

Health Care Law and Ethics

Participants in this online short course will develop an understanding of health law, health ethics and the relationships between the two.

Develop an understanding of health law, health ethics and the relationships between the two with this short course, presented by experts in health law and ethics.

Areas of focus include:

- an introduction to ethical theories and health law
- macro-level issues including the right to health and health rationing
- micro-level issues including patient safety
- developments and emerging issues in healthcare ethics and law.

Evolve with QUTeX

Develop an understanding of health law, health ethics and the relationships between the two with this short course, presented by experts in health law and ethics.

Who should participate?

Health professionals and practitioners from a wide range of fields, who are interested in receiving an introduction to the intersections between ethics and law in the healthcare setting.

Core concepts

On completion of this course, you'll have the ability to:

- demonstrate a comprehensive knowledge and understanding of the links between law and ethics in health care
- demonstrate a critical appreciation of the dynamic nature of law and ethics in health care, in terms of its continuing development and the impact of various legal, ethical, moral, economic, political, philosophical, social, and cultural factors on developments in this area
- clearly express and defend positions on a range of issues at the intersection of health care ethics and law in a manner that is both respectful and constructive and acknowledges contrasting perspectives
- research, synthesise, critically analyse, and evaluate complex legal and ethical issues in a healthcare context.

Your expert facilitator

Associate Professor Shih-Ning Then commenced with the School of Law in 2008. Shih-Ning is a socio-legal academic who researches and teaches in the areas of medical law and ethics. She is an experienced interdisciplinary researcher who has published with medical practitioners, ethicists, and other interdisciplinary scholars. Shih-Ning's research interests include:

- guardianship, substituted and supported decision-making
- regulation of biomedical science
- artificial reproductive technologies
- involvement of minors in a health context
- use of human tissues and tissue donation and transplantation
- health law and ethics
