A curriculum to help you create change

Join a globally recognised program that equips you with essential skills to master both foundational and advanced project management practices.

Our courses are built on internationally acclaimed frameworks like the Project Management Body of Knowledge (PMBOK), opening doors to manage and deliver successful projects across diverse sectors and industries. Our curriculum emphasises practical application, immersive learning experiences and cutting-edge research insights, ensuring you develop into a professional, ethical and digital leader.

Why choose QUT

- Benefit from an on-campus learning experience that fosters connections with industry leaders and likeminded peers already employed in industry.
- Gain industry credibility with courses that are accredited by the Project Management Institute (PMI) and endorsed by the Australian Institute of Project Management (AIPM).
- Access shortened course duration based on previous project management study and professional work experience.

Did you know?

If you're an experienced Project Management professional your work experience and any professional certifications could reduce your course duration.
