Our training in analytical chemistry throughout the chemistry degree is renowned nationally. You will undertake a comprehensive laboratory program including experiments using modern computer-based analytical instruments and gain vital knowledge and experience in the health and safety aspects of handling chemicals. You will learn under the guidance of highly respected

Bachelor of Science (Chemistry)

lecturers, most of whom are actively involved in cutting-edge research.

Career outcomes

Among a diverse range of employment opportunities, you may become an industrial chemist, materials scientist, environmental chemist, quality control analyst, laboratory supervisor, food chemist, or an organic/inorganic chemist. Your interaction with QUT experts in current fields of interest, including drug development, clay and minerals chemistry, renewable energy sources, nanotechnology, environmental monitoring, and applications of modern analytical instrumentation, may lead to careers in these areas.

QUT graduates are sought after by police and other forensics laboratories because of their extensive practical training using modern analytical instrumentation. With the addition of a postgraduate diploma in education, you may wish to pursue opportunities in the teaching profession.

Professional recognition

Graduates completing the chemistry major with the chemistry for industry second major are eligible for membership of the Royal Australian Chemical Institute.

Domestic Course structure

Faculty core units

These seven units give you an introduction to the principles of science. The inquiry based experimental science units will give you the opportunity to learn by enquiry and become familiar with the methods of scientific inquiry.

From your very first semester, you will collaborate with your peers and teaching staff in QUT's exciting new learning environments. You will explore real-world problems from multiple scientific perspectives and learn the tools of the trade. Depending on your choices, you may find yourself out in the field, working in the laboratory or learning about the impact of scientific discovery on people, policy, industry and the planet.

Working with data you have collected, you'll study how to apply fundamental methods of scientific practice, perform scientific analysis, and learn the tools to present your findings. You'll have the opportunity to explore and discover the range of career and professional outcomes available to you, so you can gain the most from your unit selection and the flexibility the Bachelor of Science has to offer.

Primary major

Your major is your main area of study for what you aspire to become professionally. You will receive in-depth knowledge and expertise within your chosen scientific discipline, preparing you for entry into the workforce or further study. Your primary major comprises 11 units.

Complementary study areas

This is where you make the degree your own, tailoring your studies to further match your individual career goals with a wide range of complementary study options available. You'll have the opportunity to develop sought-after professional skills, deepen your understanding of your major discipline, pursue an interest from across the university, or broaden your scientific understanding. You can even work with industry or study overseas to gain credit towards your degree.

You can choose: a second major (eight units); or two minors (four units each).

Second major (eight units)

Choose a second area of study to complement your major, and develop a significant depth of knowledge and skills in two discipline areas. Experience another field, learn another academic methodology and experience interdisciplinary networking.

Choose a second science discipline (biological sciences, earth science, environmental science or physics), or explore different perspectives which might include:

- computational and simulation science
- human biomolecular sciences
- innovation and entrepreneurship, or
- sustainable environments for health

Minor (four units)

You might prefer to expand the breadth and depth of your studies by adding to your chosen science major with two minors.

Writing	6.0
Speaking	6.0

Overview

The Earth is an amazing place and for an earth scientist, it offers a unique natural laboratory that covers both space and time. Earth science is a multidisciplinary science that applies the tools of chemistry, physics, biology and mathematics to understand earth processes, decipher its past and predict its future. Earth scientists work to monitor changes in the Earth's environment and suggest solutions to environmental problems. They study natural hazards to find ways to lessen the loss of life and reduce property damage.

Earth scientists play key roles in the search for fuels and minerals. Climate change, earthquakes, and geothermal energy are just a few of the issues that require knowledge of earth science. Earth science (also known as geoscience) blends the traditional fields of geology, physical geography and oceanography/hydrology. Geology describes the rocky parts of the Earth's crust (or lithosphere) and its historic development. Physical geography, which studies the Earth's surface, includes geomorphology, soil science, and biogeoscience. The marine and freshwater parts of Earth define the fields of oceanography and hydrology.

Why choose this course?

Earth science is an exciting and fun science with many interesting and practical applications and a great number of travelling opportunities. If you enjoy working outdoors and are interested in understanding how the world works, then you will find earth science a rewarding area of study. Blending current research issues and problem solving with theory and industry-related, hands-on practicals, the earth science major provides you with a fundamental background to pursue a career in either the resource or the environmental sector.

Career outcomes

There is currently a shortage of earth scientists in Australia and employment rates are high and salaries great. Earth scientists are in high demand in the

Bachelor of Science (Earth Science)

energy sector (oil, gas, coal, geothermal) and exploration and mining industries. Many earth scientists find employment in environmental consulting companies tackling geotechnical, groundwater contamination, natural hazards or climate change issues. Earth scientists may work for government agencies such as CSIRO and Geoscience Australia doing applied research, or for state or local governments.

Domestic Course structure

Faculty core units

These seven units give you an introduction to the principles of science. The inquiry based experimental science units will give you the opportunity to learn by enquiry and become familiar with the methods of scientific inquiry.

Why choose this course?

The environmental science course at QUT is designed to provide hands-on skills and field experiences using real-world industry examples and methods to allow you to pursue a variety of careers as an environmental scientist. The program has particular strengths in the areas of land resources, hydrogeology, environmental geology, biogeochemistry, geographic information systems and field mapping, systems modelling and sustainable management.

The program also emphasises practical skills and experience, including day-long and extended field trips. You will learn from guest lecturers from relevant government agencies, industry and QUT staff who regularly provide advice for industry, government and community groups.

Overview

We rely on our natural environment to sustain our lives and our lifestyles. Do you want to help the earth's natural environment to maintain its integrity while continuing our urban and rural development? Have you wanted to be part of the solution to our increasing environmental issues such as climate change, air, water and soil quality, soil erosion, dry land salinity or water resources? We continually need to improve our understanding and management of the natural environment to balance our development with wise management while minimising impacts and degradation.

An understanding of the mechanisms controlling environmental systems provides the skills required to undertake a great range of scientific environmental planning and management, and tackle problems such as local water quality and ecosystem impacts, soil erosion, catchment and groundwater use, or adaptation to global climate change.

Career outcomes

Environmental scientists are continually needed in a wide variety of planning,

Bachelor of Science (Environmental Science)

management, monitoring and research careers. These roles are usually found in government departments and agencies, local councils, consultancy, and industrial and mining companies. As an environmental science graduate, you could be working in urban, rural or remote settings depending on your interests.

Graduates are equipped to assess resources, implement environmental impact programs, analyse and interpret environmental data and formulate contingency plans in a wide variety of areas. These include strategic land use planning; waste disposal; pollution measurement and control; coastal protection; environmental impact of mining, tourism and urban development; rehabilitation and reforestation of degraded sites; ground water assessment and modelling; flood plain planning; erosion control; and marine science.

Professional recognition

Graduates are eligible for membership of the Environment Institute of Australia and New Zealand and a variety of other scientific societies, including the Soil Science Society of Australia and the Ecological Society of Australia.

Domestic Course structure

Faculty core units

These seven units give you an introduction to the principles of science. The inquiry based experimental science units will give you the opportunity to learn by enquiry and become familiar with the methods of scientific inquiry.

From your very first semester, you will collaborate with your peers and teaching staff in QUT's exciting new learning environments. You will explore real-world problems from multiple scientific perspectives and learn the tools of the trade. Depending on your choices, you may find yourself out in the field, working in the laboratory or learning about the impact of scientific discovery on people, policy, industry and the planet.

Working with data you have collected, you'll study how to apply fundamental methods of scientific practice, perform scientific analysis, and learn the tools to present your findings. You'll have the opportunity to explore and discover the range of career and professional outcomes available to you, so you can gain the most from your unit selection and the flexibility the Bachelor of Science has to offer.

Primary major

Your major is your main area of study for what you aspire to become professionally. You will receive in-depth knowledge and expertise within your chosen scientific discipline, preparing you for entry into the workforce or further study. Your primary major comprises 11 units.

Complementary study areas

This is where you make the degree your own, tailoring your studies to further match your individual career goals with a wide range of complementary study options available. You'll have the opportunity to develop sought-after professional skills, deepen your understanding of your major discipline, pursue an interest from across the university, or broaden your scientific understanding. You can even work with industry or study overseas to gain credit towards your degree.

You can choose: a second major (eight units); or an extended minor (four units) or breadth minor (four units), plus either a faculty minor (four units) or breadth minor (four units).

Second major (eight units)

Choose a second area of study to complement your major, and develop a significant depth of knowledge and skills in two discipline areas. Experience another field, learn another academic methodology and experience interdisciplinary networking.

Choose a second science discipline (biological sciences, chemistry, earth science or physics), or explore different perspectives which might include:

- computational and simulation science
- human biomolecular sciences
- innovation and entrepreneurship, or
- sustainable environments for health

Minor (four units)

You might prefer to expand the breadth and depth of your studies by adding to your chosen science major with two minors. Minors include:

Extension minor (four units)

Gain further insights and depth in your primary area of study. Intensify your chosen major to develop additional knowledge, skills and experience for your career in science.

Breadth minor (four units)

Broaden your studies to include minors from the list of science majors, second

majors or from the list of university-wide minors.

Overview

Physicists are involved in finding solutions to many current and future challenges facing our world. These include developing instruments for environmental monitoring, computer models for climate change prediction, and developing solar and renewable energy systems. Physicists are also attempting to address the world's ever-increasing appetite for information and information processing by undertaking research into quantum computers, nanotechnology, lasers and photonics.

Physics deals with the natural laws and processes, and the states and properties, of matter, energy, space and time. Physics also underlies many of the recent advances in information technology, medicine and biotechnology. Areas of specialisation include mechanics, electromagnetism, lasers and optics, medical physics, computational physics, nuclear and radiation physics, astronomy and astrophysics, thermodynamics, quantum mechanics and relativity.

Why choose this course?

QUT's physics course has a strong applied emphasis so you will spend a significant amount of time in the undergraduate teaching laboratories. In each unit that you study the theory will be supported by experimental work. In your final year, you will undertake research and gain exposure to the research laboratories through the experimental physics unit.

You can also apply for a Vacation Research Experience Scholarship to gain experience working on a research project. Many of the lecturers at QUT have worked in industry and QUT works closely with industry through consultancy and research projects, so you can be sure that the course will be up to date and relevant to the real world.

Career outcomes

Physicists are an asset to almost any industry. Employment areas of QUT physics graduates are very wide ranging.

Bachelor of Science (Physics)

These include research and development departments of large manufacturing companies, mining and exploration companies, research institutions such as the Commonwealth Scientific and Industrial Research Organisation and the Defence Science and Technology Organisation, government bodies such as the Bureau of Meteorology, environmental protection agencies and health departments, schools, universities and hospitals.

Broad training in data analysis and problem-solving skills also makes physicists well suited to management and consulting roles in a range of technology based industries.

Professional recognition

Graduates are eligible for membership of the Australian Institute of Physics, dependent on choice of study options.

Domestic Course structure

Faculty core units

These seven units give you an introduction to the principles of science. The inquiry based experimental science units will give you the opportunity to learn by enquiry and become familiar with the methods of scientific inquiry.

From your very first semester, you will collaborate with your peers and teaching staff in QUT's exciting new learning environments. You will explore real-world problems from multiple scientific perspectives and learn the tools of the trade. Depending on your choices, you may find yourself out in the field, working in the laboratory or learning about the impact of scientific discovery on people, policy, industry and the planet.

Working with data you have collected, you'll study how to apply fundamental methods of scientific practice, perform scientific analysis, and learn the tools to present your findings. You'll have the opportunity to explore and discover the range of career and professional outcomes available to you, so you can gain the most from your unit selection and the flexibility the Bachelor of Science has to offer.

Primary major

Your major is your main area of study for what you aspire to become professionally. You will receive in-depth knowledge and expertise within your chosen scientific discipline, preparing you for entry into the workforce or further study. Your primary major comprises 11 units.

Complementary study areas

This is where you make the degree your own, tailoring your studies to further match your individual career goals with a wide range of complementary study options available. You'll have the opportunity to develop sought-after professional skills, deepen your understanding of your major discipline, pursue an interest from across the university, or broaden your scientific understanding. You can even work with industry or study overseas to gain credit towards your degree.

You can choose: a second major (eight units); or two minors (four units each).

Second major (eight units)

Choose a second area of study to complement your major, and develop a significant depth of knowledge and skills in two discipline areas. Experience another field, learn another academic methodology and experience interdisciplinary networking.

Choose a second science discipline (biological sciences, chemistry, earth science or environmental science), or explore different perspectives which might include:

- computational and simulation science
- human biomolecular sciences
- innovation and entrepreneurship, or
- sustainable environments for health.

Minor (four units)

You might prefer to expand the breadth and depth of your studies by adding to your chosen science major with two minors. For instance, discipline-specific minors include:

- Astrophysics
- Nanotechnology

Prerequisites

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Biology (Units 3 & 4, B); *and*
- completion of Year 12 or attained age 18 years.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- One of Agricultural Science, Biology, Chemistry, Earth and Environmental Science, Marine Science, Physics, or Psychology (Units 3 & 4, C)
- Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Academic entry requirements

You must be a current student completing Year 12 in Australia.

You will be considered solely on the basis of your ATAR or IB Diploma results.

Please refer to the [Guide to entry thresholds](#).

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Year	2023
QUT code	ST20
CRICOS	102820D
Duration (full-time)	4 years
ATAR/Selection rank	90.00
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$7,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$39,200 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.

Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements Prerequisites

Before you start this course, you must have obtained the required result for the Queensland year 12 subjects (or equivalent senior subjects) listed below within your Year 12 studies.

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Biology (Units 3 & 4, B).

Assumed knowledge

Before you start this course, we assume you have sound knowledge of the subject/s listed below. If you don't have the subject knowledge, you can still apply for the course but we encourage you to undertake bridging studies to gain the knowledge:

- Specialist Mathematics (Units 3 & 4, C); *and*
- At least one of Agricultural Science, Chemistry, Earth and Environmental Science, Marine Science or Physics (Units 3 & 4, C).

Additional entry requirements

You must be a 2022 Year 12 student or a recent Year 12 student returning from up to two gap years.

Adjustments to your ATAR/selection rank

Elite Athlete Scheme adjustments do not apply to this course. Any other adjustments you receive to your ATAR or selection rank will be applied to this course.

[Find out if you're eligible for an adjustment to your ATAR or selection rank](#)

Domestic Course structure

ST20 Bachelor of Science Advanced (Honours) comprises 384 credit points (32 units), including 4 core units (STB100, STB200, STB300 and a core option), 240 credit points (20 units) discipline specific major units (including 8 Honours level units) and 96 credit points (8 units) of complementary studies (2 minors).

The Biological Sciences Major consists of twenty (20) units [240cp]:

Biological Sciences Majors are also required to complete the following study area B components (Minors)

- Statistical Modelling minor

and one minor (48 cp) from:

- Biotechnology and Genetics minor
- Wildlife Ecology Minor
- Advanced Science Minor

The Biological Sciences Major consists of twenty (20) units [240cp]:

Biological Sciences Majors are also required to complete the following study area B components (Minors)

- Statistical Modelling minor

and one minor (48 cp) from:

- Biotechnology and Genetics minor
- Wildlife Ecology Minor
- Advanced Science Minor

Sample Structure

The Biological Sciences major in the Bachelor of Science Advanced (Honours) is structured to provide high-achieving students with a strong applied knowledge of biology, building on foundational knowledge obtained in high school. The major will extend understanding of the structure, function and diversity of living things, from cells to whole organisms, including key areas of plant and animal biology and microbiology and the interaction with each other and the environment. The Biological Sciences major is complemented and extended with a minor in either Biotechnology & Genetics or Wildlife Ecology or a minor specifically tailored to future research goals. Students will study units in their first semester which help them identify which area they wish to pursue. By integrating theory and practice and with a strong focus on experimental design, students will learn to apply key biological principles to important areas such as conservation, food security and biotechnology that will lead to research opportunities third and fourth year research units. All students in the major will have the opportunity to participate in research-based activities in these or other key areas of biology through the ST20 core units and through extracurricular activities. Graduates of the Biological Science major will be skilled at the desk, in the laboratory and in the field with strong skills in one of the areas closely aligned to research. They will have advanced research skills and critical thinking ability needed to tackle real-world problems in biology and undertake cutting edge research. These attributes will support high-achieving students in post-graduate study and a research career.

Sample Structure

Earth Science is critical for Australia's future sustainable development as our natural resources are a major building block of the nation's economy.

Geoscientists play a leading role in finding, developing and managing these resources, as well as studying climate change and managing environmental issues, such as chronic water shortage, dry land salinity and coastal development.

An understanding of Planet Earth is fundamental to your career as a Scientist. Earth Science provides us with an understanding of Earth materials, the natural processes acting in and upon our planet, and its history. You will gain advanced skills needed to become a professional Earth Scientist with special emphasis on hands-on skills acquired through laboratory work and field studies for both resource exploration and management and environmental applications. The program provides you with particular strengths in the areas of sedimentary geology, structural geology, igneous processes and geology, hydrogeology, marine geology, and environmental geology - all these subject areas are of particular importance to Queensland and key industrial sectors that underpin our economy. The Earth Science major in the Bachelor of Science Advanced (Honours) will qualify you with an advanced and coherent knowledge in Earth Science.

Study Area B requirements for an Environmental Science Major are:

- Statistical Modelling minor

And one minor (48 cp from)

- Environmental Management Minor
- Advanced Science Minor

Sample Structure

The Environmental Science major in the Bachelor of Science Advanced (Honours) will qualify students with an advanced and coherent knowledge of environmental processes and systems. The study of Environmental Science provides an in depth knowledge of the Earth's natural resources and an understanding of the mechanisms, natural processes and human impacts that shape environmental systems. Environmental Scientists play an integral role in managing Australia's future sustainable development, environment impacts and resource management while minimising impacts and degradation.

Within this major students will gain the skills required to pursue a career as a professional environmental scientist, science educator or resource manager. This will be achieved with an emphasis on developing theoretical understanding of environmental processes and systems together with hands-on skill development and hypothesis testing through practical and field studies. The major will provide students with particular strengths in the areas of land resources, environmental impacts, geographic information systems and field mapping, systems modelling and environmental management.

International fee (indicative)	2023: \$39,200 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Brett Williams
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements Prerequisites

Before you start this course, you must have obtained the required result for the Queensland year 12 subjects (or equivalent senior subjects) listed below within your Year 12 studies.

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Physics (Units 3 & 4, B).

Assumed knowledge

Before you start this course, we assume you have sound knowledge of the subject/s listed below. If you don't have the subject knowledge, you can still apply for the course but we encourage you to undertake bridging studies to gain the knowledge:

- Specialist Mathematics (Units 3 & 4, C); *and*
- At least one of Agricultural Science, Chemistry, Earth and Environmental Science, Marine Science or Physics (Units 3 & 4, C).

Additional entry requirements

You must be a 2022 Year 12 student or a recent Year 12 student returning from up to two gap years.

Adjustments to your ATAR/selection rank

Elite Athlete Scheme adjustments do not apply to this course. Any other adjustments you receive to your ATAR or selection rank will be applied to this course.

[Find out if you're eligible for an adjustment to your ATAR or selection rank](#)

International Entry requirements

Academic entry requirements

You must be a current student completing Year 12 in Australia.

You will be considered solely on the basis of your ATAR or IB Diploma results.

Please refer to the [Guide to entry thresholds](#).

Prerequisites

Before you start this course, you must have obtained the required result for the Queensland year 12 subjects (or

equivalent senior subjects) listed below within your Year 12 studies.

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Physics (Units 3 & 4, B).

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)
- Physics (Units 3 & 4, B)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

ST20 Bachelor of Science Advanced (Honours) comprises 384 credit points (32 units), including 4 core units (STB100, STB200, STB300 and a core option), 240 credit points (20 units) Physics units (including 8 Honours level units) and 96 credit points (8 units) of complementary studies (2 minors).

Physics Majors are also required to complete the following study area B components (Minors)

- Mathematics for Physics minor

and one minor (48 cps) from:

- Astrophysics Minor
- Nanotechnology Minor
- Advanced Science minor

Domestic Entry requirements

Additional entry requirements

You must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

To demonstrate this you must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. Details are available from the [QTAC initial teacher education webpage](#).

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

Overseas qualifications

We will consider equivalent overseas qualifications for admissions purposes. If your previous studies were completed in a country other than Australia, Canada, New Zealand, Republic of Ireland, United Kingdom, or the United States of America or undertaken in a language other than English you must provide evidence of your English language proficiency.

English language proficiency

We require students to demonstrate they can speak, write, read and comprehend academic English to a specified standard.

Our English proficiency requirements for this course are:

- IELTS (Academic): 7.5 or better overall with speaking and listening subscores of 8.0 or better and no other subscore below 7.0

The test must have been completed within 2 years prior to the proposed course start month.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) Capabilities Criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

Domestic Entry requirements

Additional entry requirements

You must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

To demonstrate this you must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. Details are available from the [QTAC initial teacher education webpage](#).

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

Overseas qualifications

We will consider equivalent overseas qualifications for admissions purposes. If your previous studies were completed in a country other than Australia, Canada, New Zealand, Republic of Ireland, United Kingdom, or the United States of America or undertaken in a language other than English you must provide evidence of your English language proficiency.

English language proficiency

We require students to demonstrate they can speak, write, read and comprehend academic English to a specified standard.

Our English proficiency requirements for this course are:

- IELTS (Academic): 7.5 or better overall with speaking and listening subscores of 8.0 or better and no other subscore below 7.0

The test must have been completed within 2 years prior to the proposed course start month.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) Capabilities Criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

International Entry requirements

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) Capabilities Criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

Course requirements: Literacy and numeracy

You will need to successfully complete the National Literacy and Numeracy Test for Initial Teacher Education Students to graduate from the course. You are permitted three test attempts in total for each component as a student at QUT. If you fail three test attempts for each component, you will not be able to graduate. You are not eligible to apply for a place in the course if you have failed two test attempts for one or more components, at another institution. The test will assess your personal literacy and numeracy skills. QUT provides you with one reimbursement to cover the cost of the test. For more information view additional course requirements.

Minimum English requirements

Students must meet the English proficiency requirements.

Speaking	6.0

Domestic Course structure Your course

To complete this course, you must complete a total of 384 credit points comprising 192 credit points from the Bachelor of Creative Industries and 192 credit points from the Bachelor of Information Technology. You will undertake the two components of the double degree concurrently.

Creative Industries component

The core of the program centres on Creative Enterprise studios that offer authentic, problem-based activities, coupled with work integrated learning, skills in entrepreneurship and commercial links that engage in creative start-ups.

Early in your degree, you choose 24 credit points of introductory units to experience your preferred majors, with the option to undertake defined breadth units in other relevant areas. Using this experience, you then decide upon a creative industries major.

You will complete:

- core units - 72 credit points
- creative industries introductory units - 24 credit points
- a creative industries major - 96 credit points from one of the specified majors including: Creative and Professional Writing; Media and Communication; Drama and Performance; Entertainment; Fashion Communication; Interactive and Visual Design; Music and Sound; and Screen Content Production.

Information Technology component

You will complete:

- core units - 72 credit points (6 units)
- a information technology major - 120 credit points (10 units) from one of the specified majors: Computer Science or Information Systems.

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners. Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

Year	2023
QUT code	ID10
CRICOS	096583M
Duration (full-time)	4 years
ATAR/Selection rank	70.00
Offer Guarantee	Yes
Campus	Gardens Point, Kelvin Grove
Domestic fee (indicative)	2023: CSP \$11,200 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,700 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Program Director, School of Communication; Associate Professor Wayne Kelly (Information Technology); AskQUT askqut@qut.edu.au; +61 7 3138 2000;

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Prerequisites

Satisfactory completion of Year 12 in an Australian school system or equivalent.

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Communication (Digital Media) and 192 credit points from the Bachelor of Information Technology. You will undertake the two components of the double degree concurrently.

Communication component

You will complete:

- four core units (48 credit points)
- a communication major (144 credit points) in digital media.

Information technology component

You will complete:

- six core units (72 credit points)
- ten major core units (120 credit points) from one of the specified majors: computer science or information systems.

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners. Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

Year	2023
QUT code	ID11
CRICOS	096584K
Duration (full-time)	4 years
ATAR/Selection rank	75.00
Offer Guarantee	Yes
Campus	Gardens Point, Kelvin Grove
Domestic fee (indicative)	2023: CSP \$11,800 per year full-time (96 credit points)
International fee (indicative)	2023: \$35,800 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	AskQUT askqut@qut.edu.au; +61 7 3138 2000;
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Communication (Journalism) and 192 credit points from the Bachelor of Science. You will undertake the two components of the double degree concurrently.

Communication component

You will complete:

- four core units (48 credit points)
- a communication major (144 credit points) in journalism.

Science component

You will complete seven core units (60 credit points) which includes 6 credit point units, and a science major (132 credit points) in one of the following study areas:

- biological sciences
- chemistry
- earth science
- environmental science
- physics

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners. Overseas

study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

International Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Communication (Journalism) and 192 credit points from the Bachelor of Science. You will undertake the two components of the double degree concurrently.

Communication component

You will complete:

- four core units (48 credit points)
- a communication major (144 credit points) in journalism.

Science component

You will complete seven core units (60 credit points) which includes 6 credit point units, and a science major (132 credit points) in one of the following study areas:

- biological sciences
- chemistry
- earth science
- environmental science
- physics

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners. Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Prerequisites

Satisfactory completion of Year 12 in an Australian school system or equivalent.

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Design (Interaction Design) and 192 credit points from the Bachelor of Information Technology. You will undertake the two components of the double degree concurrently.

Design component

You will complete:

- four school-wide impact lab units (48 credit points)
- the interaction design major (144 credit points), including: four shared foundation units (48 credit points) seven units (96 credit points) from the discipline.

Information technology component

You will complete:

- six core units (72 credit points)
- ten major core units (120 credit points) from one of the specified majors: computer science or information systems.

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements Prerequisites

Satisfactory completion of Year 12 in an Australian school system or equivalent.

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Design (Landscape Architecture) and 192 credit points from the Bachelor of Science. You will undertake the two components of the double degree concurrently.

Design component

You will complete:

- four school-wide impact lab units (48 credit points)
- the landscape architecture major (144 credit points), including: four shared foundation units (48 credit points) eight units (96 credit points) from the discipline.

Science component

You will complete seven core units (60 credit points) which includes 6 credit point units, and a science major (132 credit points) in one of the following

study areas:

- biological sciences
- chemistry
- earth science
- environmental science
- physics

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in a creative or non-creative discipline area, depending on how they match with your QUT course.

International Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Design (Landscape Architecture) and 192 credit points from the Bachelor of Science. You will undertake the two components of the double degree concurrently.

Design component

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in a creative or non-creative discipline area, depending on how they match with your QUT course.

QUT code	ID22
CRICOS	099057J
Duration (full-time)	4.5 years
Duration (part-time domestic)	9 years
ATAR/Selection rank	71.00
Offer Guarantee	Yes
Campus	Gardens Point, Kelvin Grove
Domestic fee (indicative)	2023: CSP \$6,600 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,800 per year full-time (96 credit points)
Total credit points	432
Credit points full-time sem.	48
Credit points part-time sem.	24
Start months	July, February
Int. Start Months	July, February
Course Coordinator	AskQUT askqut@qut.edu.au; +61 7 3138 2000;
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

Prerequisites

- English, or literature, or English and literature extension, or English as an additional language (units 3 & 4, C)
- General mathematics, mathematical methods or specialist mathematics (units 3 & 4, C)

Haven't completed the prerequisite subjects?

You may be able to meet the prerequisite requirements if you've completed equivalent subjects or by completing bridging courses.

[How to meet prerequisite requirements](#)

Non-academic entry requirements

You must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

To demonstrate this you must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. Details are available from the [QTAC initial teacher education webpage](#).

If you've achieved a satisfactory result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the satisfactory result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at unsatisfactory after two test attempts for that component.

Overseas qualifications

We will consider equivalent overseas qualifications for admissions purposes. If you have tertiary qualifications from countries where English is not the standard language of instruction, you must provide evidence of English language proficiency.

English language proficiency

We require students to demonstrate they can speak, write, read and comprehend academic English to a specified standard.

Our English proficiency requirements for this course are:

- IELTS (Academic): 6.5 or better

overall with no subscore below 6.0

The test must have been completed within 2 years prior to the proposed course start month.

International Entry requirements

Prerequisites

You must have passed four semesters (Units 3 & 4, C) at an Australian high school level or equivalent:

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- at least one of General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C).

Haven't completed the prerequisite subjects?

You may be able to meet the prerequisite requirements if you've completed equivalent subjects or by completing bridging courses.

[How to meet prerequisite requirements](#)

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) capabilities criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

If you've achieved a 'satisfactory' result for one or more components of the

Bachelor of Education (Secondary)/Bachelor of Information Technology

Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the 'satisfactory' result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at 'unsatisfactory' after two test attempts for that component.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

IAB201	Modelling Techniques for Information Systems
IAB206	Modern Data Management
IAB207	Rapid Web Application Development

Year	2023
QUT code	ID28
CRICOS	0100982
Duration (full-time)	4 years
Duration (part-time domestic)	8 years
ATAR/Selection rank	84.00
Offer Guarantee	Yes
Campus	Gardens Point, Kelvin Grove
Domestic fee (indicative)	2023: CSP \$6,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$40,400 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Kerry Manton, Course Coordinator, Bachelor of Biomedical Science Dr Timothy Moroney, Course Coordinator, Bachelor of Mathematics
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- Biology (Units 3 & 4, C) or Chemistry (Units 3 & 4, C)
- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Biology (Units 3 & 4, C) or Chemistry (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Biomedical Science component consists of 96 credit points of core biomedical science studies and either one 72 credit point Biomedical Science Major and 24 credit points of elective units, or two Biomedical Science Minors (each worth 48 credit points).

The Mathematics component consists of 96 credit points of core units and 96 credit points of a selected major.

International Course structure

Biomedical Science component consists of 96 credit points of core biomedical science studies and either one 72 credit point Biomedical Science Major and 24 credit points of elective units, or two Biomedical Science Minors (each worth 48 credit points).

The Mathematics component consists of 96 credit points of core units and 96 credit points of a selected major.

Offer Guarantee	Yes
Domestic fee (indicative)	2023: CSP \$9,800 per year full-time (96 credit points)
International fee (indicative)	2023: \$33,600 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	AskQUT askqut@qut.edu.au; +61 7 3138 2000;
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

This course combines the Bachelor of Business and the Bachelor of Data Science degrees. The business degree is uniquely designed to inspire students to realise their potential, to think entrepreneurially, and to ethically and sustainably shape the future of business. Students will develop core business capabilities and undertake focused and authentic study in their chosen business discipline. The data science component covers the necessary theory and the practical tools for data acquisition, storage, management, processing, analysis and visualisation. Ethical considerations, communication, collaboration and critical thinking skills are all given first-class coverage.

Course structures will be available soon.

International Course structure

This course combines the Bachelor of Business and the Bachelor of Data Science degrees. The business degree is uniquely designed to inspire students to realise their potential, to think entrepreneurially, and to ethically and sustainably shape the future of business.

Students will develop core business capabilities and undertake focused and authentic study in their chosen business discipline. The data science component covers the necessary theory and the practical tools for data acquisition, storage, management, processing, analysis and visualisation. Ethical considerations, communication, collaboration and critical thinking skills are all given first-class coverage.

Course structures will be available soon.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

This course allows students to combine their interest in the property industry in the Australian and international economy with a data science degree and graduate with a diverse set of skills to enhance employment options in both fields. Across this double degree, students benefit from meaningful connections with high profile industry employers, practical and effective hands-on learning experiences during their studies, classes with leading and expert teachers, international study and placement opportunities, and the convenience of a city-based campus.

International Course structure

This course allows students to combine their interest in the property industry in the Australian and international economy with a data science degree and graduate with a diverse set of skills to enhance employment options in both fields. Across this double degree, students benefit from meaningful connections with high profile industry employers, practical and effective hands-on learning experiences during their studies, classes with leading and expert teachers, international study and placement opportunities, and the

convenience of a city-based campus.

Domestic Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Communication and 192 credit points from the Bachelor of Data Science. You will undertake the two components of the double degree concurrently.

Communication component

You will complete:

- four core units (48 credit points)
- a communication major (144 credit points) from one of the following disciplines: Digital Media, Entertainment Industries, Journalism, or Professional Communication.

Data science component

You will complete 192 credit points of Data Science core units.

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either

degree area, depending on how they match with your QUT course.

International Course structure

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Communication and 192 credit points from the Bachelor of Data Science. You will undertake the two components of the double degree concurrently.

Year	2023
QUT code	ID32
CRICOS	103860K
Duration (full-time)	4 years
Duration (part-time domestic)	8 years
ATAR/Selection rank	84.00
Offer Guarantee	Yes
Domestic fee (indicative)	2023: CSP \$7,700 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,400 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Phone +61 7 3138 2000; email: askqut@qut.edu.au;
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure Your course

In order to complete this course, you must complete a total of 384 credit points, made up of 192 credit points from the Bachelor of Creative Industries and 192 credit points from the Bachelor of Data Science. You will undertake the two components of the double degree concurrently.

Creative Industries component

The core of the program centres on Creative Enterprise studios that offer authentic, problem-based activities, coupled with work integrated learning, skills in entrepreneurship and commercial links that engage in creative start-ups. Early in your degree, you choose 24 credit points of introductory units to experience your preferred majors, with the option to undertake defined breadth units in other relevant areas. Using this experience, you then decide upon a creative industries major.

You will complete:

- Core units - 72 credit points
- Creative Industries introductory units - 24 credit points
- A Creative Industries major - 96 credit points from one of the

specified majors including: Creative and Professional Writing; Media and Communication; Drama and Performance; Entertainment; Fashion Communication; Interactive and Visual Design; Music and Sound; and Screen Content Production.

Data Science component

You will complete 192 credit points of Data Science core units.

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Data Science program and 336 credit points for the Bachelor of Laws (Honours) program. You will study data science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the data science component, students will complete 192 credit points (16 units) consisting of :

- 14 core units (168 credit point)
- 2 data science elective units (24 credit points)

Under the law component, you will complete 336 credit points of core units and a mixture of law electives made up of:

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students may select a general law elective in place of the introductory law elective

**Students have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

International Course structure

Domestic fee (indicative)	2023: CSP \$11,200 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,600 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Discipline Coordinator	For more information email: askqut@qut.edu.au

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Overview

This double degree will give you a broad base of commercial knowledge in business and information technology. Business is highly dependent on information technology infrastructure, so having the expertise in both makes you more attractive to employers looking for multidisciplinary staff.

Businesses look for staff who can communicate well from both the business and information technology disciplines, so having the skills and knowledge across both gives you a competitive edge over other graduates. You will have the opportunity to complement your information technology studies in either

information systems or computer science with a business major in accountancy, advertising, economics, finance, human resource management, international business, management, marketing or public relations.

Career Outcomes

This double degree will give you the particular skills to acquire a role requiring knowledge in both business and information technology. These include business and systems analyst, systems manager, product manager for an information technology product, team leader for multidisciplinary staff, pre-sales consulting, after-sales support, technical manager or consultant. Future career prospects include chief financial officer, chief information officer and chief technical officer.

Study Areas

IX22 has nominated majors in Information Systems and Computer Science in the Information Technology component of the degree. There will now be a Study Area A shown on a graduate's parchment.

Professional Recognition

The Bachelor of Business degree may, subject to choice of major, allow graduates to satisfy the academic requirements for membership to a number of professional bodies. Further information is available from the discipline schools.

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Information Technology program and 192 credit points from the Bachelor of Business program.

Business component:

- Eight Business School core units (96 credit points) *
- Eight major core units (96 credit points)

*Accounting major students complete six business core units and 10 accounting major units to allow them to complete professional requirements.

Bachelor of Business/Bachelor of Information Technology

Information Technology component:

- Six core IT units (72 credit points)
- Ten major core units (120 credit points)

International Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Information Technology program and 192 credit points from the Bachelor of Business program.

Business component:

- Eight Business School core units (96 credit points) *
- Eight major Core units (96 credit points)

*Accounting major students complete six business core units and 10 accounting major units to allow them to complete professional requirements.

Information Technology component:

- Six core IT units (72 credit points)
- Ten major core units (120 credit points)

Year	2023
QUT code	IX23
CRICOS	078352J
Duration (full-time)	4 years
ATAR/Selection rank	70.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$12,200 per year full-time (96 credit points)
International fee (indicative)	2023: \$35,400 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Overview

Your business degree will give you a broad base of commercial knowledge as well as the opportunity to major in a specific business area. This understanding of business makes you more attractive to employers, even if you wish to work predominantly in a science-based career.

Aim

Through the combination of science and business, you will equip yourself for an exciting career at the cutting edge of scientific innovation within a range of public, private and non-profit industries.

Career outcomes

By combining your science studies with business you will develop the

entrepreneurial skills necessary to sell your abilities to a range of employers. As well as the range of science-based careers available such as a scientific modeller, engineering software developer, scientific programmer, and computational scientist you could expect to gain employment as a consultant, marketer, or project manager within firms developing and taking scientific research to the marketplace.

Professional membership

Both degrees allow you to satisfy the requirements of membership of the relevant professional body for your chosen majors.

Non-standard attendance

Field work is a requirement of some areas of science.

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor Science program and 192 credit points from the Bachelor of Business program.

Business component:

- eight Business School core units (96 credit points) *
- eight major core units (96 credit points)

*Accounting major students complete six business core units and 10 accounting major units to allow them to complete professional requirements.

Science component

You must complete 192 credit points, comprising of 60 credit points of Science core units and 132 credit points of Science major units.

International Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor Science program and 192 credit points from the Bachelor of Business program.

Business component:

- eight Business School Core units (96 credit points) *
- eight Major Core units (96 credit points)

*Accounting major students complete six business core units and 10 accounting major units to allow them to complete professional requirements.

Science component

You must complete 192 credit points, comprising of 60 credit points of Science core units and 132 credit points of Science major units.

Duration (full-time)	4 years
ATAR/Selection rank	84.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$9,800 per year full-time (96 credit points)
International fee (indicative)	2023: \$32,300 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Discipline Coordinator	For more information email: askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Overview

Your Business studies will combine the broad knowledge of business practice and in depth studies in at least one business discipline area in the Bachelor of Business with the advanced quantitative skills and problem solving abilities that you will develop with the Bachelor of Mathematics.

You will develop the ability to apply mathematics, statistics, computational methods and decision science to real world problems. You will also gain understanding of the broad principles of Business at the same time as developing the skills and discipline knowledge necessary to enter the business career of your choice.

Career Outcomes

Combining business and mathematics offers diverse and sustainable career opportunities.

Business graduates are equipped to undertake sophisticated economic and financial modelling which is important in business and government decision making. Quantitative analysts are employed by the financial sector in order to optimise returns both in the short and

long-term. Graduates may also become actuarial trainees in the insurance and superannuation area although further study is required in order to qualify as an actuary.

Business graduates may find employment as Accountants, Advertising Professionals, Banking and Finance Consultants, Economists, Human Resource Managers, International Business Specialists, Managers, Marketing Officers, Public Relations Officers.

Mathematics graduates are employed across a wide range of areas. These include, but are not limited to, finance, investment, data analytics, defence and national security, research, information technology, environmental science, health, management, marketing, logistics, media, and education. In addition to their knowledge and skills in mathematics, graduates are also highly valued for their analytical and problem-solving skills. Development of skills in communication, problem-solving, critical thinking and teamwork form an integral part of the course.

Favourable career outcomes for Bachelor of Mathematics graduates are likely due to the current demand for qualified statisticians and mathematicians.

Professional Recognition

Both degrees allow you to satisfy the requirements of membership of the relevant professional body for your chosen majors.

Financial Support

You should consider applying for an industry-sponsored mathematics bursary or a business scholarship to help you financially throughout your studies. For further information visit [Scholarships](#).

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Mathematics program and 192 credit points from the Bachelor of Business program.

Business component:

- eight Business School core units (96 credit points) including MGB227 (see below)*
- eight major core units (96 credit points)

*Please note that BSB123 Data Analysis

Bachelor of Business/Bachelor of Mathematics

(one of the Business School core units) is not required as the content of MXB107 covers similar topics.

MGB227 Entrepreneurship replaces BSB123.

*Accounting major students complete six business core units and 10 accounting major units to allow them to complete professional requirements.

Mathematics component:

- 96 credit points (8 units) of Core units, which include 12 credit points (1 unit) of Core Option units selected from an approved list.
- 96 credit points (8 units) of Major Core units

Mathematics core units

These units give you the grounding in mathematical theory and practice upon which your major units will build, and also provide an introductory taste of each of the three majors: applied and computational mathematics; operations research; and statistics.

Core option units

You may choose from a wide variety of introductory units from other disciplines offered at QUT, or you may choose additional mathematics units. The additional mathematics units include a unit specially designed to assist students without a background of successful study in Mathematics C at high school; an alternative unit aimed at high achieving students that explores some interesting and unusual aspects of mathematics in some detail; and a unit introducing the field of computational and simulation science which combines mathematics, science and computing to simulate real-world problems.

International Course structure

Bachelor of Business/Bachelor of Mathematics

Marketing Stream Unit appears in this structure four times to provide flexibility for when students can undertake their elected two (2) Business Core Option Units and two (2) Marketing Stream units

Marketing Streams

Select two units (24 credit points) from the Marketing Streams. Units may be selected from one stream or from multiple streams.

Consumer Insight Through Data Stream

AMB305 Analysis for Consumer Insights

AMB306 Designing Consumer Research

Marketing Through Innovation Stream

AMB211 Branding for the Real World

AMB251 Designing Innovative Goods and Services

Marketing Across Borders Stream

AMB120 Bridging Cultures

AMB336 International Marketing

Leisure Industry Marketing Stream

AMB207 Entertainment Marketing in a Digital World

AMB209 Designing a Competitive Tourism Strategy

Social Change Through Marketing Stream

AMB255 Avoiding the Dark Side: Marketing, Ethics and Society

AMB355 Marketing Behavioural and Social Change

Business Core Option Units

Select two units from the following Business Core Options list:

BSB305 Undergraduate Business Internship

BSB151 Business Law and Governance

BSB152 Financial Management

BSB130 Social Enterprises

BSB131 Applied Business Analytics

BSB009 Experiential Learning: Innovation, Ideas and Enterprise Skills

Offer Guarantee	Yes
Campus	Gardens Point, Kelvin Grove
International fee (indicative)	2018: \$29,400 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dean Brough (Creative Industries); Dr Wayne Kelly (Information Technology)
Discipline Coordinator	Dr Wayne Kelly (Computer Science); Dr Erwin Fieft (Information Systems) +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

QUT year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on 20 November, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)

Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Overview

This double degree allows you to complement your technical skills with creative skills through digital media and film production. You will learn to merge the creative and imaginative with the technical to develop sophisticated and innovative digital products. You can choose to complement your skill set through a range of information technology and creative industries areas of interest to diversify your studies, including:

- animation
- art and design history
- creative and professional writing
- dance studies

- digital media
- entertainment industries
- entrepreneurship
- fashion communication
- film, television and screen game design
- interactive and visual design
- journalism, media and communication
- literary studies
- music
- online environments

Career Outcomes

As a graduate you can enjoy the more creative side of information technology careers including digital media programmer, simulation designer or developer, games producer or designer, sound designer, mobile entertainment and communications developer, user interface developer, knowledge worker in music and sound, web developer and digital product strategist.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Course Design

You will undertake the Bachelor of Creative Industries core units as well as one creative industries major. Your information technology degree component comprises eight core units, four breadth units, and four units in your information technology specialisation.

Study Areas

The Bachelor of Information Technology has majors in Information Systems and Computer Science which will be shown on the a graduate's parchment.

Pathways to Further Studies

On successful completion of this course, you will be eligible to apply for entry into the Bachelor of Creative Industries (Honours), provided you have met entry requirements.

The QUT Bachelor of Information Technology is located at Level 7 of the Australian Qualifications Framework (AQF). Eligible graduates may continue their studies in this discipline with an additional honours year in (IN10) Bachelor of Information Technology (Honours).

Work Integrated Learning

The Faculty's Work Integrated Learning Minor gives you the opportunity of

industry placement during your course where you can integrate real experience with what you're learning in your degree. Companies that QUT's students have worked with include Energex, Boeing, CITEC, CSC Mining, Environmental Protection Agency, Dialog, UNiTAB, RACQ and many Queensland Government departments.

Unit Incompatibility/Translation Information

Details on the translation and incompatibility of old and new units is located here:

[Undergraduate Translation Table](#)

If you have completed the unit(s) listed under the "Translation Unit Codes" column, you are not permitted to enrol in the listed new code.

Domestic Course structure

You will undertake the Bachelor of Creative Industries core units (96 credit points) as well as 96 credit points from a creative industries major.

The Bachelor of Information Technology degree comprises of:

- 72 credit points (6 units) of information technology core units, which includes 24 credit points (2 units) of option units* selected from an approved list
- 120 credit points (10 units) of major core units (Information Systems or Computer Science).

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

International Course structure

You will undertake the Bachelor of Creative Industries 96cp core units as well as 96cp from a creative industries major.

The Bachelor of Information Technology degree comprises of ;

- 72 credit points (6 units) of Information Technology Core units, which includes 24 credit points (2 units) of Option Units* selected from an approved list.
- 120 credit points (10 units) of Major Core units (Information Systems or Computer Science).

Study overseas

[Study overseas](#) while earning credit towards your QUT degree with one of our worldwide exchange partners.

Overseas study can be for one or two semesters (or during the semester break) and the units you take can be in either degree area, depending on how they match with your QUT course.

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Structure Information

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Science program and 336 credit points for the Bachelor of Laws program. You will study science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the Science component students will complete 16 units in total. Students will choose any of the following science majors that are offered in the Bachelor of Science (ST01) course: biology, chemistry, earth science, environmental science and physics.

Under the Law component students will complete 336 credit points of core units and a mixture of Introductory, General and Advanced Electives. Students may select up to 48 credit points of non-law electives or 48 credit points of a University-wide minor in place of four of the General Electives. Successful completion of a minor will be recognised on the Academic Record and / or the Australian Higher Education Graduation Statement.

Total Law credit points: 336

Total credit points for core units: 240
Total credit points for elective units: 96
Honours Level Units

96 credit points of Honours units listed below will be used to determine the Honours Levels of the LLB (Hons): LLH201 Legal Research, LLH206 Administrative Law, LLH302 Ethics and the Legal Profession, LLH305 Corporate Law, LLH401 Legal Research Capstone (24 cps) and two Advanced Electives in law.

Professional Recognition

The QUT LLB (Hons) is an approved degree for the purposes of the Legal Practitioners Admission Rules. Accordingly, it enables graduates to satisfy the academic requirements for admission to practise as a solicitor and/or barrister in all Australian states and territories. Graduates will satisfy the requirements for membership in the relevant professional body for their science major.

Admission to practice

If, at the end of your degree, you wish to become a legal practitioner, you will need to complete further practical legal training (PLT). QUT also offers PLT in the form of the Graduate Diploma in Legal Practice.

Career Outcomes

As a graduate, you may enter legal practice with an education in both the content and process of science and data analysis that will enable you to deal with the complexities of litigation that have a scientific and technological dimension, such as inventions, trade secrets, quantitative evidence, and constitutional disputes giving rise to environmental issues. On the other hand, you may choose to follow a career path in the sciences, enhancing your opportunities in a particular discipline such as environmental science or biotechnology through your knowledge of the law.

You will graduate with specialised knowledge of cutting-edge technologies and extensive practical experience using the latest techniques. You have a broad range of options to choose from and the flexibility to create your own personal science degree program.

In developing the LLB (Hons) the Faculty recognises that graduates are increasingly seeking a broad range of careers including, but not limited to, legal

Bachelor of Science/Bachelor of Laws (Honours)

practice. The defining nature of the QUT LLB (Hons) is its real-world applied nature which will equip you with advanced knowledge and research and other skills and that meet the needs of not only the legal profession, but also government, community organisations, business and industry.

The LLB (Hons) provides students with an opportunity to advance their knowledge of law in specialised areas through the elective units offered as part of the course. The elective units allow you to study areas of the law that match your career aspirations.

Career opportunities include working in general legal practice, specialist legal practice, government departments and employment in private enterprise.

Non-standard attendance

Field work is a requirement in some areas of science.

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more at [deferment](#)

Domestic Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Science program and 336 credit points for the Bachelor of Laws program. You will study science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the Science component students will complete 60 credit point of core units, which includes 6 credit point units. Students will choose any of the following science majors (132 credit points) that are offered in the [Bachelor of Science](#) (ST01) course: biological sciences, chemistry, earth science, environmental science and physics.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Law, technology and innovation minor units

- Law and Data Analysis (LLB250)
- Law and Design Thinking (LLB251)
- Regulating Artificial Intelligence and Robotics (LLB341)
- Regulating the Internet (LLB345)

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

International Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Science program and 336 credit points for the Bachelor of Laws program. You will study science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the Science component students will complete 60 credit point of core units, which includes 6 credit point units. Students will choose any of the following science majors (132 credit points) that are offered in the [Bachelor of Science](#) (ST01) course: biological sciences, chemistry, earth science, environmental science and physics.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Law, technology and innovation minor units

- Law and Data Analysis (LLB250)
- Law and Design Thinking (LLB251)
- Regulating Artificial Intelligence and Robotics (LLB341)
- Regulating the Internet (LLB345)

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

Sample Structure

Before enrolling in an option (elective) unit, you must ensure you have met any pre- or co-requisite requirements. You can check this by referring to the unit outlines on [QUT Virtual](#).

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course structure information

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Information Technology program and 336 credit points for the Bachelor of Laws program.

Requirements for the completion of the Bachelor of Information Technology component are as follows:

- 72 credit points (6 units) of IT Core units, which includes 24 credit points (2 units) of Option Units selected from an approved list.
- 120 credit points (10 units) of Major Core units

Information Technology Majors
Choose your primary area of study, also known as your major, in the following specialisation areas: Information Systems or Computer Science.

Information Technology Options List
The Bachelor of Information Technology Core Unit Options List comprises a range of units from which you choose to undertake two (2). The options include introductory units from a wide variety of

disciplines offered at QUT.

Under the Law component students will complete 336 credit points of core units and a mixture of Introductory, General and Advanced Electives. Students may select up to 48 credit points of non-law electives or 48 credit points of a University-wide minor in place of four of the General Electives. Successful completion of a minor will be recognised on the Academic Record and / or the Australian Higher Education Graduation Statement.

Total Law credit points: 336
Total credit points for core units: 240
Total credit points for elective units: 96

Honours Level Units
96 credit points of Honours units listed below will be used to determine the Honours Levels of the LLB (Hons):
LLH201 Legal Research,
LLH206 Administrative Law,
LLH302 Ethics and the Legal Profession,
LLH305 Corporate Law,
LLH401 Legal Research Capstone (24 cps) and
two Advanced Electives in law.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

The QUT LLB (Hons) is an approved degree for the purposes of the Legal Practitioners Admission Rules. Accordingly, it enables graduates to satisfy the academic requirements for admission to practise as a solicitor and/or barrister in all Australian states and territories.

Admission to practice

If, at the end of your degree, you wish to become a legal practitioner, you will need to complete further practical legal training (PLT). QUT also offers PLT in the form of the Graduate Diploma in Legal Practice.

Career Outcomes

Graduates may develop careers in cyberlaw, intellectual property and privacy, dealing with the legal regulation of the Internet including downloading music, mobile phone camera use or copyright issues. You may become a legal practitioner, barrister, in-house counsel, government lawyer or policy adviser. There is also increased demand for roles in edemocracy both in

egovernment service delivery and political campaigning.

In developing the LLB (Hons) the Faculty recognises that graduates are increasingly seeking a broad range of careers including, but not limited to, legal practice. The defining nature of the QUT LLB (Hons) is its real-world applied nature which will equip you with advanced knowledge and research and other skills and that meet the needs of not only the legal profession, but also government, community organisations, business and industry.

The LLB (Hons) provides students with an opportunity to advance their knowledge of law in specialised areas through the elective units offered as part of the course. The elective units allow you to study areas of the law that match your career aspirations.

Career opportunities include working in general legal practice, specialist legal practice, government departments and employment in private enterprise.

Pathways to Further Studies

The QUT Bachelor of Information Technology is located at Level 7 of the Australian Qualifications Framework (AQF). Eligible graduates may continue their studies in this discipline with an additional honours year in (IN10) Bachelor of Information Technology (Honours).

On successful completion of the Bachelor of Laws, there are a number of further study options open to you. The Bachelor of Laws meets the entry requirements for Practical Legal Training courses (for example, the QUT Graduate Diploma in Legal Practice). In addition, successful completion of the law degree will allow you to pursue postgraduate opportunities through research- and coursework-based higher degrees in law.

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more at [deferment](#)

Domestic Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Information Technology program and 336 credit points for the Bachelor of Laws program.

Requirements for the completion of the Bachelor of Information Technology

component are as follows:

- 6 IT core units (72 credit points)
- 10 major core units (120 credit points)

Information Technology Majors

Choose your primary area of study, also known as your major, in the following specialisation areas: Computer Science or Information Systems.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Law, technology and innovation minor units

- Law and Data Analysis (LLB250)
- Law and Design Thinking (LLB251)
- Regulating Artificial Intelligence and Robotics (LLB341)
- Regulating the Internet (LLB345)

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

International Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Information Technology program and 336 credit points for the Bachelor of Laws program.

Requirements for the completion of the

Bachelor of Information Technology component are as follows:

- 6 IT core units (72 credit points)
- 10 major core units (120 credit points)

Information Technology Majors

Choose your primary area of study, also known as your major, in the following specialisation areas: Computer Science or Information Systems.

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Business program and 192 credit points from the Bachelor of Games and Interactive Environments program.

Business component:

- 8 units (96 credit points) of Business School core units
- 8 units (96 credit points) of Major core units*

* Please note Accounting major students complete 6 business core units (72 credit points) and 10 accounting major units

(120 credit points) to allow them to complete professional requirements.

Games and Interactive Environments component:

- 6 units (72 credit points) of games and interactive environments core units, which includes 2 units (24 credit points) of option units** selected from an approved list.
- 10 units (120 credit points) of Major core units.

** Unit options list - comprises a range of units from which you choose to undertake two (2). The core option choices provide you with space in your course to explore other fields such as within Games and Interactive Environments, Information Technology. The core option choices can be used to complement your Major studies.

Unit from the other degree component	
Notes	
Select a Business Core Option Unit or a Marketing Stream Unit appears in this structure four times to provide flexibility for when students can undertake their elected two (2) Business Core Option Units and two (2) Marketing Stream units	
Marketing Streams	
Select two units (24 credit points) from the Marketing Streams. Units may be selected from one stream or from multiple streams.	
Consumer Insight Through Data Stream	
AMB305	Analysis for Consumer Insights
AMB306	Designing Consumer Research
Marketing Through Innovation Stream	
AMB211	Branding for the Real World
AMB251	Designing Innovative Goods and Services

Bachelor of Business/Bachelor of Games and Interactive Environments

Marketing Across Borders Stream	
AMB120	Bridging Cultures
AMB336	International Marketing
Leisure Industry Marketing Stream	
AMB207	Entertainment Marketing in a Digital World
AMB209	Designing a Competitive Tourism Strategy
Social Change Through Marketing Stream	
AMB255	Avoiding the Dark Side: Marketing, Ethics and Society
AMB355	Marketing Behavioural and Social Change
Business Core Option Units	
Select two units from the following Business Core Options list:	
BSB305	Undergraduate Business Internship
BSB151	Business Law and Governance
BSB152	Financial Management
BSB130	Social Enterprises
BSB131	Applied Business Analytics
BSB009	Experiential Learning: Innovation, Ideas and Enterprise Skills

Duration (full-time)	5 years
ATAR/Selection rank	70.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$8,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$36,700 per year full-time (96 credit points)
Total credit points	480
Start months	July, February
Int. Start Months	July, February
Course Coordinator	Dr Paul Donehue (Urban Development majors); Dr Graham Johnson (Science majors)
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

For this course you must complete a total of 480 credit points, made up of 288 credit points from the Bachelor of Urban Development (Honours) (Urban and Regional Planning) and 192 credit points from the Bachelor of Science (Environmental Science). You will study both science and urban development units in your first four years, and concentrate on urban development studies for the remainder of this course.

Urban and Regional Planning component

Students are required to complete 288 credit points of study comprising:

- 72 credit points of core Urban Development units including a 12

credit point work placement unit and a 12 credit point research methods unit.

- 216 credit points of Urban and Regional Planning major discipline units including 24 credit points of capstone project.

Environmental Science Component

Students are required to complete 192 credit points of study comprising:

- 60 credit points of core Science units which includes 6 credit point units, and one option unit (12cp) to be selected from a unit options list.
- 132 credit points of Environmental Science major discipline units.

International Course structure

For this course you must complete a total of 480 credit points, made up of 288 credit points from the Bachelor of Urban Development (Honours) (Urban and Regional Planning) and 192 credit points from the Bachelor of Science (Environmental Science). You will study both science and urban development units in your first four years, and concentrate on urban development studies for the remainder of this course.

Urban and Regional Planning component

Students are required to complete 288 credit points of study comprising:

- 72 credit points of core Urban Development units including a 12 credit point work placement unit and a 12 credit point research methods unit
- 216 credit points of Urban and Regional Planning major discipline units including 24 credit points of capstone project.

Environmental Science Component

Students are required to complete 192 credit points of study comprising:

- 60 credit points of core Science units which includes 6 credit point units, one option unit (12cp) to be selected from a unit options list.
- 132 credit points of Environmental Science major discipline units.

Course Overview

Studying a double degree in applied science and mathematics will provide you with advanced knowledge and skills that are highly sought after by employers. The course is made up of 384 credit points, with each component degree (i.e. Science and Mathematics) comprising 192 credit points each.

From the very first semester, in both your science and your mathematics studies, you will have the opportunity to collaborate with your peers and teaching staff in QUT's exciting new learning environments. You will explore real world problems from multiple scientific, mathematical and statistical perspectives and learn the tools of the trade. Depending on your choices you may find yourself out in the field, working in the laboratory or learning about the impact of scientific discovery on people, policy, industry and the planet. Working with data that you have collected, you will apply fundamental methods of scientific practice, perform scientific analysis, and present your findings. You will learn about a range of career and professional outcomes so that you can get the most from the flexibility the Bachelor of Science has to offer. Your mathematics studies

will strengthen your quantitative analysis skills.

Your choice of science major will provide you with in-depth knowledge and expertise in a scientific discipline. Your choice of mathematics units/major will allow you to develop more advanced quantitative skills and problem solving capabilities that can be applied to larger and more complex real world problems. Both of which will prepare you for entry into the workforce or further study. You can even work with industry or get credit to study overseas.

Aim

This double degree aims to provide graduates with opportunities to develop their skills and knowledge in mathematics and science. You will develop the ability to apply mathematics, statistics, computational methods and decision science to real world problems. The Bachelor of Science aims to deliver:

Domestic fee (indicative)	2023: CSP \$6,200 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,600 per year full-time (96 credit points)
Total credit points	384
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Associate Professor Wayne Kelly (Information Technology); Professor Tim Moroney (Mathematics)
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Overview

Mathematics and information technology are interrelated disciplines. This double degree provides you with the knowledge and skills to develop solutions for complex problems that provide great benefits to society. In the first year you will build a foundation in mathematics and information technology and then select integrated strands combining units from the areas of applied mathematics, computational mathematics, operations research, statistics or financial mathematics with the combined information technology major from either Information Systems of Computer Science.

Career Outcomes

Mathematics underpins much of information technology, especially in the more advanced areas of development and analysis. As a graduate you may find employment as a technical support specialist, data visualisation specialist, operations research specialist, computational scientist, statistician (there is high demand in the insurance industry), or work in complex system and scientific modelling.

Professional Recognition

Graduates will be eligible for membership of the Mathematical Society of Australia, the Statistical Society of Australia and, depending on unit selection, the Australian Society for Operations Research. This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Mathematics program and 192 credit points from the Bachelor of Information Technology program.

The Bachelor of Mathematics component consists of:

- Eight (8) core units (96 credit points)
- Eight (8) major core units (96 credit points).

The Bachelor of Information Technology component consists of:

- Six (6) core units (72 credit points)
- Ten (10) major core units (120 credit points).

International Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Mathematics program and 192 credit points from the Bachelor of Information Technology program.

The Mathematics component consists of :

- Eight (8) core units (96 credit points)
- Eight (8) major core units (96 credit points).

The Bachelor of Information Technology component consists of:

- Six (6) Core units (72 credit points)
- Ten (10) Major Core units (120 credit points)

Speaking	6.0

Domestic Course structure

To graduate with a Bachelor of Engineering (Honours) in SE40, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Mathematics in SE40, students are required to complete 192 credit points of course units, as outlined below:

- 96 credit points (8 units) of Core units, which include 24 credit points (2 units) of Core Option units selected from an approved list.
- 96 credit points (8 units) of Major Core units

International Course structure

To graduate with a Bachelor of Engineering (Honours) in SE40, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x Advanced major units 60cp.

To graduate with a Bachelor of Mathematics in SE40, students are required to complete 192 credit points of course units, as outlined below:

- 96 credit points (8 units) of Core units, which include 24 credit points (2 units) of Core Option units selected from an approved list.
- 96 credit points (8 units) of Major Core units

Year	2023
QUT code	SE50
CRICOS	080489G
Duration (full-time)	4 years
Duration (part-time domestic)	8 years
ATAR/Selection rank	70.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$8,200 per year full-time (96 credit points)
International fee (indicative)	2023: \$37,800 per year full-time (96 credit points)
Total credit points	384
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Luke Nothdurft (Science); Associate Professor Wayne Kelly (Information Technology)
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Overview

This double degree prepares you for an increasing range of careers that involve the application of information technology to science. It gives you the ability to use creative as well as analytical methods to solve scientific problems. Studying this double degree allows you to develop the technical skills required for your relevant field of study in science.

The science component of the course offers you the choice of majoring in Biological Sciences, Physics, Chemistry, Environmental Science or Earth Sciences. Theoretical aspects are balanced by strong practical components in this science and information technology double degree.

The Information Technology component of this degree offers a choice of majors in Information Systems or Computer Science.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

Career Outcomes

Graduates may find roles where they can use their information technology skills within the science discipline. Areas include sensor networks, complex system and scientific modelling, and science. As a graduate, you can expect to work in roles such as a scientific modeller, engineering software developer, scientific programmer, and computational scientist.

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Science program and 192 credit points from the Bachelor of Information Technology program.

Science component:

- 7 Science Core units (60 credit points) which includes 6 credit point units, and a unit (12 credit points) from the approved list of option units.
- 11 Major Core units (132 credit points)

Information

Technology component:

- 6 Information Technology Core units (72 credit points), includes unit from an approved options list.
- 10 Major Core units (120 credit points)

International Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Science program and 192 credit points from the Bachelor of Information Technology program.

Science component:

- 7 Science Core units (60 credit points) which includes 6 credit point units, and a unit (12 credit points) from the approved list of option units.
- 11 Major Core units (132 credit points)

Bachelor of Science/Bachelor of Information Technology

Information Technology component:

- 6 Information Technology Core units (72 credit points), includes unit from an approved options list.
- 10 Major Core units (120 credit points)

Information Systems major students - Select Science Core Unit Option here.	

Complete 12 credit point from the Core Unit Options in Bachelor of Information Technology. Do NOT select a unit that will be core in your major.

Core Unit Options list

Code	Title
CAB201	Programming Principles
CAB202	Microprocessors and Digital Systems
CAB210	User Experience Fundamentals
CAB230	Web Computing
IAB201	Modelling Techniques for Information Systems
IAB206	Modern Data Management
IAB207	Rapid Web Application Development
IAB230	Design of Enterprise IoT
IAB250	Enterprise Systems Configuration
IAB260	Social Technologies
IGB180	Computer Games Studies
Other units subject to approval of Course Coordinator	

Complete two units (24cp) from the Core Unit Options. Do NOT select a unit that will be in your core major.

Unit List:

Code	Title
CAB201	Programming Principles
CAB202	Microprocessors and Digital Systems
CAB210	User Experience Fundamentals
CAB230	Web Computing
IAB201	Modelling Techniques for Information Systems
IAB206	Modern Data Management

Bachelor of Science/Bachelor of Information Technology

IAB207	Rapid Web Application Development
IAB230	Design of Enterprise IoT
IAB260	Social Technologies
IAB250	Enterprise Systems Configuration
IGB180	Computer Games Studies
IFB240	Cyber Security
Other units subject to approval of Course Coordinator	

Year	2023
QUT code	SE60
CRICOS	084923F
Duration (full-time)	5 years
Duration (part-time domestic)	9 years
ATAR/Selection rank	79.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$8,100 per year full-time (96 credit points)
International fee (indicative)	2023: \$39,800 per year full-time (96 credit points)
Total credit points	480
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Jacob Coetzee (Engineering); Associate Professor Wayne Kelly (Information Technology)
Discipline Coordinator	Dr Thomas Rainey (Chemical Process), Associate Professor Jonathan Bunker (Civil); Dr Matthew McKague (Computer & Software Systems); Dr Jacob Coetzee (Electrical); Dr Aaron McFadyen (Electrical & Aerospace); Dr Wim Dekkers/Professor Ted Steinberg (Mechanical); Associate Professor Luis Alvarez (Mechatronics); Associate Professor Devakar Epari (Medical); Dr Jinglan Zhang (Computer Science); and Dr Erwin Fieft (Information Systems) +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

To graduate with a Bachelor of Engineering (Honours) in SE60, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Information Technology in SE60, students are required to complete 192 credit points of course units, as outlined below:

- six (6) core units (72 credit points)
- one (1) block of ten (10) major units (120 credit points)

International Course structure

To graduate with a Bachelor of Engineering (Honours) in SE60, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Information Technology in SE60, students are required to complete 192 credit points of course units, as outlined below:

- six (6) core units (72 credit points)
- one (1) block of ten (10) major units (120 credit points)

Sample Structure

PLEASE NOTE:

For students taking the **IT: Computer Science major with Engineering: Computer & Software Systems major**, please refer to the Engineering & IT Units: Computer & Software Systems Major with Computer Science Major (Feb)/(July) structure.

Year	2023
QUT code	SE70
CRICOS	092653A
Duration (full-time)	4 years
ATAR/Selection rank	84.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$6,300 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,700 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr David Conroy (Games and Interactive Environments); Professor Tim Moroney (Mathematics)
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Games and Interactive Environment program and 192 credit points from the Bachelor of Mathematics program.

Games and Interactive Environments component:

- 6 core units (72 credit points), which includes 2 core option units* (24 credit points) selected from an approved list.
- 10 Major core units (120 credit points)

Mathematics component:

- 8 core units (96 credit points), which includes 1 core option unit* (12 credit points) selected from an approved list.
- 8 Major core units (96 credit points).

* *Unit options list* - comprises a wide variety of foundation units from a range of disciplines offered at QUT. In the Mathematics component, there is an opportunity to choose additional mathematics units, which includes a unit specially designed to assist students without a background of successful study

in Mathematics C at high school; an alternative unit aimed at high achieving students that explores some interesting and unusual aspects of mathematics in some detail; and a unit introducing the field of computational and simulation science which combines mathematics, science and computing to simulate real-world problems. The core option choices can be used to complement your Major studies.

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

To graduate with a Bachelor of Engineering (Honours) in SE80, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Science in SE80, students are required to complete

192 credit points of course units, as outlined below:

- 7 Core units (60 credit points) which includes 6 credit point units, and a core option unit (12 credit points) selected from an approved list.
- 11 Major units (132 credit points)

International Course structure

To graduate with a Bachelor of Engineering (Honours) in SE80, students are required to complete 288 credit points of course units, as outlined below:

Year	2023
QUT code	SE90
CRICOS	092649G
Duration (full-time)	4 years
ATAR/Selection rank	70.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$8,100 per year full-time (96 credit points)
International fee (indicative)	2023: \$37,300 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Luke Nothdurft (Science); Dr David Conroy (Games and Interactive Environments)
Discipline Coordinator	Professor Matthew Phillips (Biological Science); Professor Tim Dargaville (Chemistry); Dr Patrick Hayman (Earth Science); Professor Jennifer Finn (Environmental Science); Dr Konstantin Momot (Physics). +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank./p>

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Science program and 192 credit points from the Bachelor of Games and Interactive Environments program.

Science component:

- 7 units (60 credit points) of science core units, which includes 6 credit point units, and a core option unit* (12 credit points) selected from an approved list.
- 11 units (132 credit points) of Major core units.

Games and Interactive

Environments component:

- 6 units (72 credit points) of games and interactive environments core

units, which includes 2 units (24 credit points) of option units* selected from an approved list.

- 10 units (120 credit points) of Major core units.

* *Unit options list - comprises a wide variety of foundation units from a range of disciplines offered at QUT. The core option choices can be used to complement your Major studies.*

International Course structure

Students are required to complete 384 credit points comprised of 192 credit points from the Bachelor of Science program and 192 credit points from the Bachelor of Games and Interactive Environments program.

Science component:

- 7 units (60 credit points) of science core units, which includes 6 credit point units, and a core option unit* (12 credit points) selected from an approved list.
- 11 units (132 credit points) of Major core units.

Games and Interactive Environments component:

- 6 units (72 credit points) of games and interactive environments core units, which includes 2 units (24 credit points) of option units* selected from an approved list.
- 10 units (120 credit points) of Major core units.

* *Unit options list - comprises a wide variety of foundation units from a range of disciplines offered at QUT. The core option choices can be used to complement your Major studies.*

Year	2023
QUT code	ID33
CRICOS	103861J
Duration (full-time)	5.5 years
ATAR/Selection rank	87.00
Offer Guarantee	Yes
Domestic fee (indicative)	2023: CSP \$9,200 per year full-time (96 credit points)
International fee (indicative)	2023: \$33,400 per year full-time (96 credit points)
Total credit points	528
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	AskQUT askqut@qut.edu.au; +61 7 3138 2000;
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Data Science program and 336 credit points for the Bachelor of Laws (Honours) program. You will study data science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the data science component, students will complete 192 credit points (16 units) consisting of :

- 14 core units (168 credit point)
- 2 data science elective units (24 credit points)

Under the law component, you will complete 336 credit points of core units and a mixture of law electives made up of:

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students may select a general law elective in place of the introductory law elective

**Students have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

International Course structure

Domestic Entry requirements

Entry requirements
You must have a recognised bachelor degree in information technology or relevant discipline with a minimum grade point average of 5.00 (on QUT's 7-point scale), completed within the last 5 years, *plus*:

- Suitable honours topic
- Proposed honours supervisor

If you do not meet the grade point average requirement but you have:

- Excelled in the final semesters of your degree; *or*
- Completed a double degree and excelled in the business or commerce part of your double degree

you are encouraged to apply.

International Entry requirements

A recognised bachelor degree in information technology or equivalent with a minimum grade point average of 5.00 (on QUT's 7-point scale), completed within the last 5 years; *plus*:

- Suitable honours topic
- Proposed honours supervisor

Places are subject to supervisor availability.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Overview

The Bachelor of Information Technology (Honours) allows you to further develop specific areas of expertise in information technology and related discipline areas and is a pathway into research higher degree study. You will develop high level skills in a specific discipline area and acquire research skills appropriate to your discipline. You will apply analytic processes involving abstraction and modelling to solve complex problems and / or develop new opportunities through the use of information technology and will

apply a deep understanding of the discipline to accurately assess its impact on individuals, organisations and society. You will receive individual supervision from an experienced researcher to complete a project. This project allows you to demonstrate your advanced academic capability and culminates in the completion of an honours thesis.

Course Design

Requirements for the completion of IN10 Bachelor of Information Technology (Honours) are as follows:

CORE: Foundations of Research unit and Reviewing the Field unit

OPTION: A choice of either the *Expanded Research Strand* or the *Extended Coursework Strand*

Each strand comprises of coursework and a major research project supervised by QUT staff.

Career Outcomes

Information technology is an integral part of all commercial, industrial, government, social and personal activities. Graduates from the honours program have the opportunity to achieve the highest levels of their profession. Career opportunities include roles such as web developer, database manager, network administrator, electronic commerce developer, data communications specialist, software engineer, systems programmer, computer scientist, systems analyst or programmer. Additionally, graduates may evolve into domain experts working as chief technology officers, chief information officers, managers, executives, business analysts and entrepreneurs. Graduates of this degree may go into academic and research careers.

Professional Recognition

Graduates of the Bachelor of Information Technology (Honours) meet the knowledge requirement for admission to the Australian Computer Society (ACS).

Pathways to Further Study

The QUT Bachelor of Information Technology (Honours) is located at Level 8 of the Australian Qualifications Framework (AQF). Graduates may be eligible to apply to the Doctor of Philosophy within the Science and Engineering Faculty.

Bachelor of Information Technology (Honours)

Sample Structure

The Bachelor of Information Technology (Honours) is a one year full-time degree comprising of 96 credit points.

60 credit points Core research units

36 credit points Coursework units

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Structure Information

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Science program and 336 credit points for the Bachelor of Laws program. You will study science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the Science component students will complete 16 units in total. Students will choose any of the following science majors that are offered in the Bachelor of Science (ST01) course: biology, chemistry, earth science, environmental science and physics.

Under the Law component students will complete 336 credit points of core units and a mixture of Introductory, General and Advanced Electives. Students may select up to 48 credit points of non-law electives or 48 credit points of a University-wide minor in place of four of the General Electives. Successful completion of a minor will be recognised on the Academic Record and / or the Australian Higher Education Graduation Statement.

Total Law credit points: 336

Total credit points for core units: 240
Total credit points for elective units: 96
Honours Level Units

96 credit points of Honours units listed below will be used to determine the Honours Levels of the LLB (Hons): LLH201 Legal Research, LLH206 Administrative Law, LLH302 Ethics and the Legal Profession, LLH305 Corporate Law, LLH401 Legal Research Capstone (24 cps) and two Advanced Electives in law.

Professional Recognition

The QUT LLB (Hons) is an approved degree for the purposes of the Legal Practitioners Admission Rules. Accordingly, it enables graduates to satisfy the academic requirements for admission to practise as a solicitor and/or barrister in all Australian states and territories. Graduates will satisfy the requirements for membership in the relevant professional body for their science major.

Admission to practice

If, at the end of your degree, you wish to become a legal practitioner, you will need to complete further practical legal training (PLT). QUT also offers PLT in the form of the Graduate Diploma in Legal Practice.

Career Outcomes

As a graduate, you may enter legal practice with an education in both the content and process of science and data analysis that will enable you to deal with the complexities of litigation that have a scientific and technological dimension, such as inventions, trade secrets, quantitative evidence, and constitutional disputes giving rise to environmental issues. On the other hand, you may choose to follow a career path in the sciences, enhancing your opportunities in a particular discipline such as environmental science or biotechnology through your knowledge of the law.

You will graduate with specialised knowledge of cutting-edge technologies and extensive practical experience using the latest techniques. You have a broad range of options to choose from and the flexibility to create your own personal science degree program.

In developing the LLB (Hons) the Faculty recognises that graduates are increasingly seeking a broad range of careers including, but not limited to, legal

Bachelor of Science/Bachelor of Laws (Honours)

practice. The defining nature of the QUT LLB (Hons) is its real-world applied nature which will equip you with advanced knowledge and research and other skills and that meet the needs of not only the legal profession, but also government, community organisations, business and industry.

The LLB (Hons) provides students with an opportunity to advance their knowledge of law in specialised areas through the elective units offered as part of the course. The elective units allow you to study areas of the law that match your career aspirations.

Career opportunities include working in general legal practice, specialist legal practice, government departments and employment in private enterprise.

Non-standard attendance

Field work is a requirement in some areas of science.

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more at [deferment](#)

Domestic Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Science program and 336 credit points for the Bachelor of Laws program. You will study science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the Science component students will complete 60 credit point of core units, which includes 6 credit point units. Students will choose any of the following science majors (132 credit points) that are offered in the [Bachelor of Science](#) (ST01) course: biological sciences, chemistry, earth science, environmental science and physics.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Law, technology and innovation minor units

- Law and Data Analysis (LLB250)
- Law and Design Thinking (LLB251)
- Regulating Artificial Intelligence and Robotics (LLB341)
- Regulating the Internet (LLB345)

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

International Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Science program and 336 credit points for the Bachelor of Laws program. You will study science and law units in your first four years and for the remainder of this course you will concentrate on law studies.

Under the Science component students will complete 60 credit point of core units, which includes 6 credit point units. Students will choose any of the following science majors (132 credit points) that are offered in the [Bachelor of Science](#) (ST01) course: biological sciences, chemistry, earth science, environmental science and physics.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course structure information

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Information Technology program and 336 credit points for the Bachelor of Laws program.

Requirements for the completion of the Bachelor of Information Technology component are as follows:

- 72 credit points (6 units) of IT Core units, which includes 24 credit points (2 units) of Option Units selected from an approved list.
- 120 credit points (10 units) of Major Core units

Information Technology Majors
Choose your primary area of study, also known as your major, in the following specialisation areas: Information Systems or Computer Science.

Information Technology Options List
The Bachelor of Information Technology Core Unit Options List comprises a range of units from which you choose to undertake two (2). The options include introductory units from a wide variety of

disciplines offered at QUT.

Under the Law component students will complete 336 credit points of core units and a mixture of Introductory, General and Advanced Electives. Students may select up to 48 credit points of non-law electives or 48 credit points of a University-wide minor in place of four of the General Electives. Successful completion of a minor will be recognised on the Academic Record and / or the Australian Higher Education Graduation Statement.

Total Law credit points: 336
Total credit points for core units: 240
Total credit points for elective units: 96

Honours Level Units
96 credit points of Honours units listed below will be used to determine the Honours Levels of the LLB (Hons):
LLH201 Legal Research,
LLH206 Administrative Law,
LLH302 Ethics and the Legal Profession,
LLH305 Corporate Law,
LLH401 Legal Research Capstone (24 cps) and
two Advanced Electives in law.

Professional Recognition

This course is accredited by the Australian Computer Society (ACS). ACS accreditation is internationally recognised by the Seoul Accord.

The QUT LLB (Hons) is an approved degree for the purposes of the Legal Practitioners Admission Rules. Accordingly, it enables graduates to satisfy the academic requirements for admission to practise as a solicitor and/or barrister in all Australian states and territories.

Admission to practice

If, at the end of your degree, you wish to become a legal practitioner, you will need to complete further practical legal training (PLT). QUT also offers PLT in the form of the Graduate Diploma in Legal Practice.

Career Outcomes

Graduates may develop careers in cyberlaw, intellectual property and privacy, dealing with the legal regulation of the Internet including downloading music, mobile phone camera use or copyright issues. You may become a legal practitioner, barrister, in-house counsel, government lawyer or policy adviser. There is also increased demand for roles in edemocracy both in

egovernment service delivery and political campaigning.

In developing the LLB (Hons) the Faculty recognises that graduates are increasingly seeking a broad range of careers including, but not limited to, legal practice. The defining nature of the QUT LLB (Hons) is its real-world applied nature which will equip you with advanced knowledge and research and other skills and that meet the needs of not only the legal profession, but also government, community organisations, business and industry.

The LLB (Hons) provides students with an opportunity to advance their knowledge of law in specialised areas through the elective units offered as part of the course. The elective units allow you to study areas of the law that match your career aspirations.

Career opportunities include working in general legal practice, specialist legal practice, government departments and employment in private enterprise.

Pathways to Further Studies

The QUT Bachelor of Information Technology is located at Level 7 of the Australian Qualifications Framework (AQF). Eligible graduates may continue their studies in this discipline with an additional honours year in (IN10) Bachelor of Information Technology (Honours).

On successful completion of the Bachelor of Laws, there are a number of further study options open to you. The Bachelor of Laws meets the entry requirements for Practical Legal Training courses (for example, the QUT Graduate Diploma in Legal Practice). In addition, successful completion of the law degree will allow you to pursue postgraduate opportunities through research- and coursework-based higher degrees in law.

Deferment

Domestic students can defer their offer in this course for one year. In exceptional circumstances up to 12 months of additional deferment may be granted.

Find out more at [deferment](#)

Domestic Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Information Technology program and 336 credit points for the Bachelor of Laws program.

Requirements for the completion of the Bachelor of Information Technology

component are as follows:

- 6 IT core units (72 credit points)
- 10 major core units (120 credit points)

Information Technology Majors

Choose your primary area of study, also known as your major, in the following specialisation areas: Computer Science or Information Systems.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Law, technology and innovation minor units

- Law and Data Analysis (LLB250)
- Law and Design Thinking (LLB251)
- Regulating Artificial Intelligence and Robotics (LLB341)
- Regulating the Internet (LLB345)

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

International Course structure

Students are required to complete 528 credit points, comprised of 192 credit points for the Bachelor of Information Technology program and 336 credit points for the Bachelor of Laws program.

Requirements for the completion of the

Bachelor of Information Technology component are as follows:

- 6 IT core units (72 credit points)
- 10 major core units (120 credit points)

Information Technology Majors

Choose your primary area of study, also known as your major, in the following specialisation areas: Computer Science or Information Systems.

Under the Law component you will complete 336 credit points of core units and a mixture of law electives made up of

- 19 Core units (240 credit points)
- 1 introductory law elective* (12 credit points)
- 5 general law electives** (60 credit points)
- 2 advanced law electives (24 credit points)

*Students commencing from 2019 may select a general law elective in place of the introductory law elective

**Students commencing from 2019 have the option to complete the Law, Technology and Innovation minor or 4 non-law electives (48 credit points) or a university wide minor in place of 4 general law electives (48 credit points). Successful completion of a minor will be recognised on the academic record and/or the Australian Higher Education Graduation Statement.

Honours-level units

96 credit points of the following honours units will be used to determine the honours levels of the LLB (Hons):

- Legal Research (LLH201)
- Administrative Law (LLH206)
- Ethics and the Legal Profession (LLH302)
- Corporate Law (LLH305)
- Legal Research Capstone (LLH401) (24 credit points)
- two 12-credit point Advanced Law Electives

Sample Structure

Before enrolling in an option (elective) unit, you must ensure you have met any pre- or co-requisite requirements. You can check this by referring to the unit outlines on [QUT Virtual](#).

Domestic Entry requirements

Entry requirements
You must have a recognised bachelor degree with a minimum grade point average (GPA) score of 5.00 (on QUT's 7-point scale) completed within the last 5 years in one of the fields of:

- computer science
- economics
- engineering
- finance
- mathematics
- physics

plus:

- Suitable honours topic
- Proposed honours supervisor

If you do not meet the grade point average requirement but you have:

- Excelled in the final semesters of your degree; *or*
- Completed a double degree and excelled in the business or commerce part of your double degree

you are encouraged to apply.

Places are subject to supervisor availability, infrastructure, and other required resources.

International Entry requirements

Prerequisite

A completed recognised bachelor degree with a minimum grade point average (GPA) score of 5.00 (on QUT's 7-point scale) completed within the last 5 years in the fields of:

- mathematics
- computer science
- economics or finance
- physics
- engineering

Applicants are required to nominate their proposed topic and supervisor. Places are subject to supervisor availability.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)

Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Design

Students undertake a 36 credit point Research Project.

Overview

The Bachelor of Mathematics (Honours) course provides extended modern and rigorous training in mathematical sciences and related research, to prepare students both for higher-level graduate careers in industry and government and for research at PhD or Research Masters level. The course contributes to addressing the continuing shortage of highly trained mathematical scientists in Australia and abroad.

Through a combination of research and advanced coursework units, students pursue specialised studies in an area of mutual interest with a personal research mentor/supervisor. Research units will enable students to develop an understanding of the nature of mathematical and statistical approaches to solving real world, current research problems. Coursework units provide students the opportunity to develop much more advanced skills and knowledge compared with those built in the undergraduate course. The coursework emphasises mathematics and statistics that is required for current research and for a competitive edge in the employment market.

The course provides students with further depth of knowledge and analytical skills expected of professionals who apply mathematics, computational methods, decision science and statistics in the workplace and in further research.

Course Structure

Requirements for the completion of MS10 Bachelor of Mathematics (Honours) are as follows:

CORE: Foundations of Research unit and Reviewing the Field unit

OPTION: A choice of either the *Expanded Research Strand* or the *Extended Coursework Strand*

Each strand comprises of coursework and a major research project supervised by QUT staff.

Career Outcomes

Mathematics graduates are employed across a wide range of areas. These include, but are not limited to, finance, investment, data analytics, defence and

Bachelor of Mathematics (Honours)

national security, research, information technology, engineering modelling and simulation, environmental science, health, management, marketing, logistics, media, and education. In addition to their knowledge and skills in mathematics, graduates are also highly valued for their analytical and problem-solving skills. Development of skills in communication, problem-solving, critical thinking and teamwork form an integral part of the course.

Professional Recognition

Graduates of this course may be eligible for membership of the Australian Mathematical Society, Statistical Society of Australia and/or the Australian Society for Operations Research

Pathways to Further Study

The QUT Bachelor of Mathematics (Honours) is located at Level 8 of the Australian Qualifications Framework (AQF). Graduates may be eligible for discipline relevant Research Masters and/or Doctoral level programs.

Domestic Course structure

Requirements for the completion of MS10 Bachelor of Mathematics (Honours) are as follows:

MXN400 Mathematical Research Training (12 cp)

MXN404-1 Honours Research Project-1 (12 cp)

MXN404-2 Honours Research Project-2 (12 cp)

MXN404-3 Honours Research Project-3 (12 cp)

and 4 Advanced Coursework units (48 credit points)

International Course structure

Requirements for the completion of MS10 Bachelor of Mathematics (Honours) are as follows:

MXN400 Mathematical Research Training (12 cp)

MXN404-1 Honours Research Project-1 (12 cp)

MXN404-2 Honours Research Project-2 (12 cp)

MXN404-3 Honours Research Project-3 (12 cp)

and 4 Advanced Coursework units (48

credit points)

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

For this course you must complete a total of 480 credit points, made up of 288 credit points from the Bachelor of Urban Development (Honours) (Urban and Regional Planning) and 192 credit points from the Bachelor of Science (Environmental Science). You will study both science and urban development units in your first four years, and concentrate on urban development studies for the remainder of this course.

Urban and Regional Planning component

Students are required to complete 288 credit points of study comprising:

- 72 credit points of core Urban Development units including a 12

credit point work placement unit and a 12 credit point research methods unit.

- 216 credit points of Urban and Regional Planning major discipline units including 24 credit points of capstone project.

Environmental Science Component

Students are required to complete 192 credit points of study comprising:

- 60 credit points of core Science units which includes 6 credit point units, and one option unit (12cp) to be selected from a unit options list.
- 132 credit points of Environmental Science major discipline units.

International Course structure

For this course you must complete a total of 480 credit points, made up of 288 credit points from the Bachelor of Urban Development (Honours) (Urban and Regional Planning) and 192 credit points from the Bachelor of Science (Environmental Science). You will study both science and urban development units in your first four years, and concentrate on urban development studies for the remainder of this course.

Urban and Regional Planning component

Students are required to complete 288 credit points of study comprising:

UXH400-2	Project - Part B

Year	2023
QUT code	SE40
CRICOS	084922G
Duration (full-time)	5 years
Duration (part-time domestic)	9 years
ATAR/Selection rank	84.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$5,100 per year full-time (96 credit points)
International fee (indicative)	2023: \$34,000 per year full-time (96 credit points)
Total credit points	480
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Jacob Coetzee (Engineering); Professor Tim Moroney (Mathematics major)
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

To graduate with a Bachelor of Engineering (Honours) in SE40, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Mathematics in SE40, students are required to complete 192 credit points of course units, as outlined below:

- 96 credit points (8 units) of Core units, which include 24 credit points (2 units) of Core Option units selected from an approved list.
- 96 credit points (8 units) of Major Core units

International Course structure

To graduate with a Bachelor of Engineering (Honours) in SE40, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x Advanced major units 60cp.

To graduate with a Bachelor of Mathematics in SE40, students are required to complete 192 credit points of course units, as outlined below:

- 96 credit points (8 units) of Core units, which include 24 credit points (2 units) of Core Option units selected from an approved list.
- 96 credit points (8 units) of Major Core units

Duration (full-time)	5 years
Duration (part-time domestic)	9 years
ATAR/Selection rank	79.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$8,100 per year full-time (96 credit points)
International fee (indicative)	2023: \$39,800 per year full-time (96 credit points)
Total credit points	480
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Jacob Coetzee (Engineering); Associate Professor Wayne Kelly (Information Technology)
Discipline Coordinator	Dr Thomas Rainey (Chemical Process), Associate Professor Jonathan Bunker (Civil); Dr Matthew McKague (Computer & Software Systems); Dr Jacob Coetzee (Electrical); Dr Aaron McFadyen (Electrical & Aerospace); Dr Wim Dekkers/Professor Ted Steinberg (Mechanical); Associate Professor Luis Alvarez (Mechatronics); Associate Professor Devakar Epari (Medical); Dr Jinglan Zhang (Computer Science); and Dr Erwin Fieft (Information Systems) +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank

[Find out more about the QUT Year 12 Early Offer Scheme](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

To graduate with a Bachelor of Engineering (Honours) in SE60, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Information Technology in SE60, students are required to complete 192 credit points of course units, as outlined below:

- six (6) core units (72 credit points)
- one (1) block of ten (10) major units (120 credit points)

International Course structure

To graduate with a Bachelor of Engineering (Honours) in SE60, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Information Technology in SE60, students are required to complete 192 credit points of course units, as outlined below:

- six (6) core units (72 credit points)
- one (1) block of ten (10) major units (120 credit points)

Sample Structure

PLEASE NOTE:

For students taking the **IT: Computer Science major with Engineering: Computer & Software Systems major**, please refer to the Engineering & IT Units: Computer & Software Systems Major with Computer Science Major (Feb)/(July) structure.

Bachelor of Engineering (Honours)/Bachelor of Information Technology

Code	Title
Semester 1 (February) commencements	
Year 2, Semester 1	
For Engineering students majoring in: Civil, Mechanical, Medical or Process/Chemical Process major -	
IT Core Unit Option	
IT Core Unit Option	
For Engineering students majoring in: Electrical, Electrical & Aerospace or Mechatronics major -	
IT Core Unit Option	
CAB201	Programming Principles
Year 2, Semester 2	
For Engineering students majoring in: Civil, Mechanical, Medical or Process/Chemical Process major -	
CAB201	Programming Principles
CAB202	Microprocessors and Digital Systems
(Note: Select CAB202 from the Computer Science Major Option list - this is compulsory in the IT component if majoring in these engineering majors.)	
For Engineering students majoring in: Electrical, Electrical & Aerospace or Mechatronics major -	
IT Core Unit Option	
Computer Science Major Unit Option 1	
(Note: CAB202 will be available as core in the engineering component if majoring in these engineering majors.)	
Year 3, Semester 1	
CAB203	Discrete Structures
CAB302	Software Development
Year 3, Semester 2	
CAB222	Networks
Note: from 2023, CAB303 is replaced by CAB222. CAB303 will still count towards this Major, if you have completed this unit previously.	
IFB295	IT Project Management
Year 4, Semester 1	
CAB301	Algorithms and Complexity
IFB398	Capstone Project (Phase 1)
Year 4, Semester 2	
IFB399	Capstone Project (Phase 2)
Semester 2 (July) commencements	
Year 2, Semester 2	
CAB201	Programming Principles
IT Core Option	
Year 3, Semester 1	
CAB203	Discrete Structures
CAB302	Software Development

CAB202	Microprocessors and Digital Systems
For Engineering students majoring in: Electrical, Electrical & Aerospace or Mechatronics major -	
Computer Science Major Unit Option 1	
Year 3, Semester 2	
CAB222	Networks
Note: from 2023, CAB303 is replaced by CAB222. CAB303 will still count towards this Major, if you have completed this unit previously.	
IFB295	IT Project Management
Year 4, Semester 1	
CAB301	Algorithms and Complexity
CAB302	Software Development
Year 4, Semester 2	
IFB398	Capstone Project (Phase 1)
IT Core Unit Option	
OR	
Computer Science Major Unit Option 2	
Year 5, Semester 1	
IFB399	Capstone Project (Phase 2)
Computer Science Major Unit Option 2	
OR	
IT Core Unit Option	
(Select IT Core Unit Option here, if not selected previously.)	
Computer Science Major Unit Options	
CAB202	Microprocessors and Digital Systems
(CAB202 is CORE unless your Engineering major is in Computer & Software Systems, Electrical, Electrical & Aerospace or Mechatronics in which you will complete CAB202 in your Engineering component.)	
DSB100	Fundamentals of Data Science
CAB320	Artificial Intelligence
CAB340	Cryptography
CAB401	High Performance and Parallel Computing
CAB402	Programming Paradigms
CAB403	Systems Programming
CAB420	Machine Learning
CAB430	Data and Information Integration
CAB432	Cloud Computing
CAB440	Network and Systems Administration

Year	2023
QUT code	SE80
CRICOS	084924E
Duration (full-time)	5 years
Duration (part-time domestic)	9 years
ATAR/Selection rank	79.00
Offer Guarantee	Yes
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$7,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$38,600 per year full-time (96 credit points)
Total credit points	480
Start months	July, February
Int. Start Months	July, February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Jacob Coetzee (Engineering); Dr Luke Nothdurft (Science)
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements Year 12 early offer scheme

If you're a current Queensland Year 12 student, you may be eligible to receive an offer for this course on the last day of Queensland Year 12, before receiving your ATAR or selection rank.

[Find out more about the QUT Year 12 Early Offer Scheme>](#)

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

To graduate with a Bachelor of Engineering (Honours) in SE80, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Science in SE80, students are required to complete

192 credit points of course units, as outlined below:

- 7 Core units (60 credit points) which includes 6 credit point units, and a core option unit (12 credit points) selected from an approved list.
- 11 Major units (132 credit points)

International Course structure

To graduate with a Bachelor of Engineering (Honours) in SE80, students are required to complete 288 credit points of course units, as outlined below:

- First year: four (4) core units 48cp + two (2) discipline foundation units 24cp + two (2) option units 24cp (96 credit points)
- Major: one (1) block of eight (8) major units 96cp plus eight (8) honours-level units 96cp (192 credit points).

Honours units to consist of:

- Research methods 12cp
- Project 24cp
- 5 x advanced major units 60cp.

To graduate with a Bachelor of Science in SE80, students are required to complete 192 credit points of course units, as outlined below:

- 7 Core units (60 credit points) which includes 6 credit point units, and a core option unit (12 credit points) selected from an approved list.
- 11 Major units (132 credit points)

Year	2023
QUT code	ST10
CRICOS	080487J
Duration (full-time)	1 year
Duration (part-time domestic)	2 years
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$8,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$40,200 per year full-time (96 credit points)
Total credit points	96
Credit points full-time sem.	48
Start months	July, February
Int. Start Months	July, February
Course Coordinator	Associate Professor Melody De Laat
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

You must have a recognised bachelor degree in science or relevant discipline with a minimum grade point average of 5.00 (on QUT's 7-point scale), completed within the last 5 years, *plus*:

- Suitable honours topic
- Proposed honours supervisor

If you do not meet the grade point average requirement but you have:

- Excelled in the final semesters of your degree; *or*
- Completed a double degree and excelled in the business or commerce part of your double degree

you are encouraged to apply.

Places are subject to supervisor availability, infrastructure, and other required resources.

International Entry requirements

Entry Requirements or relevant discipline *plus*

:

- Suitable honours topic
- Proposed honours supervisor

Places are subject to supervisor availability.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Overview

The Bachelor of Science (Honours) allows you to further develop specific areas of expertise in science by providing extended modern and rigorous training in science. It prepares you both for higher-level graduate careers in industry and government and for research at PhD or Research Masters level.

Through a combination of research and

advanced coursework units, you will pursue specialised studies in an area of mutual interest with a personal research mentor/supervisor. You will develop high level skills in a specific discipline area (Biological Science, Earth Science, Environmental Science, Chemistry or Physics) and acquire research skills appropriate to your discipline. Coursework units provide you the opportunity to develop much more advanced skills and knowledge compared with those built in the undergraduate course. You will design and undertake experimental programs in either laboratory or field settings to solve complex problems. A research project allows you to demonstrate your advanced academic capability and culminates in the completion of an honours thesis.

Course Design

Requirements for the completion of ST10 Bachelor of Science(Honours) (Study Area A) are as follows:

STUDY AREA A: 96 credit points (6 units) comprising One (1) Major from the following:

- Biological Sciences
- Chemistry
- Earth Science
- Environmental Science
- Physics

Each Major is comprised of the Core units Foundations of Research and Reviewing the Field, and the choice of either the *Expanded Research* Strand or the *Extended Coursework* Strand.

Each strand comprises of coursework and a major research project supervised by QUT staff.

Career Outcomes

Research, Graduate employment in industry or government.

Professional Recognition

Membership in professional organisations is not specifically tied to the completion of an Honours degree as entry requirements are met by the completion of the Bachelors degree.

Pathways to Further Study

The QUT Bachelor of Science (Honours) is located at Level 8 of the Australian Qualifications Framework (AQF). Honours provides the key research pathway to postgraduate study. The program is designed to easily articulate into a Master

Bachelor of Science (Honours)

of Science (Research) with one year advanced standing or into a PhD (depending upon the level of Honours attained).

Domestic Course structure

You must complete 96 credit points (8 units) from one of the following study areas:

- Biological Sciences
- Chemistry
- Earth Science
- Environmental Science
- Physics

International Course structure

You must complete 96 credit points (8 units) from one of the following study areas:

- Biological Sciences
- Chemistry
- Earth Science
- Environmental Science
- Physics

Year	2023
QUT code	ST20
CRICOS	102820D
Duration (full-time)	4 years
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$7,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$39,200 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Course Coordinator	Dr Brett Williams

Domestic Entry requirements

Prerequisites

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Biology (Units 3 & 4, B); *and*
- completion of Year 12 or attained age 18 years.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- One of Agricultural Science, Biology, Chemistry, Earth and Environmental Science, Marine Science, Physics, or Psychology (Units 3 & 4, C)
- Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Academic entry requirements

You must be a current student completing Year 12 in Australia.

You will be considered solely on the basis of your ATAR or IB Diploma results.

Please refer to the [Guide to entry thresholds](#).

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements Prerequisites

Before you start this course, you must have obtained the required result for the Queensland year 12 subjects (or equivalent senior subjects) listed below within your Year 12 studies.

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Biology (Units 3 & 4, B).

Assumed knowledge

Before you start this course, we assume you have sound knowledge of the subject/s listed below. If you don't have the subject knowledge, you can still apply for the course but we encourage you to undertake bridging studies to gain the knowledge:

- Specialist Mathematics (Units 3 & 4, C); *and*
- At least one of Agricultural Science, Chemistry, Earth and Environmental Science, Marine Science or Physics (Units 3 & 4, C).

Additional entry requirements

You must be a 2022 Year 12 student or a recent Year 12 student returning from up to two gap years.

Adjustments to your ATAR/selection rank

Elite Athlete Scheme adjustments do not apply to this course. Any other adjustments you receive to your ATAR or selection rank will be applied to this course.

[Find out if you're eligible for an adjustment to your ATAR or selection rank](#)

Domestic Course structure

ST20 Bachelor of Science Advanced (Honours) comprises 384 credit points (32 units), including 4 core units (STB100, STB200, STB300 and a core option), 240 credit points (20 units) discipline specific major units (including 8 Honours level units) and 96 credit points (8 units) of complementary studies (2 minors).

The Biological Sciences Major consists of twenty (20) units [240cp]:

Biological Sciences Majors are also required to complete the following study area B components (Minors)

- Statistical Modelling minor

and one minor (48 cp) from:

- Biotechnology and Genetics minor
- Wildlife Ecology Minor
- Advanced Science Minor

International Course structure

Biological Sciences Majors are also required to complete the following study area B components (Minors)

- Statistical Modelling minor

and one minor (48 cp) from:

- Biotechnology and Genetics minor
- Wildlife Ecology Minor
- Advanced Science Minor

Sample Structure

The Biological Sciences major in the Bachelor of Science Advanced (Honours) is structured to provide high-achieving students with a strong applied knowledge of biology, building on foundational knowledge obtained in high school. The major will extend understanding of the structure, function and diversity of living things, from cells to whole organisms, including key areas of plant and animal biology and microbiology and the interaction with each other and the environment. The Biological Sciences major is complemented and extended with a minor in either Biotechnology & Genetics or Wildlife Ecology or a minor specifically tailored to future research goals. Students will study units in their first semester which help them identify which area they wish to pursue. By integrating theory and practice and with a strong focus on experimental design, students will learn to apply key biological principles to important areas such as conservation, food security and biotechnology that will lead to research opportunities third and fourth year research units. All students in the major will have the opportunity to participate in research-based activities in these or other key areas of biology through the ST20 core units and through extracurricular activities. Graduates of the Biological Science major will be skilled at the desk, in the laboratory and in the field with strong skills in one of the areas closely aligned to research. They will have advanced research skills and critical thinking ability needed to tackle real-world problems in biology and undertake cutting edge research. These attributes will support high-achieving students in post-graduate study and a research career.

Sample Structure

Earth Science is critical for Australia's future sustainable development as our natural resources are a major building block of the nation's economy.

Geoscientists play a leading role in finding, developing and managing these resources, as well as studying climate change and managing environmental issues, such as chronic water shortage, dry land salinity and coastal development.

An understanding of Planet Earth is fundamental to your career as a Scientist. Earth Science provides us with an understanding of Earth materials, the natural processes acting in and upon our planet, and its history. You will gain advanced skills needed to become a professional Earth Scientist with special emphasis on hands-on skills acquired through laboratory work and field studies for both resource exploration and management and environmental applications. The program provides you with particular strengths in the areas of sedimentary geology, structural geology, igneous processes and geology, hydrogeology, marine geology, and environmental geology - all these subject areas are of particular importance to Queensland and key industrial sectors that underpin our economy. The Earth Science major in the Bachelor of Science Advanced (Honours) will qualify you with an advanced and coherent knowledge in Earth Science.

Study Area B requirements for an Environmental Science Major are:

- Statistical Modelling minor

And one minor (48 cp from)

- Environmental Management Minor
- Advanced Science Minor

Sample Structure

The Environmental Science major in the Bachelor of Science Advanced (Honours) will qualify students with an advanced and coherent knowledge of environmental processes and systems. The study of Environmental Science provides an in depth knowledge of the Earth's natural resources and an understanding of the mechanisms, natural processes and human impacts that shape environmental systems. Environmental Scientists play an integral role in managing Australia's future sustainable development, environment impacts and resource management while minimising impacts and degradation.

Within this major students will gain the skills required to pursue a career as a professional environmental scientist, science educator or resource manager. This will be achieved with an emphasis on developing theoretical understanding of environmental processes and systems together with hands-on skill development and hypothesis testing through practical and field studies. The major will provide students with particular strengths in the areas of land resources, environmental impacts, geographic information systems and field mapping, systems modelling and environmental management.

Year	2023
QUT code	ST20
CRICOS	102820D
Duration (full-time)	4 years
ATAR/Selection rank	90.00
Campus	Gardens Point
Domestic fee (indicative)	2023: CSP \$7,400 per year full-time (96 credit points)
International fee (indicative)	2023: \$39,200 per year full-time (96 credit points)
Total credit points	384
Credit points full-time sem.	48
Start months	February
Int. Start Months	February
Deferment	You can defer your offer and postpone the start of your course for one year.
Course Coordinator	Dr Brett Williams
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements Prerequisites

Before you start this course, you must have obtained the required result for the Queensland year 12 subjects (or equivalent senior subjects) listed below within your Year 12 studies.

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Physics (Units 3 & 4, B).

Assumed knowledge

Before you start this course, we assume you have sound knowledge of the subject/s listed below. If you don't have the subject knowledge, you can still apply for the course but we encourage you to undertake bridging studies to gain the knowledge:

- Specialist Mathematics (Units 3 & 4, C); *and*
- At least one of Agricultural Science, Chemistry, Earth and Environmental Science, Marine Science or Physics (Units 3 & 4, C).

Additional entry requirements

You must be a 2022 Year 12 student or a recent Year 12 student returning from up to two gap years.

Adjustments to your ATAR/selection rank

Elite Athlete Scheme adjustments do not apply to this course. Any other adjustments you receive to your ATAR or selection rank will be applied to this course.

[Find out if you're eligible for an adjustment to your ATAR or selection rank](#)

International Entry requirements

Academic entry requirements

You must be a current student completing Year 12 in Australia.

You will be considered solely on the basis of your ATAR or IB Diploma results.

Please refer to the [Guide to entry thresholds](#).

Prerequisites

Before you start this course, you must have obtained the required result for the Queensland year 12 subjects (or

equivalent senior subjects) listed below within your Year 12 studies.

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C); *and*
- Mathematical Methods (Units 3 & 4, C); *and*
- Physics (Units 3 & 4, B).

International Assumed knowledge

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)
- Physics (Units 3 & 4, B)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

ST20 Bachelor of Science Advanced (Honours) comprises 384 credit points (32 units), including 4 core units (STB100, STB200, STB300 and a core option), 240 credit points (20 units) Physics units (including 8 Honours level units) and 96 credit points (8 units) of complementary studies (2 minors).

Physics Majors are also required to complete the following study area B components (Minors)

- Mathematics for Physics minor

and one minor (48 cps) from:

- Astrophysics Minor
- Nanotechnology Minor
- Advanced Science minor

International Entry requirements

A completed recognised bachelor degree in information technology with a minimum grade point average (GPA) score of 4.0 (on QUT's 7 point scale).

Pathway to the Master of Information Technology

- Graduate Certificate in Communication for Information Technology (IN17) (one semester) to [Master of Information Technology](#) (IN20) (three semesters)

Students with bachelor degrees in disciplines other than information technology may consider the [University Certificate in Tertiary Preparation for Postgraduate Studies](#) (QC06) or [English for Academic Purposes](#) pathways.

Pathway to Master of Data Analytics

- Graduate Certificate in Communication for Information Technology (IN17) (one semester) leading to [Master of Data Analytics](#) (IN27) (three semesters)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.0
Listening	5.0
Reading	5.5
Writing	5.5
Speaking	5.0

Successful completion of QUT's English for Academic Purposes (EAP)(Direct Stream) with 50% or better or QC32 English for Academic Purposes 2.

Course Design

The Graduate Certificate in Communication for Information Technology will provide you with core discipline studies and communication knowledge and skills.

The course structure consists of 48 credit points of units. There are two common core communications units (24cp) and two information technology unit options (24cp) from the following information technology areas: Computer Science/Data Science, Enterprise Systems, Networks, Security, or Business Process Management.

NB: If you intend to follow a major pathway into IN20/21 MIT you should select the recommended IT units for those majors on commencement of IN17.

Pathways to Further Study

The QUT Graduate Certificate in Communication for Information Technology is located at Level 8 of the Australian Qualifications Framework (AQF). Eligible graduates may articulate from the Graduate Certificate in Communication for Information Technology into the related [IN20 Master of Information Technology](#)/ [IN21 Master of Information Technology - Graduate Entry](#) course.

International Course structure

The course structure consists of 48 credit points of units. There are two common core communications units (24 credit points) and two information technology unit options (24 credit points) from the following information technology areas:

- computer science/software development
- cyber security and networks
- business analysis
- business process management
- data science
- enterprise systems
- executive IT

NOTE: You should select the recommended IT units for your [chosen major](#) on commencement of IN17. Please contact the Course Coordinator for assistance with any IT unit selection.

Sample Structure Important Course Information

You should select the recommended IT units for your [chosen major](#) on commencement of IN17. Please contact the Course Coordinator for assistance with any IT unit selection.

Information Technology unit options are available from the following IT areas:

Business Process Management related units - IFN515, *IFN521*, *IFN562*
 Business Analysis related units - IFN561, IFN562, *IFN515*, *IFN521*
 Computer Science related units - IFN563 (6CP) + IFN564 (6CP), *IFN507*, *IFN509*, *IFN541*, *IFN591*
 Cyber Security & Networks related units - IFN507, IFN541, *IFN591*

Graduate Certificate in Communication for Information Technology

Data Science related units -

IFN509, *IFN521*

Software Development related units -

IFN563 (6CP) + IFN564 (6CP)

Enterprise Systems related units -

IFN561, *IFN515*, *IFN521*, *IFN541*, *IFN562*

Executive IT related units -

IFN561, *IFN521*

* *Italics = option units in the MIT major*

PLEASE NOTE: IFN563 and IFN564 are 6 credit point (cp) units (delivered in block mode - 5 week teaching period).

IMPORTANT: When you select a 6cp unit you must select another 6cp unit together with it. The units are delivered in 5 week teaching period:

- 5 Week A runs from week 1 to 5 of semester 1
- 5 Week B runs from week 9 to 13 of semester 1
- 5 Week C runs from week 1 in semester 2
- 5 Week D runs from week 9 in semester 2.

Due to the shorter timeframes involved the 5 Week sessions have different enrolment and [census dates](#).

You must have one of:

- A recognised bachelor degree (or higher qualification) in any discipline; *or*
- A recognised diploma (or higher qualification) in any discipline followed by at least two years full-time (or equivalent) professional work experience as an analyst and/or in the information technology field; *or*
- At least five years full-time (or equivalent) professional work experience as an analyst and/or in the information technology field.

International Entry requirements

A recognised bachelor degree (or higher qualification) in any discipline.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

You must complete 48 credit points of course units, consisting of:

- 1 core unit (12 credit points)
- 36 credit points of elective units selected from an approved list.

International Course structure

You must complete 48 credit points of course units, consisting of:

- 1 core unit (12 credit points)
- 36 credit points of elective units selected from an approved list.

Sample Structure

PLEASE NOTE: Elective units - IFN552, IFN554, IFN555 and IFN556 are 6 credit point (cp) units (delivered in block mode - 5 week teaching period).

Important: When you select a 6cp unit you must select another 6cp unit (ideally one unit in first half of the semester and the other in the second half of the semester to balance enrolment

load).

IFN552, IFN554, IFN555 and IFN556 are delivered in 5 Week teaching sessions commencing in either week 1 or week 9 of semester 1 & 2:

- 5 Week A runs from week 1 to 5 of semester 1
- 5 Week B runs from week 9 to 13 of semester 1
- 5 Week C runs from week 1 in semester 2
- 5 Week D runs from week 9 in semester 2.

Due to the shorter timeframes involved the 5 Week sessions have different enrolment and [census dates](#).

Code	Title
Unit Set	
IFN619	Data Analytics for Strategic Decision Makers
PLUS Select 36 credit points from the Electives option list:	
[The units are classified in streams as a guide to assist you in focusing your studies. You may wish to pick and choose combination of units depending on your needs and interests]	
IFN509	Data Exploration and Mining (IFN509: data analysis/ data-driven/ data systems development focus)
IFN515	Fundamentals of Business Process Management (IFN515: data-driven decision making focus)
IFN552	Systems Analysis and Design (IFN552+IFN556: data systems development focus/ IFN552+IFN554: data-driven decision making focus)
IFN554	Databases (IFN554+IFN555: data analysis/ data systems development focus/ IFN554+IFN552 data-driven decision making focus)
IFN555	Introduction to Programming (IFN555+IFN554: data analysis/ data systems development focus/ IFN555+IFN556: data-driven decision making focus)
IFN556	Object Oriented Programming (IFN556+IFN555: data-driven decision making focus/ IFN556+IFN552: data systems development focus)
MXN500	Statistical Data Analysis (MXN500: data analyst/ data-driven decision making/ data systems development)
Note:	

Graduate Certificate in Data Analytics

IFN501 Programming Fundamental (data systems development focus) is permitted to count towards the option if completed prior to 2020. It is replaced by IFN555 (6CP) and IFN556 (6CP) which are delivered in block mode - 5 week teaching period.

Domestic Entry requirements

Entry requirements
You must have a recognised bachelor degree (or higher qualification) in one of the following fields:

- Biomedical, medical, medical electronics etc engineering
- Biophysics
- Electrical, avionics etc engineering
- Geophysics
- Mechanical engineering
- Medical physics
- Physics

The following degrees (or higher qualification) are not acceptable:

- Biomedical science
- Laboratory science
- Medical imaging
- Radiotherapy
- Medical radiation
- Medical science

International Entry requirements

Academic entry requirements

A completed recognised bachelor degree (or higher award) in physics.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Career Outcomes

Graduates can seek employment in hospitals, health departments, tertiary institutions and medical instrumentation companies. Depending on the field of employment, graduates may be known as a medical physicist, health physicist or bio-engineer.

- Professional medical/health physicists:
- apply electronic tools and medical software, ultrasonics, radiation and computers to clinical and environmental problems
 - monitor the environment to maintain acceptable standards in the workplace and the community
 - apply fundamental physical research in development programs
 - are responsible for calibration, care and

maintenance of instruments and apparatus.

Course Design

Stage 1— Graduate Diploma (PH71) comprises assessed coursework such as advanced lectures, seminars, reading units or independent study. Full-time students will need an average of 14 hours a week of formal contact (seven hours for parttime students). Students can graduate with a Graduate Diploma in Medical Physics after satisfactory completion of Stage 1.

Stage 2— Master of Applied Science (PH80) students undertake a program of supervised research and investigation that can be completed at QUT or in a suitable external institution.

Professional Recognition

The course is accredited by the Australasian College of Physical Sciences and Engineers in Medicine.

Domestic Entry requirements Entry requirements 2 year program

You must have a recognised bachelor degree (or higher) in any discipline with a minimum grade point average (GPA) of 4.00 (on QUT's 7 point scale).

1.5 year program

You must have one of:

- A recognised bachelor degree (or higher) in information technology with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale); or
- A recognised bachelor degree in any other discipline with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale) followed by three full-time years (or equivalent) of professional work experience in information technology.

1 year program

You must have one of:

- A recognised bachelor honours degree in information technology with a minimum grade point average of 4.00 (on QUT's 7 point scale); or
- A recognised graduate diploma (or higher) in information technology with a minimum grade point average of 4.00 (on QUT's 7 point scale); or
- A recognised bachelor degree (or higher) in information technology with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale) *plus* completion with a minimum grade point average (GPA) score of 4.00 in the QUT graduate certificates listed below.
- [Graduate Certificate in Business Analysis](#)
- [Graduate Certificate in Computer Science](#)
- [Graduate Certificate in Cyber Security and Network](#)

International Entry requirements

2 year program

A completed recognised bachelor degree in any discipline with a minimum grade point average of 4.0 (on QUT's 7 point scale).

1.5 year program*

A completed recognised bachelor degree in information technology with a minimum grade point average of 4.0 (on QUT's 7 point scale); or

A completed recognised graduate certificate in information technology with a minimum grade point average of 4.0 (on QUT's 7 point scale).

1 year program*

A completed Australian honours bachelor degree in information technology with a minimum grade point average of 4.0 (on QUT's 7 point scale); or

A completed recognised graduate diploma in information technology with a minimum grade point average of 4.0 (on QUT's 7 point scale).

**Note: As part of QUT's application for admission process, you will be automatically assessed for the 1.5 or 1 year program, if eligible. If you wish to be considered for the 2 year program only, please indicate this on your application form.*

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

If you have an IELTS score of 6 (with Reading and Writing no less than 5.5) and (Listening and Speaking no less than 5) (or accepted equivalent), you may be considered for the Graduate Certificate in Communication for Information Technology pathway.

Course Overview

Graduates of the Master of IT degree will have the specialist knowledge and skills required for senior IT-related professional positions (both technical and managerial). The range of majors offered within the degree opens opportunities for students across the IT sector.

Students who graduate from this degree will have the ability to demonstrate advanced knowledge, based on research practices, in at least one IT discipline. They will undertake a significant research-based project that allows them to constructively apply the analytical skills they develop within an IT problem

domain. The course will provide students with the ability to formulate best practice IT strategies and solutions and during this process create new IT discipline knowledge.

The degree aims to prepare students for work in a specialist IT area through a program of study that balances theoretical content, project-based experiences and industry-oriented perspectives.

Core Units

Students must complete core units in Research Based Practice, Project Management and a major Project or 2 small Projects on the approval of their Course Coordinator.

Majors

Students may select a major of 48 credit points from the following disciplines;

* Data Science

The data science major provides you with the knowledge and skills to extract information from large, complex and disparate data sets, using leading edge algorithms and tools.

* Enterprise Systems

Enterprise systems are engineered information systems that consist of applications and associated information, forming the fundamental structure of organisational processes in most large organisations. Enterprise systems provide comprehensive administrative systems and help to automate and streamline business processes.

* Security

The Security major provides you with the skills and knowledge appropriate for an information security professional. You will develop skills in risk management security policies and be aware of the technical security mechanisms and issues.

* Computer Science

The computer science major extends your understanding of computer programming beyond being a mere user of programming language to an appreciation of their design and implementation.

* Business Process Management

The Business Process Management Major will provide graduates with complementary skills and knowledge to create and align information systems to effectively support business and enable business strategy.

* Networks

The Networks major provides you with the

practical skills and theoretical knowledge required by a network administrator. You will gain experience with designing, implementing and maintaining network systems for a wide range of organisations.

* Human Computer Interaction

The HCI major develops the advanced knowledge & skills in human-centred design activities involving emerging technologies in order to create new forms of human-computer interaction.

* Information Management

The Information Management major provides you with the skills and knowledge to find employment in the information management industry. You will gain awareness of the activities in which information management professionals are engaged, in various organisational contexts.

* No Major

Students may select any 4 Advanced level units

Masters Strand Options

Students must complete 72 credit points from the Transition/Advanced Unit Options

Course Completion Rules

Students should meet the following requirements before they are able to complete the Masters program:

For students with an undergraduate degree in an IT-related field wishing to complete the 2 year MIT:

- Students are required to complete 192 credit points of units.
- Students are required to complete the specified core units.
- Students wishing to specialise must complete the specific unit requirements for a major.
- Students wishing to complete their postgraduate studies without a single area of specialisation must satisfy the unit requirements for graduation with no major.
- Students may be allowed to take up to 72 credit points of electives from the list of approved elective units provided.

Entry Requirements

A completed recognised Level 7 Bachelor Degree in any discipline with a minimum GPA of 4 (on a 7 point scale).

IELTS overall band score of 6.5 with no sub-band below 6.0, or equivalent.

Students who have completed a

recognised Level 7 Bachelor Degree in the field of Information Technology and are eligible to enter IN21 (graduate entry) MUST indicate 2 year entry option at point of application.

Domestic Course structure

To meet the course requirements for the Master of Information Technology (Study Area A) you are required to complete 192 credit points of course units consisting of:

- 96 credit points of core units, which includes 48 credit points of IT foundation units, and 2 x 24 credit points of industry and research based project units.
- 60 credit points of discipline units from your selected Major.
- 36 credit points of IT related elective units selected from an approved list of units, which is drawn from units offered in each of the IT majors. The unit choices allow you to explore an area in more depth (e.g., Software Development, Data Science), or provide the opportunity for you to develop a breadth of understanding (e.g., Business Analysis, Computer Science).

International Course structure

To meet the course requirements for the Master of Information Technology (Study Area A) you are required to complete 192 credit points of course units consisting of:

- 96 credit points of core units, which includes 48 credit points of IT foundation units, and 2 x 24 credit points of industry and research based project units.
- 60 credit points of discipline units from your selected Major.
- 36 credit points of IT related elective units selected from an approved list of units, which is drawn from units offered in each of the IT majors. The unit choices allow you to explore an area in more depth (e.g., Software Development, Data Science), or provide the opportunity for you to develop a breadth of understanding (e.g., Business Analysis, Computer Science).

Domestic Entry requirements

Entry Requirements

1.5 year program

You must have a recognised bachelor degree (or higher qualification) in business or information technology with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale).

1 year program

You must have:

- A recognised bachelor honours degree in business or information technology with a minimum grade point average of 4.00 (on QUT's 7 point scale); *or*
- A recognised graduate diploma (or higher) in business or information technology with a minimum grade point average of 4.00 (on QUT's 7 point scale); *or*
- A recognised bachelor degree in business or information technology *plus* graduate certificate in business or information technology each with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale); *or*
- Completed QUT's [Graduate Certificate in Business Process Management](#) with a minimum grade point average of 4.00.

Advanced Standing

If you are 1 year entrant, you will automatically receive 48 credit points of advanced standing upon offer.

For more information please visit [QUT - Advanced standing](#) and for:

- Institution name - enter "Any recognised tertiary institution" as institution name and
- QUT course or unit - enter "IN23 Master of Business Process Management"

to view the advanced standing you will be granted.

If you have completed the QUT [Graduate Certificate in Business Process Management](#) within the last 7 years you will instead be credited all of the units you passed in the course.

International Entry requirements

1.5 year program

A completed recognised bachelor degree in business or information technology with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale).

1 year program

A completed Australian honours bachelor degree in information technology or business with a minimum grade point average of 4.00 (on QUT's 7 point scale); *or*

A completed recognised graduate diploma in information technology or business with a minimum grade point average of 4.00 (on QUT's 7 point scale).

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Overview

The Master of Business Process Management will provide graduates with the skills and knowledge to create and align information systems to effectively support business and enable business strategy. The program examines business-IT alignment issues through appropriate theory and skill development, and provides career enhancement opportunities into senior management and governance roles. Students will study specialist units in Business Process Management specialisation and may undertake additional study in the areas of corporate systems, IT professional services, enterprise architecture and systems, and information and knowledge management.

Course Structure

To be eligible for the Master of Business Process Management (IN23):

- Students are required to complete 144 credit points of units.
- Students are required to complete the specified core units (120cp) which includes 48cp in specialist Business Process Management units
- Students must also complete two units (24cp) of electives from the list of approved elective units provided.

Domestic Course structure

The Master of Business Process Management provides graduates with the

skills and knowledge to create and align information systems to effectively support business and enable business strategy. The program examines business-IT alignment issues through appropriate theory and skill development, and provides career enhancement opportunities into senior management and governance roles.

Students will study specialist units in Business Process Management specialisation and may undertake additional study in the areas of corporate systems, IT professional services, enterprise architecture and systems, and information and knowledge management.

Course completion rules

- Students are required to complete 144 credit points of units.
- Students are required to complete the specified core units (96cp)
- Students must also complete four units (48cp) of electives from the list of approved elective units provided. NB: *If you have no BPM Background, you should complete IFN515 Fundamentals of BPM in your first semester*

Domestic Entry requirements

Entry requirements - all majors

2 year program

You must have a recognised bachelor degree (or higher qualification) in any discipline with a minimum grade point average (GPA) of 4.00 (on QUT's 7 point scale).

1.5 year program

You must have a recognised bachelor degree (or higher qualification) in information technology or mathematics with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale).

Entry requirements - Biomedical Data Science major only

The following are additional admission pathways for the Biomedical Data Science major beyond the ones listed above for all majors.

1.5 year program

You must have a recognised bachelor degree (or higher qualification) in biomedical science with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale).

1 year program

You must have successful completed [LV41 Bachelor of Biomedical Science](#) at QUT.

Graduates will automatically receive an offer to start within three weeks of the current semester results being released.

International Entry requirements

Entry requirements - all majors

2 year program

You must have a completed recognised bachelor degree (or higher qualification) in any discipline with a minimum grade point average of 4.00 (on QUT's 7 point scale).

1.5 year program

You must have a completed recognised bachelor degree (or higher qualification) in information technology or mathematics (or related field), with a minimum grade point average of 4.00 (on QUT's 7 point scale).

1 year program

You must have:

- A completed Australian bachelor

honours degree in information technology or mathematics with a minimum grade point average of 4.00 (on QUT's 7 point scale); or

- A completed recognised bachelor degree in information technology or mathematics (or higher qualification) with a minimum grade point average (GPA) score of 4.00 (on QUT's 7 point scale) *plus* completion with a minimum grade point average (GPA) score of 4.00 of one of QUT's: [Graduate Certificate in Business Analysis](#) [Graduate Certificate in Cyber Security and Network](#) [Graduate Certificate in Data Analytics](#)

Entry requirements - Biomedical Data Science major only

The following are additional admission pathways for the Biomedical Data Science major beyond the ones listed above for all majors.

Domestic Course structure

To meet the course requirements for the Master of Data Analytics, you must complete 192 credit points of course units, consisting of:

- 48 credit points of core units
- 96 credit points of discipline units from your selected Major, or a range of units from across the majors if you choose not to nominate a

Master of Data Analytics

major.

- 48 credit points of data analytics related elective units selected from an approved list of units, which is drawn from units offered in each of the majors.

Study Areas:

Choose your major in the following specialisation areas -

- Biomedical Data Science;
- Computational Data Science;
- Statistical Data Science; or
- No Major option

Students in the 1.5 year program

Please note: study plans are determined based on prior qualifications. The placement of the 48 credit point reduction across the study plan may vary between students. Clarification can be sought from the Course Coordinators once admitted.

Domestic Entry requirements

Entry requirements
You must have a recognised bachelor degree (or higher qualification) in one of the following fields:

- Biomedical, medical, medical electronics etc engineering
- Biophysics
- Electrical, avionics etc engineering
- Geophysics
- Mechanical engineering
- Medical physics
- Physics

The following degrees (or higher qualification) are not acceptable:

- Biomedical science
- Laboratory science
- Medical imaging
- Radiotherapy
- Medical radiation
- Medical science

International Entry requirements

Academic entry requirements

A completed recognised bachelor degree (or higher award) in physics with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.0
Reading	6.0
Writing	6.0
Speaking	6.0

Course Design

Stage 1— Graduate Diploma (PH71) comprises assessed coursework such as advanced lectures, seminars, reading units or independent study. Full time students will need an average of 14 hours a week of formal contact (seven hours for parttime students). Students can graduate with a Graduate Diploma in Medical Physics after satisfactory completion of Stage 1.

Stage 2— Master of Applied Science (PH80) students undertake a program of supervised research and investigation that can be completed at QUT or in a suitable external institution.

Professional Recognition

The course is accredited by the Australasian College of Physical Sciences and Engineers in Medicine.

Domestic Entry requirements

To be eligible for this course, you need either:

- a completed recognised bachelor honours degree in a discipline relevant to your intended area of study or
- a completed recognised bachelor degree or equivalent in a discipline relevant to your intended area of study with: a minimum grade point average (GPA) score of 5.00 (on QUT's 7 point scale) relevant professional and/or research experience (as determined by the faculty).

Applications and proposed research projects are subject to supervisor availability and resources available within the faculty.

International Entry requirements

To be eligible for this course, you need either:

- a completed recognised bachelor honours degree in a discipline relevant to your intended area of study or
- a completed recognised bachelor degree or equivalent in a discipline relevant to your intended area of study with: a minimum grade point average (GPA) score of 5.00 (on QUT's 7 point scale) relevant professional and/or research experience (as determined by the faculty).

Applications and proposed research projects are subject to supervisor availability and resources available within the faculty.

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5

Reading	6.0
Writing	6.0
Speaking	6.0

Domestic Course structure

Mandatory units

You'll need to complete:

- a time-based thesis
- IFN001 Advanced Information

Research Skills.

You may need to complete other units that are recommended by your faculty, negotiated with you and based on the skills gaps identified in your research degree skills audit.

Study areas

Your faculty may have several specialisations (study areas) that your research will align with. This will appear on your testamur at graduation:

Business and Law

- Master of Philosophy (Accountancy)
- Master of Philosophy (Advertising)
- Master of Philosophy (Economics)
- Master of Philosophy (Entrepreneurship and Innovation)
- Master of Philosophy (Finance)
- Master of Philosophy (Human Resource Management)
- Master of Philosophy (International Business)
- Master of Philosophy (Law)
- Master of Philosophy (Management)
- Master of Philosophy (Marketing)
- Master of Philosophy (Philanthropy and Nonprofit Studies)
- Master of Philosophy (Public Relations)

Creative Industries, Education and Social Justice

- Master of Philosophy (Design)
- Master of Philosophy (Communication)
- Master of Philosophy (Creative Practice)
- Master of Philosophy (Education)
- Master of Philosophy (Justice)

Engineering

- Master of Philosophy (Engineering)
- Master of Philosophy (Urban Development)
- Master of Philosophy (Biomedical Technology and Health)

Health

- Master of Philosophy (Biomedical Sciences)
- Master of Philosophy (Biomedical Technology and Health)
- Master of Philosophy (Exercise Sciences)
- Master of Philosophy (Materiobiology)
- Master of Philosophy (Medical Radiations)
- Master of Philosophy (Nursing)
- Master of Philosophy (Nutrition and Dietetics)
- Master of Philosophy (Optometry)
- Master of Philosophy (Paramedicine)
- Master of Philosophy (Pharmacy)

Master of Philosophy

- Master of Philosophy (Physical Education)
- Master of Philosophy (Podiatry)
- Master of Philosophy (Public Health)
- Master of Philosophy (Psychology)
- Master of Philosophy (Social Work)

Science

- Master of Philosophy (Data Science)
- Master of Philosophy (Information Technology)
- Master of Philosophy (Magnetic Resonance in Medicine)
- Master of Philosophy (Mathematics)
- Master of Philosophy (Science)
- Master of Philosophy (Data Science)

International Course structure

Mandatory units

You'll need to complete:

- a time-based thesis
- IFN001 Advanced Information Research Skills.

You may need to complete other units that are recommended by your faculty, negotiated with you and based on the skills gaps identified in your research degree skills audit.

Study areas

Your faculty may have several specialisations (study areas) that your research will align with. This will appear on your testamur at graduation:

Business and Law

- Master of Philosophy (Accountancy)
- Master of Philosophy (Advertising)
- Master of Philosophy (Economics)
- Master of Philosophy (Entrepreneurship and Innovation)
- Master of Philosophy (Finance)
- Master of Philosophy (Human Resource Management)
- Master of Philosophy (International Business)
- Master of Philosophy (Law)
- Master of Philosophy (Management)
- Master of Philosophy (Marketing)
- Master of Philosophy (Philanthropy and Nonprofit Studies)
- Master of Philosophy (Public Relations)

Creative Industries, Education and Social Justice

- Master of Philosophy (Design)
- Master of Philosophy (Communication)
- Master of Philosophy (Creative Practice)
- Master of Philosophy (Education)
- Master of Philosophy (Justice)

Engineering

- Master of Philosophy (Engineering)
- Master of Philosophy (Urban Development)
- Master of Philosophy (Biomedical Technology and Health)

Health

- Master of Philosophy (Biomedical Sciences)
- Master of Philosophy (Biomedical Technology and Health)
- Master of Philosophy (Exercise Sciences)
- Master of Philosophy (Materiobiology)
- Master of Philosophy (Medical Radiations)
- Master of Philosophy (Nursing)
- Master of Philosophy (Nutrition and Dietetics)
- Master of Philosophy (Optometry)
- Master of Philosophy (Paramedicine)
- Master of Philosophy (Pharmacy)
- Master of Philosophy (Physical Education)
- Master of Philosophy (Podiatry)
- Master of Philosophy (Public Health)
- Master of Philosophy (Psychology)
- Master of Philosophy (Social Work)

Science

- Master of Philosophy (Data Science)
- Master of Philosophy (Information Technology)
- Master of Philosophy (Magnetic Resonance in Medicine)
- Master of Philosophy (Mathematics)
- Master of Philosophy (Science)
- Master of Philosophy (Data Science)

Year	2023
QUT code	IF49
CRICOS	006367J
Duration (full-time domestic)	3 - 4 years
Duration (full-time international)	4 years
Domestic fee (indicative)	2023: \$29,000 - \$36,000 per year full-time
International fee (indicative)	2023: \$31,000 - \$37,600 per year full-time
Total credit points	288
Credit points full-time sem.	48
Credit points part-time sem.	24
Start months	December, November, October, September, August, July, June, May, April, March, February, January
Int. Start Months	December, November, October, September, August, July, June, May, April, March, February, January
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

You must have either:

- a completed recognised relevant honours degree (first class or second class Division A) or equivalent
- a completed recognised masters degree or professional doctorate (by research or coursework)

Admission to the Doctor of Philosophy depends on an applicant's demonstrated research aptitude and the availability of supervision, infrastructure and resources needed for the proposed research project.

For more information on eligibility, read the [admission criteria for the Doctor of Philosophy %asset_summary_640320%](#).

Once you've started your PhD, you'll need to complete your Stage 2 milestone to be fully admitted to your course. You'll usually complete this milestone within the first three months of study.

Masters and professional doctorate degrees by coursework must have a significant research component, normally not less than 25%. Holders of masters and professional doctorate by coursework must:

- have a minimum grade point average (GPA) score of 5.0 on QUT's 7 point scale; *and*
- present evidence of research experience and potential for approval

International Entry requirements

Domestic Entry requirements

Edit in the CMS.

International Entry requirements

Edit in the CMS.

Minimum English requirements

Students must meet the English proficiency requirements.

Domestic Course structure (Edit in the CMS)

You can enrol in one unit per semester, in addition to your Year 11 semester two and/or Year 12 semester one studies.

You can choose a unit from a different study area in each semester; for example, a science unit in Semester 2, and a business unit in the following Semester 1. This might be a good option if you are looking to study a double degree.

If you're hoping to receive advanced standing (credit) toward a degree for the units you complete, it's best to select those related to your chosen future study area. Your START QUT studies, including the grades you achieve, will be included as part of your official QUT record.

Please note enrolment in START QUT is not permitted after semester 1, year 12.

International Course structure (Edit in the CMS)

You can enrol in one unit per semester, in addition to your Year 11 semester two and/or Year 12 semester one studies.

You can choose a unit from a different study area in each semester; for example, a science unit in Semester 2, and a business unit in the following Semester 1. This might be a good option if you are looking to study a double degree.

If you're hoping to receive advanced standing (credit) toward a degree for the units you complete, it's best to select those related to your chosen future study area. Your START QUT studies, including the grades you achieve, will be included as part of your official QUT record.

Please note enrolment in START QUT is not permitted after semester 1, year 12.

Sample Structure

Two-week intensive program where you complete about 80 hours of study, including lectures, discussion, exercises, and assessment.

Numbers in each unit are limited and will be allocated based on a first come, first served basis. Some units are limited to female students only. Some classes are limited to Aboriginal and Torres Strait Islander students only.

Domestic Entry requirements

Additional entry requirements
You must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

To demonstrate this you must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. Details are available from the [QTAC initial teacher education webpage](#).

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

Overseas qualifications

We will consider equivalent overseas qualifications for admissions purposes. If your previous studies were completed in a country other than Australia, Canada, New Zealand, Republic of Ireland, United Kingdom, or the United States of America or undertaken in a language other than English you must provide evidence of your English language proficiency.

English language proficiency

We require students to demonstrate they can speak, write, read and comprehend academic English to a specified standard.

Our English proficiency requirements for this course are:

- IELTS (Academic): 7.5 or better overall with speaking and listening subscores of 8.0 or better and no other subscore below 7.0

The test must have been completed within 2 years prior to the proposed course start month.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) Capabilities Criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

Domestic Entry requirements

Additional entry requirements

You must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

To demonstrate this you must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. Details are available from the [QTAC initial teacher education webpage](#).

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

Overseas qualifications

We will consider equivalent overseas qualifications for admissions purposes. If your previous studies were completed in a country other than Australia, Canada, New Zealand, Republic of Ireland, United Kingdom, or the United States of America or undertaken in a language other than English you must provide evidence of your English language proficiency.

English language proficiency

We require students to demonstrate they can speak, write, read and comprehend academic English to a specified standard.

Our English proficiency requirements for this course are:

- IELTS (Academic): 7.5 or better overall with speaking and listening subscores of 8.0 or better and no other subscore below 7.0

The test must have been completed within 2 years prior to the proposed course start month.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)

- Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

International Entry requirements

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) Capabilities Criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

If you've achieved a *satisfactory* result for one or more components of the Literacy and Numeracy Test for Initial Teacher Education (LANTITE) at another institution, the *satisfactory* result can be carried across with your admission application. You are not eligible to apply for a place in this course if one or more components of LANTITE remains at *unsatisfactory* after two test attempts for that component.

International Entry requirements

Additional entry requirements

Pass the Initial Teacher Education Course (ITE) Capabilities Criteria.

Applicants must demonstrate possession of key competencies outlined by the Australian Institute for Teaching and School Leadership (AITSL) as those attributes and motivations common to effective teachers.

You must complete an online questionnaire to demonstrate your motivation for and understanding of, the course and profession. In the questionnaire you will be asked to:

- Rank a series of potentially appropriate statement responses, in order of what you think is most to least important.
- Provide two x 500 word written statements addressing the categories and indicators as outlined on the [Teacher Entry Fact Sheet](#).

QUT will send you details on how to complete the Initial Teacher Education Course (ITE) Capabilities Criteria questionnaire and submit your written statements after you have lodged an application.

Course requirements: Literacy and numeracy

You will need to successfully complete the National Literacy and Numeracy Test for Initial Teacher Education Students to graduate from the course. You are permitted three test attempts in total for each component as a student at QUT. If you fail three test attempts for each component, you will not be able to graduate. You are not eligible to apply for a place in the course if you have failed two test attempts for one or more components, at another institution. The test will assess your personal literacy and numeracy skills. QUT provides you with one reimbursement to cover the cost of the test. For more information view additional course requirements.

Minimum English requirements

Students must meet the English proficiency requirements.

Overview

The Diploma in Engineering, which has intakes for international students in February, June and October, is equivalent to the first year of the Bachelor of Engineering. In this program, students study six first year faculty core units as well as two units of Communication which have been designed to support their other core units. Students who successfully complete these units earn full academic credit for eight units towards their degree. Graduates articulate to the second year of the Bachelor of Engineering. Small lectures and tutorials, additional workshops and the support of Language and Welfare Advisers provide an excellent learning environment.

Entry Requirements - Academic

Successful completion of senior high school with the required grades. Students can find more detailed country specific entry requirements at the following web site:
<http://www.qut.edu.au/international/apply>
ng

English Language Requirements

Queensland Senior English (Low Achievement) or IELTS 5.5 with no sub-score less than 5.0 or TOEFL iBT Overall score of 69 (at least 18 in writing and reading and 17 or more in listening and speaking) or TOEFL 525 (paper) or TOEFL 193 (CBT) or equivalent, or successful completion of the EAP program. (N.B. Students should also check visa requirements).

Progression

Requirements for progression to the second year of the QUT Bachelor of Engineering program:

- fulfil the Diploma course requirements,
- achieve a minimum GPA of 4.0

Course Completion

Students must obtain at least a grade of 4 (Pass) or better in all units.

Abbreviation

Description

The Diploma in Creative Industries (previous title: University Diploma in Creative Industries), which has intakes for international students in February, June and October, is primarily a pathway for entry to bachelor degrees within Creative Industries, with the Bachelor of Creative Industries KK33 being the most prevalent course progression pathway. Students gain coherent and integrated theoretical, technical and practical knowledge with emphasis on developing technical, analytical, decision-making, problem solving, teamwork and communication skills in well-defined, structured environments and with real world application.

In this program, students study six faculty units as well as two units of Communication which have been designed to support their other units. Small lectures and tutorials, additional workshops and the support of Language and Welfare Advisers provide an excellent learning environment.

Course Completion

Students must obtain at least a grade of 4 (Pass) in all units.

Progression

Students who successfully complete the Diploma of Creative Industries and achieve a GPA of 4.0 will **receive one year's advanced standing** and be **guaranteed a place in one of the available bachelor programs** from the Creative Industries Faculty.

96 credit points of advanced standing with:

QUT International College

International students may upgrade to the QUT Bachelor of Information Technology through QUT International College at our Kelvin Grove campus.

The University Diploma in Information Technology is equivalent to two semesters of the Bachelor of Information Technology degree with a total of 96 credit points (48 standard credit points for a full-time semester).

In the University Diploma program, students study six degree core units as well as two English language units that have been designed to support the other core units.

Progression to the Bachelor of Information Technology

Students who successfully complete these eight units with a grade point average of 4 (on a 7-point scale) and obtain a grade of at least 4 in Professional Communication 2 are given two semesters full-time advanced standing towards their degree and are guaranteed a place in the Bachelor of Information Technology.

Students who complete the University Diploma in Information Technology are also eligible for 96 credit points towards the Bachelor of Corporate Systems Management and Bachelor of Games and

Interactive Entertainment.

Domestic Course structure

IT10 students can enrol in a maximum of 48 credit points (4 units) per teaching period.

International Course structure

IT10 students can enrol in a maximum of 48 credit points (4 units) per teaching period.

Sample Structure

There are a number of changes to units and study areas which may affect your enrolment in 2023 or beyond. Study plans for affected continuing students have been updated.

- ITD122- Modelling Techniques for Information Systems has been replaced with ITD240 - Cyber Security from college 2 2023.

IT10 students can enrol in a maximum of 48 credit points (4 units) per teaching period.

Academic entry requirements

Requirements for this pathway course are dependent your selected Master program and major.

Master of Professional Engineering (Electrical OR Electrical and Management Majors)

EN60 Graduate Certificate in Communication for Engineering (1 semester) and EN55 Master of Professional Engineering (Electrical OR Electrical and Management) (3 semesters)

A completed recognised four year full time Bachelor degree in an Electrical engineering discipline with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Master of Professional Engineering (Mechanical OR Mechanical and Management Majors)

EN60 Graduate Certificate in Communication for Engineering (1 semester) and EN55 Master of Professional Engineering (Mechanical OR Mechanical and Management) (3 semesters)

A completed recognised four year full time Bachelor degree in a Mechanical engineering discipline with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Master of Professional Engineering (Civil OR Civil and Construction OR Civil and Management Majors)

EN60 Graduate Certificate in Communication for Engineering (1 semester) and EN55 Master of Professional Engineering (Civil OR Civil and Construction OR Civil and Management) (3 semesters)

A completed recognised four year full time Bachelor degree in a Civil engineering discipline with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Master of Engineering Management

EN60 Graduate Certificate in Communication for Engineering (1 semester) and BN87 Master of Engineering Management (2 semesters)

A completed recognised four year full time Bachelor degree in Electrical, Mechanical or Civil engineering with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Master of Engineering (Electrical)

EN60 Graduate Certificate in Communication for Engineering (1 semester) and EN50 Master of Engineering (Electrical) (2 semesters)

A completed recognised four year full time Bachelor degree in an Electrical engineering discipline with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Master of Engineering (Mechanical)

EN60 Graduate Certificate in Communication for Engineering (1 semester) and EN50 Master of Engineering (Mechanical) (2 semesters)

A completed recognised four year full time Bachelor degree in a Mechanical engineering discipline with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Master of Project Management

EN60 Graduate Certificate in Communication for Engineering (1 semester) and PM20 Master of Project Management (2 or 3 semesters)

A completed recognised four year full time Bachelor degree in an Electrical, Mechanical or Civil engineering discipline with a grade point average of 4.0 or higher (on QUT's 7 point scale).

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.0
Listening	5.0
Reading	5.5
Writing	5.5
Speaking	5.0

International Course structure

The Graduate Certificate in Communication for Engineering is designed around set of core and

Graduate Certificate in Communication for Engineering

discipline units to provide engineering graduates with technical, theoretical and language skills for further learning.

To graduate with a EN60 Graduate Certificate in Communication for Engineering you are required to complete 48 credit points of course units consisting of:

- 24 credit points of core communication units
- 12 credit points of core engineering units
- 12 credit points of engineering discipline units for advanced specialised knowledge and technical skills.

Your engineering discipline unit is selected from either the mechanical or electrical unit options, depending on your engineering specialisation.

No credit for prior learning will be available for units in this course. Discipline units provide added depth and breadth in your chosen area of specialisation in an English speaking context.

Sample Structure

International Entry requirements

A completed recognised bachelor degree in information technology with a minimum grade point average (GPA) score of 4.0 (on QUT's 7 point scale).

Pathway to the Master of Information Technology

- Graduate Certificate in Communication for Information Technology (IN17) (one semester) to [Master of Information Technology](#) (IN20) (three semesters)

Students with bachelor degrees in disciplines other than information technology may consider the [University Certificate in Tertiary Preparation for Postgraduate Studies](#) (QC06) or [English for Academic Purposes](#) pathways.

Pathway to Master of Data Analytics

- Graduate Certificate in Communication for Information Technology (IN17) (one semester) leading to [Master of Data Analytics](#) (IN27) (three semesters)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.0
Listening	5.0
Reading	5.5
Writing	5.5
Speaking	5.0

Successful completion of QUT's English for Academic Purposes (EAP)(Direct Stream) with 50% or better or QC32 English for Academic Purposes 2.

Course Design

The Graduate Certificate in Communication for Information Technology will provide you with core discipline studies and communication knowledge and skills.

The course structure consists of 48 credit points of units. There are two common core communications units (24cp) and two information technology unit options (24cp) from the following information technology areas: Computer Science/Data Science, Enterprise Systems, Networks, Security, or Business Process Management.

NB: If you intend to follow a major pathway into IN20/21 MIT you should select the recommended IT units for those majors on commencement of IN17.

Pathways to Further Study

The QUT Graduate Certificate in Communication for Information Technology is located at Level 8 of the Australian Qualifications Framework (AQF). Eligible graduates may articulate from the Graduate Certificate in Communication for Information Technology into the related [IN20 Master of Information Technology/ IN21 Master of Information Technology - Graduate Entry](#) course.

International Course structure

The course structure consists of 48 credit points of units. There are two common core communications units (24 credit points) and two information technology unit options (24 credit points) from the following information technology areas:

- computer science/software development
- cyber security and networks
- business analysis
- business process management
- data science
- enterprise systems
- executive IT

NOTE: You should select the recommended IT units for your [chosen major](#) on commencement of IN17. Please contact the Course Coordinator for assistance with any IT unit selection.

Sample Structure Important Course Information

You should select the recommended IT units for your [chosen major](#) on commencement of IN17. Please contact the Course Coordinator for assistance with any IT unit selection.

Information Technology unit options are available from the following IT areas:

Business Process Management related units - IFN515, *IFN521*, *IFN562*
 Business Analysis related units - IFN561, IFN562, *IFN515*, *IFN521*
 Computer Science related units - IFN563 (6CP) + IFN564 (6CP), *IFN507*, *IFN509*, *IFN541*, *IFN591*
 Cyber Security & Networks related units - IFN507, IFN541, *IFN591*

Graduate Certificate in Communication for Information Technology

Data Science related units -

IFN509, *IFN521*

Software Development related units -

IFN563 (6CP) + IFN564 (6CP)

Enterprise Systems related units -

IFN561, *IFN515*, *IFN521*, *IFN541*, *IFN562*

Executive IT related units -

IFN561, *IFN521*

* *Italics = option units in the MIT major*

PLEASE NOTE: IFN563 and IFN564 are 6 credit point (cp) units (delivered in block mode - 5 week teaching period).

IMPORTANT: When you select a 6cp unit you must select another 6cp unit together with it. The units are delivered in 5 week teaching period:

- 5 Week A runs from week 1 to 5 of semester 1
- 5 Week B runs from week 9 to 13 of semester 1
- 5 Week C runs from week 1 in semester 2
- 5 Week D runs from week 9 in semester 2.

Due to the shorter timeframes involved the 5 Week sessions have different enrolment and [census dates](#).

Code	Title
UNIT LIST	
Core units:	
QCD111	Communication 1
QCD211	Communication 2
Plus select 24 credit points from the Postgraduate Information Technology Unit Options List:	
IFN563	Object Oriented Design
IFN564	Data Structures and Algorithms
(Note: IFN563 and IFN564 are 6 credit points units, hence the block delivery)	
IFN507	Network Systems
IFN541	Information Security Management
IFN591	Principles of User Experience
IFN515	Fundamentals of Business Process Management
IFN521	Foundations of Decision Science
IFN562	Advanced Business Analysis
IFN561	Enterprise Systems Lifecycle Management
IFN509	Data Exploration and Mining
NOTE: If you select a 6 credit point unit, you must select another 6 credit point to ensure you meet the required course credit points. Example: IFN563 (6CP) + IFN564 (6CP).	

Year	2023
QUT code	QC19
Duration (part-time domestic)	12 weeks
Total credit points	12
Dom. Start Months	November
Course Coordinator	
Discipline Coordinator	AskQUT +61 7 3138 2000 askqut@qut.edu.au

Domestic Entry requirements

You must be:

- minimum age of 16 when classes for Diploma Advantage Program commences
- a Year 11, Semester 2 student when you participate in the Diploma Advantage program
- a senior student in a school included in QUT's Widening Participation program (check with your school's Guidance/Career Officer before applying)
- one of the following: currently studying or completed a minimum of four ATAR general subjects (including General English) with passing grades

You can study a maximum of one unit.

Applications dates

- Application open: 7 August 2023
- Applications close: 31 October 2023

Your grades

In the semester before you apply, you must have maintained both of the following:

- a minimum of a C (50%) in any General English subject such as English, Literature, English and Literature, or English as an additional language
- a C (50%) average across a minimum of four ATAR general subjects.

Median grade is not used.

How to Apply:

Step 1: School approval

Request that your school completes and signs the [school approval proforma](#) and provides you with a copy.

If you are not following the standard, slow or fast track pattern of ATAR study, please also get your school to provide a covering letter detailing your study pattern.

Step 2: Apply

Once applications open, complete the Diploma Advantage online application form.

To apply, you must have:

- an email address to create your QUT account. This is the first part of the application process
- a Learning Unique Identifier (LUI).
- school results on school letterhead for the previous semester
- a cover letter from your school outlining your pattern study if you

not following the standard, slow or fast track pattern of study

- the completed and signed [school approval proforma](#).

When to apply

Apply as soon as applications open.

We won't consider late applications.

What happens next?

If your application is successful, we'll send you an email to offer you a place in the Diploma Advantage program.

If your application is unsuccessful, we'll also email you to let you know.

We may also email you to request more information or supporting documents. Make sure you upload this documentation within 10 working days.

All emails we send you will be sent to the email address you provide in your application. Make sure you provide us with your personal email address and not your school email, because we might contact you over the school holidays.

You'll be able to decline your place in the program if the timetable for the unit you choose doesn't fit in with your personal schedule.

Minimum English requirements

Students must meet the English proficiency requirements.

Domestic Course structure

Students will select one unit from the list below to complete over the College's summer teaching period.

Reading	5.5
Writing	5.5
Speaking	5.0

Entry Requirements - Academic

Students must have met the academic entry requirements for their proposed postgraduate or undergraduate course.

Entry Requirements- English Language

IELTS 6.0 with no sub-score less than 5.0 or TOEFL iBT Overall score of 80 (at least 18 in all bands) or TOEFL 550 (paper) or TOEFL 213 (CBT) or equivalent, or successful completion of the EAP program (N.B. Students should also check visa requirements).

Description

The University Certificate in Tertiary Preparation is a one-semester program that enables students to receive a University certificate on successful completion. It is designed for students who may have already met the academic entry requirements for a QUT undergraduate or postgraduate degree, but who may not have met the English language and/or prerequisite requirements.*

This program provides two alternative streams:

Stream A is designed for students who have not met English and/or prerequisite requirements for their chosen undergraduate or postgraduate course. Most students may undertake one degree unit (for credit) whilst enrolled in the University Certificate in Tertiary Preparation program.

Stream B is for students who have met English requirements but not prerequisite

requirement for their degree, or who may wish to improve the standard of their academic English. These students may take one or two degree units (for credit) whilst enrolled in the University Certificate in Tertiary Preparation Program.

Both streams include intensive preparation for academic language, lateral thinking, research and presentation skills required for successful tertiary study. Small classes and dedicated staff ensure an excellent learning environment. Additional support is provided by Language and Welfare Advisers.

Alternatively, there may be some students who have already met both the academic and English requirements for a QUT degree entry, but who would prefer to undertake the University Certificate in Tertiary Preparation in order to prepare for academic study in a different tertiary environment.

*Students who require a Student Visa should check the English language requirements for a student visa from their country of origin.

Course Completion

Students must obtain at least a grade of 4 (Pass) in all units.

Progression

In order to progress to an award course, students must:

- fulfil the University Certificate in Tertiary Preparation course requirements
- gain a minimum grade of 4 (Pass) in Communication 2 or an IELTS 6.5 or equivalent,
- meet any other conditions detailed in the 'letter of offer' from Student Business Services.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)
- General Mathematics, or Mathematical Methods, or Specialist Mathematics (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

IELTS (International English Language Testing System)	
Overall	6.5
Listening	6.5
Reading	6.5
Writing	6.5
Speaking	6.5

Domestic Course structure

The Undergraduate Certificate (Information Technology) provides you with foundational knowledge and skills related to the broad field of information technology. It serves as a taster to both areas critical to this field: Computer Science and Information Systems.

You will learn in a highly supportive environment and have access to a suite of services designed to help achieve your study goals and advance your career.

The four units of study in this course can be used as credit towards the Bachelor of Information Technology.

Domestic Entry requirements

Additional entry requirements

You must have attended and satisfactorily completed at least 6 years of primary and secondary education taught and assessed solely in English. At least two years of this education must have been between grades 7 and 12. This education must have been completed in one of the following countries:

- Australia
- Canada
- New Zealand
- Republic of Ireland
- South Africa
- United Kingdom
- United States of America

If you have not met these educational requirements, you are required to provide evidence of an acceptable English Language test (refer below).

English language proficiency

QUT requires students to demonstrate that they can speak, write, read and comprehend academic English to a specified standard.

QUT's English proficiency requirements for this course are:

- IELTS (Academic): 7.0 or better overall with no sub-score below 7.0
- PTE: 65 or better overall with no sub-score below 65
- TOEFL (IBT): 98 or better overall with a writing sub-score of 27 or better, listening and reading sub-scores of 24 or better, and speaking sub-score of 23 or better
- Occupational English Test (Nursing Profession) with a minimum score of 350 in each component.

The test must have been completed within 2 years prior to the proposed course start month.

Domestic Assumed knowledge

Before you start this course we assume you have sound knowledge in these areas

- English, or Literature, or English and Literature Extension, or English as an Additional Language (Units 3 & 4, C)

Minimum English requirements

Students must meet the English proficiency requirements.

Units

Unit Synopses

AMB031 Mandarin 1

Anti-requisites	HHB051 and HUB453
Equivalent s	AMX031, HHB031
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In this introductory language unit designed for students with little or no prior knowledge of Mandarin, students will gain skills in listening, speaking, reading and writing Mandarin in an integrated communicative environment. From the foundations of the Mandarin sound and tonal systems and Pinyin (Romanized Chinese phonetic spelling system), students will be taught the skills in writing Chinese characters and in performing basic language functions such as greetings, introducing oneself and others, talking about one's family relations, and describing places, objects, and locations. Chinese word processing will be taught as well so that students can access and use online Chinese learning resources. By studying this unit, students will not only build a solid foundation in the use of Mandarin (i.e. Modern Standard Chinese), but also get exposed to certain aspects of Chinese culture. This unit leads on to further studies and is the beginning of developing competency in Mandarin.

AMB032 Mandarin 2

Pre-requisites	AMB031 or HHB031 or HUB453 or HHB051
----------------	--------------------------------------

Anti-requisites	HHB052, HUB454
Equivalent s	AMX032, HHB032
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This subject continues to help students develop the four macro-skills of listening, speaking, reading and writing through an integrated communicative approach. While there is still further consolidation of the knowledge of the Chinese phonetic spelling system (i.e. Pinyin), greater attention is to be devoted to the speech of everyday conversations and to the the reading and writing of Chinese characters. With progressive acquisition of the Chinese language, students will receive further exposure to aspects and characteristics of Chinese culture.

AMB034 Mandarin 4

Pre-requisites	AMB033 or HHB033
Equivalent s	AMX034, HHB034
Credit Points	12
Campus	null

This unit follows on from Mandarin 3. It will continue to meet student need to expand their knowledge of Mandarin Chinese and further their skills of listening, speaking, reading and writing in the language. It will continue engaging students in activities to strengthen their command of the Mandarin Pinyin/Romanization system

and also in activities to increase their competence in reading and writing Chinese characters as well as in speaking and understanding conversations and simple speech in everyday situations. With acquisition of the Chinese language, students will be further exposed to aspects of Chinese culture.

AMB035 Mandarin 5

Credit Points	48
Campus	EXCHANGE
Availabilities	XCH - XCH-2

AMB045 Chinese - English Translation for Business Communication

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

This language unit is suitable for students with native or near-native competencies in both Chinese and English and who have an interest or need to work with business-related documents and high-level written communications in both languages. The unit teaches basic translation theories and helps students to develop their skills through a large amount of varied translation practice using real world materials including general business correspondence and sample texts in areas of advertising and marketing. In addition to the translation practice, students are introduced to business Chinese and English, which will help them to improve their skills in writing business documents. The knowledge and skills gained through this unit will provide a competitive edge for students who aspire to work in international business and trade companies requiring people with skills in translating

business documents between Chinese and English. Admission may require an interview.

AMB046 Chinese - English Translation on Business Topics

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

Business communication between the English-speaking world and China has been increasing rapidly and on an extensive scale. Success of many business deals and transactions depends on truthful and effective translation of business documents between the two languages. This unit is suitable for students with native or near native competencies in both Chinese and English, and who have an interest or need to work with business-related documents and high-level written communications in both languages. The unit teaches and expands students' strategies and skills in conducting translation tasks in business and, in particular, in the areas of accounting, banking, business contracts and international business through a large amount of varied translation practice using real world materials. In addition to the translation practice, students learn business Chinese and English language features, which helps them to improve their skills in writing business documents.

AMB110 Internationalisation

Equivalent s	AMB210, AMX210
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Internationalisation has become fundamental to the survival and growth of many businesses in Australia as well as in other economies in this era of globalisation. Globalisation has forged interdependency among organisations and individuals in different country markets. This unit examines the drivers of globalisation and international business. It explores the diversity of country markets at an introductory level, introducing key knowledge and skills for operating businesses effectively - responding to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments. In this unit you can gain an awareness of the unique knowledge and skills required of management to operate business internationally across diverse contexts, which will inform future studies in this field.

AMB111 Advertising Works

Equivalent s	AMB220, AMX220
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point

Units

es	- SEM-1, SEM-2
	Online
	- SEM-1, SEM-2
	External
	- XCH-1, XCH-2

This unit serves as the introduction and prerequisite to later units in the advertising course and as a useful elective for students taking other courses. The unit provides you with a thorough fundamental knowledge of advertising principles and a practical understanding of the techniques and practices used by today's advertising agencies and clients, including strategy development, media planning, creative development, integration of other communications and analysing an advertising campaign.

AMB120 Bridging Cultures

Pre-requisites	Completion of 96 credit points or more of study
Anti-requisites	AMB390
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Understand the skills, behaviours and attitudes required to work effectively with people from different cultural backgrounds, and develop practical strategies to interpret difference and respond appropriately in culturally diverse situations. Our increasingly globalised workplaces need graduates with awareness, understanding, sensitivity to,

and an ability to deal with cultural diversity. The knowledge and skills developed in this unit are particularly valuable for a range of international exchange students: those planning an outbound program and those already inbound, for shorter programs or full degrees at QUT. Students with an interest in intercultural communication and those who are learning or have learned a second language will also benefit from this unit.

AMB130 Multi-disciplinary Approaches to Behaviour Change

Pre-requisites	48 credit points of completed study
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

In this introductory behavioural economics unit, you will gain a core understanding of human behaviour and decision-making, as well as basic approaches to designing behaviour change solutions (policy and industry) that rely on behavioural uptake. This unit is the first of its kind in Australia, linking theory and practice from multiple disciplines in behaviour change. You will explore a broad range of foundational theories and methods from behavioural economics, economics, social marketing, law and communications, to develop a more comprehensive understanding of factors

impacting individual decision making and their applied role in addressing complex social issues. This unit involves a real-world client and asks students to apply behavioural theories and design a basic behaviour change program. This unit is relevant to students of business, law, psychology and health as an elective and as a core unit for the Behavioural Economics major.

AMB140 Marketplace Simulation

Equivalent s	AMB240, AMX240
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

AMB140 Marketplace Simulation follows the introductory marketing unit in the marketing major and minor and provides a focus on the implementation and evaluation of the marketing plan at a small business level. Emphasis is placed on the responsibilities within a marketing team for planning, developing, organising, implementing, controlling, and evaluating marketing activities. The unit prepares students for other marketing units in the major. The learning approach is innovative and uses role-play where students take the role of a marketing team member in a virtual simulated marketplace.

AMB163 Introduction to Public Relations

Equivalent s	AMB263, AMX263
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

AMB163 Introduction to Public Relations answers three important questions: (a) what is public relations, (b) why do organisations need public relations, and (c) how is public relations practised? The unit introduces key concepts of public relations and lays a foundation for subsequent study in the discipline. This unit applies the role and influence of publics and stakeholders into multiple contexts including crisis management, community consultation, and internal communication. The unit showcases the range of potential careers available in public relations.

AMB164 Media Relations and Publicity

Equivalent s	AMB264, AMX264
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

AMB164 Media Relations and Publicity introduces you to the tools and techniques you will need to work with the media

and get positive publicity for organisations. This makes the unit an ideal elective for students from any discipline looking to add value to their major. The tools and techniques covered in AMB164 Media Relations and Publicity will also provide foundational knowledge and skills for use in subsequent units in the public relations major and minor. AMB164 Media Relations and Publicity helps you develop the skills required to effectively communicate with audiences on behalf of organisations through legacy/traditional and other forms of media.

AMB200 Understanding how Consumers Think, Feel, and (Mis)Behave

Pre-requisites	48 Credit Points of Study
Equivalent s	AMX200, CTB200
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

A fundamental component of effective and successful marketing activity is an understanding of consumers, their needs and behaviours. Studying the behaviour of consumers in a wide range of situations and circumstances provides marketers with clear guidelines for the development of marketing strategy. This unit provides the foundation theories for the marketing major.

AMB201 Marketing and Audience Analytics

Pre-requisites	48 credit points of completed studies
Anti-requisites	MGB220
Equivalent s	AMX201
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

The systematic and objective identification, collection, analysis, and dissemination of information is essential for any business to make informed decisions about how to address problems and opportunities in their markets. All business leaders must understand the challenges, opportunities and limitations of the marketing research process; questions that marketing research can answer and questions it can't, and be able to draw appropriate conclusions from different types of data that may be collected during marketing research. This subject builds on basic marketing knowledge and students are involved in, and guided through, a practical, applied marketing research exercise based on a research brief chosen at the start of each semester. This provides the foundations for interpreting case studies, theories and research information presented in more advanced subjects.

AMB204 International Sourcing and Procurement

Pre-requisites	BSB119 or CTB119
Anti-requisites	IBB312
Equivalent s	AMX204
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

All organisations require supplies and depend on a reliable and quality source of their supplies whether they are raw materials, components, spare parts, consumables or services. The management of these supplies is a complex logistics process and is often of strategic importance both in global and domestic markets. This unit is provided to examine the role of international procurement and purchasing in this process.

AMB207 Entertainment Marketing in a Digital World

Pre-requisites	48 credit points of completed studies
Equivalent s	AMX207
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

As one of the largest industries in the world, and having been

hit dramatically by COVID-19, the entertainment industry offers significant opportunities along with unique challenges for the application of marketing and communication tools. The unit is designed to be part of the Tourism and Entertainment Marketing minor or to be taken as an elective by students with a particular interest in the area of entertainment marketing.

AMB209 Designing a Competitive Tourism Strategy

Pre-requisites	48 credit points of completed studies
Equivalent s	AMB351, AMX209
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

The success of individual tourism businesses is reliant to some extent on the competitiveness of their destination. This unit explores how a destination marketing organisation (DMO) is formed when a community recognises the need to become organised in destination promotions. Examine opportunities for the DMO and tourism stakeholders to collaborate in the development and implementation of a competitive destination marketing strategy. Learning resources and assessments explore how marketing theories can be applied to tourism marketing practice.

AMB211 Branding for the Real World

Pre-requisites	48 credit points of completed study
Equivalent s	AMX211
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

The study and understanding of fundamental brand management concepts is relevant to students pursuing a variety of career outcomes (marketing, advertising, public relations, consulting, entrepreneurship, etc.) because brands are some of a firm's most valuable assets. Brands are an investment and an asset and help firms attract and, more importantly, keep customers.

AMB223 Create Advertising

Pre-requisites	96 credit points of completed studies
Equivalent s	AMB318, AMX318
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Advertising Copywriting is an important addition to the knowledge base of all marketing communication students. It equips you with the skills to develop creative strategy and write well-

Units

grounded and well-crafted copy. Thus, this unit is indispensable for those interested in pursuing a career in copywriting. Nevertheless, it is also highly valuable for those not interested in such a career, as it establishes the benchmarks for assessing creative work and lend support to great creative ideas.

AMB224 Consumers and Media Channels

Pre-requisites	96 credit points of completed studies.
Equivalent s	AMB319, AMX319
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit introduces you to the strategic use of paid, owned and earned media to effectively reach consumers using media channels within an advertising campaign. You will develop skills to analyse data to research consumer attitudes and behaviours and develop creative consumer insights. Based on these insights you will work together in a team to develop a media strategy. This unit works closely with media industry professionals and is accredited by the Media Federation of Australia. Completing this unit will be beneficial to students who would like to pursue careers in advertising, digital or media agencies or media sales.

AMB251 Designing Innovative Goods and Services

Pre-requisites	48 credit points of completed studies
Anti-requisites	MIB227
Equivalent s	AMX251
Credit Points	12
Campus	Gardens Point, Online and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1

The need for innovative design of goods and services that create customer value and deliver exceptional customer experience are central to the growth and marketing success of every organisation. Therefore an understanding of how to create new goods and services that are market-oriented is vital for students seeking a career in marketing. This unit is an elective in the marketing major however there is no assumed knowledge in marketing so students in other disciplines are welcome.

AMB255 Avoiding the Dark Side: Marketing, Ethics and Society

Pre-requisites	48 credit points of completed studies
Credit Points	12
Campus	Gardens Point, Online and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1

Avoiding the Dark Side: Marketing, Ethics and Society

seeks to equip students with a strong understanding of the principles and practical tools necessary to understand the impact of marketing decisions and strategies on consumers, the natural environment and society with a view to avoiding the 'dark side' of marketing. A marketer's individual values and perspectives influence the approach to ethics in the design and delivery of marketing, and hence form part of the foundation of this unit. Students will discover their personal ethical approach as well as learn ethical principles, concepts, and theories, and how to apply these to a professional marketing context. Students will analyse real world ethical dilemmas and develop innovative and creative solutions to creating a better society, one step at a time. This is an elective unit.

AMB299 Marketing Communication

Pre-requisites	96 credit points of completed studies.
Equivalent s	AMB372, AMB202, AMB320
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Marketing Communication brings advertising, marketing and public relations students together to solve real world problems. In the unit, you will strengthen creative, digital, and research skills in real world

Units

settings. First, you will use marketing communication planning principles to audit and transform existing strategy. Second, you will respond to a client brief by researching the situation and creating and pitching your evidence-based marketing communication strategy to industry. You will also be able to assess your career readiness.

AMB303 International Logistics

Pre-requisites	(AMB110 or AMB210) and 96 credit points of completed studies.
Equivalent s	AMX303
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Current and future managers in businesses need to comprehend the role which logistics and supply chain management play in enhancing corporate performance.

AMB305 Analysis for Consumer Insights

Pre-requisites	AMB200 and AMB201
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

The ability to prepare, analyse and interpret data to make informed business decisions are essential skills in any market driven organisation.

The unit builds on the fundamental theoretical, technical and methodological concepts encountered in earlier introductory units like AMB200 and AMB201. This unit will enable students to use industry-relevant software packages and appropriate technical and analytical skills to draw meaningful inferences and to formulate evidence-based decisions and recommendations.

AMB306 Designing Consumer Research

Pre-requisites	AMB200 and AMB201
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

In our information-driven society, consumers and organisations are increasingly using research to guide their decisions. Consequently, the ability to critically evaluate research evidence and research designs are essential business skills. The unit builds on fundamental theoretical and methodological concepts from earlier marketing units (e.g., AMB200, AMB201) to teach students how to critically evaluate research and develop effective and rigorous research proposals.

AMB330 Digital Optimisation

Pre-requisites	144 credit points of completed studies.
Equivalent s	AMX330
Credit Points	12

Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Digital has changed the nature of marketing communication as a discipline and the way we think, communicate and purchase as consumers. This unit is important as the digital environment permeates our decision making as advertising and marketing communication professionals. Hence, an understanding of how to optimise the digital environment, an ability to navigate its platforms and measure its performance is a critical vocational skill. This unit provides a real work integrated learning opportunity for students.

AMB336 International Marketing

Pre-requisites	96 credit points of completed studies
Equivalent s	AMX336
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

Globalisation has required firms to look beyond their domestic markets to remain competitive and profitable. An understanding of marketing internationally is vital in today's global marketplace where different challenges and value systems exist.

AMB340 Marketing Service Experiences

Pre-requisites	(AMB240 or AMB140) and AMB201
Equivalent s	AMX340, CTB340
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit uses the core characteristics of service experiences as a framework to explore strategies for the marketing of services domestically and internationally. Services marketing is an important growth area and students need to understand how services marketing principles apply to the real world. This will be achieved by examining the application of marketing concepts, models and tools in services using case studies and practical experiences. Service quality management and the pervading influence of technology are critical topics that differentiate this unit within the marketing program.

AMB355 Marketing Behavioural and Social Change

Pre-requisites	48 credit points of completed studies
Equivalent s	AMB206, AMX206
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online

- SEM-2
External
- XCH-1, XCH-2

AMB355 introduces students to the principles, concepts, theory and application of social marketing. Social Marketing seeks to develop and integrate marketing concepts with other approaches to influence behaviours that benefit individuals and communities for the greater social good. It is increasingly being adopted by governments and stakeholders around the world as they seek effective solutions to solving social problems relating to health, well-being, environment, and inequality. In AMB355 we focus on how strategic, critical, and systems thinking, use of theory and research insight, and use of techniques such as segmentation, designing and planning, and the social marketing intervention mix can be used to tackle health and social issues. Students will learn to analyse real world behavioural and social problems and develop innovative and creative solutions using social marketing frameworks. This is an elective unit for business and law, and public health students.

AMB373 Issues, Stakeholders and Reputation

Pre-requisites	96 credit points must be completed prior to enrolling in this unit
Equivalent s	AMX373
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External

Gardens Point
- SEM-1
Online
- SEM-1
External
- XCH-1, XCH-2

Issues, Stakeholders and Reputation (AMB373) focuses on public relations practice in an organisational setting. A key responsibility of this role is to anticipate and respond to issues that influence stakeholder relationships and organisational reputations. AMB373 provides foundational skills and knowledge of the issues management process, including monitoring and tracking public opinion, analysis and developing appropriate organisational responses.

AMB374 Global Public Relations Cases

Pre-requisites	(AMB163 or AMB263) and (AMB164 or AMB264)
Equivalent s	AMX374
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

In today's dynamic and interconnected environment, organisations are increasingly challenged when making effective and well-considered decisions, especially in situations that require international and/or cross-cultural understanding. The communication of these decisions and the way organisations react to events

Units

have far-reaching consequences. It is imperative that public relations professionals can identify contextual considerations and make informed, criteria-based decisions in response. This unit strengthens your critical thinking and evaluation skills in public relations through case-based learning across a range of practice areas, and builds your skills in decision-making to resolve public relations problems.

AMB375 Internal Communication and Change

Pre-requisites	72 credit points of completed study
Equivalent s	AMX375
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Communication is central to organisational practice. Internal Communication and Change will provide theoretical and practical insights to equip students to identify, analyse, and respond to communication challenges in contemporary organisations.

AMB390 Bridging Cultures - International

Anti-requisites	AMB120
Other requisites	To enrol students must have completed 144cp (or equivalent to three semesters full-time study), have a course GPA of 4.5, which must include a minimum of 48cp of study in

	BS08
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Understand the skills, behaviours and attitudes required to work effectively with people from different cultural backgrounds, and develop practical strategies to interpret difference and respond appropriately in culturally diverse situations. Our increasingly globalised workplaces need graduates with awareness, understanding, sensitivity to, and an ability to deal with cultural diversity. The knowledge and skills developed in this unit are particularly valuable for a range of international exchange students: those planning an outbound program and those already inbound, for shorter programs or full degrees at QUT. Students with an interest in intercultural communication and those who are learning or have learned a second language will also benefit from this unit. This unit is specifically designed for students enrolled in BS08 Bachelor of Business - International.

AMB399 Capstone Experience

Pre-requisites	240 credit points of completed studies
Equivalent s	AMB379, AMX379, AMB369, AMX369, AMB359, AMX359, AMB339, AMX339
Credit Points	12

Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Getting from the Capstone unit to a career in advertising, marketing, public relations or international business generally involves an interview where three questions are most often asked: *Who are you? What can you do? and How well do you work with others?* Your Capstone Experience seeks to help you answer those questions and be job-ready and discipline smart. By bringing all your previous learning and discipline theories to an industry-based team brief, the Capstone Experience prepares you for the transition to industry practice, building your professional identity and providing evidence for those important interview questions.

AMN400 Consumer Insights for Marketing Success

Anti-requisites	MIN419
Equivalent s	AMX400
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

As marketers work to develop more effective strategies to attract, reach and maintain their customers, the need to understand how consumers

are influenced by both internal and external factors is integral to strategy formulation. The managerial importance of consumer behaviour stems from the marketing concept, so as consumers and their needs become the focus of the business; consumer behaviour forms the cornerstone of marketing strategy.

AMN401 Integrated Marketing Communication

Anti-requisites	CON421
Equivalent s	AMX401
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit represents a new way of thinking about IMC. Driven by the idea that everything is digital, this unit enhances traditional concepts of integration and synergy with new touchpoints of communication and new tools of measurement to deliver and optimise the ultimate customer experience.

AMN403 Developing Market Intelligence Skills for Decision Making

Anti-requisites	MIN413
Equivalent s	AMX403
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External

- XCH-1, XCH-2

Examine how market research is used to enhance management decision making. The key to an organisation achieving business goals necessitates being more effective than competitors in creating, communicating and delivering value to customers. This means market decisions must be made with stakeholders in mind. Therefore managers are reliant on information about customers, non-customers, competitors and the operating environment. Learn how to develop a research design that would enable data collection and analysis to address real world management decision problems.

AMN405 Decisions and Issues in Integrated Marketing Communication

Pre-requisites	AMN401 or AMN420
Equivalent s	AMX405
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

The purpose of this unit is to develop a framework to understand and evaluate advertising and IMC theory, as it guides business decisions and impacts upon key issues in society. In doing so, this unit makes an important contribution to postgraduate studies by evaluating

advertising and IMC in action, and exploring the ethical and legal considerations of message and media from a personal, corporate and professional perspective.

AMN420 Manage Advertising

Anti-requisites	CON417
Equivalent s	AMX420
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit is an important introduction to the management of successful advertising campaigns. Unless the advertising is based on research, well planned and has a strong strategic focus, the campaign will not be successful - regardless of how good the creative is or how effective the media is planned. Therefore, advertising management is the keystone of successful advertising. This makes this unit of vital importance to all who study advertising or marketing communication.

AMN423 Strategies for Creative Advertising

Anti-requisites	CON419
Equivalent s	AMX423
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-2 Online

- SEM-2

This unit explores theory and practice of advertising message planning and creation for print, broadcast and digital media. Insight and strategy underpin creative and provides direction for ideation and the benchmark for evaluation. Therefore, an examination of insight, strategy, ideation and execution is essential to effective and creative advertising.

AMN425 Digital Strategy and Analytics

Pre-requisites	24 credit points of completed Postgraduate study
Equivalent s	AMX425
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This course spans all the marketing communication disciplines and the practice of advertising, public relations and marketing to deliver a holistic approach to digital strategy. It introduces students to new digital skills that reflect the cutting edge of industry practice and important analytic understanding for decision-making. This unit satisfies the growing demand from industry for strategic thinking and planning, and the expectation of strong digital skills and a desire for evidence based solutions.

AMN426 Content Creation and Management

Pre-requisites	24 credit points of completed Postgraduate study
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

Content creation is an essential part of advertising, marketing and any communication strategy. Creating new, valuable, up-to-date content increases organic search traffic and improves brand positioning in search engine results. Further, high-quality content establishes the authority of a brand, builds relationships with consumers and ignites social sharing. Therefore, being able to produce content that is strategic, relevant and engaging is an important and employable skill in agencies and in organisations. This unit introduces students to principles and skills for creating content and managing online communities, and deepens students' understanding of data-informed decision making.

AMN430 International Logistics Management

Equivalent s	AMX430, IBN410
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

This unit provides an

introduction to the logistics functions that allow the planning, procurement, production, movement, distribution and positioning of goods and services for international business. The focus on supply chain management emphasises the requirement of integration of international business activities, and the necessary collaboration between firms to manage not simply the movement and positioning of inventory, but also the management of information, finance, data and knowledge across borders.

AMN431 Marketing Internationally

Anti-requisites	MIN421
Equivalent s	AMX431, IBN421
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

International markets are becoming increasingly competitive as globalisation, technology changes and distribution changes influence the flows of goods and services. Recognising this criticality, this advanced unit builds on strategic knowledge and skills developed in earlier units, extending students' ability to apply business and marketing principles, theories and frameworks to key issues in the contemporary

international landscape. This unit gives students essential knowledge and skills to understand and strategically respond to the challenges and opportunities of international marketing. Students will evaluate and formulate international marketing strategies, develop and practice their critical thinking, data analysis, and decision making skills, and craft and defend their judgements to make effective contributions to marketing strategy informed by environmental, cultural and ethical understanding.

AMN436 Developing Cultural Intelligence

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

In a globalised world, workplaces are increasingly filled with a diverse range of people from different nationalities, ethnicities, and cultural backgrounds. Diverse perspectives create more effective outcomes, yet can also cause misunderstanding, frustration, poor team performance, unintentional offense and lack of trust. This unit introduces Cultural Intelligence (CQ) – the ability to adapt, relate and work effectively with teams across cultures. In this unit students will develop an understanding of the key aspects of CQ by engaging with theoretical frameworks for interpreting differences in cultural

behaviour in conjunction with developing skills which can help in responding appropriately and effectively to culturally diverse situations. This unit will be of value to students seeking global careers and those currently working in multicultural team environments.

AMN443 Innovating Products and Customer Experiences

Anti-requisites	MIN423
Equivalent s	AMX443
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

The need for innovation in products and services to compete effectively in a global economy is a core driver of organisational strategy. Digital innovation alone can deliver \$315 billion in gross economic value to Australia over the next decade (Data61 2018). This unit combines both the theory and practice of innovation and uses a service design process to show students how to develop new products.

AMN444 Achieving Service Excellence

Pre-requisites	24 credit points of completed Postgraduate study
Anti-requisites	MIN424
Equivalent s	AMX444
Credit Points	12

Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

The service sector is a large and growing feature of the Australian economy. In addition, most manufacturing businesses encompass extensive service functions as well as production operations. Consequently, it is important for managers in all sectors to understand the problems and challenges inherent in designing and delivering high quality services for their customers and business partners. In this unit, students will be encouraged to explore and reflect on real world services marketing through examples, case studies and tutorial discussions that draw on relevant academic theory.

AMN445 Meaningful Marketing: Value Creation and Customer Engagement

Anti-requisites	AMN442, AMX442, MIN425
Equivalent s	AMX445
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit provides an introduction to basic concepts, principles and activities of customer-driven marketing at post-graduate level. Some of the principal topics include

value-based marketing, strategic marketing planning, consumer behaviour, segmenting and targeting markets, and marketing mix decisions. The overall objective of this unit is to provide each student with a working knowledge of the marketing function, its strategic importance for value creation, its relationship to other internal and external functions, its role in business plans, and its execution.

AMN446 Brand Analytics

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

Brands are critical assets to firms due to their ability to establish and sustain relationships with their consumers. Consequently, understanding the effects brands have on consumers is critical to future brand managers, market analysts and entrepreneurs across virtually all industries and types of organisations. This unit introduces students to the practical analytic skills needed to engage in consumer-focused brand management.

AMN449 Marketing Revolutionary Social Change

Anti-requisites	AMN447
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online

- SEM-2

In this unit, you will learn how marketing can be used to bring about revolutionary social change to tackle social problems such as climate change, racism, obesity, and gender inequality. The unit focuses on social marketing - a strategic approach utilising marketing concepts alongside approaches to influence behaviours, practices and social outcomes that benefit individuals and communities for the greater social good. The unit advances the principles, concepts, theory and application of social marketing, explaining how strategic, critical, and systems thinking, the use of theory and research insight, the application of segmentation, designing and planning, and the social marketing intervention mix, and creating value, can all be used to bring behaviour & social change & help solve social problems. You will explore and critically analyse real world social problems and develop innovative and creative solutions using social marketing frameworks.

AMN461 Organisational Storytelling and Media Relations

Anti-requisites	CON424
Equivalent s	AMX461
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

External
- XCH-1, XCH-2

This unit looks at how organisations use storytelling in owned, shared, and earned content developed for distribution via traditional (legacy) and social media. You will learn how traditional and social media play an important role in responding to, and influencing, public opinion surrounding organisations, their issues, and reputations. You will develop a storytelling-based media strategy and portfolio of material to respond to the needs of a real-world organisation. There is a strong focus on media writing.

AMN462 Community Engagement

Pre-requisites	24 credit points of completed Postgraduate study
Equivalent s	AMX462
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

Community Engagement (AMN462) introduces students to communication engagement, a key practice area of public relations. AMN462 investigates the theoretical foundations of contemporary strategies to inform research, planning, and implementation. Stakeholders (i.e., organisations, local community and government) have their own agendas and expectations of the processes and outcomes of these strategies. Effective engagement practitioners

identify these expectations and facilitate communication, interaction, participation and dialogue to address questions of authenticity and voice. In this unit, students will develop the skills and knowledge needed to help organisations identify community expectations, develop and implement appropriate engagement programs, and evaluate engagement strategies within a framework of ethical practice. AMN462 aims to prepare students to help organisations plan for, implement, and evaluate community engagement.

AMN465 Public Relations Foundations

Anti-requisites	CON415
Equivalent s	AMX465
Credit Points	12
Campus	Gardens Point and Online
Availabilit es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

AMN465 Public Relations Foundations introduces students to public relations as a management function in contemporary organisations. Public relations is based on the management of relationships between organisations and the groups or individuals on whom their success or failure depends. This unit lays the foundation for students to begin to explore the nature of such relationships, and the tools, theories and strategies which may be deployed to successfully manage relationships between

organisations and their publics.

AMN467 Strategic Communication Campaigns

Equivalent s	AMX467
Credit Points	12
Campus	Gardens Point and Online
Availabilit es	Gardens Point - SEM-2 Online - SEM-2

AMN468 Issues and Crisis Management

Pre-requisites	24 credit points of completed Postgraduate study
Anti-requisites	CON408
Equivalent s	AMX468
Credit Points	12
Campus	Gardens Point and Online
Availabilit es	Gardens Point - SEM-1 Online - SEM-1

AMN468 is delivered in both internal and external modes. The external offering of this unit is only available to domestic students admitted to the BS16 Master of Business, BS17 Master of Business (Advanced), BS18 Master of Business/Master of Business courses and the BS39 Graduate Certificate in Business. Organisations face increasing uncertainty in their business environments. Understanding how to prepare for issues and crises are essential components to making communication decisions and mitigating further risk. Issues and crisis management encompass all professions and AMN468 will

integrate a range of action strategies with a focus on communication approaches.

AMN499 Industry, Markets and Stakeholder Capstone

Pre-requisites	Completion of 96 credit points of Business postgraduate units
Anti-requisites	CON405
Equivalent s	AMX406
Credit Points	24
Campus	Gardens Point and Online
Availabilit es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This is the postgraduate Capstone unit for the PR, Marketing, Strategic Advertising, and IMC disciplines. Using a Work Integrated Learning (WIL) industry project, you will work independently and in a team of students to critically examine contemporary issues relevant to your discipline by researching and analysing real-world problems and issues. Through the application of your discipline knowledge and skills you will develop feasible business solutions in collaboration with your industry partner and your discipline-specific academic project supervisor. In addition to the application of discipline-specific knowledge and skills, you will obtain an overview of research and project work related skills, requirements, and processes to get help you develop your graduate capabilities and to get you job ready.

AYB106 Accounting Processes and Systems

Anti-requisites	BSB110, BSD110
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availability	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

Accounting data is the basis for decision making in any organisation, making it important for any business professional to have a foundational level of knowledge and understanding of modern financial and managerial accounting theory and practice. Accordingly, this unit provides students with introductory knowledge of modern financial accounting theory and practice to develop an understanding of how accounting data is used to inform decisions in organisations. The unit covers financial procedures and reporting for business entities, analysis and interpretation of financial statements, planning, control, business decision making and information communication technologies. The knowledge and skills developed in this introductory unit are relevant to students in accounting and non-accounting majors.

AYB115 Governance, Fraud and Investigation

Equivalent	BSB213
Credit Points	12
Campus	Gardens Point and Online
Availability	Gardens Point

es	- SEM-1 Online - SEM-1
----	-------------------------------------

The role of a forensic accountant involves many different tasks including profiling, interviewing, expert witness work and risk management. Fraud is an ever present problem in a technology driven business environment and understanding how fraud occurs and can be prevented and detected is becoming a necessity for business operations. Governance issues have an increasingly large impact on business due to the electronic and global nature of business operations. Therefore, an understanding of how IT governance assists forensic accountants in their risk management role, particularly in relation to fraud detection and prevention, is particularly important. From a legal perspective, understanding criminal and civil jurisdictions, gathering evidence, interviewing suspects, knowledge of evidentiary rules and the expert witness role is essential knowledge for those wishing to enter the forensic accounting profession

AYB200 Financial Accounting

Pre-requisites	BSB110
Anti-requisites	AYB201, AYX200
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availability	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

External	- XCH-1, XCH-2
----------	----------------

External financial reports are a legal requirement for companies under the Australian Corporations Act and provide decision-useful information for interested users. Therefore, it is a requirement for accountants working in industry to know and understand: accounting concepts and procedures; specific technical accounting and legal requirements; and, general professional and ethical concepts. These are required in order to be able to prepare, present and explain external financial reports for users. Similarly, this knowledge and skill is a requirement for auditors who perform audits and reviews of external financial reports.

AYB201 Financial Accounting and Reporting

Pre-requisites	AYB106
Anti-requisites	AYB200, AYX200
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availability	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

External financial reports are a legal requirement for companies under the Australian Corporations Act and provide decision-useful information for interested users. Therefore, it is a requirement for accountants working in industry to know and

understand: accounting concepts and procedures; specific technical accounting and legal requirements: and, general professional and ethical concepts. These are required in order to be able to prepare, present and explain external financial reports for users. Similarly, this knowledge and skill is a requirement for auditors who perform audits and reviews of external financial reports.

AYB202 Management Accounting

Pre-requisites	AYB106
Equivalent s	AYB225, AYX225
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Management accounting is the sourcing, analysis and communication of decision-relevant information - both financial and non-financial – used by firms to generate value and maintain a competitive advantage. Accordingly, all firms, regardless of industry type or size, make use of a range of management accounting practices. Accountants need to know about these concepts, techniques, and sustainability practices used by firms to allocate costs to products or services; plan, control and measure performance; and be able to identify and provide

management with relevant information to inform their decision making.

AYB203 Taxation

Pre-requisites	48 credit points of completed studies
Anti-requisites	LWB364, LLB347
Equivalent s	AYB219, AYX219
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

As many business decisions involve a consideration of the taxation implications, Accountancy graduates should possess a basic knowledge of the Australian taxation system so that they can develop skills required for professional practice. The purpose of this unit is to enable students to develop an understanding of the basic fundamentals of taxation. AYB203 Taxation is a prerequisite for AYB320 Advanced Taxation Law.

AYB205 Law of Business Entities

Pre-requisites	BSB111 or BSB151 or CTB111
Anti-requisites	AYB223
Equivalent s	AYB305
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2

Under Australian law, both

individuals and businesses may organise their affairs through various types of business structures. Each structure has characteristics that differ and each structure affects the nature of their responsibilities, obligations, internal and external relationships. Accountants are often called upon to audit, advise and assist clients with their business endeavours and are required to understand the attributes of such business structures and the laws and regulations that affect them.

AYB221 Accounting Systems and Analytics

Pre-requisites	BSB110
Anti-requisites	AYN443
Equivalent s	AYX221
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Accounting information systems are an essential element of any business. An appreciation of accounting in a modern electronic environment, how accounting systems are designed and how analytics can be applied in accounting, are therefore crucial to the study of real world accounting systems. This unit builds on the knowledge attained in the prerequisite subjects and applies it to accounting information systems environment.

AYB227 International Accounting

Pre-requisites	96 credit points of completed studies.
Equivalent s	AYX227
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

As business and financial markets have become increasingly globalised, the significance of the differences in international, financial accounting policies and disclosure and reporting practices, have become more important, especially from the perspective of management, financial analysts and other users of financial statements including trillion dollar pension/superannuation funds. For these key interest groups, it is vital not only to be aware of international differences in financial accounting policies and practices, but also to be able to assess their impact on earnings and assets and key performance indicators and ratios, for example, return on assets. Additional key issues in globalised business operations relate to an understanding and appreciation of cultural diversity issues and the global trends in foreign currency transactions and hedging, global corporate sustainability, international taxation and international audit.

AYB230 Corporations Law

Pre-requisites	96 credit points of completed studies.
Anti-requisites	LWB334
Equivalent s	AYX230
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Individuals and businesses may organise their affairs through various legal structures. One of the most common ways to organise a business structure is through incorporation. Accordingly, accountants should have a detailed knowledge about corporations as a particular type of business structure.

AYB232 Financial Services Regulation and Law

Pre-requisites	(BSB110 or BSB107) and ((LLB101 and LLB202) or BSB111 or BSB151) and EFB210. EFB210 can be enrolled in the same teaching period.
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

This course is developed for students who will be, or intend to embark on careers as, financial advisors and planners, accountants, auditors, business analysts and stockbrokers. It is designed to aid the students' understanding of the regulatory fundamentals and the key provisions of the law and regulations relating to corporate securities and

financial services.

AYB240 Superannuation and Retirement Planning

Pre-requisites	(BSB110 or BSB107) and (BSB111 or BSB151)
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

Mandatory superannuation savings under the Australian retirement incomes policy have seen the superannuation industry grow to nearly \$3 trillion, with almost all workers now having superannuation benefits. Expansion of superannuation fund and investment choice has also increasingly shifted investment decision-making to superannuation fund members. Superannuation has become an almost universal benefit affecting virtually every business and employee. However, the superannuation system is complex and subject to a broad range of regulation governing all facets of the operations of the superannuation industry. This unit introduces students to the Australian superannuation system and the regulatory framework under which it operates. Knowledge and understanding of superannuation is important to financial planning, accounting graduates, particularly if they will be involved with the superannuation advice to clients or employers, administration or auditing of superannuation funds.

AYB250 Personal Financial Planning

Pre-requisites	(BSB110 or BSB107) and ((LLB101 and LLB202) or BSB111 or BSB151) and EFB210. EFB210 can be enrolled in the same teaching period
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

With the increasing complexity of taxation laws, the ageing population and the focus on self-reliance in retirement, individuals expect their financial advisers to be professionally equipped to assist them in effective investment and risk management and also with complex retirement planning strategies. As a result, many professional accounting firms, banks and independent financial advise firms now offer financial planning services as part and parcel of the services they are offering to their individual clients. QUT graduates who have acquired skills and knowledge in this area will have a definite competitive advantage when seeking financial planning related employment.

AYB301 Audit and Assurance

Pre-requisites	AYB221 or AYB340
Equivalent s	AYX301
Credit Points	12
Campus	Gardens Point, Online,

	EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

Audit and Assurance is a third year unit, which is included in the degree program to enable students to comprehend the key concepts of auditing as a discipline, to demonstrate the relationship between auditing and the systems of accountability and to demonstrate the differences between manual and computerised information systems (CIS) audit processes. The unit builds on the knowledge of accounting and accounting standards acquired in prior units by enabling students to understand in detail the audit process (including professional auditing standards and techniques and ethical requirements) which leads to the auditor providing an opinion on the truth and fairness of financial reports of various types of entities.

AYB311 Financial Accounting Issues

Pre-requisites	AYB340
Equivalent s	AYX311
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit extends the knowledge acquired in earlier

accounting units to examine accounting theories and reporting practices adopted in the financial statements of reporting entities and publicly listed companies to meet the decision-making needs of external parties. Emphasis is placed on developing an understanding of, and the ability to critically evaluate, how regulatory requirements and incentives affect financial reporting. The unit explores the different governance models of corporations and relates them to their financial reporting environment. This framework provides a basis for examining specific accounting issues with an emphasis on both the application of specific accounting measurement models (e.g. historic cost versus fair value) or regulatory provisions (e.g. continuous disclosure requirements). The unit also analyses key issues of debate in the international arena.

AYB320 Advanced Taxation Law

Pre-requisites	AYB203 or AYB219 or AYB325
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

As many business decisions involve a consideration of the taxation implications, accountancy graduates should possess knowledge of the Australian taxation system so that they can develop skills required for professional

practice. The purpose of this unit is to enhance student's understanding of taxation concepts by extending the basic fundamental principles learned in AYB219 Taxation Law and exploring advanced taxation concepts in more depth.

AYB321 Strategic Management Accounting

Pre-requisites	AYB225 or AYB202
Equivalent s	AYX321
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Strategic management accounting is a key component of the overall skills base of today's professional accountant. This unit will provide an in-depth understanding of management accounting techniques designed to support strategy by building on the technical knowledge gained in AYB202. The unit examines the strategic management accountants' role in dynamic organisations and considers the skills and competencies that management accountants should develop to stay competitive as value-adding members of management teams in the global business environment. By the end of this unit, students will be able to identify and analyse complex situations from a strategic

perspective. The unit uses case studies to develop crucial graduate capabilities centred upon higher order critical analysis skills and the ability of students to generate a range of effective alternative options and innovative solutions to case-based scenarios based on complex real-world situations.

AYB339 Accountancy Capstone

Pre-requisites	192 credit points must be completed prior to enrolling in this unit including successful completion of AYB340 Company Accounting
Equivalent s	AYX339
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

One of the essential elements in the real world is the ability to solve unstructured, multi-disciplined accounting problems. This unit integrates elements of the accountancy discipline using a Problem-Based Learning (PBL) approach. The unit addresses issues faced by a professional advisor/consultant by presenting students with simulated real-world problems. These problems require students to work together in teams, research issues, gather information, and form conclusions. Students should therefore be better prepared for the various situations they will face in their accounting career.

AYB340 Company Accounting

Pre-requisites	AYB200 or AYB201
Equivalent s	AYX340
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM

As an accountant, most of the work you will undertake as a practitioner will involve accounting for companies. In this context, accountants are required to interpret and apply accounting standards, and other statutory requirements governing the accounting procedures reflected in the content of a company's financial statements. This unit contributes to the knowledge and technical skills you will need to prepare and present financial statements for companies. This unit builds on the prerequisite units by applying accounting principles to complex company accounting issues and building upon your understanding and knowledge of ICT in accounting. It provides a foundation for subsequent units by developing critical analytical skills through an examination of theoretical accounting issues, accounting regulation and practice.

AYB341 Forensic and Business Analytics

Pre-requisites	192cp of completed studies
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2

Units

Online
- SEM-2

With the digitisation of information, management have become increasingly reliant on comprehensive and timely data driven reporting as their primary mechanism for capturing and evaluating business performance and for making urgent, strategic, high-risk decisions. This unit provides students with theoretical and practical skills in forensic and business intelligence through the use of SAS and other technologies, to investigate business related data resources to identify fraud, and to support corporate performance and decision making.

AYB346 Financial Plan Construction (Capstone)

Pre-requisites	AYB250 and 192cp of completed studies
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

A key aspect of working in the financial planning industry is the ability to draw upon a range of professional skills including managing career and professional identity, communicating effectively with others, and leveraging the strengths of diverse teams to develop practical and ethical responses to contemporary financial planning problems and opportunities. This capstone unit provides a platform for students to develop and refine financial

planning professional practical skills by integrating and extending knowledge and skills gained in earlier financial planning units. Students will develop a critical understanding of their professional strengths and limitations in working individually, with peers, and with industry professionals. Students will be guided by academics and industry professionals to apply the discipline knowledge and professional skills gained throughout their university studies to real-world financial planning problems.

AYN411 Audit and Assurance Services

Pre-requisites	AYN416 or enrolment in BS11 Accountancy major (BS11MJR-ACCOUNT)
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit will enable students to develop an appreciation of the audit function and to better understand the main aspects of auditing and how it fits into the overall business environment. The unit builds on other accounting units studied as part of the overall course and applies other concepts and techniques previously learned to this specific area.

AYN414 Cost and Management Accounting

Pre-requisites	AYN416 Can be enrolled in the same teaching period.
Credit Points	12

Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

The objective of management accounting is to deliver effective business insights to help firms achieve and maintain a competitive advantage. In this unit you will learn to evaluate data and perform analytical techniques that support decisions such as costing a firm's products or services, evaluating non-routine projects, resource allocation, and performance management.

AYN416 Financial Accounting Processes

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

All firms need to prepare financial statements at least annually. AYN416 provides a comprehensive introduction to financial accounting processes from both a practical and theoretical viewpoint. Being the first accounting unit in the Master of Business (Professional Accounting) AYN416 also provides the foundation for studies in all the other accounting related units in the degree course particularly AYN417 Corporate Accounting and AYN418 Advanced Financial Accounting.

AYN417 Corporate Accounting

Pre-	AYN416 or enrolment in

Units

requisites	BS11 Accountancy major (BS11MJR-ACCOUNT)
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

A large number of entities are companies rather than, for example, sole traders or partnerships. Accordingly, a significant amount of the work you will undertake as a practitioner will involve accounting for companies. In this context, accountants are required to interpret and apply accounting standards, and other statutory requirements governing the accounting procedures reflected in the content of a company's financial reports. Accountants are also required to integrate and apply academic accounting knowledge to solving problems that arise in practice. This unit contributes to the knowledge and skills you will need to prepare financial reports for companies. This unit builds on the prerequisite unit by applying accounting principles to complex company accounting issues. It also provides a foundation for subsequent units, which develop critical analytical skills through an examination of theoretical accounting issues, accounting regulation and practice.

AYN418 Advanced Financial Accounting

Pre-requisites	AYN416 or enrolment in BS11 Accountancy major (BS11MJR-ACCOUNT)
Credit	12

Points	
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Financial accounting is concerned with communicating information about an entity's financial position and performance to meet the decision making needs of external parties. This unit examines the accounting and reporting practices of reporting entities, particularly listed public companies. Emphasis is placed on developing an understanding of, and the ability to critically evaluate, the various regulatory requirements governing financial reporting. The unit commences with an overview of the financial reporting environment and theories that seek to explain the accounting policy choices of management. This framework provides a basis for examining specific accounting issues with particular emphasis on both the application of specific accounting techniques/rules and the conceptual/theoretical issues associated with alternative accounting methods.

AYN424 Accountability of Transnational Corporations

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

As business and financial markets have become

increasingly globalised, the significance of the differences in international accounting policies and disclosure and reporting practices, has become more important, especially from the perspective of managers, financial analysts and other users of financial statements. This unit is designed to provide students with an insight into, and an appreciation of, many of the financial accounting reporting, disclosure and enforcement issues faced by global corporations in an international business environment. This unit provides you with an understanding of the unique financial accounting and reporting, taxation and corporate governance issues associated with global business operations including issues related to the political lobbying activities of both accounting standards and standard-setters. It will assist you to develop the skills necessary to analyse, compare, contrast, and report on the performance levels of global corporations.

AYN433 Research Topics in Accounting

Pre-requisites	(AYN417 and AYN418) or enrolment in BS63
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

This unit extends students' critical knowledge and skills in the formal review of a broad range of topics within the

Units

accounting literature. Through the exploration of key theories and research methodologies applied in accounting, this unit prepares students to complete their proposed research topic.

AYN438 Taxation Law and Practice

Pre-requisites	AYN456 or enrolment in BS11 Accountancy major (BS11MJR-ACCOUNT)
Equivalent s	AYQ438
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit builds on students' previous knowledge of business and corporations law to introduce the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levying of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The unit also provides a brief overview of the taxation of partnerships, trusts and companies, the goods and services tax (GST), and fringe benefits tax (FBT). Emphasis is placed on developing students' practical skills and problem solving through research, analysis and application of taxation legislation.

AYN442 Superannuation and Wealth Management

----------------	---

Equivalent s	AYQ442
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2

Mandatory superannuation savings combined with the expansion of superannuation fund and investment choice has also increasingly shifted investment decision-making to superannuation fund members. Superannuation has become an almost universal benefit affecting virtually every business and employee. However, the superannuation system is complex and subject to a broad range of regulation governing all facets of the operations of the superannuation industry. This unit extends students' foundational accounting and financial planning knowledge to encompass the Australian superannuation system and the regulatory framework under which it operates. Knowledge and understanding of superannuation is important to financial planning and accounting graduates, particularly if they will be involved with the provision of superannuation advice to clients or employers, administration or auditing of superannuation funds.

AYN443 Accounting Information Systems and Analytics

Pre-requisites	AYN416 or enrolment in the BS39 Forensic Accounting Major (BS39MJR-FNSCACC)
----------------	---

Anti-requisites	AYB221, AYN402
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

In this unit, we look at how computers and accounting information systems are used in the modern day business environment. An appreciation of accounting in a computerised environment, how accounting information systems are designed and how application software can be used in accounting, are therefore crucial to the study of real world accounting systems. This unit builds on the knowledge attained in the prerequisite subjects and applies it to an accounting information systems environment.

AYN453 Forensic Accounting and Data Analytics

Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-1 Online - SEM-1

The unit provides students with an important skill base - both theoretical and practical - in supporting corporate decision making and fraud investigation in a business environment. Management require more than just information to assist them. This unit focuses on providing skills and knowledge in forensic and data analysis/business intelligence through the use of advanced

Units

MS Access, MS Excel and SAS Enterprise Guide to mine and analyse data sets to assist managerial decision making and aid in fraud detection. Applications for Forensic Accounting and Data Analytics are emphasised.

AYN454 Fraud and Investigation

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

There are many rules and regulations that are required to be addressed in the forensic accounting role. This unit will provide students with the knowledge and skills associated with different types of fraud, as well as regulatory aspects of forensic accounting including the correct way to collect and store evidence, interviewing suspects and witnesses, as well as expert witness obligations and court etiquette. The unit provides students with important theoretical knowledge in supporting clients in a civil and/or criminal forensic investigation.

AYN456 Business and Corporations Law

Equivalent s	AYX456, AYQ456
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External

- XCH-1, XCH-2

As many business decisions involve consideration of business and corporate law, postgraduates with an accountancy degree should possess a functional understanding of Australia's legal system. Knowledge of business and company law will equip them with skills for professional practice as well as enhance their capacity to navigate increasingly complex business landscapes. This unit introduces students to Australia's legal environment, developing students' knowledge and understanding of core principles of law while also introducing basic research and analysis skills essential to effective decision in this space.

AYN457 Financial Planning Principles and Regulation

Equivalent s	AYQ457
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

This unit aims to introduce students to key financial planning processes, concepts, issues, ethics requirements, laws and regulations applicable to financial services in Australia. Introduction to financial planning areas of investments and asset allocations, taxation planning, insurance and risk management, superannuation and retirement planning and statement of advice processes

are covered. Responsibilities and obligations for licencees and their representatives are also discussed. This includes requirements pertaining to disclosure obligations for financial products and services, anti-money laundering and counter-terrorism financing (AML & CTF), privacy, statement of advice, and Tax Practitioner Board (TPB) requirements. The foundation knowledge and skills learned in this unit form the basis for further postgraduate study in the financial planning discipline.

AYN458 Ethics and Professional Relationships

Equivalent s	AYQ458
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit is designed for students intending to pursue professional careers in business, particularly accounting or financial planning, and introduces ethical issues associated with the roles of directors, executives and professionals. With a particular focus on the ethical competencies and obligations required of those providing financial advice and accounting services, the unit also specifically addresses the development of trust within professional relationships. Practical considerations regarding how to develop effective non-verbal and verbal

communication skills with clients and other stakeholders are also of continuing importance in professional contexts and are explored in this unit.

AYN471 Financial Literacy and Decision Making

Credit Points	12
Campus	Gardens Point and Online
Availability	Gardens Point - SEM-2 Online - SEM-2

This unit enables non-accountants to understand financial information. Developing basic financial literacy skills and an appreciation of accountability is necessary for managers, executives and board members of organisations across the for-profit, non-profit and public sectors. Being able to analyse and interpret financial reports is critical to understand the financial position of an organisation, and therefore practice good governance, decision making, transparency, the achievement of an organisation's purpose, strategic decision-making, and communicating with both internal and external stakeholders. The unit also equips students with the knowledge and skills needed to undertake budgeting activities that support the broader operational decision-making processes. Finally, specific financial and accountability challenges which face for profit, non-profit and public sector

organisations are examined.

AYN472 Fundraising and Philanthropy

Equivalent	GSN488 and GSN489
Credit Points	12
Campus	Gardens Point and Online
Availability	Gardens Point - SEM-2 Online - SEM-2

Fundraising and philanthropy are related and vital topics for the community and the broad nonprofit sector. The unit initially offers students a grounding based on history, terminology, key theories and models of these practices. It then explores key principles and techniques of fundraising to provide insights into what fundraising organisations must do now and in the emergent future to meet the needs of both the community and donors in a strategic way. The latter half of the subject allows students to investigate the philanthropy landscape from its structures, applied skills and knowledge needed, and critiques to its role in civil society. The subject builds understanding of both theory and practice in fundraising and philanthropic behaviour through a variety of resources.

AYN473 Managing Non-profits and Social Enterprises

Equivalent	GSN487 and GSN484
Credit Points	12
Campus	Gardens Point and Online
Availability	Gardens Point - SEM-1 Online

- SEM-1

This unit introduces the Third Sector sector and explores the demands of being managing human, financial and operational resources and activities. Organisations in this sector address complex and wicked problems, so managers are expected to adopt management theory and strategies which effectively and efficiently create positive outcomes and impact for individuals and communities. This unit explores management theory and practices that focus on, understanding organisational and community problems, building and maintaining social and human capital, and implementing good practice in professional and organisational contexts. Additionally, nonprofit organisations and social enterprises are increasingly seeking new sources of revenue, developing social innovations and programs, and using data to harness insights to drive decision making. This means the need for effective social business planning, strategy, and diverse managerial skills is critical in today's environment.

AYN520 Integrated Issues in Professional Practice

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

The 'third sector' encompasses a diversity of values-driven organisations, including, charities and social enterprises. Recent high profile third sector governance failures have challenged community trust in the sector, at times prompting questions about its legitimacy and contributions. In

this context public scrutiny of the efficacy of legal frameworks designed to regulate and facilitate the conduct of third sector organisations and concern about the competency and integrity of its leaders have intensified. The primary aim of this unit is to prepare students for working in third sector leadership roles. To support this aim the unit is designed to help students develop a critical understanding of governance models, laws, and normative frameworks and how these can help and hinder leadership responses to real-world governance issues such as those relating to fraud, financial sustainability and mission-drift.

- XCH-1

Real world social and environmental issues are increasingly addressed through business means in an emerging form of hybrid organisation – the social enterprise. Traditionally, the government and charity sectors sought to meet community needs, however resource constraints and increasing demand make this increasingly difficult. Social enterprises provide innovative and sustainable solutions to resourcing and fulfilling charitable purposes via business means. This business core option unit introduces you to social enterprises in a global perspective, and helps you to develop Human-Centred Design skills as you build a social enterprise business plan.

BSB131 Applied Business Analytics

Equivalent s	BSB123
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

Organisations use business analytics to understand and solve business problems, increase efficiency, leverage productivity, and ultimately enhance the business performance of organisations. This business core option unit introduces you to a practical framework for data collection,

aggregation, processing, and modelling to transform data into business insights. You will gain knowledge of key business analytics methods and approaches, and build skills in using Excel to manage and analyse data sets — valuable competencies that will help you to improve decision-making in contemporary business environments across all business disciplines.

BSB151 Business Law and Governance

Anti-requisites	AYB120, LLB101, LLB202, LWB136, LWB146
Equivalent s	BSD111 BSB111
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

This foundational unit aims to help students understand that in business, choosing the "right" thing to do involves a range of quite different conceptualizations of what is "right". By using Ethics, the Law and Governance principles to determine what is right, we emphasize the need for tomorrow's business leaders to understand different ways people judge what is "right" and introduce critical business concepts such as governance, fiduciary duties, agency law, contract and negligence (duty of care). Through use classical ethical frameworks as well as statute and case law, students will

develop the ability to justify what is the right thing to do in a number of different business scenarios. In so doing the unit also addresses specific legal issues germane to all fields of business and professional contexts while developing problem solving skills relevant to contemporary business.

BSB152 Financial Management

Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit prepares students to analyse, interpret and make decisions based on the accounting and financial information produced by an organisation. Different types of accounting and financial information are introduced together with various techniques that are utilised to generate insights into organisational performance, risk management as well as management investment, finance and profit distribution decision making. This is essential knowledge for all management decision makers in an organisation. Real life limitations of the individual approaches and techniques covered will be introduced together with the complexities of making these management decisions. Topics introduced in the unit include: analysis of financial statements, valuation of different financial assets, management investment

decision making, short and long-term planning and business risk management.

BSB250 Business Citizenship

Pre-requisites	72 credit points of completed studies
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

In this developmental core business unit, you will explore the potential for individuals and organisations to create positive social and environmental change, and extend your ability to analyse complex business problems. You will explore your personal values and ethical priorities in the context of professional practice while gaining an appreciation of multi-stakeholder and Indigenous perspectives on business issues and practice. You will develop skills to communicate complex issues and data to a variety of audiences, and refine your self-reflection skills to guide your professional development. Exploring citizenship and ethics at individual, professional, organisational and global scales, this unit is relevant to students of all business disciplines, bridging the introductory and capstone core business units to extend your business competencies and preparing you to become a socially responsible professional and global citizen.

BSB302 Project 2

Credit Points	24
Campus	External
Availabilities	External - XCH-1

BSB304 Project

Other requisites	Subject to Unit Coordinator approval and 96 credit points of prior studies.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - XCH-1

This unit provides an opportunity for students to focus in greater depth on a selected topic that is significant to their professional development. In addition to providing greater depth of knowledge the project will also develop independent learning skills and the ability to be self motivated and innovative in developing and completing a specifically designed and approved area of study. The unit is designed to provide a valuable practical and specific element to a student's professional portfolio, which can provide a competitive edge in the labour market.

BSB305 Undergraduate Business Internship

Pre-requisites	192 credit points of undergraduate study completed in current course and a GPA of at least 4.0
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

Online
- SEM-1, SEM-2, SUM

Undergraduate Business Internship is a work integrated learning unit for undergraduate students from any undergraduate major in QUT Business School. Students apply and build on the knowledge and skills developed during their studies in a real world setting. The unit develops and refines employability skills, engages students in career development activities, supports students to adopt a reflective approach to learning, and prepares students for transition to professional practice and careers in the future world of work.

BSB399 Real World Ready - Business Capstone

Pre-requisites	Completion of 192cp of study
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Everything in the professional world is centred on working with and through other people. This capstone unit enables students to develop and refine their professional skills and experience working in an interdisciplinary team to develop experience in applying structured problem solving techniques. Integrating and extending professional practice knowledge and skills gained in earlier units, students will develop a critical understanding of their personal and professional strengths and

limitations in working individually, with peers, and with industry professionals. Students will be guided to apply the discipline knowledge and professional skills gained throughout their university studies to a real-world project for an industry client. This unit supports students to develop their professional identity, and enables students to develop and demonstrate their capabilities for working professionally in teams to develop solutions for real world problems.

BSD105 The Future Enterprise

Equivalent s	BSB105
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

This introductory business core unit provides insights on how to predict emerging futures in the contemporary workplace and how to tailor individual response strategies to future business scenarios. Grounded in an integrated mix of real-world case studies from corporate, non-profit and entrepreneurial sectors, this unit will help you to develop the mindset and skill set required to approach the future world of work equipped to succeed. You will practise environmental sensing, scenario planning and managing strategic alternatives, and will be introduced to megatrends defining the contemporary work landscape, along with opportunities, threats and “black swan” events disrupting

it. You will build your capability to be resilient and agile in the workplace. This unit is relevant to students of all business disciplines, preparing you for the future of work and introducing you to business capabilities to ignite your career.

BSD106 Dynamic Markets

Equivalent s	BSB106, BSD126
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

In this introductory business core unit, you will explore how value is created for organisations and customers through the process of exchange in dynamic market environments. You will learn about how businesses interact with consumers and other stakeholders, gain an understanding of the forces that drive behaviour in different market settings, and explore strategies organisations use to enter and operate within dynamic markets to co-create value with customers and stakeholders. This unit is relevant to students of all business disciplines, introducing you to evidence-based skills needed to analyse and critically appraise the trade-offs required to create value and succeed in complex business settings. Along with the rest of the introductory business core, this unit forms the foundation for further study across the breadth of business disciplines, introducing you to business capabilities to

prepare you for the future world of work and ignite your career.

BSD107 Financial Performance and Responsibility

Equivalent s	BSB107
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

In this introductory business core unit, you will learn about how individuals and businesses allocate financial resources and use financial information to make sound business decisions in the contemporary workplace. You will gain foundational skills in managing your own personal finances, and in using software to gather and analyse financial information in order to manage cash, evaluate risk, and assess performance and value both at personal and organisational levels in authentic, real-world contexts. This unit, along with the rest of the introductory business core, forms the foundation for further study across the breadth of business disciplines and introduces you to business capabilities to prepare you for the future world of work and ignite your career.

BSD108 Business Environments

Equivalent s	BSB108
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

In this introductory business unit, you will examine the

features that define and shape the national, international and global environments in which businesses operate. You will gain an understanding of the roles of key economic, political and legal institutions and regulatory frameworks and how they impact businesses, and apply critical thinking skills and evidence-based approaches to solve real-world business problems. This unit also introduces you to professional skills in analysing and presenting data to inform business decisions. Along with the rest of the introductory business core, this unit forms the foundation for further study across the breadth of business disciplines, introducing you to business capabilities to prepare you for the future world of work and ignite your career.

BSD130 Social Enterprises

Equivalent s	BSB130
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

Real world social and environmental issues are increasingly addressed through business means in an emerging form of hybrid organisation – the social enterprise. Traditionally, the government and charity sectors sought to meet community needs, however resource constraints and increasing demand make this increasingly difficult. Social enterprises provide innovative and sustainable solutions to resourcing and fulfilling

charitable purposes via business means. This business core option unit introduces you to social enterprises in a global perspective, and helps you to develop Human-Centred Design skills as you build a social enterprise business plan.

BSD131 Business Analytics

Equivalent s	BSB131
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

Organisations use business analytics to understand and solve business problems, increase efficiency, leverage productivity, and ultimately enhance the business performance of organisations. This business core option unit introduces you to a practical framework for data collection, aggregation, processing, and modelling to transform data into business insights. You will gain knowledge of key business analytics methods and approaches, and build skills in using Excel to manage and analyse data sets — valuable competencies that will help you to improve decision-making in contemporary business environments across all business disciplines.

BSN404 Project 1

Anti-requisites	MKN101, MKN102, MKN103
Equivalent s	BSX404
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

BSN404 is an applied research unit. The student selects a topic which they have identified as significant to their professional development and they are expected to spend ten hours per week over the teaching period on completing the project on this topic. The primary purpose of the unit is to augment or extend your professional knowledge beyond classroom instruction, to develop applied research skills, to integrate learning with work, and provide an opportunity for self directed learning. In order to achieve these purposes, you will develop an individually tailored learning contract. The specific program of study will be developed in conjunction with and approved by the academic supervisor.

BSN405 Project 2

Anti-requisites	MKN101, MKN102, MKN104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

BSN405 is an applied project unit. The student selects a topic which they have identified as significant to their professional development and is expected to spend ten hours per week over the teaching period on completing the project on this topic. The primary purpose of the unit is to augment or extend your professional knowledge beyond classroom instruction, to develop applied research skills, to integrate learning with work, and provide an

opportunity for self directed learning. In order to achieve these purposes, you will develop an individually tailored learning contract. The specific program of study will be developed in conjunction with and approved by the academic supervisor.

BSN406 Project 3

Equivalent s	BSX406
Credit Points	24
Campus	Gardens Point, EXCHANGE, Online and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1 External - XCH-1, XCH-2

BSN406 is an applied project unit. The student selects a topic which they have identified as significant to their professional development and is expected to spend twenty hours per week over the teaching period on completing the project on this topic. The primary purpose of the unit is to augment or extend your professional knowledge beyond classroom instruction, to develop applied research skills, to integrate learning with work, and provide an opportunity for self directed learning. In order to achieve these purposes, you will develop an individually tailored learning contract. The specific program of study will be developed in conjunction with and approved by the academic supervisor.

BSN412 Qualitative Research and Analytical Techniques

Anti-requisites	CON500
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The increasing availability of unstructured data in research and business settings requires that managers, employees, business owners and other stakeholders have an understanding of the nature of qualitative data, the conduct of qualitative studies and the methods to collect, analyse and interpret qualitative data.

BSN413 Experiential Learning Project

Pre-requisites	48cp of completed postgraduate study
Other requisites	Participation in approved study tour, industry engagement and project innovation entrepreneurship, or social enterprise activity of 50 hours or more.
Assumed Knowledge	null
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2 Online - FP07A, SEM-1, SEM-2

Students have many opportunities to undertake activities such as entrepreneurial learning opportunities, start-up weekends, innovation sprints, social enterprises, industry or community engagement. The unit supports students in bringing more meaning to these opportunities, through connecting with their course

and career ambitions.

BSN414 Quantitative Research Methods

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit is designed to give students an introduction to a range of quantitative research methods and their application to different research questions and types of quantitative data.

BSN420 Postgraduate Business Internship

Pre-requisites	Grade Point Average (GPA) of 4.0 or higher AND 48 credit points of postgraduate study completed in current course
Anti-requisites	BSN421
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM

BSN450 Business Intelligence

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

In this multidisciplinary business core unit, you will learn about approaches and technologies used by enterprises to research business problems and develop knowledge guiding effective business strategy. Through hands-on application

of key theories and business research tools, you will gain skills in collecting and analysing data about the business environment (e.g., consumers and competitors) as well as its internal processes, and generate insights to help businesses create value through innovation, product development and process improvement. You will develop skills in conducting business research, working in team contexts and using powerful visualisation tools to present complex business insights to professional audiences. This unit is the first of two business core units that form the foundation for further study across the breadth of business disciplines, introducing you to business capabilities to prepare you for the future world of work and ignite your career.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN501-(1-4) are the dissertation units for Higher Degree Research (HDR) students to write their thesis. Dissertation requirements are to be agreed with the academic supervisory team in accordance with scheduled HDR student milestones.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN501-(1-4) are the dissertation units for Higher Degree Research (HDR) students to write their thesis. Dissertation requirements are to be agreed with the academic supervisory team in accordance with scheduled HDR student milestones.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN501-(1-4) are the dissertation units for Higher Degree Research (HDR) students to write their thesis. Dissertation requirements are to be agreed with the academic supervisory team in accordance with scheduled HDR student milestones.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN501-(1-4) are the dissertation units for Higher Degree Research (HDR) students to write their thesis. Dissertation requirements are to be agreed with the academic supervisory team in accordance with scheduled HDR student milestones.

BSN502 Methodology for Business Research

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online

Units

- SEM-1, SEM-2

BSN502 is designed to assist postgraduate research students to understand and deploy the fundamentals of methodology for business research. It is designed as a companion unit to Research Seminar, Quantitative Research Methods and Qualitative Research and Analytical Techniques. Through lecture content, workshop activities and additional readings you will establish the fundamental building blocks for planning and designing your own research and for evaluating the research of others.

BSN503 Research Seminar

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit is designed to assist students in the preparation of a research proposal. It is intended that this unit will provide a basis for future writing tasks required of students during their candidature (such as formal course milestones, ethics applications, and the final thesis). Through the structured tutorial activities and assessment items, students will have the opportunity to develop and refine their research proposal in light of feedback received throughout the semester.

BSN550 Responsible Enterprise

Pre-requisites	36 credit points of completed study or enrolment in BS39MJR-PHILNPS or BS11MJR-PHILNPS
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Excellent enterprises generate a profit, but also seek to achieve these economic benefits ethically and sustainably - thus minimising impact on people and planet. In this multidisciplinary business core unit, you will develop an applied understanding of ethical frameworks in business, and practise critical systems thinking and problem solving skills required for effective leadership in the future world of work. You will explore your own values in relation to Indigenous Australian, philosophical and psychological ethical perspectives. You will apply a values-based approach to conceptualising and addressing complex systems and business problems aligned with the United Nations Sustainable Development Goals (SDGs), spanning for-profit, not-for-profit, government and hybrid contexts. This unit informs further study across the breadth of business disciplines, developing business capabilities to prepare you for the future of business and ignite your career.

BVB101 Foundations of Biology

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Biology is the study of living things. But what is “living”? Cells are considered the basic structural unit of life, existing in diverse forms from simple single-celled microbes to complex multicellular organisms such as plants and animals. Using collaborative approaches in workshops and the laboratory you will investigate the diverse nature of cells and consider how they are built and powered and how they interact and reproduce. You will use the concepts developed in this unit to discuss more complex questions such as “are viruses alive” and “can we synthesise life”

BVB102 Evolution

Anti-requisites	NQB422
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Studying Evolution provides students with the fundamental basis for understanding biological patterns and processes from data sources spanning research from genomes to ecology and fossils. As stated by the famous biologist, Theodosius

Dobzhansky (1973), "nothing in biology makes sense except in the light of evolution". Evolution gives an overview of the nature of inheritance, biological variation, natural & sexual selection, adaptation and how these underpin biological diversity and the distributions of all species, both extinct and extant. The primary aim of the unit is to provide the context for you to be able to interpret any biological observation in an evolutionary framework in fields as diverse as conservation and medical genetics. As a foundational unit, knowledge and skills that you gain will be built upon in subsequent units in the biology major as well as in Wildlife Ecology, Environmental Science and Biotechnology & Genetics minors.

BVB201 Biological Processes

Pre-requisites	BVB101 or (BVB203 and admission to ST20)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

An understanding of processes which occur at the cellular level is fundamental to all aspects of biology. Using a combination of theoretical and laboratory-based approaches to enquiry you will explore the biochemical pathways and processes that facilitate biological function and the genetic mechanisms that control them.

BVB202 Experimental Design and Quantitative Methods

Pre-requisites	SEB113 or MAB101 or MAB141 or MXB101 or MXB107
Equivalent s	NQB421
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

The skills to design, carry out, analyse and interpret experiments are fundamental for scientists. This is particularly important for students of biology and environmental science since environmental variability is an inherent element of the systems that they will need to understand. This unit builds on first year knowledge of the theory of science and the scientific method developed in first year. With field trips it provides real world experience in problem assessment, formulation of testable hypotheses, and experimental design. These critical skills are used and further developed in later units.

BVB203 Plant Biology

Pre-requisites	(BVB101 and BVB102 and BVB201) or admission to ST20
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is a foundational plant biology unit addressing the core concepts of plant function, including structural, physiological and molecular

aspects, from the cell to the whole plant. This subject will outline and teach the skills required for measuring and monitoring plant function and an appreciation of how they are influenced by the environment and applied by industry. It introduces the fundamentals of plant physiology, biochemistry and molecular biology in such a way to enable you to understand how plants grow, develop and interact with their environment, and will also be valuable for lifelong appreciation of the potential of agriculture and its contribution to industry and humanity.

BVB204 Ecology

Pre-requisites	BVB101 or BVB102 or EVB102 or (admission to ST20 and completion of 96 credit points)
Equivalent s	NQB321
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Ecology is the study of the factors and interactions that influence the distribution and abundance of organisms. It is a key component of biology and is central to managing species and ecosystems. This unit examines the major concepts of ecology and develops the conceptual foundation for later subjects in the biology major and minors.

BVB212 Drug Action

Credit Points	12
---------------	----

Units

Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Introduction to the classification of bioactive compounds according to the various physiological systems they influence, such as the cardiovascular system, nervous system and respiratory system. The principles of drug action will be discussed, including the concepts of drug specificity, potency and efficacy. These principles will facilitate a basic understanding of toxicology, the development drug tolerance, addiction and withdrawal. Taught in the context human and veterinary medicine, as well as the use of drugs in sport, as poisons, or as food or environmental contaminants, it complements 'Drug Discovery and Design' offered in the same semester. The way in which chemical compounds affect biological cells and systems is fundamental to the study of medicines and toxins. The pharmaceutical, nutraceutical and pesticide industries are major economic forces which offer significant employment opportunities in science.

BVB214 Vertebrate Life

Pre-requisites	BVB101 or BVB102 or EVB102 or admission to ST20
Equivalent s	NQB423
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1

External	- XCH-1, XCH-2
-----------------	----------------

Vertebrates are often the focus of conservation campaigns and environmental impact assessments. Thus, any graduate wishing to pursue a career that involves the biological or environmental sciences must have a deep knowledge of this charismatic group of animals, which includes our most recent ancestors and us. The aim of this unit is for you to gain a deeper understanding of vertebrate evolution, morphology, taxonomy, physiology and ecology through a series of lectures, practicals and field work. The unit will cover evolution of the major groups of vertebrates, considering the fossil record and plausible explanations for major changes such as 'mass extinctions'. Taxonomy and systematics of the group will be introduced. Physiological systems will be described and consideration given to how they work and operate in an integrated manner. This mid-level unit will give you skills relevant to the biology major, wildlife ecology minor and environmental science major.

BVB221 Nature's Pharmacy

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Fundamental concepts and practical skills relevant to plant medicinal biology, chemistry, biochemistry, and pharmacology. It introduces the

general classes of medicinal compounds, their biosynthesis and function, their purification and analysis, and clinical applications. The unit introduces the pharmacology of specific biologically derived compounds, thereby building upon the knowledge of drug action developed in BVB212. It provides a deeper understanding of the broader technical, social, cultural, and legal challenges in the transition from discovery to application via focused evaluation of existing/emerging global health challenges. The ability to critically evaluate scientific literature, synthesise information, and write effectively is further developed in this unit. This unit develops a broad range of knowledge and practical skills of direct relevance to natural product chemistry, plant science, botany, and allied health.

BVB225 Ecosystems and Biodiversity

Pre-requisites	BVB101 or BVB102 or EVB102 or BZB210 or admission to ST20
Anti-requisites	BVB223, BVB224
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

There are over one million species catalogued, and several million yet to be described. Familiarity with biological diversity and the role species play within ecosystems is central to biological and evolutionary research, and for developing solutions to sustain

the environmental health of our planet. Australia has a largely unique flora and fauna, with a very high proportion of our plant and animal species found nowhere else. While it is impossible to cover every Australian plant and animal in a single unit, we will introduce some key elements of that diversity, with a focus on terrestrial ecosystems and the plants, insects and mammals which occur in them. For students enrolled in biology and environmental science majors this unit provides foundational knowledge to complement areas such as ecology and environmental monitoring; while for education majors the skills gained in creating collections forms a basis for teaching biology in both primary and secondary school.

BVB301 Animal Biology

Pre-requisites	BVB101 or BVB214 or BZB210 or (BVB201 and admission to ST20)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

An understanding of animal physiology is fundamental to studying the way that animals grow, develop, reproduce and respond to their environments. This unit has a focus on vertebrate physiology, but will include elements of invertebrate physiology. The unit builds on earlier studies of cells and genes, to explain how the animal functions as a

whole, and how different animals have evolved different senses and diverse physiological systems to cope with different environments. Finally, the unit will consider the relationship between animals and humans, placing the topic in a broader societal context. This knowledge will be useful to biology educators and those who wish to pursue further animal studies or research in wildlife, domestic, or companion animals.

BVB304 Integrative Biology

Pre-requisites	BVB202 and BVB203 and BVB301
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This Capstone unit requires you to think critically about an important problem in biological sciences and to integrate the knowledge gained through earlier units to provide an effective solution. You will conduct a research project, applying your knowledge of quantitative techniques and experimental design, to answer a specific challenge. Through critical analysis and reflection on your work and that of your peers, you will gain a deeper understanding of the scientific method and will become confident in applying it. The unit will provide a foundation for future Honours studies, or higher degree research.

BVB305 Microbiology and the Environment

Pre-requisites	BVB201
Credit Points	12
Campus	Gardens Point and EXCHANGE
Availabilities	Gardens Point - SEM-1 XCH - XCH-1, XCH-2

The biology, evolution and ecology of microorganisms underpin critical, complex and, sometimes, harmful processes in almost every environment on earth, from oceanic vents to the animal gut, in the roots of plants and the health of soil, and even in your shower head. These fundamental biological processes are a rich resource for cutting-edge research and applications of biotechnology, including the growing field of synthetic biology. You will conduct original laboratory research and desktop analyses to explore, evaluate and communicate insights into core concepts in microbiology, their functional interactions in the environment, and their exploitation in agriculture, bioindustry and the built environment. Through this, you will build skills in project planning, design, conduct, analysis and communication to address real world applications and prepare you for a key area of post-graduate employment.

BVB311 Conservation Biology

Pre-requisites	BVB204
Equivalent s	NQB622
Credit Points	12
Campus	Gardens Point,

Units

	EXCHANGE and External
Availability	Gardens Point - SEM-1 External - XCH-1, XCH-2

The theory and practice of conservation biology is essential for maintaining viable populations of rare and threatened species and for maintaining essential ecosystem processes. In this unit, you will synthesise a diverse range of information including high quality scientific literature, apply field skills in biodiversity monitoring and prepare written reports that provide an incisive and decisive analysis of key conservation issues. Specific modules will train you to critically analyse the link, or lack of, between theory and application in current conservation management approaches. Scientific methods will be used to develop problem-recognition and problem-solving skills through fieldwork, data collection, analysis and reporting. This advanced unit is essential for anyone wanting to work in areas of wildlife management and conservation.

BVB313 Population Genetics and Molecular Ecology

Pre-requisites	BVB204 or (BVB201 and admission to ST20)
Equivalent	NQB521
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availability	Gardens Point - SEM-2 External - XCH-1, XCH-2

Understanding the dispersal and movement of genes in populations is fundamental to the management of invasive species, the management of fisheries and wild resources and the conservation of rare species. This unit will provide the theoretical and practical training required for practicing ecologists to use genetic techniques in theoretical and applied settings.

BVB317 Principles of Genomics and Biotechnology

Pre-requisites	BVB101 or (BVB201 and admission to ST20)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availability	Gardens Point - SEM-1 External - XCH-1, XCH-2

This unit will introduce students to the basic principles, core concepts and processes that underpin the topics of genomics and biotechnology. The cutting-edge innovations arising from these rapidly emerging and evolving areas have, and will continue to, transform and shape the world we live in with global impacts in human health, agriculture and the environment. The unit will build on the basic cell and molecular biology skills acquired in BVB101 and further develop theoretical knowledge and practical expertise in the cellular and molecular processes and techniques that are used to manipulate and exploit organisms (microbes, animals and plants). Recent technological advances such as gene editing will also be

covered in addition to important issues such as regulation and commercialisation of biotechnology process and products. The biotechnology industry is growing rapidly and graduate employment in this sector is expected to be in high demand.

BVB321 Invasion Ecology

Pre-requisites	BVB202 and BVB204
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-2

Invasive species cause substantial and costly negative effects to native ecosystems and threaten food security. An understanding of the ecological processes by which they are introduced, establish and spread in new regions is essential for their control. Invasive species are now so widespread that they will be encountered in some way in a wide range of careers in ecology and environmental science. Similarly, while pest species are typically dealt with within agro-ecosystems, managing and reducing large populations in a sustainable manner requires science and sophistication, and often similar ecological principles to dealing with invasive species. Integrating and extending work introduced in earlier units, you will learn the skills and concepts that are necessary to understand, analyse and manage pests and invasive species, and the processes of biological invasion.

BVB328 Applications in Biotechnology

Pre-requisites	BVB317 or BVB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Biotechnology underpins the manufacture of a wide variety of products on which society depends. Such products include pharmaceuticals, chemicals, fuels, and foods. With the major advances in biotechnology and the ability to engineer biological systems in recent decades, biotechnology offers the generation of better products at lower cost with reduced environmental impacts. As such, both established companies and start-ups are making a major impact on the global stage to deliver products that we use every day. You will learn about a variety of biotechnology applications from both a technical and a business perspective. Your learning will be contextualised with local and international biotechnology company case studies and you will perform an entire biotechnology process during practical classes. At the end of the unit you will have a deep understanding of the biotechnology industry and the technologies that underpin it as well as an awareness of the opportunities it offers.

BVB330 Synthetic Genomics

Pre-requisites	BVB317
Anti-requisites	BVB314, BVB327

requisites	
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The field of Synthetic Biology has emerged from decades of advances in DNA sequencing and editing technologies. Thanks to the increasing information available describing DNA sequence-function relationships, scientists can design and build new biological parts (like enzymes), new genetic programs (connecting multiple biological parts), and even new organisms. These products of synthetic biology are used to improve agricultural practices, reduce pollution, develop new therapeutics, and create new bio-based chemicals and materials. In this unit you will be introduced to bioinformatic tools for analysing DNA, and for designing new genetic circuits. You will apply this knowledge to design, edit and implement genetic programs *in vitro* and in live organisms, and develop data analysis skills.

BZB210 Biological Sciences

Anti-requisites	BVB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cells are the basic structural unit of life. They exist in diverse forms from simple single-celled microbes to complex multicellular organisms such as plants and animals. In this unit you will investigate the diverse

nature of cells and consider how they are built and powered and how they interact and reproduce. You will extend these foundation concepts to examine more complex problems involving molecular biology, plant and animal biology, and ecology.

BZB304 Biology and Environmental Science Research

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This Capstone unit requires you to think critically about an important problem in biological or environmental sciences and to integrate the knowledge gained through earlier units to provide an effective solution. You will conduct a research project, applying your knowledge of quantitative techniques and experimental design, to answer a specific challenge. Through critical analysis and reflection on your work and that of your peers, you will gain a deeper understanding of the scientific method and will become confident in applying it.

CAB201 Programming Principles

Pre-requisites	IFB104 or ITD104 or MZB126 or EGD126 or ENB246 or MXB103 or INB104 or MAB220 or EGB103
Anti-requisites	ITD121
Equivalent s	INB270, IND270
Credit Points	12

Units

Campus	Gardens Point, Online and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-2

This unit builds on the gentle introduction to programming provided in IFB104, EGB103 or MZB126. In those units students learn how algorithms are constructed by combining the logical structures of sequence, selection and iteration. Students also learn how functions can be used to abstract and reuse sections of code. These concepts are reinforced in this unit and extended with additional applications of abstraction necessary to combat complexity when building larger systems. Object-oriented principles are introduced where the program is structured around classes of objects that are identified from the real-world providing a high-level architecture that is better able to stand the test of time as requirements evolve throughout the lifetime of the system. This unit provides the foundation for the other more advanced and specialized programming units.

CAB202 Microprocessors and Digital Systems

Pre-requisites	((IFB104 or ITD104) and (IFB102 or ITD102)) or (EGB103 or MZB126 or MZB127 or EGD126)
Equivalent s	ENB244
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External

Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2
----------------	--

This unit introduces you to the components inside a computer and how these components work together. The design and development of modern digital electronic systems requires a knowledge of the hardware and software to program the system. This unit identifies design requirements and lets you develop embedded microcontroller-based system solutions. Practical laboratory exercises progressively expose features of a typical microprocessor; and explain how an embedded computer can interact with its environment. This provides a valuable foundation for further studies in areas such as robotics and networking.

CAB203 Discrete Structures

Pre-requisites	IFB104 or ITD104 or MZB126 or EGD126 or EGB103
Equivalent s	INB250
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

In trying to solve complex problems, a powerful approach is to transform the problem into a simpler model by abstracting away some of the less important details. Once in this more abstract form, powerful

mathematical techniques (developed over centuries) can be brought to bear. For computing related problems, the most relevant mathematical concepts and techniques come from the field of discrete mathematics, and include arithmetic, logic, set theory, graph theory and functions. This unit demonstrates how these mathematical concepts and techniques can be used to model and solve real-world problems. The unit also supports subsequent units: CAB301 where algorithms involving graphs are introduced and CAB402 where the mathematical notion of a function provides the basis for alternative programming paradigms.

CAB210 User Experience Fundamentals

Pre-requisites	IFB103 or INB103 or ITD103 or INB182 or EGB100 or ENB100 or EGB101
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

User experience (UX) means how a person feels when interacting with digital technology, like mobile applications, web services and games. This unit introduces user experience methods to study people's needs in a real-world context, and to evaluate the usability and experience with technologies. This unit is important to inform the design

and development of technologies that meet the needs of people who are going to use them and the context within which they will be used. A stronger understanding of user experience will provide students with an edge in the market place for jobs such as interaction designers, usability engineers, game designers, app developers, information architects, and user experience designers. This unit builds on the design thinking skills developed in IFB103, and it provides the foundation for advanced interaction design skills through unit CAB310.

CAB222 Networks

Pre-requisites	IFB102 or ITD102
Equivalent s	CAB303, INB251
Credit Points	12
Campus	Gardens Point and Online
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2

CAB230 Web Computing

Pre-requisites	IFB104 or ITD104 or MZB126 or EGD126 or EGB103
Equivalent s	INB271
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

The World Wide Web is the most important platform for software systems and an

integral part of modern life. Many companies owe their existence to the web, through applications deployed over the Internet using web protocols. All IT professionals require a good understanding of the web and its architecture, especially software developers and those tasked with maintaining and implementing web-based software systems. This unit is a technical introduction to modern web computing. You will design and implement clean and responsive user interfaces, taking account of accessibility and internationalisation. We will provide an introduction to JavaScript and you will use it throughout the semester, gaining practical experience with HTML, CSS and frameworks such as React on the client side, and node.js, Express and the node ecosystem on the server side. You will understand security threats and their mitigation and gain practical experience deploying an internet facing web server using HTTPS.

CAB301 Algorithms and Complexity

Pre-requisites	(CAB201 or ITD121)
Equivalent s	INB371
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit teaches you the

fundamental principles used to assess the efficiency of software algorithms, allowing you to distinguish solutions that can process large amounts of data or perform complex calculations effectively from those that run unacceptably slowly or not at all. In this unit you will examine a range of different algorithms, review the principles used to predict their efficiency and perform empirical measurements of specific algorithms to confirm the theoretical predictions.

CAB302 Software Development

Pre-requisites	CAB201 or INB270 or ITD121
Equivalent s	INB370
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit teaches you how to work effectively in a team to develop large-scale software systems. It includes principles of teamwork, modern software development methodologies and tools that are needed when working in a team on a large project.

CAB310 Interaction and Experience Design

Pre-requisites	CAB210
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1

Units

Online
- SEM-1
External
- XCH-1, XCH-2

External
- XCH-1, XCH-2

Online
- SEM-2

This is an advanced human-computer interaction unit focussed on the design and evaluation of emerging technologies for human use. Emerging technologies like robots, machine learning, and Internet of Things devices have the potential to disrupt how we work and live. Based on interaction design theories and methods, this unit focusses on how we design, prototype, and study how people experience such emerging technologies. Understanding how to design emerging technologies for human use will give students an edge in the market place for jobs as user experience professionals, IT developers, and interaction designers. The theories and methods introduced in this unit prepare students for a career in human-computer interaction research and development. This unit builds on design thinking skills from unit IFB103 and user experience research skills from unit CAB210 to design experiences with emerging technologies.

CAB320 Artificial Intelligence

Pre-requisites	(INB270 or CAB201 or ITD121 or CAB202) and (MZB151 or ENB246 or MZB126 or EGD126 or MXB103 or MXB100)
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1

This foundational unit introduces the basics of Artificial Intelligence (AI) ranging from Intelligent Search techniques to Machine Learning. AI strives to build intelligent entities as well as understand them. AI has produced many significant products; from AI chess champions to state of the art schedulers and planners. This unit introduces state representations, techniques and architectures used to build intelligent systems. It covers topics such as heuristic search, machine learning (including deep neural networks) and probabilistic reasoning. The ability to formalise a given problem in the language/framework of relevant AI methods (for examples, a search problem, a planning problem, a classification problem, etc) and understand a fast evolving field is a requirement for a range of graduate entry software engineer positions. This unit lays the foundations for further studies in Games, Robotics, Pattern Recognition, Information Retrieval, Data Mining and Intelligent Web Agents.

CAB330 Data and Web Analytics

Pre-requisites	CAB220 or DSB100 or CAB230 or IAB207
Equivalent s	INB342
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2

Data analytics has become a popular way to support decision-making by turning an organization's large collection of data into useful knowledge about their customers and business processes. Data analytics has direct applications in several fields such as social networks, business processes, search-engines, e-commerce, digital libraries, bioinformatics and web information systems. This unit provide fundamental knowledge and skills of data analytics to help with data-driven decision making. You will learn the different types of data mining techniques to apply classification, clustering and association mining. You will learn how the processing can be applied to text and web usage data. This is an introductory unit and the knowledge and skills developed in this unit are relevant to all IT professionals. It builds on CAB220 - Fundamentals of Data Science which introduces the basic concepts of data manipulation.

CAB340 Cryptography

Pre-requisites	CAB203 or MXB102
Anti-requisites	INB355
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

The dependence of modern society on remote electronic data transmission and storage makes it an essential requirement that this data be secured, both against unwanted disclosure and malicious alterations. This unit provides a self-contained introduction to the field of cryptography, from historical roots and attacks, to the mathematical principles that underpin the workings of the modern ciphers most commonly in use for securing internet communications. The focus of this unit is on a grounded understanding of cryptographic designs and their limitations, which in turn inform how they are used in practice.

CAB401 High Performance and Parallel Computing

Pre-requisites	CAB301 or IFN505 or IFN564
Equivalent s	INB375
Credit Points	12
Campus	Gardens Point, Online and External
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1

Building on your skills in "sequential" programming, this unit teaches you the tools and techniques needed to exploit multi-processor computer systems to achieve dramatic performance improvements for computationally intensive problems. This unit gives you both an understanding of why future computer hardware will be increasingly parallel, the

challenges this poses for software development as well as a set of practical skills in creating high-performance programs using today's best tools and techniques.

CAB402 Programming Paradigms

Pre-requisites	(CAB201 or ITD121) and (CAB203 or CAB220 or DSB100)
Credit Points	12
Campus	Online, EXCHANGE, Gardens Point and External
Availabiliti es	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This advanced unit exposes you to special-purpose programming languages that operate under different paradigms than the conventional "imperative" languages you have used in the course so far. This unit will expose you to new ways of thinking about and expressing software solutions, exploring advanced programming language constructs, principles for the sound design of new languages and how they evolve. The unit provides both a deep theoretical foundation for programming languages by abstracting them to basic mathematical forms as well as showcasing practical application of those advanced principles for software development in the real world.

CAB403 Systems Programming

Pre-requisites	(CAB201 or MZB126 or EGB103 or ITD121) and CAB202
Anti-	INN365

requisites	
Equivalent s	INB365, ITB706, ITB745
Credit Points	12
Campus	Gardens Point, EXCHANGE, Online and External
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Most of our other Computer Science units focus on high-level applications programming. Applications programmers are insulated from the low-level intricacies of the underlying hardware by making use of services provided by the operating system such as threads, virtual memory, file systems and device drivers. This unit focuses on Systems Programming, where the programmer can't necessarily rely on high level services provided by the operating system and must interact directly with the underlying hardware. Systems software is either part of the operating system or software that operates at a similar level. This unit aims to give you practical programming skills for developing systems level applications and services.

CAB420 Machine Learning

Pre-requisites	CAB201 or CAB202 or ITD121 or IFN501 or IFN556 or Admission to (EN50 or EN55 or EN52)
Credit Points	12
Campus	Gardens Point, EXCHANGE, Online and External
Availabiliti	Gardens Point

Units

es	- SEM-1
	Online
	- SEM-1
	External
	- XCH-1, XCH-2

Machine learning is the science of getting computers to act without being explicitly programmed. This unit provides you with a broad introduction to machine learning and its statistical foundations. Topics include: definition of machine learning tasks; classification principles and methods; dimensionality reduction/subspace methods; graphical models; and deep learning. Application examples are taken from areas such as computer vision, finance, market prediction and information retrieval.

CAB430 Data and Information Integration

Pre-requisites	CAB220 or DSB100 or CAB201 or ITD121
Credit Points	12
Campus	Online, EXCHANGE, Gardens Point and External
Availability	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

With the rapid growth of data and digital repositories, there is an increasing awareness of benefits of data warehousing and mining techniques for Business Intelligence. Data warehousing represents an ideal vision of maintaining a central digital repository of all organizational data that can be smartly used through data mining tools to maximize business profits. Data warehousing is recognized by

the IT industry as a dominant technique for applications of databases in the future. This unit discusses the concepts, architectures and methods of data warehousing and mining techniques, e.g., data warehouse architecture and schema, data cubes and OLAP (on-line analytical processing), ETL (Data Extraction, Transformation and Loading) process, data quality, association analysis and classification. It also focuses on the topics and techniques that are most promising for building and analyzing multidimensional data for efficiently organizing data warehouses and mining tools.

CAB431 Text Analysis and Web Search

Pre-requisites	CAB201 or ITD121
Credit Points	12
Campus	Gardens Point and Online
Availability	Gardens Point - SEM-1 Online - SEM-1

With the explosion of information resources on the Web, social media and corporate intranets, there is an imminent need for advanced technologies to help people deal with big text data. There are many practical applications of Web search and text analysis in the areas such as classification of news stories, academic papers or medical records; spam or junk email filtering, understand customers opinion or behaviors through their feedback in online-systems or social media,

customer service promotion etc. Therefore, it is urgent for IT developers, Web analysts, information management consultants, or Web development & support officers to understand NLP (Natural Language Processing) techniques, popular text processing models (such as Web search engine, information retrieval models); advanced text mining techniques (such as supervised methods for information filtering or classification and unsupervised method for topic modelling); and future directions in Web Intelligence.

CAB432 Cloud Computing

Pre-requisites	CAB301 or CAB302 or INB370 or INB371 or IFN666
Equivalent s	INB356
Credit Points	12
Campus	Gardens Point, EXCHANGE, Online and External
Availability	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Cloud Computing is among the most important developments in the IT industry in recent years, and one which has received enormous attention. Cloud is a natural progression from earlier trends in service and infrastructure outsourcing and virtualisation, but is distinguished by its elasticity and scale: service and infrastructure provisioning may change rapidly in response to variations in demand, allowing

clients to cater for unexpected spikes in load without tying up capital in expensive and potentially underutilised assets. Cloud services and technologies are becoming increasingly diverse and sophisticated, moving rapidly from the original 'bare metal' offerings and providing a rich set of options and APIs. This unit provides a technically oriented introduction to Cloud Computing, giving you experience in developing modern cloud applications and deploying them to the public clouds of the major vendors.

CAB440 Network and Systems Administration

Pre-requisites	CAB222 or CAB303 or INB251
Credit Points	12
Campus	Online, EXCHANGE, Gardens Point and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit builds on your existing knowledge of networks and systems administration. You will be introduced to technical knowledge and practical skills for managing network administration, including: (1) configuring addressing and routing with physical/virtual network devices, (2) installing/maintaining/troubleshooting network services on a Unix-like platform, and (3) preventing vulnerabilities/threats to network systems and proposing mitigation strategies to secure network

infrastructure. CAB441 Network Security builds on this unit by extending your network administration skills to secure network application services.

CAB441 Network Security

Pre-requisites	(IFB240 or CAB240 or INB255) and (CAB440 or INB351)
Anti-requisites	INN251
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

As a system administrator or information security professional you are expected to have an in depth understanding of a variety of network security controls, principles and analysis tools and their use in a wider cybersecurity context. In this unit you will learn these tools by building and testing a secure network in a virtualised environment in accordance with cybersecurity principles.

CCB101 Media Issues and Debates

Equivalent s	KCB102
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This introductory unit addresses key concepts, myths, controversies and debates surrounding the

relationship between media and contemporary society. The media and communication theories and ideas about the role of communication in contemporary society and culture are foundational for communication professionals. The unit aids you to critically examine topics such as the relationship between media content and violence, and how media may or may not affect social behaviours. In doing so, the unit investigates the historical foundations, cultural context and factual accuracy of a series of 'common sense' arguments regarding how different kinds of media have or have not affected the way our society functions. The unit provides a critical approach to media scholarship about the role of media in society that underpins more advanced units such as Social Media, Self and Society and Communication Research Methods.

CCB102 Multi-Media Design

Equivalent s	KJB103, KCB304, KJB211
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2 External - XCH-1

Visual communication techniques are essential in capturing the attention of an increasingly visually literate society. Understanding how to design well is growing in importance in a society that is time poor and overloaded with

competing sources of media. You will learn how to apply design theory in a variety of visual communication contexts relevant to the journalism, media and communication industries. You will gain an understanding of the role of design as a communication tool in a variety of outputs including newspapers, magazines, online publications and other integrated communication resources. It introduces the theory of design, its formats, the use of desktop publishing software, the principles of typography and design and the development of stakeholder relationships (photographers, printers etc.).

CCB200 Digital Platforms

Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

It is critical for communication professionals to understand the cultural, political, economic and technical contexts from which contemporary digital platforms have emerged and in which they are continuing to evolve. This unit focuses on the core concepts that have shaped digital media's brief history, differentiating digital media from older media forms. It develops students' contextual understanding of digital platforms by exploring how key concepts in digital media map onto specific platforms and their audience and user

cultures. CCB200 forms the foundation for more detailed analyses of digital media in future years.

CCB201 Australian Media

Pre-requisites	Completion of 48 credit points of study
Equivalent s	KCB104
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit provides you with the skills to critically engage with media as a user and industry participant. By developing your current awareness of contemporary debates and developments in Australian media, you will learn about how national and local media are shaped by a range of factors including globalising media markets, questions of national culture and identity, and digital disruption. As such, the unit introduces the theories that seek to improve media industry visibility and its social and economic importance. It also addresses public policy strategies for critically assessing industry, government, citizen and consumer perspectives around media industry. A critical understanding of media institutions helps to inform ethical media choices and professional communication practices. Current awareness of technological, economic and political drivers and impediments for change introduces you to leaders, change agents and

experienced practitioners in a range of media sectors.

CCB203 Strategic Speech Communication

Equivalent s	KCB103, KCD103, KCB213
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This unit addresses the theory and practice of speech and interpersonal communication. It introduces theories of language, rhetoric and persuasion which are interrelated to promote understanding and development of your communication skills. Classroom practice in simulated work situations will enhance the leadership abilities needed to become articulate presenters in a range of contexts, including personal presentations both live and mediated. The ability to present a spoken message is a highly desirable skill in education, employment and life. Across a range of fields and professions, graduates will have many opportunities to speak a message in different modes. Taking an audience-centred approach to speaking, this unit focuses on creating and analysing persuasive messages. The unit is designed to assist you in becoming an effective oral communicator and discerning listener.

CCB204 Communication Planning and Practice

Pre-requisites	CYB101 or KCB101 or KJB102
Equivalent s	KCB205
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2 External - XCH-1

This unit examines communication between individuals and teams in organisational settings. It aids in developing practical skills needed for effective communication such as analysis, communication proposal development, formal document production and professional presentation. The unit provides theoretical concepts that shape effective communication in professional settings, the experience to apply these skills and develop a strategic communication proposal for an external client, and the ability to understand professional teamwork and effective internal communication. The strategic process of planning, implementing and evaluating effective communication will prepare you for a career as a strategic communicator both in internal and external contexts.

CCB301 Communication Research Methods

Pre-requisites	Completion of 96 credit points of study
Equivalent s	KCB105, KCB334

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1

This unit provides critical knowledge for the evaluation of complex media issues by introducing you to key research perspectives and methods and to the principles of research ethics. It involves qualitative and quantitative research methods, such as surveys, content analysis, interviews, focus groups, and ethnography, which are addressed in both traditional and contemporary digital formats. The research process (define problem, collect relevant information, analyse information, formulate conclusions/outcomes) underlies many decisions that confront communication professionals. In this unit you will learn how to ensure your decisions are made based on the most relevant and rigorous data available. Throughout the unit you will design research, analyse results and present conclusions and recommendations. You will develop critical skills in investigating media issues through qualitative and quantitative research, thus becoming knowledgeable consumers of media information.

CCB302 Digital Media Analytics

Pre-requisites	Completion of 96 credit points of study
Credit Points	12
Campus	Kelvin Grove, Online and

	External
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2 External - XCH-1

This advanced level unit equips you with critical understanding and skills in contemporary computational research methods as they are applied to digital content, platforms and networks. From computational analyses of 'big social data' to close qualitative analysis of digital media platforms and practices, the approaches, methods and tools that are grounded in and suitable for the study of digital media are expanding and evolving rapidly. This unit aims to provide you with critical understanding and practical skills in how to select and implement contemporary digital approaches to the collection, analysis and interpretation of various forms of emerging communication data, such as social media content (both textual and visual) and geodata.

CCB303 Digital Media Project

Pre-requisites	Completion of 168 credit points of study
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an environment in which to develop your prior knowledge of digital media and/or communication theories, technologies, industries, and practices by working on a significant digital media project

or series of projects. Content creation, project management, collaborative work, and critical reflection are extremely important in the digital media and communication industries. You will develop these skills and apply them to a real-world project or series of projects, the scope of which will be determined in collaboration with team members and academic staff. This is a capstone unit in which your development of the aforementioned project/s—which may take the form of industry, research, and/or corporate-based project/s—will work to advance your future employability. The project/s may involve social media analytics, digital content creation, industry reports, interaction design, and data collection and analysis.

CCN102 Social Media Storytelling

Equivalent s	CCQ102
Credit Points	6
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP03A, FP08A

Effective communication has essentially always been about telling compelling stories. As a digital communication specialist it is critical that you are able to craft effective messages to reach and engage your target audiences across multiple platforms and in a variety of formats.

CCN103 Debates in Digital Culture

Equivalent s	CCQ103
Credit Points	6
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP03A, FP08A

This unit addresses key debates and different perspectives about the role and impacts of digital technologies on contemporary culture and society. As such, the unit develops your academic skills to assess, draw on and contribute to scholarly research in the context of such debates. Issues such as the role of social media, filter bubbles, echo chambers and the changing nature of power will be focussed on. The ability to consider different perspectives and draw on current research to discuss the debates around digital technologies and their impact is crucial for critically informed communication professionals.

CCN104 Visualising Data

Pre-requisites	CCN106 or CCQ106
Anti-requisites	DVB302, DXB502
Equivalent s	CCQ104
Credit Points	6
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP09A

Knowing how to make sense of data for diverse audiences, through appropriate visual representation, is a key skill for contemporary communication professionals. This unit is included early in the program

to teach you some fundamental knowledge and skills in data visualisation.

CCN105 The Power of Platforms

Equivalent s	CCQ105
Credit Points	6
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP09A

It is critical for communication professionals to have an understanding of how the communication and media industries are disrupted and transformed by the power and influence of digital platforms. This unit addresses how platforms have changed media industry business models, content creation and distribution, as well as a deep exploration of the specifics of platforms and their audience and user cultures. As a digital communication professional the knowledge and skills developed in this unit will be essential for you to be effective in this digital media environment.

CCN106 Introduction to Social Media Analytics

Equivalent s	CCQ106
Credit Points	6
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP03A, FP08A

Knowing how to analyse social media data sets by asking questions and making decisions that improve content and engagement is a fundamental skill for

Units

contemporary communication professionals. It is included in the early part of the program to develop your foundational data analytics knowledge and skills.

CCN107 Coding for Communicators

Pre-requisites	CCN106 or CCQ106
Equivalent s	CCQ107
Credit Points	6
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP09A

It is essential that future focused communication professionals have both an understanding of how computational technologies transform the world of communication, and the hands-on skills to develop code. This unit provides a foundational understanding of computational thinking .

CCN108 Social Media Strategy Project

Pre-requisites	Completion of 24 credit points of CCN- or CCQ-coded units including (CCN104 or CCQ104) and (CCN106 and CCQ106)
Equivalent s	CCQ108
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP06A, FP11A

This Work Integrated Learning unit enable you to synthesise your knowledge and skills developed in earlier foundational units in the program and to develop core knowledge and skills essential for professional practice in the

Communication industries. It provides an opportunity to work collaboratively as a team to respond to a real client brief by applying the key principles of effective social media management to the development of a social media strategy.

CCN201 The Digital Creative Economy and the Future of Work

Equivalent s	CCQ201
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP04A, FP08A

This unit explores how changes in the broader digital creative economy impact on media and communication industries and the working lives of communication professionals. To develop effective communication strategies and pursue work opportunities, communication professionals need to have an understanding of how the new digital creative economy operates, emerging trends in the digital economy, and how to thrive in this environment as a digital communication professional. As such, the unit provides an advanced and critical understanding of the evolution of the broader digital creative economy, how it disrupts the communication and media industries, and the specific implications for the future of digital communication professionals.

CCN202 Automating the Digital World

Pre-requisites	((CCN112 or CCQ112) OR ((CCN103 or CCQ103) and (CCN105 or CCQ105)))
Equivalent s	CCQ202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP04A

This unit introduces current and advanced research on the impacts and ethical implications of automation for communication, media, and society at large. As such, the unit provides you with advanced knowledge and understanding of how Artificial Intelligence (AI), algorithms and other forms of automation are transforming communication, the media and communication industry and the wider society. It also addresses the ethical issues surrounding how these technologies are used. It is critically important that digital communication professionals have a future-focused orientation towards embryonic and emerging technologies that are likely to further disrupt media and communications environments.

CCN203 Communication Research and Problem Solving

Pre-requisites	Completion of 48 credit points of CCN- or CCQ-coded units
Equivalent s	CCQ203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP10A

This foundational unit introduces traditional and emerging academic research principles, methods and approaches, and aids you in the design and planning of a research project relevant to the digital communication field. You will develop a project proposal, demonstrate awareness of ethical research practice, and plan for your capstone project. As a communication professional, you will frequently be called upon to undertake research projects and generate innovative solutions to complex problems. This unit provides you with a strong basis that you will then implement in the capstone project units:

CCN301 Digital Communication Project 1 or
 CCN302 Digital Communication Project 2 and
 CCN303 Digital Communication Project 3.
 Note: Students in the Graduate Diploma in Digital Communication should undertake this unit if they intend to articulate into the Master of Digital Communication and commence their Digital Communication Project in the following semester.

CCN204 Audience Analytics

Pre-requisites	(CCN104 or CCQ104) and (CCN106 or CCQ106) and (CCN107 or CCQ107)
Equivalent s	CCQ204
Credit Points	12
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - FP08A

This unit focuses on developing your critical understanding of media audience and the fundamental theoretical frameworks, methods and metrics for identifying and measuring it. Digital technologies have transformed the way communicators engage with and analyse diverse media audiences. The unit will aid you in recognising audiences by means of descriptive and inferential statistics. An applied and critical understanding of audience analytics is crucial for communication professionals. This unit builds upon and deepens the ideas and methods for audience analysis introduced in CCN106 Introduction to Social Media Analytics. The methods and techniques explored in this unit also complement CCN203 Communication Research and Problem Solving.

CCN205 Data-Driven Storytelling

Pre-requisites	CCN104 or CCQ104
Anti-requisites	DVB302, DXB502
Equivalent s	CCQ205
Credit Points	12
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - FP10A

This unit examines visual communication for information and the application of design principles for effective information design, especially visual data stories across various contexts and audiences. Understanding and

engaging with the ever-growing quantities of data is a challenge for both organisations and individuals. Increasingly, experts are required to not only manipulate and evaluate this data but also to identify and communicate it within, to stakeholders, clients, users, community groups, etc. The effective visual communication of those stories in the data is a design process informed by advanced principles of information design and is critical for audience engagement. Data-driven storytelling is an advanced visual information design unit.

CCN206 Communicating with Bots

Pre-requisites	CCQ107 or CCN107
Equivalent s	CCQ206
Credit Points	12
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - FP05A

This unit introduces you to the development and use of artificial intelligence (AI) and bots as effective tools for communication planning and execution. It examines the impact of such technologies on communication planning and practice, aiding you in developing your own bots. The unit provides the hands-on experience of applying technology to develop bots that algorithmically communicate via social media platforms. Communication professionals need to understand how to use emerging technologies such as AI to innovatively engage with

their users and audiences. Bots, generally defined as “a computer program that performs automatic repetitive tasks”, and other technologies in the field of AI are changing the way communication is planned and executed, and how stories are told and evolve across social media platforms.

CCN301 Digital Communication Project 1

Pre-requisites	Completion of 72 credit points of CCN or CCQ coded units including CCN203 or CCQ203
Equivalent s	CCQ301-2
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP10A

Digital Communication Project 1 is a capstone project unit that allows you to integrate and apply advanced knowledge of digital communication theory, methods, principles and skills in the context of a significant digital communication project. The unit requires you to implement a substantial and appropriately scoped project that can take various forms including research and/or an industry-related partner project. Supported by supervisors, you will develop and execute a previously designed and approved project. CCN203 Communication Research and Problem Solving is a prerequisite for this unit as you design and plan your project in that unit.

CCN302 Digital Communication Project 2

Pre-requisites	Completion of 72 credit points of CCN or CCQ coded units including CCN203 or CCQ203
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP10A

Digital Communication Project 2 is the first of two 24-credit-point capstone project units that allow you to integrate and apply advanced knowledge of digital communication theory, methods, principles and skills in the context of a significant digital communication project. The unit requires you to implement a substantial and appropriately scoped project that can take various forms including research and/or an industry partner project. Supported by supervisors, you will develop and execute a previously designed and approved project. CCN203 Communication Research and Problem Solving is a prerequisite for this unit as you design and plan your project in that unit. To complete the full 48-credit-point capstone project requires you to also enrol in and complete CCN303 Digital Communication Project 3 in a subsequent semester.

CCN303 Digital Communication Project 3

Pre-requisites	CCN302
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FP05A, FP10A

Digital Communication Project

3 is the second of two capstone project units that allow you to draw on and apply the knowledge and skills developed throughout the Master program. This unit enables you to finalise the project commenced in CCN302 Digital Communication Project 2. It provides further opportunity to integrate and apply the advanced knowledge of digital communication theory, methods, principles and skills in the context of research or professional practice and to professionally present the findings of your project.

CCQ102 Social Media Storytelling

Equivalent s	CCN102
Credit Points	6
Campus	Online and QUT Online
Availabilities	Online - SES1A, SES3A

This unit introduces the basic concepts, frameworks and techniques for effective storytelling and communication, via social media platforms. It examines how audiences engage with stories that unfold across multiple platforms. Additionally, it explains how to craft effective messages as compelling stories for target audiences, ultimately, the aim of effective communication. As a digital communication specialist, it is critical that you are able to reach and engage your target audiences, across multiple platforms, and in a variety of formats.

CCQ103 Debates in Digital Culture

Equivalent s	CCN103
Credit Points	6
Campus	Online and QUT Online
Availabilities	Online - SES2A, SES4A

This unit addresses key debates and different perspectives about the role and impacts of digital technologies on contemporary culture and society. As such, the unit develops your academic skills to assess, draw on and contribute to scholarly research in the context of such debates. Issues such as the role of social media, filter bubbles, echo chambers and the changing nature of power will be focussed on. The ability to consider different perspectives and draw on current research to discuss the debates around digital technologies and their impact is crucial for critically informed communication professionals.

CCQ104 Visualising Data

Equivalent s	CCN104
Credit Points	6
Campus	Online and QUT Online
Availabilities	Online - SES2B, SES4B

This foundational unit provides you with some fundamental knowledge and skills in data visualisation, such as design, techniques and methods for the visual communication of complex datasets. To produce the simplest bar graph and scatter plot to highly complex network diagrams requires an

understanding of the principles of visual communication and data analytics. Across the communication and media industries there is a growing demand for communication specialists to be able to effectively communicate complex datasets to non-specialist audiences. Knowing how to make sense of data for diverse audiences, through appropriate visual representation, is a key skill for contemporary communication professionals.

CCQ105 The Power of Platforms

Equivalent s	CCN105
Credit Points	6
Campus	Online and QUT Online
Availabilities	Online - SES1A, SES3A

It is critical for communication professionals to have an understanding of how the communication and media industries are disrupted and transformed by the power and influence of digital platforms. This unit addresses how platforms have changed media industry business models, content creation and distribution, as well as a deep exploration of the specifics of platforms and their audience and user cultures. As a digital communication professional the knowledge and skills developed in this unit will be essential for you to be effective in this digital media environment.

CCQ106 Introduction to Social Media Analytics

Equivalent s	CCN106
Credit Points	6
Campus	Online and QUT Online
Availabilities	Online - SES1B, SES3B

Knowing how to analyse social media data sets by asking questions and making decisions that improve content and engagement is a fundamental skill for contemporary communication professionals. It is included in the early part of the program to develop your foundational data analytics knowledge and skills.

CCQ107 Coding for Communicators

Equivalent s	CCN107
Credit Points	6
Campus	Online and QUT Online
Availabilities	Online - SES1B, SES3B

It is essential that future focused communication professionals have both an understanding of how computational technologies transform the world of communication, and the hands-on skills to develop code. This unit provides a foundational understanding of computational thinking. It provides a hands-on approach to the field of computational communication, including how to use and create programs written in Python; to program Python for automating data collection; and to collect, manage, process and analyse the digital traces of human online

communication.

CCQ108 Social Media Strategy Project

Pre-requisites	Completion of 24 credit points of CCQ- or CCN-coded units including two of the following units (CCQ104 or CCN104, CCQ106 or CCN106, CCQ107 or CCN107)
Equivalent s	CCN108
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES2, SES4

This project-based unit enables you to synthesise social media management skills acquired in earlier foundational units and to gain core knowledge and skills essential for professional practice in the Communication Industries. It provides an opportunity to work collaboratively as a team to respond to a social media management challenge scenario by applying the key principles of effective social media management to the development of a social media strategy.

CCQ201 The Digital Creative Economy and the Future of Work

Equivalent s	CCN201
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES1, SES3

This unit explores how changes in the broader digital creative economy impact on media and communication industries and the working lives

of communication professionals. To develop effective communication strategies and pursue work opportunities, communication professionals need to have an understanding of how the new digital creative economy operates, emerging trends in the digital economy, and how to thrive in this environment as a digital communication professional. As such, the unit provides an advanced and critical understanding of the evolution of the broader digital creative economy, how it disrupts the communication and media industries, and the specific implications for the future of digital communication professionals.

CCQ202 Automating the Digital World

Equivalent s	CCN202
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES1, SES3

This unit introduces current and advanced research on the impacts and ethical implications of automation for communication, media, and society at large. As such, the unit provides you with advanced knowledge and understanding of how Artificial Intelligence (AI), algorithms and other forms of automation are transforming communication, the media and communication industry and the wider society. It also addresses the ethical issues surrounding how these technologies are used. It is

critically important that digital communication professionals have a future-focused orientation towards embryonic and emerging technologies that are likely to further disrupt media and communications environments.

CCQ203 Communication Research and Problem Solving

Pre-requisites	Completion of 48 credit points of CCN- or CCQ-coded units
Equivalent s	CCN203
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES2, SES4

This foundational unit introduces traditional and emerging academic research principles, methods and approaches, and aids you in the design and planning of a research project relevant to the digital communication field. You will develop a project proposal, demonstrate awareness of ethical research practice and plan for your capstone project. As a communication professional, you will frequently be called upon to undertake research projects and generate innovative solutions to complex problems. This unit provides you with a strong basis that you will then implement in the capstone project unit, Digital Communication Project. Note: Students in the Graduate Diploma in Digital Communication should undertake this unit if they intend to articulate into the Master of Digital

Units

Communication and commence their Digital Communication Project in the following semester.

CCQ204 Audience Analytics

Pre-requisites	(CCQ104 or CCN104) and (CCQ106 or CCN106) and (CCQ107 or CCN107)
Equivalent s	CCN204
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES1, SES3

This unit focuses on developing your critical understanding of media audience and the fundamental theoretical frameworks, methods and metrics for identifying and measuring it. Digital technologies have transformed the way communicators engage with and analyse diverse media audiences. The unit will aid you in recognising audiences by means of descriptive and inferential statistics. An applied and critical understanding of audience analytics is crucial for communication professionals. This unit builds upon and deepens the ideas and methods for audience analysis introduced in CCN106 Introduction to Social Media Analytics. The methods and techniques explored in this unit also complement CCN203 Communication Research and Problem Solving.

CCQ205 Data-Driven Storytelling

Pre-requisites	CCQ104 or CCN104
Anti-requisites	DXB502

Equivalent s	CCN205
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES2, SES4

This unit examines visual communication for information and the application of design principles for effective information design, especially visual data stories across various contexts and audiences. Understanding and engaging with the ever-growing quantities of data is a challenge for both organisations and individuals. Increasingly, experts are required to not only manipulate and evaluate this data but also to identify and communicate it within, to stakeholders, clients, users, community groups, etc. The effective visual communication of those stories in the data is a design process informed by advanced principles of information design and is critical for audience engagement. Data-driven storytelling is an advanced visual information design unit.

CCQ206 Communicating with Bots

Pre-requisites	CCQ107 or CCN107
Equivalent s	CCN206
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES2, SES4

This unit introduces you to the development and use of artificial intelligence (AI) and bots as effective tools for communication planning and

execution. It examines the impact of such technologies on communication planning and practice, aiding you in developing your own bots. The unit provides the hands-on experience of applying technology to develop bots that algorithmically communicate via social media platforms. Communication professionals need to understand how to use emerging technologies such as AI to innovatively engage with their users and audiences. Bots, generally defined as “a computer program that performs automatic repetitive tasks”, and other technologies in the field of AI are changing the way communication is planned and executed, and how stories are told and evolve across social media platforms.

CCQ301 Digital Communication Project

Pre-requisites	Completion of 72 credit points of CCN or CCQ coded units including CCQ203 or CCN203
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES1, SES3

Digital Communication Project is a capstone project unit that allows you to integrate and apply advanced knowledge of digital communication theory, methods, principles and skills in the context of a significant digital communication project. The unit requires you to implement a substantial and appropriately scoped project that can take various forms including research and/or an industry-related partner project.

Units

Supported by supervisors, you will develop and execute a previously designed and approved project. As a 24-credit-point project completed across CCQ301-1 and CCQ301-2, it spans two QUT Online teaching periods (sessions). CCQ203 Communication Research and Problem Solving is a prerequisite for this unit as you design and plan your project in that unit.

CCQ301 Digital Communication Project

Pre-requisites	CCQ301-1
Equivalent s	CCN301
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES2, SES4

Digital Communication Project is a capstone project unit that allows you to integrate and apply advanced knowledge of digital communication theory, methods, principles and skills in the context of a significant digital communication project. The unit requires you to implement a substantial and appropriately scoped project that can take various forms including research and/or an industry-related partner project. Supported by supervisors, you will develop and execute a previously designed and approved project. As a 24-credit-point project completed across CCQ301-1 and CCQ301-2, it spans two QUT Online teaching periods (sessions). CCQ203 Communication Research and

Problem Solving is a prerequisite for this unit as you design and plan your project in that unit.

CDB101 Managing Media and Entertainment

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit develops a critical understanding of the social dimension of work in the media and entertainment industries. It introduces core concepts and debates, analytical frameworks, and the professional practices necessary to understand and employ effective management principles in the media and entertainment industries. The unit looks at management theories and practices, and how the often social and collaborative mode of work in the media and entertainment industries shapes managerial identities, roles and strategies. It also provides you with a broad overview of what obstacles and challenges to expect, such as managing teams and collaboration within and across diverse contexts in a rapidly evolving industry environment. Ultimately, it develops a solid theoretical foundation, essential for media and entertainment professionals that you will apply to authentic project management activities later in your course.

CDB201 Entertainment Strategy

Pre-requisites	(CDB101 and CYB105) or completion of 48 credit points of study
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This unit develops an advanced, critical, in-depth understanding of economic and labour aspects of the media and entertainment industries. It examines key strategies and trends of entertainment management and work across media platforms, locations and audiences. This unit will give you a broad overview of the financial and commercial elements behind how a wide variety of entertainment products are made, circulated, and consumed. You will learn about emerging business models, changing labour conditions, the tensions of creativity and commercialisation, the role of fans, and dealing with the day-to-day commercial requirements of a creative venture. You will learn the core strategies entertainment producers use to bring creative ideas to life as they strive for a sustainable outcome.

CDB202 Entertainment Cultures

Pre-requisites	CYB106 or completion of 96 credit points of study
Equivalent s	KXB201
Credit Points	12
Campus	Kelvin Grove, Online and

Units

	External
Availability	Kelvin Grove
	- SEM-2
	Online
	- SEM-2
	External
	- XCH-1

This unit examines the cultural conditions of the entertainment industries. It introduces theories and methodologies to understand the complex cultural dynamics of producing commercial culture in the entertainment industries. It offers a practical framework to make sense of the cultural factors that both shape and are shaped by industry operations and individual decision-making. It surveys the structural factors as well as the sociocultural practices that constitute the production and consumption of entertainment media. In order to navigate such complex conditions, you must understand the structural factors as well as the practices, values, and belief systems that constitute entertainment culture. For example, how does 'culture' shape how businesses and workers conceive of and conduct themselves in the entertainment industries; how industry understands and responds to emergent technologies, or how does race or gender identity shape workers' experiences of entertainment work?

CDB301 Critical Issues in the Entertainment Industries

Pre-requisites	Completion of 168 credit points of study
Credit Points	12
Campus	Kelvin Grove
Availability	Kelvin Grove

es	- SEM-1
----	---------

This capstone unit provides you with the advanced critical thinking skills needed for solving real world issues within the entertainment industries. It builds upon core knowledge and skills, and is designed to increase confidence in your analytical capacity as an entertainment professional. The unit addresses ethical, economic, and cultural issues, such as questions related to labour, political economy, and representation in the entertainment industries. Entertainment industries are defined by rapid and unpredictable change. As entertainment professionals, you will be able to independently assess, evaluate and act when faced with the industries' most pressing concerns. This unit allows you to critically engage with key theories and debates shaping entertainment industries. You will reflect on the complex relationships among history, economics, politics, technology, and culture by examining and responding to real world issues facing the entertainment industries.

CDB302 Entertainment Project 1: Pre-Production

Pre-requisites	Completion of 168 credit points of study
Equivalents	KXB302
Credit Points	12
Campus	Kelvin Grove
Availability	Kelvin Grove - SEM-1

This capstone unit provides you with hands-on experience

managing at an advanced level a real world entertainment project working alongside project stakeholders. It builds upon the core knowledge and skills gained from your program of study and develops your professional capacity for independence, leadership, confidence and collaboration. While this first semester unit covers the initial pre-production phase during which the project is researched and developed, the second semester unit covers the production phase during which the project is delivered and assessed.

CDB303 Entertainment Project 2: Production

Pre-requisites	Completion of 168 credit points of study
Equivalents	KXB303
Credit Points	12
Campus	Kelvin Grove and External
Availability	Kelvin Grove - SEM-2 External - XCH-1

This practice-based unit enables you to take high responsibility for the delivery of a real world media and entertainment project. The advanced experience and skills gained from this project are designed to further develop your confidence as a media and entertainment industries professional. This unit is the second of two capstone units in the media and entertainment industries program and is designed to build upon the knowledges, skills and experiences gained in the unit CDB302. The unit develops and assesses your

professional capacity in a team-based context in delivering an independent media and entertainment project. You will be entrusted with a high degree of responsibility in order to ensure that the project is completed to a pre-professional standard. This unit covers the production phase during which the project is delivered and assessed.

CIB101 Engaging with Indigenous Perspectives: Respectful Engagement

Credit Points	6
Campus	Online and Kelvin Grove
Availabilities	Online - 6TP2, 6TP4

Gaining a better awareness of Aboriginal and Torres Strait Islander perspectives will benefit you as a civic citizen and in your future career, no matter where life takes you. This unit is designed to take you on a journey to explore Indigenous perspectives and give you the tools, knowledge, and language to engage confidently and respectfully with Aboriginal and Torres Strait Islander peoples in your personal and professional life. This unit is designed as a university-wide option unit that provides opportunities to engage with and reflect on Aboriginal and Torres Strait Islander perspectives across all discipline areas.

CIB102 Engaging with Indigenous Perspectives: Understanding Rights

Credit Points	6
Campus	Online and Kelvin Grove

Availabilities	Online - 6TP3, 6TP5
----------------	------------------------

Gaining a better awareness of Aboriginal and Torres Strait Islander perspectives will benefit you as a civic citizen and in your future career, no matter where life takes you. In this unit you will explore real world issues that affect Indigenous peoples globally, nationally and locally, situated in a rights-based framework that has relevance across disciplines and professions. Through truth-telling about systemic racism you will begin to understand the need for Indigenous sovereignty. This unit is designed as a university-wide option unit that provides opportunities to reflect on Aboriginal and Torres Strait Islander perspectives across all discipline areas.

CJB101 Newswriting

Equivalent s	KJB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This foundational unit provides you with the understanding and skills in journalistic ways of thought, processes and practice, focusing on processes and practices that inform effective news writing. This is the first writing/reporting unit in Journalism. By adopting a hands-on newsroom approach and industry-based assessment, this unit provides a foundation for advanced and specialised professional journalistic reporting techniques. Professional

journalists require these foundational knowledge and skills in order to practice in newsrooms. The unit addresses the foundations of news reporting, focusing on identifying, researching and then structuring news reports in an evolving news environment. You will learn how to recognise the fundamental attributes of news and other journalism forms; use available mobile technologies, evaluate events for their potential news value, to record interviews and perform other reporting tasks, and to write socially responsible news stories.

CJB102 Visual Journalism

Equivalent s	KJB104, KKB020
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit equips you with the knowledge, skills, and experiences to create, edit, and present visual journalism using camera-based approaches. You'll learn about journalistic principles, equipment and camera settings, light and optics, visual literacy and aesthetics, file management and organisation, captions, image editing and sequencing. You'll leave with a portfolio of still or moving images that demonstrate the skills you've learnt and the principles you've put into practice. You'll become a more thoughtful visual thinker and storyteller in this unit and will have the opportunity to demonstrate technical skills and work in key genres of

visual journalism, such as environmental portraiture, news photography, sports photography, and picture or video stories.

CJB103 Journalistic Inquiry

Pre-requisites	CJB101 or KJB120
Equivalent s	KJB121
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit addresses basic skills of newswriting: generating story ideas, researching, conducting interviews, finding news values and news angles and applying them in a practical context. It also advances generic newswriting skills, enhances writing competency and develops the use of social media and mobile technologies in journalism. As such, it develops media professionals who can generate accurate, interesting and insightful stories. It builds your capacity to independently examine issues and events from new angles, rather than uncritically complying with outside agendas, such as PR agencies, government or business. You develop your journalistic inquiry skills focusing on interviewing, data mining and right to information, and learn how they fit into an online environment. You are introduced to everyday journalism, rigorous deadlines, social media and mobile first technologies.

CJB201 Feature Writing

Equivalent s	KJB224
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1

This unit provides advanced journalistic skills in feature writing, such as generating story ideas and new angles, researching and interviewing and writing interesting copy. Feature writing is a mainstay of journalism that practitioners cultivate during a career in this constantly evolving media space. The unit provides experience in the preparation of feature stories of professional quality and gives access to the benefits of reflection and a constructive critique of your research and writing. It aids you in producing credible non-fiction articles in a dynamic and appealing style, engaging skills that are transferable to areas outside journalism. It also provides awareness of the market for feature material for writers including freelance journalists. You are mentored to find publication opportunities in off-campus media.

CJB202 Production Journalism

Pre-requisites	CJB101 or KJB120
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1

Contemporary journalism

increasingly requires multi-skilled practitioners able to engage and attract audiences through creatively and accurately edited content integrated with compelling visual design. This unit introduces you to the key functions of production journalism for print and digital media by teaching how to produce multimedia (video) and how to edit and design print and digital content prior to publication. It builds on foundation skills in journalism and engages you with the dynamics of visual design and the application of design theory to journalistic practice. You learn to develop material to the publication-ready stage and to apply theoretical concepts in practical contexts. You also gain an understanding of the role of layout and design as a communication tool in print and digital media.

CJB203 Newsroom

Pre-requisites	CJB102 or KJB121
Credit Points	24
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - XCH-1

The aim of this unit is to advance knowledge of the journalism professional approaches needed to produce quality news material for diverse and changing news audiences. It equips you with concepts and skills needed to plan reports; conduct interviews; write news stories; and present and edit material

for radio, television and multi-media outputs. This second-year unit is the first of the newsroom suite of units that are a hallmark of the digital-journalism focus of the QUT journalism degree. With a collaborative newsroom approach, it combines the skills and learning of students from different year levels in a team environment with input from peers, staff and industry practitioners. Therefore, you learn the production principles of quality news production in real time while identifying and pursuing innovative news approaches. In keeping with a commercial newsroom, the QUT newsroom experience aims to create a dynamic and diverse news product.

CJB204 Journalism Ethics and Issues

Pre-requisites	((CJB101 or KJB120) and LWS011) or (CDB101 and LLB101)
Equivalent s	KJB239
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1

This unit aims to develop socially responsible, ethical journalists. As such, it looks at moral philosophical traditions and current journalistic practice in the context of Australian and international news media approaches. It introduces theories of ethical decision-making and their application; overviews professional codes of conduct and codes of ethics in the media industry and

related professions; addresses major ethical concerns in journalism; examines the journalist’s working environment and the public’s perceptions of the media industry; provides opportunities to explore personal responses to ethical dilemmas and to work through examples of applied ethical decision-making; develops capabilities of self-care as well as your critical analytical abilities; and addresses the impact of developing information and communication technologies.

CJB301 International Newsdesk

Pre-requisites	CJB203 or KJB235
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This capstone unit prepares you for journalistic work in internationalised settings in which the topics that journalists report on, the information sources they draw from, the professional partners they work with, and the audiences they address are increasingly globalised. You will create original journalistic work in news feature style about international issues. To do this effectively, you must understand practical, legal, ethical, and creative demands that impact on the quality of journalism produced in or about other countries. In your role as part of a production team that creates journalistic work about international people, places and events, you will need to understand the

current contexts, cultures and values of countries that you report on. By analysing political, economic, and other social influences on the roles, rights and expectations of journalists in different countries, you will learn how journalism practices must adapt to different contexts and circumstances.

CJB302 Newsdesk

Pre-requisites	CJB203 or KJB235
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This capstone unit models day-to-day operations of a fully-converged, multimedia newsroom (online/audio/video). It aids you in reporting, storytelling and professional training as part of a team publishing material for real audiences. Today’s journalism requires skills to operate in a converged media environment and to meet the needs of an increasingly diverse and fragmented audience. Graduates need to deal with both the instantaneous demands of the 24-hour news and social media landscape, as well as being able to produce far more considered pieces that analyse, educate, inform and entertain. Choosing the right medium for the task, and working to deadlines, is essential. This authentic learning experience in an industry-standard newsroom demands practical, legal, ethical, creative and social issues to be addressed in real

time.

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

technologists.

CSB012 Introduction to Medical Radiations

Equivalent s	PCB178
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This introductory unit provides you with an overview of the principles of medical radiation practices. Following semesters will build on this foundation knowledge in your studies in medical imaging practice.

CSB013 Introduction to Radiation Therapy

Co-requisites	CSB111 and PCB272
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This introductory Radiation Therapy unit is the first in a series of units which will focus on foundation skills and knowledge that underpin radiation therapy. The following semester unit specific to radiation therapy, CSB025 Principles of Radiation Therapy Planning and Treatment, will build on these skills.

CSB020 Systematic Imaging Pathology

Pre-requisites	CSB021
Anti-requisites	LSB367, LSB475
Equivalent s	PCB252
Credit Points	12
Campus	Gardens Point

The field of medical imaging is rapidly changing but a sound knowledge of pathology continues to underpin diagnostics and treatment design required for professional practice. This unit will apply the principles of general cellular pathology to imaging of the major systems thus enabling you to use appropriate terminology to describe the pathogenesis and image appearances of common systemic diseases. This will enable you to integrate theoretical and practical knowledge of human pathology required for the understanding of subsequent clinical semesters.

CSB021 General Radiography 1

Pre-requisites	LSB142 and CSB012 and PCB272
Equivalent s	PCB276
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is a foundational unit designed to provide you with knowledge of imaging practices and in particular skeletal radiography. It introduces you to the patient considerations and positioning techniques which you will be able to put into practice in the accompanying unit CSB022 Radiographic Practice. A full and detailed knowledge of anatomy and positioning techniques for skeletal radiography is essential to the education of medical imaging

CSB022 Radiographic Practice

Pre-requisites	CSB021. CSB021 can be studied in the same teaching period as CSB022
Equivalent s	PCB277
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the first unit in radiographic positioning of your course and builds on your foundation knowledge of the role of the Radiographer from semester 1. The development of positioning skills and a full appreciation of the principles of image production and processing are essential requirements in the education of medical imaging students. This unit is designed to apply your knowledge of skeletal anatomy, radiography and imaging practices, and the role of the radiographer. The practical sessions are designed to develop positioning skills through role play and taking radiographs of sectional models to become familiar with radiographic appearances and image quality, and prepare you for safe clinical practice.

CSB025 Principles of Radiation Therapy Planning and Treatment

Pre-requisites	CSB013 and PCB272 and CSB111
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the first unit in

Radiation Therapy planning and treatment of your course and builds on your foundation knowledge from CSB013 introduction to Radiation Therapy from semester 1. This unit provides you with opportunities to build, practice and provide evidence of your problem-solving skills for radiation planning and treatment. Within a simulated environment, you will be able to practice planning and treatment techniques in a safe environment in order to prepare for clinical practice. Highlighting the importance of accurate working and the potential impact of errors builds on the radiation safety principles being learned concurrently in the radiation safety unit. The clinical placements will allow you to familiarise yourself with the practices of a radiation therapy department. This unit aims to provide you with a fundamental understanding of the principles of planning and treatment for radiation therapy.

CSB033 Clinical Radiography 1

Pre-requisites	(CSB022 or PCB277) and (CSB021 or PCB276) and LSB142
Co-requisites	CSB034
Equivalent s	PCB359
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

An opportunity to participate in patient examinations in the clinical situation is essential to further skills development for medical imaging students.

CSB034 General Radiography 2

Pre-requisites	(CSB021 or PCB276) and (CSB022 or PCB277) and LSB142
Co-requisites	CSB033
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

A full and detailed knowledge of positioning techniques and the development of positioning skills is essential to the professional practice of medical imaging technologists. This includes the extended range of skeletal systems projections, basic contrast media examinations and radiography performed outside of the Medical Imaging Department.

CSB036 Medical Imaging Methods

Pre-requisites	CSB012 and PCB272
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Radiographers are required to be competent and proficient in using different medical imaging equipment. This unit will build on your knowledge of radiation physics and how it relates to the safe operation of x-ray equipment found in clinical practice. It provides you with opportunities to build on this knowledge and gain an understanding of the operation of digital imaging devices.

CSB037 Medical Imaging Applications in Radiation Therapy

Pre-requisites	LQB389 and CSB025
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The ability to identify anatomical structures on a range of imaging modalities is an essential skill for radiation therapists. This unit provides you with opportunities to build on the fundamental 3D relational anatomical understanding of previous anatomy units and apply this knowledge to image interpretation. This unit also provides radiation therapy students with the fundamental knowledge of CT, MRI, Ultrasound and PET and the quality control and quality assurance associated with these modalities.

CSB038 Clinical Radiation Therapy 1

Pre-requisites	CSB025 and PCB675 and LQB389
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Experience in clinical departments is essential in developing clinical competence and meeting professional capabilities. This unit is designed to provide you not only with this experience but also some tools to maximise learning during clinical placements. After completion of this unit you should be able

to assist with routine clinical procedures and be prepared to organise your clinical learning in relation to your development needs for future clinical units.

CSB039 Radiation Therapy Treatment 1

Pre-requisites	CSB025 and PCB675 and LQB389
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-1

This unit builds on the fundamental theories of CSB025 Principles of Radiation Therapy Planning and Treatment and enables you to apply knowledge to practice in a simulated virtual environment. You will need to gain practical skills in order to become competent radiation therapists and this unit provides you with the underpinning theory and practical skills.

CSB041 Specialised Imaging Techniques

Pre-requisites	CSB033 and CSB034 and CSB044. CSB044 can be enrolled in the same teaching period as CSB041
Equivalent s	PCB476
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-2

A full and detailed appreciation of the special procedures and radiographic techniques is essential to the education of medical imaging students. The practical sessions are designed to further develop and maintain positioning skills through role

play and taking radiographs of sectional models to become familiar with radiographic appearances and prepare you for safe clinical practice. Approaches to imaging for the diversity of population including consideration of culture, age, gender and body habitus with an emphasis on Aboriginal and Torres Strait Islander cultures and cultural safety in the Australian healthcare setting.

CSB044 Clinical Radiography 2

Pre-requisites	CSB033 and CSB041. CSB041 can be enrolled in the same teaching period as CSB044
Equivalent s	PCB459
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-1, SEM-2

This unit will continue to build on your previous clinical placement experience to deal with more complex patient presentations. The aim of this unit is to enable you to continue to develop and consolidate your skills and demonstrate safe practice in general radiography and minor procedures, whilst also allowing you to develop skills in computed tomography. This period of clinical experience includes a placement within the computed tomography area to enable you to gain clinical experience in routine computed tomography following on from the theory unit undertaken this semester.

CSB046 Complementary Imaging Techniques

Pre-requisites	CSB012 or PCB178
Equivalent s	PCB477
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-1

Medical imaging technologists are required to utilise a number of imaging modalities to assist in the diagnosis of disease. Proper utilisation of equipment and safe practice requires an understanding of the underlying physical principles. Knowledge of the clinical applications enables an appreciation of the overall medical imaging strategies available in a patient's clinical management. Alignment to Medical Radiation Practice Board of Australia (MRPBA) Professional capabilities (2020) and National Safety and Quality Health Service (NSQHS) Standards (2021).

CSB047 Clinical Radiation Therapy 2

Pre-requisites	CSB037 and CSB038 and CSB039 and CSB090
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-2

Experience in clinical departments is vital to developing clinical competence and this unit is designed to build on the experience gained in CSB038 Clinical Radiation Therapy 1 and further develop your clinical and interpersonal skills. This unit aims to provide you with the fundamental skills

and experience which will enable you to participate in routine radiation therapy techniques and procedures under supervision. After completion of this unit you should be able to assist with a wide range of clinical procedures and have developed an action plan in relation to your developmental needs for future clinical units.

CSB048 Radiation Therapy Treatment 2

Pre-requisites	CSB037 and CSB038 and CSB039 and CSB090
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the third in a series of discipline specific Radiation Therapy units and builds on the knowledge and skills gained in the previous units CSB025 Principles of Radiation Therapy Planning and Treatment and CSB039 Radiation Therapy Treatment 1. Oncology and technique are essential components of radiation therapy skills for treatment practice. This unit builds on the fundamental theories of CSB039 Radiation Therapy Treatment 1 and focusses on the application of knowledge to practice. You will need to gain practical skills in order to become competent radiation therapists and this unit provides you with the underpinning theory and practice. This unit is designed to further develop and apply the principles of oncology and technique for various anatomical sites.

CSB049 Radiation Therapy Planning 2

Pre-requisites	CSB037 and CSB038 and CSB039 and CSB090
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Treatment planning is an essential component of radiation therapy, and understanding of treatment planning techniques is essential. This unit builds on the planning experience gained in previous units to concentrate on application of more in-depth knowledge of treatment planning practice. In order to further prepare you for clinical planning, a range of challenging plans will be completed using clinical data sets and planning techniques. This will consolidate your understanding of advanced planning concepts and pave the way for progression to more advanced planning techniques in Year 3. You will need to gain high levels of plan evaluation skills in order to become a competent treatment planner and this unit provides you with the opportunity to further develop plan evaluation skills. This unit also aims to further develop critical appraisal and plan evaluation skills.

CSB053 Clinical Radiography 3

Pre-requisites	CSB041 and CSB044
Co-requisites	CSB046
Anti-requisites	CSB058
Credit	12

Points	
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will continue to build on previous clinical placements to deal with more complex patients. The extended period of clinical experience in this 12 credit point unit will enable you to gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures.

CSB056 Computed Tomography Imaging

Pre-requisites	LQB390
Equivalent s	PCB681
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Computed Tomography Imaging is a specialised modality within the field of medical radiations. The applications of computed tomography imaging have a wide impact on differential diagnoses and subsequent radiographic examinations. This unit will provide you with an introduction to the safe operation and clinical applications of computed tomography and the image appearances, and covers both the technological and clinical aspects of computed tomography (CT). Clinical applications described include those for specific anatomical areas as well as advanced and interventional applications. The

Units

strengths and weaknesses of CT in relation to other imaging modalities are discussed.

CSB063 Magnetic Resonance Imaging

Pre-requisites	LQB390
Equivalent s	PCB682
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Magnetic Resonance Imaging is a specialised modality within the field of medical radiations. The applications of magnetic resonance imaging have a wide impact on differential diagnoses and subsequent radiographic examinations.

CSB067 Clinical Radiography 4

Pre-requisites	CSB058 or CSB053
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will continue to build on previous clinical placements to deal with more complex patients and contexts. The period of clinical experience in this unit will enable you to demonstrate safe practice and gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures.

CSB069 Radiation Therapy Treatment 4

Pre-requisites	CSB092 and CSB093 and CSH059
----------------	------------------------------

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes a range of specialised radiation therapy techniques and technology. Previous radiation therapy units have provided knowledge and experience with a wide range of treatment techniques encompassing a range of procedures and tumour sites. Improvements in new equipment and less common procedures will be outlined to make students aware of these techniques and technologies. This unit aims to stimulate your interest in specialised radiation therapy equipment, techniques and associated treatment procedures, as well as providing you with an overview of current and future avenues of research.

CSB070 Transition to Professional Practice 1

Pre-requisites	CSB067 and (CSB068 or CSH068)
Co-requisites	CSB071
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is the first of two transitional capstone units across the final year and requires you to integrate and apply your previously developed knowledge and skills in medical imaging in a clinical context. You will consolidate your professional practice skills in workload management and clinical

efficiency particularly in relation to general radiography and minor procedures. You will demonstrate your ability to deliver collaborative, culturally responsive care in a professional manner. As you progress to a reflective ethical practitioner, this unit provides the opportunity for you to operate with an increasing level of intellectual independence whilst still under supervision.

CSB071 Clinical Radiography 5

Pre-requisites	CSB067
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will continue to build on previous clinical placements to deal with a full range of complex patients and contexts. The period of clinical experience in this unit will enable you to gain experience as a supervised performer in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures while demonstrating safe practice.

CSB072 Review of Contemporary Clinical Practice

Pre-requisites	(CSB600 or CSH600) and (CSB068 or CSB069 or CSH068)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit in the final year of your course builds upon the

developmental work you have undertaken in CSH600 Evidence Based Clinical Practice. CSB072 provides you with the opportunity to investigate a topic of interest in contemporary practice and demonstrate your capability at critical analysis, synthesis and evaluation of the evidence available.

CSB078 Transitioning to Professional Practice 1

Pre-requisites	CSB069 and CSB094 and CSB095
Equivalents	CSB073
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is a capstone unit/experience which provides a culminating learning experience occurring in the final year of a course that brings reflection and focus to the whole course experience whilst, at the same time, leading you to transition into professional pathways and/or post-graduate study. This is the first of two transitional capstone units across the final year and requires you to integrate and apply your previously developed knowledge and skills in radiation therapy in a clinical context. You will consolidate your professional practice skills in workload management and clinical efficiency particularly in relation to simulation/CT, treatment planning and treatment. As you progress to a reflective ethical practitioner, this unit provides the

opportunity for you to operate with an increasing level of intellectual independence whilst still under supervision.

CSB090 Radiation Therapy Planning 1

Pre-requisites	CSB025 and PCB675 and LQB389
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Treatment planning is an essential component of radiation therapy and application of fundamental principles to routine planning practice is essential. This unit builds on the fundamental theories of treatment planning to concentrate on application of knowledge to practice. In order to further prepare for planning, a range of routine plans will be completed using 3D datasets. You will need to gain plan evaluation skills in order to become competent treatment planners and this unit provides you with the underpinning theory and introductory practice.

CSB091 Clinical Radiation Therapy 3

Pre-requisites	CSB047 and CSB048 and CSB049
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Experience in clinical departments is essential in developing clinical competence and meeting professional capabilities. This unit is designed to build on the

experience gained in CSB047 Clinical Radiation Therapy 2 to further develop your clinical and interpersonal skills. After completion of this unit you should be able to perform the full range of clinical procedures under supervision and be able to organise your clinical learning in relation to your future personal and professional development.

CSB092 Radiation Therapy Treatment 3

Pre-requisites	CSB047 and CSB048 and CSB049
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on the fundamental theories of previous treatment units, CSB047 Radiation Therapy Treatment 2, to further the application of knowledge to practice. You will need to gain practical skills in order to become competent radiation therapists and this unit provides you with the underpinning theory and simulated practice.

CSB093 Radiation Therapy Planning 3

Pre-requisites	CSB047 and CSB048 and CSB049
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The planner is increasingly making use of advanced technology to aid with radiation therapy treatment planning. This unit builds on the planning

experience gained in previous planning units to further develop planning practice. In order to further prepare you for clinical planning, you will have the opportunity to plan challenging tumour sites.

Previous work on plan evaluation will be developed and you will be encouraged to integrate feedback from plan evaluations in previous units and support your work with consistent critical appraisal of the evidence base.

CSB094 Radiation Therapy Planning 4

Pre-requisites	CSB092 and CSB093 and CSH059
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Previous treatment planning units have provided knowledge and experience with a wide range of planning techniques encompassing the relatively simple to highly complex procedures and tumour sites. This unit builds on the planning experience gained in Semester 1, to concentrate on the application of more complex techniques and technology. Previous work on plan evaluation will be developed to allow application to complex planning scenarios and you will be encouraged to integrate feedback from previous plan evaluations and support your work with critical appraisal of the evidence base. This unit aims to stimulate your interest in advanced planning technologies as well as providing you with an overview

of current and future avenues of research.

CSB095 Clinical Radiation Therapy 4

Pre-requisites	CSB091 and CSB092 and CSB093 and CSH059
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Experience in clinical departments is essential in developing clinical competence and meeting professional capabilities. This Unit is designed to build on the experience gained in CSB091 Clinical Radiation Therapy 3 to further develop your clinical and interpersonal skills. After completion of this Unit you should be able to perform the full range of clinical procedures with minimal supervision and organise your clinical learning in relation to your future personal and professional development. This unit is the final clinical radiation therapy unit in the course where both academic and clinical learning will be consolidated. By the completion of this unit all of the clinical achievements will have been met and you will progress to CSB078 Transitioning to Professional Practice I. This unit aims to further develop your skills and experience which will enable you to demonstrate competence in a full range of radiation therapy techniques and procedures with minimal supervision.

CSB111 Foundations of Clinical Practice

Equivalent s	PUB442
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

Clinical health professionals work within the health care system in interprofessional teams to provide optimal care to individuals and communities. The nature and standards of professional practice are determined by government and professional organisations, and the scope of clinical practice for clinicians evolves in response to community needs. There is a community expectation that clinical health care professionals will be effective communicators who engage in ethical practice that is continually improved through ongoing reflection. This unit introduces you to the fundamentals of the health care system and the skills necessary to practise as a health professional. The foundation knowledge and skills you learn in this unit will be further developed throughout your clinical programs of study. The ability to communicate, reflect, and evaluate aspects of clinical practice are important aspects of your future studies.

CSB330 Foundations of Paramedicine

Equivalent s	PUB180
Credit Points	12

Units

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This foundational unit will introduce the profession, regulatory bodies and professional standards, and the foundations of high-quality, culturally safe and patient-centred healthcare. A particular emphasis of this unit is to provide a foundation for practical knowledge, skills and application of knowledge related to paramedic practice. This will enhance students' work-integrated learning experience, and prepare students for more complex clinical practice, commencing in the second year of the paramedicine course.

CSB331 Paramedic Clinical Practice 1

Pre-requisites	(LSB282 or LQB185 or LQB281 or CSB520) and (CSB332 or PUB280)
Equivalent s	PUB270
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SUM

This unit is in the developmental stage of your course and builds on the work you learned in CSB330 and CSB332. This unit provides you with opportunities to build practice and provide evidence of your development as a clinician in a supervised environment. Additionally it is fundamental to this course that you are exposed to an appropriate case load of suitable patients in the out of hospital phase. This unit is the

first in a series of three that provide the work integrated learning experience. Over a six week period, you will be required to complete approximately 240 hours of placement to be conducted externally through the Queensland Ambulance Service.

CSB332 Integrated Paramedic Practice 1

Pre-requisites	CSB330 or PUB180
Equivalent s	PUB280
Credit Points	12
Campus	null

Through the use of case-based learning, clinical simulation and work-integrated learning, this unit builds on Foundations of Paramedicine by enhancing a student's ability to perform and reflect on culturally safe and patient-centred assessment and management which aligns with the professional standards. The unit provides students with their first three-week work-integrated learning opportunity in a paramedic care setting. During this supervised placement, students will demonstrate the foundational knowledge, skills and values required of a professional and ethical paramedic.

CSB333 Integrated Paramedic Practice 2

Pre-requisites	CSB332
Equivalent s	PUB383
Credit Points	12

Campus	null
--------	------

Through clinical simulation and work-integrated learning, this unit builds upon the knowledge, skills and values developed during year one, providing opportunities for the translation of CSB335, CSB340 and LQB301 knowledge into practice. Students initially develop discrete skills, such as medical documentation and clinical procedures, which are then incorporated into increasingly complex and integrated clinical simulation focusing on adult cardiac, respiratory, toxicology, toxinology, environmental, and major incident cases and infection prevention and control. The unit includes a student organised interprofessional, work-integrated learning component in a non-paramedic care setting. This provides an experiential learning opportunity where students interact with diverse populations, explore the broader role of paramedics, learn about and from other professionals, exploring the complex relationship between the social determinants of health and health outcomes.

CSB335 Paramedic Management of Cardiac, Respiratory and Neuro Emergencies

Pre-requisites	CSB333 or CSB363 or PUB383 or PUB390
Equivalent s	PUB451
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is a first in a series of two paramedic management units that cover some of the most common medical and surgical emergencies seen in ambulance practice. The unit focus is on the development of your clinical skills for the management of patients suffering cardiovascular, respiratory and neurological emergencies. Additionally, to better prepare students for international placements and employment opportunities, an overview of cardiovascular, respiratory and neurovascular advanced life support (ALS) knowledge will be provided and student discussions regarding the ALS content is promoted through a collaborative learning platform. This unit synthesises your application of knowledge and clinical reasoning skills that underpin the management of such patients whilst providing a solid grounding in paramedic practice.

CSB336 Paramedic Management of Medical and Surgical Emergencies

Pre-requisites	CSB333 or PUB383 or PUB390
Equivalent s	PUB452
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

As a paramedic you will be required to manage patients with acute and life threatening diseases. This unit covers many of the medical and surgical emergencies seen in ambulance practice, such as genitourinary, gastrointestinal,

metabolic, endocrine, haematological, musculoskeletal, toxicological, toxinological, infectious disease and palliative emergencies. In the early phases of your clinical experience it is important that you engage in these clinical problems to develop your patient care abilities and prepare yourself to practise as a Registered Paramedic.

CSB338 Ethics and the Law in Health Service Delivery

Credit Points	12
Campus	Kelvin Grove, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1, XCH-2

Paramedics, nurses and other health professionals are confronted by situations with ethical and legal implications for both practitioners and the patients they provide care to. Introducing ethical and legal awareness appropriate for the professional development of health professionals governed by regulation will support graduates. Using legal and ethical principles – in addition to regulatory structures, the National Law and human rights – this unit will help you resolve dilemmas using ethical and legal frameworks. It will provide you with the ability to access and understand the information in relation to professional practise, policy, principles, legislation, conduct and standards.

CSB339 Paramedic Management of Lifespan Emergencies

Pre-requisites	CSB333 or PUB383 or PUB390
Equivalent s	PUB566
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Obstetric and paediatric emergencies represent an important component of emergency ambulance practice. However these patient care groups are specialised in respect of their physiological and anatomical variances. There is also an additional emotional burden surrounding the management of these patients which will be explored. The impact of the growing ageing population on emergency and health services and the management of these patients will be discussed in a socio-cultural context.

CSB340 Major Incident Management

Pre-requisites	(CSB335 or PUB451) and (CSB336 or PUB452) and (CSB337 or PUB453)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

As a Paramedic you may be required to attend incidents involving multiple patients from transportation/industrial accidents, natural disasters or terrorist related events. The management of these events in a unique and unpredictable environment creates real challenges, and requires timely

application of evidence-informed decision-making. You will learn the principles of disaster health management and apply these to a variety of likely clinical scenarios.

CSB341 Mental Health Issues in the Out-of-Hospital Environment

Pre-requisites	(CSB331 or PUB270) and (PYB007 or PYB111)
Equivalent s	PUB568
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

A significant proportion of calls for ambulance assistance relate to mental health concerns. As a practising health care professional you will require a contemporary understanding of mental health issues and the range of services available to people experiencing acute and chronic mental health issues. You will examine key mental health issues across the life-span and will develop an understanding of both acute and chronic presentations. This unit emphasises the importance of understanding mental health issues from the perspective of the patient, their carers' and other health care providers. You will have already completed clinical practice placements which will assist to contextualise the myriad of mental health issues encountered in pre-hospital practice.

CSB342 Paramedic Clinical Practice 2

Pre-requisites	(CSB331 or PUB270) and (CSB340 or PUB567 or PUB555). CSB340 can be studied in the same teaching period as CSB342
Anti-requisites	CSB357
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is in the developmental stage of your course and builds on the work you learned in previous paramedic clinical units. This unit provides you with opportunities to strengthen your practice skills and provide evidence of your development as a clinician in a supervised environment. Additionally it is fundamental to this course that you are exposed to an appropriate case load of suitable patients in the out of hospital phase. This unit is the second in a series of three that provide the work integrated learning experience. Over a six week period, you will be required to complete approximately 240 hours of placement to be conducted externally through the Queensland Ambulance Service.

CSB343 Paramedic Clinical Practice 3

Pre-requisites	CSB342 or PUB532 or PUB470
Anti-requisites	CSB359
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the third in a series of supervised clinical practice units designed to further develop your knowledge, skills and application of paramedic practice. At this stage of your degree you have now been exposed to the core content of the course. This unit synthesises your application of knowledge and clinical skills of safe patient care to a level where you can confidently take the lead when managing more complex clinical presentations as a novice practitioner. Over a six week period, you will be required to complete approximately 240 hours of placement to be conducted externally through the Queensland Ambulance Service. During this clinical placement your mentor will be expecting more leadership and evidence-based decision making from you as you consolidate your personal and professional readiness for practice as a patient care officer in a supervised student capacity, with a view to preparing you for the transition to being a Registered Paramedic after graduation.

CSB346 Transition to Professional Paramedic Practice (Capstone)

Pre-requisites	CSB343 or PUB673 or PUB570. CSB343 can be studied in the same teaching period as CSB346
Anti-requisites	CSB344, CSB345, CSB364
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

CSB346 consolidates

knowledge, skills and attributes required for safe, competent, and professional practice as a beginning level Registered Paramedic. It integrates, and synthesises previous clinical and scientific support units, drawing upon concepts, principles and theories developed through your studies to promote effective practice and patient care. When you will commence your role as a Registered Paramedic, your level of expertise is at the beginner practitioner level. The capstone unit focuses on the development and demonstration of professional skills such as critical reflection necessary for paramedicine and highlights the importance of continuing professional development. As a professional practitioner, you will develop evidence-based knowledge and implement reflective processes to improve the quality of patient care. These strategies and processes are necessary for the transition into the workplace. The unit is delivered concurrently with the final clinical placement.

CSB347 Community Paramedicine Principles and Practice

Pre-requisites	CSB335 and CSB336
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Estimates of the percentage of patients that present to an emergency department via ambulance that could be managed safely outside of

hospital ranges from 30% to 50%. The management of these patients in the community-based or primary care setting by paramedics is termed "community paramedicine". Community paramedicine is an area of paramedic clinical practice that aims principally to improve patient outcomes by navigating the patient more efficiently through the health care system. Paramedics working in community paramedicine are therefore required to have a detailed understanding of the health system in which they operate, possess advanced patient assessment skills and work collaboratively with other healthcare professionals. This unit expands further on content from previous units, namely CSB111, CSB335 and CSB336, and provides you with further skills and knowledge to care more holistically for patients who do not require transport to a hospital emergency department.

CSB348 Paramedic Management - Obstetrics, Gynaecology, Neonatal Care and Sexual Health

Pre-requisites	CSB333 or CSB363
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is one of several case-based learning paramedic specific management units; it explores common and critical medical and surgical presentations. The unit focus is on developing your clinical

knowledge, skills and reasoning for the culturally safe, person-centred assessment and effective clinical management of sexual health, reproductive health, and neonatal presentations. Additionally, to ensure you are prepared for work-integrated learning and employment, you will focus on national and international evidence-informed clinical practice. CSB348 Sexual and Reproductive health and Neonatal Care is followed by CSB342 Integrated Practice 3, which focuses on the translation of this knowledge into the clinical environment. This unit incorporates authentic, real-world learning design features and assessments. Completion of this unit will contribute to your completion of your degree leading to registration with national and/or international regulatory bodies. .

CSB356 Paramedic Management - Major Incidents, Environmental Cases and Toxinology

Pre-requisites	CSB333 or CSB363 (CSB363 can be completed concurrently with CSB356)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This theoretical unit is a paramedic specific case-based learning unit that explores presentations encountered in the paramedic care setting. The unit focus is on developing your knowledge and attributes for the person-centred assessment and management

of major incidents, environmental cases and toxinology presentations. You will focus on national and international evidence-informed clinical practice. This unit is complemented by CSB363 Paramedic Practice - Skills and Application, which focuses on the translation of this knowledge into the clinical environment.

CSB357 Integrated Paramedic Practice 2

Pre-requisites	Completion of 144cp including CSB356 and (CSB358 or CSB335) and (CSB363 or CSB333)
Anti-requisites	CSB342
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - FPB

Through clinical simulation and work-integrated learning, this unit builds upon the knowledge, skills and values developed during year two, providing opportunities for the translation of CSB337, CSB348 and CSB338 knowledge into practice. Students initially develop skills and clinical procedures, which are then incorporated into increasingly complex and integrated clinical simulation focusing on adult resuscitation, trauma, neurological and endocrine presentations as well as obstetrics, gynaecology, sexual health and neonatal care. The unit includes a work-integrated learning component in a paramedic care setting, providing an experiential learning opportunity where

students interact with diverse populations, explore the role of paramedics in jurisdictional and non-jurisdictional ambulance settings and learn from registered paramedics and other professionals, exploring the complex relationship between the social determinants of health and health outcomes.

CSB358 Paramedic Management - Cardiac, Respiratory and Toxicology

Pre-requisites	PUB383 or PUB390 or CSB363 or CSB333
Anti-requisites	CSB335
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CSB362 Integrated Paramedic Practice 1

Pre-requisites	CSB330
Equivalent s	
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Through the use of case-based learning, clinical simulation and work-integrated learning, this unit builds on Foundations of Paramedicine by enhancing a student's ability to perform and reflect on culturally safe and patient-centred assessment and management which aligns with the professional standards. The unit provides students with their first three-week work-integrated learning opportunity in a paramedic care setting. During this

supervised placement, students will demonstrate the foundational knowledge, skills and values required of a professional and ethical paramedic.

CSB363 Paramedic Practice - Skills and Application

Pre-requisites	CSB332 or CSB362
Equivalent s	CSB333
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Through clinical simulation, this unit builds upon the knowledge, skills and values developed during year one, providing opportunities for the translation of CSB358, CSB356 and LQB301 knowledge into practice. Students initially develop discrete skills, such as medical documentation and clinical procedures, which are then incorporated into increasingly complex and integrated clinical simulation cases.

CSB373 Paramedic Management - Trauma, Neurological and Endocrine

Pre-requisites	CSB333 or CSB363
Anti-requisites	CSB337
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This theoretical unit is the first in a series of case-based learning paramedic specific management units that explores common and critical

medical and surgical presentations encountered in the paramedic care setting. The unit focus is on developing students' knowledge and values for the patient-centred assessment and management of trauma, neurological and endocrine presentations. Additionally, to ensure students are prepared for national and international work-integrated learning and employment opportunities, they will focus on national and international evidence-informed clinical practice. This unit develops the knowledge and values required to effectively and safely manage a trauma, neurological and endocrine patient presentation and is complemented by CSB342 Integrated Practice 3, which focuses on the translation of this knowledge into the clinical environment.

CSB420 Introduction to Pharmacy Practice

Pre-requisites	CSB111. CSB111 can be enrolled in the same study period as CSB420
Equivalent s	SCB208
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This foundational pharmacy practice unit will introduce the knowledge and skills related to the legal responsibilities and cognitive activities of a pharmacist. This can include dispensing prescriptions, differential diagnosis of primary health conditions and scope of practice, selecting medications

and counselling on their use, and basic business management. A particular emphasis of this unit will be to provide a foundation for practical knowledge, skills and application of knowledge and skills related to pharmacy practice. This will enhance your experiential placement experience, and prepare you for more complex patient needs, which will commence in the second year of the pharmacy course.

CSB421 Chemistry for Medicines

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In their day-to-day activities, health professionals require a sound knowledge of the molecular mechanisms and biological actions of medicines, therapeutics and drugs. Such knowledge builds on foundational understandings of the biochemistry of the body and biomolecules and extends to encompass the molecular, chemical and physical properties of therapeutic agents, as well as how these properties influence their actions in living systems. Further, this unit provides the foundation knowledge underpinning more advanced studies in the clinical professions that work with, or administer therapeutics, e.g. pharmacy, podiatry, exercise and sports physiology, nutrition, dietetics.

CSB431 I Pharmacist

Pre-requisites	CSB111. CSB111 can be studied in the same teaching period as CSB431
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on your previous studies in CSB111 Foundations of Clinical Practice and CSB420 Introduction to Pharmacy Practice by understanding the role of an effective pharmacist who has a commitment to social accountability. You will investigate this principle of social accountability in pharmacy by exploring what it means to deliver culturally safe and responsive person-centred care, to address the health care needs of individuals and the wider society, to assume responsibility for the sustainable use of health care resources and to contribute to the ongoing improvement of individual and societal health outcomes. You will further extend this exploration of social accountability through experiential learning during a 24-hour WIL experience in a pharmacy.

CSB432 Molecules to Medicines

Pre-requisites	CSB421
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds upon the concepts of medicinal chemistry, pharmacokinetics, drug design, dosage form

design and formulations, and metabolism of pharmacological compounds. The unit explores the sources and properties of drugs which form the biologically active and therapeutic components of medicines. This unit will enhance your understanding of the chemistry of medicines, and the biology of cells and receptors to provide a context for the therapeutic use of medicines and their formulations, manufacturing, quality control, and storage. This unit will follow a molecule's journey from discovery, design, and development processes through the phases of clinical trials to regulation and approval as a medicine.

CSB441 Quality Use of Medicines

Pre-requisites	CSB431 and CSB420. CSB420 can be studied in the same teaching period as CSB441
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Pharmacists have the responsibility to protect consumers from harm by managing and responding to the risk inherent in medication management systems. This unit explores the role and responsibilities of the pharmacist as the medicines expert through knowledge and application of skills related to the safe, efficacious, appropriate, and judicious use of medicinal products. Different patient populations will be

introduced, building on conditions and therapies introduced in CSB420 Introduction to Pharmacy Practice, and skills from CSB431 I Pharmacist. This unit will also develop your understanding of your role as an effective pharmacist through experiential learning over a one week period.

CSB444 Molecular Basis of Medicines

Pre-requisites	CSB432
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on your learning in CSB432, and will provide you with a strong foundation of knowledge to underpin the principles of pharmacology, pharmacokinetics, and drug development. You will gain an understanding of how biologically active molecules and medicinal substances interact with the body at a cellular and molecular level. This learning will underpin your understanding of pharmacological strategies used in people and will develop your understanding of quality use of medicines to provide a solid foundation for your clinical units.

CSB445 Person-centred care: Musculoskeletal Dermatological and Special Senses

Pre-requisites	CSB441. CSB441 can be studied in the same teaching period as CSB445
Co-	CSB446

requisites	
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on previous units studied to further develop knowledge and skills within the National Competency Standards Framework for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health Organisation/International Pharmaceutical Federation's concept of the 8 star pharmacist. Knowledge and skills will be developed in the musculoskeletal, dermatological, and special senses context, priority areas that are a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB446 Person-centred care: Gastrointestinal

Pre-requisites	CSB441. CSB441 can be studied in the same teaching period as CSB446
Co-requisites	CSB445
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on previous units studied to further develop knowledge and skills within the

Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health Organisation/International Pharmaceutical Federation's concept of the 8 star pharmacist. Knowledge and skills will be developed in the gastrointestinal context, a priority area that is a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB451 Person-centred care: Cardiovascular and Renal

Pre-requisites	CSB446
Co-requisites	CSB454
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on previous units studied to further develop knowledge and skills within the Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health Organisation/International Pharmaceutical Federation's

concept of the 8 star pharmacist. Knowledge and skills will be developed in the cardiovascular and renal context, priority areas that are significant contributors to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB454 Person-centred care: Respiratory

Pre-requisites	CSB446
Co-requisites	CSB451
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on previous units studied to further develop knowledge and skills within the Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health Organisation/International Pharmaceutical Federation's concept of the 8 star pharmacist. Knowledge and skills will be developed in the respiratory context, a priority area that is a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the

interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB455 Person-centred care: Endocrine

Pre-requisites	CSB445
Co-requisites	CSB456
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on previous units studied to further develop knowledge and skills within the Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health Organisation/International Pharmaceutical Federation's concept of the 8 star pharmacist. Knowledge and skills will be developed in the endocrine, diabetes and reproductive context, a priority area that is a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB456 Person-centred care: Oncology and Immunology

Pre-	CSB445
------	--------

Units

requisites	
Co-requisites	CSB455
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on previous units studied to further develop knowledge and skills within the Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health

Organisation/International Pharmaceutical Federation's concept of the 8 star pharmacist. Knowledge and skills will be developed in the oncology and immunology context, a priority area that is a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB464 Person-centred care: Neurology

Pre-requisites	CSB451 and CSB455
Co-requisites	CSB465
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on previous units studied to further develop knowledge and skills within the

Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains and performance outcomes for degree programs, and the World Health Organisation/International Pharmaceutical Federation's concept of the 8 star pharmacist. Knowledge and skills will be developed in the neurology context, a priority area that is a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge.

CSB465 Person-centred care: Mental Health

Pre-requisites	CSB454 and CSB456
Co-requisites	CSB464
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on previous units studied to further develop knowledge and skills within the Framework of the National Competency Standards for Pharmacists in Australia, the Australian Pharmacy Council pharmacy learning domains for degree programs, and the World Health Organisation/International Pharmaceutical Federation's concept of the 8 star

pharmacist. Knowledge and skills will be developed in the mental health context, a priority area that is a significant contributor to the burden of illness and/or injury in Australia. Through an inquiry based learning approach, you will participate in the interpretation, application and dissemination of pharmaceutical and pharmacotherapeutic concepts and knowledge. This unit will also develop your understanding of your role as an effective pharmacist through experiential learning over a two week period. You will observe and/or participate in a variety of pharmacy operations, with a focus on mental health and neurology.

CSB487 Clinical Skills

Pre-requisites	CSH471
Co-requisites	CSH481
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The effective delivery of healthcare services depends on the pharmacist working in partnership with patients to ensure recommended treatments and strategies meet clinical needs, are practical, and consistent with patient preferences. The delivery of healthcare services by pharmacists are important for enhancing patient access to needed care. This is of particular importance to patients who experience difficulties in accessing the

health services that they need. It is therefore imperative for the pharmacy profession to build capacity for contribution in this area, in light of the evolving role of the pharmacist. This capstone unit focuses on your competency to practice, and develops the required clinical and practical skills such as administering vaccination in a supervised experiential learning environment.

CSB520 Disease Processes

Anti-requisites	LSB321, LSB361, LSB367
Equivalent s	LSB475
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit will provide you with knowledge of general cellular pathology, which includes cellular stress, cellular adaptation, cell death, neoplasia, inflammation, repair and immunity before applying this knowledge to the major systems of the body in order to understand the causes, pathogenesis and treatment underlying the common acute and chronic diseases prevalent in Australia. This unit will illustrate the multidisciplinary nature of modern healthcare and provide you with appropriate knowledge and skills that are required for your subsequent clinical studies.

CSB521 Podiatric Medicine 1

Pre-requisites	LSB235 and (LSB250 or LSB231)
Equivalent s	PUB339

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces you to the clinical, theoretical and professional domains of podiatric practice. You will transition toward becoming a clinician by gaining experience in the QUT Health Clinics, as well as continuing your academic learning. The application of prior knowledge including anatomy, physiology, disease processes and the integration of new knowledge, is encouraged through a case-based approach. You will develop clinical skills, theoretical knowledge and an understanding of professional standards and protocols. You will also build essential skills such as a self-directed approach to learning and the ability to work as part of a team. Evidence-based practice is introduced in a podiatric context.

CSB522 Podiatric Medicine 2

Pre-requisites	(CSB521 or PUB339) and (CSB520 or LSB475) and CSB523
Equivalent s	PUB439
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit builds on the foundational knowledge and clinical skills acquired in Podiatric Medicine 1 and enables you to consolidate your skills and begin to effectively manage patients

under staff supervision. Your clinical decisions will be informed by physical and diagnostic examinations conducted within the framework of technological, ethical, financial and legal considerations and an evidence-based context. You will demonstrate clinical competencies at an introductory level and aligned with AHPRA's professional capabilities for podiatrists, professional guidelines and codes of conduct. Concepts in clinical biomechanics, foot disease and common foot conditions in adults are introduced and the content has been developed to enable you to integrate information from other units. You will increase your proficiency in examining and treating patients who have common foot conditions and continue to increase your awareness of the role of the podiatry profession in the community.

CSB523 Podiatric Clinical Gait Analysis

Pre-requisites	LSB235
Equivalent s	PUB362
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The evidence provided by gait analysis technology is quantitative and facilitates sound clinical decision making. In order to select and evaluate appropriate treatment interventions it is necessary to measure gait and determine

musculoskeletal and neurological factors that influence foot and leg disorders. Therefore the process of collection, selection, processing and case evaluation of gait analysis data is therefore fundamental and underpins the greater part of podiatry practice. It is important that these skills are acquired early in the course.

CSB525 Podiatric Medicine and Clinical Practice

Equivalent s	PUB442
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Podiatric Medicine and Clinical Practice has been specifically designed for students entering the graduate entry podiatry course who have completed a prior degree in a health-related field. The unit introduces the knowledge and clinical skills required for podiatry students who are commencing patient management at the QUT Podiatry clinic. This unit involves clinical placement which requires you to meet mandatory requirements for clinical placements detailed below. It is a 24 credit point unit equivalent to half of a full-time study workload. You will acquire foundational knowledge and skills in the areas of biomedical science (microbiology and lower limb anatomy), podiatric clinical biomechanics and gait analysis, podiatric medicine and podiatric clinical practice. The unit develops the

application of your knowledge and skills in these areas to enable your transition into the third year of the Bachelor of Podiatry the following semester.

CSB530 Pharmacotherapeutics for Podiatrists

Pre-requisites	LSB384 or PUB437 or CSB601
Equivalent s	LSB584
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will extend your knowledge of the pharmacology and the therapeutic use of the medicines administered and prescribed for the treatment of the disease states encountered in the scope of your professional podiatry practice in Australia. Selection of drugs and discussion of their therapeutic use by Podiatrists is based on the Clinical Practice Guidelines of the Podiatry Board of Australia, particularly Appendix B: List of Scheduled Medicines Approved by the Podiatry Board of Australia. Additionally, you will be introduced to resources available in Australia guiding you towards the appropriate selection and use of these medicines, including clinical trials and recognised clinical guidelines e.g. the Therapeutic Guidelines, Australian Medicines Handbook (AMH), Monthly Index of Medical Specialties better known as MIMS, Therapeutic Goods

Administration (TGA). Critical assessment of such resources is essential for the practice of Quality Use of Medicines.

CSB531 Radiographic Image Interpretation

Pre-requisites	CSB521 or CSB522 or CSB525 or PUB439 or PUB442. CSB521 or CSB525 can be studied in the same teaching period as CSB531
Equivalent s	PUB537
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In this unit you will integrate the theory of medical imaging with podiatry practice at a level corresponding to second, third and fourth year clinical exposure in preparation for entry to the work place. Diagnostic imaging is an integral part of contemporary podiatry practice. As a registered podiatry practitioner you are legally entitled to refer for plain radiographs, sonography for diagnostic purposes and can refer for magnetic resonance imaging and computerised tomography under specific circumstances. This unit is positioned in the course so that it can be studied in association with Podiatric Medicine 2, these subjects are closely interconnected in the clinical setting. The knowledge and skills covered in this unit are applied in various clinical settings on a regular basis. The unit helps to prepare you for the forthcoming challenges of complex case management

Units

where imaging can be required, these will be encountered in the third and fourth year clinics.

CSB532 Medicine

Pre-requisites	CSB522 or CSB525 or PUB439 or PUB442
Co-requisites	CSB530
Equivalent s	PUB438
Credit Points	12
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - SEM-1

Many of the patients treated by podiatrists present with co-morbidity which affects their foot health. This unit provides a medical basis for clinical practice in the 3rd and 4th years of the course. It provides you with insight into medical conditions, their effects on general and foot health, and an understanding of how appropriate foot care may be delivered with these factors in mind. You should be able to recognise and understand the related theory and clinical features, pathogenesis and significance of medical conditions likely to be seen in clinical practice. The podiatrist is constantly involved in the diagnosis and treatment of foot conditions in patients with associated medical comorbidity, particularly dermatological disorders which are also discussed in this unit.

CSB533 Podiatric Medicine 3

Pre-requisites	CSB522 or CSB525 or PUB439 or PUB442
Equivalent s	PUB539
Credit	12

Points	
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - SEM-1

This unit further develops professional understanding of the general and specific effects of medical and surgical conditions on the human foot. The clinical experience presented builds on the theory introduced in Podiatric Medicine 2. The unit allows you to further develop clinical practice skills by integrating content from other units such as Pharmacotherapeutics for Podiatrists, Disease Processes, Medicine, Radiographic Image Interpretation. In addition, you will be required to analyse theoretical models of podiatric biomechanics.

CSB536 Clinical Therapeutics for Podiatrists

Pre-requisites	CSB532 and (CSB530 or LSB584)
Co-requisites	CSH534
Equivalent s	PUB662
Credit Points	12
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - SEM-2

Clinical Therapeutics for Podiatrists builds on foundational studies in physiology, disease processes, medicine, podiatric medicine, pharmacology and pharmacotherapeutics. This unit recognises the need to equip you for the changing role of the podiatrist in managing podiatric conditions by prescribing medicines. You will

develop the theoretical and practical knowledge and skills necessary to safely prescribe and/or administer medications and restricted substances for treatment of podiatric conditions. You will collaborate with members of the health care team (pharmacists and medical practitioners) with reference to appropriate information resources. Podiatrists make complex clinical decisions that require the practitioner to consider legal, ethical, pharmacological, medical and patient factors as they determine the most efficacious therapeutic approaches to treatment. This unit provides a basis to acquire the practical skills to complete this task.

CSB538 Sports Medicine and Rehabilitation

Pre-requisites	(CSB522 and CSB531) or (CSB525)
Credit Points	12
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - SEM-1

Podiatrists encounter patients with a wide range of musculoskeletal problems and injuries related to diverse sports, exercise and health contexts. This unit provides you with a theoretical and practical background in sports and exercise medicine, including principles of diagnosis and case management, rehabilitation modalities, rehabilitation planning and evaluation, injury prevention, risk assessment in sport, and multi-disciplinary team care. The unit builds on a

thorough understanding of anatomy, physiology, pathology and biomechanics and is designed to provide students with the knowledge and skills required to manage patients with lower limb musculoskeletal injuries within clinical placements which occur later in the course.

CSB539 Podiatric Anaesthesiology and Surgery

Pre-requisites	CSB530 and CSB532 and CSB533
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is designed to provide you with the knowledge and skills associated with the safe administration of local anaesthetics and performance of minor surgical techniques. You will conduct client interviews and collect information relevant to both the health of the patient and their consent for the clinical procedure. You will also learn about the need, when appropriate, for additional examinations, tests and referrals to be initiated. Sterilisation standards at a national/international level will be implemented as part of your clinical experience. This unit provides you with the background knowledge and skills to implement podiatric surgical techniques. You will develop a level of competency commensurate with the safe use of local anaesthetics in clinical practice and the implementation of surgical skills and techniques. On

completion, you should understand the principles of relevant surgical protocols.

CSB541 Professional Placement 1

Pre-requisites	CSH545 or PUB739. CSH545 can be studied in the same teaching period as CSB541
Equivalent s	PUB738
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Workplace Integrated Learning (WIL) is integral to QUT's approach to teaching and learning. It meets the expectations of the Podiatry Board of Australia and the National Podiatry Competency Standards. Within Professional Placement 1 you must undertake external clinical placements in a variety of settings. Professional competency embodies the ability to transfer and apply skills and knowledge from one situation to another. Your confidence and resilience in approaching the challenges associated with placement must be developed. This is achievable through exposure to podiatry practice in diverse settings within the broader health care system. Preparing you to enter the workplace as a professional requires equipping you with the capacity for reflective practice and lifelong learning. This is the first of two professional placement units, within the final year of the podiatry degree.

CSB542 Professional Placement 2

Pre-requisites	CSB541 and (CSB545 or CSH545)
Equivalent s	PUB838
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Professional Placement 2 will build upon and broaden your clinical experience through exposure to a variety of Workplace Integrated Learning environments, while consolidating knowledge and skills acquired across the course. An appreciation of social determinants of health, foot health needs in the community, and the professional role and responsibilities of podiatrists in the community will be explored. You will experience team work and collaboration with a range of health professionals in an interdisciplinary environment. This unit will develop your capacity for reflection and form the basis for lifelong learning in professional practice, while consolidating knowledge and skills acquired across the course. This final semester unit is designed to prepare you for entry into the workplace upon graduation as a registered health professional.

CSB544 Transition to the Clinical Profession

Pre-requisites	CSB545 or CSH545
Equivalent s	PUB862
Credit Points	12
Campus	Kelvin Grove

Units

Availability
es **Kelvin Grove**
- SEM-2

In this final year unit, you will develop an understanding of the legal, regulatory, ethical, and professional requirements, responsibilities, and guidelines for practice in the public and private health sectors. As pre-professionals you will combine administrative and organisational skills to ensure the protection and enhancement of patient and workplace safety in the delivery of high-quality, person-centred, culturally responsive health care services. Essential knowledge is applied to real world scenarios to prepare you for the transition to the responsibilities of professional practice. This unit prepares you for the workplace by ensuring you can make effective professional decisions that consider your legal and professional responsibilities as well as the context of the patient and workplace.

CSB549 Podiatric Medicine 6

Pre-requisites	CSB545 or CSH545
Anti-requisites	PUB839
Equivalent s	PUB840
Credit Points	24
Campus	Kelvin Grove
Availability es	Kelvin Grove - SEM-2

In this final semester, you should demonstrate proficiency in integrating knowledge and skills obtained throughout the course, applying them in a supervised University podiatry clinic setting. Your clinical

decisions should be person centered, culturally responsive, and informed by ethical and legal frameworks and evidence-based medicine. National and international medical, orthopaedic, pharmacological and podiatric perspectives guide the design, implementation and evaluation of complex patient management plans. At this point in the course (capstone unit), you should demonstrate clinical competencies at a level commensurate with professional capabilities for podiatrists, professional guidelines and codes of conduct.

CSB601 Introduction to Clinical Therapeutics for Health

Pre-requisites	(LQB185 or LSB111 or LQB285 or LSB282 or LSB382 or LQD185) or ((LSB142 or LSB235) and (LQB281 or LSB250 or LSB231)) or (LSB142 and CSB520). (CSB520 or LQB185 or LSB111 or LQB285 or LSB282 or LSB382) can be enrolled in the same study period as CSB601
Credit Points	12
Campus	Kelvin Grove
Availability es	Kelvin Grove - SEM-1, SEM-2

Health practitioners play a variety of roles in relation to drug therapy for improved health outcomes in patients. Depending on your scope of practice with patients you care for, you might prescribe, dispense, administer or review and evaluate the effects of medicines. In order to assume these roles and responsibilities consistent with clinical,

professional, organisational and legislative requirements, knowledge of the pharmacology, clinical therapeutics and the principles of Quality Use of Medicines (QUM) must inform the health practitioner's medication decision-making. This unit forms a foundation for further clinical practice and will draw upon and expand your knowledge of body systems, physiology and disease processes that was taught in previous units.

CSH057 Image Interpretation

Pre-requisites	CSB041 and CSB044
Equivalent s	CSB057
Credit Points	12
Campus	Gardens Point
Availability es	Gardens Point - SEM-1

This unit builds on both theoretical knowledge and technical skills achieved in first and second year radiography, anatomy and pathology units and concentrates on application of this knowledge to practice. Image interpretation is an essential component of general radiographic skills, with a basic knowledge of the principles of imaging techniques, their clinical applications, responding to the acute and deteriorating patient and an appreciation of the appearances of major disease processes on diagnostic images a necessary requirement for radiographers. You will gain practical skills in image interpretation and this unit provides you with the

underpinning theory and practice. At this level you are expected to engage with the literature base in order to support your work and you will have specific support for this via the practical sessions.

CSH059 Advanced Imaging Applications

Pre-requisites	CSB037 and CSB048 and CSB049
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit further develops your knowledge, skills and application of advanced imaging and builds on the unit Medical Imaging Applications in Radiation Therapy. This unit provides you with a sound understanding of the use of advanced medical imaging within radiation therapy, prior to transitioning to the capstone units in fourth year.

CSH068 Advanced Imaging Practice 1

Pre-requisites	(CSH057 or CSB057) and (CSB058 or CSB053)
Equivalent s	CSB068
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the expected advanced knowledge level of your course and builds on the developmental activities in clinical reasoning and problem-solving from CSB057 Image Interpretation and CSB041 Specialised Imaging Techniques. This unit provides

you with opportunities to provide evidence of your clinical reasoning and problem-solving skills prior to transition to the capstone units in fourth year. This unit prepares you for the capstone units, CSB070 Transition to Professional Practice 1 and CSH080 Transition to Professional Practice 2. The unit content includes application of advanced knowledge to advanced imaging techniques and roles.

CSH074 Holistic Cancer Management

Pre-requisites	CSB069 and CSB094 and CSB095
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on the skills you have developed in previous academic and clinical units. This unit provides you with opportunities to develop your problem-solving skills and prepare you for the final clinical capstone units.

CSH075 Transitioning to Professional Practice 2

Pre-requisites	CSB078 and CSH074
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is a capstone unit/experience which provides a culminating learning experience occurring in the final year of a course that brings reflection and focus to the whole course experience

whilst, at the same time, leading you to transition into professional pathways and/or post-graduate study. This is the second of the transitional capstone units across the final year and requires you to integrate and apply your previously developed knowledge and skills in radiation therapy in a clinical context. You will consolidate your professional practice skills in workload management and clinical efficiency particularly in relation to simulation/CT, treatment planning and treatment. As you progress to a reflective ethical practitioner, this unit provides the opportunity for you to operate with an increasing level of intellectual independence whilst still under supervision.

CSH076 Advanced Quality Assurance

Pre-requisites	CSB078 and CSH074
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This capstone unit will integrate the knowledge and skills acquired from previous units to incorporate advanced quality assurance concepts in radiation therapy. You will investigate opportunities for data analysis and apply critical thinking and problem-solving skills to address risk management for radiation therapy incidents. This unit aims to consolidate the planning and treatment units by incorporating Quality Control (QC) and Quality Assurance

(QA).

CSH077 Research Project in Contemporary Clinical Practice

Pre-requisites	CSH077-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Medical imaging practice is a rapidly advancing field and research has a place in informing professional practice. This final year unit further develops your research skills in conducting a research project to source new knowledge applicable to contemporary clinical practice. You will apply the skills developed in both CSH600 Evidence-Based Clinical Practice and PUB561 Statistical Methods in Health to complete an individual research project of relevance to contemporary professional practice in medical imaging.

CSH077 Research Project in Contemporary Clinical Practice

Pre-requisites	CSH600 and CSB067
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Medical imaging practice is a rapidly advancing field and research has a place in informing professional practice. This final year unit further develops your research skills in conducting a research project to source new knowledge applicable to contemporary clinical practice. You will apply the skills developed in both

CSH600 Evidence-Based Clinical Practice and PUB561 Statistical Methods in Health to complete an individual research project of relevance to contemporary professional practice in medical imaging.

CSH080 Transition to Professional Practice 2

Pre-requisites	CSB070 and CSB071 and (CSH068 or CSB068)
Equivalent s	CSB080
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the second of the transitional capstone units and requires you to integrate and apply your previously developed knowledge and skills in medical imaging in a clinical context. The unit focuses on professional approaches to the scope of clinical practice and includes online learning activities. You will consolidate your professional practice skills in workload management and clinical efficiency particularly in relation to general radiography and minor procedures with an emphasis on Aboriginal and Torres Strait Islander cultures and cultural safety in the Australian healthcare setting. As you progress to a reflective ethical practitioner, this unit provides the opportunity for you to operate with an increasing level of intellectual independence whilst still under supervision.

CSH081 Advanced Imaging Practice 2

Pre-requisites	CSB041, (CSH057 or CSB057), and (CSH068 or CSB068)
Equivalent s	CSB081
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This capstone unit will integrate the knowledge and skills acquired from previous units in imaging investigations to advanced imaging applications. The unit integrates the skills and knowledge in clinical reasoning and problem solving previously developed across the curriculum, particularly in regard to advanced scope of practice roles. This unit provides you with opportunities to provide evidence of your safe practice and radiographic imaging skills, clinical reasoning and problem-solving skills prior to completion of your course.

CSH466 Pharmacist Prescribing

Pre-requisites	CSB454 and CSB456 and CSB451 and CSB455
Co-requisites	CSB464 and CSB465
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on the patient-centred care units to further develop knowledge and skills within the National Prescribing Service (NPS) prescribing competencies, to prepare students to be future pharmacist prescribers. The context will build from

prescribing of pharmacy and pharmacist only medicines, towards the full scope of medicine prescribing (for when this is legally authorised). This unit will lead into the 4th year capstone units CSH471 Advanced Clinical Practice 1, and CSH481 Advanced Clinical Practice 2. It will provide you with stepping stones to advance your clinical skills, preparing for your core practice in routine situations by developing the technical, clinical, personal and professional skills relevant to the day-to-day practice, and forming the basis of an advanced pharmacy practice framework.

CSH471 Advanced Clinical Practice 1

Pre-requisites	CSB464, CSB465 and CSH474. CSH474 may be studied in the same teaching period as CSH471.
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is in the fourth year of your course, and builds on your acquired knowledge and skills of your previous units of study and leads into CSH481 Advanced Clinical Practice 2, and aligns with CSH472 Business of Healthcare. It will provide you with stepping stones to advance your clinical skills, preparing for your core practice in routine situations by developing the technical, clinical, personal and professional skills relevant to the day-to-day practice, and forming the basis of an

advanced pharmacy practice framework.

CSH472 Business of Healthcare

Pre-requisites	CSB464 and CSB465
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit consolidates students' knowledge of business management concepts from previous study in the undergraduate pharmacy program, and delivers theoretical content on more advanced level business concepts. The unit will provide authentic real world learning to facilitate the application of business management concepts to contemporary and future sustainable pharmacy practice.

CSH474 Applying Research in Practice 1

Pre-requisites	CSH600 or CSB600
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is a culminating learning experience occurring in the final year of your course that brings reflection and focus on evidence based practice, research and the provision of effective care. Fostering your research skills which you will use for your project during placement in a range of professional practice settings (in CSH471), aligns with the National Competency Standards Framework for

Pharmacists.

CSH477 Evidence-based Healthcare: Practice informing research 1

Pre-requisites	CSH600 and CSB444 and CSH474. CSH474 can be studied in the same teaching period as CSH477
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In the fourth year of your study program, this unit is grounded in basic science, consolidating your knowledge and research skills. It is about practice informing /driving research to investigate a clinically relevant question relating to pharmaceutical research and future therapies. You will put into practice basic science concepts from previous learning, in the wider context of sustainability and innovation, and critically apply your knowledge and skills in advanced drug development and delivery to address a clinical need.

CSH481 Advanced Clinical Practice 2

Pre-requisites	CSH471 and CSH484. CSH484 can be studied in the same teaching period as CSH481
Co-requisites	CSB487
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit integrates your accumulated knowledge, skills and expertise while emphasising your capacity to

contribute to health care, and the attributes and behaviours associated with being job-ready. It will build on CSH471 to advance your clinical and research skills which are registerable competencies for pharmacists. Your core practice in routine and emerging practice will develop the technical, clinical, personal, professional and researcher skills relevant to contemporary pharmacy practice. You will apply skills and knowledge you have acquired from the research methods units CSH474 and CSH484. You will develop your understanding of your role as a pharmacist through experiential learning over a four week period, which will include completing an independent quality use of medicines (QUM) research project.

CSH484 Applying Research in Practice 2

Pre-requisites	CSH474
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is a final semester (capstone) unit that brings reflection and focus on evidence based practice, research, and the provision of effective care. It utilises the skill sets that were introduced in CSH474 and further develops these research skills providing approaches to publishing data and obtaining research funding. This unit extends from previous units that have introduced research

methodology (CSH474) and have incorporated research projects and data acquisition (e.g. QUM placement project CSB471). It also aligns with activities run in adjacent units (CSH488) to provide additional support in research methodology. Research skills are a registerable competency in your future role as a pharmacist, so this unit provides opportunities for you to refine your critical evaluation skills to address knowledge gaps, identify areas for innovation and advances in practice.

CSH488 Evidence-based Healthcare: Practice informing research 2

Pre-requisites	CSH477 and CSH484. CSH484 can be studied in the same teaching period as CSH488
Anti-requisites	CSH489
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In the fourth year of your study program, this unit explores current research thinking that supports pharmacists to practice to their full scope of expertise e.g. cognitive service delivery to enhance human health and well-being. This unit aims to utilise the critical and creative thinking skills you have to date, to conceptualise and problem-solve contemporary research topics relevant to pharmacy practice.

CSH534 Podiatric Medicine 4

Pre-requisites	CSB533
----------------	--------

Equivalent s	PUB639, CSB534
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit will extend your clinical expertise by fostering independent case investigation, communication and clinical case management. This unit will provide exposure to the treatment of complex cases requiring higher order problem solving ability and the ability to link information from your previous studies. Diagnostic skills will be developed with a wider range of patients being treated and the specialised study of disciplines such as dermatology, surgery and radiology further integrating academic and clinical studies. You will be expected to successfully implement a range of treatments and consolidate skills acquired in operative mechanical, chemical and physical therapies. Treatment within the areas of paediatrics and diabetes, including therapeutic intervention will be emphasised. You will demonstrate clinical competencies at a developing level and aligned with AHPRA Professional capabilities for podiatrists, professional guidelines and codes of conduct.

CSH545 Podiatric Medicine 5

Pre-requisites	(CSH534 or CSB534) and CSB538
Anti-requisites	
Equivalent	PUB740, CSB545

Units

s	
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In this final year unit, you will be required to integrate and synthesise knowledge, practical, clinical and problem-solving skills acquired across the course. Clinical decisions are informed by relevant physical and clinically appropriate diagnostic examinations conducted within the framework of technological, ethical, financial and legal considerations and an evidence-based context. National and international medical, orthopaedic, pharmacological and podiatric perspectives guide the design, implementation and evaluation of complex patient management plans. Your transition to pre-professional practice begins as you perform these tasks at a range of clinical facilities with close supervisor support. You will gain experience in the management of the high risk foot as well as paediatric, musculoskeletal, surgical and general conditions of the lower limb as part of your placement rotations during semester.

CSH547 Current Theory of Podiatric Medicine

Pre-requisites	(CSH534 or CSB534) and (CSH545 or CSB545). (CSH545 or CSB545) may be studied in the same teaching period as CSH547.
Equivalent s	
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This final year unit integrates a broad scope of advanced podiatric medicine knowledge. Health professionals are required to integrate a large body of specialised knowledge in their day to day clinical decision making processes. Skills in ongoing learning and research are essential for continuing professional development and improvement of clinical practice. Theory covered in this unit supports the companion clinical units, Podiatric Medicine 5 and Professional Placement 1, which are comprised largely of diverse Work Integrated Learning experiences inclusive of external placement sites and the on campus QUT Health Clinic.

CSH548 Podiatric Medicine 6 for Honours

Pre-requisites	CSH545 or CSB545
Equivalent s	CSB548
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In this final year honours unit, you will demonstrate proficiency in integrating and synthesising advanced knowledge, practical, clinical and problem-solving skills acquired across the course. Your clinical decisions should be person centered, culturally responsive, and informed by ethical and legal frameworks and evidence-based medicine.

National and international medical, orthopaedic, pharmacological and podiatric perspectives guide the design, implementation and evaluation of complex patient management plans. Your transition to professional practice begins as you perform these tasks in supervised on-campus clinical settings. You will demonstrate competencies at a level expected of a new graduate and commensurate with AHPRA's Professional Capabilities for Podiatrists, professional guidelines and codes of conduct. You will undertake placement rotations in all clinical areas of podiatry during semester.

CSH600 Evidence-Based Clinical Practice

Pre-requisites	CSB111
Equivalent s	PUB384, CSB334, CSB600
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1, SEM-2 Online - SEM-1

The volume of medical and health care literature now available is significant and increases exponentially every year. As a practising health care professional, you will be expected to systematically inform your practice using sound scientific methods. Developing a skill set which allows you to identify the best available evidence and apply it judiciously to inform practice improvement is critical to fulfilling your role as a health care professional. Students

under the International Articulation Agreements with the Bachelor of Paramedic Science Course will be contacted about your enrolment into this unit.

CSN021 Cardiac Ultrasound 1

Pre-requisites	CSN025. CSN025 can be studied in the same teaching period as CSN021
Equivalent s	PCN155
Credit Points	12
Campus	Online
Availabilities	Online - SEM-1

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit of the course provides a detailed understanding of the two-dimensional, M-mode, spectral and colour Doppler components of the adult examination. It also provides detailed knowledge of cardiac anatomy and physiology and electrocardiographic (ECG) interpretation.

CSN022 Cardiac Ultrasound 2

Pre-requisites	CSN021 and CSN031. CSN031 can be studied in the same teaching period as CSN022.
Credit Points	12
Campus	Online
Availabilities	Online - SEM-2

The field of medical ultrasound is scientifically based in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography)

is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of CSN021 Cardiac Ultrasound 1 by introducing the principles and clinical applications of Doppler Echocardiography in the assessment of the adult heart, as well as basic haemodynamic principles and calculations. In addition, professional issues including ethical and legal considerations in the cardiac sonography profession are considered. The importance of cultural safety in the healthcare setting is explored, specifically focussing on Aboriginal and Torres Strait Islander and New Zealand Indigenous perspectives.

CSN023 Cardiac Ultrasound 3

Pre-requisites	(CSN022 or PCN259) and (CSN031 or PCN497-2)
Equivalent s	PCN359
Credit Points	12
Campus	Online
Availabilities	Online - SEM-1

This unit extends and builds on the content of CSN021 Cardiac Ultrasound 1 and CSN022 Cardiac Ultrasound 2 by introducing concepts and techniques of the more complex haemodynamic calculations and by discussing the applications of these techniques in the evaluation of cardiac valvular disease and prosthetic heart valves and complications.

CSN024 Advanced Cardiac Ultrasound

Pre-requisites	CSN023 and CSN032
Credit Points	12
Campus	Online
Availabilities	Online - SEM-2

This unit extends and builds on the content of units CSN022 and CSN023 by introducing more advanced applications of echocardiography. In particular, this unit covers the role of echocardiography in the assessment of complex cardiac diseases such as pericardial disease, cardiac masses, systemic diseases with cardiac involvement and congenital heart defects. This unit also explores the roles of other cardiac diagnostic imaging methods that are complementary to echocardiography.

CSN025 Principles of Medical Ultrasound

Equivalent s	PCN162
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Online - SEM-1, SEM-2

The field of medical ultrasound is scientifically based in an environment that is rapidly changing and undergoing considerable technological advancement. Understanding the physical processes of ultrasound, the equipment design features and the interactions of sound in human tissue are essential for professionals working in this field. This unit is offered as a

foundation unit early in the program to ensure you have a fundamental understanding of the physical principles of ultrasound; the knowledge gained can then be applied directly to practice and to other units offered in the ultrasound courses.

CSN026 Ultrasonic Examination 1

Pre-requisites	CSN025
Credit Points	12
Campus	Online
Availabilities	Online - SEM-1

Specialised knowledge of the diagnostic potential of medical ultrasound imaging is essential for the operator to perform effective examinations. This unit provides a detailed understanding of the fundamental ultrasound examinations of the abdomen and pelvis. It is offered in the first semester to ensure you obtain a comprehensive understanding of these primary skills before progression to more advanced techniques.

CSN027 Ultrasonic Examination 2

Pre-requisites	CSN025
Credit Points	12
Campus	Online
Availabilities	Online - SEM-2

Specialised knowledge of the diagnostic potential of medical ultrasound imaging is essential for the operator to perform effective examinations. This unit builds on the content of the

unit CSN026 Ultrasonic Examination 1 introducing more advanced ultrasound examinations that are encountered in clinical practice. This unit includes the ultrasound techniques used to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology. It also describes the basic ultrasound techniques used in the 1st, 2nd and 3rd trimester of pregnancy. These topics are offered in the second semester of the course so that you have had time to understand the fundamentals of Medical Ultrasound which are outlined in the subjects CSN026 Ultrasonic Examination 1 and CSN025 Principles of Medical Ultrasound.

CSN028 Advanced Ultrasound Topics 2

Pre-requisites	CSN026 and CSN027
Credit Points	12
Campus	Online
Availabilities	Online - SEM-1

Specialised knowledge of the diagnostic potential of medical ultrasound imaging is essential for the operator to perform effective examinations. This unit extends and builds on the content of the units CSN026 Ultrasonic Examination 1 and CSN027 Ultrasonic Examination 2 and covers Vascular and Musculoskeletal topics. This unit is offered in the second year of the course in order for you to apply knowledge gained in the first

year to more advanced topics.

CSN029 Advanced Ultrasound Topics

Pre-requisites	CSN026 and CSN027
Credit Points	12
Campus	Online
Availabilities	Online - SEM-1

Specialised knowledge of the diagnostic potential of medical ultrasound imaging is essential for the operator to perform effective examinations. This unit extends and builds on the content of the units CSN026 Ultrasonic Examination 1 and CSN027 Ultrasonic Examination 2. This unit is offered in the second year of the course in order for you to understand the basics of Medical Ultrasound which are outlined in the subjects CSN026 Ultrasonic Examination 1, CSN025 Principles of Medical Ultrasound and CSN027 Ultrasonic Examination 2.

CSN031 Cardiac Ultrasound Clinical Practice 1

Pre-requisites	CSN021 and CSN022. CSN022 can be studied in the same teaching period as CSN031
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Online - SEM-2, SEM-2

This unit is the first of three units in which you will progressively develop your clinical practice and experience. This unit builds on basic skills, knowledge and abilities gained in the unit

Units

CSN021 Cardiac Ultrasound 1. In this unit, basic instrumentation skills are refined and expanded, and echocardiographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are evaluated by QUT academic staff and QUT approved clinical supervisors, in consultation with QUT academic staff.

CSN032 Cardiac Ultrasound Clinical Practice 2

Pre-requisites	CSN031 and CSN023. CSN023 can be studied in the same teaching period as CSN032.
Equivalent s	PCN597-1, PCN597-2
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Online - SEM-1, SEM-1

This unit provides the second opportunity in the course for you to be involved in extensive clinical experience that is complementary to all other units in the course. This unit further builds your skills, knowledge and abilities gained in the unit CSN031 Cardiac Ultrasound Clinical Practice 1. Your specialist skills will be further refined and expanded, and advanced echocardiographic skills will be developed through employment and training in a QUT approved clinical department.

CSN033 Medical Ultrasound Clinical Practice 1

Pre-requisites	CSN025
Credit	12

Points	
Campus	Online
Availabilities	Online - SEM-2

In this unit, the specialised sonographic skills are developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff. Your skills as a student sonographer will be developed from a novice level to an advanced beginner. This unit is offered in the second semester of the first year of the course in order for you to thoroughly develop the necessary sonographic techniques required for many routine ultrasound examinations.

CSN034 Medical Ultrasound Clinical Practice 2

Pre-requisites	CSN033
Credit Points	12
Campus	Online
Availabilities	Online - SEM-2

This unit builds on the skills, knowledge and abilities gained in CSN033 Medical Ultrasound Clinical Practice 1. In this unit, sonographic skills are refined and expanded with more advanced skills developed through employment and training in a QUT approved clinical department. Clinical skills are developed and evaluated by QUT approved clinical supervisors, in consultation with QUT academic staff. This unit is

offered in the second semester of the second year of the course in order for you to thoroughly develop the necessary sonographic techniques required for many advanced ultrasound examinations.

CSN035 Cardiac Ultrasound Clinical Practice 3

Pre-requisites	CSN032 and CSN023
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Online - SEM-2, SEM-2

This unit provides the third opportunity in the course for extensive clinical experience that is complementary to all other units in the course. This unit builds on skills, knowledge and abilities gained in the unit CSN032 Cardiac Ultrasound Clinical Practice 2. Your specialist skills will be further refined and expanded, and advanced echocardiographic skills will be developed through employment and training in a QUT approved clinical department. During this clinical placement you will be working more autonomously, with minimal supervision while delivering the highest level of patient care.

CSN036 Foundations of Ultrasound Imaging

Credit Points	12
Campus	Online
Availabilities	Online - SEM-2

This foundational unit will introduce the sonographic profession, regulatory bodies

and professional standards, and equips practitioners with basic skills to perform high-quality, patient-centred ultrasound examinations. A particular emphasis of this unit is to provide a foundation for practical knowledge and skills. You will also obtain insights into the importance of scan ergonomics, sonographic anatomy and scientific literacy as they apply to the sonography profession. It is offered in the first semester to ensure you understand these primary skills before progressing to more advanced techniques.

CSN500 Clinical Therapeutics for Health

Credit Points	24
Campus	Online and Kelvin Grove
Availabilities	Online - SEM-2, SEM-2

The Clinical Therapeutics unit provides you with a sound knowledge of biomedical science, pharmacology and therapeutics in the context of professional practice. The unit provides essential foundational knowledge in therapeutics and areas of assessment, diagnostics and management including quality use of medicines. It utilises contemporary resources, such as modules from the National Prescribing Service as well as relevant guidelines. The unit provides knowledge and skills for the safe prescribing of scheduled medicines by health practitioners. To equip health professionals with knowledge, skills and expertise required to contribute to the development

of management and evaluation practices, such as the use of scheduled medicines.

CSN501 Podiatric Therapeutics 2

Pre-requisites	CSN500
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-1

This is the second unit in the Podiatric Therapeutics course. This unit builds on the theoretical concepts introduced in Podiatric Therapeutics 1 (CSN500) and requires a sound understanding of physiology, disease processes, medicine, pharmacology and pharmacotherapeutics. The unit provides you with a practical understanding of the use of scheduled medicines in the therapeutic management of foot and related lower limb disorders. Podiatrists make therapeutic decisions that require consideration of legal, ethical, financial, pharmacological, medical and patient factors before delivering the most efficacious, safe and appropriate treatment, including no treatment. This unit will equip you with the skills necessary to utilise scheduled medicines in clinical practice, including how and when collaboration with members of the health care team is required and how to access appropriate information resources to guide therapy.

CVB101 General Chemistry

Anti-requisites	CZB190
-----------------	--------

Equivalent s	SCB111
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM6C External - XCH-1, XCH-2

This foundation chemistry unit covers the core concepts and laboratory practices that we use to define the nature of atoms and the different forms of matter, to quantify chemical reactions & chemical reaction processes through the application of thermochemistry, kinetics and chemical equilibria. The understanding of these chemical concepts is essential to knowing why matter in our universe exists in specific forms and how it transforms. This knowledge is the foundation upon which the other scientific disciplines and applied disciplines are based. This is an introductory unit. The knowledge and skills developed in this unit are relevant to both chemistry major students and non-majors alike. CVB102 Chemical Structure & Reactivity builds on this unit by focusing on applications to chemical reactions and their relationship to chemical structure, with a particular focus on organic chemical synthesis and laboratory practices and reporting requirements with regards to organic chemistry.

CVB102 Chemical Structure and Reactivity

Anti-requisites	CZB190, CZB191, CVB103
Equivalent	SCB121

Units

Equivalent s	
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM6D External - XCH-1, XCH-2

Chemistry relates to all aspects of our lives. An understanding of chemistry is necessary to make sense of our world and to address the global challenges faced by our society. Together with its companion unit, CVB101 General Chemistry, this unit provides you with a foundation in the science of Chemistry. It focuses on how atoms bond to form molecules, and the models chemists use to understand molecular structure. You will learn how to predict the reactivity and properties of molecules and will get a foundational introduction to organic and biological chemistry. You will develop your ability to apply theoretical knowledge and critical thinking to solving chemical problems. You will also complete a suite of laboratory practical experiments, where you will develop professional skills in chemical manipulation, analysis, safe laboratory practices, data recording and analysis. This unit is a foundation for higher-level courses in organic chemistry, materials science and biochemistry.

CVB201 Inorganic Chemistry

Pre-requisites	(CVB101 and CVB102) or ((CVB102 or CVB103 or CZB190) and admission to ST20)
Anti-requisites	PCB334

Equivalent s	PQB331
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

The fascinating and diverse chemistry of transition metals and main group elements is explored in detail from the fundamentals of electronic structure and bonding through to metal complex structure, symmetry, isomerism and chirality, magnetism, reaction mechanisms and molecular orbital theory. Learning is enhanced through a range of practical laboratory activities that enable understanding of theory through experiment. Core laboratory skills in the handling and synthesis of a wide variety of metal complexes will be developed and techniques such as magnetometry, UV-visible spectroscopy and spectropolarimetry will be introduced and used to discern metal complex structure and function. The knowledge and skills developed in this unit underpin further studies in physical, organic and coordination chemistry.

CVB202 Analytical Chemistry

Pre-requisites	((CVB101 or CZB191) and (CVB102 or CZB191)) or ((CVB102 or CVB103 or CZB190) and admission to ST20)
Equivalent s	PQB312
Credit Points	12
Campus	Gardens Point, EXCHANGE and External

Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2
----------------	--

This unit introduces modern chemical analysis, including some standard instrumental techniques, which are firmly linked to the theory and practice of the discipline in a modern, working laboratory. You will gain essential analytical and deductive skills for chemical science as well as laboratory-based experience in sampling, treatment of samples, principles and practice of making high-quality chemical measurements with chromatographic and spectroscopic instrumentation. This unit further develops your knowledge and technical laboratory skills in chemical instrumentation and analysis. It links to the work previously undertaken in CVB101 General Chemistry and prepares you for the final semester major capstone unit CVB304 Chemistry Research Project.

CVB203 Physical Chemistry

Pre-requisites	((CVB101 and CVB102) or ((CVB102 or CVB103 or CZB190) and admission to ST20)
Anti-requisites	PCB354, PCB405
Equivalent s	PQB401
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This is a developmental unit that covers concepts that determine how chemical

systems behave. It covers the discrete nature of atoms and molecules through spectroscopy, and develops understanding of the thermodynamics and kinetics of chemical processes. Theoretical and practical-based approaches are to develop understanding of the nature of the physical properties and dynamic transformations of matter essential to all branches of chemistry and to other disciplines based on physical materials, or that use and rely on chemical reactions. This unit builds on knowledge and practical skills introduced in CVB101 General Chemistry, it expands on the concepts introduced in CVB101 and prepares for CVB302 Applied Physical Chemistry.

CVB204 Organic Structure and Mechanisms

Pre-requisites	((CVB101 or CZB191) and (CVB102 or CZB191)) or ((CVB102 or CVB103 or CZB190) and admission to ST20)
Anti-requisites	PQB401
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Build on the organic chemistry knowledge and laboratory skills gained in CVB101 and CVB 102. The deeper understanding of reaction mechanisms, instrumental characterisation and stereochemistry are important in facets of all subsequent chemistry units. Perhaps most importantly, this

unit will be used as the foundation for advanced studies in organic chemistry in CVB 301 Organic Chemistry: Strategy for Synthesis. To successfully complete this unit you will: -Describe the electronic effects and mechanistic concepts which govern the reactions of organic compounds. -Predict the outcome of a set of reaction conditions when applied to organic compounds. -Design syntheses based on the major functional groups. -Deduce the solution of synthetic problems in organic chemistry -Apply modern spectroscopic techniques as an aid to structure elucidation - Demonstrate a range of practical skills in safe laboratory practice applied to the synthesis, isolation and purification of organic compounds.

CVB210 Chemical Measurement Science

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit introduces students to the principles and methods of making quality measurements in the context of chemical analysis and calibration. Students will gain relevant 'hands-on' experience from the practical and workshop programs, which will enable them to understand the theory in the context of 'real world' examples. The practical component involves a representative examples of wet-chemical and instrumental

exercises that provide an introduction to Analytical Chemistry and practical experience for students pursuing any area of Science, Health and Engineering that needs quantitative chemical measurements. Skills developed in the unit will be important for students aiming gain an understanding of the internationally-recognised quality framework for chemical testing and calibration, the ISO/IEC 17025.

CVB212 Industrial Analytical Chemistry

Pre-requisites	((CVB101 and CVB102) or ((CVB102 or CVB103 or CZB190) and admission to ST20)
Equivalent s	PQB313
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The modern chemical industry requires comprehensive analytical measurement relating to raw materials, process streams and outputs in order to control quality and to confer error prevention. This unit further develops your knowledge and technical laboratory skills in chemical instrumentation and analysis in applications relevant to the chemical industry. It links to the work previously undertaken in CVB101 General Chemistry and prepares you for the final semester major capstone unit CVB304 Chemistry Research Project. This unit aims at extending your foundational chemistry in areas of chemical applications that are relevant to

the industry. In particular, this unit provides you with the theoretical knowledge and practical capabilities for chemical analysis and measurements that are widely used in industrial analytical laboratories as well as outlining the future direction of this area.

CVB215 Criminalistics and Physical Evidence

Equivalent s	SCB384
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces the current technologies used by crime scene investigators to investigate crime scene and identify evidence. This unit will introduce the students to the realm of forensics and its role in criminal investigations. The student will be introduced to the fundamentals of chemical and physical sciences used for evidence collection, preservation and analysis. The unit will bring to the students hands-on experience in crime scene investigations, questioned documents and fingerprinting.

CVB216 Forensic Chemistry

Anti-requisites	PQB684
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Forensic Chemistry is dedicated to the screening and quantification of any substance, compound or

material that may be abused or cause harm to humans, environment or infrastructure. A forensic chemist is a professional chemist who analyzes unknown substances and other forms of evidence using advanced chemical technologies. The forensics scientist uses in-depth scientific knowledge to interpret the analysis results and arrive to correct non-biased conclusions on the evidence. In the Forensic Chemistry unit, students will gain expertise in all the major branches of chemistry (organic, inorganic, physical and especially analytical & bio-analytical) as related to forensic investigations. The analytical aspect of the course has been broadened from a more traditional chemistry focus to include modern and special types of analysis of importance to forensic science.

CVB217 Digital Forensics

Equivalent s	PQB584
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cyberspace is increasingly turning into a place where criminal acts are committed. This requires law enforcement agencies, businesses and other organizations to develop new competences. The evolving sophistication of computer crime, together with the methods and tools required to detect and deal with it, demand the timely development underlines the

need for forensic scientists with relevant IT skills required by employers. In the case of forensic computing, there are two main areas of possible employment. Firstly, the police force with its need to develop high technology crime units, and secondly the private companies that wish to deal with a variety of illegal behaviour involving their technology. Both areas are predicted to grow quickly in the coming years and it is expected that the job market for graduates skilled in forensic computing will grow concomitantly. This unit will introduce you to a new area of next generation forensics.

CVB218 Drug Discovery and Design

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This unit investigates the evolution of the pharmaceutical industry, modern drug discovery methods and drug targets and explores the concept of chemical structure in relation to drug properties and drug design. The unit provides knowledge and skills at the interface between chemistry and biology relating to the drug discovery process. As the pharmaceutical industry represents a large international concern, offering many employment opportunities, and there is also significant growth in the bio-economy, dealing

with bioactive molecules such as food additives and supplements, cosmetics, pesticides and other agricultural bio-chemicals, it is important for students to develop a broad appreciation of the pharmaceutical industry at large. This unit builds on foundation chemistry and biology knowledge as part of the Medicinal Chemistry and Biology minor and complements the BVB212 Drug Action unit.

CVB222 Forensic Analysis of Bio-active Compounds

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides an introduction to the basics of bio-analytical methods used for the detection and identification of bio-active substances in different matrices. The methods are demonstrated to bio-active compounds that are frequently encountered in pharmaceutical, forensic, molecular diagnostics and environmental industries. The unit will introduce modern instrumental analytical platforms such as spectroscopy, chromatography, electrophoresis, nanosensors and immunoassay.

CVB225 Forensic Biology and Analytical Toxicology

Anti-requisites	LQB680, PQB680
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

es - SEM-2

The extensive use of biological evidence to identify victims and offenders as well as indicate attempts to control victims prior to abuse or attack has had a significant bearing on the course of law enforcement investigations, criminal court proceedings, and victim service providers. DNA and toxicology evidence have become a highly influential piece of the crime puzzle. You will be introduced to the concepts of DNA profiling and analytical toxicology and their applications in forensic case work. You will develop the necessary skills for analysing and interpreting DNA and toxicology evidences and be introduced to the basic concepts of forensic anthropology. This learning will be through the study of the theory, hands-on practices relevant to real life scenarios as well as training on the forensic interpretation of the evidence.

CVB301 Organic Chemistry: Strategies for Synthesis

Pre-requisites	(CVB101 and CVB102 and CVB204) or (CVB204 and admission to ST20)
Equivalent s	PQB531
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Learn skills in the synthesis of organic molecules and an analysis of the nature of the reaction mixtures and products

generated. Apply the principles of synthetic design, using their knowledge of a range of synthetically useful organic reactions and the concept of retrosynthesis. You will learn to evaluate experimental data qualitatively and quantitatively, especially with regard to IR and NMR spectroscopic data, and use this knowledge to deduce and explain conclusions based on logical arguments. You will be able to use creative design strategies to overcome common synthetic organic problems by applying the principles of protecting group strategies and selectivity in organic synthesis. The application of practical skills in safe laboratory practice relating to the principles of synthesis, isolation and purification of organic compounds will allow you to demonstrate their capabilities as well as develop skills to document their findings in an appropriate work orientated format.

CVB302 Applied Physical Chemistry

Pre-requisites	CVB203
Equivalent s	PQB502
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Physical chemistry is a discipline of chemistry in which the physical factors which govern chemical reactions and interactions are described, quantified and explored. This

unit will explore the effects of the underlying principles of thermodynamics and kinetics to chemical and physical processes which commonly occur around us. The principles that govern the macroscopic behavior of solids, liquids and gases, the fundamental physical properties which determine the extent of reaction and the speed with which it occurs will be explained. These thermodynamic principles are extended to mixtures, the properties of solutions, polymeric systems and electrochemistry which all play a very important role in the world around us.

CVB303 Coordination Chemistry

Pre-requisites	CVB201
Equivalent s	PQB631
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Coordination chemistry - the chemistry of transition metal complexes - encompasses aspects of organic, physical and transition metal chemistry. Deep understanding of the electronic structure of these remarkable compounds is developed along with an exploration of fascinating topics of current international research interest including organometallic compounds, bioinorganic chemistry, coordination polymers, metal-

organic-frameworks (MOFs) and other metallo-supramolecular species. Synthesis and characterisation skills are honed through laboratory exercises drawing on knowledge developed throughout the chemistry major including magnetometry, thermogravimetric analysis and UV-visible, infrared and NMR spectroscopy.

CVB304 Chemistry Research Project

Pre-requisites	CVB202 and CVB302
Co-requisites	CVB303 or CVB301
Equivalent s	PQB642
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In this unit you will be engaged on a chemistry project that is selected from a range of topics in exciting new areas of relevance to modern chemistry and chemical technology. Examples may include, but are not necessarily limited to nanotechnology, drug design, free-radical chemistry and trace metal speciation in environmental and biological systems. The unit will involve a self-directed project in which you synthesize the knowledge, skills and techniques developed during your chemistry major. In the process, you will be expected to critically review relevant literature sources, demonstrate understanding and depth of knowledge and provide a clear, coherent communication of the

chemical project outcomes. The project will provide you with the opportunity to articulate societal and ethical implications of the profession of chemistry as part of the written project report.

CVB313 Environmental Analytical Chemistry

Pre-requisites	CVB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Environmental Analytical Chemistry provides the tools and techniques necessary to make quantitative measurements of the extent of environmental alteration by natural or man-made activities. Principal areas of study include the chemical evaluation of air quality; water quality; soil and sediment contamination; and pesticide residue contamination in agriculture. Students will gain an understanding of the relevant methods of analyses through the lectures and a complementary laboratory practical program. This will allow students to develop technical skills such as: sample collection and treatment; use of modern instruments, including receptor modelling, atomic spectrometric and IC instruments for inorganic elemental analysis, GC, GC-MS and HPLC instruments for organic components. Experience gained in the unit will be important for students seeking positions in environmental protection

Units

agencies, environmental laboratories and environmental consultancy.

CVB320 Instrumental Analysis

Pre-requisites	CVB202
Equivalent s	PQB513
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Modern instrumental methods are capable of producing large quantities of data and it is becoming common practice to use data driven chemometric and cheminformatics techniques as an adjunct to instrumental analysis. These techniques are introduced through a project-based investigation of bio-analytically related datasets where you develop understanding of applications of instrumental analysis and further develop your analytical thinking, problem-solving, communication and deductive skills using real-world examples. This unit builds upon the theoretical and practical framework for chemical analysis in the unit CVB202 Analytical Chemistry to develop advanced instrumental and analysis techniques for modern laboratory practice.

CWB101 Communication and Composition: Introduction to Academic Writing

Equivalent s	KWB110
Credit Points	12

Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit introduces you to the conventions and practices of academic writing. It develops an understanding of how to interpret and analyse information and to argue a case based on evidence and logic. The unit also helps build your understanding of information literacies, research skills and how to evaluate evidence. Academic writing is an essential skill that you need to succeed in your university program, as academic writing underpins assessment tasks in all university degrees. This unit is placed in your first year to ensure that you have the necessary writing skills to complete your assessment at a high standard throughout your course of study.

CWB102 Influence and Persuasion

Equivalent s	KWB115
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This foundational unit provides you with the theories, techniques and practices of analysing and creating persuasive texts. It introduces the theory and practice of persuasive communication across a number of genres to enhance your writing and communication skills. Persuasion and persuasive

appeals are an integral (if often unconscious) element of professional communication. Advances in technology have made persuasion a pervasive element of contemporary communication, both personal and professional. Therefore, as a professional communication practitioner, you should be able to understand the principles of persuasion, use the vocabulary of persuasion, and evaluate the efficacy of different persuasive strategies.

CWB103 Interpersonal and Intercultural Negotiation

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This foundational unit introduces the wider context of cultural practices that inform communication at the individual and social levels. The unit explores how communication in the workplace and other professional contexts is influenced by factors such as power dynamics, gender, nationality, cultural norms, and ethnicity. It develops your engagement with the theories of and skills for successful intercultural and interpersonal exchange in business and professional relationships in a global context. Your career will be shaped by global forces, events, and contexts. Therefore, to be a global effective communication practitioner, you will need to see communication in the context of social and cultural norms and assumptions.

CWB110 Introduction to Literary and Cultural Studies

Equivalent s	KWB108
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to give you the 'tools' and knowledge to critically analyse and creatively appreciate a range of texts so that you are able to enter into academic or popular discourse with an understanding of important critical concepts. It provides an introduction to key concepts in literary studies. The theories relate to ideas and terminology that you will be expected to become familiar with throughout the course of your study. You are introduced to concepts that form the basis of discussions in a range of academic discourses so that you can engage analytically with texts and their contexts. 'The 'textualisation' of the world has been an important development in twentieth century theory in the West: What are texts? What do they mean? The unit addresses these issues by providing you with an introduction to conceptual frameworks derived from some of the major critical discourses that have impacted on our world.

CWB111 Scientific and Technical Writing

Equivalent s	KWB114
Credit Points	12
Campus	Gardens Point

Availabilities
Gardens Point
- SEM-2

This unit introduces you to the principles of writing clearly in a science-based context and to the discursive frameworks that inform scientific and technical writing. It aims to provide you with an understanding of the conventions of writing and publishing scientific and technical information and to develop skills in communicating this information for a general audience. Graduates in the fields of engineering, science and information technology are required to assess high volumes of information and to communicate key scientific and technical ideas to a general audience. As such, there are growing industry and research demands for graduates with professional writing skills that deliver clear and well-structured written information about complex material.

CWB113 Writing Australia

Equivalent s	KWB109
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to improve your analytical and creative, oral and written communication skills. It is important for you to understand how Australian identity has been written, rewritten and remains contested by engaging with and evaluating a range of Indigenous and Non-Indigenous Australian writings. This unit provides you with

opportunities to read, explore, discuss and evaluate a number of classic and contemporary Australian texts. Upon completing this unit you can understand and critically interrogate texts pertinent to contemporary Australian society and culture.

CWB201 Corporate Writing and Editing

Equivalent s	KWB213, KWB106
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit allows you to develop the ability to write in at least two corporate writing genres and be proficient in three other genres. It deals with both the fundamentals of language (grammar, punctuation, style) and common corporate writing genres (manuals, reports, speeches, brochures). Professional communication specialists must have a command of an extensive range of corporate writing genres to create and edit corporate documents. As a corporate writing specialist, you must also be able to respond authoritatively to technical and stylistic writing questions when such matters arise in the workplace. You will develop your knowledge about how language works and be able to use that knowledge in practical writing applications. As a result, you will become a more confident writer and communicator in corporate and

professional situations.

CWB202 Rhetoric: Public Communication Skills

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit provides advanced-level rhetorical tools, strategies, techniques and analytical methods related to communication in professional and workplace contexts and audiences. It builds upon prior knowledge (Influence and Persuasion) to further understand the role and function of rhetoric in contemporary society. Examples of advanced rhetoric in action are drawn from technical, political and business communication, and other fields. Rhetoric—the process of crafting written and spoken messages for specific audiences to inform, persuade, or achieve action—is a fundamental element of all forms of Professional Communication. Its practitioners need to be conversant with rhetorical topics, tools, techniques and analytical frameworks to be able to create sophisticated communication artefacts that inform, persuade and instruct depending on the specifics of audience and context.

CWB301 Political Communication

Pre-requisites	Completion of 72 credit points of study
Equivalent	KCB302

S	
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1

This unit surveys the theory and professional practices of political and governmental communication, especially through the media and communications industries. It examines contemporary and historical political issues and communications in Australia and internationally from the perspectives of democratic theory, media influence, strategic image and issue management, and popular culture. The unit comprises an overview of theoretical approaches to political communication, the construction of political discourse, and the mobilisation of audiences/voters; an understanding of the relationship between communication strategies and the management of politics, with cases drawn from Australian and international politics; and the capacity to critically appraise strategic issues such as political persuasion, electoral strategy, popular culture, and public opinion formation.

CWB302 Advanced Corporate Communication

Pre-requisites	(CWB201 or KWB213) and (CCB204 or KCB205). CCB204 can be enrolled in the same teaching period as CWB302.
Credit Points	12
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-2
----------------	--------------------------------

This unit equips you with advanced-level corporate communication skills and techniques that will enhance your writing and editing abilities. It advances your learning in corporate writing and editing to equip you with the skills needed as a corporate communicator and further develops skills in the areas of professional writing, mechanics, grammar, and editing. The unit is scheduled in the final year of your degree to ensure that you will be prepared for your transition to the workplace.

CWB303 Communication Project

Pre-requisites	Completion of 168 credit points of study
Equivalents	KCB303, KCB307
Credit Points	12
Campus	Online and Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit applies prior knowledge of media and/or communication research, industries, and practices; providing an environment in which to develop your communication and project management skills while contributing to the maintenance and development of publicly facing websites or other media. Content creation, project management skills, and collaborative work are extremely important in media and communication industries.

Units

You will use these skills and apply them to working on public websites and with industry. This is a capstone unit in which you contribute to a real-world project (research, industry/corporate-based or not for profit) that works to advance your future employability. In doing so, you will work on an online platform that incorporates academic research, is informed by content marketing research (industry/corporate-based), or provides professional content services for clients (not for profit).

CYB101 Introduction to Communication

Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This foundational unit introduces you to written, spoken and visual communication skills. It focuses on audience, purpose, and context as they inform communication practice. The unit is designed to equip you with theoretical and practical skills and knowledge required for careers in the Communication Industries. As a student in the Communication program, you need to be able to express your ideas in written, spoken and visual form. Research shows that an aptitude for and facility in written, spoken and visual communication are

essential for academic and professional success. This unit is one of four foundation units in the Bachelor of Communication program that are central to building the theoretical and practical knowledge required by QUT and industry.

CYB102 Introduction to Media and Entertainment Industries

Equivalent s	KXB101
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1, SEM-2 Online - SEM-1, SEM-2

This foundational unit introduces core concepts and debates, analytical frameworks and professional practices necessary to understand how the media and entertainment industries operate as complex economic and cultural activities. It develops capacity for subsequent study and employability in the media and entertainment industries. The unit provides a comprehensive overview of industry structures and functions, regulatory and technological conditions, and professional practice. It also presents you with the broader theoretical and practical implications of industry dynamics in political, economic, and social contexts. As such, this unit aims to develop a deeper and more critical understanding of media and entertainment industries and their dynamics.

CYB103 Communication Theory and Practice

Equivalent s	KCB101
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1

This unit introduces concepts and theories in the study of communication. It covers communication theory, textual analysis, representation, practice, and context. Drawing on examples of communication practice from contemporary society, the unit aims to develop your understanding of communication ecologies, processes, systems, and modes within the wider frame of radical changes occurring in the way texts are produced, read and circulated within our culture. It is one of four foundation units in the Bachelor of Communication program that supports learning activities in intermediate and capstone units and introduces you to individual and teamwork approaches to learning and teaching. The unit also addresses your role as a communicator in the workplace and initiates important strategies for career planning.

CYB105 Understanding Audiences

Equivalent s	KCB301
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online

Units

- SEM-1
External
- XCH-1

This unit introduces the ways in which the media and entertainment industries have imagined, measured and monetised their audiences. Understanding that audiences are powerful constructions in the media and entertainment industries, the unit examines how conceptions of audiences shape marketing, branding and advertising strategies, and what broader cultural concerns are associated with our reading of audiences and their behaviours. The unit also examines audiences by looking at the complex relationship between industry's imagined audiences and its strategies and establishes a theoretical foundation in audience studies as well as overview of key qualitative and quantitative market research techniques.

CYB106 Global Media and Entertainment Industries

Pre-requisites	CYB102 or KXB101
Equivalent s	KXB102
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit provides a critical understanding of globalisation in the media and entertainment industries. It introduces key disciplinary debates about the creation, circulation and consumption of media and entertainment across different locations and cultures. For the

successful media and entertainment professional, it is imperative to understand how media and entertainment operate and interact across local and global contexts. This unit introduces a range of media and entertainment industries and forms, and draws attention to the increasingly transnational nature of entertainment economics and culture. Specifically, it looks at media and entertainment industries as global players; their consumption and circulation; understanding them as an economic and cultural phenomenon; and how the interaction between global-local forces transforms media and entertainment industries, business practices, and products.

CYD104 Managing Social Media

Equivalent s	CYB104
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

This foundational unit gives an understanding of, and basic applied skills in, best practice social media management within professional communication contexts. It introduces you to the principles, tools and techniques of professional social media practice, social media presence and the development, implementation and analysis of digital communication strategies. It also provides opportunities to apply them in the ever-evolving

social media landscape through industry engagement.

CZB190 Chemistry for Health Sciences

Anti-requisites	CVB101, CVB102, LQB180
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is a foundational chemistry unit for all students of the health sciences in which basic concepts of general, organic and biological chemistry are covered. The organization of the human body begins with chemicals (atoms and molecules) making up its simplest or smallest scale level of organization. Chemistry allows us to understand how cells, tissues and organs are formed, how these substances react with each other and their environment, and how these substances behave. This unit will develop the essential concepts of chemistry necessary for students studying health and biological sciences with topics introduced and applied in a contextualized manner relevant to their discipline. As part of early health science training, it is important to explore and have an understanding of the chemical composition and processes relevant to human body. This unit will form an essential foundation to further study in the areas of health sciences.

CZB191 Introductory Chemistry for Educators

Anti-requisites	CVB101, CVB102, LQB180
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

An understanding of chemistry is needed to make sense of our world and to address big challenges faced by our society both in the natural and unnatural environments. This unit will provide both a theoretical and practical introduction into understanding chemical changes on a molecular level. The unit will focus broadly on topics including synthesis, analysis and quantification within chemistry while drawing on pertinent examples from materials, nanotechnology and complex biological systems.

DAB101 Architectural Design 1: Explorations

Equivalent s	DAB110
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of this unit is to provide a broad introduction to the discipline of architecture and an overview of the fields of knowledge with which architects must concern themselves. Design is arguably the core activity of architecture. This design unit offers a broad introduction to the practice of design in an architectural context and is therefore offered at the commencement of the

course. It uses developmental exercises to enhance your perceptions of the built environment. Analysis of the constructed environment leads to design projects that engage with issues of context, tectonics, planning, form, and spatial quality. Orthogonal drawing exercises, freehand sketching, presentation graphics and model-making all form part of the unit content. Teaching and learning activities are spread across lectures and studio-based activities.

DAB102 Architectural Design 2: Spaces

Equivalent s	DAB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit examines technological and artistic processes of design within an architectural context. It seeks to provide the ability to develop architectural designs of controlled complexity, focusing on aspects of spatial quality. As such, this unit will expose you to the design of a small public building in the Brisbane area. Architectural design as a manageable process is explored through a number of exercises and design projects. Discrete steps in the process of architectural design are made explicit through staged activities that build to a complete design project. Orthogonal drawing exercises, freehand sketching, presentation graphics, and

model making all form part of the unit content.

DAB200 Modern Architecture

Pre-requisites	DYB114
Equivalent s	DAB325
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit explores the global movement of modern architecture from its European roots. As many contemporary architects state, the movement still influences architecture and theory and this unit will enable you to locate contemporary global architecture within a framework of rich, complex and interconnected cultural, societal and historical contexts and traditions. You will acquire the facility to read seminal texts, to begin to understand your own design projects in an historical context, and to engage with the global architectural debates which inform architecture today. This unit is part of the history and theory stream in architectural studies. As an architect, you should be able to analyse developments in architectural history from multiple perspectives. Following on from DYB112 Spatial Materiality and DYB114 Spatial Histories, this unit explores and critically examines significant issues, influential individuals and exemplary works of the modern movement.

DAB201 Architectural Design 3: Dwelling

Pre-requisites	DAB101 or DAB110
Equivalent s	DAB310
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - XCH-1

This unit provides you with an ability to develop architectural designs with a focus on aspects of problem solving through an appreciation of architectural principles and process. It advances research skills and investigates architectural principles through the examination of precedents. The unit focuses on dwelling design in the form of houses in a semi-urban or suburban context. It uses developmental exercises to enhance student perceptions of dwelling. Design problems of moderate complexity are tackled through a process of abstraction, experimentation, representation, imagination, and testing. This unit is part of the sequence of design units of the course that continues the development of your architectural design knowledge and skills. This design unit exposes architectural design as a rigorous process with measurable qualities with particular focus on dwelling, spatial qualities of residential living, and the relationship of a building to its landscape.

DAB202 Architectural Design 4: Metro

Pre-requisites	DAB102 or DAB210
Equivalent s	DAB410
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with an ability to develop architectural designs of limited complexity with particular focus on aspects of urban context, planning and form through an understanding of site specificities, topography, urban infrastructure and the natural landscape. In particular the unit focuses on a small civic building design. It builds on prior knowledge gained in the first three design studios, but introduces a higher level of architectural thought via the practice of formalism in architecture, involving established aesthetic concepts of architectural object and language that underlie global architectural praxis. It also introduces urban design into the design studio thereby expanding your previous knowledge of site planning to a new level. It will teach new skills in architectural design, urban analysis, and architectural drawing, modelling and visualisation toward the formal synthesis of the architectural object in urban space.

DAB211 Environmental Principles of Architectural Design

Pre-requisites	DYB112 and DYB113. DYB112 can be enrolled in the same teaching period
----------------	--

	as DAB211
Equivalent s	DAB330
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - XCH-1

This unit familiarises you with the basic design principles and passive strategies for heating, cooling and daylighting necessary for architectural designs that respond to human needs (human comfort), regionalism and climate. Understanding the importance of climate-responsive design and environmental factors on the design development of buildings provides you with the tools to integrate environmental design principals in buildings. In a world of finite resources, understanding the physical phenomenon we have to deal with in design is essential for responsible professionals. Technical and scientific issues are an integral part of design projects. It is a fundamental task of architectural design to achieve maximum comfort requirements of the users while minimising energy consumption.

DAB212 Small Scale Building Construction

Pre-requisites	DYB113
Equivalent s	DAB435, UXB110
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces building

construction principles, an essential part of the vocabulary and knowledge of an architect. It increases your understanding of applied construction technologies and materials as key concepts for design development and resolution. It examines the role of building standards and the Building Code of Australia (BCA) in building design, including its housing provisions and associated codes for all types of buildings to achieve the requirements for building approvals. It also looks at domestic construction with emphasis on general material and structural properties of building components and systems; and common construction practices used in dwellings, single storey and class 10 buildings. Comparison of building systems and their effect on domestic building design will be explored in detail.

DAB301 Architectural Design 5: Commercial

Pre-requisites	DAB201 or DAB310
Equivalent s	DAB511, DAH510, DAB510
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit will aid you to develop architectural designs of intermediate complexity with focus on the integration of issues pertinent to commercial architectural projects that address modern technology, society and culture. This design unit expects you to start

undertaking your own, independent research and project development, aiming for a real-world design environment. It builds upon design skills developed in previous units focusing on commercial architecture of industrial and mixed-use projects. Particular emphasis is placed on effective and professional communication of the design intent with the aid of digital tools. Design theory, sustainability, sociology, heritage and adaptive re-use, history and critique, as they all apply to architectural design, all form part of the content.

DAB302 Architectural Design 6: Communities

Pre-requisites	DAB202 or DAB410
Equivalent s	DAB611, DAH610, DAB610
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - XCH-1

This unit will develop more complex architectural design skills focusing on ethical and sustainable design solutions and practice. This requires the synthesis of issues, ideas, knowledge, and techniques of architectural design as a holistic practice. This unit also advances understanding of the interdependencies of social, cultural, economic, and environmental dimensions at local and global levels, which are crucial to sustainable design of human settlement. Design is the core activity of architecture and the

architectural design studio is a major component of the architecture course. This unit deals with synthesis and integration of knowledge and skills from various domains of knowledge into a major project(s) in an urban context. As part of the research and learning focus in the course, emphasis will be placed on the exploration and application of concepts of sustainability in the design of multi-residential and mixed used building types in local and international contexts.

DAB303 Integrated Architectural Technology

Pre-requisites	DYB111 and DYB113 and DAB212
Equivalent s	DAB403
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops visual communication skills previously acquired with emphasis on the ability to communicate technical intentions. Architects recognise that visualisation or communication of process, decisions and outcomes is crucial. To date, you know how to effectively communicate your architectural intentions using both analogue and digital means, skills primarily intended for the communication of design and technical aspects of buildings. However, the ability to communicate technical intentions is equally important. This unit integrates both these aspects through technical communication and

Units

documentation skills using Building Information Modelling (BIM).

DAB311 Systems and Structures

Pre-requisites	DAB212
Equivalent s	DAH530,DAB530, UXB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit addresses the qualitative influences of structural and construction systems on the design of buildings. In particular, the possibilities and limits of building structure as related to architectural intention through the use of exemplars. The unit explains how to understand and use structural and construction systems to advance the design development of medium scale commercial and public buildings that achieve sustainable outcomes. You will become familiar with various construction systems where an emphasis is placed on the criteria to be used for the selection of appropriate building systems and their associated materials.

DAB312 Building Services

Pre-requisites	DAB311
Equivalent s	DAH635,DAB635, UXB211
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides a basis to create safe, functional and comfortable buildings. It looks at the principles, equipment, and the architect's role (building services procurement, consultation on design decision making, establishing selection criteria for systems and equipment, understanding of spatial requirements, and communication systems for medium-rise buildings). It highlights the role and direction of building consultants and the legislative requirements of building services. It also looks at the skills and knowledge to transform technical design ideas into built form through construction documentation by looking at the principles and application of building services and standards. In this unit, building services, fire safety, and building code requirements are offered as drivers of architectural design. Ultimately the unit enables you to face architectural issues and meet the requirements of the National Construction Code of Australia (NCC) for a range of user requirements.

DAH710 Architectural Design 7

Pre-requisites	DAB301 or DAB510 or DAB511 or DAH510
Equivalent s	ADB007, DAB710
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Design is the core activity of architecture, and the architectural design studio is a major component of the architecture course. This

advanced architectural design unit deals with synthesis and integration of architectural knowledge, construction technology, and skills from various built environment domains. It offers an advanced level investigation into the field of design as applied to architecture, with particular focus on industrial buildings and workplaces

DAN104 Advanced Building Science

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit aims to develop an understanding of low energy and high comfort architectural design solutions for large-scale buildings. This hands-on unit addresses natural means of control of indoor conditions for the achievement of thermal and visual comfort of building occupants with a focus on evaluation of design solutions through simulation. It explores the role of building science and simulation tools in the design of high performing buildings. Buildings are large consumers of energy and most of this energy comes from operation. In a world of finite resources, architects need to understand the environmental impacts of their design decisions, considering all technical and scientific issues involved in order to achieve maximum comfort while minimising energy consumption. This unit further develops scientific knowledge associated with architectural practice and, in

particular, skills required for design and evaluation of large-scale projects dealing with environmental design.

DAN105 Complex Building Systems

Pre-requisites	DAN212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides opportunities to formulate, refine and devise advanced technological solutions as they are applied to structures with moderate to advanced complexity. It presents advanced ideas, subjects and techniques that relate to the selection, design and integration of innovative structural, construction and services systems into large-scale buildings. It considers the nature and impact of architectural technology choices and how these are refined to be incorporated into complex architectural projects. The unit examines the foundations, structural, cladding, service and fabric of a complex building. It also develops your understanding of how the Building Code of Australia and Australian Standards affect the building's architectural technology. This unit builds on knowledge of Architectural Technology learned in your undergraduate degree and will help you develop an understanding of advanced systems that are used in complex buildings.

DAN108 Contemporary Architectural Theory

Equivalent s	DAN125
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit explores the rise of contemporary architectural theory since the late 1960s until today through architecture's interdisciplinary excursions into discourses from philosophy, psychoanalysis and Marxism. Architectural theory will be taught not as an abstraction or severance from concrete architectural production, but as an active agent through which the discipline of architecture responds to radical politics and a broader cross-disciplinary dialogue in order to transform the reality of design practice and the architecture studio alike. The unit serves as a platform for theorising your own design praxis in the studio, and importantly developing a position as an architect. It enhances your previous learning in the design studios by providing you the intellectual skills to participate in global architectural debate, and moreover the ability to make your own design projects theoretically rigorous. This is the foundation of architecture that makes an impact in the real world.

DAN111 Studio: Adaptable

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is a studio-based unit in which you design architectural projects, engaging with different scales and contexts. The unit offers a focused high level investigation into the field of design as applied to architecture through the investigation of complex design problems. It uses developmental exercises to enhance student perceptions of the built environment in a project-based learning environment. The architectural aspects of design theory, sustainability, sociology, history, and critique form part of the unit content. The studio will focus on the development of the abilities to rationally test and experiment through architectural design projects; to explore cultures, contexts, technologies, and environments. This unit introduces the design and development of architectural projects at a postgraduate level. It requires a higher level of design resolution than undergraduate design studios - it introduces research-led design processes.

DAN112 Studio: Urban

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is a studio-based unit in which you will select a design project from a range of real-world challenges. It offers a high level approach to the collaborative design of projects within complex situations. It positions a value-led approach

as central to a collaborative design process which considers ethical, social, environmental, cultural and economic challenges as critical concerns for architects to engage with. It seeks to enhance your understanding of how collaboration contributes to the creative process through effective approaches to stakeholder consultation that lead to authentic formulation of the client brief, through to meaningful engagement with other design specialists in the process of the design resolution of a building project. The unit will develop your practice of research-led design processes in problem identification and solution justification of a complex real-world global problem.

DAN125 Contemporary Architectural Culture

Equivalent s	ADN014, ADB014
Credit Points	12
Campus	null

This unit explores the rise of theoretical discourses that stimulated critical architectural debates since Modernism and the late 1960s, specifically as they emerged from the social and political fabric of modern and contemporary war and its development. Architectural theory is understood not as an abstraction or severance from concrete architectural production, but as an active agent through which architecture responds to radical politics and a broader cultural dialogue in order to transform the real of design practice and

the architecture studio alike. By this excursion into late architectural theory, criticism and debate, you will acquire the ability to interpret seminal architectural texts and the facility to properly theorise your own design projects to produce rigorous concepts in the design studio, and to engage with the architectural debates which inform architecture today. This unit aims to develop in you an appreciation for diverse and inclusive perspectives.

DAN202 Urban Studies

Equivalent s	DAB525, DAH525
Credit Points	12
Campus	null

This unit investigates an urban environment to inform a design project and develop problem solving skills by engaging with theoretical principles in different scenarios. This unit discusses the main urban studies theories and illustrates techniques and tools to investigate an urban environment. Understanding the structure of a city as well as the relationship between its different components and dynamics is necessary to function as a reflective practitioner in the real world. Emphasis will be placed on the development of critical thinking and analytical approach to problems associated with the city and its design. This unit builds on your understanding of design to challenge your vision of urban environments not limited to their physical aspects but including their social,

political, and cultural dimensions. Learning and teaching activities are developed in a blended environment in order to best foster critical thinking and problem-solving skills.

DAN203 Complex Building Systems

Anti-requisites	
Equivalent s	
Credit Points	12
Campus	null

This unit provide opportunities to formulate, refine and devise advanced technological solutions as they are applied to high rise structures. It presents advanced ideas, subjects and techniques that relate to the selection, design and integration of innovative structural, construction and services systems into high rise buildings. It considers the nature and impact of architectural technology choices and how these are refined to be incorporated into complex architectural projects. The unit examines the foundations, structural, cladding, service and fabric of a complex building. It also develops your understanding of how the Building Code of Australia and Australian Standards affect the building's architectural technology. This unit builds on knowledge of Architectural Technology learned in your undergraduate degree and will help you develop an understanding of advanced systems that are used in complex buildings.

DAN204 Architectural Professional Practice

Equivalent s	DAN145
Credit Points	12
Campus	null

The unit aids you to better transition from student to practitioner. As such, it provides learning opportunities to both consolidate and extend understanding and appreciation of architectural professional practice issues. It introduces key issues in architecture-related discourses: the functioning of regulatory professional bodies, the cultural and sociological context for contemporary practice, as well as its prevailing values and attitudes. The unit is delivered in two key modules. Module 1 investigates what is and how to become a professional registered architect, examining Australian professional bodies and the need for an ethical orientation in professional life. Module 2 expands on this knowledge by providing an understanding of professional relations, focusing on leadership skills, collaboration, communication, discrimination, and health and wellness issues.

DAN205 Advanced Building Documentation

Credit Points	12
Campus	null

This unit provides the skill needed to use advanced digital tools to initiate, refine and

formalise complex architectural objects, and make appropriate judgements in the technical drawing communication of the critical aspects of a building's construction. It develops the practice and theory of Building Information Modelling (BIM) to a high level of resolution. As such, the unit equips you with advanced skills in relation to Building Information Modelling (BIM), form generation, digital fabrication techniques, and documentation techniques as they are applicable to architecture.

DAN211 Design Studio C: Simulated Office

Credit Points	24
Campus	null

This unit consolidates the design and development of real-world architectural projects at a postgraduate level. It requires a high level of design resolution thus introducing notions of practice-led design process. It addresses teamwork and collaboration skills knowledge through undertaking an educational building project design set within a real-world challenge and the 'simulated' constraints of professional practice. It looks at applied critical activities that support a successful design project, namely: collaboration, consultation, project feasibility studies, professional communication and writing, and project programming. As a studio-based design unit that builds on the mainly collaborative approach of

Masters Studio (Impact Lab), it advances your skills through a 'Simulated Office Practice' (SOP) group project. You will face a typical real-world design problem affected by factors such as: a real client, brief, context, budget etc. The unit will test effective communication.

DAN212 Studio: Integrated

Pre-requisites	
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the 'capstone' design studio/unit in the Master of Architecture. As such it synthesises and applies all prior learning from this course (and the preceding undergraduate course). This is a studio-based unit in which you design architectural projects. The studio will focus on the high-level development of the abilities to rationally test and experiment through architectural design projects; to explore cultures, contexts, technologies and environments. It requires a high level of design resolution in its projects as well as the practice of a research-led design process. The unit uses developmental exercises to enhance student perceptions of the built environment in a project-based learning environment. The architectural aspects of design theory, sustainability, sociology, history and critique all form part of the unit content.

DED202 Introducing Design History

Equivalent s	DEB102, DEB202, DYB114, DYB124
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

Designers within any discipline should possess the ability to appreciate the history of design, across all its disciplines or forms. This involves appreciation of developments in design history and theory from multiple perspectives. Learning from the past enriches and informs future design. A breadth of design history knowledge increases the creative opportunities and problem solutions that can be applied in design studios.

DFB102 Introduction to Fashion Communication

Equivalent s	KFB103
Credit Points	12
Campus	Kelvin Grove, Online, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit provides an introduction to fashion communication and is intended to provide foundational knowledge and skills to pursue further studies in fashion communication. It aims to develop your understanding of fashion as both an everyday cultural form and a complex global industry. Learning in this

unit will be important in order to gain an overview of the global fashion system and fashion cultures. You will develop and practise foundational fashion communication skills alongside learning how to apply key theoretical ideas to understanding fashion. This unit will provide you with the conceptual basis to pursue further studies in fashion communication.

DFB104 Fashion Sustainability

Equivalent s	DFB203, KFB104
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit is in the developmental stage of the program and provides you with a foundational knowledge of environmental and social impacts of fashion production and consumption. Throughout the unit you will examine the environmental and social impact of different industry business models, materials and production methods in order to develop the skills and mindset to apply more sustainable practices. It also introduces fashion systems as complex supply chains spanning raw fibre through to manufacturing, design, retailing and garment use, disposal systems at end of life, fibre and textiles, industry structures, and business models grounded in sustainable and ethical practices.

DFB110 Fashion Design Studio 1

Equivalent s	DFB101, KFB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This foundational unit provides knowledge and skills for the theory and practice of fashion design, including sustainable practices. It addresses fashion design principles, processes and contexts, including the development of effective skills to communicate and realise design ideas in an integrated studio environment. The unit provides a positioning framework to introduce you to the broad notion of place: your formative place as a fashion designer connected to theoretical and cultural fashion contexts that underpin fashion design. The suite of Fashion Design Studio units form the spine of learning for fashion design understandings in the Bachelor of Design (Fashion) program and this unit is the first in the series.

DFB111 Fashion Design Studio 2

Equivalent s	DFB201, KFB102
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1

This unit provides introductory knowledge and skills for the theory and practice of fashion design, focusing on flat patternmaking and classic

western design forms. This foundational unit provides knowledge and skills for the theory and practice of structured fashion design. It addresses fashion design principles, processes and contexts, including the development of effective skills to communicate digitally and realise design ideas in an integrated studio environment. The suite of six Fashion Design Studio units form the foundation of learning for understanding fashion design in the Bachelor of Design (Fashion) program. Embedded in this program is a focus on ethical and sustainable practices.

DFB204 Fashion Product Development

Pre-requisites	DFB105, DYB122, DFB302, or KFB107
Equivalent s	DFB406, KFB211
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This unit further develops your knowledge, skills and application for professional fashion communication and product development in the fashion industry. It focuses on commercial fashion design and product styling. Developing consumer products in the fashion industry requires diverse skills and knowledge in trend analysis, range building, sourcing, finishing,

specification sheets and marketing to ensure successful and sustainable outcomes. By developing a foundational knowledge in product development you will be prepared to work in commercial fashion or to create your own fashion brand.

DFB205 Fashion Media

Pre-requisites	Completion of 72 credit points of study
Equivalent s	DFB304, KFB210
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit offers insight into the connection between media and fashion image making. It takes a critical historical, interdisciplinary and industrial approach to the study of fashion media, exploring media and digital social platforms that have contributed to the dissemination of fashion. Cross-pollination between fashion and media platforms from different historical times has contributed to the formation of taste, along with cultural and consumer discourses. This unit explores the evolving and complex fashion communication landscape that has captured key changes in fashion culture and industry, and the fragmentation and opening up of fashion communication to global consumers and identities.

DFB206 Global Fashion Cultures

Pre-requisites	Completion of 72 credit points of study
Equivalent s	DFB402, KFB207
Credit Points	12
Campus	Kelvin Grove, Online, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit further develops your knowledge of the complexities of global fashion systems and builds on the application of your skills in fashion visual communication with an emphasis on visual analysis. It focuses on the diverse aesthetics and practices of global fashion cultures since the mid-twentieth century. The aim of this unit is to develop your knowledge of the diversity of global fashion aesthetics since the mid-twentieth century while focusing on consumer-led fashion developments alongside high-end designer fashion of this period. As such, it will deepen your knowledge of how design is connected to social and cultural developments.

DFB208 Fashion Textiles and Technology

Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2 External - XCH-1

This unit provides you with

knowledge and skills in applied textile design and technology exploring avenues in speculative design into textile futures. By learning about the technologies involved with textile production you will be able to understand and forecast future design and technology trends that involve textile processes in the wider spectrum. This unit will be presented in an integrated studio environment. As such, it will focus on textiles, materiality and technology. You will be given the opportunity to design experimental textiles in line with industry trends and challenges.

DFB209 Global Fashion History

Equivalent s	DFB303, KFB109
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit introduces the foundations of fashion history through a global perspective of trade, culture and style flows between the West and the East. It presents a new approach to the study of fashion history as an exchange between cultures taking a critical and interdisciplinary approach to provide you with the opportunity to build your fashion knowledge in a context of complex global cultural and commercial exchanges in fashion. It unravels competing cultural and political discourses of dress in colonial contexts recognising the multiple sites

that contributed to the emergence of fashion. The unit presents instances of colonisation and resistance through dress, including an Australian Indigenous perspective. It provides you with skills in written and oral communication; research and visual analysis; and creative skills. Importantly, it will help you to identify and understand current influences and future directions in contemporary fashion design.

DFB210 Fashion Design Studio 3

Pre-requisites	DFB111 or DFB201
Equivalent s	DFB301, KFB200
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1

This unit builds on previous fashion studio knowledge to navigate the structure and requirements of industry/professional fashion contexts. It develops effective skills to communicate and realise design ideas in an integrated studio environment. This unit is the third in a series of six Fashion Design Studio units and provides expanded knowledge and skills for the theory and practice of fashion design, including sustainable practices. The suite of Fashion Design Studio units form the spine of learning for fashion design understandings in the Bachelor of Design Fashion program, and include practical skills and knowledge of

garment construction, pattern cutting and communication of design ideas.

DFB211 Fashion Design Studio 4

Pre-requisites	DFB111 or DFB201
Equivalent s	DFB401, KFB202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to provide you with knowledge of fashion design working in collaborative contexts including the development of more advanced skills to communicate and realise design ideas in an integrated studio environment. It will also allow you to explore the spirit of collaboration intrinsic to the fashion industry. You will build on your previously acquired design and communication skills as well as your awareness of ethical and sustainable practices. In this unit you will synthesise your understanding of product development and retail readiness. This unit is the fourth in a series of six Fashion Design Studio units and provides more advanced knowledge and skills for the theory and practice of fashion design. The suite of Fashion Design Studio units form the spine of learning for fashion design understandings in the Fashion design program and include practical skills and knowledge of garment construction and pattern cutting.

DFB216 Wearables

Equivalent s	DNB216, DNB315
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces wearable product design for the purposes of enhancing the user experience within a given context. It provides knowledge and skills to design interactive wearable products. It focuses on demonstrating the use of emerging technologies and rapid prototyping techniques for the purposes of designing wearable products that enhance the user experience within a given context. This unit is designed as an intermediate experience of your course and as such it is desirable that you have completed design foundation units, tangible media or textiles and technology units prior to enrolling in this unit. This unit provides you with opportunities to build, develop and apply creative design proficiency in the context of wearable design and wearable technologies.

DFB305 Critical Fashion Studies

Pre-requisites	Completion of 48 credit points of Fashion units (DF% coded)
Equivalent s	DFB602, KFB305
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This advanced level unit deepens your critical fashion engagement and consolidates your skills in fashion communication. It prepares you to play a leadership role in shaping the dialogues that are transforming fashion practices. The aim of this unit is to develop your critical, analytical and communication skills in the context of the global fashion industry and wider cultural debates. Embracing an interdisciplinary approach characteristic of current fashion scholarship, this final unit builds on the theoretical and practical knowledge developed in DFB206 Global Fashion Cultures and DFB209 Global Fashion History and provides you with the opportunity to develop sophisticated research and written communication skills, preparing you to contribute to shaping the dialogues and debates that are changing the contemporary fashion industry.

DFB310 Fashion Design Studio 5

Pre-requisites	DFB211 or DFB401 or KFB202
Equivalent s	DFH501, KFB301
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the fifth in a series of six Fashion Design Studio units in the Bachelor of Design Fashion program and provides advanced knowledge and skills for the theory and practice of fashion design exploring your individual design identity

contextualised within critical and ethical parameters. It focuses on researching and documenting your individual design identity, including the development of advanced skills to research, communicate and realise design ideas in an integrated studio environment. The unit builds upon the understandings acquired in the unit DFB211 Fashion Design Studio 4 and also provides a launch platform to explore in depth your individual design identity culminating in DFB311 Fashion Design Studio 6. The suite of Fashion Design Studio units form the spine of learning for fashion design understandings in the Bachelor of Design Fashion program and include practical skills and knowledge of garment construction and pattern cutting.

DFB311 Fashion Design Studio 6

Pre-requisites	DFB310 or DFH501
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This 24 credit point unit is the capstone Fashion Design Studio experience and aims to provide you with the opportunity to synthesise your prior learning, within university and the workplace, through the production of a final year project that will be outward looking. Within this unit you will develop your confidence and ability to work with minimal supervision in preparation for graduation exploring your

individual style and target audience. During this unit you will complete your final year project and will have the opportunity to apply to present your work in a graduate show or other external event. This unit may form part of the Honours component for continuing DE42 Bachelor of Design (Honours) students.

DFH701 Fashion Design Studio 7

Pre-requisites	DFH601 or KFB302
Credit Points	24
Campus	Kelvin Grove, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1, XCH-2

This unit aims to provide an advanced knowledge of fashion design including the conceptual framing and situated context of your practice. It promotes critical analysis, design prototyping and organisational skills required to formulate an extended independently-led fashion project across DFH701 and DFH801. The seventh in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) program, it forms the start of the capstone experience for an extended independently led fashion project. This unit builds upon the understandings acquired in the six preceding Fashion Design Studio units and also provides advanced fashion research skills to begin to formulate pathways to execute the self-defined independently-led fashion project. DEH701

Research Methods supports the content of this unit. The independently led fashion project will culminate in the final capstone studio unit, DFH801 Fashion Design Studio 8 (semester 2 - 36cp).

DFH801 Fashion Design Studio 8

Pre-requisites	DFH701
Credit Points	36
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to provide you with advanced knowledge of fashion design as well as professional decision making, planning and organisational skills in order to execute and complete an extended independently-led research fashion project. It is the final in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) program and forms the capstone experience for an extended independently-led research fashion project.

DLB101 Landscape Studio 1

Equivalent s	DLB100, DLB130
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is your first landscape design studio introducing you to foundational landscape design knowledge, skills and applications. You will acquire these in stages, covering a range of design principles, theories and processes which

you will apply to real or simulated design scenarios. The first stage is an immersion in, and familiarisation with, understanding space and landscape architectural works, to interpret, test and represent space making and its logic. Next you will learn to apply basic design problem solving processes to articulate landscape architectural propositions in response to your interpretations. You will learn and experiment with design and discipline-specific language including application of the representational techniques. This studio prepares you for the ongoing series of landscape design studio units.

DLB102 Landscape Studio 2

Pre-requisites	DYB111
Equivalent s	DLB200, DLB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces landscape design principles, theories and processes, and their application in problem solving and articulation of landscape architectural propositions. It provides foundational skills and knowledge to develop in your ongoing landscape design studio units. Through critical thinking and experimental design propositions you will explore design principles of landscape space, materiality, scale, time and place. This unit builds on DLB101 Landscape Studio 1 and DYB111 Create

Units

and Represent: Form, inviting you to interpret wider dimensions of landscape and experiment with design development and representation.

DLB201 Landform, Technology and Techniques

Pre-requisites	DLB101 or DLB102 or DAB101 or DAB102 or DYB111 or DYB113
Equivalent s	DLB240, DLB430
Credit Points	12
Campus	Gardens Point
Availabili es	Gardens Point - SEM-1

This unit provides foundational landscape technology principles of landform and tectonics and processes, allowing you to understand and apply the technical manipulation of landforms as part of the landscape design process. This unit continues your development of a finer scale of design, detail and precision, including landform grading for drainage, circulation, platforms and other functions. It extends the design knowledge from studios, technical graphic design development and communication skills developed in Create and Represent units and prepares you for the subsequent Landscape Architecture units.

DLB202 Landscape, People and Place Studio

Pre-requisites	DLB101 or DLB100
Equivalent s	DLB300
Credit Points	12

Campus	Gardens Point
Availabili es	Gardens Point - SEM-1

This unit introduces a range of theories, principles and approaches to contemporary place making through site planning skills and the critical examination of how people perceive and respond to their environment, both individually and collectively. It explores theories of environment and behaviour, place-making and environmental psychology essential to the formulation of sustainable landscape design propositions. These investigations and design propositions develop your research and design communication skills and will provide an intellectually rigorous foundation for the rest of this course and for later professional practice. This unit advances your skills to research and apply design theory in the creation of places for people. It addresses key physical, psychological and cultural theories that underpin our knowledge of the reciprocal relationship between people and their environments. You will also have the opportunity to improve your design communication skills.

DLB204 Planting Design Studio

Equivalent s	DLB320, DLB230
Credit Points	12
Campus	Gardens Point
Availabili es	Gardens Point - SEM-2

This second year unit builds on your knowledge of environmental sustainability

and introduces you to scientific, horticultural and planting design principles and their application in sustainable site-based planting design, including the specific conventions of planting design communication. As such, the unit engages with the basic plant sciences (botany, ecology and horticulture) including: botanical nomenclature, morphology, plant forms, assemblages and systems, and plant cultivation requirements. You will apply this knowledge to develop and articulate sustainable site-based planting design propositions and extend your communication techniques.

DLB301 Landscape Ecology

Equivalent s	DLB420, DLB330
Credit Points	12
Campus	Gardens Point
Availabili es	Gardens Point - SEM-1

This unit applies theories of landscape ecology related to sustainable landscape design and planning in combination with an understanding of geomorphological structures and processes. It prepares you for further expansion of your intermediate-level design skills into Landscape Planning theory and application. It expands your understanding of landscape from a small site to a broad and holistic level. Landscape architects need to understand the systems that create and are created by the landscape and so this unit will develop your ability to comprehend the

interconnectedness of landscape structures and processes, and how they interact within landscape systems, essential to the formulation of sustainable landscape design propositions. You will apply this knowledge in a semester-long landscape study project, extending the communication techniques you learnt in first and second year units.

DLB302 Landscape Materiality and Constructs

Pre-requisites	DLB201 or DLB240
Equivalent s	DLB440, DLB530
Credit Points	12
Campus	Gardens Point
Availabiliti es	Gardens Point - SEM-2

This unit introduces landscape structural theories, material properties, and design and construction principles and processes. Its content will help you analyse technical briefs and critically evaluate and select appropriate materials and construction techniques to formulate sustainable landscape design propositions and implementation strategies. This unit also addresses the legislative environment governing landscape construction.

DLB303 Resilient Landscapes Studio

Pre-requisites	Completion of 60 credit points of Landscape Architecture units (DL%)
Credit Points	12
Campus	Gardens Point
Availabiliti es	Gardens Point

es - SEM-2

This capstone unit builds on the critical thinking and design resolution skills that students have developed through their earlier design studios and associated units. The studio begins with students researching and presenting exemplar projects and threatened landscape case studies. This will be conducted through the framework of relevant landscape resilience theory. This research will then provide the standpoint upon which students develop design propositions to the identified problem site and/or scenario.

DLH700 Landscape Design 7

Pre-requisites	DLB500 or DLB303
Equivalent s	DLB700, DLB710, DLB810
Credit Points	24
Campus	Gardens Point
Availabiliti es	Gardens Point - SEM-1

This unit applies theoretical concepts of landscape planning and landscape urbanism to sustainable landscape design and planning approaches. It explores advanced theories in landscape planning to help you conceptualise the complex social and environmental issues and policy frameworks that inform land development, and the related design and planning theories and processes such as those emerging through landscape urbanism. In a sustained semester-long project you will engage with a large-scale site and associated complex

problems of planning, design and management, and independently formulate innovative and sustainable landscape planning and design propositions and implementation strategies. This unit introduces complexity and independent application of communication and presentation techniques commensurate with professional-level landscape architectural investigation and practice. The following semester unit DLH800 will build on these skills in your capstone landscape project.

DLH800 Landscape Design 8

Pre-requisites	DLH600
Equivalent s	DLB730, DLB830
Credit Points	24
Campus	Gardens Point
Availabiliti es	Gardens Point - SEM-2

This capstone unit aims for you to be able to apply theories of Landscape Planning and Landscape Urbanism in landscape appraisal and design development. You will undertake a sustained thesis-style project at an advanced conceptual and schematic landscape design level based on substantial independent research and rigorous design development. Understanding landscape architecture as a contextual and relational discipline, you will formulate innovative and sustainable landscape planning and design propositions and implementation strategies to balance competing social,

cultural, economic, and ecological constraints and opportunities. This unit develops independent skills in investigation and practice enabling you to engage with a wide range of projects. It consolidates your individual expression of the knowledge, skills and application of landscape design principles, theories and processes developed in your landscape architecture core units to date.

DLN103 Plants for Urban and Natural Systems

Pre-requisites	Completion of 192 credit points in DV43 or admission into DE70 Graduate Certificate in Designing Resilient Landscapes or DE72 Master of Landscape Architecture
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Plants are a key element in our landscapes and a critical component of the landscape architect's toolkit. This unit will provide an in-depth look at individual plants and plant communities that occur and are used within natural and urban systems. Understanding how plants can be used to enhance ecosystem services and green infrastructure within a variety of ecological and social conditions is critical to create resilient landscapes within the context of significant environmental change. You will learn about the functions of vegetation as related to biodiversity, drought and flooding mitigation, erosion control, carbon sequestration,

evapotranspiration and cooling.

DLN215 Studio: Advanced Practice

Credit Points	24
Campus	null

This unit exemplifies the dual themes of the Masters course - environmental change and social justice. Through a propositional and projective design narrative, the thesis project must demonstrate knowledge in landscape architectural design research, theories, technologies, and skills. The convincing and holistic design project must also encompass projective practices, representational methods and techniques. Throughout the semester, you will complete a thesis that thoroughly examines a selected and approved topic that shows deep and critical engagement with the themes. You will create a project that unfolds from a clear and theoretical sustained argument to a methodically resolved project that is visually and verbally presented. The Thesis must represent a proposed intervention in the real world that could create a significant contribution to the field of landscape architecture.

DNB110 ID Studio 1: User Centred Design

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to

User Centred Industrial Design. It addresses visual and creative thinking within the context of the industrial design process and provides human-centred knowledge focused on usability, usability methods and evaluation techniques. You will learn how to implement physical, cognitive and emotional factors to human-centred product design, services and systems. Understanding the needs and capabilities of people is essential to the design of usable, desirable and viable products, services and systems. In order to do this you will need a solid understanding of user-centred design methods during the industrial design process and the application of form, structure, function and beauty in design.

DNB111 ID Studio 2: Aesthetics and Visualisation

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This introductory unit advances knowledge and skills with analogue and digital visualisation techniques to explore, elaborate and communicate your design ideas effectively. The most common and complex aspect of industrial design deals with creating aesthetically pleasing products imbued with meaning and value through form and function. Continuing the development of design process knowledge and skills established in DNB110 ID Studio 1: User Centred Design,

this unit delves deeper into ideas of aesthetics and meaning in order to advance the quality of everyday products.

DNB210 ID Studio 3: Interaction and Experience

Pre-requisites	DNB110 or DNB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

A core responsibility of the Industrial Designer is the interpretation of human interactions with products or systems. This unit develops intermediate design research skills and strategies to gain a detailed understanding of the user within the product's social, cultural and technological context. It employs design strategies to identify opportunities of human interactions with products and systems and enhance the user-product experience. In this unit you will strengthen and apply your design, visualisation, model-making and CAD skills at an intermediate level while dealing with user-centred design (UCD) principles to produce interactive designs. This unit builds on knowledge and experience gained in earlier Industrial Design (ID) foundation units. It builds your skills and knowledge in the area of interaction and experience allowing for integration of skills and knowledge in the capstone units.

DNB211 ID Studio 4: Manufacturing Technology

Pre-requisites	DNB110 or DNB101. DNB110 can be enrolled in the same teaching period as DNB211
Equivalents	DNB304, DNB303, DNB302
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces the skills and knowledge to transform design ideas into manufacturable products. It provides experience and skills in creating 3D CAD models and using them to communicate design intent. The unit increases your knowledge of the commonly used materials and processes and of how their manufacturing constraints and opportunities affect the design process. The industrial designer needs to possess skills in translating these constraints and opportunities into viable product designs and to be able to communicate their design intent with sufficient detail to allow that product to be manufactured according to industry standards and capabilities. This unit introduces you to the principles of Design For Manufacture and Assembly (DFMA) and extends your Computer-Aided Design (CAD) skills. The skills and knowledge covered by this unit are amongst those highly sought after by employers and will be applied in all subsequent ID studio units.

DNB212 ID Studio 5: Applied Technology

Pre-requisites	DNB211 or DNB304
Equivalents	DNB404
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides the skills and knowledge required to design products for manufacture. It advances knowledge on commonly used materials allowing you to gain an understanding of how manufacturing constraints and opportunities affect the design process. Industrial Designers need to be able to design products that are viable for production. They also need to possess skills in translating these constraints and opportunities into viable product designs and to be able to efficiently communicate their design intent to allow that product to be manufactured according to industry standards and capabilities. The unit focuses on 3D parametric Computer Aided Design (CAD) and on how this is incorporated into the design process. Additionally, it provides skills in creating 3D CAD models and using them to communicate design intent. The unit builds on the DNB211 ID Studio 4: Manufacturing Technology unit as well as developing CAD and digital presentation skills.

DNB215 Personal Transportation

Pre-requisites	Completion of 108 credit points of study
Credit	12

Units

Points	
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces personal transport and mobility system concepts as applied to the design of a personal transport system for a given context. It focuses on understanding, benchmarking and designing personal transport systems for a specific context. It prepares you for future units including mass transportation and future transportation units. This unit is in the developmental stage of your course and introduces you to some basic concepts for transportation systems and builds on your application of design. It is preferred (but not a requirement) that you have completed design or design visualisation units prior to enrolling in this unit.

DNB310 ID Studio 6: Systems Design

Pre-requisites	DNB212 or DNB404
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces the concept of systems thinking and its application to design to solve complex societal, cultural and environmental challenges. It advances on Industrial design concepts, methods, strategies and processes for innovation with a particular focus on future products and systems. It also builds and consolidates knowledge and experience gained in earlier Industrial Design units, in

particular skills and knowledge in the area of systems design. To be able to tackle the most critical problems of our time, we must broaden our view to incorporate a more holistic and comprehensive view of design and systems. This requires the understanding and application of novel systems thinking approaches to the design of products, services and systems that are viable, feasible and desirable for people and the environment.

DNB311 ID Studio 7: Capstone

Pre-requisites	DNB212 or DNB404
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is the capstone unit for Industrial Design. It is built upon the earlier Industrial Design units and extends the application of research to the designing products and systems. This is an independent project reinforcing leadership and project management as well as strengthening your expertise. You will focus on research done through design, application of research findings for early and developmental design stages, and will learn to integrate research and design to support novel design ideas. The unit provides you with an opportunity to learn how to manage and lead large authentic projects.

DNB312 Advanced Manufacturing

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to elevate your knowledge of manufacturing to a level where you can confidently produce products able to be manufactured. It further develops your knowledge of the relationship between manufacturing and design. In this you will gain a greater understanding of manufacturing materials and processes that are commonly used by designers. You will also gain experience applying that knowledge to a design project. For a design to progress from just an idea to becoming a real thing it needs to be able to be manufactured. For this, designers need an in-depth understanding of the ways that products are manufactured and what they can be manufactured from. This forms part of the core technical skills that designers require. This unit builds on previous manufacturing skills and allows for this knowledge to be incorporated into the final capstone unit.

DNB313 Advanced Computer-Aided Design

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops your knowledge and skill in Computer Aided Design (CAD)

Its aim is to strengthen knowledge about the implementation of CAD in a design context as well as skills in generating CAD output in a form that accurately communicates design intent. In particular it will focus on building skills using Solidworks, a 3D parametric modeller. Designers need to be able to communicate their 3D design ideas in an accurate way to others in order to have them manufactured. CAD is the primary way that this is done. Therefore good CAD skills are an essential skill, sought after by employers and very useful for design communication in subsequent units, especially the capstone unit.

DNH703 Applied Design Research 1

Pre-requisites	DNH603 or DNB311
Equivalent s	DNB702, DNB703
Credit Points	12
Campus	Gardens Point
Availabiliti es	Gardens Point - SEM-1

This unit introduces you to the strategic contribution of applied research including identifying people's needs through to their integration within the system and gap identification. It incorporates studies of the dynamic relationships between people, products/artefacts and systems, and their contextual environment. The unit addresses the ways research about people can contribute to product innovation, as well as how to integrate the applied research skills and knowledge

that support the development of an innovative product or system proposal. It covers: human-centred innovation framework application of qualitative research methods to industrial design; situating product/systems within the socio-cultural context; and communication of research outcome. This is a capstone unit which provides you with the foundation for higher research degrees.

DNH704 New Product Development

Pre-requisites	DNH603 or DNB311
Equivalent s	ADB235, DNB602, DNB704
Credit Points	12
Campus	EXCHANGE, Gardens Point and External
Availabiliti es	Gardens Point - SEM-1 External - XCH-1, XCH-2

This unit focuses on the introduction of new products into the market. It provides an overview of the relationship between product design and commercialisation. It introduces strategy development which aims to meet consumer expectations whilst achieving corporate objectives. It covers: new product development process; idea generation; strategic planning; introduction to marketing; product screening and evaluation; and commercialisation and post-launch review. The unit will provide you with background knowledge of management, financial and marketing parameters surrounding the

development and commercialisation of consumer products. Launching new products into the market requires a sound understanding of product development tools and methods. Therefore this unit will draw on your understanding of design process and complement this with an understanding of the issues surrounding the translation of a concept into a marketable product or service.

DNH803 Applied Design Research 2

Pre-requisites	DNH703 or DNB703
Equivalent s	DNB701, DNB801, DNB802
Credit Points	24
Campus	Kelvin Grove
Availabiliti es	Kelvin Grove - SEM-2

This unit focuses on the design of a product or system to a professional level. It builds upon DNH703 Applied Design Research 1 and extends the application of research to the design of a product. You will learn how to integrate research and design knowledge to support novel design ideas. The unit contains seminar discourse. This is a capstone unit and it provides you with the foundation for higher research degrees.

DNH804 Professional Practice in Industrial Design

Pre-requisites	Completion of 240cp in course
Equivalent s	DEB801
Credit Points	12

Units

Campus	Kelvin Grove, EXCHANGE and External
Availability	Kelvin Grove - SEM-2 External - XCH-1, XCH-2

This unit focuses on the role of professional practice management and its significance to industrial design. It covers: professional practice and management, career paths in Industrial Design, management of design projects, Design documentation and the role of design administration, intellectual property, and designer-client relationships. The unit provides an overview of the relationship between product design and professional practice. It addresses professional practice management and how you can use this knowledge to manage your own projects. This unit also provides an overview of both current and potential future trends in the Industrial Design profession.

DSB100 Fundamentals of Data Science

Pre-requisites	(CAB201 or ITD121) and (MZB151 or any MXB unit). CAB201 can be studied in the same teaching period as DSB100.
Credit Points	12
Campus	Gardens Point and Online
Availability	Gardens Point - SEM-2 Online - SEM-2

Data is becoming central to every organization's decision making process, and the demand for data savvy modelers and software engineers is rapidly increasing.

Modern computational approaches to data analysis have to enable users to acquire, manage, interpret, present and disseminate large volumes of heterogeneous data. Data science is a synthesis of statistics, mathematics, machine learning and computer science, and uses tools, techniques, and approaches from all of these fields to extract information from datasets. This unit will introduce you to a wide range of Data Science methods and theories to model and analyze data.

DSB300 Data Science Capstone Project

Pre-requisites	CAB301 and CAB420 and (MXB344 or MXB362)
Credit Points	12
Campus	Online and Gardens Point
Availability	Gardens Point - SEM-2 Online - SEM-2

The project addresses a research question or a practical problem through the application of Data Science theories, tools and techniques. It allows you to apply the knowledge of the research skills and practices used to undertake specific Data Science activities. It provides an opportunity to individualise your studies by concentrating on a specific problem domain.

DTB101 Interior Studio: Interiority

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availability	Gardens Point

es	- SEM-1 External - XCH-1, XCH-2
----	--

This unit introduces the principles and elements of design in the interior design context with an emphasis on dwelling and associated concepts of embodiment and interiority. Learning to design for interior design practice requires the development of coherent and advanced knowledge of design process, practice and content pertinent to the production of meaningful and socially responsive environments. This unit introduces you to this knowledge through lectures, readings, tutorials and projects that enable you to appreciate the knowledge and skills you already have that have application in design and how to enhance these with a specific focus on learning for interior design at a foundational level. The learning in this unit will be progressively developed through subsequent design units in the course.

DTB102 Interior Studio: Inhabitation

Pre-requisites	DTB101
Equivalent	DTB201
Credit Points	12
Campus	Gardens Point
Availability	Gardens Point - SEM-2

DTB200 Interior Access and Assemblies

Pre-requisites	Completion of 72 credit points of Design units (D% units)
Equivalent	DTB303

Units

s	
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops sound competency in the technical communication of commercial construction and detailing of interiors in order to apply this knowledge to project work. It provides opportunities to develop your knowledge of the information required to assemble a set of construction documents for a commercial interior design scenario. It links to other core interior design units by introducing you to the commercial sector, in particular exploring 2D and 3D digital drafting conventions and the application of building codes and standards with an emphasis on interior construction assemblies and access. This unit will develop your knowledge of the techniques and conventions required for digital documentation of technical material. It also covers the technical knowledge required to document a commercial project to meet relevant codes and standards. These are fundamental skills required by a professional interior designer.

DTB204 Interior Studio: Inclusion

Pre-requisites	DTB101
Equivalent s	DTB301
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1

External
- XCH-1

This unit addresses aspects of multifunctional interiors within commercial contexts, focusing on large-scale spaces with vertical circulation as part of the greater urban social fabric. It integrates theoretical, technological, sociological and design methods to address design problems. A holistic view of the situation presented will be undertaken so that a synthesis of complex relationships can be managed. It provides you with opportunities to build on, practise and evidence your individual and collaborative sensory design process, design theory, and understanding of social urban context, which will provide a foundation for any subsequent units with more complex designs. Through the application of research-based design approaches, you will realise that complex design outcomes are multi-layered and therefore rich in meaning and significance, whilst responding to multi-function specific and realistic project requirements.

DTB205 Design Psychology

Pre-requisites	Completion of 72 credit points of study
Equivalent s	DTB403
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Drawing on environmental psychology relevant to spatial design, this unit provides the

opportunity to develop a broad understanding of the transactional nature of the relationship between people and the built environment. The unit complements the socio-cultural aspects of design addressed in the Design in Society unit providing core theoretical and technical knowledge to support evidence-based design and ethical and sustainable practice. Interior designers require an understanding of how people and the built environment engage physically, psychosocially and existentially if they are to help produce individually meaningful and socially responsive environments. They also require skills to explore person-environment interaction relevant to practice-based projects. This unit builds on introductory understandings of the nature of human engagement and inhabitation and, in so doing, prepares you to consolidate your design knowledge and skills.

DTB210 Colour and Light

Pre-requisites	Completion of 72 credit points of study
Equivalent s	DTB302
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops a broad and coherent understanding of colour, its psychology and complexity, and interdependence with light in the context of design theory and application in practice. As

such, it introduces you to the attributes, influences and principles of implications of colour and light within the built environment. It develops broad knowledge and the skills to apply theoretical concepts relative to colour and lighting in the creation of spatial design projects. It focuses on the human response to colour and light through an understanding of the histories, theories, and methods of application relevant to two and three-dimensional environments.

DTB211 Materials, Products and Processes

Pre-requisites	Completion of 72 credit points of study
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit explores the complex nature of material and product selections to further enhance interior design project outcomes. Your knowledge of materials and products relevant to commercial interior design applications will be developed with a focus on sustainable manufacturing processes. This unit then introduces you to appropriate documentation to communicate your research and understanding to relevant project stakeholders. Specifying appropriate products for a variety of interior design scenarios is a fundamental process in the delivery of an interior design project.

DTB304 Design in Society

Pre-requisites	Completion of 72 credit points of study
Equivalent s	DTB504
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit addresses the relationships between design and everyday socio-cultural practices enabling you to apply this knowledge in contemporary designed environments analysis such as work and exhibiting environments and service scapes. It provides theoretical and analytical opportunities to develop knowledge of the way the designed world intersects with social life. These insights are crucial to the capacity of design to respond in an evidenced-based and socially responsible way to the designed world as lived and experienced. The unit reviews theories and case studies to illuminate the relationships between design and everyday practice across cultures and time and provides an opportunity to apply these insights in an analysis of a designed environment. It focuses on socio-cultural aspects of design and complements the psychologically oriented unit, DTB205 Design Psychology, while also helping consolidate your final year learning in preparation for professional practice.

DTB305 Interior Studio: Integration

Pre-requisites	DTB204
Equivalent s	DTH601
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with the opportunity to undertake a 'real world' design project. You will develop design methodology and undertake an informed design exploration; critically analyse and generate solutions to unpredictable and complex problems. You will refine your written, verbal and visual communication skills to present design processes and solutions at a beginning professional standard. You will develop your critical knowledge of contemporary social contexts within actual built spaces, focusing on 'process' and 'solution'. The projects will address the role and relevance of research, while applying theoretical, technical, ethical and legislative constraints. Through semi-directed learning and studio delivery, the projects allow for the exploration of interior environments with an increased level of complexity and resolution.

DTB306 Interior Systems

Pre-requisites	DTB200 or DTB303
Equivalent s	DTB402
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

This advanced unit aims to develop an understanding of the relationship between design, environmental quality, access and egress and technology while developing your technical communication skills. It introduces a greater complexity in commercial interior construction, services integration and code compliance while also developing your technical documentation skills. The unit links directly to your previous studies in DTB200 and provides the necessary knowledge, skills and application required to document the construction of your designs through all of your core units. DTB306 sits at the developmental stage of your course and provides you with opportunities to develop your knowledge of services integration, digital drafting and documentation requirements in a commercial workplace application with an emphasis on meeting codes and standards relating to fire safety.

DTB310 Furniture Design and Fabrication

Pre-requisites	Completion of 144 credit points of prior study including DYB113 or DNB111 or DTB200 or DTB303
Equivalent s	DTH603
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Furniture and its role in the built environment is

fundamental to creating an enhanced user experience. This unit develops at an intermediate level your knowledge, skills and their application regarding furniture and joinery in the interior and exterior context with a specific focus on experimental design and prototype construction. It builds upon the technical issues introduced in prior design and technology units, such as design, detailing and working drawing documentation, materials and ergonomics. Through an investigation of furniture and its design, this unit introduces you to the broad base of knowledge and the well-developed skills necessary to the field of interior design. Furniture and joinery are integral elements in an interior environment aesthetically, socially and culturally. You will therefore investigate aspects of the interior environment through the design of furniture and joinery within an appropriate and authentic real world context.

DTB311 Professional Interior Practice Delivery

Pre-requisites	Completion of 168 credit points of study
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit consolidates knowledge, skills, and practical abilities to understand and participate in an interior design practice as a beginning professional. It integrates the management and technical

requirements associated with operating a design practice, the organisation and roles of the regulatory and professional bodies, the cultural and legal context, and values and attitudes that govern professional practice. Interior designers require knowledge of management theory; of building contract requirements and project management; contract documentation and administration, and communication skills. This unit covers a range of ethical, cultural, legal, operational, and technical concerns related to interior design practice. It links to related stakeholders and professional disciplines, providing authentic learning opportunities.

DVB101 Visual Communication Design

Equivalent s	DXB102, KIB101
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1, SUM External - XCH-1

This unit introduces the principles and conventions associated with the interpretation and production of meaning through visual representation. Visual Communication is based on the creation of meaning through image and text and this plays a critical role in our contemporary world which is visually and media driven. Visual communicators require

a deep understanding of conceptual development, design process, typography and image making, and how image-based communication occurs. You will learn how to think and operate as a visual designer through studio-based learning and a series of industry-focused experiences.

DVB102 Image Design and Production

Equivalent s	DXB202, KIB120, KVB204
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2 External - XCH-2

This unit provides skills and knowledge for image creation and production across different contexts, styles and media. It also deals with issues of originality, creativity and suitability of images used in professional visual design, while increasing your skills and creative approaches to areas of illustration, information design, photography, and photo media design. It advances knowledge on aesthetic and formal qualities of new areas of image design and a growing technical skill set which will be built upon in further Visual Communication Design specialisation subjects. In a world of easily reproduced digital imagery, the ability to create your own original illustrations, photos, textures and patterns can be highly competitive. Along with

developing practical skills to generate original imagery for your design work, the unit further develops your capacity to critique and reflect upon practice.

DVB201 Typographic Design

Pre-requisites	DVB101 or DXB102
Equivalent s	DXB302, KIB231, KIB335
Credit Points	12
Campus	Kelvin Grove, Online, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit provides knowledge and skills of typographic principles, composition and design strategies. It combines theory and practice, history and experimentation, and designing for print and digital media, all within a vibrant studio environment delivered face-to-face and online. You will engage with dynamic, creative briefs and use type as the main element of visual expression in your work. Typically typography is at the core of any visual communication work, independently of media. 'Good' typographic design demands well developed technical skills, constant attention to detail as well as a sharp understanding of the context and content of the message being transmitted. Upon completion of this unit you will be able to understand, apply and manipulate multiple aspects of typography as a powerful visual communication tool and to prepare and publish

your work in multiple media contexts, including emerging technologies and environmental spaces.

DVB202 Visual Design for Storytelling

Pre-requisites	DVB101 or DXB102
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

While contemporary visual communication often applies concise and immediate messaging for targeted audiences, it can also require extended, multi-layered narrative-led messaging. This unit provides theoretical, conceptual, technical and research skills to produce narrative-based visual communication works. The unit addresses principles and techniques of visual storytelling across multiple media forms such as print, screen and space, and allows you to develop key portfolio pieces which are complex and creative. Visual Design for Storytelling builds upon the Visual Communication foundations, expanding the scope of projects you are equipped for.

DVB203 Theories and Methods of Visual Communication

Pre-requisites	DVB101 or DXB102
Equivalent s	DXB402, KIB207
Credit Points	12
Campus	Kelvin Grove and Online

Units

Availability	Kelvin Grove - SEM-2 Online - SEM-2
--------------	--

This unit builds on your understanding of the principles of visual communication and its role in determining the values of our contemporary cultures and societies. Through exploring theoretical perspectives, discussions and class exercises you will critique and analyse images and visual communication designs occurring in multiple contexts. In doing so, you will develop further expertise in the production of contemporary communication design and the ethical, social and professional responsibilities of a designer. This unit directly builds upon the Visual Communication and Image Production units while providing opportunities to engage with critical analysis of images and experiences and evidence this through written expression and report writing.

DVB301 Kinetic Image and Text

Pre-requisites	Completion of 36 credit points of Visual Communication units (DVB%)
Credit Points	12
Campus	Kelvin Grove and Online
Availability	Kelvin Grove - SEM-1 Online - SEM-1

Moving image and typographic design has become a leading form of communication in contemporary society, from online contexts, to film and television, to digital signage. An in-depth understanding of and creative skills in motion-

based design are essential for visual designers to work on major campaigns and address all client needs. This unit provides you with knowledge of key theoretical approaches, techniques and methods of kinetic design and allows you to explore these through practice within studio-based assessment projects. In taking this focus, the unit builds directly upon prior foundations of Image Design and Typography in the Visual Communication specialisation and prepares students to work at a further, advanced level within the industry.

DVB302 Data Visualisation and Information Design

Pre-requisites	Completion of 36 credit points of Visual Communication or Interaction units (DVB% or DXB%)
Anti-requisites	CCN104, CCN205
Equivalent s	DXB502, KIB340
Credit Points	12
Campus	Kelvin Grove and Online
Availability	Kelvin Grove - SEM-1 Online - SEM-1

Information and data is now an essential aspect of everyday life in our technologically-driven and visually rich society. In the contemporary world, the generation of data is much greater than the ability to digest and visualise this as meaningful information. The unit provides advanced knowledge and skills in visual information design and data visualisation allowing you to apply these within a series of

practice-based design works. The unit contextualises the growth of this information design specialisation for visual designers, raises issues relating to data collection and integrity, and provides you with a comprehensive understanding of the variety of design approaches that can be engaged within this area. It offers both a practical understanding of established information design models and also the opportunity to develop an innovative and future-forward approach to data visualisation, including utilising interactivity.

DVB303 Experimental Visual Communication

Pre-requisites	Completion of 60 credit points of Visual Communication units (DVB%)
Equivalent s	DXH601
Credit Points	12
Campus	Kelvin Grove and Online
Availability	Kelvin Grove - SEM-2 Online - SEM-2

This capstone unit refines and extends your communication design skills through studio-driven explorations of emerging and future practices. It aids you to develop your own unique and innovative visual design language, culminating in the design of a signature work, which will assist you in defining a creative portfolio and future career directions. As well, this outcome represents a key design piece to be presented in your final year exhibition. Visual communication

continues to be a vibrant and rapidly growing field of design. New design opportunities and career pathways continue to emerge and an understanding of future industry directions – and an ability to actively engage and adapt to these – is essential in forging a long-term career. This subject provides you with the opportunity to explore emerging areas of visual communication through practice-based research, creative focus and through providing a dynamic community of learning.

DVB305 Design and Health

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit addresses theories, approaches, methods and applications of design to the context of health and wellbeing. It takes into account multiple stakeholder perspectives: health professionals, patients and carers. The contribution of design-led approaches and methods to innovations in eHealth and healthcare services and technologies is increasing. Challenges impacting Australian and international health sectors require skills and knowledge of consumer- and user-centric approaches. You will become familiar with theoretical frameworks for health and wellbeing and develop knowledge of contemporary design-led approaches to

development of health and wellbeing services, products and experiences. You will further deepen design skills and methods developed in the Design Thinking unit to conceptualise, develop and produce a design prototype.

DXB110 Principles of Interaction and UX Design

Equivalent s	DXB201
Credit Points	12
Campus	Online and Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit introduces Interaction and UX Design theories, methods, tools and applications essential for the design of digital products, services and experiences for human interaction. It enables you to undertake user experience research in response to real world briefs, critique leading industry case studies and practices, iteratively prototype solutions, and evaluate usability of the outcome with regard to user experience. Amidst global proliferation of digital products and services shaped by trends in augmented and virtual reality, automation, smart homes, and the Internet of Things; there is a greater emphasis on designing digital interactions, interfaces and systems that improve the human experience. In order to effectively achieve that, this unit provides foundational skills and knowledge in human-centred design, including

aspects of the interaction design lifecycle, methods, tools and techniques needed to solve real world problems.

DXB111 Introduction to Web Design

Equivalent s	DXB203, KIB103
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

DXB205 Interactive Narrative Design

Pre-requisites	Completion of 24 credit points of study
Equivalent s	DXB304, DXB404
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit serves as an introduction to creating immersive environments and building interactive worlds for player performance and dramatic agency. The role of the narrative designer is central to the success of any significant professional project in interactive media and game design. The unit addresses theoretical issues associated with immersive / non-linear story structures and interactive narrative forms through the analysis of game / play systems, the creation of original game concepts and the application of techniques of narrative design. It extends this understanding into practice

through the application of relevant skills, which will scaffold you into the production of a portfolio work (suitable for interaction designers, visual communication designers, game designers, media designers, creative writers and performance studies).

DXB210 Critical Experience Design

Pre-requisites	DXB110 or DXB201
Credit Points	12
Campus	Online and External
Availabilities	Online - SEM-1 External - XCH-1

This unit explores the way in which critical and speculative design theory and practices can transform established design conventions in new and unexpected ways, leading to innovative design solutions. Design does not operate in isolation. All our decisions as designers affect not only the produced outcome, but the broader society and environments for which it is created. This unit provides you with design skills to create highly engaging and interactive speculative designs, services and experiences, while focusing on their impact and potential of design for change and deep societal transformation. In this unit you will adopt critical thinking and speculative design methods to re-imagine, analyse, design and present solutions for future scenarios (e.g. living in future cities, design of future hospitals and future of the environment)

as a way to re-frame present interactions between people, spaces and technologies.

DXB211 Creative Coding

Pre-requisites	36cp of previous study
Equivalents	DXB303, KIB205
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This is an introductory programming unit for designers. It presents core principles of computer programming and explores how these can be applied to produce creative outcomes. It also surveys the ways that designers, artists and other creative practitioners have engaged with computer programming and reflects on the nature of code as a creative medium. A basic literacy with programming is essential in areas of professional practice such as interaction design, visual design, web design, mobile app design and game design. As such, it is important for you to develop core skills in computer programming, as well as knowledge of the aesthetics of computational processes in design and creative practice.

DXB212 Tangible Media

Pre-requisites	DXB211 or DXB303
Equivalents	DXB501, KIB314
Credit	12

Points	
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit provides in-depth knowledge of tangible media through the production of an advanced tangible media design project. The design and production of computational and interactive media forms requires theoretical knowledge and an understanding of the processes that underpin the tangible as well as the embodied ways in which people interact with such systems. This unit builds upon previous interaction design studies and extends these studies into the field of tangible media.

DXB310 Augmented Interactions

Pre-requisites	Completion of 48 credit points of Interaction units (DXB% units)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit advances on your understandings of augmented interaction. Studio-driven explorations of emerging and future practices and concerns, and engagement in a chosen problem space, will facilitate such process. The unit provides an opportunity for reflective practices to situate your work in the relevant context as well as extend your own understanding of interaction design. You will create an augmented

interactive system that responds to a problem or site you identify and research, as well as evaluate people's experience of it gaining formative feedback. You will use interactive media technologies, such as virtual and augmented reality software tools and sensors, and develop a visual and experiential language for your concept. Understanding social and physical phenomena evolution and how we interact with the world is crucial, even more so today as wireless networks proliferate and that interaction is increasingly mediated.

DXB311 Advanced Interaction Design Project

Pre-requisites	Completion of 60 credit points of Interaction units (DXB% units)
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This capstone unit further develops your interaction design skills through the production of a signature project. It focuses on developing your own specialist Interaction Design work which will serve to assist you in defining your professional portfolio and future career pathways. The outcome will also become your major design work to be presented in the final year exhibition. Design for interaction continues to be a transformative and pivotal field of design for contemporary society, encompassing a range of practice from sustainability, usability, and collaboration to

the evocative, playful and expressive. New design opportunities and career options continue to emerge and an understanding of future industry practices and an ability to actively engage in these is essential for career success. This subject provides you with the opportunity to explore emerging areas of interaction design through practice-based research, creative focus and a supportive community of learning.

DXH602 Embodied Interactions

Pre-requisites	DXB212 or DXB501 or KIB314
Equivalent s	KIB309
Credit Points	12
Campus	Kelvin Grove, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1, XCH-2

This unit introduces the concept of embodiment and how to design and realise embodied interfaces in the Creative Industries. Interaction with technology has advanced beyond the desktop paradigm of mouse and keyboard to embodied interfaces that incorporate video tracking, audio input, and gestural interaction techniques. Applications range from wearable technology to tangible media installations. This unit introduces an experimental field of interactive media design through the practical application of the processes and techniques of tangible media. In order to work successfully as a

designer in the field you will need to understand the ways in which people communicate and create meaning through embodied interactions. Designing embodied interfaces requires an understanding of how physical and social phenomena unfold across both time and space and how we interact with the world in which we are situated.

DXH701 IVD Research Studio 1

Pre-requisites	((DXH601 or DXH602 or KIB338 or KIB309) and completion of 264 cp of study) or completion of 60 cp of Visual Communication units (DVB%)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit addresses advanced interaction and visual design theory and design research methodology, and their application and relevance to design in professional practice. Design research is a key component of many careers in interaction and visual design. This unit addresses this demand by providing an opportunity for you to develop a major design-led research project. This is undertaken in a studio setting, under the guidance of academic supervisors from the discipline. It brings together the skills and knowledge developed over the first three years of your degree and leads to the capstone studio unit DXH801.

DXH702 Contemporary Issues in IVD

Pre-requisites	(DVB203 or DXB402 or KIB207) and completion of 180cp of study
Equivalent s	KIB315, KIB813
Credit Points	12
Campus	Kelvin Grove, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-1 External - XCH-1, XCH-2

Contemporary designers need to be aware of how design shapes and changes the way that we understand communication, technologies, social interaction, and culture. Moreover, interaction and visual designers need a deep understanding of established and new design methods and conceptual approaches. This unit addresses the intellectual frameworks, theories, and philosophical and cultural issues surrounding contemporary design practice. It addresses the methodologies and methods designers use for critical, creative, and analytical thinking and for driving design innovation. In this unit, you will reflect upon interconnections between technology, design, and society and engage with advanced frameworks for design research and innovation.

DXH801 IVD Research Studio 2

Pre-requisites	DXH701
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit focuses on design research and enables you to undertake projects at an advanced level within interaction and visual design. Through the unit you learn to integrate research and design knowledge to conduct a design-led research project, with a design outcome suitable for professional / public presentation. The unit aims to consolidate the knowledge, skills and application abilities you have developed throughout the course in preparation for the complexities and responsibilities of practice. It provides you with an appreciation of the interdisciplinary nature of Interactive and Visual Design practice.

DXH803 Professional Practice for Designers

Pre-requisites	DXH702
Equivalent s	KIB322, KIB806
Credit Points	12
Campus	Kelvin Grove, EXCHANGE and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1, XCH-2

This unit enables you to outline a strategy for your future as a designer and present yourself as a design professional in public contexts. It is based on professional workshops and presentations that will cover collaborative and inclusive work practices. This unit serves as a capstone for the Interactive and Visual Design program, and is where you will bring together your individual

creative expression, design understanding, technical knowledge, and organisational skills taught throughout the course. In it, you will present yourself as a design professional in public contexts. You will do this through identifying and planning your own professional strategy for your personal design philosophy and goals, and then publicly present a portfolio of design work to a professional standard. The work you choose to showcase can be a portfolio design piece developed in your design studio unit DXH801.

DYB101 Impact Lab 1: Place

Equivalent s	DEB101, KKB102, KKD102, KKB185, KYB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

While you will develop disciplinary knowledge and skills through the course, many problems facing organisations and societies naturally span disciplines. The four common core Impact Labs in the Bachelor of Design explore the potential of design to bring about change. As the first Impact Lab, DYB101 introduces design processes and practices for a future characterised by diverse perspectives, social agendas and environmental concerns. You will learn how 21st-century designers from all disciplines apply empathy and the ability to acknowledge and incorporate diverse viewpoints to address challenging themes.

DYB102 Impact Lab 2: People

Pre-requisites	DYB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit addresses methods of social impact design and the ways in which these approaches can contribute to transformational social and community focused change. In it, you experience how design approaches and tools can be applied to complex social and community-based challenges. In a context where design can foster inclusion and act as a disruptor and driver for positive change you as a designer, alongside your design peers, have the collective potential to lead or make a better future. Framed around real world challenges; and in partnership with community, government and/or industry partners; you will engage with transdisciplinary design-led participatory entrepreneurial strategies to address key issues within one or more communities. This will develop skills valuable in designing for social impact. This impact lab focuses on people, to foreground the importance of keeping the human condition at the heart of design practice which enables solutions aimed at social change.

DYB111 Create and Represent: Form

Equivalent s	DAB103, DTB103, DEB103, DLB103
Credit	12

Points	
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - XCH-1

This unit introduces you to the foundational visualisation skills and applications needed to formulate design propositions such as sketching, technical drawing, simple physical and digital model-making, rendering, composition and presentation. Visualisation is a crucial part of design thinking. The ability to use appropriate techniques and media to communicate design ideas is a vital part of the design process. Designers need to conceptualise and communicate two dimensional/three dimensional forms and spatial qualities. Therefore it is important for designers to learn how to imagine, visualise and communicate these ideas effectively. The unit is paired with DYB113 Create and Represent: Materials as part of the foundation block in the first year of study that will enable you to acquire the preliminary skills required for design communication in the Spatial Study Areas. These skills will be progressively applied throughout your course.

DYB112 Spatial Materiality

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides an exploration of the materials of the built environment. It will

focus on a number of thematic issues of materials: their physical properties, their histories, their environmental impacts, and their applications in making architecture, interiors and landscapes. Through activities of analysis, observation and research, you will discover materials' tectonic ability to heighten the human experience of the spatial environments around us. As such, the unit aims to foster a spirit of enquiry into the creation of spatial environments. As a foundation unit for architecture, interior architecture, and landscape architecture students, it offers a broad view of the spatial disciplines and the materiality of their design and creation.

DYB113 Create and Represent: Materials

Equivalent s	DAB203, DTB203, DEB203, DLB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to the fundamentals of building materials and their representation through the development of foundation digital visualisation skills and applications and their integration with manual skills and analogue media. You will develop visualisation skills and techniques within the design process through understanding the drawing conventions associated with the representation of materials, as well as the ability to select the right visualisation technique for

each phase of the design process. Visualisation and representation are crucial aspects of design thinking, with a particular emphasis on understanding the physical quality of building materials. This unit is paired with DYB112 which introduces representation techniques in the design process. In this unit you will learn to use two- and three-dimensional software applications and physical model making to present your ideas, which demonstrates an appreciation of the fundamental aspects of building materials.

DYB114 Spatial Histories

Equivalent s	DEB202, DED202, UXB130
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This foundation unit introduces the history of the built environment that will inform your study of global architectures that have occurred over several millennia putting the present into its relative context. It is designed to integrate the discipline specific content of architecture, interior architecture and landscape architecture within the broad context of a global understanding of spatial histories from multiple perspectives. The unit addresses key designs, ideas and issues that have shaped the aesthetic, environmental, socio-cultural and political factors that related to their production. It enables you to

become familiar with the critical moments and paradigm shifts of the built environment through global perspectives and spatial justice theories; to develop an understanding of yourself as a participant in the continuum of the rich cultural tradition of designing and making places for human inhabitation.

DYB121 Introducing Design Fabrication

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This introductory hands-on unit explores concepts, skills and methods required to prototype and fabricate physical objects from your design ideas. Designers need to consider the capabilities of fabrication, associated processes and equipment, and materials available to produce a physical prototype of their design ideas. From this perspective, design fabrication is problem centric and requires a rationale behind the choice of materials and processes, an understanding of the quality of the fabrication outcome as part of an iterative process or for its temporal qualities for concept evaluation, as well as consideration of the ethics of fabrication. The foundational design fabrication skills acquired in this unit will be further developed in subsequent design units in the program.

DYB122 Design Visualisations

Equivalent s	DFB105, DFB302, DNB103, DEB103
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1

This unit Introduces you to design visualisation practice and how to employ a variety of techniques to visualise design ideas to assist you in design thinking, research, communication and presentation.

DYB123 Emerging Design Technology

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit introduces you to existing and emerging technology and how it applies to design. In this unit you will learn about how technology is used in the design process and to design solutions. Designers need to be familiar with technology to aid them in the design process as well as being able to create products that take advantage of emerging technologies.

DYB124 Design Consequences

Equivalent s	DEB202, DED202
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove

Units

es	- SEM-2
	Online
	- SEM-2

Design Consequences is a foundational unit employing historical, theoretical, and applied methods to explore the ways in which design influences and is influenced by cultural traditions and practices, beliefs and biases. Working across frames of past, present and future, you will learn how to critically engage with and draw upon these cultural factors and influences to shape and define your design work and practice. The twenty-first century presents designers with a challenging context characterised by the increasingly dramatic effects of climate change, growing levels of inequality, and destabilised geopolitical conditions. This unit will introduce you to a range of ideas, methods, and approaches necessary to understand design not only as products, environments, services and experiences but also as a social, cultural, political, and economic agent.

DYB201 Impact Lab 3: Planet

Pre-requisites	DYB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit challenges you to take design-led approaches to analyse, evaluate and deliver innovative and ethical responses or design propositions. It builds upon the skills and experiences gained in the first two impact labs,

introducing a new scale of investigation through the exploration of complex issues that have a global impact. You will collaboratively analyse and evaluate these issues to develop responses or design propositions that provide avenues for more sustainable and ethical behaviours or systems. This approach will allow you to consider how design methods and approaches can be used to address complex global issues such as those defined by the United Nations (UN.org, 2017).

DYB301 Impact Lab 4: Purpose

Pre-requisites	Completion of 120 credit points of Design units (D% units)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit is the fourth and final Impact Lab - providing you with an opportunity to explore and define your design purpose and identity, foster career aspirations and expand your professional network. Through this unit you will develop your knowledge and expectations of professional practice and navigate career opportunities. Impact Lab 4 : Purpose will assist you as you transition from student to professional, translating what you have learned and experienced over the course of your degree to be able to professionally present your skills, knowledge and capabilities into a meaningful and purposeful portfolio.

DYN102 Research Strategies in Design

Pre-requisites	Completion of 192 credit points in DV43 or DE42, or admission into DE70 Graduate Certificate in Designing Resilient Landscapes or DE72 Master of Landscape Architecture or DE83 Master of Architecture
Anti-requisites	DEH701
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is project-based and introduces students to research methods and methodologies that have relevance to designers. An understanding of research is important for design practice in order to understand existing conditions and needs, to test ideas, to understand the implications of design-decisions, to evaluate how a design intervention is used, and to anticipate changes that will need to be made. Research is critical to advancing design practice and ensuring decisions can be made based on evidence.

DYN106 Sustainable Urban Design: Approaches and Principles

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit explores multiple dimensions of integrated approaches and principles in urban design. It is about adding quality to products and processes related to urban spaces that shape our

everyday life experiences and reinforce sustainability and resilience. Participants will gain an appreciation and deeper understanding of the complex urban problems and different ways of thinking in order to respond to these multifaceted challenges and translate them into policy and design solutions. Key principles, frameworks and associated methods will be explored which enable good urban design practice that leads to socially just spaces for all.

DYN203 Integrated Professional Practice

Anti-requisites	DLH845
Equivalents	DAN145
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces and consolidates key issues in discourses about the professional practice and business of a design office. The unit is delivered in two key modules. Module 1 investigates how to become, and what it means to be, a professional designer, specifically examining the organisation and roles of the bodies that govern the professions and the necessity for an ethical orientation in professional life. Module 2 expands on this knowledge, by providing a detailed understanding in the processes of professional relations, with a specific focus on leadership skills, collaboration,

communication, discrimination, and health and wellness issues. This unit enables students from Landscape Architecture and Architecture to collaborate and share learning experiences.

DYN207 Management and Administration of Projects

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds upon and consolidates key issues in understanding an architect's and landscape architect's management, documentation and contract administration of projects, as spatial designers. The unit examines various phases of spatial design projects including the inception, schematic design, design development, documentation, contract administration and completion stages. The unit is delivered in two key modules. Module 1 provides a detailed understanding of the various ways in which spatial designers manage key phases of a project, including areas such as project programming, and professional correspondence. Module 2 examines various forms of contracts, emerging codes and standards that must be adhered to in Australia, the contract administration phase of projects, and includes a review of the laws and statutory regulations that impact the practice of architecture and landscape architecture.

DYN211 Studio: Communities

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is a studio based design unit, with a cohort comprising students of both the Masters of Architecture and Landscape Architecture programs. Your skills in designing highly resolved design propositions that address critical real-world scenarios will be developed via intensive collaborative processes within the design studio. Here, transdisciplinary collaborations and industry-led scenarios simulate the opportunities and constraints of professional practice and how these play out across the project lifecycle. With a focus on designing with disadvantaged communities and underpinnings of social justice principles, you will conduct design-led research while working jointly with others from outside your discipline area to create new conceptual, theoretical, methodological and translational propositions that integrate and move beyond conventional discipline-specific boundaries and approaches.

EDN612 Shaping an Educational Research Project

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1, SEM-2 Online - SEM-1, SEM-2

To support early career researchers as they plan, design and undertake a

research project, this unit focuses on developing skills, practices and knowledges necessary to design and conduct educational research in innovative ways and to investigate current, innovative topics, issues and challenges. The unit is structured to enable knowledge of the commonalities and differences between various paradigms and approaches to be developed and to ensure consistency in the design of research. This unit is relevant for you if you are engaging in research projects, particularly if you are enrolled in the Master of Philosophy course. It will support you to conduct research within particular fields of interest. You will consider the design issues involved in addressing your research interest/focus/question.

EED001 Developing an Entrepreneurial Mindset

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1

In the first unit of your Diploma you will explore the various dimensions of the “entrepreneurial mindset” and reflect on aspects that resonate with you. You will develop the practice of self-reflection and develop a plan to grow and develop your entrepreneurial identity into the future. You will explore questions such as what is an entrepreneur? Am I entrepreneurial? What does a successful entrepreneur look like? What does entrepreneurship mean to me?

Using a range of self-assessment tools this unit will help you explore and consider what being an entrepreneur means to you, what kind of entrepreneur you aspire to be and where your journey may take you.

EED002 Ideate and Create!

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1

Are you a creative? Can you learn to be innovative? The answer is yes (!) Having the confidence and the capability to canvas a number of viable solutions to an issue or an opportunity that you may identify, is an essential pre-condition to pursuing a successful entrepreneurial venture. This unit will help you to develop the capacity to explore, generate and develop creative approaches to situations you might experience in your professional and personal life. You will explore a range of approaches, techniques and tools that are designed to develop your creative self-efficacy including problem framing, ideation and creative problem solving. In doing so you will learn to observe and evaluate situations in a novel and unique way, utilising a number of approaches to ensure that you have explored all of the possible options at your disposal.

EED003 Opportunity Identification

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP2

One of the the defining attributes of entrepreneurial practice is the capacity to provide value, typically in new or novel ways to new or existing customers and markets. This unit will allow you to apply your creative and entrepreneurial self-efficacy developed in EED002 *Ideate & Create!* to develop an actual solution for an identified issue or challenge. In this unit you will develop the skills required to identify and explore issues faced by a defined set of customers or users and analyse the potential opportunities reflected in their needs, wants or desires. By applying your creative skills to approach an issue from a novel perspective, learning to investigate the potential value of a proposed solution and critically evaluating what kinds of value you may be able to generate in the form of an entrepreneurial venture.

EED004 Test, Prototype and Validate

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP2

Will people buy what you're selling? This unit will allow you to develop the skill and ability to test and validate whether there is actually a need for your business idea. You will learn a

number of approaches and methodologies that can be used to determine whether your idea is worth developing into a fully-fledged start-up. You will be trained and given the opportunity to test a range of your assumptions, gather data and evidence from potential customers, to experiment with prototypes, and develop a minimum viable product. On completion this unit you will have developed a set of skills and knowledge of techniques that will allow you to determine the viability and potential of taking an idea into a business opportunity.

EFB106 Cost-Benefit Analysis for Project Appraisal

Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Cost Benefit Analysis (CBA) is a key technique used to appraise the relative desirability of competing alternative uses of limited resources. CBA supports decision making with respect to investment alternatives across a range of industries in the public and private sector. CBA has been used intensively in investment projects, socio-economic programmes and policies. The unit provides students with foundational knowledge and basic skills of CBA.

EFB201 Financial Markets

Pre-requisites	48 credit points of completed studies
Equivalent s	EFX201
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

This unit introduces students to the institutional elements of global financial markets, and the role and reality of financial markets as an integral part of the economy and of social and political structures. Topics explored in this unit include the functions of financial markets, the banking and payments system, financial system deregulation, non-bank financial institutions, stock exchange operations, debt markets, foreign exchange markets and markets for financial derivatives. Students will practise key skills of critical exploration and analysis in considering the role of finance theories and models to help understand key financial market events within broader social, economic and political contexts. Students will continue to develop and apply these foundational insights and critical thinking skills in subsequent finance units.

EFB210 Fundamentals of Finance

Pre-requisites	48 credit points of completed study
Equivalent s	EFX210
Credit	12

Points	
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Online - SEM-1, SEM-2, SUM External - XCH-1, XCH-2

This unit introduces the fundamental concepts, theories and skills of financial management and how these are applied to solve problems associated with the decisions of financial managers. This is essential knowledge for financial decision makers. Topics covered include: an introduction to the financial institutional framework; an introduction to debt and equity instruments; financial mathematics applied to the pricing of debt and equity securities; a firm's investment decision including Net Present Value and Internal Rate of Return; introduction to risk and uncertainty using the Capital Asset Pricing Model and Weighted Average Cost of Capital concept and risk management. Because of its fundamental nature, this unit is a prerequisite for more advanced units within the finance, accountancy and financial planning study areas, and content studied in this unit forms part of the knowledge and skills required for students seeking professional accountancy accreditation.

EFB222 Introduction to Applied Econometrics

Pre-requisites	24 Credit Points of Study
Equivalent s	EFX222

Units

Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit provides a thorough and practical treatment of regression analysis, including the foundations of statistical and mathematical concepts and skills. The statistical and mathematical knowledge and skills taught in this unit are essential in contemporary economic and financial practice with regression analysis the most widely used econometric modelling technique in the fields of economics, finance, accounting and many others. The unit aims to develop students' knowledge of econometric techniques and to apply these to the analysis of business data. Students will develop regression modelling techniques and also the ability to interpret statistical output. This unit serves as a developmental unit to prepare you for further units in Econometrics.

EFB225 Economics for the Real World

Pre-requisites	24 Credit Points of Study
Equivalent s	EFX225
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External

This information is correct as at 08/09/2023. For the most up-to-date course information, visit <https://www.student.qut.edu.au/enrolment/units/>. CRICOS No.00213J

- XCH-1, XCH-2

This unit builds on the economic concepts, principles and theories learnt in introductory level economics. It further develops and refines students' economic analysis, evaluation and reasoning skills by applying economic concepts to the exploration of contemporary real world issues.

EFB226 Environmental Economics and Policy

Equivalent s	EFX226
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

The objective of the unit is to introduce students to some of the current environmental and natural resource issues confronting society and how planners and decision-makers could better understand and address these problems using economics. The unit demonstrates why economics matters more to environmental and natural resources policy and how the approach taken in this unit is free of the constraints of orthodox economics. The unit also explores what would happen when environmental considerations get left out of economics and what happens when economics gets left out of environmental policy-making and resource management decisions. The unit would

benefit those who wish to work in government, the private sector or for a non-governmental organisation.

EFB227 Insurance, Risk Management and Estate Planning

Pre-requisites	EFB210
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

This unit is designed for students to further develop their understanding of risk management, insurance and estate planning concepts and issues, and practise skills in developing and providing financial planning advice to clients. The knowledge and skills developed in this unit are essential for financial planning practitioners.

EFB228 Microeconomics

Pre-requisites	24 credit points of completed study
Equivalent s	EFB331, EFX331
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit explores the economic analysis of and the interplay between the decisions and actions of consumers, firms and governments in modern economies. The theoretical

and empirical content of this unit provides a basis for understanding these decisions and actions with a focus on applications to real world contexts. You will develop the ability to understand and apply microeconomic concepts to a range of contemporary economic issues and problems at an intermediate level. Further, the unit provides the basis for appreciation of a range of issues that can improve managerial decision-making to the formulation of public policy that can improve the welfare of the community. The unit prepares you for a major in economics and develops your ability to apply microeconomic knowledge and critical thinking skills to economic problems in real world contexts.

EFB229 Macroeconomics

Pre-requisites	24 credit points of completed study
Equivalent s	EFB330, EFX330
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Macroeconomics is one of the key fields in economics. It is a study of economic aggregates, such as GDP, inflation and unemployment rates, economic growth and income distribution, etc. A major focus of macroeconomics is on

economic policies that affect these aggregate measures. The unit goes beyond the basic overview of the workings of the economy and provides an in-depth analysis of fundamental macroeconomic ideas. It also develops the capabilities and skills to equip you with a deeper understanding of the macroeconomic policies and their applications in the real world.

EFB231 Economics

Anti-requisites	EFB228 and EFB229
Equivalent s	BSB113
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Economics studies the efficient use and distribution of scarce resources. It is concerned with how people make decisions and interact in markets. Economics examines the role of government in either obstructing or improving market outcomes and the effect of those decisions on the well-being of society. Economics also studies the economy as a whole and key issues explored in this unit include economic growth, inflation, unemployment and international trade. In studying these issues economists can understand how to manage the economy for the good of its citizens. In this unit students

develop an understanding of the key principles and tools that economists use to interpret and critically analyse economic policies that impact on Australia and the global economy.

EFB240 Finance for International Business

Pre-requisites	48 credit points of completed studies.
Anti-requisites	EFB312
Equivalent s	EFX240
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Doing business internationally increases the range and risks of financial transactions that must be managed within the firm. Managers making decisions involving international trade and investment need to be aware of the nature and extent of the risks involved and to be knowledgeable about fundamental financial skills used to measure and manage these risks. This unit builds on the skills developed in primary units of the International Business major and provides a firm base for developing financially sustainable international business strategies in later units.

EFB308 Financial Modelling and Coding

Pre-requisites	EFB210
----------------	--------

Units

Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

In recent years, large volumes of big complex data have become available to investors. This unit provides an opportunity for students to develop computer coding skills and an understanding of modelling techniques and tools for analysing such complex financial data. The analysis skills students develop in this unit are commonly used to inform investment and managerial decision making.

EFB309 Financial Derivatives

Pre-requisites	EFB344
Credit Points	12
Campus	External
Availabilities	External - XCH-2

The unit provides students with an in-depth analysis of derivative securities and examines the theoretical underpinnings of numerous derivative pricing models. Students will also gain exposure to the manner in which various derivative securities are used and priced, gaining industry relevant knowledge and technical skills.

EFB312 International Finance

Pre-requisites	EFB201 and EFB210
Anti-requisites	EFB240, IBB202

Equivalent s	EFX312
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

As international markets become more integrated, knowledge and skills related to international financial management are becoming ever more important. This unit applies and extends the knowledge and skills gained from EFB201 and EFB210 to international settings. Students are introduced to the international aspects of financial management theory and practice, including: international arbitrage and parity conditions, foreign exchange risk management, international equity markets, political risk, and international capital budgeting. This unit will endeavor to prepare students to operate in the multinational world of the financial markets.

EFB332 Applied Behavioural Economics

Pre-requisites	EFB228 or EFB331 or EFB337
Equivalent s	EFX332
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

This unit is designed to expose you to current and practical applications of behavioural economics that can be used to improve the understanding of important topics in a variety of industries and contexts. It teaches you about the economic paradigm, involving very basic but powerful tools to understand ubiquitous human behaviour exploring topics such as fads and herding behaviour, decision under risk and uncertainty, time and distributional preferences, status concerns, inter-temporal choices, human rationality, heuristics and biases, and behavioural game theory. The theories and methodological tools learned in this unit can also be applied to other economic areas and industries.

EFB333 Applied Econometrics

Pre-requisites	EFB222
Equivalent s	EFX333
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

As a final year unit the focus is primarily on further developing students' theoretical knowledge and applied skills in econometrics, using common methods that business, economics and finance graduates will encounter in practice. These skills are essential for research in economics and finance and are

relevant for use in future employment.

EFB335 Investments

Pre-requisites	EFB201 and EFB210
Equivalent s	EFX335
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

In this unit, students will apply finance knowledge acquired in earlier units to develop investment decision making skills essential for their personal and professional lives. The unit advances understanding of how investment decisions are made, what securities to invest in, how they fit in a portfolio, the impact of transaction costs, the risks associated with investing and performance evaluation of the investment process. Securities and analytical tools investment managers employ when managing equity and fixed income portfolios will be critically examined and applied to real world contexts. By applying higher level knowledge and skills and considering issues from the investment manager's perspective, this unit provides insight into an industry that controls trillions of dollars of assets both domestically and internationally.

EFB336 International Economics

Pre-requisites	EFB228 or EFB223
Anti-requisites	EFB314
Equivalent s	EFX336
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

The slicing of the global value chain and the dominance of global production networks have changed the economics and politics of trade. Trade wars are daily on the news and BREXIT changed the way we think about trade policy. The COVID19 pandemic has created a global economic crisis that dwarfs the GFC. Globalization has come under attack but is it for the right reasons? International Economics advances understanding of these issues and enables students to develop critical reasoning to international business and policy problems. The aim of this unit is to build students' ability to critically analyse tendencies in the international economy. After laying down the empirical and theoretical underpinnings of how trade markets work, students will be presented with the latest examples/controversies in the global economy and will participate in moderated debates that will help them shape their own critical thinking based on economic reasoning.

EFB337 Game Theory and Applications

Pre-requisites	EFB228 or EFB223
Equivalent s	EFX337
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit is intended to deepen students' understanding of an important branch of economics by developing their understanding of the key theoretical foundations of game theory and its applications.

EFB338 Contemporary Application of Economic Theory

Pre-requisites	(Completion of 168 credit points) and (EFB222, EFB228 & EFB229) or (EFB330 & EFB331)
Equivalent s	EFB329, EFX338
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Working as an economist in the real world requires the ability to research and apply economic solutions to often complex problems. This capstone unit is designed to consolidate your studies in economics through the application of a variety of economic concepts, theories, and empirical methods to

current public policy issues. You will develop an analytical framework to tackle major economic issues and practise the practical application of a variety of economic approaches to analyse problems facing Australian and international economies and develop policy options with consideration for diverse perspectives, ethical principles and socially responsible behaviour. You will develop the ability to summarise, evaluate and criticise research findings, and learn how research in economics evolves, preparing you for employment as economists in government, business – in particular consulting - and in the not-for profit sector.

EFB341 Development Economics: An Immersive Experience

Other requisites	Subject to Unit Coordinator Approval. Students are required to complete a minimum of 48 credit points of study.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SUM

This unit introduces students to the economic problems and challenges that fall under the purview of Development Economics and includes coursework as well as an immersive international field project to develop their understanding through a real-world application of their skills on a project with a placement organization. The field project

may take place in different international location each year and will be facilitated by the unit coordinator in collaboration with Beyond Borders Learning Programs, the key host organization at these locations. Locations over various years: Mumbai, India (2018, 2019), Kathmandu, Nepal (2020). Other potential locations in future include Dhaka, Bangladesh and Colombo, Sri Lanka. The aim of this unit is to provide a basic grounding in development economics, as well as a grasp of various approaches and initiatives that have been used to solve key challenges associated with poverty and underdevelopment.

EFB343 Corporate Finance

Pre-requisites	EFB210
Anti-requisites	EFB307
Equivalent s	EFX343
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit extends the knowledge and skills introduced in earlier finance units to the corporate finance context. It provides an in-depth analysis of the sustainable financial management of a business organisation and advances frameworks necessary for the analysis of the more advanced aspects of domestic and international

business finance. The further specialisation of financial management knowledge and skills this unit provides equips students wishing to pursue a career in finance with a valuable applied skill set. Topics examined include: working capital management, capital investment decisions, issuance of corporate securities and capital structure, payout policy, mergers and acquisitions, and financial restructuring.

EFB344 Risk Management and Derivatives

Pre-requisites	EFB201 and EFB210
Equivalent s	EFX344
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit develops knowledge and skills required to identify, measure and hedge the risks associated with an exposure to financial securities. Building on earlier finance units, and with a focus on the risk associated with movements in market prices (market risk), this unit introduces students to specialised knowledge and skills for identifying, measuring, managing and hedging risk. As derivative securities are an important tool in risk management, this unit explores a wide range of derivative securities and examines their pricing and use in managing

and hedging risk. Subsequent topics on derivatives include the pricing and use of forwards, futures, swaps and options contracts. Students will develop their self-reflection skills in considering their application of financial knowledge and reasoning, and in exercising responsibility and accountability for their own learning: valuable skills for finance professionals.

EFB345 Managing Investments and Client Relationships

Pre-requisites	144cp of completed study including EFB210
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

A key component of financial planning advice is managing investments and relationships with clients. The purpose of this advanced unit is to build on the financial knowledge gained in earlier units in this major to develop and refine knowledge and skills for managing client investments, setting client investment goals and risk profiles, and managing client relationships. Students will practise communicating effectively with clients, demonstrating ethical and professional conduct.

EFB346 Market Structure and Regulation

Pre-requisites	EFB228 or EFB223
Credit Points	12
Campus	Gardens Point, Online and External

Availabilities	Gardens Point
	- SEM-2
	Online
	- SEM-2
	External
	- XCH-2

The profitability of firms, the prices faced by consumer, and the economic value of a market are determined by the market's underlying structure. Market Structure and Regulation advances understanding of the sources of firms' market power, its impact on consumer welfare and market efficiency, and the role of public policy in regulating markets. The unit enables you to use fundamental economics tools to analyse real world markets and regulations.

EFB347 Student Managed Investment Fund 1

Pre-requisites	EFB335
Other requisites	Minimum Grade Point Average (GPA) of 5 and a selection interview, if required
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Businesses operate in an environment of manifold uncertainty which is difficult, if not impossible, to recreate within a traditional classroom environment. Instead, this unit offers students a unique opportunity to apply the knowledge and skills developed throughout their undergraduate finance studies to real world investment evaluations and decisions,

drawing particularly on the investment knowledge gained in EFB335. This unit focuses on the application of theories and techniques used in security analysis and valuation which are attuned to practice in the real world, including estimating a company's intrinsic value, identifying growth opportunities and threats to business and profitability, and social and ethical considerations of investors. Working under the guidance of academics and industry experts, students gain real experience as professional analysts.

EFB348 Student Managed Investment Fund 2

Pre-requisites	EFB347
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Businesses operate in an environment of uncertainty which is difficult, if not impossible, to recreate within a traditional classroom environment. Instead, this unit offers students a unique, real world learning opportunity for developing investment decision-making and portfolio management capabilities under realistic conditions. Students apply the knowledge and skills developed throughout their undergraduate finance studies to real world investment evaluations and decisions, drawing particularly on the investment knowledge gained in EFB335 and EFB347. This advanced unit is the second of

a block of two units that provide students with hands-on experience in the operation of a managed fund. Working as senior analysts and portfolio managers under the mentorship of academics and industry professionals, students evaluate investment recommendations for the QUT Student Managed Investment Fund (SMIF) that are put forward by their peers enrolled in Student Managed Investment Fund 1.

EFB349 Macroeconomic Policy

Pre-requisites	EFB229 or EFB223
Credit Points	12
Campus	Gardens Point, Online and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1

Macroeconomic policies are of great significance as they are associated with changes to the health of an economy – that is, changes in short run economic fluctuations, economic growth, income distribution, employment, inflation, exchange rate, etc. This unit provides an in-depth understanding of these policies in a national as well as global context through a blend of theory and application. The unit also addresses some recent issues and debates in macroeconomic policymaking, such as the limitations of conventional fiscal and monetary policies and policy dilemmas in relation to growth and development. This unit

builds on and applies the theories in EFB229 Macroeconomics and investigates macroeconomic policies that impact on national and global economies, including but not limited to monetary, fiscal, trade, exchange rate, and technology-driven growth policies.

EFB360 Finance Capstone

Pre-requisites	192 credit points of completed study including EFB335 and (EFB343 or EFB307)
Equivalent s	EFX360
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

Finance Capstone is the final unit in the finance study area and focuses on integrating the knowledge and skills gained throughout students' prior finance studies for application to complex, real world problems. Students focus on identifying, exploring and finding optimal solutions to problems encountered in competitive financial environments and contexts while refining effective decision-making skills. Additionally, this unit seeks to develop students' oral communication, written communication and teamwork skills. The insights and experiences gained in this unit help to prepare students for further learning and professional practice and, through its applied setting and

focus on contemporary finance issues, the unit acts as a bridge between university studies and employment in the financial services industry.

EFN405 Applied Economics

Anti-requisites	GSN203, GSN411, GSN414, GSN491, GSN492, GSZ491
Equivalent s	EFX405
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

The economic framework in this introductory unit provides students with a broad understanding of the economic forces that impact business and government, equipping them with knowledge, technical and problem solving skills that they will continue to develop and apply in later units where more complex situations and issues are explored. The unit provides an introduction to both microeconomic and macroeconomic key concepts.

EFN406 Managerial Finance

Anti-requisites	GSN413, GSN423, GSZ413
Equivalent s	EFX406
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

Units

This is an introductory unit complementary to EFN425 and EFN420. This unit gives students an essential grounding in applied finance, addressing fundamental issues of how we can use finance in a commercial sense and how this impacts critical organisational and managerial decisions in an increasingly complex and demanding financial environment. Subsequent units in this course will build on the knowledge introduced in this unit.

EFN408 Special Topic - Economics, Banking and Finance A

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - 6TP3, SEM-1, SEM-2 Online - SEM-1, SEM-2

The purpose of the unit is to provide Research students with an opportunity to pursue an elective research topic.

EFN412 Advanced Managerial Finance

Pre-requisites	EFN406
Equivalent s	EFX412
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This is an intermediate level unit which extends the study of financial management introduced in Managerial

Finance. It provides an in-depth analysis of valuation and of the financial management of a business organisation. It develops further the framework necessary for the analysis of other and more advanced aspects of domestic and international business finance. With the growing sophistication of global financial markets, this unit provides an excellent base for students wishing to pursue a career in the field.

EFN414 International Finance

Anti-requisites	EFN417
Equivalent s	EFX414
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

This unit extends the knowledge and skills students have gained in prior units by exploring the influences, issues and challenges of the international environment. Students will investigate financial management issues arising in international settings and develop problem-solving and decision-making skills essential for financial practice.

EFN415 Security Analysis and Portfolio Management

Pre-requisites	EFN406
Anti-requisites	EFN429
Equivalent s	EFX415
Credit	12

Points	
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This developmental unit extends the knowledge and skill base of all finance students, drawing particularly on the earlier unit EFN406. This unit focuses on the theories and techniques found in security analysis and investment management which have a profound effect on professional behaviour and practice in the real world. For example, fund managers must understand the needs of their clients, design portfolios consisting of different assets to suit those needs, and ensure the returns from the funds and the associated risk are as per expectations. The required knowledge and skills for effective practice can mean the difference between the success and failure of any type of investment portfolio.

EFN420 Data Analysis for Financial Managers

Equivalent s	EFX420
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

The field of finance is broad and dynamic. It directly affects the lives of every person and every organisation, financial or non-financial, private or public,

Units

large or small, profit-maximising or not-for-profit. In order to make optimal financial decisions, some basic financial skills are necessary. This unit introduces students to key knowledge and skills necessary for financial managers functioning in an increasingly complex and demanding environment. Subsequent units will build on and extend the knowledge and skills gained in this unit.

EFN422 Economics and Data Analysis

Anti-requisites	EFN405, EFN419, GSN403, GSN411, GSN414, GSN491
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

To make sound business decisions managers must understand the forces that shape the economic environment and their decision making should, where appropriate, use relevant data analysis. This unit provides the analytical framework needed to understand how market conditions are determined at the micro and macro levels and how market conditions affect business performance. It also provides an essential grounding in statistical literacy and an introduction to basic techniques and concepts in the statistical treatment and analysis of data relevant to the business environment.

EFN423 Health Economics: Applications and Policy

Anti-requisites	PUN211
Equivalent s	EFQ423
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides a strategic overview of resource allocation, funding and economic evaluation in the health and health care markets, which is fundamental knowledge for health managers and those aspiring to work in health policy roles. The management of resources, whether they are financial, material or human, are critical elements of the role of a health service manager.

EFN425 Financial Markets and Institutions

Equivalent s	EFX425
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1, XCH-2

This unit introduces students to a range of key concepts and ideas in finance, giving students grounding in how financial markets operate and also the ability to critically apply knowledge and skills to address real world problems and issues arising in financial markets. Subsequent units in this course build on and integrate the foundational

knowledge and skills introduced in this unit.

EFN426 Applied Research in Finance

Pre-requisites	EFN406 and EFN420
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

This unit provides students with skills for approaching a research problem from an econometric approach. These skills are crucial in the use of a range of research methods and business applications. The knowledge and technical skills gained in this unit will enable students to work effectively with a variety of data and business problems and will have further application in addressing problems they encounter in the subsequent units of this course.

EFN427 Behavioural Finance

Equivalent s	EFN514, EFX514, EFX427
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

As a natural complement to the formal economic theory of financial decisions and financial markets, this unit builds on earlier units that address finance theory in this program. As a recognised area

Units

of expertise in the world of finance this unit will give students knowledge and skills that play a key role in explaining and supporting financial decision making.

EFN428 Behavioural Economics: Developments and Applications

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

This unit introduces students to current concepts and practical applications of behavioural economics. Students will learn about and critically apply foundational tools of thought and exploration used in the behavioural economics approach to real-world contexts and problems. It provides a framework incorporating rationality, the psychology of thinking, emotions, heuristics, the brain, and (cultural) evolution, through which human nature and decision-making in organisations may be decoded.

EFN429 Investments Management

Anti-requisites	EFN415
Equivalent s	EFQ429
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1 Online - SEM-1

A key component of financial planning advice is

understanding how client investments are managed. The purpose of this unit is to develop students' understanding of foundational financial concepts and issues, and introduce knowledge on managing client investments, setting client investment goals and risk profiles. Knowledge and skills in these areas are essential for graduates working in financial service industries, and establish the foundation for more advanced finance and financial planning units to build upon.

EFN500 Contemporary Macroeconomic Theory

Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3

This unit aims to give students an understanding of the different theoretical explanations for the behaviour of the national economy in an international context. Students will explore competing policy approaches in a global context and be able to use the tools of modern macroeconomics to analyse current issues in macroeconomics. It prepares the students for higher studies in macroeconomics.

EFN502 Developments in Microeconomic Theories

Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics
------------------	--

	or Finance required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2

The unit involves a discussion of contemporary developments and refinements in microeconomic theory, such as firms' strategic interactions in imperfect markets, consumer behaviour and decision biases, problems of collective action, externalities and public goods, and market mechanism design. It is expected that on completion of the unit, students will have developed an understanding of the basic tenets of microeconomic theory and its application to several economic issues of interest and of relevance to government policy, and private/public sector decision making.

EFN505 Financial Risk Management

Pre-requisites	EFN412 and EFN426
Equivalent s	EFX505
Credit Points	12
Campus	Gardens Point, Online and External
Availabilities	Gardens Point - SEM-1 Online - SEM-1 External - XCH-1

Risk is one of the most misunderstood concepts in finance. This advanced finance unit employs an authentic learning approach where you will develop a deep

Units

understanding of the key concepts and processes of risk management, helping you to flourish in a rapidly changing world. This unit builds on the knowledge and skills you have acquired about finance in earlier finance units.

EFN507 Advanced Capital Budgeting

Pre-requisites	EFN412
Equivalent s	EFX507
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 Online - SEM-2 External - XCH-1, XCH-2

Capital budgeting is an important aspect of a firm's financial management. As capital budgeting concerns the firm's long-lived assets, decisions made in this area are likely to impact upon the firm well into the future and have much to do with its long-term performance. This unit builds on the foundational finance knowledge, extending it to the context of making capital budgeting decisions.

EFN508 Econometric Methods

Anti-requisites	BSN506
Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

es - 6TP2

The purpose of the unit is to provide Honours and Higher Degree Research Students with the basic quantitative research skills necessary to complete the applied econometric work in their dissertation or thesis. The course will focus on fairly practical considerations, such as: how to develop testable implications from theoretical models; and a practical understanding of regression analysis and other more advanced econometric methods; and how to use econometric software to conduct empirical research.

EFN512 Asset Pricing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3

The purpose of this unit is to provide Honours students with an overview of the current state of empirical research in asset pricing and risk management. The unit will help students develop the skills to apply the econometric tools to formulate tests of theories considered in prior units.

EFN513 Corporate Finance

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2

The primary purpose of this unit is to expose students to and familiarise them with the major literature and recent developments in corporate

finance research. Specifically, the aim is to draw attention to the latest research on selected topics in corporate finance and the 'typical' problems encountered in empirical work in corporate finance, e.g., those associated with data accuracy, the nature and limitations of the assumptions embodied within the models adopted, and the problems of joint hypothesis testing. This should build an awareness of both the strengths and limitations of the models and methods currently used in corporate finance research.

EFN516 Insurance and Risk Management

Pre-requisites	48cp of completed studies in postgraduate Accounting, Financial Planning or Applied Finance units
Equivalent s	EFQ516
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit is designed for students to develop an advanced level of understanding about insurance and risk management, their relationship and other related factors on which financial planning practitioners advise clients and employers. The knowledge and professional skills students practise in this unit will help to prepare them for working as financial planning professionals.

Units

EFN517 Fixed Income and Alternative Investments

Pre-requisites	EFN412
Equivalent s	EFN515
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2 Online - SEM-2

This unit has an applied focus with an emphasis on investigating real world investment practice and problems, while working with real datasets. This is an intermediate level finance unit which builds on the theory and practice covered in introductory units. In this unit, students will develop a deeper understanding of fixed income securities, along with strategies for portfolio management, and technical skills for managing their risk. Students will also gain an understanding of alternative assets that extend beyond the traditional focus on equities and fixed income to real estate, commodities, and hedge funds.

EFN520 Behavioural Client Management - Financial Planning (Capstone)

Pre-requisites	(AYN457 and 48cp of completed studies in postgraduate Accounting, Financial Planning or Applied Finance) or enrolment in BS39 Financial Planning major (BS39MJR-FINPLAN).
Equivalent s	EFQ520
Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-2

Online
- SEM-2

This unit enables students to develop behavioural client management skills focusing on the examination and evaluation of behavioural biases; evaluation of market anomalies, risk profiling and investment behaviour and harmonising human and financial capital. Integrating and extending financial planning knowledge and skills gained in earlier units, students will develop a critical understanding of the financial planning discipline working individually, with peers, and with industry professionals on real-world financial planning cases and problems. This unit supports students to develop their professional identity, and enables students to demonstrate their career-readiness through the preparation and presentation of a detailed statement of advice using industry software as they prepare to transition to become financial planning professionals.

EFN555 Advanced Applications in Finance

Pre-requisites	EFN412 and EFN415
Equivalent s	EFX555
Credit Points	12
Campus	Gardens Point, Online, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2 External - XCH-1, XCH-2

As a capstone experience in

Applied Finance, this unit focuses on the integration and synthesis of the knowledge, skills, and understanding students have gained across their Applied Finance program of study. The unit connects student learning via case studies where students focus on identifying practical solutions to real-world problems encountered in finance. The case studies help to consolidate student learning, extend their critical thinking through applications, and facilitate employment-focused teamwork to support their transition into work.

EFQ423 Health Economics: Applications and Policy

Anti-requisites	PUN211
Equivalent s	EFN423
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES2, SES4

This unit provides a strategic overview of resource allocation, health-related behaviour and economic evaluation in the health and health care markets, which is fundamental knowledge for health managers and those aspiring to work in health policy roles. The management of resources, whether they are financial, material or human, are critical elements of the role of a health service manager.

EGB101 Engineering Design and Professional Practice

Credit Points	12
---------------	----

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM-2

As a professional engineer you will be competent to practise as outlined in the Engineers Australia Stage 1 Competency Standard for Professional Engineer. One of the main activities that professional engineers undertake is design, which involves using knowledge and skill bases to apply engineering methods to create systems that meet stakeholders' needs, while maintaining professional and personal attributes. This unit introduces engineering design and begins your development as a trusted and ethical professional. To develop your capability in design, you will learn about strength of materials and load bearing mechanisms so that you can undertake introductory analysis, building and testing of engineering systems, and develop your engineering ethics, professional skills in communication, engineering teamwork, research, cultural awareness and sustainable development practices. Future units, particularly those focused on design will build from this introduction.

EGB102 Fundamentals of Engineering Science

Equivalent s	EGB113
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Professional engineers have a "comprehensive, theory based

understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). This engineering foundation unit introduces concepts of physics and the strength of materials in an engineering context. You will develop the ability to recognise and apply methods to solve fundamental problems involving forces, motion and energy and to solve more complex problems involving pressures, mechanical stresses, strain and the deformation of solids as an introduction to predicting the behaviour of engineering systems. You will undertake laboratory work in groups to plan and conduct experiments to predict and analyse the behaviour of physical systems. You will build from this foundation in later units within your engineering major.

EGB103 Computing and Data for Engineers

Anti-requisites	IFB104, ITD104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Professional engineers spend much of their working lives using computing tools to support design and problem solving. In this unit, you will become proficient in designing and implementing simple algorithms to create software for solving engineering

problems. As a professional engineer having computing skills are key to automating tedious tasks and creatively constructing innovative processes that go beyond off-the-shelf software solutions. With the ubiquitous nature of large data sets, whether that be about transport systems, building energy use or chemical processes, professional engineers are often required to use computing as a key tool within engineering design methods. This unit is an introductory unit and you will build from these foundational skills in future units, within your major. No prior programming experience is assumed.

EGB120 Foundations of Electrical Engineering

Anti-requisites	EGD120
Equivalent s	ENB120
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - XCH-1, XCH-2

In this foundational electrical engineering unit you will learn concepts around the relationship between electrical energy, electronic instrumentation and measurements. This is key to begin your journey towards being a professional engineer. This unit introduces techniques for circuit analysis, instruments for measurement and practical applications in an engineering context. The ability to analyse

and understand electrical circuits and related concepts plays a key role in all engineering disciplines, but plays a key foundation for students studying electrical related majors. EGB120 combines real world focused lectures, tutorials and practicals to give a hands on experience learning about these fundamentals. The concepts in this unit will be built upon in future electrical engineering units, and also teaches key fundamentals relevant to all engineering majors.

EGB121 Engineering Mechanics

Pre-requisites	EGB102 or EGB113 or EGD113 or PVB101. EGB102 can be enrolled as a concurrent prerequisite to EGB121.
Anti-requisites	EGD121
Equivalent s	ENB110
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - XCH-1, XCH-2

Professional engineers have a "comprehensive, theory based understanding of the the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). This introductory unit provides the basic knowledge and skills in statics and mechanics of materials. It is a foundation engineering unit that will develop your skills in analysing

mechanical and civil engineering systems including cranes, buildings, bridges and mechanical equipment. You will learn the importance of accurate design and analysis of mechanical components and structures. You will draw on the skills and knowledge learn in this unit in more advanced units such as Stress Analysis, Structural Analysis and Mechanical Design.

EGB123 Civil Engineering Systems

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Civil engineers undertake site investigations and project assessments as part of infrastructure planning and management activities that meet stakeholders' needs. This unit introduces you to knowledge and skills bases that are used in these activities. You will learn road network planning, design and management, bridges and bridge approaches design and construction, public utility plant management, engineering governance, and transport facility design and development. You will continue to learn about ethics, cultural awareness, and sustainable development practices and how they underpin professional work. You will further develop your professional skills in communication and engineering teamwork. This

unit draws upon your learning in EGB101 Engineering Design and Professional Practice and integrates your learning with EGB124 Engineering for the Environment. All units in your Civil Engineering major will build upon this unit.

EGB124 Engineering for the Environment

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Civil Engineers are at the forefront of designing and implementing changes to the environment to enhance community well-being. However, it is also critical to manage the consequential environmental impacts arising from these activities and to achieve sustainable development. Therefore, understanding the interconnectedness of environmental systems are critical for civil engineers. This includes a fundamental understanding of the concepts of resilience, pollution mitigation, community engagement, and meeting legislative, regulatory and professional practice requirements. Students will learn the fundamentals about how environmental systems function and challenges imposed on the environment as a result of human activities. This unit draws on your learnings in EGB101 Engineering Design and Professional Practice and integrates with EGB123 Civil Engineering Systems. Your

learning in all units in your Civil Engineering major will benefit from the knowledge acquired from this unit.

EGB125 Design for Manufacture

Pre-requisites	EGB101 or EGB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Professional engineers have a "comprehensive, theory based understanding of underpinning natural and physical sciences" (1.1) which supports their capability in the "application of established engineering methods to complex engineering problem solving" (2.1) (Engineers Australia Stage 1 Competency Standard for Professional Engineer).

This unit provides the opportunity for you to develop your capability in these competencies in mechanical engineering. It introduces the relationships between engineering design, manufacturing processes and mechanical properties of materials, which will provide a foundation for later units in engineering design, manufacturing, solid mechanics, and stress analysis. You will learn to communicate engineering concepts using drawings and industry standard computer aided drawing technologies, to convey dimensions and tolerances, and specify materials and manufacturing processes.

EGB160 Process Principles

Equivalent s	CVB220, EGB262
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces students to the fundamental approach involved when taking a chemical reaction from the laboratory to full-scale industrial implementation. Aspects such as health and safety considerations, environmental issues, process design, process constraints, introductory project costing, mass and heat balance, chemistry and chemical engineering practice will be discussed. Examples of how professionals integrate this knowledge into practice will be provided and the design process for improvement illustrated. You will gain an understanding of how to interact in a team environment to obtain satisfactory technical solutions to an industry relevant problem. This introductory unit prepares you for more advanced study in process design.

EGB161 Foundations of Engineering Chemistry

Pre-requisites	EGB101 or EGB102
Equivalent s	CVB101, CVB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As a professional engineer,

you are required understand fundamental scientific concepts which underpin the knowledge and skill base of professional engineers. This foundational unit introduces essential concepts of chemistry which are required for engineers. You will learn about key areas of chemistry including the relationship between atomic structure and reactivity, chemical bonding, chemical thermodynamics, and types of matter. Throughout the unit, you will be provided with engineering relevant examples to demonstrate the links between chemistry and different areas of engineering. These examples will highlight the links between engineering chemistry, risk management, and sustainability. It is expected that you will build from this unit in EGB264 (Engineering Chemistry).

EGB210 Fundamentals of Mechanical Design

Pre-requisites	(EGB111 or EGB125) and EGB314
Equivalent s	ENB215
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Mechanical Design forms the backbone of the Mechanical Engineering Degree. This unit is an introduction into Mechanical Design. It brings together fundamental engineering units such as Applied Mechanics, Mechanics of Solids, Fluid Mechanics and

Materials Study and is a common unit for students studying Mechanical Engineering, Medical Engineering and Mechatronics. It will develop systematic knowledge and practice of methods of engineering problem solving, design procedures, design analysis, and introductory mechanical components design, highlighting the need for sustainable and contextually appropriate solutions. It lays the basis for advanced study in Mechanical Design.

EGB211 Dynamics

Pre-requisites	(EGB113 or EGD102 or EGD113 or ENB130 or PCB136 or PCB150 or PVB101) and (MZB126 or EGD126 or MZB127 or MAB126 or MAB180 or MAB131 or equivalencies)
Equivalent s	ENB211
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Mechanical engineers are required to have a sound knowledge in motion of particles and rigid bodies, which is essential in the design and production of machines and other engineering systems. Dynamic forces in systems such as motor vehicles, aircrafts and robotic devices are determined by kinematic and kinetic analysis of these systems. These forces play an essential part in the design of these systems. In this introductory unit, you are

introduced to the concepts of dynamics in the context of real engineering systems. The basic principles for dynamics of particles and rigid bodies in 2D are introduced and discussed as related problems within various engineering systems. On completion of this unit, you will be able to apply fundamental principles of kinematics and kinetics in formulating and solving dynamics problems for particles and rigid bodies and analyse kinematics and kinetics of basic mechanical components and mechanisms.

EGB214 Materials and Manufacturing

Pre-requisites	EGB121 or EGD121 or ENB110
Equivalent s	ENB231, ENB331
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This unit introduces the fundamentals of engineering materials and their manufacturability, deformation of materials at the micro-scale and how mechanical properties of materials can be tailored by mechanical processing and heat treatments. This knowledge along with a range of complex manufacturing processes (casting, bulk deformation processes such as rolling, forging, extrusion) and sheet metal forming processes such as blanking, piercing, bending, drawing and deep drawing. This knowledge is

important for graduate engineers in their engineering study. This unit develops appreciation to engineers around design and how to make a product out of materials using both primary and secondary production methods with minimum environmental impact and costs. They will improve their understanding about the interactions and interrelationship between processing, microstructure, properties and performance of various engineering materials in order to utilize new designs and fabrication.

EGB220 Mechatronics Design 1

Pre-requisites	(EGB101 or EGB111) and (EGB120 or EGD120 or ENB120) and CAB202
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Mechatronics Design 1 is a project unit with a hands-on introduction to mechatronics. You will be introduced to the basic concepts in mechatronics, focusing on the mechanics, electronics, and embedded software principles. The unit focuses on the research, design, and implementation of a mechatronic product to conform to a customer's needs. This is the first in a series of design units specifically for Mechatronics, building on your Introduction to Design unit in first year.

EGB240 Electronic Design

Pre-requisites	(EGB101 or EGB111) and (EGB120 or EGD120 or ENB120)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

EGB240 introduces you to the practical aspects of electronic circuit design that underpins the practice of electrical engineering. You will develop experience and confidence to draw upon theory, literature and CAD tools to synthesise electronic circuit designs to solve real world problems. You will complete two practical projects to design, build, evaluate and document simple electronic circuits. The unit provides an opportunity to apply and extend circuit and electronic theories developed in first year, and the theoretical knowledge gained in EGB120 and EGB242 to real-world engineering problems. As the second of three design units, you will further develop your engineering design and professional communication skills through application to a practical project.

EGB241 Electromagnetics and Machines

Pre-requisites	(EGB120 or EGD120) and ((MZB126 or EGD126) or (MZB127 and MZB221)). MZB221 can be enrolled in the same teaching period as EGB241.
Credit Points	12
Campus	Gardens Point, EXCHANGE and External

Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2
----------------	--

Power engineering is a sub-field of electrical engineering that deals with the generation, transmission, distribution, and utilization of electric power. Electromagnetics involves the study electric fields, magnetic fields, their sources, waves and the behavior these waves. Applications include electrical generators and motors, antennas, printed circuit board layout, data storage, fiber optics and wireless systems. This unit will introduce you to the foundations of power engineering, including magnetic circuits, electric machines, transformers and 3-phase power. You will also learn about static electric fields, electromagnetic wave propagation and transmission line theory. You will work individually and with peers to solve practical problems and to carry out simple designs. This unit will draw on your knowledge of Mathematics and EGB120 Foundations in Electrical Engineering, and prepares you for more advanced studies in Microwave and Power Engineering.

EGB242 Signal Analysis

Pre-requisites	(EGB120 or EGD120) and ((MZB126 or EGD126) or (MZB127 and MZB221)). MZB221 can be enrolled in the same teaching period as EGB242.
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2

External	- XCH-1, XCH-2
----------	----------------

Signal processing engineers have knowledge of engineering methodologies, and possess problem solving, communication, leadership and project management skills. They design, model, and analyze systems, and use a wide range of technologies and applications, including household appliances, communications systems, modern control, circuit design, biomedical engineering, and speech processing. They help transform society and enhance the quality of life. This unit will introduce you to the foundations of signal and system analysis in the time and frequency domains. You will learn and work individually and with peers to apply engineering and mathematical concepts and use programming techniques, to solve contextualized practical problems employing Fourier and Laplace analysis, LTI systems, filtering, and System modelling. This unit will draw on your knowledge and skills from EGB120 and MZB127, and prepare you for units in telecommunications, signal processing and control.

EGB243 Aircraft Systems and Flight

Pre-requisites	(EGB102 or EGB113 or EGD113 or PVB101) and ((MZB126 or EGD126) or (MZB127 and MZB221)). MZB221 can be enrolled in the same teaching period as EGB243.
Equivalent s	ENB121
Credit	12

Units

Points	
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This is a foundational aerospace engineering unit addressing the aerodynamic principles of flight, aircraft systems and the airspace environment in which aircraft operate. The unit covers basic aerostatics, aerodynamics and equations of motion to gain a technical appreciation for how aircraft fly. Core aircraft systems including navigation, surveillance, guidance and control system are covered, linking their functionality and importance to air traffic management and air safety aspects of the airspace. These topics are delivered in conjunction with multiple problem solving tasks, providing you with both the technical knowledge and high level picture of how aircraft are able to operate in the world today. This is second year engineering unit and the knowledge and problem solving skills developed in this unit are relevant to aerospace and electrical, electrical and mechatronics majors.

EGB261 Unit Operations

Equivalent s	CVB221, EGB461
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Professional engineers have a "comprehensive, theory based

understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). This engineering unit introduces concepts of unit operations in the engineering context of water treatment and industrial chemicals production. You will develop the ability to select and apply unit operations to solve practical problems involving treating water to make it comply with beneficial reuse, and use appropriate unit operations to develop sustainable solutions in the chemical sector. You will partake in computer simulations to predict water treatment designs which are technically, economically, environmentally and socially appropriate. You will build from this foundation in later units within your engineering major.

EGB263 Process Systems

Pre-requisites	EGB160
Anti-requisites	EGB262
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - XCH-2

This unit lays foundational technical skills for chemical and process engineers in mass and energy balance modelling as a process design tool. This unit introduces mass and energy balance concepts and you will

learn how to solve mass and energy balance problems individually through problem solving tasks. The unit builds on EGB160 and lays foundational skills for real-world process modelling in EGB364 where process designed skills are aided with computer simulation software.

EGB264 Engineering Chemistry

Pre-requisites	EGB161
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

As a Chemical Process Engineer, you will encounter analytical concepts in both inorganic and organic branches of chemical processing. Collaboration and consultation with technical partners will require a working knowledge of these concepts as a professional chemical process engineer. This unit introduces theoretical and practical concepts of analytical and organic chemistry that are relevant within chemical processing. You will learn about common analytical concepts and instrumentation, as well as learn about fundamental organic chemistry functional groups, interactions and reactions. You will draw on knowledge gained from EGB161 and will build from this unit in EGB361.

EGB270 Civil Engineering Materials

Pre-requisites	EGB102 or EGB113 or EGD113 or PVB101
Anti-	EGD270

Units

requisites	
Equivalent s	ENB273
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Civil engineers in the fields of structural, geotechnical and construction engineering use knowledge and skills bases in civil engineering materials that you will learn in this unit to meet stakeholders' needs for safe, economical and sustainable infrastructure. You will learn core concepts of civil engineering materials science, along with acquisition, manufacturing and testing of materials such as concrete, steel, timber and soils, and factors that influence their properties, quality, and application in real-world infrastructure projects. You will be introduced to common and advanced civil engineering materials used in the Australian and global contexts. You will further develop your professional skills, in particular communication and reflection towards developing your professional engineering competency. This unit draws upon your learning in EGB121 Engineering Mechanics. Structural, geotechnical, and construction engineering units will build upon this unit.

EGB272 Traffic and Transport Engineering

Pre-requisites	MZB127 or MZB126 or EGD126
Equivalent	ENB376

s	
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Transport engineering is a prominent field of civil engineering that focuses upon safe, efficient and environmentally sustainable mobility of people and goods. Its activities include the analysis, design, planning, operation, management and control of multimodal transport systems. Transport engineers use knowledge and skills bases that you will learn in this unit to meet stakeholders' needs. You will learn the fundamentals of road traffic and transport engineering, which includes traffic flow theory, unsignalised intersection analysis, roundabout analysis and design, signalised intersection analysis and design, and travel demand modelling. You will further develop your professional skills in communication and engineering teamwork. This unit draws upon your learning in EGB123 Civil Engineering Systems and EGB103 Computing and Data for Engineers. EGH472 Advanced Highway and Pavement Engineering, and EGH479 Advances in Civil Engineering Practice, will build upon this unit.

EGB273 Principles of Construction

Pre-requisites	EGB123 OR EGD123 (EGB123 can be studied in the same teaching period as EGB273)
Equivalent s	ENB275
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Construction engineering is a prominent field of civil engineering that focuses on turning civil engineering infrastructure designs into reality. Construction engineers use knowledge and skills bases that you will learn in this unit to select and implement methods of civil construction. You will learn about site investigation, environmental management, construction planning and project management techniques, earthworks, equipment selection for various civil infrastructure types. You will further develop your professional skills in communication and engineering teamwork. This unit draws upon your learning in EGB123 Civil Engineering Systems. EGH479 Advances in Civil Engineering Practice will build upon this unit.

EGB274 Environmentally Sustainable Design

Pre-requisites	EGB124 or EVB201 or EGB111 or UXB220 or UXB230 or ERB101 or EVB102 or completion of 96 CPs in AB01
Equivalent s	ENB274

Units

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

The knowledge and skills associated with site investigation and planning for sustainable development are essential for civil and environmental engineers, as is the ability to work within multidisciplinary teams to achieve balanced solutions on social, economic and environmental grounds. This sustainable development design project requires you to undertake typical site investigations, analyses and designs for a selected site covering sustainability issues in the following areas:

Sustainable Transport, Land Planning including assessment of the surrounding suburbs, Water and Wastewater Management and Environmental Impact Assessment. This unit extends and applies the knowledge developed in first year design based engineering units to important issues such as site analysis, site investigation, development of site planning criteria, site planning, environmental management and quality, pollution prevention and control, and resource and waste management.

EGB275 Structural Mechanics

Pre-requisites	(EGB121 or EGD121 or ENB110) and (MZB127 or MZB126 or EGD126)
Credit	12

Points	
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - XCH-1, XCH-2

Structural engineering is a prominent field of civil engineering that focuses on creation of safe, economical and sustainable structures. Structural engineers use knowledge and skills bases that you will learn in this unit to meet stakeholders' needs. You will learn moment distribution, introduction to structural analysis software, principle of virtual work to determine deflections, transformation of stresses and Mohr's Circle, torsion, shear flow, shear centre, unsymmetrical bending, the principle of compatibility, and combined axial loading and bending of structural elements and systems. In this unit you will further develop your mathematical skills (30% of this unit is maths) in structural engineering applications, and professional skills in engineering communication. This unit draws upon your learning in EGB121 Engineering Mechanics and MZB127 Engineering Mathematics and Statistics. All structural engineering units in the Civil Engineering major will build upon this unit.

EGB314 Solid Mechanics

Pre-requisites	(EGB121 or EGD121 or ENB110) and (MZB125 or MXB161 or EGD125 or equivalencies)
Equivalent s	ENB212

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

As a mechanical/medical engineer, you must have the expertise to analyse components and systems of components to produce safe and efficient designs. Strength of Materials is an intermediate level unit which investigates how external loading produces internal stresses and strains in a solid body, and the implications of these stresses and strains for components' strength, stiffness and robustness. Understanding this subject is an essential part of the design process that ensures the structural integrity of various structures, electromechanical devices and mechanisms. When used effectively and this process can result in lightweight, reliable and robust structures. This unit builds on the concepts from the introductory EGB121 - Engineering Mechanics unit. Future units, such as EGB210 - Fundamentals of Mechanical Design, EGB316 - Design of Machine elements and EGH414 - Stress Analysis use the knowledge and techniques developed in this subject extensively.

EGB316 Design of Machine Elements

Pre-requisites	EGB314 and (EGB210 or ENB215) or Admission to EN55
Equivalent s	ENB316

Units

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Mechanical design within professional engineering practice requires that graduates bring together the various analytical techniques they know in a systematic way to develop confidence in a design or analysis. In this unit students will learn advanced theories of mechanical design analysis, and will apply this in the design and analysis of a variety of machine elements. Methodical design process is emphasized, as is the application of relevant design standards, and advanced simulation using the Finite Element Analysis package ANSYS. A key focus of the unit is the repeated application of a practice based design analysis workflow to real machine components. Weekly application of the design skills being developed, make you comfortable with both mechanical systems as a whole, and the determination, estimation, or selection of open ended quantities within the design process.

EGB319 Medical Device Design

Pre-requisites	EGB210 or EGB220 or ENB215 or ENB229
Equivalent s	ENB319
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1

External
- XCH-1, XCH-2

Professional medical engineers work with medical devices at different stages of their life-cycle. Doing so requires specialist understanding of the regulatory requirements for medical devices. In this unit, you will work together with peers to propose and evaluate designs to address an unmet clinical need. In assuming a team role you will be exposed to the various duties that medical engineers may fulfill in professional practice. The impacts of the regulatory environment on medical device design will be explored as well as the importance of quality and risk management. EGB319 Medical Device Design builds on EGB210 Fundamentals of Mechanical Design to develop your engineering design skills, with particular emphasis on medical device concept development, EGH435 Modelling and Simulation for Medical Engineers will add quantitative design skills to enable refinement of medical device designs.

EGB320 Mechatronics Design 2

Pre-requisites	EGB220
Equivalent s	ENB329
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Mechatronics Design 2 is a project unit with a hands-on application to advanced mechatronics principles. You will focus on the mechanics,

electronics, and embedded software principles behind mechatronics. In this unit, you extend your knowledge and skills from Mechatronics Design 1 to the research, design, and implementation of an advanced mechatronic product to meet a customer's needs. You will further extend your skills and knowledge in mechatronics design in Mechatronics Design 3.

EGB321 Dynamics of Machines

Pre-requisites	EGB211 or ENB211
Equivalent s	ENB312
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Professional engineers have a "comprehensive, theory-based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineers). This engineering core unit introduces fundamental concepts of dynamics & vibration of machines in an engineering context. You will develop the ability to recognise and apply the developed theories and formulas to solve fundamental engineering problems involving position, velocity, acceleration and force and to solve more complex problems involving nonlinear equation of motion, free body

diagram as an introduction to predicting the vibration behaviours of engineering systems. You will undertake laboratory work in groups to plan and conduct experiments to predict and analyze the behavior of physical systems and apply this theoretical dynamics knowledge into practice to design walkable robots.

EGB322 Thermodynamics

Pre-requisites	EGB323 or ENB221
Equivalent s	ENB222
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

As a professional engineer you will be competent to practice as outlined in the Engineers Australia Stage 1 Competency Standard for Professional Engineers, including discipline specific knowledge and skills in engineering thermodynamics. This unit introduces the fundamental principles of thermodynamics, together with the use of state diagrams to describe thermodynamic systems and processes. In this unit you will apply these principles and analysis methods to real world engineering problems involving air compressors, internal combustion engines, steam power plant and refrigeration systems. This unit relies on a prior understanding of mathematics and mechanics studied in your first year or

equivalent units. You will build from this unit in subsequent engineering units in advanced thermodynamics and fluid dynamics.

EGB323 Fluid Mechanics

Pre-requisites	(MZB127 or MZB126) AND (EGB102 or EGD102 or EGB113 or EGD113 or PVB101 or ENB130)
Equivalent s	ENB221
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Professional engineers have a "comprehensive, theory based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). This 2nd-year unit introduces the fundamentals of fluid mechanics applied by engineers to understand and characterize fluid flows. The concepts, principles and equations of fluid mechanics are presented in the context of real engineering systems. The unit will provide you with the ability to apply and solve problems related to hydrostatics, explain and report how basic fluid mechanics is used in hydraulic structures and fluid systems, and apply the energy and momentum equations. This unit also contains an embedded mathematics component (30%)

to provide intermediate level vector calculus as well as dynamical systems and their stability to support student learning in intermediate level engineering units.

EGB339 Introduction to Robotics

Equivalent s	ENB339
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces the fundamental concepts and algorithms of robotics and computer vision. You will learn how to solve typical fundamental real-world computer vision and robotics problems, working individually and in a team. You will build from this unit in EGB439 (Advanced Robotics).

EGB340 Design and Practice

Pre-requisites	EGB240 or Admission to EN55
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This is an advanced unit which aims to extend your design skills, professional skills and technical knowledge in the context of teamwork on a challenging project. Design communication skills will be developed through teamwork, regular presentation, written reports and studio-style critique. Professional skills

developed include those in problem exploration, solution generation, problem scoping, teamwork, time management, flexible problem solving, critical thinking, information retrieval, report writing and presentation. This unit plays an important role in developing many professional skills by approaching problems from a user centred design methodology. EGB340 is situated after the first and second year electrical design units, and prepares you for your final year honours project.

EGB341 Energy Supply and Delivery

Pre-requisites	EGB241
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

In this unit you will cover the concepts and technical aspects of electric energy generation and delivery. The structure of energy conversion and delivery from power stations through transmission and distribution to customer loads will be addressed, including the concept of electricity markets. Models of transformers, transmission lines, power flow, synchronous and induction machines will be studied as key component and features of electricity network. This subject will lay the foundations for EGH441 Power System Modelling.

EGB342 Telecommunications and Signal Processing

Pre-requisites	EGB242
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - XCH-2

This a foundational unit addressing core concepts, characteristics and performance requirements in analog and digital communication systems. This is an introductory unit and the knowledge and skills developed in this unit are relevant to communication and signals stream in the electrical engineering major. This unit introduces basic building blocks of analog and digital modulation techniques for single and multi-user communications. You will learn to use time and frequency domain signal analysis, apply information theory to compress digital data, choose appropriate modulation techniques to transmit digital and analog signals and analyse the performance communication systems in noisy channels. You will build from this unit in EGH443 Advanced Telecommunications, EGH444 Digital Systems and Image processing, and EGH442 RF Techniques and Applications units by extending analytical understanding of basic building blocks for design and analysis of more complex signals and systems.

EGB345 Control and Dynamic Systems

Pre-requisites	EGB242
Anti-requisites	EGH421
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Control systems engineering is at the heart of most of the modern electrical and mechanical systems that you will encounter in your careers as practicing engineers. The unit provides theoretical and practical understanding of control systems to enable you to better apply and design engineering technologies. The unit is an intermediate level unit to be undertaken once you have sufficient mathematical and analysis skills to understand the theory and to apply the theory in practice.

EGB346 Unmanned Aircraft Systems

Pre-requisites	EGB243
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Unmanned Aircraft Systems have become a useful and common tool for engineers. As a future professional engineer it is critical to understand technical, practical and regulatory issues around the design and operation of

Unmanned Aircraft Systems. This unit introduces the key concepts and theory of Unmanned Aircraft Systems including mission design, airframes and propulsion, autopilots and sensors, ground stations and communications, and flight operations and risk management. You will work with your peers in a team and design an Unmanned Aircraft System-based solution to a real-world problem. You will draw on your experience in EGB243 Aircraft Systems and Flight.

EGB348 Electronics

Pre-requisites	EGB242. EGB242 can be enrolled in the same teaching period as EGB348.
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Electronic devices and circuits are the building blocks of most electrical and computing devices. In this unit, you will identify the characteristics and operation of discrete and integrated circuit semiconductor devices, including diodes, transistors and op amps. You will learn how they are combined into circuits to perform useful operations on signals, such as amplification, filtering or switching. This unit also introduces digital electronics, including devices such as logic gates and flip-flops, and combinational logic, and digital circuit design. This unit is an

Intermediate Electrical Option, which builds on basic electrical circuit theory learned in EGB120. It forms the foundation for later units in Advanced Electronics and Power Electronics.

EGB349 Systems Engineering and Design Project

Pre-requisites	EGB240
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Engineers who work on large projects need a specific suite of additional skills when compared to engineers who work on smaller projects. Systems Engineering provides the framework to allow the interoperability to be addressed. These skills include technical design and implementation, management of the project and teamwork coordination. Compliance to Australian and International standards is also an essential requirement of the designs. This unit provides skills and knowledge for a project teamwork activity, and builds on the work you learned in foundation of engineering design and electronic design. This unit will develop the necessary competency in dealing with aerospace systems. The objectives of the unit are to provide a grounding in systems engineering methodology according to the various standards in use throughout the world, to

expose you to the experience and the problems of working as a member of a design team, and to have you undertake a group design exercise.

EGB361 Minerals Processing

Pre-requisites	EGB264
Equivalent s	ENB361
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Professional engineers need to have a sound understanding of how science and engineering fundamental concepts inform sustainable practices and designs. In this engineering unit, you will apply inorganic, physical, organic and analytical chemistry concepts in the operation and design of a range of mineral processing circuits used for extracting metals and minerals required for clean energy technologies. You will build professional and personal attributes around ethics, risks and sustainability through a number of interactive design challenges for complex mineral processing problems or case studies. A virtual mineral processing plant will be used to evaluate health, safety and environmental aspects and to demonstrate the operation of different areas of a mineral processing plant. This unit builds on chemistry from Foundations in Engineering Chemistry EGB161, engineering design concepts in Process Principles EGB160 and analytical techniques in Engineering Chemistry

EGB264.

EGB362 Operations Management and Process Economics

Pre-requisites	EGB261 or EGB461 or EGB323
Equivalent s	ENB260, EGB260
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This an intermediate level unit for chemical process engineering, addressing concepts to allow an engineer to understand the competing factors that affect operations and profitability of a chemical process in an Australian context. The unit brings together operations management and process economics concepts to understand the competing factors that affect operations and profitability of a chemical process in an Australian context. You will work together with peers on an authentic learning experience in a role play and submit a portfolio of works. You will draw on process operations introduced in EGB261.

EGB364 Process Modelling

Pre-requisites	EGB263 or EGB262
Equivalent s	ENB460, EGH460
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds technical competence in mass and

energy balances for process design. Moving from simple mass and energy balances towards realistic and complex balances requires developing deeper modelling skills involving computer software, bringing together chemical thermodynamics and mathematics. You will learn how to use process simulation software through individual problem solving tasks and how it mimics the chemistry through practical laboratories. The unit builds on introductory concepts learned in EGB263 Process Systems, leading into EGH462 Process Control which focuses on dynamic behaviour. The embedded mathematics content constitutes 30% of the unit and provides intermediate level computational mathematics techniques to support student learning in intermediate level engineering units.

EGB371 Engineering Hydraulics

Pre-requisites	(EGB124 or EGB123) and (EGB102 or EGB113 or EGD113 or PVB101)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Hydraulic engineering is a prominent field of civil engineering that focuses on design, construction, operation and maintenance of infrastructure including dams, pumping stations, water and wastewater treatment plants, water distribution systems and

sewer collection systems. Hydraulic engineers use knowledge and skills bases that you will learn in this unit to meet stakeholders' needs. You will learn about the engineering applications of water and other fluids through pipe flow, energy loss in pipes, pipe systems, water distribution systems and open channel flow hydraulics. You will further develop your professional skills in communication and engineering teamwork. This unit draws upon your learning in EGB123 Civil Engineering Systems and EGB124 Engineering for the Environment. EGH471 Advanced Water Engineering will build upon this unit.

EGB373 Geotechnical Engineering

Pre-requisites	(EGB270 or EGD270) and (EGB121 or EGD121 or ENB110)
Equivalent s	ENB272
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Geotechnical engineering is prominent field of civil engineering that focuses on design, construction, and maintenance of foundations of structures (such as buildings, bridges), soil and water retaining structures (retaining walls and earth dams), soil slopes, road and runway pavements, and buried structures including pipes and tunnels.

Geotechnical engineers use knowledge and skills bases that you will learn in this unit to meet stakeholders' needs. You will learn the properties of geomaterials, geotechnical engineering principles and theories, and their applications. You will further develop your personal and professional skills in communication and engineering teamwork. This unit draws upon your learning in EGB270 Civil Engineering Materials. EGH473 Advanced Geotechnical Engineering will build upon this unit.

EGB375 Design of Concrete Structures

Pre-requisites	EGB275 and (EGB270 or EGD270 or ENB273)
Equivalent s	ENB276
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Structural engineering is a prominent field of civil engineering that includes a focus on concrete structures, which are the most common form of construction worldwide. Structural engineers use knowledge and skills bases that you will learn in this unit to design concrete structures to meet stakeholders' needs. You will learn the core concepts of the design principles and methods of the reinforced and prestressed concrete and their application to structural elements such as the beams, slabs, columns and footings of

buildings. You will learn the essential principles of safety, economy, sustainability and constructability in design of concrete structures. You will continue to develop your personal and professional attributes, especially communication skills in design. This unit draws upon your learning in EGB121 Engineering Mechanics, EGB270 Civil Engineering Materials, and EGB275 Structural Mechanics. EGH475 Advanced Concrete Structures will build upon this unit.

EGB376 Steel Design

Pre-requisites	(EGB275 OR ENB270) AND (EGB270 OR EGD270 OR ENB273)
Equivalent s	ENB375
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Structural engineering is a prominent field of civil engineering that includes a focus on the design, construction, operation and maintenance of steel structures such as buildings, bridges, cranes, and transmission towers. Structural engineers use knowledge and skills bases that you will learn in this unit to meet stakeholders' needs. You will learn the behaviour, analysis and limit states design of steel structural elements such as tension and compression members, beams, and their connections. You will

develop skills to analyse and design simple steel structures including continuous beams and trusses. You will further develop your professional skills in communication and engineering teamwork. This unit draws upon your learning in EGB270 Civil Engineering Materials and EGB275 Structural Mechanics. EGH479 Advances in Civil Engineering Practice will build upon this unit.

EGB377 Water and Waste Water Engineering

Pre-requisites	EGB371
Equivalent s	ENB377
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Water and wastewater engineering is a third year elective Civil Engineering unit, providing the fundamental principles and application of (i) drinking water and (ii) wastewater treatment processes. The subject of water quality is also introduced to show how to link source water quality to treatment process selection. The wastewater component covers principles of wastewater treatment in order to enable wastewater to be disposed safely, without being a danger to public health or polluting receiving watercourses. New concepts introduced during lectures are explained through practical examples and further

demonstrated with real-world complex practical problem solving tasks during tutorials. There are two site visits, one to a water treatment plant and to a wastewater treatment plant. These real-world experiences will help consolidate concepts, principles and methodologies learned in the classroom.

EGB382 Construction Methodologies

Pre-requisites	EGB273
Equivalent s	ENB381
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1 External - XCH-1, XCH-2

Success in civil engineering construction projects is dependent on the selection of correct construction procedures matched with the correct equipment and ancillary temporary work. To do this, a construction engineer must have command of a range of options and the judgement to integrate these options for optimal outcomes for all stakeholders. This unit covers the fundamentals of project execution and start up of civil engineering projects. The subjects to be covered will include: site investigation, survey, identification and provision of temporary facilities, selection of equipment, material management, methods of construction, environmental protection practices, workplace

health and safety requirements. The emphasis of the content will be on heavy, civil engineering projects existing or relevant to Queensland with a focus on environmental concerns and safety.

EGB386 Design of Masonry Structures

Pre-requisites	EGB275
Equivalent s	ENB384
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-1 External - XCH-1, XCH-2

This unit deals with the application of structural masonry to buildings with the core concepts of the design principles and methods of assessing the structural performance of masonry walls subject to earthquake and gravity loading. Most masonry buildings have heritage value and require knowledge for preservation; masonry structures are also popular in medium rise residential and industrial buildings. Therefore, this unit introduces the principles of safe and economical design of masonry walls for fire and combined compression, flexure and shear. Unreinforced, partially reinforced and fully reinforced masonry structures are covered.

EGB387 Project Value and Innovations

Pre-requisites	EGB273
Equivalent s	ENB472
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-2 External - XCH-1, XCH-2

In addition to design competence, Engineers require a sound understanding of construction and management principles and engineering economic analysis to fully meet the expectations of employers and the broader community. This unit addressing a complete financial and economic evaluation of project using several evaluation criteria commonly applied in the assessment of engineering project alternatives. This is a construction engineering second major unit and the knowledge and skills developed in this unit will help engineers to think creatively and to understand the decisions required in a project planning and feasibility environments as well as understanding projects within the economic (value and price) environment. This advanced unit significantly integrates your prior knowledge and skills to effectively perform specific management tasks in typical civil engineering projects.

EGB414 Advanced Materials

Pre-requisites	EGB214
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

With a rapidly growing and ageing world population, the need for novel materials with advanced properties to address critical issues from structure to energy, environment and healthcare is increasing. You will be introduced to advanced materials including functional metallic alloys, ceramic, polymers, composites, and nanostructured materials and examined in more depth in the context of their properties, processing, performance and their applications in robust designs. Where appropriate, relevant engineering cases, research papers that outline the latest developments in research, and laboratory experiments will be provided to an in-depth understanding of the selected material or applications. This is an advanced engineering unit that is built from knowledge and skills you previously learned in EGB214 Materials and Manufacturing. It covers advanced engineering materials and their applications.

EGB415 Motor Racing Vehicle Design

Pre-requisites	EGB316 Or Admission to (EN50 or EN55)
Equivalent s	ENB315
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External

This information is correct as at 08/09/2023. For the most up-to-date course information, visit <https://www.student.qut.edu.au/enrolment/units/>. CRICOS No.00213J

- XCH-1, XCH-2

Building on fundamental mechanics, materials, and design units, in this unit you will study design, development, and setup of motor racing vehicles. In addition to basic content delivery in lectures, learning will take place through a series of practicals, computer laboratories, a group design project, and industry-led tutorials. Where possible, a track day will be organised with the QUT Motorsport Team.

EGB422 Energy Management and Sustainability

Pre-requisites	EGB323 Or Admission to (EN50 or EN55)
Equivalent s	ENB422
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Global energy issues are having a profound effect on engineering practice in relation to energy utilisation. Energy management is generally regarded as an effective solution for immediate energy consumption reduction and to address global warming. It is also concerned with increasing productivity, improving standards of living and saving money. You will learn how to apply the principles of thermodynamics, heat transfer and electricity along with an introduction to financial analysis and managerial practice. This will enable them to conduct an audit of energy

systems and develop a sustainable energy management plan. This unit also details energy auditing of commercial buildings, industrial energy systems and processes, and explore their energy-saving opportunities. It equips students with the skills and knowledge required to conduct energy audits, analyse data, and provide reports for their energy-related customers. This unit also includes guest lectures from industry experts.

EGB423 Heating, Ventilation and Air Conditioning

Pre-requisites	EGB323 Or Admission to (EN50 or EN55)
Equivalent s	ENB423
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces the basic principles of HVAC and refrigeration systems in the context of buildings in sub-tropical environments. In buildings, health and comfort level of people are highly related to the indoor thermal environments. Many methods have been developed to alter our immediate environment to achieve 'comfortable' conditions, particularly within the built environment. Using the principles of thermodynamics and fluid mechanics, engineers have developed efficient HVAC systems that process ambient air to conditions deemed to be comfortable for most people. HVAC systems are designed to create a comfortable and safe

environment and are one of the most important systems in modern buildings. On the other hand, HVAC systems are most energy consuming systems in commercial and residential buildings and therefore energy efficiency is a prime concern for these systems. This unit provides detailed analysis and implementation of the design practices required for engineers.

EGB432 Asset Management and Maintenance

Pre-requisites	EGB316 or ENB316 or EGB319 or ENB319
Equivalent s	ENB432
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Engineers are often involved in the acquisition, maintenance, and renewal of equipment. The ability to analyse maintenance data and develop effective maintenance plans remain important skills for today's engineers. The focus of this unit is on the development of techniques to manage the life cycles of engineering assets effectively to maximise their value. The unit will introduce students to the theory and techniques of Reliability Engineering, develop tools for the analysis of maintenance data, and address the development of optimised maintenance strategies.

EGB435 Advanced Manufacturing and Industrial Automation

Pre-requisites	EGB214 Or Admission to (EN50 or EN55)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is built on the earlier unit Materials and Manufacturing (EGB214) with a particular focus to advanced manufacturing technique. The unit further develops student knowledge and skills around advanced manufacturing processes, in particular various machining techniques such as turning, milling, shaping, drilling and grinding and various other super finishing techniques. In addition the students will develop appreciation of the mechanics of metal cutting (orthogonal), tooling considerations and economics of tooling. In particular this unit introduces various non-traditional manufacturing processes such as ECM, EDM, Ultrasonic Machining etc. In a broad sense this unit will provide all necessary knowledge about manufacturing a product/assembly/machine including process capability and process sequencing.

EGB439 Advanced Robotics

Pre-requisites	EGB339 Or Admission to (EN50 or EN55 or EN60)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

In this unit, you will develop your skills in the theory and practice of mobile robotics. The theory part includes advanced topics on motion models, motion control, motion planning, localisation, and simultaneous localisation and mapping (SLAM). Practice requires the translation of theory to working software which is evaluated using online tools. This unit builds on skills developed in EGB339.

EGB473 Composite Structures

Pre-requisites	EGB476 or Admission to (EN55 or EN60)
Equivalent s	ENB473
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced level civil engineering unit provides the required knowledge and skills for the analysis, design and construction of multi-storey steel-concrete composite buildings. Building on the structural, material, construction and professional studies units of previous semesters, it provides detailed knowledge, skills and experience in load evaluation, selection of suitable structural framing systems, modelling, analysis and design of multi-storey steel-concrete buildings and their components including composite slabs and beams by engaging in a 12-storey building project on a real site. The ability to analyse and design multi-storey buildings is a requirement for selected graduate civil engineering

positions. This unit provides the knowledge and skills required for this purpose. It will prepare you to pursue a career in structures and/or construction.

EGB475 Advanced Structural Analysis

Pre-requisites	EGB275 or Admission to EN55
Equivalent s	ENB475
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is an advanced structural engineering unit in which topics that are regularly used by structural engineers as well as some topics that become useful for special cases will be covered. Using knowledge from previous years, you will develop and present the computer based stiffness method for analyzing structures in order to design them. Dynamics and vibration of structures will be introduced with applications to buildings. Structures collapse when loaded beyond their capacity. The predictable pattern of structural failure through the formation of plastic hinges (or failure points) will be treated. The application of dynamics and vibration to structural health monitoring and damage detection and to seismic engineering will be covered. The Australian Standard AS1170.4 for seismic analysis will be used in the studies. On completion of this unit, students will be well prepared to face the challenges of a

structural engineer.

EGB476 Advanced Steel Design

Pre-requisites	EGB376 or Admission to EN55
Equivalent s	ENB373
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is an advanced level civil engineering unit that provides the required knowledge and skills for the analysis, design and construction of steel buildings. Building on the structural, material and construction units of previous semesters, it provides detailed knowledge, skills and experience in determining the wind effects on buildings, modelling, analysis and design of steel framed buildings and all their components by engaging in a single storey steel portal frame building project on a real site. The ability to analyse and design steel buildings is a requirement for a range of graduate civil engineering positions. This unit is the second one in the civil engineering course that provides the knowledge and skills required for this purpose. It will prepare you to pursue a career in structures and/or construction. EGB473-Composite Structures builds on this unit by extending your knowledge and skills for more complex, composite steel-concrete structures.

EGB479 Advanced Transport Engineering

Pre-requisites	EGB272 or Admission to EN55
Equivalent s	ENB379, EGB379
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

The transport engineer must be familiar with the role of each transport mode in the overall transport task, along with operational aspects of each mode. This must be overarched by an understanding of the system and tools for planning, operation and management of transport projects, particularly in context of economic, environmental and social attributes. The aim of this unit is to develop your awareness and understanding of important concepts and analytical tools for operations, planning, designing, and management of transport systems, especially transit systems. This unit builds upon your transport related knowledge and skills developed in EGB123 Civil Engineering Systems and EGB272 Traffic and Transport Engineering, and provides a useful foundation to EGH479 Advances in Civil Engineering Practice.

EGB481 Infrastructure Asset Management

Pre-requisites	EGB123 or Admission to (EN55 or EN60)
Equivalent s	EGB381
Credit	12

Units

Points	
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

The quality of civil infrastructure has significant impacts on the quality of life, the health of the social system, and the sustenance and growth of regional and national economy. This unit in infrastructure asset management is a response to the growing need for civil engineers to be proficient in infrastructure asset management topic that requires a broad and practical knowledge of infrastructure characteristics and fundamental management techniques. At the completion of this unit students will have sound understanding of the whole of life-cycle assessment of infrastructure assets, practical asset-management techniques, and some of the economic and governance related issues that pertains to infrastructure. These skills should enable students with better decision-making capabilities that can increase resilience and sustainability of infrastructure.

EGB482 Contracting and Construction Regulations

Pre-requisites	EGB273 or admission to EN55
Equivalent s	ENB277
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

A construction engineer must have an appreciation of the commercial environment in which they work. The law and particularly the law relating to construction has a significant impact upon that commercial environment. This unit will provide a framework and sufficient detail to increase your awareness of how the law governs you and your organisation's actions within the industry. In addition, you will understand the operation of a construction contract and the claims and disputes commonly associated with the administration of such a contract. The lectures provide a solid foundation required for Construction Engineers, and embedded in the tutorials are discussions of real-world cases of the past month to highlight the importance of understanding the impacts of day-to-day decisions in the world of construction.

EGB485 Finite Element Analysis

Pre-requisites	EGB475 or Admission to (EN50 or EN55 or EN60)
Equivalent s	ENB474
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Finite Element Analysis (FEA) is a computer based method for analysing structures under static or dynamics loadings. It has applications in all areas of engineering and is used by practising engineers and researchers to analyse and design all types of structures

including buildings, bridges, dams, multi-purpose towers, cooling towers, etc. FEA enables multiple and repeated analyses with ease and hence facilitates the optimum design of the structure. It is available through a number of well-known packages such as Strand 7, ANSYS, ABAQUS, LSDYNA, etc. It is now possible to treat complex problems such as dynamic seismic analysis, impact and blast analyses and structural health monitoring and damage detection, all of which were impossible prior to the advent of FEA. Students who complete this unit will be well prepared to face the challenges of modern design offices.

EGB489 Advanced Transport Modelling

Pre-requisites	MZB127 or MZB126 or admission to EN55
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an advance transport engineering unit that develops theoretical insights with their practical applications of transport modelling and simulation. The unit covers various levels of modelling (micro and macro) techniques. The theory is supported by its real world practical modelling applications. It provides hands-on use of state-of-the-art modelling tools through an authentic assessment. Modelling of transport networks is an inevitable part of the planning, design and operation

of complex transport systems. For instance, strategic models are exploited for the planning of new transport infrastructure and traffic flow models are utilised for evaluating the efficiency and reliability of existing networks. A transport engineer should understand the suitability of various modelling and simulation techniques for particular tasks and assess their strength and weakness. The unit will acquaint students with essential transport strategic and operational modelling, and evaluation skills.

EGD101 Engineering Design and Professional Practice

Equivalent s	EGB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

As a professional engineer you will be competent to practise as outlined in the Engineers Australia Stage 1 Competency Standard for Professional Engineer. One of the main activities that professional engineers undertake is design, which involves using knowledge and skill bases to apply engineering methods to create systems that meet stakeholders' needs, while maintaining professional and personal attributes. This unit introduces engineering design and begins your development as a trusted and ethical professional. To develop your capability in design, you will learn about strength of materials and load bearing

mechanisms so that you can undertake introductory analysis, building and testing of engineering systems, and develop your engineering ethics, professional communication skills, engineering teamwork, research, cultural awareness and sustainable development practices. Future units in the Bachelor course, particularly those focused on design, will build from this introduction.

EGD102 Fundamentals of Engineering Science

Anti-requisites	EGB113, EGD113
Equivalent s	EGB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

Professional engineers have a "comprehensive, theory based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). This engineering foundation unit introduces concepts of physics and the strength of materials in an engineering context. You will develop the ability to recognise and apply methods to solve fundamental problems involving forces, motion and energy and to solve more complex problems involving pressures, mechanical stresses, strain and the deformation of solids as an introduction to predicting

the behaviour of engineering systems. You will undertake laboratory work in which you will plan and conduct experiments to predict and analyse the behaviour of physical systems.

EGD103 Computing and Data for Engineers

Anti-requisites	ITD104, IFB104
Equivalent s	EGB103
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

Professional engineers spend much of their working lives using computing tools to support design and problem solving. In this unit, you will become proficient in designing and implementing simple algorithms to create software for solving engineering problems. As a professional engineer having computing skills are key to automating tedious tasks and creatively constructing innovative processes that go beyond off-the-shelf software solutions. With the ubiquitous nature of large data sets, whether that be about transport systems, building energy use or chemical processes, professional engineers are often required to use computing as a key tool within engineering design methods. This unit is an introductory unit providing you with foundational skills. No prior programming experience is assumed.

Units

EGD105 Modelling with Introductory Calculus

Equivalent s	MAB105, MZB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

This is an introductory unit covering the basic mathematical theory of functions and graphs, along with the foundational concepts and techniques of differential and integral calculus. The unit also explores a wide variety of calculus applications, and introduces the basic mathematical modelling skills relevant to a wide variety of scientific fields. The ability to express scientific problems in mathematical language, and to apply calculus techniques in the analysis of these problems, is essential to science students across all disciplines. This foundational mathematical unit prepares students for EGD125 Introductory Engineering Mathematics.

EGD120 Foundations of Electrical Engineering

Pre-requisites	EGD113
Anti-requisites	EGB120
Equivalent s	ENB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

All engineers need to have a basic understanding of the relationship between electrical energy, electronic instrumentation and

measurements. Understanding techniques for circuit analysis, instruments for measurement and practical applications in an engineering context are the objectives of this unit. This unit lays the foundation for advanced units in electronics, signals and systems, and power systems in later years.

EGD121 Engineering Mechanics

Anti-requisites	EGB121
Equivalent s	ENB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

This is a foundation engineering unit that will develop the necessary skills in analysing mechanical and civil engineering systems (cranes, buildings, bridges and mechanical equipment) to maintain equilibrium leading to the determination of direct, bending and shear stresses that will aid you in design. The principles of engineering mechanics are essential for the purpose of accurate design and analysis of mechanical components and structures. This is an introductory unit and provides the basic knowledge and skills in statics and mechanics of materials including mechanical properties of rigid bodies. It forms the foundation for advanced engineering units such as Stress Analysis, Structural Analysis and Mechanical Design by developing your basic

knowledge and skills that are important to your engineering degree and career.

EGD125 Introductory Engineering Mathematics

Anti-requisites	MZB125, MAN120
Equivalent s	MAB100, MAB120, MAB125, MAB180, MXB100
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2, CTPS

Professional engineers have a "conceptual understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). You will learn about elementary functions, their derivatives and integrals, the algebra of complex numbers, and vectors and matrices. Mathematical techniques and problem solving skills are employed in a range of mathematical exercises and contextualised problems, illustrating how these concepts and techniques are used in real-world engineering systems. Mathematical knowledge and skills are essential in all engineering majors.

EGD126 Engineering Computation

Anti-requisites	MZB126
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

Applied problem solving is a key skill in all disciplines of engineering. This unit provides you with a structured model for problem solving early in your course experience, emphasising critical thinking, analysis, interpretation and exposition, in applications across multiple disciplines in engineering. Fundamental elementary skill development in computational tools further supports the student's capacity to interpret, describe and understand mathematical and statistical concepts and the contexts in which they apply.

EGH400 Research Project 2

Pre-requisites	EGH400-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As a professional engineer you will be competent to practise as outlined in the Engineers Australia Stage 1 Competency Standard for Professional Engineer. You will be required to identify engineering challenges and carry out comprehensive projects to address them using a rigorous research and investigation approach in a team setting. In this second of two integrated capstone units of your Bachelor of Engineering (Hons) degree you will hone your knowledge and skills bases in preparation for graduate work or further studies. You will learn engineering project design,

methodology and management, advancement of discipline knowledge and skills, risk, sustainability and ethics in a project environment, and reporting and defence of final delivery. This unit follows EGH400-1 Research Project 1 and together build upon your learning throughout your engineering core and Study Area A. You will demonstrate that you have completed the work placement required by Engineers Australia.

EGH400 Research Project 1

Pre-requisites	(EGH403 or EGH404) and Completion of 288cp in an Engineering course. EGH404 can be studied in the same teaching period as EGH400-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As a professional engineer you will be competent to practise as outlined in the Engineers Australia Stage 1 Competency Standard for Professional Engineer. You will be required to identify engineering challenges and carry out comprehensive, independent projects to address them using a rigorous research and investigation framework in a team setting. In this first of two integrated capstone units of your Bachelor of Engineering (Hons) degree you will hone your knowledge and skills bases in preparation for graduate work or further studies. You will learn engineering project design, methodology and management, advancement of

discipline knowledge and skills, risk, ethics and sustainability in a project environment, and reporting and presenting project stages. This unit and its following unit EGH400-2 Research Project 2 together build upon your learning throughout your engineering core and first major (Study Area A), in particular EGH404 Research in Engineering Practice.

EGH404 Research in Engineering Practice

Pre-requisites	192 Credit Points of completed study or Admission to EN60
Equivalent s	EGH403
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - XCH-1, XCH-2

This is a core engineering unit that introduces you to methods, principles and processes that are fundamental to performing effective research and relates them to professional engineering practice. This encompasses a variety of areas including critically analyzing and reporting information and findings, presenting and pitching research ideas, and the analysis and visualization of data. As engineers, you will be entering a highly dynamic and changing workforce where you will be required to adapt and respond to changing demands. This unit builds on your understanding of fundamental concepts and

language in your engineering discipline and directly prepares you for your final year engineering project, as well as research-based professional engineering practice.

EGH408 Research Project

Pre-requisites	288 Credit Points
Other requisites	Subject Area Coordinator approval is required to enrol. Students must have completed 288 credit points in EN01 prior to seeking approval.
Assumed Knowledge	null
Credit Points	24
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - XCH-1, XCH-2

This is an accelerated project unit allowing for EN01 students to complete their 24 credit points of final year capstone project in one semester. You are required to identify a research related issue or problem and apply your learning to carry out a comprehensive, independent research informed project designed to extend and broaden your understanding of the chosen topic. The unit also gives you the opportunity to demonstrate that you have completed the required work placement for accreditation with Engineers Australia. The purpose of this unit is to prepare you for your transition to the professional world or to further research studies.

EGH411 Sustainable Chemical Engineering in Practice

Pre-requisites	EGB361
Equivalent s	CVB211
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

It is essential that chemical and process engineers involved in industrial chemical production translate fundamental knowledge of chemistry and engineering into practical outcomes. In this unit you will focus on green chemistry, industrial biotechnology and catalysis which underpins 90 % of all chemicals made today. You will be introduced to catalyst fundamentals and their application to industry for bulk chemicals, production of sustainable polymers and plastics, zeolites for green chemistry and bio-catalysts such as enzymes. You will also be guided through the development of professional skills which includes creation of a MindMap, completion of a Dynamic SWOT analysis, and presentation of business ideas in a poster. This unit brings together learnings from prior units in the chemistry stream.

EGH413 Advanced Dynamics

Pre-requisites	EGB321 or Admission to (EN50 or EN55)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

The analysis, design, and control of many practical engineering systems require analysis of rigid bodies in three dimensions, e.g. gyroscopes, amusement park rides, space vehicles, and robots. The aim of this unit is to develop skills and techniques to analyse the behaviour of mechanical systems in three dimensions using both Newton-Euler and Lagrangian approaches. This capstone unit builds upon the concepts of 2D kinematics and kinetics from earlier units (EGB211, EGB321) and introduces Lagrangian methods, which are powerful tools in developing equations of motion for complex engineering systems.

EGH414 Stress Analysis and Numerical Modelling

Pre-requisites	(EGB314 or ENB212) or Admission to (EN55 or EN60)
Equivalent s	ENB311
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Mechanical/Medical engineers need to analyse components and systems to produce safe effective designs, innovate new products and improve existing devices. Towards a professional engineer, an understanding of how engineering components respond to loads to produce stress and strain, and the nature of the stresses and strains is required. This unit introduces computational methods to analyse, design

and optimize more complex components and systems. You will work with peers to learn basic finite element method in solving stress and strain in simple engineering components in response to loadings. This unit builds on the intermediate Engineering Mechanics units, and aims to extend your knowledge on basic mechanics of materials to more advanced stress analysis methods. This unit also contains an embedded maths module to provide advanced level numerical analysis techniques to support student learning in advanced level engineering units. The mathematics constitutes 30% of this unit.

EGH418 Biomechanics

Pre-requisites	EGB211 or ENB211
Equivalent s	ENB318
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Biomedical engineers require the ability to analyse the mechanics of the human body for a large variety of applications. The first type of problems deal with prosthetic design, design of assistive devices for people with disabilities, sporting performance, and ergonomic tasks which can be addressed within the context of rigid-body dynamics. The second type of applications is related to characterisation of tissue

mechanical properties to bone fracture fixation, development of cartilage and ligament replacement materials and dynamic adaptation of living tissues. In this advanced unit, the concepts of dynamics and continuum mechanics are further developed in the context of biomechanical systems and human movement. Skills for the measurement of human movement and lab-based testing of biological tissues are developed.

EGH419 Mechatronics Design 3

Pre-requisites	EGB320
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Mechatronics Design 3 is an advanced project unit with a hands-on application to interdisciplinary mechatronics principles. You will focus on the mechanics, electronics and embedded software principles of mechatronics as an interdisciplinary team with individual strengths ranging across these areas. The unit focuses on the research, design, and implementation of an advanced mechatronic product to conform to a customer's needs. This unit extends your knowledge and skills from Mechatronics Design 2 and prepares you for your capstone project.

EGH420 Mechanical Systems Design

Pre-requisites	(EGB316 or ENB316) or ((Admission to EN55) and
----------------	--

	(ENN516))
Equivalent s	ENB317
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This unit brings together a number of Engineers Australia's Stage 1 competencies. Students will demonstrate their knowledge and skill base, their engineering application ability all whilst being expected to demonstrate the professional and personal attributes. This unit builds on previous introductory and intermediate design units to be the final unit in the mechanical design stream. You will bring together design knowledge and skills to design and analyze systems of increasing complexity and interdependence. You also will be given the opportunity to consider the broader role mechanical engineers often play in relation to human interaction, quality, safety, ethics and sustainability in design.

EGH421 Vibration and Control

Pre-requisites	(EGB321 or ENB312) or Admission to (EN55 or EN60)
Anti-requisites	EGB345, EGH462
Equivalent s	ENB313
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External

- XCH-1, XCH-2

The ability to analyse and control the dynamic behaviour of machinery and processes is core competency for mechanical engineers. In this unit, you will be introduced to the theory and techniques that underpin dynamic systems analysis and control system engineering, including: transfer function representations, stability, steady-state behaviour, and frequency response. You will then use these techniques to design controllers to achieve certain transient and steady-state performance criteria. Together, these concepts and analysis tools will provide you with a solid foundation to develop real-world controllers, including the ubiquitous proportional-integral-derivative (PID) controller. In this capstone unit, you will draw on the earlier dynamics units EGB321 Dynamics of Machines, and EGB211 Dynamics. An embedded mathematics module, constituting 20% of the unit, provides advanced methods that support student learning in the engineering context.

EGH422 Heat Transfer

Pre-requisites	(EGB322 or ENB222) or Admission to (EN50, EN55 or EN60)
Equivalent s	ENB421
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

As a professional engineer you will be competent to practice as outlined in the Engineers Australia Stage 1 Competency Standard for Professional Engineers, including discipline specific knowledge and skills in heat transfer. This unit introduces the fundamental principles of heat transfer, together with key concepts of heat conduction, convection, radiation and mass diffusion while implementing conceptual and mathematical design exercises under each key concept. In this unit you will apply these principles and analysis methods to design and analysis of real world engineering problems involving design optimal heat/mass insulations and efficient heat/mass exchangers with sustainability considerations. This unit relies on a prior understanding of fluid mechanics and thermodynamics studied in your previous year or equivalent units.

EGH423 Fluid Dynamics

Pre-requisites	(EGB322 or ENB222 or EGB323 or ENB221) or Admission to (EN55 or EN60)
Equivalent s	ENB321
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

As a professional engineer you will be competent to practice as outlined in the Engineers Australia Stage 1 Competency

Standard for Professional Engineers, including discipline specific knowledge and skills in engineering fluid dynamics. This unit builds on your understanding of fluid mechanics, thermodynamics and mathematics by studying viscous, transient and compressible fluid flows, together with the analysis and design of fluid machines including pumps and turbines. You will learn about the application of dimensional analysis to experimental results, theoretical and analytical problem solving methods based on idealized versions of real engineering systems, and numerical studies based on the application of computational fluid dynamics (CFD). This unit relies on a prior understanding of dynamics, fluid mechanics and thermodynamics studied in introductory and intermediate units.

EGH424 Biofluids

Pre-requisites	EGB323 or ENB221
Equivalent s	ENB322
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This unit is an advanced unit in medical engineering. Towards a professional medical engineer, It is designed to build up your knowledge and skills to examine the particular properties of the biological fluids and to introduce

techniques to analyse their behaviour. This unit introduces the fundamental principles of fluid dynamics that are used to explain the mechanisms of biological flows and their interrelationships with physiological processes, in health and in disease. You will work together with peers to learn basic numerical methods in solving the flow of biofluids and propose design concepts by taking consideration of biological fluid property and behaviour. You will build on EGB323 Fluid Mechanics and LSB231 Physiology to develop your engineering knowledge and skills, with particular emphasis on an improved ability in applying the biological fluid dynamics principles in development of strategies for disease prevention or medical device design.

EGH431 Principles of Control Engineering

Pre-requisites	Admission to EN52 OR the completion of 192 CPs
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - SEM6A

Robotics and AI rely on control engineering principles which students have limited exposure to in undergraduate courses. This unit provides the principles of control engineering in the areas of uncertainty and optimisation and part of the foundation of professional practice in robotics and AI. This unit prepares students for later units of Decision and Control, Robot Motion, Control and

Planning, SLAM and Mobile Robotics.

EGH432 Foundations of Kinematics and Algorithms in Robotics

Pre-requisites	Admission to EN52 or Completion of 192 cps
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - SEM6B

This unit provides the foundations needed to understand how to represent quantities in two and three dimensions. It also provides the knowledge on how to represent quantities in these dimensional representations, which are essential areas in Robotics and AI. Representation of position and orientation in 2D and 3D form the foundation of professional practice in robotics and AI. This foundation unit also presents key search algorithms used in most navigation tasks. Students will acquire key knowledge needed for later units in Decision and Control, Robot motion, control and planning, SLAM and Mobile Robotics.

EGH435 Modelling and Simulation for Medical Engineers

Pre-requisites	EGH414
Equivalents	ENB335
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Traditional analytical and experimental techniques can often not be applied to investigate the mechanics of medical devices in biological systems. Biomechanical systems exhibit substantial non-linearity due to complex geometries, materials and interactions. Medical engineering professionals use modelling and simulation techniques in the design of biomechanical systems. This unit advances modelling and simulation techniques through their applications in Biomedical Engineering. This advanced unit will develop your knowledge and skills in analysing biomechanical components and systems in the course of medical device development. The unit focuses on modelling and simulation techniques using industry standard software. It applies content introduced in EGH418 Biomechanics, builds upon the finite element capabilities introduced in EGH414 Stress Analysis and adds quantitative analysis tools to the medical device design process commenced in EGB319 BioDesign.

EGH437 Robot Anatomy

Pre-requisites	Admission to EN52 or completion of 192 cps
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Robots are complex systems that rely on electrical, electronic, mechanical and computing technology. This unit provides an understanding

Units

of the components that go toward creating a robot, how they work individually, and how they are organized into systems.

EGH438 Biomaterials

Pre-requisites	EGB314
Equivalent s	ENB338
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Biomaterials are widely used to create medical implants and devices. Thus, it is important for biomedical engineers to understand the fundamental properties of biomaterials and their interactions with biological systems. After taking this unit, you should be able to select suitable biomaterials for specific medical implants, devices and tissue engineering applications based on key features including biocompatibility, manufacturability, and sustainability. You will also have the essential knowledge to communicate with other professionals in the biomedical space including materials engineers, cell biologists, surgeons, and medical device regulators.

EGH441 Power System Modelling

Pre-requisites	EGB341 or Admission to (EN50, EN55 or EN60)
Credit Points	12
Campus	Gardens Point,

	EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

The power grid consists of various components such as generators, transmission lines, transformers and loads. In this unit, you will learn the technical aspects of power system modelling, which will help you to understand the operations and planning of the modern electricity grid. You will use several mathematical techniques to design and analyse power system and learn professional industry practices such as load flow, fault calculations, protection, and stability. This unit will help you to further develop your professional skills in communication and engineering teamwork.

EGH442 RF Techniques and Applications

Pre-requisites	EGB342 or ENB342 or ENB346
Equivalent s	ENB440
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This unit develops skills and knowledge on radio-frequency (RF) devices, components and systems used in wireless communications. The unit focuses on microwave network theory, impedance matching and high-frequency effects for the design of RF circuits and systems, including antennas and antenna arrays. The unit also develops knowledge of

antenna measurement procedures, RF system noise figure calculations and measurement, optic fibres and electromagnetic compatibility (EMC). It links to work previously undertaken in EGB241 Electromagnetics and Machines and EGB342 Telecoms and Signal Processing.

EGH443 Advanced Telecommunications

Pre-requisites	(EGB342 or ENB342 or ENB346) or Admission to (EN50, EN55 or EN60)
Equivalent s	ENB446
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

With the increasing importance of telecommunications systems and services in people's lives, a unit covering the fundamentals and applications of advanced communication systems is indispensable in the Electrical Engineering Curriculum. Therefore, this unit provides an understanding of the evolution of mobile communications systems from 1st generation to 5th generation, efficient cellular planning, wireless channel characteristics and modelling, transmitter and receiver diversity, multi-carrier systems, error control coding and decoding, and optical fiber communications. Emphasis is placed on fundamental principles of advanced communication methods so

Units

that on graduation, you will be able to interpret existing and emerging communication technologies. This is an advanced unit and therefore the prior knowledge on the basic signal analysis (EGB242), and telecommunications and signal processing (EGB342) is required.

EGH444 Digital Signals and Image Processing

Pre-requisites	(EGB342 or ENB342 or ENB346) or Admission to (EN50, EN55 or EN60)
Equivalent s	ENB448
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

The unit covers the area of digital signal and image processing with detailed study of Statistics of multiple random variables, detection of signals by feature extraction using Fourier, wavelet, discrete cosine transform features, Z-Transform and filter design. The unit also covers digital image processing including image representation and acquisition, Image spatial and frequency domain techniques, Image enhancement and filtering.

EGH445 Modern Control

Pre-requisites	(EGB345 or ENB301 or ENB348) or Admission to (EN50, EN55 or EN60)
Equivalent s	ENB458, ENB347
Credit Points	12

Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This unit develops fundamental concepts and methods used for modelling, analysis and control design of complex engineering systems. The unit introduces a general class of models for complex systems known as state-space. This class of models allows the development of control techniques and designs that shape and modify the behavior of the system. In particular, the classical state and output-feedback regulators, integral action, observer design, and optimal control are studied and used to solve stabilisation problems. The control design problem is discussed in both continuous-time and discrete-time domains, allowing for the study of both ideal and real systems. The implementation of digital controllers is included, building knowledge in the practical application of control designs into real systems. Thus, this unit provides a set of modern tools for control design of engineering systems currently used in real-life applications.

EGH446 Autonomous Systems

Pre-requisites	EGB345 and (EGB340 or EGB349 or CAB301 or CAB302 or EGB320) or Admission to (EN50, EN55 or EN60)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This advanced unit will present the principles operation of modern sensors necessary for robust navigation. This unit provides the required knowledge to develop state of the art navigation approaches in complex environments. Navigation is a fundamental building block for all aspects of autonomous systems. This unit draws upon previous studies in mathematics and control systems that underpin navigation system.

EGH448 Power Electronics

Pre-requisites	EGB348 or Admission to (EN50, EN55 or EN60)
Equivalent s	ENB455
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This is a higher level unit that aims to introduce the principles of operation of basic power electronic circuits and systems used in industrial applications. This unit enables the learner to understand, interpret and compare the characteristics of power devices such as power diodes, thyristors, BJT, MOSFET, IGBT etc.; analyse common types of diode and thyristor converters, inverters, and DC-DC converters; use simulation tools to model and analyse simple power electronic circuits; perform experiments on power electronic hardware circuits; obtain measurements. Power processing can be considered as one of the major

applications of electronics in industrial applications. A broad understanding of industrial electronic circuits and systems will provide the foundation not only to design advanced power processing circuits for complex systems but also to operate and maintain them properly. Such knowledge is essential for a graduate electrical engineer who intends to work in the industry.

EGH449 Advanced Electronics

Pre-requisites	((EGB348 or ENB240) and CAB202) or Admission to (EN50, EN55 or EN60)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This Advanced Electrical Option builds on the electronic and computing building blocks and concepts covered in Electronics (EGB348) and Microprocessors and Digital Systems (CAB202). This unit explores the extension and application of general electronic circuits to specific topic areas where special consideration and approaches are required. These topic areas include precision electronics, low noise electronics, the interface of analogue and digital electronics, digital systems, and Field Programmable Gate Arrays. The advanced unit EGH448 Power Electronics is complimentary to this unit's content.

EGH450 Advanced Unmanned Aircraft Systems

Pre-requisites	(EGB243 and EGB346) or Admission to (EN55 or EN60)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This unit further develops your knowledge, skills and application of aerospace concepts, building on aircraft systems and flight and unmanned aircraft systems. The unit focuses on experimental design, integration and test of an Unmanned Aerial System. You will also gain skills in setting design specifications and carrying out detailed design analysis to design, build and flight test a UAV.

EGH454 Power Systems Management with Renewable & Storage Resources

Pre-requisites	EGB341 Or Admission to (EN50 or EN55)
Anti-requisites	ENB454
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - XCH-1

The aim of this unit is to develop skills in the operational management of a modern power system incorporating conventional as well as renewables and storage. This unit will therefore introduce the student to the application of conventional sources as well

as renewable and storage resources, their operational benefits and difficulties. There are many operational decisions that need to be made in the context of imperfect information that will affect the overall performance of the network. This unit will provide a degree of structure to the decision processes and introduce tools and techniques used during the process. These tools cover the areas of risk analysis, reliability, economic based panning and power quality extending into the operational areas of utilization of equipment. The outcome is to achieve a balance between capital investment, reliability and the operational aspects of the network.

EGH455 Advanced Systems Design

Pre-requisites	CAB403
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This advanced unit further develops your investigation, analysis, synthesis and problem solving skills when solving complex engineering tasks. The unit focuses on experimental design using a systems engineering approach to work on an engineering concept, starting from a basic need and opportunity description. You work in teams to identify customers, formulate a basic business case, establish a basic concept of

Units

operations, develop the system requirements, generate concepts, conduct trade studies, determine the most promising design, and pursue a design and testing and verification of the system. The unit replicates industry or government systems engineering practices as closely as possible.

EGH456 Embedded Systems

Pre-requisites	CAB403 or Admission to (EN50, EN55 or EN60)
Equivalent s	ENB350
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

This advanced unit gives you practical experience with advanced software development for embedded systems. It leads on from fundamental computer architecture and C programming covered in first and second year units. It covers programming with C and assembly, input/output programming, concurrent software, shared memory, scheduling and real-time aspects. It involves practical laboratory exercises and a group project implementation of a device driver. Embedded systems builds on the knowledge and skill you acquired in systems programming.

EGH462 Process Control

Pre-requisites	EGB364 or EGB321
----------------	------------------

Anti-requisites	EGH421
Equivalent s	ENB461
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Modern plants are composed of numerous processes that have strict performance and safety requirements. To meet these demands, engineers need to ensure properly designed process control systems that maintain suitable operation in the presence of changing set points and fluctuations in process conditions. In this advanced level unit, you will learn the concepts and techniques that underpin control systems, bringing together content learnt in the process design and process operations streams. You will learn the theory underpinning control of dynamic process systems, and use this to model and predict the response of these systems. This will cumulate designing process control systems which meet various engineering requirements of performance and safety. This unit brings together previous learning in the process operations stream. An embedded mathematics module, constituting 20% of the unit, provides advanced methods that support student learning in the engineering context.

EGH463 Process Design

Pre-requisites	EGB322 and EGB364
Equivalent s	ENB433, EGH360

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Professional engineers have a "comprehensive, theory based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline" (Engineers Australia Stage 1 Competency Standard for Professional Engineer). This process engineering unit uses advanced concepts of chemistry, design, economics and physics in a real engineering context. You will develop the ability to recognise and apply methods to design plant to solve real world problems utilising chemical, thermodynamic, fluids and kinetics with subsequent evaluation of the techno economics, sustainability and environmental impacts. You will undertake site visits and laboratory working in groups to plan, design and evaluate plant design. You will use this to demonstrate the culmination of knowledge and appreciation across a number of technical areas.

EGH471 Advanced Water Engineering

Pre-requisites	EGB371 OR ENB280 OR Admission to (EN55 or EN60)
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Water engineers use knowledge and skills bases that you will learn in this advanced unit to analyse surface water systems including rivers, creeks and reservoirs, and to undertake design of related hydraulic structures including bridges, culverts and dams. You will continue to develop your knowledge of water engineering in the context of technical, practical and stakeholder perspectives. You will learn the hydrologic cycle and its applications in runoff estimations, probability and risk based flood analysis, estimating design floods, hydrologic and hydraulic modelling and water sensitive urban design concepts. You will work together with peers on assessing catchments for their hydrologic and hydraulic characteristics, modelling floods using software tools and designing simple hydraulic structures. This unit draws upon your learning in EGB123 Civil Engineering Systems, EGB124 Engineering for the Environment, and EGB371 Engineering Hydraulics.

EGH472 Advanced Highway and Pavement Engineering

Pre-requisites	EGB272 or ENB376 or Admission to (EN55 or EN60)
Equivalent s	ENB372
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilit es	Gardens Point - SEM-2 External - XCH-1, XCH-2

This is an advanced civil engineering unit that will develop your theoretical knowledge of highway and pavement engineering science and engineering analysis, and design. It will develop applied skills in investigation, analysis, synthesis and problem solving, written and visual literacy for communication and reporting. It stresses both independent and collaborative strategies for managing and completing tasks on time. It contextualises this civil engineering activity across social, economic, and environmental lenses, and emphasises application of standards and codes of practice in the civil engineering discipline. This is an advanced unit and therefore the prior knowledge on Traffic and Transport (EGB272) and on basic geotechnical engineering concepts (EGB373). Capstone projects (EGH400-1 and EGH400-2) in Transport/Pavement engineering require the knowledge of this unit.

EGH473 Advanced Geotechnical Engineering

Pre-requisites	EGB373 OR ENB272 OR ENB371 OR Admission to EN55
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilit es	Gardens Point - SEM-1 External - XCH-1, XCH-2

Geotechnical engineers use knowledge and skills bases that you will learn about in this advanced unit to undertake site investigation, evaluate slope

stability, design retaining walls, design shallow foundations and deep foundations, and analyse and design rock systems. You will continue to develop your knowledge of geotechnical engineering in the context of technical, practical, and stakeholder perspectives. You will also continue to develop your personal and professional attributes, especially teamwork, time and resource management, communication, and reflective practice. This unit draws upon your learning in EGB373 Geotechnical Engineering. EGH479 Advances in Civil Engineering Practice will build upon this unit.

EGH475 Advanced Concrete Structures

Pre-requisites	EGB375 or ENB276 or Admission to EN55
Equivalent s	ENB471
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilit es	Gardens Point - SEM-2 External - XCH-1, XCH-2

Structural engineers use knowledge and skills basis that you will learn in this advanced unit to create innovative solutions to complex planning and design problems about concrete structures to meet stakeholders' needs. You will continue to learn about loading, design standards, analysis and design of concrete structural systems and elements, economical and sustainable design, computer modelling, and professional design

reporting and drawing. You will further develop your personal and professional attributes, especially teamwork, time and resource management, communication, and reflective practice. This unit draws upon your learning in structural units of the civil engineering major, in particular EGB375 Design of Concrete Structures.

EGH479 Advances in Civil Engineering Practice

Pre-requisites	(EGB375 or ENB276) and (EGH472 or ENB372) or admission to EN55
Equivalent s	ENB476
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This is the final design unit of the civil engineering first major and will apply and refine advanced knowledge, concepts, methodologies and systematic thinking to prepare the student for professional practice. It will develop advanced cognitive skills in review, analysis and synthesis in civil infrastructure planning and design contexts, including critical, creative and innovative solutions to complex problems. It stresses the ability to communicate advanced knowledge and concepts in written, modelled and graphical forms to civil engineering professional audiences. It also stresses both independent and collaborative strategies in team working contexts, including reflective practice, to manage a

civil infrastructure planning and design project in a timely manner with a focus on delivering outcomes. Emphasis is placed on awareness and understanding of social and economic factors in civil engineering practice, and on ethical practice.

ENN510 Engineering Knowledge Management

Equivalent s	ENQ510
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces Knowledge management as an innovative process that needs to be closely aligned to organization goals. The development of knowledge management systems requires a sound understanding of the various building blocks of knowledge management. The unit introduces critical building blocks such as; knowledge identification, knowledge development, knowledge preservation, knowledge representation and knowledge distribution and sharing. All engineering managers must have the fundamental skills and knowledge to understand, design and develop and manage knowledge management systems in an organization. This unit provides the basic knowledge and skills to understand the complex issues of knowledge management that are essential to the career advancement of engineering managers. In addition the unit also

introduces organizational culture and organizational behavioral changes that are needed to transform a traditional organization to a knowledge oriented enterprise.

ENN515 Total Quality Management

Equivalent s	ENQ515
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

To grow in the highly competitive global marketplace, organizations must maximize customer value and product quality. Total Quality Management (TQM) advocates the enterprise make optimum use of resources, technology, equipment, and the skills and knowledge of employees, suppliers and customers. Total Quality Management unit provides students with an understanding of the underlying philosophy, theory and practice of modern day quality management process. Quality Management has evolved beyond its roots in statistics and the quality control functions. Many consider TQM to be a framework for "excellent" management. The main themes of TQM are: a data-based approach to problem solving; an emphasis on organisational and behavioural considerations; a customer-oriented market-sensitive approach to designing and delivering both products and services; and finally, a desire and system approach for continual

improvement.

ENN523 Advanced Network Engineering

Pre-requisites	IFN507 or IFQ507 or Admission to EN50 or EN55
Anti-requisites	INB352, INN352
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an advanced-level networks unit highlighting the systems approach and top-down method for service-oriented planning and design of large-scale computer networks. It introduces the theory and methodology to assemble various network technologies in a cohesive fashion for network planning and design to address the connectivity, scalability, reliability, security, quality-of-service, cloud data centres, and other recent developments of networks. Computer networks have become an integrated part of the fundamental infrastructure in modern industries and societies. Building new networks or upgrading existing networks requires a deep understanding of the concepts and principles of advanced network engineering and particularly network architecture. This advanced network engineering unit helps develop such a deep understanding. The knowledge and skills developed from this unit are relevant to networks and cybersecurity, and other related majors.

ENN524 Mobile Network Engineering

Pre-requisites	IFN507 or IFQ507 or Admission to EN50 or EN55
Anti-requisites	INN353
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Wireless communications, mobile networks and navigation have been widely deployed and integrated into various mobile platforms for value-added services. This unit highlights the recent advances in wireless local area and wide area networks, vehicular networks and Internet of Things with focus on selected standards and network protocols. The unit also provides an overview for satellite navigation systems, wireless positioning technologies and location-based services.

ENN530 Asset and Facility Management

Equivalent s	ENQ530
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Professionals are often involved in the management of infrastructure including transportation, water, energy, buildings and telecommunications. In today's business environment, the efficient maintenance and management of these assets

and associated risks is critical. The professionals need to know how to manage the whole of life cycle of assets; organise maintenance based on condition and reliability assessments; and create as well as implement effective asset management and maintenance plans so as to meet the business objectives of the organisation.

ENN531 Advanced Materials and Engineering Applications

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introducing recent development of materials and their potential applications. The advances in microanalysis and modelling techniques will be also covered. The unit teaches the inter-relationships amongst the microstructure, properties and processing so that the fundamental principle of structure-property relationship and materials selection can be understood. The unit also provides students an opportunity to apply the knowledge to analyze a typical material problem through project work and practice class. Understanding of the fundamental relationships between the microstructure and properties in materials is critical to development of robust designs and/or manufacturing methods. This unit provides knowledge in advanced materials, their properties, application, processing, characterization and simulation. This is an

advanced unit which is relevant and built on other materials and manufacturing units.

ENN532 Safety and Environmental Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Professional engineers work within a legislative framework which includes regulations related to safety and environmental impact. This unit provides students with an overview of the governing regulations, and an understanding of the associated responsibilities and duties of professional engineers in assessing and managing risk to ensure safety, and in assessing and mitigating environmental impact. This will include the analysis of case studies which will form the basis for engineering design work in safety systems and environmental impact mitigation systems.

ENN541 Research Methods for Engineers

Anti-requisites	IFN600, INN700, INN701
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Problem identification, research design and planning, literature search and communications through reports and presentations are essential attributes of engineers in all the disciplines. Practice based research

methods applied to solve discipline specific real world problems are skills in demand from professional engineers in contemporary work places. It is also equally important to communicate methods and solutions clearly and effectively in writing and verbally.

ENN543 Data Analytics and Optimisation

Equivalent s	ENN542
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

There is a growing need for engineers to understand underlying patterns and characteristics of vast amount of data collected from various sources by performing advanced data analytics and optimisation to transform data into understandable and actionable information for the purpose of making decisions. This unit develops your knowledge to improve the economy and efficiency of systems, processes, and enterprises through data analytics and optimisation. The unit focuses on application of statistical, and optimisation methods to solve complex problems involving large data sets from multiple sources.

ENN544 Sustainable Practice in Engineering

Equivalent s	BEN710
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

es - SEM-2

Sustainable development has become a global agenda that impacts on our work and everyday life. Sustainability principles and practices are rapidly becoming embedded in all phases of engineering projects from planning, design, construction and maintenance of buildings and infrastructure, through to mining and manufacturing, energy and water utilities. Engineers need to ensure that their decision making is guided by the fundamental principles of sustainable development. The unit will introduce you to principles, challenges and skills for dealing with a diversity of trans-disciplinary issues in engineering sustainable development. By introducing critical sustainability theory and challenging best practices, this unit will prepare you for the impending changes that are necessary in all built environment and engineering disciplines.

ENN570 Enterprise Resource Planning

Equivalent s	ENQ570
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Enterprise Systems are now essential infrastructure to both large as well as to small-to-medium (SME) organisations, as they realise the necessity of a single central database instead of a large number of separate databases. By

integrating core business processes in one single application, Enterprise Resource Planning (ERP) helps companies maximize the efficiency of business processes across the entire organization including increases in on-time delivery, productivity, forecasting demand and production capacity. This unit aims to provide the fundamental understanding of various Enterprise Systems, functions and modules and how they can be integrated in a business context. The students will be trained to develop a real life ERP system based on actual data from industry. This unit will also aims to help students to refine their communication and group work skills, and assist in the development of research-based skills. This is a core unit for Master of Engineering Management.

ENN581 Robot Motion, Control and Planning

Pre-requisites	EGH432 and EGH437
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide knowledge on principal aspects of robot motion, control and planning which is crucial in Robotics. This will provide an understanding of the dynamics, kinematics and control of mobile and manipulator arm robots.

ENN582 Reinforcement Learning and Optimal Control

Pre-requisites	EGH431
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - SEM6D

Robots are autonomous systems that rely on a variety of control technologies. This unit provides understanding of key concepts in optimal control and reinforcement learning concepts for use in the design of robotic systems. This unit prepares students for building robotics systems in future careers.

ENN583 Foundations of Robotics Vision

Pre-requisites	CAB420
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides the foundation for robotic vision which includes introduction to computer vision concepts and the use of deep learning models for robotic vision applications. This unit will further demonstrate how these concepts are utilised in solving real-world robotic vision problems such as place recognition, object detection and semantic segmentation, and provide you with practical experience in implementing algorithms for real-world robotic vision tasks.

ENN586 Decision and Control

Pre-	EGH431
------	--------

requisites	
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - SEM6C

Robots are autonomous systems that rely on a variety of decision and control technologies. This unit provides an understanding of the estimation, model uncertainty, decision making and practical control aspects used in the design of robotic systems. This unit prepares students for building robotics systems in future careers.

ENN590 Project 2

Pre-requisites	ENN590-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This forms the second semester of the Master of Engineering capstone project. Engineering approaches and tools can be used to solve problems that confront engineers. The techniques and tools were identified and the project framed in semester 2 and they are applied in this unit. The ability to frame a technical approach to an engineering problem is essential to engineering practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to your profession.

Units

ENN590 Project 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is the first semester of a two-semester project unit ENN590, in Master of Engineering program EN50. It provides experience in solving advanced engineering problems and the opportunity to apply the knowledge gained throughout the EN50 course. Engineering concepts, technical approaches and tools can be used to solve problems that confront engineers. However, the engineering approach needs identifying and justifying before it can be continued be implemented (in ENN590-2). The ability to frame a technical approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to your profession.

ENN591 Project 1

Pre-requisites	ENN541. May be enrolled in the same teaching period as ENN591-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is the first semester of a two-semester project unit. It provides experience in solving advanced engineering management problems and the opportunity to apply the knowledge gained throughout

the BN87 course. Management approaches and tools can be used to solve problems that confront engineers. However, the management approach needs identifying and justifying before it can be implemented (in ENN591-2). The ability to frame a management approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to your profession.

ENN591 Project 2

Pre-requisites	ENN591-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This forms the second semester of the Engineering Management capstone project. Engineering management approaches and tools will be used to solve problems that confront engineers. The tools were identified and the project framed in semester 1 and they are applied in this unit. The ability to frame an engineering management approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to the profession.

ENN592 Project 2

Pre-requisites	ENN592-1
----------------	----------

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This forms the second semester of the Master of professional Engineering capstone project. Engineering approaches and tools can be used to solve problems that confront engineers. The techniques and tools were identified and the project framed in semester 2 and they are applied in this unit. The ability to frame a technical approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to your profession.

ENN592 Project 1

Pre-requisites	Enrolment in EN55MJR-ELECTRI or EN55MJR-MECHENG or EN55MJRCIVILEN or ENGGMJR-CIVICON and ENN541. Enrolment in ENN541 in the same teaching period as ENN592-1 is allowed
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is the first semester of a two-semester project unit ENN592, in Master of Engineering program EN555. It provides experience in solving advanced engineering problems and the opportunity to apply the knowledge gained throughout the EN55 course. Engineering concepts,

Units

technical approaches and tools can be used to solve problems that confront engineers. However, the engineering approach needs identifying and justifying before it can continued be implemented (in ENN592-2). The ability to frame a technical approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to your profession.

ENN593 Project 2

Pre-requisites	ENN593-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This two-semester capstone project unit provides skills and experience in solving advanced engineering management problems and the opportunity to apply the knowledge gained throughout EN55 course. Through this project work, you will gain experience in project identification, research planning, communications and problem solving. The unit also gives you the opportunity to demonstrate that you have completed the required work placement for accreditation with Engineers Australia.

ENN593 Project 1

Pre-requisites	Enrolment in EN55MJR-ELECMAN or EN55MJR-MECHMAN or EN55MJR-CIVIMAN and ENN541. Enrolment in ENN541 in the same teaching period as
----------------	---

	ENN593-1 is allowed
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This two-semester capstone project unit provides skills and experience in solving advanced engineering management problems and the opportunity to apply the knowledge gained throughout EN55 course. Through this project work, you will gain experience in problem identification, research planning, communications and problem solving.

ENN595 Project 1

Pre-requisites	ENN541 or equivalent
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the first semester of a two-semester project unit, ENN595-1 and ENN595-2, in EN52 Master of Robotics and Artificial Intelligence. It provides experience in researching and solving authentic, complex and advanced engineering problems, and the opportunity to apply some of the knowledge gained throughout the course. You will engage in engineering project design, methodology and management, advancement of discipline knowledge and skills, risk, ethics and sustainability in a project environment, and reporting and presenting project stages. In this first semester, you will identify the problem, research the

literature, research and propose methods to address the problem identified, and progress some of the solutions.

ENQ510 Engineering Knowledge Management

Equivalent s	ENN510
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES1, SES4

This unit introduces Knowledge management as an innovative process that needs to be closely aligned to organization goals. The development of knowledge management systems requires a sound understanding of the various building blocks of knowledge management. The unit introduces critical building blocks such as; knowledge identification, knowledge development, knowledge preservation, knowledge representation and knowledge distribution and sharing. All engineering managers must have the fundamental skills and knowledge to understand, design and develop and manage knowledge management systems in an organization. This unit provides the basic knowledge and skills to understand the complex issues of knowledge management that are essential to the career advancement of engineering managers. In addition the unit also introduces organizational culture and organizational behavioral changes that are needed to transform a

traditional organization to a knowledge oriented enterprise.

ENQ515 Total Quality Management

Equivalent s	ENN515
Credit Points	12
Campus	Online
Availabilities	Online - SES3

To grow in the highly competitive global marketplace, organizations must maximize customer value and product quality. Total Quality Management (TQM) advocates the enterprise make optimum use of resources, technology, equipment, and the skills and knowledge of employees, suppliers and customers. Total Quality Management unit provides students with an understanding of the underlying philosophy, theory and practice of modern day quality management process. Quality Management has evolved beyond its roots in statistics and the quality control functions. Many consider TQM to be a framework for "excellent" management. The main themes of TQM are: a data-based approach to problem solving; an emphasis on organisational and behavioural considerations; a customer-oriented market-sensitive approach to designing and delivering both products and services; and finally, a desire and system approach for continual improvement.

ENQ530 Asset and Facility Management

Equivalent s	ENN530
Credit Points	12
Campus	Online and QUT Online
Availabilities	Online - SES1, SES2

Professionals are often involved in the management of infrastructure including transportation, water, energy, buildings and telecommunications. In today's business environment, the efficient maintenance and management of these assets and associated risks is critical. The professionals need to know how to manage the whole of life cycle of assets; organise maintenance based on condition and reliability assessments; and create as well as implement effective asset management and maintenance plans so as to meet the business objectives of the organisation.

ENQ541 Research Methods for Engineers

Anti-requisites	IFN600, INN700, INN701
Equivalent s	ENN541
Credit Points	12
Campus	Online
Availabilities	Online - SES1

Problem identification, research design and planning, literature search, and communications through reports and presentations are essential attributes of engineers in all the disciplines. Practice-based research methods applied to solve

discipline-specific real-world problems are skills in demand from professional engineers in contemporary workplaces. It is also equally important to communicate methods and solutions clearly and effectively in writing and verbally.

ENQ570 Enterprise Resource Planning

Equivalent s	ENN570
Credit Points	12
Campus	Online
Availabilities	Online - SES1

Enterprise Systems are now essential infrastructure to both large as well as to small-to-medium (SME) organisations, as they realise the necessity of a single central database instead of a large number of separate databases. This unit aims to provide the fundamental understanding of various Enterprise Systems, functions and modules and how they can be integrated in a business context. The students will be trained to develop a real life ERP system based on actual data from industry. This unit will also aims to help students to refine their communication and group work skills, and

assist in the development of research-based skills. This is a core unit for Master of Engineering Management.

ENQ591 Project 1

Pre-requisites	ENQ541. May be enrolled in the same teaching period as ENN591-1
Equivalent s	ENN591-1
Credit Points	12
Campus	Online
Availabiliti es	Online - SES2

This is the first teaching period of a project unit that spans two teaching periods. It provides experience in solving advanced engineering management problems and the opportunity to apply the knowledge gained throughout the course. Management approaches and tools can be used to solve problems that confront engineers. However, the management approach needs identifying and justifying before it can be implemented (in ENQ591-2). The ability to frame a management approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to your profession.

ENQ591 Project 2

Pre-requisites	ENN591-1 or ENQ591-1
Credit Points	12
Campus	Online
Availabiliti es	Online - SES3

This forms the second teaching period of the Engineering Management capstone project. Engineering management approaches and tools will be used to solve problems that confront engineers. The tools were identified and the project framed in the first teaching period and they are applied in this unit. The ability to frame an engineering management approach to an engineering problem is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to investigate an authentic engineering problem that is relevant to the profession.

ERB101 Earth Systems

Equivalent s	NQB201
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-2 External - XCH-1, XCH-2

Earth Science impacts every aspect of modern life. The concepts of Earth Science are fundamental not only to the field of Geology, but also to environmental science, natural resource management, climate change, water security, civil and geotechnical engineering and society at large. This introduction to Earth Science, includes earth cycles and materials (minerals and rocks), geological history and physical geography and landforms. Additionally, the unit provides accessible examples of the use of scientific reasoning for

understanding complex natural systems. Earth Systems is a foundation unit for further studies in Geology and Environmental Science, but more importantly, serves as a broad introduction to the very world we live on and to science in general. Such a background is highly desirable for any informed citizen for understanding complex issues around resources, climate, environment, and societal development.

ERB102 Evolving Earth

Equivalent s	NQB202
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabiliti es	Gardens Point - SEM-2 External - XCH-1, XCH-1, XCH-2

In ERB102 Evolving Earth you will focus on key events in the history of our planet – the formation of our planet, the concept of geologic time, the origin of the oceans and atmosphere and the evolution of life. You will learn about the connections between the evolution of life and geological processes and events, to appreciate the complexity of life that exists on Earth today. This provides a fundamental introduction to evolution and geological time and prepares you for more in-depth exploration of Earth system connectivity, natural hazards, environmental management and climate change.

ERB201 Destructive Earth: Natural Hazards

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In ERB201 Destructive Earth, we will focus on the Science of Natural Hazards. By understanding the conditions and processes that lead to, and cause, severity of natural processes such as earthquakes, tsunamis, volcanic eruptions, landslides, cyclones, tornadoes, storms/blizzards, floods, bushfire, and asteroid impacts, you will be better informed as to why there are natural hazards and disasters, and how to prepare and mitigate for future events that will have a range of social, economic and political impacts. We will build on the knowledge and skills developed in Year 1 to provide you with a global perspective of how we, as a society, will continually be confronted by natural hazards.

ERB202 Marine and Atmospheric Systems

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Oceans make up 70% of the Earth's surface, yet less than 5% of them have been explored. There is therefore still much to learn about the marine environment, marine resources, and management,

and how oceans affect atmospheric circulation. This unit takes a bottom-up approach introducing students to the major geological processes and geomorphology features that shape the ocean floor, dynamic sediments and biology that are sourced and distributed by ocean currents and chemistry, followed by an overview of the factors governing ocean circulation and ocean water properties and finally looking at how oceans affect atmospheric circulation and climate. The interaction of all these processes has a direct societal impact such as management of marine resources, including the Great Barrier Reef, infrastructure, natural hazards, weather patterns, and climate change.

ERB203 Sedimentary Geology and Stratigraphy

Pre-requisites	(ERB101 and ERB102 and ERB202) or admission to ST20
Anti-requisites	NQB413
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This unit provides you with an introduction to sedimentology and stratigraphy, incorporating sediments and sedimentary rocks and how they relate to depositional environments. The unit focuses on the link between features preserved in sedimentary rocks and what those features tell us about

how the rock was emplaced, the environment it was emplaced into and the subsequent burial history of the rocks. Sedimentology and stratigraphy is a fundamental part of the education of any earth scientist, and especially of those who wish to be involved in fossil fuel (i.e., coal, petroleum and gas) exploration, water resource exploration and management, and environmental geology, such as geosequestration of carbon dioxide, landscape remediation and soil science, investigation of extreme events (e.g., landslides, tsunami and storm surge) and climate change.

ERB204 Deforming Earth: Fundamentals of Structural Geology

Pre-requisites	(ERB101 and (SEB113 or MXB105 or MZB125)) or admission to ST20
Equivalent s	NQB412
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This unit develops the knowledge and skills required to recognise, classify, describe, record, and interpret deformation structures in rocks, from the scale of millimetres to kilometres. Rock deformation driven by plate tectonics is a fundamental process that shapes the lithosphere of our planet and the complex 3D spatial distribution of rocks within it. It is integral to the

study of the solid Earth and touches almost all geological disciplines.

ERB205 Earth Materials

Equivalent s	NQB311
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Earth Materials comprises the study of minerals and rocks which form the solid Earth. The study of Earth Materials is essential for understanding the structure and composition of the earth and the detailed processes of the rock cycle. Earth Materials forms the basis for petrology (the study of the genesis of rocks) and geochemistry.

ERB206 Petrology

Pre-requisites	ERB205
Equivalent s	NQB411
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

Igneous and metamorphic rocks comprise the bulk of the Earth and are formed by geological processes, many of which cannot be directly observed as they occur at relatively high temperature and pressure within the Earth. The structure, texture, mineralogy and chemical composition of igneous and metamorphic rocks provide the fundamental clues from which the origin of

these rocks can be interpreted. This information can then be used to address larger scale geologic issues, such as the tectonic development of mountain ranges or plate boundaries, and magma source regions and eruptive history of volcanoes.

ERB211 Global Change

Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

ERB301 Chemical Earth

Pre-requisites	(ERB101 and ERB102) or (ERB202 and admission to ST20)
Equivalent s	NQB615
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Earth Science examines the interaction of physical, biological and chemical processes in the fractionation and differentiation of the Earth. Geochemistry is therefore an essential component of understanding the origin of the Earth, its evolution through time and the functioning of systems that are active today. This unit aims to apply and develop your theoretical knowledge and practical skills, to use and apply a wide range of geochemical tools available to the modern scientist to address a variety of geological

and environmental problems.

ERB302 Applied Geophysics

Pre-requisites	(ERB204 and (SEB113 or MXB105 or MAB101 or MAB141 or MAB105)) or (ERB204 and admission to ST20)
Equivalent s	NQB513
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Applied geophysics provides geoscientists with the tools to investigate the generally inaccessible subsurface. These tools enable us to detect temporal and spatial changes in the physical properties of Earth. Knowledge of material properties such as density, electrical resistivity, magnetisation, elasticity and natural radioactivity is essential for the exploration of minerals, hydrocarbons and groundwater. Beyond exploration geophysical methods are used in disciplines as diverse as plate tectonics, environmental geology, engineering geology, and seismic hazard assessment.

ERB303 Energy Resources and Basin Analysis

Pre-requisites	ERB203 and ERB302
Equivalent s	NQB612
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The vast majority of the world's

energy is derived from fossil fuels. Advanced concepts of stratigraphy and basin analysis are fundamental for exploration, evaluation, exploitation and conservation of oil, gas, coal and water in sedimentary rocks. Knowledge of subsurface geologic methods using core, well and geophysical data is essential for anyone wishing to enter the petroleum, coal or strata-bound minerals industry. This unit will cover advanced basin analysis concepts and combine project based learning and practical exercises to provide insight into the exploration of petroleum and other natural resources.

ERB304 Dynamic Earth: Plate Tectonics

Pre-requisites	ERB203, ERB204 and ERB302
Equivalent s	NQB613
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

How we think about Earth processes and evolution has been revolutionised by the recognition that rigid plates forming the outer layer of the Earth move relative to one another and interact at their boundaries. This notion is a cornerstone of the unifying theory of Plate Tectonics. In this unit, you will be introduced to the driving mechanisms of motion and deformation within of the Earth and how they relate to the driving forces of Plate Tectonics. You will become familiar with the igneous, metamorphic and

sedimentary responses associated with specific tectonic environments, and how they have evolved through Earth's evolution. This is a synthesis course integrating all knowledge that you have gained from your Earth Science Major units.

ERB305 Geological Field Methods

Pre-requisites	(ERB203 or NQB413) and (ERB204 or NQB412) and (ERB206 or NQB411)
Equivalent s	NQB502
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-1 External - XCH-1, XCH-2

Field experience is an essential part of the professional training of geologists, environmental scientists, and natural resource specialists in general. The theory and practice of methods to recognize, map, measure, and interpret important geological features and characteristics are essential to the study of geology. Methods of mapping, orientation, and interpretation are necessary skills for resource assessment, geo-exploration, and environmental impact assessment. This unit assumes knowledge of geological principles and methods, namely structural geology and basic petrology and petrography (sedimentary, igneous and metamorphic rocks). It provides professional experiences that are essential for the employability for

geology graduates.

ERB306 Earth's Mineral Resources

Pre-requisites	ERB204 and ERB206 and ERB301
Equivalent s	NQB512
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

A mineral resource represents an enrichment of an element or mineral that can be mined for a profit, and Australia's wealth and future economic growth depend largely on these resources. Develop a theoretical background and understanding of the major aspects of mineral resource formation; develop the practical skills to describe and interpret mineralised rocks and their host sequences; and plan and execute an exploration program. Learning approaches include, lectures (including guest industry lectures) and practical sessions using samples from famous ore bodies across the globe (hand samples and thin sections for microscopic study). Students are assessed based on a group project and theoretical and practical exams. Many students find the semester-long mineral exploration group project a highlight, as students get an opportunity to use a variety of real datasets to 'explore' for mineral prospects. The JK Education Endowment Award is given to the group with the top mark.

ERB310 Groundwater Systems

Pre-requisites	ERB101 or EVB312
Equivalent s	NQB614
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point - SEM-2 External - XCH-1, XCH-2

This unit focuses on the origin, occurrence and movement of groundwater; aquifer properties; chemistry and quality of groundwater; exploration methods for groundwater; drilling methods and well testing equipment; assessment of groundwater problems, both supply and quality; and introduction to modelling of groundwater systems. Groundwater resources of Australia and current issues associated with these resources are covered. This unit builds on knowledge of soil and water chemistry from "Soils" and "Environmental pollution". Through working on real world assessment tasks, you will learn how to collect, analyse and interpret groundwater data. These skills will prepare you for any role where groundwater may be encountered (including government, industry and consulting roles).

ERB311 Dynamic Atmosphere

Pre-requisites	PQB360
Credit Points	12
Campus	Gardens Point, EXCHANGE and External
Availabilities	Gardens Point

es	- SEM-2 External - XCH-1, XCH-2
----	--

Building on the foundation of atmospheric science laid in PQB360, this unit will provide enhanced understanding of chemical and physical processes that are responsible for structure, composition and properties of the atmosphere. Students will gain deeper understanding of aerosol and cloud formation, their interaction with solar radiation and role in global climate, as well as chemical transformations that govern abundance of important atmospheric trace species in both gas and aerosol phase. This knowledge will provide students with the background to understand current issues, such as stratospheric ozone depletion, impact of volcanoes on climate, air pollution and photochemical smog, acid rain and climate change.

ESD001 The Esports Ecosystem

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2

The esports industry is considered as big business. It is rapidly emerging and has a global reach rivalling that of traditional sports. In this foundational unit you will gain an understanding of the esports ecosystem including its structure, organisation and key stakeholders both in Australia and globally. You will also gain an appreciation of the diverse career pathways within this

industry. The unit forms part of the esports core which along with your chosen discipline pathway provides you with the foundation for further study in Business, Information Technology or Creative Industries.

ESD002 Gaming Culture

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP1, CTP2

This unit will investigate the esports gaming culture. It will explore both positive and negative aspect of esports culture and discuss theories related to positive cultural change. The unit forms part of the esports core which along with your chosen discipline pathway provides you with the foundation for further study in Business, Information Technology or Creative Industries.

ESD003 Esports Consumerism

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP2

Real time data, the ability to connect with an engaged community and the opportunity to create curated discussions are just some of the expectations of esports audiences. This unit focuses on understanding and catering to these audiences to ensure the success of an esports enterprise. This unit also explores the digital marketing tools and strategies used by

esports enterprises to build relationships with audiences. The unit forms part of the esports core which along with your chosen discipline pathway provides you with the foundation for further study in Business, Information Technology or Creative Industries.

ESD004 Contemporary Concepts in Esports

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - CTP2

This unit provides a holistic approach to digital competitive play. It focuses on issues related to balancing ethical reasoning for engagement within digital competitive play and health practices. It also provides opportunities to investigate the role of support networks and coaching practices within esports. The unit forms part of the esports core which along with your chosen discipline pathway provides you with the foundation for further study in Business, Information Technology or Creative Industries.

EUB001 Grammar in the Classroom: Theories and Pedagogies

Equivalent s	CRB443
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP10A Online - FP10A

This unit provides an organised, contextualised introduction to the teaching of writing through workshop sessions. This unit caters to all disciplines from early years to senior secondary. You will learn to provide feedback on unsuccessful assessment tasks, discuss the assessment with peers, and prepare teaching sequences for teaching writing. This is important as all teachers need to know how to participate in professional dialogues about assessment and teach students to read/view and write/design texts. Functional grammar is the foundational skill for this unit. All teachers benefit from knowledge about grammar and skills in how to teach it in the discipline/teaching areas. This unit will deepen your knowledge of grammar as a system of communication, and expand your skills in how to teach writing within a range of discipline areas.

EUB002 Numeracy: Examining Barriers for Learners

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP10A Online - FP10A

Numeracy is a crucial component of education; however, many learners continue to cite concerns over their numeracy skills well into adulthood. Educators across disciplines and areas are needed in this area who have understandings, skills and

expertise around potential barriers and equity issues in numeracy education. This unit will provide you with opportunities to explore several potential issues in numeracy education, and may include psychological, socioeconomic, cultural and/or biological factors. This unit will build on knowledge and expertise gained from core units of mathematics already studied as well as numeracy concepts explored within other curriculum subjects. This unit is critical to position you as a responsive, inclusive and resilient numeracy educator in your setting.

EUB003 Managing Challenging Student Behaviours Related to Complex Trauma

Equivalent s	LCB343
Credit Points	12
Campus	Online, Kelvin Grove and External
Availabilities	Online - 6TP2, FP10A External - XCH-1

This unit is designed to develop your understanding and skill in neuroscience-informed support and education of students who are living with the outcomes of complex childhood trauma (abuse, neglect, family violence, etc). New teachers often deem student behaviour to be one of the most confronting aspects of their new careers. The behavioural concerns presented by students who are living with the outcomes of complex trauma can be significant, persistent

and unresponsive to more traditional approaches to behaviour management. By examining the impact of complex trauma on the developing brain and nervous system, you'll develop your understanding of why and how these behaviours occur and explore approaches and strategies recommended to address short and longer-term concerns for students. You'll be informed and prepared for the times you are responsible for the learning and well-being of these students whilst minimising any negative impact on your own well-being or teaching practice.

EUB004 Including Students with Learning Difficulties

Equivalent s	LCB330
Credit Points	12
Campus	Online
Availabilities	Online - FP10A

The aim of this unit is to provide you with knowledge of the learning strengths and challenges of students with learning difficulties in inclusive educational settings and to provide you with skills and strategies to improve learning outcomes with these students. These learning differences can cause difficulties in reading, writing, spelling, and maths. This option unit provides you, as a pre-service teacher, with an understanding of concepts of difference in learning and practical implications for teaching. This unit will focus on pedagogical frameworks and continuums of support to

ensure quality instruction, underpinned by informed evidence that identifies each child's needs and supports performance in an inclusive environment. You will develop skills to disseminate your knowledge to the wider community, including your peers and future teaching colleagues.

EUB005 The Global Teacher, Learner and Citizen

Equivalent s	LCB327
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - FP10A Online - FP10A External - XCH-1

This unit will provide you with opportunities to develop your capacity to teach in an interconnected, diverse and rapidly changing world. Building on your knowledge and expertise gained from your core units, the unit considers how learners can critically examine global developments that are significant to both the world at large and their own lives. Practitioner examples together with a variety of subject matter drawn from frameworks for global education including; global competence, intercultural education, global citizenship education, values education and education for sustainable development, will be considered through which key principles and practices of contemporary pedagogy will be

explored. This unit will enhance your understanding of how a global and intercultural outlook can be embedded within your education setting.

EUB006 Differentiation and Gifted Education

Equivalent s	LCB344
Credit Points	12
Campus	Online
Availabilities	Online - FP10A

The aim of this unit is develop your professional knowledge of the philosophy and pedagogy of differentiation, and how to extend learners in an inclusive education context (including learners who may be identified as gifted). The learning in this unit will develop your understanding and skills of designing differentiation to cater for diverse learners by adjusting the content, processes of teaching and learning, products of learning, and the learning environment. It will also develop your understandings about identifying gifted learners, and providing tiers of support to include and extend diverse learners in an inclusive setting. This unit is in the developmental stage of the course, and will link to other learning on inclusive education and pedagogical approaches.

EUB007 Understanding Reading Difficulties

Equivalent s	LCB338
Credit Points	12
Campus	Online

Units

Availabilities	Online - FP10A
----------------	--------------------------

The unit offers opportunities to develop and master your knowledge and pedagogical skills related to teaching students who experience difficulty learning to read. You will learn strategies for planning, teaching and assessing, and strategies for engaging parents/carers. The context for learning will be framed by the Australian Curriculum: English and current research, relevant literacies theories, and empirical research. You will be encouraged to explore the concepts presented via collaborative learning experiences including case studies, problem solving tasks, small group work, and discussion. The unit enables you to build informed professional practices for teaching students with reading difficulties. The unit includes weekly study activities to support the content delivered within workshops.

EUB008 Engaging with New and Emerging Technologies

Equivalents	CRB038, CRB039
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP10A Online - FP10A

This unit develops the theoretical and practical approaches to using new and emerging digital technologies across the curriculum to connect and engage with

students. It also offers the opportunity to create learning experiences for an authentic teaching and learning context, through QUT's collaboration with Fortitude Valley State Secondary College (FVSSC). Working both individually and collaboratively, you will participate in activities that require you to explore new schooling contexts in Australia and internationally, investigate technologies and apply them across all learning areas. The aims of this unit are to enable you to acquire skills and knowledge related to (i) introducing and using new and emerging technologies across a range of learning areas, and (ii) theoretical and practical perspectives associated with using these technologies in your future classroom.

EUB009 Teachers as Leaders and Entrepreneurial Thinkers

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP2 Online - 6TP2

As a teacher you are a leader, regardless of your organisational position. Leadership and entrepreneurial thinking involve enacted practices that shape who you are as a teacher. This unit aims to develop your practical leadership and entrepreneurial thinking skills to enable you to become confident in self-negotiated action, and influence your future working environment in a positive way. Understanding leadership and

entrepreneurial thinking enables people who work in educational contexts to be well positioned in engaging with change, enabling organisational growth, and advocating for effective forms of professional practice. This unit enables you to engage with leadership and entrepreneurial thinking in your role in the teaching profession. It links to your previous study of learners and educational contexts to provide an important foundation for your professional identity and your future career as a teacher with leadership and entrepreneurial skills.

EUB010 Real World Integrated STEM Education

Equivalents	CRB042
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP10A Online - FP10A

This unit equips you to understand how Integrated STEM contributes to the investigation and solution of real-world problems, where this field aligns with the Early Years Learning Framework and the Australian Curriculum, and how learners learn through contextualised Integrated STEM projects. The unit promotes skills for developing innovative pedagogies and strategies for integrating curriculum to create real-world STEM education in classrooms. The unit enables you to build on teaching areas

related to science, technology, engineering and/or mathematics, appropriate to the context in which you will teach. The Integrated STEM approach enables prior discipline, curriculum and pedagogical knowledge to be framed in authentic learning contexts that simulate real-world practice.

EUB011 Community Engagement in International, Rural and Remote

Anti-requisites	EDB440
Credit Points	12
Campus	Online
Availabilities	Online - FPB

The unit encompasses your international, rural or remote education experience that has been organised through QUT. The learning in this unit will develop your knowledge, skills and application for working. As part of this unit you will engage professionally with diverse linguistic, cultural, religious and socio-economic networks and communities. This unit builds on what you have learnt in the areas of engaging with an international, rural or remote experience, allowing you to investigate and consider diversity and professional practice and engagement.

EUB101 Supporting Innovative Pedagogy with Digital Technologies

Equivalent s	EDB112, CRB013
Credit Points	12
Campus	Kelvin Grove and Online

Availabilities	Kelvin Grove - SEM-1 Online - SEM-1
----------------	--

This unit introduces key concepts and skills for the application of digital technologies in curriculum and pedagogy. It focuses on using digital technologies as a general capability across early childhood, primary and secondary education contexts, while emphasising the importance of ethical use of digital technologies in new and innovative approaches to teaching and learning. This unit will develop your knowledge of relevant curriculum documents (such as the Australian Curriculum and the Early Years Learning Framework) and prepare you with the pedagogies to teach effectively across the curriculum using digital technologies. This unit is undertaken in the first year of your course.

EUB102 Education and Society

Equivalent s	EAB511, LCB003
Credit Points	12
Campus	Kelvin Grove, Online and External
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1 External - XCH-1

This unit introduces you to the complex relationship between our education system and the social and cultural contexts from which it emerges. You will use socio-cultural and sociological theory to better understand those you will

come to teach, as well as how learners' diverse backgrounds, including Aboriginal and Torres Strait Islander students, shape their experiences with the modern school/site, often in very different ways. In this unit, you will develop reflective and critical understandings of the socially, culturally and historically constructed nature of education and care, and be able to identify the social identities and structures influencing contemporary early childhood, primary, middle and senior school contexts.

EUB103 Culture Studies: Indigenous Education

Anti-requisites	EDB171
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit provides you with foundation skills and knowledge about teaching Aboriginal and Torres Strait Islander students and embedding Aboriginal and Torres Strait Islander peoples' knowledge as required by the Australian Curriculum, Early Years Learning Framework and the Queensland Kindergarten Learning Guideline. It is about understanding Aboriginal and Torres Strait Islander peoples' perspectives on history and contemporary issues, and why Aboriginal and Torres Strait Islander students continue to be disadvantaged by education systems. You'll develop

theoretical, personal and professional knowledge around Indigenous perspectives enabling you to think more deeply about your role as a teacher in diverse educational contexts. It will cover a relevant concepts and issues in the area of Indigenous education, establishing a critical foundation for your teaching practice capacity to meet the educational needs of Indigenous students, their families and communities in practical ways.

EUB104 Stepping In

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit introduces key concepts and skills required when working in education, and cultivates awareness of diverse educational contexts and understandings of teachers' work. The unit provides explicit academic preparation underpinned by the Australian Professional Standards designed to support you through your degree and transition to the profession. There is opportunity to demonstrate effective communication techniques and engage with academics, peers and education professionals. You will be introduced to contemporary policies and curriculum documents including the Australian Curriculum, and Early Years Learning Framework for early childhood education. The

concept of teacher resilience will be introduced, providing the opportunity to engage with resources for building teacher resilience that will be developed in your degree. This unit presents an introduction to requirements including the Quality Teaching Performance Assessment that you will develop further in your degree.

EUB105 Introduction to Curriculum, Pedagogy and Assessment (Primary)

Anti-requisites	EDB140
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit introduces the theory and practice of teaching and learning cycles that integrate curriculum, pedagogy and assessment to design lesson plans for primary students. You will learn how to plan a lesson using knowledge of student learning, curriculum sources, and responsive formative assessment. You will have opportunities to conduct classroom observations of students and teachers engaged in learning (via visiting or virtually engaging with schools). You will be introduced to national and state curricular documents, pedagogic frameworks and assessment for learning theories that inform contemporary teacher practice. This introductory unit provides a context for applying the theoretical knowledge of

teaching and learning cycles. The unit also provides a foundation to be developed further in professional experience in EUB242 Professional Experience: Introduction to Professional Practice. The unit complements EUB112 Child and Adolescent Learning and Development.

EUB106 Introduction to Curriculum, Pedagogy and Assessment (Early Childhood)

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit introduces key concepts about effective curriculum, pedagogy and assessment in early childhood education settings. You will identify, consider and evaluate early childhood philosophies, theories and approaches that influence and inform curriculum, pedagogy and assessment in the early years. You will learn how to plan learning experiences based on understandings of learners, curriculum sources, teaching strategies and responsive formative assessment. You will have opportunities to conduct observations of children and teachers engaged in learning (either in person or online). You will be introduced to national and state curricular documents, including the Early Years Learning Framework and Queensland Kindergarten Learning Guideline, pedagogic principles and practices, and

assessment for learning theories and strategies. The content in this unit will be further developed through professional experiences and child development units.

EUB107 Introduction to Curriculum, Pedagogy and Assessment (Secondary)

Anti-requisites	EUB129
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces the theory and practice of teaching and learning cycles that integrate curriculum, pedagogy and assessment to design lesson plans for secondary students. You will learn how to plan a lesson in your first teaching area using knowledge of student learning, curriculum sources, teaching strategies, and responsive formative assessment (informal and formal, diagnostic and summative). You will have opportunities to conduct classroom observations of students and teachers engaged in learning (via visiting or virtually engaging with schools). This introductory unit provides context for applying the theoretical knowledge of teaching and learning cycles. You will be introduced to national and state curricular documents, pedagogic frameworks and assessment for learning theories that inform contemporary teacher practice. The unit provides a foundation further developed through

professional experiences and child and adolescent learning units.

EUB108 Early Childhood Development and Learning (Birth-8 Years)

Anti-requisites	EUB120, EDB121
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit introduces theories, features and processes of early childhood development and learning, from birth to 8 years. Child development and learning are shaped by both biological predispositions, and the interactions and experiences afforded to children in family and social contexts. Content in this unit is focused on children's physical, social and emotional development, along with speech, language and cognition. Aboriginal and Torres Strait Islander knowledges and perspectives on child development are embedded in this unit. Knowledge about the interrelatedness of each area of child development, including influences on how children develop and learn, is fundamental to early childhood education practice. Early childhood teachers apply child development knowledge to plan and facilitate appropriate learning experiences. Your learning in this unit contributes to knowledge and skills further developed in the professional

experience units EUB140 and EUB241.

EUB109 English, Literacies and Language 1

Equivalent s	EAB510
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit develops your knowledge, skills and application of teaching English curriculum, language and literacy to young children, from birth to year 6. This unit focuses on the theories of teaching English, literacy and language acquisition, and develops understandings about effective use of children's literature in literacy teaching in prior-to-school and primary school settings. You will explore early years literacy teaching and learning, including play based pedagogies with particular focus on birth to Year 3. You will engage with the Early Years Learning Framework, Queensland Kindergarten Guideline and The Australian Curriculum, to understand the ways children and teachers build knowledge and skills with language and literacy as they transition from prior-to-school to formal school contexts. The unit also prepares you in learning how to annotate evidence of practice, which will be needed for the Quality Teaching Performance Assessment in your final semester.

EUB110 Primary English Curriculum Studies 1

Equivalent s	EAB510
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit provides an introduction to foundation understandings, skills and processes for studying Primary English Curriculum. In this unit, you will engage with current research about how educators teach children to learn about literature, including literacy theories, pedagogical models and assessment practices. In the context of a real world diverse class profile, you will study the Continuum of Literacy Instruction or Literacy Block, the Four Resources Model and reading assessment practices. The Primary English curriculum provides a key context for the development of literacy skills and knowledges. The unit supports the development of understandings that will be critical for further studies of language and literacies in EUB209 Primary English Curriculum Studies 2 and EUB306 Primary English Curriculum Studies 3. The units enable you to build informed professional practices for teaching listening, speaking, reading and writing for the real world.

EUB111 Primary Mathematics Curriculum Studies 1

Equivalent	CRB001
------------	--------

s	
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit aims to assist you with developing your knowledge, skills and understanding of primary mathematics curriculum and pedagogical context knowledge and its application to real world contexts to enhance a numerate society. The foundations of mathematics commence in early childhood through play and is developed in later years through schooling and active participation in society. In this unit, specific content includes the exploration of number and measurement and the proficiencies, and the role of numeracy in daily life including your own lives, in society and educational contexts.

EUB112 Child and Adolescent Learning and Development

Equivalent s	LCB002
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This introductory unit contributes to your foundation knowledge for your pre-service teaching degree. This first-year unit facilitates understanding of how learners construct knowledge and become self-motivated thinkers and problem solvers. The unit provides a

means of acquiring knowledge of the processes of learning, and an awareness of the physical, personal, moral, social, and emotional factors that influence development, and learning experiences that support the instruction of diverse learners. The unit contributes to your own professional development as a life-long, autonomous learner, capable of reflection and high-level thinking, and of enabling you, as an educator, to promote similar development in your learners.

EUB129 Introduction to Curriculum, Pedagogy and Assessment: Double Degree

Anti-requisites	EUB107
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the first of two units in the double degree that focus on curriculum, pedagogy and assessment in your first teaching area. The theory and practice of teaching and learning cycles that integrate curriculum, pedagogy and assessment for effective lesson design for secondary students in years 7 to 10 will be introduced in this unit. You will engage with national and state curricular documents, pedagogic frameworks and assessment theories that inform contemporary teacher practice. You will learn how to plan a lesson in your first teaching area using knowledge of student learning, curriculum sources, teaching strategies,

and assessment responsive to student needs. You will have opportunities to observe students and teachers engaged in learning (via visiting or virtually engaging with classrooms). The unit provides a foundation further developed through professional experiences and child and adolescent learning units.

EUB140 Professional Experience: Introduction to Early Childhood Practice in Kindergartens

Pre-requisites	EUB104
Anti-requisites	EDB120, EDB121
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

Early childhood teachers draw on educational theories and practices, curriculum knowledge, play-based pedagogies, and understanding of the multiple ways that children learn to provide effective, inclusive and engaging educational environments for children aged 3-5 years. This unit focuses on examining the roles and practices of early childhood teachers; building respectful relationships with children, families, communities and colleagues; observing, documenting and assessing children's learning; planning and implementing engaging play-based pedagogies to support and extend children's learning; and critically reflecting on teaching, and links between

the National Quality Standard and the Australian Professional Standards for Teachers. The unit includes a 15-day professional experience placement (ACECQA requirements) in a kindergarten setting and will further support you to develop knowledge and skills related to your Quality Teaching Performance Assessment (QTPA).

EUB150 World Regions

Equivalent s	CRB109
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit offers an introduction to geography as a discipline and provides an overview of the physical and human characteristics of the world's geographical regions, and zones (e.g. climate zones and biomes). With a focus on the interactions between people and environments you will gain an understanding of geographical processes that shape the identity of places. Geographical processes are both bio-physical and anthropogenic in nature and result in patterns of change over time and space which has implications for people and places. Using an inquiry approach, you will explore the regions, sub-regions and zones of the world to develop and apply analytical and communication skills as well as the specific geographical skills of mapping and representing data. The skills and understanding developed in

this course provide practical value to professions including journalism, teaching, law, hazard management, global security, conservation and environmental science.

EUB151 Nations and Nationalism in Modern Europe

Equivalent s	CRB108
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides you with an understanding of matters pertinent to the evolution of nationalism in Europe in the modern era. This will include the influence of social movements, cultural and economic issues (1640-1990). Nationalism, nationhood and national identity have become subjects of heated debate in the post-cold war world. But what is nationalism? What constitutes a nation and how does nationality become one of the primary bases for the construction of individual and collective identities? This unit offers you the ability to critically evaluate the work of professional historians. You will explore how available evidence and methodologies employed influence cultural and political factors and shape the messages and values that historians advocate through their writing. These practices promote understandings of how historians work, the rules that govern their methods, the reliability of historical knowledge and the value of history socially and culturally.

EUB152 Teaching Young Adult Literature

Equivalent s	LCB323
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This is the first discipline unit that you will take in the first year of your degree. It will provide you with a broad introduction to Young Adult (YA) literature, created for and/or marketed to readers aged between 12 and 20 years. This unit complements and extends the study of literature in the English Curriculum units. It addresses similar aspects of literary criticism but applies these elements to literature specifically intended for adolescents and young adults. In this unit you will also engage with a number of topics essential to the professional development of secondary English teachers including scope and nature of YA literature; strategies for evaluation and selection of focus texts; recent research into teenagers' reading needs, interests and responses. You will also address questions about literariness, appeal, and the changing role and format of literary YA texts in learning environments dominated by digital media.

EUB153 Thinking and Communicating Mathematically

Credit	12
--------	----

Points	
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Ways of thinking, reasoning and communicating mathematically are important both for “doing” mathematics and for your future professional practice, when you will need to demonstrate these skills to assist others in their learning of mathematics. This unit is intended to reshape your way of thinking about mathematics, bridging you from a position of a learner at school to a learner of mathematics for your future profession. This unit provides a basis for the remaining mathematics discipline units in the Bachelor of Education (Secondary) course.

EUB154 Foundations of Science

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

With a focus on the topic areas of the Australian Curriculum for junior secondary science, this unit aims to build foundational knowledge of science by critically reflecting on the nature of science, different forms of science inquiry, and the characteristics of the knowledge that is produced. This unit will prepare you for further studies in science discipline and curriculum studies, and as such it addresses professional standards to support the professional registration of teachers. It will ground you in

an understanding of the social character and the philosophical foundations of science that are embedded in a heterogeneous collection of practices called science inquiry. In alignment with the recent Step Up Project (2016), you will connect with real-world scientists and perform science inquiry projects as a vehicle for critical reflection. This unit addresses APST 2.1 with a particular focus on junior secondary science topics.

EUB201 Early Childhood Mathematics Education 1

Equivalent s	EAB532
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

It is essential that young children develop mathematical foundations in the early years. As a future educator you will need to be aware of the mathematical opportunities that will enhance young children's mathematical proficiencies. You will develop an introductory understanding of Early Childhood Mathematics Education and familiarise yourself with mathematical content knowledge and the pedagogical practices associated with Number and Algebra. In this unit and the proceeding EUB302 Early Childhood Mathematics Education 2 unit, you will develop conceptual and pedagogical knowledge of early years mathematics

teaching and learning, including play based pedagogies with particular focus on birth to Year 3. You will engage with the Early Years Learning Framework, ways children and teachers build mathematical knowledge as they transition from prior-to-school to formal school contexts.

EUB202 English, Literacies and Language 2

Pre-requisites	EUB109 or EAB510
Equivalent s	EAB534
Credit Points	12
Campus	Kelvin Grove and Online
Availabiliti es	Kelvin Grove - SEM-1 Online - SEM-1

This unit further develops your knowledge, skills and application for teaching English curriculum and literacy to young children. The unit is at the developmental stage of your course and focuses on the importance of children's early oral language development, comprehension, fluency, phonics, phonological and phonemic awareness for the teaching of reading and writing in the early years of school. This unit links to the work previously undertaken in EUB109 English, Literacies and Language 1 and supports the development of understandings that will be crucial for your future studies in EUB304 English, Literacies and Language 3.

EUB203 Science in Early Childhood

Equivalent s	EAB531
Credit Points	12
Campus	Kelvin Grove and Online
Availabiliti es	Kelvin Grove - SEM-1 Online - SEM-1

This unit develops your understanding about the importance of quality science education for young children from birth to 8 years of age. In order to inspire young children to ask questions about their environment and become scientifically literate, teachers require knowledge of science concepts, pedagogy and curriculum, as well as diverse, contemporary and cultural perspectives on science education. This early childhood unit will develop your capacity to design and implement engaging science learning experiences that support children's conceptual development. You will further enhance your content knowledge, particularly in the areas of biology, chemistry, physics and earth and space science, through your participation in inquiry-based and hands-on learning activities. This unit will build on theories of teaching and learning from previous units and provide you with the knowledge and skills to develop and implement age-appropriate early childhood science learning experiences.

EUB204 Building Partnerships with Families and Communities

Equivalent s	EAB513
Credit Points	12
Campus	Kelvin Grove and Online
Availabiliti es	Kelvin Grove - SEM-1 Online - SEM-1

Teaching and learning is enhanced when early childhood teachers build respectful and supportive relationships and work in partnership with families. This includes undertaking professional learning to enhance these skills. This unit promotes knowledge and understandings about the diversity, complexity and changing nature of contemporary childhoods, families and communities. Undertaken in the second year of your course, you will be able to reflect on your experiences of working with children, families and communities in line with ACECQA requirements and the Australian Professional Standards for Teachers. You will understand your professional responsibilities and need for professional learning to develop your skills to engage in active communication, consultation and collaboration with families for effective partnerships and to develop links with other child and family services.

EUB205 Child Health, Wellbeing, Safety and Movement

Equivalent s	EAB512
--------------	--------

Units

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

Due to the emerging understandings and concerns regarding children's health and wellness, early childhood educators require the capacity to lead, plan, implement, and evaluate health practices in early childhood settings and to balance the health needs of individual children. Additionally, educators' health and wellness is an important aspect of effective delivery of early childhood programs. This unit introduces foundational understandings related to child health, wellbeing, safety and movement that influence working with children, and that relate to the learning areas of Health and Physical Education and The Early Years Learning Framework. The unit focuses on food, nutrition and wellness principles as well as diverse, contemporary and cultural perspectives on health and wellness including Aboriginal and Torres Strait Islander perspectives.

EUB206 Arts Curriculum Studies 1: Visual Arts and Media Arts

Equivalent s	EAB530
Credit Points	12
Campus	Online and Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit is the first of two

curriculum units in the arts. In this introductory unit, you will examine the basic content of the Visual and Media arts and how students learn in these disciplines. The unit provides opportunities for practical exploration of these art forms and theories, and introduces relevant arts pedagogies that emphasise the role of the arts in society and in the education and care of children from birth to 12 years of age. The arts traditionally and historically play an important part in early childhood and primary education with their potential to inspire children to reach their creative potential, and to enrich their experiences in prior-to-school and primary school contexts. This Visual and Media Arts unit focuses on the social, emotional, cultural and educational importance of the arts.

EUB207 Inclusive Education: Teaching Diverse Learners

Equivalent s	LCB005, EAB514
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit will cover the fundamental concepts underpinning inclusive education and your obligations under national legislation, with emphasis on evidence-based universal strategies for use in inclusive classrooms and prior-to-school settings. The learning in this unit will develop your understanding of quality

differentiated teaching practice to support the engagement, participation and achievement of diverse learners in inclusive settings. The unit aims to build your pedagogical agility and ethical practice for creating safe and supportive inclusive learning environments. This unit is in the introductory stage of the course and is linked with other units covering child development and pedagogical approaches. It will enhance your responsiveness to the learning strengths, rights and requirements of diverse learners and your knowledge of universal strategies to teach diverse learners in inclusive settings.

EUB208 Primary Mathematics Curriculum Studies 2

Pre-requisites	EUB111 or CRB001
Equivalent s	CRB008
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

As a future mathematics educator you will need to be aware of the mathematical opportunities in everyday encounters that will enhance children's mathematical proficiencies. Through your participation in this unit you will develop conceptual and pedagogical knowledge of mathematics education, with a focus on algebra, geometry, probability and statistics. This unit builds upon knowledge attained in EUB111 Primary Mathematics Curriculum

Units

Studies 1 and provides important foundational work for the proceeding unit, EUB307 Primary Mathematics Curriculum Studies 3.

EUB209 Primary English Curriculum Studies 2

Pre-requisites	EUB110 or EAB510
Equivalent s	CRB005
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit provides a developed understanding of skills and processes for studying Primary English Curriculum. In this unit, you will practice and engage with current research about how educators teach children to learn about language, including knowledge of the English language and how it works, language models and pedagogical models. In the context of a real world diverse class profile, you will study the writing cycle, a language in use model, and the teaching of genre, text types, grammar, punctuation, spelling and handwriting. The unit supports the development of understandings that will be critical for further studies of literacies in Primary English Curriculum Studies 3 (EUB306). The units enable you to build informed professional practices for teaching listening, speaking, reading and writing for the real world.

EUB210 Science in Primary Education 1

Equivalent s	CRB002
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit will introduce you to science content knowledge and practices required to teach primary science from Foundation to Year 6. The content is relevant to the Science Understanding, Science as a Human Endeavour, and Science Inquiry Skills strands of the Australian Curriculum: Science and includes big ideas from the biology, chemistry, physics, and earth and space science disciplines. Adequate science disciplinary content knowledge has recently become a more focused requirement of Australian teachers working within educational systems. This unit will be built upon in EUB212 Science in Primary Education 2, where you will develop the knowledge and skills to plan, sequence, and assess inquiry-based student learning in primary science education using constructivism as a referent for your science teaching practice.

EUB212 Science in Primary Education 2

Pre-requisites	EUB210 or CRB002
Equivalent s	CRB010
Credit Points	12
Campus	Kelvin Grove and Online

Availabilities	Kelvin Grove - SEM-2 Online - SEM-2
----------------	--

In this developmental unit you will learn how to plan, sequence, teach, and assess student learning in primary science. You will learn the major theoretical frameworks and research-informed teaching strategies that support high-quality science learning in the primary years. Included in this unit is the opportunity to apply and reflect upon your developing pedagogical content knowledge in relation to Australian Professional Standards for Teachers to identify professional learning needs. As this unit builds upon EUB210 Science in Primary Education 1, it is expected that you have existing knowledge of the science concepts and practices relevant to primary science education.

EUB213 Inclusive Practices for Diverse Learners

Equivalent s	LCB005
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit will cover the fundamental concepts underpinning inclusive education and your obligations under national legislation with emphasis on evidence-based universal strategies for use in inclusive classrooms. This unit focuses on why, when and how to make adjustments for diverse students including

those with complex behavioural profiles (disabilities), in partnership with parents/carers and in collaboration with teacher aides and external professionals. The unit aims to build your pedagogical agility and ethical practice for creating safe and supportive inclusive learning environments for all students. This unit is in the introductory stage of the course and is linked with other units covering child development and pedagogical approaches. It will enhance your responsiveness to the learning strengths, rights and requirements of diverse students and your knowledge of quality differentiated teaching practice and adjustments for teaching diverse students in inclusive classrooms.

EUB220 Curriculum, Pedagogy and Assessment 1: English

Pre-requisites	EUB107 or EUB129
Anti-requisites	CRB200
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This English Curriculum Studies unit develops your understanding of English curriculum content, pedagogy and assessment, with a focus on junior secondary (years 7-10) education. Building upon your learning in EUB107 Introduction to Curriculum, Pedagogy and Assessment (Secondary), and following your first professional experience, this unit will

explore the Australian Curriculum: English in more depth, to recognise its implicit informing theories relating to language, literature and literacy and explicit program specifications. The focus of this unit is on junior high school contexts, with some engagement with senior English to show how junior and senior English are linked, and in preparation for the second professional experience unit. The unit provides simulated experiences of the kind of work undertaken by high school English teachers and their students.

EUB221 Curriculum, Pedagogy and Assessment 1: Mathematics

Pre-requisites	EUB107 or EUB012 or EUB129
Anti-requisites	CRB204
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Mathematics is a constantly evolving field of inter-related and inter-dependent concepts and systems that can be applied to model and reason about phenomena from other disciplines. Building upon your prior learning and experience, including your first professional experience, this unit will explore mathematics curricula, with a focus upon junior secondary (Years 7-10) in the Queensland context. Through a consideration of subject matter from the Australian Curriculum: Mathematics, key principles and practices of

contemporary mathematics pedagogy will be explored. You will apply your understanding of subject-matter, topic-specific pedagogy and formative assessment knowledge to the sequencing and design of learning activities suitable for use in a junior secondary classroom. The knowledge, understanding and skill developed in this unit will prepare you to plan and teach mathematics lessons in your subsequent professional experience, and will be further extended in EUB321.

EUB222 Curriculum, Pedagogy and Assessment 1: History

Pre-requisites	EUB107 or EUB129
Anti-requisites	CRB208
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops your understanding and skill in history curriculum, pedagogy and assessment knowledge. Building upon your learning in EUB107 or EUB129 (if you are a double degree student), and following your first professional experience, this unit will explore history curricula, with a focus upon Years 7-10. A variety of subject matter from the *Australian Curriculum: History* will be considered, through which key principles and practices of contemporary history pedagogy will be explored. You will apply your understanding of subject-matter, topic and discipline-specific conceptual and

Units

pedagogical and assessment knowledge to the design of inquiry-based learning activities suitable for use in a junior secondary classroom. The knowledge, understanding and skills you develop here will prepare you to plan and teach a sequence of history lessons in your subsequent professional experience, and be further extended in EUB322 Curriculum, Pedagogy and Assessment 2: History.

EUB223 Curriculum, Pedagogy and Assessment 1: Geography

Pre-requisites	EUB107 or EUB129
Anti-requisites	CRB212
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops your understanding and skill in regards to Geography curriculum, pedagogy and assessment knowledge. Building upon your learning in EUB107 Introduction to Curriculum, Pedagogy and Assessment (Secondary), and following your first professional experience, this unit will explore geography curricula, with a focus on Years 7-10. A variety of subject matter from the Australian Curriculum: Geography will be considered, through which key principles and practices of contemporary geography pedagogy will be explored. You will apply your understanding of subject-matter and topic-specific pedagogical and assessment knowledge to the design of

learning activities suitable for use in a junior secondary classroom. The knowledge, understanding and skill developed in this unit will prepare you to plan and teach geography lessons in your subsequent professional experience, and will be further extended in EUB323 Curriculum, Pedagogy and Assessment 2: Geography.

EUB224 Curriculum, Pedagogy and Assessment 1: Science

Pre-requisites	EUB107 or EUB012
Anti-requisites	CRB215
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops your understanding of Science curriculum, pedagogy and assessment. Building upon your learning in EUB107 Introduction to Curriculum, Pedagogy and Assessment (Secondary), contemporary pedagogical approaches for teaching science will be explored in conjunction with the requirements of the Australian Curriculum: Science. You will apply your understanding of discipline content knowledge (i.e., Biology, Chemistry, Physics, Earth and Space sciences) as well as pedagogical and assessment knowledge to the design of learning activities suitable for a junior secondary classroom (years 7-10). The knowledge, understanding and pedagogical skills developed in this unit will assist you to plan and teach a

science lesson. Mapping of junior science content to the senior syllabus will prepare you for further extension in EUB324 Curriculum, Pedagogy and Assessment 2: Science.

EUB241 Professional Experience: Early Childhood Practice in Birth-2 Settings

Pre-requisites	EUB140 or EDB120
Anti-requisites	EDB121
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This second professional experience unit in a prior-to-school setting explores early childhood curriculum, learning environments, pedagogical approaches, and the importance of relationships in teaching children aged birth-2 years. Aboriginal and Torres Strait Islander knowledges and perspectives on early education and care are embedded throughout this unit. The unit includes a 10-day professional experience placement in a birth-2 setting and will further support you to develop knowledge and skills related to your Quality Teaching Performance Assessment (QTPA). Following on from EUB140 Professional Experience: Introduction to Early Childhood Practice in Kindergartens, the content of this unit and the 10-day professional experience placement contributes explicitly to the ACECQA requirements for early childhood graduates.

EUB242 Professional Experience: Introduction to Professional Practice

Pre-requisites	EUB104 and (EUB105 or EUB107 or EUB129). EUB107 or EUB129 can be enrolled in the same teaching period as EUB242.
Anti-requisites	EDB170, EUB242-1, EUB242-2
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit has a 15-day professional experience placement designed to further introduce you to the practice of teaching with a focus on planning for learning. You will develop a range of planning and teaching strategies designed to create positive learning environments. The unit content and professional experience combine to provide you with purposeful learning and reflection opportunities for you to begin to develop and shape your emerging identity and practice as a beginning teacher. Learning in this unit will be directly related to preparing for and reflecting on the time you will spend in a school.

EUB250 Australian Geographical Studies

Equivalent s	CRB113
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit explores the unique nature of the Australian

continent, its landforms and landscapes, it's people and places. A vast nation with a small population, Australia is faced with challenges of remoteness not found in other regions of the world. This remoteness shapes the identity of places and the relationships of people with their environment and poses challenges for sustainability and liveability. Australia is home to the one of world's oldest living cultures, that of Aboriginal peoples and Torres Strait Islander peoples, who have a connection and relationship with the land that shapes their identity and underpins their belief systems. In this unit you will gain an understanding of Indigenous peoples' perspectives on the creation of and relationships with land. The skills and knowledge acquired in this unit are valued in a range of academic endeavours including regional and urban planning, resource management, native title, emergency management, environmental management.

EUB251 Environment and Society

Equivalent s	CRB110
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an applied geography approach to understand the dynamic nature of interactions between people and their environments, and the ways environments

influence people's attitudes, perceptions, choices and decisions. This is a skills-based unit that provides an opportunity to transform, represent and analyse geographical data and information to recognise spatial and temporal patterns and trends and explain how these represent contemporary geographical challenges. The skills developed in this unit are applicable across a range of other academic geography and social science subjects and are utilised by specialists in a diverse range of professions including economists, demographers, spatial technicians, criminologists, environmental analysts and managers, urban and regional planners and those in hazard management professions.

EUB252 Australian Society and Culture

Equivalent s	CRB250
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Australian Society and Culture combines literary and cultural studies, political analysis and history. It provides a context through which you can acquire knowledge about Australian institutions and traditions since 1901. In the last century, numerous social, cultural and political ideas, policies and actions have shaped and re-constructed Australians. Understanding how Australia has evolved as a nation, a community, a culture and a

people involves critically analysing various constructions, meanings and interpretations. A study of Australian society and culture will therefore involve an appreciation of Australian people and the significant political and social debates that they engage in. This unit offers insights and understandings about issues that divide Australians as well as events and circumstances that unite the nation. The content provides students with the knowledge base and understandings necessary to successfully teach history in Queensland Secondary schools.

EUB253 The Classical World

Equivalent s	CRB107
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit facilitates understandings of particular societies and their transition in the Classical World by focusing attention on selected periods, aspects and individuals in the ancient Near East, Greece and Rome. Such understandings encourage questioning of established interpretations and knowledge, and provides a foundational understanding of these historical periods in preparation for junior and senior history teaching.

EUB254 Studies in Language

Equivalent s	LCB320
Credit	12

Points	
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Pre-service English language teachers require a solid foundational understanding of the nature, complexity and diversity of language; of the ways in which it is acquired and learned and how it is used to perform a range of cognitive, social, cultural and personal functions. These understandings about language and literacy development are related to a broad range of teaching contexts, both local and international. This unit will enable you to gain insight into various aspects of language that impact on teaching and learning in schools. The unit will develop your awareness of the nature, function and development of language and literacy and the role each plays in the constitution of social and cultural processes and practices, with particular reference to the role of language in classroom contexts. It aims also to extend your understanding of the dynamic, changing nature of 'English' and of other languages in the current global context.

EUB255 Literature in Secondary Teaching

Equivalent s	LCB322
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides you with

opportunities to explore literature and fiction, theories of how literary and fictional works are produced, and to engage in creative writing. You will explore, as both consumers and creators, how fictional texts can convey and transform personal and cultural perspectives. The unit invites you to draw on a very wide repertoire of fictional texts across all media in interpreting and creating texts for professional, personal, cultural, social and aesthetic purposes.

EUB256 Exploring, Representing and Interpreting Mathematical Change

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Understanding the mathematical representation of numerical change is fundamental to modelling the physical world. This unit takes a fresh look at the ideas that contribute to such an understanding, building on some of the concepts in EUB153. This unit shows how the relatively simple topics of algebra, geometry and trigonometry can be contextualised and represented, and how these topics can be extended into introductory calculus. A key aspect of this unit will be the development of your confidence and ability as a secondary Mathematics teacher to communicate with others regarding these mathematical topics.

EUB257 Reasoning with Quantity, Space and Shape

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

A deeper understanding of measurement, shape and space will allow you to apply your mathematical knowledge to problems of interest in the real world. This in turn will provide you with new ways to explain mathematics to others and to assist them in their learning. In this unit you will further apply your growing mathematical knowledge-base, built from earlier discipline units, to problems of both real world and abstract natures that involve the use of measurement and geometry concepts. This unit intends to give you greater confidence in explaining mathematical ideas to students by exposing you to different applications and links between mathematical topics.

EUB301 Performing Arts in Early Childhood

Equivalent s	EAB536
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

Early childhood performing arts has distinct pedagogical and curricular orientations, including play based approaches. Through music, movement/dance, performance-based media,

imaginative play, story and drama, children are provided with ways to experience, understand, appreciate and respond to their worlds, as they develop visual, aural, bodily-kinesthetic and aesthetic literacies. An emphasis on early childhood approaches to the performing arts including play based experiences are a feature of this unit. This unit explores key ideas, concepts and understandings about effective curriculum, pedagogy, performing arts works and assessment in the performing arts in early childhood education from birth to eight. Your work in this unit will be linked to national and state curricular documents, including the Early Years Learning Framework, Queensland Kindergarten Learning Guideline and the Australian Curriculum: Arts Strands.

EUB302 Early Childhood Mathematics Education 2

Pre-requisites	EUB201
Equivalent s	EAB533
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit provides you with opportunities to build conceptual knowledge and practise pedagogical strategies that will provide young children with opportunities to engage in learning, specific to Measurement and Geometry and Statistics and Probability. This unit extends upon

knowledge gained in EUB201 and further develops your understandings, attitudes, values and skills in relation to early childhood mathematic concepts of Measurement and Geometry and Statistics and Probability. Through participation in this unit, you will be prepared to develop young children's early mathematics knowledge and processes through quality real world learning experiences and supportive learning environments from birth and into primary contexts. You will explore the Early Years Learning Framework, the Queensland Kindergarten Learning Guideline and the Australian Curriculum in relation to mathematics education.

EUB303 Technologies

Equivalent s	CRB011
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

Technologies impact the lives of people globally and are essential to envisioning and developing innovative solutions to meet both current and future needs. This unit provides you with opportunity to develop knowledge and understanding of both Digital Technologies and Design and Technologies, two distinct learning areas from the Australian Curriculum. As a future Early Childhood or Primary teacher you are required to engage with

teaching and learning issues present in teaching technologies. Hence, theoretical approaches, practical experiences, and the development of communities of practice are important features of this unit. This unit also includes practical application of the ICT general capability that was introduced in previous units. This unit further develops introductory understandings of technologies covered in the Digital Pedagogies unit undertaken in your first year of study.

EUB304 English, Literacies and Language 3

Pre-requisites	EUB202 or EAB534
Equivalent s	EAB535
Credit Points	12
Campus	Kelvin Grove and Online
Availabiliti es	Kelvin Grove - SEM-2 Online - SEM-2

This unit builds on the content of earlier units, English, Literacies and Language 1 and 2. The unit is at the mastery stage of your course, and focuses on broadening knowledge and understandings about the current context of education in relation to literacy and English in prior to school and primary school settings. The unit provides a space for you to build informed opinions about important issues and to practice articulating these opinions professionally and confidently.

EUB305 HASS Curriculum Studies 1: Geography and Civics

Equivalent s	CRB004
Credit Points	12
Campus	Kelvin Grove and Online
Availabiliti es	Kelvin Grove - SEM-2 Online - SEM-2

This unit introduces key concepts and skills foundational to geography and civics education in the early childhood and primary years. The unit distinguishes children as critical thinkers and active and informed citizens who can develop perspectives about global issues and sustainable futures. This unit will develop your knowledge of curriculum documents (Australian Curriculum (F-6), the Early Years Learning Framework and the Queensland Kindergarten Learning Guideline) and prepare you with the pedagogies to teach geography/civics to diverse learners. In particular, the unit focuses on using ICTs and embedding literacy and numeracy strategies. Additionally, the unit uses data to inform practice developing skills learnt in EUB343. This third year unit is the first HASS unit but further develops pedagogical and assessment practices from earlier units. The second HASS unit HASS Curriculum Studies 2: History and Civics builds on the knowledge and skills introduced in this unit.

EUB306 Primary English Curriculum Studies 3

Pre-requisites	EUB209 or CRB005
Equivalent s	CRB006
Credit Points	12
Campus	Kelvin Grove and Online
Availabiliti es	Kelvin Grove - SEM-1 Online - SEM-1

This unit provides an understanding of the skills and processes for studying Primary English Curriculum. You will engage in and master the use of research to guide, inform and reflect on practices necessary for teaching literacy in the context of English curriculum and for unit planning. You will study literacy theories including critical literacies, visual literacies, and philosophical perspectives on pedagogical practices and how these apply to English curriculum planning. In the context of a real world diverse class profile you will develop unit planning skills and day-to-day planning skills and strategies that encompass the complexities of primary English curriculum. This unit supports the mastery of understandings that have been developed in previous studies of English curriculum in Primary English Curriculum Studies 1 & 2 (EUB110 & EUB209). This unit will assess your mastery of the English curriculum content including teaching & learning strategies.

EUB307 Primary Mathematics Curriculum Studies 3

Pre-requisites	EUB208 or CRB008
Equivalent s	CRB009
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

Mathematical thinking and reasoning are ubiquitous in, and fundamental to our daily life and work. This unit introduces an inquiry pedagogical approach, which integrates across mathematical content strands and makes the learning meaningful by connecting it to real world applications. Problem solving and posing, and mathematical modelling are the core activities in this unit.

EUB309 Performing Arts Education

Equivalent s	EAB538
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

Performing arts has distinct pedagogical and curricular orientations, including play based approaches. Through music, movement/dance, performance-based media, imaginative play, story and drama, children are provided with ways to experience, understand, appreciate and respond to their worlds, as they develop visual, aural, bodily-kinesthetic and aesthetic

literacies. This unit explores key ideas, concepts and understandings about effective curriculum, pedagogy, performing arts works and assessment in the performing arts in primary education. Your work in this unit will be linked to national and state curricular documents: Arts Strands. This is an authentic assessment because it introduces you to sequential planning in the performing arts. Performing arts activities do not usually last for a single lesson so you are able to understand how to connect different performing arts strands across an extended time frame.

EUB310 Teaching EAL/D Learners

Anti-requisites	LCB004
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Teaching English as an additional language/dialect (EAL/D) introduces key concepts and skills that are foundational to understanding, engaging and supporting English language learners in education contexts. This unit relates to teachers' professional work in knowing diverse learners and planning quality differentiated teaching practice for learners who are acquiring English as an additional language. This unit is at the developed level of the course, and supports the knowledge and orientations that you explore in other units. In particular, it complements

curriculum knowledge and skills that you are learning about through other units studied.

EUB320 Curriculum, Pedagogy and Assessment 2: English

Pre-requisites	EUB220 or CRB200
Anti-requisites	CRB201, CRB203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This English Curriculum Studies unit develops your understanding of English curriculum content, pedagogy and assessment, focusing on senior secondary (yrs 11-12) English. Building upon your learning in EUB220, & prior to your final year of professional experience, this unit will explore the Queensland senior syllabus for English in depth, to recognise its implicit informing theories and explicit program specifications. Other senior English syllabuses for Queensland will also be explored. Exploration of a selection of subject-matter from across Years 11-12 will provide the basis for you to extend your topic-specific pedagogical knowledge, & to develop your ability to design and provide feedback on summative assessment tasks. You will apply your understanding of subject matter and topic specific pedagogical and assessment knowledge to the marking of a summative assessment task & associated teaching & learning plans suitable for use in a senior

secondary classroom.

EUB321 Curriculum, Pedagogy and Assessment 2:

Mathematics

Pre-requisites	EUB221 or CRB204
Anti-requisites	CRB205, CRB207
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Mathematics is an intellectual discipline in which problems are explored and solved through observation, reflection and logical reasoning. This unit further develops your understanding and skill in regard to mathematical curriculum, pedagogy and assessment knowledge. Building upon your prior learning experience, this unit will explore the subject-matter and summative assessment practices including instrument specific marking guides (ISMGs) used in the senior (Years 11-12) mathematics syllabi.

EUB322 Curriculum, Pedagogy and Assessment 2: History

Pre-requisites	EUB222 or CRB208
Anti-requisites	CRB209, CRB211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops your understanding and skill in regard to History curriculum, pedagogy and assessment knowledge. Building upon your learning about the principles

and practices of contemporary history pedagogy in EUB222, and following your second professional experience, this unit will explore the subject-matter and summative assessment practices for Years 11-12 in the Senior Modern and/or Senior Ancient History syllabi in the Queensland context. The exploration of a selection of subject-matter from across Years 11-12 will provide the context for you to extend your pedagogical knowledge and to develop your ability to design and provide feedback on summative assessment tasks. You will apply your understanding of subject-matter, topic and discipline-specific conceptual pedagogical and assessment knowledge to the marking of a summative assessment task and associated teaching and learning depth-study plans suitable for use in a senior secondary classroom.

EUB323 Curriculum, Pedagogy and Assessment 2: Geography

Pre-requisites	EUB223 or CRB212
Anti-requisites	CRB213, CRB214
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops your understanding and skill in regard to geography curriculum, pedagogy and assessment knowledge. Building upon your learning in EUB223 Curriculum, Pedagogy and Assessment 1: Geography and following your second

professional experience, this unit will explore the subject-matter and summative assessment practices used in Years 11-12 geography syllabi in the Queensland context. The exploration of a selection of subject-matter from across Years 11-12 will provide the basis for you to extend your topic-specific pedagogical knowledge and to develop your ability to design and provide feedback on summative assessment tasks. You will apply your understanding of subject-matter and topic-specific pedagogical and assessment knowledge to the marking of a summative assessment task and associated teaching and learning plans suitable for use in a senior secondary classroom.

EUB324 Curriculum, Pedagogy and Assessment 2: Science

Pre-requisites	EUB224 or CRB215
Anti-requisites	CRB216, CRB218
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops your understanding of the theory and practice of curriculum and assessment design in senior science (Years 11 and 12). It focuses on the knowledge and skills required to design contextualised lesson sequences and assessment instruments, which comply with new QCAA syllabus specifications while catering for 'real world' school and learner

characteristics. You will learn how to build upon the syllabus structure and topic outlines by incorporating contexts, resources and examples of pedagogical content knowledge appropriate to authentic school scenarios. The unit builds on content taught in EUB107 concerning the fundamentals of curriculum and assessment, as well as the knowledge developed in EUB224 regarding the syllabus documents specific to your chosen senior science subject (i.e., Biology, Chemistry, Earth and Environmental Science, Physics, etc.).

EUB329 Curriculum, Pedagogy and Assessment: Double Degree

Pre-requisites	EUB129
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to extend your knowledge, understanding and skills from previous curriculum units with reference to the discipline-specific pedagogical and summative assessment requirements of official senior syllabuses (years 11 and 12). You will enhance your knowledge of how teaching, learning and assessment practices in senior secondary classrooms are shaped by engagement with curriculum documentation. You will explore your relevant senior syllabus with reference to its implicit informing theories and program specifications. You will research

the academic literature around assessment in your teaching area and interview an expert in the field before presenting your findings to the Parents and Citizens/Friends Association in your school.

EUB343 Professional Experience: Informing Professional Practice

Pre-requisites	EUB241 or EUB242 or EUB242-2 or EDB171, a recorded result (Achieved or Not Achieved) of both components of LANTITE and completion of 180 credit points.
Anti-requisites	EDB173, EDB150, EUB343-1, EUB343-2
Credit Points	12
Campus	Online and Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 Online - 10TP4, SEM-1

This unit supports the developing stage of pre-service teacher professional practice. This unit focuses on developing the professional knowledge and practices associated with evidence of learning and evidence of impact. You will gain an understanding of and develop strategies for assessing, providing feedback and reporting on student progress, including quality-assuring teacher judgements of student achievement. Data management, interpretation and analysis skills will be introduced, and factors that influence the measures of student performance. You will participate in 20 days of professional experience. Learning in this unit will be related to preparing for and

reflecting on the time you will spend in a school. You will also focus on developing skills and practices for professional resilience, specifically, personal wellbeing.

EUB344 Professional Experiences: Informing Professional Practice

Anti-requisites	EUB343, EUB343-1, EUB343-2
Credit Points	12
Campus	Online and Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 Online - 10TP4

This unit supports the developing stage of pre-service teacher professional practice. This unit focuses on developing the professional knowledge and practices associated with evidence of learning and evidence of impact. You will gain an understanding of and develop strategies for assessing, providing feedback and reporting on student progress, including quality assuring teacher judgements of student achievement. Data management, interpretation and analysis skills will be introduced, and factors that influence the measures of student performance. You will participate in 15 days of professional experience. Learning in this unit will be related to preparing for and reflecting on the time you will spend in a school. You will also focus on developing skills and practices for professional resilience, specifically, personal wellbeing.

EUB350 Asia in Focus

Equivalent s	CRB112
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides the opportunity to engage with a range of physical and human geography topics with Asia as the focus. A regional geography approach is used to explore and understand the features, elements and characteristics of the human and physical landscapes as well as the interconnection between Asian nations and Australia. A case study approach is used with topics include sustainability and liveability of places; natural and ecological hazard zones and the risks in these zones; population, urbanisation and the emergence of megacities; the unique and diverse physical environments and the relationships people have with places across Asia. Utilising a range of geographical technologies, this unit provides valuable analytical skills, including spatial analysis, that are valued in a range of professions including regional planning, foreign affairs, journalism, environmental management, emergency services, hazard management, resource management and global security.

EUB351 Space, Population and Territory

Credit Points	12
---------------	----

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit focuses on three interrelated concepts that are foundational to the discipline of geography: space, population and territory. You are invited to examine the historical and contemporary environmental, economic, political, social and cultural factors that shape these concepts. You will engage in the examination of the practical and concrete impact that ideas about space, population and territory have on lived everyday life at both a local and global level and the implications for sustainable planning for the future. In this unit, which is placed towards the end of your course, you will be able to draw on, extend and contextualise knowledge and skills that you have acquired in your earlier discipline and curriculum studies in geography.

EUB352 Medieval Europe and the World

Equivalent s	CRB115
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit traces the evolution of Europe from the Fall of Rome in the 5th century through to the centuries usually defined as the High Middle Ages including Renaissance and the Reformation periods. On a thematic level, the unit selectively examines topics concerned with political, religious and intellectual

developments, along with the cultural history of Medieval Europe. You will develop an understanding of how events and forces have contributed to societal, political and cultural change in Europe in Medieval times. The Middle Ages constitute a crucial period in the formation of a European identity. The breakdown of the Roman world saw the gradual emergence of a Christian civilisation of striking originality. At the same time, it gave rise to political fragmentation, as well as to national characteristics and antagonisms that are still part of the European scene today. The content of this unit offers you understandings of issues that are still of central concern in our society.

EUB353 China and its Region

Equivalent s	CRB106
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - XCH-1

The unit provides you with the knowledge of how China, formerly a Dynastic Empire, was disempowered by Western Imperialism, only to obtain independence through the governmental embrace of Communism. The role of powerful individuals in determining China's destiny, and an understanding of how the country's fortunes changed over time are additional features of the content. To enhance understanding, and

for comparative purposes, the unit also examines significant events in the history of nearby Asian countries. Through appreciating the circumstances and personalities that have shaped China and its neighbours, you will be able to more readily and articulately analyse and interpret major events taking place in China and its region today.

EUB354 Screen Studies and New Media

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with opportunities to explore screen and moving image media and their functions as important sources of information, education, cultural exchange and participation. The unit introduces you to different schools of theory in these areas and provides you with the tools to analyse and evaluate a wide diversity of screen texts and to work creatively with these texts. You will gain a working familiarity with a number of new media platforms.

EUB355 Uncertain Situations

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Probability and statistics are used to describe and analyse phenomena involving uncertainty, and this unit will promote contemporary

perspectives on these topics. Building on ideas from your first discipline unit, you will be equipped with understanding and skills to solve problems and communicate ideas and findings related to this often misunderstood areas of the mathematical sciences.

EUB356 Mathematics in Everyday Contexts

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Applying mathematics and statistics to investigate real world phenomena and solve related problems is considered by some to be the ideal way the engage learners in mathematics and to illuminate for them, the most difficult ideas. In this unit you will draw on mathematical and statistical techniques of preceding discipline units, applying them to real world problems from a variety of contexts.

EUB357 Poetry: Responding and Composing

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with opportunities to explore poetry in a variety of forms, theories of how poetry can be appreciated and appraised, and to engage in poetry writing. You will consider, as consumers and creators, how concepts, issues, identities, times and places are represented in poetry. The unit

invites you to experience a wide repertoire of poetic texts across traditional and new media, as well as from a variety of places and times. The unit content includes: a range of written poems as well as song lyrics and spoken poetry performances.

EUB401 Teaching Learners with Complex Learning Profiles

Pre-requisites	EUB207
Anti-requisites	LCB006
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit will cover targeted strategies for learners with complex learning profiles in inclusive classrooms in prior-to-school and formal school contexts. This unit focuses on why, when and how to make adjustments in accordance with the Disability Standards for Education 2005, and how to do so in partnership with parents/carers and in collaboration with relevant external professionals and teacher aides. The learning in this unit will develop your understanding of learners with complex learning profiles and your capability to plan and enact supplementary, substantial and extensive adjustments to curriculum, pedagogy and assessment within inclusive classrooms in prior-to-school and primary school contexts. The unit is offered at the mastery stage of the course to develop your

ability to teach learners with complex learning profiles. It builds on your learning in EUB207 and is related to other units covering pedagogical and curriculum approaches.

EUB402 Early Childhood Research and Evaluation

Equivalent s	EAB516
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit focusses on research and evaluation for diverse early childhood education settings. Research and evaluation knowledge and skills are important for educators as they enable them to take a scholarly approach to researching topics of interest in the field. This also enhances contemporary early childhood professional practice in the area of evaluating and improving teaching and learning programs. These skills and knowledge allows educators to use rigorous data collection and analysis approaches, high level research literacy skills, and ethical approaches to answer questions such as 'what works, for whom, and how?' This unit is at the mastery level of the course and draws on research literacy skills and critical and evaluative thinking introduced and developed earlier in the course. This unit will support you with knowledge and skills needed for your QTPA and includes a Work Integrated Learning project.

EUB403 HASS Curriculum Studies 2: History and Civics

Equivalent s	CRB003
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

This unit further develops key foundational concepts, content and skills of history, civics and citizenship education in the prior-to-school and primary school years. This mastery level unit assumes professional familiarity with the structure and intent of the Australian Curriculum (F-6) HASS, the Early Years Learning Framework and the Queensland Kindergarten Learning Guideline. It distinguishes young children as competent, involved learners who develop and experience perspectives about the past. In prior-to-school and primary school contexts, learners investigate challenging topics to enable them to become critical thinkers and active and informed citizens. As such, educators in the early childhood and primary years engage with children, families and communities that help them understand the role of history, civics and citizenship in society. Such knowledge develops an informed and critical understanding of the past and allows better understandings of the present and the future.

EUB404 Leadership, Management and Advocacy

Equivalent s	EAB515
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP10A Online - FP10A

In this unit you will explore essential elements of quality early childhood education and care, including leadership, management and advocacy. These are essential when building strong, respectful and meaningful relationships with children, families and staff. Understandings of leadership, management and advocacy from diverse, contemporary and cultural perspectives, enable early childhood educators to work optimally with diverse children, families and communities in varying early childhood contexts. Through exploring leadership and management theories and approaches to advocacy from contemporary research and literature you will expand upon and master your existing skills. Advocacy and its capacity to affect change and growth is integral to the unit. Social justice, ethics, and equity are explored as effective principles for the successful leadership in early childhood services. This unit will support your preparation for the QTPA and includes a Work Integrated Learning project.

EUB405 Teaching EAL/D Learners

Anti-requisites	LCB004
-----------------	--------

Units

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

Teaching English as an additional language/dialect (EAL/D) introduces key concepts and skills that are foundational to understanding, engaging and supporting English language learners in prior-to-school and primary school contexts. This unit relates to teachers' professional work in knowing diverse learners and planning Quality Differentiated Teaching Practice for learners who are acquiring English as an additional language. As a fourth-year unit at the mastery level of the course, this unit supports the knowledge and orientations that you explore in other units. In particular, it complements curriculum knowledge and skills that you are learning about through other units studied. Additionally, the unit helps you to understand the role of external professionals and community representatives in broadening teachers' professional knowledge and practice.

EUB406 Stepping Out/ Quality Teaching Performance Assessment

Pre-requisites	Successful completion of 336cp in (ED39 or ED49 or ED59) or successful completion of 384cp in (ID22 or ID24 or ID25)
Co-requisites	EUB445 or EUB444-2
Anti-requisites	EDB174

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP09A, SEM-1 Online - FP09A, SEM-1

The unit provides a means of transition from pre-service teachers to the role of a professional educator capable of working across diverse contexts and settings. This unit contributes to the capstone for your pre-service teaching degree and connects all of your prior university learning experiences. The final year Quality Teaching Performance Assessment (QTPA) is a course requirement that is situated within this unit. The QTPA is an assessment of teaching performance that is designed to measure your knowledge, skills and ability in relation to the Graduate level of the Australian Professional Standards for Teachers. The QTPA is based on a learning sequence around a discipline-specific area.

EUB407 Health and Physical Education: Wellbeing, Families and Communities

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP10A Online - FP10A

This unit prepares you to teach health education (wellbeing) in the primary school context. Student wellbeing is a central focus for learning, with both policy and the Australian Curriculum stating the importance of such teaching

and learning. You will develop pedagogical knowledge on anti-bullying frameworks and pedagogies, diversity (including sex, gender, sexuality and culture), respectful relationships, and safe and responsible choices. Effective teaching and learning practices will be based in anti-oppressive education theory. This unit supports the introduction of the health and physical education curriculum with a focus on the personal, social, and community health strand.

EUB408 Integrated Curriculum: Bringing it all Together

Equivalent s	CRB007
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

Integrated units of teaching and learning are popular strategies for intellectually challenging learning in primary education. Teachers are required to have a deep understanding of disciplinary connections and options for integrated assessment. Real world learners and their contexts provide a platform for integration. This mastery level unit investigates ways of translating theory into professional practice for integrating curriculum, including demonstration of a broad range of disciplinary content knowledge. You'll have opportunities to appreciate the complexity of integrated curriculum and assessment

and consider different approaches to integrating curriculum. The focus for learning includes the study of multiliteracies designs for learning and pedagogy, planning models, general capabilities, and cross-curriculum priorities and literacies. You'll reflect critically on the affordances and barriers of a best practice integrated curriculum approach and real-world applications.

EUB420 Curriculum, Pedagogy and Assessment: Innovation

Pre-requisites	EUB320 or EUB321 or EUB322 or EUB323 or EUB324 or XNB399 or CRB201 or CRB205 or CRB209 or CRB213 or CRB216 or CRB203 or XNB391 or CRB207 or CRB211 or CRB214 or CRB218
Anti-requisites	CRB202, CRB206, CRB210, CRB217
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Secondary school teachers need a range of understandings and skills to be effective practitioners in the complex social and technological environment of the classroom. The policy and practice environment of schooling provides many challenges for the graduate teacher. Grounded in your classroom experiences, this independent inquiry unit at the end of the curriculum, pedagogy and assessment suite will provide you with an opportunity to identify an area of interest related to secondary school curriculum, pedagogy

and/or assessment. You will explore your area of interest with assistance and feedback from your tutor.

EUB444 Professional Experience: Consolidating Professional Practice

Pre-requisites	EUB343 (or EUB343-2 or EDB173 or EDB150) and a recorded result of Achieved for both components of LANTITE
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1, SEM-2 Online - SEM-1, SEM-2

Learning in this unit will be directly related to preparing for and reflecting on the time you will spend in an educational setting. There is a focus on developing skills and practices for professional resilience, specifically, taking initiative. This unit has a 20-day professional experience designed to consolidate previous learning in the course. Students in the QTPA Kindy Pilot will complete 25 days to fulfill the days required in a school setting. Throughout this unit you will further consolidate the skills necessary to critically analyse your professional practice and identify areas to strengthen. You will continue to develop and refine a range of planning, teaching and assessment strategies designed to positively impact on a diversity of learners. The unit content and professional experience combine to provide you with purposeful reflection opportunities for you to consolidate your teaching

practice and further shape your emerging identity as a beginning teacher.

EUB445 Professional Experience: Transition to Professional Practice

Pre-requisites	EUB444 and one of (EUN304, EUN305, EUN306, EUB320, EUB321, EUB322, EUB323, EUB324, XNB399)
Co-requisites	EUB406
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP09A, SEM-1 Online - FP09A, SEM-1

This final professional experience will strengthen your professional practice at the Graduate level of the APSTs. A 25 day professional experience provides you with an opportunity to gather evidence, reflect, focus and synthesise your knowledge as you prepare to enter the teaching profession. Your emerging teacher identity will be further developed as you move from pre-service teacher to a beginning teacher. This mastery level unit will also focus on developing skills and practices for professional resilience, specifically, managing emotions. If you are an early childhood or primary student your chosen primary specialisation will relate to this final professional experience. From 2023, early childhood pre-service teachers in the QTPA Kindy Pilot will complete their 25-day professional experience in a kindergarten where they will collect data for

their QTPA.

EUB450 Geography in the Field

Equivalent s	CRB114
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an opportunity to develop fieldwork design skills as well as practical fieldwork skills for gathering data, making observations, and recording information in the field. Fieldwork is carried out in both urban and natural environments within the Greater Brisbane area. Ways of representing and analysing data gathered in the field will provide the opportunity to develop cartographic, graphic and analytical skills. You will propose, design and carry out your own fieldwork and report on your findings. The skills developed in this unit are relevant to a wide range of professions within the geography, science and education fields that rely on project design, data collection and analysis and analytical reporting, including proposing action to identified geographical challenges.

EUB451 Australia, Britain and America

Equivalent s	CRB117
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on British and

American social and political influences on Australian foreign policy and social attitudes since 1900. It investigates Australia's, America's and Britain's relationships with Asian countries through involvement in war. The content examines World War 1, the interwar-years, World War 2 and the post-World War 2 period. A secondary objective is to examine the fight for independence and democracy, particularly in a number of former colonial countries. Before World War 2, reverence for the British Empire and appreciation of its protection influenced Australian attitudes and governmental decision-making. Most Australians seldom questioned this close relationship. During and after World War 2, America became Australia's great and powerful friend - and the influence of Britain diminished. Nevertheless, public affection for the mother country did not dissipate so quickly. Learning experiences and assessment align with QCAA and ACARA expectations.

EUB452 STEM Investigation Project

Equivalent s	CRB047
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Practitioners of the sciences almost always require an ability to define problems, formulate justifiable questions, develop investigation methods that are rigorous and evidence-based,

interpret data, and communicate findings verbally and in writing. This unit will build on foundational and specialist discipline knowledge gained throughout your units of prior study. This unit prepares you to think critically about an important problem related to Science, Technology, Engineering and Mathematics (STEM) and to integrate the knowledge gained through earlier units to provide an effective solution. During this project you will critically analyse and reflect on your work and that of your peers, you will gain a deeper understanding of scientific methods and/or mathematical modelling and reasoning, and will become confident in applying them.

EUN101 Supporting Innovative Pedagogy with Digital Technologies

Pre-requisites	Completion of 192 credit points in MV01 Bachelor of Mathematics or SV02 Bachelor of Science; or admission into EU30 Master of Teaching (Early Childhood), EU40 Master of Teaching (Primary), EU50 Master of Teaching (Secondary).
Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP2 Online - 6TP2

This unit focuses on using digital technologies as a general capability across early childhood, primary and secondary education contexts, while emphasising the importance of ethical use of

digital technologies on new and innovative approaches to teaching and learning. General capabilities are common across all three cohorts as part of the Australian Curriculum. Digital technologies play an essential role in how individuals work, live, play and learn. It is imperative for educators to understand how to use digital technologies to support and enhance student learning experiences. This six week unit provides you with theoretical and practical approaches to using innovative digital technologies in the classroom, while ensuring that you have the pre-requisite knowledge and skills to apply the essential learnings of digital pedagogies to units in this course.

EUN102 Child and Adolescent Development

Pre-requisites	Completion of 192 credit points in MV01 Bachelor of Mathematics or SV02 Bachelor of Science; or admission into EU30 Master of Teaching (Early Childhood), EU40 Master of Teaching (Primary), EU50 Master of Teaching (Secondary).
Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP3 Online - 6TP3

This introductory six week unit provides you with knowledge about major theories and processes of child and adolescent development. The unit focuses on theories of child and adolescent development, along with

biological sequences for physical, social, emotional, cognitive, and speech and language development, from birth to adolescence. Through engagement with relevant theories and research, you will develop the ability to analyse and synthesise ideas about child and adolescent development and begin to consider how these impact children and adolescents as learners in family and educational contexts. This foundational knowledge will be applied in curriculum units throughout your degree program that focus on how teachers interpret and respond to a child/adolescent's individual characteristics and abilities in the planning and implementation of appropriate educational opportunities.

EUN103 Teaching EAL/D Learners

Pre-requisites	Completion of 192 credit points in MV01 Bachelor of Mathematics or SV02 Bachelor of Science; or admission into EU30 Master of Teaching (Early Childhood), EU40 Master of Teaching (Primary), EU50 Master of Teaching (Secondary).
Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP3 Online - 6TP3

Diversity in the Australian population, including people from different religions, cultures, language and socio-economic backgrounds (including Aboriginal and Torres Strait Island peoples,

migrants and refugees) collectively referred to as EAL/D, means teachers need specific knowledge, dispositions and skills to understand, engage and support those learning Standard Australian English. Curriculum is taught through English language and teachers are expected to understand the diverse abilities of learners. Teachers provide effective scaffolding to respond to the rich language environments of children and families, along with the language demands of specific discipline areas in school-based curriculum. This six week unit will equip you with effective strategies for teaching language aspects, including language development and skills of speaking, listening, reading, writing, vocabulary and grammar, with learners whose first language or dialect is not Standard Australian English.

EUN104 Culture Studies: Indigenous Education

Pre-requisites	Completion of 192 credit points in MV01 Bachelor of Mathematics or SV02 Bachelor of Science; or admission into EU30 Master of Teaching (Early Childhood), EU40 Master of Teaching (Primary), EU50 Master of Teaching (Secondary).
Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP2 Online - 6TP2

The Australian Curriculum and Assessment Reporting Authority identifies Aboriginal

and Torres Strait Islander histories and cultures as one of the three cross-curricular priorities to be embedded across all key learning areas. Further, improving Indigenous education outcomes has been recognised as a national priority through the Close the Gap strategy. This introductory six-week unit begins with an analysis of your own cultural place in the Australian context and moves toward understanding Aboriginal and Torres Strait Islander perspectives on history and contemporary issues in education. You will examine why Aboriginal and Torres Strait Islander children and students have been disadvantaged by the Australian education system. The unit introduces theories in relation to cultural standpoint, decolonisation and race and supports the development of informed approaches for practice in Aboriginal and Torres Strait Islander education.

EUN105 Teaching in New Times

Pre-requisites	Completion of 192 credit points in MV01 Bachelor of Mathematics or SV02 Bachelor of Science; or admission into EU30 Master of Teaching (Early Childhood), EU40 Master of Teaching (Primary), EU50 Master of Teaching (Secondary).
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1, SUM-1

This unit introduces you to new

and emerging configurations of society, culture, economy, politics, and technology -- the 'new times' in which education today is practised. The implications of these new arrangements for education in early childhood, primary, and secondary settings are both widespread and far-reaching. Oftentimes, they are codified in policy. In this unit, you will develop a knowledge of these contemporary and emerging configurations and an insight into programmatic - policy - endeavours to marshal education in their name. Your learning will be informed by advanced disciplinary knowledge drawn from the sociology and history of education, and by the development of research skills applied to education's professional, ethical, and inclusive programs, policies and practices. This is an AQF-level 9 unit.

EUN106 English, Language and Literacies 1: Early and Primary Reading

Credit Points	12
Campus	Online and Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

The Early Years Learning Framework and Primary English curriculum provide key contexts for the development of literacy skills and knowledges. Literacy is an area of concern for all early childhood and primary teachers, and comprises the largest proportion of daily learning. In

current times it is vital for all learners to understand and work with texts across a variety of modes, therefore oral language, print reading and writing are key components of this unit. There will be a focus on the teaching of phonics, speaking (oral language), listening, reading fluency, reading comprehension, viewing and assessment of these vital English skills, drawing on current learning frameworks and curriculum documents. Elements of this unit interconnect with EUN201. A further aim of the unit is for you to develop your own academic, personal and professional literacy capabilities.

EUN107 Mathematics and Numeracy 1

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

The development of mathematics knowledge, skills and applications across a wide range of situations is critical for your development as an early childhood or primary teacher. Mathematics knowledge and skills are included in your course because you will develop theoretical and practical knowledge to support learners as they learn to become numerate. This unit provides you with the foundations of the Australian Curriculum: Mathematics - Number and Measurement strands. Dispositions for

Units

learning in early numeracy is explored in the Early Years Learning Framework and the Queensland Kindergarten Learning Guideline. You will develop your confidence and capacity to teach Number and Measurement and their interconnections with other curriculum areas, educational contexts and wider society.

EUN108 Science Curriculum and Pedagogy

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

Science is necessary for understanding the world around us. From birth onwards, children actively explore their environment and try to make sense of their world. You will enhance your content knowledge, particularly in the areas of biology, chemistry, physics and earth and space science, through your participation in inquiry-based and hands-on learning activities. This will be integrated with pedagogical and curriculum knowledge to enhance your repertoire of instructional approaches, and to develop your pedagogical content knowledge for teaching to all learners. This unit will build on theories of teaching and learning from previous units including literacy, numeracy, and digital literacies, and will provide you with the knowledge and skills to develop and implement age-appropriate science learning

experiences. If you selected Science as your primary specialisation, it is recommended you take *EUN303: Science Primary Science Specialisation 1* alongside this unit.

EUN109 Inclusive Teaching for Diverse Learners

Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP4 Online - 6TP4

Within the current policy and legislative context in Australia, teachers are required to respond to the needs of diverse learners and offer support through a multi-tiered response model, which integrates Quality Differentiated Teaching Practice and levels of adjustments for diverse groups of learners. The Australian Curriculum and The Early Years Learning Framework have been designed to enable flexibility and to ease adjustments to facilitate access using the principles of Universal Design for Learning, to meet the needs of all learners. This six-week unit will develop your understanding of the fundamental concepts underpinning international and national policy and legislation, and your ability to apply inclusive teaching strategies across all educational contexts, to cater for diversity, including learners with disabilities and gifted and talented learners.

EUN110 Teachers as Leaders and Entrepreneurial Thinkers

Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP4 Online - 6TP4

Teachers require knowledge of leadership types, leadership styles and approaches as a framework for working collaboratively and optimally with a diverse range of people, communities and online professionals. Understandings of how management structures impact on programs and service provision shows how and why organisations function in particular ways. These leadership and management insights enable you to participate effectively as part of a team of staff and to influence and lead decisions in early childhood settings and schools for children, families, staff and the community. This six-week unit provides you, as a potential leader in education, and in your career as a teacher, with knowledge of entrepreneurial education, and develop an entrepreneurial mindset which will enable you to develop these qualities in your students and in your organisation. It will aid understanding of legislative, administrative and organisational policies and processes required for teachers and leaders.

EUN111 Arts, Design and Technologies Education

Anti-requisites	EUN205, EUN206
-----------------	----------------

Units

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

EUN112 Child and Adolescent Development and Trauma Awareness

Pre-requisites	Completion of 192 credit points in MV01 Bachelor of Mathematics or SV02 Bachelor of Science; or admission into EU30 Master of Teaching (Early Childhood), EU40 Master of Teaching (Primary), EU50 Master of Teaching (Secondary).
Anti-requisites	EUN102 and EUN252
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1, SUM-2

This introductory unit provides you with knowledge about major theories of child and adolescent development as well as the theory and neuroscience underpinning complex trauma (abuse, neglect, family violence etc) on the experience of learners. The unit focuses on a range of developmental theories from birth to adolescence. Through engagement with relevant theories and research, you will develop the ability to analyse and synthesise ideas about child and adolescent development and the impact of complex trauma on children and adolescents' behaviour and learning. This foundational knowledge will be applied in curriculum units throughout your degree program that focus

on how teachers interpret and respond to a child/adolescent's individual characteristics and abilities in the planning and implementation of appropriate educational opportunities.

EUN113 Inclusive Teaching for Diverse Learners

Anti-requisites	EUN103, EUN109
Credit Points	12
Campus	Kelvin Grove and Online

EUN160 Professional Experience: Introduction to Professional Practice

Pre-requisites	EUN120 (EUN120 can be enrolled in the same teaching period as EUN160) or EUN111 or EUN106 (EUN106 can be enrolled in the same teaching period as EUN160)
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2

Online
- SEM-1, SEM-2

This unit prepares you for your first professional experience and planning for learning. You will develop planning skills to construct lesson plans that include learning goals and a range of teaching strategies. The unit will include planning for classroom management, strategies to support student engagement and a focus on planning for comprehension, text knowledge and literacy. The unit will also include verbal and non-verbal communications strategies to support student engagement in an educational setting. In preparation for placement, you will learn about system, curriculum and legislative requirements for working in educational settings. The unit incorporates a 15 day professional experience in a primary or secondary school setting.

EUN201 English, Language and Literacies 2

Pre-requisites	EUN106 or CRN650 or EAN651
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

The Early Years Learning Framework and Primary English curriculum provide key contexts for the development of early literacy skills and knowledges. Knowledge of how language and semiotics are used to achieve different purposes for different

audiences across a variety of modes and media is a high priority in English curriculum. This unit will help you set learning goals that provide achievable challenges for students of varying abilities and characteristics, especially EAL/D students (including Aboriginal and Torres Strait Islander students). You will develop your knowledge about purposes, textual features and structures of text types; how children develop skills in using written language; and how to design teaching strategies and use resources to scaffold successful application of English literacies.

EUN202 Mathematics and Numeracy 2

Pre-requisites	EUN107 or EAN650
Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-1 Online - SEM-1

You will explore and continue to build your knowledge and skills to use the strands and their associated topics across a wide range of situations and contexts to enhance your development as a teacher. This focus is included in your course because you will need to teach children how to become numerate and be able to make sound decisions in their lives. This unit integrates the knowledge and skills developed in the first mathematics and numeracy (EUN107) unit to provide you with the foundations of strands

of the Australian Curriculum: Mathematics - geometry, algebra, statistics and probability. It seeks to build your capacity to recognise the numeracy demands across a range of contexts to assist all children to identify the interconnectedness of mathematical knowledge and its application in everyday life.

EUN203 Wellbeing, Health and Physical Education Curriculum Studies

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This early childhood and primary wellbeing, health and physical education unit will equip you with professional knowledge, skills and dispositions for understanding pedagogically appropriate ways to implement child wellbeing, health and physical education (HPE) in before-school and primary school contexts. In addition, you will engage with and apply health and physical development related principles from the Early Years Learning Framework (EYLF) for children aged birth-5 years, and the Australian Curriculum Health and Physical Education: Foundation to Year 6. The unit presents a clear case for adopting evidence and inquiry based principles, policies, and practices to provide relevant, engaging, contemporary, physically active, enjoyable and developmentally

appropriate learning experiences for children aged birth-12 years. Work in this unit will be added to your eportfolio that you started in EUN101.

EUN204 Humanities and Social Sciences Curriculum Studies

Credit Points	12
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - SEM-2 Online - SEM-2

This unit assumes familiarity with the structure and intent of the Australian Curriculum (F-6), the Early Years Learning Framework and the Queensland Kindergarten Learning Guideline. This unit focuses on the teaching/learning approaches and curriculum documents associated with Humanities and Social Sciences (HASS). There is an emphasis on the links between the theories informing history, geography and civics education and the disciplinary basis of such subjects. The unit will develop your knowledge of the relevant curriculum documents and pedagogy to teach key concepts, content and skills in history, geography, civics, economics and business in early childhood and primary school settings. An integrated inquiry approach is used to develop students' critical and creative thinking skills and to enable them to be proactive and informed citizens. You'll participate in assessment marking and quality assurance processes and learn how to deal with parents/carers about

assessment issues.

EUN205 Arts Curriculum

Credit Points	6
Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - FP03A Online - FP03A

This unit provides you with foundation skills and knowledge to teach the Arts, including dance, drama, media arts, music and visual arts. The Arts traditionally and historically play an important part in early childhood and primary education with their potential to inspire children to reach their creative potential and to enrich their experiences in before-school and primary school contexts. This unit is about the social, emotional, cultural and educational importance of the Arts. Teaching and learning in the Arts requires ongoing construction and reconstruction of new knowledges about learners, learning and learning contexts. Relevant theories, principles and philosophies will be considered and analysed, and form the basis for developing quality Arts programs in schools and before-school settings. At this point in the course, you'll consider the role of the Arts disciplines in education, as well as the Arts role in teaching and learning about other key learning areas.

EUN206 Design and Technologies

Credit Points	6
---------------	---

Campus	Kelvin Grove and Online
Availabilities	Kelvin Grove - 6TP2 Online - 6TP2

This unit develops your knowledge of the "Technologies" Learning Area of the Australian Curriculum and the associated pedagogy required to teach this in primary and early childhood settings. You'll learn how to develop design and computational thinking in future students, enabling them to create designed solutions to address authentic problems and opportunities. Practical experiences and communities of practice development are important features of the unit and you'll become aware of the nature of technology and technological literacy and how it connects with the knowledge and skills developed in mathematics, science and digital literacies units. You'll explore and develop skills to teach the Technologies learning area in early childhood and primary education. You'll learn how to teach students to use critical and creative thinking in design processes, develop and evaluate technologies that create solutions to complex challenges, contributing to sustainable patterns of living.

EUN211 Understanding Adolescent Learners

Credit Points	12
Campus	Online
Availabilities	Online - SUM-1

This unit further develops your
