programming for computer graphics.

Prerequisite: MDP501
Credit Points: 12
Contact Hours: 3 per week

Students, either individually or in small groups, undertake a substantial project relevant to the needs of industry and designed to give insight into industrial requirements. Each project is carried out under the supervision of a staff member whose interests lie in the field of the project. Before work commences on the project, student(s) and supervisor must agree on the topic of the project and the scope of the work to be attempted.

Prerequisites: Successful completion of all other core subjects of the Graduate Diploma in Computing Science.
Credit Points: 12

A first course in computers, including brief introductions to operating systems and utilities; design of algorithms and their implementation in a structural language.

Credit Points: 7
Contact Hours: 3 per week

Overview of computer applications in business; computer hardware and software; input and output

</thead>
<tbody>
<tr>
<td><strong>CUB211 TEACHING AS MANAGING LEARNING</strong></td>
<td>12</td>
<td>4 per week</td>
</tr>
<tr>
<td>Examination of the principles, procedures and implications of decision-making related to: the management of instruction; programs and evaluation; people; material and non-material resources; and classroom environments.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite: CUB210</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td><strong>CUB212 TEACHERS AS CURRICULUM DECISION MAKERS</strong></td>
<td>12</td>
<td>2 per week</td>
</tr>
<tr>
<td>Analysis of state policies and curriculum frameworks to gain an understanding of the responsibility which teachers are expected to take with respect to curriculum development and school community involvement. Ways in which literature deals with curriculum decision-making. The social and political nature of curriculum decision making. The role of parents and other members of the wider community in curriculum decision-making and the development of skills necessary to facilitate a collaborative approach to curriculum and school development.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prerequisite: CUB211</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td><strong>CUB280 EQUITY AS A CURRICULUM ISSUE</strong></td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>The notion of equity and development of principles whereby equity underpins teaching and curriculum planning. An understanding of the inclusive curriculum and specific strategies for planning and implementing the inclusive curriculum. Analysis of the specific needs and circumstances arising from gender, cultural background, disability and socio-economic background.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>CUB281 NEGOTIATED STUDY IN TEACHING</strong></td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>Students identify a particular area within the teaching role which they would like to explore in more depth. This may be related to the career pathway they plan to take or the teaching and curriculum implications of a particular problem or specific teaching context in which they are interested. The lecturer determines if the student has the necessary prerequisite knowledge and skills to pursue the topic and determines a suitable program of reading. The lecturer meets with the student on a regular basis to discuss progress. The negotiated study may take the form of an investigative study within a particular school context.</td>
<td></td>
<td></td>

</table>
CUB301 INTRODUCTION TO CURRICULUM & TEACHING STUDIES
Integrates understandings derived in foundation studies in Education subjects to develop a reasoned and conceptually responsive framework for teaching. Considers communication and teaching skills and strategies in interactive teaching/learning settings and provides opportunities for observation, practice and critical reflection. Focuses attention particularly on the notion that teaching is about the facilitation of student learning.
Credit Points: 12  Contact Hours: 3 per week

CUB302 TEACHERS & SCHOOL PROGRAMS
Extends principles of professional practice established in Curriculum and Teaching Studies 1. Facilitates general studies of curriculum development and teacher decision making, with applied curriculum-area studies to follow in Curriculum and Teaching Studies 2. Gives emphasis to teaching in its broader contexts, encourages further development of a critically reflective approach to teaching and assists with the transition to beginning teaching.
Program: Curriculum and Teaching Studies 1
Co-requisites: Curriculum and Teaching Studies 2, EDB302
Credit Points: 12  Contact Hours: 3 per week

CUB320 EDUCATION, LAW & THE BEGINNING TEACHER
Legal literacy and education: sources of education law; legislative and common law; students' rights and responsibilities; students, schools and law; parents and their legal responsibilities in relation to education; teachers rights and duties; teachers and school-related accidents; drugs and alcohol; discrimination and human rights procedures; education malpractice.
Credit Points: 12  Contact Hours: 3 per week

CUB410 TEACHERS & THE CURRICULUM
Development of concepts and strategies essential to the processes of school-based curriculum development and the design, implementation and evaluation of relevant school programs. It relates the significance of curriculum in the broader sense to a spectrum of individual professional teaching perspectives.
Credit Points: 12  Contact Hours: 3 per week

CUB411 EVALUATION IN CURRICULUM DEVELOPMENT
Students are introduced to the basic concepts of evaluation as they relate to the process of decision-making in a school setting. Strategies appropriate to all school settings are considered ranging from school development to classroom teaching. Design, data gathering strategies and report writing are considered.
Credit Points: 12  Contact Hours: 3 per week

CUB413 CURRICULUM, MAKING IT HAPPEN AT SCHOOL
Development of understandings and skills in implementing curriculum programs in specific school settings; in-depth study of the literature and reflection on practice and experience; the practical application of specific approaches and strategies for effective curriculum implementation.
Credit Points: 12  Contact Hours: 3 per week

CUB414 ADULT EDUCATION
The design and implementation of educational programs for adults. The study is based on theories relating to adults as educational participants, the educational process and the environment in which it takes place. Emphasis is on the provision of effective adult education.
Credit Points: 12  Contact Hours: 3 per week

CUB431 CLASSROOM MANAGEMENT: MODELS & PRACTICE
Practical and research-based approaches to classroom management and discipline for teachers. Includes techniques that motivate pupils in daily teaching, role development, teaching for responsibility, dealing with parents and communication and settings for on-task behaviour and meeting student needs.
Credit Points: 12  Contact Hours: 3 per week

CUB432 TEACHERS & ISOLATED LEARNERS
The isolated community; the isolated learner; consideration of various types of teaching situations in rural schools, especially small schools and distance education; teaching strategies; support services.
Credit Points: 12  Contact Hours: 3 per week

CUB433 TEACHING STRATEGIES
Evaluation of the student's teaching strategies; examination of the literature on teaching strategies; critical evaluation of strategies/models of teaching available.
Credit Points: 12  Contact Hours: 3 per week

CUB434 SUPERVISION OF TEACHING
This subject is designed to cater for teachers who wish to improve their teaching by using the process of clinical supervision. It is also designed to help teachers who supervise practice teaching, and school administrative staff, to improve their supervisory skills. The process of clinical supervision is explored and applied as a means of achieving these objectives. Students must be active supervisors.
Credit Points: 12  Contact Hours: 3 per week

CUB441 INTERNATIONAL EDUCATION FIELD STUDY
The purpose of international education studies and a field study to a particular society is this subject's focus. Key questions concern social context and priorities and curricula of that society. Australian curriculum is also introduced. The subject involves an international field study - two weeks within a vacation period.
Credit Points: 12  Contact Hours: 3 per week

CUB442 INTRODUCTION TO EDUCATIONAL ADMINISTRATION
Introduction to educational administration with particular reference to the theory and practice of work roles, motivation, leadership, decision making, change, conflict, needs assessment and presentation of written reports. Includes issues for administrators in various educational settings.
Credit Points: 12  Contact Hours: 3 per week

CUB443 CLASSROOM ASSESSMENT PRACTICES
Examination of the nature and purposes of classroom assessment; analysis of main approaches to assessing student progress; developments in assessment practices in Queensland with particular reference to the ROSBA and Vivanti reports; improving teacher-made tests; advantages and disadvantages of a wide range of test instruments used in classrooms.
Credit Points: 12  Contact Hours: 3 per week
CUB444 EDUCATORS & THE LAW
Legal literacy; sources of education law; students and rights; students' law and schools; parents' law and education; educators rights and obligations; educators and school-based accidents; educational malpractice; educational administration and law.
Credit Points: 12 Contact Hours: 3 per week

CUB445 COMMUNITY RESOURCES & SCHOOL CHANGE
This subject aims to help participants to identify and develop strategies for working with a wide range of community groups. An in-depth study is made both of the educational potential of different groups and ways that they can be better involved in helping schools to improve their offerings.
Credit Points: 12 Contact Hours: 3 per week

CUB490 INTRODUCTION TO CURRICULUM CONSTRUCTION
Curriculum terminology and theory; the key elements of a curriculum; the pressures or influences that affect decision making; the process of curriculum development; school-based curriculum development and innovation.
Credit Points: 12 Contact Hours: 3 per week

CUP420 PROFESSIONAL & CURRICULUM STUDIES 1
Applications of planning, implementation and evaluation strategies to the teaching of expressive arts. Observe, apply and reflect upon theoretical and practical relationships with classroom instruction, control and organisation.
Credit Points: 12 Contact Hours: 3 per week

CUP421 PROFESSIONAL & CURRICULUM STUDIES 2
Integration of curriculum theory, appreciation of its use in social, environmental, health studies and science in the primary school curriculum. Observation and application of curriculum theory in the primary school curriculum. Observation and application in the school setting.
Credit Points: 12 Contact Hours: 3 per week

CUP500 CURRICULUM: LEARNERS WITH SPECIAL NEEDS
Introduction to curriculum development and situational/self analysis; innovative program approaches; changing ourselves and school environments; evaluation of curriculum development; resource teacher support for school-based curriculum development, student assessment, participation and equity programs; communicating information about improved programs.
Credit Points: 10 Contact Hours: 3 per week

CUP501 CURRICULUM FOUNDATIONS
Examination of the personal and generic theories of curriculum practice, and the foundations for teachers and consultants to develop a framework for curriculum thinking and decision making which emerges from contemporary curriculum theory related to their subject specialisation.
Credit Points: 12 Contact Hours: 3 per week

CUP502 CURRICULUM DEVELOPMENT & INNOVATION
The application of the curriculum development process in specialist teaching areas; the process of innovation and change appropriate for particular educational settings. Frameworks and skills for evaluating existing programs, and the implementation and outcomes of innovation.
Prerequisite: CUP501
Credit Points: 12 Contact Hours: 3 per week

EAB102 HUMAN RELATIONSHIPS IN EARLY EDUCATION
Fundamentals of interpersonal communication; the self in interpersonal communication; verbal and non-verbal behaviour; listening and feedback in interpersonal communication; interpersonal relationships; and group processes.
Credit Points: 8 Contact Hours: 2 per week

EAB103 AUSTRALIAN FAMILIES & EARLY EDUCATION
Family and community analysis, historical view, economic, political, social and cultural factors; issues affecting families in Australia today employment patterns, ideology of family, effect of technological change, inequalities and social justice; personal approaches and critical reflection.
Prerequisite: LEB240
Credit Points: 8 Contact Hours: 2 per week

EAB104 EARLY CHILDHOOD TEACHERS & FAMILIES
Teachers in early childhood settings interacting with children and their families; examination of collaborative relationships between teachers and parents; resources to support parents; research findings on parental roles in development of young children; creating welcoming and informal atmospheres in early childhood centres; home visiting techniques; evaluating family involvement.
Credit Points: 8 Contact Hours: 2 per week

EAB105 EARLY CHILDHOOD EDUCATION CONTEXTS
Exploration of childhood services: relationships of early childhood services to Australian and overseas contexts; implication of beliefs for practice in early childhood education; the early childhood teacher as an agent for empowering parents and their children.
Credit Points: 8 Contact Hours: 2 per week

EAB111 EARLY CHILDHOOD CURRICULUM APPROACHES
Overview of integrated curriculum approaches; curriculum in the social context; developmentally-appropriate practice; developing young children's understandings of mathematics and science concepts; developing young children's language understandings and use. Focus on preschool and kindergarten contexts.
Prerequisite: CUB210
Credit Points: 12 Contact Hours: 3.5 per week

EAB112 INTEGRATED CURRICULUM FOR 3-5 YEAR OLDS
Total program planning and implementation in kindergarten and preschool settings; extension of pedagogical content to an advanced level; philosophy; alternative curriculum models; knowledge of child development in practical curriculum decision-making; integration across content areas; working with parents and members of the community.
Credit Points: 12 Contact Hours: 3 per week

EAB113 INTEGRATED ROUTINES & LEARNING FOR UNDER 3s
Practical aspects of providing physical care and nutrition for young children; individualised quality care for young children (basic trust, bonding, attachment);
adults as responsive, sensitive, interactive partners; creating a safe, stimulating and supportive environment (space, resources, time, health and nutrition); the importance of the contribution of all adults involved with children aged birth to three years.

Credit Points: 12  Contact Hours: 3 per week

**EAB121 EARLY CHILDHOOD CURRICULUM: MATHEMATICS**

Observed learning patterns used as a basis for reflection about developmentally appropriate planning for young children; selection of appropriate resources and tasks for individuals and small groups; how young children develop the concept of number; the range of learning processes to be fostered; the concept of number, traditional and new approaches to sequencing for effective learning about numbers.

Credit Points: 8  Contact Hours: 3 per week

**EAB122 EARLY CHILDHOOD CURRICULUM: LANGUAGE & LITERACY**

The variety of teaching and learning theories in language development and literacy education; the role of the teacher in developing classroom practices within the context of learning environments which are meaningful, purposeful and relevant; teaching strategies for promoting children's language and communication; scaffolding children's efforts to become independent and successful users of language for thinking, learning and communicating.

Prerequisite: EAB111

Credit Points: 8  Contact Hours: 3 per week

**EAB123 EARLY CHILDHOOD CURRICULUM: VISUAL ARTS**

The value of the visual arts for young children; how children develop and learn through the visual arts; learning processes which are involved in children's creative, imaginative, symbolic and fine-motor development and activity; an analysis and comparison of various art media and the way in which these are used by children; criteria for selecting art experiences and the ways in which these may be planned, sequenced, implemented and evaluated; teaching styles responsive to children; ways in which to facilitate visual arts development within children at various stages.

Credit Points: 8  Contact Hours: 3 per week

**EAB124 EARLY CHILDHOOD CURRICULUM: DRAMA & SOCIAL EDUCATION**

The value of play for young children, particularly in relation to self image and social understanding; using knowledge of child development and learning and observations of children to plan, implement and evaluate learning environments which focus on play, drama and social education; learning processes which are involved in children's creative, imaginative, symbolic and interactive behaviour; comparison and analysis of socio-dramatic play, experiential drama and presentational drama; principles of child-centredness; the teacher's role.

Credit Points: 8  Contact Hours: 3 per week

**EAB125 EARLY CHILDHOOD CURRICULUM: MUSIC & MOVEMENT**

Music and movement as a fundamental way of learning and knowing for young children; the child-centred music learning environment; experience within the creative process itself; development of sensitivity to sounds and movement, and their interaction; understanding the basic concepts of musical and movement elements, their combination and manipulation; acquisition of the simple skills, teaching techniques and curriculum principles which allow the child to operate as a creative musician and mover, and the development of positive attitudes toward music, movement and the self.

Credit Points: 8  Contact Hours: 3 per week

**EAB126 EARLY CHILDHOOD CURRICULUM: SCIENCE/HEALTH EDUCATION**

The organisation of physical and interpersonal environments which support young children's natural enquiry activity in the sciences; ways in which early childhood environments can be organised to support active, enquiry learning; varied and relevant resources for the content of biological, social and physical sciences; the immediate classroom, the outdoors and the local neighbourhood and the social, cultural and physical features of these environments.

Credit Points: 8  Contact Hours: 3 per week

**EAB127 EARLY CHILDHOOD CURRICULUM: MATHS, SCIENCE, LITERACY**

Drawing on previous knowledge about curricula in mathematics and science to study how the teacher prepares learning environments for children in lower primary grades; using content knowledge in concert with the needs of individual children in culturally relevant ways; development of learning centres and associated methods characteristic of environments that foster active, enquiry learning. Programming for teaching/learning environments; the role of language in learning; developing language in all curriculum areas in the lower primary classroom; evaluation of programs and assessment and reporting of children's development in literacy.

Prerequisites: EAB121, EAB122

Credit Points: 12  Contact Hours: 3 per week

**EAB141 PHYSICAL, PERCEPTUAL & MOTOR ASPECTS: B-8 YEARS**

Physical development (prenatal factors, growth patterns and changes in body systems, effects on maturation, phylogenetic and ontogenetic aspects); perceptual development: visual, auditory, tactile-haptic, kinesthetic and vestibular and the degree of sensitivity and organisation of these systems; motor development: theoretical perspectives, phases and patterns, factors affecting development, implications for programming and instruction; observation techniques: observing, recording, analysing, applying.

Credit Points: 8  Contact Hours: 2 per week

**EAB142 LANGUAGE & COGNITIVE ASPECTS: B-8 YEARS**

Part A: Theories of language development; language and cognitive development; early syntax and the development of speech and morphology; functions of children's language and communication; communication with children. Part B: Broad theoretical/historical/definition overview on cognition and cognitive development; knowledge and how it arises and grows; how knowledge is maintained; generalisation and differentiation of knowledge; making cognitive connections; the role of experience/environment/culture and maturation/inheritance in cognitive development.

Credit Points: 8  Contact Hours: 2 per week

**EAB143 SOCIAL, EMOTIONAL & CREATIVE ASPECTS: B-8 YEARS**

Theories of social, emotional and creative development and their application; theoretical and empirical
approaches to the study of creativity and self-expression from birth to eight years; the nature of creativity and its relationship to other areas of development; children’s recognition and production of emotions, processes involved in the socialisation of emotions; sex differences and contextual influences on development; individuality self-knowledge and the development of personal identity; socialisation in the context of relationships, in particular, those within the family, the peer context and the classroom.

Credit Points: 8  Contact Hours: 2 per week

- EAB144 INTEGRATING THE EXCEPTIONAL CHILD IN EARLY CHILDHOOD

Foundations for least restrictive early education; philosophical and policy issues; integrating early intervention; nature of exceptionalities; methods for meeting special needs; team work with support personnel; interpretation and evaluation of individualised programs and teaching strategies; management of behaviour; family dynamics and parental needs.

Credit Points: 8  Contact Hours: 2 per week

- EAB151 TEACHING STRATEGIES 1: BEFORE-SCHOOL SETTINGS

Understanding the planning-implementing-evaluating cycle; managing learning environments; facilitating children’s development, learning through the physical environment and the human environment; strategies to support children’s exploration, problem solving and communication. Twelve days teaching experience in a child care, kindergarten or preschool setting.

Prerequisite: CUB210  Credit Points: 12  Contact Hours: 2 per week

- EAB152 TEACHING STRATEGIES 2: YEARS 1-3

Understanding the primary school; planning, implementing and evaluating the curriculum in the early primary years; becoming familiar with current syllabus documents; responding to individual children and monitoring their progress; organisation for learning; reflecting and commenting on a personal teaching style. Twelve days practice teaching experience in an early primary setting.

Prerequisite: EAB151  Credit Points: 12  Contact Hours: 2 per week

- EAB153 TEACHING STRATEGIES 3

Discussion and study of a range of themes and issues relevant to working with young children in learning environments for 3 to 5-year-old children; role of the teacher, environments and interactions; introduction to programming; negotiation approach to allow students to form their studies in a selected context of early childhood education and care. Twenty-four days in two of three settings: child care, kindergarten or preschool.

Prerequisite: EAB152  Credit Points: 12  Contact Hours: 2 per week

- EAB154 TEACHING STRATEGIES 4: CHILD CARE

Monitoring and reporting on children’s progress; managing children’s behaviour, developing a personal philosophy; integrating across content areas; advanced data gathering techniques for teachers. A negotiation approach allows students to focus their studies in the selected context of early childhood education of child care. Eighteen days teaching practice in a child care centre.

Prerequisite: EAB153  Credit Points: 12  Contact Hours: 2 per week

- EAB155 TEACHING STRATEGIES 4: KINDERGARTEN/PRESCHOOL

Monitoring and reporting on children’s progress; managing children’s behaviour; developing a personal philosophy; integrating across content areas; advanced data gathering techniques for teachers. A negotiation approach allows students to focus their studies in the selected context of early childhood education of kindergarten. Eighteen days teaching practice in a child care centre.

Prerequisite: EAB153  Credit Points: 12  Contact Hours: 2 per week

- EAB156 TEACHING STRATEGIES 4: YEARS 1-3

Monitoring and reporting on children’s progress; managing children’s behaviour; developing a personal philosophy; integrating across content areas; advanced data gathering techniques for teachers. A negotiation approach allows students to focus their studies in the selected context of early childhood education of P-3. Eighteen days practice in an early primary school setting.

Prerequisite: EAB153  Credit Points: 12  Contact Hours: 2 per week

- EAB157 TEACHING STRATEGIES 5

Preparing for a teaching career; teacher as professional practitioner; ethical and legal issues; administration and leadership; career paths in early childhood education; advocacy; government policies for families and education; common and specialised studies across the full range of early childhood education and care services. Twenty days teaching practice in a child care, kindergarten, preschool or years 1-3 setting.

Credit Points: 12  Contact Hours: 3 per week

- EAB160 ESL IN EARLY CHILDHOOD SETTINGS

The nature and functions of language; grammar of English from a teaching/learning perspective, particularly in relation to English learners; fundamental principles and procedures underlying a communicative approach to teaching English as a second language; teaching specific language skills; evaluation and assessment.

Credit Points: 8  Contact Hours: 2 per week

- EAB161 CULTURAL INCLUSIVITY IN EARLY CHILDHOOD

Aspects of diverse disciplines and the emergent common principles, aims, objectives and practices that enhance the development of the professional; culturally inclusive practices; cultural bias; criteria for evaluating resources and curricula; the range of theory that cultural inclusivity takes into account across the disciplines: sociology, multicultural studies, aboriginal studies, gender studies and early childhood education and history.

Credit Points: 8  Contact Hours: 2 per week

- EAB162 EDUCATION FOR TRANSFORMATION – EC TEACHERS

What society values as important knowledge for all humans; how these values are expressed and reflected in parental and teacher practices in the early years of a child’s life; the forces, beliefs and practices in society and school which cause teachers and students
to feel alone, worthless and powerless; vital philosophical, social and practical knowledge for human welfare; how teachers can encourage transformation through curriculum development and interpersonal school and classroom interaction.

Credit Points: 8  Contact Hours: 2 per week

**EAB163 GRAPHIC MEDIA FOR EC TEACHERS**

The planning, production and teaching uses of a range of graphic visual media with emphasis on the skills involved in the production of handouts, newsletters, laminated board games, charts and displays; the planning and production of a range of these resources; specific skills in the selection of resources for specific situations; layout, lettering, cut and paste techniques, incorporation of photographic materials, and the operation of appropriate mechanical devices including copiers, duplicators and computers. Assessment is through evaluation of work produced during the semester.

Credit Points: 4  Contact Hours: 2 per week

**EAB164 EARLY CHILDHOOD CHORAL & PERCUSSION ENSEMBLE**

Development of choral singing and percussion playing skills relevant to both recreational and classroom situations; application of Orff philosophies, techniques and tools; some development of musical literacy.

Credit Points: 4  Contact Hours: 2 per week

**EAB165 PROGRAMS FOR CHILDREN UNDER THREE YEARS**

Societal attitudes and public policy in the care and education of children under three years of age, historically and cross-culturally; research supporting the importance of infancy in influencing later development; centre-based and family day care programs for infants and toddlers in Australia and overseas; the functioning of parent-child centres and playgroups in which participation of parents, their families and toddlers occurs; programs which aim to identify and help overcome physical, emotional, intellectual and socioeconomic handicapping circumstances.

Credit Points: 8  Contact Hours: 3 per week

**EAB166 SPECIAL PROGRAMS FOR YOUNG CHILDREN**

Meeting particular needs of young children through special programs; procedures for setting up, obtaining funding needs, formulating objectives, devising programs, evaluating outcomes of programs including those for isolated children, socially disadvantaged children and culturally different children.

Credit Points: 4  Contact Hours: 3 per week

**EAB167 CHILDREN'S LITERATURE FOR EARLY CHILDHOOD SETTINGS**

The significance of children's literature as it increasingly influences the content of literacy and language programs; origins and antecedents of stories as they reflect society; critical evaluation of books being produced nationally and internationally; acquisition of skills of selection for use in early childhood settings; planning quality long-term literature programs for children in early childhood settings.

Credit Points: 8  Contact Hours: 3 per week

**EAB168 DRAMA FOR SPECIAL CHILDREN**

Drama as a method of facilitating learning through available resource materials; observing, planning for and teaching children with special needs; matching activities to positive abilities; evaluation of outcomes.

Credit Points: 8  Contact Hours: 2 per week

**EAB169 CHILD CARE POLICIES**

Rights and responsibilities of parents and the community in child rearing; past and current factors affecting child rearing needs within society; overview of the political and economic influences on child care in the past; current policies, regulations, funding sources and issues of quality; factors influencing high quality care, such as staffing, building and furnishings.

Credit Points: 8  Contact Hours: 2 per week

**EAB170 MICROCOMPUTERS IN EARLY EDUCATION**

The possibilities of using microcomputer technology with young children; skills and methods of working with young children and computers; developing individual programs that are appropriate for young children.

Credit Points: 8  Contact Hours: 2 per week

**EAB171 MANAGEMENT OF EARLY CHILDHOOD SERVICES**

General management theory and practice; organisation and leadership styles; management of various early childhood services; setting policies and planning for services; completing financial matters; implementing day to day tasks and operations; managing and working with people; considering ethical issues and conduct; working outside early childhood services; advocating for early childhood.

Prerequisite: CUB210, EAB111

Credit Points: 4  Contact Hours: 2 per week

**EAB172 PARENT-PROFESSIONAL RELATIONSHIPS IN EC SETTINGS**

Philosophy, principles and practices in a number of models of parent-professional interactions; examination of needs, roles, relationships and results of some exemplary programs; examination of specific local parent-professional programs (framing questions, carrying out enquiries) on the aims, functioning and outcomes of local programs involving parents and professionals.

Prerequisite: EAB104

Credit Points: 8  Contact Hours: 2 per week

**EAB174 PROJECTED VISUAL MEDIA IN EC SETTINGS**

The production and teaching use of projected media with emphasis on slide/filmstrip resources and overhead projection; planning and producing a range of these resources; specific skills in determining appropriate resources for specific situations; planning procedures and production techniques, foiling, titling, incorporation of graphic images and overlays; mechanical reproduction techniques including photo and thermal copiers. Assessment is through self evaluation of work produced during the semester.

Credit Points: 4  Contact Hours: 2 per week

**EAB175 EARLY CHILDHOOD NUTRITION PLANNING**

Nutrition policies for early childhood services; management of health and nutrition components within early childhood services; planning early childhood health and food education for children and staff.

Credit Points: 4  Contact Hours: 2 per week

**EAB176 MEDIA FOR EARLY CHILDHOOD TEACHERS**

Examination of media selection, use and evaluation; integration of learning through media; planning and production in areas of graphics, audio, projected and...
photographic media and television; development of media for early childhood teaching situations.
Credit Points: 8  Contact Hours: 2 per week

■ EAB180 DANCE EDUCATION FOR YOUNG CHILDREN
Study of alignment and physiology of young bodies; increasing movement awareness for children through games and simple dance structures.
Credit Points: 8  Contact Hours: 2 per week

■ EAB181 TECHNOLOGY IN EARLY CHILDHOOD CONTEXTS
A school-based elective involving work with young children in small groups with calculators, computers and other technology.
Credit Points: 8  Contact Hours: 4 per week

■ EAB182 KEYBOARD MUSICIANSHIP 1 & 2 (EC)
Keyboard majors: practical classes in accompanying other students; keyboard technique; sight reading in a variety of keyboard styles; basic improvisation skills, including harmonisation of melodies. Required performance/theory background. Continues into second semester.
Credit Points: 8  Contact Hours: 2 per week

■ EAB280 EARLY CHILDHOOD 1
Examination of historical trends in both Europe and America which have affected early educational trends. Investigation of educational changes and dilemmas and the impact of other disciplines on early education such as medicine and psychology. Recurrent themes of early childhood education are examined in the context of the types of programs now offered to young children.
Credit Points: 8  Contact Hours: 2 per week

■ EAB281 EARLY CHILDHOOD 2
Combination of the theoretical underpinnings of child growth and development in a range of interdisciplinary settings for children from three to eight years with the practical application of a child study. This subject provides the students with the opportunity to develop skills as observers in a range of settings in order to see and record what is happening as accurately and objectively as possible to increase their understanding of child behaviour and development. This subject provides the opportunity to interpret the observational data in a range of educational settings.
Prerequisite: LE3241
Credit Points: 12  Contact Hours: 3 per week

■ EAB282 EARLY CHILDHOOD 3
In this subject student teachers compare and contrast similarities and differences in early childhood environments with teaching in other educational environments. The teacher's role in the classroom and outside the classroom is explored. Students are encouraged to examine their own personal qualities through self-awareness activities and to confront their attitudes and biases as they explore teaching practices that are developmentally appropriate. Students draw on concepts from psychology and sociology in undertaking these tasks.
Prerequisite: EAB281
Credit Points: 12  Contact Hours: 3 per week

■ EAB283 EARLY CHILDHOOD EDUCATION
The issue of developmentally appropriate practice in early childhood education is investigated for all areas of a child's development through an integrated approach. Appropriate curriculum planning based on teacher's observations and recordings of each child's special interests and developmental progress. Curriculum planning as an interactive process is a focus of the subject.
Prerequisite: CUB211
Credit Points: 16  Contact Hours: 3 per week

■ EAB410 EARLY EDUCATION: DECIDING THE CURRICULUM
Examination of the curriculum decision-making processes promoted and in use among teachers working in early childhood settings such as kindergartens, child care and schools. Students have an opportunity to reflect on, and seek to improve, personal ability to decide the curriculum for young learners.
Credit Points: 12  Contact Hours: 3 per week

■ EAB411 EARLY EDUCATION: LITERACY
A study of current understandings about the nature of literacy, literacy development in early childhood and the ways in which this development can be fostered both within the home and at a range of educational and care settings. The broad topic areas addressed comprise language foundations, processes and patterns of development, the classroom context and program development. Students are expected to build on their preservice studies in the area of language and literacy development and learning.
Credit Points: 12  Contact Hours: 3 per week

■ EAB440 WORKING WITH PARENTS & THE COMMUNITY
Parental roles in childhood; review of research on child rearing; the use of interpersonal skills in relating to parents; planning for parent involvement; parent involvement approaches; resources for parents; meeting the needs of parents and programs; future trends.
Prerequisite: Relevant studies at Diploma of Teaching level.
Credit Points: 12  Contact Hours: 3 per week

■ EAB441 EARLY EDUCATION DEVELOPMENT & LEARNING
Ecological orientation of child development; forces shaping the development of children from birth to eight years of age; analysis of the psychosocial and cultural perspectives of development and learning in the early childhood years; and ecological analysis of early childhood settings impacting on children's development and learning.
Credit Points: 12  Contact Hours: 3 per week

■ EAB501 ADVANCED CHILD CARE DEVELOPMENT & LEARNING
Theoretical perspectives on development and learning of children 0-12 years; investigation of aspects of development, developmental sequences and patterns; factors influencing development and learning; observation measurement and research methods in development and learning.
Credit Points: 16

■ EAB502 ADVANCED CURRICULUM THEORY & DESIGN FOR CHILD CARE
Frameworks for curriculum decision making; establishing curriculum policies and evaluation strategies; characteristics of learning environments which foster communicative competence, creativity and problem solving; levels of decision making, federal and state governments, employing authorities, particular child care and education services.
Credit Points: 16
■ EAB503 TEACHING STRATEGIES FOR CHILD CARE
Understanding the planning-implementing-evaluating cycle; managing learning environments; the teaching/caring role; facilitating children's development and learning through the human environment; dimensions of curriculum decision-making; adult/adult and adult/child interactions; teacher as a professional.
Credit Points: 16

■ EAB504 PROGRAMS & TEACHING STRATEGIES FOR CHILDREN UNDER THREE YEARS
Facilitating children's development and learning through the physical environment; mathematics and science concepts in the learning environment; physical care, education and nutrition for infants and toddlers; creating a safe, stimulating and supportive environment for learning; day care programs for infants and toddlers in Australia and overseas; parent-infant programs; policies and trends.
Credit Points: 16

■ EAB505 LEARNING TEACHING & INTEGRATED CURRICULUM FOR 3-5 YEARS
Language and cognitive development; communication with children; early mathematics and science concepts, making cognitive connections; total program planning implementation and evaluation; integration across content areas involving parents and community.
Credit Points: 16

■ EAB506 FIELD PROJECT (CHILDREN 0-5 YEARS)
Observations, analysis and implementation of the teaching and management program; teaching file of recorded observations, summaries, records, organisation strategies and evaluated plans; provision of a safe, caring and challenging learning environment; competency in leadership and responsibility.
Credit Points: 16

■ EAB507 EARLY CHILDHOOD LEADERSHIP & MANAGEMENT IN THE SOCIOCULTURAL CONTEXT
Administration and management of early childhood services; becoming and being a leader; leadership styles; managing people; professional issues; selection of personnel; outcomes for children and families; management theory and practice; program administration; financial matters; features of comprehensive programs, their planning and communication.
Credit Points: 16

■ EAB508 FIELD PROJECT (CHILDREN 0-12 YEARS)
Analysis of a significant social, political or curriculum issue affecting the delivery of child care and education service; teaching file of recorded observations, summaries, relevant centre records, management and teaching strategies, community resources, parent and staff communications, evaluated plans; competence in providing a safe caring learning environment which reflects the cultural and social backgrounds of the children; competence in leadership and responsibility for the total program for a period of time.
Credit Points: 16

■ EAN601 EARLY CHILDHOOD CURRICULUM: DESIGN ISSUES
Key concepts and themes in the development of early childhood curriculum; processes associated with decision making of early childhood teachers; critical analysis of early childhood curriculum theorising; examination of research methods used to study curriculum and teacher's application of knowledge bases.
Credit Points: 12  Contact Hours: 3 per week

■ EAN602 EARLY CHILDHOOD SERVICES & POLICIES
Analysis of early childhood services from a social, political and cultural context; knowledge of the range of early childhood services for families and children in contemporary Australia; key issues affecting the development of these services, critical analysis of current policies.
Credit Points: 12  Contact Hours: 3 per week

■ EAN603 RESEARCH SEMINAR IN EARLY CHILDHOOD ISSUES
Development of skills for critical evaluation of research in early childhood issues; knowledge of methodological approaches; skills for a pilot study or review of selected research issues in early childhood; critical discussion of implications of research for early childhood education; knowledge of broad research issues regarding child development, family, education and care contexts and interventions.
Credit Points: 12  Contact Hours: 3 per week

■ EAN604 YOUNG CHILDREN, FAMILIES & COMMUNITY
Analysis of the interactions between children, families and the wider social and cultural community in the past, present and future; key issues facing families within community contexts; application of research findings to the analysis of transactions involving children, families and community; aspects of family diversity (class, ethnicity, structure); professionals and families.
Credit Points: 12  Contact Hours: 3 per week

■ EAP410 SOCIAL, EMOTIONAL & PHYSICAL DEVELOPMENT (0-9)
Introduction to the major theories, processes and features of development and learning of children 0-9 years in the physical, perceptual, motor and social-emotional domains; application of this knowledge to planning for children's needs, interests and abilities.
Credit Points: 8  Contact Hours: 3 per week

■ EAP411 CREATIVITY & LANGUAGE I
Developmental processes in the expressive and language arts; principles of learning; the development of personal identity in young children; creative and expressive processes; teaching-learning approaches and processes; teaching-learning approaches and strategies for language and literacy in early childhood programs.
Credit Points: 8  Contact Hours: 3 per week

■ EAP412 THINKING & PROBLEM SOLVING I
The processes of interest in active learning, enquiry and problem solving; environments and strategies which promote the development of active learning and enquiry by young children; monitoring individual progress.
Credit Points: 8  Contact Hours: 3 per week
EAP413 PROGRAM PLANNING & TEACHING STRATEGIES I
Overview of the role of the early childhood teacher; the human communication process in relation to teaching in different early childhood settings; decision making; guidelines for short-term planning to meet individual and group needs; teaching and learning styles and strategies; theories of motivation, management and guidance relating to the physical, intellectual and socio-emotional aspects of the development of young children; effective use of time, space and resources.
Credit Points: 8  Contact Hours: 3 per week

EAP414 SOCIOCULTURAL CONTEXTS OF EDUCATION
The social context of education; social inter-relationships which define this context; the impact of diversity in family structures; child rearing patterns; alterations to family roles; educational practices which respond to sociocultural contexts.
Credit Points: 8  Contact Hours: 3 per week

EAP415 COGNITION & LANGUAGE (0-9 YEARS)
Review and analysis of current knowledge of the processes and features of cognitive and language development and learning of children 0-9 years; analysis of observational data on children’s behaviour in terms of current theoretical understanding and using such analyses for planning to meet children’s needs, interests and abilities.
Credit Points: 8  Contact Hours: 3 per week

EAP416 CREATIVITY & LANGUAGE 2
Discipline-based processes; the interrelated and unique contribution of each of the arts; the teacher’s role as a curriculum decision maker in the development of language and literacy programs.
Credit Points: 8  Contact Hours: 3 per week

EAP417 THINKING & PROBLEM SOLVING 2
The child as explorer, problem solver and meaning maker; organising for active learning, enquiry and problem solving; linking home and early childhood educational environments.
Credit Points: 8  Contact Hours: 3 per week

EAP418 PROGRAM PLANNING & TEACHING STRATEGIES 2
Continuation of EAP417.  Prerequisite: EAP413
Credit Points: 8  Contact Hours: 3 per week

EAP419 TEACHING IN CONTEMPORARY SOCIETY
The implications of social change for early childhood programs; historical, philosophical and sociological perspectives on change in contemporary society; technological developments; demographic changes in urban and rural settings; ethical and legal issues affecting teachers.
Credit Points: 8  Contact Hours: 3 per week

EAP520 EARLY CHILDHOOD DEVELOPMENT & LEARNING
Examination of techniques for observing and analysing child behaviour; overview of major theories of development and learning; cognitive, social/emotional, language, physical development and learning in children 2-9 years.
Credit Points: 8

EAP521 EARLY CHILDHOOD EDUCATION I
Examination of the development of problem solving, explanation, investigation, self-expression, originality, divergent thinking, and risk-taking in young children in relation to communication, movement and the expressive arts; analysis of teaching strategies.
Credit Points: 12

EAP522 EARLY CHILDHOOD EDUCATION II
Examination of teaching strategies, incorporating problem solving through exploration and investigation, for studying mathematics, science, social studies and health curriculum. The emphasis is on approaches and suitable materials for these curriculum areas within various early childhood settings.
Credit Points: 12

EAP523 THE CONTEXT OF EARLY CHILDHOOD EDUCATION
Examination of the bases and scope of education in early childhood, the role of psychological theories, curriculum models, policies and programs; case studies of early childhood programs.
Credit Points: 8

EAP524 RESEARCH IN EARLY CHILDHOOD
Examination of the research literature in development and learning; research techniques in early childhood; application of research techniques in early childhood; application of research techniques to research proposals; experimental research in one aspect of development and learning of children aged 3-8 years; contributions to early childhood research from other fields.  Prerequisite: EAP520
Credit Points: 8

EAP525 EARLY CHILDHOOD PROGRAM PLANNING
Planning and evaluating early childhood programs for children 3 to 8 years; organisation and administration of programs for young children; examination of approaches to teaching; early intervention programs; inter-disciplinary teamwork and support services; strategies for working with parents and community agencies; professional behaviour and ethics.
Credit Points: 12

EAP526 EARLY CHILDHOOD EDUCATION 3
Critical evaluation of current approaches to the teaching of literacy and numeracy in the early years; diagnosis and assessment in early literacy and numeracy; the expressive arts and the sciences as modes of learning and teaching in the early years; the use of microcomputers and educational software with young children; planning and teaching for individual and group needs.
Credit Points: 12

EAP527 TRANSACTIONS IN EARLY CHILDHOOD EDUCATION
Examination of the implications of social, cultural and geographical factors for early childhood education; consideration of the effects of technology and media, and ethical and legal obligations; analysis of procedures and techniques for case studies; formulating a personal philosophical statement.  Prerequisite: EAP523
Credit Points: 8
EDP551 DANCE EDUCATION IN EARLY CHILDHOOD

The study of movement and dance in early childhood, the influence of home and culture, the awareness of space, time, energy and body performance in the movement and dance curriculum, and the approaches which underpin philosophical and professional practice.

Credit Points: 12  Contact Hours: 3 per week

EDP552 FROM PLAY TO DRAMA IN EARLY CHILDHOOD EDUCATION

An analysis of the developmental relationship that exists between children's play and drama in early childhood, children's language development through drama; and the synthesis of theories/approaches and methods in drama contexts.

Credit Points: 12  Contact Hours: 3 per week

EDP553 MUSIC IN EARLY CHILDHOOD EDUCATION

Examination of the influence of home, formal learning contexts, society and culture on music education for young children; children's development and learning through music; musical elements, approaches/methods and learning contexts.

Credit Points: 12  Contact Hours: 3 per week

EDP554 THE ARTISTIC PROCESS & THE VISUAL ARTS IN EARLY CHILDHOOD EDUCATION

The value of the visual arts – for culture, and for children; education versus educated, children's development and learning through the visual arts; visual arts media and curricula, philosophical and historical underpinnings.

Credit Points: 12  Contact Hours: 3 per week

EDB251 PRACTICE TEACHING 1

Introduction to teaching at the classroom level. Central to the subject are carefully guided observations as preparation for the implementation of teaching/learning segments. These lesson segments are prepared for fully with assistance from the classroom supervisor. Additionally, the students are involved in assisting, where possible with the work of the classroom to obtain an overview of the class teacher's duties.

Credit Points: 8

EDB252 PRACTICE TEACHING 2

The theoretical background gained from the foundational subjects in the area of learning and development and from applied curriculum areas forms the basis of the knowledge and skills applied in this subject. It is envisaged that further observation, analysis and critical reflection be fostered in students' trial of theories of teaching. Students' planning and implementation skills are carefully developed and evaluated under the supportive and collaborative teamwork of supervising teacher, principal and university supervisor.

Prerequisite: EDB251
Credit Points: 8

EDB253 PRACTICE TEACHING 3

This school experience should challenge students to further develop and exhibit an awareness of reflective and analytic positions concerning curriculum, and teaching and learning within another context. Students should effectively be able to examine principles, procedures and implications of decision making related to management and development of instruction and class environments. Further understanding of programs and evaluation, material and non-material resources in relation to classroom planning should assist students to be more effective managers of learning.

Prerequisite: EDB252
Credit Points: 8

EDB254 PRACTICE TEACHING 4

During this four-week period in schools, students extend their involvement to include periods of continuous teaching. Additionally, the experience widens to encompass both the school and community domains. Wider contexts e.g. small schools are also considered appropriate venues for practical experience in this semester. Students also have the opportunity to implement the knowledge and skills gained in major study areas. Finally, other practical experiences e.g. attendance at P & C meetings is required.

Prerequisite: EDB253
Credit Points: 12

EDB255 PRACTICE TEACHING 5

For the four-week period of school experience, students prepare the curriculum program. Selected parts of the program are implemented during weeks 1 & 2, and for the second half of the practice the full program is taught. Additionally, students involve themselves in other activities within the school and community domains. Finally, throughout the semester, other practical activities are undertaken. Practice in appropriate settings is arranged for students in major study areas.

Prerequisite: EDB254
Credit Points: 12

EDB301 PRACTICE TEACHING 1

Twenty-one days of secondary school/teaching experiences in which observational skills and knowledge gained from discipline and professional studies are applied to planning, resourcing, implementing and evaluating short sequences of classroom activities and lessons. The program aims to develop confidence and competence in generic teaching/learning strategies, management and resource skills, interpersonal and professional relationships.

Credit Points: 8

EDB302 PRACTICE TEACHING 2

Participation in a 40-day practicum that prepares students for beginning teaching in at least one secondary curriculum area. Students assume responsibility for the learning programs of their 'own' classes, employing appropriate planning, researching, managing, collegial and teaming skills needed in the interactive classroom and in the wider school community.

Credit Points: 12

EDB303 PRACTICE TEACHING 3

Twenty-day practicum aimed at upgrading and extending professional and generic teaching skills, exploring 'coal-face' innovations and current curriculum initiatives, and understanding in greater depth the school in its wider societal context. This is the final opportunity for students to develop skills so far under emphasised in their school experiences, but which are of vital importance to become reflective practitioners.

Credit Points: 8

EDB440 INDEPENDENT STUDY

Self-initiated and self-directed study in an area of interest which allows study either to a depth not possible in electives, or in an area not covered by the current Bachelor of Education program. An independent study can be taken by any student who has completed, or will have completed, four subjects of
the BEd but must meet certain requirements laid down in the 'Independent Study Guide' available from the Faculty of Education. Application forms are also available from the Faculty of Education - telephone (07) 864 3503. Students cannot enrol in this subject without the written approval of their proposed study by the Independent Study Committee.
Credit Points: 12 Contact Hours: 3 per week

EDB441 EDUCATIONAL RESEARCH & PRACTICE
Introduction to educational research and practice; preparing for research; data collection techniques applicable to either quantitative or qualitative research methodologies; analysis and interpretation of evidence; reporting.
Credit Points: 12 Contact Hours: 3 per week

EDN600 RESEARCH METHODS IN EDUCATION
Development of an awareness and understanding of the research process for an historical, sociocultural, ethical and theoretical perspective; the validity, applicability and suitability of various research strategies for specific educational endeavours; comprehension and evaluation of research findings drawn from a variety of perspectives, paradigms and methodologies; development of skills to conduct research appropriate to answer questions critical to particular fields of interest.
Co-requisite: EDN601
Credit Points: 12 Contact Hours: 3 per week

EDN601 MAJOR ISSUES IN EDUCATION
Three modules to identify some major issues in an education system undergoing profound change; policy module analyses the major political forces shaping the education system; learning module focuses on cognitive development and the development of human information processing; context module situates learning and education in the broader social context.
Co-requisite: EDN600
Credit Points: 12 Contact Hours: 3 per week

EDN602 ADVANCED SEMINARS
Opportunities for students to participate in a special subject organised around a particular interest, or a visiting expert.
Credit Points: 12 Contact Hours: 3 per week

EDN603 INDEPENDENT STUDY
Opportunity to study an aspect or topic in a particular specialisation of special interest to students; working autonomously under the supervision of a lecturer.
Credit Points: 12 Contact Hours: 3 per week

EDN604 DISSERTATION
Opportunity to extend and synthesise knowledge from the core and specialisation subjects in either a critical evaluation of a topic in the literature of one specialisation or the development of appropriate educational resources.
Credit Points: 24 Contact Hours: 3 per week

EDN605 DISSERTATION
A study to synthesise and apply knowledge from the core and specialisation subjects that will focus on only one issue, involve only the necessary number of clients, and include only essential research activity.
Credit Points: 36 Contact Hours: 3 per week

EDN606 DISSERTATION
An application of coursework theory to a literature survey, a critical analysis, an evaluation of a portion of an educational program or the development of a curriculum package.
Credit Points: 48 Contact Hours: 3 per week

EDP410 PRACTICE TEACHING 1
Participation in two early childhood settings for 24 days (12 days in each setting). Emphasis on observation, planning, implementing, evaluating and record-keeping.
Credit Points: 8

EDP411 PRACTICE TEACHING 2
Participation in two early childhood settings for 32 days (16 days in each setting). Emphasis on observation, planning, implementing, evaluating, administration, parent programs and record-keeping.
Prerequisite: EDP410
Credit Points: 8

EDP412 PRACTICE TEACHING 1
Orientation to the primary school. Planning, implementation and lesson closure; teaching tasks of increasing complexity from micro-teaching to full-scale responsibility for planning, implementing, closing a lesson. Development of initiative and individuality in lesson and unit planning and implementation.
Credit Points: 8 Contact Hours: 4 weeks

EDP413 PRACTICE TEACHING 2
Utilisation of knowledge gained from indepth contextual studies and curriculum and professional studies. Emphasis is given to school and community domains in preparation for beginning teaching.
Prerequisite: EDP412
Credit Points: 8 Contact Hours: 4 weeks

EDP450 TEACHING PRACTICE A
This subject allows students in school settings to plan, resource, teach and evaluate single lessons in their curriculum areas to mixed ability classes. The subject also provides the opportunity for students to form valid and worthwhile reflections on the ways in which their practising schools cater for the needs of learners, from the vantage point of their own schooling, their post-compulsory education, work-related experiences and their introduction to Studies in Education and Curriculum, and Teaching Studies subjects.
Co-requisites: CPP410, LEP410
Credit Points: 6 Contact Hours: Four weeks block + one single day

EDP451 TEACHING PRACTICE B
This subject is designed to be the field studies component of the second semester subjects of the course. Its broad purpose is to develop students' confidence and competence in teaching and in teaming skills to a level that will enable them to experience success in their beginning year of teaching. In contrast to EDP450, where a lesson-by-lesson approach to teaching and an awareness approach to the role of the teacher were implied, this subject aims to immerse students in teaching in as realistic a manner as practicable. They are required to assume responsibility for teaching well-planned and well-resourced units of work, in which they are employed a variety of teaching strategies and classroom management skills to cater for differences in learning styles and career aspirations. Within the wider school context, opportunities will arise for the enhancement of teaming skills and professional attitudes. Students are expected to in-
volve themselves fully in the organised day-to-day activities of the school.
Prerequisite: EDP450
Co-requisites: CUP411, LEP411 under normal circumstances.
Credit Points: 6
Contact Hours: Five weeks block + four single days

- **EDP510 PRACTICUM IN EARLY CHILDHOOD I**
  Observation; planning, implementation and evaluation of curriculum for children in the early childhood age range; communication with children, parents and colleagues; increased responsibility for control and management in the early childhood setting; catering for children in the early childhood age range.
  Prerequisite: EDP510
  Credit Points: 8

- **EDP511 PRACTICUM IN EARLY CHILDHOOD 2**
  Observation; design, implementation and evaluation of programs for children in the early childhood age range; communication with children, parents and colleagues; increased responsibility for control and management in the early childhood setting; catering for children in the early childhood age range.
  Prerequisite: EEB510
  Credit Points: 8

- **EEB101 CIRCUITS & MEASUREMENTS**
The concepts of voltage, current and electrical impedance, simple electrical circuits (R, L and C) and the measurement of electrical quantities using the oscilloscope, meters and bridges; introduction to AC theory, errors in measurement, traceability of measurement.
  Credit Points: 7
  Contact Hours: 3 per week

- **EEB107 AERONAUTICAL INDUSTRIAL EXPERIENCE I**
Students must engage in two weeks of approved employment in the aviation industry at the end of the first semester with a view to gaining a general background in aviation; for the employment to be recognised, students must submit an industrial experience record which has been completed by both the student and the employer.
  Contact Hours: 2 weeks

- **EEB202 ELECTROMAGNETICS**
Introduction to engineering applications of current flow, electrostatic and electromagnetic fields; ideal and loosely coupled transformers; instrument and high frequency transformers; electrical power supply and safety; introduction to all types of rotating electrical machines.
  Credit Points: 6
  Contact Hours: 3 per week

- **EEB203 CIRCUIT ANALYSIS**
Network theorems, mesh and nodal analysis, complex power; introduction to the concept of steady-state response; introduction to transient response of RL, RC and RCL circuits with step forcing functions; mutual inductance, three phase systems.
  Prerequisite: EEB101[R]
  Credit Points: 5
  Contact Hours: 3 per week

- **EEB206 INDUSTRIAL EXPERIENCE I**
Students should engage in at least five weeks employment, approved by the Head of School; for the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.
  Contact Hours: 5 weeks

- **EEB209 ELECTRICAL ENGINEERING 2M**
Introduction to the basic principles of microprocessors, microprocessor systems, electrical machines, power control and tariffs; the subject material will be presented at a basic level with heavy emphasis on practical applications.
  Credit Points: 6
  Contact Hours: 3 per week

- **EEB272 DIGITAL PRINCIPLES**
Binary variables, number systems, Boolean algebra, minimisation of logic functions, logic gates, analysis and synthesis of combinational logic functions.
  Credit Points: 3
  Contact Hours: 1.5 per week

- **EEB273 MICROCOMPUTERS IN ENGINEERING**
Introduction to the physical, virtual and application levels of a microcomputer system; high level devices and devices; software packages; transducers and peripheral devices; hardware and software integration.
  Credit Points: 6
  Contact Hours: 3 per week

- **EEB301 CIRCUIT ANALYSIS**
A detailed study of the basic theory of network analysis covering Laplace and Fourier analysis, four terminal network theory, frequency behaviour and transient response of networks.
  Prerequisites: EEB202[R], EEB203[R]
  Contact Hours: 3 per week

- **EEB303 NETWORK THEORY I**
A detailed study of the basic theory of network analysis covering Laplace and Fourier analysis, four terminal network theory, frequency behaviour and transient response of networks.
  Prerequisites: EEB203[R], MAB493
  Contact Hours: 3 per week

- **EEB311 SIGNALS & SYSTEMS**
A detailed study of Fourier theory applied to signals. An overview of systems and their representation, response of systems to signals.
  Prerequisites: EEB203[R], MAB493
  Contact Hours: 3 per week

- **EEB371 ELECTRONIC DEVICES**
The theory of operation and characteristics of semiconductor devices which includes various types of diodes, the bipolar junction transistor and the field effect transistor; development and practical applications of small signal models.
  Prerequisite: EEB101[R]
  Credit Points: 7
  Contact Hours: 3 per week

- **EEB372 SEQUENTIAL LOGIC**
Flip-flops, counters, shift registers, asynchronous and synchronous sequential machines. Realisation of sequential machines using PROMs, GALS, etc.
  Prerequisite: EEB272[R]
  Contact Hours: 3 per week

- **EEB373 DIGITAL ELECTRONICS PRINCIPLES**
Binary variables to Boolean algebra; logic functions, gates and analysis; combined logic functions; flip-flops, counters, shift registers; sequential machines; realisation of sequential machinery using PROMs, GALs, etc.
  Credit Points: 6
  Contact Hours: 3 per week

- **EEB400 ELECTRICAL POWER SYSTEMS**
Introduction to electrical power systems calculations, technology of overhead lines and cables; elementary
electrical engineering economics are also introduced at this stage.

**Prerequisite:** EEB302[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB401 NETWORK THEORY 2**
General transform theory; stability and realisability of networks; the synthesis of networks and filters; an introduction to non-linear analysis techniques for simple networks.
**Prerequisite:** EEB303[R]  **Co-requisite:** EEB361
**Credits:** 6  **Contact Hours:** 3 per week

**EEB404 ELECTRICAL MACHINES**
The fundamentals of torque production in rotating machines; the theory of operation and characteristics of most commonly used machines are then derived from common foundations.
**Prerequisite:** EEB302[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB406 INDUSTRIAL EXPERIENCE 2**
Students should engage in at least five weeks employment, approved by the Head of School; for the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.
**Contact Hours:** 5 weeks

**EEB407 AERONAUTICAL INDUSTRIAL EXPERIENCE 2**
Students must engage in five weeks of approved employment in the aerospace industry at the end of the fourth semester with a view to gaining detailed experience in several aspects of aerospace industry particularly in relation to concepts peculiar to that industry; for the employment to be recognised students must submit an industrial experience record form which has been completed by both the student and the employer.
**Contact Hours:** 5 weeks

**EEB430 ENGINEERING FIELDS**
Electrostatic and magnetic fields, Maxwell’s Equations and electromagnetic waves.
**Prerequisites:** MAB193[R], PHB132[R], PHB232[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB471 ELECTRONICS**
A detailed study of transistor circuits and their applications; circuits, fundamental to the understanding of integrated circuit amplifiers are studied in detail.
**Prerequisite:** EEB371[R]
**Credits:** 7  **Contact Hours:** 3 per week

**EEB473 INTEGRATED CIRCUITS**
The fundamental theory of operation of integrated circuits and the generalised concepts of feedback in electronic circuits; various operational amplifier configurations are analysed; oscillators and timing circuits are also studied.
**Prerequisite:** EEB471[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB474 MICROPROCESSORS**
Microprocessor architecture, instruction sets, assembly language programming; memories, input/output devices and interrupt systems.
**Prerequisite:** EEB372[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB520 CONTROL ENGINEERING**
Survey of measurement transducers, amplifiers, signal processors and final control elements; selection of system components; application of micro-computers to closed-loop control; examples of closed-loop systems; system transfer function and time domain performance.
**Prerequisite:** EEB302[R]  **Co-requisite:** EEB401
**Credits:** 6  **Contact Hours:** 3 per week

**EEB531 ELECTRICAL POWER TRANSMISSION**
Equivalent circuits of power equipment; the pu method; power flows in networks, solution by Gauss Siedel; sequence components, fault analysis by sequence methods; power system harmonics; transients due to switching; transmission plant parameters.
**Prerequisite:** EEB400[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB553 ELECTRICAL POWER EQUIPMENT**
Transmission line parameters, standing voltage and travelling waves on transmission lines; introduction to protection of systems, CTS, VTs protection methods of electrical equipment.
**Prerequisite:** EEB400[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB561 ANALOGUE COMMUNICATIONS**
Analogue modulations and demodulations hardware, including discrete and integrated electronic methods; AM-SSB-FM modulation and demodulation methods; heterodyne receivers: image and spurious responses of double and single conversion receivers; distributed networks: radio and transmission-line links effects and modulated signals.
**Prerequisites:** EEB361[R], EEB303[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB562 TRANSMISSION & PROPAGATION**
Transmission line theory, terminated line, Smith Circle Chart usage and lattice diagram; propagation modes in wave guides and optical fibres; free-space propagation, ionospheric and ground wave propagation; basic antenna parameters.
**Prerequisites:** EEB361[R], EEB430[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB573 INDUSTRIAL ELECTRONICS**
The study of a wide range of modern electronic devices and circuits with particular emphasis to industrial application.
**Prerequisite:** EEB471[R]
**Credits:** 6  **Contact Hours:** 3 per week

**EEB580 AEROSPACE DESIGN I**
To study the environmental factors affecting the design of aerospace equipment particularly in relation to USA and Australian standards and specifications (eg. US Mil Specs, FAA requirements such as FAR 23, 25 and Technical Service Orders, Australian certification requirements both civil and military); to examine in detail the operating regime for avionic equipment such as the properties of the atmosphere (temperature, pressure, humidity); design load factors for aeronautical equipment, reliability and duplication requirements.
**Credits:** 6  **Contact Hours:** 3 per week

**EEB587 DESIGN I**
General principles of electronic circuit and electrical equipment design and the realisation of typical electronic circuits and equipment.
**Prerequisites:** EEB401[R], EEB361[R], EEB400[R]
**Credits:** 6  **Contact Hours:** 3 per week
The syntax and facilities of the C programming language will be studied and applied to systems programming. Prerequisite: EEB474[R]
Credit: 6 Contact Hours: 3 per week

II EEB600 STARTING A TECHNOLOGY-BASED BUSINESS
Introduction to business structures, forming a business team, marketing and market research, financing new high-risk business, selling yourself with business plans and presentation skills, product development, manufacturing and distribution, inventions, useful people to talk to.
Credit: 4 Contact Hours: 2 per week

II EEB601 REALTIME OPERATING SYSTEMS
Theory and practical aspects of the use of microprocessors and computers as components in time critical engineering applications; methods of guaranteeing computer response within a specifiable time; applications related to embedded systems and some business applications; design of new systems and study of existing systems.
Prerequisite: EEB591[R]
Credit: 6 Contact Hours: 3 per week

II EEB602 SIGNAL PROCESSING
Sampling and reconstruction, z-transforms description of discrete-time signals. Digital filtering: FIR, IIR; discrete Fourier transform and relationship with z-plane; leakage effects and window functions; discrete Hilbert transform relationships.
Prerequisites: EEB361[R], EEB401[R], MAB893[R]
Credit: 6 Contact Hours: 3 per week

II EEB606 INDUSTRIAL EXPERIENCE
Students should engage in at least five weeks employment; approved by the Head of School; for the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.
Contact Hours: 5 weeks

II EEB621 AERONAUTICAL INDUSTRIAL EXPERIENCE
Students must engage in 5 weeks of approved employment in the aerospace industry at the end of the sixth semester with a view to gaining specific information and experience in some aspect of aerospace industry; for the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.
Contact Hours: 5 weeks

II EEB620 CONTROL SYSTEMS ANALYSIS
Time-domain, frequency-domain, and complex-domain analysis of systems; closed-loop control system performance and system compensation; digital computer control of closed-loop systems; analogue and digital simulation of systems.
Prerequisite: EEB520[R]
Credit: 6 Contact Hours: 3 per week

II EEB621 ADVANCED CONTROL SYSTEMS
System performance specification format; selection of control system elements; design of linear system compensation using analogue and digital techniques; techniques for dealing with system non-linearities and non-linear system analysis and design; examples of typical control systems.
Prerequisite: EEB620[R]
Credit: 6 Contact Hours: 3 per week

II EEB652 POWER ELECTRONICS
Review of modern switching components, characteristics and device control methods; principles of operation of controlled rectifiers and chopper techniques for dc motor control; quasisquare and PWM inverters for induction and synchronous motor control; static switches for induction motor soft start control and static VAR compensation; induction motor drive and dc motor drive control strategies; harmonic analysis and waveform modelling analysis.
Prerequisite: EEB573[R]
Credit: 7 Contact Hours: 3 per week

II EEB661 INFORMATION THEORY & NOISE
Information in discrete and continuous channels, coding efficiency, statistical description of noise, effects of transformations on signal parameters, error rates, effect of noise in information transfer.
Prerequisites: MAB493[R], EEB361[R]
Credit: 6 Contact Hours: 3 per week

II EEB662 MICROWAVE & ANTENNA TECHNOLOGY
Propagation in rectangular and circular guides, guide components, microwave active devices, high frequency techniques, various types of antennas, antenna arrays, computer-aided antenna design, antenna measurements.
Prerequisite: EEB562[R]
Credit: 6 Contact Hours: 3 per week

II EEB680 AEROSPACE DESIGN
Designing for reliability as required by the aviation and aerospace industry will augment practical design assignments; assignments require that design problems be solved analytically and the results confirmed by equipment construction and practical measurement; computer-aided design, computer simulation and programming may be required.
Prerequisites: EEB580[R], EEB561[R], EEB400[R], EEB620[R]
Credit: 6 Contact Hours: 3 per week

II EEB691 AERONAUTICAL COMPUTING
Suitable languages such as ADA will be used to implement embedded avionics computer systems and practical experience will be gained in the application of object-oriented software design, concurrency and distributed systems commonly used in the aerospace industry.
Prerequisites: CSB490, EEB472
Credit: 6 Contact Hours: 3 per week

II EEB692 SPACE TECHNOLOGY
Review of world launch capability; spherical trigonometry; orbits and trajectories, eg. launch orbits, geostationary orbits; GPS satellite orbit requirements; gravitational fields; Lagrange points; orbital dynamics and parameters; special purpose orbits; orbit determination from tracking data; payload techniques; upper atmospheric meteorology and introduction to astronomy.
Credit: 6 Contact Hours: 3 per week

II EEB722 FLIGHT CONTROL SYSTEMS
Principles and description of flight control systems; performance of aircraft in flight; analysis and simulation of flight control systems; cross-coupling
parameters; methods of coupling terrain following radar and other navigational aids; mechanical systems; analogue augmented systems; digital augmented systems; digital computer control relating to multiplex buses (Mil spec); artificial stability; automatic pilots during flight and landing; fibre optic control; fly-by-wire systems; use of redundancy.

Prerequisites: MEB551, MEB611, MEB553
Co-requisite: EEB947
Credit Points: 6 Contact Hours: 3 per week

EEB741 POWER SYSTEMS ANALYSIS
Economic operation of power systems, system stability, power system control; HVDC power transmission; advanced harmonic analysis; surge phenomena in machine and transmission lines.

Prerequisite: EEB531[R]
Credit Points: 8 Contact Hours: 3 per week

EEB742 POWER SYSTEMS ENGINEERING
Substation engineering, protection of plant, substation earthing, system overvoltages, insulation coordination, HV switchgear.

Prerequisite: EEB531[R]
Credit Points: 7 Contact Hours: 3 per week

EEB761 STATISTICAL COMMUNICATION
PCM quantization noise in uniform and non-uniform quantization; effects of channel noise on S/N; delta modulation and delta-sigma modulations; threshold extensions, spread spectrum, matched filtering and correlation.

Prerequisite: EEB661[R]
Credit Points: 7 Contact Hours: 3 per week

EEB780 AEROSPACE DESIGN 3
Practical design assignments consisting of detailed design and realisation of typical sub-systems used in all areas of the avionics industry; assignments require that design problems be solved analytically and the results confirmed by equipment construction and practical measurement; computer-aided design, computer simulation and programming may be required.

Prerequisites: EEB680[R], EEB602[R], EEB474[R]
Co-requisite: EEB790, EEB947
Credit Points: 6 Contact Hours: 3 per week

EEB784 AEROSPACE PROJECT
An individual engineering project on a special subject. The work requires design, computing, construction and experimental work and practical testing with the submission of appropriate reports; the subject will be selected from any area which involves electronics, computing, control, communication and educational power and may include programming, circuit and system design.

Co-requisite: This subject must be done in the final year of the course.
Credit Points: 15

EEB820 ENGINEERING MANAGEMENT
Economic analysis of electrical engineering projects; present worth and annual cost calculations. Assessment of tenders; project management, critical paths and linear programming methods; contract administration. Engineering case studies.

Credit Points: 8 Contact Hours: 3 per week

EEB821 PRODUCTION TECHNOLOGY & QUALITY
The methodology of electronic system design, the range of production processes in electronic manufacture, and the quality control procedures required in electronic manufacturing at both prototype and full production stages.

Prerequisites: EEB587[R], EEB788[R]
Credit Points: 6 Contact Hours: 3 per week

EEB841 MINING ELECTROTECHNOLOGY
Definition of hazardous locations; methods of protection of electrical equipment; intrinsically safe circuits, flameproof equipment; power supply systems in mines; planning, voltage regulation, fault levels, dynamic operation; earthing in mines; monitoring and control equipment; communications systems in mines; testing and certification of mining equipment; gas explosion testing, assessment of intrinsically safe equipment, CTI testing, temperature rise and high current testing.

Prerequisite: EEB531[R]
Credit Points: 7 Contact Hours: 3 per week

EEB880 AEROSPACE DESIGN 4
Practical design assignments consisting of the realisation of complete system designs for a specific aspect of the avionics industry; assignments require that design problems be solved analytically and the results confirmed by equipment construction and practical measurement; factors such as reliability, complexity, economic considerations and system (and sub-system) optimisation; computer-aided design; computer simulation and programming may be required.

Prerequisite: EEB780
Credit Points: 7 Contact Hours: 3 per week

EEB887 DESIGN 3
Detailed design and realisation of typical electronic and power based sub-systems used in all areas of electronic systems and power systems engineering.

Prerequisites: EEB788[R], EEB602[R], EEB620[R], EEB474[R], EEB400[R], EEB971[R] or EEB531[R]
Co-requisite: This subject must be done in the final year of the course.
Credit Points: 6 Contact Hours: 3 per week

EEB888 DESIGN 4
System design techniques and practice in these techniques on typical electronic systems and power systems, taking into account such factors as reliability, complexity, economic considerations and optimisation.

Prerequisite: EEB887[R]
Credit Points: 10 Contact Hours: 3 per week

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EEB90 ADVANCED INFORMATION TECHNOLOGY TOPICS</td>
<td>The content of this subject will depend on current technology and availability of suitable specialist lecturers; subjects could include artificial intelligence, computer graphics, database systems, computer-aided engineering, super computing and parallel processing.</td>
<td>Credit Points: 3 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB901 INDUSTRIAL EXPERIENCE</td>
<td>Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.</td>
<td>Contact Hours: 5 weeks</td>
</tr>
<tr>
<td>EEB902 INDUSTRIAL EXPERIENCE</td>
<td>Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.</td>
<td>Contact Hours: 5 weeks</td>
</tr>
<tr>
<td>EEB903 INDUSTRIAL EXPERIENCE</td>
<td>Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form which has been completed by both the student and the employer.</td>
<td>Contact Hours: 5 weeks</td>
</tr>
<tr>
<td>EEB922 COMPUTER CONTROLLED SYSTEMS</td>
<td>Computer control of typical process control systems; numerical control of machine tools and an introduction to robotics; optimal control and self-adaptive control systems; sequential control systems.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB932 AUTOMATIC FLIGHT CONTROL</td>
<td>Derivation of transfer functions for aircraft and missiles including effects of vibration and other perturbations on servo systems along with servo actuators and sensors; use of conventional and modern control theory to analyse and design lateral-directional stability augmentation systems and control augmentation systems; study of autopilot design for various tasks including terrain coordination and automatic landing, stabilisation of aircraft and adaptive control systems.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB933 COMBAT SYSTEMS</td>
<td>Sound generation propagation and analysis in the maritime environment; principles and application of lasers to sighting and guidance systems; principles of detection of submarines using magnetometers; infrared propagation and its use in detection and weapons guidance; including ECM/ECM; sonar processing; laser processing and guidance; radar guidance/sighting; gun sights; weapons control systems; IFF/transponders; command and control; magnetic anomaly detection; tactical nav systems; infra-red.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB934 ADVANCED COMMUNICATIONS &amp; NAVIGATION SYSTEMS</td>
<td>Expansion of previous theory; develop an increased understanding of systems previously described; complex algebra required for error-correcting codes and auto-correlation and cross-correlation of pseudo-noise sequences; investigation and simulation of error-correcting communication systems; detailed investigation into modern communication systems; theory of acquisition and tracking using delay-lock and similar techniques; use of fast-fourier and parallel processing for acquisition and tracking; description and analysis of the Global Positioning System (GPS); position fixing using GPS.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB935 ADVANCED SATELLITE SYSTEMS</td>
<td>Design of communication systems for spacecraft; spacecraft and ground stations performance; special modulation methods; coherent frequency translation modes of operation; analysis of intermodulation distortion; carrier regeneration or synchronisation and acquisition and tracking requirements; analogue and digital processing of signals in the presence of noise; factors affecting accuracy of ranging; characterisation of spacecraft components and a critical evaluation of alternative design methods; design parameters of various aerial systems; design of low-noise amplifiers; description of B-MAC television system.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB947 RADAR &amp; RADIO NAVIGATIONAL AIDS</td>
<td>Radar equation; theory of reception; matched filtering; principles of detection; types of radars; primary and secondary radar; surveillance; tracking; navigation; terrain-following radar; radar techniques including doppler extraction, moving target indicator, pulse compression, ranging parameter optimisation, application of matched filtering and wiener and kalman filtering; detailed and systematic study of navigational systems; microwave landing systems.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB951 HIGH VOLTAGE EQUIPMENT</td>
<td>Review of modern insulating materials; high voltage test methods and apparatus; characteristics of electrical insulation theories of breakdown in dielectrics; non-destructive testing methods, dielectric loss angle, partial discharge; voltage surge distribution in power equipment; overhead line insulation and lightning.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB954 ELECTRICAL ENERGY UTILISATION</td>
<td>Power reticulation in building, energy management, fire protection systems, illumination technology, air conditioning plant, building supervising and control systems, lifts.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
<tr>
<td>EEB955 POWER ELECTRONICS APPLICATIONS</td>
<td>Review of power electronic switching devices; variable speed AC and DC drives; high voltage DC transmission (HVDC); standard static VAR compensators and new developments in static VAR.</td>
<td>Credit Points: 7 Contact Hours: 3 per week</td>
</tr>
</tbody>
</table>
compensation. Uninterruptible power supplies (UPS); induction heating; high frequency switching technology in variable speed AC drives; power electronic physical layout considerations.
Credit Points: 7 Contact Hours: 3 per week

**EEB961 COMMUNICATIONS TECHNIQUES**
Modern communication techniques including switched networks, broadcast, point-to-point systems; microwave and optical links; radio navigation and radar; associated electronic devices.
Prerequisite: EEB661[R]
Credit Points: 7 Contact Hours: 3 per week

**EEB962 MICROWAVE SYSTEMS ENGINEERING**
Microwave thermionic and semiconductor devices, amplifier design using scattering parameters; passive microwave devices including non-linear networks and ferrites; array theory and design, microwave antennas.
Prerequisite: EEB662[R]
Credit Points: 7 Contact Hours: 3 per week

**EEB967 DIGITAL COMMUNICATIONS**
The theory and applications of digital communication technology; baseband digital signals are introduced; pulse shaping, signal regeneration, measurement techniques and the digital coding of analogue signals are treated; such applications as digital radio systems, digital telephone and computer networks, error control in digital networks and ISDN are analysed.
Credit Points: 6 Contact Hours: 3 per week

**EEB968 DIGITAL SIGNAL PROCESSING**
Adaptive digital filtering and applications, spectral estimation techniques, speech analysis and synthesis; realtime implementation of signal processing systems.
Prerequisite: EEB602[R]
Credit Points: 7 Contact Hours: 3 per week

**EEB969 DIGITAL SPECTRAL ANALYSIS**
Modern spectral estimation, parametric and non-parametric; time frequency analysis and instantaneous frequency estimation; definition and implementation of higher order spectra; application of higher order spectra to signal detection and classification.
Prerequisite: EEB968[R]
Credit Points: 7 Contact Hours: 3 per week

**EEB971 APPLIED ELECTRONICS**
Analysis of the characteristics and applications of a variety of integrated devices; particular attention is given to new products; emphasis is placed on errors and quality of design.
Prerequisite: EEB573[R]
Credit Points: 6 Contact Hours: 3 per week

**EEB972 INTEGRATED ELECTRONIC TECHNIQUES**
Study of a wide range of commercially available integrated circuits and their typical applications in industry; design rules, limitations and methods of VLSI fabrication.
Prerequisite: EEB573[R]
Co-requisite: EEB602[R]
Credit Points: 7 Contact Hours: 3 per week

**EEB980 AEROSPACE LAW**
Aviation law, both national and international; cargo constraints, restricted airspace, transport of people and animals, dangerous cargoes and firearms; the division of the upper atmosphere and space; insurance considerations.
Credit Points: 7 Contact Hours: 3 per week

**EEP101 ALGORITHMS FOR CONTROL & SIGNAL PROCESSING**
The application of numerical analysis methods, equation solving and signal processing; the design of digital computer algorithms for the processing of signals and the control of continuous and discrete processes; and the application of optimisation techniques to system control.
Credit Points: 12 Contact Hours: 3 per week

**EEP102 UNIX & C FOR ENGINEERING**
The C language; use of C for program development; use of C as a substitute for assembly language to produce ROMable code with methods and particular problems; the UNIX operating system and its use as an engineering work station operating system.
Credit Points: 12 Contact Hours: 3 per week

**EEP103 COMPUTER HARDWARE & INTERFACING**
State-of-the-art digital devices; design and implementation of digital systems; microprocessors and microcontroller systems and interfacing; computer architectures, subsystems and peripherals.
Credit Points: 12 Contact Hours: 3 per week

**EEP104 REALTIME OPERATING SYSTEMS**
Definition and review of realtime operating systems; detailed examination of the structure of realtime operating system; the development of programming skills, orientated towards realtime applications; programming exercises for realtime applications using assembler and high-level languages.
Co-requisite: EEP102
Credit Points: 12 Contact Hours: 3 per week

**EEP120 NETWORKS & DISTRIBUTED COMPUTING**
A thorough treatment of the ISO OSI model of computer interconnections and common techniques for layers 3 to 7; this includes protocols, software and packages and the computers which support these layers; a lighter treatment of layers 1 and 2 will also be given.
Prerequisites: EEP103, EEP104
Credit Points: 12 Contact Hours: 3 per week

**EEP121 PARALLEL & SUPER COMPUTING**
The latest in vector processing and parallel computing technology; students will have access to parallel computer development systems; students may be required to undertake a small research project.
Credit Points: 12 Contact Hours: 3 per week

**EEP122 GRAPHICS & COMPUTER VISION**
An introduction to the human visual system and the modelling of digital images; it also provides an introduction to a range of digital image processing systems; transforms, image enhancement, image structural operations and pattern recognition.
Credit Points: 12 Contact Hours: 3 per week

**EEP123 PROCESS CONTROL & ROBOTICS**
A thorough survey of computers as applied to manufacturing, encompassing hardware and software methods and state of the art products; material in-
includes robots, computer numerically controlled machine tools, distributed process control, networks and computers.

Prerequisite: EEP101
Credit Points: 12  Contact Hours: 3 per week

- EEP124 DATA COMMUNICATIONS
Characteristics of transmission channels, synchronous and asynchronous modems and interfaces, fibre optic and satellite links, local and wide area networks, encoding and security.
Credit Points: 12  Contact Hours: 3 per week

- EEP125 ADVANCED ENGINEERING SOFTWARE TOOLS
Selected numerical techniques and computer software tools available in procedural and non-procedural languages as well as specialised commercial applications packages for the analysis and design of data transmission systems.
Credit Points: 12  Contact Hours: 3 per week

- EEP300 RESEARCH PROJECT
A computer engineering research project in the student's chosen field encompassing a literature search, design, hardware construction or writing of software, testing and publication of a thesis.
Credit Points: 12  Contact Hours: 3 per week

- EET211 ELECTRICAL ENGINEERING 2
Introduction to alternating quantities; sinusoidally time varying sources; phasor diagrams; RL, RC and RLC series and parallel circuits; resonance, transformation, complex power; application of circuit theorems to AC circuits.
Prerequisite: EET111[R]
Credit Points: 7  Contact Hours: 3 per week

- EET270 ELECTRONICS 1
An introduction to the fundamentals of electronic devices and transistor circuits; emphasis is placed on characterising and applying these devices to basic electronic circuits; applications include: transistor amplifiers including differential and tuned stages, current sources, oscillators and simple fault finding techniques.
Prerequisites: EET111[R], EET100[R]
Co-requisite: EET211
Credit Points: 7  Contact Hours: 3 per week

- EET350 ELECTRICAL ENGINEERING 3
Magnetic circuits, single phase transformers, equivalent circuits, power losses, regulation and efficiency; three phase theory, balanced and unbalanced loads, measurement of power; electrical safety earth ing, fault levels and protection equipment; electrical machines, review of principles of operation and characteristics of a range of AC and DC machines; costs of electricity tariffs.
Prerequisite: EET211[R]
Credit Points: 7  Contact Hours: 3 per week
EET570 ELECTRONICS 2
Integrated circuit amplifiers and their applications; other areas of study include: power amplifiers; optoelectronic devices; voltage regulators and a survey of semiconductor switching devices.
Prerequisite: EET270[R]
Credit Points: 7
Contact Hours: 3 per week

EET590 MICROPROCESSOR SYSTEMS
Assembly language programming and use of microprocessors as electrical engineering hardware. Interfacing of microprocessors to instrumentation and external equipment.
Prerequisites: CST390[R], EET676[R]
Credit Points: 7
Contact Hours: 3 per week

EET62 ELECTRICAL POWER SYSTEMS
Single line diagrams, pu systems, transmission line equivalent circuits, faulted balanced calculations, power flow calculations, overhead line and underground cable characteristics, power system insulation.
Prerequisites: EET350[R], EET350[R]
Credit Points: 7
Contact Hours: 3 per week

EET650 ELECTRICAL EQUIPMENT
Three phase transformers, multiwinding, auto; special types of AC machines including three phase and single phase induction motors, synchronous machine construction and operation.
Prerequisite: EET350[R]
Credit Points: 7
Contact Hours: 3 per week

EET676 DIGITAL ELECTRONICS
The basic concepts of digital combinational and sequential logic circuits; logic gates, Boolean algebra, minimisation of logic functions, counters, shift registers, address, ADCs, DACs and logic families; code converters and binary arithmetic.
Co-requisites: EET270
Credit Points: 7
Contact Hours: 3 per week

EET678 APPLIED ELECTRONICS
The integrated circuit approach to electronic systems design; the subject is highly practical and utilises the basic fundamentals of ICs given in integrated circuits; further treatment of integrated circuits with practical applications (all the common configurations), oscillators, special purpose circuits such as peak detectors, sample and hold circuits, active filters.
Prerequisite: EET570[R]
Credit Points: 7
Contact Hours: 3 per week

EET690 COMPUTER ORGANISATION
A comparative study of computer architectures and operating systems from microprocessors up to super computers; virtual machines, interpreters, compilers, linkers, loaders, disc operating systems and executive; instruction sets, addressing modes and instruction fetch cycles; a survey of memory management techniques such as memory maps, virtual memory, cache memory, and interleaving; exception processing methods such as interrupts, autovectors, bus errors and supervisor states; multi processor systems and computer communications standards, networks and protocols. Parallel computing, pipelines, single instruction multiple data and multiple instruction multiple data machines.
Prerequisites: CST390[R], EET676[R]
Credit Points: 7
Contact Hours: 3 per week

EET720 MODERN CONTROL TECHNOLOGY
Onstream analysers; intelligent analytical equipment; sequence control and programmable logic controllers; robot sensors and control systems; computer numerically controlled machines; distributed control systems; sampling theory and algorithm development; communication between intelligent control systems (such as MAP and TOP); adaptive and automatic tuning controllers; advanced testing instruments.
Prerequisite: EET420[R]
Co-requisite: EET522[R]
Credit Points: 7
Contact Hours: 3 per week

EET737 TRANSMISSION & PROPAGATION
Transmission lines study of waves; reflections; matching; using Smith circle and computer aided techniques; electromagnetic waves in free space and at the boundary between media; basic antenna parameters and properties; waveguide theory and microwave techniques and an introduction to optical fibre technology.
Prerequisite: EET460[R]
Credit Points: 7
Contact Hours: 3 per week

EET753 TESTING & COMMISSIONING TECHNIQUES
The philosophy of testing, the concepts of quality assurance and the principles of commissioning: test methods and techniques for various electrical tests; application of test methods and techniques to a range of electrical plant; principles of earthing in a power system; safety procedures.
Prerequisite: EET350[R]
Credit Points: 7
Contact Hours: 3 per week

EET760 COMMUNICATIONS ENGINEERING 2
Sampling, reconstruction, spectra; quantization, dynamic range and noise; PCM methods and circuitry, companding; delta modulation; digital transmission, TDM, FDM, modulation methods; data coding for error correction and data communication protocols.
Prerequisite: EET560[R]
Credit Points: 7
Contact Hours: 3 per week

EET791 COMPUTER PROGRAMMING 2
Development of the concepts introduced in CST390 to include the full range of features in this language; an introduction to the features of FORTRAN.
Prerequisite: CST390[R]
Credit Points: 7
Contact Hours: 3 per week

EET840 SUBSTATIONS & PROTECTION SYSTEMS
Study insulation coordination principles, substation layout and equipment including circuit breakers, current and voltage transformers and their characteristics; an introduction to sequence components and fault calculations; a description of different types of protection systems and their integration with the power system, especially substations.
Prerequisite: EET642[R]
Credit Points: 7
Contact Hours: 3 per week

EET860 COMMUNICATIONS TECHNOLOGY
Broadcast radio and TV, terrestrial and satellite; specialised broadcast systems, eg. police, taxi; point-topoint radio communications; telemetry; switched systems, circuit and packet switching, exchanges, traffic; use of different frequency ranges, VLF, MF,
HF, VHF, UHF and SHF for radio communications; a number of compulsory industrial visits are arranged.

Prerequisites: EET570[R], EET670[R]
Credit Points: 7 Contact Hours: 3 per week

- **EET870 INDUSTRIAL ELECTRICALS**
  
  Study of a wide range of electronic devices and circuits associated with industrial control systems; a wide range of power switching devices and their applications are studied together with electronic measurement systems and their associated transducers.
  
  Prerequisite: EET570[R]
  Credit Points: 7 Contact Hours: 3 per week

- **EET880 DESIGN**
  
  The main concepts of electrical designs and introduction to relevant specifications and standards; further work is in the form of design projects in which a written report must be submitted.
  
  Prerequisites: Major subjects in selected modules
  Co-requisites: Major modules 1(d) and 2(d)
  Credit Points: 7 Contact Hours: 3 per week

- **EET891 ADVANCED COMPUTING TECHNIQUES**
  
  Applications of computers and microprocessor systems to data collection supervision and active control functions; realtime operating systems and software development in both low level languages and appropriate high level language such as Modula 2.
  
  Prerequisite: CST320[R]
  Credit Points: 7 Contact Hours: 3 per week

- **EPB100 ADMINISTRATIVE THEORY**
  
  Use of political theories and models in the study of public administration: theories of democracy; individualism, pluralism, elitism, corporatism, marxism; theories of power; Clegland, Lasswell; theories of bureaucracy; Weber, Mosca, Michels, Marx; use of management theories and models in the study of public administration: classical/traditional theory; human relations theory; systems theory and structural functionalism; action theory (Harmon); Group theory (Bales' typology); administrative personality types.
  
  Prerequisite: BSB102, EPB112
  Credit Points: 12 Contact Hours: 3 per week

- **EPB101 ADVANCED ECONOMIC THEORY & POLICY**
  
  The foundations of economic thought and recent contributions to the literature of micro and macro theory and policy; their relevance for public and private decision making in the Australian context.
  
  Prerequisite: EPB142 and EPB152 or one of these plus the other as a co-requisite.
  Credit Points: 12 Contact Hours: 3 per week

- **EPB102 APPLIED ECONOMETRICS A**
  
  Development of general linear model in matrix form and assumptions underlying the model; specification of models in terms of explanatory variables and functional form; econometric problems such as multicollinearity, serial correlation and heteroscedasticity; dummy variables as a proxy to qualitative and quantitative variables; simultaneous equation models and their applications.
  
  Prerequisite: EPB110
  Credit Points: 12 Contact Hours: 3 per week

- **EPB103 APPLIED ECONOMETRICS B**
  
  Single equation methods such as errors in variables, lagged variables and principle components with applications in economics; simultaneous equation methods, identification problems; estimation methods such as indirect least square, two stage least squares and three stage least squares.
  
  Prerequisite: EPB102
  Credit Points: 12 Contact Hours: 3 per week

- **EPB104 APPLIED ECONOMIC TECHNIQUES I**
  
  Approaches to economic research; econometrics applications; single equation models for the estimation of demand, production and cost functions and applications (eg. elasticities, returns to scale); forecasting techniques; classical, algebraic, regression, introduction to ARIMA; operations research applications; linear programming and applications; portfolio selection, marketing applications, production scheduling; transportation techniques and applications; assignment techniques for job/territory allocation; inventory management with deterministic and probabilistic demand; decision theory: developing a decision strategy; network models: CPM applications to project management.
  
  Prerequisite: Quantitative Methods, Introductory Statistics (Administrative Research), EPB140, EPB150
  Credit Points: 12 Contact Hours: 3 per week

- **EPB105 ASIAN ECONOMIC DEVELOPMENT**
  
  To analyse economic change in Asia and the evolution of the Asia-Pacific region; the development of the Japanese economy post 1868; the rise of the NICs ASEAN and South-east Asia and Japanese economic policies.
  
  Credit Points: 12 Contact Hours: 3 per week

- **EPB106 AUSTRALIAN ECONOMIC HISTORY**
  
  The development of the Australian economy and its economic institutions from the 1890s to World War II; analysis of post-war economic growth and fluctuations; arbitration, conciliation and wage fixation, immigration policy, capital inflow, institutional arrangements; Australia's links with the international economy; trading agreements; the contribution of manufacturing, agriculture, minerals and energy, labor, investment and technology in historical context; Australia's deteriorating economic performance since the 1970s and the opportunities presented by the development of the Pacific Basin; the future for Australia.
  
  Credit Points: 12 Contact Hours: 3 per week

- **EPB107 BUSINESS ECONOMIC FORECASTING**
  
  Review of deterministic forecasting models; properties of stochastic time series; concepts of stationarity and the autocorrelation function; identification of autoregressive; moving average and ARIMA models; non-linear estimation of model parameters; diagnostic checking of model adequacy; forecasting and adaptive forecasting with ARIMA models; seasonal ARIMA models and their application.
  
  Prerequisite: EPB104, EPB102
  Credit Points: 12 Contact Hours: 3 per week

- **EPB108 BUSINESS IN ASIA**
  
  The business and cultural environment of Japan, China, the NICs and ASEAN; the operation and management of the major Asian economies; social and institutional foundations of the economies concerned; interaction between Asia and Australia.
  
  Credit Points: 12 Contact Hours: 3 per week
EPB109 BUSINESS METHODOLOGY
Commonly used statistical techniques for handling data; central limit theorem and confidence intervals; hypothesis testing for one and two populations (both means and proportions); repertory grid analysis testing; analysis of variance; simple and multiple regression; and correlation; index numbers; time series; non-parametric statistics; business forecasting. Computer work will involve SPSS on the VAX. Students taking this subject should also have completed the bridging course in statistics.
Prerequisite: FNB102
Credit Points: 12 Contact Hours: 3 per week

EPB110 BUSINESS STATISTICS
Hypothesis testing (means and proportions), analysis of variance, simple and multiple regression, non-parametric methods, index numbers, time series analysis and business forecasting. (Note: Students who have not studied the Probability and Statistics Unit in secondary school are strongly advised to take the bridging course in this area offered by the School of Mathematics, and should be familiar with the statgraphics package.)
Prerequisite: FNB102
Credit Points: 12 Contact Hours: 3 per week

EPB111 COMPARATIVE ECONOMIC SYSTEMS
Rationale for the study of comparative economic systems; methods of comparison; structural dimensions as systemic factors; socio-political settings and economic systems; ideology, social relations and political institutions; socialist planning and administrative decentralisation; socialist planning and manipulative decentralisation; planning and the role of state in the market economy; socialist economic reforms; structural change and economic development; convergence.
Prerequisites: EPB142, EPB152
Credit Points: 12 Contact Hours: 3 per week

EPB112 CRITICAL ANALYSIS
The anatomy of valid argument in the social sciences, analysis of a chain of arguments from premise to conclusion, examination of causes, fallacies in argument to foster a critical stance; application of these fundamentals of reasoning to organisation principles, rule making issues and the enforcement problem, strategies for change, dealing with clients and responding to rhetoric.
Credit Points: 12 Contact Hours: 3 per week

EPB114 ECONOMIC DEVELOPMENT
The economics of development of the Third World: examination and application of economic principles, theories and policies to the understanding of significant real world development problems such as poverty, inequality, unemployment, debt, rural stagnation, resource depletion and sustainability. As these problems of development or underdevelopment are rooted in social and institutional causes as well as economic causes, the economic principles are combined with appropriate institutional and structural analyses to provide a better understanding of the problems.
Prerequisites: EPB142, EPB152
Credit Points: 12 Contact Hours: 3 per week

EPB115 ECONOMIC MODEL BUILDING
Model specification and theory formulation; investigating the model characteristics and the underlying assumptions of convexity, concavity and regularity; theoretical appraisal of single and simultaneous equation model building and audit usefulness in pacifying and solving economic issues and problems.
Prerequisite: EPB142, EPB152, EPB104
Credit Points: 12 Contact Hours: 3 per week

EPB116 ECONOMIC PRINCIPLES
Economic problem and its basis scarcity; contemporary Australian microeconomics institutions; aspects of market demand, supply and elasticity; costing principles; profit maximisation; contemporary microeconomics institutions; aspects of market demand, supply and elasticity; costing principles; profit maximisation; and analysis of a chain of arguments from premise to conclusion. (Note: This subject is not available to students who have taken and passed EPN103.)
Prerequisite: EPB152
Credit Points: 12 Contact Hours: 3 per week

EPB117 ECONOMICS OF INDUSTRY
Economics of industry builds upon the foundations of the theory of the firm developed in the analytical subject EPB142. Analysis is extended to concentration measures, pricing behaviour, contestable markets, multi-product firms, control of pricing practices, the Trade Practices Act.
Prerequisite: EPB152
Credit Points: 12 Contact Hours: 3 per week

EPB118 ECONOMICS OF STRATEGIC MANAGEMENT
The internal structure, operation and growth of organisations with special reference to commercial institutions; the determinants of the internal structure of organisations; the relative effectiveness of the institutions of market and hierarchy in reaching decisions; the determinants of vertical integration; the determinants of the growth and functioning in internal labour markets; the reasons for the development of firms as economic institutions; and the role of the entrepreneur in decision making. (Note: This subject is not available to students who have taken and passed EPN103.)
Prerequisite: EPB152
Credit Points: 12 Contact Hours: 3 per week

EPB120 EUROPEAN ECONOMIC HISTORY
Reasons for Europe’s economic success; emergence and spread of industry; Europe’s involvement with the world economy and the evolution of the international economy from 1850: international movements of capital and technology.
Credit Points: 12 Contact Hours: 3 per week

EPB121 EUROPEAN INTEGRATION
The economic history of European integration post World War II; survey and analysis of the major economics and the European institutional framework emphasis on current issues surrounding Europe 1992, the impact of changes in Eastern Europe and Australia’s relationship with the new Europe.
Prerequisites: EPB140, EPB150
Credit Points: 12 Contact Hours: 3 per week

EPB124 GOVERNMENT
Political concepts and principles: social and economic factors in Australian politics; responsible government: Westminster principles; federalism: the Constitution, inter-governmental relations; separation of powers: parliament and the executive, judiciary, the High Court and statutory interpretation;
representation: Commonwealth electoral system, major and minor political parties, interest groups and peak organisations; role of government; public policy-making process, intervention, regulation, assistance and promotion, trend to corporatism; Australia in the international community; reform and trends (constitution, parliament, intergovernmental relations, administrative, industrial, and social reforms).

**EPB125 GOVERNMENT & BUSINESS**

The political context of development: a review of major trends in Australian government policies towards business; ideology and government-business relationships; liberalism, socialism and their contemporary derivatives; intergovernmental relations and business policy; the regulatory framework; the big government debate; interest representation: interest groups, political parties and processes; the trend to corporatism; taxation and welfare policies and business; government, business and the primary sector; government, business and manufacturing; government, business and the transport sector; government, business and resource development; government, business and finance; science and technology.

**Prerequisites:** EPB142 and one of EPB140 or EPB150.

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB127 HISTORY OF ECONOMIC THOUGHT**

Adam Smith and economic development; Malthus and the population problem; the magnificent dynamics of David Ricardo; the problem of value; Smith, Ricardo, Marx and the marginal revolution; utopian socialists and the problem of alternative organisation and industry; Marx and the critique of capitalism; planning versus the market; Lange versus Mises; Schumpeter on economic development; Rae, Veblen and Galbraith and the problem of consumption.

**Prerequisites:** EPB142, EPB152

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB130 INTERNATIONAL ECONOMICS**

Trade theory and international macroeconomics; Australia's experience in international economics with emphasis on recent events particularly after the dollar was floated in December 1983. Other topics include: theories of trade, balance of payments, Australia's export dilemma, foreign investment in Australia, GATT, OECD, commodity agreements, currency and other barriers to trade, the spot and forward FX markets, FX risk management using futures and options, the national debt, Keynesian and monetary approaches to the balance of payments, the EC, ASEAN, the economics and monetary effects of the 1990 re-unification of Germany.

**Prerequisite:** EPB124

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB131 INTERNATIONAL POLITICS & BUSINESS**

Public and private enterprise: a descriptive and comparative perspective; the extent and socio-economic significance of public enterprises; the development of public enterprise: to World War I; the development of public enterprise: from World War I to present; policy and planning in public enterprise; control systems and problems; personnel policies and problems; financial policies and practices; assessing the performance of public enterprise: models and criteria; assessing the performance of public enterprise: the literate; privatisation and the Commonwealth; State Government and privatisation; the future of state intervention.

**Prerequisite:** EPB124

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB132 INTERNATIONAL TRADE & FINANCE**

Australia's experience in international economics with emphasis on recent events particularly after the dollar was floated in December 1983. Particular topics dealt with include: theories of trade, balance of payments, Australia's export dilemma, foreign investment in Australia, GATT, OECD, commodity agreements, tariff and other barriers to trade, the spot and forward FX markets, FX risk management using futures and options, the national debt, Keynesian and monetary approaches to the balance of payments, the EC, ASEAN, the economics and monetary effects of the 1990 re-unification of Germany.

**Prerequisites:** EPB140, EPB150

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB133 GLOBALISATION & WORLD BUSINESS**

Economic conflict and competition in the international economy, new trade theorists, international monetary relations in the Pacific, conflict in agricultural product and exports, economic conflict with and within the European community, US/Japanese/Australian economic relations, the north-south dialogue, Australia as a participant in international economic conflict and cooperation.

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB135 LOCAL GOVERNMENT**

The nature and constitutional status of local government in Queensland; the evolution of local government legislation; community of interest concepts; determination of external boundaries; local government electoral systems in Queensland; public participation and policy formulation; professionals in local government; administrative issues; functions, the general charter, personnel resources; budgeting and finance; local government and federalism; greater local government; City of Brisbane; regional administration; local government in the UK; corporatisation in local government; EARC proposals and the reform process.

**Prerequisite:** EPB124

**Credit Points:** 12

**Contact Hours:** 3 per week

**EPB136 LOCAL GOVERNMENT ADMINISTRATIVE PRACTICE 1**

The local authority, its constitution, committees; the Department of Housing and local government, and powers of central government; by-laws; procedures, content, and enforcement; elections and electoral procedures; the finances of the local authority; planning schemes, land use controls, procedures; planning and the Environment Court; subdivision of land, building units title and group title, artificial lakes, canals; environmental controls, types and powers, Environmental Impact Statement (EIS); the role of the local authority; Health, the Health Act and regulations; the standard by-laws (buildings, water supply and sewerage) and flammable liquids regulations; local authority meeting agenda and minutes; the Local Government Association of Queensland; a review of recent legislative action and possible future legisla-
credit area Water commissions and the concept of fiscal equalisation; Prerequisite: A review of the Local Government Act; examination. (Note: Offered in Semester I in odd-numbered years only.)

**EPBI41**

- **MACROECONOMIC POLICY**
  - Examination of the problems associated with inflation, unemployment and the balance of payments in the context of the Australian economy; the role of the government and the central bank discussed within the framework of an income-expenditure model; international trade and capital flows.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI42**

- **MACROECONOMIC THEORY**
  - Development of the IS-LM model in a closed and open economy; theories of consumption, investment and money; issues relating to aggregate supply; problems of unemployment, inflation, the balance of payments and economic growth; the effects of monetary and fiscal policies and supply-side economics.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI43**

- **MANAGEMENT SCIENCE**
  - The major behavioural objectives are to introduce students to important models of operations research; students are made aware of how these models are used in accounting and management decision-making situations; students become familiar with solving decision problems through their own calculations and the use of a computer; students gain an appreciation of the strengths and weaknesses of the models.
  - Credit Points: 9
  - Contact Hours: 3 per week

**EPBI44**

- **MATHEMATICAL ECONOMIC APPLICATIONS**
  - Classical optimisation: Lagrange's method with variables under constrained conditions; second order conditions for optimisation with Hessian Determinants; Kuhn-Tucker conditions and non-linear programming with application to theory of the firm. Integral calculus and differential calculus with application to problems of economic dynamics; consumer's equilibrium, producer's equilibrium, input-output analysis and general equilibrium. Difference equations with applications to the theories of growth and trade cycles.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI50**

- **MICROECONOMICS**
  - The nature of the economic agents: the consumer, the firm, the manager and the government; their effects on the determination of prices; the theory of consumer behaviour, the nature of demand, preference and difference theory, the nature of supply of the operation of the market, short and long costs, market structures and factor markets.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI51**

- **MICROECONOMIC POLICY**
  - A methodological framework based on the tenets of welfare economics allowing the student to assess microeconomic policy in action in both the public and private sectors. It covers such issues as efficient market outcomes, market failure, the role of the government, public goods, agriculture policy, manufacturing policy, externalities and the environment.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI52**

- **MICROECONOMIC THEORY**
  - Development of the theory of consumer demand showing the dual relationship between preference and demand theory; the concept of elasticity and demand analysis; the theory of the firm through extensions into production and cost theory. Monopoly and competitive pricing behaviour and the concepts of welfare economics.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI53**

- **MONETARY THEORY & POLICY**
  - The historical evolution of contemporary monetary theories; the role of money in affecting output, inflation and the balance of payments; recent approaches to monetary policy in the Australian context; and the role of the Reserve Bank in interpreting theory and giving effect to policy.
  - Credit Points: 12
  - Contact Hours: 3 per week

**EPBI54**

- **NATIONAL GOVERNMENT**
  - The philosophical foundations, trends and reform processes across the whole spectrum of national government in Australia. Topics include: political theories and models; their relevance for Australian national government; theories of democracy: liberalism, pluralism, elitism, marxism, corporatism, socialism; constitutional framework: judicial review and division of powers; legislative processes: the contemporary committee system, scrutiny mechanisms; electoral processes: voting behaviour, public policy-making: models of public policy formulation, the budget process; public sector reform: devolution of responsibility, the goals of improved efficiency, accountability, equity; inter-governmental relations, fiscal federalism, cooperative federalism; politics of structural reform.
  - Credit Points: 12
  - Contact Hours: 3 per week
EPB155 POLICY & PROGRAM EVALUATION
The process and practice of policy and program evaluation in the public sector; the nature of evaluation and techniques evaluations of selected policies and programs. The aim is to develop a critical appreciation of the strengths and weaknesses of evaluation as an integral part of the policy process.
Prerequisite: EPB159
Credit Points: 12  Contact Hours: 3 per week

EPB156 POLITICAL & ADMINISTRATIVE ANALYSIS
Political theory and practice: conceptualising the problems; the liberal tradition; neo-liberalism, conservatism, liberal and their relevance for past and present political systems; reformist and radical traditions: totalitarianism, communism, socialism and social democracy; relevance for past and present political systems; theories of power and participation; Lukes, Lindblom, Pateman; contemporary case studies; theories of the liberal-democratic state: liberalism, freedom and equality, marxism and the capitalist state, theories of the liberal-democratic state: the public choice approach; corporatism and democracy; initiatives, possibilities and problems; the limits of state power and democracy; re-evaluation of basic concepts.
Prerequisite: EPB100
Credit Points: 12  Contact Hours: 3 per week

EPB157 PUBLIC ENTERPRISE
Public and private enterprise; a descriptive and comparative perspective; the extent and socio-economic significance of public enterprises; the development of public enterprise; to World War I; the development of public enterprise: from World War I to date; policy and planning in public enterprise; control systems and problems; personnel policies and problems; financial policies and practices; assessing the performance of public enterprises; models and criteria; privatisation and the Commonwealth; State Government and privatisation: the future of state intervention.
Prerequisites: EPB124 and either EPB140 or EPB150
Credit Points: 12  Contact Hours: 3 per week

EPB158 PUBLIC FINANCE
The tools of microeconomic theory applied to public sector budgeting: the tenets of welfare economics and financing public programs; the principles of taxation, the rationale for public expenditure, the benefit principle versus user pays principle, voting procedures and preference revelation, the free rider problem, log rolling, and the prisoner dilemma, the incidence of tax and the consumption tax versus the income tax, public sector accounting.
Prerequisite: EPB152
Credit Points: 12  Contact Hours: 3 per week

EPB159 PUBLIC POLICY
Models of policy: types and uses of models, cyclical and sequential models; policy formulation: issue identification and agendas, adoption; legitimisation and succession; Program design; implementation: a developing study, traditional models, implementation: Mazmanian, Van Meter and Horn models; determinants of policy: economic and political; current developments in policy theory; application of the model.
Prerequisite: EPB100 or for non public administration students, the completion of 8 subjects in the relevant degree program, including an introductory government or politics subject.
Credit Points: 12  Contact Hours: 3 per week

EPB160 PUBLIC SECTOR ECONOMICS
The principles of equity versus efficiency; traces developments in techniques of government resource allocation: benefit cost analysis, program budgeting and cost effectiveness; privatisation and corporatisation issues.
Prerequisite: EPB152
Credit Points: 12  Contact Hours: 3 per week

EPB162 REFORM & THE PUBLIC SECTOR
The development of the existing body of law, rules and regulations governing accountability; efficiency and effectiveness in the public sector through all administrative processes and levels of government, as well as the various mechanisms available for the purpose of review. The need for reform and review from early developments in administrative and political history through to contemporary developments.
Prerequisites: EPB112, BSB102
Credit Points: 12  Contact Hours: 3 per week

EPB163 RESEARCH & SURVEY METHODS
Australian statistical information, demographic processes, the presentation of quantitative as well as qualitative data, questionnaire construction, how to conduct surveys, sampling design, sample accuracy, sample size, confidence intervals, hypothesis testing and an introduction to correlation, regression and time series analysis. Computer work involves SPSS-X and Statgraphics.
Credit Points: 12  Contact Hours: 3 per week

EPB164 SPATIAL & REGIONAL ECONOMICS
Location theories; theories of growth and development over space; the role of cities; regional features, problems and comparative strengths; spatial networks including city systems; regional stability and volatility.
Credit Points: 12  Contact Hours: 3 per week

EPB166 SPECIAL TOPIC – PUBLIC ADMINISTRATION
The aim of this subject is to help the student apply in detail the modes of analysis developed in the core subjects to specific policy areas. In this way their immediate relevance can be demonstrated and a thorough understanding of a policy area gained.
Prerequisites/Co-requisites: EPB159, EPB140 or EPB159
Credit Points: 12  Contact Hours: 3 per week

EPB167 STATE GOVERNMENT
Queensland history and political culture; major issues of Queensland politics; development, corruption, the gerrymander; Federal/State relations: constitution, finance, current issues; Parliament: structure, functions, reform; impact of the Fitzgerald Report; the Executive: Governor, Premier, Cabinet, power and change; the Public services: reform and future directions; conservative parties in Queensland; the ALP in Queensland; reform and the road to government; the electoral system, impact on parties, Electoral and Administrative Review Commission (EARC); other participants in the political process; the media and its role in the political process: the process of reform; Criminal Justice Commission (CJC) the mechanism
of appeal; police; reform of the criminal justice system.
Prerequisite: EPB124
Credit Points: 12  Contact Hours: 3 per week

EP101 ECONOMIC ANALYSIS
Australia's international trading performance relative to other industrialised nations. The potential economic impact on quality control systems on primary, secondary and tertiary sections of Australian industry. Economics of the firm and the quality factor, quality as a determinant of demand, demand elasticity, goods attribute theory. Tools for incorporating quality into investment decisions; opportunity and marginal costs; obsolescence and economic life; repair and major overhaul; criteria for comparing economic alternatives.
Credit Points: 12  Contact Hours: 3 per week

EP102 TRANSPORT & COMMUNICATION ECONOMICS
The application of microeconomic principles to transport and communication; location decision, demand, costs, pricing, investment principles, regulation, issues and policy.
Prerequisite: EPB124
Credit Points: 12  Contact Hours: 3 per week

EP103 ECONOMICS OF INFORMATION
Information as a commodity, the demand for information: the economics of the production of information; the costs of information; the cost, pricing and charging out of information within organisations; the market supply of information; information technology and the supply curve; the structure of the information industry; information and industry concentration; public good characteristics of information; government intervention and economic impacts in the information industry.
Credit Points: 12  Contact Hours: 3 per week

EP104 TRANSPORT & COMMUNICATION ECONOMICS
The application of microeconomic principles to transport and communication; location decision, demand, costs, pricing, investment principles, regulation, issues and policy.
Prerequisite: EPB124
Credit Points: 12  Contact Hours: 3 per week

EP105 RESEARCH METHODS
Logic and argument; descriptive statistics; collection, presentation and analysis of data; price index numbers; introduction to computers.
Credit Points: 12  Contact Hours: 4 per week
of stratigraphy; radiometric dating; palaeontology and biostratigraphy. Practical work includes stratigraphic interpretations, study of fossils, and map interpretation. Field excursions to local areas of interest.

Prerequisite: ESB122
Credit Points: 12  Contact Hours: 5 per week

■ ESB312 MINERALOGY & OPTICAL MINERALOGY

Introductory crystallography; fundamentals of crystal chemistry, mineral stability and reactions; crystallisation, growth and habit of the geologic framework of minerals; classification of minerals; systematic treatment of the physical, chemical and structural properties of minerals; and techniques of mineral analysis. The theory and identification of minerals in transmitted and incident light; the introduction to mineralogy with theory of reflected light; optical properties of ore minerals and identification of minerals in thin section, polished section and grain mounts. Field excursions to sites of mineralogic interest.

Prerequisite: ESB122
Credit Points: 12  Contact Hours: 5 per week

■ ESB342 STRUCTURAL GEOLOGY

The geometry of map-scale structures. Principles of deformation: strain and rigid motion, measurements of strain in deformed rocks, deformation paths, strain rate, homogeneous and non-homogeneous strain, normal and shear stress, Mohr diagram. Deformation mechanisms: elastic and thermal expansion, plastic deformation within crystals, flow by pressure solution, compaction, stress-strain relations. Fracture and brittle behaviour: the Mohr envelope, role of cracks and fluid in the fracture of rocks, fracture experiments; effects of pre-existing fractures, fracture of anisotropic rocks, brittle-plastic transition. Classes of structures: joints: origin, surface morphology and relation to other structures; faults: normal, strike-slip, thrust and detachment faults; folds: description and classification, kink bands, chevron folds, boudination, mechanisms and mechanics. Practical work includes a series of assignments of increasing complexity; field work involves mapping deformed terrain.

Prerequisites: ESB122, ESB222
Credit Points: 12  Contact Hours: 5 per week

■ ESB342 ECONOMIC MINERAL DEPOSITS

Mineralogy, genesis, use and value, mining methods and beneficiation of the different groups of economic materials. Major overseas deposits and Australian deposits are studied. The subject includes practical work and field and industrial visits.

Prerequisites: ESB122, ESB222
Co-requisite: ESB312
Credit Points: 12  Contact Hours: 5 per week

■ ESB392 FIELD TECHNIQUES & STUDIES

Methods used in the accumulation, analysis and interpretation of geological field data. Geological mapping, sampling and presentation of reports. The subject includes an extended excursion (five days or more), during which students will be required (individually or in groups) to map the geology of an assigned area. Assessment will be based on the production of a geological map to the prescribed scale, together with supporting explanatory notes. Other weekend excursions to areas of geological interest may be included.

Prerequisites: ESB122, ESB222
Credit Points: 12  Contact Hours: 5 per week

■ ESB422 GEOMORPHOLOGY

An introduction to the chemistry of the earth as a whole and of its component parts. Origin and distribution of the elements within the universe, the solar system and the earth. Elemental associations, primary differentiation and geochemical classification. Thermodynamics, equilibrium and equilibrium constants, chemical potential, fugacity, activity, the phase rule and phase diagrams. Isotope geochemistry. Crystal chemistry, nature of solids, bonding forces, covalent and ionic radii, crystal structures, unit cell composition, solid solution, polymorphism, crystal field theory, trace elements in minerals. Organic geochemistry. The geochemistry of aqueous environments, water chemistry, properties of water, solutions and solubilities, pH, oxidation and reduction, water at high temperature and pressure, kinetics of water reactions. The geochemistry of magmatic, sedimentary and metamorphic rocks. Statistical rationalisation, interpretation and presentation of geochemical data. Practical aspects include preparation of geochemical maps and reports based on field work in selected localities.

Prerequisites: ESB312, MAB237, CHB182, CHB282
Credit Points: 12  Contact Hours: 5 per week

■ ESB442 LITHOLOGY

The description and classification of igneous, metamorphic and sedimentary rocks in thin section and hand specimen; optical mineralogy; textural identification and classification. Field excursions of short duration are normally required.

Prerequisite: ESB312
Credit Points: 12  Contact Hours: 5 per week
ESB517 MINERAL EXPLORATION
An introduction to a range of relevant aspects and references to develop an awareness of their importance, and to provide a foundation for further development during the students' future professional lives. The aspects introduced are: exploration programs, crustal evolution and mineralisation, ore distribution in space and time, wall rock alteration, gossans, mineral potential of the sea bed, isotope studies, geothermometry, clay technology. Additional topics are dealt with in seminars.
Prerequisite: ESB367
Credit Points: 8  Contact Hours: 3 per week

ESB519 GEOLOGY FOR ENGINEERING
An introduction to the basic principles and theories of geology, emphasising the way in which mineralogy and petrology, geologic structures, geomorphology and groundwater interact with, and are related to, engineering design and construction. The engineering properties of rock are considered and the effect of geologic hazards on engineering construction are examined. The course incorporates a number of case histories to demonstrate and extend the relevance of various aspects of geology to the civil engineer's workplace.
Credit Points: 6  Contact Hours: 3 per week

ESB520 APPLIED GEOCHEMISTRY
Techniques for establishing regional geochemical patterns. The application of geochemistry to the discovery of ore deposits and to the solution of environmental problems. Primary and secondary dispersion patterns. Optimum design of geochemical surveys and statistical rationalisation of geochemical data. The application of multipurpose regional geochemical mapping to land use evaluation and environmental impact studies. The relation of selected trace elements to health and disease in plants and animals. Practical work includes an industry-oriented field project requiring several days of field work and also case history assignments based on environmental and exploration problems.
Prerequisite: ESB403
Credit Points: 8  Contact Hours: 3 per week

ESB537 APPLIED GEOPHYSICS
The reduction and manipulation of geophysical data, and their interpretation in geological terms; field data acquisition and computer modelling. Experience in a variety of geophysical methods is gained during a field excursions.
Prerequisite: ESB437
Credit Points: 8  Contact Hours: 3 per week

ESB547 IGNEOUS & METAMORPHIC PETROLOGY
The origin, formation and geologic history of igneous and metamorphic rocks as determined from field and laboratory studies of occurrences, mineral assemblages, rock composition, and texture. Interpretation of rock and mineral compositional diagrams; application of experimental investigations. Practical work examines the petrography and geochemistry of igneous and metamorphic suites. Field excursion.
Prerequisites: ESB417, ESB403
Co-requisite: ESB577
Credit Points: 8  Contact Hours: 3 per week

ESB557 PETROLEUM GEOLOGY
Origin and physio-chemical characteristics of petroleum (oil and gas); principles of petroleum generation, migration and accumulation through time and space; development of structural, stratigraphic combination traps; reservoir rock characteristics; use of geophysical, geochemical and radiometric techniques in petroleum exploration and reservoir characterisation; drilling techniques, well log interpretation and modern seismic-stratigraphic correlation in petroleum exploration and development; methods of primary, secondary and tertiary oil and gas recovery. Review of economics of petroleum production.
Prerequisite: ESB497
Credit Points: 8  Contact Hours: 3 per week

ESB577 FIELD EXCURSIONS
An extended (five or more days) excursion, with the possible addition of weekend commitments, to areas of petrologic interest with the emphasis on igneous and metamorphic petrology together with related mineralisation. Assessed on the bases of field attitude, formal examination and the production of an original written report.
Prerequisite: ESB417  Co-requisite: ESB547
Credit Points: 8  Contact Hours: 3 per week

ESB607 COAL GEOLOGY
Coal properties, classification genesis and analysis; hydro-carbon generation from coal and oil shale. Coalfield geology, Basin analysis and subsurface mapping techniques, coal production and economics. Coal hand specimen study and microscopy. Field excursions of short duration as required, together with practical assignments.
Prerequisites: ESB101, ESB102, ESB201
Credit Points: 8  Contact Hours: 3 per week

ESB617 MINING GEOLOGY
Search methods for economic materials, ore prediction, reserve assessment techniques. Interpretation of drilling information. Mining economics, case studies. Field excursions as required.
Prerequisite: ESB367
Credit Points: 8  Contact Hours: 3 per week

ESB627 HYDROGEOLOGY
Introduction to the hydrological cycle, groundwater, aquifers, chemistry and usage of water; exploration, evaluation and exploration of aquifers is followed by assessment of resources, recharge problems and contamination including sea water intrusion; practical work includes evaluation of aquifers by pump tests, flow nets finite element analysis; seepage problems and dewatering of mines and excavations.
Prerequisite: ESB453
Credit Points: 8  Contact Hours: 3 per week

ESB647 STRUCTURAL GEOLOGY & GEOTECTONICS
Geotectonics; structure of the earth's crust; world structural patterns; salt tectonics; deformation of lineations in folded rocks; folding of inclined surfaces, unconformities, superimposed folding; structural methods for exploration.
Prerequisite: ESB357
Credit Points: 8  Contact Hours: 3 per week

ESB653 ENGINEERING GEOLOGY
The application of geology to engineering, including an introduction to soil and rock mechanics, geological factors influencing engineering design and construction and the use of geological materials in construction. Foundation conditions and site investigation techniques. Case histories of various construction projects, including dams, bridges, build-
ings, roads, railways, tunnels and slopes. Field excursions to appropriate construction sites.

**Prerequisites:** ESB413, ESB437, ESB397

**Credit Points:** 8

**Contact Hours:** 3 per week

- **ESB677 FIELD EXCURSIONS**

An extended (five or more days) excursion, with the possible addition of weekend commitments, to areas of geological interest, the emphasis being on economic geology. Students will be assessed on the bases of field attitude, the production of their individual original written report, and any other requirements of the examiner, eg. oral or written examination, seminar, etc.

**Prerequisites:** ESB577

**Credit Points:** 8

**Contact Hours:** 3 per week

- **ESB687 GEOLOGICAL INVESTIGATION**

Students are required to produce an original detailed map of a designated area, collect representative samples, observe and collate relevant information (eg, structures, mineralisation, lithological variation, geomorphic variations, etc.). Appropriate laboratory and office work follows from the initial field work. Assessment based on the production of a final detailed report which will include maps. Each student is assigned to an adviser.

**Prerequisites:** ESB357, ESB517, ESB547, ESB497, ESB437

**Credit Points:** 8

**Contact Hours:** 3 per week

- **ESB697 MINING FEASIBILITY STUDIES**

Economics of mine development and operation; problem solving involving concepts of value, cash flow, payback, depreciation, annuity, taxation, forecasting and marketing; sampling and tonnage grade calculations, cut-off grade, ore reserves and sensitivity analyses, sources and costs of capital. Practicals utilise computer programs and spreadsheets for DCFROI calculations.

**Prerequisites:** ESB517

**Credit Points:** 8

**Contact Hours:** 3 per week

- **ESB700 PROJECT**

All students undertaking honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project will be assessed on the basis of an extensive written report and an oral presentation.

**Credit Points:** 48

- **ESB701 GEOLOGICAL CASE STUDIES**

Preparation of case history assignments of one or several projects from inception to completion. This includes the philosophy of the project, project development, project results. The case history should be selected to complement the student's project thesis. The study includes literature research from published and unpublished sources and if possible, interviews with project personnel. Presentation of the case history may include some or all of the following: relevant maps, sections, geochemical synthesis, and appropriate specimen material. Assessment includes the preparation of a publication quality report and an oral presentation.

**Credit Points:** 10

**Contact Hours:** 3 per week

- **ESB710 HYDROLOGY & ENVIRONMENTAL GEOLOGY**

Advanced aspects of sedimentology and environmental geology, as related to rational assessment and development of economic resources. The topics that will be addressed include: historical development of sedimentology and environmental geology; sedimentological models (including facies concepts) and their application to basin analysis and mineral/fuel exploration; advanced field and laboratory-based techniques for sedimentological and environmental investigations; economic resources in sedimentary strata; role of sedimentology in scientific assessment of environmental issues, such as land degradation, dryland salting, coastal erosion, fluvial-estuarine siltation and water quality deterioration.

**Credit Points:** 6

**Contact Hours:** 2 per week

- **ESB711 ADVANCED RESOURCE GEOLGY**

Metallogenic epochs and provinces; ore genesis models; advanced basin analysis; isotope geology; fluid inclusions and geothermometry; advanced mineralogy; petrology - new materials, aspects of special rocks, alteration zones, paragenesis; resource trends, exploration philosophy; resource assessment - geostatistics, pattern drilling methodology.

**Credit Points:** 6

**Contact Hours:** 2 per week

- **ESB712 ADVANCED ENGINEERING GEOLOGY**

Principles and scientific basis underlying the theory of engineering geological investigations and the application of modern techniques in analysis and investigation. Coursework is structured around engineering geology thesis topics being pursued in the current year, but includes: application of continuous seismic profiling, engineering behaviour on normally consolidated Holocene sediments, engineering geology of open pit mines, slope and underground opening stability, slope stability in tropical residual soils, geotechnical problems in damsite foundations.

**Prerequisites:** ESB653 or equivalent

**Credit Points:** 6

**Contact Hours:** 2 per week

- **ESB713 PETROCHEMISTRY**

The petrology, geochemistry, and petrogenesis of igneous and metamorphic rocks. Topics may vary according to student interest but will include field, petrologic, geochemical, isotopic and experimental aspects of magma generation and/or metamorphism. Quantitative modelling of magmatic processes using phase chemistry, major and trace element geochronology, stable and radiogenic isotopes. Petrographic analysis of igneous and metamorphic textures.

**Prerequisites:** ESB547, ESB403 or equivalent

**Credit Points:** 6

**Contact Hours:** 2 per week

- **ESB714 GLOBAL PLATE TECTONICS**

Investigation of recent advances in global plate tectonics; the petrology, sedimentology, structural, geophysical and resource geology of divergent and convergent plate margins; application of plate tectonic concepts to the Australian continent.

**Credit Points:** 6

**Contact Hours:** 2 per week

- **EST219 ENGINEERING GEOLOGY**

A brief introduction to the definitions and principles of geology, an appreciation of the range of rock types and the effects of weathering leading to soil formation. Identification of common mineral and rock types, the occurrence and nature of rock defects or discontinuities; the flow and control of groundwater by stratigraphy; rock structure and surface profile; and the effects of rivers and coastal wave action in erosional/sedimentary cycles.

**Credit Points:** 7

**Contact Hours:** 3 per week
• FNB100 AUSTRALIAN FINANCIAL MARKETS
System efficiency and the intermediation process; term structure of interest rates; the Australian banking and payments system; merchant bank and finance company operations; the operations of the Australian Stock Exchange; financial systems regulation; trading and pricing of money market/capital market securities; the options and futures market.
Prerequisite: ESB140
Credit Points: 12  Contact Hours: 3 per week

• FNB101 BUILDING FINANCIAL MANAGEMENT 1
The accounting process and accounting systems in the building industry; the nature of accounts, liabilities, and proprietorship; the accounting equation and balance sheets, ledger accounts and the double entry system, the accounting period concept, and profit determination; different forms of ownership and the basic nature of taxation; budgeting.
Credit Points: 4  Contact Hours: 2 per week

• FNB102 BUSINESS COMPUTING
Credit Points: 12  Contact Hours: 3-4 per week

• FNB104 COMPUTER APPLICATIONS IN FINANCE
Statistical analysis of share price data; statistical capabilities of a modern package such as SPSSX, SAS, SHAZAM or LOTUS 1-2-3; application of those capabilities to data to determine finance parameters, eg. betas, returns; using statistical software to perform events studies on finance data; study of research techniques used in finance.
Prerequisites: FNB102, FNB111 or FNB112
Credit Points: 12  Contact Hours: 4 per week

• FNB105 COMPUTER APPLICATIONS IN MANAGERIAL ACCOUNTING
Consideration of selected managerial accounting areas: master budgeting, cash budgeting, cost estimation, cost allocation, variance analysis, cost-volume-profit analysis; application of appropriate software tools; Lotus 1-2-3, Sybiz, accounting software, graphics software, statistical analysis software.
Prerequisite: FNB102
Credit Points: 12  Contact Hours: 4 per week

• FNB106 COMPUTER APPLICATIONS IN PUBLIC PRACTICE
Use of modern software tools and techniques (eg. Expert systems) as applied to selected areas of finance and commerce; reinforcement of investment analysis using software (eg. LOTUS 1-2-3); hardware and software selection process; the practicalities of negotiating contracts involving hardware and software; using and searching on-line public access databases; an understanding of the components and benefits of modern data communications and automated office technology in finance and commerce.
Prerequisite: FNB102
Credit Points: 12  Contact Hours: 4 per week

• FNB107 FINANCE 1
The institutional framework terminology, the basic instruments, their uses and uncertainty, and the CAPM model. Practical aspects of asset management, firm valuations, investments and capital budgeting.
Prerequisite: AYB110
Credit Points: 12  Contact Hours: 3 per week

• FNB111 FINANCE 1
The institutional framework terminology, the basic instruments, their uses and pricing. Financial mathematics, NPV, risk and returns, certainty and uncertainty, and the CAPM model. Practical aspects of asset management, firm valuations, investments and capital budgeting.
Prerequisite: AYB110
Credit Points: 12  Contact Hours: 4 per week

• FNB112 FINANCE 2
Theoretical development of the CAPM model, the practical application of the model and its relationship to efficient market hypothesis. Capital structure, dividends, options, international finance.
Prerequisite: FNB111
Credit Points: 12  Contact Hours: 4 per week

• FNB113 FINANCE 3
Advanced financial mathematics; advanced capital budgeting; readings in contemporary finance issues; project combining theory and practice.
Prerequisite: FNB112
Credit Points: 12  Contact Hours: 4 per week

• FNB114 FINANCIAL INSTITUTIONS LENDING
Finance theory and the lending function; cost of bank funds; the evaluation of retail loans, lending to small business; financial statement analysis; corporate lending process and securities; financing international trade; problem loans and credit scoring.
Prerequisite: FNB111
Credit Points: 12  Contact Hours: 4 per week

• FNB115 FINANCIAL INSTITUTIONS MANAGEMENT
Strategic planning and budgeting in a financial institution; performance measurement, risk management in financial institutions; gap management; liquidity and capital adequacy; lending policy and credit risk, service and customer profitability; international banking. An introduction to the marketing of financial services.
Prerequisites: FNB111 and FNB123
Credit Points: 12  Contact Hours: 4 per week

• FNB116 FINANCIAL MANAGEMENT FOR ENGINEERS
Introduction to the theory and practice of financial management in Australia; the nature of business finance and firm objectives; business structures and the organisation of the Australian capital markets; investment of firm funds in working capital and fixed assets; portfolio management theory.
Credit Points: 6  Contact Hours: 3 per week

• FNB117 FINANCIAL MODELLING
The development of a basic model within an organisational environment; operation of computer modelling languages; analysis and development of forecasting models; specialist financial models; model development as part of the decision support system.
Prerequisite: FNB111
Credit Points: 12  Contact Hours: 4 per week
FNB120 INTERNATIONAL FINANCE
Foreign exchange; government assistance to exporters and importers; international money markets; risk measurement in foreign exchange; foreign exchange market efficiency; Eurobond and Euronote financing; international capital budgeting; cost of capital in international finance; foreign takeovers and other acquisitions; legislative aspects; accounting issues; taxation issues; international financial economics; transfer pricing.
Prerequisite: FNB1200 and FNB111 (Export Diploma students may be required to undertake additional contact in lieu of FNB100).
Credit Points: 12  Contact Hours: 4 per week

FNB121 ISSUES IN FINANCE
The finance framework; positive versus normative methods; Kuhn's model of progress; the resolution of traditional finance problems including ownership viewpoints; regulation and finance, market failure - the finance solution.
Prerequisite: FNB11, FNB123
Credit Points: 12  Contact Hours: 4 per week

FNB122 MANAGEMENT ACCOUNTING
The nature of management accounting; cost concepts; budgeting and standards for control; cost profit volume analysis; job and process costing; standard costs; direct absorption costing and their applicability to business education.
Prerequisite: AYB110
Credit Points: 12  Contact Hours: 3 per week

FNB123 MANAGERIAL ACCOUNTING 1
Introduction to managerial accounting, the role of the management accountant and cost concepts; costing systems including actual/normal/standard systems under job and process costing; introduction to budgeting; accounting for the factors of production: materials, labour and overheads; extension of basic costing systems for multiple products and spoilage; direct and absorption costing.
Prerequisite: AYB110
Credit Points: 12  Contact Hours: 4 per week

FNB124 MANAGERIAL ACCOUNTING 2
Methods of corporate planning and decision making within the framework of corporate goal achievement; development of management control systems to evaluate segment and managerial performance; responsibility accounting; analysis of cost and management accounting information using formal decision models in relevant costing; pricing and transfer pricing; agency theory and other analysis techniques under certainty and uncertainty.
Prerequisite: FNB123
Credit Points: 12  Contact Hours: 4 per week

FNB125 PERSONAL & CORPORATE FINANCE
The Australian financial environment from both a personal and corporate point of view; goals and functions of finance; methods of project evaluation; evaluation and selection of investment projects, management of working capital; leverage; cash forecasting and cash management; financial statement analysis.
Credit Points: 4  Contact Hours: 2 per week

FNB126 PORTFOLIO & SECURITY ANALYSIS
CAPM; OPM; efficient market hypothesis, financial instruments; risk management
Prerequisites: FNB111, FNB112
Credit Points: 12  Contact Hours: 4 per week

FNB127 MANAGERIAL ACCOUNTING PRINCIPLES
Budgeting, standard costs and variance reporting for manufacturing for non-manufacturing firms; managerial performance reporting, decentralised business operations, and capital budgeting; inventory planning, control and valuation; relevant costs and decision making; project control.
Prerequisite: Accounting Information Systems
Credit Points: 9  Contact Hours: 3 per week

FNN100 ADVANCED CAPITAL BUDGETING
Application of the theoretical constructs developed in undergraduate finance subject to complex problems in investment appraisal. A case study approach is used with the majority of cases being drawn from real situations.
Credit Points: 12  Contact Hours: 3 per week

FNN101 FINANCE HONOURS
An advanced coverage of the theory of financial management, building on work done in the undergraduate course with reference to empirical evidence where available. Topics include capital markets, investment decisions, market equilibrium, the capital asset pricing model, arbitrage pricing theory, capital structure, dividend policy, efficient capital markets. The subject provides a theoretical basis allowing for evaluating policy problems in the area of financial management, a necessary prerequisite for further specialisation in this area.
Credit Points: 12  Contact Hours: 3 per week

FNN102 MANAGERIAL FINANCE
Introduction to the world of finance and financial management. Topics include: the finance function, the role of the financial manager, the Australian financial environment; sources of funds; present and future value; time value of money; financial mathematics; cost of funds, the firm investment decision; investment evaluation techniques; cash budgeting; working capital management; capital budgeting; dividend policy and financial structure policy.
Credit Points: 12  Contact Hours: 3 per week

FNN103 FINANCIAL MODELLING
Modelling as an organisational planning tool; the development and manipulation of databases in order to provide information sources for model building; the use of the modelling concept for solving investment and forecasting problems and analysing performance.
Credit Points: 12  Contact Hours: 3 per week

FNN104 FINANCIAL RISK MANAGEMENT
An advanced postgraduate finance subject which covers four areas of risk management: portfolio risk, investment risk, exchange risk and insurance. Topics include: portfolio theory, performance evaluation, benchmark problems, hedging, portfolio insurance in the crash of 1987, managing exchange risk, risk reduction, self insurance, exchange risk, new tax rules capital international finance; options and derivative products; capital budgeting and capital structure; cash flow analysis.
Credit Points: 12  Contact Hours: 3 per week

FNN105 INTERNATIONAL FINANCE
The theory and practice of international finance including the relationship between domestic and international capital markets, interest rate and exchange rate determination, risk management of foreign exchange, international trade finance, off-
shore investment, legislation, transfer pricing, and accounting and taxation aspects of international finance.

**FNN106 MANAGERIAL ACCOUNTING**

The current research in management accounting. Topics include: costing for product pricing; behavioural implications of costing methods; advanced variance analysis; aspects of agency theory; advanced transfer pricing; structure of the firm and its impact on managerial accounting; contemporary developments.

**Credit Points:** 12  **Contact Hours:** 3 per week

**FNN110 MANAGERIAL ACCOUNTING ISSUES A**

The theoretical issues associated with the design, operation and evaluation of management accounting systems. Topics include: quality development and strategic product development, productivity control, advanced budgeting techniques, program budgeting, and management control systems.

**Credit Points:** 12  **Contact Hours:** 3 per week

**FNN111 MANAGERIAL ACCOUNTING ISSUES B**

The practical managerial accounting issues currently facing contemporary management. Topics include: quality development and strategic product development, productivity control, advanced budgeting techniques, program budgeting, and management control systems.

**Credit Points:** 12  **Contact Hours:** 3 per week

**FNN112 SPECIAL TOPIC - MANAGERIAL ACCOUNTING & FINANCE**

This subject is offered when required and normally examines issues of significance in the managerial accounting and finance areas.

**Credit Points:** 12

**FNN300 ACCOUNTING 2 (PY)**

This subject aims to satisfy the Professional Year syllabus of the Institute of Chartered Accountants in Australia in relation to applied areas of managerial accounting, finance and auditing. The subject builds upon the undergraduate framework in these areas. The topics covered are revised annually by the Institute with a focus on applied practice.

**Credit Points:** 12  **Contact Hours:** 3 per week

**FNN301 MANAGEMENT ACCOUNTING (PY)**

This subject is designed to satisfy an elective topic in the Professional Year program of the Institute of Chartered Accountants in Australia. The syllabus is revised annually and applied advanced managerial topics are included as the profession determines necessary for senior managerial accountants.

**Credit Points:** 12  **Contact Hours:** 3 per week

**FNP101 QUALITY COST ANALYSIS**

Programs in quality assurance related to costing procedures and terminology; quality costs as defined in AS2561; the design and use of cost control systems to conform with the standard.

**Credit Points:** 6  **Contact Hours:** 3 per week

**HMB101 MOVEMENT FOR YOUNG CHILDREN**

Examination of the predisposition of young children towards rhythm in movement and sound; identification of how this might be used to enhance their early education; play elements in relation to the above; situations in which creative learning experiences might emerge; workshops.

**Credit Points:** 4  **Contact Hours:** 2 per week

**HMB102 INTRODUCTION TO HUMAN MOVEMENT**

Rhythmic experiences: range of rhythmic experiences including folk dance, singing games, rhythmic patterns with music and percussion. Games and gymnastics activities; basic skills in games and gymnastics with emphasis on improvisation in play situations.

**Credit Points:** 8  **Contact Hours:** 3 per week

**HMB103 GAMES FOR RECREATION**

Development of the individual skills and techniques of the game; application of the rules and umpiring procedures. Students are expected to participate in two of the following games: volleyball, tennis, squash.

**Credit Points:** 4  **Contact Hours:** 2 per week

**HMB104 PERSONAL HEALTH & FITNESS**

Health; development of a personal health program; issues, techniques and topics of current personal and societal health concerns. Fitness: theoretical basis of physical fitness; appraisal of personal fitness; development of fitness programs; mandatory practical involvement.

**Credit Points:** 4  **Contact Hours:** 2 per week

**HMB105 OUTDOOR PURSUITS**

Opportunities for students to participate in a program of outdoor activities incorporating the basic skills and knowledge necessary for meeting environmental challenges. Physical skills and techniques are presented in a logical progression to ensure safe participation in future outdoor education activities.

**Credit Points:** 8  **Contact Hours:** 3 per week

**HMB106 DANCE FOR RECREATION**

Community dance: development of basic techniques in square, round and bush dancing, latest trends in popular dance. Ballroom dance: basic figures in ballroom dancing such as cha-cha, quickstep, modern waltz. Aerobic dance: rhythmic activities for personal fitness.

**Credit Points:** 8  **Contact Hours:** 3 per week

**HMB107 LEISURE EDUCATION**

Leisure and recreation; leisure and the individual; leisure and society; future directions for leisure; all-of-life sport.

**Credit Points:** 4  **Contact Hours:** 2 per week

**HMB108 TEACHING GAMES & SPORT**

Skill recognition (catching, throwing, striking) development of physical skills; skill analysis and teaching; study of a selected sport; certification in coaching school sports; presentation of a coaching workshop.

**Credit Points:** 8  **Contact Hours:** 3 per week

**HMB201 PHYSICAL EDUCATION 1**

Foundations of growth and development in primary children. Understanding the factors in physical skill development. Knowledge of the content of primary physical education curriculum and processes in teaching such content. Development from basic lesson
planning to comprehensive and sequenced term planning.
Credit Points: 8  Contact Hours: 3 per week

■ HMB202 PHYSICAL EDUCATION 2
Theoretical, practical and organisational requirements of teaching physical education in primary schools. Students cohesively combine elements of the curriculum in fieldwork situations which is germane to preparation of teachers of physical education, both specialist and non-specialists. At the outcome, students will be able to consider the total programming aspects of physical education curriculum holistically.
Credit Points: 8  Contact Hours: 3 per week

■ HMB203 FOUNDATIONS OF PHYSICAL ACTIVITY
The possibilities of improving life through physical activity are unlimited and this foundation subject aims to present all sides of physical education viewed from different vantage points. The concern is with the how and why of human movement, whether this be in the school setting or on the sports field, for competition or for recreation, for enjoyment or for money.
Credit Points: 8  Contact Hours: 3 per week

■ HMB204 PHYSICAL ACTIVITY STUDIES 1
Students study one of the following four strands: the science of physical activity incorporating physiology, anatomy and biomechanical principles which govern the body’s movements in a variety of movement situations; a dance strand which enables students to understand basic dance technique and choreographic principles to encourage the building of confidence in their own ability to move expressively; a sport in society strand which synthesises the philosophical, sociological and cultural forces which have influenced the role and relevance of play, games and sport in society; a motor development and skill acquisition strand which will incorporate theoretical and applied aspects of motor learning in such a way that appropriate methods for meeting the particular needs of each learning situation are developed.
Credit Points: 12  Contact Hours: 3 per week

■ HMB205 PHYSICAL ACTIVITY STUDIES 2
The subject matter is offered in four strands to enable students to gain an indepth knowledge of one of the following: Science of Physical Activity enables students to gain experience assessing the components of physical fitness in the laboratory and then implement these skills in the community; Adapted Physical Activity incorporating designing community programs for handicapped and disabled people; Dance which enables students to acquire the rudiments of a modern dance technique and to relate it to performance, individually or in a group; Sport in Society from a sociological perspective that examines the inter-relationship with other societal institutions in its role as a social force and a cultural phenomenon.
Credit Points: 12  Contact Hours: 3 per week

■ HMB240 HEALTH EDUCATION
An understanding of what is involved in life-long healthy living and the role health education plays in promoting this. Curriculum development in primary school health education and the investigation of selected content areas of the primary school health education curriculum which highlights the importance of attitudes, values, beliefs and practices in the adoption of healthy behaviour.
Credit Points: 8  Contact Hours: 3 per week

■ HMB242 HEALTH STUDIES 2
This level two subject is offered in parallel strands. Students have the option to follow a strand focussing on individual health, or a strand focussing on health as a community issue. Students choosing to follow the individual strand focus on their development of a personal action control as a procedure for maintaining their health. Students choosing to follow the community health strand focus on occupational and environmental health issues in the community. This subject expands some of the issues raised in the level one subject.
Credit Points: 12  Contact Hours: 3 per week

■ HMB243 HEALTH STUDIES 3
This level three subject extends in depth some of the issues addressed in the level one and two subjects. The dual strand developed in the level two subject continues, following an individual or a community focus. In the individual strand the focus narrows to look at the individual health status of children. In the community strand the focus narrows to look at drug issues and their use in Australia.
Credit Points: 12  Contact Hours: 3 per week

■ HMB303 ADOLESCENT HEALTH & LIFESTYLE
An introduction to the health influences and needs of adolescents: importance of a sound personal health foundation during the growing years for the prevention of health problems during adulthood; relationship between genetic and environmental factors that influence the health of children and adolescents; health services in the community used in the promotion of health during adolescence including support groups.
Credit Points: 10  Contact Hours: 3 per week

■ HMB305 PERSONAL HEALTH
Examination of the range of factors influencing personal health including lifestyle and a range of social, economic and environmental factors. The subject takes a holistic perspective on personal health.
Co-requisite: PUB327
Credit Points: 12  Contact Hours: 3 per week

■ HMB309 MOTOR DEVELOPMENT & SKILLS ACQUISITION
Identification of key terms in motor development and skill acquisition; evaluation of different classification systems; classification of skills using a variety of criteria; awareness of different stages of motor development; interpretation of performance curves; theoretical bases of information processing models; analysis of mechanisms involved in skilled performance.
Credit Points: 12  Contact Hours: 5 per week

■ HMB310 PHYSICAL EDUCATION CURRICULUM & TEACHING STUDIES 1
Builds on CUB301 to give a greater understanding of the nature of physical education as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 12  Contact Hours: 5 per week

■ HMB311 ANATOMY & BIOMECHANICS
Recognition of skeletal structures; differences in the structure and functions of human joints, muscle attachment; actions of muscles as related to motor joints; why certain activities are anatomically harm-
ful; mechanical principles of human movement; diagnosis of errors in technique; isolation of basic elements common to a variety of performance skills.

**Credit Points:** 12  **Contact Hours:** 4 per week

### HMB312 EXERCISE PHYSIOLOGY
The structure and function of body systems; key terms and principles relating to specific aspects of systemic physiology; application of general physiological principles to conditions of work; interpretation of a variety of tests and procedures used in evaluating physique, fitness, effects of training and exercise.

**Credit Points:** 12  **Contact Hours:** 5 per week

### HMB313 FOUNDATIONS OF PHYSICAL EDUCATION
Historical events which have shaped developments in contemporary physical education; demonstration of confidence and competence in the communication of philosophical and historical aspects of education and sport; appreciation of the nature and scope of human movement studies, including physical education, leisure and sport.

**Credit Points:** 12  **Contact Hours:** 4 per week

### HMB314 PERFORMANCE SKILLS 1
Application of scientific principles to the analysis and development of techniques for swimming and track and field; performance of all aspects of the major swimming strokes and track and field events; instructional strategies and motivational, conditioning and training activities; development of activity programs for various ability levels; application of event rules; water rescue.

**Credit Points:** 12  **Contact Hours:** 6 per week

### HMB315 PERFORMANCE SKILLS 2
Various game forms; analysis of fundamental game skills; identification of problem areas in skill development; application of relevant skills to suit game situation; application of sport rules; application of relevant strategies for teaching and coaching selected sports for a variety of age groups.

**Credit Points:** 12  **Contact Hours:** 6 per week

### HMB316 PERFORMANCE SKILLS 3
Basic theoretical principles fundamental to the performance and teaching of gymnastics and dance; physical fitness and basic biomechanical principles in the performance of excellence in gymnastics; performance of routines incorporating a variety of gymnastic and dance skills on floor/apparatus; recognition of unsafe practices.

**Credit Points:** 12  **Contact Hours:** 6 per week

### HMB317 OUTDOOR EDUCATION
Appreciation of the value and place of outdoor education in schools and the community; development of proficiency in a number of outdoor pursuits; lightweight, minimum impact camping; leadership skills and safety techniques; the Australian natural environment; promotion of positive attitudes towards natural environments.

**Credit Points:** 12  **Contact Hours:** 6 per week

### HMB318 RESEARCH IN MOVEMENT STUDIES
Data collection, presentation, and interpretation; test design and administration; basic computer programming and analysis; elementary research procedures and design.

**Prerequisites:** HMB309, HMB311 or HMB312

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB319 SPORTS PSYCHOLOGY
The role of the mind in sports performance is being increasingly recognised and a position has been reached where sport psychologists are in evidence wherever important competition is taking place. Psychological factors to be examined include planning for competition, the build up to competition, intervention strategies used during competition and restructuring goals for the next performance. Sports psychology complements the physical aspects of skill and fitness and gives the student a better insight into the total person and the total performance.

**Prerequisite:** HMB309

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB320 PHYSICAL EDUCATION CURRICULUM & TEACHING STUDIES 2
Studied in association with HMB302. Provides opportunities for consideration and practical application of broad curricular teaching principles and systems policies within the more specific context of this curriculum area. As with HMB302, establishes principles which will be used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisite:** HMB310

**Co-requisites:** CUB302, EDB302

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB321 SOCIOLOGY OF SPORT
How sport affects individuals, the local community, and society in general; sport and leisure from a sociological standpoint; commercialism; politics in sport; sport in Australia: origins and development of our sporting ethos.

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB322 ADAPTED PHYSICAL EDUCATION
The causes of short-term and long-term disorders and disabilities from medical and developmental perspectives; procedures for assessing the range of movement and current level of skills; individualised program planning for most disability groups.

**Prerequisite:** HMB309

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB323 SPORT & FITNESS DEVELOPMENT
Practical procedures and laboratory work; testing and evaluating; exercise prescription; design and development of conditioning programs.

**Prerequisite:** HMB312

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB324 ADVANCED SKILL LABORATORIES
Investigation of an advanced theoretical structure and application to a performance activity of their choice.

**Prerequisites:** Compulsory Level 1 subjects in Performance Skills.

**Credit Points:** 12  **Contact Hours:** 3 per week

### HMB325 INDEPENDENT STUDY
Students are required, with guidance, to propose, carry out and report on some achievable enquiry which may take a variety of forms, from a specialised development of previously undertaken subjects to a supplementary option chosen to expand the scope of their studies in human performance and physical education.

**Prerequisites:** Compulsory Level 1 subjects.

**Credit Points:** 12  **Contact Hours:** 3 per week
HMB326 HUMAN PERFORMANCE ANALYSIS
Various methods of conducting performance analysis; deductive and inductive approaches to analysis; analysis of selected activities using observation techniques, video tapes of performance, sequential photographs, film.
Prerequisite: HMB311
Credit Points: 12 Contact Hours: 3 per week

HMB327 COMPUTERS IN SPORT & PHYSICAL EDUCATION
This subject is designed to familiarise students with the benefits of applying microcomputer technology to the teaching of physical education. Throughout the subject students will be introduced to, and provided with, an opportunity to use and evaluate a wide variety of computer software programs which are presently being used by innovative physical educators throughout the world.
Credit Points: 12 Contact Hours: 3 per week

HMB328 COMPARATIVE PHYSICAL EDUCATION
Provides an international perspective; comparative analysis of systems of physical education and sport in selected countries such as the Soviet Union, People's Republic of China, South Africa and Australia; sport issues in the twentieth century.
Prerequisite: HMB313
Credit Points: 12 Contact Hours: 3 per week

HMB329 ANTHROPOLOGY OF PLAY
Play theories and functions of play in society; case studies: Australian Aborigines; North American Indians; Polynesian Societies; play and contest as ritual.
Prerequisite: HMB313
Credit Points: 12 Contact Hours: 3 per week

HMB330 PHYSICAL EDUCATION CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.
Prerequisites: HMB310, HMB320, CUB302
Credit Points: 8 Contact Hours: 3 per week

HMB332 HEALTH RELATED FITNESS
The role of health related fitness in the community and in the school as it contributes to the attainment of optimal health.
Prerequisite: PUB327
Credit Points: 12 Contact Hours: 3 per week

HMB333 CHILD & ADOLESCENT HEALTH
Child and adolescent health and the wide range of factors that impact on health.
Credit Points: 12 Contact Hours: 3 per week

HMB334 FUNCTIONAL ANATOMY & KINESIOLOGY
The relationship between structure and function of the musculoskeletal and nervous systems is explored in relation to human movement and body mechanics; observation and development of techniques necessary for detailed kinesiological analysis.
Prerequisite: HMB311
Credit Points: 12 Contact Hours: 3 per week

HMB335 INDIVIDUAL GAMES & SPORTS
These sports offer a different perspective from team games by demanding a higher level of self-directed involvement. Students will be able to specialise in three sports selected from the range offered which may include activities such as archery, golf, orienteering, fencing, squash and table tennis.
Credit Points: 12 Contact Hours: 4 per week

HMB336 LEISURE & AUSTRALIANS
The need for leisure education and the associated problems of finance, facilities, ignorance and apathy are examined; the concept of leisure-time, activity and value is discussed; current trends and issues in leisure behaviour patterns in Australian society are identified.
Credit Points: 12 Contact Hours: 3 per week

HMB340 SPECIAL PHYSICAL EDUCATION
Disability; cause, etiology and motor or intellectual limitations. Evaluating procedures: use of existing test batteries; designing test batteries for specific purposes. Teaching strategies and skills: designing and implementing programs, using appropriate techniques for specific disability groups.
Credit Points: 8 Contact Hours: 3 per week

HMB410 PHYSICAL EDUCATION CURRICULUM: SECONDARY
Examination of the factors responsible for current physical education curriculum development. Emerging trends are studied to highlight the implications for physical education programs. The subject challenges the student to design a secondary curriculum that reflects current educational trends.
Credit Points: 12 Contact Hours: 3 per week

HMB411 PHYSICAL EDUCATION CURRICULUM: PRIMARY
Philosophical background; growth characteristics of the primary school child with particular reference to their implications for physical education; orientation of physical education into the primary school program; structuring the learning environment.
Credit Points: 12 Contact Hours: 3 per week

HMB440 MOTOR DEVELOPMENT & LEARNING IN CHILDREN
The role of reflexes and early voluntary movements in the development of the child; fundamental patterns of movement (walking, running, jumping, throwing, catching) and their sequential development; development of comprehension and manipulation; theories of motor learning; evaluation of perceptual-motor, sensory-motor and psycho-motor theories.
Credit Points: 12 Contact Hours: 3 per week

HMB441 SOCIOLOGY OF SPORT
Towards a sociology of sport, historical and contemporary perspectives; sport in Australia; Australia's sporting heritage; corruption of sport; control of sport; media and sport; inequality in sport; social issues in sport.
Credit Points: 12 Contact Hours: 3 per week

HMB442 ADMINISTRATION IN PHYSICAL EDUCATION & SPORT
Identification of duties of the administrator; administration theory; leadership styles and conflict resolution; budgeting and money management including sponsorship and fundraising; planning for a range of events; processes and procedures of management. These are discussed against a school and club setting.
Credit Points: 12 Contact Hours: 3 per week
HMP014 SCHOOL HEALTH EDUCATION
Introduction to the field of health education and the roles, functions and areas of responsibility of the health educator; specific focus on nature, scope and place of health education in the total school environment.
Credit Points: 12 Contact Hours: 3 per week

HMP015 SCHOOL HEALTH PROGRAM PLANNING
Planning, implementation and evaluation of school health programs. Analysis of a range of planning models in health education and health promotion.
Prerequisite: HMP014
Credit Points: 12 Contact Hours: 3 per week

HMP420 PHYSICAL EDUCATION CURRICULUM & TEACHING STUDIES A
Development of competencies relevant to the effective planning and teaching of physical education in secondary schools. The most important contribution is to provide a conceptual framework for alternatives in teaching strategies and to give starter plans which can be successfully modified. Particular attention is paid to management and control in the outdoors, safety, maximum participation and teaching for cognition in practical activities.
Prerequisite: Appropriate discipline studies in the undergraduate degree.
Co-requisite: EDP450
Credit Points: 24 Contact Hours: 6 per week

HMP421 PHYSICAL EDUCATION CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning, teaching and learning strategies; examines the role of the teacher in the community and the profession.
Prerequisite: HMP420 Co-requisite: EDP451
Credit Points: 12 Contact Hours: 3 per week

HMP423 OUTDOOR EDUCATION CURRICULUM & TEACHING STUDIES C
This Curriculum C subject provides opportunities for students with an appropriate background to prepare to teach outdoor education. It develops skills and understandings in planning, assessment and teaching and learning strategies, and builds on the general principles of the Curriculum A and B groups of subjects.
Credit Points: 12 Contact Hours: 3 per week

HRB100 ADVANCED ORGANISATIONAL BEHAVIOUR
Investigation and analyses of major organisational behaviour issues undertaken within a context of organisational effectiveness and the quality of work life; analysis of relevant literature; application of concepts via case studies, surveys and/or projects.
Prerequisite: HRB130 or HRN108
Credit Points: 12 Contact Hours: 3 per week

HRB101 ADVANCED TRAINING & DEVELOPMENT
Planning and programming management and supervisory development; career planning, developing a complete training program; advanced training techniques: case study, role play, laboratory training, simulations, games, programmed instruction, computer assisted instruction, individualized learning video and learning; managing the training and development function: planning, organizing staffing, direct controlling: the competencies of a trainer. Experiential and project activities.
Prerequisite: HRB120
Credit Points: 12 Contact Hours: 3 per week

HRB102 ADVOCACY & NEGOTIATION
Preparation and conduct of various types of negotiated industrial cases; preparation of tribunal documentation, preparation and presentation of cases before industrial tribunals.
Prerequisite: HRB114
Credit Points: 12 Contact Hours: 3 per week

HRB103 EMPLOYMENT REGULATION & ADMINISTRATION
Survey of the key legislation, regulations and agreements which impact on work and therefore in personnel management and industrial relations; the consequences of these requirements on the administration of human resources.
Prerequisite: HRB131, HRN104
Credit Points: 12 Contact Hours: 3 per week

HRB104 FOUNDATION HRM COMPETENCIES
The personal and interpersonal competencies (in both cognitive and affective domains) which form the foundations from which a HRM practitioner must operate. It aims to develop knowledge of, and skills in, self-awareness, personal and interpersonal development and interpersonal processes. It emphasises the design of process to achieve outcomes.
Prerequisite: HRB130
Credit Points: 12 Contact Hours: 3 per week

HRB105 HUMAN RESOURCES & THE ORGANISATION
The interface of human resources with the organisation and its requirements; concepts and processes for analysing jobs; human resources planning, job evaluation, performance appraisal and remuneration processes; data. A substantial level of analytical and professional competence is expected in this subject.
Prerequisite: HRB131 or HRN104
Credit Points: 12 Contact Hours: 3 per week

HRB106 INDEPENDENT STUDY IN MANAGEMENT
A review of an organisation by examining some aspects of its management processes and practices; the review leads to the preparation of a report for the organisation.
Prerequisite: BSB102
Credit Points: 12 Contact Hours: 3 per week

HRB107 INDEPENDENT STUDY HRD
This subject enables students to demonstrate a competence in directing their own learning. This is essential for professionals who must subsequently keep themselves up-to-date in their area of expertise. To this end, students either individually or in small groups, within an approved content area, undertake one or several learning activities with the approval of a supervisor. Appropriate activities could include literature review, research (mini-thesis), project, practicum (work placement) or anything else deemed acceptable by the supervisor.
Prerequisite: As determined by the supervisor.
Credit Points: 12 Contact Hours: 3 per week

HRB108 INDEPENDENT STUDY HRM
This subject will enable students to demonstrate an ability to direct their own learning, a key competence for professionals who must subsequently keep themselves up-to-date in their area of expertise. To this end, students either individually or in small groups, undertake one or several learning activities with the approval of a supervisor. Appropriate activities could include literature review, research (mini-thesis),
HRB109 INDUSTRIAL DEMOCRACY
The theoretical basis for the range of industrial democracy schemes which have been developed. In particular, it focuses how such factors as employment relationships; organisation of work and reward systems have been generated.
Prerequisite: HRB114
Credit Points: 12 Contact Hours: 3 per week

HRB110 INDUSTRIAL LAW
The development and role of law in industrial relations in Australia; industrial relations legislation; common law contract of employment; industrial torts; other statute and case law related to the above.
Prerequisite: HRB114
Credit Points: 12 Contact Hours: 3 per week

HRB111 INDUSTRIAL MANAGEMENT
The management process, planning, leading, coordinating, human resources management aspects of communication, motivation, leadership and teamwork, with practical applications to planning and control, personnel relations, job design.
Credit Points: 6 Contact Hours: 3 per week

HRB112 INDUSTRIAL RELATIONS
Structure and development of the industrial relations system in Australia; federal and state conciliation and arbitration systems, authority and extent of jurisdiction; industrial relations issues such as wages, conditions, claims and disputes; role of trade unions, the employers' and employees' representatives, the commission, awards and agreements; acts, regulations and workers' compensation; law of master and servant; strikes and lockouts; public liability insurance; law of professional negligence.
Credit Points: 4 Contact Hours: 2 per week

HRB113 INDUSTRIAL RELATIONS HISTORY
The emergence and development of labour movements and employer groups; the ideas which gave rise to and changed these institutions. Although the focus is on Australian, relevant European and North American experience is included.
Prerequisite: HRB113
Credit Points: 12 Contact Hours: 3 per week

HRB114 INDUSTRIAL RELATIONS INSTITUTIONS
The history, structure, functions and role of the industrial tribunal system in federal and state jurisdictions, employer associations and unions.
Prerequisite: HRB114
Credit Points: 12 Contact Hours: 3 per week

HRB115 INDUSTRIAL RELATIONS POLICIES
Examination of the most significant policies of governments, employer bodies and unions: the development and influence of contemporary policies by these institutions.
Prerequisite: HRB115
Credit Points: 12 Contact Hours: 3 per week

HRB116 INNOVATION & ENTREPRENEURSHIP
An examination of the development of both large and small firms; innovation in existing firms; sources of funds; government support; business planning; writing a business plan.
Prerequisite: BSB102
Credit Points: 12 Contact Hours: 3 per week

HRB118 INTERNATIONAL MANAGEMENT
The management of multinational enterprises; management across national borders and in different cultures; corporate-government relations and conflicting regulations; international marketing; international industrial relations.
Prerequisite: BSB102
Credit Points: 12 Contact Hours: 3 per week

HRB119 INTERVIEWING & COUNSELLING
Development of practical skills in aspects of employment interviewing through an introduction to the theory and principles of interviewing, and supervised experience. The characteristics of the interview situation; the interviewer, the interviewee and their inter-relationships. Interview areas include the personal interview; information seeking and the employee-personnel interview: recruitment, appraisal, disciplinary and exit. Personality theory, guidance, counselling theory and techniques. An emphasis on understanding and practising the human skills required to facilitate the development of others, either in individual interaction or group interaction.
Credit Points: 12 Contact Hours: 3 per week

HRB120 INTRODUCTORY TRAINING & DEVELOPMENT
The knowledge and competencies required of a beginning trainer or an occasional trainer. Appropriate theories and research, and skill development. Major topics include: training in Australia; instructional models and theories of learning; training needs analysis; task analysis process; basic training techniques - the information giving model, the discussion model; training aides/audiovisuals; algorithms; administering a training course; evaluating learning, writing and scoring test items; follow-up training.
Prerequisite: The completion of the equivalent of the first year of the course in which the student is enrolled or Introduction to Management
Credit Points: 12 Contact Hours: 3 per week

HRB121 MANAGEMENT (ENGINEERS)
An introduction to the theory and practice of management, laying a foundation on which to build managerial knowledge and techniques through a lifetime career. Functions of management; planning, organising, leading and controlling presented in the framework of a systems approach to decision making.
Credit Points: 4 Contact Hours: 2 per week

HRB122 MANAGEMENT (CHEMISTS)
An introductory study of management including the functions of management, leadership, motivation and supervision of staff, and employee relations.
Credit Points: 4 Contact Hours: 2 per week

HRB125 MANAGEMENT POLICY & STRATEGY
The process of strategy as applied to modern management in both the public and private sectors. Attention is given to the organisational context, to the processes involved in the formulation of policy and strategy, and the problems associated with moving from advocacy...
to implementation to review and evaluation of organisational performance.
Prerequisites: BSB102, HRB131 or HRN104
Credit Points: 12  Contact Hours: 3 per week

HRB126 MANAGEMENT PROCESSES
The skill domain of management, including self-management; techniques used to assist in the task of managing.
Prerequisite: BSB102
Credit Points: 12  Contact Hours: 3 per week

HRB127 MANAGEMENT THEORY & ISSUES
In consideration of a number of the theories which have been advanced to explain the tasks and roles of managers; recent developments in regard to management and organisational methods as well as some of the issues confronting managers.
Prerequisite: BSB102
Credit Points: 12  Contact Hours: 3 per week

HRB128 OCCUPATIONAL HEALTH & SAFETY MANAGEMENT
The physical working environment and its physical and psychological impact on staff members; major occupational health and safety issues and their management; ergonomics, human-machine interface and physical aspects of job design; competencies in conducting safety audits, designing safety programs and the management of the occupational health and safety functions.
Prerequisites: HRB131, HRN104
Credit Points: 12  Contact Hours: 3 per week

HRB129 OPERATIONS & PRODUCTION MANAGEMENT
Types of production and their implications for management; the management and control of organisational systems; techniques for managing inventories and raw materials, plant layout, work and production scheduling, and quality control.
Prerequisites: BSB104 or HRN104 (may be done as a co-requisite)
Credit Points: 12  Contact Hours: 3 per week

HRB130 ORGANISATIONAL BEHAVIOUR
Introduction to human behaviour in work and other settings; actions designed to enhance individual outcomes: satisfaction, commitment, and the human inputs into organisational outcomes: effectiveness, productivity, attendance, retention, flexibility. It is also foundational material for any client or service orientation to customers of the organisation. The development and application of strategies and practices impinging on the human component of business in the broadest sense, essential to anyone intending to influence the behaviour of others.
Credit Points: 12  Contact Hours: 3 per week

HRB131 PERSONNEL MANAGEMENT & INDUSTRIAL RELATIONS
The broad range of influences that impact on personnel management and industrial relations, and the theoretical and conceptual foundations upon which personnel management and industrial relations is based.
Credit Points: 12  Contact Hours: 3 per week

HRB132 PRACTICE MANAGEMENT
Small business management; the various roles in which small business managers must develop at least rudimentary proficiency. The structure, organisation, finance, planning, control, taxation, marketing, and environmental factors are discussed in order to equip students with basic skills necessary for starting a successful small business.
Credit Points: 4  Contact Hours: 2 per week

HRB133 PUBLIC SECTOR MANAGEMENT
Management and administration in the context of the public sector; public sector enterprises; program evaluation and review; government-business relations.
Prerequisite: BSB102
Credit Points: 12  Contact Hours: 3 per week

HRB134 RECRUITMENT & SELECTION
This subject has an applied focus but draws heavily on conceptual and research foundations and job analysis competencies developed in HRB105. Contextual issues of the legal and social environment as well as labour markets are considered. Recruitment: is examined from the perspective of both the organisation and the individual; recruitment strategies; selection techniques including aptitude and ability testing, work samples, assessment centres and interviews; technical issues including validity, reliability and utility analysis.
Prerequisite: HRB105
Credit Points: 12  Contact Hours: 3 per week

HRB135 SMALL BUSINESS MANAGEMENT
The development of small business; the interface between large and small business; government policy and small business; managing small enterprises; survival strategies; practical techniques and operations.
Prerequisite: BSB102
Credit Points: 12  Contact Hours: 3 per week

HRB136 STRATEGIC HUMAN RESOURCE MANAGEMENT
The capstone of the HRM major; the primary objective is to integrate HR concepts and issues into the wider business and environmental context. In addition, a range of historical features, professional and ethical matters are considered. An experiential approach based in cases and or simulations is adopted.
Prerequisite: Completion of five subjects within the HRM major.
Credit Points: 12  Contact Hours: 3 per week

HRB137 WAGES & EMPLOYMENT
The forces which determine wage and employment levels; the various types of labour markets; collective bargaining and skill formation processes. The relationship between these aspects and industrial relations institutions are addressed.
Prerequisite: HRB131
Credit Points: 12  Contact Hours: 3 per week

HRB138 WORK & SOCIETY
Work and work organisations in industrialised society and their relationship with industrial relations processes and structures. Examination of work, work organisations and relations at work from a range of perspectives. The influence of control over work, work practices and technological change in an industrial relations context.
Prerequisite: HRB131
Credit Points: 12  Contact Hours: 3 per week

HRB140 MANAGEMENT & TECHNOLOGY
Exploration of the links between technical process, product innovation and management structure, policy and practice; emphasising the consequences of changes.
to technologies for the organisation, for example, robotics.

**Prerequisite:** BSB102

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRB142 PERSONNEL MANAGEMENT**

Small business management; the various roles in which small business managers must develop at least rudimentary proficiency. The structure, organisation, finance, planning, control, taxation, marketing, and environmental factors discussed in order to equip students with basic skills necessary for starting a small business.

**Credit Points:** 4  **Contact Hours:** 2 per week

**HRB144 PUBLIC SECTOR INDUSTRIAL RELATIONS**

Examination of industrial relations within the public sector in both Federal and State arenas, in particular the relationship between the various agencies of the state and public sector units.

**Prerequisite:** HRB114

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRB146 SPECIAL TOPIC HRM**

Will be offered as required. The aim of the subject is to permit an in-depth examination of an issue of importance to HRM. Hence, the actual content will vary, depending on the issue under examination.

**Prerequisite:** HRB131

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRB400 CURRENT ISSUES IN MANAGEMENT**

Advanced management issues and practices. Content depends on which management issues are significant at the time and the special expertise of staff, including visiting scholars and distinguished business leaders.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRB401 STRATEGIC MANAGEMENT**

Introduces Honours students to management strategy and decision-making concepts and skills; intended for students who have not completed at least a management minor at undergraduate (those who have need to take the subject Current Issues in Management). Emphasising the strategic viewpoint, the subject includes a critical assessment of: management theory and issues; operational management; and management as a skill domain.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRB402 PUBLIC PERSONNEL MANAGEMENT**

Principles of public sector management; public sector staffing structure; planning; organising/staffing; grievance resolution; review; development; personnel management issues; revision.

**Prerequisite:** EPB100

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRB404 PRINCIPLES OF MANAGEMENT**

Introduction to the concepts, principles and practical techniques involved in managing organisations; strategic and operational planning; the organising function; staffing of organisations; motivation and effective leadership; the dynamics of groups and the management of organisational culture; the design and operation of effective control systems; the management of quality; managing change and conflict.

**Credit Points:** 9  **Contact Hours:** 2 per week

**HRN100 ADVANCED INDUSTRIAL LAW**

Analysis of the legal aspects of a particular industrial relations problem from an Australian perspective; sociological approaches to law; the legislative context of the problem or issue in one or more countries; the international context, eg. ILO conventions, EEC directives, European Court decisions from a legal viewpoint.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN101 ADVANCED THEORY & COMPARATIVISM**

Theoretical basis of industrial relations; international industrial relations and Australian comparisons; a theoretical and comparative issue or problem, eg. union or employer organisation, strikes, health and safety.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN102 INDUSTRIAL RELATIONS METHODOLOGY**

Basic computer skills; data bases and sources of information; a bibliographical exercise; design of a research program; introductory fieldwork.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN103 INDUSTRIAL RELATIONS PLANNING**

The formal planning and framework of industrial relations policies and strategies; the content of industrial relations planning, eg. technology, training, superannuation; the relationship of planning to the political and economic environment, including industrial restructuring, capital formation and investment, employment and productivity.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN104 INTRODUCTION TO MANAGEMENT**

The functions and roles of managers; frameworks of concepts and principles; practical applications of these concepts and principles; the key management functions; areas of planning, organising, staffing, directing and controlling; production/operations management and the management of quality; entrepreneurship and business planning; important problems, opportunities and trends facing managers in Australia analysed from the viewpoint of a range of relevant academic disciplines.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN105 LABOUR-MANAGEMENT RELATIONS**

Employee relations; employee and union action; the role of governments and industrial tribunals; alternative methods and pressures to change traditional Australian systems; the Australian system of labour/management relations; different systems of regulation in the employment area; negotiating skills; the resources required for mobilising change in this area.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN106 MANAGEMENT, TECHNOLOGY & SOCIAL CHANGE**

This subject provides a critical and cross-cultural review of the development of management theory and an analysis of management within complex organisations. The course focuses on managers as participants in an organisational dynamic that is both influenced by and influences such factors as the current state of technology, labour markets, world markets and government and community pressures.

**Credit Points:** 12  **Contact Hours:** 3 per week

**HRN107 ORGANISATIONAL PSYCHOLOGY**

The nature of organisations and the way in which individuals, groups and leaders function within or-
organisations. Theories of organisational structures; the determinants of organisational structure; an examination of climate and culture within organisations. The places of the individual within the organisation and the assumptions underlying the psychological theories which guide the treatment of employees. Traditional and recent developments in leadership theory. The course ends with a consideration of the future of organisations and changes.

Credit Points: 12  Contact Hours: 3 per week

HRP108 PEOPLES IN ORGANISATIONS

The internal operation of organisations and the behaviour of those in them; exploration of a range of theories and models of individual and group behaviour. This exposure encourages students to critically evaluate such theories and models, and their implications for management behaviour.

Credit Points: 12  Contact Hours: 3 per week

HRN110 THESIS

Synthesis and application of studies undertaken in the course. Topic may be taken from any aspect of industrial relations. Formulation of thesis undertaken in conjunction with supervisor and other academic staff.

Credit Points: 144

HRP100 COMPARATIVE INDUSTRIAL RELATIONS

The main structures, processes and contexts relevant to industrial relations in selected industrialised societies; the different ways in which industrial relations has developed and operates.

Prerequisite: HRP101

Credit Points: 12  Contact Hours: 3 per week

HRP102 HUMAN FACTORS IN QUALITY

The relationship between people in the organisation and its technical structure and system, and behavioural concepts applied to the management of quality; intrapersonal, interpersonal and social factors including leadership, motivation, attitudes, values, learning and organisational culture; ergonomics and workplace design and occupational health and safety.

Credit Points: 6  Contact Hours: 3 per week

HRP103 INDUSTRIAL RELATIONS POLICIES

Examination of policy formation in industrial relations at national and local level in areas including wage policies, job security, job design, bargaining structure and union matters.

Credit Points: 12  Contact Hours: 3 per week

HRP104 INDUSTRIAL RELATIONS PRACTICES

Current industrial relations practices and policies; research techniques for industrial relations issues, case research, preparation and presentation; institutional framework of industrial relations practices in Australia.

Credit Points: 12  Contact Hours: 3 per week

HRP105 INDUSTRIAL RELATIONS PROCESSES

Negotiation practices in industrial law; detailed study of law relating to trade unions and employer organisations; current developments in industrial law.

Prerequisite: HRP104

Credit Points: 12  Contact Hours: 3 per week

HRP106 INDUSTRIAL RELATIONS STRUCTURES

The economic and political context pertinent to Australian industrial relations; development of Australian economy, industry structure, labour markets, wage fixation, current economic strategies and policies.

Credit Points: 12  Contact Hours: 4 per week

HRP107 INDUSTRIAL RELATIONS THEORY

Major theoretical approaches to resolution and regulation of conflict in work and employment; theories of collective organisation; bipartite and tripartite schema of labour market regulation and workplace process.

Credit Points: 12  Contact Hours: 3 per week

HRP108 QUALITY SYSTEM MANAGEMENT

Introduction to the role of quality in modern organisations; relation between quality management and strategic management as a total management philosophy; comparative practices in quality: Japan, Europe, North America, and the Pacific Asian Region; implications for Australia; organising for quality: structure, customer focus, technology and leadership, quality planning and quality systems and standards.

Credit Points: 6  Contact Hours: 3 per week

HRP109 MANAGING COMMUNICATIONS FOR QUALITY

The importance of information and two-way communication for the development and implementation of the quality plan; introduction to market research to gain information on customer requirements and its impact on the management of quality; communication as part of a quality process, involving management, other employees, customers and suppliers in the network; consultation and involvement strategies; communication of policy, commitment and objectives.

Credit Points: 6  Contact Hours: 3 per week

HRX100 AUSTRALIAN DEVELOPMENT

Australia’s industrial development; the development of the arbitration system; the growth of the trade union movement; Australia’s changing industrial structure; changing employment trends, new technology, the nature of unemployment, social welfare and the future of work.

Credit Points: 12  Contact Hours: 3 per week

HRX101 INDUSTRIAL RELATIONS & MANAGEMENT

Professionalism in industrial relations; pre-emptive bargaining; enterprise bargaining; alternative strategies; functional specialisations and the division of professional labour.

Credit Points: 12  Contact Hours: 3 per week

HRX102 INDUSTRIAL RELATIONS INSTITUTIONS

An introductory analysis of the theory and practice of industrial relations in which major emphasis is placed on the role of the parties and the bargaining context in Australia.

Credit Points: 12  Contact Hours: 3 per week

HRX103 INDUSTRIAL RELATIONS SKILLS 1

Introduction to industrial relations research; written and oral skills necessary for industrial relations practitioners; research writing and presentation of industrial relations reports.

Credit Points: 12  Contact Hours: 3 per week
HRX104 INDUSTRIAL RELATIONS
SKILLS 2
Vocational skills associated with industrial relations practice; industrial information sources; collection, collation and utilisation of source material; handling industrial situations; meeting law and procedure.
Prerequisite: HRX103
Credit Points: 12 Contact Hours: 3 per week

HRX105 INDUSTRIAL RELATIONS
SKILLS 3
Negotiation processes in industrial relations; duties, responsibilities and skills of negotiators; handling grievances at the workplace; award interpretation; local responsibilities.
Prerequisite: HRX104
Credit Points: 12 Contact Hours: 3 per week

HRX106 INDUSTRIAL RELATIONS
SKILLS 4
Formal advocacy and negotiation; operations within the conciliation and arbitration tribunals; collective bargaining in common law agreements; award creation and variation.
Prerequisite: HRX105
Credit Points: 12 Contact Hours: 3 per week

HRX107 SOCIOLOGY OF WORK
Examination of major theories in the sociology of work; the relationship between the world of work and society; detailed examination of occupations; the labour process and alienation; Australian social structure.
Credit Points: 12 Contact Hours: 3 per week

HRX108 SPORTS ADMINISTRATION
The roles of elected officials; the roles of professional administrators; the relationships between the two groups; managing meetings and committees; liaison with government departments; managing sponsorship; intra-organisational conflicts and negotiation.
Prerequisite: BSB102
Credit Points: 12 Contact Hours: 3 per week

HRX110 WORKPLACE ISSUES
Analysis of policies dealing with current industrial relations issues in the workforce. Australian and overseas initiatives.
Credit Points: 12 Contact Hours: 3 per week

HUB002 CONTEMPORARY SOCIAL ETHICS
Introduction to moral philosophy through an analysis of a range of contemporary issues, eg. uses of technology, genetic engineering, nuclear energy, overpopulation, environmentalism, war, terrorism, civil disobedience, pacifism, racism, sexism, abortion, euthanasia, suicide and sexuality.
Credit Points: 12 Contact Hours: 3 per week

HUB003 PHILOSOPHY & NURSING
A general introduction to philosophical questions and reasoning. Students have the opportunity to examine the ways in which personal beliefs and values impact on the nature of human beings and on nursing practice.
Topics include: the nature of philosophy and political philosophy; the concept of personhood; spirituality and caring; and critical thinking in nursing practice.
Credit Points: 8 Contact Hours: 3 per week

HUB004 PHILOSOPHY & NURSING
Exploration of bioethics providing a foundation for the nursing professional in the handling of moral dilemmas intrinsic to the provision of health care.
Credit Points: 8 Contact Hours: 3 per week

HUB005 SOCIAL ETHICS & HUMAN RELATIONSHIPS
Philosophical and pedagogical issues underpinning the human relationships dimension of classroom practice and school cultures (eg. concept of personhood, the nature of love, power, desire, human rights); consideration of the socio-cultural factors and changes which are generating moral dilemmas in contemporary society; case studies of moral issues and moral decision-making; the ethics of teaching controversial issues and matters such as indoctrination and censorship — all in the context of possibilities of human relationships education within the Queensland education system.
Credit Points: 12 Contact Hours: 3 per week

HUB100 APPROACHES TO CULTURAL STUDIES
Critical evaluation of traditional approaches to literary texts; understanding of major terms and concepts of semiotics, structuralism, post-structuralism; application of concepts in analysis of texts; knowledge of significant writings and cultural theorists.
Credit Points: 12 Contact Hours: 3 per week

HUB101 AUSTRALIAN LITERARY STUDIES
Critical appreciation of various texts from Australia’s literary tradition; impact of social values, political and artistic movements upon literature production and genres; dichotomy of mainstream and marginalised writing in various groups and periods of Australia’s cultural traditions.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week

HUB102 MODERN BRITISH LITERATURE
The novel, poetry and drama from the time of Hardy to the present day; the development of modernism, the influence of T.S. Eliot; changes in the nature of drama with the birth of realism and the conflict created by the anti-novel in any traditional view of a body of literature.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week

HUB103 NINETEENTH CENTURY ENGLISH LITERATURE
The importance of context to critical appreciation of the literature of any age; the varying kinds of relationships that exist between writers and their society in a time of profound social, economic and political change.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week

HUB104 AMERICAN LITERATURE
The literature of America in the twentieth century within its cultural context; significant developments in American literature since the 1920s, with reference to major preoccupations and issues; changes and influences in literary style; the impact of socio-political changes on American writing.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week
HUB105 SHAKESPEARE IN THE ELIZABETHAN WORLD
The literary and intellectual culture of Elizabethan England as a backdrop for the special study of a selection of the dramatic and poetic works of William Shakespeare and, more briefly, the work of some of his contemporaries.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week

HUB108 CLASSICAL & MEDIEVAL LITERATURE
Great works from ancient Greece with reference to Greek art, architecture, religion and philosophy; the development of Latin literature from Ennius to the Silver Age in its historical context; the authorised version of the Bible; Anglo-Saxon literature, old French literature, Dante, Petrarch, Boccaccio, Chaucer, Malory and the Arthurian tradition.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week

HUB109 NARRATIVE & SOCIAL CONTEXT
The role and functions of narrative and story-telling as habitual means of making sense of experienced socio-political issues; myth and the construction of social and psychological realities. Textual analysis of set works in terms of social, cultural and political contexts, and in relation to the ways in which medium of expression, genre and intended audience relate to content.
Prerequisite: HUB100
Credit Points: 12 Contact Hours: 3 per week

HUB111 APPROACHES TO LITERATURE
Introduction to theories and practice of literary criticism and cultural analysis. The subject applies theoretical approaches (including new criticism; structuralism and post-structuralism; Marxist, psychoanalytic and feminist perspectives) to the study of a representative selection of texts chosen from a variety of genres and media.
Credit Points: 12 Contact Hours: 3 per week

HUB200 INTRODUCTION TO CULTURAL GEOGRAPHY
The spatial organisation of world societies, their demographic characteristics, their means of livelihood and interactions with each other; geography viewpoint, cultural diversity; cultural universals; social well-being; perception; diffusion; contemporary affairs.
Co-requisites: HUB201, HUB202
Credit Points: 12 Contact Hours: 3 per week

HUB201 PEOPLE & THE NATURAL ENVIRONMENT 1
The geomorphological systems which are creating the surface of the earth and within which human systems interact; the probable effects of the interaction of human and physical systems.
Co-requisites: HUB200, HUB202
Credit Points: 12 Contact Hours: 3 per week

HUB202 INTRODUCTION TO GEOGRAPHY
The nature and purpose of geography in terms of its conceptual structure and enquiry approaches; technologies, methods, skills commonly used by geographers.
Co-requisites: HUB200, HUB201
Credit Points: 12 Contact Hours: 3 per week

HUB203 PEOPLE & THE NATURAL ENVIRONMENT 2
Global systems; regional patterns of climate, soils, flora and fauna; human influence on global systems, potential effects and mitigation strategies.
Prerequisite: HUB201
Credit Points: 12 Contact Hours: 3 per week

HUB204 AUSTRALIAN GEOGRAPHICAL STUDIES
Consumer versus conserver values; resource development in Australia; distribution and structure of the Australian population; prospects for sustainable agriculture; energy resources, user patterns, future scenarios; industrialisation in Australia, the benefits and costs of technological changes on resource development.
Prerequisite: HUB200
Credit Points: 12 Contact Hours: 3 per week

HUB205 LIVING IN CITIES
The cultural basis of human settlement and the factors that contribute to the nature of modern cities (human perception, economic and political processes, the natural environment); the problems caused by over-crowding, urban decay and the unjust distribution of urban services and facilities in Australian, other Western and Third World cities; principles of town planning; field study.
Prerequisite: HUB202
Credit Points: 12 Contact Hours: 3 per week

HUB206 ADVANCED GEOGRAPHICAL TECHNIQUES
User-oriented mapping; geographical information systems and the structuring of geographical information; computer-assisted mapping; uses of remote sensing; advanced aerial photography; field skills in geography.
Prerequisite: HUB202
Credit Points: 12 Contact Hours: 3 per week

HUB207 ENVIRONMENTAL HAZARDS
The nature of hazard, risk and disaster; origins of hazards; nature of disaster; influences on the perception of risk; disaster prediction, preparation, response and recovery strategies.
Prerequisites: HUB201, HUB203
Credit Points: 12 Contact Hours: 3 per week

HUB208 ASIAN GEOGRAPHICAL STUDIES
Physical and cultural aspects of Asia; transition from traditional societies; the effects of colonialism; the independence movements; alternative approaches to development; traditional and modern agriculture; trends in manufacturing; tourism; urbanisation; cultural conflict and economic power; alternative approaches to development; trade cooperation and dependency as a background to human systems.
Prerequisites: HUB200, HUB503
Credit Points: 12 Contact Hours: 3 per week

HUB209 RESOURCES PLANNING & DEVELOPMENT
The social, economic and political implications of the distribution, management and consumption of resource; evaluation of the impact of resource development on social and economic well-being and environmental quality; clarification of the concept of a just society in terms of resource development.
Prerequisites: HUB201, HUB200
Credit Points: 12 Contact Hours: 3 per week
HUB 300 MODERN POLITICAL IDEOLOGIES

Political values and the political spectrum; the problem with models; right-wing ideologies: liberalism, social democracy; socialism; left-wing ideologies: Marxist socialisms, anarchism; emerging ideologies: feminism, environmentalism; residual ideologies: racism, imperialism.

Credit Points: 12  Contact Hours: 3 per week

HUB 301 AUSTRALIAN STUDIES

Developments in nineteenth and twentieth-century Australia; the Australian legend; Australian nationalism; race relations; federation; foreign policy; Australia's position in the world; the Australian political system.

Credit Points: 12  Contact Hours: 3 per week

HUB 302 THE EMERGENCE OF CIVILISATION

The rediscovery of the ancient past; the growth of archeology; selected case studies of Egypt, Sumer, early Indian and Chinese civilisations.

Credit Points: 12  Contact Hours: 3 per week

HUB 303 THE CLASSICAL WORLD

Greek society: Greece after the dark ages; the emergence of city states; the spread of Greek peoples across the eastern Mediterranean; the development of Athenian democracy; the Peloponnesian War and the decline of the Greek world; the cultural contribution of the Greek world. Roman society; the beginnings of Rome; the early republican government; the struggle for Italy and the western Mediterranean; the breakdown of the republic and the growth of the principate; Rome as master of the Mediterranean; the spread of Christianity; the decline of the empire.

Credit Points: 12  Contact Hours: 3 per week

HUB 304 MODERN CHINA & JAPAN

Historical developments in China and Japan during the nineteenth and twentieth centuries; use of historical evidence to examine commonly held stereotypes of Chinese and Japanese society and to evaluate a variety of explanations relating to the recent history of the area.

Prerequisites: HUB 315, HUB 300, HUB 301

Credit Points: 12  Contact Hours: 3 per week

HUB 305 MODERN INDIA & SOUTH EAST ASIA

Inquiry-based study of the struggles for independence in India and Vietnam; ways in which historians bring different analytical frameworks to bear on historical questions.

Credit Points: 12  Contact Hours: 3 per week

HUB 306 EUROPEAN STUDIES 1

European history: developments and relevance; sixteenth-century Europe: the renaissance, the reformation and Martin Luther; England in the sixteenth and seventeenth centuries; the English Reformation and the English revolution; the French revolution; Napoleon and the Napoleonic legend; nationalism in the nineteenth century; Italian and German unification; the Third Republic of France and the Dreyfus affair; Bismarckian Germany; Europe in 1906.

Credit Points: 12  Contact Hours: 3 per week

HUB 307 EUROPEAN STUDIES 2

Europe before 1912; the origins of World War I; Europe between the wars; the rise of Fascism; Russia and the USSR; the Revolution of 1917 and its consolidation to 1921; World War II; a people's war; the origins of the Cold War; Western Europe: the European Economic Community; Eastern Europe: the USSR; Stalin, Khrushchev, Brezhnev, Gorbachev; Glasnost and Perestroika; Europe in 1992.

Credit Points: 12  Contact Hours: 3 per week

HUB 308 AMERICAN STUDIES

The formative decades; the emergence of the United States and the revolutions of Central and South America; the Monroe Doctrine; expansion across the continent—Canadian and American experiences; the emergence of the United States as a world power; gunboat and dollar diplomacy; American economic imperialism and reactions north and south; the limits to American power.

Credit Points: 12  Contact Hours: 3 per week

HUB 309 WOMEN IN AUSTRALIAN HISTORY

The nature of history as a series of tentative interpretations; the forgotten people of history of which women are one group; how to redress the imbalance and develop women's history; women's history as part of the predominant historical paradigm; women's history as social history; developing women's history.

Credit Points: 12  Contact Hours: 3 per week

HUB 310 HISTORY SEMINAR

The following are examples of topics which could provide the study focus for this subject: philosophies of the social sciences; world systems theory; Pacific Basin studies; Marxism and the social sciences; global studies; development studies; environmental studies; the use of conceptual models in history.

Credit Points: 12  Contact Hours: 3 per week

HUB 311 THE STUDY OF HISTORY

An introduction to some of the key issues inherent in the study of history; the role and importance of history for contemporary society; examination of differing theories of history; the nature of the new history; evaluation of the importance of historical studies in the socialisation process.

Credit Points: 12  Contact Hours: 3 per week

HUB 312 ASIAN STUDIES

Consideration of the nature of traditional Asian societies, the interface between occidental and oriental cultures both historically and in a contemporary context, and the emergence of modern Asian societies. It has been specifically designed for secondary school teachers with limited knowledge of Asia and Asian issues.

Credit Points: 12  Contact Hours: 3 per week

HUB 313 AUSTRALIAN STUDIES

The background to settlement; attitudes and beliefs of early settlers and the extent to which these influenced the development of colonial society; European civilisation and the Aborigines; the origins of an Australian stereotype and development of an ethos; nationalism and federation, Australia between the
wars; Australia since World War II; urbanisation and the rights of the individual.
Credit Points: 12  Contact Hours: 3 per week
■ HUB314 INDONESIA: AUSTRALIA'S NEAR NEIGHBOUR
Influence of the physical environment on population densities and land use systems; ethnic groups, historical survey from pre-European times to independence; agricultural systems; religion; mining and manufacturing; politics since independence; problems for the future; the nature and structure of the Indonesian language.
Credit Points: 12  Contact Hours: 3 per week
■ HUB315 INTRODUCTION TO HISTORY
The nature of history as a discipline; the work of historians; consideration of a specific historical work; using it as a focus for examining other general problems of historical writing and perceptions of history.
Credit Points: 12  Contact Hours: 3 per week
■ HUB317 MODERN EUROPEAN STUDIES
Major aspects of physical geography of Europe; population factors; political institutions and movements; economic activities and institutions; relationships with the rest of the world; current ecological issues; current social issues; political interactions and movements; ecological issues; social issues.
Credit Points: 12  Contact Hours: 3 per week
■ HUB318 EUROPEAN CULTURAL HISTORY
The development of European civilisation from its origins in Greece and Rome; the spread and influence of Christianity; the fall of Rome and the Barbarian invasions; the Middle Ages and the Renaissance; cultural and artistic achievements which find expression in literature, art, music and architecture; the importance of Renaissance Italy on the whole of European culture; the emergence of the great European powers and the development of national thought in the seventeenth and eighteenth centuries; Romantic period and the significance of the French Revolution; the industrial age, the growth of liberalism and the development of national ideas until World War I; developments in the modern age.
Credit Points: 12  Contact Hours: 3 per week
■ HUB319 ASIAN CULTURAL STUDIES
Traditional Asian values and beliefs; impact of these values and beliefs on social structures, decision making, technological development; western colonialism, imperialism and neo-imperialism and their impact on Asian cultures; the emergence of contemporary Asian cultures.
Credit Points: 12  Contact Hours: 4 per week
■ HUB400 FRENCH LANGUAGE 1
Development of the four language skills: listening, speaking, reading and writing; acquisition of knowledge and skills to perform various language functions in a variety of settings.
Credit Points: 12  Contact Hours: 3 per week
■ HUB401 FRENCH LANGUAGE 2
Extension of HUB400.
Prerequisite: HUB400
Credit Points: 12  Contact Hours: 3 per week
■ HUB402 FRENCH LANGUAGE & LITERATURE 1
Development of the four language skills; literary texts where the prevailing ideas are seen to be revolutionary in some way, whether individually, socially, or philosophically (Voltaire, Rousseau, Sartre, Rimbaud, Robbe-Grillet) where language and genre are at issue.
Prerequisite: HUB401
Credit Points: 12  Contact Hours: 3 per week
■ HUB403 FRENCH LANGUAGE & LITERATURE 2
Continuing development of the four language skills; studies in conflict in French literature.
Prerequisite: HUB402
Credit Points: 12  Contact Hours: 3 per week
■ HUB404 FRENCH LANGUAGE & LITERATURE 3
Continuing development of the four language skills; studies in relationships between men and women in French literature.
Prerequisite: HUB403
Credit Points: 12  Contact Hours: 3 per week
■ HUB405 FRENCH LANGUAGE & LITERATURE 4
Continuing development of the four language skills; study of a variety of French texts where there is the possibility of analysing different aspects of the concept of hero or heroine.
Prerequisite: HUB404
Credit Points: 12  Contact Hours: 3 per week
■ HUB406 ITALIAN LANGUAGE 1
Functional development of the four language skills; systematic study of Italian grammar to consolidate language structures.
Credit Points: 12  Contact Hours: 3 per week
■ HUB407 ITALIAN LANGUAGE 2
Extension of HUB406.
Prerequisite: HUB406
Credit Points: 12  Contact Hours: 4 per week
■ HUB408 ITALIAN LANGUAGE & LITERATURE 1
Italian grammar; writing, listening and speaking skills; reading of prose and poetry; reading and performance of a play.
Prerequisite: HUB407
Credit Points: 12  Contact Hours: 3 per week
■ HUB409 ITALIAN LANGUAGE & LITERATURE 2
Difficult aspects of Italian grammar; systematic study of the literature of the Middle Ages.
Prerequisite: HUB408
Credit Points: 12  Contact Hours: 3 per week
■ HUB410 ITALIAN LANGUAGE & LITERATURE 3
Further development of language skills; literature from the Renaissance to the nineteenth century; development of the Italian Language; dialects; Italian spoken by migrants in Australia.
Prerequisite: HUB409
Credit Points: 12  Contact Hours: 3 per week
■ HUB411 ITALIAN LANGUAGE & LITERATURE 4
Further development of language skills; literature from the Renaissance to the nineteenth century; development of the Italian Language; dialects; Italian spoken by migrants in Australia.
Prerequisite: HUB410
Credit Points: 12  Contact Hours: 3 per week
- HUB412 GERMAN LANGUAGE 1
  Development of the four language skills: listening, speaking, reading and writing; acquisition of knowledge and skills to perform various language functions in a variety of settings.
  Credit Points: 12  Contact Hours: 3 per week

- HUB413 GERMAN LANGUAGE 2
  Extension of HUB412.
  Prerequisite: HUB412
  Credit Points: 12  Contact Hours: 3 per week

- HUB414 GERMAN LANGUAGE & LITERATURE 1
  Development of the four writing skills and introduction to some easy modern German literature.
  Prerequisite: HUB413
  Credit Points: 12  Contact Hours: 3 per week

- HUB415 GERMAN LANGUAGE & LITERATURE 2
  In addition to the development of the four language skills, it concentrates on the study of the modern novel.
  Prerequisite: HUB414
  Credit Points: 12  Contact Hours: 3 per week

- HUB416 GERMAN LANGUAGE & LITERATURE 3
  Further development of German language and literature, especially poetry and drama. It introduces students to German radio, cinema and television.
  Prerequisite: HUB415
  Credit Points: 12  Contact Hours: 3 per week

- HUB417 GERMAN LANGUAGE & LITERATURE 4
  Continuing development of language skills; German literature in the past and the history of the German language.
  Prerequisite: HUB416
  Credit Points: 12  Contact Hours: 3 per week

- HUB418 LOTE 1
  Students develop the ability to communicate in Indonesian, Japanese and German in a variety of situations and gain a better understanding of the sociocultural aspects of the target culture.
  Credit Points: 8  Contact Hours: 3 per week

- HUB419 LOTE 2
  This subject focuses on furthering students' proficiency in a LOTE using communicative teaching techniques as outlined in the ALL guidelines. The major emphasis of the teaching program, expressed at an holistic level, relates to communication. Learners should be able to compose and comprehend a LOTE in both written and spoken modes in a range of genres and contexts and at a higher level of complexity than LOTE, Level 1. This is done through lectures, workshops, tutorials and language tapes.
  Prerequisite: HUB418
  Credit Points: 12  Contact Hours: 3 per week

- HUB500 LOCAL COMMUNITY
  The importance of the local community in relation to broader issues of Australian and global citizenship; the sources of data available for local community studies and methods of collating, analysing, synthesising and evaluating data on local communities; the nature of local communities; the problems and issues facing them; the inter-relationship between the local community and broader community groups.
  Credit Points: 12  Contact Hours: 3 per week

- HUB501 INTRODUCTION TO THE SOCIAL SCIENCES
  Principle theories and procedures of the social sciences; problematic nature of evidence and data used by social scientists; the value base of social science knowledge and inquiry.
  Credit Points: 12  Contact Hours: 3 per week

- HUB502 ABORIGINAL & TORRES STRAIT ISLANDER CULTURE STUDIES
  Concepts of culture; Aboriginal and Torres Strait Islander culture: laws, religions, philosophy, social structure, material culture, artistic expression; alternative social stratification, behaviours and values; ritual and ceremonial life, their aspects and importance; contemporary socio-political issues, land rights, health, education, employment and expression.
  Credit Points: 12  Contact Hours: 3 per week

- HUB503 AUSTRALIA & THIRD WORLD ISSUES
  The Third World and Australia; the nature of world poverty; myths surrounding overpopulation; the causes of world hunger; life in shanty towns; the relationship between the arms race and underdevelopment; approaches to development based on self-reliance and global interdependence.
  Credit Points: 12  Contact Hours: 3 per week

- HUB504 CONTEMPORARY GLOBAL ISSUES
  The world economic system; nation states and self-determination; the causes of conflict and the maintenance of peace; international human rights; the ecological crisis; sustainable development; the role of the United Nations and non-government groups.
  Credit Points: 12  Contact Hours: 3 per week

- HUB505 SOCIAL SCIENCE SEMINAR
  The following are examples of topics which could provide the study focus for this subject: philosophies of the social sciences; world systems theory; Pacific Basin studies; Marxism and the social sciences; global studies, development studies; environmental studies; the use of conceptual models in the social sciences.
  Credit Points: 12  Contact Hours: 3 per week

- HUB506 INTRODUCTION TO AUSTRALIAN POLITICS
  Concepts and values which serve as an analytical and explanatory context for studies of Australian society; the major institutions of society, including government at all levels, economic institutions, organisations of employers and workers, extra-parliamentary political groups.
  Credit Points: 12  Contact Hours: 3 per week

- HUB507 CONSUMERISM
  The nature of the consumer society and its underlying values; consumer sovereignty: reality or myth?; the structures and institutions promoting, maintaining and sustaining the consumer society; the implications of consumer society; a consideration of the benefits and costs; visions of a new consumer society; what needs to be done?; alternative visions to the consumer society.
  Credit Points: 12  Contact Hours: 3 per week

- HUB508 PACIFIC ISLAND HISTORY (SINCE 1945)
  National identity and nationhood; western and indigenous attempts to create a regional identity through political, cultural and economic relationships; continuing presence of neo-colonial influences including language, tourism, aid. A study of contemporary
events of importance to Pacific Island people, e.g., militarism, cultural transmission via TV, land rights, independence, sovereignty. Students undertake an independent study of an area covered in the program.

Credit Points: 12  Contact Hours: 3 per week

**IFB080 PROJECT**

Students undertake a project requiring research, investigation or design of some topic or problem of interest to the profession.

Prerequisite: Successful completion of subjects totalling not less than 120 hours of weekly contact time

Credit Points: 24  Contact Hours: 3 per week

**IFB001 ADVANCED INFORMATION RETRIEVAL SKILLS**

This subject provides postgraduate research students with the skills to implement a thorough literature search in their research area and to set up a personal system for managing the references collected. The seven modules which form this subject include: using the QUT libraries; indexing and abstracting services; electronic information retrieval; developing a current awareness strategy; thesis writing; personal file management; evaluating information.

Credit Points: 4  Contact Hours: 1 per week

**IFB222 PROJECT**

Students undertake a project in the area of Quality with the aim of developing a student's capacity for managing his/her own work and for persistence within a prescribed area. The project will normally involve presentation of a seminar in addition to the preparation of a full report. The topic selected will have regard to available expertise and the selected field of special interest to the candidate. In particular, it is expected that project work will be conducted across the wide variety of applications in areas serviced by the course. Most projects will be work-related and will have associate supervision from commercial/industrial sources. It is envisaged that, where appropriate, projects may be jointly supervised by staff of the Schools involved in the course.

Credit Points: 8  Contact Hours: 2 per week

**ISB014 INTRODUCTION TO INFORMATION SYSTEMS**

Basic information system concepts; the utilisation of information; microcomputer packages and equipment; office automation; introduction to SQL.

Credit Points: 12  Contact Hours: 3 per week

**ISB019 SYSTEMS ANALYSIS & DESIGN**

Information systems and their development; the systems development life cycle; project management; structured analysis, design tools and techniques; security and controls; systems documentation; system conversion; testing implementation planning and user training.

Prerequisite: ISB014

Credit Points: 12  Contact Hours: 3 per week

**ISB030 SYSTEMS DEVELOPMENT PROJECT**

The design, development and implementation of a computer-based system; demonstration of the working system.

Prerequisites: ISB019 and subjects as required by supervisor.

Credit Points: 12  Contact Hours: 3 per week

**ISB038 TRANSACTION BASED SYSTEMS**

Transaction processing systems (TPS) requirements; transaction rates, atomic events, multiple access; disk performance, performance tuning; distributed TPS, planning for TPS, capacity planning for TPS.

Prerequisite: ISB089

Credit Points: 12  Contact Hours: 3 per week

**ISB089 COMMERCIAL SYSTEMS DEVELOPMENT**

Production of reliable software; standards and documentation; programming for large systems; managing software development; programming using advanced COBOL.

Prerequisite: ISB095 or ISB014

Credit Points: 12  Contact Hours: 4 per week

**ISB090 DATABASE SYSTEMS I**

Database system architecture; storage structures and database models; relational database systems; relational algebra and calculus; further normalisation theory; advanced use of database languages including SQL.

Prerequisite: ISB014

Credit Points: 12  Contact Hours: 4 per week

**ISB091 INDUSTRY PROJECT**

Individual work related to an application of computers in business or other approved area.

Prerequisite: ISB085 or ISB019 plus subjects as required.

Credit Points: 12  Contact Hours: 4 per week

**ISB093 SYSTEMS PLANNING**

Information system classifications; corporate modelling and data base developments; management of information system development; costing and development strategies; information systems trends.

Prerequisites: (ISB090 or CSB012) or (ISB019 or ISB085)

Credit Points: 12  Contact Hours: 4 per week

**ISB095 COMMERCIAL APPLICATIONS DEVELOPMENT**

Development of algorithms; program design; programming style; structured programming concepts; file processing; report generation; practical programming using COBOL.

Prerequisite: CSB011

Credit Points: 12  Contact Hours: 4 per week

**ISB097 INFORMATION ANALYSIS**

Introduction to database systems; database concepts; conceptual data modelling; normalisation; relational database design and implementation; information analysis; conceptual schema design; data definition languages.

Prerequisite: ISB014 or equivalent

Credit Points: 12  Contact Hours: 4 per week

**ISB098 DATABASE SYSTEMS 2**

Advanced database concepts; performance and reliability criteria; recovery, integrity, concurrency and security; optimisation techniques; distributed database systems.

Prerequisite: ISB090

Credit Points: 12  Contact Hours: 4 per week

**ISB101 APPLICATION SYSTEMS**

This subject examines the way business operates and the nature of business application systems. It also examines the features of some non-business applications. On completion of the subject, students will be able to describe the generalised applications needed to support business; be aware of the need for custom-
develop an abstract model of a real situation, being the first step in the process of creating a computer-based information system. The subject therefore forms a basis for the subsequent development of the concepts associated with the design and implementation of information systems.

Credit Points: 9  Contact Hours: 3 per week

- **ISB102 REPRESENTATION OF INFORMATION**

This subject will provide students with the ability to develop an abstract model of a real situation, being the first step in the process of creating a computer-based information system. The subject therefore forms a basis for the subsequent development of the concepts associated with the design and implementation of information systems.

Credit Points: 9  Contact Hours: 3 per week

- **ISB113 PRINCIPLES OF INFORMATION MANAGEMENT**

An introduction to the core elements of information management emphasising information as an essential organisational resource required by management to meet organisational goals and objectives. The nature and creation of information, storage media, organisation for storage, retrieval techniques, transfer, effects of internal and external environments, security and obsolescence.

Credit Points: 9  Contact Hours: 3 per week

- **ISB180 COMPUTER APPLICATIONS**

Application of technologies in a teaching context; the use of writing and publishing software; graphics design software; numerical software tools; personal and project management tools; communications technologies and computer peripherals used in the production of computer-generated materials.

Credit Points: 12  Contact Hours: 3 per week

- **ISB183 INTRODUCTION TO COMPUTERS IN PLANNING**

The use of computers in planning, including benefits and problems; computing facilities available at QUT, particularly PCs. Overview of computers; problems and advantages of computer use; "hands on" experience in using QUT's computer facilities; gaining access, file structures, information storage and retrieval, editing and related utility functions; flowcharting and programming logic. Simple programming exercises. Spreadsheets and databases. Geographical Information Systems. Word processing on microcomputers.

Credit Points: 4  Contact Hours: 2 per week

- **ISB201 INFORMATION SYSTEMS ANALYSIS & DESIGN 1**

This subject provides a grounding in the methodology and techniques of systems analysis and design.

Prerequisite: ISB102

Credit Points: 9  Contact Hours: 3 per week

- **ISB202 DATABASE & PROCEDURAL LANGUAGES**

The fundamentals and syntax of a procedural computer programming language (eg. COBOL) and its use in the implementation of information systems (in particular database systems). Apart from developing techniques in commercial programming, the subject provides an appreciation of the advantages and disadvantages of a database approach.

Prerequisites: CSB100, ISB102

Credit Points: 9  Contact Hours: 3 per week

- **ISB203 ADVANCED DATABASE**

Relational and network database architectures and the facilities provided by a database management system.

The issues in the database area which impinge on on-line systems design will be discussed and students will be introduced to the relationship between database management systems and 4GL software.

Prerequisite: ISB102 or ISB182

Credit Points: 9  Contact Hours: 3 per week

- **ISB204 INFORMATION MANAGERS AND THE LAW**

The legal environment of computing is examined with reference to protection, intellectual property, copyright legislation and patent processes, computer contracts and crime. Implications of computer data use, with respect to evidence, privacy, freedom of information and flow of data are considered. Use of computers in legal practice and use of legal databases are studied with particular reference to INFO-One.

Credit Points: 9  Contact Hours: 3 per week

- **ISB210 INFORMATION SYSTEMS ANALYSIS & DESIGN 2**

This subject teaches a complete method for developing an information system, from initial analysis of the problem through to a working computer system. Emphasis is given to the practical application of the techniques, using a wide range of real life problems.

Prerequisite: ISB201

Credit Points: 9  Contact Hours: 3 per week

- **ISB214 THE INFORMATION RESOURCE**

Methodologies for analysing information resources within an organisation with particular reference to information mapping techniques; comparisons between institutions that concentrate on one information function and institutions that utilise a range of internal and external functions; the effect of convergent technologies on such use.

Credit Points: 9  Contact Hours: 3 per week

- **ISB215 EXTERNAL SOURCES OF INFORMATION**

This subject encompasses the scanning of the environment using various information sources, technologies, avenues and methodologies. It will also provide practical skills including off-line searching techniques. It will cover the definition of external information sources (personal and recorded); types of information provided by government sources, industrial sources, academic sources and business sources; the publishing industries; storage and retrieval media; computer conferencing.

Credit Points: 9  Contact Hours: 3 per week

- **ISB216 POLITICAL & SOCIAL ASPECTS OF INFORMATION TECHNOLOGY**

The major political and legal aspects of information technology. Government policies relevant to the information industry will be examined and comparisons drawn between policies adopted by different countries. The social consequences of technological convergence with particular emphasis on the changing nature of work and the evolution of the information professions will be discussed.

Credit Points: 9  Contact Hours: 3 per week

- **ISB219 ADVANCED COBOL**

This subject provides students with the opportunity of gaining greater proficiency in writing complex commercial programs in the COBOL language. A major programming project will be implemented to facilitate the above.

Prerequisite: ISB202 or ISB283

Credit Points: 9  Contact Hours: 3 per week
ISB281 INFORMATION SYSTEMS ANALYSIS & DESIGN 1

The methodology and techniques of systems analysis and design; and aims to develop competence in techniques and application of methodologies of information systems development.
Prerequisite: ISB182
Credit Points: 12 Contact Hours: 4 per week

ISB283 DATABASE & PROCEDURAL LANGUAGES

Introduction to the fundamentals and syntax of a procedural computer programming language (e.g., COBOL), examining its use in the implementation of information systems (and in particular database systems). Apart from developing techniques in commercial programming, the subject provides an appreciation of the advantages and disadvantages of a database approach.
Prerequisites: CSB181, ISB182
Credit Points: 12 Contact Hours: 4 per week

ISB290 INFORMATION SYSTEMS ANALYSIS & DESIGN 2

Techniques of analysis and design to further develop competence in methodologies, skills and techniques used by systems analysts. It will teach a complete method for developing an information system, from initial analysis of the problem through to a working computer system. Emphasis will be given to the practical application of the techniques, using a wide range of real life problems.
Prerequisite: ISB281 or equivalent
Credit Points: 12 Contact Hours: 4 per week

ISB300 PROJECT WORK

Students, either individually or in small groups, undertake a substantial six-month project relevant to the needs of industry and designed to give insight into industrial requirements. Each student, or group of students, undertakes a different project and is supervised by a member of staff who provides guidance throughout the project.
Prerequisite: Successful completion of the first two years of Bachelor of Business – Computing/Bachelor of Laws joint degree course.
Credit Points: 12

ISB305 PROJECT

Students, either individually or in small groups, undertake a substantial six-month project relevant to the needs of industry and designed to give insight into industrial requirements. Each student, or group of students, undertakes a different project and is supervised generally by a member of staff who provides guidance throughout the duration of the project.
Prerequisite: Successful completion of at least the equivalent of two-thirds of the normal course program and CMB104.
Credit Points: 12

ISB313 EXPERT INFORMATION SYSTEMS

This subject introduces students to the concept and practice of Decision Support Systems (DSS). It covers foundations architecture and developing DSS; the DSS environment, applications of DSS and the role of DSS in an organisation; end-users and DSS; human factors in DSS; DSS and management information systems; intelligent DSS.
Prerequisite: ISB201 or ISB281
Credit Points: 9 Contact Hours: 3 per week

ISB314 INFORMATION SYSTEMS MANAGEMENT

This subject is designed to develop a knowledge of the functions and practices of management in a computer installation and to give competence in the evaluation and acquisition of a computer system. It will cover the data processing management process; criteria and techniques for selecting computer hardware, software and services; the RFP, project and operations management; site selection, evaluation of computing contracts and professional ethics.
Prerequisite: Completion of two-thirds of the relevant Bachelor of Business course.
Credit Points: 9 Contact Hours: 3 per week

ISB316 INFORMATION SUPPORT SYSTEMS

Methods of describing information for the computer database; introduction to principles of content analysis, vocabulary control and thesaurus maintenance of indexing systems; planning and
implementation of such systems together with database systems and software upgrades by an information centre, along with the establishment of such a centre and its interactions with an organisation.

Credit Points: 9  Contact Hours: 3 per week

**ISB318 STRATEGIC INFORMATION MANAGEMENT**

This subject integrates all learning occurring throughout the Information Management degree in the context of the working environment. The importance of strategic planning by organisations and the contribution of the information manager to this process is stressed. The subject covers methods of intelligence analysis and environmental scanning in support of strategic planning. The value of information to the strategic positions being adopted by the organisations is also covered.

Prerequisite: ISB214

Credit Points: 9  Contact Hours: 3 per week

**ISB350 MINOR STUDIES**

Students will undertake theoretical and/or practical work under supervision. Topics will be related to other coursework.

Credit Points: 3  Contact Hours: 1 per week

**ISB382 MICROCOMPUTER APPLICATIONS**

This subject aims to provide a basic understanding of commercial microcomputer systems as they apply to science. It includes an introduction to three major microcomputer applications; the design and implementation of spreadsheet models and creation of reusable templates; the use of a database management system (DBMS) including design of data files; creation of data views and reports; an introduction to problem definition, solution design and modular programming in connection with the DBMS; understanding the basic capabilities of word processing packages and their applications.

Credit Points: 8  Contact Hours: 3 per week

**ISB385 MICROCOMPUTER SOFTWARE APPLICATIONS**

This subject is designed to provide a basic understanding of commercial microcomputer systems as they relate to applied science. It includes an introduction to three major microcomputer applications; the design and implementation of spreadsheet models and creation of reusable templates; the use of a database management system (DBMS) including design of data files; creation of data views and reports; an introduction to problem definition, solution design and modular programming in connection with the DBMS; and an understanding of the basic capabilities of word processing packages and their applications.

Credit Points: 4  Contact Hours: 2 per week

**ISB393 COMPUTER BASED INFORMATION SYSTEMS**

This subject is designed to introduce engineering students to commercial computer applications. Some time will be spent on introducing systems concepts, file management and database systems. As practical work, the combination of database/spreadsheet package VP-Planner has been selected.

Credit Points: 4  Contact Hours: 2 per week

**ISB493 BUSINESS COMPUTER PROGRAMMING**

This subject introduces COBOL as a business programming language and develops competence in modern commercial programming techniques. It examines programming principles, structured design, fundamentals of COBOL, commercial data processing systems, algorithms for business applications, data structures and file processing. It includes practical projects in COBOL on HP3000 or VAX. (Note: This subject is not compatible with CSB306 or ISB283; credit may not be retained for both.)

Prerequisite: CSB155, ISB892

Credit Points: 12  Contact Hours: 3 per week

**ISB483 DATABASE THEORY & TECHNIQUES**

Logical and physical models of information systems; the characteristics of these models; use of a structured query language to query existing curriculum databases and construct new ones; the sociological implications of the utilisation of public and private databases.

Credit Points: 12  Contact Hours: 3 per week

**ISB865 INFORMATION SYSTEM MODELLING**

Modelling of information systems, in particular relational systems; fact oriented approaches; conceptual schema design.

Pre/Co-requisite: ISB863

Credit Points: 12  Contact Hours: 3 per week

**ISB892 BUSINESS COMPUTING**

This subject provides business students with a practical understanding of computers as used in various business environments and an introduction to the theory of hardware, software, types of processing and data storage methods. The emphasis of this subject is to give business students a thorough understanding of the role of computing in business, the efficient design and implementation of microcomputer software solutions (wordprocessing, spreadsheets and databases) to specific business problems, and an understanding of the implications of computers for business in terms of security, privacy, legal issues and current developments.

Credit Points: 12  Contact Hours: 4 per week

**ISB998 SPECIAL TOPIC - BUSINESS COMPUTING**

**ISB999 SPECIAL TOPIC - BUSINESS COMPUTING**

These subjects are designed to allow for the significant development of, or emphasis in, business computing not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available. See School announcements for full details of special topics being offered.

Prerequisite: Select School announcements.

Credit Points: 9  Contact Hours: 3 per week

**ISN100 INFORMATION SYSTEMS 1**

Advances in information system development approaches and techniques. It examines the theoretical basis underlying current approaches to decision support. A special focus is on the impact on information systems development of increased user involvement.

Prerequisite: ISB201 or equivalent

Credit Points: 12  Contact Hours: 3 per week

**ISN110 FORMAL SYSTEMS SPECIFICATION**

The description of information systems by means of formal languages; the concepts of formal specification, compared to informal specification languages such as structured English. As well as being taught how to formally specify a system, students will be shown how to prove properties of that system, how to
develop an executable implementation of the system and how to prove the equivalence of the two. 

Prerequisite: ISB201, ISB302 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

■ ISN120 DATABASE SYSTEMS
Examines aspects of database performance, data distribution and the special problems of storing unformatted data. Database performance is discussed in terms of query optimisation, whereby access statements, such as those written in SQL, are analysed so that they are executed efficiently. The advantages and disadvantages of distributed databases are presented, covering topics such as whether data should be replicated over a number of sites. Also deals with the special requirements of databases which contain unformatted data, such as text, voice and image data.
Prerequisite: ISB302
Credit Points: 12 Contact Hours: 3 per week

■ ISN130 OBJECT-ORIENTED SYSTEMS
Object-oriented systems as an alternative to traditional procedurally based systems; looks at their benefits and weaknesses, including key concepts of data abstraction and encapsulation and the techniques of inheritance, polymorphism and generality. Students learn to identify and design object classes. Builds competence in selection of strategies appropriate to improved systems design leading to lower long-term maintenance costs.
Prerequisite: ISB210
Credit Points: 12 Contact Hours: 3 per week

■ ISN140 KNOWLEDGE-BASED SYSTEMS
This subject assumes a background in conventional systems concepts, programming and database, and an exposure to fundamental expert systems concepts. It explores four major themes in knowledge-based systems: (a) conceptual: problem selection and structure, inference and knowledge representation; (b) technical: declarative and functional programming; (c) pragmatic: improving the yield from existing information bases; and (d) methodological: questions associated with the definition, design and control of knowledge-based systems.
Prerequisite: ISN110, ISB313 (or equivalent).
Credit Points: 12 Contact Hours: 3 per week

■ ISN150 SPECIAL STUDIES
Students are offered the opportunity to study specific topics which are not dealt with elsewhere in the course and which are seen at the time of offering to be significant to business information systems. The subject takes account of the very dynamic nature of the information systems field in allowing treatment of newly emerged topical areas. It also permits utilisation of new specialist knowledge and skills among the Information Systems staff at the time.
Prerequisite: See School announcements.
Credit Points: 12 Contact Hours: 3 per week

■ ISN160 HUMAN COMPUTER INTERFACE
Addresses the most significant issues and activities of the Human Computer Interface (HCI) and software design; includes the perceptual basis of the presentation of visual information, the basic aspects of visual information processing and facets of representation of knowledge; examines the development of expert systems and how they change the nature of interaction between person and machine and reviews features of interactions with systems, e.g. keyboards through to advanced input modes. On completion of this subject, students should be able to apply principles from the current research in different aspects of HCI interactions and will be aware of future developments possible in this emerging field.
Prerequisite: ISP101
Credit Points: 12 Contact Hours: 3 per week

■ ISN190 COMPARATIVE STUDY OF INFORMATION AGENCIES
Philosophies and modes of information provision which apply in different cultures and countries; comparative methods and studies and an investigation of sources related to information agencies: including both libraries and computer-based information agencies worldwide. Students review and analyse examples of existing studies, services offered by different types of agencies and their community impact, national and international standards of services, the structure of the information professions, professional associations, literature, ethics and legal responsibilities in relation to national information policies and emerging trends in information provision.
Credit Points: 12 Contact Hours: 3 per week

■ ISN200 MAJOR ISSUES IN INFORMATION TECHNOLOGY
Explores aspects of Information Technology of great potential significance to Information Systems professionals, such as the status of information system standards, the extent of integration of computer technology and data communications technology, as well as emerging social and ethical considerations with regard to information technology.
Credit Points: 12 Contact Hours: 3 per week

■ ISN201 RESEARCH METHODOLOGY
Topics of research by agreement between the student and a faculty staff member acting as a project supervisor. Students must attend lectures/seminars of approximately one hour every two weeks (on average). They will also engage in literature search and generally other design aspects of their research project.
Credit Points: 12

■ ISN211 HONOURS PROJECT
This subject is a continuation and completion of the research project initiated for ISN201.
Credit Points: 12

■ ISN220 BUSINESS COMPETITOR INTELLIGENCE
The use of competitor intelligence to enhance effectiveness of business strategies and the various methodologies and analytical techniques for obtaining and using competitor intelligence in support of strategic planning; competitor intelligence and strategic planning; the inter-relationship between intelligence and planning in corporate decision making; the organisation framework; establishing an intelligence collection network; analytical techniques; applications in different strategic environments; and sources and types of competitor intelligence.
Prerequisite: ISB215
Credit Points: 12 Contact Hours: 3 per week

■ ISN240 CLASSIFICATION
The theory and practice of the classification of knowledge and its role in the advancement of knowledge; selected schemes and their applications, research into automated classification and creation of schemes for special situations will be considered.
Prerequisite: ISP432
Credit Points: 12 Contact Hours: 3 per week
■ ISN250 THE INFORMATION INDUSTRIES
The nature of the information industries and information policies; the social and legal issues involved in the expansion of these industries; the information industries in the information economy, public policy, Queensland as an information economy; information industry development abroad, information law, intellectual property, privacy/freedom of information computer crime transborder data flow/sovereignty issues, social justice and equity issues in the information industry and education for the information society.
Prerequisite: ISN201
Credit Points: 12
Contact Hours: 3 per week

■ ISN260 EVALUATION OF INFORMATION SERVICES & ORGANISATIONS
Techniques applicable to the evaluation of libraries and other information centres; including the statistics collected, their usefulness and the means used to collect them as well as non-statistical methods and their value. Previous research will be studied to determine applicable methods and isolate trends, especially those which may have implications for the future.
Prerequisite: ISN201
Credit Points: 12
Contact Hours: 3 per week

■ ISN270 SOCIAL IMPACTS OF INFORMATION TECHNOLOGY
The significant issues in the realm of speculative information systems and technologies; scenarios of information rich/poor interactions within and without organisational environments are examined. Emerging issues in information technology and the implications for information systems and organisational structures are defined and predicted. A compact synthesis for an organisational system, incorporating environmental and societal integration is considered.
Credit Points: 12
Contact Hours: 3 per week

■ ISN280 ORGANISATIONS, SYSTEMS & INFORMATION
The structure of organisations, systems and information; theoretical aspects of environmental and managerial influences are explored and common linkages identified. Socio-technical areas and system failures are defined. Appropriate strategies to deal with system failures are formulated and presented. The role of information in organisations is illustrated and the symbiotic relationship established. This enables interface constraints to be identified and alternative solutions to be proposed.
Credit Points: 12
Contact Hours: 3 per week

■ ISN300 INFORMATION SYSTEMS 2
This subject provides an advanced treatment of contemporary issues of information system development. It deals particularly with the issues of development of corporate information systems.
Prerequisite: ISN100
Credit Points: 12
Contact Hours: 3 per week

■ ISN401 MAJOR PROJECT
Students may undertake a major project as an alternative to minor projects to pursue in depth a topic of interest in keeping with the course objectives. Project topics are to be determined after discussion between the student and a Faculty staff member who will act as supervisor.
Prerequisite: Completion of at least 50 per cent of the Master of Information Technology.
Credit Points: 48

■ ISN500 DISSERTATION
Comprises the undertaking and writing up of a significant piece of research work. The research will examine some aspect of concepts and principles dealt with in the course work components of the program. The research topic will be agreed on following discussions between the student and a Faculty staff member who will act as supervisor. Each student will present a seminar on his or her dissertation topic.
Prerequisite: Completion of at least 50 per cent of the Master of Information Technology.
Credit Points: 96

■ ISP100 THE COMPUTER SYSTEM
An overview of the computer as a tool to be applied to a variety of problems concentrating on applications in commerce; to develop the perception for the process necessary in systems development: software engineering; to develop skills in program development and a basic competence in algorithm development and implementation using PASCAL. It will cover computer hardware and software; an introduction to software engineering; computational linguistics; algorithm development and implementation in PASCAL.
Credit Points: 12
Contact Hours: 3 per week

■ ISP101 DATA DESIGN & PROCESSING
This subject is designed to introduce the theory of data modelling and the techniques associated with development of database solutions for a variety of information problems and in conjunction with the above, to familiarise students with modern post-procedural approaches to database retrieval and manipulation.
Credit Points: 12
Contact Hours: 3 per week

■ ISP113 PRINCIPLES OF INFORMATION MANAGEMENT
An introduction to the core elements of information management emphasising information as an essential organisational resource required by management to meet organisational goals and objectives. The nature and creation of information, storage media, organisation for storage, retrieval techniques, transfer, effects of internal and external environments, security and obsolescence.
Credit Points: 12
Contact Hours: 3 per week

■ ISP200 SYSTEMS ANALYSIS & DESIGN
This subject is designed to give students an understanding of methodologies for undertaking the development of a computer-based business system; to develop competence in the use of a number of techniques of systems analysis and design; to develop understanding of design considerations related to important business application areas; and to extend the understanding of the application of data modelling.
Prerequisite: ISP101
Credit Points: 12
Contact Hours: 3 per week

■ ISP301 ADVANCED DATABASE
On completion of this subject, students should be able to accomplish the following: discuss the functions of a DBMS; describe the relational and network approaches to database construction; describe one DBMS in detail; design a database to support the outputs required of some information system; distinguish between databases and knowledge bases, and
describe the features expected of a 4GL and how they facilitate the use of prototyping.

Prerequisite/Co-requisite: ISP400 (for students in the Graduate Diploma Commercial Computing).
Credit Points: 12 Contact Hours: 3 per week

ISP303 PROGRAMMING
This subject is designed to develop: advanced algorithms and implement these algorithms; structured program design techniques for commercial applications; practical aspects of program testing, debugging and error handling; and competence in the 'C' programming language. The subject will cover structured program design (top-down development); advanced data structures and algorithm development; and sound program development, testing and debugging using PASCAL and C. It includes practical work on VAX, PCs or HP9000.
Prerequisites: ISP100 and ISP101
Credit Points: 12 Contact Hours: 3 per week

ISP313 EXPERT INFORMATION SYSTEMS
The role of expert systems in the commercial area and their impact on business information systems. It provides an understanding of how expert systems could be used in the development of advanced business information systems and gives some practical experience in developing and implementing information systems containing such techniques. It includes discussion on the social implications of expert systems.
Prerequisites: ISB283, ISB290 or ISP200
Credit Points: 12 Contact Hours: 3 per week

ISP314 INFORMATION SYSTEMS MANAGEMENT
This subject is designed to develop a knowledge of the functions and practices of management in a computer installation and competence in the evaluation and acquisition of a computer system. It covers the data processing management process; criteria and techniques for selecting computer hardware, software and services; the RFP, project and operations management; site selection, evaluation of computing resources; the planning and carrying out of contracts and professional ethics.
Prerequisite: Completion of one-half of the Graduate Diploma in Commercial Computing.
Credit Points: 12 Contact Hours: 3 per week

ISP380 QUALITY INFORMATION SYSTEMS
Methodologies and techniques for achieving a high level of quality in business information systems, relating these to broader principles of quality control and quality assurance. Areas covered include: types of information systems; information as a resource; past and current approaches to information systems; decision making based on information systems; analysis and design; prototype concepts; information system modelling.
Credit Points: 6 Contact Hours: 3 per week

ISP381 ADVANCED INFORMATION SYSTEMS
The concept and application of Decision Support Systems (DSS), to study the development and architecture of DSS; and to introduce students to the role and relationship of the user and the organisation to DSS. It covers foundations architecture and developing DSS; the DSS environment, applications and the role in an organisation; end-users and DSS; human factors; DSS and Management Information Systems (MIS); intelligent DSS.
Prerequisite: ISP281
Credit Points: 12 Contact Hours: 3 per week

ISP383 OFFICE INFORMATION SYSTEMS
The development and implementation of information systems in the office context. It includes an assessment of the computer hardware, software and telecommunications products available to support the automated office. The subject is intended to extend students' competence in the design and implementation of data communications networks and to examine techniques and systems contributing to automation of the modern office.
Prerequisite: ITB508 or ITB501 or equivalent
Credit Points: 12 Contact Hours: 3 per week

ISP400 ADVANCED PROGRAMMING
This subject is designed to examine and study the implementation of business information systems in COBOL. It covers a review of programming principles; fundamentals of COBOL; commercial data processing systems; data structures; sequential and random file processing; and includes extensive practical projects in COBOL.
Prerequisite: ISP100
Credit Points: 12 Contact Hours: 3 per week

ISP401 COMPUTER PROJECT
A major project allocated to, or proposed by, the student in any of the specialist areas (covered or otherwise) in the course, e.g. a development of project software implementation, or the solution to a particular problem in computer business applications.
Prerequisite: Completion of six subjects of the Graduate Diploma in Commercial Computing.
Credit Points: 12 Contact Hours: 3 per week

ISP414 LIBRARY SERVICES TO YOUNG PEOPLE
Introduces the most important aspects of library services to children and young adults; covers the evolution of literature with emphasis on the effects of social, political and religious movements on its purposes, form and content; the development of library services in both schools and public libraries; the importance of literary awards; the criteria for selection of resources; the planning and carrying out of programs to promote reading, including effective storytelling.
Prerequisites: ISP431, ISP433
Credit Points: 12 Contact Hours: 3 per week

ISP419 GOVERNMENT DOCUMENTS
The production, acquisition and organisation of government documents and issues related to their use. Topics include why governments publish, the range of subjects, the value of government information, bibliographic control, freedom of information commercialisation/privatisation of government information, and organisation of government document collections.
Prerequisite: ISP433
Credit Points: 12 Contact Hours: 3 per week

ISP427 SPECIAL TOPIC - LIBRARY SCIENCE
This subject is designed to allow for significant development of, or emphasis in, library science not dealt with in other course subjects. Selected topics and
study areas will be offered as required and when the necessary expertise is available.

Prerequisite: See School announcements.
Credit Points: 12  Contact Hours: 3 per week

\[ ISP428 \text{ FIELD EXPERIENCE} \]
This subject is designed to give students an opportunity to participate in the day-to-day work of a library at a beginning professional level. Students are required to undertake work at a level appropriate to beginning professionals in two approved libraries for a total period of 30 working days. During this period, they should have substantial experience in at least two different areas of library work under the supervision of professionally qualified librarians.
Prerequisite: Completion of 50 per cent of other subjects.
Credit Points: 4

\[ ISP431 \text{ COLLECTION BUILDING & ACQUISITIONS} \]
The concept of information and its relationship to information resources and needs; the various formats by which information is communicated are compared and appropriate selection criteria discussed; the characteristics of the book and other media trades, and the means by which these media are acquired; collection building to meet the needs of the needs of the immediate clientele to be served and of the wider Australian community. Other topics include procedures for keeping collections current, evaluating their usefulness and the legal and ethical dimensions of collection building.
Credit Points: 12  Contact Hours: 3 per week

\[ ISP432 \text{ ORGANISATION OF KNOWLEDGE} \]
The organisation of knowledge in libraries and information agencies. Emphasis is placed on the description, classification and subject analysis of information in print media using AACR2 (1988 revision), DDC, and LCSH. Other related topics will be mentioned briefly, eg. LCC, MARC, ABN, and other cooperative efforts.
Credit Points: 12  Contact Hours: 3 per week

\[ ISP433 \text{ INFORMATION SOURCES & SERVICES} \]
Interpersonal communication, the reference interview and search strategies, and general and Australian reference tools; National Information Policy, reference theory and service, communication and the reference interview, search strategies, lead-in tools, general reference tools, government documents, resources in the humanities, social sciences, science and technology, user pays, document delivery, microcomputers and reference work.
Credit Points: 12  Contact Hours: 3 per week

\[ ISP437 \text{ SPECIAL TOPIC - LIBRARY SCIENCE} \]
This subject allows for the significant development of or emphasis in, library science not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available.
Prerequisite: See School announcements.
Credit Points: 8  Contact Hours: 2 per week

\[ ISP441 \text{ ON-LINE INFORMATION SERVICES} \]
Teaches students to act as the interface between users and information they may require, using a variety of available resources, systems, and technologies; includes development of on-line information services, database producers, search strategies, services offered by major vendors, in-house systems (including CD-ROM) and trends and issues in computer assisted retrieval of information.
Prerequisite: ISP101
Credit Points: 12  Contact Hours: 3 per week

\[ ISP442 \text{ LIBRARY PROGRAMS MANAGEMENT} \]
Patterns of administrative organisation in libraries; authority relationships and the nature of the library as a bureaucracy; position classification and personnel administration; the management of library finances; applications of computer technology in library management; change in organisations; the management functions of planning, organising, staffing, directing, and controlling; the concepts of leadership and professionalism.
Credit Points: 12  Contact Hours: 3 per week

\[ ISP451 \text{ ADVANCED ORGANISATION OF KNOWLEDGE} \]
The organisation of knowledge in libraries and information agencies. Topics include description of selected non-print media, enumerative and faceted classifications, special classifications, problems with alphabetical subject indexes and automated indexing.
Prerequisite: ISP432
Credit Points: 12  Contact Hours: 3 per week

\[ ISP452 \text{ INDIVIDUAL STUDY} \]
Students can pursue in depth a personal interest in library science not covered by the Graduate Diploma core or other elective subjects. On completion of this subject, students should be able to demonstrate a detailed knowledge of the area chosen.
Prerequisite: To be determined by the nature of the study.
Credit Points: 8  Contact Hours: 2 per week

\[ ISP453 \text{ INTRODUCTION TO RECORDS MANAGEMENT} \]
An introduction to records management theory, techniques and trends. Topics include the history and role of records management and the creation, control, organisation, maintenance, disposition and evaluation of records.
Credit Points: 8  Contact Hours: 2 per week

\[ ISP454 \text{ LIBRARY PROGRAMS & SERVICES} \]
An introduction to the evaluation of users' informational needs and the development of library programs and services to meet the needs of special groups in the community, eg. young people, elderly people, disabled people, ethnic minorities, business people, etc.
Credit Points: 8  Contact Hours: 2 per week

\[ ISP411 \text{ BOOKS & PUBLISHING} \]
Artistic and historical evolution of the book; judgment of book format through an understanding of production processes; techniques of printing; elements of the book; complexities of the publishing business, past and present.
Credit Points: 12

\[ ISP455 \text{ MICROCOMPUTER APPLICATIONS} \]
Introduction to the applications of microcomputers in a business environment; hardware and software components of a microcomputer system; operating system functions; database management systems and spreadsheets; trends in microcomputer technology and applications.
Credit Points: 12  Contact Hours: 3 per week
ISX026 COMMERCIAL PROGRAMMING
This subject is designed to allow for significant development of, or emphasis in, commercial computing not dealt with in other course subjects. Selected topics and study areas will be offered as required and when the necessary expertise is available.
Prerequisite: See School announcements.
Credit Points: 12 Contact Hours: 4 per week

ISX027 SYSTEMS ANALYSIS
Systems in business; overview of system analysis and design; system life cycle; tools and techniques of systems analysis; communication; file organisation and design.
Prerequisite: CSX025
Credit Points: 12 Contact Hours: 4 per week

ISX029 MICROCOMPUTERS: HARDWARE & APPLICATIONS
Overview of microcomputer systems; microprocessors; operating system functions on microcomputers; application packages and programming on microcomputers; evaluation and selection.
Prerequisites: CSX025, CSX035
Credit Points: 12 Contact Hours: 4 per week

ISX032 DATABASE SYSTEMS 1
Overview of database management systems; relational model; functional analysis of database management; database management; practical work involving database systems and query languages.
Prerequisite: CSX025
Credit Points: 12 Contact Hours: 4 per week

ISX033 DATABASE SYSTEMS 2
Analysis of organisations and their information needs; design, implementation, management and evaluation of an information system; fourth generation techniques in the development of information systems.
Prerequisite: ISX032
Credit Points: 12 Contact Hours: 4 per week

ISX034 PROJECT
Individual work related to an application of computers in business or other approved area.
Prerequisites: ISX027 and other subjects as required.
Credit Points: 12

ISX036 SYSTEMS DESIGN
Structured design techniques; tools and methods of design; large system construction and implementation; project management and control; implementation and maintenance issues; alternative design methodologies and strategies.
Prerequisite: ISX027
Credit Points: 12 Contact Hours: 4 per week
Designed to coordinate the practical aspects of the lecture material presented each semester so that students develop both essential practical skills and benefit from cross fertilisation of the individual subjects. The importance of all aspects of personal communication will be emphasised throughout and students will also be encouraged to perceive the social implications of computing activities and systems.

Co-requisites: Core topics in appropriate semester.
Credit Points: 6 Contact Hours: 2 per week

ITB600 PRACTICE 3 (CS28)
ITB601 PRACTICE 3 (IS10)
ITB602 PRACTICE 3 (IS43)
ITB603 PRACTICE 1 (IT32)
ITB653 PRACTICE 2 (IT32)
ITB650 PRACTICE 4 (CS28)
ITB651 PRACTICE 4 (IS10)
ITB652 PRACTICE 4 (IS43)
ITB602 PRACTICE 5 (CS28)

Designed to coordinate the practical aspects of the lecture material presented each semester so that students develop both essential practical skills and benefit from cross fertilisation of the individual subjects. The importance of all aspects of personal communication will be emphasised throughout and students will also be strongly encouraged to perceive the social implications of computing activities and systems.

Co-requisites: Core topics in appropriate semester.
Credit Points: 12 Contact Hours: 4 per week

ITB900 INDUSTRIAL TRAINING EXPERIENCE

Consists of a one-year work experience program. For more information about this program, see the 'Information for All Information Technology Students' at the front of the Faculty's Handbook entry.
Credit Points: 18

ITN311 ADVANCED DATA COMMUNICATIONS

This subject deals with advanced material in data communications. Topics covered include data communications network design and management (techniques and case studies); performance modelling of communications networks; comparative evaluation of data communications products and services; data communications software design and implementation; provision of integrated communications services (voice, data, video, etc.); network security; communications industry policy (eg. deregulation vs regulation).

Prerequisite: INB270 (or equivalent)
Credit Points: 12 Contact Hours: 3 per week

ITN502 COMPUTER SECURITY

Ensures that students recognise the requirement to design, implement and manage facilities in a manner consistent with an overall organisational security policy. Development of security plan; risk analysis; access control; cryptography; network security and encryption; key management; database security; secure operating systems and access control. On completion of this subject, students should be able to incorporate security and management controls into information systems in accordance with a formal risk analysis and assessment for the system.
Credit Points: 12 Contact Hours: 3 per week

ITN550 COMPUTER SECURITY RISK MODELLING

The tasks of identifying, valuing and securing data assets are fundamental to modern information systems security. Those tasks are explored in terms of the current state of computer risk model research and implementation. Several traditional models are compared to demonstrate sources of data for model development: asset identification and evaluation, threat, vulnerability and dependency analysis, and collection of supporting data. Students are introduced to modern risk modelling software and techniques, and are guided in the adoption of appropriate standards and methodologies.

Prerequisite: ITN502
Credit Points: 12 Contact Hours: 3 per week

ITP501 DATA COMMUNICATIONS

The role of data communications in a modern computing environment. It examines in some detail aspects of the design, implementation and management of data communications networks. Topics to be discussed include basic telecommunications concepts, communications protocols, the ISO reference model for open systems interconnection, wide area networks, local area networks and communications network security.

Prerequisite/Co-requisite: CSP112 or ISP100
Credit Points: 12 Contact Hours: 3 per week

JSB101 CONTEMPORARY ISSUES IN AUSTRALIAN SOCIETY

Perspectives in sociology, major approaches in sociology; social structures: ethnicity, racism, aboriginality, patriarchy, feminism, the family, family violence; economic organisation: international and local economic activity; class, wealth, poverty, work; the environment; the future.
Credit Points: 12 Contact Hours: 3 per week

JSB102 SOCIAL ETHICS & THE JUSTICE SYSTEM

The ethical domain, the significance of ethics for the criminal justice system. The topics addressed are: what is ethics?; what is justice?; justice reasoning; human rights; an ethic of care; an ethic of empowerment; criminal justice work; the role of the police; the ethics of punishment and correction; being ethical.
Credit Points: 12 Contact Hours: 3 per week

JSB103 INTRODUCTION TO THE LEGAL SYSTEM

Law and society; development of the Australian legal system; sources of our law; statutory interpretation; dispute resolution; a critical perspective of the legal
system; introduction to the criminal justice process; investigation, adjudication and corrections; disadvantaged groups; the criminal justice process post-Fitzgerald.

Credit Points: 12 Contact Hours: 3 per week

- **JSB104 COMMUNICATION FOR JUSTICE PROFESSIONALS**
Methodology and techniques in communication: emphasis on application in the law enforcement and justice professions; feelings; perception and analysis; interpersonal communication: cultural and ethnic minorities; Aboriginal people; special needs groups; interviewing: theory and practice; practical, oral and written tasks.

Credit Points: 12 Contact Hours: 3 per week

- **JSB105 PERSONAL & INTERPERSONAL RELATIONSHIPS**
Self-concept, self-esteem, self-image and their relationships to personal styles; expression formation; interpersonal effectiveness and self-disclosure including related skills application; human sexuality as a central force in interactional situations; co-dependency, assertion and component skills development; conflict resolution; negotiation and aggression; conflict negotiation and the legal system; suicide; associated issues, skills development and application.

Prerequisite: JSB104

Credit Points: 12 Contact Hours: 3 per week

- **JSB106 HUMAN RESOURCE MANAGEMENT IN JUSTICE ADMINISTRATION**
Understanding of organisations; structure of organisations; behaviour of individuals within organisations; selected management practices and techniques within the major institutions which make up the criminal justice system.

Credit Points: 12 Contact Hours: 3 per week

- **JSB107 INTRODUCTION TO CRIMINOLOGY**
Legal and criminological conceptions of crime: nature, scope and objects of criminology. Criminological theory; classical and neo-classical theories; the positivist school; physical and biological factors and theories; psychological and psychiatric explanations; crime as a social phenomenon; radical or critical criminology. Key issues in criminology; juvenile crime; Aboriginals in the criminal justice system; Royal Commission into Aboriginal Deaths in Custody; reforming the correctional system; impact of incarceration on offenders; victims of crime; white-collar and corporate crime; privacy.

Credit Points: 12 Contact Hours: 3 per week

- **JSB110 INTRODUCTION TO PROFESSIONAL STUDIES: POLICE SYSTEMS**
The history of policing dating from 18th century England, through colonisation in Australia to the present day; the role and function of policing and its transitions; community-based policing and a comparative view of selected policing jurisdictions.

Credit Points: 12 Contact Hours: 3 per week

- **JSB111 INTRODUCTION TO PROFESSIONAL STUDIES: INTELLIGENCE SYSTEMS**
Determining thinking and learning styles; development of metacognitive skills; the meaning and principles of intelligence and protective security; producing intelligence through collection management, collation, evaluation, integration, analysis and interpretation of data; dissemination of the intelligence product; application of personal and interpersonal skills.

Prerequisites: JSB101, JSB102, JSB103, JSB104 (or equivalent).

Credit Points: 12 Contact Hours: 3 per week

- **JSB201 PRINCIPLES OF CRIMINAL LAW I**
History and theory of criminal law; the role of criminal law and concepts of justice; concepts in criminal law; comparative criminal law; development and administration of criminal law in Queensland; legal research.

Prerequisite: JSB103

Credit Points: 12 Contact Hours: 3 per week

- **JSB202 CONTEMPORARY ISSUES IN AUSTRALIAN SOCIETY 2**
Theory and practice of social research; development of theory; applying social theory; main trends in sociological thought; social justice issues.

Prerequisite: JSB101

Credit Points: 12 Contact Hours: 3 per week

- **JSB203 HUMAN DYNAMICS: THE JUSTICE SYSTEM**
Human factors and crime evolving personality; inherited factors, morality and moral development, human dynamics and the police focusing on perception, recognition and identification; human dynamics in relation to the courts including the concepts of memory and its effects on evidence, eye witness testimony, juror selection and reliability, and reaching a verdict – the process and consensus; human dynamics and crime prevention, focusing on offender rehabilitation and individual and societal reactions to them, changing the environment by reducing opportunities for crime, increasing risks of detection, and community education.

Prerequisite: JSB105

Credit Points: 12 Contact Hours: 3 per week

- **JSB204 PRINCIPLES OF CRIMINAL LAW 2**
Issues and problems of justice in contemporary criminal law: parties, proof, intent, responsibility, defences; the Queensland Criminal Code; legal research.

Prerequisite: JSB201

Credit Points: 12 Contact Hours: 3 per week

- **JSB205 CRIMINOLOGY 2**
Contemporary criminological constructs and debate; theories of punishment and sentencing; reforming the criminal justice system.

Prerequisite: JSB107

Credit Points: 12 Contact Hours: 3 per week

- **JSB210 PROFESSIONAL STUDIES 1: LAW ENFORCEMENT PROCEDURE & PRACTICE**
Aspects of the role and function of policing; enforcement practices: non-arrest, arrest situations including supporting documentation; evidentiary sources and gathering methodology; crime trends and their impact on policing practices.

Prerequisite: JSB110

Credit Points: 12 Contact Hours: 3 per week

- **JSB211 PROFESSIONAL STUDIES 1: INTELLIGENCE 1**
Detailed study and application of the intelligence process (cycle); study of intelligence support to operational staffs and organisations; strategic, operational and tactical concepts of intelligence and security; threat and risk assessment relative to protective...
security - personnel, materials and infrastructure; industrial and commercial espionage and sabotage.
Prerequisite: JSB111 (or equivalent)
Credit Points: 12  Contact Hours: 3 per week

- JSB212 PROFESSIONAL STUDIES 2: LAW ENFORCEMENT & INTERPROFESSIONAL COOPERATION
The role and function of policing in conjunction with other community agencies, particularly emergency service agencies; the cooperation necessary and the awareness of reciprocal roles and functions in given situations.
Credit Points: 12  Contact Hours: 3 per week

- JSB213 PROFESSIONAL STUDIES 2: INTELLIGENCE 2
The conduct of protective security audits in personnel, material and infrastructure areas; application of protective security to conferences, VIP protection and witness protection; access control and layered security.
Prerequisite: JSB211
Credit Points: 12  Contact Hours: 3 per week

- JSS001 THE LAW & LEGAL INSTITUTIONS
This subject will provide students with a sound knowledge of relevant legal institutions and procedures, as well as assist students to develop an ability to analyse and critique both the strengths and weaknesses inherent in our legal system. In so doing, the subject will trace the development of law in Australia from its early beginnings to the present, as an outcome of meeting the needs of a changing society.
Credit Points: 12  Contact Hours: 3 per week

- JSS005 INDIVIDUAL LEGAL RESPONSIBILITIES
The major areas of law affecting a person upon attaining the age of eighteen years. The main areas considered in terms of individual legal responsibilities will be employment, family responsibilities, and the renting and buying of a house. Consideration is also given to the social context in which various statute laws are embedded.
Credit Points: 12  Contact Hours: 3 per week

- JSX101 REPORTING 1
Introduction to basic computer-compatible machine shorthand theory and elementary court, literary and parliamentary material; the functions and responsibilities of professional court and parliamentary reporters in public and private sectors.
Credit Points: 24  Contact Hours: 10 per week

- JSX102 REPORTING 2
Consolidation and reinforement of the machine shorthand theory learnt in JSX101. Emphasis is placed on speed development and vocabulary expansion. Students are instructed in court and parliamentary reporting techniques and procedures, and are introduced to legal, medical and technical terminology.
Prerequisite: JSX101
Credit Points: 36  Contact Hours: 14 per week

- JSX201 REPORTING 3
The emphasis is on speed development and court and parliamentary reporting practices. Students are exposed to a broad range of subject matter and gain experience in reporting material from many jurisdictions. Students develop familiarity with medical terminology and with a large range of specialised terms used in areas of diverse interest.
Prerequisite: JSA102
Credit Points: 36  Contact Hours: 16 per week

- JSX202 REPORTING 4
Further development and refinement of students' high-speed shorthand writing and transcription skills. Students concentrate on multi-voice testimony and note editing for parliamentary work. For successful completion of the subject, students must obtain a machine shorthand writing speed of 200 wpm with 98% transcription accuracy.
Prerequisite: JSX201
Credit Points: 24  Contact Hours: 12 per week

- JSX203 WORKPLACE EXPERIENCE
Students use the reporting skills developed in earlier semesters in an on-the-job context in the State District and Supreme Courts, and Queensland Parliament. Lectures cover development of interpersonal skills in the work environment and include orientation sessions at the Court Reporting Bureau and State Hansard. Students alternate between reporting at the Court Reporting Bureau and Hansard, and participating in transcription sessions on campus.
Prerequisite: JSX201  Co-requisite: JSX202
Credit Points: 12  Contact Hours: 6 per week

- LAB002 ADULT LITERACY
Introduction to adult literacy and provisions for further training; teaching and working with clients under the supervision of the lecturer, reflecting on each teaching session with the client.
Credit Points: 8  Contact Hours: 3 per week

- LAB003 STUDY OF LANGUAGE
Examination of the development of English with a view to increasing the teacher's understanding of how language works, particularly in the written mode; studies of the developing grammars and vocabulary of English are undertaken to enhance the teacher's knowledge of linguistic terminology and to contribute to improved understanding of writing; introduction to traditional grammar and to the modern functional grammars; considerations of usage and style.
Credit Points: 4  Contact Hours: 2 per week

- LAB004 LANGUAGE & COMMUNICATION
The nature and function of language and communication; characteristics of the English language; language variation and English; the role of language in social control and persuasion; communication in a multicultural society; discourse analysis.
Credit Points: 8  Contact Hours: 2 per week

- LAB005 STORYTELLING IN VARIOUS MEDIA
Function of storytelling with young children; selecting stories to tell from a range of traditional, contemporary story and non-story sources; storytelling techniques; planning storytelling across the curriculum.
Credit Points: 8  Contact Hours: 2 per week

- LAB223 LANGUAGE EDUCATION 1
Language as a cultural and social phenomenon; language in terms of cultural and social situations which generate oral, written and media texts; the different cultural values of texts. The language learner and user; the aim of language education. Students as language users: competency as a language user; reflection on effectiveness and appropriateness of language use; application of competencies in the classroom.
Credit Points: 8  Contact Hours: 3 per week
LAB230 LANGUAGE EDUCATION 2
Extension of the language concepts developed in LAB223 and introduction to language teaching. Focus of the school setting with an emphasis on the design, implementation and evaluation of effective language programs in schools.
Prerequisite: LAB223
Credit Points: 12  Contact Hours: 3 per week

LAB260 LITERATURE & EDUCATION 1
Study of a range of adult literature from different sociocultural contexts. Adolescent and children’s literature; reflecting changing sociocultural values. Examination of ways in which historical changes in concepts of childhood are reflected in stories written for children. Aspects of literature which remain constant and examination of some of these archetypes in traditional and contemporary literature.
Credit Points: 8  Contact Hours: 3 per week

LAB261 LITERATURE & EDUCATION 2
Continuation of LAB260. Exploring how the language of childhood experiences and everyday interaction are translated into art forms in novels, plays and poetry. Examination of how the literature of different times and different cultures reflects the appropriate culture. Students have the opportunity to concentrate on the study of literature or on the development of their own writing.
Prerequisite: LAB260
Credit Points: 12  Contact Hours: 3 per week

LAB262 LITERATURE & EDUCATION 3
This advanced subject requires students to use the work done in previous subjects in three ways: to engage in an area of specialised study not completely covered in earlier subjects; to select an aspect of their specialised study for independent reading and research over a range of genres and styles; and to present their work to their peers in a seminar format.
Prerequisite: LAB261
Credit Points: 12  Contact Hours: 3 per week

LAB270 LOTE EDUCATION
The development of classroom applications, strategies, resources, evaluation techniques for the teaching of languages other than English, through an application of knowledge from prerequisite subjects.
Prerequisites: LAB223, LAB230
Credit Points: 8  Contact Hours: 3 per week

LAB271 LOTE 3
At this level students are able to deal with more complex sociocultural information. In addition they broaden their target language resource as well as develop an ability to use it; use more complex language structures and broader vocabulary; develop fluency; expand and fine-tune registers, genres, etc. and develop more theoretical/abstract discourse as the need arises in activities related to content within their conceptual range.
Prerequisite: HUB419
Credit Points: 12  Contact Hours: 3 per week

LAB320 STUDIES IN LANGUAGE
The language basis in current approaches to the teaching of English; nature and function of language; dynamics involved in interactive situations; appropriateness of language forms used in various social contexts; educational implications of linguistic diversity within the community; recognition of the developmental features of adolescent language.
Credit Points: 12  Contact Hours: 3 per week

LAB321 WRITING WORKSHOP
This subject is based on contemporary understanding of writing. The student, as writer, uses all the language modes in social contexts (either genuine or simulated) to lead to writing in a range of situations. Engagement in these writing situations is designed to bring about personal understanding of the following: the nature of the writing process; the influence of audience and purpose on the final written product; the range of genres (or forms) that fall within the activity of writing.
Prerequisite: LAB320
Credit Points: 12  Contact Hours: 3 per week

LAB322 LITERATURE IN TEACHING
Literature teaching in historical perspective; recent developments in theory; poetry in the senior school; appropriateness to teaching drama in the senior school; teaching the novel in the senior school; shorter works (novellas, short stories) and their use in the English curriculum.
Credit Points: 12  Contact Hours: 3 per week

LAB323 ADOLESCENT & YOUNG ADULT FICTION
The scope and nature of young adult literature; strategies for evaluation and selection; recent research into adolescents’ reading needs, interests and responses; methods of promoting and using young adult books in the curriculum.
Prerequisite: HUB100
Credit Points: 12  Contact Hours: 3 per week

LAB350 ENGLISH CURRICULUM & TEACHING STUDIES 1
Builds on CUB301 to give a greater understanding of the nature of English as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8  Contact Hours: 3 per week

LAB351 ENGLISH CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which will be used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: LAB350
Co-requisites: CUB302, EDB302
Credit Points: 12  Contact Hours: 3 per week

LAB352 ENGLISH CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.
Prerequisites: LAB350, LAB351, CUB302
Credit Points: 8  Contact Hours: 3 per week

LAB353 FILM & MEDIA STUDIES CURRICULUM & TEACHING STUDIES
Builds on CUB301 to give a greater understanding of the nature of film and media studies as an applied...
Studied in association with LAB353, LAB354, CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisites:** LAB353

**Co-requisites:** CUB302, EDB302

**Credit Points:** 8  **Contact Hours:** 3 per week

**LAB356 LOTE CURRICULUM & TEACHING STUDIES 1**

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** CUB301, and at least 48 credit points in each relevant discipline area.

**Credit Points:** 8  **Contact Hours:** 3 per week

**LAB357 LOTE CURRICULUM & TEACHING STUDIES 2**

Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisites:** LAB356

**Co-requisites:** CUB302, EDB302

**Credit Points:** 8  **Contact Hours:** 3 per week

**LAB358 LOTE CURRICULUM & TEACHING STUDIES 3**

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.

**Credit Points:** 8  **Contact Hours:** 3 per week

**LAB410 LANGUAGE CURRICULUM ISSUES**

This subject is designed for primary and secondary teachers. It involves a critical examination of the issues underpinning language education today and an action research project into classroom innovation or a detailed child study of language development.

**Credit Points:** 12  **Contact Hours:** 3 per week

**LAB440 THE TEACHER & THE WRITING PROCESS**

Development of writing in the light of the language in use model, recent research, and classroom practice. It is designed for the teacher P-12. Students are expected to develop their own folio of writing, an understanding of current approaches to writing curriculum, and writing programs for their classrooms.

**Credit Points:** 12  **Contact Hours:** 3 per week

**LAB441 CHILDREN'S LITERATURE**

Evaluative criteria in children's literature; genres; teaching strategies for promoting the use of children's literature; reader response theories.

**Prerequisite:** Language arts and literature studies at Diploma of Teaching level.

**Credit Points:** 12  **Contact Hours:** 3 per week

**LAB442 TUTORING PARENTS AS LITERACY TUTORS**

Parents are the most valuable resource available to teachers in the nineties. Today, with more emphasis on involving parents in all areas of decision making in schools, it is vital that teachers can communicate proficiently with parents of all educational and socioeconomic backgrounds. This subject provides background knowledge and practice in the skills and knowledge required for successful tutoring of parents as literacy tutors of their children, both in the classroom and at home.

**Credit Points:** 12  **Contact Hours:** 3 per week

**LAB443 TRENDS IN THE TEACHING OF READING**

This subject provides students with the opportunity to extend their understanding of the reading process. It examines current views about reading in order to identify key concepts of the theory. From this the implications for classroom practice are drawn. It also identifies factors which influence readers and texts. The roles these play in the understanding of the meanings made are discussed. Learning situations based on these understandings are developed.

**Prerequisite:** Studies in the teaching of reading at Diploma of Teaching level.

**Credit Points:** 12  **Contact Hours:** 3 per week

**LAB444 LEARNING TO READ THROUGH READING/WRITING**

Development of the teachers' understanding of the importance of teaching children how to use language to learn. Students are presented with recent research into the topic, a range of strategies for empowering children to use language to learn, as well as the requirement to apply this knowledge in a classroom setting.

**Credit Points:** 12  **Contact Hours:** 3 per week

**LAB445 LANGUAGE LEARNING THROUGH FLIP**

This subject is designed for students who fulfil guidelines 6.1 and 6.2 of FLIP. As well as presenting a learning log, students develop an action research project in language/literacy and report on that project (preferably in a symposium). In their report, students are expected to display a critical understanding of the issues in language curriculum relevant to their research.

**Credit Points:** 12  **Contact Hours:** 3 per week
LAB446 GRAMMAR FOR WRITERS
This subject is designed to help teachers develop some systematic knowledge about language and grammar in particular. It looks at the questions: what is grammar? what grammars are available to us? It then focuses in some detail on systemic functional grammar.
Credit Points: 12 Contact Hours: 3 per week

LAB490 RECENT DEVELOPMENTS IN LANGUAGE/READING
The nature of language; functions of language; language development; oracy and literacy and their interrelationships; planning and implementation of a language arts unit or program.
Credit Points: 12 Contact Hours: 3 per week

LAN601 FOUNDATIONS OF ENGLISH/LANGUAGE ARTS EDUCATION
Theoretical and historical perspectives on the development of English/languages arts curricula; current debates, theory and research in the teaching of reading, writing, listening, speaking and viewing in the context of the primary and secondary classrooms; programming and assessment in the English/languages arts classroom; continuity and sequence in the teaching of English/languages arts.
Credit Points: 12 Contact Hours: 3 per week

LAN602 LITERACY & SCHOOLING
Theoretical, historical and cultural models of literacy; literacy as a contemporary social and educational problem; literacy, gender and class; literacy and minority groups; literacy and changing theories of reading and writing; literacy and the curriculum; subject-specific literacies and whole-school literacy policies.
Credit Points: 12 Contact Hours: 3 per week

LAP420 COMMUNICATION CURRICULUM & TEACHING STUDIES A
An introduction to the principles and practices of the communication curriculum area subjects of English, film and media studies, journalism and applied communication studies in Queensland secondary schools. Within this curriculum area, students design and teach lessons appropriate to adolescents and young adults in schools.
Prerequisite: Appropriate Discipline Studies in the undergraduate degree.
Co-requisite: EDP450
Credit Points: 24 Contact Hours: 6 per week

LAP421 ENGLISH CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
Prerequisite: LAP420
Credit Points: 12 Contact Hours: 3 per week

LAP422 FILM & TELEVISION CURRICULUM & TEACHING STUDIES B
This Curriculum B subject provides opportunities for students to critically examine and develop skills and understandings in significant areas of teaching and learning in film and television. It provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: LAP420
Credit Points: 12 Contact Hours: 3 per week

LAP431 CHINESE CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
Prerequisite: LAP430
Credit Points: 12 Contact Hours: 3 per week

LAP432 FRENCH CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
Prerequisite: LAP430
Credit Points: 12 Contact Hours: 3 per week

LAP433 GERMAN CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
Prerequisite: LAP430
Credit Points: 12 Contact Hours: 3 per week

LAP434 INDONESIAN CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
Prerequisite: LAP430
Credit Points: 12 Contact Hours: 3 per week
• LAP435 ITALIAN CURRICULUM & TEACHING STUDIES B
  Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
  Prerequisite: LAP430  Co-requisite: EDP451
  Credit Points: 12  Contact Hours: 3 per week

• LAP436 JAPANESE CURRICULUM & TEACHING STUDIES B
  Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies, and examines the roles of the teacher in the community and the profession.
  Prerequisite: LAP430  Co-requisite: EDP451
  Credit Points: 12  Contact Hours: 3 per week

• LAP437 LOTE IN THE PRIMARY SCHOOL CURRICULUM & TEACHING STUDIES C
  This Curriculum C subject provides opportunities for students with an appropriate background to prepare to teach LOTE in the primary school. It develops skills and understanding in planning, assessment and teaching and learning strategies, and builds on the general principles of the Curriculum A and B groups of subjects.
  Prerequisite: LAP430  Co-requisite: EDP451
  Credit Points: 12  Contact Hours: 3 per week

• LAP440 LANGUAGE & LITERACY 1
  Developing and understanding the role language plays in society: appropriate language for different social purposes; the functions and structures of language; the range of genres. Language/literacy learning: initial learning of language; continued development of language/literacy. Approaches to language/literacy teaching: strategies for development of speech, language; language in use model and implications for teaching; other models on which the language education framework is based.
  Prerequisite: LAP440
  Credit Points: 8  Contact Hours: 3 per week

• LAP441 LANGUAGE & LITERACY 2
  Prerequisite: LAP440
  Credit Points: 8  Contact Hours: 3 per week

• LAP509 DIRECTED STUDY
  An individually designed subject which allows students, under the supervision of a staff member, to increase their knowledge in a particular area relevant to teacher-librarianship.
  Credit Points: 12

• LAP504 SCHOOL LIBRARY RESOURCES: ORGANISATION & ACCESS
  School library administration and organisation systems, including computer applications; bibliographic organisation principles and procedures, and implications for self-directed learning; organisation and maintenance of, and access to, resources including equipment; field program, including school experience (3 weeks).
  Credit Points: 12

• LAP505 COMMUNICATION & MANAGEMENT IN SCHOOL LIBRARY RESOURCE CENTRES
  Extension of studies in management of school library resource centres; goal setting; time management; communication models; interpersonal and organisational communication patterns; problem solving and conflict management; innovation, intervention and change; advocacy and promotion; writing for a purpose.
  Credit Points: 12

• LAP506 INFORMATION SERVICES FOR SCHOOLS
  Implications of the information age; advanced reference skills; computer-based information services with an in-depth study of two, selected by the student.
  Credit Points: 12  Contact Hours: 3 per week

• LAP507 AUSTRALIAN LITERATURE FOR YOUNG PEOPLE
  Credit Points: 12

• LAP508 BOOKS & PUBLISHING
  Artistic and historical evolution of the book; judgment of book format through an understanding of production processes; techniques of printing; elements of the book; complexities of the publishing business, past and present.
  Credit Points: 12

• LAP509 INTERACTIVE TECHNOLOGIES IN INSTRUCTION
  Theories of interactive communications; interactive resources; videodisk; teleconferencing; computer conferencing and electronic mail; planning an instructional program.
  Credit Points: 12

• LAP510 LITERACY EDUCATION & LIBRARIES
  Educational role of libraries; literacy and basic education programs in libraries; literacy resource collections; multicultural library services; international developments.
  Credit Points: 12
LAP512 LITERATURE FOR YOUNG PEOPLE
Historical development of imaginative literature; evolution of books for young people in present social and cultural contexts; writers and illustrators from European, Commonwealth and American countries; teaching strategies for eliciting a wide variety of reader responses.
Credit Points: 12

LAP513 MEDIA LITERACY & THE SCHOOL
Mass media communication processes and their implications for teaching and learning; semiotics; influences of media on people; advertising and mass media research techniques; media ownership issues; future trends in mass media technologies.
Credit Points: 12

LAP514 REFERENCE SERVICES & MATERIALS
Extension of studies in reference and information services relevant to schools; reference interview; using an existing school's resource collection; knowledge and use of information agencies and services external to the school. External with 3-day study school or six 2-hour evening sessions.
Credit Points: 12

LAP515 RESOURCE SERVICES FOR SPECIAL NEEDS
Resource services requirements of gifted and talented, intellectually handicapped and physically handicapped school students; implications of mainstreaming; equity issues.
Credit Points: 12

LAP516 SPECIAL SEMINAR
Study of a specific aspect of teacher-librarianship, the subject to be determined by the University according to special need and/or the availability of special expertise.
Credit Points: 12

LAP517 STORYTELLING
Function of the story and storytelling in learning and teaching; preparing, developing and delivering stories; story and non-story resources; storytelling across the curriculum.
Credit Points: 12

LAP518 VISUAL LITERACY & RESOURCE DESIGN
Concepts of visual literacy; learning styles; interpretation of visuals; design and evaluation of visually-based resources.
Credit Points: 12

LEB101 HUMAN SEXUALITY & LEARNING
Physical and psychological development; attitudes and beliefs about sex; sexuality and sex education in childhood and adolescence; sex roles; contraception, sexually transmitted diseases, sexuality, disability and illness; sexual abuse of children; sexual dysfunction; pregnancy; abortion; sex education in schools.
Credit Points: 8

LEB240 DEVELOPMENT & LEARNING 1
The nature and role of theory in providing perspectives on issues in human development; the range of opinions and beliefs which have shaped theories of development and learning and influenced educational practice; how psychology and other disciplines influence the consideration of developmental issues; perspectives on development and learning in the areas of physical, cognitive, linguistic and socio-emotional processes.
Credit Points: 12

LEB241 DEVELOPMENT & LEARNING 2
Historical and contemporary psychological theories and approaches: scientific behaviourist models, behaviour modification applications, personal and social development, cognitive models, information processing models, creativity and giftedness. The teacher's role in facilitating learning. Issues in educating children with special needs: the range of individual differences, concept of integration, problems of labelling, non-discriminatory assessment, instructional techniques.
Prerequisite: LEB240
Credit Points: 8

LEB270 HUMAN RELATIONSHIPS EDUCATION
This elective has a dual focus: effective interpersonal communication by teachers as members of the school and community; and the curriculum and pedagogical process for teaching children. These curriculum programs focus on care, personal development, work experience and community-based learning. Students undertaking this elective are introduced to these processes through lectures, seminars and workshops and appropriate field study experiences.
Credit Points: 8

LEB280 DEVELOPMENT & LEARNING ELECTIVE
Introduction to a wide range of development and learning perspectives. A more in-depth understanding of specific psychological issues in education and their application to teaching.
Prerequisites: LEB240, LEB241
Credit Points: 8

LEB300 ADOLESCENT DEVELOPMENT & HUMAN RELATIONSHIPS
Adolescent development and human relationships; adolescence and the search for identity; social, physical, cognitive and moral development; overview of human relationships; self-concept and self-awareness; interpersonal relationships; group processes; and educational applications of interpersonal psychology.
Credit Points: 12

LEB301 HUMAN RELATIONSHIPS IN SCHOOLS
Approaches to learning as well as factors that influence effective teaching and learning: motivation, classroom management, learning styles, individual differences, teaching effectiveness, as these issues apply to the full range of learners, including those with special needs.
Credit Points: 12

LEB302 PSYCHOLOGY OF LEARNING & TEACHING
Analysis of the correlates of low achievement in secondary schools with a focus on slow learners and students with specific learning disabilities; development and critical evaluation of a range of teaching/learning strategies designed to assist such students.
Prerequisite: LEB302
Credit Points: 12
LEB321 TEACHER AS COUNSELLOR
This subject is not designed to prepare counsellors. It develops advanced interpersonal skills that assist in the personal and professional development of students and increase their ability to facilitate the development of positive interpersonal learning environments in schools.
Prerequisite: LEB302
Credit Points: 12 Contact Hours: 3 per week

LEB350 HUMAN RELATIONSHIPS
EDUCATION CURRICULUM & TEACHING STUDIES 1
Builds on CUB301 to give a greater understanding of the nature of human relationships education as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8 Contact Hours: 3 per week

LEB351 HUMAN RELATIONSHIPS
EDUCATION CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curriculum and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: LEB350
Co-requisites: CUB302, EDB302
Credit Points: 12 Contact Hours: 3 per week

LEB352 HUMAN RELATIONSHIPS
EDUCATION CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.
Prerequisites: PUB310, PUB320, CUB302
Credit Points: 8 Contact Hours: 3 per week

LEB420 INTERPERSONAL PSYCHOLOGY IN EDUCATION
Historical development and major principles of interpersonal psychology; concepts related to the formation and development of interpersonal relationships; particular concepts and their application to education; interpersonal relationships with exceptionalal students; emotionality; models of effective teaching; self-concept; small group development; applications of interpersonal psychology. Study school for external students strongly recommended.
Credit Points: 12 Contact Hours: 3 per week

LEB421 APPLIED STRATEGIES IN CLASSROOM LEARNING
Contemporary theoretical approaches to human development and learning; dimensions of learning; correlates of learning; developing teaching/learning strategies; gathering and interpreting information; consideration of a range of advanced teaching/learning strategies.
Credit Points: 12 Contact Hours: 3 per week

LEB422 ADULT LEARNING
Contemporary theoretical perspectives and research in adult learning. Factors which influence learning. Application of theoretical perspectives to facilitate learning in adult educational environments.
Credit Points: 12 Contact Hours: 3 per week

LEB430 CREATIVITY IN PROBLEM SOLVING
Creativity is an often advocated, loosely discussed, presumed phenomenon much sought after as an educational objective both in general and as curriculum specific. It is the aim of this subject to familiarise students with the history of this concept's emergence, its definitional problems, current explanatory theories and models, and to ensure that their presentation promotes the development of the concept as an aspect of problem solving in personal development and pedagogical applications.
Credit Points: 12 Contact Hours: 3 per week

LEB431 INNOVATIVE TEACHING METHODS
Cooperative learning and developmental goals; effect of cooperative learning on achievement, attitudes and interpersonal relations. A series of classroom strategies applicable to all grade levels (preschool through TAFE/university) and to all subject areas. Access to classroom or other structured learning group essential.
Credit Points: 12 Contact Hours: 3 per week

LEB441 EDUCATIONAL COUNSELLING
The nature of counselling/helping in educational contexts; the educator as counsellor; characteristics of effective helpers, practical development of communications skills, building an empathic relationship; structuring the counselling process; application of some counselling theories to the educational contexts; practical sessions using educationally-based role plays to demonstrate effective use of the skills learned. Compulsory study school for external students. Incompatible with Studies in Counselling or equivalent at Diploma of Teaching level.
Credit Points: 12 Contact Hours: 3 per week

LEB442 ADVANCED EDUCATIONAL COUNSELLING
The major theoretical approaches to counselling are applied to problems and concerns arising in the educational context. Theories include: psychoanalytic, adferian, existential person-centered, Gestalt, transactional analysis, behaviour, rational-emotive, and reality. Skills and techniques associated with each major theory are presented and related to educationally-based problems and concerns. The effects and outcomes of counselling inventions are investigated and ethical issues are addressed.
Credit Points: 12 Contact Hours: 3 per week

LEB443 HUMAN SEXUALITY & LEARNING
Physical and psychological development; attitudes and beliefs about sex; sexuality and sex education in childhood and adolescence; sex roles; contraception; sexually transmitted diseases; sexuality, disability and illness; sexual abuse of children; sexual dysfunction; pregnancy; abortion; sex education in schools. Compulsory study school for external students.
Credit Points: 12 Contact Hours: 3 per week
LEB444 HUMAN SEXUALITY & DEVELOPMENT
An examination of social and legal issues associated with human sexual behaviour and their impact on adult development and identity. Behaviours investigated are pregnancy, abortion, infertility, child sexual abuse, rape, pornography, prostitution and transsexuality.
Credit Points: 12 Contact Hours: 3 per week

LEP410 HUMAN DEVELOPMENT & LEARNING A
Using their own life experiences as developing human beings and learners as a basis for discussion, students study adolescent development in this subject within the broader contexts of life-span development, social change with reference to youth sub-cultures and popular cultures, and observations of contemporary educational practice during teaching practice. The subject introduces students to the complex process of teaching and learning.
Co-requisite: CPP410 Credit Points: 9 Contact Hours: 3 per week

LEP411 HUMAN DEVELOPMENT & LEARNING B
This subject builds on LEP410 A and focuses on the students as emerging professional practitioners. Interpersonal relationships and group processes in relation to school students, school and community personnel are emphasised.
Prerequisite: LEP410 Co-requisite: CPP411 Credit Points: 9 Contact Hours: 3 per week

LEP420 HUMAN RELATIONS EDUCATION CURRICULUM & TEACHING STUDIES C
This Curriculum C subject provides opportunities for students with an appropriate background to prepare to teach human relations education. It develops skills and understandings in planning, assessment and teaching and learning strategies, and builds on the general principles of the Curriculum A and B groups of subjects.
Credit Points: 12 Contact Hours: 3 per week

LEP421 ADULT LEARNERS CURRICULUM & TEACHING STUDIES C
This Curriculum C subject provides opportunities for students with an appropriate background to prepare to teach adult learners. It develops skills and understandings in planning, assessment and teaching and learning strategies, and builds on the general principles of the Curriculum A and B groups of subjects.
Credit Points: 12 Contact Hours: 3 per week

LEP422 EXCEPTIONALITY CURRICULUM & TEACHING STUDIES C
This Curriculum C subject provides opportunities for students with an appropriate background to prepare to teach exceptional learners. It develops skills and understandings in planning, assessment and learning strategies, and builds on the general principles of the Curriculum A and B groups of subjects.
Credit Points: 12 Contact Hours: 3 per week

LEP430 HUMAN DEVELOPMENT & LEARNING
Understand child development and learning theory; evaluate the practical implications of this theoretical perspective within existing and changing practices in primary educational settings; the nature and acquisition of knowledge; the nature of teaching and learning; the historical antecedents of concepts and theories relating to child growth, development and learning.
Credit Points: 8 Contact Hours: 3 per week

LEP501 LEARNERS WITH SPECIAL NEEDS
Special educational needs of school (P-12) and TAFE College learners arising from cognitive, behavioural and sociocultural differences; diagnosing student functioning in cognitive, social-emotional, self-help and motor skill areas; developing teaching strategies suited to student learning styles; techniques of formative and summative assessment appropriate to student learning needs; mixed ability teaching.
Credit Points: 10 Contact Hours: 3 per week

LEP502 DEVELOPING RELATIONSHIPS & GROUPS
Overview of concepts relating to a model of interpersonal relationships; study of some human relationships concepts such as verbal and nonverbal interpersonal communication, power, influence, authority/control, trust and mistrust, confrontation and constructive resolution of conflict; interviewing and consulting skills; self-concept studies; small group dynamics; student and teacher stress; assertion-
relation theory and skills, resource teacher as change
agent.
Credit Points: 10 Contact Hours: 4 per week

- LEP503 REMEDIATING LITERACY
DIFFICULTIES
Review of significant learning difficulties among
learners in schools (Years 1-12) and post-secondary
education; foundation studies in language and learn-
ing; assessment and monitoring of literacy-related
curriculum tasks; test interpretation and development;
related approaches to teaching, informed by prin-
ciples derived from psycholinguistics, metacognition
and process approaches to literacy; service delivery
based on an adjunct model.
Credit Points: 10 Contact Hours: 3 per week

- LEP504 RESOURCE TEACHING
FIELDWORK 1
Students participate in colloquia on resource/support
teaching and undertake school or college-based
projects related to other subjects studied in the first
half of the course; observe and report on classroom
teacher and students on a particular resource teaching
project; demonstrate a range of personal and profes-
sional attributes necessary for successful
resource/support teaching.
Credit Points: 8 Contact Hours: 2 per week

- LEP505 STUDY SKILLS, LITERACY &
LEARNING
Review of significant learning difficulties among
learners in schools (Years 4-12) and post-secondary
education in the areas of language/learning demands
of the curriculum, functions of language and founda-
tions studies of language and learning leading to
detailed study of composing and comprehending tasks
as they relate to curriculum demands; recent lan-
guage/learning research, genre theory; study skills
development and organisation; test-wisdomess,
notetaking, organisation, managing examina-
tion stress; service delivery based on an adjunct model.
Credit Points: 10 Contact Hours: 3 per week

- LEP506 RESOURCE TEACHING
FIELDWORK 2
Students participate in colloquia on resource/support
teaching and undertake school or college-based
projects related to other subjects studied in the second
half of the course; observe and report on curriculum
and sociocultural influences in schools/colleges;
work with classroom teacher and students on a study
skills, language and learning project; demonstrate a
range of advanced personal and professional at-
tributes necessary for successful resource/support

teaching.
Credit Points: 8 Contact Hours: 2 per week

- LEP507 RESEARCH METHODS IN
RESOURCE TEACHING
Introduction to quantitative and qualitative research
methodologies; literature reviews; gaining access to
research sites; data collection and analysis; ethical
issues in research; reporting research; completion of
minor research task or preparation of Master's re-
search proposal.
Credit Points: 10 Contact Hours: 3 per week

- LEP508 INDEPENDENT STUDY IN
RESOURCE TEACHING
Action research, literature reviews or special project
development on a topic arising from resource/support
teaching; designing appropriate investigative
strategies; implementation of investigation; produc-
ing and presenting final report using computer and
various audiovisual formats as required.
Credit Points: 10 Contact Hours: 3 per week

- LEP509 RESOURCE TEACHING 1A
See LEP504
Credit Points: 4

- LEP510 RESOURCE TEACHING 1B
See LEP504
Credit Points: 4

- LEP511 RESOURCE TEACHING 2A
See LEP504
Credit Points: 4

- LEP512 RESOURCE TEACHING 2B
See LEP504
Credit Points: 4

- LEP513 HUMAN SEXUALITY &
LEARNING
Physical and psychological development; attitudes
and beliefs about sex; sexuality and sex education in
childhood and adolescence; sex roles; contraception;
sexually transmitted diseases; sexuality, disability
and illness; sexual abuse of children; sexual dysfunc-
tion; pregnancy; abortion; sex education in school.
Credit Points: 12 Contact Hours: 3 per week

- LEP514 HUMAN SEXUALITY &
DEVELOPMENT
An examination of social and legal issues associated
with human sexual behaviour and their impact on
adult development and identity. Behavioural inves-
tigated are pregnancy, abortion, infertiltiy, child
sexual abuse, rape, pornography, prostitution and
transsexuality.
Credit Points: 12 Contact Hours: 3 per week

- LEP515 ETHICS & HUMAN
RELATIONSHIPS EDUCATION
Philosophical approaches to human relationships;
moral philosophy and education; development of an
integrated and clearly articulated argument for a
philosophy of human relationships education.
Prerequisite: LEP515
Credit Points: 12 Contact Hours: 3 per week

- LEP516 HUMAN RELATIONSHIPS
ACROSS THE LIFESPAN
The developmental processes; issues in human develop-
ment across the lifespan; development theory and
research; development of human relations; the sociocul-
tural context of development and relationships.
Credit Points: 12 Contact Hours: 3 per week

- LEP517 INTERPERSONAL &
PROFESSIONAL RELATIONSHIPS 1
An examination of the major concepts and models
used to explain interpersonal relationship develop-
ment, social influence and attitude change; the
development of communication and counselling
skills and theoretical understandings.
Credit Points: 12 Contact Hours: 3 per week

- LEP518 INTERPERSONAL &
PROFESSIONAL RELATIONSHIPS 2
An examination of the major concepts and models
used to explain interpersonal relationship develop-
ment, social influence and attitude change; the
development of communication and counselling
skills and theoretical understandings.
Prerequisite: LEP519
Credit Points: 12 Contact Hours: 3 per week
- LEP521 SOCIOCULTURAL CONTEXT OF HUMAN RELATIONSHIPS EDUCATION
  Poverty; marriage and partnerships, divorce and separation; family violence; disability.
  Credit Points: 12  Contact Hours: 3 per week

- LEP522 INTERPERSONAL & SMALL GROUP TEACHING STRATEGIES
  This subject is designed to provide human relationships educators with insight into the effects and usefulness of interactive and cooperative teaching strategies, and experience with their implementation.
  Credit Points: 12  Contact Hours: 3 per week

- LPN300 RESEARCH DISSERTATION
  A research dissertation of approximately 20,000 words. It is expected that the research dissertation relates to one of the core subject areas covered in the Graduate Diploma in Legal Practice and will have an applied law orientation. Examples of topics are: law and practice difficulties in staged resort development; analysis of judgement by default procedures and practices in the courts; jurisdictional issues and procedural difficulties in obtaining injunctive relief in the courts.
  Credit Points: 48

- LSB001 INTRODUCTORY BIOLOGY
  A companion subject to BEB103 and BEB104, designed for students who have not studied Senior Biology. It presents an overview of organisms with emphasis on the relationship between structure and basic biological function, including nutrition, excretion, reproduction and inheritance.
  Credit Points: 6  Contact Hours: 3 per week

- LSB100 MICROBIOLOGY I
  The subject acts as an introduction to the study of microbiology and biochemistry. The diversity of microbes is presented together with the various forms of microscopy used to study them. Important biological molecules, both inorganic and organic, are discussed with emphasis on the mode of action of enzymes and their role in energy production. A detailed study is made of the morphology of eukaryotic cells, prokaryotic cells and viruses.
  Credit Points: 8  Contact Hours: 3 per week

- LSB113 ENVIRONMENTAL SCIENCE
  Atmospheric process including climate; air pollution and smog; water cycles. Sea level changes and water pollution as a global issue; carbon, nitrogen and phosphorus cycling. Introduction to human population and demographic trends. Distribution and trade in renewable and non-renewable resources; trends in the use of land; the city as an ecosystem; natural resource management and conservation.
  Credit Points: 4  Contact Hours: 2 per week

- LSB122 BIOLOGY I
  A core subject for major and submajor studies in biology. It consists of an integrated program of lectures and practical work dealing with structure and function of living organisms and systems.
  Co-requisite: LSB100 or Senior Biology
  Credit Points: 12  Contact Hours: 5 per week

- LSB130 ANATOMY I
  An integrated course of lectures and practicals dealing with microscopic structure of the cell, epithelium, connective tissue, bone and cartilage, muscle tissue, nerve tissue, and cardiovascular system. Also deals with the gross anatomical of the skeletal, articular, and cardiovascular systems.
  Credit Points: 8  Contact Hours: 3 per week

- LSB141 ANATOMY & PHYSIOLOGY I
  A study of human anatomy of the body as a whole, including a detailed study of the skeletal system.
  Credit Points: 10  Contact Hours: 4 per week

- LSB151 HUMAN ANATOMY I
  An integrated course of lectures and practicals dealing with microscopic structure of the cell, epithelium, connective tissue, bone and cartilage, muscle tissue, nerve tissue, and cardiovascular system. Also deals with the gross anatomical of the skeletal, articular and cardiovascular systems.
  Credit Points: 8  Contact Hours: 3 per week

- LSB161 BIOLOGY
  An introduction to biology for students with no previous experience in the discipline. An overview of form and function in animal and plant systems; patterns and mechanisms of inheritance; fundamental ecological principles.
  Credit Points: 8  Contact Hours: 3 per week

- LSB171 ANATOMY & PHYSIOLOGY I
  This subject introduces students to an integrated study of anatomy and physiology at the degree level. Emphasis is placed on gaining an appreciation of the relationship between structure and function at the levels of cells, tissues, organs and organ systems, initially the morphology and physiology of cells and tissues is examined. The skeletal, muscular, nervous and integumentary systems are studied.
  Credit Points: 12  Contact Hours: 4 per week

- LSB181 ANATOMY
  The general principles of anatomy; macroscopic and some microscopic and ultrastructures of the human body; introductory surface and regional anatomy in relation to systemic anatomy. This subject also focuses on the areas of anatomy relevant to nursing.
  Credit Points: 8  Contact Hours: 3 per week

- LSB191 CLINICAL PHYSIOLOGY & PHARMACOLOGY
  The physiological basis of the pathogenesis, clinical features and principles of treatment of the major disorders of body function. (Note: This subject is not compatible with PNB240, or PNB340 + PNB540 + PNB640, or PNB350 + PNB450 + PNB650.)
  Prerequisite: PNB240
  Credit Points: 8  Contact Hours: 3 per week

- LSB210 QUANTITATIVE LABORATORY TECHNIQUES 2
  A subject dealing with the theoretical and practical aspects of instrumental analysis in the clinical laboratory, and organisation and analysis of data. Topics include: glassware, plastics, balances, spectrophotometers, flamephoto-meters, auto-titrators, pH meters and specific ion meters. Programmable calculators and computers are used during the practical course to illustrate modern methods of data manipulation. Emphasis is placed throughout on the effective use of the instruments.
  Credit Points: 12  Contact Hours: 5 per week

- LSB221 INTRODUCTION TO PATHOLOGY
  Application of scientific methods to the study of the general principles of disease processes and the major diseases of the organ systems. Correct understanding and use of pathological terms and concepts are emphasised.
  Prerequisite: PNB125
  Credit Points: 6  Contact Hours: 3 per week
- **LSB222 BIOLOGY 2**
  Macrobiology; populations of organisms, their interactions with each other, and their association into communities, ecosystems, biomes and the global biosphere are studied in both qualitative and quantitative terms. The flow of energy and matter through the biosphere; the impact of humanity on this process; introduction to simple computer-based models of community ecology and ecosystem processes through practical sessions.
  **Credit Points:** 12  **Contact Hours:** 5 per week

- **LSB230 ANATOMY 2**
  An extension of LSB130. A course dealing with the microscopic and macroscopic anatomy of the nervous, digestive, lymphatic, integumentary, respiratory, renal, endocrine and reproductive systems.
  **Prerequisite:** LSB130  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB232 CELL BIOLOGY**
  Introduction to cell structure and function in both eukaryote and prokaryote organisms; cell biology in relation to structure, function, systems, metabolism and differentiation in addition to basic molecular biology and genetic organisation; the molecular basis for genetic manipulation and other current advances based on molecular genetics.
  **Prerequisite:** LSB122  **Credit Points:** 12  **Contact Hours:** 5 per week

- **LSB240 PHYSIOLOGY 2**
  Basic mechanisms: cells, fluids, electrolytes; energy metabolism; essential nutrients; transport mechanisms; blood; communication and control; excitable tissues. Control systems: nervous and endocrine systems.
  **Prerequisite:** LSB130 for Med Lab Science students  **Co-requisite:** CHB222 or CHB242 for Med Lab Science students  **Credit Points:** 8  **Contact Hours:** 4 per week

- **LSB241 ANATOMY & PHYSIOLOGY 2**
  A course of lectures and practical exercises involving a basic, yet comprehensive, study of the anatomy and physiology of the various body systems.
  **Prerequisite:** LSB141  **Credit Points:** 10  **Contact Hours:** 4 per week

- **LSB242 HUMAN ANATOMY & PHYSIOLOGY**
  An introduction to the anatomy and physiology of the human body for health professionals. Emphasis is placed on gaining an appreciation of the relationship between structure and function at the levels of cells, tissues, organs and organ systems. Related medical terminology is introduced. A brief study of pregnancy and human development is included.
  **Credit Points:** 12  **Contact Hours:** 5 per week

- **LSB261 SYSTEMATIC ANATOMY**
  An extension of PUB161. A subject dealing with the microscopic and macroscopic anatomy of the nervous, digestive, lymphatic, integumentary, respiratory, renal, endocrine and reproductive systems.
  **Prerequisite:** LSB161  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB271 ANATOMY & PHYSIOLOGY 2**
  This subject follows on LSB171, integrating the study of structure and function of the human body. The systematic physiology of organs and organ systems continues with the study of the cardiovascular, lymphatic, immune, endocrine, respiratory, digestive, urinary and reproductive systems. Metabolism, nutrition and temperature regulation is reviewed. A brief study on pregnancy and human development is included.
  **Prerequisites:** LSB171  **Credit Points:** 12  **Contact Hours:** 4 per week

- **LSB281 PHYSIOLOGY & PHARMACOLOGY**
  This subject considers the basic principles of normal body function and provides an introduction to pharmacology. (Note: This subject is not compatible with PNB115, or PNB240 or PND241.)
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB300 MICROBIOLOGY 3**
  An introductory core subject in microbiology dealing with cytology, nutrition, genetics control of microbial populations and principles of taxonomy.
  **Prerequisite:** LSB100  **Co-requisite:** LSB320  **Credit Points:** 8  **Contact Hours:** 4 per week

- **LSB301 MICROBIOLOGY 1**
  The classification and identification of microorganisms: emphasis is on their microbiology and reproduction. Organisms dealt with include: the protozoa, helminths, fungi, bacteria and algae.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB302 ANIMAL BIOLOGY 1**
  This subject, together with LSB402, provides the foundation in animal biology that is essential for later specialist subjects in population studies and aquaculture. The subject deals with non-chordates and covers the following topics: taxonomy, systematics, nomenclature, classification, ultrastructure, life histories, structure and physiology, and evolutionary trends.
  **Credit Points:** 12  **Contact Hours:** 5 per week

- **LSB305 BIOCHEMISTRY**
  The meaning and function of intermediary metabolism; nucleic acids; vitamins and coenzymes; bioenergetics; carbohydrate metabolism; biological oxidation; lipid metabolism; regulation of carbohydrates and lipid metabolism; amino acid metabolism.
  **Credit Points:** 12  **Contact Hours:** 5 per week

- **LSB308 BIOCHEMISTRY 3**
  The structure and function of organic macromolecules. Topics include: the chemistry and function of proteins; enzymology; thermodynamics; energy production and utilisation; the structure, chemistry and function of carbohydrates and nucleic acids.
  **Prerequisites:** LSB232, CHB222  **Credit Points:** 12  **Contact Hours:** 5 per week

- **LSB310 QUANTITATIVE LABORATORY TECHNOLOGY 3**
  The subject deals with techniques encountered in the clinical laboratory. Topics include: immunassay, enzyme analysis, electrophoresis, isoelectric focusing, and chromatography, gel filtration, ion exchange, affinity, and high performance liquid chromatography. Emphasis is placed on the maintenance of accuracy, precision and quality control including statistical control in the clinical laboratory.
  **Prerequisite:** LSB210  **Credit Points:** 8  **Contact Hours:** 4 per week

- **LSB312 MARINE STUDIES**
  A general overview of the marine ecosystems, their importance to all life along the coastal areas and to people's livelihood; management and conservation of
the sea; appreciation of its infinite value to mankind's changing lifestyle.

**Prerequisite:** LSB122

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB318 BIOCHEMICAL METHODOLOGY 3**

A companion to LSB308 emphasising biochemical laboratory methods and practice and dealing with pH measurement and buffers, UV and visible spectrophotometry, chromatography, electrophoresis and isotope techniques.

**Prerequisites:** LSB232, MAB327

**Co-requisite:** LSB308

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB321 SYSTEMATIC PATHOLOGY**

Detailed study of the diseases of the organ systems: cardiovascular, respiratory, alimentary, urogenital, nervous muscular-skeletal, endocrine, haematologic and skin.

**Prerequisite:** LSB221

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB322 PLANT BIOLOGY**

Plant biology provides a foundation in morphology, anatomy reproduction, taxonomy and identification in the plant kingdom. The subject includes a small practical project, and some emphasis is given to species of economic value. The content forms a basis for further study in plant tissue culture, physiology and ecology.

**Prerequisite:** LSB322

**Credit Points:** 12  **Contact Hours:** 3 per week

**LSB328 MICROBIOLOGY 3**

An introductory core subject of lectures and practical exercises in microbiology dealing with cytology, nutrition, genetics control of microbial populations and principles of taxonomy.

**Prerequisite:** LSB232

**Credit Points:** 12  **Contact Hours:** 3 per week

**LSB330 INTRODUCTION TO BIOTECHNOLOGY**

The basic aspects of molecular biology, genetic engineering and clinical applications of biotechnology. The subject includes: types and structures of DNA and RNA; the genetic code; DNA replication, transcription and translation; gene cloning techniques; vectors and hosts; DNA hybridisation and DNA probe techniques; clinical applications of technology.

**Credit Points:** 8  **Contact Hours:** 5 per week

**LSB331 ADVANCED ANATOMY**

On completion of this subject, students should be able to describe the structures, function and anatomical relationship of the components of the lower limb and demonstrate anatomical knowledge which are fundamental to the understanding of the functional and applied aspects of podiatric anatomy. This subject contains the major topics of osteology, myology, arthrology, angiology and neurology.

**Prerequisite:** LSB261

**Credit Points:** 8  **Contact Hours:** 3 per week

**LSB332 PLANT PHYSIOLOGY 1**

An introduction to whole plant physiology and the functional systems of plants. It is an important preparatory subject for students continuing their studies in the plant biotechnology and ecology areas.

**Prerequisite:** LSB232

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB340 PHYSIOLOGY 3**

Maintenance systems: gastrointestinal; cardiovascular; respiratory; and renal systems. Integrated mechanisms: sexual development; pregnancy; parturition; lactation; control of growth, energy intake, organic metabolism, body temperature, ECF osmolarity and volume, blood pressure and flow, respiration; response to tissue damage and foreign matter; adaptation to stress and exercise.

**Prerequisite:** LSB230 and LSB240 for students in Med Lab Science

**Credit Points:** 8  **Contact Hours:** 5 per week

**LSB340 SCIENCE & SURVIVAL**

**Prerequisite:** MDB261

**Credit Points:** 12  **Contact Hours:** 3 per week

**LSB341 BIOLOGY & TECHNOLOGY**

The interaction of organisms and their physical environment; the human influence in the biosphere; how technology empowers communities to exploit and/or protect biological systems and the integrity of the earth as humanity experiences it today.

**Prerequisite:** LSB340

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB351 HUMAN ANATOMY 3**

An extension of LSB151. This integrated series of lectures and practicals covers basic embryology, structure and development of the eye, and gross and microscopic anatomy of the major organ systems of the human body.

**Prerequisite:** LSB151

**Credit Points:** 10  **Contact Hours:** 5 per week

**LSB352 POPULATION ECOLOGY**

A broad theoretical background in the major concepts of plant and animal ecology; introduction to a number of basic ecological models and modelling techniques; topics include: the ecology of single populations, life history and demography, interactions within and between populations, population regulation, management, behavioural ecology, energetics and biogeography.

**Prerequisite:** LSB222

**Co-requisite:** LSB362

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB358 PHYSIOLOGY 2S**

A course of lectures and practicals reviewing basic mechanisms: cells, fluids, electrolytes; energy metabolism; essential nutrients; transport mechanisms; blood; communication and control; excitable tissues; control systems; nervous and endocrine.

**Prerequisite:** LSB242

**Credit Points:** 12  **Contact Hours:** 5 per week

**LSB361 FUNDAMENTALS OF MEDICINE 1**

This subject provides students with the theoretical basis for an understanding of the process of medical care. These students must understand the nature of disease processes and the clinician's response to them
in order to: design appropriate and efficient health information services for all types of health care facilities; communicate effectively with other health professionals involved in the care of patients; assist in research and quality assurance programs in the health services. A review of the important and frequently encountered diseases and disorders of the major body systems.

Prerequisite: LSB271
Credit Points: 12  Contact Hours: 3 per week

■ LSB400 MICROBIOLOGY 4
An extension of the core subject in Microbiology (LSB300), including aspects of microbial taxonomy, food and water microbiology, microbial ecology, industrial and agricultural microbiology, and the role of microorganisms as infectious agents.
Prerequisite: LSB300 or LSB491
Co-requisite: LSB481
Credit Points: 8  Contact Hours: 4 per week

■ LSB401 MICROBIOLOGY
An introductory core subject of lectures and practical exercises in microbiology dealing with cytology, nutrition, genetics, control of microbial populations, and principles of taxonomy.
Credit Points: 8  Contact Hours: 3 per week

■ LSB402 ANIMAL BIOLOGY 2
This subject, together with LSB302, provides the foundation in animal biology that is essential for later specialist subjects in population studies and aquaculture. The subject deals with chordates and covers the following topics: embryology, development, structure, physiology, classification and major evolutionary trends.
Prerequisite: LSB302
Credit Points: 12  Contact Hours: 5 per week

■ LSB405 MICROBIOLOGY
Scope of microbiology; characteristics of major microbial types; microbial metabolism; water, food and micro-organisms; principles of food presentation; spoilage of food; food-borne disease; food hygiene; microbial fermentation of foods; environmental and industrial microbiology.
Credit Points: 12  Contact Hours: 5 per week

■ LSB408 BIOCHEMISTRY 4
Aspects of carbohydrate metabolism in mammals, the chemistry and metabolism of lipids, amino acids, the chemistry and function of the nucleic acids, protein biosynthesis and molecular bases of genetic mutation.
Prerequisite: LSB308
Credit Points: 12  Contact Hours: 5 per week

■ LSB412 APPLIED ECOLOGY A
The theory and practice of methods used to determine and measure important population parameters and characteristics. The methods are an essential tool for the study of biological populations. Content includes estimation of population size, determination of dispersion patterns, detecting competition and measuring productivity. Applications of methods are demonstrated using laboratory and field exercises.
Prerequisite: LSB352
Credit Points: 12  Contact Hours: 5 per week

■ LSB418 BIOCHEMICAL METHODOLOGY 4
This subject extends studies of chromatographic and electrophoretic methods, protein binding techniques and the methodology of protein and nucleic analysis.
Prerequisite: LSB318
Co-requisite: LSB408
Credit Points: 12  Contact Hours: 5 per week

■ LSB421 IMAGING PATHOLOGY
A study of the appearances of pathology on medical images with particular emphasis on the radiographic image.
Prerequisite: LSB321
Credit Points: 4  Contact Hours: 2 per week

■ LSB422 APPLIED ECOLOGY B
The principle and concepts of plant community ecology and ecosystem structure. It includes a consideration of biogeochemical cycles, soils, nutrient cycling, vegetation classification and mapping, and techniques for characterising the physical environment. Field work is incorporated.
Credit Points: 12  Contact Hours: 5 per week

■ LSB428 MICROBIOLOGY 4
An extension of LSB328, includes aspects of microbial taxonomy, food and water microbiology, microbial ecology, industrial and agricultural microbiology and the role of micro-organisms as infectious agents.
Prerequisite: LSB328
Co-requisite: LSB408
Credit Points: 12  Contact Hours: 5 per week

■ LSB430 IMMUNOLOGY 4
A study of the mechanisms of the immune process including the nature of antigen, antibodies, antigen-antibody reactions, antibody formation, control of the humoral and cell-mediated immune responses, hypersensitivity and allergy and immunisation of man against infections.
Prerequisite: LSB306 and LSB300
Credit Points: 8  Contact Hours: 4 per week

■ LSB431 MICROBIOLOGY 2
This subject extends the principles covered in LSB301 and considers the classification and identification of micro-organisms, their infectious capability, host responses and the role of micro-organisms in nature and in industrial processes, the enumeration of micro-organisms, the control of microbial populations. The classification of viruses and their reproductive cycle are briefly considered.
Prerequisite: LSB301
Credit Points: 8  Contact Hours: 3 per week

■ LSB432 GENETICS
An introductory subject in basic genetics. Topics include: the molecular basis of genetics, Mendelian genetics, nuclear and cytoplasmic inheritance, genotype-phenotype interactions, quantitative and behavioural genetics, and basic evolutionary theory.
Prerequisite: LSB122
Credit Points: 12  Contact Hours: 5 per week

■ LSB438 IMMUNOLOGY 4
The mechanisms of the immune process including the nature of antigen, antibodies, antigen-antibody reactions, antibody formation, control of the humoral and cell-mediated immune responses, hypersensitivity
and allergy, and immunisation of man against infections.
Prerequisites: LSB328, LSB242
Credit Points: 12  Contact Hours: 5 per week

■ LSB441 IMAGING ANATOMY
A study of the appearances, on medical images, of normal and abnormal anatomy.
Credit Points: 8  Contact Hours: 4 per week

■ LSB442 PLANT TISSUE CULTURE 1
A broad introduction to most of the areas of plant tissue culture. After an introduction to techniques and media preparation leading to a coverage of micropropagation, the topics discussed include: organogenesis, embryogenesis, genetic variability, another culture and secondary metabolite production. Some emphasis is placed on the tissue culture of horticultural crops and a field excursion is included as part of the program.
Prerequisite: LSB332
Credit Points: 12  Contact Hours: 5 per week

■ LSB450 HAEMATOLOGY 4
In the first of the three haematology subjects the student is introduced to the theory of the origin, development and composition of normal blood. Laboratory tests, principles, techniques and interpretation used in the screening of blood samples are discussed in detail. Basic haematologic tests include: preparation, staining and examination of blood films, determination of the red cell indices, supravital staining, erythrocyte sedimentation rate, screening tests used in the investigation of a bleeding disorder.
Prerequisites: LSB310, LSB205, LSB306
Co-requisite: LSB408
Credit Points: 8  Contact Hours: 4 per week

■ LSB451 HUMAN PHYSIOLOGY
A course of lectures and practicals. The lectures are the same as LSB240 and LSB340. The subject is presented as a one semester program.
Prerequisite: LSB351 or LSB261
Credit Points: 12  Contact Hours: 7 per week

■ LSB458 PHYSIOLOGY 3S
A continuation of LSB358.
Prerequisite: LSB358
Credit Points: 12  Contact Hours: 5 per week

■ LSB460 HISTOPATHOLOGY 4
An introductory subject presenting methods of preparing tissue samples for examination by the various methods of light and electron microscopy. Topics include: fixation, embedding, microtomy and an introduction to staining and microscopy techniques.
Co-requisites: PNB132, CHB242
Credit Points: 8  Contact Hours: 4 per week

■ LSB461 FUNDAMENTALS OF MEDICINE 2
This subject continues the study of the process of medical care begun in LSB361. In addition it includes the study of the roles and functions of allied health professions, and of technological services in the diagnosis and treatment of disease.
Prerequisite: LSB361
Credit Points: 12  Contact Hours: 3 per week

■ LSB470 DISEASE PROCESSES 4
The principles of the study of disease and dealing with the causes and nature of circulation disorders, degenerative processes, metabolic and nutritional disorders, disturbances of development and growth, inflammation, infections and infestations, regeneration and repair, and neoplasia. It includes: the applications of general pathology to the study of diseases of the heart and circulatory system, digestive system, respiratory system, urogenital system, endocrine system, nervous system, haematologic system and skin.
Prerequisite: LSB105  Co-requisite: LSB306
Credit Points: 4  Contact Hours: 2 per week

■ LSB485 AUSTRALIAN BIOLOGY
The geological and climatic history of the Australian continent, the history of Australian ecosystems and the evolution of the Australian flora and fauna. Major groups of extant plants and animals are examined in some detail. While emphasis is placed on vertebrate animals, invertebrates of particular relevance because of their abundance, scientific interest or economic importance are discussed. The structure of selected plant communities and their social and economic relevance are examined.
Credit Points: 12  Contact Hours: 3 per week

■ LSB491 MICROBIOLOGY 3
An introductory core subject microbiology for students of optometry dealing with cytology, nutrition, genetics, control of microbial populations and principles of taxonomy.
Credit Points: 6  Contact Hours: 3 per week

■ LSB500 MICROBIOLOGY 5
A study of parasitology (85 semester hours) directed towards the laboratory diagnosis of parasitic disease in man. It consists of a systematic study of identification, life history, incidence, modes of infection, epidemiology and control of the parasites of man. Emphasis is placed on parasites evident in Australia and on those most likely to penetrate the quarantine barrier. A study of clinical mycology (20 semester hours) including characterisation of fungi responsible for systemic and superficial infections in man.
Prerequisite: LSB400
Credit Points: 16  Contact Hours: 7 per week

■ LSB508 BIOCHEMISTRY 5
The catabolic and anabolic pathways for the major macromolecules in mammalian systems; important aspects of non-mammalian metabolism; advanced concepts in bioenergetics and thermodynamics in the context of cellular metabolism; integration of metabolism including production of mixed conjugates of biological significance such as amino-sugars and lipopolysaccharides.
Prerequisite: LSB408
Credit Points: 12  Contact Hours: 5 per week

■ LSB520 CLINICAL BIOCHEMISTRY 5
This subject introduces the study of chemical aspects of human life in health and illness and discusses the application of chemical laboratory methods to diagnosis, control of treatment and prevention of disease. Topics include: kidney, pancreas, liver and gastric functions, the metabolism of lipids, carbohydrates and proteins.
Prerequisites: LSB408, LSB310, LSB306
Co-requisite: MAB252
Credit Points: 8  Contact Hours: 4 per week

■ LSB528 MICROBIAL PHYSIOLOGY & METABOLISM
The composition organisation, structure and activity of the microbial cell: bacteria, yeasts and moulds. Topics include: light microscopy and staining methods; cell structure; enrichment, isolation and
growth of cultures; cells, populations and the kinetics of growth; biosynthesis of cellular materials; regulation of metabolism; microbial genetics; sporeogenesis and germination.

Prerequisite: LSB428
Credit Points: 12  Contact Hours: 5 per week

**LSB530 IMMUNOLOGY 5**
This subject builds on the basic understanding provided in LSB430 to provide an understanding of the genetic control of antibody diversity, the function of antibody and complement at a molecular level, cell interactions in the immune response and immunological process in resistance to and recovery from infection. Practical classes place emphasis on the competent performance of immunological procedures rather than just a demonstration of immunological principles.

Prerequisites: LSB430, LSB408, LSB400
Credit Points: 8  Contact Hours: 4 per week

**LSB538 MOLECULAR BIOLOGY**
An introductory subject of lectures and practical exercises in molecular biology including types and structures of DNA and RNA, the genetic code and protein synthesis; DNA replication, repair and mutability; transcription and translation; gene structure, function and expression in prokaryotes and eukaryotes; transferable DNA including plasmids, bacteriophage and transposable elements.

Prerequisites: LSB408, LSB428
Credit Points: 12  Contact Hours: 5 per week

**LSB548 BIOCHEMICAL SEPARATIONS**
An advanced course of lectures and a comprehensive project designed to integrate a number of specialist biochemical procedures including centrifugation, chromatography, electrophoresis and spectrophotometry. Students are required to design and execute an experimental protocol for the separation of selected macromolecules.

Prerequisite: LSB318  Co-requisite: LSB508
Credit Points: 12  Contact Hours: 5 per week

**LSB550 HAEMATOLOGY 5**
The first of two subjects in which the student is introduced to the diseases of the blood. Each blood disease is considered under the following headings: cause, laboratory investigation, prognosis, principles of treatment and laboratory monitoring of treatment. The blood disorders discussed in this subject include: bleeding disorders, iron deficiency anaemia, anaemia of chronic disease, macrocytic anaemia and pancytopenia.

Prerequisites: LSB450, LSB310, LSB408, LSB306
Credit Points: 8  Contact Hours: 4 per week

**LSB558 APPLIED PHYSIOLOGY**
The links between normal and abnormal food intake and normal and abnormal physiological functions in the human body; the role of nutrition in the physiology of the cardiovascular, renal, gastrointestinal and nervous systems.

Prerequisites: LSB358, LSB458
Credit Points: 12  Contact Hours: 5 per week

**LSB560 HISTOPATHOLOGY 5**
A detailed study of techniques used in routine histopathology including methods for immunohisto-chemistry and transmission electron microscopy. Emphasis is placed on the application and relevance of methods to particular diagnostic areas.

Prerequisites: LSB460, LSB408, LSB306, LSB510, LSB205
Credit Points: 8  Contact Hours: 4 per week

**LSB568 ELECTRON MICROSCOPY**
A theoretical and practical background to the operation and use of scanning and transmission electron microscopes in biological, materials and forensic science; basic principles of specimen preparation are covered and the analytical capabilities of electron beam instruments.

Credit Points: 12  Contact Hours: 5 per week

**LSB571 BIOCHEMISTRY 4**
Introduction to the structures and functions of proteins, carbohydrates, lipids and nucleic acids, basic enzymology, mechanisms of cellular energy production and the role of ATP, an outline of the metabolism of carbohydrates, lipids and amino acids and the fundamentals of protein biosynthesis and molecular biology.

Prerequisite: LSB358
Credit Points: 8  Contact Hours: 4 per week

**LSB600 CLINICAL BACTERIOLOGY 6**
A study of clinical bacteriology, dealing with the characteristics, isolation and identification of bacteria implicated in human disease, the collection and examination of clinical specimens, the initial use of computerised data bases in bacterial identification and antibiotic sensitivity tests on laboratory isolates, the interpretation and clear reporting of results.

Prerequisite: LSB400
Credit Points: 16  Contact Hours: 7 per week

**LSB608 BIOCHEMISTRY 6**
Advanced studies in protein biochemistry, including structure, analysis and evaluation of proteins, and their special properties; applications in the areas of enzymology and membrane biochemistry.

Prerequisites: LSB418, LSB408
Credit Points: 12  Contact Hours: 5 per week

**LSB618 ANALYTICAL BIOCHEMISTRY 6**
A companion subject to LSB608 which extends the material of LSB418 into biochemical analysis. This subject treats enzyme-based analyses, advanced analysis using isotopes, immunoassays and specific methods for the major biomolecules.

Prerequisite: LSB418  Co-requisite: LSB608
Credit Points: 12  Contact Hours: 5 per week

**LSB620 CLINICAL BIOCHEMISTRY 6**
This subject further develops clinical biochemistry with emphasis on enzymes, electrolytes, blood gases, drugs, vitamins, functions of the thyroid and adrenal gland, auto-analyses, quality control and steroid metabolism.

Prerequisite: LSB520
Credit Points: 8  Contact Hours: 4 per week

**LSB622 CASE STUDIES**
Application of skills and techniques to examine a current research problem in ecology. Skills in problem appraisal, experimental design and data handling and processing are developed, with appropriate field work.

Prerequisite: LSB412
Credit Points: 12  Contact Hours: 5 per week

**LSB628 APPLIED MICROBIOLOGY**
Aspects of the microbiology of foods, water and agriculture; topics include: sampling plans, foodborne infections, food hygiene, food standards and the law, food ecology and its relationship to food spoilage and preservation, industrial fermentations, NATA requirements for laboratory registration and methods of microbiological examination of foods, plant and soil
microbiology, preservation of cultures and cell lines, bacterial systematics and nomenclature.
Prerequisite: LSB528
Credit Points: 12 Contact Hours: 5 per week

**LSB630 IMMUNOHAEMATOLOGY 6**
This subject is designed to supply the competence in theoretical and practical blood transfusion required of a scientist working in a hospital blood bank. The understanding of immunology gained in LSB530 is applied to the area of blood banking. Topics include: blood group systems, compatibility testing, antibody identification, antenatal serology, clinical use of blood and blood products and quality control.
Prerequisite: LSB530
Credit Points: 8 Contact Hours: 4 per week

**LSB638 GENETIC ENGINEERING**
Introduction to techniques integral to genetic engineering; students are compelled to develop laboratory competence in the use of radioisotopes and gene probes for the labelling, hybridisation and detection of nucleic acids. Topics include: strategies for gene isolation and cloning, gene expression, animal and plant transgenesis and applications of genetic engineering in vaccine research, disease diagnosis and gene therapy.
Prerequisite: LSB538
Credit Points: 12 Contact Hours: 5 per week

**LSB642 PLANT TISSUE CULTURE 2**
Cellular and biochemical aspects of plant growth are integrated with standard plant tissue culture practice in this subject. Theories and techniques of modern plant biotechnology are introduced, including cytogenetics, protoplast isolation, and the unusual carbohydrate metabolism of plants in tissue culture.
Prerequisite: LSB342
Credit Points: 12 Contact Hours: 5 per week

**LSB648 MICROBIAL TECHNOLOGY**
An advanced course of lectures and practical sessions dealing with the industrial use of microorganisms. Topics include: screening and strain development; large scale fermentation; membrane filtration; product recovery; biochemical engineering; production of immunising agents and diagnostic reagents; primary and secondary metabolites of industrial importance; single cell protein; microbial transformations; biodeterioration and biodegradation.
Prerequisite: LSB528
Credit Points: 12 Contact Hours: 5 per week

**LSB650 HAEMATOLOGY 6**
This subject continues the study of blood diseases. Topics include: haemolytic anaemia, leukaemia and related diseases, paediatric haematology, blood disorders in the elderly and veterinary haematology.
Prerequisite: LSB530
Credit Points: 8 Contact Hours: 4 per week

**LSB658 CLINICAL PHYSIOLOGY**
This subject aims to develop in the student an appreciation of the physiological basis of the pathogenesis, clinical features and treatment of the major disorders of the cardiovascular, respiratory, haematological, renal, gastrointestinal and endocrine systems. In addition, students are introduced to topics of particular interest to those wishing to pursue a career in nutrition and dietetics, such as chemical carcinogenesis, nutrition in cancer patients, and the metabolic response to stress.
Prerequisites: LSB358, LSB458
Credit Points: 12 Contact Hours: 5 per week

**LSB660 HISTOPATHOLOGY 6**
The subject reviews recent advances in diagnostic histopathology and introduces advanced and specialised methods including scanning electron microscopy and X-ray microanalysis. A major component is an overview of techniques for diagnostic cytology concentrating on specimen preparation and the microscopic detection of cancrumous and other abnormal cells in human tissues and body fluids.
Prerequisite: LSB560
Credit Points: 8 Contact Hours: 4 per week

**LSB700 PROJECT – BIOLOGY**
All students undertaking Honours are required to select and undertake, in consultation with a supervisor, a substantial project in an appropriate area. Each project will be assessed on the basis of an extensive written report and an oral presentation.
Credit Points: 40

**LSB722 RESEARCH STRATEGIES 1**
A series of seminars presented by staff of the Faculties of Health and Science and other research scientists on research strategies and directions in their area of expertise. A series of tutorials and lectures on such topics as library searches, oral communications, written communications and ethics. Several written assignments in the areas of microbiology, biochemistry and biotechnology. A seminar presented by the student covering the background literature relevant to the student’s research project.
Credit Points: 8 Contact Hours: 3 per week

**LSB723 READINGS IN LIFE SCIENCE 1**
This subject consists of the preparation of a literature review of direct and associated relevance to LSB725. The literature review, under the guidance of the supervisor(s), includes an in-depth computer search, the presentation of a written paper demonstrating a considerable knowledge, understanding and appreciation of the literature as well as a critical appraisal of future research requirements.
Credit Points: 25 Contact Hours: 1 per week

**LSB724 PROJECT**
All students undertaking honours in biotechnology, biochemistry or microbiology are required to select and undertake, in consultation with a supervisor, a suitable project.
Credit Points: 10

**LSB732 BIOCHEMICAL SEPARATIONS**
An advanced course of lectures and a comprehensive project designed to integrate a number of specialist biochemical procedures including centrifugation, chromatography, electrophoresis and spectrophotometry. Students are required to design and execute an experimental protocol for the separation of selected macromolecules.
Prerequisite: LSB318 Co-requisite: LSB508
Credit Points: 10 Contact Hours: 5 per week

**LSB734 ANALYTICAL ELECTRON MICROSCOPY**
An advanced course in electron microscopy with emphasis on the applications of labelling and analytical techniques. Material covered in lectures and practical sessions include immunocytochemistry, in situ hybridisation, energy and wavelength dispersive X-ray analysis, electron energy loss spectroscopy and image analysis. Specialised preparation methods necessary for use of these techniques in SEM, TEM and STEM instruments are discussed, together with their advantages and limitations. Applications are
drawn from the biological, materials and forensic science areas.

**LSB736 ADVANCED GENETIC ENGINEERING**

The isolation of mRNA and DS viral RNA; DNA analysis using Restriction Fragment Length Polymorphisms (RFLPs) and nucleotide sequence determination in plasmids and bacteriophage M13; separation of chromosomes using Pulsed Field Gel Electrophoresis (PFGE); oligonucleotide synthesis and the application of gene probes in diagnostics; electroporation and chemical transformation of cells; and DNA amplification using the Polymerase Chain Reaction (PCR).

Credit Points: 10  
Contact Hours: 5 per week

**LSB738 MOLECULAR BIOLOGY**

Introduction to molecular biology including types and structures of DNA and RNA; the genetic code and protein synthesis; DNA replication, repair and mutability; transcription and translation; gene structure, function and expression in prokaryotes and eukaryotes; transferable DNA including plasmids, bacteriophage and transposable elements.

Prerequisites: LSB408, LSB428

Credit Points: 10  
Contact Hours: 5 per week

**LSB750 ADVANCED AQUACULTURE**

The biological physiological and economic basis for the selection and use of species in aquaculture; topics include: nutritional requirements of cultured species; reproductive physiology; genetic manipulation of sex; the efficacy and safety of genetic engineering; the efficacy and safety of the use growth promoters and antimicrobial agents; genetic methods of stock assessment; high technology culture; subsistence culture in developing counties.

Credit Points: 10  
Contact Hours: 5 per week

**LSB801 ADVANCED PLANT PHYSIOLOGY & BIOCHEMISTRY**

Aspects of plant physiology and biochemistry of current research interest are covered, expanding upon material in the third year Plant Biochemistry subject. Students select from a reading list, present seminars and undertake advanced practical work.

Credit Points: 9  
Contact Hours: 4 per week

**LSB803 DATA HANDLING, INTERPRETATION & BIOMETRICS**

The efficient organisation and manipulation of data using techniques available through personal computer software. Data manipulation programs are developed to facilitate the application of commercial software to the analysis and interpretation of experimental data.

Credit Points: 9  
Contact Hours: 4 per week

**LSB804 ADVANCED STUDIES IN POPULATION MANAGEMENT**

Topics include: pest control and economics; chemical pesticides and their uses; biological control agents; autocidal control and genetic control; use of pheromones, attractants and repellents; resistant varieties, cultural and ecological control; physical methods of control; integrative pest management; quarantine. Conservation management; national parks and protected areas management; legislation.

Credit Points: 9  
Contact Hours: 4 per week

**LSB805 MOLECULAR DIAGNOSIS OF DISEASE**

Advanced molecular techniques of disease diagnosis; collection and preparation of samples; the use of DNA probes in dot blots, southern blots and northern blots; RFLP analysis and DNA fingerprinting; advanced immunological techniques such as Elisa and western blotting.

Credit Points: 10  
Contact Hours: 5 per week
II genetics of behaviour. Students may be required to undertake semester-long project topics on relevant practical or theoretical problems.

**Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB984 PROJECTS 1**
  This subject develops the student's capacity for managing their own work and for persistence within a circumscribed subject area. Projects emphasise specific investigative skills in reviewing, collating, interpreting and presenting data; contribution to a seminar is usually required. Projects, supervised by various staff members, are graded individually. The Head of School coordinates assessment, and may request external assessment. Projects are to be selected by the 12th week of the fourth semester of the course. There are a number of compulsory field trips. This subject normally leads into LSB990.
  **Credit Points:** 16  **Contact Hours:** 6 per week

- **LSB985 BIOLOGICAL RESOURCES**
  A conceptual basis for aspects of ecosystem management related to naturally occurring materials and ecosystems subject to interactive use within the economy. Limitations on specific exploitation of natural resources are identified and linked with relevant aspects of land tenure, administration and law. Strategies leading to sustained yield and conservation are contrasted with those resulting in resource degradation.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB986 AQUACULTURE 2**
  The theoretical and applied aspects of warm-water aquaculture. Topics include: the design and operation of production facilities; water quality requirements and management; the biology of commercially important species; reproduction and its control; nutrition, feeding and growth; diseases and their control; methods of production improvement; polyculture; case studies.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB987 SELECTED TOPICS 2**
  As a final semester subject, provides students with an opportunity to complete a detailed study on a specific topic. The study normally is based on project work and may include a lecture program.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB988 PLANT PHYSIOLOGY 2**
  Lectures are designed to follow the sequence of biochemical events during the life history of a plant. Topics include: starch and oil mobilisation during seed germination, biosynthesis of cell membranes, cell walls, photosynthetic assimilation of nitrogen and sulphur (overview of biosynthesis of all amino acids); biochemistry of secondary plant products, e.g. terpenoids, flavonoids, and the lignin component of wood; biosynthesis of starch and oils in new seeds. Laboratory classes emphasise techniques of value to plant biochemical research.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB989 POPULATION MANAGEMENT**
  The principles of biological population management: subject deals with natural populations and three forms of management: pest control, harvesting, and conservation. Field trips and computer simulations are used to investigate management methods.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB990 PROJECTS 2**
  This elective subject may be undertaken by students who have taken LSB984 and who have the Head of School's permission to continue project work. The student either: continues a project undertaken in LSB984, or involves one or more additional projects aimed at developing a greater depth aspects of the subject matter of experimental subjects previously completed, such projects being established for either individuals or groups. Assessment is conducted as for LSB984. Individual programs for LSB990 are to be determined by the 12th week of the fifth semester of the course. There are a number of excursions.
  **Credit Points:** 16  **Contact Hours:** 6 per week

- **LSB991 HYDROBIOLOGY & AQUACULTURE**
  Aquatic biology and aquatic ecosystem management with particular reference to aquatic farming; water quality measurement; criteria and management; nutrient cycles; the composition and biology of aquatic communities; primary and secondary productivity and their control; trophic relationships and energy flow.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSB992 VIROLOGY 5**
  Lectures and laboratory exercises dealing with the nature of viruses; viral replication; viral transmission; viral diseases of humans, animals and plants and their diagnosis; virus purification and assay.
  **Credit Points:** 8  **Contact Hours:** 3 per week

- **LSN102 CELLULAR BASIS OF DISEASE**
  Cell injury and stress mechanisms. Cellular communication. The responses of organelles, cells and tissues to injury and stress including the following: immune, inflammation, thrombosis, ageing and neoplastic responses. Transplantation and regeneration.
  **Prerequisite:** 24 credit points in Master of Health Science
  **Credit Points:** 12  **Contact Hours:** 3 per week

- **LSN110 MOLECULAR BASIS OF DISEASE**
  This subject provides an understanding at the molecular level, of the etiology, diagnosis and treatment of various diseases, by a study of molecular structures, biochemical reactions, and the integration and control of metabolism. Topics include: gene structure and function, proteins - structure and molecular dysfunction, and enzymes - properties and alterations in diseases; metabolic integration and hormone action, hormones and organ disease, disorders of carbohydrate and lipid metabolism and chemotherapy.
  **Prerequisite:** 24 credit points in Master of Health Science
  **Credit Points:** 12  **Contact Hours:** 3 per week

- **LSN116 HUMAN FACTORS**
  Introduction to the human factors in occupational health and safety. Basic human anatomy and physiology are reviewed prior to a discussion of how the physical-chemical environment of the workplace can impinge on normal physiological function. The psychology of humans in the work environment is discussed with consideration of attitudes towards health and safety. The use of ergonomics, anthropometry and biomechanics in the design of safer workplaces will be reviewed.
  **Credit Points:** 12  **Contact Hours:** 3 per week
LSN150 EPIDEMIOLOGY & RESEARCH STRATEGIES
An introduction to the principles and applications of epidemiology with emphasis given to its scope and value in establishing disease aetiology. Topics include: epidemiological methods (descriptive, analytical and experimental), epidemiological concepts, causal relationships, measurement of morbidity and mortality, statistical overview of the health of the Australian population, and the investigation of an epidemic.
Credit Points: 12  Contact Hours: 3 per week

LSN158 ULTRASONIC PATHOLOGY
Pathology as applicable to diagnostic ultrasound; basic embryology and genetics.
Credit Points: 6  Contact Hours: 2 per week

LSN161 ANATOMY & PHYSIOLOGY 1
A study of basic functional anatomy covering cells, tissues, and the organ systems of the human body. The lectures and practical work are integrated and emphasise the relationships between structure and function.
Credit Points: 6  Contact Hours: 2 per week

LSN165 ANATOMY & PHYSIOLOGY 2
A study of the mechanisms and controls of body functions. Stress is placed on fundamental principles and the practical work serves to illustrate these principles, as well as providing experience in physiological recording and investigative techniques.
Credit Points: 8  Contact Hours: 3 per week

LSN306 PATHOPHYSIOLOGY
A study of selected pathophysiological states which represent major alteration in physiological functioning, occurring in each developmental phase.
Prerequisite: 72 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN401 ADVANCES IN MEDICAL LABORATORY SCIENCE
A series of lectures to provide current and topical information across the general field of medical laboratory science. In addition, topics which have significant implications on the advancement of the profession are presented, e.g., computers, laboratory automation, biotechnology, self-diagnosis. The lecture program is flexible to allow for the incorporation of visiting speakers or for the introduction of a current interest topic. In addition to formal lectures the subject offers tutorial and student seminar sessions.
Prerequisite: 72 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN510 CLINICAL BIOCHEMISTRY 1
The use of clinical biochemistry in the diagnosis of diseases. Disorders of fluid and electrolyte balance systems, disorders of the gastrointestinal, pancreatic and hepatobiliary systems, and disorders of the cardiovascular system and hypertension are studied, concentrating on diagnosis and the interpretation of biochemical results. In addition, aspects of instrumentation and laboratory methods are reviewed.
Prerequisite: 96 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN511 HAEMATOLOGY 1
Haematologic diseases; their aetiology, laboratory investigation, pathogenesis, principles of treatment and laboratory monitoring. The study program includes seminars, oral presentations and assignments. Topics are chosen from the following areas: haemopoietic kinetics, haematologic oncology, haemolytic disease, haemostasis and the haematologic manipulations of systemic disease. Assessment is by formal examination, assignments and seminar participation.
Prerequisite: 96 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN512 HISTOPATHOLOGY 1
An in-depth review of recent advances and modern methods in diagnostic histopathology. Major topics include: immunohistochemistry, enzyme histochemistry and transmission electron microscopy methods.
Prerequisite: 96 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN515 MICROBIOLOGY 1
Bacteriology, virology, mycology and parasitology. Topics are chosen to increase the knowledge and understanding of microorganisms associated with human infection. Recent trends and developments in diagnostic microbiology are studied. A critical approach to the assessment of laboratory practices and interpretation of data will be developed.
Prerequisite: 96 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN517 IMMUNOLOGY 1
Exposure to information retrieval systems and practice in scientific writing. Five essay topics are selected following discussion with students, supervisor/employer.
Credit Points: 12  Contact Hours: 3 per week

LSN518 DIAGNOSTIC CYTOLOGY 1
Review of recent advances and modern methods in diagnostic cytology. The major topics are in gynaecological cytology.
Credit Points: 12  Contact Hours: 3 per week

LSN530 DISSERTATION
The dissertation includes a supervised project in an approved topic area selected by the student. The project area may be novel, developmental or directed at an investigation of the introduction of a new system into the laboratory. Other areas which are considered appropriate include epidemiological analyses, laboratory safety, laboratory design or the efficacy of laboratory service. Each student submits a written project report in a style to present the data.
Prerequisite: 96 credit points in Master of Health Science.
Credit Points: 12  Contact Hours: 3 per week

LSN610 CLINICAL BIOCHEMISTRY 2
The use of clinical biochemistry in the diagnosis of diseases. Endocrinology, disorders of the muscular and skeletal systems, disorders of special groups, nutrition and drugs, neurochemistry and neural disorders, cancer-associated biochemical abnormalities, and the seriously ill patients are studied, concentrating on diagnosis and the interpretation of biochemical results.
Prerequisite: LSN510
Credit Points: 12  Contact Hours: 3 per week
LSN611 HAEMATOLOGY 2
Topics include: age-related changes to the haemopoietic system, perinatal haematology, paediatric haematology and haematology in the elderly, nutrition anaemias, the role of the forensic laboratory, transplantation, automation and quality control. Since outside lecturers participate in these specialist electives some interchange of topics between this subject and LSN511 may be necessary.
Prerequisite: LSN511
Credit Points: 12 Contact Hours: 5 per week

LSN612 HISTOPATHOLOGY 2
Investigation of methods in diagnostic histopathology. The design and assessment of diagnostic programs to aid the identification of tumours and diseases of selected organ systems. A study of specialised techniques including aspiration cytology, scanning electron microscopy and analytical electron microscope methods.
Prerequisite: LSN512
Credit Points: 12 Contact Hours: 3 per week

LSN613 MICROBIOLOGY 2
Areas of bacteriology, virology, mycology and parasitology. Topics are chosen to increase the knowledge and understanding of micro-organisms associated with human infection. Recent trends and developments in diagnostic microbiology are studied. A critical approach to the assessment of laboratory practices and interpretation of data is developed.
Prerequisite: LSN513
Credit Points: 12 Contact Hours: 3 per week

LSN614 IMMUNOLOGY 2
Assist with the preparation of scientific publications and the presentation of data orally. Students are expected to prepare a short scientific paper based on raw data provided. They also prepare and present a short seminar based on the scientific paper.
Prerequisite: LSN514
Credit Points: 12 Contact Hours: 3 per week

LSN615 DIAGNOSTIC CYTOLOGY 2
Exploration of recent advances, modern methods and their applications in diagnostic cytology of various body sites. Topics include: respiratory and urinary tract, body fluids and specialised techniques such as fine needle aspiration.
Prerequisite: LSN515
Credit Points: 12 Contact Hours: 3 per week

LSN616 MOLECULAR DIAGNOSIS OF DISEASE
This subject consists of a series of lectures and laboratory exercises in advanced molecular techniques of disease diagnosis: the collection and preparation of samples; the use of DNA probes in dot blot, southern blots and northern blots, RFLP analysis and DNA fingerprinting; advanced immunological techniques such as ELISA and western blotting.
Credit Points: 12 Contact Hours: 3 per week

LSP112 MOLECULAR BIOLOGY I
The isolation of mRNA and cDNA viral RNA; DNA analysis using Restriction Fragment Length Polymorphisms (RFLPs) and nucleotide sequence determination in plasmids and bacteriophage M13; separation of chromosomes using Pulse Field Gel Electrophoresis (PFGE); oligonucleotide synthesis and the application of gene probes in diagnosis; electrophoresis and chemical transformation of cells; and DNA amplification using the Polymerase Chain Reaction (PCR).
Credit Points: 12 Contact Hours: 5 per week

LSP113 TOPICS IN BIOTECHNOLOGY
Commercial perspectives of a biotechnology company; funding for commercial research; research strategies in biotechnology; methods of reviewing the biotechnology literature; DNA and protein sequence data banks. Students are also required to present a seminar on some aspect of biotechnology research.
Credit Points: 12 Contact Hours: 5 per week

LSP114 PROJECT
All students undertaking the Graduate Diploma in Biotechnology are required to select, in consultation with their employer and an academic supervisor, a suitable research project. The aims of the project are that students, under supervision, should participate in the selection of a suitable topic for investigation; conduct a literature search in the subject area; plan an experimental program which includes scheduling laboratory space, equipment and consumables; undertake work at the bench; record, assess and interpret the results; write a concise thesis in a standard form of presentation.
Credit Points: 12 Contact Hours: 3 per week

LSP514 INTRODUCTION TO PLANT SCIENCE
Consideration of plants as living organisms; survey of the plant kingdom emphasising revolutionary trends; complexity of organisation and integration of structural elements; evolution of specialised organs such as leaves, roots, flowers, and propagules; consideration of plant systematics and taxonomy as scientific approaches to coping with diversity, the concept of classification, and the development and use of keys for identification. Values and use of numerical classification techniques are introduced; an introduction to physiological processes: photosynthesis and respiration, responses to light, temperature, nutrients, water balance and stress, nutrient and mineral deficiencies, and diseases and pathogens.
Credit Points: 4 Contact Hours: 2 per week

LSP515 INTRODUCTORY BIOLOGY
An introduction to the classification of organisms. Examination of the morphology, anatomy, reproduction, life-history and physiology of selected species.
Credit Points: 8 Contact Hours: 3 per week

LSP516 MICROSCOPY TECHNIQUES
The use and roles of various types of optical microscopes; microscope accessories for counting, measuring, drawing and photography; procedures for preparing specimens for examination and histological/histochemical study.
Credit Points: 8 Contact Hours: 3 per week

LSP517 BIOLOGICAL CHEMISTRY I
An introduction to the basic chemistry of biological systems and the biochemistry of major groups of biologically important compounds. Topics include: solution chemistry, biochemistry of amino acids, proteins, fats and sugars; basic aspects of enzyme chemistry; nucleic acids and protein synthesis.
Credit Points: 8 Contact Hours: 3 per week

LSP518 LABORATORY INSTRUMENTATION I
The principles, care and effective usage of basic laboratory equipment including glassware, plastics, balances, spectrophotometers, flamephotometers,
autotitrators, pH meters and specific ion meters. Programmable calculators and computers are used during the practical course to illustrate modern methods of data manipulation. In addition the practical course aims to provide experience in the handling of chemicals, and in the preparation of reagents and standards. In this work emphasis is placed on aspects of laboratory safety.

Co-requisite: LSX111

Credit Points: 8  Contact Hours: 4 per week

**LSX123 MICROBIOLOGY I**

An introduction to the biology of bacteria, fungi, algae, protozoa and viruses, with consideration of structure, nutrition, reproduction, genetics, and classification systems. The practical course is aimed at developing the manipulative skills necessary for laboratory identification of microbial forms.

Credit Points: 8  Contact Hours: 3 per week

**LSX124 PERSPECTIVES IN MEDICINE**

A general introduction to the health care area; topics include: health in the Australian society, workplace safety, the function of various types of laboratories in health care, the laboratory identification of microbial forms.

Credit Points: 4  Contact Hours: 1 per week

**LSX125 ANATOMY & PHYSIOLOGY I**

An integrated study of anatomy and physiology. Emphasis is placed on gaining an appreciation of the relationship between structure and function at the levels of cells and tissues, organ and organ systems. Initially the morphology and physiology of cells and tissues are examined and then the structure and function of the skeletal, muscular, nervous and integumentary systems are studied.

Credit Points: 8  Contact Hours: 3 per week

**LSX210 BIOLOGY B**

This subject extends the basic concepts presented in Introductory Biology and also includes aspects of mendelian genetics, gene expression and cell differentiation, as well as reproduction and development in selected animals and plants.

Credit Points: 8  Contact Hours: 3 per week

**LSX211 CELL STRUCTURE & FUNCTION**

A general course in cell biology including the living cell and its processes, structure and function. Photosynthesis, respiration, intermediary metabolism are emphasised.

Credit Points: 8  Contact Hours: 3 per week

**LSX212 BIOLOGICAL DATA HANDLING**

Application of statistical procedures to surveys, sampling and design of experiments. Recognition of problems arising from variability in results and particular data type. Methods of data collection, checking, analysis and presentation are discussed. An introduction to the use of computer software packages is included.

Prerequisite: MAA251

Credit Points: 8  Contact Hours: 3 per week

**LSX213 INTRODUCTORY BIOCHEMISTRY**

Credit Points: 8  Contact Hours: 3 per week

**LSX221 BIOLOGICAL CHEMISTRY 2**

Basic metabolism; topics include: biological catalysis; energetic of biological systems; catabolic and anabolic pathways for the metabolism of carbohydrates, lipids, amino acids and nucleic acids; metabolic control and integration.

Prerequisites: LSX121, LSX122

Credit Points: 8  Contact Hours: 4 per week

**LSX222 LABORATORY INSTRUMENTATION 2**

Lectures and practical work designed to integrate the principles and techniques of macro-molecule separation by a variety of chromatographic procedures and various methods of electrophoresis, dialysis, filtration and centrifugation.

Prerequisite: LSX122

Credit Points: 8  Contact Hours: 4 per week

**LSX223 MICROBIOLOGY 2**

The growth of microbial populations and methods of controlling growth; sterilisation and disinfection methods; enzymic activity of microorganisms; the identification of the micro-organisms relevant to public health; host-parasite relationships and an introduction to immunity.

Prerequisite: LSX123

Credit Points: 8  Contact Hours: 3 per week

**LSX224 PATHOLOGY**

The application of scientific methods to the study of the general principles of disease processes and selected diseases of the organ systems. Correct understanding and use of pathological terms and concepts are emphasised.

Credit Points: 8  Contact Hours: 2 per week

**LSX225 ANATOMY & PHYSIOLOGY 2**

The broad objectives outlined LSX125 are continued; the relationships between structure and function at the level of organs and systems; the cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive, and endocrine systems.

Prerequisite: LSX125

Co-requisite: LSX222

Credit Points: 8  Contact Hours: 3 per week

**LSX310 INTRODUCTION TO BIOCULTURE**

This subject introduces students to techniques of algal culture and plant tissue culture. Topics include: nutrition, continuous production techniques, and the use of growth regulators to control growth. The role of environmental factors in controlling growth also is discussed. This subject provides the theoretical basis for students undertaking electives in aquaculture techniques and/or plant tissue culture.

Credit Points: 8  Contact Hours: 3 per week

**LSX311 COMPUTER APPLICATIONS IN BIOLOGY**

An introduction to microcomputers and applications software such as word processing, databases, spreadsheets, and computer graphics for report presentation. This subject is not oriented towards any specific computer language.

Credit Points: 8  Contact Hours: 3 per week
m LSX312 ANIMAL & PLANT TECHNIQUES
Care and maintenance of animal and plant resources, both micro- and macroscopic. Animal handling, maintenance of glasshouse resources, culture collections and sterile techniques, preparation of specimens for permanent collections and the maintenance of such collections.
Credit Points: 12  Contact Hours: 4 per week

m LSX313 TAXONOMY
Investigation and identification of local flora and fauna; use and construction of keys. The concepts of systematic, classification, taxonomy and nomenclatural procedure are introduced in short lectures and tutorials associated with the practical exercises.
Credit Points: 8  Contact Hours: 3 per week

m LSX314 AQUACULTURE TECHNIQUES
Topics include: water quality monitoring; culture methods for microscopic food organisms; disease and parasite identification and treatment; techniques associated with spawning, rearing, handling and stock assessment.
Credit Points: 8  Contact Hours: 3 per week

m LSX315 PLANT PHYSIOLOGY
An introduction to the important aspects of whole-plant physiology, including nutrition, water relations, photosynthesis, translocation and stress physiology.
Prerequisite: BEA108
Credit Points: 8  Contact Hours: 3 per week

m LSX316 HYDROBIOLOGICAL TECHNIQUES
An introduction to the characteristics of aquatic ecosystems. Students gain practical experience using methods, equipment and instrumentation to estimate population abundance, distribution, biomass and productivity; determine community structure and diversity; determine physical characteristics and morphology and assess water quality. Compulsory field studies form a significant part of this subject.
Credit Points: 8  Contact Hours: 3 per week

m LSX320 CLINICAL BIOCHEMICAL TECHNIQUES 3
A study of the basic chemical procedures used in biochemical laboratories with emphasis on technique and accuracy. Topics include: tests of renal, pancreatic, hepatic and gastric functions, and the estimation of serum proteins and lipids.
Prerequisites: LSX221, LSX225
Credit Points: 8  Contact Hours: 4 per week

m LSX321 CLINICAL MICROBIOLOGICAL TECHNIQUES 3
The techniques used in isolation and identification of bacteria important in human and animal infections; the use of computerised data bases to assist in bacterial identification; tests for the sensitivity of bacteria to antibiotics; preparation, sterilisation, quality control and use of bacteriological media.
Prerequisite: LSX223
Credit Points: 8  Contact Hours: 4 per week

m LSX322 HAEMATOLOGICAL TECHNIQUES 3
Lectures and associated practical work in basic haematological techniques. Topics include the counting of blood cells, the preparation, staining and examination of blood films, the determination of the red cell indices, supravital staining techniques and erythrocyte sedimentation rate and origin and maturation of blood cells.
Prerequisites: LSX125, LSX225
Credit Points: 8  Contact Hours: 4 per week

m LSX323 HISTOLOGICAL TECHNIQUES 3
Methods of preparing tissue samples for examination by the various forms of light microscopy. Topics include: fixation, tissue processing, microtomy and an introduction to staining and light microscope techniques.
Prerequisites: LSX125, LSX225, LSX122
Credit Points: 8  Contact Hours: 4 per week

m LSX324 IMMUNOLOGICAL TECHNIQUES 3
An introduction to immunology with particular emphasis on the principle and performance of basic immunological techniques including blood grouping. Topics include: antigens, antibodies and the immune system.
Prerequisites: LSX125, LSX225
Credit Points: 8  Contact Hours: 4 per week

m LSX325 CYTOLOGICAL TECHNIQUES 3
Lectures and associated practical sessions in cytological methods and normal gynaecological cytology. This provides a basis for the study of clinical cytology offered in LSX425.
Prerequisites: LSX221, LSX125, LSX225
Credit Points: 8  Contact Hours: 4 per week

m LSX331 FOUNDATIONS OFANAESTHETIC TECHNIQUES
Introduction to the ethical, moral and legal responsibilities of anaesthetic technicians; the standard equipment used in the operating rooms.
Credit Points: 12  Contact Hours: 5 per week

m LSX332 PHYSIOLOGY & PHARMACOLOGY
A study of the anatomy and physiology of the main systems, with emphasis on the major pathological disturbances. Also an introduction to the pharmacology of drugs used in anaesthesia.
Prerequisite: LSX225
Credit Points: 12  Contact Hours: 5 per week

m LSX333 ELECTRONICS & COMPUTING
An understanding of the basic principles of electronics, enabling an understanding of the complex equipment used for the dispensing of anaesthesia; the basic hardware and software of computers; word processing, databases and spreadsheet.
Credit Points: 12  Contact Hours: 5 per week

m LSX334 OPERATING ROOM EQUIPMENT
Introduction to the ancillary equipment used in operating rooms; the methods in use in the operating rooms; team roles in the operating room.
Credit Points: 12  Contact Hours: 5 per week

m LSX410 ENVIRONMENTAL BIOLOGY
Ecosystems and energy flow. Productivity, decomposition and nutrient cycling. Niche, species packing, diversity, colonisation and community structure. Short compulsory field trips form an integral part of the subject.
Credit Points: 8  Contact Hours: 3 per week

m LSX411 POPULATION BIOLOGY
Population biology including: structure and dynamics of populations, evolution and differentiation in populations; the relationships between the genetics, energetics and dynamics of populations leading to
particular life-history strategies. Field excursions are a compulsory part of the subject.

Co-requisite: LSX412
Credit Points: 8 Contact Hours: 3 per week

- **LSX412 FIELD TECHNIQUES**
  Activities include surveying, soil and climatic measurements, assessment and sampling of animal and plant populations, evaluation of spatial changes in plant and animal communities in relation to environmental gradients. Skills are gained not only in sampling and analytical techniques, but also in the establishment and running of a field camp. An extended field excursion is a compulsory part of the subject.

  Credit Points: 8 Contact Hours: 3 per week

- **LSX413 APPLICATIONS IN ELECTRON MICROSCOPY**
  The roles played by various forms of electron microscopy in the biological sciences and presents an introduction to the basic techniques and their limitations.

  Prerequisites: BEA108, BEA198

  Credit Points: 8 Contact Hours: 3 per week

- **LSX414 ANIMAL PHYSIOLOGY**
  The general physiological processes which sustain life and an understanding of animal-environment interactions.

  Credit Points: 8 Contact Hours: 3 per week

- **LSX415 PLANT CELL TISSUE CULTURE**
  Topics include: techniques, equipment and media used in plant tissue culture, the role of plant growth regulators and micropropagation. The significance of organogenesis, somatic embryogenesis and genetic variability in plant tissue culture are discussed. The lecture program is supported by appropriate laboratory exercises.

  Credit Points: 8 Contact Hours: 3 per week

- **LSX420 CLINICAL BIOCHEMICAL TECHNIQUES 4**
  A study of more complex techniques used in clinical biochemical laboratories, including enzyme assays, estimations of electrolytes, blood gases, drugs, vitamins and hormones. Auto analytical techniques and quality control are also treated.

  Prerequisite: LSX320

  Credit Points: 8 Contact Hours: 4 per week

- **LSX421 CLINICAL MICROBIOLOGICAL TECHNIQUES 4**
  Basic microbiological techniques in the following disciplines: virology, mycology and parasitology (enteric parasites). The practical periods are used to reinforce the theoretical aspects of the subject.

  Prerequisite: LSX223

  Credit Points: 8 Contact Hours: 4 per week

- **LSX422 HAEMATOLOGICAL TECHNIQUES 4**
  This subject is an extension of LSX322. The student is introduced to the common blood disorders. A brief outline of their courses and laboratory investigation is given. The main emphasis is the use of basic haematological techniques and some specialised laboratory procedures used in the investigation of commonly encountered blood diseases. The basic theory of haemostasis and the screening tests used in the investigation of the bleeding disorders are discussed.

  Prerequisite: LSX322

  Credit Points: 8 Contact Hours: 4 per week

- **LSX423 HISTOLOGICAL TECHNIQUES 4**
  An advanced course dealing with specialised methods for identifying tissue components. Topics include: electron microscopy, histochemistry, immunohistochemistry. Emphasis is placed on the practical application of these methods in histopathology.

  Prerequisites: LSX221, LSX322

  Credit Points: 8 Contact Hours: 4 per week

- **LSX424 TRANSFUSION TECHNIQUES 4**
  The basic knowledge of immunology gained in LSX324 applied to the study of human blood group systems. Topics include: principles of immunohaematology, ABO blood group, Rh blood group system, compatibility testing, antibody identification, investigation of transfusion reactions, antenatal testing, quality control and intravenous fluids and blood products.

  Prerequisite: LSX324

  Credit Points: 8 Contact Hours: 4 per week

- **LSX425 CYTOLOGICAL TECHNIQUES 4**
  A course of lectures and associated practical work presenting specialised preparative methods for non-gynaecological cytology and demonstrating the evaluation of specimens commonly encountered in routine diagnostic cytology.

  Prerequisite: LSX325

  Credit Points: 8 Contact Hours: 4 per week

- **LSX431 CARDIAC CARE & RESUSCITATION**
  In the operating room and intensive care units, the cardiac status of patients is monitored by several devices. Students are introduced to these devices as well as to the resuscitation equipment used in emergency situations and special equipment used in lung and cardiac surgery.

  Prerequisite: LSX332

  Credit Points: 12 Contact Hours: 5 per week

- **LSX432 CARE OF RESPIRATORY AIRWAYS & INTENSIVE CARE**
  The care and maintenance of equipment used for the respiratory airways and in intensive care; acid-base balance, blood gases, and the equipment needed for the monitoring of those parameters.

  Prerequisite: LSX332

  Credit Points: 12 Contact Hours: 5 per week

- **LSX433 ANAESTHESIA FOR SPECIALISED SURGERY**
  Introduction to the different surgical interventions requiring anaesthesia; the techniques used and their effects on the vital parameters of patients in these special circumstances.

  Prerequisite: LSX332

  Credit Points: 12 Contact Hours: 5 per week

- **LSX434 PROFESSIONAL PRACTICE**
  The practical skills needed for the proper delivery of anaesthetic in different situations. This is essentially a practical subject, which can only be taken towards the end of the course. The aim is for students to become proficient and confident in assisting with the delivery of anaesthesia.

  Prerequisite: LSX334

  Co-requisites: LSX431, LSX432, LSX433

  Credit Points: 12 Contact Hours: 5 per week

- **LWBIO11 INTRODUCTION TO LAW**
  The institutions of the law: the courts, Parliament, the judiciary, the legal profession, and their working, and the doctrines and methodology of the Law, including
the doctrine of precedent and the principles of statutory interpretation.
Credit Points: 12 per semester
Contact Hours: 3 per week

- **LWB102 LAW OF CONTRACT**
  The substantive principles of contract law, as taught, include: definition of the Law of Contract, outline of remedies; formation of contracts; equitable estoppel; express and implied terms; factors vitiating contracts; capacity to contract; privity of contract; discharge of contract; breach of contract.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB103 TORTS**
  At its most general level this branch of the law is concerned with the question of compensation to be given by a person causing a loss to a person suffering a loss. Areas of everyday conflict which may be resolved by principles of tort liability include damage sustained as a result of a motor-vehicle collision, and injury to a person's reputation from publication of defamatory material. The rules are examined to ascertain whether they satisfy the critical test: functional adequacy in terms of contemporary values.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB104 LEGAL RESEARCH & WRITING I**
  Basic legal research skills and methodology, and how to write assignments and solve legal problems. A study of the hierarchy of the courts and the doctrine of precedent; how to use a law library effectively; practice in handling the most important research materials. An introduction to the use of computerised legal research is included.
  Credit Points: 4 per semester
  Contact Hours: 1 per week

- **LWB201 LAND LAW**
  The principles relating to the law of Real Property in Queensland: the rights, interests and obligations which can exist in relation to land, and the methods of creating, enforcing, assigning and extinguishing such rights, interests and obligations. The course encompasses: the concept of real property, the doctrines of tenure and of estates; equitable interests; the Torrens system; covenants; buildings; leaseholds; interests affecting land; co-ownership; future interests and perpetuities; building units title and group title; time-sharing; Crown leasehold.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB202 CRIMINAL LAW & PROCEDURE**
  The criminal law in force in Queensland, encompassing criminal responsibility, parties to offences, and major indictable offences. The wider context of the operation of the criminal law is considered, introducing students to penal principles and the justifications for imposing punishment by the State, to aspects of the disposition of offenders in the sentencing part of a criminal trial, and to a consideration of imprisonment and release procedures.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB203 CONSTITUTIONAL LAW**
  A study of the extent of power of the institutions which make, administer or apply the law. The federal constitution divides power between the State and Commonwealth governments, and between the legislative, executive and judicial branches of the Commonwealth government and actions which ignore those divisions can be challenged successfully in courts of law.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB301 EQUITY**
  Equitable doctrines were developed to complement the sometimes inflexible rules of the common law. In Semester 1, students are introduced to basic equitable principles, including a study of equitable estates and interests. Unconscionable dealings are also studied in some detail. In Semester 2, major areas of study include the law of trusts and equitable assignments.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB302 FAMILY LAW**
  An examination of the manner in which the law treats the special social relationships which exist among members of a family and transforms them into legal relationships. Subjects include: the family as a legal phenomenon; annulment of marriages; dissolution of marriages; consequences of separation and divorce; children and property. The legal rules which govern mercantile dealings in personal property. The course encompasses the legal framework, the various kinds of personal property recognised in the Australian legal system, and rules which especially affect commercial transactions. Matters include: nature and sources of commercial law; personal property; negotiable instruments including bills of exchange and cheques; bailment; sale of goods; consumer protection under the Sale of Goods Act 1974; insurance.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB303 COMMERCIAL LAW**
  The legal rules which govern mercantile dealings in personal property. The course encompasses the legal framework, the various kinds of personal property recognised in the Australian legal system, and rules which especially affect commercial transactions. Matters include: nature and sources of commercial law; personal property; negotiable instruments including bills of exchange and cheques; bailment; sale of goods; consumer protection under the Trade Practices Act 1974; insurance.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB304 JURISPRUDENCE**
  Jurisprudence involves the application of insights gained from philosophy: in particular from logic and law, political and social philosophy: to the study of law. Topics include: historical background to modern theories, sociological and historical descriptions of law and legal change, theories of limited or unlimited government power, recognition of the rule of law and legal systems, legal reasoning, proper direction of legal change.
  Credit Points: 12 per semester
  Contact Hours: 3 per week

- **LWB305 LOCAL GOVERNMENT LAW**
  The sources of legal authority for the government of cities, towns and shires, with particular reference to the City of Brisbane; the laws relating to town planning and subdivision, including the principles applicable to the rezoning of land; uses of land; the control of developments by local authorities; rights to object to developments; the control exercised over subdivision of land by local authorities; rights of appeal from local authority decisions; and the structure, function and purpose of the Local Government Court.
  Credit Points: 8
  Contact Hours: 3 per week

- **LWB306 INSOLVENCY LAW**
  The subject consists of two parts. The first deals with the insolvency of individuals and involves a study of the Bankruptcy Act 1966 (Cth). The second part covers winding up of companies, schemes of arrangement and official management as procedures other than winding up which may be open to an insolvent
company, and the law relating to recovership and
mortgages in possession. This includes a consideration
of the relevant provisions of the Corporations Law.
Credit Points: 8 Contact Hours: 2 per week

■ LWB308 INDUSTRIAL LAW
Industrial law examines the rights and duties of
employers and employees under the law of employ­
ment, breach of these duties; and the remedies of both
parties; entitlement to workers compensation and the
benefits available; the law governing the operation of
trade unions and the rights of members; the settlement
of industrial disputes in the Commonwealth and State
spheres by conciliation and arbitration.
Credit Points: 8 Contact Hours: 2 per week

■ LWB309 SUCCESION
Intestate and estate succession; definitions; joint
and mutual wills; formal requirements for execution of
valid will; alteration, revocation and revival of wills;
administration of assets: duties, powers, rights and
liabilities of personal representatives; family main­
tenance provisions; power of court to vary a will.
Credit Points: 8 Contact Hours: 2 per week

■ LWB311 ADMINISTRATIVE LAW
An examination of the basis on which the courts
review both administrative action taken by govern­
ments and delegated legislation, and of the remedies
available and restrictions on judicial review. The
alternative means of review, the Ombudsman and the
Administrative Appeals Tribunal and access to
government information. The special position of the
Crown and the question of government liability in
contract and tort.
Credit Points: 12 per semester Contact Hours: 3 per week

■ LWB312 LAND CONTRACTS
This subject examines in detail the principles involved
in the construction of contracts for the sale of land,
with special emphasis upon the current standard REIQ
Contract in use in Queensland. Special consideration
is given to statutory requirements as they affect such
contracts, including those relating to building units
and group titles conveyancing.
Credit Points: 12 Contact Hours: 3 per week

■ LWB313 DISCRIMINATION/EQUAL OPPORTUNITY LAW
An examination of the law and policy with respect to
discrimination and equal opportunity in Australia;
relevant international treaties and Australian legisla­
tion such as the Racial Discrimination Act, Sex
Discrimination Act, Human Rights and Equal Oppor­
tunity Commission Act and Privacy Act; the practice
and procedure of the Human Rights Commission and
state bodies.
Credit Points: 12 Contact Hours: 3 per week

■ LWB401 COMPANY LAW & PARTNERSHIP
Company law dominates the subject and is mostly
concerned with registered companies. The law relat­
ing to proprietary companies is dealt with fully, that
relating to public companies in outline only. Topics
include: the nature of registered companies, including
procedure to obtain registration, and classification of
registered companies; prospectuses; general meet­
ings; enforcement of directors' and controlling
members' duties; shares, share capital and dividends;
wind-up.
Credit Points: 12 per semester Contact Hours: 3 per week

■ LWB402 EVIDENCE
The rules and principles that relate to the presentation
and proof of facts to a Court of Law. Litigation largely
involves the application of substantive law to the facts
that are determined according to the rules of evidence
— students' knowledge of the substantive law is as­
sumed. In addition to the technical rules that are
considered during the course, students are encouraged
to view the principles in the context of the adversary
system and to recognize the problems of applying
rigid rules within that system.
Credit Points: 12 Contact Hours: 3 per week

■ LWB403 TAXATION LAW
The Income Tax Assessment Act 1936 (Cth) and
some related statutes. Topics include: the administra­
tive structure and scheme of the Act, residence of
taxpayers, determining assessable income and deduc­
tions, taxation of partnerships, trusts and companies,
capital gains tax; tax planning; liability of tax ad­
dvisors, aspects of fringe benefit tax.
Credit Points: 12 per semester Contact Hours: 3 per week

■ LWB404 CIVIL PROCEDURE
Examination of the procedures by which Superior
Courts resolve civil disputes. Students become
familiar with Supreme, District and Federal Court
rules and their application to civil litigation. Students
are instructed on how to manage civil litigation files
by means of extensive simulations and drafting.
Credit Points: 12 per semester Contact Hours: 3 per week

■ LWB405 SOLICITORS' TRUST ACCOUNTS
Intending solicitors must study this subject which
examines the Trust Account Act and Regulations and
related legislation, including the Legal Assistance Act
and Queensland Law Society Act. The subject
provides detailed study of the legislation for practical
and accounting purposes, including the format for
documentation and records; reconciliations; invest­
ments; internal control and trust ledger accounts and
trial balance. The course also examines the role of the
auditor, audit requirements and Ministerial involve­
ment.
Credit Points: 8 Contact Hours: 2 per week

■ LWB406 PUBLIC INTERNATIONAL LAW
An examination of the legal rules which govern the
activities of nations between themselves and with
international organisations, such as the UN; the cre­
ation of international law: treaties, customary law,
general principles of law; the concept of international
legal personality: statehood, self-determination,
recognition; the effects of international law:
sovereignty, international responsibility, human
rights, the law of armed conflict; the problem of the
status of the law itself; comparative approaches to
international legal thinking.
Credit Points: 12 Contact Hours: 3 per week

■ LWB407 CONFLICT OF LAWS
An indepth analysis of the body of law governing the
resolution of private legal problems with a significant
foreign element. It includes: jurisdiction of domestic
courts to determine matters having a foreign element;
enforcement of foreign judgments in the domestic
jurisdiction; choice of law for the resolution of the
dispute; both generally and in relation to family law,
contract, tort, property and succession.
Credit Points: 12 Contact Hours: 3 per week
LWB409 PROFESSIONAL CONDUCT
All LLB students, whether they intend to become barristers or solicitors, must study both parts of this subject. Barristers - conduct and etiquette at the Bar; specifically the character of practice at the Bar; regulation of practice at the Bar in Queensland; the respective duties of Barristers to the Law, the Court, the public, the client and the opponent. Solicitors - professional courtesies, division of the profession in Queensland, the Statutory Committee, malpractice, professional conduct, duties of a solicitor, respective functions of barristers and solicitors, a solicitor acting for more than one party, advertising fees, trust accounts and legal professional negligence.
Credit Points: 2
Contact Hours: 2 per week for 5 weeks (10 hours)

LWB410 TRADE PRACTICES LAW
This elective subject deals with the law established by the Trade Practices Act 1974 (Cth), as amended, and related State Laws. Topics include: background to, and need for, the legislation; constitutional basis of the Commonwealth Act; administrative arrangements and enforcement procedures; control of restrictive practices; prohibition of unfair practices; jurisdictional problems and remedies.
Credit Points: 12
Contact Hours: 3 per week

LWB412 RESEARCH & WRITING PROJECT
An arranged and supervised piece of research into some area of legal knowledge, and the writing of a paper of between 10,000 and 15,000 words on the results of the research and conclusions drawn therefrom. The paper becomes the property of the Faculty of Law and may be placed in the Law Library. A student wishing to undertake the Research and Writing Project should discuss the matter as early as possible in the semester immediately before that in which he/she proposes to undertake it. The written proposal must reach the Dean at least two clear weeks before the beginning of the teaching semester in which the project is undertaken, and the proposal is accepted or refused, and the student notified accordingly, not later than the first day of that teaching semester.
Credit Points: 12
Contact Hours: 3 per week

LWB414 DRAFTING & LEGAL TRANSACTIONS
A study of the general principles of drafting and analysis of instruments commonly used in practice including deeds, special conditions in Torrens Title conveying contracts, options to purchase and renew, Land Act contracts, business contracts and leases. Topics include: an introductory study of stamp duty and its applications; examination of securities and trust instruments. Drafting covers mortgages, unit trusts and discretionary trusts, together with stamp duty implications.
Credit Points: 8 per semester
Contact Hours: 2 per week

LWB415 LEGAL RESEARCH & WRITING 2
This advanced subject revises, extends and tests students' legal research skills acquired in the introductory subject. Sources from other jurisdictions such as the UK, Canada, New Zealand and the USA are included. An important section of this subject is the researching/writing of an assignment based on a problem which involves a number of subjects studied during the LLB course, including researching recent developments in the law in those areas.
Credit Points: 4 per semester
Contact Hours: 1 per week

LWB480 MEDIA LAW
The laws which shape the news media, their industry structure and their message content. Topics include: journalists and their sources of information, defamation, contempt, confidential information, access to information, the Broadcasting Tribunal, and regulation of advertising and of ownership.
Credit Points: 12
Contact Hours: 3 per week

LWB481 MINERAL LAW
Predominantly, the law governing and affecting the mining of hard minerals. The subject begins with a short explanation of basic concepts, and then analyses mining legislation with particular emphasis on Queensland legislation and other legislation which has an impact on mining. The structure of mining ventures is also considered. Topics include: ownership of mineral rights; State agreements; securities; mining on private land; administration of mining legislation; Warden's Court; and environment protection legislation.
Credit Points: 12
Contact Hours: 3 per week

LWB482 COMPUTERS & THE LAW
Computers and their impact upon the law including: use of computers in the individual legal practice; computerisation of the Titles Office, Companies Register, Parliamentary Drafting, Government Printer, Supreme Court; computer contracts; computer records as evidence; implications of data storage for privacy; freedom of information. The subject includes instruction in the use of Computerised Legal Information Retrieval System (CLIRS).
Credit Points: 12
Contact Hours: 3 per week

LWB483 MEDICO-LEGAL ISSUES
The constitutional framework supporting the regulation of health care; the relationship between the individual and the health care provider in terms of consent to treatment and negligence; the impact of the criminal law: abortion, removal from life support systems, mental illness and fitness to plead; medical records and evidence; ownership and confidentiality of records, expert evidence; the role of the coroner; complaints against hospitals and health care workers.
Prerequisites: LWB101, LWB103
Credit Points: 12
Contact Hours: 3 per week

LWN001 ADVANCED COMPANY LAW
The first part of this subject considers the Companies (Acquisition of Shares) Code which regulates acquisition of shares affecting a change in a company's control. The second part considers the law of company liquidations: emphasis is given to a creditor's application for a winding-up order, and effects of a winding-up and duties/powers/rights of liquidators are also considered.
Prerequisite: LWB401 or equivalent
Credit Points: 24
Contact Hours: 2 per week

LWN003 ADVANCED FAMILY LAW
A detailed examination of the law and underlying principles of selected areas of Family Law including: jurisdiction; financial aspects of marriage and divorce; children; marital and non-marital relationships. Where appropriate, comparisons with other countries are used and the impact of treaties is examined.
Credit Points: 24
Contact Hours: 2 per week
LWN004 ADVANCED LAW OF TRUSTS
The underlying principles of areas of conceptual difficulty from the law of trusts which are of particular practical importance. A specialised examination of the principles and practice in respect of establishment, administration, distribution, taxation, liability and recognition.
Credit Points: 24 Contact Hours: 2 per week

LWN005 TRADE PRACTICES & CONSUMER PROTECTION
The various aspects of the current Australian Trade Practices Act 1974, not only from a technical legal viewpoint but also from a wider view of the public policy issues involved. No knowledge of economics is required, although some readings are drawn from economics. Most of the subject is devoted to a study of Part IV of the Act; Part V is considered briefly (no more than six weeks) in Second Semester. The Trade Practices Act was drafted using the well-developed United States and EEC models as a basis, and the courts, in construing the Act, sometimes refer to the primary and secondary material available from these jurisdictions. The subject therefore makes law and policy comparisons with the United States and the EEC.
Credit Points: 24 Contact Hours: 2 per week

LWN007 COMMERCIAL ARBITRATION
Commercial arbitration - Australian and international. Topics include: nature and conduct of arbitration proceedings, court control of arbitration, awards and their enforcement, and international commercial arbitration.
Credit Points: 24 Contact Hours: 2 per week

LWN008 COMMERCIAL LEASES
An examination in depth of the standards of clauses of a modern Australian commercial lease in the light of recent case law and Queensland statutory provisions affecting such interests. Where appropriate, drafting techniques are explored against the background of current problems in specific areas with the assistance of invited specialist practitioners. The topics are covered largely by way of seminar problems preceded by some introductory lecture material. Topics include: negotiation of leases, subject matter of leases, covenants for repair, user, assignment, quiet possession, options to renew and purchase, insurance, the phenomenon of default, remedies of lessor and lessee, guarantees of leases.
Credit Points: 24 Contact Hours: 2 per week

LWN011 LITIGATION
Successful litigation is a product of both favourable substantive law rights and a thorough knowledge and application of the rules of procedure and evidence. The subject examines current issues in the litigation process which present interest or difficulty in legal practice. The emphasis is on procedure and evidence in the Supreme Court of Queensland, although other jurisdictions are considered.
Credit Points: 24 Contact Hours: 2 per week

LWN013 COMMERCIAL REMEDIES
The main emphasis is on study of judicial remedies in civil actions relating to commercial transactions. The subject initially discusses the theory and function of such remedies, and then considers in detail remedies such as damages, equitable remedies, restitutionary claims, and some statutory remedies. A knowledge of the substantive law giving rise to the existence of a right to seek a remedy is assumed, and the focus is on the process of selecting remedies to best enforce the particular right.
Credit Points: 24 Contact Hours: 2 per week

LWN014 THE PRINCIPLES OF NATURAL RESOURCES LAW
An analysis of the relationships underlying the natural resources legal system in Australia. These include the State, the various executive agencies of the State, Parliament, the courts and other tribunals, the commercial community, the Aboriginal community, specific interest groups, the public interest and the community at large. It does so in relation to natural resources at large: the atmosphere, the surface of land and its related resources such as vegetation, forests, water, flora and fauna, sub-surface minerals and water, as well as the environment at large as a resource itself. The legal mechanisms include sovereignty, property, contractually and administratively created and regulated rights and duties, the common law, the criminal law, and planning and management regimes. The subject considers the international law context of the Australian system, the role of the Commonwealth and the law in Queensland.
Credit Points: 12 Contact Hours: 2 per week

LWN017 RESTITUTION
A restitutionary claim is allowed when a defendant obtains a benefit which must be restored to the plaintiff. The basis on which restitution is made is that the defendant has been enriched at the plaintiff’s expense and that it would be unjust to allow the defendant to retain the benefit. Liability lies outside the traditional areas of civil obligation, contract and tort. The subject examines the principles of restitution, that is those circumstances in which a remedy is allowed on the basis of unjust enrichment.
Credit Points: 12 Contact Hours: 2 per week

LWN018 SELECT PROBLEMS OF TRUSTS
The first part of the subject concentrates on aspects of express trusts including a short refresher, management of trustee investments, and consideration of a model trustee code. The remainder of the subject concentrates upon the area of constructive trusts, and examines the nature and development of the constructive trust as a remedy with particular emphasis upon recent significant Australian decisions.
Credit Points: 12 Contact Hours: 2 per week

LWN019 TAXATION OF BUSINESS ENTITIES
The consequences of a sole trader setting up business in partnership with others, carrying on business activities by way of a business trust and a corporation. Approximately three-quarters of the course is devoted to the carrying on of business activities through a corporation.
Credit Points: 12 Contact Hours: 2 per week

LWN020 NON-RESIDENT & FOREIGN SOURCE TAXATION
Questions relating to residence, source, transfer pricing and the legislation relating to Controlled Foreign Entities; the effect of Double Tax Treaties.
Credit Points: 12 Contact Hours: 2 per week

LWN021 BANKING & FINANCE LAW
Lending on the security of goods and priorities in relation to chattel securities; lending on the security of proceeds, action and chattel paper, credit cards; financing through negotiable instruments, promissory
notes and letters of credit; utilisation and property financing; project financing.
Credit Points: 12  Contact Hours: 2 per week

LWN022 BANKING & FINANCE LAW 2
Securitisation of debts; SWAP transactions; international financing including capital adequacy requirements; corporate restructurings; tax based finance transactions.
Credit Points: 12  Contact Hours: 2 per week

LWN023 INTERNATIONAL TRADE LAW
Origins, sources and modern developments; harmonisation of law; international commercial transactions; international sale of goods; countertrade; marketing arrangements; financing in international transactions; carriage of goods by sea; litigation; international commercial arbitration; other alternative dispute resolution; export assistance; investment protection; ANZCERTA; globalisation of legal services; principles of international business conduct; examination of the trade law of a selected trading partner of Australia.
Credit Points: 24  Contact Hours: 2 per week

LWN024 SELECT PROBLEMS OF TRIBUNALS & ENQUIRIES
Investigation of problems that occur in the law relating to the activities of tribunals and enquiries. The subject concentrates on Royal Commissions and related forms of enquiries, as well as Statutory Tribunals exercising quasi-judicial functions. Topics include: the power to require information; the privilege against self-incrimination; Crown privilege and duties of secrecy; do the rules of procedural fairness apply?; can an enquiry commit a contempt of court?; enquiries and the rules of parliamentary privilege; the power of the courts to review the activities of enquiries; enquiries that investigate a mixture of Federal and State matters; enquiries and the laws of privacy; legislative attempts to curb judicial review of enquiries and tribunals.
Credit Points: 12  Contact Hours: 2 per week

LWN025 RESEARCH PROJECT 1
A supervised research project over one semester approved by the Postgraduate Studies Committee.
Credit Points: 12

LWN026 RESEARCH PROJECT 2
A supervised research project over the whole year approved by the Postgraduate Studies Committee.
Credit Points: 24

LWN027 THE PRACTICE OF NATURAL RESOURCES LAW
The practical application of the principles identified and analysed in LWN014. There are many issues in natural resources management currently under discussion: protection of the ozone layer, regulation of industrial chemicals, disposal of hazardous waste, coastal management, rehabilitation of land, environmental auditing, ecologically sustainable development, pollution control, soil erosion, catchment management, and conservation of the cultural heritage. The subject examines issues such as these from a predominantly legal perspective. It is in this sense topic-oriented and the topics selected for analysis reflect the needs of members of the class. A knowledge and understanding of the natural resources legal system in Australia is necessary for full advantage to be taken of this course.
Credit Points: 12  Contact Hours: 2 per week

LWN028 ADVANCED SECURITIES
Competing claims to fixtures on land; the nature of a charge and a mortgage; security over bank accounts; recent problems with Bills of Sale legislation; the mortgagee's power of sale; guarantees and indemnities; fixed and floating securities; some problems arising from receiverships and mortgages in possession; securities and the Trade Practices Act; bank guarantees and unconditional performance bonds; the demise of the scintilla temporis principle; romanpa clauses; co-ownership and security interests; negative pledges; securities over future property; the nature of various security interests; and the giving of formal opinions in relation to security documentation.
Credit Points: 12

LWN029 THEORETICAL CRIMINOLOGY
Legal and criminological conceptions of crime and punishment; nature, scope and objects of criminology. Criminological theory: classical and neo-classical theories; the positivist school; physical and biological factors and theories; psychological and psychiatric explanations, including the notion of danger; crime as a social phenomenon; radical or critical criminology; law and social change; theories of punishment.
Credit Points: 12  Contact Hours: 2 per week

LWN030 DISPUTE RESOLUTION/MEDIATION
A study of mediation looking at both the theory and practice. Students are expected to take part in a number of class workshops to learn mediation skills; therefore an attendance rate of 70% (ie 10 out of 14 classes) is necessary for students to gain a mark in the subject. Issues include: mediation in Australia; theories of mediators; different forms of mediation, i.e. neighbourhood, family, commercial; the advantages and disadvantages of mediation; power imbalance; when mediation is not appropriate; ethical and professional issues relating to mediation. Selected readings from relevant texts and journals are distributed at the first class.
Credit Points: 12  Contact Hours: 2 per week

LWN031 FOREIGN INVESTMENT & PROPERTY DEVELOPMENT LAW IN AUSTRALIA
Examination of Australian foreign investment policy and regulation and property development regulation, with a strong bias towards problems arising in practice for both areas. Foreign investment policy guidelines; the regulation of foreign investment proposals by FIRB and under the FATA; special regulation of land title and interest in land for foreigners; controls for special categories of investment and development projects such as tourism, integrated resorts, shopping centres, residential development, mining, resources development and primary industries. Matters of indirect regulation concerning such projects, eg. exchange controls, taxation implications for foreigners, business migration, customs requirements, etc. Special attention is given to aspects of governmental relations and government transactions which affect such projects and also to general regulation and protection under the law for the infrastructure of the investment or development project. Special attention is also given to the developing scope of environmental protection and other special regulatory legislation in Queensland.
Credit Points: 12  Contact Hours: 2 per week
LWN032 CREDIT FOR UQ SUBJECT 1
Under the course rules, a coursework student may, with the prior approval in writing of the Deans of the Faculties of Law of the Queensland University of Technology and of the University of Queensland, undertake one whole year or two one-semester subjects offered in the LLM degree by Coursework at the University of Queensland. This subject code represents a one-semester subject taken pursuant to that course rule at the University of Queensland.
Credit Points: 12

LWN033 CREDIT FOR UQ SUBJECT 2
Under the course rules, a coursework student may, with the prior approval in writing of the Deans of the Faculties of Law of the Queensland University of Technology and of the University of Queensland, undertake one whole year or two one-semester subjects offered in the LLM degree by Coursework at the University of Queensland. This subject code represents a one-semester subject taken pursuant to that course rule at the University of Queensland.
Credit Points: 12

LWN034 CREDIT FOR UQ SUBJECT 3
Under the course rules, a coursework student may, with the prior approval in writing of the Deans of the Faculties of Law of the Queensland University of Technology and of the University of Queensland, undertake one whole year or two one-semester subjects offered in the LLM degree by Coursework at the University of Queensland. This subject code represents a whole year subject taken pursuant to that course rule at the University of Queensland.
Credit Points: 24

LWN035 MEDICO-LEGAL ISSUES
The constitutional framework supporting the regulation of health care: the relationship between the individual and the health-care provider in terms of consent to treatment and negligence; the impact of the criminal law: abortion, removal from life support systems; mental illness and fitness to plead; medical records and evidence; ownership and confidentiality of records, expert evidence; the role of the Coroner; complaints against health-care workers.
Credit Points: 12  Contact Hours: 2 per week

LWN037 STAMP DUTY & COMMERCIAL TRANSACTIONS
Whilst stamp duty remains a tax on instruments, amendments to the Stamp Act have had the result that it is essentially a transactional impost. Upon completion of this subject, students have a sound understanding of the scope of the Act and of the circumstances in which commercial transactions attract a liability to duty. Topics include: territorial nexus; stamp duty administration; scheme of the Act and overview of the Heads of Charge; transactions concerning companies; transactions concerning trusts; partnership transactions; leasing and hiring transactions; financial transactions; planning and structuring issues; anti-avoidance provisions.
Credit Points: 12  Contact Hours: 2 per week

LWN038 CAPITAL GAINS TAX & COMMERCIAL TRANSACTIONS
The capital gains tax provisions contained in Part IIIA of the Income Tax Assessment Act have the potential to apply to innumerable acts, transactions and events. Upon completion of this subject, students have a sound understanding of the scheme of taxation which underpins the Part and of the application of that scheme to commercial transactions. Topics include: the relationship between Part IIIA and the other taxing provisions of the Act; the general scheme of Part IIIA; the threshold conditions to the application of the Part; the calculation provisions of the Part; the function and operation of roll-over provisions; companies and capital gains tax; partnerships and capital gains tax; trusts and capital gains tax; planning and structuring issues: tax avoidance and capital gains tax.
Credit Points: 12  Contact Hours: 2 per week

LWN039 APPLIED CRIMINOLOGY
Perceptions of crime and justice; the identification and measurement of crime; social location of crime; administration of criminal justice; key issues: victims of crime; juvenile, white-collar and corporate crime; privacy. Aboriginals and criminal justice; the system of corrections.
Credit Points: 12  Contact Hours: 2 per week

LWN040 THEORIES OF JUSTICE
Introduction to the history and development of the concept of justice within western and other traditions. Emphasis is placed upon the socio-political implications of these developments and their contemporary relevance to the law in Australia.
Credit Points: 12  Contact Hours: 2 per week

LWN100 HONOURS DISSERTATION
A dissertation undertaken by students enrolled in the Master of Laws by Coursework program who have obtained 96 credit points with a GPA of 6 or better. The dissertation is between 20,000 and 30,000 words in length.
Credit Points: 48

LWS001 MEDICINE & THE LAW
This subject seeks to teach students to appreciate the impact of some important fields of law upon the medical profession and upon hospital staff, patients and visitors. Introduction to law and the legal system. The Federal and State systems; general principles of the law of tort; principles of negligence; trespass; liability of hospitals; industrial law and industrial relations; workers' compensation; legal aspects of medical practice; medico-legal investigations; medical ethics. A consideration of emerging legal issues surrounding surrogate motherhood and test-tube babies. Relevant Commonwealth and Queensland legislation and regulations are introduced and court decisions studied.
Credit Points: 12  Contact Hours: 3 per week

LWS005 LAW & NURSING
Introduction to the Australian legal system; Commonwealth and State powers concerning health; consent and treatment/restraint of patients; negligence; the relationship between employer and employee; removal of patients from life support equipment and the law on euthanasia; abortion; transplantation of organs and tissue; medical records and confidentiality; control of poisons; the Coroners Act (Qld).
Credit Points: 8  Contact Hours: 3 per week

MAA251 STATISTICS & DATA PROCESSING
A basic subject in statistics, including statistical terminology and organisation of data, elementary probability, binomial and normal distribution, sampling theory, regression and correlation.
Prerequisite: Approval of Head of School of Mechanical and Manufacturing Engineering.
Credit Points: 8  Contact Hours: 3 per week
- **MABI02 BASIC MATHEMATICS**  
Algebra; factorising polynomials; index and logarithm laws; AP and GP trigonometrical ratios; Pythagorean identities; graphs; sine rule and cosine rule; coordinate geometry; equations of lines and standard conics; introduction to differential calculus; curve sketching; Newton-Raphson method; elementary integration; definite and indefinite integrals; use of tables of integrals; Simpson's rule.  
Credit Points: 12  
Contact Hours: 4 per week

- **MABI152 QUANTITATIVE METHODS**  
Organisational, analysis and interpretation of data; solution of practical problems involving basic calculus techniques and numerical methods; probability distributions; sampling; estimation; regression and correlation.  
Credit Points: 8  
Contact Hours: 3 per week

- **MABI172 QUANTITATIVE METHODS 1B**  
Organisation and analysis of data; use of computer packages in data analysis; probability and probability distributions; sampling theory; estimation; testing of hypotheses; regression and correlation.  
Credit Points: 9  
Contact Hours: 3 per week

- **MABI173 QUANTITATIVE METHODS**  
To enable students to use mathematical reasoning and skills to obtain solutions to financial, economic and general business problems. On completion, students should have an understanding of the types of problems amenable to a mathematical solution; they should be able to develop appropriate mathematical models and appreciate any limitations or assumptions in the models and in addition they should be able to obtain solutions to these models.  
Credit Points: 12  
Contact Hours: 3 per week

- **MABI181 APPLIED MATHEMATICS FOR DESIGNERS 1**  
Applications of plane and solid geometry in design; revision of basic geometry; symmetry; construction and packing of solids; spherical geometry and its applications. Applications of trigonometry in design; revision of basic trigonometry; calculation of heights, distances, areas and volumes. Data collection and analysis in design; introduction to statistics; use of computers in data analysis; elements of computer programming.  
Credit Points: 6  
Contact Hours: 3 per week

- **MABI182 APPLIED MATHEMATICS FOR DESIGNERS 2**  
Applications of plane and solid geometry in design; revision of basic geometry; symmetry; construction and packing of solids; spherical geometry and its applications. Applications of trigonometry in design; revision of basic trigonometry; calculation of heights, distances, areas and volumes. Data collection and analysis in design; introduction to statistics; use of computers in data analysis; elements of computer programming.  
Credit Points: 6  
Contact Hours: 3 per week

- **MABI193 ENGINEERING MATHEMATICS 1**  
Accuracy, relative and absolute errors; solution of systems of linear equations, determinants; vectors; complex numbers; elementary matrix algebra; differential and integral calculus of one variable; elementary multiple integrals; centre of gravity and moment of inertia.  
Credit Points: 6 per semester  
Contact Hours: 3 per week

- **MABI195 QUANTITATIVE METHODS 1**  
Applications of plane and solid geometry in design; revision of basic geometry; construction and packing of solids; spherical geometry and its applications. Application of trigonometry in design; calculation of heights, distances, areas and volumes.  
Credit Points: 6  
Contact Hours: 3 per week

- **MABI196 QUANTITATIVE METHODS 2**  
Data collection and analysis in design; introduction to statistics; use of computers in data analysis.  
Credit Points: 6  
Contact Hours: 3 per week

- **MABI199 SURVEY MATHEMATICS 1**  
Credit Points: 12  
Contact Hours: 6 per week

- **MABI212 MATHMATICS 1**  
Credit Points: 12  
Contact Hours: 3 per week

- **MABI213 MATHEMATICS IA**  
Real valued functions; differentiation; introduction to partial differentiation; integration, techniques of integration; elementary special functions.  
Credit Points: 12  
Contact Hours: 4 per week

- **MABI222 MATHEMATICS 2**  
Prerequisite: MABI212  
Credit Points: 12  
Contact Hours: 3 per week

- **MABI232 DISCRETE MATHEMATICS**  
Combinatorics; logic; set theory; axiomatic systems; modular arithmetic; rings, integral domains, fields; finite groups; elementary number theory; difference equations.  
Co-requisite: MABI222  
Credit Points: 12  
Contact Hours: 4 per week

- **MABI237 STATISTICS**  
The collection of statistical data from surveys and experiments, investigation and analyses of the data; drawing valid conclusions. Students study real data via computer packages and are introduced to the basic
concepts of estimation, hypothesis testing, regression and analysis of variance.
Credit Points: 12  Contact Hours: 3 per week

■ MAB251 MATHEMATICS I
Data handling; determinants and matrices; differentiation with applications; partial differentiation; integral calculus with applications; numerical methods.
Credit Points: 8  Contact Hours: 4 per week

■ MAB252 STATISTICS
Organisation and analysis of data; probability and probability distributions; sampling theory; estimation; tests of hypothesis; regression and correlation.
Prerequisite: MAB251
Credit Points: 4  Contact Hours: 2 per week

■ MAB258 EXPERIMENTAL DESIGN
Goodness of fit tests and tests of independence using chi-square distribution; introduction to multiple regression; statistical quality control; analysis of variance; introduction to non-parameter methods.
Prerequisite: MAB252
Credit Points: 4  Contact Hours: 2 per week

■ MAB297 MATHEMATICS FOR CONSTRUCTION
Data handling and basic: algebra, geometry, trigonometry, vector techniques; introduction to financial mathematics; introduction to probability and statistics.
Credit Points: 4  Contact Hours: 2 per week

■ MAB298 MATHEMATICS & STATISTICS
Data handling, basic algebra, geometry, trigonometry, vector techniques; introduction to financial mathematics; introduction to probability and statistics.
Credit Points: 4  Contact Hours: 2 per week

■ MAB301 CALCULUS & ANALYSIS A
Real valued functions; differentiation; introduction to partial differentiation; integration; techniques of integration; elementary special functions.
Credit Points: 12  Contact Hours: 4 per week

■ MAB303 ALGEBRA & ANALYSIS B
Set theory, relations and functions; introduction to difference equations; infinite series; complex numbers; linear equations; matrices and determinants; vector spaces; eigenvalues and eigenvectors.
Co-requisite: MAB301
Credit Points: 12  Contact Hours: 4 per week

■ MAB304 CALCULUS & VECTOR ALGEBRA
Improper integrals; first and second order linear differential equations; elementary vector algebra; Euclidean spaces; introduction to differential geometry of curves, conic sections.
Prerequisites: MAB301, MAB303
Credit Points: 12  Contact Hours: 4 per week

■ MAB321 COMPUTATIONAL MATHEMATICS
Sources of errors; computer arithmetic; computations with polynomials, standard functions, recurrence relations and series; computations with data, searching, sorting, sums and means; computations with arrays; use of calculators, programming languages and graphical/mathematical software.
Prerequisites: CSB155, MAB303
Credit Points: 12  Contact Hours: 4 per week

■ MAB342 MATHEMATICS OF FINANCE
Interest rates; solution of problems in compound interest; annuities; applications of annuities; capital redemption policies; valuation of securities; effects of taxation; introduction of basic modelling techniques.
Credit Points: 12  Contact Hours: 4 per week

■ MAB347 STATISTICS 1A
Collection and representation of data, parameters and statistics; elementary treatment of sampling; sample mean and variance; statistical estimation and tests of hypotheses based on the normal, t, F and chi-square distributions; linear regression and correlation; introduction to experimental design; introduction to non-parametric tests.
Credit Points: 12  Contact Hours: 4 per week

■ MAB348 STATISTICS 1B
Probability; conditional probability; random variables and probability distributions; binomial, Poisson, exponential, uniform, normal; expected values and moments, sums and differences of random variables; sampling distributions and their properties, estimation.
Prerequisite: MAB347  Co-requisite: MAB301
Credit Points: 12  Contact Hours: 4 per week

■ MAB420 FINITE MATHEMATICS
Set theory; relations and functions; finite group theory; Boolean algebra; methods of proof including induction; introduction to combinatorics; finite state machines; number theory; introduction to ring theory.
Prerequisites: MAB222, MAB232
Credit Points: 12  Contact Hours: 4 per week

■ MAB421 COMPUTATIONAL MATHEMATICS
Errors: sources, propagation, control; computations with polynomials, standard functions, recurrence relations and series; computations with data, searching, sorting, sums and means; computations with arrays; use of electronic calculators, PC-based Programming Languages (PASCAL), mathematical/graphical support software (DERIVE).
Prerequisites: MAB222, CSB155
Credit Points: 12  Contact Hours: 4 per week

■ MAB422 TOPICS IN MATHEMATICS
Topics in geometry, recreational mathematics, and the history of mathematics.
Prerequisite: MAB222
Credit Points: 12  Contact Hours: 3 per week

■ MAB430 LINEAR ALGEBRA & ITS APPLICATIONS
Vector spaces; linear transformations; eigenvalues and eigenvectors; Euclidean spaces; quadratic forms.
Prerequisites: MAB232, MAB222
Credit Points: 12  Contact Hours: 4 per week

■ MAB432 MATHEMATICS 3
Laplace transforms; ordinary differential equations of first and higher order; multivariable calculus; Fourier series and Fourier transforms; applications particularly relevant to physics.
Prerequisite: MAB222
Credit Points: 12  Contact Hours: 4 per week

■ MAB443 MATHEMATICS OF FINANCE
Interest rates; solution of problems in compound interest; annuities; applications of annuities; capital redemption policies; valuation of securities; effects of taxation; introduction to basic modelling techniques.
Prerequisite: MAB222
Credit Points: 12  Contact Hours: 4 per week
MAB447 STATISTICS 1A
See MAB347.
Credit Points: 12 Contact Hours: 4 per week

MAB448 STATISTICS 1B
See MAB348.
Prerequisite: Credit in MAB237 or MAB447
Co-requisite: MAB222
Credit Points: 12 Contact Hours: 4 per week

MAB452 MATHEMATICS 4
Partial differential equations; vector analysis; vector integration theorems; introduction to tensors; applications particularly relevant to physics.
Prerequisite: MAB432
Credit Points: 12 Contact Hours: 4 per week

MAB462 VECTOR ANALYSIS
Vector algebra; vector products, identities and equations; physical and geometrical applications; differentiation and integration of vectors; differential geometry of curves; conic sections.
Prerequisite: MAB212
Credit Points: 12 Contact Hours: 4 per week

MAB493 ENGINEERING MATHEMATICS 2
Solution of systems of linear equations by direct and iterative methods, rank of a matrix; representation of a function by Taylor series, MacLaurin series, Fourier series; finite differences, polynomial interpolation, Newton-Gregory interpolation formulas; solution of first and second order differential equations, operator-D and Laplace transform methods. Taylor series and Runge-Kutta techniques; basic descriptive statistics, probability theorems, distributions.
Prerequisite: MAB193
Credit Points: 6 per semester
Contact Hours: 5 per week

MAB495 SURVEY MATHEMATICS 2
Prerequisite: MAB199
Credit Points: 12 Contact Hours: 6 per week

MAB499 BASIC STATISTICS FOR SURVEYORS
Descriptive statistics, frequency distributions and their graphical representation, probability, sampling, estimation, tests of hypothesis, regression and correlation.
Prerequisite: MAB199[R]
Credit Points: 5 Contact Hours: 2 per week

MAB601 MULTIVARIABLE CALCULUS
Differentiation, extrema; double integrals, triple integrals, surface integrals; functions of a complex variable, analyticity, complex integration.
Prerequisites: MAB303, MAB304
Credit Points: 12 Contact Hours: 4 per week

MAB602 VECTOR FIELD THEORY
Vector analysis; scalar and vector fields; line integrals; surface integrals; differential field operators; the integral properties of fields. Tensor analysis; curvilinear coordinates; application to potential theory; hydrodynamic theory; and electromagnetic theory; calculus of variations; functionals; Euler's differential equation; variational problems with subsidiary conditions.
Prerequisite: MAB601
Credit Points: 12 Contact Hours: 4 per week

MAB612 DIFFERENTIAL EQUATIONS
Linear differential equations, series methods, Laplace transforms; self adjoint boundary value problems and Fourier series; introduction to partial differential equations; mathematical modelling, applications of differential equations.
Prerequisite: MAB303, MAB304
Credit Points: 12 Contact Hours: 4 per week

MAB618 NUMERICAL ANALYSIS 1
Solution of systems of linear equations; numerical solution of a single non-linear equation; interpolation; quadrature; numerical solution of a single first order differential equation.
Prerequisite: MAB321
Credit Points: 12 Contact Hours: 4 per week

MAB619 NUMERICAL ANALYSIS 2
Systems of linear equations; direct methods, measure of work, iterative refinement, error analysis; indirect methods, convergence considerations; systems of non-linear equations; quadrature, Romberg integration; ordinary differential equations, initial and boundary value problems; eigenvalue problems, power method, inverse iteration.
Prerequisite: MAB618 Co-requisite: MAB630
Credit Points: 8 Contact Hours: 3 per week

MAB620 FINITE MATHEMATICS
Set theory; relations and functions; finite group theory; Boolean algebra; methods of proof including induction; introduction to combinatorics; finite state machines; number theory; introduction to ring theory.
Prerequisite: MAB303
Credit Points: 12 Contact Hours: 4 per week

MAB630 LINEAR ALGEBRA & ITS APPLICATIONS
Real and complex vector spaces, inner products; linear operators in finite dimensional space; eigen analysis, vector and matrix norms; quadratic forms; applications.
Prerequisite: MAB303
Credit Points: 12 Contact Hours: 4 per week

MAB635 MECHANICS
Statics; kinematics of a particle; relative motion; conservation laws of dynamics; motion of a particle in one and two dimensions; impulsive motion.
Prerequisite: MAB304
Credit Points: 12 Contact Hours: 4 per week

MAB637 OPERATIONS RESEARCH 1A
The fundamentals of linear programming; replacement, maintenance and reliability; project scheduling techniques; simulation.
Prerequisite: MAB303, MAB347
Credit Points: 12 Contact Hours: 4 per week

MAB638 OPERATIONS RESEARCH 1B
Transportation, transshipment and assignment models; introduction to sensitivity analysis; inventory models; introduction to queuing theory.
Prerequisite: MAB637
Credit Points: 8 Contact Hours: 3 per week

MAB641 ACTUARIAL MATHEMATICS
The life table; demographic techniques; pure endowments and annuities; assurance; policy values; laws of mortality; benefits depending on other contingencies; pension funds.
Prerequisite: MAB301, MAB342
Credit Points: 12 Contact Hours: 4 per week

MAB647 STATISTICS 2A
Bivariate distributions; conditional distributions; covariance; moment generating functions; joint mgfs' and their uses in i.i.d. cases; transformations; sam-
pling distributions; introduction to sampling from finite populations; introductory Markov chains; introduction to time series and auto correlation; some convergence ideas; order statistics.

Prerequisite: MAB348, MAB301
Co-requisite: MAB303
Credit Points: 12 Contact Hours: 4 per week

MAB648 STATISTICS 2B
One way ANOVA and multiple comparisons; Kruskal-Wallis alternative; blocking; two way ANOVA; replication, interaction; factors, levels, 22 factorial; missing values, data quality; multiple and polynomial regression; residuals; use of covariates; time series data and analysis; Q - Q plots, normal scores, introductory transformations; use of ranks; non-parametric techniques.

Prerequisite: MAB348
Credit Points: 8 Contact Hours: 3 per week

MAB712 DIFFERENTIAL EQUATIONS
Vector spaces with inner product; linear operations in finite dimensional spaces; linear differential equations; series methods; Laplace transforms; self adjoint boundary problems and Fourier series; partial differential equations.

Prerequisite: MAB3452
Credit Points: 12 Contact Hours: 4 per week

MAB720 INTRODUCTION TO CRYPTOLOGY
Number theory; finite field theory; information theory; classical ciphers; modern symmetric ciphers, public key ciphers; practical cryptography.

Prerequisites: MAB420, MAB421
Credit Points: 12 Contact Hours: 4 per week

MAB721 ACTUARIAL MATHEMATICS
The life table; demographic topics including population projection techniques; pure endowments, life annuities, life assurances, policy values; laws of mortality; topics in general insurance.

Co-requisite: MAB442
Credit Points: 12 Contact Hours: 4 per week

MAB722 VECTOR FIELD THEORY
Vector algebra; scalar and vector fields; line integrals; surface integrals; differential field operators; the integral properties of fields; curvilinear coordinates; application to potential theory, hydrodynamic theory and electromagnetic theory; calculus of variations, functionals; Euler's differential equation; variational problems with subsidiary conditions.

Prerequisite: MAB452
Credit Points: 12 Contact Hours: 4 per week

MAB725 MECHANICS
Mathematical model of Newtonian mechanics; statics; conservation laws of dynamics; impulsive motion in one dimension; motion of a particle in one dimension; motion of a particle in two dimensions.

Prerequisite: MAB432
Credit Points: 12 Contact Hours: 4 per week

MAB728 NUMERICAL METHODS 1
Errors; systems of linear equations (direct methods); solution of non-linear equations; interpolation and approximation; numerical quadrature; numerical solution of first order ordinary differential equations

Prerequisite: MAB421
Credit Points: 12 Contact Hours: 4 per week

MAB729 NUMERICAL METHODS 2
Systems of linear equations: direct methods, measure of work, iterative refinement, error analysis; indirect methods, convergence considerations: systems of non-linear equations; quadrature (Romberg integration); ordinary differential equations, (initial and boundary value problems); eigenvalue problems, (power method, inverse iteration).

Prerequisite: MAB728 Co-requisite: MAB430
Credit Points: 8 Contact Hours: 3 per week

MAB747 STATISTICS 2A
Moment generating functions and their use in investigating the properties of particular distributions; introduction to bivariate and multivariate distributions; introduction to stochastic processes, Markov chains; introduction to time-series autocorrelation.

Prerequisites: MAB448, MAB222
Credit Points: 12 Contact Hours: 4 per week

MAB748 STATISTICS 2B
One way ANOVA and multiple comparisons; Kruskal-Wallis alternative; blocking; two way ANOVA; replication, interaction; factors, levels, 22 factorial; missing values, data quality; multiple and polynomial regression; residuals; use of covariates; time series data and analysis; Q - Q plots, normal scores, introductory transformations; use of ranks; non-parametric techniques.

Prerequisites: MAB448, MAB222
Credit Points: 8 Contact Hours: 3 per week

MAB777 OPERATIONS RESEARCH 1A
The algorithm, simulation, replacement, maintenance and reliability, networks.

Prerequisites: MAB222, CSB155
Co-requisite: MAB448
Credit Points: 12 Contact Hours: 4 per week

MAB778 OPERATIONS RESEARCH 1B
Transportation, transshipment and assignment models; introductory sensitivity analysis; inventory models; introduction to queueing theory.

Prerequisite: MAB787
Credit Points: 8 Contact Hours: 3 per week

MAB781 MULTIVARIABLE CALCULUS
Differentiation, extrema, double integrals, triple integrals, surface integrals; complex integration.

Prerequisite: MAB432
Credit Points: 12 Contact Hours: 4 per week

MAB795 SURVEY MATHEMATICS 3

Prerequisite: MAB495
Credit Points: 6 Contact Hours: 3 per week

MAB893 ENGINEERING MATHEMATICS 3
Eigenvalues and eigenvectors, quadratic forms, determination of dominant eigenvalue by iteration; sampling theory, hypothesis testing, linear regression and correlation, analysis of variance; introduction to linear programming.

Prerequisite: MAB493
Credit Points: 6 Contact Hours: 3 per week

MAB894 ENGINEERING MATHEMATICS 4
Solution of linear systems of differential equations employing operator-D and Laplace transform methods, variation of parameters methods for non-homogeneous equations; solution of partial differential equations, separation of variables methods, introduc-
tion to numerical techniques; complex variables, Cauchy-Riemann equations, conformal mapping.

**Prerequisite:** MAB493

**Credit Points:** 6  **Contact Hours:** 3 per week

**MAB895 INTRODUCTION TO CRYPTOLOGY**

Number theory; finite field theory; information theory; classical ciphers; key ciphers; practical cryptography.

**Prerequisite:** MAB493

**Credit Points:** 7  **Contact Hours:** 4 per week

**MAB896 ERROR CORRECTION & DATA COMPRESSION**

Data compression techniques; introduction to block codes; convolutional codes; cyclic codes and Reed-Solomon codes; other coding techniques and applications.

**Prerequisite:** MAB895

**Credit Points:** 7  **Contact Hours:** 4 per week

**MAB896 TOPICS IN ANALYSIS**

Topics selected from the following: measures; Lebesgue integrals; product of measures; normed spaces; metric spaces; constrained optimisation, Gateaux and Frechet derivatives.

**Prerequisites:** MAB601, MAB612

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB907 STATISTICS 3A**

Estimation; testing; exponential; linear models; introduction to generalised linear models; multicollinearity, heteroscedasticity, effect of autocorrelation; non-linear LSE; introduction to diagnostics.

**Prerequisites:** MAB647, MAB648, MAB303

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB908 STATISTICS 3B**

Experimental design; response surfaces; optimal design; transformations, diagnostics, influential observations, some EDA.

**Prerequisite:** MAB648

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB913 NUMERICAL ANALYSIS 3**

Hilbert spaces; the projection theorem; application to discrete polynomial and trigonometric approximation; Legendre polynomials; Gaussian quadrature; Chebyshev polynomials; Chebyshev approximation. Reduction of a matrix to upper Hessenberg form by similarity transforms, orthogonal reduction, Givens and Householder methods, determination of eigen-systems by the QR algorithm, emphasis on symmetric matrices. Stability analyses for IVPs, types of instability, inherent and induced, partial instability.

**Prerequisite:** MAB619

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB920 CODING & ENCRYPTION TECHNIQUES**

Number theory; finite field theory; information theory; classical ciphers; modern symmetric ciphers, public key ciphers; practical cryptography.

**Prerequisite:** MAB622

**Credit Points:** 12  **Contact Hours:** 3 per week

**MAB927 OPERATIONS RESEARCH 2A**

Algorithms of linear programming; integer and mixed integer programming; non-linear programming; dynamic programming; heuristic methods.

**Prerequisite:** MAB638

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB928 OPERATIONS RESEARCH 2B**

Simulation; queuing theory; decision analysis; implementation in operations research.

**Prerequisite:** MAB637

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB929 TIME SERIES & STATISTICAL FORECASTING**

Review of smoothing and decomposition methods; ARIMA time series methods; Box-Jenkins method; pooling of time series and cross-sectional data; causality; recursive estimation and prediction of stationary processes; multivariate time series; comparison and selection of forecasting methods.

**Prerequisites:** MAB647, MAB648

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB941 MATHEMATICAL MODELLING IN ECONOMICS**

Mathematical models in economics; macro and micro economic models; simulation; growth and decay models; dynamic economic models; introduction to stability theory; stability of linear systems.

**Prerequisites:** MAB601, MAB612

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB942 OPTIMISATION METHODS**

Analytic calculation of maxima and minima in functions of several variables; constrained optimisation using Lagrange multiplier and penalty techniques; quadratic and convex programming; 1 dimensional search techniques; direct (non-derivative) search techniques; gradient methods; least squares; global optimisation strategies.

**Prerequisites:** MAB601, MAB618

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB960 PROJECT WORK**

Students, either individually or in small groups, undertake a substantial project which is relevant to the needs of industry and which is designed to give students insight into industrial requirements. Each student, or group of students, undertakes a different project and is supervised, generally by a member of staff, throughout the duration of the project.

**Prerequisite:** Successful completion of at least 192 credit points including at least two subjects from List D of the course requirements.

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB970 PROBABILITY THEORY & STOCHASTIC PROCESSES**

Probability measures, conditional probability; distributions and random variables. Convergence of random variables; strong and weak laws of large numbers; central limit theorems. Markov processes; birth and death, queues; epidemics; inference. Point processes; marked point processes; filtered processes; inference, simulation, Branch process.

**Prerequisite:** MAB647

**Credit Points:** 12  **Contact Hours:** 4 per week

**MAB971 ADVANCED MATHEMATICS OF FINANCE**

Study of mathematical techniques and concepts which are important in capital markets, foreign exchange dealings, fund management and assessment. Other advanced topics to be developed in consultation with the financial industry.

**Prerequisite:** MAB641

**Credit Points:** 12  **Contact Hours:** 4 per week
MAB972 ERROR CORRECTION & DATA COMPRESSION
Data compression techniques; introduction to block codes; convolutional codes; cyclic codes and Reed-Solomon codes; other coding techniques and applications.
Prerequisites: MAB920
Credit Points: 12 Contact Hours: 4 per week

MAB973 PARALLEL DIFFERENTIAL EQUATIONS
Derivation and solution of first order partial differential equations. Derivation of second order partial differential equations: the wave equation, the heat conduction equation, the equation of a bending beam and equations for fluid flow. Classification of second order equations. Discussion of boundary conditions. Solution of second order equations by the method of characteristics, separation of variables, integral transforms.
Prerequisites: MAB602, MAB612
Credit Points: 12 Contact Hours: 4 per week

MAB974 SAMPLING & SURVEY TECHNIQUES
Simple and stratified random sampling; estimates; design of questionnaires; data quality and errors in surveys; systematic, cluster and double sampling plans; imputation techniques; alternatives to household surveys.
Prerequisites: MAB647, MAB648
Credit Points: 12 Contact Hours: 4 per week

MAB975 ORDINARY DIFFERENTIAL EQUATIONS & CHAOS
Singular points in systems of ordinary differential equations; eigenvalues of systems of ordinary differential equations; system stability using phase plane portraits; chaotic systems; analytic and numerical solution of equations describing systems with chaotic and singular behaviour.
Prerequisites: MAB601, MAB612, MAB619
Credit Points: 12 Contact Hours: 4 per week

MAB976 RELIABILITY & SURVIVAL ANALYSIS
Failure rates; life distributions and inference; extreme values; fitting tails; flood data; IFR, NBU; system reliability; censored sampling; Cox proportional hazards models; competing hazards.
Prerequisites: MAB647, MAB648
Credit Points: 12 Contact Hours: 4 per week

MAB977 SCHEDULING & NETWORKS
Credit Points: 12 Contact Hours: 4 per week

MAB978 STATISTICAL SIGNAL PROCESSING & IMAGE ANALYSIS
Prerequisites: MAB318, MAB608
Credit Points: 12 Contact Hours: 4 per week

MAB979 STATISTICAL MODELLING & DATA ANALYSIS
Robust procedures and principles: influence functions; robust estimation; simulation studies; M-estimation. Distribution theory of statistics based on ranks. Robust regression; EDA; graphics; model choice, assessment and fitting; distributional families used in data analysis, inference studies and simulations; transformations, including Box-Cox. Outliers.
Prerequisites: MAB907, MAB601
Credit Points: 12 Contact Hours: 4 per week

MAB980 STOCHASTIC PROCESSES & APPLICATIONS
Gaussian processes; Brownian motion; diffusions; stochastic equations; martingales; random walks; central limit theorems; applications of martingales. Epidemic models. Queueing models. Stochastic compartment models. Extreme value theory for stochastic processes.
Prerequisites: MAB970 or (MAB906, MAB929)
Credit Points: 12 Contact Hours: 4 per week

MAB981 APPLIED STATISTICAL INFERENCE & EXPERIMENTATION
Jackknife, bootstrap and other resampling ideas; prediction. Application to calibration. Introduction to Bayesian ideas; applications of Bayesian theory: quasi-likelihood; principal component analysis; discriminant and cluster analysis; some robust methods in experimental design and data analysis
Prerequisites: MAB907, MAB908, MAB630
Credit Points: 12 Contact Hours: 4 per week

MAB982 ADVANCED TOPICS IN CRYPTOLOGY
Prerequisites: MAB920 or (MAB995 + GPA 5)
Credit Points: 12 Contact Hours: 4 per week

MAB983 FINITE MATHEMATICS
Topics in finite mathematics.
Prerequisite: Approved Honours or postgraduate program.
Credit Points: 24 Contact Hours: 8 per week

MAB984 ACTUARIAL STATISTICS
Distribution theory. Financial stochastic models and problem-solving with them. Credibility, utility and risk theory. Loss and ruin models.
Prerequisites: MAB907 Co-requisite: MAB970
Credit Points: 12 Contact Hours: 4 per week

MAB985 NUMERICAL ANALYSIS
• Solution of the steady/unsteady heat conduction equation with: variable thermal conductivity, different forms, control, optimal continuous scheduling.

- MAP111 STATISTICAL METHODS
  Describing variation, frequency distribution, histogram, estimation of parameters. Important distributions useful in describing quality-related phenomena, binomial, hypergeometric, Poisson, normal, exponential, Weibull. Approximations, Poisson to binomial, normal to binomial, etc. Sampling distributions, interval estimation and test of hypotheses. Type 1 and type 2 errors.
  Credit Points: 6  Contact Hours: 3 per week

- MAP121 STATISTICAL PROCESS CONTROL
  Credit Points: 6  Contact Hours: 3 per week

- MAP211 SAMPLING PROCEDURES
  Basic concepts and principles in sampling. Attribute batch sampling, sampling plans (single, double and multiple), OC curves. AS1199, terminology and definitions, choice of plan and switching rules. Attribute batch sampling with rectifying inspection, Dodge Romig procedure, use of tables. Attribute continuous sampling and the Dodge system (CSP-1, etc.). Sampling by variables, plans and procedures.
  Credit Points: 6  Contact Hours: 3 per week

- MAP221 QUALITY PROBLEM SOLVING TECHNIQUES
  Collection of data and use of check sheets. Histogram as a diagnostic tool. Pareto diagram, stratified data, use of weighted factors, Ishikawa chart, dispersion analysis and process classification type. Kepner Tregoe technique. Correlation analysis, scattergram and the Tukey corner test, independence and spurious correlation, regression equation and prediction. Design of experiments, principles and basic concepts, Latin Square design, factorial experiments.
  Credit Points: 8  Contact Hours: 2 per week

- MAS090 MATHEMATICS
  This intensive subject is aimed at providing an appropriate background for those who may wish to undertake a tertiary course in science, business or other areas which require competence in certain mathematical areas prior to entry. Topics include: algebra, analytical geometry, trigonometry, differential and integral calculus, matrices and a selection of applications from elementary statics, kinematics, dynamics and statistics. The treatment assumes some initial knowledge of basic algebra, such as manipulation of indices and factorisation, and elementary trigonometry at a level equivalent to Year 10 Advanced Mathematics.
  Credit Points: 6 per semester  Contact Hours: 3 per week

- MAS092 MATHEMATICS A
  This subject is aimed at providing a mathematical background pertinent to those who may wish to undertake a tertiary course in computing. Topics include: algebra, matrices, analytical geometry, trigonometry, propositions and truth tables, set theory. The treatment assumes some initial knowledge of basic algebra, such as manipulation of indices and factorisation, and elementary trigonometry at a level equivalent to Year 10 Advanced Mathematics.
  Credit Points: 6  Contact Hours: 3 per week

- MAX173 QUANTITATIVE METHODS
  Applications of mathematics in business; exponential and logarithmic functions; interest calculations; annuities; sinking funds; depreciation; descriptive statistics; probability; graphical techniques; linear regression and correlation.
  Credit Points: 12  Contact Hours: 4 per week

- MDB101 PERSONAL COMPUTING
  The development of competence with modern computers and peripherals so that they can be used with young children; wordprocessing and the use of database and spreadsheet packages; the features of computers important for teaching and the use of computers with young children.
  Credit Points: 4  Contact Hours: 2 per week

- MDB102 NUMBER ENRICHMENT FOR YOUNG CHILDREN
  The development of practical activities and constructing classroom resources to teach number in early childhood; counting and precounting activities; early grouping and numeration games; language and number materials; early estimation and mental computation techniques and number puzzles and tricks.
  Credit Points: 4  Contact Hours: 2 per week

<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Points</th>
<th>Contact Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MDB103</td>
<td>MATHEMATICAL THINKING &amp; PROBLEM SOLVING</td>
<td>Creative problem solving and mathematical thinking activities suitable for kindergarten, preschool and years 1-3; problem solving with materials; early logical thinking; visual patterns with blocks, jigsaw and other puzzles, and cooperative group and philosophy for children, techniques.</td>
<td>4</td>
<td>2 per week</td>
</tr>
<tr>
<td>MDB104</td>
<td>SCIENCE MODELS &amp; TOYS</td>
<td>Toys children play with can be starting points for scientific investigations for young children. Toys provide motivation and are familiar to children. The science is built around experiences and ideas encountered from toy boats, motors (elastic, clockwork and steam), balls, cameras (from which notions concerning safety and timing can be developed), trains and cars (which can introduce ideas such as gears and looping the loop) and flying models (paper aeroplanes and gliders).</td>
<td>4</td>
<td>2 per week</td>
</tr>
<tr>
<td>MDB105</td>
<td>WRITING &amp; COMPUTERS</td>
<td>The use of computers in the writing process by both adults and young children. Appropriate word processing and applications software are used by students. The social, economic and educational implications of the technology are addressed.</td>
<td>4</td>
<td>2 per week</td>
</tr>
<tr>
<td>MDB106</td>
<td>PROBLEM-SOLVING WITH COMPUTER GRAPHICS</td>
<td>Design principles appropriate to generating graphic images; the use of computer graphics packages; programming in a computer graphics language; dynamic computer graphics and animation; educational applications for young children.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB220</td>
<td>MATHEMATICS FOUNDATION</td>
<td>The process of mathematics and the role of mathematics in society; mathematical competencies in a technological world; logic and sets and the various forms of mathematical thinking; basic mathematical structures and properties and how these can be seen within mathematics syllabus; the dynamic nature of mathematics.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB221</td>
<td>SCIENCE FOUNDATIONS</td>
<td>The development of understanding the concepts of science. Presenting a positive view of science through the examination of: the nature of science; the historical development of major concepts of science; development of scientific language; relationship of science to society. Links between the view of society and the ideas and knowledge which have been generated and applied to the solution of problems.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB222</td>
<td>MATHEMATICS EDUCATION 1</td>
<td>Extension from MA3040 of the importance of considering the structure of mathematics to the planning of curricula appropriate for young children. Key concepts and skills that form the structure of mathematics. Links to teaching methods that connect mathematics in real world situations to concrete and symbolic representatives of discipline. The role of language, importance of selecting and teaching mathematics in a technological age.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB223</td>
<td>MATHEMATICS EDUCATION 2</td>
<td>Greater insight into children's acquisition of mathematical competence with particular emphasis on the role of higher-order thinking skill in the learning process. Emphasis on the development of important mathematical skills such as decision making and problem solving, critical analysis and reflection, and logical reasoning. Examination of curriculum topics from both a content perspective and a processing perspective. The topics to be addressed include the skills of problem solving, statistical analysis, elementary probability, measurement concepts and processes, visual imagery and spatial problem solving.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB224</td>
<td>SCIENCE MODELS</td>
<td>Topics to be addressed include the skills of problem solving, statistical analysis, elementary probability, measurement concepts and processes, visual imagery and spatial problem solving.</td>
<td>12</td>
<td>4 per week</td>
</tr>
<tr>
<td>MDB225</td>
<td>STRUCTURE IN MATHEMATICS</td>
<td>The nature of mathematics: the presentation of mathematics as a logical and visual process of patterning and generalising; application of this knowledge to number and space to develop mental sequences and taxonomies. Mathematical pattern and structure: introduction to patterns from number theory and concepts and principles from algebra, geometry and calculus. Study of the common errors in children's mathematical performance and application of knowledge to infer the causes of these errors.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB226</td>
<td>EARTH &amp; SPACE</td>
<td>Time and motion: observations of the notion of the earth; motions of objects through the sky and interrelatedness of time. Earth and its environment: theories of the origin of the earth and its liquid and gaseous environment; geological and biological evolution of the earth incorporating real world practical problems. Frontiers of space: spectroscopy, optical and radio astronomical techniques at a basic level.</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>MDB227</td>
<td>HISTORY OF MATHEMATICS</td>
<td>Philosophy and history of mathematical thinking: the role of thinking in mathematics and vice versa, the history of the thinking movement, and approaches to developing mathematical thinking skills. History of basic mathematical topics: number systems, algorithms, algebra, geometry and measurement. Conceptions of mathematics: the role of intuition, logic, real world applications and formality. Applications to teaching.</td>
<td>8</td>
<td>3 per week</td>
</tr>
</tbody>
</table>
| MDB228      | APPLICATIONS IN MATHEMATICS | Modelling and mathematical applications: the role of modelling in applying mathematics to real world problems. Mathematical applications: discrete math-
ematics, statistical and computer applications, game and queuing theory. Modelling in mathematics instruction; how to use the above to extend and enrich teaching.

**Prerequisite:** MDB262

**Credit Points:** 12  **Contact Hours:** 3 per week

- **MDB270 COMPUTER EDUCATION**
  The exploration of the uses of computer-based technology. Consideration of educational issues such as: curriculum planning and implementation considerations; criteria for the evaluation of computer hardware and software; and policies for computer use in schools.

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB350 BIOLOGY CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of biology as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB351 BIOLOGY CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. With CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisite:** MDB350

**Co-requisites:** CUB302, EDB302

**Credit Points:** 12  **Contact Hours:** 3 per week

- **MDB352 BIOLOGY CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** MDB350, MDB351, CUB302

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB353 CHEMISTRY CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of chemistry as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB354 CHEMISTRY CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisite:** MDB353

**Co-requisites:** CUB302, EDB302

**Credit Points:** 12  **Contact Hours:** 3 per week

- **MDB355 CHEMISTRY CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** SBB353, SBB354, CUB302

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB356 COMPUTING CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of computing as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB357 COMPUTING CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisite:** MDB356

**Co-requisites:** CUB302, EDB302

**Credit Points:** 12  **Contact Hours:** 3 per week

- **MDB358 COMPUTING CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** MDB356, MDB357, CUB302

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB359 EARTH SCIENCE CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of earth science as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.

**Credit Points:** 8  **Contact Hours:** 3 per week

- **MDB360 EARTH SCIENCE CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles.
which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisites:** MDB359
**Co-requisites:** CUB302, EDB302
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB361 EARTH SCIENCE CURRICULUM & TEACHING STUDIES 1**

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** MDB359, MDB360, CUB302
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB362 MATHEMATICS CURRICULUM & TEACHING STUDIES 1**

Builds on CUB301 to give a greater understanding of the nature of mathematics as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB363 MATHEMATICS CURRICULUM & TEACHING STUDIES 2**

Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisites:** MDB362
**Co-requisites:** CUB302, EDB302
**Credit Points:** 12  **Contact Hours:** 3 per week

**MDB364 MATHEMATICS CURRICULUM & TEACHING STUDIES 3**

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** MDB362, MDB363, CUB302
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB365 PHYSICS CURRICULUM & TEACHING STUDIES 1**

Builds on CUB301 to give a greater understanding of the nature of physics as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB366 PHYSICS CURRICULUM & TEACHING STUDIES 2**

Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisites:** MDB365
**Co-requisites:** CUB302, EDB302
**Credit Points:** 12  **Contact Hours:** 3 per week

**MDB367 PHYSICS CURRICULUM & TEACHING STUDIES 3**

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** MDB365, MDB366, CUB302
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB368 SCIENCE CURRICULUM & TEACHING STUDIES 1**

Builds on CUB301 to give a greater understanding of the nature of science as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

**Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB369 SCIENCE CURRICULUM & TEACHING STUDIES 2**

Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.

**Prerequisites:** MDB368
**Co-requisites:** CUB302, EDB302
**Credit Points:** 12  **Contact Hours:** 3 per week

**MDB370 SCIENCE CURRICULUM & TEACHING STUDIES 3**

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

**Prerequisites:** MDB368, MDB369, CUB302
**Credit Points:** 8  **Contact Hours:** 3 per week

**MDB377 PROJECT PLANNING & IMPLEMENTATION**

Planning, implementation and management of projects involving the use of computers.

**Prerequisites:** CSB864, ISB865, CSB866
**Credit Points:** 12  **Contact Hours:** 3 per week

**MDB410 COMPUTERS IN THE SCHOOL CURRICULUM**

The introduction of computers into the school environment and curriculum; methods for teaching computer studies; the use of computers for classroom management and support; computer technology and its impact on schools and society. Access to an appropriate microcomputer is required.

**Credit Points:** 12  **Contact Hours:** 3 per week
MDB411 EARLY CHILDHOOD MATHEMATICS CURRICULUM
Theoretical background and research; logical sequence of mathematics and children's cognitive development; mathematics content and learning experiences for early childhood; integration and application.
Credit Points: 12     Contact Hours: 3 per week

MDB412 PRIMARY MATHEMATICS CURRICULUM
The influential factors on the development and content of mathematics education; how students learn and apply mathematics; identification of effective curriculum models and teaching strategies for mathematics.
Prerequisite: CUB410 (or equivalent)
Credit Points: 12     Contact Hours: 3 per week

MDB413 SECONDARY MATHEMATICS CURRICULUM
Current syllabus developments, teaching strategies and curriculum models for secondary mathematics; planning and evaluating sequences of learning activities for secondary school mathematics; designing and evaluating a variety of forms of assessment.
Credit Points: 12     Contact Hours: 3 per week

MDB415 PRIMARY SCIENCE CURRICULUM
The nature and importance of science in primary schools; theoretical principles of science curriculum development; elements of program planning and evaluation, development of practical teaching sequences of classroom activities.
Credit Points: 12     Contact Hours: 3 per week

MDB416 SECONDARY SCIENCE CURRICULUM
Review of directions for secondary science education; evaluation of present curricula and resources; review of how students learn science; learning difficulties; approaches to assessment.
Credit Points: 12     Contact Hours: 3 per week

MDB430 TEACHING MATHEMATICS PROBLEM SOLVING
Definition and importance of problem solving; problem solving strategies; measures of problem solving performance; methods of teaching problem solving.
Credit Points: 12     Contact Hours: 3 per week

MDB440 COMPUTERS & EDUCATION
An overview of microcomputer hardware and software with an emphasis on the usefulness of various components in schools; use of educationally valuable application software; critical examination of a variety of uses of computers in education; the impact of computers on society and education in particular.
Credit Points: 12     Contact Hours: 3 per week

MDB441 EXPLORATIONS USING LOGO
Learning to program in Logo; creating and solving problems using Logo; exploring curriculum applications with Logo; general problem solving skills.
Credit Points: 12     Contact Hours: 3 per week

MDB490 TOPICS IN TEACHING MATHEMATICS
Development of programs for teaching numeration; language in the mathematics program; memorisation strategies; teaching algorithms; measurement and spatial components; problem solving; the role of computers and calculators in mathematics.
Credit Points: 12     Contact Hours: 3 per week

MDB601 CURRICULUM STUDIES IN MATHEMATICS, SCIENCE & COMPUTER EDUCATION
Curriculum theory: intended, developed and enacted curriculum; curriculum design; models for curriculum design; impact on information technology; curriculum implementation; vocational models; discipline models, individualised models, school-based models, innovations; curriculum evaluation; historical factors affecting the curriculum in mathematics, science and technology education.
Credit Points: 12     Contact Hours: 3 per week

MDN602 FOCUS ON THE MATHEMATICS, SCIENCE & COMPUTER EDUCATION CLASSROOM
The role of the teacher: metaphors, perceptions, curriculum change, the effective teacher; classroom climate: cooperative versus competitive learning, student/teacher interactions; psychological and learning theories and their application to teaching of mathematics, science and technology education.
Credit Points: 12     Contact Hours: 3 per week

MDN603 CURRICULUM SPECIALISATION IN MATHEMATICS, SCIENCE & COMPUTER EDUCATION
Special topics in mathematics, science and computer curriculum; curriculum at specific year level; special needs of students; past and future trends in curriculum design and implementation. Content varies depending on the needs of the students in the subject.
Credit Points: 12     Contact Hours: 3 per week

MDN604 DIAGNOSIS & ASSESSMENT IN MATHEMATICS
Techniques for diagnosis and remediating difficulties in mathematics; assessment models and their interrelationship with instruction; designing assessment instruments; modern developments in classroom evaluation; practical work with clients.
Credit Points: 12     Contact Hours: 3 per week

MDN605 RESOURCES & TECHNOLOGY IN MATHEMATICS & SCIENCE EDUCATION
Computers in mathematics and science education: software for high order thinking; using computers to reorganise mental functioning; other resources and technologies: print materials, community resources; social, cultural and educational issues in using technology.
Credit Points: 12     Contact Hours: 3 per week

MDN606 POLICY STUDY IN MATHEMATICS & SCIENCE EDUCATION
Major documents affecting mathematics and science education in schools; comparative studies of curriculum in different countries; rationale for policy statements; contextual factors affecting policy formulation; school versus system policies.
Credit Points: 12     Contact Hours: 3 per week

MDN607 ISSUES IN SCIENCE EDUCATION
Equity consideration; science learning and concept development; practical and laboratory skills; science and technology in society; communication in science. Content of subject may vary according to the interest of the students.
Credit Points: 12     Contact Hours: 3 per week

</tbody>
</table>
MDP445 EARTH SCIENCE CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: MDP440 or MDP449
Co-requisite: EDP451
Credit Points: 12 Contact Hours: 3 per week

MDP446 MARINE STUDIES CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: MDP440 or MDP449
Co-requisite: EDP451
Credit Points: 12 Contact Hours: 3 per week

MDP447 PHYSICS CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: MDP440 or MDP449
Co-requisite: EDP451
Credit Points: 12 Contact Hours: 3 per week

MDP448 JUNIOR SCIENCE CURRICULUM & TEACHING STUDIES C
This Curriculum C subject offers studies which enable appropriately qualified students to teach junior Science at lower levels of the secondary school. It allows the application of principles, skills and understandings which have been developed in the Curriculum A subject and which are expanded in the Curriculum B subject.
Credit Points: 12 Contact Hours: 3 per week

MDP450 MATHEMATICS, SCIENCE & TECHNOLOGY 1
The contexts of learning and processes by which effective mathematics/science learning takes place; the nature of mathematics/science and the rationale for mathematics/science education; theoretical constructs of curriculum development; approaches to teaching key concepts and processes; technology in mathematics/science teaching.
Credit Points: 12 Contact Hours: 3 per week

MDP451 MATHEMATICS, SCIENCE & TECHNOLOGY 2
Application of key concepts and processes in mathematics/science; concepts and processes studied in Semester 1 transferred to other mathematics/science topics; development of teaching episodes incorporating the concepts and processes. Assessment and evaluation; difference between assessment and evaluation; nature and types of assessment/evaluation. Child study: student selects child and mathematics/science topic to assess; develop instruments for assessment; analyse child's performance; develop individual program to cater for child's individual mathematical/scientific needs.
Prerequisite: MDP450
Credit Points: 12 Contact Hours: 4 per week

MDP502 COMPUTERS IN EDUCATION
Range of possible uses of computers in education; impact of information technology on learning, curriculum development and teaching strategy; the computer as an administrative tool in education; social implications of the use of computers.
Credit Points: 12 Contact Hours: 3 per week

MDP503 INFORMATION SYSTEMS & EDUCATION
Information storage; types and models of information systems; knowledge representation; databases and database languages, social impact of information systems.
Credit Points: 12 Contact Hours: 3 per week

MDP504 COMPUTERS & SCHOOL ADMINISTRATION
Application of computers to educational administration; student information; databases, spreadsheets, text processing and graphics packages; timetabling and resource utilisation; financial accounting; office automation.
Prerequisites: MDP502, MDP503
Credit Points: 12 Contact Hours: 3 per week

MDP505 COMPUTER TOOLS FOR TEACHING
Application of computers to educational activities; use of software packages for: graphic presentation, text processing and numerical analysis; development of teaching materials.
Prerequisite: MDP501
Credit Points: 12 Contact Hours: 3 per week

MDP506 COMPUTER EDUCATION PROJECT
Types of educational and administrative problems which are and are not amenable to a computer-solution; factors unique to planning computer related activities; evaluation and publishing.
Prerequisites: MDP501, MDP502, MDP503
Credit Points: 12 Contact Hours: 3 per week

MDP507 TEACHING COMPUTER STUDIES: SECONDARY
The nature of computer studies at secondary school level; existing computer studies subjects; frames of reference for teaching computer studies; application to particular subject areas; relating computer studies to the total school curriculum.
Prerequisites: MDP501, MDP502
Credit Points: 12 Contact Hours: 3 per week

MDP508 COMPUTER IN PRIMARY EDUCATION
Computer-based techniques for teaching problem-solving strategies; application of word processing and other software packages to the language arts curriculum; the computer as an information resource for the classroom; teaching and learning with microcomputers; computers, society and education.
Prerequisite: MDP502
Credit Points: 12 Contact Hours: 3 per week

MDP509 MODELLING INFORMATION SYSTEMS
Knowledge representation; very high-level problem description and database languages; development of information processing systems.
Prerequisite: MDP503
Credit Points: 12 Contact Hours: 3 per week
MDP511 DIAGNOSTIC ASSESSMENT IN MATHEMATICS
Overview of numerical and conceptual learning difficulties in mathematics; learning experiences in various areas of mathematics; utility of mathematics in real life situations; examination of mathematics in other curriculum areas; learning experiences in the integration of mathematical topics; use of the handheld calculator and computer as aids to conceptual development and as practical tools; geometric and algebraic concepts across the curriculum; error analysis and diagnostic inventories; remedial strategies.
Credit Points: 10 Contact Hours: 3 per week

MDP515 MATHEMATICS CURRICULUM SPECIALISATION
Influential factors on the development and content of mathematics education; how students learn and apply mathematics; identification of effective curriculum models and teaching strategies for mathematics; classroom applications.
Prerequisite: CUP502
Credit Points: 12 Contact Hours: 3 per week

MDP516 DIAGNOSIS & EVALUATION IN MATHEMATICS EDUCATION
Learning difficulties in mathematics; action-research approach to problem solving and diagnosis; organising mathematics learning; utility of mathematics in real-life situations; formal and informal techniques for diagnosing mathematics difficulties; identifying and remediating specific learning errors.
Prerequisite and/or Co-requisite: MDP515
Credit Points: 12 Contact Hours: 3 per week

MDP517 FOUNDATIONS OF MATHEMATICS IN EDUCATION
The nature of mathematics and mathematical reasoning; topics in number theory; number patterns; group, field and equivalent relation properties; the nature of modelling; vectors; matrices, statistics, game and queuing theory; use of these topics to develop effective instruction; transformational approach to mathematics and its teaching.
Credit Points: 12 Contact Hours: 3 per week

MDP518 HISTORICAL TOPICS FOR MATHEMATICS EDUCATION
History of mathematical topics: counting, number systems, computation, measures, algebra, logic and geometry; the effect of the renaissance; origins and development of calculus; applications in the school classroom.
Credit Points: 12 Contact Hours: 3 per week

MDP519 MATHEMATICS, SCIENCE, TECHNOLOGY & SOCIETY
The rise of western mathematics and science, philosophical, historical and social background to the relationship between mathematics, science, technology and society; the relationship between the nature of technologies and the nature of society, the role of mathematics and science in technology.
Credit Points: 12 Contact Hours: 3 per week

MDP520 THINKING & LEARNING IN MATHEMATICS & SCIENCE
Concepts of thinking, learning and intelligence; modern theories on mathematical and scientific thinking; methods to promote thinking; designing effective mathematics and science learning experiences to foster thinking.
Credit Points: 12 Contact Hours: 3 per week

MDP521 MATHEMATICS EDUCATION
Overview of numerical and conceptual learning difficulties in mathematics; learning experiences in various areas of mathematics; utility of mathematics in real life situations; examination of mathematics in other curriculum areas; learning experiences in the integration of mathematical topics; use of the handheld calculator and computer as aids to conceptual development and as practical tools; geometric and algebraic concepts across the curriculum; error analysis and diagnostic inventories; remedial strategies.
Credit Points: 10 Contact Hours: 3 per week

MDP522 MATHEMATICS EDUCATION
Overview of numerical and conceptual learning difficulties in mathematics; learning experiences in various areas of mathematics; utility of mathematics in real life situations; examination of mathematics in other curriculum areas; learning experiences in the integration of mathematical topics; use of the handheld calculator and computer as aids to conceptual development and as practical tools; geometric and algebraic concepts across the curriculum; error analysis and diagnostic inventories; remedial strategies.
Credit Points: 10 Contact Hours: 3 per week

MDP523 MATHEMATICS EDUCATION
Overview of numerical and conceptual learning difficulties in mathematics; learning experiences in various areas of mathematics; utility of mathematics in real life situations; examination of mathematics in other curriculum areas; learning experiences in the integration of mathematical topics; use of the handheld calculator and computer as aids to conceptual development and as practical tools; geometric and algebraic concepts across the curriculum; error analysis and diagnostic inventories; remedial strategies.
Credit Points: 10 Contact Hours: 3 per week

MDP524 MATHEMATICS EDUCATION
Overview of numerical and conceptual learning difficulties in mathematics; learning experiences in various areas of mathematics; utility of mathematics in real life situations; examination of mathematics in other curriculum areas; learning experiences in the integration of mathematical topics; use of the handheld calculator and computer as aids to conceptual development and as practical tools; geometric and algebraic concepts across the curriculum; error analysis and diagnostic inventories; remedial strategies.
Credit Points: 10 Contact Hours: 3 per week

MDP525 SCIENCE CURRICULUM SPECIALISATION
The nature and importance of science in schools; theoretical principles of science curriculum development; future directions for science education; elements of program planning and evaluation, development of practical teaching sequences of classroom activities; learning difficulties; approaches to assessment.
Prerequisite: CUP502
Credit Points: 12 Contact Hours: 3 per week

MDP526 RESOURCING SCIENCE EDUCATION
The role of equipment in science; the role of computers and audiovisual equipment; the use of community resources such as museums; field trips; the role of print materials; the development of school programs to utilise resources.
Prerequisite: MDP525
Credit Points: 12 Contact Hours: 3 per week

MDP527 SCIENCE CONCEPT DEVELOPMENT & LEARNING
Diversity and unity in the biological and chemical world and the need for classification and organisation; biological and geological change; matter and links to these worlds; role of energy and how it changes; interrelationship and interdependence of the world; techniques for teaching these concepts.
Credit Points: 12 Contact Hours: 3 per week

MDP528 PERCEPTUAL & EXPERIMENTAL SKILLS IN SCIENCE EDUCATION
Sensation and perception and the science of light and sound and chemical stimuli; laboratory instrumentation in school; conducting experiments in the classroom; data collection, recording, communication and analysis; photography, art, graphing and other visual representations of data.
Credit Points: 12 Contact Hours: 3 per week

MEB010 DYNAMICS 1
Modelling methods and analysis; motion of relevant machines and mechanisms; fluids, transmissions and methods of measurements.
Credit Points: 4 Contact Hours: 2 per week

MEB012 DYNAMICS 2
Application of modelling techniques on machines and mechanisms; unbalanced forces in rotating bodies and gyroscopic effects; vibration; interaction of fluids and methods of measurement.
Prerequisite: MEB010
Credit Points: 4 Contact Hours: 2 per week

MEB031 MATERIALS TECHNOLOGY
A structure property approach to orthotic materials; plastics; rubber; metals; composites; modes of failure; strength; creep; fatigue; resilience; selection procedures.
Credit Points: 8 Contact Hours: 2 per week

MEB035 SAFETY TECHNOLOGY 1
The importance and relevance of safety in the workplace; analysis of the accident process; the hazards associated with machinery and materials failure.
Prerequisites: BGB151, PHB250
Co-requisite: PNB211
Credit Points: 12 Contact Hours: 4 per week
MEBI01 DESIGN 1
Mechanical design; power transfer; V-belt drives; chain drives; gear drives; selection of machine components.
Prerequisites: MEB121, CEB184
Co-requisites: MEB133, CEB185, MEB111
Credit Points: 8  Contact Hours: 3 per week

MEBI11 DYNAMICS
Basic concepts of the principles of dynamics; kinetics of particles and systems of particles in plane motion; coordinate systems; relative motion; various methods for the solution of mechanisms; freebody diagrams; work-energy equations; impulse; momentum and impact.
Credit Points: 7  Contact Hours: 3 per week

MEBI21 ENGINEERING GRAPHICS
Principles of geometric drawing; orthographic projection; auxiliary views; sectioning; component detailing; surface developments; assembly drawing; CAD.
Credit Points: 6  Contact Hours: 3 per week

MEBI33 MATERIALS 1
Bonding; thermodynamics of solids; state and phase changes; defects; elasticity, plasticity and fracture; recovery diffusion; recrystallisation; hot and cold deformation; creep and fatigue mechanisms; heat treatment. Alloying and strengthening in metals, polymers and ceramics.
Credit Points: 6  Contact Hours: 3 per week

MEBI171 INTRODUCTION TO MANUFACTURING
The role of manufacturing in the Australian economy; modern concepts in manufacturing systems design: the interrelationship between design, materials selection, manufacturing processes, marketing and information processing of products; choice of manufacturing technologies in relation to product quantity and quality.
Credit Points: 2  Contact Hours: 1 per week

MEBI173 MANUFACTURING PRACTICE
The role of manufacturing in the Australian economy; modern concepts in manufacturing systems design: the interrelationship between design, materials selection, manufacturing processes, marketing and information processing of products; choice of manufacturing technologies in relation to product quantity and quality; hands-on experience in manufacturing processes; metrology, laboratory and systems modelling.
Credit Points: 7  Contact Hours: 1 per week

MEBI200 INDUSTRIAL EXPERIENCE 1
Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form completed by both the student and the employer.
Contact Hours: 5 weeks

MEBI230 MATERIALS 2
Solidification of ingots and castings; segregation; defects; properties of cast irons; steel and non-ferrous alloys. Properties of welded materials; arc characteristics; metal transfer; thermal diffusivity; cooling rates and transformations; carbide equivalents; hot and cold cracking; residual stresses and dilution effects. Properties of wrought materials; strain hardening; anisotropy; preferred orientation; defects; toughness.
Microstructures and properties of high strength low alloy steels; important non-ferrous alloys.
Prerequisite: MEB133
Credit Points: 6  Contact Hours: 3 per week

MEBI231 MATERIALS 3
The structure and properties of polymers; composites and modern engineering ceramics; stress transformations; fibre and matrix properties; fibre density and orientation; rule of mixtures; modern engineering polymers; properties and applications; fracture toughness of polymers, ceramics and metals; linear elastic fracture mechanics; application to static and dynamic forces such as fatigue and stress corrosion cracking.
Prerequisite: MEB133
Credit Points: 6  Contact Hours: 3 per week

MEBI250 THERMODYNAMICS 1
Basics of engineering thermodynamics; reversibility; first and second laws of thermodynamics; applications to heat engines; compressors; engine testing; particular emphasis given to single phase systems; field visit.
Credit Points: 6  Contact Hours: 3 per week

MEBI251 THERMODYNAMICS 2
Steam plant; impulse and reaction turbines; gas turbines; refrigeration; field visit.
Prerequisite: MEB250
Credit Points: 6  Contact Hours: 3 per week

MEBI270 INDUSTRIAL EXPERIENCE 2
Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form completed by both the student and the employer.
Contact Hours: 5 weeks

MEBI300 INDUSTRIAL EXPERIENCE 3
Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form completed by both the student and the employer.
Contact Hours: 5 weeks

MEBI313 MECHANICS 1
Kinematic and dynamic analysis of linkages and mechanisms; linkage synthesis applied to spatial mechanisms and robotics; the design and synthesis of cams; kinematic analysis of gears.
Prerequisites: MEB111, CEB184, CEB185
Credit Points: 6  Contact Hours: 3 per week

MATERIALS & MANUFACTURING PROJECT
The project exposes the student to self-regulated but supervised research on a specified topic associated with materials or manufacturing engineering. A survey of relevant literature and organised experimental work resulting in conclusions presented in a formal report.
Prerequisites: MEB230, MEB231
Credit Points: 6  Contact Hours: 3 per week

MEBI361 FLUIDS 1
Fluid mechanics; forces in a fluid at rest and its action on submerged and floating bodies; manometry; pressure distribution in a liquid subjected to acceleration; different types of flow; momentum and energy equations; flow through orifices and vortex flow.
Prerequisites: MEB111, PHB132, MAB193
Credit Points: 6  Contact Hours: 3 per week
MEB362 THERMO-FLUIDS
Fluid properties; forces on fluids at rest; definition and applications of the continuity equation, the momentum equation and the energy equation; isentropic compressible flow including boundary layer effects; first and second laws of thermodynamics.
Credit Points: 7 Contact Hours: 3 per week

MEB370 MANUFACTURING SYSTEMS 1
Practical machining principles; mechanics of chip formation; speeds and feeds selection; practical applications in metrology; numerical control and parts programming; processing of plastics.
Prerequisite: MEB171
Credit Points: 6 Contact Hours: 3 per week

MEB381 DESIGN 2
Methodology for mechanical design; design of machine elements; design for strength and fatigue; computer aided design.
Prerequisites: MEB121, MEB101, CEB184, CEB185
Co-requisite: MEB313
Credit Points: 6 Contact Hours: 3 per week

MEB402 INDUSTRIAL EXPERIENCE 3
Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form completed by both the student and the employer.
Contact Hours: 5 weeks

MEB408 PROJECT A (MECHANICAL)
Investigate and present a formal report on a mechanical engineering problem; project may be industry based or arise from applied research.
Prerequisite: MEB339 Co-requisite: MEB489
Credit Points: 16 Contact Hours: 6 per week

MEB411 THEORY OF MACHINES
Balancing of mechanisms and rotors; gyroscopic effects in mechanisms; rotors and vehicles; gear trains, simple and epicyclic; friction and centrifugal devices such as clutches and governors.
Prerequisites: MEB111, CEB184, CEB185
Credit Points: 7 Contact Hours: 3 per week

MEB450 AIR CONDITIONING
Psychrometry; cooling load calculations; air conditioning systems; vapoour compression refrigeration cycle analysis; multipressure systems; absorption refrigeration; field visit.
Prerequisites: MEB231, MEB462
Co-requisite: MEB350
Credit Points: 7 Contact Hours: 3 per week

MEB454 AERODYNAMICS 1
Incompressible airflow around bluff bodies and aerofoils and in a tube of varying cross-sections; stalling of aerofoils; variations with angle of attack of lift, pressure, pitching moment and drag coefficients; the influence of Reynold's Number including the effect of boundary layers, turbulent and laminar; high lift devices and fuselage effect; platform effects; aircraft layouts such as canards and delta wings.
Prerequisite: MEB362
Credit Points: 6 Contact Hours: 3 per week

MEB462 FLUIDS 2
Fluid flow in closed conduits; rotodynamic machines; hydraulic transmissions; water hammer in pipes; dimensional analysis and dynamic similarity.
Prerequisite: MEB193
Co-requisites: MEB361, MAB493
Credit Points: 6 Contact Hours: 3 per week

MEB463 TRIBOLOGY
The fundamentals of tribology; specification and measurement of surface roughness; lubrication modes; lubricants; wear modes; bearing design; lubrication of machine elements; seals.
Credit Points: 6 Contact Hours: 3 per week

MEB464 FLUIDS 3
Boundary layer theory; a general approach to viscous flow via the Navier-Stokes and Reynold's equations; isentropic compressible flow; normal and oblique shock waves.
Prerequisites: MEB462, MAB893
Credit Points: 7 Contact Hours: 3 per week

MEB470 INDUSTRIAL EXPERIENCE 2
Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience record form completed by both the student and the employer.
Contact Hours: 5 weeks

MEB471 MANUFACTURING ENGINEERING 1
Practical machining principles and mechanics of chip formation; economics of machining; practical applications in metrology; NC part programming.
Credit Points: 6 Contact Hours: 3 per week

MEB472 MANUFACTURING SYSTEMS 2
Fundamentals and applications of plasticity theory in the deformation of metals and plastics; concepts and applications of non-traditional machining and forming processes; introduction to automation and advanced manufacturing techniques.
Prerequisite: MEB370
Credit Points: 6 Contact Hours: 3 per week

MEB483 DESIGN 3
Design of mechanisms; welded structures; flexible components; journal bearings; computer aided design.
Prerequisites: MEB133, MEB111, MEB381, CEB102, CEB191
Co-requisites: MEB411, MEB231, MEB313
Credit Points: 7 Contact Hours: 3 per week

MEB489 MECHANICAL DESIGN PROJECT
A team approach to design; projects drawn from either the University or industry; application of theoretical and practical design principles; design, draw and supervise manufacture of project; presentation of formal report.
Prerequisites: MEB483, MEB610, MEB511, MEB773
Co-requisites: MEB772, MEB911
Credit Points: 7 Contact Hours: 3 per week

MEB500 SPECIAL TOPIC 1
A series of lectures and tutorials in subject areas which are of special professional relevance to the student's intended career path, or which may be available on occasions from visiting scholars.
Prerequisites: Students need to have achieved an appropriate level of preparation in the topic area concerned.
Co-requisites: Depend on the syllabus of the particular special topic offered.
Credit Points: 7 Contact Hours: 3 per week
• MEB510 NOISE & VIBRATIONS
Introduction to noise and vibration measurements and instruments; free and forced vibration; normal mode vibration; Holzer’s method; Mykelstadt’s method; noise levels; A-weighting; leq; SEL; noise dose and standards; sound power; absorption; the behaviour of sound relating to rooms, enclosures and partitions.
Prerequisites: PHB132, MAB493
Co-requisite: MAB893
Credit Points: 7
Contact Hours: 3 per week

• MEB511 STRESS ANALYSIS
Analysis of strain and stress; strain-displacement relations; stress and strain transformation; 2 dimensional problems including curved bars, thick-walled cylinders and rotating discs; tension of prismatic bars and thin-walled sections; failure criteria and their applications; experimental strain measurement and analysis.
Credit Points: 7
Contact Hours: 3 per week

• MEB531 ADVANCED MATERIALS
Properties and applications for modern advanced composites; fibre reinforcements of ceramic, metal and polymer materials. Coatings of metals and ceramics by vapour deposition; plasma and advanced techniques. Surface treatments for frictional and wear performance. Properties of ultra high strength steels.
Credit Points: 7
Contact Hours: 3 per week

• MEB550 HEAT TRANSFER
Conduction: steady-state, 1 and 2 dimensions, unsteady-state; convection: boundary layers, forced, natural and radiation black and grey bodies, shape factors.
Credit Points: 6
Contact Hours: 3 per week

• MEB551 PROPULSION & ENGINES
Piston engines; super chargers and carburetors; actuator disc theory of propellers and rotating wing aircraft; gas turbine engines; compressors; turbines; ignition systems; fuel control systems and after-burners; rocket motors; fuels and thrust calculations.
Prerequisite: MEB230, MEB231
Credit Points: 7
Contact Hours: 3 per week

• MEB553 AERODYNAMICS 2
Transonic and supersonic flows; critical Mach numbers; quasi 1 dimensional stationary current equations, shock waves, compression and expansion; linear flow around aerofoil sections; convergent divergent nozzles; qualitative study of flow around differing wing areas and shape; climb, cruise, descent, take off and landing calculations.
Prerequisite: MEB454
Credit Points: 6
Contact Hours: 3 per week

• MEB571 MANUFACTURING ENGINEERING 2
Fundamentals and applications of plasticity theory in the deformation of metals and plastics; analysis of forming machine performance and selection of machine tools.
Credit Points: 6
Contact Hours: 3 per week

• MEB600 INDUSTRIAL EXPERIENCE 3
Students should engage in at least five weeks employment, approved by the Head of School. For the employment to be recognised, students must submit an industrial experience report form completed by both the student and the employer.
Contact Hours: 5 weeks

• MEB601 SPECIAL TOPIC 2
A series of lectures and tutorials in subject areas which are of special professional relevance to the student’s intended career path, or which may be available on occasions from visiting scholars.
Prerequisites: Students need to have achieved an appropriate level of preparation in the topic area concerned.
Co-requisites: Depend on the syllabus of the particular special topic offered.
Credit Points: 7
Contact Hours: 3 per week

• MEB610 MECHANICS 2
Introduction to mechanical frames and methods of analysis; investigation of the effects of static and dynamic loading upon frames and framework members.
Prerequisites: MEB411, MEB510, MAB493
Co-requisite: MEB511
Credit Points: 6
Contact Hours: 3 per week

• MEB611 STABILITY & CONTROL OF AIRCRAFT
Equations of motion; longitudinal, lateral and directional stick fixed and stick free control and stability; manoeuvring flight; use of aerodynamic coefficients without derivation; control system modelling.
Prerequisite: MEB553
Credit Points: 5
Contact Hours: 3 per week

• MEB640 AUTOMATION 1
Mathematical models of mechanical systems; system response to given inputs; modification of system parameters to obtain a more desirable response in closed loop.
Prerequisite: MAB493
Credit Points: 7
Contact Hours: 3 per week

• MEB650 THERMODYNAMICS 3
Properties and testing methods of solid, liquid and gaseous fuels; combustion calculations; flow gas analysis; energy tariffs and audits; major applications of energy management, eg. buildings, process plant, compressed air systems, vehicle fleets; economic evaluation of energy projects; introduction and management of energy-saving programs; field visit.
Prerequisites: MEB550, MEB251
Credit Points: 6
Contact Hours: 3 per week

• MEB660 FLUID POWER
Introduction to fluid power; graphical symbols; simple circuits; cascade method; Boolean algebra; fluid logic; Karnaugh- Veitch method; hydraulic components; hydraulic system design; hydraulic circuits.
Prerequisite: MEB462
Credit Points: 6
Contact Hours: 3 per week

• MEB6670 INDUSTRIAL ENGINEERING I
Project planning and control; plant location and layout; work study; design of experiments; linear programming applications.
Credit Points: 6
Contact Hours: 3 per week

• MEB673 MANUFACTURING ENGINEERING 3
Advanced manufacturing technology; tool chatter and vibration; optical metrology; an introduction to CAM and robotics.
Prerequisite: MEB471
Credit Points: 7
Contact Hours: 3 per week

• MEB680 ADVANCED MECHANICAL DESIGN
The application of modern materials and analytical techniques to mechanical design: case studies; statistical analysis of failures; application of material
science in design; fracture mechanics; computer aided optimisation techniques.

**MEB709 AIRCRAFT SYSTEMS**

Design criteria and techniques of hydraulic, pneumatic and electrical circuits to provide the services to operate a modern aircraft, e.g. detailed analysis of undercarriage and flap systems; aircraft fuel systems; pressurisation systems; cockpit instrumentation and associated equipment; fundamental principles and operation of gyroscopes and accelerometers.

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB710 AUTOMATION 2**

Use of computer packages in control system design (e.g. matrix, 'X'); fundamentals of discrete time systems; instrumentation used in the acquisition and analysis of digital data (e.g. Labtech); programmable logic controllers.

**Prerequisites:** MEB640, MEB660

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB740 MAINTENANCE MANAGEMENT & TECHNOLOGY**

The economic and environmental importance of maintenance; management of the maintenance function including organisation; data systems; cost control; spares policy; design for reliability; planning of overhauls; the maintenance of buildings; mechanical maintenance and failure analysis; electrical and electronic maintenance.

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB771 INDUSTRIAL ENGINEERING 2**

Forecasting; manufacturing resources planning; scheduling; capacity planning; total quality control; modelling and simulation.

**Prerequisite:** MEB670

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB772 ENGINEERING PROJECT APPRAISAL**

Rational economic analysis of engineering projects at product level and project level; techniques needed to establish the cost of a project; techniques for determining design changes needed to reduce the manufacturing cost of a product; strategies for new product planning.

**Prerequisites:** MEB483, MEB339, MEB472

**Co-requisites:** MEB773, MEB670

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB773 DESIGN FOR MANUFACTURING 1**

Value analysis and principles related to product design; tolerance technology; design of jigs and fixtures; cutting tools applicable for various machining operations including assembly.

**Prerequisite:** MEB171

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB774 OPERATIONS MANAGEMENT**

Method study and work measurements; job design, project planning and control; scheduling; capacity planning; resource planning; inventory control; total quality control.

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB798 SPACECRAFT & SATELLITE DESIGN**

Analysis techniques of spacecraft control including stabilisation and attitude control; monitoring and control of internal environment; albedo measurements; effects of solar eclipses; heat and radiation projection methods; design of on-board systems including power systems; attitude control; libration dampers; accelerometers and station keeping systems; requirements for satellite and ground-station equipment design and operation.

**Prerequisite:** MEB692

**Credit Points:** 6  **Contact Hours:** 3 per week

**MEB800 SPECIAL TOPIC 4**

A series of lectures and tutorials in subject areas of special professional relevance to the student's intended career path, or which may be available on occasions from visiting scholars.

**Prerequisites:** Students need to have achieved an appropriate level of preparation in the topic area concerned.

**Co-requisites:** Depend on the syllabus of the particular special topic offered.

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB810 INDUSTRIAL NOISE & VIBRATION**

Vibration measurements; spectrum analysis; Kurztest, Cepstrum and envelope analysis; averaging; gear, bearing and rotor vibration; whole body and arm vibration; noise measurements; noise power; industrial standards; attenuation methods.

**Prerequisite:** MEB510

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB900 MANUFACTURING PROJECT**

The student is required to investigate in depth and present a formal report on a problem area taken from the full range of manufacturing engineering practices. Project may arise through investigation in applied research programs or specific topics from industry.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MEB911 FINITE ELEMENT ANALYSIS**

General description of the finite element method; static and dynamic analysis of mechanical engineering problems; review of finite element packages.

**Prerequisites:** MEB462, MEB550, MEB610, MEB511

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB950 PROCESS PLANT DESIGN**

Duct and industrial pipework system design; pressure vessel design methods; field visits.

**Prerequisites:** MEB251, MEB462

**Co-requisite:** MEB511

**Credit Points:** 7  **Contact Hours:** 3 per week

**MEB960 FLUID SYSTEMS DESIGN**

Analysis of selected fluid systems; performance characteristics of components; performance characteristics of systems.

**Co-requisite:** MEB454

**Credit Points:** 7  **Contact Hours:** 3 per week
■ MEB974 DESIGN FOR MANUFACTURING 2
Design of press tools, dies for forming operations and joining processes; an overview of CAD in tool and die design.
Prerequisite: MEB571
Credit Points: 7  Contact Hours: 3 per week

■ MEB975 DESIGN OF MANUFACTURING SYSTEMS
Design and integration of flexible fixtures, palleterisers and conveyors to flexible manufacturing systems (FMS); the use of robots and automatic guided vehicles in materials handling; total integrated manufacturing systems; selection of machine tools for CIM implementation.
Prerequisites: MEB976, MEB977
Credit Points: 7  Contact Hours: 3 per week

■ MEB976 COMPUTER INTEGRATED MANUFACTURING
Requirements for implementing CAD/CAM systems; component design using geometric modelling techniques; classification systems for part family formation and computer aided process planning; concepts and applications of flexible manufacturing systems (FMS).
Credit Points: 7  Contact Hours: 3 per week

■ MEB977 COMPUTER CONTROL OF MANUFACTURING SYSTEMS
Use of computers in machine tool control; computer control of production systems; control of robots; interfacing and networking.
Prerequisite: MEB976
Credit Points: 7  Contact Hours: 3 per week

■ MEB978 MANUFACTURING SYSTEMS ENGINEERING
Concepts and fundamentals of manufacturing systems analysis and production management; simulation and modelling of manufacturing systems.
Credit Points: 7  Contact Hours: 3 per week

■ MEB980 DESIGN OF POWER TRANSMISSION SYSTEMS
Design of systems for the transmission of mechanical power; solid elements: gears, clutches, belts, etc.; fluid elements: pneumatic and hydraulic.
Prerequisites: EEB209, MEB411, MEB313, MEB483
Co-requisites: MEB510, MEB511
Credit Points: 7  Contact Hours: 3 per week

■ MEB981 DESIGN OF MATERIALS HANDLING SYSTEMS
Design of bulk material conveying and process plant, storage silos and bins, ground stockpiling systems, and the associated supporting structures.
Prerequisites: MEB483, MEB411, CEB184, CEB185, MEB111, MEB511
Credit Points: 6  Contact Hours: 3 per week

■ MEP173 QUALITY PLANNING
Quality systems, a succinct explanation; case studies; TQC and the deming philosophy; getting things into perspective; the business plan; quality management; continuous training and productivity improvement on the path to business success; quality assurance, its organisation and function; TQ principle; procedures and audits; everyone's responsibility; the role of the QA entity; organisation structure; the quality manual; standards and their applications; procedures preparation and format; the quality plan; inspection and test plans; design control; procurement to control; audit and corrective action; the quality manual assignment.
Credit Points: 6  Contact Hours: 3 per week

■ MEP201 SAFETY TECHNOLOGY & PRACTICE 1
Overview of models of the accident phenomenon; technological background of potential hazards with electrical power; construction site mechanical equipment hazards and failure; failure modes of engineering materials; mechanical properties of engineering materials and their effect on failure mode.
Credit Points: 12  Contact Hours: 3 per week

■ MEP273 QUALITY MEASUREMENT & TESTING
Measurement basics; measurement and standards; measurement errors; reliability of measurements; application of statistics; the cumulative distribution function; weights and errors; statistical interpretation of test results; the hypergeometric distribution; the binomial distribution; the poisson distribution; the pascal distribution; the normal distribution; the central limit theorem. Quality assurance in the laboratory; calibration in the laboratory; uncertainty of measurements; the laboratory quality manual; assignments and laboratory audits.
Credit Points: 6  Contact Hours: 3 per week

■ MEP301 SAFETY TECHNOLOGY & PRACTICE 2
The psychology of industrial accidents; the technology of electrical power plant mechanical equipment and materials (failure pertaining to accident prevention; accident prevention and hazard recognition; risk management and control; design and maintenance of personal protection equipment; safe habits and the effective use of personal protection equipment.
Prerequisites: MEP201
Credit Points: 12  Contact Hours: 3 per week

■ MEP371 RELIABILITY & MAINTAINABILITY
Reliability and maintainability; relationship between reliability and quality; relationship between designer, manufacturer and operator; means of achieving high reliability and maintainability; fundamental theory of reliability; reliability data analysis; practical applications of Weibull's distribution to reliability and maintainability; modelling for reliability; computerised maintenance systems, economics and systems availability.
Credit Points: 6  Contact Hours: 3 per week

■ MEP473 QUALITY SYSTEMS & ASSESSMENT
Subject and class breakdown on the basis of syndicates for leading topic discussion; lectures on quality system requirements; policy and organisation; planning; purchasing; work instructions; inspection; corrective action; review and reorganise; application of topics to AS3900 - 1987/ISO9000 - 1987 to AS3904 - 1987/ISO9004 - 1987; application of topics to AS2990 - 1987; syndicate presentation; quality system requirements and assessment; the mechanics of step-by-step auditing.
Credit Points: 8  Contact Hours: 2 per week

■ MET101 ENGINEERING DRAWING
Engineering graphics for electrical engineering students: orthographic projection; preparation of circuit diagrams; other drawing relevant to electrical en-
ENGINEERING ASSOCIATES; COMPUTER AIDED DRAFTING TECHNIQUES
Credit Points: 7  Contact Hours: 3 per week

MET120 ENGINEERING DRAWING 1
Lettering and linework; principles of third angle projection; orthographic projection; pictorial drawing; assembly drawing; sectional views; CAD.
Credit Points: 7  Contact Hours: 3 per week

MET121 DRAFTING PRACTICE 1A
Complements MET120: drawing mechanical engineering components; detailed exercises; CAD.
Co-requisite: MET120
Credit Points: 3  Contact Hours: 3 per week

MET123 ELECTRICAL ENGINEERING DRAWING 1A
Preparation of block diagrams; logic diagrams; circuit diagrams.
Co-requisite: MET101
Credit Points: 3  Contact Hours: 3 per week

MET140 ENGINEERING MATERIALS I
General properties of materials; materials selection; service requirements and properties of ferrous and nonferrous metals and alloys; corrosion types and prevention; testing procedures; plastics, ceramics and other materials.
Credit Points: 8  Contact Hours: 3 per week

MET170 MANUFACTURING TECHNOLOGY
Basic methods of converting raw material into manufactured goods; an introduction to metrology; safety in the work place.
Credit Points: 8  Contact Hours: 3 per week

MET171 TRADE TRAINING 1A
Skill training in basic fitting and welding; the practical and applied aspects of fitting and welding skills.
Credit Points: 6  Contact Hours: 7 per week

MET175 WORKSHOP (MECHANICAL) 1A
An introduction to workshops and field training; the use of sketches; working drawings; materials; safety and legal requirements.
Credit Points: 3  Contact Hours: 3 per week

MET201 APPLIED MECHANICS
Statics; friction; velocity and acceleration; inertia and change of motion; dynamics of rotation; periodic motion; balancing; work and energy; impulse and momentum; strain and stress; fluids at rest and in motion.
Credit Points: 7  Contact Hours: 3 per week

MET210 APPLIED MECHANICS 1
Force and its effects; equilibrium; moments of forces; displacement, velocity and acceleration; inertia; friction and friction machines.
Credit Points: 8  Contact Hours: 3 per week

MET220 ENGINEERING DRAWING 2
Auxiliary views; sectional views; intersections; surface developments; CAD.
Prerequisite: MET120
Credit Points: 8  Contact Hours: 3 per week

MET221 DRAFTING PRACTICE 2A
Cam and gear geometry; spatial geometry; mechanical drive component selection; CAD.
Co-requisite: MET220
Credit Points: 3  Contact Hours: 3 per week

MET223 ELECTRICAL ENGINEERING DRAWING 2A
Printed circuit board layout; plant layout; transformer construction; single line diagrams; CAD.
Prerequisites: MET101, MET123
Credit Points: 3  Contact Hours: 3 per week

MET250 THERMODYNAMICS
Basic engineering thermodynamics concepts; systems; reversibility; first and second laws; working fluids; IC engine cycles and simple performance evaluations.
Credit Points: 6  Contact Hours: 3 per week

MET271 TRADE TRAINING 2A
Skill training in basic metal machining techniques; practical and applied aspects of turning, milling, shaping and surface grinding.
Credit Points: 6  Contact Hours: 3 per week

MET310 APPLIED MECHANICS 2
Work, power and energy; efficiency; introduction to simple machines; mechanical advantage and velocity ratio; hydrostatics and fluid friction; section properties; shearing force and bending moments; torsion.
Credit Points: 8  Contact Hours: 3 per week

MET320 ENGINEERING DRAWING 3
Geometric tolerancing; structural drafting; simplified dimensioning techniques; CAD.
Prerequisites: MET120, MET220
Credit Points: 6  Contact Hours: 3 per week

MET350 PROCESS ENGINEERING
Steam plant; positive displacement compressors; refrigeration plant; positive expanders; reciprocating engines; gas turbines.
Prerequisite: MET250
Credit Points: 7  Contact Hours: 3 per week

MET352 AIR CONDITIONING & REFRIGERATION
Ideal and actual refrigeration cycles including variation of operating conditions; performance of refrigeration equipment; psychrometry; cooling load estimation; air supply systems.
Prerequisite: MET250
Credit Points: 7  Contact Hours: 3 per week

MET421 MECHANICAL PROJECT 1A
Report and presentation: projects selected from list; each project deals with a specific engineering environment.
Prerequisite: MET320
Credit Points: 3  Contact Hours: 3 per week

MET433 ENGINEERING MATERIALS 2
Properties and selection of advanced engineering materials.
Co-requisite: MET140
Credit Points: 8  Contact Hours: 3 per week

MET475 WORKSHOP (MECHANICAL) 3A
An introduction to workshop machines and practices.
Co-requisite: MET175
Credit Points: 3  Contact Hours: 3 per week
• MET511 NOISE, STRESS & VIBRATION PRACTICE
  Instrumentation used to measure vibrations, noise and stress; fundamental principles and equations related to such measurement; vibration isolation; noise standards; stress/strain transformations.
  Co-requisites: MET210, MET310
  Credit Points: 6  Contact Hours: 3 per week

• MET560 THERMOFLUIDS
  Fluid statics; fluid flow and measurement; dimensionless groups; elementary heat transfer by conduction, convection and radiation.
  Credit Points: 8  Contact Hours: 3 per week

• MET572 PRODUCTION PLANNING & CONTROL
  Overview of production management; introduction to quality control; types of production; plant layout; scheduling and inventory control.
  Prerequisite: MET171
  Credit Points: 6  Contact Hours: 3 per week

• MET573 CAD/CAM TECHNOLOGY
  Introduction to the fundamentals of CAD/CAM and geometrical modelling; automated process planning; practical applications in CNC programming and economics of machine tools; the use of robots and principles of integrated manufacturing systems.
  Credit Points: 7  Contact Hours: 3 per week

• MET580 MACHINE ELEMENTS 1
  Practical application of shear force and bending moment diagrams; selection of components from BHP manual; use of handbooks, codes and rolled steel section tables; bolted and welded connections; application of standard rolled steel sections; selection of shafts.
  Prerequisites: MET210, MET120, MET220
  Credit Points: 6  Contact Hours: 3 per week

• MET600 MATERIALS FOR ELECTRICAL ENGINEERS
  Properties of materials; materials selection; service requirements and properties of ferrous and nonferrous metals and alloys; corrosion types and prevention; testing procedures; plastics, ceramics and other materials.
  Credit Points: 4  Contact Hours: 1.5 per week

• MET601 MECHANICAL PLANT
  Manufacturing processes and workshop practices; power station equipment (turbines and boilers); mining machinery; air conditioning equipment; fans and pumps; hoists; compressors; cranes; welding; heat transfer principles.
  Credit Points: 3  Contact Hours: 1.5 per week

• MET650 PLANT ENGINEERING 1A
  A series of investigatory practical sessions related to design parameters, performance characteristics and plant maintenance practices associated with engineering plant systems; the machinery within the system and maintenance procedures.
  Credit Points: 3  Contact Hours: 3 per week

• MET680 MACHINE ELEMENTS 2
  Selection and application of shafts and couplings; selection of spur, helical and worm reduction unit; determination of gear forces; selection of springs and brakes; curved beams.
  Prerequisite: MET580
  Credit Points: 7  Contact Hours: 3 per week

• MET733 INDUSTRIAL METALLURGY
  Techniques in casting; metallurgical advances in materials and their evaluation.
  Prerequisite: MET433
  Credit Points: 6  Contact Hours: 3 per week

• MET782 JIG & TOOL DESIGN
  Design of jig and fixtures for various machine operations and assembly; principles in design of blanking and forming dies; special forming techniques; dies used in blow and injection moulding; simple press capacity calculation.
  Prerequisite: MET171
  Credit Points: 6  Contact Hours: 3 per week

• MET850 ENERGY MANAGEMENT
  Tariff framing and objectives; energy and power losses in electrical and mechanical plant; equipment and buildings; identification of losses; energy audits; load forecasting and control.
  Co-requisites: MET500, MET250.
  Credit Points: 6  Contact Hours: 3 per week

• MET920 COMPUTER AIDED DESIGN & DRAFTING
  Computer based drafting: 2 dimensional drafting; design and solid modelling.
  Prerequisites: MET120, MET220
  Credit Points: 6  Contact Hours: 3 per week

• MET933 INDUSTRIAL TRIBOLOGY
  Maintenance and maintenance systems; types and mechanisms of wear; bearings and seals; friction: lubricants; oils, greases, solid lubricants; gas as a lubricant; application of lubricants.
  Credit Points: 6  Contact Hours: 3 per week

• MET940 MECHANICAL MEASUREMENTS
  Instruments used to measure mechanical quantities; function and method of application; speed; acceleration; frequency; force; torque; pressure; level; flow; temperature.
  Credit Points: 8  Contact Hours: 3 per week

• MET960 FLUID POWER
  Introduction to fluid power; compressed air systems; graphical symbols; cascade method of pneumatic system design; hydraulic components; hydraulic circuits.
  Credit Points: 7  Contact Hours: 3 per week

• MET961 FLUID MECHANICS
  Characteristics of pumps; turbines; compressors and fans; fluid couplings and torque converters. Friction losses in pipes and fittings. Analysis of complete pumping systems.
  Prerequisite: MET560
  Credit Points: 7  Contact Hours: 3 per week

• MET971 INDUSTRIAL PRACTICE
  Human resource management; work study; aspects of communication; leadership and teamwork; practical applications in planning and control; basic engineering metrology.
  Credit Points: 7  Contact Hours: 3 per week

• MJB100 MEDIA PRODUCTION
  Focus on the still image and still images in juxtaposition in terms of the technical processes of producing images and the cultural and artistic processes of creating meaning with images; the processes of skills of photography; thematic presentation of images in sequence e.g. slide shows; application of computers and other electronic technologies in media production and presentation including: basic applications, com-
communications, graphics, animation, interactive videodisc, multimedia and computer-based education. Elementary computer skills are developed including the use of Microsoft Works.

Credit Points: 12  Contact Hours: 3 per week

**MJB102 ADVANCED TEXT ANALYSIS**

The nature of printed material, radio, film and television as forms of communication; the general range of media studies approaches: structuralism, psychoanalysis, linguistics, film theory and narrative theory; media production as texts; the factors determining their construction and how they influence their reception by audiences.

Prerequisite: Australian Media Institutions, and Literature and Communication, MJB104.

Credit Points: 12  Contact Hours: 3 per week

**MJB103 NEWS PRODUCTION**

What is a media organisation; media industries and media firms; social responsibilities of media companies; managing deadlines; planning and decision-making in the newsroom; leadership and motivation; news practice: radio, television, newspapers; case studies.

Prerequisites: MJB122, MJB138

Credit Points: 12  Contact Hours: 3 per week

**MJB104 MEDIA INDUSTRIES & ISSUES**

An introduction to the study of the mass media, with particular emphasis on Australian media industries: television, radio, the press, advertising, and film and video, from social, historical and industrial perspectives, and current issues facing these industries.

Credit Points: 12  Contact Hours: 3 per week

**MJB105 FILM & SOCIETY**

The Great Depression era, Roosevelt's new deal, and the ways in which 1930s genre films refracted these problems; post-war reconstruction and the re-affirmation of the family unit in 1940s films; the period of the House Committee on un-American activities and associated films; the films of the 1960s and their relation to various radical movements; the treatment of a range of social issues in American films of the 1970s and 1980s.

Prerequisite: MJB130

Credit Points: 12  Contact Hours: 3 per week

**MJB106 SCREEN ADAPTION**

The process of adaption of literary texts into feature films. Selective thematic and textual analysis of modern literature and film enables students to appreciate both forms as a expression of society. These analyses are related to the broader questions of representation and rhetoric of fiction in film.

Credit Points: 12  Contact Hours: 3 per week

**MJB107 GENDER & THE MEDIA**

Cultural gender representation of masculinity and femininity in a range of media texts; historical, sociological and economic contexts of gender ideology and cultural discourses such as motherhood, romance, the new woman; violence; women as creators of visual art and media texts; women as audience; gender and popular cultures.

Credit Points: 12  Contact Hours: 3 per week

**MJB108 CREATIVE SOUND & IMAGE**

Creation and manipulation of sound and image in the communication context; fundamentals of sound and sound recording; dynamic range, distortion, bias, equalization, multitracking and mixing; fundamentals of light and colour; additive and subtractive colour, film animation, pixilation, computer graphics and computer animation.

Credit Points: 12  Contact Hours: 3 per week

**MJB109 AUSTRALIAN TELEVISION**

Australian cultural identity before television; key myths in Australia—the Anzacs; crime and corruption as part of the Australian way of life; political and social crisis in Australia; the Vietnam experience; the search for an independent national identity; the relationship with Britain, USA and Japan.

Credit Points: 12  Contact Hours: 3 per week

**MJB110 ASIAN & LATIN AMERICAN CINEMA**

A concentrated study of two of the following national cinemas: China, Japan, Brazil and Cuba. Chinese cinema from the perspective of the new cinema which emerged from the film makers Chen Kaige, Wu Tianming, Zhang Yimou and Tian Zhaohuang. Japanese cinema in relation to the dominance of a small number of film companies in the 1930s, the impact of World War II, and the output of film makers such as Mizoguchi, Ozu, Kurosawa, Ichikawa, Oshima and Itami. Cuban cinema within the context of the Cuban revolution. Brazilian cinema and the various phases of Cinema Novo, the influence of the Tropicalist movement, parody, the camavalesque and the function of Embrafilme.

Credit Points: 12  Contact Hours: 3 per week

**MJB113 FILM DRAMA PRODUCTION**

Analysis of the process and effects of mediated communication; budgeting and production management; effective presentation methods; innovation and special media events; advanced production techniques. Students are required to work in crews to produce a significant film production.

Prerequisites: MJB129, MJB126

Credit Points: 12  Contact Hours: 3 per week

**MJB114 FILM & VIDEO BUSINESS**

The role of the producer and executive producer in the packaging and financing of film and television production including corporate, training and documentary, grant films, features and mini-series; achieving balance in above-the-line, below-the-line and marketing costs. Sources of finance: corporate sponsors, corporate clients, investors, pre-sales, government grants, Film Finance Corporation; methods of obtaining finance, insurance, completion guarantees, legal and accounting requirements; social and ethical issues; script breakdowns, budgeting and production management.

Prerequisite: MJB113

Credit Points: 12  Contact Hours: 3 per week

**MJB115 SUPERVISED PROJECT FILM & TV**

The completion of a significant film or video production. Seminar presentation and discussion of each stage of production throughout the semester with progress reports made each week including the viewing of rushes and cut material.

Prerequisite: MJB114 and either MJB134 or MJB113

Credit Points: 12  Contact Hours: 3 per week

**MJB116 FILM LANGUAGE & GENRE**

Extending the structural and semiotic insights from the introductory theory subject, the processes by which films construct reality, and relates these to the
conventions and iconography of film genre; linkages between text, ideology and industry.

**Prerequisite:** COB113  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB117 INTRODUCTION TO AUDIOVISUAL COMMUNICATION
An introduction to the theory and practice of audiovisual communication. Areas covered include planning: definition of operational objectives, analysis of audience characteristics, development of concept, budget, selection of appropriate mediated form; preparation: scripting and storyboarding; basic production techniques; technology; how still and video pictures are seen; how sound is heard, recorded and replayed; how vision is recorded and played back; selection and operation of appropriate equipment; production of a significant slide-tape presentation.

**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB118 FUNDAMENTALS OF PHOTOGRAPHY
Historical development of the photographic arts, role of the photographer in society, the principle of visual perception and design, photography as both art and craft; display photography, news photography, photo layout and design; the still camera, developing, printing and enlarging; creative use of camera and darkroom. Fortnightly photographic assignments. Portfolio.

**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB120 NEWSWRITING
Students learn to think like journalists, to evaluate events for their potential news value, to interview and perform other reporting tasks and to write news stories. The course covers the evolution and theoretical background to reporting techniques in the areas of courts, politics, industrial relations, crime and finance.

**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB121 REPORTING PRINCIPLES
The philosophical rationale behind the free flow of information and its use studied from practical and theoretical perspectives. The journalist's role in society defined and explored through the use of advanced research techniques involving Freedom of Information, property and company searches and the use of newspaper databases.

**Prerequisite:** MJB120  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB122 SUB-EDITING & LAYOUT
Introduction to the basic copy editing and design principles for newspapers. These skills are incorporated with the latest desktop publishing technology with specific reference to newspapers. Students use wire stories from Australian Associated Press, Reuters, Associated Press and Agence France Presse in news and feature page design exercises.

**Prerequisite:** MJB120 or MP1100  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB124 FEATURE WRITING
Students use the principles of reporting to produce newspaper and magazine articles that profile personalities, or that treat things, processes, events and places to exploit their human-interest news value.

**Prerequisite:** MJB120 or MP1100  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB125 MODERN LITERATURE & FILM IN SOCIETY
An integrated study of contemporary literature and film and how both media provide an insight into topical issues of the day. Various critical approaches to literary and film texts and the concepts of genre, authorship and structure.

**Prerequisite:** COB144  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB126 VIDEO PRODUCTION
Intensive introduction to the theory and practise of communication through video; criteria used in selection of the appropriate mediated form; principles of production; realising the intention of program; conversion of script to mediated form, roles and responsibilities, budgeting and production management; future directions in video; principles and practice of editing; pictorial composition, lighting, use of colour, camera control; sound and sound recording; use of special effects.

**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB127 NARRATIVE CONCEPTS
The inter-relationship between improved means: lenses, editing techniques, cameras and sound and how they increase the scope of film makers. Elements of the graphic arts, the novel, dramatic forms and social phenomena in the various national groupings. The subject is designed to assist students in choosing effective narrative styles for short films and especially dramas and dramatised documentaries by providing historical analysis of stylistic and technical developments of narrative film making.

**Prerequisite:** MJB108 or 8 subjects in a degree program.  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB129 FILM & TELEVISION SCRIPTWRITING
Writing through analysis of such forms as features, documentaries and dramas; in-depth approach to writing through analysis of audiences and the industry; the writer's commitment to social responsibility; use of film in television and public relations; analysis of scripts and script requirements in contemporary markets.

**Prerequisite:** MJB127  
**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB130 MEDIA TEXT ANALYSIS
The strategies applied in the analysis of texts are drawn from the following areas: new criticism and the traditional legacy; semiotics and structuralism/post-structuralism; Marxism and contextual/historical approaches; feminism; psychoanalysis; reader-response approaches. The media texts chosen include films, television programs, newspaper articles and cartoons, photographs and advertisements. Some examples are also drawn from literature.

**Credit Points:** 12  
**Contact Hours:** 3 per week

### MJB131 TELEVISION STUDIO/POST PRODUCTION
Television studio production and post production of news/current affairs, corporate, documentary and drama; the roles of producer, director, art director, camera and audio operator, vision mixer, floor manager, technical director, production assistant and offline editor.

**Prerequisite:** MJB134 or MJB113  
**Credit Points:** 12  
**Contact Hours:** 3 per week
MJB132 RADIO/TELEVISION JOURNALISM 1

The practical and theoretical aspects of radio and television media are studied through the examination of interviewing techniques. Students learn radio style and usage and the evaluation of television news bulletins through seminar workshops. Strong emphasis is placed on current affairs knowledge.

Prerequisite: MJB126, MJB121

Credit Points: 12  Contact Hours: 3 per week

MJB134 VIDEO DOCUMENTARY PRODUCTION

Orientation to the history and development of documentary film and video and of the role of editing in the production; affective elements, the scope and limitations of creative editing, evolution of an editing plan, correlation of image, sound, music, pace, and tone in the total design; editing practice in workshops throughout the semester using materials provided on tape; production of a documentary or corporate video.

Prerequisites: MJB129, MJB126

Credit Points: 12  Contact Hours: 3 per week

MJB135 PROFESSIONAL MEDIA PRACTICE

The aim of this elective subject is to provide the student with an opportunity to observe and gain insight into the application of theory to practice. The student is placed with an approved employer. The lecturer in charge of the subject obtains reports from the student at regular intervals. The student is required to complete a progressive assessment program. The student's result is determined on the basis of reports, continuous assessment and the employer's report.

Prerequisite: MJB122 or MJB138

Credit Points: 12  Contact Hours: 3 per week

MJB137 PUBLIC AFFAIRS REPORTING

The role of the reporter in covering national and international politics, and major political issues is examined in depth. The range of topics covered include: the public's right to know, defamation restrictions, the constitution, federalism, defence, immigration and multiculturalism, health, welfare and education, the environment, science and industrial issues, economics and finance reporting.

Prerequisite: MJB124

Credit Points: 12  Contact Hours: 3 per week

MJB138 RADIO/TELEVISION JOURNALISM 2

Philosophy and formulation of radio and television current affairs, anchor techniques, radio and television news production using computers.

Prerequisite: MJB132

Credit Points: 12  Contact Hours: 3 per week

MJB139 JOURNALISTIC ETHICS & ISSUES

Students are challenged on journalistic practices and debate options and choices. The Australian Journalist's Association code of ethics is studied in the context of ethical systems and journalistic practice.

Credit Points: 12  Contact Hours: 3 per week

MJB140 THE MEDIA & SOCIETY

A range of theoretical positions on mass media study; the political economy of the media; the role and meaning of advertising; the function of news; audience theory; media representation of different societal groups: gender, race, ethnicity, class, age; public access media; media ownership and control; the treatment of particular social issues in the media; textual and discourse analysis; popular culture of the media.

Prerequisite: MJB130 (or equivalent)

Credit Points: 12  Contact Hours: 3 per week

MJB141 FILM LANGUAGE

The processes by which meaning is constructed in film. This is first studied in relation to the question of form in film; and attention is given to how films, both narrative and non-narrative, may be structured. Then, the production of meaning is explored through a detailed examination of mise-en-scene, movement and placement of actors, setting, lighting, and costume, cinematography: including camera-angle, distance, movement, animation, and special effects, editing, and sound.

Prerequisite: MJB130

Credit Points: 12  Contact Hours: 3 per week

MJB142 FILM & SOCIETY

The Great Depression era, Roosevelt's new deal, and the ways in which 1930s genre films refractions these problems; post-war reconstruction and the reaffirmation of the family unit in 1940s films; the period of the House Committee on un-American activities and associated films; the films of the 1960s and their relation to various radical movements; the treatment of a range of social issues in American films of the 1970s and 1980s.

Prerequisite: MJB130

Credit Points: 12  Contact Hours: 3 per week

MJB143 AUSTRALIAN FILM

The trend towards period films and the construction of a national identity in the 1970s compared with earlier periods; the representation of women and its relationship with the growth of the women's movement; the deploitation of Aborigines in recent films compared with earlier portrayals; images of masculinity; low budget features and independent film makers; images of adolescence in recent films.

Prerequisite: MJB130

Credit Points: 12  Contact Hours: 3 per week

MJB144 EUROPEAN CINEMA

The cinema of two of the following countries: Italy, Germany, France, Italy; the epic films of the silent period, Fascist films, neo-realist, and the work of Antonioni, Visconti, Rossellini, De Sica, Fellini, Olmi and Bertolucci, Germany; expressionism, Nazi cinema, the influence of the war on film content and production, and the New German cinema, including the work of Herzog, Fassbinder, Wenders, Schorlendorff and Kluge. France: film impressionism and the avant-garde movements of the 1920s, poetic realism, the New Wave, and post 1968 cinema.

Credit Points: 12  Contact Hours: 3 per week

MJB146 AUSTRALIAN DOCUMENTARY FILM

The newsreel in Australia: Fox Movietone News and Cinesound Review; the role of Film Australia, alternative documentary in the work of the Waterside Workers Film Unit; the impact of television on documentary film making; the Sydney Women's Film Group; radical film makers, Bradbury, Zubrycki and Pilger.

Credit Points: 12  Contact Hours: 3 per week

MJB147 FILM GENRES

Genre conventions: the narrative patterns, styles, and iconographic which govern the production and reading of genre films; the evolution of genres in relation
to social change; the relationship with the Hollywood studio system, including economic and ideological constraints; the conventions of specific genres such as the western, the musical, horror and science fiction films, film noir, and the family melodrama. Three genres are selected for special study.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJB149 FILM HISTORY**
The development of the Hollywood classical continuity style; notions of realism and their relation to French poetic realism of the 1930s, neo-realism in post war Italy, and the kitchen-sink films of Britain in the 1960s: modernism; expressionism and film noir; the impact of wide-screen formats; the various ‘new waves’ of the 1950s and 1960s; and the impact of new technologies and information systems on film.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJB100 COMMUNICATION & SOCIETY**
Contemporary communication and media theory, developing the theoretical introduction offered in MJP101. Subject content proceeds in a detailed survey mode, and includes contemporary political economy of the media, feminist cultural theory, textual and audience studies, media and cultural studies, post-modernism and cross-cultural communication. These studies of contemporary theory find preliminary application in some relevant research areas in the mass media, popular culture and the new media.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJB101 COMMUNICATION & CULTURE**
The applications of critical communication and media theory to a range of research topic areas: the growth of written mass culture/popular literature; the relationship between language and reality formed by language; rather than vice versa; the modern debate about mass culture versus high culture; literary journalism; film, television, and the other mass media. Students are expected to demonstrate advanced competence in the application of media and critical theory to topic areas.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJB103 AUSTRALIAN COMMUNICATION CONTEXTS**
Analysis of specific aspects of the interaction between mass media, its institutions and history, at an advanced level, the histories and contemporary configurations of Australian media industries: telecommunications, television, film, radio, advertising, print. The subject is designed to complement MJB101, with its emphasis on the analysis of media context.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJP100 JOURNALISTIC WRITING**
Learning to think like journalists; to evaluate events for their potential news value; to interview and perform other reporting tasks and to write news stories. News values; reporting techniques; and journalistic writing style and convention.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJP101 COMMUNICATION THEORY 2**
Builds on media studies theory that students have learned in three subjects with media studies components in the undergraduate degree by teaching an advanced introduction to critical media theory (7 weeks). This also leads into the media studies strand of the masters degree. Applications to film, television, print, radio, and advertising. The second segment of the subject (7 weeks) focuses on behavioural or process theory. Topics include: the process and effects of mass communication; systems thinking; role of the media in society.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MJP102 COMMUNICATION POLICY ENVIRONMENT**
The public policy environment associated with communication practice and processes; current issues; the participating and critical views. A study of the public policy process in selected countries with special emphasis on Australian communication policy. Social, legal, political and technical environments; current and major issues, and the differing approaches to communication policy.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MKB102 ADVANCED MARKETING LOGISTICS**
The application of computer based models to distribution systems. Case studies of commodity markets in Australia. Advanced transportation modelling.

**Prerequisite:** MKB108  **Co-requirement:** MKB136

**Credit Points:** 12  **Contact Hours:** 3 per week

**MKB108 MARKET PRACTICES**
Quantitative marketing practices in the areas of: inventory control; queuing; LP programming; market simulation; causal regression analysis; market applications.

**Prerequisites:** MKB140, EPB109

**Credit Points:** 12  **Contact Hours:** 3 per week

**MKB112 RESEARCH METHODS**
The main traditions and methods in research, including primary and secondary, qualitative and quantitative research.

**Credit Points:** 12  **Contact Hours:** 3 per week

**MKB116 PRINCIPLES OF ADVERTISING**
A brief history of advertising; structure of the industry; functions and objectives; campaign planning; budgeting; elementary media planning; creative functions; elementary copywriting; principles of advertising.

**Prerequisite:** MKB140 and Research Methods

**Credit Points:** 12  **Contact Hours:** 3 per week

**MKB117 PR CAMPAIGNS**
This is a specialist public relations subject examining strategies to relate an institution or individual to the community through comprehensive public relations programs. These may include fundraising, special events, and corporate sponsorships. The subject is designed to increase intellectual depth of understanding and give students practical experience in problem solving and the implementation of actual community relations programs for various organisations.

**Prerequisites:** MKB120 and MKB133

**Credit Points:** 12  **Contact Hours:** 3 per week

**MKB118 ADVERTISING COPYWRITING**
Target audience definition; copywriters and their functions, copy platforms; copy rationales; positioning; creative thought processes; advertising writing theories and styles; layout principles; newspaper copywriting; magazine copywriting; direct mail copywriting; outdoor copywriting; basic print production.

**Prerequisite:** MKB116

**Credit Points:** 12  **Contact Hours:** 3 per week
MKB120 PR WRITING & EDITING
The function of media other than mass media. Public relations practitioners work in government, institutional and corporate environments which deal with internal and external audiences through a wide range of written materials as well as speechmaking. Writing and editing newsletters are covered through workshops. The role of the editor is emphasised to give an understanding of the importance of communication to achieve corporate objectives. Of equal importance is an understanding of techniques to write, edit and present speeches effectively.
Prerequisite: MKB129
Credit Points: 12 Contact Hours: 3 per week

MKB122 ADVERTISING REGULATION & ETHICS
The various laws, codes and regulations which apply to advertising in Australia; the codes of ethics of the different institutions of advertising; recent and current examples of contentious advertisements; application of the principles and ethical standards covered.
Prerequisite: MKB116
Credit Points: 12 Contact Hours: 3 per week

MKB123 PUBLICATION MANAGEMENT
Examination of the requirements for communicating in print and managing this process. It analyses the steps involved in design and production, focusing on management and liaison skills. The subject offers students desktop publishing skills which are required for assignments, and the scope to produce a real life brochure for a client.
Prerequisite: MKB129
Credit Points: 12 Contact Hours: 3 per week

MKB124 PUBLIC RELATIONS PRINCIPLES
An introduction to the concepts and practice of public relations; the role and functions of public relations, its history, career paths, professional/ethical responsibilities, corporate public relations, public relations consultancies, the process of public relations, concepts of public opinion, persuasion and communication strategies. This subject offers a theoretical foundation for students to equip them to better understand and practice the public relations skills emphasised in later subjects.
Credit Points: 12 Contact Hours: 3 per week

MKB125 MEDIA PLANNING
Costing and scheduling media, qualitative and quantitative factors affecting media selection and use, market targeting, researching the media plan, planning media strategy, coordinating media, media options, concepts of media decision making, media exposure, media comparisons, media trends, media and the computer.
Prerequisite: MKB116
Credit Points: 12 Contact Hours: 3 per week

MKB126 ADVERTISING MANAGEMENT
Theories of mass communication, psychology, empirical research and market planning in the context of the strategic management function.
Prerequisite: MKB118, MKB122 and MKB125 or MKB116 and 4 Marketing Subjects.
Credit Points: 12 Contact Hours: 3 per week

MKB127 ADVANCED ADVERTISING
Expansion and addition of theoretical perspectives and skills gained in the prerequisite. There is heavy emphasis on application of these perspectives to solving advanced advertising problems and the use of both basic and advanced skills in these solutions.
Prerequisite: MKB118 or Media Strategy
Credit Points: 12 Contact Hours: 3 per week

MKB128 DIRECT RESPONSE ADVERTISING
Principles and practice of direct response advertising in its various forms; ethical considerations against a background of Australian societal norms.
Prerequisite: MKB126 or MKB157
Credit Points: 12 Contact Hours: 3 per week

MKB129 PUBLICITY & PROMOTION - PRINT
This subject focuses on communication with the print media. Students are given the background, techniques and skills needed to work with newspapers, magazines and the trade press. Producing and evaluating communication materials such as news releases, features, and media kits form the core of the subject.
Guest lecturers join the class to discuss aspects of media relations, writing style and publicity planning.
Prerequisites: MKB120, MKB124
Credit Points: 12 Contact Hours: 3 per week

MKB130 PUBLICITY & PROMOTION - ELECTRONIC
The development of production skills in video as they apply to public relations in organisations. Students produce a complex video news magazine for a client organisation. This includes scripting, presenting, studio management, special effects, graphics, field operation of video equipment and video editing, techniques for producing community service announcements.
Prerequisites: MKB126, MKB129
Credit Points: 12 Contact Hours: 3 per week

MKB131 ADVERTISING CAMPAIGNS
Students draw together and apply all of the professional knowledge and skills gained throughout their degree studies. Application of this to problems or cases set by lecturers and practitioners. The accent is on development and application.
Prerequisite: MKB126
Credit Points: 12 Contact Hours: 3 per week

MKB132 GOVERNMENT & FINANCIAL RELATIONS
Current standards of social responsibility and public accountability in organisations and society. Through the presentation of case studies in financial and government relations, students develop an understanding of problem definition, the planning and implementing of public relations programs, and the creation of communication strategies designed to solve specific problems.
Prerequisites: MKB133, EPB124
Credit Points: 12 Contact Hours: 3 per week

MKB133 PR CONSULTING & MANAGEMENT
The management of public relations practice including research, budgets, consultancies and people. It is tailored for students who have completed most of the public relations strand and is designed as advanced level preparation for employment in the field. The subject offers input from specialist guest lecturers, who are either experienced practitioners or specialists in a particular area. Students prepare and present a group submission as part of the subject.
Prerequisites: MKB123, MKB123
Credit Points: 12 Contact Hours: 3 per week
MKBI36 MARKETING LOGISTICS
Distribution strategies and techniques and the activities that facilitate product flow; distribution and level strategies; inventory costs and control; efficient raw product mix and the application of linear programming; transshipment models; allocation efficiency; customer queuing.
Prerequisites: MKB140, EPB109
Credit Points: 12 Contact Hours: 3 per week

MKBI37 COMPUTER APPLICATIONS IN MARKETING
Techniques in market research; univariate and bivariate analysis; nonparametric statistics; ANOVA; the multivariate techniques common to marketing research; dependency methods such as multiple regression, MANOVA, multiple discriminant analysis and conjoint measurement; interdependence methods including factor analysis, cluster analysis and multidimensional scaling.
Prerequisite: Business Methodology
Co-requisite: MKB151
Credit Points: 12 Contact Hours: 3 per week

MKBI39 MARKETING
Marketing: the definition of marketing including its fit into the strategic plans of a firm or institution, either profit or non-profit; full explanation of the components of the marketing mix with emphasis on a systems approach. The components of the marketing mix defined as price, promotion, product and distribution; the integration of the above elements with branding, packaging sales and sales promotion to create the marketing plan.
Credit Points: 12 Contact Hours: 3 per week

MKBI40 PRINCIPLES OF MARKETING
The role of marketing and its importance in contemporary organisations. Introduction to marketing decision areas: the marketing concept; understanding consumer behaviour and preferences, marketing research and marketing information systems; market segmentation and planning, strategy and control; the components of the marketing mix, viz. product planning, management and development; pricing methods and strategies; the elements of promotion, including personal selling, advertising, publicity and sales promotion, and distribution.
Credit Points: 12 Contact Hours: 3 per week

MKBI41 MARKETING MANAGEMENT
Contemporary marketing concepts linked to strategic applications; market segmentation, product positioning, portfolio analysis, marketing strategies in key areas such as product development, promotion, distribution and pricing.
Prerequisite: MKB140 or MKN106
Credit Points: 12 Contact Hours: 3 per week

MKBI42 CONSUMER BEHAVIOUR
Internal and external influences on the individual consumer including motivation, perception, learning, attitudes and social class, culture, reference groups, communicating and market segmentation, and the consumer decision process.
Prerequisite: MKB140 or MKN106
Credit Points: 12 Contact Hours: 3 per week

MKBI43 EXPORT MANAGEMENT
The role of government including need to export; export incentives; methods of exporting, including agents and merchants, consultants and overseas organisations; bases for export sales, including terminology and exporter's responsibilities; export documentation; finance of export trade, including methods of payment, finance for export transactions and foreign exchange transactions; export finance insurance corporation; modes of international transport; marine insurance; quoting for export, including pricing policies, export costs, marketing and packaging and quotations. A major case study is included as part of the study program.
Credit Points: 12 Contact Hours: 3 per week

MKBI44 SALES MANAGEMENT
The range of analytical activities performed in the design and management of the selling function of the organisation. These activities include sales forecasting, sales force size, territory management, selling logistics, sales force motivation, sales negotiation. The subject combines theory and practice and uses a case study approach to consolidate the learning process.
Prerequisite: MKB140 or Marketing Methods and Practice
Credit Points: 12 Contact Hours: 3 per week

MKBI45 RETAILING MANAGEMENT 1
Introduction to the techniques, concepts and analytical issues that are involved in retailing management. The dynamics of the retail system are examined from a strategic marketing viewpoint and include a basic appreciation of retail customer behaviour and retail information needs. The analysis of store location and the evaluation of retail trade areas and stores siting determinants are given detailed attention along with store layout and design. Elements of merchandising, franchising and promotion are also examined.
Prerequisites: MKB140, MKN106
Credit Points: 12 Contact Hours: 3 per week

MKBI46 SERVICES MARKETING
The special characteristics of services and possible strategies to deal with those characteristics; the nature and classification of services; the differences between services and products and their implications for the marketing/customer mix and for marketing strategy; the relationship of the service organisation with its customers; the management of product support services; the concept of productivity for services, including the management of demand and supply; the search for service quality and consistency, including the issue of standardisation versus customisation.
Prerequisite: MKB140 or MKN106
Credit Points: 12 Contact Hours: 3 per week

MKBI47 RETAILING MANAGEMENT 2
Development of a strong grounding in those retailing activities that comprise the merchandising function of the different types of retail stores including the distributors of durable consumer goods from the large supermarket or department store to the smallest corner store. Covers those topics associated with the merchandising of retail products: forecasting customer demand, planning, promotions, as well as the managerial control of buying and stocking merchandise.
Prerequisite: MKB145
Credit Points: 12 Contact Hours: 3 per week

MKBI48 MARKETING DECISION MAKING
The evaluation of marketing policy and strategy, consumer and organisational buying behaviour, market segmentation and demand assessment, product, price, promotion, distribution and selling decisions. These models lead to the study of an integrated decision
support system for marketing management. Application to real-life examples is stressed throughout, with case studies and experiential exercises providing the learning framework.

Prerequisite: MKB140 or MKN106
Credit Points: 12 Contact Hours: 3 per week

MKB149 INTERNATIONAL MARKETING
The nature and practice of international marketing. It assumes a familiarity with general marketing management and builds on this knowledge to develop insight into and understanding of the peculiar nature of international marketing management and the problems of marketing within a number of different national markets. The course is managerial in the sense that it focuses on the problems and decisions facing managers of international marketing in business enterprises.

Prerequisite: MKB140 or MKN106
Credit Points: 12 Contact Hours: 3 per week

MKB151 MARKETING RESEARCH
This subject has three main purposes: to emphasise the processes most suitable to marketing research, both qualitative and quantitative; to undertake a marketing research project whereby students determine the most suitable way of gathering information, undertake the research, and finally, present the results; to develop the ability, as marketing managers, to choose, use, and manage market research wisely, whether dealing with a consultancy firm or an internal marketing research department. Areas to be covered in both the theoretical and practical aspects of the subject include: problem formulation; research design and sources of information; design and forms of data collection; analysis and interpretation of data; the marketing research report and presentation.

Prerequisite: MKB141
Credit Points: 12 Contact Hours: 3 per week

MKB152 PROMOTIONAL STRATEGY
The marketing promotional mix and its relationship with the marketing mix, the structure of marketing communications; the environmental framework of promotion practice; the media of marketing communications; the planning and control of marketing communications.

Prerequisite: MKB140 or MKN106
Credit Points: 12 Contact Hours: 3 per week

MKB153 PROFESSIONAL MARKETING PRACTICE
With the approval of the lecturer involved, the students undertake a preferred study program within the marketing framework, eg, some particular area of the marketing mix. This study program requires students to undertake a project or internship with a suitable company, where they actively work on a part-time basis. The program is aligned as closely as possible to the preferred area of study. Students are required to submit a number of reports reflecting the theoretical concepts learned and the application to their job experience.

Prerequisite: MKB141
Credit Points: 12 Contact Hours: 3 per week

MKB154 DISTRIBUTION MANAGEMENT
Physical distribution, warehouse location and management, choice of transportation modes.

Prerequisite: EPB109 or Business Statistics
Credit Points: 12 Contact Hours: 3 per week

MKB155 STRATEGIC MARKETING
The capstone of the marketing course; it reviews the state of the art in marketing strategy and current thoughts and concepts in marketing strategy formulation and focuses on the formulation of marketing strategy, a task undertaken in most companies at the strategic business unit level.

Prerequisite: MKB141
Credit Points: 12 Contact Hours: 3 per week

MKB158 TELEMARKETING
As direct marketing is a growth area it is essential that students understand the fundamentals of effective telemarketing. There is heavy emphasis on practical work in this subject. Students are taught practical skills in how to set up a telemarketing centre and how to conduct a structured telemarketing campaign. Practitioners and field visits provide students with the necessary real world experience.

Prerequisite: MKB128
Credit Points: 12 Contact Hours: 3 per week

MKB159 DIRECT MARKETING CAMPAIGNS
Students examine and analyse contemporary direct marketing and integrated marketing practice and present their findings in seminars. They plan and execute direct marketing campaigns as briefed by practitioners. Recommendations are presented to those practitioners for comment. Skills in appropriate areas are advanced to fully operable level.

Prerequisite: MKB128 and MKB158
Credit Points: 12 Contact Hours: 3 per week

MKB160 MARKETING
The role of marketing and the importance for the industrial design profession; the marketing mix of product, price, promotion and distribution, and marketing strategies for success.

Credit Points: 4 Contact Hours: 2 per week

MKB161 PROPERTY MARKETING
Characteristics of the Australian property market, the nature of marketing problems. The marketing plan: the mix, implementation of plan and sales forecast; pricing decisions, approaches to selling; consideration of sales particulars and auction catalogues. Promotional decisions: determination of budget size; media decision and sales promotion; technological advances and market changes. Real estate brokerage and the application of marketing principles to residential, commercial, industrial, special and overseas properties. Negotiation skills development.

Credit Points: 7 Contact Hours: 3 per week

MKB100 ADVANCED QUANTITATIVE RESEARCH METHODS
Conceptual foundations of research design; research methodologies; data sources; methods of observation and data collection; data analysis; evaluation.

Prerequisite: MKB108. A high level of performance in subjects in statistics and applied statistics at undergraduate level is assumed. Knowledge of computing and use of computer packages is highly desirable.

Credit Points: 12 Contact Hours: 3 per week

MKB101 BUSINESS FORECASTING TECHNIQUES
Exponential and moving average techniques; decomposition models; seasonal regression models; stochastic models; stationary and non-stationary
models; model identification and estimation; diagnostic checking; transfer functions.
Prerequisite: MKN101
Credit Points: 12  Contact Hours: 3 per week

MKN102 BUSINESS LOGISTICS
The integrated physical distribution management concept; customer service; inventory policy, analysis and decision making; selection of distribution channels, channel design and strategy; transport systems and model choice; modelling the facility location, optimising size, siting and network; logistics and pricing; organisational implementation of marketing logistics concepts.
Prerequisite: MKN101
Credit Points: 12  Contact Hours: 3 per week

MKN103 ADVANCED MARKET SIMULATION
The economics of risk and uncertainty; quantitative estimation of demand and costs; market structures and pricing practices; multi-product pricing; transfer pricing; capital budgeting.
Credit Points: 12  Contact Hours: 3 per week

MKN104 THESIS
Synthesis and application of studies undertaken in the course. Topic may be taken from any aspect of marketing science. Formulation of thesis undertaken in conjunction with supervisor and other academic staff.
Credit Points: 144

MKN105 DECISION SUPPORT SYSTEMS
Timely and accurate information is a management resource, and computers can process much of this information to augment and extend a manager's capacity. This subject provides an understanding of the importance, variety and value of both quantitative and qualitative decision support systems, including a significant emphasis on computer-based information systems such as data bases and expert systems from the point of view of systems users rather than of specialist system analysis.
Credit Points: 12  Contact Hours: 3 per week

MKN106 MARKETING METHODS & PRACTICES
The role of marketing and how marketing fits into the strategic processes of firms and institutions; key marketing decision areas including the marketing concept, marketing research, consumer behaviour, marketing segmentation and positioning, product policy, pricing, promotion and distribution.
Credit Points: 12  Contact Hours: 3 per week

MKN107 ADVANCED MARKETING MANAGEMENT
An advanced study of marketing, marketing systems and market management decision processes within the contemporary structure of social cultural, political, economic, business and organisational environments. Advanced marketing theory from both strategic and tactical perspectives with emphasis on the relationship between marketing and corporate policy as well as both the internal and external social and behaviourial and motivational factors that facilitate marketing exchange opportunities. Marketing issues associated with both profit and non-profit organisations and the relevance of marketing theory to these institutions, including the developing area of international marketing.
Credit Points: 12  Contact Hours: 3 per week

MKP100 FUNDRAISING PRINCIPLES
The fundamentals of fundraising; the preparation of the case statement; planning methods; the various techniques of fundraising. Introductory segments on public relations, advertising, marketing and management. Major topics include: philosophy of fundraising, its role in society, budget, fundraising, major gift and capital campaigns, planned giving, researching and establishing prospect bases, procedures of solicitation, team building of boards and volunteers, role of foundations.
Credit Points: 12  Contact Hours: 3 per week

MKP101 FUNDRAISING CAMPAIGNS
Practical experience in planning and implementing a fundraising campaign: planning a complete fundraising program; defining relevant constituencies and pinpointing appropriate vehicles for linking to these target markets: budgeting and managing campaign elements: working successfully with boards and volunteers where appropriate; evaluating fundraising efforts. Students undertake a group project in the form of the analysis of a fundraising program. Topics include: strategic planning, management, financial issues, ethics and evaluation techniques.
Credit Points: 12  Contact Hours: 3 per week

NSB114 CLINICAL PRACTICE 1A
This subject focuses on the acquisition of skills which are fundamental to nursing practice. Students practise communication skills, health assessment skills, selected technical skills in both University (on-campus) and clinical (off-campus) laboratories. The clinical laboratory experiences in this subject take place in a variety of settings which include various types of health care facilities, community facilities, domiciliary nursing services, occupational health services, disability services and outpatients clinics.
Co-requisite: NSB114
Credit Points: 8  Contact Hours: 6 per 2 week block following semester

NSB115 CLINICAL PRACTICE 1B
This subject provides students with the opportunity to consolidate the skills which they have acquired during the preceding clinical subject, and aims at the achievement of a specific level of clinical competence. The learning experiences are conducted in the clinical (off-campus) laboratory, and the settings are as previously described.
Co-requisite: NSB114
Credit Points: 8  Contact Hours: 60 per 2 week block following semester

NSB151 FOUNDATIONS OF NURSING PRACTICE 1
An introduction to the major concepts which are fundamental to nursing practice. Topics include: the nature of individuals, families and communities, the impact of the environment on health, the concept of health, and the relationship between nursing and health care. The significance of a conceptual approach to nursing practice is explored.
Credit Points: 8  Contact Hours: 3 per week

NSB152 FOUNDATIONS OF NURSING PRACTICE 2
Further development of the concepts of people, environment, health and nursing in order to facilitate an understanding of the theoretical basis of nursing practice. Topics include: human needs from a holistic perspective, human resources which can be utilised in the attainment of health, the roles of the nurse as a...
This introductory subject emphasises the ethical, legal and clinical accountability of the radiographer for safe patient care. The subject aims to develop in radiography students an awareness of their responsibilities in protecting patients and promoting their well-being.

**Credit Points:** 8  **Contact Hours:** 2 per week

**Prerequisites:** NSB151

**NSB201 PRINCIPLES OF PATIENT CARE**

This subject is designed to deepen and broaden the clinical decision making skill base of students who already have a foundation in nursing and related sciences from previous studies. It explores the significance of conceptual models for clinical decision making, provides physical and psychosocial assessment skill practice, explores the concept of nursing diagnosis and associated core planning, and highlights the use of research in support of clinical decisions.

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB207 NURSING & THE INDIVIDUAL**

The subject is designed to deepen and broaden the clinical decision making skill base of students who already have a foundation in nursing and related sciences from previous studies. It explores the significance of conceptual models for clinical decision making, provides physical and psychosocial assessment skill practice, explores the concept of nursing diagnosis and associated core planning, and highlights the use of research in support of clinical decisions.

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB214 CLINICAL PRACTICE 2A**

This subject provides students with the opportunity to consolidate the development of skills which are fundamental to nursing practice. Students practise applied communication skills, nursing diagnosis and care planning skills, and further selected technical skills in both University (on-campus) and clinical (off-campus) laboratories. The clinical laboratory experiences in this subject take place in a variety of settings which include hospitals, nursing homes and palliative care facilities.

**Co-requisites:** NSB114, NSB115, NSB151, NSB152

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB215 CLINICAL PRACTICE 2B**

This subject provides students with the opportunity to consolidate the skills which they have acquired during the preceding subjects, particularly NSB214. It aims at the achievement of an increasing level of competence in clinical situations. The learning experiences are conducted in the clinical (off-campus) laboratory and the settings are as described for the preceding clinical practice subject.

**Co-requisites:** NSB114, NSB115, NSB214

**Credit Points:** 8  **Contact Hours:** 6 per 2 week block following semester

**NSB301 NURSING & BIOPHYSICAL HEALTH I**

The effects of selected pathophysiologic processes on the meeting of human needs; topics include: the assessment and nursing diagnosis of gas exchange, circulation, hydration, physical comfort and safety problems along with independent and collaborative strategies designed to promote, maintain and/or restore health.

**Prerequisites:** NSB151, NSB152

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB302 NURSING & MENTAL HEALTH I**

Theories, concepts and models which provide the basis for understanding the individual and their mental health needs, and aims to provide a framework for nursing care which acknowledges the importance of promoting, maintaining and restoring mental health. It addresses contemporary concepts of mental health and mental illness; biological and sociocultural factors which can influence mental health and mental health problems; mental health assessment; and strategies for mental health promotion.

**Prerequisites:** NSB151, NSB152

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB304 NURSING & CULTURE**

Socio-structural, behavioural, lifestyle and genetic factors play a large part in the determination of health status in contemporary Australia. This subject aims to develop an understanding, acceptance and appreciation of culture such that students are better able to provide people-centred care within a multicultural health care context. Topics include: the nature of culture and behavioural practices of societies, fundamental aspects of socio-anthropological and epidemiological methodology, the cultural nature of contemporary Australian society, health policy and ethnic sub-cultural diversity, and cultural beliefs, activities, values and behaviour regarding selected health-related practices.

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB314 CLINICAL PRACTICE 3A**

This subject provides the opportunity for students to develop a range of skills which are associated with the nursing care of people experiencing biophysical or mental health dysfunction. Students practise the application of problem solving skills, selected technical and process skills and organising skills in both University (on-campus) and clinical (off-campus) laboratories. The clinical laboratory experiences in this subject are undertaken in settings which include hospitals and palliative care facilities or psychiatric mental health facilities.

**Co-requisites:** NSB214, NSB301, NSB215, or NSB302

**Credit Points:** 8  **Contact Hours:** 6 per 2 week block following semester

**NSB315 CLINICAL PRACTICE 3B**

This subject provides students with the opportunity to consolidate skills which they have acquired in previous subjects, particularly NSB314. It aims at the achievement of an increasing level of competence in clinical situations. The learning experiences are conducted in the clinical (off-campus) laboratory, and the settings are as described for the preceding Clinical Practice subject.

**Co-requisites:** NSB314

**Credit Points:** 8  **Contact Hours:** 6 per 2 week block following semester

**NSB401 NURSING & BIOPHYSICAL HEALTH 2**

This subject further develops an appreciation of the effects of selected pathophysiologic processes on the meeting of human needs. Topics addressed include the assessment and nursing diagnosis of elimination, mobility, nutrition, skin integrity and sleep/rest problems along with independent and collaborative strategies designed to promote, maintain and/or restore health.

**Credit Points:** 8  **Contact Hours:** 3 per week

**NSB402 NURSING & MENTAL HEALTH 2**

Expansion of the application of nursing knowledge and research about mental health to the provision of nursing care to clients with mental health problems. It provides, at an advanced level, a theoretical foundation for mental health nursing practice with a focus on diagnostic reasoning and intervention strategies to...
promote mental health and wellbeing. Topics include: theories of stress and adaptation; assessment, diagnosis and intervention in situations of developmental disorder, selected organic and non-organic mental syndromes and crisis intervention.

Prerequisites: NSB151, NSB152
Credit Points: 8 Contact Hours: 3 per week

NSB406 NURSING & THE FAMILY
Family nursing practice recognises the substantial impact that families can have on the health of individuals within the family unit, and upon society as a whole. This subject provides an introduction to the knowledge base which underpins family nursing practice, and facilitates the development of decision-making skills in this area. Topics include: nature of the family unit; family development; models of the family; and families with particular situational or developmental needs.

Credit Points: 8 Contact Hours: 3 per week

NSB407 NURSING & THE COMMUNITY
Community health is an important focus for nursing practice. This subject provides an introduction to the fundamentals of community nursing practice and facilitates the development of decision-making skills in this area. Topics include: models of community; community development; perspectives of community health; the application of epidemiological principles to community health; community groups with particular health needs; strategies for the promotion of community health.

Credit Points: 8 Contact Hours: 3 per week

NSB414 CLINICAL PRACTICE 4A
This subject provides further opportunity for students to develop skills which are associated with the nursing care of people experiencing biophysical or mental health dysfunction. Students practise the application of problem-solving skills, technical skills and health teaching skills in both the University (on-campus) and clinical (off-campus) laboratories. The clinical laboratory experiences places take place in settings which include hospitals, palliative care facilities, and disability services or psychiatric-mental health facilities.

Co-requisites: NSB214, NSB215
Credit Points: 8 Contact Hours: 6 per week

NSB415 CLINICAL PRACTICE 4B
This subject provides students with the opportunity to consolidate skills which they have acquired in previous subjects, particularly NSB414. It aims at the achievement of an increasing level of competence in clinical situations. The learning experiences are conducted in the clinical (off-campus) laboratories, and the settings are as described for the preceding clinical practice subjects.

Co-requisite: NSB414
Credit Points: 8 Contact Hours: 60 per 2 week block following semester.

NSB504 PROFESSIONAL ISSUES IN NURSING 1
Nursing as a profession and the implications for nursing practice. Topics include: the nature of professions; the development of standards; quality assurance strategies; the significance of continuing education; nursing authorities and organisations; influences on the development of nursing as a profession; the future of professional nursing.

Credit Points: 8 Contact Hours: 3 per week

NSB505 PROFESSIONAL ISSUES IN NURSING 2
The contemporary development of nursing as a profession is closely linked with an increasing focus on theory and theory development in nursing. This subject is designed to facilitate an understanding of the role that nursing theory plays within the discipline. Topics include: nature of nursing theory; the development of theory in nursing, and factors which have been influential in this process; and an overview of nursing theories and models including selected applications to practice.

Credit Points: 8 Contact Hours: 3 per week

NSB514 CLINICAL PRACTICE 5A
This subject provides the opportunity for students to develop a range of clinical skills associated with the Health Strand which were not chosen for study during the second year of the program. Students practise the application of problem-solving skills; selected technical skills; organising, health education, client advocacy skills in both the University (on-campus) and clinical (off-campus) laboratories. The clinical laboratory experiences in this subject are undertaken in settings which include hospitals and palliative care facilities or psychiatric-mental health facilities.

Co-requisites: NSB214, NSB215
Credit Points: 8 Contact Hours: 3 per week

NSB515 CLINICAL PRACTICE 5B
This subject provides students with the opportunity to consolidate skills which they have acquired in previous subjects, particularly NSB514. It aims at the achievement of an increasing level of competence in clinical situations. The learning experiences are conducted in clinical (off-campus) laboratories, and the settings are as described for the preceding clinical practice subjects.

Co-requisite: NSB514
Credit Points: 8 Contact Hours: 60 per 2 week block following semester

NSB601 RESEARCH IN NURSING PRACTICE
An understanding of the components of the research process is essential in the development of an informed approach to contemporary nursing practice. This subject addresses topics which include the significance of research in nursing; the process of research; and the appraisal of research reports.

Credit Points: 8 Contact Hours: 3 per week

NSB614 CLINICAL PRACTICE 6A
This subject provides students with the opportunity to develop further clinical skills associated with the Health Strand studied in the third year of the program. Students practise the application of problem-solving skills; selected technical skills; and organising, health education, advocacy and counselling skills in both the University (on-campus) and clinical (off-campus) laboratories. The clinical laboratory experiences in this subject are undertaken in settings which include hospitals, palliative care facilities and/or psychiatric-mental health facilities.

Co-requisites: NSB214, NSB215
Credit Points: 8 Contact Hours: 3 per week
NSB615 CLINICAL PRACTICE 6B
This subject provides students with the opportunity to consolidate skills which they have acquired in previous subjects, especially Clinical Practice. It aims at the achievement of a level of competence which is consonant with the expectations of a beginning practitioner in nursing. The learning experiences are conducted in clinical (off-campus) laboratories, and the settings are as described for the preceding Clinical Practice subject.
Co-requisite: NSB614
Credit Points: 8
Contact Hours: 60 per 2 week block following semester

NSNI02 CONCEPTS FOR ADVANCED CLINICAL NURSING
In recent years there has been significant development in the role of the professional nurse as an advanced-level planner and provider of care. At this level, it is expected that nurses show a high degree of competence with an independent problem-solving approach to client care and are able to interact widely on intra-, inter- and extra-professional levels. Therefore, this subject is designed to enhance knowledge and skills involved in the selection, provision and communication of contemporary nursing care.
Credit Points: 12 Contact Hours: 3 per week

NSNI03 RESEARCH METHODS IN NURSING
This subject provides opportunities for students to develop skills in research design and data collection processes related to clinical phenomena. The data analysis component emphasises statistical techniques applicable to nursing research design.
Credit Points: 12 Contact Hours: 3 per week

NSNI04 PROFESSIONAL ISSUES IN NURSING
This subject is designed to enable students to expand the concept of the social significance of nursing as well as analyse the profession's accountability and responsibility to health care at local, national and international levels. Major topics include: theoretical and ideological perspectives of professional regulation; nursing's approach to professionalisation and the involvement of national and international nursing organisations in health policy formulation. Students are given the opportunity to consider the influence of other disciplines and the historical environment on the development of ideas in nursing theory.
Credit Points: 12 Contact Hours: 3 per week

NSNI05 MEDICAL/SURGICAL NURSING 1
Advanced specialisation in medical-surgical nursing requires the ability to deal critically and effectively with particular clinical phenomena so that the health of the individual, family or community is promoted. This subject, which focuses on the individual as client, provides opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised.
Prerequisites: NSNI01, NSNI02
Credit Points: 12 Contact Hours: 3 per week

NSNI06 MEDICAL/SURGICAL NURSING 2
Advanced specialisation in medical-surgical nursing requires the ability to deal critically and effectively with particular clinical phenomena so that the health of the individual, family or community is promoted. This subject adds a family focus to that of the individual. It provides opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised.
Credit Points: 12 Contact Hours: 3 per week

NSNI07 MEDICAL/SURGICAL NURSING 3
Advanced specialisation in medical-surgical nursing requires the ability to deal critically and effectively with particular clinical phenomena so that the health of the individual, family or community is promoted. This subject adds a community focus to that of the individual and family. It provides opportunities for students to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised.
Credit Points: 12 Contact Hours: 3 per week

NSNI08 PRIMARY HEALTH CARE NURSING 1
Advanced specialisation in primary health care nursing requires the ability to critically analyse issues and trends affecting the health and lifestyle of individuals, families and communities. This subject focuses on the individual as client and provides the foundation for the primary health care nursing stream by exploring a broad range of factors which together define the parameters of primary health care practice.
Credit Points: 12 Contact Hours: 3 per week

NSNI09 PRIMARY HEALTH CARE NURSING 2
Advanced specialisation in primary health care nursing requires the ability to critically analyse issues and trends affecting the health and lifestyle of individuals, families and communities. This subject focuses on the family as client and provides opportunities to enhance previous clinical knowledge and skills through the application and evaluation of appropriate health education strategies.
Credit Points: 12 Contact Hours: 3 per week

NSNI10 PRIMARY HEALTH CARE NURSING 3
Advanced specialisation in primary health care nursing requires the ability to critically analyse issues and trends affecting the health and lifestyle of individuals, families and communities. This subject focuses on the community as client and provides opportunities to enhance previous clinical knowledge and skills through the application and evaluation of appropriate health education strategies.
Credit Points: 12 Contact Hours: 3 per week

NSNI11 PSYCHIATRIC/MENTAL HEALTH NURSING 1
Advanced clinical practice in psychiatric-mental health nursing requires the ability to deal critically and effectively with interpersonal processes and strategic therapeutic use of self to restore, maintain, promote and prevent mental and psychiatric disability. Particular attention is given to interpersonal dynamics and behaviour as basic processes by which nursing assessment and intervention occur. This subject, which focuses on the individual as client, provides opportunities to enhance previous clinical knowledge and skills through the application and testing of interpersonal theory and therapeutic approaches.
Credit Points: 12 Contact Hours: 3 per week

NSNI12 PSYCHIATRIC/MENTAL HEALTH NURSING 2
In this subject particular attention is given to family dynamics and behaviour as basic processes by which nursing assessment and intervention occur. By focusing on the family as client, it provides opportunities...
to enhance previous clinical knowledge and skills through the application and testing of family theory and therapeutics. Credit Points: 12 Contact Hours: 3 per week

- **NSN113 PSYCHIATRIC/MENTAL HEALTH NURSING 3**
  Particular attention is given to current trends and approaches to the organisation and delivery of mental health services within Australia with selected international comparisons. Credit Points: 12 Contact Hours: 3 per week

- **NSN114 MIDWIFERY 1**
  Philosophies of advanced midwifery practice; the role of the midwife; formal and informal structures that influence the practice of midwifery; strategies that facilitate the role of the midwife; family theory and concepts related to the community. Credit Points: 12 Contact Hours: 3 per week

- **NSN115 MIDWIFERY 2**
  The individual and family during child-bearing processes; the human and social sciences that form the basis of normal child-bearing processes; theoretical framework for health promotion and maintenance; the relationship between psycho-physiological phenomena, its effect on individual and family functioning; advanced midwifery practice. Credit Points: 12 Contact Hours: 3 per week

- **NSN116 MIDWIFERY 3**
  The individual and family during child-bearing processes that are affected by health problems; the human and social sciences related to health problems of pregnancy and the neonate. A theoretical framework for restorative and rehabilitative midwifery practice is developed and applied. Credit Points: 12 Contact Hours: 3 per week

- **NSN117 GERONTOLOGICAL NURSING 1**
  The individual and particularly the biological issues of ageing, both normal and abnormal; the clinical component emphasises the delivery of individualised nursing care which maximises the control and independence of the elderly person; genetic and non-genetic biological theories of ageing; epidemiological issues of age; selected acute or chronic health problems common to ageing; nursing assessment, care planning and care delivery with the elderly client and approaches and technologies for maximising the independence of elderly people. Credit Points: 12 Contact Hours: 3 per week

- **NSN118 GERONTOLOGICAL NURSING 2**
  The family and the roles and relationships within families with elderly members; the psychological theories of later life; theories of adjustment to ageing; roles and relationships of families with elderly members; role of carers in families with a highly dependent older member and the assessment and selection of nursing interventions to be used with elderly clients and their families. Credit Points: 12 Contact Hours: 3 per week

- **NSN119 GERONTOLOGICAL NURSING 3**
  Ageing as a community and social issue; an investigation of social and policy responses to ageing in Australian and other societies; the sociology of ageing; principles of epidemiology of ageing and public health; role and status changes of ageing; social attitudes to ageing; historical perspectives; cross-cultural perspectives and the direction and impact of policies in relation to the aged population. Credit Points: 12 Contact Hours: 3 per week

- **NSN120 CHILD & ADOLESCENT NURSING 1**
  The role of the nurse who practises with children, adolescents and child rearing families within various health care systems, the factors that impinge on or facilitate the provision of care. Theoretical frameworks are utilised and a philosophy of advanced nursing practice is formulated. Credit Points: 12 Contact Hours: 3 per week

- **NSN121 CHILD & ADOLESCENT NURSING 2**
  The primary prevention strategies for the health of children, adolescents and the child rearing family; theoretical framework for health promotion and maintenance. Credit Points: 12 Contact Hours: 3 per week

- **NSN122 CHILD & ADOLESCENT NURSING 3**
  The pathophysiological and behavioural problems experienced by the child rearing family, children and adolescents who have special needs; the implications for the role of the nurse working in the area. Students develop competencies in advanced nursing practice to accommodate these special needs. The emphasis is on secondary and tertiary prevention strategies. Credit Points: 12 Contact Hours: 3 per week

- **NSN201 GRIEF & BEREAVEMENT**
  Advanced level clinical practice in any field of nursing requires the ability to deal effectively and sensitively with grieving and bereaved individuals and families. The purpose of such practice is two fold: to enable the dying to experience a dignified and peaceful death; and to assist the families of bereaved individuals with the their adaptation to the loss. This subject provides opportunities for student to enhance previous clinical knowledge and skills so that excellence in nursing care may be realised when caring for grieving and bereaved individuals and families in hospital and community settings. Credit Points: 6 Contact Hours: 1.5 per week

- **NSN202 NURSING & HEALTH EDUCATION PRACTICE**
  This elective subject of study introduces practising nurses to the theoretical perspectives of health education. Particular attention is given to the development, implementation and evaluation of health education programs which focus on specific needs of groups and/or communities. Credit Points: 6 Contact Hours: 1.5 per week

- **NSN203 HUMAN SEXUALITY & HEALTH**
  Human sexuality remains a controversial and highly debated topic in Australian society. Although there is a growing awareness amongst nurses of the significance of human sexuality to patient care, many nurses suffer from the same paucity of information, myths and misconceptions about sexuality that afflict the broader community. Students undertaking this elective have the opportunity to explore a subject of considerable complexity within a nursing context. Credit Points: 6 Contact Hours: 1.5 per week

- **NSN204 PAIN: A NURSING FOCUS**
  Pain is a universal experience which may cause individuals, together with their families, great distress. It is also a subjective, personal experience about which much is still being learnt and understood. This
This subject provides opportunities for students to extend previous clinical knowledge and skills so that a contemporary and comprehensive approach to pain assessment and management may be initiated by the nurses.

Credit Points: 6  Contact Hours: 1.5 per week

- **NSN205 INDEPENDENT STUDY**
  The intention of this subject of study is to increase flexibility and provide the opportunity for indepth study in an approved area of study interest to meet the diverse needs and interests of practising registered nurses.
  
  Credit Points: 6  Contact Hours: 1.5 per week

- **NSN301 ADVANCED NURSING EDUCATION 1**
  This subject is designed to increase students' knowledge of the theoretical bases of teaching and learning in order to promote and facilitate learning. Students from various disciplines on campus can be accommodated within this subject. Students of nursing focus on the professional practice of that discipline.
  
  Credit Points: 12  Contact Hours: 3 per week

- **NSN302 ADVANCED NURSING EDUCATION 2**
  This subject provides opportunities for students to view measurement and evaluation as essential components of sound educational decision making. Students from various disciplines on campus are able to be accommodated within this subject. Students of nursing focus on the professional practice of that discipline.
  
  Prerequisite: NSN301
  Credit Points: 12  Contact Hours: 3 per week

- **NSN303 ADVANCED NURSING EDUCATION 3**
  This subject enables students to explore aspects of curriculum development which are relevant to their specific areas of interest. Students from various disciplines on campus are able to be accommodated within this subject. Students of nursing focus on the professional practice of that discipline. Content focuses on perspectives, principal issues and theoretical approaches to curriculum assessment, planning implementation, evaluation and innovation.
  
  Prerequisite: NSN301
  Credit Points: 12  Contact Hours: 3 per week

- **NSN304 ADVANCED NURSING MANAGEMENT 1**
  This subject provides opportunities for students to examine the organisation context of nursing and health care from a number of theoretical perspectives and to enable them to contribute effectively to debate on the nature of nursing and health care organisation.
  
  Credit Points: 12  Contact Hours: 3 per week

- **NSN305 ADVANCED NURSING MANAGEMENT 2**
  This subject provides an opportunity for students to examine management processes of nursing divisions within health care organisations enabling them to have creative input into the nursing environment.
  
  Prerequisites: NSN301
  Credit Points: 12  Contact Hours: 3 per week

- **NSN307 ADVANCED NURSING CLINICAL 1**
  This subject allows the student to develop an advanced clinical nurse practice role. It focuses on the role of the advanced clinical nurse practitioner; and includes role creation/development including role theory, role application, role analysis and strategies for implementing role. Students develop a conceptual framework for advanced clinical practice which includes but is not limited to: expert clinical practitioner advocate, change agent, professional role model, clinical teacher/mentor and motivator.
  
  Prerequisite: Clinical Specialisation 3
  Credit Points: 12  Contact Hours: 3 per week

- **NSN308 ADVANCED NURSING CLINICAL 2**
  This subject allows the students to implement functions of the advanced clinical practice role. The content of this subject focuses on implementing the advanced clinical practice role in a selected area. It provides experiences to strengthen clinical skill, knowledge and judgment.
  
  Prerequisite: NSN301
  Credit Points: 12  Contact Hours: 3 per week

- **NSN309 ADVANCED NURSING CLINICAL 3**
  This subject is designed to develop knowledge and skill in the consultative function of the advanced clinical practitioner role. It also develops skill in the implementation of innovative change utilising skills from leadership, innovation, and change theory. This subject examines consultation theory and practice in detail. The areas of study include a focus on relationship between the nurse consultant and the client, problems that can arise, planning intervention and evaluation of the consultative process.
  
  Prerequisite: NSN301
  Credit Points: 12  Contact Hours: 3 per week

- **NSN401 STRATEGIES FOR NURSING RESEARCH**
  This subject introduces postgraduate students to the use and application of qualitative research techniques in nursing practice. The content is selected from techniques such as participant observation and unstructured interviewing as well as qualitative approaches in nursing research such as phenomenology, grounded theory, ethnography and historical research.
  
  Credit Points: 12  Contact Hours: 1.5 per week

- **NSN403 DISSERTATION**
  The dissertation should be a substantive and original research study. It should provide evidence that the student has identified a significant problem, reviewed the relevant literature, developed appropriate methodology to collect and analyse data, implemented the study and presented the findings in a form consistent with school requirements.
  
  Prerequisites: NSN401, MSN150
  Credit Points: 12  Contact Hours: 6 per week

- **NSN404 DISSERTATION**
  The dissertation should be a substantive and original research study. It should provide evidence that the student has identified a significant problem, reviewed the relevant literature, developed appropriate methodology to collect and analyse data, implemented the study and presented the findings in a form consistent with school requirements.
  
  Prerequisites: NSN401, MSN150
  Credit Points: 12  Contact Hours: 6 per week

- **OPB132 OPHTHALMIC OPTICS 2**
  An introduction to ophthalmic optics; optical properties of spherical and astigmatic lenses and of ophthalmic prisms; bifocals, multifocals and special lens types; ophthalmic lens materials and lens quality;
the ophthalmic prescription, its interpretation and verification.
Prerequisite: PHB150 Co-requisite: PHB240
Credit Points: 12 Contact Hours: 4 per week

■ OPB312 VISUAL SCIENCE 3
The performance of the eye as an optical system is
considered in the context of ocular aberrations, refrac-
tive errors and image formation and quality. An
introduction to visual performance characteristics in-
cludes absolute and relative thresholds, dark and light
adaptation and relative luminous efficiency curves.
Prerequisite: PHB240 Co-requisite: PHB340
Credit Points: 14 Contact Hours: 5 per week

■ OPB401 OCULAR & REGIONAL
ANATOMY
The gross anatomy of the head and neck region with
particular reference to the central nervous system. The
macroscopic and microscopic anatomy of the orbit,
extraocular muscles, eyelids, lacrimal apparatus, cor-
eae, conjunctiva, sclera, uveal tract, lens, retina, optic
nerve, aqueous, vitreous and the neural pathways and
vascular circulation subserving vision. Ocular embryol-
yogy.
Prerequisite: PNB363
Co-requisites: PNB435; OPB412
Credit Points: 8 Contact Hours: 3 per week

■ OPB412 VISUAL SCIENCE 4
Visual performance is examined with respect to its
spatial and temporal characteristics. Perceptual
aspects of vision as well as binocular and colour
vision performance characteristics.
Prerequisite: OPB312; PHB340
Co-requisite: OPB401
Credit Points: 14 Contact Hours: 5 per week

■ OPB504 OPHTHALMIC OPTICS 5
A continuation of OPB132, with emphasis on prob-
lems with spectacle lenses. The practical applica-
tion of theory to ophthalmic dispensing in the
laboratory.
Prerequisite: OPB132, PHB340
Credit Points: 6 Contact Hours: 4 per week

■ OPB505 CLINICAL OPTOMETRY 5
The clinical application of techniques learnt in
OPB509 (studied concurrently) in the management of
patients presenting for eye examinations.
Prerequisite: OPB412
Co-requisites: OPB509, OPB505, OPB527
Credit Points: 8 Contact Hours: 4 per week

■ OPB508 OCULAR PHYSIOLOGY
All aspects of ocular physiology including the vegeta-
tive physiology of various ocular structures, visual
neurophysiology and an introduction to electrophysiological techniques.
Prerequisite: OPB412, OPB401
Co-requisite: OPB509, OPB505, OPB527
Credit Points: 8 Contact Hours: 4 per week

■ OPB509 OPTOMETRY 5
The theory and practice of clinical procedures which
are used in routine eye examinations.
Prerequisite: OPB412, OPB401
Co-requisite: OPB508, OPB505, OPB527
Credit Points: 18 Contact Hours: 9 per week

■ OPB527 DISEASES OF THE EYE 5
The detection, diagnosis, referral and management of
ocular disease. General pathological considerations.
The writing of reports, referral letters and referral
procedures. The nature, aetiology and management of
congenital, developmental, dystrophic and degenera-
tive anomalies of the external and internal ocular
structures and ocular adnexae. The ocular manifes-
tation of systemic disease including cardiovascular,
metabolic, endocrine, central nervous system and
malnutritional disorders.
Prerequisite: OPB412, OPB505, OPB509
Co-requisites: OPB508, OPB509
Credit Points: 8 Contact Hours: 4 per week

■ OPB605 CLINICAL OPTOMETRY 6
The continuation of OPB505. The clinical applica-
tion of techniques learnt in OPB509 and OPB609 (studied
concurrently) in the management of patients present-
ing for eye examinations.
Prerequisite: OPB505
Co-requisites: OPB608, OPB609, OPB627
Credit Points: 8 Contact Hours: 4 per week

■ OPB608 OCULAR PHARMACOLOGY
General pharmacological principles are presented as
background to a study of pharmacological profiles of
ophthalmic preparations; both diagnostic and topical
therapeutic agents are considered. Particular em-
phasis is placed on those ophthalmic drugs used to
facilitate an eye examination.
Prerequisite: OPB508, OPB509
Co-requisites: OPB605, OPB609, OPB627
Credit Points: 6 Contact Hours: 3 per week

■ OPB609 OPTOMETRY 6
This subject is a continuation of the theory and prac-
tice of routine and advanced clinical procedures
which are used when conducting a complete eye
examination. The areas covered include ocular
photography, the management of binocular vision
anomalies, methods of examining the visual field and
the measurement of intra-ocular pressure.
Prerequisite: OPB508, OPB509
Co-requisites: OPB605, OPB608, OPB627
Credit Points: 16 Contact Hours: 8 per week

■ OPB617 CONTACT LENS STUDIES 6
An introduction to the basic concepts of contact lens
fitting. Areas covered include contact lens instrumen-
tation, contact lens materials and designs, fitting and
consultation techniques. The practical component of
the subject focuses upon the fitting of contact lenses.
Prerequisite: OPB509, OPB505, OPB527
Co-requisites: OPB609, OPB605, OPB627, OPB608
Credit Points: 6 Contact Hours: 2 per week

■ OPB627 DISEASES OF THE EYE 6
A continuation of OPB527. The anatomical,
physiological and pathological aspects of glaucoma.
Its symptomatology, methods of detection and diag-
nosis, management and prognosis. Inflammatory
diseases, trauma and tumours of the external and
internal ocular structures and ocular adnexae.
Prerequisite: OPB527
Co-requisites: OPB605, OPB609, OPB606, OPB617
Credit Points: 8 Contact Hours: 4 per week

■ OPB705 CLINICAL OPTOMETRY 7
This is the clinical application of the procedures
studied in OPB609 and OPB709, and includes the
management of patients in the clinical situation.
Prerequisite: OPB605
Co-requisites: OPB609, OPB717, OPB750
Credit Points: 24 Contact Hours: 13 per week

■ OPB709 OPTOMETRY 7
This subject is a continuation of OPB609 and provides
knowledge and understanding of the theory and clini-
OPB717 CONTACT LENS STUDIES 7
A series of lectures and practical sessions in advanced aspects of contact lens practice. The subject includes topics such as the physiological consequences of contact lens wear, management of contact lens patients, and fitting of lenses for keratoconus, extended wear and presbyopia. Practical sessions provide training in advanced diagnostic and fitting techniques.
Prerequisite: OPB617
Co-requisites: OPB705, OPB709, OPB750
Credit Points: 6 Contact Hours: 2 per week

OPB750 PROJECT
Students are required to undertake project work in Year 4, Semesters 1 and 2. Students work in groups of up to three on projects of their own choosing or on a topic chosen from a suggested list. Project topics must be original. Students conduct a literature search (including a computer-based search in conjunction with a reference librarian). They decide on the experimental hypotheses, plan and execute the experiment, analyse the results and write a report in manuscript form which it is hoped will be suitable for publication in the open literature. Oral presentations are given by each group to their peers, third year students and staff, as part of a formal Year 4, Semester 2 colloquium.
Co-requisites: OPB709, MAB258, OPB705, OPB717
Credit Points: 10 Contact Hours: 2 per week

OPB803 OCCUPATIONAL/PUBLIC HEALTH OPTOMETRY
A course of study to introduce the basic concepts of eye safety and visual ergonomics. Content includes eye safety programs, occupational vision screening, legal aspects of eye safety, eye hazards: traumatic, radiation and chemical, eye protection, visual ergonomics and illumination engineering.
Prerequisite: OPB709
Co-requisites: OPB805, OPB750
Credit Points: 6 Contact Hours: 2 per week

OPB805 CLINICAL OPTOMETRY 8
A continuation of OPB705. This subject places emphasis on the students’ decision-making skills in the evaluation, care and treatment of patients who may have a wide range of visual disorders.
Prerequisites: OPB705, OPB717
Co-requisite: OPB803
Credit Points: 32 Contact Hours: 17 per week

PHA154 INTRODUCTORY PHYSICS
An introduction to the basic concepts involved in the study of linear mechanics, ideal gases, liquids and solids, elasticity, surface tension, temperature and its measurements, heat content, heat transfer, reflection and refraction of light at plane surfaces, use of lenses in simple optical instruments, current electricity, e.m.f. resistance, circuit analysis, heating effects, electrical measurements using moving coil galvanometers, potentiometers and Wheatstone bridge, magnetic field with simple applications. A series of laboratory experiments emphasise the above concepts.
Credit Points: 8 Contact Hours: 3 per week

PHA213 MEDICAL INSTRUMENTATION 2
Basic concepts and procedures in diagnostic instrumentation; transducer principles; characteristics of physiological signals; methods of measurement and instrumentation principles. Hospital visits may be included.
Prerequisite: PHA154
Credit Points: 8 Contact Hours: 4 per week

PHB111 PHYSICS 1B
A course of lectures and laboratory work on AC and DC circuit theory, electronics, vibrations and waves, sound.
Co-requisite: PHB104 unless Senior Physics has been undertaken.
Credit Points: 8 Contact Hours: 3 per week

PHB122 PHYSICS 1C
Dimensional analysis, kinematics, dynamics, motion in a curve, mechanical properties of matter, gravitation, fluids, waves and acoustics, circuit theory and electronics.
Prerequisite: Sound Achievement in Senior Physics
Co-requisite: PHB901
Credit Points: 12 Contact Hours: 5 per week

PHB132 ENGINEERING PHYSICS 1A
A basic subject in the physics of waves and optics; including moving and stationary waves in various media, interference of waves, beats, acoustics and shock waves and measurement of sound; geometrical and physical optics including reflection, refraction, dispersion, interference and diffraction, polarisation, optical instruments, design and resolution, and photometry.
Credit Points: 6 Contact Hours: 3 per week

PHB144 APPLIED SCIENCE FOR DESIGNERS I
Physics for environmental design: light and colour, heat and energy transfer, solar energy physics, sound and acoustics, electricity, magnetism and electronics for the built environment.
Credit Points: 6 Contact Hours: 3 per week

PHB150 PHYSICS 1H
Basic physical measurements; mechanics; fluids; heat; vacuum physics; waves, acoustics, ultrasonics and optics, and the instrumentation used to measure biological parameters.
Credit Points: 12 Contact Hours: 6 per week

PHB170 PHYSICS FOR SURVEYORS
Mechanics; geometrical optics; physical optics; quantum optics; physics of materials; physics of the lower atmosphere; sound; electromagnetic fields; electronics.
Credit Points: 12 Contact Hours: 6 per week

PHB178 PRINCIPLES OF MEDICAL RADIATIONS
An introduction to the principles of medical imaging and to the methods of detection, diagnosis and treatment of cancer.
Credit Points: 10 Contact Hours: 6 per week

PHB222 PHYSICS 2
Properties of matter; fluids; quantum and radiation physics; thermal physics; electromagnetic fields.
Prerequisite: Sound Achievement in Senior Physics
Co-requisite: PHB901
Credit Points: 12 Contact Hours: 5 per week
PHB232 ENGINEERING PHYSICS 2
The physics of heat and properties of matter, including the kinetic theory of gases, temperature scales and thermometers, heat and heat measurement, thermodynamics and the molecular properties of matter, gravitational fields; basic radiation physics.
Credit Points: 6  Contact Hours: 3 per week

PHB240 OPTICS 2
The principles of geometrical optics as they apply to rectilinear propagation, reflection and refraction for paraxial rays for monochromatic light for single surfaces, thin lenses, cylindrical, spherocylindrical and toric lenses, lens systems in air, the eye and a selection of optical instruments; study of the optics of monochromatic and chromatic aberrations and of photometry and colour.
Prerequisite: PHB150  Co-requisite: OPB132
Credit Points: 12  Contact Hours: 7 per week

PHB250 PHYSICS 2H
An extension of PHB150 including a.c., d.c. circuit theory, with emphasis on electronics and instrumentation, fields, modern and nuclear physics.
Credit Points: 10  Contact Hours: 4 per week

PHB252 KINESIOLOGY & BIOMECHANICS
Principles, methods and interpretation of measurement of human movement, particularly associated with the lower limb; principles of lower limb function (standing, walking and running).
Credit Points: 8  Contact Hours: 2 per week

PHB262 PHYSICS 2L
An extension of PHB150 including a.c., d.c. circuit theory, with emphasis on electronic and instrumentation, fields, modern and nuclear physics.
Credit Points: 8  Contact Hours: 2 per week

PHB263 PHYSICS 2E
An extension of PHB150 including a.c., d.c. circuit theory, with emphasis on electronics and instrumentation, fields, modern and nuclear physics.
Credit Points: 12  Contact Hours: 6 per week

PHB272 RADIATION PHYSICS 1
Electrostatics, electromagnetism, the production of X-rays and their interaction with matter.
Credit Points: 12  Contact Hours: 5 per week

PHB275 PROCESSING TECHNOLOGY
A study of the processes involved in the production of a visible image in radiography, including: latent image formation, processing, techniques and equipment relevant to radiography.
Credit Points: 4  Contact Hours: 2 per week

PHB276 GENERAL RADIOGRAPHY 1
A program of lectures and practical sessions relating to radiography of the skeletal system.
Prerequisite: PNB125, PHB178
Co-requisite: PNB225
Credit Points: 14  Contact Hours: 7 per week

PHB279 CLINICAL RADIOGRAPHY 1
Practical programs carried out in approved clinical departments. Specific experiences relate to topics introduced in PHB276.
Credit Points: 4  Contact Hours: 2 per week

PHB286 TREATMENT PLANNING 1
An introduction to the techniques of radiotherapy treatment planning.
Credit Points: 12  Contact Hours: 6 per week

PHB287 MEGA VOLTAGE THERAPY 1
An introduction to the basic techniques of radiotherapy including beam direction and defining devices.
Prerequisites: PHB178, PHB125
Credit Points: 6  Contact Hours: 3 per week

PHB289 CLINICAL RADIOTHERAPY 1
Practical programs carried out in approved clinical departments. Specific experiences relate to topics introduced in PHB287.
Credit Points: 4  Contact Hours: 2 per week

PHB313 RADIOGRAPHIC IMAGE INTERPRETATION
The basic of image formation in medical radiography, and the significance of diagnostic techniques and their image appearances in assessment of the lower extremity.
Credit Points: 6  Contact Hours: 3 per week

PHB322 PHYSICS 3A
Laplace Transforms; SHM; damped harmonic motion; forced oscillations; coupled oscillations; wave transmission and reflection; wave systems; AC circuit analysis; power; network analysis; resonance; AC measurements.
Prerequisites: PHB122, PHB222 and (MAB212 or MAB222)
Credit Points: 12  Contact Hours: 5 per week

PHB332 PHYSICS 3B
Measures of sound; sound emission and propagation; sound in enclosed spaces; measurement; environmental and occupational noise; building and architectural acoustics. Interference by division of wavefront and by amplitude division; interferometry; diffraction; holography; Fourier methods.
Prerequisites: PHB122, PHB222 and (MAB212 or MAB222)
Credit Points: 12  Contact Hours: 5 per week

PHB340 OPTICS 3
The application of geometrical optics to selected aspects of optometry including lens form and thickness, contact lenses, spectacle lens design and spherical surfaces; the wave nature of light with emphasis on interference, interferometry, diffraction and polarisation; the specialised topics of optical processing, lasers and the evaluation of optical systems.
Prerequisites: PHB240, PHB250
Credit Points: 12  Contact Hours: 7 per week

PHB342 PHYSICS 3C
Forces between atoms; structure of solids; types of materials; defects; phase transformations; rate processes; diffusion and crystallisation; surfaces and interfacial phenomena; corrosion; mechanical properties; modern materials; vacuum theory; systems and components; leak detection and thin film processing.
Prerequisites: PHB122, PHB222 and (MAB212 or MAB222)
Credit Points: 12  Contact Hours: 5 per week

PHB352 ELECTRONICS 1
Laboratory measurement techniques and instrumentation; AC circuit analysis; Bode plots, pole-zero plots, RC networks; diodes, transistors, FET, SCR, Triac and applications; feedback theory and applications; operational amplifier fundamentals; digital circuits; gates, FF, counters, registers.
Prerequisite: At least four level 1 subjects, preferably including Physics.
Credit points: 12  Contact Hours: 5 per week
PHB373 NUCLEAR MEDICINE IMAGING 1
The principles, equipment and applications of nuclear medicine imaging.
Credit Points: 4 Contact Hours: 2 per week

PHB374 RADIOGRAPHIC EQUIPMENT 1
Detailed discussion of design considerations of X-ray generators and equipment used for control of beam direction.
Credit Points: 6 Contact Hours: 3 per week

PHB376 GENERAL RADIOGRAPHY 2
An extension of topics introduced in PHB276 to include more advanced techniques of skeletal radiography, ward and operating theatre radiography, and examinations utilising contrast media.
Prerequisites: PHB276, PHB279, PNB225
Credit Points: 12 Contact Hours: 5 per week

PHB379 CLINICAL RADIOGRAPHY 2
Clinical experiences in radiographic examinations introduced in PHB276 and PHB376. Experience is obtained in approved clinical departments.
Prerequisites: PHB276, PHB279, PNB225
Credit Points: 10 Contact Hours: 5 per week

PHB382 RADIOTHERAPY PHYSICS 1
A study of the design, physical aspects and operating characteristics of megavoltage and telecurie units.
Prerequisite: PHB272
Credit Points: 4 Contact Hours: 2 per week

PHB386 TREATMENT PLANNING 2
An extension of the study of treatment planning introduced in PHB286 to the planning of complex techniques of photon therapy. The planning of electron therapy.
Credit Points: 8 Contact Hours: 4 per week

PHB387 MEGAVOLTAGE THERAPY 2
The principles and applications of megavoltage therapy including techniques for specific sites.
Prerequisites: PHB287, PNB225
Credit Points: 10 Contact Hours: 5 per week

PHB389 CLINICAL RADIOTHERAPY 2
Practical exercises in megavoltage therapy related to topics introduced in PHB287 and PHB387. The programs are carried out in approved clinical departments.
Prerequisites: PHB289, PNB225
Co-requisite: PHB387
Credit Points: 10 Contact Hours: 5 per week

PHB422 PHYSICS 4A
Review of quantum mechanics; microscopic systems in equilibrium; probability and statistics; statistical descriptions of systems; internal energy, equipartition; interaction of two systems; laws of thermodynamics; entropy; fundamental statistical relations; classical thermodynamics; kinetic theory; quantum statistics and quantum gases; compressible and incompressible flow; viscous effects; supersonic flow and applications.
Prerequisites: PHB122, PHB222 and (MAB212 or MAB222)
Credit Points: 12 Contact Hours: 5 per week

PHB432 PHYSICS 4B
The Lorentz transformation; relativistic kinematics and dynamics; energy conversion and storage; photons; radioactivity; interaction of radiation with matter; radiation detectors; counting statistics; nuclear reactions; non-ionising radiation.
Prerequisites: PHB122, PHB222 and (MAB212 or MAB222)
Credit Points: 12 Contact Hours: 5 per week

PHB442 ASTRONOMY & ASTROPHYSICS
Spectral classification of stars; stellar formation, structure, evolution, introduction to general relativity and cosmology, galaxies, structure of the universe. Astronomical instrumentation other than optical, practical space astrophysics, advanced observational/practical work. Field trip.
Prerequisites: PHB122 and SCB222
Credit Points: 12 Contact Hours: 5 per week

PHB452 ELECTRONICS 2
Applications of operational amplifiers and special function ICs including filter networks; transducers; digital circuits: memories, timers, A/D and D/A systems; microprocessor fundamentals.
Prerequisite: PHB352
Credit Points: 12 Contact Hours: 5 per week

PHB462 EXPERIMENTAL PHYSICS 4
Experimental method and design; data analysis; preparation and presentation of reports; group project.
Prerequisite: At least two level 2 Physics subjects.
Credit Points: 12 Contact Hours: 5 per week

PHB471 RADIATION PHYSICS 2
A study of the philosophy and protocol of radiation protection. The question of protection is treated in a manner which brings into perspective the details of protection dealt with in other subjects of the course.
Credit Points: 4 Contact Hours: 2 per week

PHB473 MEDICAL ULTRASOUND
The physical principles and application of ultrasound.
Credit Points: 4 Contact Hours: 2 per week

PHB474 RADIOGRAPHIC EQUIPMENT 2
A study of the equipment used in specialised radiography; including mobiles, tomographic units, skull tables and mammography units.
Credit Points: 4 Contact Hours: 2 per week

PHB475 MEDICAL RADIATION COMPUTING 1
An introduction to the capabilities of computer hardware and software, and image processing.
Credit Points: 8 Contact Hours: 3 per week

PHB476 SPECIAL PROCEDURES
Specialised techniques of radiography, including the skull, obstetrics, gynaecology, CNS and paediatric radiography.
Prerequisites: PHB376, PHB379
Credit Points: 8 Contact Hours: 3 per week

PHB479 CLINICAL RADIOGRAPHY 3
Clinical experience in approved departments in radiographic examinations discussed in PHB376.
Prerequisites: PHB376, PHB379
Credit Points: 8 Contact Hours: 4 per week

PHB481 DOSIMETRY
A study of the measurement and dosimetry of external beam X-ray and gamma ray radiotherapy.
Credit Points: 6 Contact Hours: 3 per week

PHB482 RADIOTHERAPY PHYSICS 2
A study of radioactivity including methods of radiation detection, radioactive equilibrium and
production of radioisotopes, the principles of brachytherapy.  
Prerequisite: PHB382  
Credit Points: 6  Contact Hours: 3 per week

■ PHB484 PRINCIPLES OF TREATMENT 1  
The principles underlying the choice of treatment of cancer in specific sites including consideration of associated treatment.  
Credit Points: 6  Contact Hours: 3 per week

■ PHB487 MEGAVOLTAGE THERAPY 3  
An extension of the topic introduced in PHB387 to include the full range of treatment by megavoltage therapy for cancer in specific sites. Consideration includes techniques, planning, patient positioning, outlines and measurements.  
Prerequisites: PHB387, PHB389  
Credit Points: 10  Contact Hours: 4 per week

■ PHB489 CLINICAL RADIOTHERAPY 3  
Clinical experiences in approved departments in techniques of megavoltage therapy.  
Prerequisites: PHB389, PHB387  
Co-requisite: PHB487  
Credit Points: 8  Contact Hours: 4 per week

■ PHB501 APPLIED QUANTUM MECHANICS  
A course of lectures on quantum mechanics and theory of spectra.  
Prerequisites: PHB310[R], MAB411 and MAB412  
Credit Points: 8  Contact Hours: 3 per week

■ PHB502 ELECTROMAGNETIC FIELD THEORY  
Electromagnetic field theory; static field theory, wave equation, plane and spherical wave solutions, properties of plane waves, reflection, refraction, waveguides, cavity resonators and radiation theory.  
Prerequisites: PHB310[R], MAB411 and MAB412  
Credit Points: 8  Contact Hours: 3 per week

■ PHB505 ELECTRONICS 3  
Microprocessor fundamentals and interfacing to computer displays and instrumentation. Design of microprocessor controlled data collection and analysis systems.  
Prerequisite: PHB408  
Credit Points: 8  Contact Hours: 3 per week

■ PHB510 PHYSICAL METHODS OF ANALYSIS  
A course of lectures and associated practical work on a range of physical techniques of analysis, including X-ray diffraction and fluorescence, electron microscopy, neutron activation analysis, electron microprobe analysis. Emphasis is on the physical principle, instrumentation and nature of information available from each technique. Industrial visits may be included.  
Prerequisite: PHB312  
Credit Points: 8  Contact Hours: 3 per week

■ PHB516 EXPERIMENTAL PHYSICS 5  
Laboratory and field work in applied physics with emphasis on open ended experiments with modern equipment. Field trips may be necessary.  
Prerequisite: PHB416  
Co-requisite: At least one of PHB501, PHB502.  
Credit Points: 12  Contact Hours: 6 per week

■ PHB572 IMAGE RECORDING & EVALUATION  
A course of lectures and practical exercises on non-film image formation evaluation. Information theory.  
Credit Points: 4  Contact Hours: 2 per week

■ PHB573 DIGITAL IMAGING MODALITIES  
A study of the principles, methods and applications of CT, digital radiography and MRI in medical imaging.  
Credit Points: 6  Contact Hours: 2 per week

■ PHB574 QUALITY ASSURANCE IN MEDICAL IMAGING  
A study of the principles and techniques used in the quality assurance of medical imaging apparatus and ancillary equipment.  
Credit Points: 6  Contact Hours: 3 per week

■ PHB575 MEDICAL RADIATIONS COMPUTING 2  
A course of lectures and practical exercises related to the applications of computers in image processing and radiotherapy.  
Credit Points: 8  Contact Hours: 3 per week

■ PHB576 ADVANCED RADIOGRAPHIC TECHNIQUE 1  
A study of the principles and techniques used in advanced radiographic techniques including angiography, the salivary glands, arthrography, sinography, angioptography and venography.  
Prerequisites: PHB476, PHB479  
Co-requisite: PHB578  
Credit Points: 12  Contact Hours: 6 per week

■ PHB578 IMAGE INTERPRETATION 1  
A course of lectures and practical exercises on image interpretation including technical and diagnostic quality.  
Credit Points: 4  Contact Hours: 2 per week

■ PHB579 CLINICAL RADIOGRAPHY 4  
Clinical experience in special radiographic procedures as introduced in PHB476.  
Prerequisites: PHB476, PHB479  
Credit Points: 8  Contact Hours: 4 per week

■ PHB583 COMPLEMENTARY & EVOLVING TECHNIQUES  
A course of lectures on the principles, strengths and stage of development of techniques which are complementary to radiotherapy treatment of cancer including: hyperbaric O2 therapy, neutron therapy, p-meson therapy, chemotherapy, cryotherapy and hyperthermia.  
Credit Points: 6  Contact Hours: 3 per week

■ PHB584 PRINCIPLES OF TREATMENT 2  
A continuation of the detailed discussion started in PHB484 to include the principles of treatment of cancer in all sites, and benign diseases.  
Credit Points: 4  Contact Hours: 2 per week

■ PHB585 COMPUTER ASSISTED TREATMENT PLANNING 1  
A study of planning hardware and software to include 2 dimensional planning. Development of concepts to an advanced level of understanding of computer-assisted optimisation of isodose distributions.  
Credit Points: 8  Contact Hours: 3 per week
• PHB587 ORTHOVOLTAGE & SUPERFICIAL THERAPY
A course of lectures and practical exercises on the specialised techniques of orthovoltage and superficial radiotherapy.
Prerequisites: PHB489, PHB487
Credit Points: 10 Contact Hours: 4 per week

• PHB589 CLINICAL RADIOThERAPY 4
Clinical experience in the techniques of radiotherapy employing orthovoltage and superficial therapy.
Prerequisites: PHB489, PHB487
Co-requisite: PHB587
Credit Points: 12 Contact Hours: 6 per week

• PHB601 SOLID STATE PHYSICS
A course of lectures on the physics of materials, including mechanical, thermal and electrical properties.
Prerequisites: PHB401, PHB501, PHB312
Credit Points: 8 Contact Hours: 3 per week

• PHB602 NUCLEAR PHYSICS & ENERGY
A course of lectures on applied nuclear physics, neutron physics, reactor technology and energy.
Prerequisite: PHB402
Credit Points: 8 Contact Hours: 3 per week

• PHB608 APPLIED ACOUSTICS
Standards, principles of methods and instrumentation used in vibration, noise and sound measurements with emphasis upon architectural acoustics and traffic, industrial and community noise. Brief treatment of underwater acoustics and recording and reproduction of sound. Legal and technical aspects of professional practice. Field trips.
Prerequisite: PHB311
Credit Points: 8 Contact Hours: 3 per week

• PHB609 APPLIED RADIATION PHYSICS
Special techniques of radiation counting and applications, health physics, radiation protection, and radiobiological effects.
Prerequisite: PHB402
Credit Points: 8 Contact Hours: 3 per week

• PHB613 BIOPHYSICS
A course dealing with the biophysics of selected biological systems: electrical transmission systems, amplifiers, mechanical systems, molecular behaviours in fields; instrumentation for inter-cellular and inter-organ measurements: micro-electronics, transducers.
Prerequisites: At least 24 credit points in first level physics subjects and successful completion of at least 80 credit points of second level subjects.
Credit Points: 8 Contact Hours: 3 per week

• PHB616 PROJECT
A supervised project on some aspect of applied physics which could involve the extension and application of existing techniques or the development of new techniques.
Prerequisite: PHB516
Co-requisite: At least one third level physics subject.
Credit Points: 16 Contact Hours: 6 per week

• PHB620 TOPICS IN PHYSICS
Lectures, laboratory work and industrial visits in several topics relating to current advances in physics. The nature of the subject is dependent on departmental and staff activities at the time.
Prerequisite: At least 32 credit points in second level physics subjects.
Credit Points: 8 Contact Hours: 3 per week

• PHB671 RADIATION BIOLOGY
A study of the biological effects on ionising and non-ionising radiation.
Credit Points: 4 Contact Hours: 2 per week

• PHB672 PROJECT
A supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic.
Credit Points: 8 Contact Hours: 3 per week

• PHB676 ADVANCED RADIOGRAPHIC TECHNIQUE 2
An extension of topics in advanced radiographic technique as introduced in PHB576 to include mammography, technique for examination of the lymphatic system, and emerging techniques.
Prerequisites: PHB576, PHB579
Co-requisite: PHB678
Credit Points: 8 Contact Hours: 3 per week

• PHB679 CLINICAL RADIOGRAPHY 5
Clinical experience in advanced radiographic techniques introduced in PHB576.
Prerequisites: PHB576, PHB579
Credit Points: 14 Contact Hours: 6 per week

• PHB680 NUCLEAR MEDICINE IMAGING 2
A course of lectures, practical exercises and clinical experiences in nuclear medicine imaging. This subject expands on topics introduced in PHB373 and provides an indepth study of nuclear medicine imaging techniques.
Prerequisite: PHB373
Credit Points: 10 Contact Hours: 5 per week

• PHB681 COMPUTED TOMOGRAPHY IMAGING
A course of lectures, practical exercises and clinical experiences in CT imaging. This subject expands on topics introduced in PHB573 and provides an indepth study of CT imaging techniques.
Prerequisite: PHB573
Credit Points: 10 Contact Hours: 5 per week

• PHB683 ONCOLOGICAL IMAGING
A study of the principles and techniques of medical imaging used in the detection of cancer including CT, MRI, US and NM.
Credit Points: 6 Contact Hours: 4 per week

• PHB685 COMPUTER ASSISTED TREATMENT PLANNING 2
The use of computers in the planning of non-standard and complex radiotherapy treatment including arc and rotation techniques, irregular field techniques, 3 dimensional plans.
Credit Points: 8 Contact Hours: 4 per week

• PHB687 SPECIALISED RADIOTHERAPY TECHNIQUE
A study of specialised radiotherapy techniques including techniques applicable to the child patient and patients with communicable disease, theatre procedures, total body photon and electron therapy.
Credit Points: 10 Contact Hours: 4 per week

• PHB689 CLINICAL RADIOTHERAPY 5
Clinical experience in specialised radiotherapy treatment techniques.
Prerequisite: PHB589 Co-requisite: PHB687
Credit Points: 8 Contact Hours: 4 per week

</table>
digital image processing, medical applications of numerical methods and medical statistics.
Credit Points: 8 Contact Hours: 3 per week

- PHN304 MEDICAL IMAGING SCIENCE
Visual science, analogue and digital images, image enhancement, restoration and analysis, computed tomography, computer architecture, display instrumentation, recording and storage.
Credit Points: 6 Contact Hours: 2 per week

- PHN351 ULTRASOUND EQUIPMENT 2
A course of lectures and practical exercises on the principles and techniques of quality assurance protocols used in ultrasonic imaging.
Prerequisite: PHN153
Credit Points: 6 Contact Hours: 2 per week

- PHN352 ULTRASONIC EXAMINATION IN CARDIOLOGY
The techniques of ultrasound imaging used in investigating the cardiovascular system; techniques for demonstration of cardiac structures, cerebrovascular and peripheral vascular systems and peripheral venous systems.
Credit Points: 6 Contact Hours: 2 per week

- PHN353 ULTRASOUND IN MEDICAL DIAGNOSIS
A study of the role of ultrasound in medical imaging diagnosis.
Credit Points: 6 Contact Hours: 2 per week

- PHN354 ULTRASONIC EXAMINATIONS OF THE HEAD, NECK & PERIPHERAL ORGANS
The techniques ultrasound uses to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology.
Prerequisite: PHN257
Credit Points: 6 Contact Hours: 2 per week

- PHN357 CLINICAL ULTRASOUND 3
A supervised practical program carried out in an approved clinical ultrasound department. Students must obtain experience of specified ultrasound examinations used in cardiology and in the examination of the head, neck and peripheral organs.
Prerequisite: PHN257
Credit Points: 12

- PHN402 RADIOTHERAPY
Considers the principles and techniques of clinical application of ionising radiation for diagnostic and therapeutic purposes. Emphasis is on radiotherapy physics and diathermy therapy.
Credit Points: 6 Contact Hours: 2 per week

- PHN405 PHYSIOLOGICAL MEASUREMENT
Introduction to the principles and techniques of the direct and indirect measurement of physiological variables.
Credit Points: 6 Contact Hours: 2 per week

- PHN407 CASE STUDIES
Completion of assignments in applied practical procedures including reports written to journal publication standards.
Credit Points: 6

- PHN520 PROJECT
- PHN540 PROJECT
The project may take the form of research development, a design, a feasibility study, or the collation of scattered information on a given topic. The project can be undertaken externally under QUT supervision. Time spent on projects will be one year for full-time and two years for part-time students.
Credit Points: 48 and 24 per semester respectively Contact Hours: 18 and 9 per week respectively

- PHS021 INTRODUCTORY PHYSICS
This subject is intended to give the student a grounding in basic physics topics selected from the following areas: mechanics, heat, electricity, and magnetism and light. Note: This subject is not compatible with Senior Physics.
Credit Points: 6 Contact Hours: 3 per week

- PLB102 HISTORY OF THE BUILT ENVIRONMENT I
The development of man's artificial environment and its relationship to ideas, technology, and the fine arts from the earliest times to the seventeenth century.
Credit Points: 6 Contact Hours: 3 per week

- PLB135 MAP & AIR PHOTO INTERPRETATION
Types, sources, uses and availability of maps and air photos, map reading, understanding of contours, land form and use of sections; methods and techniques of map production; introduction to photogrammetry and use of stereoscopes; introduction to remote sensing.
Credit Points: 2 Contact Hours: 1 per week

- PLB200 INTRODUCTORY DESIGN 2
Studio work; simple 3 dimensional design tasks at a variety of scales, and illustrating tasks associated with the five professions. Workshop and fieldwork are related to studio exercises.
Prerequisite: ARB140
Credit Points: 18 Contact Hours: 8 per week

- PLB201 THE HUMAN ENVIRONMENT 2
Basic research principles, perception, learning processes, motivation and problem solving. Communication, characteristics and dynamics of group and interpersonal interactions. Stress and anxiety management. The role of the self-concept and locus of control in transactions with the world in general.
Credit Points: 4 Contact Hours: 2 per week

- PLB209 APPLIED LAND SCIENCE FOR DESIGNERS
This subject is concerned with establishing the foundations of a scientific understanding of the earth's surface. It includes earth science and climatology for environmental design; land forms and their origins; introduction to the physical properties and behaviour of soils and rocks in relation to the design professions.
Credit Points: 2 Contact Hours: 1 per week

- PLB300 PLANNING & LANDSCAPE DESIGN 1
Site planning theory and problem solving theory. The studio exercises develop the capacity to analyse the nature and use of spaces and to understand the role of creative expression in design.
Prerequisites: ARB140, ARB141, PLB113, PLB200, PLB209
Credit Points: 18 Contact Hours: 8 per week

- PLB301 THE HUMAN ENVIRONMENT 3
The role of social, cultural, and historical variables in human-environment interactions. The social and cultural development of Australian urban environments. Theory: privacy, personal space, territoriality, environmental meaning and cognition, cognitive maps
and wayfinding, intercultural and intracultural differences.

Prerequisite: PLB201
Credit Points: 6  Contact Hours: 3 per week

II PLB340 SITE MEASUREMENT II
Introduction to basic equipment for site measurement: levels, staffs, chains and tapes, the prismatic compass, optical prism, clinometer, range poles and their use in horizontal and vertical measurement. Introduction to recording of field data and the preparation of measured site drawings from recorded data.
Credit Points: 4  Contact Hours: 1 per week

II PLB343 INTRODUCTION TO THE PROFESSIONS
The concept of professionalism and contemporary social expectations of the environmental design professions. Current issues and controversies in environmental design and planning in Australia. Organisation and activities of the professional institutes. The powers, responsibilities and day-to-day activities of landscape architects and urban and regional planners.
Credit Points: 3  Contact Hours: 1 per week

II PLB346 GRAPHIC COMMUNICATION
A practice-based program with specialised, formal lecture inputs related to the development of methodologies. The program concentrates on the achievement of a professional standard in basic techniques of production documentation.
Prerequisites: ARB140, PLB200
Credit Points: 6  Contact Hours: 3 per week

II PLB400 PLANNING & LANDSCAPE DESIGN 2
Site planning techniques. The studio exercises link work commenced in site planning theory and site planning techniques. The subject integrates issues covered in PLB300 with the technical and practical aspects of site planning and design.
Prerequisites: PLB300, PLB301, PLB345
Credit Points: 20  Contact Hours: 6 per week

II PLB401 THE HUMAN ENVIRONMENT 4
Directing society; the roles of government and private enterprise; theories of power in society. The Australian example; three tiers of government; Australian constitution; Parliamentary democracy. Queensland State administration; role of local government, quangos and statutory authorities; pressure groups and lobby groups and their influence in the built environment arena.
Prerequisites: PLB301
Credit Points: 4  Contact Hours: 2 per week

II PLB408 DESIGN SCIENCE
The quantity and quality of light and daylight in buildings; macro and micro climatic conditions. Throughout the subject as each of these units is covered students are given opportunity to conduct experiments and test models. The subject consists of lecture and practical work.
Prerequisites: ARB140, CHB204, PHB144, PLB113, PLB200, PLB209
Credit Points: 4  Contact Hours: 2 per week

II PLB409 COMPUTER TECHNIQUES
Development of understanding, awareness, and appreciation of the use of computers as aids in data analysis and presentation, and of basic skills to input, manipulate, and analyse output; for statistical analysis of data in decision making; the range of information systems; as a tool in landscape architecture and planning.
Prerequisites: MAB195, MAB196
Credit Points: 4  Contact Hours: 2 per week

II PLB411 LANDSCAPE ECOLOGY
The broad division of the earth in relation to climate and soils; the ecosystem concept and its development and application at various geographic scales; concept of community ecophysiology and growth equations; ecological biogeography of Australian vegetation; classification of landscape; concepts of biogeographic regions; landscape structure: patches and corridors and the ideas of matrix and network; analysis of landscape structure and function.
Credit Points: 8  Contact Hours: 3 per week

II PLB414 POPULATION & URBAN STUDIES
Topics include: aspects of urban structure including size/function relationships, concentric zone theory, Hoy's settlement patterns and problems of rural settlements. The dynamics of urban areas: the relationships and requirements of urban activities (especially residential, work, and leisure activities); theories of city form and change; the problems of the CBD; the CBD fringe, and the urban/rural fringe. Case studies of Australian settlements.
Credit Points: 6  Contact Hours: 3 per week

II PLB440 INTRODUCTION TO ECONOMICS
An introduction to the basic economic problem of scarcity. Production possibilities are outlined together with various types of economic regimes. A simple macroeconomic circular flow model is introduced. The second part of the subject deals with microeconomic concepts. The market system and associated concepts of demand, supply and price equilibrium.

Credit Points: 2  Contact Hours: 1 per week

II PLB441 URBAN PLANNING 2
Credit Points: 4  Contact Hours: 2 per week

II PLB442 QUANTITIES & COSTS
Measurement and costing of time, resources, and materials for professional services, production of documents, and implementation of projects. The techniques and tools available for both preliminary and detailed measurement and costing and their control.
Credit Points: 2  Contact Hours: 1 per week

II PLB500 PLANNING & LANDSCAPE DESIGN 3
This subject aims to confirm the student's appreciation of the coherence of the design process by a single integrated semester long project. Secondly, the exercise focuses on interdisciplinary skills by undertaking joint work with the architecture students.
Prerequisites: PLB400, PLB408, PLB411
Credit Points: 20  Contact Hours: 6 per week

II PLB511 LANDSCAPE CONSTRUCTION
Materials and methods of construction; skills in detailing and preparation of documents. Topics include: the common building materials; foundation soils; basic services of site stormwater drainage, water
and electrical services; applied systems, including paving, etc.
Prerequisites: PLB340, PLB345
Credit Points: 6 Contact Hours: 3 per week

- PLB546 LAND DEVELOPMENT I
The political, economic and physical contexts of land development; environmental services and utilities at the broad scale; the necessary design criteria for these services. Topics include: characteristics of land development projects; structure and operation of approval authorities; design considerations; impacts of electricity and gas systems on the natural environment; transport systems planning.
Credit Points: 8 Contact Hours: 3 per week

- PLB547 LAND USE GENERATION
Credit Points: 4 Contact Hours: 2 per week

- PLB561 ECONOMICS OF TOWN PLANNING
This subject is essentially microeconomic. It introduces urban economics and the economic aspects of town planning issues; provides techniques for economic analysis suited to planning needs; and illustrates interactions with employment, industry, population and urban studies at the economic interface.
Credit Points: 3 Contact Hours: 1 per week

- PLB562 REPORT PREPARATION
Prerequisites: CMB 116, CMB 117, PLB 346
Credit Points: 2 Contact Hours: 1 per week

- PLB563 TRANSPORT PLANNING
Studies include alternative modes of transport; to methods for predicting future urban transport patterns; and to techniques of transport planning and management. It covers movement and its alternative modes. The origin and destination approach to traffic management; interchange studies. Inter-urban traffic and regional transport planning. The relationship between land use and traffic generation.
Credit Points: 5 Contact Hours: 2 per week

- PLB565 LANDSCAPE GRAPHICS
Combined application of freehand, drafting and colour techniques. The selection of colour, theme and emphasis in graphic packages. Realism, abstraction and symbolism in landscape communication. Monochromatic graphics for simple reproduction. Integration of various graphic techniques and media. Efficient processes for production and reproduction.
Credit Points: 6 Contact Hours: 2 per week

- PLB600 PLANNING & LANDSCAPE DESIGN 4
Expansion of students' planning and design skills by increasing the complexity and scale of projects and introducing problems requiring knowledge and skills drawn from the human environment, natural environment and technology study areas. The three projects for the semester focus on the development a significant urban area.
Prerequisites: PLB400, PLB408, PLB411, PLB414, PLB511
Credit Points: 20 Contact Hours: 6 per week

- PLB640 PLANTING DESIGN
Design characteristics and criteria. The use of plants as structural and design elements within landscape principles to planting design. Scale. Design for change, growth, replacement and maintenance. Planting design in typical schemes such as streets, highways, parks, urban forecourts and interior plantscapes, gardens and broadband regeneration and stabilisation.
Prerequisites: PLB345
Credit Points: 3 Contact Hours: 1 per week

- PLB643 ISSUES & ETHICS
Prerequisites: Completion of years 1 and 2
Credit Points: 2 Contact Hours: 1 per week

- PLB645 GRADING
Techniques of land surface manipulation including the construction of platforms for building, carparks, sports ovals and other features and the associated provision of surface drainage. Lectures are accompanied by skill development exercises in a grading workbook concluding with the preparation of two set grading plans.
Prerequisites: PLB340
Credit Points: 4 Contact Hours: 2 per week

- PLB646 LAND DEVELOPMENT 2
Continuation of PLB546. Land development projects, their financial, marketing and local authority requirements; the housing industry, firm and industry developments and current trends in these areas; the requirements of community, public and utility services.
Prerequisites: PLB546
Credit Points: 7 Contact Hours: 3 per week

- PLB647 LAND USE POLICIES
Review of the Government structure as applied to urban areas and regions. The levels of urban planning. How urban policies are made. Organisations as policy makers and policy implementors. Areas of conflict and their resolution. The various levels and types of land use planning. Major land uses and activities; work, housing, recreation, transport and welfare.
Prerequisites: PLB547
Credit Points: 4 Contact Hours: 2 per week

- PLB649 CONSERVATION THEORY
Introduction to the concepts of conservation and preservation. The structure of conservation legislation and responsibility in Australia. ICOMOS and the Burra charter. The particular requirements of places, landscapes and precincts in mixed or public ownership. Application of conservation concepts and their use in the National Listings process.
Credit Points: 2 Contact Hours: 1 per week
PLB561 ELECTIVE – LANDSCAPE ARCHITECTURE
Final year undergraduate students are required to undertake a minimum of two hours of elective subjects. The elective may be taken in either semester or spread across both semesters depending on subject choice.
Prerequisites: Completion of years 1 and 2
Credit Points: 4 Contact Hours: 2 per week

PLB654 ELECTIVE – PLANNING
Any approved subject selected from the undergraduate programs of the Faculty of Built Environment and Engineering, normally one of the landscape architecture courses. In special circumstances the elective may be selected from courses offered in other faculties of QUT or in another approved university.
Prerequisites: Completion of years 1 and 2
Credit Points: 4 Contact Hours: 2 per week

PLB655 HOUSING & COMMUNITY SERVICES
Population change and households formation. Housing conditions and preference surveys; housing issues and policies. The economics of the building and land development industries. The physical place of educational institutions in communities. Shared use of facilities. Location and space standards. Social and welfare services and their role in the community.
Credit Points: 4 Contact Hours: 2 per week

PLB659 IMPACTS & ASSESSMENT
Forms of impact assessment and analysis considering ecological, social and economic issues; various statutory systems. An analysis of the ecological processes as a background to assessing impact of human activities: urbanisation, resource exploitation, mining and other forms of landscape change.
Prerequisites: PLB411, PLB414
Credit Points: 5 Contact Hours: 2 per week

PLB663 URBAN PLANNING I
Building upon preliminary economic knowledge, urban growth theory and constraints are outlined. Population and employment changes and their effect on employment, industry and residential location are identified together with relevant definition and analytical techniques. Introduction to economic base studies, activity rates and use of multipliers. The urban labour market, unemployment and labour supply are outlined. Theory and methods of industry location are developed: types and needs of industry, retailing, retail hierarchies; office activities; office location; shopping centres; and office, industrial and corporate parks. The role of government and the impact of the post-industrial society are considered.
Credit Points: 4 Contact Hours: 2 per week

PLN101 URBAN DESIGN ANALYSIS STUDIO
The emphasis within this subject is on the development of skills in analysis related to the urban design process and adequate communication of the results.
Credit Points: 8 Contact Hours: 2 per week

PLN102 URBAN DESIGN CONTEXT STUDIO
Students are required to undertake studies typically from a community participation project, a sense of place project, a conservation and infill project for the redevelopment/rehabilitation of urban precincts or residential areas. Techniques of guidance and control: the use of regulations, ratios, and performance stand-

PLN103 URBAN DESIGN CONJECTURE STUDIO
Identification and classification of approaches to urban design. The setting of objectives, the adoption of a method and the testing of implications for a particular urban design problem type. Students are required to undertake studies typically from: local area, precinct, part of the city, the city as a whole. Where applicable, work in other units of study will be incorporated into this subject.
Credit Points: 8 Contact Hours: 3 per week

PLN105 URBAN DESIGN FIELD STUDIES
This subject consists of a field trip of approximately ten days duration. Visits successful and unsuccessful examples of urban design and to design offices in the eastern states and the Australian Capital Territory.
Credit Points: 2 Contact Hours: Approx 10 day field trip

PLN111 COMPARATIVE PLANNING THEORY
The roles of planners: statutory, pluralist, advocate, consultants; different models of planning at different scales and in different contexts: national, regional and local; planning under different economic and social conditions: free market, centrally planned, indicative, directive, interventionist, participatory. Current metropolitan and regional planning issues in Australia.
Credit Points: 8 Contact Hours: 2 per week

PLN112 CONCENTRATION STUDIES
In consultation with the lecturer in charge of the course, and with the approval of the Head of School, each student undertakes an agreed program of study which may involve taking selected courses from outside the urban and regional planning curriculum, focusing on a particular aspect of urban and regional planning which relates to the student's thesis topic. Every student is required to prepare a draft outline of the thesis and write a preliminary chapter or dissertation paper which normally deals with the theoretical background or broad context of the topic selected for study.
Credit Points: 8 Contact Hours: 2 per week

PLN113 OPTION PROJECTS
Working in small groups, students undertake projects which broadly relate to their theses topics. Projects may relate to topics such as urban development and design, regional development planning and management, recreation and tourism planning, and planning in developing countries.
Credit Points: 12 Contact Hours: 3 per week
PLN114 APPLIED RESEARCH TECHNIQUES
Research techniques, including surveys of various types, statistical analysis, remote sensing and others as appropriate.
Credit Points: 4 Contact Hours: 1 per week

PLN115 METROPOLITAN PLANNING PRACTICE & LAW
Growth and changes in metropolitan areas with particular reference to Australia; urban sprawl or urban consolidation; the future of metropolitan Brisbane; the current planning and legislative framework; suggestions for reform; group project on an aspect of metropolitan planning, normally in the context of Brisbane.
Credit Points: 16 Contact Hours: 3 per week

PLN121 PLANNING THESIS
The thesis is normally required to be 30-50,000 words in length, or equivalent, and is normally related to the Concentration Studies and Option Project chosen by the student. It provides an opportunity to pursue in depth an issue or problem within his or her special field of interest. The precise subject and objectives are chosen in consultation with an appropriate tutor. Field work is usually a necessary component of the research required in the production of the Planning Thesis which should make an original contribution to knowledge in the field of urban and regional planning to a specified area.
Credit Points: 24 Contact Hours: 2 per week

PLN122 PROFESSIONAL SEMINARS
Contributions by local and visiting speakers with specialist expertise or knowledge of specific issues or projects related to the work and interests of the built environment professions. Students from the different majors of the Master of Built Environment program are expected to attend and to participate fully in the discussions.
Credit Points: 8 Contact Hours: 2 per week

PLN123 PLANNING IN DEVELOPING COUNTRIES
The concept of the Third World: characteristics and setting; theories of national development relevant to the Third World; the roles of international agencies, governments, expatriate urban and regional planners, local expertise and the international community; the problems of rapid social and cultural change; the role of nationalism. Urban issues: rapid urbanisation, dual economies, the provision of shelter, squatters, social and physical infrastructure. Rural issues: definitions and theories of development; rural development schemes and case studies; capital land and labour intensive; economic transformations; the future of urban-rural relations in developing countries.
Credit Points: 8 Contact Hours: 2 per week

PLN124 OPTION COURSE
This course is developed by senior academic staff in response to matters of particular current significance; there are also opportunities to select appropriate elective courses from elsewhere within and outside the University.
Credit Points: 8 Contact Hours: 2 per week

PLN201 URBAN DESIGN HISTORY OF URBAN SYSTEMS
Analysis of urban forms and systems in the pre-industrial, industrial and post-industrial periods. Specific topics include urban activities: commerce, manufacture, administration, dwelling, recreation and culture; urban services: water supply, transportation, defence and public order, fire control, sewage and waste disposal, fuel and power, public information; urban form: planning for intelligibility, planning for propriety and symbolism, planning for delight.
Credit Points: 4 Contact Hours: 1 per week

PLN204 URBAN DESIGN THEORY & CRITICISM
The characteristics of good theory in the field of urban design in relation to the work of a number of theoretical writers and schools. Specific topics include: theoretical writing on urban design before 1800, theory and practice in the nineteenth century, the kunstlerischen Grundsatzen of Camillo Sitte, the Garden City movement, Le Corbusier and Modernism, the Townsape movement, Jacobs and 'The Death and Life of Great American Cities', Alexander on the urban system, the intelligible city, the work of Lynch and Appleyard, Rapoport on urban meaning, Habraken, Rowe and the city as independent artefact, Cantor, Ralph and Tuan on the phenomenology of the city, Mailand's analysis of urban design concepts.
Credit Points: 4 Contact Hours: 1 per week

PLN250 MASTERS STUDIO
Students select a specific studio usually related to the proposed focus of study. Studios are organised on a thematic rather than a purely disciplinary basis and projects will involve members of several disciplines. Advanced problem solving and interactive skills are required. Emphasis is placed on coordinated and managed group activity and resulting high levels of team output are expected. Professional aspects of project activities are supported by formal input on advanced aspects and concepts.
Credit Points: 12 Contact Hours: 3 per week

PLN251 ADVANCED PRACTICE 1
Presumes prerequisite understanding of practice relationships and processes. Emphasis is on the establishment and development of new markets and appropriate methodologies. Students are expected to use knowledge and skills developed in concurrent subjects.
Credit Points: 4 Contact Hours: 1 per week

PLN252 ADVANCED PRACTICE 2
Presumes prerequisite understanding of practice relationships and processes. Emphasis is on the establishment and development of new markets and appropriate methodologies. Students are expected to use knowledge and skills developed in concurrent subjects.
Credit Points: 8 Contact Hours: 2 per week

PLN253 PRACTICE SEMINAR
Students are required to prepare and present a formal seminar on a professional topical subject and to participate in those presented by fellow students.
Credit Points: 6 Contact Hours: 2 per week

PLN254 PROFESSIONAL SEMINARS
This subject provides a forum for interdisciplinary discussion. Local and visiting speakers contribute specialist expertise and knowledge of specific issues or projects related to the work and interests of the contributing majors.
Credit Points: 8 Contact Hours: 2 per week

PLN255 DESIGNATED STUDIES
Students, in conjunction with and with the approval of the Course Coordinator elect studies to improve
basic knowledge in identified areas of deficiency. Such study may be either in defined subjects offered outside the major or a specified reading/research program under tutorial guidance.
Credit Points: 6 Contact Hours: 2 per week

- **PLN256 CONCENTRATION STUDIES**
  Each student undertakes approved study to develop more specialised knowledge and skills related to their specific focus of study or dissertation topic. Study may be taken within the student’s own major through specialist studies offered by staff in their areas of expertise, from other majors in the course, or from other advanced studies in the University.
Credit Points: 8 Contact Hours: 2 per week

- **PLN257 RESEARCH METHOD**
  Students are introduced to issues related to the purpose, organisation, and conduct of research and to a range of appropriate techniques for the collection and analysis of information relating to their dissertation topics. The current state of research and publication in the profession is highlighted. Each student is required to prepare a proposal for the dissertation.
Credit Points: 4 Contact Hours: 1 per week

- **PLN258 DISSERTATION**
  This subject provides the opportunity to pursue in depth and with innovation an issue or problem within the chosen focus of study. This may be achieved through emphasis on either design or process. The balance between theory and design application may vary; however, a dissertation which focuses on a specific design must be supported by a theoretical basis and analysis sufficient to define the problem and to explain how the design satisfies the conditions for a solution. Conversely, a dissertation which focuses on the development of a theory must illustrate the practical implications of the theory for the relevant classes of design.
Credit Points: 24 Contact Hours: 4 per week

- **PLN302 URBAN LANDSCAPE**
  The city as a landscape unit, notable examples of city/site relationships; contributions of natural factors and patterns; topography, soils, drainage, vegetation, climate; towards better definition of urban form and character. Spaces and their organisation, the city as spatial entity, sequential experience; spaces for specific purposes; the choreography of spaces: use, settings, and furnishings, enclosures, floors, overhead structures, services, features, finishes. Natural elements and their nurture within urban areas: vegetation species, groupings, and their requirements, streets, plazas, forecourts, roofs, parts urban forests, natural areas; water bodies and their conservation as healthy feature; urban wildlife: habitats and contribution to the urban experience; landscape conservation techniques in urban areas.
Credit Points: 4 Contact Hours: 1 per week

- **PLN304 URBAN SERVICES & FUNCTIONS**
  Urban services: functional services of power, telephone, gas, water, stormwater and sewerage reticulation; controlling authorities, planning requirements and controls relevant to urban design. Community services related to health, safety, and welfare: such as medical, fire, emergency services, libraries, police, community participatory groups; controlling authorities, extent of services provided and controls relevant to urban design. Origins and destinies of traffic movements. The road hierarchy and its characteristics. Features of major terminals, car parks, pedestrian and cycle networks. Modes of travel and transport systems, railway and light rail, water, evaluation of comparative system. Major traffic generators: airports, terminals, CBD circulation. Related environmental and design issues: noise, atmospheric pollution, physical and visual impacts of difference systems and traffic channels. Future trends in transport and movement systems and related issues.
Credit Points: 4 Contact Hours: 1 per week

- **PLN401 COMPUTER APPLICATIONS IN URBAN DESIGN**
  The use of computers to analyse and solve urban design problems and communicate solutions. Feasibility studies; land use studies; generation of envelope and space layouts; environmental and service systems analyses; development control testing; data handling and manipulation; computer graphics; interactive integrated design systems.
Credit Points: 4 Contact Hours: 1 per week

- **PLN402 LAW & LEGISLATION IN URBAN DESIGN**
  Legislative controls and law reform related to urban design and the development process with specific reference to Queensland. Topics include the potential range of legislative controls, principal relevant legislation in Queensland and its impacts on urban design, the development control authority, arbitration processes of the State Government and influence on legislation; potential Group Acts, Heritage Acts, pedestrian malls) on the urban design process.
Credit Points: 4 Contact Hours: 1 per week

- **PLN501 URBAN DESIGN RESEARCH DISSERTATION (Masters students only)**
  The Research dissertation provides the student with the opportunity to innovatively pursue in depth an issue or problem within his or her special field of interest. The precise subject and objectives are chosen in consultation with the Course Coordinator. This may be achieved through an emphasis on a design project or through a written process. The balance between theory and design application in the dissertation may vary. However, a dissertation which focuses on a specific design project must be supported by a theoretical analysis sufficient to define the problem and to explain how the design proposed satisfies the conditions for a solution. Conversely a dissertation which focuses on the development of a theory must sufficiently illustrate the practical implications of the theory for the relevant classes of design task. The dissertation is supported by work undertaken as Applied Research Techniques.
Credit Points: 24 Contact Hours: 4 per week

- **PLN701 URBAN DESIGN ELECTIVE 1 (Graduate Diploma students only)**
  The opportunity for students to study an area of urban design of personal choice. Study required for this subject is undertaken as a taught subject within the University, with the approval of the Course Coordinator.
Credit Points: 4 Contact Hours: 1 per week

- **PLN702 URBAN DESIGN ELECTIVE 2 (Graduate Diploma students only)**
  Study required for the subject may be undertaken as taught subjects within the University or may be undertaken partly as taught subject and partly as individual studies under the direction of a tutor, all with the approval of the Course Coordinator. A normal program would be four taught subjects of average 6 credit points taken within the faculty or, two taught subjects of average 6 credit points taken within the
faculty and a design project or study program under tuition.

Credit Points: 24  Contact Hours: 4 to 8 per week

PLP201 CULTURAL VALUES
Concepts of garden, landscape and environment; formative influences on late twentieth century thinking. Landscape as art or artefact, the fine arts tradition and iconography. The continuing influence of the picturesque and gardenesque. The scientific, rationalist approach and evolving environmental romanticism. Functionalism, symbolism and meaning. The demystification (quantification) of aesthetic and personal response and the influence of the social sciences. Pursuing a public art form.

Credit Points: 4  Contact Hours: 1 per week

PLP202 RESIDENTIAL LANDSCAPE DESIGN
Landscape design of single and multiple dwellings; range of housing and subdivision types; consequences for design, controls, by-laws, standards and regulations for residential development; relevant examples including Radburn planning, experimentation with residential forms in the last 50 years, and the Commonwealth's Affordable Housing program; expectations of residents and the development of attitudes to suburban and urban gardens in Australia; fashion, style, environmental constants, microclimatic control, views and privacy, noise attenuation.

Credit Points: 8  Contact Hours: 3 per week

PLP203 URBAN LANDSCAPE DESIGN
Theory: client and user analysis, data gathering and information requirements, programming of work for site planning and detailed design services, programming of implementation; user/function analysis and site capacity considerations; preparation of a project brief; space theory and principles of spatial design. Studio: a medium scale intensive/multiple use project which demands re-design and rehabilitation; project site(s) visits and site surveys and client interviews to establish project briefs and carry out the design process; an advanced level of professional presentation is attached to the project output.

Credit Points: 10  Contact Hours: 3 per week

PLP204 LANDSCAPE PLANNING
Studies of medium to large-scale projects involving a range of biophysical, cultural and visual issues with a relatively high degree of complexity; focus on assessment and evaluation of related landscape attributes and issues with emphasis on deriving landscape management options in the form of policies, guidelines, and implementation strategies; studio incorporating lecture/seminar program to promote an understanding of the theoretical framework of landscape planning.

Credit Points: 10  Contact Hours: 4 per week

PLP205 LANDSCAPE DESIGN
Landscape design problems of increased scope, complexity and constraint; at least one one-day esquisse project in addition to the primary theme project extending for the duration of the subject; emphasis on the consistent resolution of design from broad concept through to the most detailed level; matters of appropriate style and morphology; theme applied consistently through scale and organisation of layout, selection of materials, forms and elements, and integration with surrounding context.

Credit Points: 10  Contact Hours: 3 per week

PLP206 FORUM/WORKSHOP A
PLP207 FORUM/WORKSHOP B
Content depends on the needs of students as perceived by staff during each semester: forum discussions structured around topical issues as debates, panel discussions, or seminars which may involve visiting specialist lecturers and/or participants. Skills extension session as seminars of studio tutorials in areas such as graphic and other communication techniques, new materials or processes, innovative approaches to design, or specialised survey/analysis techniques.

Credit Points: 2  Contact Hours: 1 per week

PLP208 LANDSCAPE PRACTICE
Practical experience for a period of at least three weeks in a landscape architectural office or offices as approved by the Course Coordinator; prerequisite to co-requisite with the second part of the subject and logged as directed; lectures in principles of contract law, forms of contract, standard conditions of contract and conditions of engagement, contract administration, professional presentation.

Credit Points: 6  Contact Hours: 2 per week

PLP209 ADVANCED LANDSCAPE ECOLOGY
Structure of landscape and impact of human settlement; heterogeneous landscapes, patches, corridors, and the matrix; contrast and grain size; interaction among adjacent elements, wind, soil, and water; connectivity of habitats and the dispersal of plants and animals; landscape and vegetation dynamics, scales of change; wildlife and conservation evaluation; computer graphics and modelling in landscape ecology; case studies in landscape ecology practice; potential for biological habitat reconstruction: issues, ethics, and practice.

Credit Points: 2  Contact Hours: 1 per week

PLP210 LANDSCAPE MANAGEMENT A
The relationship between management created/dependent landscapes and constructed created landscapes; specifying and programming construction and management as part of design implementation; specialisations and appropriate case studies; horticulture, urban horticulture, arboriculture, plantscapes; bushland management, regeneration, and monitoring; catchment and water-course management, embankment stabilisation.

Credit Points: 10  Contact Hours: 4 per week

PLP211 LANDSCAPE MANAGEMENT B
Assessment and evaluation including environmental impact analysis and an outline of current Commonwealth and State environmental assessment procedures and applications; visual and scenic quality assessment techniques; ecosystem protection; corridor and catchment management; introduction to large-scale computerised monitoring and management programs including a range of case studies; rural land use issues and systems; resource management issues and systems.

Credit Points: 10  Contact Hours: 4 per week

PLP212 ADVANCED GRAPHICS
Applications of large format design presentations; case studies and examples; advanced colour techniques; relating verbal and visual materials; relating design concepts to visual themes.

Credit Points: 4  Contact Hours: 2 per week
PLP213 ADVANCED LANDSCAPE CONSTRUCTION

Theory and techniques of a range of types of landscape construction including platforms, land stabilization, clearing and demolition, earth dams, lakes and flood levees, broadscale stormwater drainage and control, sports facilities and swimming pools, irrigation systems. Types of documentation used for the implementation of landscape works including working drawings, specifications, bills and schedules of quantities and methods of production; production of working drawings and specification of a competent standard.

Credit Points: 8 Contact Hours: 3 per week

PLP214 LANDSCAPE ENGINEERING

Common philosophies of civil engineering designs; site influences on structural form; residential subdivisions: structural and engineering design, services, design standards, controls; major road systems: hierarchy, route selection, design parameters, noise constraints, associated services/facilities; waste disposal: land fill; large dams, canals, marinas, coastal development: engineering constraints; design parameters, standards, erosion control methods; airfields, power reticulation—controlling authorities and legislation.

Credit Points: 4 Contact Hours: 2 per week

PLP215 SCHOOL FIELD TRIP

The field trip is a 7-10 day organised trip either interstate or in Queensland away from Brisbane. Environments may be natural, rural, or urban and the work and issues for discussion may relate to any or all of these. Current projects and complexity, areas of work, or contextual issues not able to be experienced locally form the major thrust of the field trip.

Credit Points: 2 Contact Hours: 7-10 days

PLP216 COMPUTER AIDED DATA ANALYSIS A

The development of skills and application of computer aided data analysis in landscape architecture. The emphasis is on building graphical data and attribute data skills; database management software; input and manipulation of data; development of graphic skills using the Autocad system.

Credit Points: 2 Contact Hours: 1 per week

PLP217 COMPUTER AIDED DATA ANALYSIS B

The subject presumes not only basic understanding of the use and application of computers but also a sound knowledge of and some skill in graphic software and data input analysis in database management systems. Exploration of the types of GIS, potentials and problems; current issues: working knowledge of ArcInfo (PC version) and current applications in landscape architecture.

Credit Points: 2 Contact Hours: 1 per week

PLP401 RURAL LAND USE & PLANNING

Rural land use patterns; characteristics and dynamics of rural land uses; impacts of rural resource developments. Rural land evaluation. Rural planning and characterisation of rural settlements; the rural urban fringe; Associate project and field work.

Credit Points: 4 Contact Hours: 1 per week

PLP402 SOCIAL PLANNING

The genesis of social welfare policies in Australia: employment, health, housing, income and education. The aims and conduct of social surveys. Community development and organisation schemes in Australia and overseas. Public participation and community action; planning aid and advocacy planning.

Credit Points: 4 Contact Hours: 1 per week

PLP403 PLANNING PROCESSES

Credit Points: 6 Contact Hours: 2 per week

PLP404 THEORIES FOR PLANNING

Ideas and theories in planning; theory as a basis for practice; political and philosophical determinants of land use planning. Values in planning, models of human nature and planning's relationship to important value traditions: liberalism, utilitarianism, empiricism, idealism, socialism, conservatism; concepts of the public interest, social justice and public intervention.

Credit Points: 4 Contact Hours: 2 per week

PLP405 PROCEDURAL PLANNING THEORY

Theory, explanation and prescription and the development of planning and decision theory; comprehensive planning and incrementalism, flexibility and commitment, the management of uncertainty, levels of decision making: the concept of mixed scanning, strategic and local planning, procedural planning theory and recent critiques.

Credit Points: 4 Contact Hours: 1 per week

PLP406 PROFESSIONAL PROCEDURES & ETHICS

Nature and role of a profession and professionalisation; codes of practice and ethics; role of the expert witness; situations of professional conflict; the role of the professional planner in public and private practice; office practice and procedures, setting up an office, filing, costing, control systems, preparation of briefs, estimating.

Credit Points: 4 Contact Hours: 1 per week

PLP407 URBAN POLICY PROCESSES

Models of public decision making: rational, incremental, bureaucratic, etc.; roles of political, administrative and private factors in public policy-making; organisational and inter-organisational theory; ways of improving urban policy making at the organisational and inter-organisational levels: corporate planning, PPBS, management by objectives, strategic choice, etc.

Credit Points: 4 Contact Hours: 2 per week

PLP408 SOCIAL & POLITICAL STRUCTURE

The focus and exercise of power in society; analysis of modern industrial societies, with particular reference to Australia; structure of society, family, political groups, ethnic groups, alternative societies, etc.; relevance to and implications for statutory planning.

Credit Points: 4 Contact Hours: 1 per week

PLP409 EMPLOYMENT, INDUSTRY & COMMERCE

The economy and its changing structure; the labour force, including measurement and trends; industrial location with special reference to manufacturing; retail and commercial activities; other services, in-
cluding recreational industries; some contemporary problems, eg. unemployment, technological change, industry rationalisation.

Credit Points: 4  Contact Hours: 2 per week

PLP411 PLANNING PRACTICE & LAW (URBAN)
A problem-solving group project set in an inner metropolitan or small town location, often undertaken in conjunction with local communities and councils. The statutory basis for urban planning and development in Queensland, including land use allocation, zoning, development control, statutory and non-statutory plans, consultation and participation, and the sources and use of statistical and other data relevant to urban planning.

Credit Points: 12  Contact Hours: 4 per week

PLP412 PLANNING PRACTICE & LAW (REGIONAL & STRATEGIC)
The regional concept and its relevance to planning; aims of regional and strategic planning; integration of urban and rural development, reduction of regional disparities, resource development; statutory basis of strategic planning; the case of Queensland. Strategy and policy formulation in a group project relating to a specific region.

Credit Points: 12  Contact Hours: 4 per week

PLP413 ADVANCED URBAN STRUCTURE
Critique of models of urban land use; justice, equality and welfare in the urban context; marginalisation and polarisation of groups within society; issues related to the problems and requirements of groups such as women, children, the aged, disabled, ethnic minorities, and access to housing, transport, etc.; relevance to and implications for planners.

Credit Points: 4  Contact Hours: 1 per week

PLP414 RESOURCE MANAGEMENT
Aims and processes of resource management; alternative approaches and techniques, resource inventories and evaluations. Environmental impact analysis and statements, statutory requirements. Multi-purpose schemes and the planning and management of regional landscapes in Australia and overseas. Policy studies of land and other resource management schemes.

Credit Points: 6  Contact Hours: 2 per week

PLP415 RESEARCH METHODS & INDIVIDUAL PROJECT
The place of objectives in research method; delimitation of areas of concern; structuring the research program; identification of primary and secondary sources; purposes and limitations of analysis; inference, uncertainty and exclusion of false conclusions; selection and adaptation of techniques. Preparation of an individual research study 10-1200 words in length (or equivalent).

Credit Points: 10  Contact Hours: 2 per week

PLP416 URBAN POLICY IMPLEMENTATION
Overview of the roles of the three levels of government in Australia as they impact on urban policy making and implementation. Statutory authorities; the private sector; pressure groups; implementation and evaluation in the urban planning process. Development of skills for improving the implementation of urban policies, including conflict resolution and negotiation skills; case studies.

Credit Points: 4  Contact Hours: 1 per week

PLP418 COMPUTER APPLICATIONS IN PLANNING
Information storage and retrieval; sources of information and databases; census, local surveys, networked databases, etc. the use of information in decision making; manipulation of information by use of statistical packages, spreadsheets and databases; Geographical Information Systems, and CAD, including hands on experience with drafting, digitising, etc. and the specific use of Land Information Systems.

Credit Points: 6  Contact Hours: 2 per week

PLP420 SCHOOL FIELD TRIP
One field course of approximately 7-10 days duration to provide a comparative dimension to students' studies and to develop skills in observation, data collection, recording and interpretation.

Credit Points: 4  Contact Hours: 7-10 days

PLP501 THEORY OF SITE PLANNING
Exploration of open space theory at regional and local scales; definition of spatial characteristics by edges, nodes, landmarks, districts, and paths. Sense of place; structure and form; legibility; image, ability, etc.; human responses and expectations and their effects on site planning decisions.

Credit Points: 2  Contact Hours: 1 per week

PLP502 SITE PLANNING TECHNIQUES
Introduction to the processes of site planning and detailed site design; role and objectives of survey and analysis; types of information and the methods of processing resultant data; data analysis to generate and evaluate problem solutions in conceptual form as a basis for strategic and master planning.

Credit Points: 2  Contact Hours: 1 per week

PLP503 HISTORY OF LANDSCAPE DESIGN
The form, content, influencing factors, and implications of the creation and development of historically, regionally, and religiously significant consciously designed landscape throughout the world; the evolutionary processes in development of cultural landscapes.

Credit Points: 2  Contact Hours: 1 per week

PLP504 PLANTING DESIGN
Design characteristics and criteria. The use of plants as structural and design elements within landscape. Principles of planting design. Scale. Design for change, growth, replacement and maintenance. Planting design in typical schemes such as streets, highways, parks, urban forecourts and interior plant-schemes, gardens, and broadscale regeneration and stabilisation.

Credit Points: 3  Contact Hours: 1 per week

PLP505 CONSERVATION THEORY

Credit Points: 3  Contact Hours: 1 per week

PLP506 USER & CHARACTER DESIGN STUDIES
User behaviour and requirements using two or three city centre pedestrian spaces; use of the same loca-
tions to analyse the spaces in light of both their own inherent characters and the users needs and responses defined earlier; an introduction to the concept of abstraction; making sculptures or models expressing the spirit of the places studied earlier in the semester.

Credit Points: 8  Contact Hours: 3 per week

■ PLP507 SITE PLANNING
Application of site planning principles and theory at all scales and types of projects; site utilisation and selection; application of site survey and analysis techniques; natural and man-made influences in physical design; environmental and social implications of design decisions; siting and integrating activities, structures and services; land form manipulation. Emphasis is given to alternative concept formulation and evaluation as a critical decision-making phase of the design process.

Credit Points: 9  Contact Hours: 3 per week

■ PLP508 INTRODUCTION TO PRACTICE
The concept of professionalism and contemporary social expectations of the environmental design profession. Current issues and controversies in environmental design and planning in Australia. Roles, ranges of employment and activities within the profession. Organisation and activities of the professional institute. Future directions, potentials, and opportunities. Introduction to the range of professions associated with landscape architecture. Introduction to the importance and techniques of CVs and portfolios.

Credit Points: 4  Contact Hours: 2 per week

■ PLP509 QUANTITIES & COSTS
Measurement and costing of time, resources, and materials for professional services, production of documents and implementation of projects; techniques and tools for preliminary and detailed measurement and costing and their control; time and percentage measurement and costing of professional services; costs of documents, including relative costs of different methods of production; units of management and costing of broad development types and for more detailed design projects; techniques of cost control.

Credit Points: 2  Contact Hours: 1 per week

■ PLP510 INTRODUCTION TO LAW
Laws, regulations and their interpretation. A review of the Australian and Queensland acts, local authority by-laws and regulations of statutory authorities as they affect the built environment. Legal aspects of land and land transfer. Planning and land use regulations. Introduction to professional liability, design registration, and copyright.

Credit Points: 2  Contact Hours: 1 per week

■ PLP511 ENVIRONMENTAL PSYCHOLOGY
The social and cultural development of Australian urban environments, with particular reference to the local built environment. The study of human functioning in urban environments. Theory: privacy, person space, territoriality, environmental meaning and cognition, cognitive ways and wayfinding, intercultural and intracultural differences. Application via examination and analysis of an urban environment or an artefact with respect to its sociocultural function.

Credit Points: 4  Contact Hours: 2 per week

■ PLP513 INTRODUCTION TO PLANT ECOLOGY
The individual organism as an ecological unit; life forms as an expression of environmental influences; the concept of species in plants and animals; population and population regulation; limiting factors; life cycles; pollination and dispersal; life history patterns; concept of niche; resources, competition, dynamics of plant communities; herbivore and other interactions with the fauna; introduction to ecosystems and energy and nutrient flows.

Credit Points: 4  Contact Hours: 2 per week

■ PLP514 LANDSCAPE ECOLOGY
Broad divisions of the earth related to climate and soils: biomes, formations, alliances, associations, and societies; the ecosystem concept and its development and application; plant communities as expressions of ecosystems; energy and water balance; concepts of community ecophysiology and growth equations; vegetation classification in Australia and its functional significance; ecological biogeography of Australian vegetation; classification of landscape: concepts of biogeographic regions, provinces, land systems, and land units; landscape structure and function and significance for conservation planning; landscape ecology and landscape planning practice.

Credit Points: 9  Contact Hours: 3 per week

■ PLP515 IMPACTS & ASSESSMENT
Decision-making and conflict resolution techniques relevant to land and other natural resource planning and management; analysis of ecological processes as background to assessing impact of human activities or urbanisation, resource exploitation, mining, and other landscape changes; statutory assessment systems especially those pertaining to Queensland and under Federal legislation.

Credit Points: 4  Contact Hours: 2 per week

■ PLP516 VISUAL COMMUNICATION - GRAPHICS
Lettering, layout, and visual themes in display communication; scale, emphasis, readability, and organisation of various types of information; photos, diagrams, text, sketches, plans, etc.; use of diagrams as major tools to explore and to communicate information from concepts through to physical relationships; range of sketch types and appropriateness to different types of work such as exploration of form, analysis, and communication of concepts.

Credit Points: 6  Contact Hours: 3 per week

■ PLP520 LANDSCAPE GRAPHICS
Combined application of freehand, drafting and colour techniques. The selection of colour, theme and emphasis in graphics packages. Realism, abstraction and symbolism in landscape communication. Monochromatic graphics for simple reproduction. Integration of various graphic techniques and media. Efficient processes for production and reproduction.

Credit Points: 4  Contact Hours: 2 per week

■ PLP521 MAP & AIR PHOTO INTERPRETATION
Types, sources, uses and availability of maps and air photos, map reading, understanding of contours, land form and use of sections; methods and techniques of map production; introduction to photogrammetry and use of stereoscopes; introduction to remote sensing.

Credit Points: 4  Contact Hours: 2 per week

■ PLP522 MEASUREMENT OF SITES
Introduction to basic equipment for site measurement: levels, staffs, chains and tapes, the prismatic compass, optical square, clinometer, range poles: their uses in horizontal and vertical measurement. Introduction to
recording of field data and the preparation of measured site drawings from recorded data.
Credit Points: 2  Contact Hours: 1 per week

PLP523 LANDSCAPE CONSTRUCTION 1
PLP524 LANDSCAPE CONSTRUCTION 2
Introduction to structures: definition of terms; basic actions/reactions of beams, columns, slabs, structural units, and types of structures; loadings and types including wind loading. Properties and application of common construction materials in landscape situations: concrete, masonry, stonework, timber, metalwork, glass, applied finishes; foundation soils; basic services of site storm water drainage, water, and electricity; applied systems; construction for planting and small water features. Manual techniques of land surface manipulation for site uses including building platforms, carparks, sports ovals, and surface drainage. Establishment of sound techniques of technical drawing in the preparation of construction documents.
Credit Points: 6 each subject  Contact Hours: 3 hours per week each subject

PLP551 LAND USE GENERATION
Changing patterns of urban land use, medieval to industrial revolution; segregation of land uses in planned settlements of the twentieth century; planning for urban diversity; the logic of design from values through activities to land uses; the formation of value systems; analysis and projection of activity systems; electronic communications, urban decentralisation, and emerging settlement patterns in the western world.
Credit Points: 7  Contact Hours: 2 per week

PLP552 INTRODUCTION TO GRAPHICS
Freehand sketching of objects from observation, rendering textured surfaces, design, developmental graphics, understanding 2 dimensional layout and competence in presentation of 2 dimensional design in reports and drawings.
Credit Points: 5  Contact Hours: 2 per week

PLP553 SITE PLANNING DATA & TECHNIQUES
Natural influences in physical planning: geology, climate, topography, hydrology, soils and vegetation, etc. Ecological considerations in design and development processes. Impact of natural hazards and other physical constraints on design, including air, water, and noise pollution. Impacts of development on the natural environment. Landscape evaluation techniques.
Credit Points: 3  Contact Hours: 1 per week

PLP554 SITE PLANNING PRACTICE
Layout of lots, buildings, roads and services; the retention of existing desirable features of the site; use of trees and other plant material; modification of land surface, eg. cut and fill; subdivision design, planning application and approval process.
Credit Points: 12  Contact Hours: 3 per week

PLP555 THEORY OF SITE PLANNING
Exploration of open space theory at regional and local scales; definition of spatial characteristics by edges, nodes, landmarks, districts, and paths. Sense of place; structure and form; legibility; imageability, etc.; human responses and expectations and their effects on site planning decisions.
Credit Points: 3  Contact Hours: 1 per week

PLP557 TRANSPORT PLANNING
Movement and its alternative modes: foot, cycle, car, bus, train, plane, pipeline, inland waterway and marine modes. The origin and destination approach to traffic management interchange studies. Inter-urban traffic and regional transport planning. This relationship between land use and traffic generation.
Credit Points: 5  Contact Hours: 2 per week

PLP558 POPULATION & URBAN STUDIES
Basic urban definitions, spread and characteristics of urbanisation, structure of cities and the economic and social processes at work within cities, particular aspects such as housing and gentrification, basic concepts of population and demography, familiarisation with the role of ABS and with statistical and data analysis of the Australian population, world demographic trends.
Credit Points: 10  Contact Hours: 3 per week

PLP559 APPLIED NATURAL SCIENCE
Applied studies in geology and geomorphology, climate and micro-climate, soils and hydrology, the broad soil and plant community associations. The influence of these systems collectively and separately on environmental design decisions.
Credit Points: 5  Contact Hours: 2 per week

PLP560 HISTORY OF PLANNING
Links between society; ideas and urban form. Urban evolution from ancient to modern times in Africa, Asia, Europe, America and Australasia. The industrial revolution and its effect on urban form and on planning ideas. Australian urban history and the development of environmental management and town planning in Australia.
Credit Points: 3  Contact Hours: 1 per week

PLP561 URBAN DESIGN
Design method, visual thinking; principles of perception and spatial arrangement; the vocabulary of design and urban imagery; design elements; the evolution of designer theory; techniques for analysing the quality of existing built environments; analysis of examples. Urban design project.
Credit Points: 18  Contact Hours: 3 per week

PLP562 ECONOMICS OF TOWN PLANNING
Credit Points: 5  Contact Hours: 2 per week

PLP564 INTRODUCTION TO MAPS & AIR PHOTOS
Types of maps, their uses and limitations. Orientation scale, cartographic symbols, representation of relief, etc. grid coordinates. Vertical and oblique air photos; black and white, colour, false colour. Mosaics and stereopairs. Introduction to stereoscopy and simple mapping from air photos. Introduction to various types of remote sensing imagery available to planners.
Credit Points: 3  Contact Hours: 1 per week
PLP565 URBAN LAND DEVELOPMENT
Structural and engineering design requirements in urban development: roads and drainage, sewers, water, gas, electricity and Telecom services. The roles of statutory authorities: gas, electricity, water, telephone, public transport, railways, waterways, road construction authorities. Development teams: the roles of associated disciplines. The role of the private developer.
Credit Points: 3 Contact Hours: 1 per week

PLP566 HOUSING & COMMUNITY SERVICES
Credit Points: 5 Contact Hours: 2 per week

PLS102 INTRODUCTION TO TOWN PLANNING
The concept and administrative procedures of town planning; the objectives of town planning; conflicts in land use; development control; planning criteria; planning schemes; development applications and decision making.
Credit Points: 2 Contact Hours: 2 per week

PNP420 HOME ECONOMICS CURRICULUM & TEACHING STUDIES A
The subject highlights the areas of human development and social relationships; the practical skills dimensions reflected in home economics curricula in schools; the place of home economics within the current P-10 initiatives and senior schooling.
Prerequisite: Appropriate discipline studies in the undergraduate degree.
Co-requisite: EDP450
Credit Points: 24 Contact Hours: 6 per week

PNP421 HOME ECONOMICS CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.
Prerequisite: PNP420
Co-requisite: EDP451
Credit Points: 12 Contact Hours: 3 per week

PUB109 INTRODUCTION TO ENVIRONMENTAL HEALTH
Students are introduced to a brief history of environmental health in Queensland; the current role of environmental health officers within the public health agencies at all levels of government and the principal public health legislation in this state is reviewed. Students develop an understanding of the complexity of environmental systems, the effects of pollutants on such systems and the interdisciplinary approaches needed to address these problems.
Credit Points: 8 Contact Hours: 3 per week

PUB130 AUSTRALIAN HEALTH INDUSTRY
A broad overview of the systems of health care in Australia and their methods of operation. The public and private health and medical care sectors are discussed. The political environment, health care institutions, community health, public health, and the problems of coordination and integration of health services are also studied.
Credit Points: 12 Contact Hours: 3 per week

PUB153 FOOD FOR KIDS
The effects of food on the development of children; food related issues explored from the point of their impact on social, emotional and cognitive as well as physical development and the implications for family and school personnel; the development of feeding autonomy in young children.
Credit Points: 4 Contact Hours: 2 per week

PUB155 CHILD SAFETY
An examination of the high percentage of childhood deaths to accidents; children as the most high-risk age group; the importance of creating an environment which reduces the risk of childhood accidents; environmental situations in which accidents are most likely to occur; prevention: falls, cuts and lacerations, electric shock, burns and scalds, poisoning, plants and animals, drowning and fire arms; application to areas such as the home, pool, road safety and the classroom.
Credit Points: 4 Contact Hours: 2 per week

PUB205 ENVIRONMENTAL HEALTH 5
The causative agents of communicable and noncommunicable diseases and conditions; the principles of and methods in epidemiology. The food hygiene foundation provided in PNB204 is further developed to encompass food poisoning and spoilage. Students gain a knowledge of relative pest control principles and practices, especially in relation to vectors of disease.
Prerequisites: PNB204, MSB402, PNB232
Credit Points: 30 Contact Hours: 16 per week

PUB206 ENVIRONMENTAL HEALTH 6
This subject develops a sound theoretical and practical knowledge of a wide range of environmental health problems which confront the community. The underlying principles of health promotion and their effective practical application are addressed. Food topics are completed by considering aspects of food production and packaging and concepts of nutrition and malnutrition. Students also gain an insight into obligations, responsibilities and ethics of professional practice.
Prerequisites: PUB250
Credit Points: 30 Contact Hours: 16 per week

PUB207 INTRODUCTION TO ENVIRONMENTAL HEALTH
A brief history of environmental health in Queensland; the current role of environmental health officers within the public health agencies at all levels of government and the principal public health legislation in this State; development of an understanding of introductory law and environmental law, the complexity of environmental systems, the effects of pollutants on such systems and the interdisciplinary approaches needed to address these problems; aspects of professional communications and report writing.
Credit Points: 12 Contact Hours: 4 per week

PUB210 OCCUPATIONAL HEALTH & SAFETY 1
This subject introduces students to the basic concepts of occupational health and safety, such that they can identify health and safety problems in the workplace; strategies for dealing with such problems, and the legislation, government agencies and health personnel associated with the working environment. Topics covered include the physical, chemical and biological
working environments, temporal work patterns and the design and use of protective devices.
Credit Points: 8  Contact Hours: 4 per week

**PUB211 OCCUPATIONAL HEALTH & SAFETY 2**
This subject develops further the principles covered in PUB210 and PUB212 and highlights their practical application to the workplace. Students also develop knowledge and skills associated with the actual measurement of the physical and chemical working environment, physiological effects on humans in the workplace and evaluation of the data collected.
Prerequisite: PUB210 or PUB212
Credit Points: 12  Contact Hours: 4 per week

**PUB212 OCCUPATIONAL HEALTH AND SAFETY 1**
The basic concepts and theoretical framework of occupational health and safety as noted in PUB210. The subject also introduces students to the communication skills and devices relevant to the profession. Students participate in single and group activities to develop English expression, public speaking, debating and discussion group skills.
Credit Points: 12  Contact Hours: 4 per week

**PUB220 MEDICAL TERMINOLOGY**
This subject is designed to enable the student to understand, define, spell and pronounce terms related to the diseases and systems of the body, the activities of health professionals and medical technology. A thorough knowledge of medical terminology is necessary for health information managers and health administrators to communicate effectively with other health care professionals and contribute to health care planning, evaluation and research studies.
Credit Points: 12  Contact Hours: 3 per week

**PUB233 INFORMATION, EDUCATION AND COMMUNICATION FOR HEALTH**
A study of the processes of communication in the health fields. It covers person-to-person communication such as patient-professional communication; communication in small groups; public education for health; diffusion and adoption of new health-related behaviours; the role of information; the use of mass media; communication within health organisations.
Credit Points: 12  Contact Hours: 3 per week

**PUB241 HEALTH STUDIES 1**
An overview of the nature of health in Australian society. This subject serves as the foundation study in this minor from which a number of separate, more detailed studies emerge in level 2 and 3 subjects. It is considered that an understanding of broad health issues and problems is essential to equipping health educators for their roles in promoting optimal health of Australians, viz, addressing prevention of major risk factors, and developing a commitment to promoting healthy lifestyles.
Credit Points: 8  Contact Hours: 3 per week

**PUB272 HOME ECONOMICS CONSUMER STUDIES**
The place of the consumer in the Australian economy; the consumer in the market place; alternatives to mass consumption; legal procedures; legal requirements regarding business transactions and business organisations; consumer protection; family and the law.
Credit Points: 12  Contact Hours: 4 per week

**PUB274 HOME ECONOMICS ISSUES**
Introduction to the nature of sociology and psychology; social image; social control; deviance; environmental planning and human behaviour; family patterns; gender roles and relationships; work and unemployment in relation to home economics.
Credit Points: 12  Contact Hours: 4 per week

**PUB276 DESIGN STUDIES**
Art elements and principles; qualities of natural and non-natural materials; design process; design presentation; effects of changing technology on form and construction; ergonomics.
Credit Points: 12  Contact Hours: 4 per week

**PUB299 HEALTH INFORMATION MANAGEMENT 1**
An introduction to the principles of health record management and their application in hospitals. The subject presents an overview of the interrelationships between the various processes of the medical record department and functionally related areas in health care facilities. Topics include: the structure, format and use of medical records, the function of medical record departments, quantitative analysis of medical records, and health information collection and retrieval systems, both manual and computerised.
Credit Points: 12  Contact Hours: 3 per week

**PUB300 POLLUTION SCIENCE 1**
The causes, effects, control measures, standards and legislation relating to air pollution and noise.
Prerequisite: CHB242, PUB250
Credit Points: 8  Contact Hours: 4 per week

**PUB302 PODIATRIC MEDICINE 1**
The health, social and economic implications of podiatric care in the general population with particular reference to specialised groups, eg. children, diabetics, the aged and sports patients. It also provides foundation studies essential to the pre-clinical student in the diagnosis and treatment of conditions commonly manifest in the foot. 
Prerequisite: PNB220  Co-requisite: PUB303
Credit Points: 8  Contact Hours: 4 per week

**PUB303 CLINICAL SCIENCE 1**
On completion of this subject students should be able to demonstrate competent operating skills; expertise in clinical observation of the patient and the elicitation of an accurate medical record; recognise common clinical entities and implement appropriate treatment and develop a professional attitude towards patients, clinical teaching and care of equipment used during clinical practice.
Prerequisite: MEB031  Co-requisite: PUB302
Credit Points: 12  Contact Hours: 6 per week

**PUB304 PHYSICAL MEDICINE**
Introduction to a wide range of diagnostic and physical treatment modalities used in modern podiatric practice. On completion of this subject, students should be able to understand the uses, applications, contra indications and limitations of each modality studied in direct connection with ongoing clinical studies and the theoretical component of podiatric medicine lectures.
Prerequisite: PNB435  Co-requisite: PUB504, PUB410
Credit Points: 8  Contact Hours: 3 per week

**PUB306 PHARMACOLOGY**
This subject is designed to ensure that students understand basic drug therapies their patients may be using, the groups of drugs used for specific diseases and their application and relevance to podiatry and clinical podiatry. Emphasis is placed on drug groups and their
use for specific disease, rather than proprietary brands. Students learn to recognise the drug groups and know the system they are acting on in the body. In addition, differentiation between the different groups within one group of systemic drugs and why they are used for a condition is emphasised.

Prerequisite: PUB310
Co-requisites: PUB311, PUB327
Credit Points: 12
Contact Hours: 3 per week

PUB310 HOME ECONOMICS
CURRICULUM & TEACHING STUDIES 1
Builds on CUB301 to give a greater understanding of the nature of home economics as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.

Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8
Contact Hours: 3 per week

PUB311 HOME ECONOMICS:
CONCEPTUAL FOUNDATIONS
This subject is designed to empower future home economics teachers to make such decisions; as such the subject explores the conceptual basis of home economics. The underlying concepts are explored in depth and linked to practical application.

Credit Points: 8
Contact Hours: 3 per week

PUB313 DESIGN
Design has a relevance to both the teaching and learning process and the discipline of home economics. In the areas of textiles, food and shelter there is a role for the application of design as well as critical evaluation and communication of the products of design. This subject provides students with generic design knowledge as well as experience in the application of this knowledge in the specific areas of home economics.

Credit Points: 8
Contact Hours: 3 per week

PUB315 HOME ECONOMICS - SCIENCE FOUNDATIONS
Major concepts in physical and organic chemistry as they relate to home economics systems; conceptual framework for the chemistry of carbon compounds; application of concepts to an introductory study of more complex macromolecular structures in chemical and biological systems; fundamental concepts in physics: forces, energy, fluids, pressure, heat, temperature, electromagnetic radiation and electricity; as related to the study of home economics.

Credit Points: 8
Contact Hours: 4 per week

PUB317 MANAGEMENT & CONSUMER STUDIES
Management and consumer issues pervade all areas of home economics. Management and consumer concepts pertinent to individual and group living leading to the optimising of well-being.

Credit Points: 8
Contact Hours: 4 per week

PUB319 FOOD & NUTRITION
Issues related to choosing a diet which will promote health; nutritional needs for humans; translating these to food selection and preparation.

Prerequisite: PUB315
Credit Points: 12
Contact Hours: 6 per week

PUB320 HOME ECONOMICS
CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles used to guide school experience during teaching practice and also as a beginning teacher.

Prerequisite: PUB310
Co-requisites: CUB302, EDB302
Credit Points: 12
Contact Hours: 3 per week

PUB321 TEXTILES 1
The scientific understanding and aesthetic aspects of textiles and their selection, use and care, with reference to specific end uses; practical aspects of construction and surface design of textile articles; textile project.

Prerequisite: PUB311
Credit Points: 12
Contact Hours: 3 per week

PUB323 HOME ECONOMICS: SOCIAL FOUNDATIONS
Home economics is concerned with the well-being of individuals and families. In order to achieve this goal, individuals must have an understanding of development from conception to old age, and a critical awareness of the social processes which influence this development. In this subject these issues are examined within the context of home economics.

Prerequisite: PUB311
Credit Points: 8
Contact Hours: 3 per week

PUB325 SHELTER STUDIES
The critical aspects of shelter as a fulfillment of people's basic needs; design, technology and relevant legislation linked to decisions affecting provision of shelter for the differing needs of individuals and families.

Prerequisite: PUB311
Credit Points: 8
Contact Hours: 4 per week

PUB327 HEALTH ISSUES IN AUSTRALIA
Major health concerns of Australians; the multidimensional nature of health; initiatives undertaken to address health problems at individual, community, and national levels; prevention as a pivotal concept in health status.

Credit Points: 12
Contact Hours: 3 per week

PUB328 CONTEMPORARY INFLUENCES ON HEALTH STATUS
The concept of contemporary social, economic and political influences on well-being. It further explores major, contemporary health concerns resulting from these influences.

Credit Points: 12
Contact Hours: 3 per week

PUB329 FOUNDATIONS OF HEALTH STUDIES & HEALTH BEHAVIOUR
Consideration of the foundations of the discipline of health education, its theoretical framework and concepts of models of health, health education and health promotion.

Prerequisites: SSB922, PUB327
Co-requisite: HMB305
Credit Points: 12
Contact Hours: 3 per week

PUB330 HOME ECONOMICS
CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.

Prerequisites: PUB310, PUB320, CUB302
Credit Points: 8
Contact Hours: 3 per week
PUB331 SHELTER DESIGN
The linking of human physical and psycho-social needs, environmental and technological issues and design aspects to the effective provision of shelter, with emphasis being placed on the development of advanced skills and knowledge; environmental and technological aspects which have implications on shelter design for the well-being of the individual and families; effective design to accommodate changing family structures; legislative updates.
Credit Points: 12 Contact Hours: 4 per week

PUB333 SHELTER: CULTURAL & HISTORICAL CONTEXTS
Investigation of shelter decisions based on historical and cultural factors, integrating the effect technological advances have had on this. It considers possible future shelter options given the impact of historical and cultural factors.
Prerequisite: PUB325
Credit Points: 12 Contact Hours: 4 per week

PUB334 FOOD FOR HEALTH
Exploration of concepts which impinge on food-related behaviours and develop concomitant cognitive competencies. Students are encouraged to recognise that their own personal pro-active stance in relation to food-related health issues can contribute to better health for all Australians.
Credit Points: 12 Contact Hours: 3 per week

PUB335 OCCUPATIONAL & ENVIRONMENTAL HEALTH
Study of environmental and occupational health issues in their broadest context and their impact on individual health.
Credit Points: 12 Contact Hours: 3 per week

PUB336 WOMEN'S HEALTH
Exploration of the data and health issues related to women's health and critically evaluates health-related policies, systems and practices in terms of their impact on women's health.
Credit Points: 12 Contact Hours: 3 per week

PUB337 HEALTH NEEDS OF SPECIFIC POPULATIONS
The health needs of a range of specific population groups and considers the broad picture of actual differences in health status among population groups.
Prerequisite: PUB327
Credit Points: 12 Contact Hours: 3 per week

PUB338 SUBSTANCE USE IN CONTEMPORARY SOCIETY
An introduction to analytical models, statistical evidence and health education and health promotion strategies applicable to substance use and abuse, to familiarise students with the contemporary nature and extent of substance use in Australia and examines models and strategies to address these issues.
Credit Points: 12 Contact Hours: 3 per week

PUB340 HEALTH EDUCATION CURRICULUM AND TEACHING STUDIES 1
Builds on Introduction to Curriculum and Teaching Studies to give a greater understanding of the nature of health education as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: Introduction to Curriculum and Teaching Studies and at least 48 credit points in each relevant discipline area.
Credit Points: 8

PUB345 FAMILY RELATIONSHIPS
This subject prepares teachers for the teaching of the Family Studies component of Home Economics. Drawing from the psychological and sociological disciplines, it examines such issues as power, dominance and submission that occur in families and society. Dynamics which operate between individuals is also considered.
Prerequisite: PUB323
Credit Points: 12 Contact Hours: 4 per week

PUB347 FAMILIES IN OTHER CULTURES
Individuals, the structured elements within families and the relationship of families to society; kinship, family structures, mate selection practices, legitimacy and illegitimacy, contemporary issues that relate to family groups.
Credit Points: 12 Contact Hours: 4 per week

PUB349 FAMILIES & HOUSEHOLDS IN AUSTRALIA
Home economics is concerned with the well-being of individuals and families. This subject examines the emphasis of the family in home economics. A number of perspectives are considered including structural functionalist, symbolic interactional, conflict and feminist. The question is asked whether the family provides an appropriate orientation for home economics.
Prerequisite: PUB349
Credit Points: 12 Contact Hours: 4 per week

PUB350 HEALTH EDUCATION CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and policies within the more specific context of this curriculum area. As with CUB302, it establishes principles used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: PUB340
Co-requisites: CUB302, EDB302
Credit Points: 12 Contact Hours: 3 per week

PUB353 CONSUMER FOOD
The role of the food industry in relation to lifestyles in modern societies; the scientific principles and operations involved in the preservation and manufacture of foods; the composition, the ingredients, the labelling and marketing methods of a representative range of commercial foods; current consumer issues such as the safety of food additives, food irradiation, consumer protection, new product development, food regulations and future trends in our food supply.
Prerequisite: Any Level 1 Science subject
Credit Points: 12 Contact Hours: 4 per week

PUB355 FOOD SERVICE: PRINCIPLES & PRACTICES
The use of relevant management principles, safe and hygienic work practices, effective communication skills, sound nutrition and mastery of techniques in food production and presentation.
Prerequisite: PUB3319
Credit Points: 12 Contact Hours: 4 per week
PUB357 NUTRITION ISSUES IN AUSTRALIA
A background study into the nutritional issues which are impacting on the quality of Australian lives. These issues are considered in two broad frameworks: (1) the nutritional needs throughout the lifecycle and the environmental factors which impact on realisation of these needs and (2) the etiology, incidence, outcomes and management of diet-related disorders.
Prerequisite: PUB319   Co-requisite: PUB334
Credit Points: 12   Contact Hours: 4 per week

PUB360 HEALTH EDUCATION CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for application of planning and teaching skills during practice teaching.
Prerequisites: PUB340, PUB350, PUB302
Credit Points: 8   Contact Hours: 3 per week

PUB361 TEXTILES 2
Continuation of PUB321. An understanding of textile consumer issues is developed by a study of relevant commercial enterprises and the implications for the consumer. Creativity is encouraged by students combining skills in pattern development with advanced techniques in constructing textile articles.
Prerequisite: PUB321
Credit Points: 12   Contact Hours: 4 per week

PUB363 CONSUMER TEXTILES
Technological advances in the production of textiles with particular reference to fibres, yarn, fabric, finishing and dyeing; consumer protection legislative and regulatory framework with particular reference to textile products; textile performance requirements of these major consumer textile end-uses; experimental evaluation of textiles for suitability of purpose; development of problem identification and solution skills in consumer textiles through a major project-based assignment.
Prerequisite: PUB361
Credit Points: 12   Contact Hours: 3 per week

PUB365 EVOLUTION OF WESTERN DRESS
Evaluation of western fashionable dress from ancient times to the present; the relationship between costume and the environment; influencing factors; social, aesthetic, political, economic, geographic, spiritual, technological; emphasis on primary sources from the nineteenth and twentieth centuries; teaching strategies and resources.
Credit Points: 12   Contact Hours: 3 per week

PUB367 MENSWEAR 1
This subject offers students an opportunity to develop expertise in the area of men’s fashion design. Students implement the design process through the production of apparel items. Emphasis is placed on production techniques used in a studio environment.
Prerequisite: PUB321 or PUB352
Credit Points: 12   Contact Hours: 4 per week

PUB369 TEXTILES: SUPERVISED PROJECT
Students select and complete an indepth study in one or more methods of creating with textiles. The study includes the development of advanced technical skills and an investigation and evaluation of the corresponding commercial production.
Prerequisite: PUB321 or PUB352
Credit Points: 12   Contact Hours: 3 per week

PUB372 SHELTER
Housing tenure; advantages and disadvantages of ownership/tenancy; housing finance; housing for special groups; special needs in housing; interior environment; housing heritage.
Credit Points: 12   Contact Hours: 4 per week

PUB374 FAMILY STUDIES
Definitions of the family; the family and society; social class and geographical differences in family patterns; influence of changing social conditions; socialisation and child rearing patterns; families in a multicultural society.
Prerequisite: PUB274
Credit Points: 12   Contact Hours: 4 per week

PUB376 PRACTICUM 1
Experience in working in industry, commerce or government; placement at two different organisations each for two weeks.

PUB381 INTRODUCTION TO APPAREL DESIGN & PRODUCTION
This subject offers students an insight into the fashion industry. It also offers an opportunity for students to develop expertise in the area of women’s fashion design. Students implement the design process through the production of apparel items. Emphasis is placed on production techniques used in cottage industry.
Prerequisite: PUB361
Credit Points: 12   Contact Hours: 4 per week

PUB399 HEALTH INFORMATION MANAGEMENT 2
This subject is designed to provide the student with an understanding of specialised medical and health record systems and techniques, particularly data capture techniques and models. The students study clinical classification principles and systems used in the retrieval of health information for research, evaluation, planning and statistical collection in the health services.
Prerequisites: PUB299 and PUB220
Credit Points: 12   Contact Hours: 3 per week

PUB404 CLINICAL SCIENCE 2
At this stage students will be able to follow cases through to observe the short-term effect of therapy and are expected to commence case studies to develop comparative and recording skills. Students should now be adopting the standard medical terminology and abbreviations used in clinical situations.
Prerequisite: PUB303   Co-requisite: PNB506
Credit Points: 12   Contact Hours: 9 per week

PUB405 HUMAN NUTRITION 2
An extension of PUB305. The role of nutrients in the maintenance of life; growth and the normal function of the human body; the social influences on food selection; nutritional impact of technology; nutrition guidelines for groups within the community.
Credit Points: 12   Contact Hours: 5 per week

PUB410 MEDICINE
Following completion of this subject students should be able to recognise and understand the clinical features, pathogenesis and significance of common conditions affecting the lower limbs, eg. oedema; obesity; motor, sensory and trophic disturbances and
their resultant effects in paralysis, ataxia, deformity and ulceration; intermittent claudication, vascular spasm and cramp are taught so as to emphasise their significance. Medical conditions with manifestations in the feet are given particular attention.

**Prerequisites:** MSB430, PNB435

**Co-requisite:** PUB503

**Credit Points:** 8

**Contact Hours:** 3 per week

- **PUB411 ORTHOPAEDICS**

  The emphasis of this subject is on orthopaedic surgery. It seeks to develop a detailed knowledge of general and specific orthopaedic conditions which have an effect on the lower limbs and the surgical treatment of systemic conditions as seen by the podiatrist, i.e. diabetes. In addition the subject provides an understanding of the special problems associated with children and specific lower limb conditions with emphasis on the surgical techniques used in their treatment.

  **Prerequisites:** PUB503, PNB313

  **Co-requisite:** PUB505

  **Credit Points:** 8

  **Contact Hours:** 3 per week

- **PUB412 HEALTH EDUCATION CURRICULUM PLANNING**

  Analysis and application of curriculum design theory and curriculum research to health education in primary and secondary schools. A focus on a curriculum design project is supported with a situational analysis of the project setting and is evaluated in a report on the effectiveness of the process.

  **Credit Points:** 12

  **Contact Hours:** 3 per week

- **PUB414 HOME ECONOMICS APPLIED CURRICULUM**

  Issues and problems relating to home economics education; bases for curriculum decision making; nature and structure of home economics; syllabus implementation; student needs; innovation; and assessment procedures.

  **Prerequisites:** CUB410 or equivalent plus HS2002 or equivalent (Diploma of Teaching).

  **Credit Points:** 12

  **Contact Hours:** 3 per week

- **PUB421 PODIATRIC MEDICINE 2**

  The foundation for study in the role of therapeutics in patient management including short-term and long-term management of conditions. It expands the range of understanding of the wide variety of conditions presenting to the podiatrist. On completion, students should be able to develop an understanding of the biomechanical principles affecting the joints of the foot and the structural and functional consequences presenting in podiatric practice.

  **Prerequisites:** PUB302

  **Co-requisite:** PUB404

  **Credit Points:** 12

  **Contact Hours:** 6 per week

- **PUB422 PODIATRIC ANAESTHESIOLOGY**

  This subject is designed to provide a sound understanding of the science of anaesthetics as applicable to the practice of podiatry. Students are required to understand the pharmacology of local anaesthetics and their clinical usage, and be competent in injection techniques, including local infiltration and local nerve block in the lower limbs.

  **Prerequisites:** PUB421

  **Co-requisite:** PUB421

  **Credit Points:** 8

  **Contact Hours:** 2 per week

- **PUB423 FOOD AND NUTRITION**

  Nutrition is an important factor in the provision of health, and in the prevention and management of many disease states. This subject provides an overview of concepts which are fundamental to an appreciation of the role of nutrition in health care. Topics include: the chemical nature, digestion, absorption and assimilation of nutrients; nutrients provided by the five food groups; food selection to provide a healthy diet; nutrient requirements in particular clinical situations.

  **Prerequisites:** Physiology and Pharmacology

  **Credit Points:** 8

  **Contact Hours:** 3 per week

- **PUB430 APPLIED HEALTH CARE ANALYSIS**

  This subject is an introduction to epidemiology and biostatistics. Descriptive and analytical epidemiological methods used in the study of acute and chronic disease and in health services planning are studied. The statistical techniques appropriate to public health problems are included at an introductory level.

  **Prerequisites:** MNB331

  **Credit Points:** 12

  **Contact Hours:** 3 per week

- **PUB440 CLOTHING DESIGN**

  Clothing design offers an opportunity for teachers to study in this area at a greater depth than that available in the pre-service subjects. It allows for critical evaluation of influences of the fashion industry, pattern making, clothing construction and the teaching strategies and resources available.

  **Credit Points:** 12

  **Contact Hours:** 3 per week

- **PUB441 NUTRITION EDUCATION**

  Biochemical approaches to nutrition; history and evolution of nutrition; critical evaluation of popular nutrition literature; development of a philosophy of nutrition.

  **Credit Points:** 12

  **Contact Hours:** 3 per week

- **PUB472 TEXTILE SCIENCE**

  Overview of textiles and textile evaluation; fibres; yarns; fabric construction; finishing treatments; colour and its application to textiles; textile care; textile end-use; principles and practice of textile performance evaluation.

  **Credit Points:** 12

  **Contact Hours:** 4 per week

- **PUB474 FOOD STUDIES**

  The behaviour of foods; nature, properties and behaviour of major nutrients in food; interaction between major ingredients in certain foods; individual research.

  **Prerequisites:** CH3025

  **Credit Points:** 12

  **Contact Hours:** 6 per week

- **PUB476 NUTRITION**

  Simple tools used in nutrition education: food groups and food composition tables; role of nutrients in the Australian diet; function of water in human systems; energy requirements; individual research.

  **Credit Points:** 12

  **Contact Hours:** 4 per week

- **PUB478 FOOD SCIENCE & TECHNOLOGY**

  The role of the food industry in modern society; issues and problems facing consumers and the food industry; food preservation principles; unit processes in the
food industry; commercially available food; product development; food technology workshop.

Prerequisite: MB3025
Credit Points: 12  Contact Hours: 3 per week

■ PUB481 POLLUTION SCIENCE 2
The causes, effects, control measures, standards and legislation relating to water pollution and solid and hazardous wastes.

Prerequisites: CHB242, PHB250
Credit Points: 12  Contact Hours: 5 per week

■ PUB482 OCCUPATIONAL HEALTH
The basic concepts of toxicology and the body's responses to toxic substances; the basic disease processes in humans and the various agents in the workplace capable of adversely affecting the health of workers.

Prerequisite: PUB211
Co-requisites: PUB232, MSB402
Credit Points: 12  Contact Hours: 6 per week

■ PUB483 HUMAN FACTORS 1
The normal structure and function of relevant systems within the human body and the ways in which the work environment can impinge on normal functions; develops an appreciation of the multiple interfaces between humans, machines and the environment; the principles of manual handling and the effects of such physical factors as lighting, temperature and humidity on human performance.

Prerequisite: MSB035
Credit Points: 8  Contact Hours: 4 per week

■ PUB485 OCCUPATIONAL HYGIENE 1
This subject applies the practical skills students have already obtained from Chemistry 1 and 2 and Physics 1H & 21M to the field of occupational hygiene. It is intended to introduce students to the use and limitations of a range of sampling and analytical equipment in the measurement and assessment of workplace contaminants.

Prerequisite: CHB242
Credit Points: 8  Contact Hours: 4 per week

■ PUB499 HEALTH INFORMATION MANAGEMENT 3
This subject is designed to enable students to recognise and use effectively all types of classification systems utilised for the retrieval of health information. It builds on the student experience from PUB399 by refining and enhancing practical coding skills. It explores the use of coded data in case mix, particularly diagnosis related groups. The examination of specialised types of health records within hospitals, special purpose health record systems outside hospitals and systems for the registration and notification of disease is linked with the specialised classification systems developed to aid the retrieval of information from these various health information systems.

Prerequisite: PUB399
Credit Points: 12  Contact Hours: 3 per week

■ PUB502 DERMATOLOGY
This subject is designed to provide an appreciation of the many varieties of skin lesions and their particular relevance when found in the lower limbs. The lecture program consists of classification of skin disease, vascular reaction group, vascularies, ulcers, peripheral vascular disease, tumours, eczema, dermatitis, allergy, immunity, infections, psoriasis, squamous eruptions, nails and hair, skin manifestations of internal disease, pharmacology and general therapeutics. The clinical sessions utilise this information in allowing students the opportunity to see and diagnose many of these conditions.

Prerequisites: PUB410, PUB421
Co-requisite: PUB503
Credit Points: 8  Contact Hours: 3 per week

■ PUB503 PODIATIC MEDICINE 3
This subject develops the professional understanding of the general and specific effects of medical and surgical conditions on the human foot. It also expands the concept of total case management in terms of the interdisciplinary approach. Including physical, mechanical and surgical techniques. On completion of this subject students should be able to consolidate the podiatrist's role in the health care team across the spectrum of practice.

Prerequisite: PUB421
Co-requisite: PNB504
Credit Points: 8  Contact Hours: 3 per week

■ PUB504 CLINICAL SCIENCE 3
On completion of this subject the student should be able to consolidate skills acquired in operative, mechanical, chemical and physical therapy and to demonstrate expertise in the treatment of the diabetic arthritic foot and related circulatory and neurological disorders. Diagnostic skills are also developed with the wider range of patients being treated and the specialised study of disciplines such as dermatology and radiology further integrating academic and clinical studies.

Prerequisites: PUB404, PUB421
Co-requisite: PUB304
Credit Points: 8  Contact Hours: 6 per week

■ PUB505 PODIATRIC SURGERY
The implementation of podiatric surgical techniques based on a strong theoretical component of knowledge. At the conclusion of this course students to understand the principles and techniques of minimal incision surgery.

Prerequisites: PUB422, PUB440
Co-requisite: PUB603
Credit Points: 8  Contact Hours: 12 per week

■ PUB512 HUMAN FACTORS 2
The application of psychology to the industrial environment; an examination of the key individual, social and organisational factors contributing to health and safety at work; the causes of stress, information processing and learning, performance abilities and work schedules.

Prerequisites: MNB067, PUB483
Credit Points: 12  Contact Hours: 6 per week

■ PUB513 EPIDEMIOLOGY AND DISEASES
This subject is designed to enable students to become familiar with the terminology used in the epidemiology and the study of diseases. The subject includes the conducting of various types of study including the analysis of data in the workplace. The topics cover the causes and preventative factors of the most common non-infectious diseases, their incubation periods, modes of infection and transmission of infectious diseases, and the principles and applications of vaccination.

Credit Points: 12  Contact Hours: 6 per week

■ PUB516 OCCUPATIONAL HEALTH & SAFETY PRACTICE I
Investigation of management principles and practices as they may be applied to resolve occupational health and safety problems; an examination of industrial relations processes and the legal framework within which occupational health and safety is addressed;
field studies are used to provide students with a practical insight into the application of the principles to which they have been introduced.

**Prerequisites:** MEB035, PNB404

**Credit Points:** 12  **Contact Hours:** 6 per week

**PUB518 FOOD HYGIENE STUDIES**
The various types of food poisoning; food poisoning investigation techniques; laboratory procedures and interpretation of results.

**Prerequisites:** PNB207, PNB318, PNB418, MSB402

**Credit Points:** 8  **Contact Hours:** 4 per week

**PUB520 ENVIRONMENTAL HEALTH MANAGEMENT I**
The management of an environmental health unit; the various legal procedures associated with the duties of environmental health officers, and aspects of town planning.

**Prerequisites:** PUB207, PUB481

**Credit Points:** 12  **Contact Hours:** 5 per week

**PUB528 HEALTH ADMINISTRATION PROJECT**
This subject enables students to do follow-up work of a practical nature in an area of interest to them. Before being admitted to this subject, students must have completed all the required coursework in the discipline area of the proposed project. Projects may be undertaken in any of the discipline areas covered by the degree, e.g., health economics, law, health finance, health information management, health management, statistics, epidemiology, either individually or in small groups. Projects must have prior approval and will be closely supervised. Being of a practical nature, projects are undertaken in a health or medical care delivery setting, e.g., hospital medical record department; group practice; local authority health department; State health department.

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB531 HEALTH CARE ECONOMICS I**
Application of economic analysis to the health care industry. It includes an examination of the demand for health care, the supply of health care, and the market for health care.

**Prerequisite:** MNB151

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB533 INTERNATIONAL HEALTH CARE SYSTEMS**
The objective of this subject is to make students aware of how different countries have organised their health delivery systems. The comparisons are historical and economic. An analysis is made of the growth of the welfare state in a number of countries, e.g., United Kingdom, USA, Sweden, Canada, with particular reference to the organisation and delivery of health services. International organisations working in health are studied. Students are introduced to the distribution of diseases in both the West and the Third World; the distribution of health and material resources; international agencies; aid programs and their roles; functions, effectiveness and coordination problems.

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB540 HOME ECONOMICS COUNSELLING**
The counselling process; major approaches to counselling; models of helping and the helping relationship; communication skills; the home economist as counsellor; moral, ethical and legal responsibility of the home economist as a helping professional.

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB542 ADVANCED COUNSELLING SKILLS**
This subject provides the opportunity to integrate and practice understanding of the basic skills of counselling in order to increase students’ understanding of the counselling process. The subject provides opportunity for students to observe and practice these basic skills. The focus of the unit is specifically on the use of these skills and theoretical concepts are examined within the context of the counselling process.

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB546 SOCIETY OF PUBLIC HEALTH**
The sociological principles and methods to deal with issues arising from the health and well-being of the community. It examines the ways in which the organisation of health care reflects particular assumptions concerning the nature of health and health work and reinforces these understandings. It explores the extent to which sociological understandings can be of value to health workers and planners.

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB552 SOCIAL NUTRITION**
Evaluation of nutritional information; psychology of food; methods of assessing nutritional status; nutritional disorders; community, remedial and nutrition education programs.

**Prerequisite:** PUB476

**Credit Points:** 12  **Contact Hours:** 4 per week

**PUB554 FOOD MANAGEMENT FOR FAMILIES**
Food habits and attitudes; social and cultural influences; role of the family in developing food habits; nutritional requirements of different age groups; principles of meal management and meal planning; adaptation of meals to special groups.

**Prerequisites:** PUB474, PUB476

**Credit Points:** 12  **Contact Hours:** 5 per week

**PUB556 FOOD PRODUCTION & PRESENTATION**
Advanced techniques and complex skills of food production and presentation; commercial production and presentation of food; production and presentation of food for photography or display purposes; food demonstrations; special occasion cookery.

**Prerequisite:** PUB474

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB560 TEXTILE MARKETING**
Theories of clothing consumption; factors affecting individual and family clothing expenditure; standard sizing; pattern styling techniques; preparation of a brief.

**Prerequisite:** PUB572

**Credit Points:** 12  **Contact Hours:** 3 per week

**PUB572 APPAREL DESIGN**
Factors influencing garment and household goods designs; design development; yarn structure; techniques of fabric construction and decoration; the textile industry.

**Credit Points:** 12  **Contact Hours:** 5 per week
PUB574 FAMILY RESOURCE MANAGEMENT
The family as a social system; resources and constraints related to the life cycle; management in the family context; the family in Australia; managing finance.
Prerequisite: MG3025
Credit Points: 12  Contact Hours: 3 per week

PUB576 PRACTICUM 2
Experience in working in industry, commerce or government; placement in one organisation for six weeks.
Prerequisite: PUB976

PUB580 HEALTH ADMINISTRATION FINANCE
Fund/accrual accounting; financial administration in Commonwealth and State Government; financial management in the health industry; financial analysis; planning and budgeting, working capital management in the health industry; health care performance and evaluation.
Prerequisite: ACB383 or ACB110
Credit Points: 12  Contact Hours: 3 per week

PUB582 ADVANCED APPAREL DESIGN
The design and production of a range of apparel suitable for a specific client group for example: corporate wear; department store; large mass market. The process involves detailed research of client needs, textile specification and evaluation and costing. The subject develops to an advanced level knowledge, understanding and processes established in PUB572.
Prerequisite: PUB572
Credit Points: 12  Contact Hours: 5 per week

PUB585 OCCUPATIONAL HYGIENE 2
Continuation of PUB985; concentrates on the application of the principles to which the student has already been introduced. The subject extends the student’s ability to recognise, evaluate and suggest the most efficient control strategies for physical and chemical hazards in the working environment. It includes an analysis of the principles and design of ventilation systems. The subject examines the elements of successful monitoring programs in the workplace.
Prerequisites: PUB482, MSB402, PUB485
Credit Points: 12  Contact Hours: 6 per week

PUB590 PRODUCT DEVELOPMENT
The consumer market; product development; critical path analysis and network planning; idea generation and product evaluation; feasibility study and product cost analysis; quality assurance; the production and marketing of products; career prospects.
Credit Points: 12  Contact Hours: 6 per week

PUB592 INDEPENDENT HOME ECONOMICS STUDY 1
Self-initiated and self-directed academic study in an area of interest consistent with the overall aims of the course.
Credit Points: 12  Contact Hours: 1 per week

PUB594 INDEPENDENT HOME ECONOMICS STUDY 2
Self-initiated and self-directed academic study in an area of interest consistent with the overall aims of the course.
Credit Points: 12  Contact Hours: 1 per week

PUB600 HEALTH MANAGEMENT 1
A problem-solving approach which relates the science of management to decision making and control in health services administration. Management science (operations research) techniques are learnt and applied in case studies from the health industry.
Prerequisite: 16 subjects in BBus (Health Administration).
Credit Points: 12  Contact Hours: 3 per week

PUB602 SPORTS MEDICINE
The importance of a multidisciplinary approach to the diagnosis, evaluation and treatment of sports injuries. Students study the symptomology of lower limb functional pathologies as related to specific sports and devise treatment programs. An understanding of the principles of human fitness and potential in relation to athletic injuries and expectations forms the foundation for further studies.
Prerequisites: PUB503, PUB410
Co-requisite: PUB411
Credit Points: 8  Contact Hours: 3 per week

PUB603 CLINICAL SCIENCE 4
This subject is designed to prepare the student for the transition to private practice. During this semester students are introduced to the sports medicine patient in terms of the range of injuries which occur affecting the lower back, hip, knee, ankle and foot. Case presentations are an integral part of clinical learning and sessions conclude with exchange between students and staff over case management.
Credit Points: 8  Contact Hours: 9 per week

PUB605 HEALTH MANAGEMENT 2
This subject involves a problem-solving approach to decision making and strategic management in health services administration. Case studies and projects are used to allow students to apply theory to practical situations. Specific management techniques and current health management issues are explored.
Prerequisite: PUB600
Credit Points: 12  Contact Hours: 3 per week

PUB610 PROJECT & PROFESSIONAL MANAGEMENT
The two component parts of this subject explain firstly how a professional practice may be set up and how a small practice can operate as a business enterprise. Methods of budgeting, finance and control are explained. Secondly it aims to develop an interest in pediary research using scientific methods of investigation and presentation. Students are encouraged to publish these projects as original material in related professional journals.
Credit Points: 8  Contact Hours: 3 per week

PUB611 HAZARD ASSESSMENT AND MANAGEMENT
The history of accident causation theory. It provides students with a knowledge of the analytical techniques for accident prevention and develops their skills for recording, analysing and reporting accident information. The subject is also intended to enhance the students’ understanding of the principles of hazardous chemicals management.
Prerequisite: PHB404
Credit Points: 12  Contact Hours: 6 per week

<th>Course Description</th>
<th>Prerequisites/Co-requisites</th>
<th>Credit Points</th>
<th>Contact Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUB612</td>
<td>HEALTH PROMOTION &amp; EDUCATION</td>
<td>The scope and nature of health promotion; use of resources for such activities; planning, conduct and evaluation of health promotion programs.</td>
<td>Prerequisite: MNB067</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>PUB613</td>
<td>OCCUPATIONAL HEALTH &amp; SAFETY PRACTICE 2</td>
<td>Enables students to apply theoretical knowledge; uses field studies and exercises to further extend students’ competence in the practical application of the various principles of occupational health and safety in the workplace. It also examines the current issues in the field of occupational health and safety and aims to equip students to play a role in debates on these issues.</td>
<td>Prerequisite: PUB516</td>
<td>8</td>
<td>3 per week</td>
</tr>
<tr>
<td>PUB614</td>
<td>INDUSTRY SPECIALISATION</td>
<td>The hazards associated with particular industries including construction, manufacturing, chemical and mining through field trips and specialist lectures; the various laws and standards that apply to these industries and an investigation of the control strategies applicable to the management of hazards in industry.</td>
<td>Prerequisites: PNB482, MEB035, PUB404</td>
<td>8</td>
<td>6 per week</td>
</tr>
<tr>
<td>PUB617</td>
<td>OCCUPATIONAL HEALTH &amp; SAFETY PROJECT</td>
<td>Continuation of the project commenced in the subject Project 1. It includes the analysis of the material relevant to the problem selected by the student and the presentation of verbal and written reports outlining the findings of the investigation.</td>
<td></td>
<td>12</td>
<td>6 per week</td>
</tr>
<tr>
<td>PUB618</td>
<td>HEALTH COMPUTER SYSTEMS</td>
<td>Principles and applications of electronic data processing in health care settings. Computerised health information systems are analysed from a variety of viewpoints including the objectives of the system, specific methods employed to meet user needs, structure in an overall information system, the technology which makes it operative, the data base, and the various ways information is transferred and used in health facilities.</td>
<td>Prerequisite: ISB392</td>
<td>12</td>
<td>4 per week</td>
</tr>
<tr>
<td>PUB619</td>
<td>HEALTH INFORMATION MANAGEMENT 4</td>
<td>The role and functions of the medical record administrator in the management of health care services. Topics include: the legal and ethical implications of health information management; extended care facilities and their special needs; occupational health and health records for industry; health records for community/primary care units; the potential of modern technology in the effective running of health information services. The clinical classification component concentrates on nosologic problem solving, collection strategies for disease and operation indices and the practical application of classifications in health care settings.</td>
<td>Prerequisite: MNB519</td>
<td>12</td>
<td>3 per week</td>
</tr>
<tr>
<td>PUB620</td>
<td>ENVIRONMENTAL HEALTH MANAGEMENT 2</td>
<td>Integration of the student’s theoretical understanding of physical and biological sciences and application of such understanding to the management of a range of environmental health problems encountered in the professional practice of an environmental health officer.</td>
<td>Co-requisite: PUB520, PUB481</td>
<td>12</td>
<td>3 per week</td>
</tr>
<tr>
<td>PUB621</td>
<td>ENVIRONMENTAL HEALTH PRACTICE</td>
<td>Visits to all types of establishments in environmental health management, pollution sciences and food studies subjects for the purpose of practical demonstration, evaluation and professional experience.</td>
<td>Prerequisites: PUB481, PUB520</td>
<td>12</td>
<td>6 per week</td>
</tr>
<tr>
<td>PUB622</td>
<td>ENVIRONMENTAL HEALTH PROJECT</td>
<td>Through independent work under the guidance of supervisors, students learn to appreciate the connection between their theoretical studies and practical aspects of environmental health. Practice is gained in research techniques, logical reasoning and presentation of research findings.</td>
<td>Prerequisite: PUB520</td>
<td>8</td>
<td>4 per week</td>
</tr>
<tr>
<td>PUB631</td>
<td>NUTRITIONAL BIOCHEMISTRY</td>
<td>The digestion, absorption and metabolic assimilation of nutrients; hormonal control of metabolism; the role of drugs; genetic and environmental influences; significant parameters measured in clinical laboratories examined in a variety of health and disease states; diet and exercise for health; starvation; obesity; diabetes mellitus; cardiovascular disease; renal disease; liver disease; alcohol consumption; physiological and traumatic stress.</td>
<td>Prerequisite: PNB305</td>
<td>12</td>
<td>5 per week</td>
</tr>
<tr>
<td>PUB634</td>
<td>HEALTH SERVICES EVALUATION</td>
<td>This subject is a study of process evaluation, program evaluation and evaluation research with applications to the health field. It is designed for health professionals in both the administration and practice areas. Theory, practice, the utilisation of evaluation results and the administration of evaluation studies are emphasised in this course. Specific topics such as quality assurance, utilisation, review and accreditation are addressed.</td>
<td>Prerequisite: PUB643</td>
<td>12</td>
<td>3 per week</td>
</tr>
<tr>
<td>PUB643</td>
<td>HEALTH SERVICES PLANNING</td>
<td>This subject deals with the administrator's role in the planning and development of health care facilities and health services. It includes an examination of the reasons for planning, the concepts and principles of planning and the types and categories of planning applied to the health industry.</td>
<td>Prerequisites: PUB130, PUB430</td>
<td>12</td>
<td>3 per week</td>
</tr>
<tr>
<td>PUB647</td>
<td>RESEARCH METHODS</td>
<td>Introduction to research; research in home economics; theoretical elements of research; research types or settings; sampling and measurement; methods of data collection; analysis and interpretation of data; planning and design of a major research project.</td>
<td></td>
<td>12</td>
<td>3 per week</td>
</tr>
</tbody>
</table>
PUB674 BUSINESS ORGANISATIONS
The structure of business organisations; types of organisations; business objectives, strategies and policies; functions within business organisations; the role of unions and the nature of industrial relations in Australia; women's issues.
Credit Points: 12 Contact Hours: 3 per week

PUN101 ENVIRONMENTAL HEALTH
Currently, there is heightened awareness about the nature of industrialised human activity and its impact upon natural resources and human health. Nurses have traditionally been concerned with the provision of an environment which is conducive to the promotion, maintenance and/or restoration of health. Thus, an understanding of contemporary environmental health issues is vital to the provision of effective health care which meets the needs of today's society. Content is selected from an introduction of ecosystems or environmental factors and human health.
Credit Points: 12 Contact Hours: 3 per week

PUN102 NUTRITION & LIFESTYLE
A wide variety of illness has its basis in inappropriate nutrition. In this subject, particular emphasis is placed on current trends in nutrition epidemiology in order to assist practising nurses in their health education efforts with clients.
Credit Points: 6 Contact Hours: 1.5 per week

PUN601 CONTEMPORARY HEALTH CARE ISSUES
An examination of the social, political, geographical and economic factors which have shaped the organisation of health care services at local, state, national and/or international levels; funding and resource management; the level and nature of responsibility for health care and health care maintenance; planning for structural change.
Credit Points: 12 Contact Hours: 3 per week

PUN602 HEALTH PLANNING, MANAGEMENT & EVALUATION
Application of the theory and principles of planning, management and evaluation to health services; a detailed analysis of health services planning techniques; information requirements and decision making for the strategic management of health services; the principles of financial and personnel management required for the effective development and utilisation of health care; process and program evaluation in health services; the appreciation of evaluation research and cost-effectiveness.
Credit Points: 12 Contact Hours: 3 per week

PUN608 ECONOMICS & HEALTH
The role of economics in planning and decision making in health care; application of economic analysis to the health care industry; issues related to the demand for health care; the supply of health care and the market for health care.
Credit Points: 12 Contact Hours: 3 per week

PUN609 HEALTH CARE FINANCE
The financial management aspects of health care delivery in Australia; sources of finance at federal, state and local government levels; priority setting; budgetary processes; responsibilities for provision of various services.
Credit Points: 12 Contact Hours: 3 per week

PUN610 HEALTH SERVICES MANAGEMENT
Evolution and changing status of management in health services; interactions between general managers, doctors and others; power/authority concepts; leadership and leadership styles; principles of motivating people and managing conflict; effective decision making by individuals and groups; theories and methods of effective communication, both verbal and written; performance assessment and outcome measures in health management.
Credit Points: 12 Contact Hours: 3 per week

PUN611 ADVANCED HEALTH PLANNING
The planning of action programs of prevention, care and cure; students taking this subject will have studied the determination of health needs using epidemiological methods. This subject has a bias towards ensuring participation in the planning process by all interests affected by the program.
Credit Points: 12 Contact Hours: 3 per week

PUN612 ADVANCED HEALTH EVALUATION
A study of evaluation research with applications to the health fields; theory and practice; the utilisation of evaluation results and the administration of evaluation studies.
Credit Points: 12 Contact Hours: 3 per week

PUP007 EPIDEMIOLOGY & ENVIRONMENTAL HEALTH
The interrelationships between disease patterns and the environment; geography, climate, transmission and the susceptible population; distribution of disease in Queensland; factors affecting such distribution.
Prerequisite: PUP010
Credit Points: 12 Contact Hours: 3 per week

PUP010 HEALTH & LIFESTYLE IN AUSTRALIA
Explanation of a broad range of factors which together define the parameters of the health educator's role in the maintenance of healthy lifestyles in a rapidly changing world; discussion and analysis of health public policy.
Credit Points: 12 Contact Hours: 3 per week

PUP011 COMMUNICATION THEORY & SKILLS
Analysis and practical experience in the development of communication skills and techniques applicable to individual, small group, community and societal levels in health education.
Prerequisite: PUP010
Credit Points: 12 Contact Hours: 3 per week

PUP012 RESEARCH & EVALUATION
Introduction to the role of research and evaluation in health education; health promotion; evaluation of health education programs; development of research skills to interpret and analyse current literature in the field; basic statistical methods.
Prerequisite: PUP010
Credit Points: 12 Contact Hours: 3 per week

PUP013 HEALTH EDUCATION & THE CHANGE PROCESS
Analysis of the process of change as it relates to individual, group and organisational contexts; the role of the health educator as a change agent; the nature of change; how change can be achieved and factors that undermine or negate change.
Prerequisite: PUP010
Credit Points: 12 Contact Hours: 3 per week
PUP016 COMMUNITY HEALTH EDUCATION
Introduction to the field of health education with a specific focus on the nature of community health education; environmental, social, political and educational elements supporting and encouraging behaviours conducive to health.
Credit Points: 12  Contact Hours: 3 per week

PUP017 COMMUNITY HEALTH PROGRAM PLANNING
Planning and implementing intervention strategies in community health; culminating subject requiring application of knowledge and skills developed over preceding terms of course. Analysis of a range of planning models in health education and health promotion.
Prerequisite: PUP016
Credit Points: 12  Contact Hours: 3 per week

PUP019 ISSUES IN HEALTH ADVANCEMENT
Consideration of healthy public policy in practice; the changing nature of the health system; contemporary issues in health advancement.
Credit Points: 12  Contact Hours: 3 per week

PUP020 HEALTH PROMOTION STRATEGIES FOR DIETITIANS
Credit Points: 12  Contact Hours: 3 per week

PUP027 INDEPENDENT STUDY
Work in an area of particular interest relating to school or community health education or promotion.
Credit Points: 12

PUP090 NUTRITION
A comprehensive study of the basic nutritional sciences building on students’ backgrounds in physiology and biochemistry. Topics include: the composition of food; structure and function of nutrients; food composition databases; food commodities; factors affecting food choice; factors affecting access to food; barriers within Australia; public health nutrition; food grouping systems; dietary guidelines and the food needs of various groups in the community.
Credit Points: 12  Contact Hours: 5 per week

PUP100 NUTRITIONAL EPIDEMIOLOGY
Statistics; validity; reliability; assessing nutritional studies; data management; interpretation of results. During the semester students have the opportunity to gather data, statistically analyse and assess the data, draw conclusions and construct a written report of the results. Students also learn to use computers to carry out basic statistical and dietary analyses.
Credit Points: 12  Contact Hours: 5 per week

PUP110 OCCUPATIONAL HEALTH & SAFETY ADMINISTRATION 1
This fundamental subject introduces students to basic concepts in occupational health and safety. They develop both an understanding of and skills in notably basic management principles as they apply to this discipline but also in the development and delivery of health and safety training programs. A sound foundation in the principles and practice of health promotion is also developed.
Credit Points: 12  Contact Hours: 3 per week

PUP122 PRACTICE IN CLINICAL DIETETICS
Practical experience and seminar presentations relevant to PNP120. The course is conducted in institutions off-campus (40 hours per week for 11 weeks).
Prerequisites: Completion of all Semester 1 and Semester 2 subjects.
Credit Points: 24  Contact Hours: 11 weeks

PUP123 PRACTICE IN COMMUNITY NUTRITIONS
This subject enables students to gain experience of the nutrition and health care of individuals and groups in the community through off-campus practice (40 hours per week for 3 weeks).
Prerequisites: Completion of all Semester 1 and Semester 2 subjects.
Credit Points: 12  Contact Hours: 4 weeks

PUP126 CLINICAL DIETETICS 1
The dietetic process; the gathering of information using dietary histories; anthropometry; biochemical indices. It builds on basic studies in nutrition; biochemistry and physiology; integrates medical, biochemical and dietary aspects of inborn errors of metabolism, energy imbalances, cardiovascular disorders and metabolic disorders. As part of the subject students are required to attend various hospitals and other locations to interact with clients and others.
Credit Points: 12  Contact Hours: 5 per week

PUP128 PRACTICAL DIETITICS
Provides an opportunity to experiment with food commodities and to practise service planning, and food presentation. Examines the ingredient content of commercial foodstuffs. Examines the role of individual ingredients of foodstuffs in the determination of food structure and organoleptic properties.
Prerequisite: PNP111
Co-requisites: PNP120, PNP108
Credit Points: 12  Contact Hours: 3 per week

PUP129 FOOD SERVICE AND DIETETIC MANAGEMENT
An introduction to the principles of management including general management theory; organising functions; leadership; staffing; management of change; marketing the profession. This is applied to food service management in terms of planning and organising food service; menu planning; kitchen design; food delivery systems; computer assistance and quality assurance. As part of this subject field trips to visit various food services are undertaken.
Credit Points: 12  Contact Hours: 5 per week

PUP132 PRACTICE IN FOOD SERVICE MANAGEMENT
Practical experience and seminar presentations relevant to PNP137. The subject will be conducted in institutions off-campus (40 hours per week for 4 weeks).
Prerequisites: Completion of all Semester 1 and Semester 2 subjects.
Credit Points: 12  Contact Hours: 3 weeks
PUP215 OCCUPATIONAL HEALTH & SAFETY ADMINISTRATION

In this subject, students develop an understanding of both the legal framework within which the discipline operates and industrial relations concepts and practices so far as they impinge upon occupational health and safety. Basic statistical techniques are reviewed as an introduction to the study of concepts of epidemiology applicable to an occupational setting.
Credit Points: 12  Contact Hours: 3 per week

PUP250 OCCUPATIONAL HYGIENE

A course of lectures, practical work and industrial visits to instruct students so that they may recognise, evaluate and control the physical, biological and chemical environmental factors which can adversely affect the health, safety, comfort and efficiency of workers.
Credit Points: 12  Contact Hours: 3 per week

SBB229 SOCIAL EDUCATION

Exploration of the philosophies of social education and their relationship to the development of a personal philosophy. Past, present and contemporary syllabuses. The links between social sciences and social education. The central role of reading, research and problem solving in social education. Design and implementation of evaluative devices and techniques. Unit planning and implementation.
Credit Points: 8  Contact Hours: 3 per week

SBB230 ENVIRONMENTAL EDUCATION

This subject is designed to assist the beginning teacher to implement the Queensland Department of Education's environmental policy in primary schools. The major goal is to develop expertise in the design and delivery of class programs and activities for children.
Prerequisites: SBB229, MDB228
Credit Points: 8  Contact Hours: 3 per week

SBB260 SOCIAL SCIENCES 1

Development of understandings and skills directly relevant to the needs of the P-10 social studies teachers in Queensland through the use of an integrative multi-disciplinary approach to social science education and by concentrating on developing similar key concepts and learnings which have been established as areas of national priority in schooling. This particular subject brings into focus for the primary teacher, the key concepts and issues in developing Australia as a nation and its role within the Asia-Pacific region.
Credit Points: 8  Contact Hours: 3 per week

SBB261 SOCIAL SCIENCES 2

Continuation of SBB260. Contemporary problems in the Australian, Asian and Pacific region; pedagogical issues of studying Australia and other countries in their political, cultural, geographical, and economic relationships. Students undertake an independent study of an area applied to an identified curriculum need within the P-10 social education framework.
Prerequisite: SBB260
Credit Points: 12  Contact Hours: 3 per week

SBB262 SOCIAL SCIENCES 3

Continuation of SBB261. An introduction to the study of futures is attempted through an analysis of principal methods and contemporary eminent contributors. Methods and models are applied to the development of futures scenarios and contemporary issues relevant to the region, eg. population and migration, political institutions and systems, resource allocation and utilisation, sustainable development, environmental issues and structural change. Using their understandings from the above, together with suggestions from the Commission on the Future (Australia), teaching methods and techniques are developed for the P-10 curriculum.
Prerequisite: SBB261
Credit Points: 12  Contact Hours: 3 per week

SBB320 ENVIRONMENTAL EDUCATION

This subject is valuable to all educators concerned with communicating environmental knowledge, concepts, skills, attitudes and values in formal and informal learning situations. Students are encouraged to pursue the objectives of environmental education within their own subject specialisations.
Credit Points: 12  Contact Hours: 3 per week

SBB350 ACCOUNTING/BUSINESS MANAGEMENT CURRICULUM & TEACHING STUDIES 1

Builds on CUB202 to give a greater understanding of the nature of accounting/business management as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB201 and at least 48 credit points in each relevant discipline area.
Credit Points: 8  Contact Hours: 3 per week

SBB351 ACCOUNTING/BUSINESS MANAGEMENT CURRICULUM & TEACHING STUDIES 2

Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: SBB350
Co-requisites: CUB302, EDB302
Credit Points: 12  Contact Hours: 3 per week

SBB352 ACCOUNTING/BUSINESS MANAGEMENT CURRICULUM & TEACHING STUDIES 3

Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
Prerequisites: SBB250, SBB351, CUB302
Credit Points: 8  Contact Hours: 3 per week

SBB353 COMMUNICATION TECHNOLOGY CURRICULUM & TEACHING STUDIES 1

Builds on CUB301 to give a greater understanding of the nature of communication technology as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8  Contact Hours: 3 per week
- **SBB354 COMMUNICATION TECHNOLOGY CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
  **Prerequisites:** SBB353
  **Co-requisites:** CUB302, EDB302
  **Credit Points:** 12 **Contact Hours:** 3 per week

- **SBB355 COMMUNICATION TECHNOLOGY CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
  **Prerequisites:** MDB356, MDB357, CUB302
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB356 ECONOMICS CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of economics as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
  **Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB357 ECONOMICS CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
  **Prerequisite:** SBB356
  **Co-requisites:** CUB302, EDB302
  **Credit Points:** 12 **Contact Hours:** 3 per week

- **SBB358 ECONOMICS CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
  **Prerequisites:** SBB356, SBB357, CUB302
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB359 GEOGRAPHY CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of geography as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
  **Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB360 GEOGRAPHY CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
  **Prerequisites:** SBB359
  **Co-requisites:** CUB302, EDB302
  **Credit Points:** 12 **Contact Hours:** 3 per week

- **SBB361 GEOGRAPHY CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
  **Prerequisites:** SBB359, SBB360, CUB302
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB362 HISTORY CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of history as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
  **Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB363 HISTORY CURRICULUM & TEACHING STUDIES 2**
  Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
  **Prerequisite:** SBB362
  **Co-requisites:** CUB302, EDB302
  **Credit Points:** 12 **Contact Hours:** 3 per week

- **SBB364 HISTORY CURRICULUM & TEACHING STUDIES 3**
  Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
  **Prerequisites:** PUB340, PUB350, CUB302
  **Credit Points:** 8 **Contact Hours:** 3 per week

- **SBB365 LEGAL STUDIES CURRICULUM & TEACHING STUDIES 1**
  Builds on CUB301 to give a greater understanding of the nature of legal studies as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
  **Prerequisites:** CUB301 and at least 48 credit points in each relevant discipline area.
  **Credit Points:** 8 **Contact Hours:** 3 per week
■ SBB366 LEGAL STUDIES CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: SBB365
Co-requisites: CUB302, EDB302
Credit Points: 12  Contact Hours: 3 per week

■ SBB367 LEGAL STUDIES CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
Prerequisites: SBB365, SBB366, CUB302
Credit Points: 8  Contact Hours: 3 per week

■ SBB368 SOCIAL SCIENCE CURRICULUM & TEACHING STUDIES 1
Builds on CUB301 to give a greater understanding of the nature of social science as an applied curriculum area. Provides insights into relevant Queensland syllabus and curriculum documents, develops competencies in planning and teaching and makes close links with teaching practice.
Prerequisites: CUB301 and at least 48 credit points in each relevant discipline area.
Credit Points: 8  Contact Hours: 3 per week

■ SBB369 SOCIAL SCIENCE CURRICULUM & TEACHING STUDIES 2
Studied in association with CUB302. Provides opportunities for consideration and practical application of broad curricular and teaching principles and systems policies within the more specific context of this curriculum area. As with CUB302, establishes principles which are used to guide school experience during teaching practice and also as a beginning teacher.
Prerequisite: SBB368
Co-requisites: CUB302, EDB302
Credit Points: 12  Contact Hours: 3 per week

■ SBB370 SOCIAL SCIENCE CURRICULUM & TEACHING STUDIES 3
Last in the Curriculum and Teaching Studies series with a major focus on contemporary issues and emerging trends pertaining to curriculum development in this curriculum area. Includes the study of advanced planning and teaching strategies and provides opportunities for the application of planning and teaching skills during practice teaching.
Prerequisites: SBB368, SBB369, CUB302
Credit Points: 8  Contact Hours: 3 per week

■ SBB410 CONSUMER EDUCATION
Preparation of teachers to teach consumer education at various school levels either as a subject in its own right or as aspects of consumer education within other disciplines. Topics include: consumer education in the school curriculum; content in consumer education; teaching consumer education; curriculum development and innovation.
Credit Points: 12  Contact Hours: 3 per week

■ SBB411 SOCIAL EDUCATION CURRICULUM DEVELOPMENT
This subject is designed for teachers who wish to specialise in curriculum planning in primary social studies, secondary economics, history, geography or social science, or TAFE liberal studies. Students explore recent curriculum movements in social education and relevant curriculum development projects. The subject provides advanced skills for planning a teaching subject and a work program.
Credit Points: 12  Contact Hours: 3 per week

■ SBB412 SOCIAL EDUCATION IN THE CURRICULUM
This subject provides opportunities for teachers of social education at all levels to investigate key issues and debates about social education and to refine their own purpose as social educators. The subject focuses on global challenges to social educators, the debate over the purposes and structure of social education, the place of critical thinking in the curriculum and the implications of the current P-10 initiative in Queensland.
Credit Points: 12  Contact Hours: 3 per week

■ SBB413 LEGAL STUDIES APPLIED CURRICULUM
This subject is for secondary teachers of legal studies (or intending teachers) who have no formal curriculum training in legal studies. The nature of legal studies within the school curriculum; current teaching strategies; the socio-critical approach; program planning and applications; curriculum innovation and development.
Credit Points: 12  Contact Hours: 3 per week

■ SBB440 ENVIRONMENTAL EDUCATION
This subject is valuable to all educators concerned with communicating environmental knowledge, concepts, skills, attitudes and values in formal and informal learning situations. Students are encouraged to pursue the objectives of environmental education within their own subject specialisations.
Credit Points: 12  Contact Hours: 3 per week

■ SBB441 ADVANCED SECRETARIAL STUDIES
This subject extends the professional education of teachers of secretarial studies. It focuses on the concepts and applications of office automation, the issues and implications of the implementation of technology in business organisations, and the importance of supervision and administrative practices to business organisations.
Prerequisite: Major in Commercial Studies or equivalent at Diploma of Teaching level.
Credit Points: 12  Contact Hours: 3 per week

■ SBN601 SOCIAL & ENVIRONMENTAL EDUCATION 1
An examination of the origins, development, and current scope and status of social and environmental education both as separate entities and as a unified emphasis on current social, environmental, political and economic imperatives. The importance of studies within the subject disciplines of geography, history and economics are also examined.
Credit Points: 12  Contact Hours: 3 per week

■ SBN602 SOCIAL & ENVIRONMENTAL EDUCATION 2
Exploration of the relative strengths and weaknesses of discipline-based and interdisciplinary approaches to social and environmental education through...
detailed studies of the actual and potential contributions to social and environmental education of one of geography, history and economics, and identifying specific areas of interest within social and environmental education to explore in more detail in a dissertation.

Credit Points: 12  Contact Hours: 3 per week

SBP420 BUSINESS EDUCATION CURRICULUM & TEACHING STUDIES A
A foundation study for students wishing to teach any of the business education subjects: accounting/business management, economics, legal studies and office administration. An examination of basic teaching skills, the interactive classroom, student learning, learning environments and curriculum implications for, and applications to business education.

Prerequisite: Appropriate discipline studies in the undergraduate degree.

Co-requisite: EDP450
Credit Points: 24  Contact Hours: 6 per week

SBP421 ACCOUNTING & BUSINESS MANAGEMENT CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.

Prerequisite: SBP420
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

SBP422 ECONOMICS CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.

Prerequisite: SBP420
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

SBP423 LEGAL STUDIES CURRICULUM & TEACHING STUDIES B
This Curriculum B subject provides opportunities for students to critically examine and develop skills and understanding in significant areas of teaching and learning in legal studies. It provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.

Prerequisite: SBP420
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

SBP424 OFFICE AUTOMATION CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.

Prerequisite: SBP420
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

SBP430 SOCIAL SCIENCE CURRICULUM & TEACHING STUDIES A
Introduction to the general field of social science education; the various ways in which the social sciences are reflected in curricula, ranging from discipline-based studies to fully integrated approaches; the complexity of factors influencing curriculum development in the social sciences. Where appropriate, these studies are based on observations and experiences within school settings. These settings also provide the context for the development of teaching approaches appropriate to the social sciences. Students become familiar with processes of curriculum development, and gain experience of those processes, particularly as they apply to the current P-10 social education initiative in Queensland.

Prerequisite: Appropriate discipline studies in the undergraduate degree.

Co-requisite: EDP450
Credit Points: 24  Contact Hours: 6 per week

SBP431 GEOGRAPHY CURRICULUM & TEACHING STUDIES B
Provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.

Prerequisite: SBP430
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

SBP432 HISTORY CURRICULUM & TEACHING STUDIES B
This Curriculum B subject provides opportunities for students to critically examine and develop skills and understanding in significant areas of teaching and learning in history. It provides a theoretical context and considers practical applications in assessment, curriculum planning and teaching and learning strategies and examines the roles of the teacher in the community and the profession.

Prerequisite: SBP430
Co-requisite: EDP451
Credit Points: 12  Contact Hours: 3 per week

SBP433 JUNIOR SOCIAL SCIENCE CURRICULUM & TEACHING STUDIES C
This Curriculum C subject offers studies which enable appropriately qualified students to teach junior social science at lower levels of the secondary school. It allows the application of principles, skills and understandings which have been developed in the Curriculum A subject and are being expanded in the Curriculum B subject.

Credit Points: 12  Contact Hours: 3 per week

SBP500 CURRICULUM ISSUES IN ENVIRONMENTAL EDUCATION 1
The nature of environmental education, environmental ethics; the theoretical and practical appreciation of the issues and problems facing environmental education curriculum planners.

Credit Points: 12  Contact Hours: 3 per week

SBP501 CURRICULUM ISSUES IN ENVIRONMENTAL EDUCATION 2
A theoretical appreciation of, and practical exposure to, the design of environmental teaching experiences in formal and non-formal settings within subject areas. The subject builds upon the knowledge and ideas developed in SBP500.

Prerequisite: SBP500
Credit Points: 12  Contact Hours: 3 per week

SBP502 ETHICS & ECONOMICS IN ENVIRONMENTAL EDUCATION
Development of an understanding of the nature of environmental economics and different philosophies, ideologies and cultural views towards the environment; development of teaching strategies and resources suitable for teaching environmental economics and ethics.

Credit Points: 12  Contact Hours: 3 per week
SBP503 NATURAL ENVIRONMENTAL EDUCATION ISSUES
The relationship between human beings and their natural environment; the historical development of environmental ethics; studies of current human impacts on vegetation, animal life, soils, waters, geomorphological processes and climate and the implications of these for current notions of sustainability.
Credit Points: 12 Contact Hours: 3 per week

SBP504 PRACTICAL & FIELDWORK IN ENVIRONMENTAL EDUCATION
Development of a range of practical and technological skills and a variety of field-based experiences to enable students to reflect on and refine their attitudes and perceptions about environmental education. Studies include rural and urban field activities.
Credit Points: 12 Contact Hours: 3 per week

SBP505 SOCIAL ENVIRONMENTAL EDUCATION ISSUES
Development of an understanding of people's responses to their urban environment; opportunities for decision making about the effective and sustainable use of urban environments; strategies to promote effective educational practices in the urban environment.
Credit Points: 12 Contact Hours: 3 per week

SCB001 LEARNING AT UNIVERSITY
A series of seminar/workshops run by the Learning Unit designed to assist students to investigate what learning at a tertiary institution involves. The aim of the subject is to introduce students to learning for understanding and integration, rather than simply for reproduction. Students with at least one subject in common are grouped together, so that material from this subject can be used to help students explore approaches to advanced reading and critical thinking skills in an applied manner. Students also develop skills in information retrieval using the University Library facilities.
Credit Points: 2 Contact Hours: 1 per week

SCB100 COOPERATIVE EDUCATION 2
Ten to 12 months placement in paid employment related to their course, in a commercial environment under the joint supervision of a industry supervisor and an academic adviser. An academic adviser obtains reports from the student and his or her work supervisor at regular intervals. The student is required to complete a progressive assessment program. The student's results are determined on the basis of reports, continuous assessment, and the employer's report.
Prerequisite: Completion of 4 semesters of a standard full-time degree-level course, normally with a GPA of not less than 4.5 overall.
Credit Points: 24 per semester

SCB222 EXPLORATION OF THE UNIVERSE
Introduction to optical observational astronomy; instrumentation; celestial sphere and astronomical coordinates, observations of constellations, stars, planets, clusters and other interesting celestial objects. Theory: description of the solar system, gravitation, phenomena of astronomical origin, brief introduction to stars and galaxies. Field trip.
Credit Points: 12 Contact Hours: 4 per week

SCB510 INTRODUCTION TO QUALITY MANAGEMENT
The philosophies, practices and tools of quality management; organisational structures; quality systems; total quality management; measurement and role of statistical methods.
Prerequisites: SCB100 and (MAB237 or MAB347)
Credit Points: 8 Contact Hours: 3 per week

SCB702 COMPLEMENTARY STUDIES
The subject is tailored to suit individual students: studies include a selection from: participation in research seminars; oral communication skills; written communication skills; formal coursework in occupational health and safety, scientific and industrial ethics, philosophy and methodology of science, and science policy and research funding options; development of research management strategies; preparation of a scientific paper/report; and coursework material from other accredited courses as directed by the project supervisor and Head of School. Assessed on a pass/fail basis.
Credit Points: 8 per semester Contact Hours: 6 per week

SCB703 STUDIES IN GLOBAL SYSTEMS A
Topics of current global concern to mankind from the perspectives of each of the participating disciplines (Biology, Geology and Chemistry) including: the enhanced greenhouse effect, ozone depletion, acid rain, pollution, soil erosion, toxics wastes and their disposal, sea level changes, and the laws and treaties which relate to them. Note: Students undertake either SCB703 or SCB704, not both.
Credit Points: 9 Contact Hours: 3 per week

SCB704 STUDIES IN GLOBAL SYSTEMS B
See SCB703.
Credit Points: 6 Contact Hours: 2 per week

SCB705 ADVANCED MICROSCOPY TECHNIQUES
This subject describes and allows students to practise, preparative techniques relating to transmission (TEM), scanning transmission (STEM) and scanning (SEM) electron microscopy. Techniques include: specialist fixation and staining (negative and positive), thin sectioning, critical point drying/freeze drying, replica production, spatter coating and metal shadowing. Each technique is applied to a range of specimens and students are familiarised with the use and manipulation of each type of microscope. The analytical capabilities of each instrument are also taught and used.
Credit Points: 9 Contact Hours: 4 per week

SSB000 STUDIES IN AUSTRALIAN SOCIETY I
Introduction to the nature of contemporary Australian society from a sociological perspective. The basic elements of the social structure (class, race & gender) are explored and selected social institutions described (eg. the family, work). Skills in analysing social processes at regional, state & national level are introduced.
Credit Points: 12 Contact Hours: 3 per week

SSB001 HUMAN DEVELOPMENT I
Life events and transitions encountered from birth to the late teen years: theories of human development: theories of childhood and adolescence; childhood and adolescent lifestyles; values clarification regarding
SSB008 COUNSELLING THEORY

The nature of the counselling process and helping relationship; the theoretical bases of the major counselling approaches; counselling skills of the major approaches; ethical issues in counselling; counselling applied in particular situations; group counselling; change processes in counselling; sociological analysis of the role and function of counselling.

Prerequisites: SSB003, SSB007
Credit Points: 12  Contact Hours: 3 per week

SSB009 THE AUSTRALIAN WELFARE STATE

The origins and the contemporary nature of the Australian welfare state; historical data on the antecedents to and stages of welfare state development; the major debates and controversies; an overview of the structural arrangements of the Australian welfare state.

Credit Points: 12  Contact Hours: 3 per week

SSB010 PROFESSIONAL RESOURCES 1

Resources and consumer needs; government systems; non-government systems; the family as a resource; issues of access to resources; appeal and grievance mechanisms; specific resource networks.

Credit Points: 12  Contact Hours: 3 per week

SSB011 CHILD & FAMILY SERVICES 1

The history of child and family services in Australia; an overview of the major service agencies and child and family problems; the family life cycle; the needs and rights of children and families; professional ethics and standards.

Credit Points: 12  Contact Hours: 3 per week

SSB012 DISABILITY SERVICES 1

History and attitudes to disability; impact of disability upon individuals and their families; review of the principles and theoretical frameworks: normalisation, social role valuation, etc. which underpin services. Planning around individuals; personal futures planning.

Credit Points: 12  Contact Hours: 3 per week

SSB013 CORRECTIVE SERVICES 1

Conception of crime; incidence of crime; causal explanations of crime; contemporary theories of crime; offender characteristics; correctional history, purpose and goals; the impact of imprisonment; the victim of crime.

Credit Points: 12  Contact Hours: 3 per week

SSB014 AGED SERVICES 1

Physiological, psychological, social and cultural aspects of ageing: common transitions and crises faced by the aged person, carers and families; modes of adaptation and maladaptation, learned helplessness in institutional life, understanding dementias, communication with and counselling of the elderly.

Credit Points: 12  Contact Hours: 3 per week

SSB015 MULTICULTURAL SERVICES 1

Orientation to the context, options and difficulties associated with the human service programs for a multicultural Australia; introduction to the policies, concepts and issues surrounding multicultural services; the experiences of immigration and resettlement.

Credit Points: 12  Contact Hours: 3 per week

SSB016 YOUTH SERVICES 1

The development and character of youth services in Australia; outline of a framework for reflective youthwork practice; youth services relating to labour market housing, juvenile justice, education, health and young people in the context of families; contemporary practice and policy issues identified through field enquiry and examination of relevant literature.

Credit Points: 12  Contact Hours: 3 per week

SSB017 GROUP WORK

Types of groups and varieties of group experiences; the importance and uniqueness of group medium; understanding behaviour in the group context;
theories and models of group development; leader and member behaviours; planning, implementing and evaluating group methods; establishing groups and planning group approaches; the group as a therapeutic community; evaluating group work; ethical issues.

Credit Points: 12  Contact Hours: 3 per week

- **SSB019 PROFESSIONAL RESOURCES 2**
  Statistics and service planning, electronic data gathering and dissemination methods; specific resource networks; evaluation of resource systems; access to resources; appeal and grievance mechanisms.
  Prerequisite: SSB010
  Credit Points: 12  Contact Hours: 4 per week

- **SSB020 CHILD & FAMILY SERVICES 2**
The service framework and the nature of child and family service assessments and interventions in child protection work, alternative care, domestic violence, sexual abuse, divorce, juvenile justice. Refining interpersonal and group work skills necessary to promote effective client-worker relationships.
  Prerequisite: SSB011
  Credit Points: 12  Contact Hours: 3 per week

- **SSB021 DISABILITY SERVICES 2**
Major life domains of home, work, education, leisure, relationships as they relate to people with a disability. Contemporary service responses to these life domains. Impact of specific disabling conditions: intellectual, physical, sensory and psychiatric.
  Prerequisite: SSB012
  Credit Points: 12  Contact Hours: 3 per week

- **SSB022 CORRECTIVE SERVICES 2**
The corrective system; staff-inmate relationships; ethics and conduct; methods and approaches to maintaining discipline in a non-threatening manner; inmate views of staff; mob psychology and control.
  Prerequisite: SSB013
  Credit Points: 12  Contact Hours: 3 per week

- **SSB023 AGED SERVICES 2**
Services available to the aged within the community and institutions; planning, implementing and evaluating needs-based services, assessment skills; policy issues and the HACC program; specific responses to the migrant, aborigines and the elderly poor.
  Prerequisite: SSB014
  Credit Points: 12  Contact Hours: 3 per week

- **SSB024 MULTICULTURAL SERVICES 2**
The characteristics and circumstances of Australia's ethnic minorities and their implications in the use of welfare intervention techniques. The needs and issues of specific interest groups are explored. The subject promotes cultural sensitivity by exploring the social mores of Australia's ethnic minorities.
  Prerequisite: SSB015
  Credit Points: 12  Contact Hours: 3 per week

- **SSB025 YOUTH SERVICES 2**
The cultural, gender and locational differences in the experience of young people as described through various forms of social commentary and research; current and emerging intervention strategies; their assumptions, strengths and limitations.
  Prerequisite: SSB016
  Credit Points: 12  Contact Hours: 3 per week

- **SSB026 FIELDWORK PRACTICE 1**
A three-stage program of pre-placement tutorials, a ten-week block placement (or negotiated equivalent) in a human service setting offering a professionally supervised, contracted learning experience of human service work, and post-placement tutorials. Students acquire and integrate human service competencies, attitudes and knowledge. Note: Students who fail to achieve a satisfactory standard of performance on placement are liable to exclusion from the course.
  Prerequisites: Enrolment in the Bachelor of Social Science (Human Services). All preceding subjects are prerequisites/co-requisites at the discretion of the Course Coordinator and Field Education Coordinator.

- **SSB027 COMMUNITY WORK**
Community work as a distinct intervention skill; the background to community work in Australia; models of community work; basic skills and techniques are developed: entering a community; building community involvement; developing community action; managing common problems.
  Credit Points: 12  Contact Hours: 3 per week

- **SSB028 STUDIES IN AUSTRALIAN SOCIETY 3**
Introduction to the Australian Constitution and Federal system of government; examination of major Australian political institutions including Parliament and the Cabinet; analysis of the role of the judiciary and the funding and role of the public service; exploration of the electoral and industrial systems; examination of the role and structure of political parties.
  Prerequisite: SSB004
  Credit Points: 12  Contact Hours: 3 per week

- **SSB030 CHILD & FAMILY SERVICES 3**
The Commonwealth and State legislation underpinning Child and Family Services in Queensland; models of intervention; development of service delivery skills; contemporary service philosophies and principles; interface between legislative power and facilitative helping.
  Prerequisite: SSB020
  Credit Points: 12  Contact Hours: 3 per week

- **SSB031 DISABILITY SERVICES 3**
Policies, legislation and programs which impact upon people with a disability reviewed at Federal, State and Local government levels; analysis of international influences on the Australian scene; policy areas on disability, income maintenance, housing, education, transport, employment, etc.
  Prerequisite: SSB021
  Credit Points: 12  Contact Hours: 3 per week

- **SSB032 CORRECTIVE SERVICES 3**
The Queensland corrective services system; the social and political influences and the development of policy and services for corrective organisations within Queensland; trends and prospects; stratification within correctional service organisations; issues of communication and organisational change.
  Prerequisite: SSB022
  Credit Points: 12  Contact Hours: 3 per week

- **SSB033 AGED SERVICES 3**
International and national trends in aged care; the use of technology to improve quality of life, administration and the creation of a humane environment; elementary accounting and budget control skills program design; the involvement of the consumer, the aged service system in the wider community welfare environment.
  Prerequisite: SSB023
  Credit Points: 12  Contact Hours: 3 per week
SSB034 MULTICULTURAL SERVICES 3
Development of the ability to critically evaluate Australia's social institutions for their relevance and fairness to ethnic minorities; exploration of contemporary principles which direct service delivery as they relate to ethnic minorities; evaluation of current methods employed to promote these principles.
Prerequisite: SSB024
Credit Points: 12  Contact Hours: 3 per week

SSB035 YOUTH SERVICES 3
The nature and implications of youth work within various contexts; different settings, eg. statutory and non-statutory, government and non-government; how each contributes or might contribute to individual, organisational and social objectives; skills and knowledge of particular relevance to these various settings.
Prerequisite: SSB025
Credit Points: 12  Contact Hours: 3 per week

SSB036 FIELDWORK PRACTICE 2
A three-stage program of pre-placement tutorials, a ten week block placement (or negotiated equivalent) in a human service setting offering a professionally supervised, contracted learning experience of human service work, and post-placement tutorials. Students consolidate and extend critical human service competencies, attitudes and knowledge. Note: Students who fail to achieve a satisfactory standard of performance on placement are liable to exclusion from the course.
Prerequisites: Enrolment in the Bachelor of Social Science (Human Services). All preceding subjects are prerequisites/co-requisites at the discretion of the Course Coordinator and Field Education Coordinator.

SSB037 STUDIES IN HUMAN RIGHTS 3
Examination of Federal and State institutional arrangements designed to protect and promote fundamental human rights; emphasis on understanding and operationalising legislative and administrative systems which have a particular relevance for the human rights of consumers within human service contexts.
Prerequisite: SSB06
Credit Points: 12  Contact Hours: 3 per week

SSB038 SOCIAL POLICY & SOCIAL CHANGE
Theoretical approaches to social change; assessment of social policy as a tool of social change generally and within Australian context; skills and techniques of applying models of social policy and program development and implementation as part of a change strategy.
Credit Points: 12  Contact Hours: 3 per week

SSB039 CONTEMPORARY SOCIAL POLICIES
The major debates in social policy; analysis of the manner in which Australia has resolved these and the impact on our welfare state; contemporary movements by governments and effects on broad approaches to social policy; current status of major policy areas, eg. health, income security, housing.
Credit Points: 12  Contact Hours: 3 per week

SSB040 CHILD & FAMILY SERVICES 4
Innovations in service delivery models; comparison of international and national trends with service delivery within Queensland; literature review; independent study-program design.
Credit Points: 12  Contact Hours: 3 per week

SSB041 DISABILITY SERVICES 4
Program planning, service design; coordination of services, sources of funding; advocacy, self-advocacy, group advocacy, citizen advocacy; independent study.
Prerequisite: SSB031
Credit Points: 12  Contact Hours: 3 per week

SSB042 CORRECTIVE SERVICES 4
Punishment versus rehabilitation; correctional options; traditional treatment programs; experimental treatment programs; traditional prison management; modern prison management; contemporary community issues; independent study.
Prerequisite: SSB032
Credit Points: 12  Contact Hours: 3 per week

SSB043 AGED SERVICES 4
An individual project is negotiated between the lecturer and student and is completed under supervision. The project is to encompass service delivery issues and include how work with the aged fits in with the wider Australian context. Specific attention is to be given to service philosophy.
Prerequisite: SSB033
Credit Points: 12  Contact Hours: 3 per week

SSB044 MULTICULTURAL SERVICES 4
The general and specific service provision systems targeted towards ethnic minorities in Australia. Students develop organisational change skills and policy analysis and development skills which they apply to a specific social program, service or policy issue.
Prerequisite: SSB034
Credit Points: 12  Contact Hours: 3 per week

SSB045 YOUTH SERVICES 4
Critical reflection of practice issues that emerged for students during the second field education subject. Skills and knowledge areas are identified for attention. As an outcome of the subject, students identify, document and critique a professional frame of reference and code of ethics for youth work practice.
Prerequisite: SSB035
Credit Points: 12  Contact Hours: 3 per week

SSB101 ENVIRONMENTAL EDUCATION
The nature of environmental education; environmental concept development of young learners; methods of teaching environmental knowledge, concepts, attitudes and behaviour; and the use of fieldwork, interpretive centres and museums in environmental education programs.
Credit Points: 8  Contact Hours: 2 per week

SSB802 TECHNOLOGY & CULTURE
Social and psychological aspects of culture; historical perspectives; the age of mechanics; the electronic revolution; political and social aspects of technology; industrialisation and the Third World; educational implications of technical change.
Credit Points: 12  Contact Hours: 3 per week

SSB803 SOCIAL PSYCHOLOGY
General study of social psychology and its relevance to the work and role of home economist; theory and research of group dynamics and related concepts; analysing small group development.
Credit Points: 10  Contact Hours: 3 per week

SSB805 PERSONAL & INTERPERSONAL CHANGE
Construction of identity, self, self-concept, self-esteem and self-development; understanding and using
a wide range of personal and interpersonal change methods, theories and approaches, together with relevant research data.

Credit Points: 12  Contact Hours: 4 per week

■ SSB806 INTERPERSONAL & GROUP PROCESSES
Understanding relationships and small group dynamics with emphasis on skill development in listening, helpful responding, assertion, conflict resolution, disclosure, feedback; models of group development and roles lead to facilitation and leadership skills. Skills are applied and analysed outside the class group.

Credit Points: 12  Contact Hours: 3 per week

■ SSB807 HUMAN SEXUALITY
Sexuality: model strategies for dealing appropriately with sensitive, value-laden issues; personal comfort in discussion of sexual matters; aspects of sexuality relevant to the student's own development; the sexual development of adolescents; issues of social concern such as sexual abuse of children.

Credit Points: 12  Contact Hours: 3 per week

■ SSB816 HUMAN RELATIONSHIPS: A SOCIOLOGICAL PERSPECTIVE
The significance of the social context to human relationships; the impact of social and demographic change on families and communities; the implications of such changes for interpersonal relationships; society and human relationships in contemporary and historical settings.

Credit Points: 12  Contact Hours: 3 per week

■ SSB903 SOCIOLOGY FOR HEALTH PROFESSIONALS
Theories and concepts of sociology are used in the analysis of the social context of health care; theoretical perspectives; social organisation; social differences and issues; the application of sociological theory to aspects of Australian society including; class and stratification, migration, sub-culture and ethnicity, crime and deviance, groups and organisations, social change.

Credit Points: 6  Contact Hours: 3 per week

■ SSB904 SOCIOLOGY OF HEALTH & ILLNESS
The social environment of health and illness and cultural aspects of health care practices; cultural definitions of health and illness; life-style factors and health; life cycle and health crises; health and social problems; health promotion; preventive care and the medical model; bureaucratisation and health care delivery; the health care professions.

Prerequisite: SSB903  Credit Points: 6  Contact Hours: 3 per week

■ SSB905 PSYCHOLOGY FOR HEALTH PROFESSIONALS
This subject presents particular aspects of the theories, skills and approaches of interpersonal, social and organisational psychology which are relevant to nursing practice. Topics include: humanistic, cognitive, behavioural and social models for understanding the individual; communication processes; self-concept and self-esteem; protection of the ego; the impact of emotions and beliefs on health behaviour; and interpersonal communication skills.

Credit Points: 8  Contact Hours: 3 per week

■ SSB906 SOCIOLOGY FOR HEALTH PROFESSIONALS
Sociological theories and methods are investigated and subsequently used to identify and analyse social relationships, social processes and social patterns relating to the social origins of illness and wellness. Analysis is undertaken into trends in morbidity and mortality in society which are not randomly distributed but associated with social structural variables such as ethnicity, gender, social class, age and geographical location. The health care system is examined internally and in relation to its utilisation by the public and its effectiveness in addressing contemporary health issues in Australia.

Credit Points: 8  Contact Hours: 3 per week

■ SSB907 PSYCHOLOGY FOR ENGINEERS
Introductory psychology; basic elements of transactional analysis and their application to work settings; self-concept and its relationship to socially effective behaviour; attitudes and attitude change; the dynamics of supervision in the work place.

Credit Points: 4  Contact Hours: 2 per week

■ SSB908 BEHAVIOURAL SCIENCE
An introduction to perception, motivation, individual personality, social attitudes, group interaction and dynamics; social motives and the sources and resolution of conflict. Students are introduced to the practical application and limitations of behavioural studies through the use of readings and case studies drawn from the building industry. An introduction to the job and responsibilities of management; the functions and role of the manager including planning, organisation, control, budgeting and decision-making; styles of leadership. Students are introduced to employee selection training, appraising and promotion. Worker efficiency and working conditions.

Credit Points: 6  Contact Hours: 3 per week

■ SSB909 PSYCHOLOGY
Students critically evaluate statements about behaviour; state and give examples of higher order motives and apply this knowledge to work and interpersonal situations; understand factors which cause people to misperceive others, and explain how to minimise misperception; use effective social skills in interpersonal and group settings; understand theories of attitude, change and know implications for changing the behaviour of others; use skills necessary for starting a successful small business.

Credit Points: 6  Contact Hours: 3 per week

■ SSB910 INTRODUCTORY PSYCHOLOGY FOR HEALTH PROFESSIONALS
A course of lectures and tutorials on psychology as a science and interpersonal behaviour and skills.

Credit Points: 4  Contact Hours: 2 per week

■ SSB911 GENERAL PSYCHOLOGY
This course is designed to give students an ability to demonstrate effective interpersonal skills in relation to patients and other health professionals; indicate bases of individual differences; diagnose patient needs and respond appropriately; state causes of stress, effects on health, and indicate appropriate techniques to reduce stress; indicate techniques that may be used to modify patient attitudes.

Credit Points: 4  Contact Hours: 3 per week

■ SSB914 PSYCHOLOGY
In studying this subject, students are taught to critically evaluate statements about behaviour; state and give examples of higher order motives, and apply this
knowledge to work and interpersonal situations; understand factors which cause us to misperceive others, and explain how to minimise misperceptions; use effective social skills in interpersonal and group settings; understand theories of attitude, change and know implications for changing the attitudes of other persons; know theories of behaviour change and understand implications for changing the behaviour of others; use skills to reduce interpersonal stress.

**Credit Points:** 4  **Contact Hours:** 3 per week

**SSP003 COUNSELLING & HUMAN DEVELOPMENT**
Major theoretical approaches to human development; age/stage perspectives; life event and transition perspectives; individual variability perspectives; nature of research in developmental psychology; psychological transitions in the life span; relevance of developmental theories and concepts to personal development and need; psychopathology and the life cycle.

**Prerequisite:** SSP001  
**Credit Points:** 8  **Contact Hours:** 3 per week

**SSP004 THEORY & PRACTICE OF COUNSELLING 2**
Change processes in counselling from a brief therapy or solution-focused perspective; emphasis on the viewing, doing and language of problems and on the narrative metaphor for counselling.

**Prerequisite:** SSP001  
**Credit Points:** 12  **Contact Hours:** 3 per week

**SSP005 PRACTICUM 2**
Advanced skill training workshops; supervised counselling experience involving work with clients; interaction of students and supervisor.

**Prerequisite:** SSP001  
**Co-requisite:** SSP007  
**Credit Points:** 8

**SSP006 COUNSELLING: A SOCIOLOGICAL PERSPECTIVE**
Sociological analysis of counselling and the helping process in terms of the functions they serve for society; the nature of helping and the helping process; sociological conceptions of the individual; social control function of helping; medicalisation and professionalisation of helping; the effect of organisation on the helping process.

**Prerequisite:** SSP001  
**Credit Points:** 8  **Contact Hours:** 3 per week

**SSP007 THEORY & PRACTICE OF COUNSELLING 3**
Historical development of psycho-analysis and analytic theory; psychodynamics in counselling practice; hypnosis and conscious phenomena in counselling; scientific credibility of psycho-analytic and analytic psychotherapy; neurosis and psychosis in counselling.

**Prerequisite:** SSP004  
**Co-requisite:** SSP005  
**Credit Points:** 12  **Contact Hours:** 3 per week

**SSP009 CAREER GUIDANCE & COUNSELLING**
Theoretical approaches to career guidance; developmental theories and opportunity structuring theories; resources and information for career guidance; career education programs; independent research.

**Credit Points:** 8  **Contact Hours:** 3 per week

**SSP012 THE COUNSELLOR & THE ORGANISATION**
Helping organisations as bureaucracies; organisational response to social change; stress within helping organisations; teamwork among professional helpers; counsellor roles.

**Prerequisite:** SSP001  
**Credit Points:** 8  **Contact Hours:** 3 per week

**SSP013 INDEPENDENT STUDY**
Independent counselling-related studies under the supervision of a member of staff. Studies must be approved by the course coordinator.

**Prerequisite:** SSP007  
**Credit Points:** 8  **Contact Hours:** 3 per week

**SSP014 FAMILY THERAPY 1**
Self-awareness in family counselling; formation and models of the family; family systems perspectives and counselling approaches.

**Prerequisite:** SSP007  
**Credit Points:** 8  **Contact Hours:** 3 per week

**SSP016 ADVANCED PRACTICUM**
Further supervision of counselling work using a group process and a focus on student's work context, personal issues and professional side.

**Prerequisite:** SSP005  
**Credit Points:** 8
SSP017 COUNSELLING IN GROUPS
Organising and facilitating group work; establishing group norms; stages of group development; member behaviour and facilitator interventions; models and ethics of group work.
Credit Points: 8  Contact Hours: 3 per week

SSP543 HEALTH PSYCHOLOGY
Current theories and developments of behavioural approaches in health care, including current learning and psychological theories pertinent to health education practices.
Credit Points: 12  Contact Hours: 3 per week

SSP800 SERVICE POLICIES & PRINCIPLES
Introduction to the principles which underpin service delivery in human services organisations such as accessibility, equity, legitimacy, accountability, responsiveness, participation, efficiency, effectiveness, productivity. Introduction to the notion of framework to several human services organisations. Development of students' capacity to apply the framework to selected organisations.
Credit Points: 12  Contact Hours: 3 per week

SSP801 PROGRAM PLANNING & EVALUATION
Prerequisite: SSP800
Credit Points: 12  Contact Hours: 3 per week

SSP802 MANAGEMENT IN THE COMMUNITY SECTOR
Credit Points: 12  Contact Hours: 3 per week

SSP850 COMMUNICATION THEORY & SKILLS
Analysis and practical experience in the development of communication skills and techniques applicable to individual, small group, community and societal levels in health education.
Credit Points: 12  Contact Hours: 3 per week

SSP854 HUMAN SEXUALITY & RELATIONSHIPS
Sexual behaviour and the life cycle; sexual health and reproduction; sex and society.
Credit Points: 12  Contact Hours: 3 per week

SVB001 SURVEYING & MAPPING
Instrumentation for land measurement, contour mapping; types of map, availability and interpretation; simple survey techniques; introduction to remote sensing techniques.
Credit Points: 2  Contact Hours: 1 per week

SVB010 SURVEYING & MEASURING
Basic concepts, applications of surveying, relationships with architecture and building instrumentation; setting out of procedures, plotting of survey data, computations, cadastral systems, land tenure systems; Titles Office procedures, searching, identification, types of surveys, easements, encroachments, interpretation of survey plans.
Credit Points: 4  Contact Hours: 2 per week

SVB111 DATA PRESENTATION 1
Drafting instruments and techniques; introductory survey drafting; introductory engineering drawing.
Co-requisite: SVB121
Credit Points: 6  Contact Hours: 3 per week

SVB121 LAND SURVEYING 1
Principles of surveying: surveying instrumentation; traversing; levelling; elements of tacheometry; contouring; elementary theory of error; plane surveying computations.
Credit Points: 13  Contact Hours: 6 per week

SVB199 INDUSTRIAL EXPERIENCE 1
At least six weeks employment, approved by the Head of School. Students must submit an industrial experience record form, completed by both student and employer.
Contact Hours: 6 weeks

SVB203 PROJECT SURVEY
Two surveys of a building site; chain survey with reduced levels taken on a grid; survey done by theodolite traverse.
Prerequisite: SVB101
Credit Points: 4  Contact Hours: 2 per week

SVB211 DATA PRESENTATION 2
Engineering survey drafting; working survey drawings; basic principles of computer graphics, hardware, software; programming; plotter production of maps and plans.
Prerequisites: CSB294, SVB111
Co-requisite: SVB226
Credit Points: 6  Contact Hours: 3 per week

SVB212 DATA PRESENTATION 2A
Developing drafting skills; introduction to engineering survey drafting and computer graphics.
Prerequisite: SVB111
Co-requisite: SVB226
Credit Points: 2  Contact Hours: 1 per week

SVB226 LAND SURVEYING 2
Plane surveying computations; detail surveying; reconnaissance surveying; route location; curve theory; setting out surveys; earthworks computation; elements of cadastral surveying.
Prerequisite: SVB121
Co-requisite: SVB211
Credit Points: 13  Contact Hours: 6 per week

SVB270 LAND ADMINISTRATION 1
Introduction to elements of law; law relating to land title and registration; crown land administration in Queensland.
Credit Points: 6  Contact Hours: 3 per week

SVB282 SEMINAR 1
Preparation of technical papers and reports; written and oral presentation; business correspondence; meeting procedures.
Credit Points: 5  Contact Hours: 2 per week

SVB299 INDUSTRIAL EXPERIENCE 2
At least six weeks employment, approved by the Head of School. Students must submit an industrial ex-
experience record form, completed by both student and employer.

Contact Hours: 6 weeks

**SVB306 SURVEYING**
Introductory surveying methods, instrumentation; use of level and theodolite for gathering and setting out data points, distance measurement, circular curves, areas and volumes; introductory photogrammetry and digital terrain models.

Credit Points: 8 Contact Hours: 3 per week

**SVB311 DATA PRESENTATION 3**
Cadastral plan drawing; introduction to cartography; cartographic reproduction; mapping agencies.

Prerequisite: SVB111 Co-requisite: SVB393
Credit Points: 5 Contact Hours: 3 per week

**SVB331 OBSERVATIONS & ADJUSTMENTS 1**
Review of relevant statistical concepts; theory of observations and of random errors; linear and nonlinear functional models, the stochastic model, the law of propagation of variances, the error ellipse; practical applications.

Prerequisites: MAB495, MAB499 Co-requisite: MAB795
Credit Points: 4 Contact Hours: 2 per week

**SVB343 PHOTOGRAMMETRY 1**
Introduction to photogrammetry; photogrammetric optics; aerial photography; geometry and use of single photographs; geometry and use of stereogram; half-day visit to an aerial survey/mapping organisation.

Prerequisite: PHB170
Credit Points: 6 Contact Hours: 3 per week

**SVB352 LAND STUDIES A**
Introductory ecology; conservation of resources; introduction to physical aspects of land; assessment of physical land parameters; land classifications; land utilisation; sieve mapping and land use surveys; regional geography; students are required to undertake a full-day ecology field trip.

Credit Points: 3 per semester Contact Hours: 6 per week

**SVB393 LAND SURVEYING 3**
Cadastral surveying; field astronomy; off-campus field work.

Prerequisites: SVB121, SVB270 Co-requisites: SVB311, SVB573 Credit Points: 10 Contact Hours: 5 per week

**SVB399 INDUSTRIAL EXPERIENCE 3**
At least six weeks employment, approved by the Head of School. Students must submit an industrial experience record form, completed by both student and employer.

Contact Hours: 6 weeks

**SVB412 CARTOGRAPHIC PRACTICE**
Replographic processes; colour systems, colour separation and colour correction; digital mapping techniques; cartographic data structures; geographical surfaces.

Prerequisite: SVB311
Credit Points: 5 Contact Hours: 3 per week

**SVB430 LAND SURVEYING 4**
Primary traversing; classical triangulation; trigonometrical levelling; precise levelling; off-campus field work.

Prerequisite: SVB121 Co-requisites: SVB431, SVB442
Credit Points: 9 Contact Hours: 4 per week

**SVB431 OBSERVATIONS & ADJUSTMENT 2**
Introduction to least squares adjustment; standard problems 1 and 2; extensive practical applications to linear and non-linear problems with both univariate data sets.

Prerequisite: SVB331 Credit Points: 4 Contact Hours: 2 per week

**SVB442 GEODETIC COMPUTATIONS**
Plane coordinate computation; geometrical geodesy, geometry of spheroid, computation on the spheroid; theory of map projections; the transverse mercator and UTM; computations on the Australian Map Grid.

Prerequisites: MAB795, SVB121 Co-requisite: SVB440
Credit Points: 9 Contact Hours: 4 per week

**SVB443 PHOTOGRAMMETRY 2**
Principles of construction; operation of analogue stereoplotters; aerial triangulation; terrestrial photogrammetry; analytical photogrammetry; half-day visit to an aerial survey/mapping organisation.

Prerequisites: SVB343, MAB795 Co-requisite: SVB451
Credit Points: 11 Contact Hours: 6 per week

**SVB451 LAND STUDIES B**
Introduction to theory of price; location theory; land economics.

Credit Points: 5 Contact Hours: 3 per week

**SVB470 LAND ADMINISTRATION 2**
Introduction to government and public administration; Australian public land administration; private sector land administration.

Credit Points: 4 Contact Hours: 2 per week

**SVB473 LAND INFORMATION SYSTEMS 1**
Need for a computerised land information system; review of cadastral systems; land title systems; the multipurpose cadastre and automation; survey requirements for land information systems; design principles, retrieval techniques.

Prerequisites: CSB294, SVB211, SVB393 Co-requisite: SVB453
Credit Points: 6 Contact Hours: 3 per week

**SVB535 LAND SURVEYING 5**
Hydrographic surveying; topographic surveying.

Prerequisites: MAB495, SVB121 Co-requisite: SVB430
Credit Points: 5 Contact Hours: 3 per week

**SVB551 LAND VALUATION**
Concepts and purposes of valuation; improvements; urban and rural valuation; interest in land; compensation; legislation affecting land valuation; land valuation practice.

Prerequisite: SVB451 Credit Points: 6 Contact Hours: 3 per week

**SVB561 LAND DEVELOPMENT PRACTICE 1**
Land development as an economic activity; surveys for subdivision design; site planning; land use determinants; political, economic, social and physical; traffic aspects affecting subdivision design; case studies.

Prerequisites: SVB352, SVB451 Co-requisites: CEB364, SVB551, SVB574 Credit Points: 10 Contact Hours: 6 per week
■ SVB563 LAND INFORMATION SYSTEMS 2
Data acquisition, storage and management; spatial identifiers; cartographic display and generalisation in automated systems; implementation of a system.
Prerequisite: SVB473 Co-requisite: SVB412
Credit Points: 4 Contact Hours: 2 per week

■ SVB571 CADASTRE
Complex and modern problems involved in the cadastre.
Prerequisite: SVB393
Credit Points: 4 Contact Hours: 2 per week

■ SVB573 LAND ADMINISTRATION 3
Queensland case law; legislation affecting land and the survey of land including the registration of interests in land, and statutory control of land development.
Prerequisite: SVB270
Credit Points: 6 Contact Hours: 3 per week

■ SVB575 DATA ACQUISITION & MANAGEMENT 6
Data acquisition, storage and management; spatial identifiers; cartographic display and generalisation in automated systems; implementation of a system.
Prerequisite: SVB473 Co-requisite: SVB412
Credit Points: 4 Contact Hours: 2 per week

■ SVB613 TOPICS IN ENGINEERING SURVEYING
Network reliability; deformation surveys; subsidence monitoring; precision alignment and distance measurement; jigs surveys; high rise buildings.
Prerequisite: SVB431 Co-requisite: SVB639
Credit Points: 5 Contact Hours: 3 per week

■ SVB614 LAND SURVEYING 6
Geophysical surveying; mine surveying; field astronomical observation.
Prerequisite: PHB170, SVB430
Credit Points: 6 Contact Hours: 3 per week

■ SVB615 OBSERVATIONS & ADJUSTMENT 3
Design, pre-analysis and optimisation followed by execution, adjustment and assessment of horizontal (2 dimensional) control networks, traverse and level networks (1 dimensional).
Prerequisite: SVB431
Credit Points: 4 Contact Hours: 2 per week

■ SVB616 GEODESY
Introduction to history; definitions; gravity field of earth; level surfaces; spherical harmonics; variations of the gravity field; gravity measurements; geodetic reference systems; datum transformations; satellite geodesy; satellite doppler surveying; global positioning system; inertial surveying systems; geodynamics.
Prerequisite: MEB221, PHB170, SVB430, SVB442
Co-requisite: SVB639
Credit Points: 6 Contact Hours: 3 per week

■ SVB617 PHOTOGRAMMETRY 3
Numerical relative and absolute orientation; independent model and bundle methods of block adjustment for triangulation; close range photogrammetry including nonconventional techniques; analytical plotters including generation, manipulation and storage of digital data; use of micro and mini computers in analytical photogrammetry.
Prerequisite: SVB443 Co-requisite: SVB431
Credit Points: 5 Contact Hours: 3 per week

■ SVB618 REMOTE SENSING
Definitions and major systems for remote sensing; characteristic spectral reflectance of objects and spectral response of sensors; remote sensing acquisition hardware; remote sensing satellites; thermography and radar; data processing for presentation and enhancement; cartographic correction of remote sensing data for systematic geometric error.
Prerequisite: SVB343
Credit Points: 5 Contact Hours: 3 per week

■ SVB619 LAND DEVELOPMENT PRACTICE 2
Preliminaries of development, data assembly, statutory approvals, elements of design, requirements of communication, hydrological and energy services, development costs, controls of land development schemes; neighbourhood, residential, industrial estate, canal and reclamation estates, commercial and rural development schemes; design of small towns.
Prerequisite: SVB561, SVB574
Credit Points: 10 Contact Hours: 6 per week

■ SVB620 LAND ADMINISTRATION 5
Organisation theory; development planning procedures; land development analysis.
Prerequisite: SVB470, SVB451
Credit Points: 5 Contact Hours: 3 per week

■ SVB621 PROFESSIONAL PRACTICE
History of surveying and surveyors; the surveyor in relation to statutory authorities, civil, commercial and taxation laws; the surveyor as employer, employee, expert witness; surveyor-client-consultant relationships; professional ethics.
Prerequisite: SVB470
Credit Points: 6 Contact Hours: 3 per week

■ SVB622 SEMINAR 2
Preparation and presentation of at least one technically oriented seminar paper in a field germane to surveying.
Prerequisite: SVB282, successful completion of subjects totalling not less than 85 hours of weekly contact time.
Credit Points: 2 Contact Hours: 1 per week

■ SVB623 PROJECT
Undertake and report on an approved project in the field of surveying. Field trips on site or to local firms may be required.
Prerequisite: Successful completion of subjects totalling not less than 85 hours of weekly contact time.
Credit Points: 4 Contact Hours: 1 per week

■ SVB624 MAP PRODUCTION PLANNING
Planning of photogrammetric projects, specifications, control, costs accuracy; elements of critical path method.
Prerequisite: SVB412, SVB443
Co-requisite: SVB643
Credit Points: 5 Contact Hours: 3 per week

■ SVB625 PROJECT
Undertaking of a substantial mapping project utilising knowledge gained in photogrammetric, traditional and computer-assisted methods. The project may be topographic or thematic.
Prerequisite: SVB311, SVB412
Co-requisite: SVB443
Credit Points: 8 Contact Hours: 4 per week

■ SVB626 PROFESSIONAL PRACTICE A
Preparing surveyors for professional practice either as employer or employee.
Prerequisite: Successful completion of subjects totalling not less than 100 hours of weekly contact including SVB573.
Credit Points: 4 Contact Hours: 2 per week
Review of matrices, the Jacobian matrix, orthogonal matrices; transformations, coordinate transformations; rotations in 3 dimensions, euler angles, datum transformations, the development of datums.

**Prerequisites: SVB640**

**Credit Points: 5**

**Contact Hours: 3 per week**

**SVB911 GRAPHIC DESIGN 1**

Perception, development of awareness, a broad-based approach to design, including graphics, film, fabrics, industrial design. Sketching in pencil from nature, cast and other areas. Development of tones and textures using various media.

**Credit Points: 10**

**Contact Hours: 5 per week**

**SVB912 GRAPHIC DESIGN 2**

Identification and statement of design problems and solutions; conceptualising in design; the study of colour; the abstract tools of design; composition, perspective, projections and layout.

**Credit Points: 9**

**Contact Hours: 4 per week**

**SVP111 CADAstral SURVEYING 1**

The practice of cadastral surveying including subdivision design. Students may be required to spend four weeks at a field study centre and to carry out off-campus field work.

**Credit Points: 26**

**Contact Hours: 356 total**

**SVP112 SURVEY COMPUTING**

Computer applications in the practice of surveying.

**Credit Points: 3**

**Contact Hours: 47 total**

**SVP113 OFFICE OPERATIONS**

Written and oral communication; interviewing; office management, industrial relations.

**Credit Points: 7**

**Contact Hours: 90 total**

**SVP114 PRACTICE LAW**

The significance of court decisions on professional indemnity claims; statutes and regulations affecting surveyors. Preparation of brief and appearance in practice court sessions in conjunction with the Legal Practice Course.

**Credit Points: 2**

**Contact Hours: 30 total**

**SVP115 PROFESSIONAL PRACTICE**

Professional organisations in surveying; the conventions of practicing surveying; professional relationships and the responsibilities of professional practice.

**Credit Points: 1**

**Contact Hours: 8 total**

**SVP116 SURVEY PROJECT MANAGEMENT**

The recording and planning of survey projects and assessing progress.

**Credit Points: 7**

**Contact Hours: 100 total**

**SVP211 CADAstral SURVEYING 2**

The practice of cadastral surveying, including mining and real property surveys. Students may be required to spend four weeks at a field study centre and be required to carry out off-campus field work.

**Credit Points: 18**

**Contact Hours: 247 total**

**SVP212 BUILDING CONTROL SURVEYS**

Horizontal and vertical building control surveys; interpretation of plans and client relationships. Students may be required to spend some time on off-campus field work and inspections.

**Credit Points: 3**

**Contact Hours: 38 total**

**SVP213 DETAIL SURVEYS**

Surveys for location and presentation of natural and man-made detail. Students may be required to spend some time at a field study centre and be required to carry out off-campus field work.

**Credit Points: 2**

**Contact Hours: 30 total**

**SVP214 MAPPING**

Mapping techniques and their relative cost.

**Credit Points: 6**

**Contact Hours: 76 total**

**SVP215 INNOVATIONS & SYSTEMS DEVELOPMENT**

Assessment of new techniques and equipment, and the development of an innovative approach to the practice of surveying.

**Credit Points: 2**

**Contact Hours: 22 total**

**SVP216 SURVEYS FOR GOVERNMENT**

Decision making in government organisations; survey services provided by or to local authorities and government departments; surveying contracts. Students may be required to carry out inspections of several government agencies.

**Credit Points: 3**

**Contact Hours: 38 total**

**SVP217 ENGINEERING SURVEYING**

Engineering surveys for a variety of development projects. Students may be required to spend two weeks at a field study centre and be required to carry out off-campus field work.

**Credit Points: 16**

**Contact Hours: 210 total**

**SVP115 CARTOGRAPHIC COMPUTATIONS I**

Calculation and calculating; plane geometry; review of algebraic manipulation with cartographic applications; matrices and transformations as used in mapping.

**Credit Points: 8**

**Contact Hours: 76 total**

**SVP225 SURVEYING**

Basic principles of surveying techniques for survey control, especially for mapping purposes; basic principles of measurement: angular and linear; historical review of surveying.

**Credit Points: 8**

**Contact Hours: 3 per week**

**SVP243 PHOTOGRAMMETRY 1**

Photographic process, aerial survey and flight planning; geometry of the single photograph, scale, etc.; stereoscopy, stereoscopes and parallax bar; simple treatment of space resection; rectification and interpretation; one evening visit to an aerial surveying organisation.

**Credit Points: 8**

**Contact Hours: 3 per week**

**SVP306 ENGINEERING SURVEYING**

Fundamental survey concepts, coordinate systems, differential and simple trigonometric levelling; angular measurements; bearing and azimuth; linear measurement by steel tape and stadia.

**Credit Points: 7**

**Contact Hours: 3 per week**

**SVP471 LAND LAWS & REGULATIONS**

Introduction to the Australian legal system, sources of law; acts affecting land and land surveying in Queensland.

**Credit Points: 8**

**Contact Hours: 3 per week**

**SVP511 CAD SYSTEMS**

Principles of digital mapping; use of an interactive graphics system for mapping operations.

**Prerequisite: SVT991**

**Credit Points: 8**

**Contact Hours: 3 per week**

**SVP513 DIGITAL MAPPING**

Advanced 3 dimensional mapping; analytical plotting systems including digital and graphical mapping.
digital elevation models and unconventional mapping.

Prerequisites: SVT443, SVT315
Credit Points: 8  Contact Hours: 3 per week

■ SVT623 PROJECT MAPPING
The role of government and the private sector in project mapping; planning mapping projects.
Prerequisites: SVT343, SVT443
Credit Points: 4  Contact Hours: 1.5 per week

■ SVT642 MAP PROJECTIONS 1
Special trigonometry and its application to map projections; projections using a sphere as reference surface.
Prerequisite: SVT115
Credit Points: 8  Contact Hours: 3 per week

■ SVT715 CARTOGRAPHY 1
Monochrome design; map compilation; the process camera for cartographic use; lithography.
Credit Points: 8  Contact Hours: 3 per week

■ SVT742 MAP PROJECTIONS 2
Geodesy: geometry of ellipse and ellipsoid; gravity; geodesy in mapping; the traverse mercator projection, geographic to grid and vice versa.
Prerequisite: SVT642
Credit Points: 8  Contact Hours: 3 per week

■ SVT7815 CARTOGRAPHY 2
Map production; registration systems; scribing and masking techniques; printing methods including letter press, gravure, offset lithography and silk screen, paper and ink manufacture; colour theory; Munsell's system, colour synthesis, colour correction.
Prerequisite: SVT715
Credit Points: 8  Contact Hours: 3 per week

■ SVT826 CARTOGRAPHIC ADMINISTRATION
Government and public administration; theory of organisations and its application to mapping agencies.
Credit Points: 8  Contact Hours: 3 per week

■ SVT915 CARTOGRAPHY 3
Economics of standard mapping, sheet sizes, map specifications, map accuracy; use of orthophotos; thematic mapping; special cartographic techniques.
Prerequisite: SVT815
Credit Points: 8  Contact Hours: 3 per week

■ SVT916 CARTOGRAPHY 4
Digital methods in cartography; compilation of data for computer-assisted cartography; coordinate systems and digitising; methods of display.
Prerequisites: SVT991, SVT315
Credit Points: 8  Contact Hours: 3 per week

■ SVT945 REMOTE SENSING
Remote sensing; data and information; electromagnetic propagation; spectral sensitivity and response; remote sensing imagery.
Prerequisite: SVT343
Credit Points: 8  Contact Hours: 3 per week

■ SVT992 COMPUTER GRAPHICS 2
Data for computer-assisted mapping; programming techniques for automated drafting; HP graphics language for driving plotters.
Prerequisites: SVT991, SVT315
Credit Points: 8  Contact Hours: 3 per week

Special Faculty of Business Electives

■ ALB102 CONSUMER STUDIES
The nature of the consumer society in the Australian economy; the interdependent roles of the consumer, business and government; consumer behaviour; products and services; marketing and advertising; consumer protection.
Credit Points: 12  Contact Hours: 3 per week

■ ALB106 LAW AND COMMUNICATION
The institutions of the law; ordering the law: public and private; the fashioning of law; cases, precedent, legislation, delegated legislation interpretation, facts, legal reasoning, the law library; limits on freedom of expression: torts, crimes, defamation, obscenity; laws affecting advertising: broadcasting, television and press; contempt of court.
Credit Points: 12  Contact Hours: 3 per week

■ ALB108 PUBLIC ADMINISTRATIVE LAW
Nature and development of law; precedent; deeds and statutes; torts; criminal law, constitutional law; foundations of administrative law; judicial review of administrative action, natural justice, ultra vires; common law remedies; legal position of the Crown and government instrumentalities; Administrative Appeals Tribunal; the Ombudsman; the Federal Court; the Judicial Review Act; freedom of information; law reform.
Prerequisite: EPB104
Credit Points: 12  Contact Hours: 3 per week

■ ALB130 INDIRECT TAXATION
Sales tax; customs and excise duties; stamp duty; payroll tax; land tax.
Prerequisite: ALB133
Credit Points: 12  Contact Hours: 3 per week

■ AYB214 COMPANY ACCOUNTING FOR EDUCATORS
Accounting procedures and records required on formation of a company; procedures for alteration of capital structure and for liquidations, amalgamations and consolidations of companies; professional and legal requirements of accounting reporting.
Prerequisite: Tertiary studies in accounting or relevant teaching experience.
Credit Points: 12  Contact Hours: 3 per week

■ AYB215 COMPUTERS IN ACCOUNTING 1
Business information systems concepts; accounting applications; controls and accounting; systems software-DOS; application software-accounting package; application software-spreadsheet package; application to business education.
Credit Points: 12  Contact Hours: 4 per week

■ AYB216 COMPUTERS IN ACCOUNTING 2
System design, implementation and installation; database query languages; business graphics; expert systems; communications; computer networks; application to business education.
Prerequisites: AYB215, AYB110
Credit Points: 12  Contact Hours: 4 per week

■ BSH100 MANAGEMENT & INDUSTRIAL RELATIONS
The development of modern management; contemporary managerial processes in the organisation and
in society; relations between managers and the state; unions and workers.

Credit Points: 12 Contact Hours: 4 per week

- **COB104 DRAMATURGY FOR PROFESSIONALS**
The relational level of communication; structure and style of message with special emphasis on non-verbal language; dramaturgical and experiential models. The theoretical perspectives of semiotic message analysis and action research underpin the practical exercises used.

Credit Points: 12 Contact Hours: 3 per week

- **COB107 INTERCULTURAL COMMUNICATION**
The social and cultural factors which affect international business communication. The influence of values, beliefs and customs on the communication process. It is anticipated that in 1992 a joint project will be conducted over the course of the semester with students in English language classes at Universities in Japan and South Korea.

Credit Points: 12 Contact Hours: 3 per week

- **COB109 ISSUES IN PUBLISHING**
The processes involved in book and magazine publishing. Topics include: changing media habits and literacy skills of consumers; the impact of technology and economics; the processes of publishing: strategic positioning, editorial concepts and steps in production.

Credit Points: 12 Contact Hours: 3 per week

- **COB117 BUSINESS ORGANISATION**
The interrelationship of key characteristics of the business organisation: people, strategies, structures, technology and the business environment.

Prerequisite: Business Management
Credit Points: 12 Contact Hours: 3 per week

- **COB124 OFFICE TRANSCRIPTION A**
Progressive development of audio transcription skills to an advanced level using a wide range of business correspondence including technical, legal and medical.

Credit Points: 12 Contact Hours: 4 per week

- **COB125 OFFICE TRANSCRIPTION B**
Synopsis as for COB124.

Credit Points: 12 Contact Hours: 3 per week

- **COB127 OFFICE MANAGEMENT**
The role of administrative management; policy making procedures involving administrative operations, communication and information management.

Credit Points: 12 Contact Hours: 3 per week

- **COB146 ADVANCED PROFESSIONAL WRITING**
The current principles and practices in writing professional documents; the content, style and presentation of professional documents; audience considerations and influences of new technology on corporate writing culture.

Prerequisite: COB160
Credit Points: 12 Contact Hours: 3 per week

- **COB147 CREATIVE WRITING**
Creative writing involving the communication of ideas and values within a social framework. Students examine the creative writing process with particular emphasis on the short story. Problems of publishing and marketing as a professional writer are considered.

Prerequisite: COB144
Credit Points: 12 Contact Hours: 3 per week

- **COB151 BUSINESS ORGANISATION**
The structure of business organisations; types of organisations; business objectives, strategies and policies; functions within business organisations; the role of unions and the nature of industrial relations in Australia; women's issues.

Prerequisite: Introduction to Management
Credit Points: 12 Contact Hours: 3 per week

- **COB152 ANALYSIS AND METHODOLOGY IN MANAGEMENT**
The first part of the subject is designed to establish a conceptual base suitable for the analysis of both abstract and empirical argument. The second part of the course builds upon the concept of a valid argument by introducing the notion of the empirical research process, both historical and scientific. A final project requiring the construction of an argument and integration of data is introduced to help integrate the analytical and empirical material, and demonstrate the student's ability to communicate meaning in an appropriate fashion. This may draw on introductory statistics and computing subjects.

Credit Points: 12 Contact Hours: 3 per week

- **COB153 ORGANISATIONAL ANALYSIS & MANAGEMENT**
How modern organisations operate and theirimport for the study and practice of management. It focuses on two key areas: analysis and understanding of organisational theory and social processes in organisations. Specific skills valuable to managers are identified and discussed. The major processes are examined, with a focus on decision making and communication processes.

Prerequisite: COB152
Credit Points: 12 Contact Hours: 3 per week

- **COB154 ORGANISATIONAL SOCIOLOGY**
Organisations in the public sector. The subject builds upon the Introduction to Sociology and Theory and Administration subjects to provide a detailed understanding of organisation theory.

Prerequisite/Co-requisite: Eight subjects in the Bachelor of Business degree including either Administrative Theory or Psychology.

Credit Points: 12 Contact Hours: 3 per week

- **COB156 ADVANCED SECRETARIAL STUDIES**
The role of the administrative secretary; secretarial procedures; office systems; office supervision; technology and the administrative secretary, incompatible with degree or higher qualifications in secretarial studies.

Prerequisite: Diploma of Teaching with a major in commercial studies or equivalent.

Credit Points: 12 Contact Hours: 3 per week

- **COB162 COMMUNITY BASED ORGANISATION: STRUCTURE & PROCESS**
Community improvement, service, cultural and economic development organisations and associations in Australian society; their background, purposes, means of operation and relationship with their environment and wider society. Particular concern is paid to the skills necessary to develop and maintain success organisations.

Prerequisite: COB129
Credit Points: 12 Contact Hours: 3 per week
EPB126 GOVERNMENT ECONOMIC POLICY
Problems in the economics of government social policy; social policy and its impact on the allocation of resources and distribution of income and wealth; the theory of taxation; fiscal federalism; the significance of the size and growth of the public sector. The application of economic analysis in a number of areas of social policy, including health and medical care, social security, education, environmental protection and housing.
Prerequisites: EPB150 or EPB151
Credit Points: 12 Contact Hours: 3 per week

EPB129 INTERNATIONAL BUSINESS STRATEGIES
The environment of international business; interaction with international home societies; business customs, protocol and values; methods of operation in Asian Pacific countries; trade policy issues; international agreements and conventions; organisation; negotiation; the future.
Credit Points: 12 Contact Hours: 3 per week

EPB134 LABOUR ECONOMICS
This subject applies analytical tools acquired from the preceding subjects investigating specific market applications both at the micro and macro levels. Credit Points: 12 Contact Hours: 3 per week

MJB112 MEDIA PRAXIS 3
Experimentation with a greater variety of production codes in three areas: still photography, video production and film production.
Prerequisite: MJB145
Credit Points: 12 Contact Hours: 3 per week

MJB119 AUSTRALIAN LITERATURE AND FILM IN SOCIETY
Selective thematic and textual analysis of Australian literature and film as expressions of Australian culture; the broader questions of representation and national cinema; the focus is principally upon film.
Prerequisite: Australian Studies
Credit Points: 12 Contact Hours: 3 per week

MJB133 COMPARATIVE JOURNALISM
Continuation of Media Praxis 1; the production of meaning in media texts through practical work. Students deal exclusively with audiovisual media and continue to use video equipment but are involved in more complex production tasks.
Prerequisite: Media Praxis 1
Credit Points: 12 Contact Hours: 3 per week

MJX100 TELEVISION PRODUCTION
Basic application of production techniques to performance statistics.
Credit Points: 12 Contact Hours: 3 per week
MKB103 MARKETING EXPERIMENTATION
Experimental design for the development of marketing theory and for rigorous control of the environment in finding casual relationships; field and laboratory experiments external and internal validity; extraneous variables; control groups; combining experimental treatments in factorial designs and interactive effects.
Prerequisite: EPB109
Credit Points: 12  Contact Hours: 3 per week

MKB104 ADVANCED MARKETING RESEARCH TECHNIQUES
The subject aims to give students a good working familiarity with the most used techniques in marketing research. A detailed analysis of concepts gained in marketing research.
Prerequisite: EPB109  Co-requisite: MKB151
Credit Points: 12  Contact Hours: 3 per week

MKB105 PROFESSIONAL PUBLIC RELATIONS PRACTICE
Final year undergraduates work in public relations oriented organisations, under supervision for 4 weeks. Undergraduates arrange for their own placements, which must be approved by the lecturer responsible for the subject. Acceptance into this subject is not a right and is subject to the approval of the Head of School, and/or Major Coordinator.
Prerequisites: MKB123, MKB120. Undergraduates must have successfully completed 5 semesters of the full-time course or equivalent.
Credit Points: 12  Contact Hours: 3 per week

MKB106 PROFESSIONAL ADVERTISING PRACTICE
Final year undergraduates work in advertising oriented organisations under supervision for 4 weeks. Undergraduates arrange for their own placements, which must be approved by the lecturer responsible for the subject. Acceptance into this subject is not a right and is subject to the approval of the Head of School, and/or Major Coordinator.
Prerequisite: MKB126 and students must have completed 5 semesters full-time or equivalent.
Credit Points: 12  Contact Hours: 3 per week

MKB107 MARKETING DECISION SUPPORT SYSTEMS
Advanced treatment of the theory and application of marketing decisions; the evaluation of marketing policy and strategy; consumer and organisational buying behaviour; market segmentation, demand assessment; product, price, promotion and distribution..
Prerequisites: MKB141 and EPB109
Credit Points: 12  Contact Hours: 3 per week

MKB109 SPECIAL TOPIC IN MARKETING
Current and/or controversial issues in marketing. Use of relevant experts is an important ingredient of the subject.
Prerequisite: MKB140 or MKN106
Credit Points: 12  Contact Hours: 3 per week

MKB110 MARKET ANALYSIS REALITIES
Market segmentation techniques; estimating market potential; new product research including concept testing, prediction of trial purchase and test marketing; customer satisfaction theory, measurement and profit implications; a substantial practical component including a large research project is involved.
Co-requisite: MKB151
Credit Points: 12  Contact Hours: 3 per week

MKB111 MARKETING MEASUREMENT CONCEPTS
Questionnaire design for marketing research; question relevance, accuracy, sequence and layout; measurement and scaling concepts; measurement of advertising effectiveness. A hands-on approach to questionnaire design and measurement.
Prerequisite: EPB109
Credit Points: 12  Contact Hours: 3 per week

MKB119 ADVERTISING COPYWRITING
The essential tasks of retail advertising; motivational techniques; retail and national advertising; imagery and typography; advertising departments versus agencies; handbills, inserts, direct mail and catalogues; audience differentiation; measuring results; planning, copywriting and presentation of retail companies.
Prerequisite: MKB118 or MKB145
Credit Points: 12  Contact Hours: 3 per week

MKB121 RETAIL ADVERTISING
The theory and application of quantitative forecasting models including smoothing techniques, CDA and auto-projective; casual models in sales and advertising; qualitative models including Delphi.
Prerequisite: EPB109
Credit Points: 12  Contact Hours: 3 per week

MKB134 BUSINESS FORECASTING
The theory and application of quantitative forecasting models including smoothing techniques, CDA and auto-projective; casual models in sales and advertising; qualitative models including Delphi.
Prerequisite: EPB109
Credit Points: 12  Contact Hours: 3 per week

MKB138 MARKET SIMULATION
This subject develops an understanding of the effectiveness of marketing strategies in differing market structures. Topics include: Australian market structures; pricing variations; risk and uncertainty; product pricing; transfer pricing; capital budgeting.
Prerequisites: EPB116 and EPB109
Credit Points: 12  Contact Hours: 3 per week

MKB157 PRINCIPLES OF DIRECT MARKETING
The underlying principles, standards and practice of direct marketing; customer requirements; acquisition and servicing; strategic and tactical planning; database marketing; list procurement and use; cost and profit considerations; product delivery.
Prerequisite: MKB142
Credit Points: 12  Contact Hours: 3 per week

MKP106 ADVERTISING SEMINAR
Advertising and promotion management; the purpose, planning, profit contribution and selective communication strategies as they apply to audience and market segmentation; the consistent relationship of the promotional component to the advertising component and their integration. Research methods and media planning is considered against the basic thrust of this binary communication model.
Credit Points: 12  Contact Hours: 3 per week
